Tender Coverage :	Sole Agency [?]
Categories :	▪ 22000000 - Building and Construction Machinery and Accessories ▪ 30000000 - Structures and Building and Construction and Manufacturing Components and Su
Regions:	▪ West Coast
Required Pre-qualifications :	*None*
Contact :	DOC Procurement Team tenders@doc.govt.nz N/A

Overview

The Department of Conservation (DOC) has a future procurement opportunity for undertaking physical works at Hannahs Clearing, Haast fo protection of a legacy industrial landfill which is at risk from coastal erosion. This is an opportunity for capable and experienced contractors participate and contribute in our efforts of protecting the environment and a remote West Coast community.

To achieve protection of the eroding landfill, a rock wall along ~285m section of the beach is proposed and will comprise of the following:
(a) Removal of Existing Material on beach to Waste: Remove eroded waste and dispose off responsibly where possible (recycling opportuniti be identified). Waste is non-contaminated and includes timber, car bodies, other predominantly steel industrial waste.
(b) Rock Supply and Construction of Rock Wall Coastal Protection: Delivery of materials from suitable supplier of Quarry Rock, and the construction of a rock wall as per coastal engineer's design and specifications.
(c) Liaise with local community noting there is a likely element of community engagement where local support may be required (for exampl access to the site may be required through private properties).

This project is addressing an ongoing erosion issue with urgency, the Department encourages suppliers who have prior experience undertak earthworks, hauling and construction in a coastal environment to register their interest. The construction will require machinery such as excavators and dumper trucks for the removal of waste, excavation of wall footing, carting of waste and delivery of rock.

We are anticipating going to market for a main contractor by the end of February 2025. We are expecting physical works to start by mid Q2

RFx Documents and details will be notified to the interested suppliers via GETS.

DOC is not taking questions at this time. Future Procurement Opportunities are to advise the market of potential upcoming opportunities wh may or may not be progressed. If the project is progressed, you will be notified. Any further information about this opportunity will be avail GETS if/when we go to market
