## Further submission points

Raw FS number	Related Submission Point	FS Decision requested	SupportOppose	Reasons
---------------	--------------------------	-----------------------	---------------	---------

---

---

FS81.1	S473.002	Allow	Support	Mining in SNAs and ONLs to be prohibited. West Coast councils have had 32 years to map the SNAs and ONLs in their areas, so there is no credible excuse for further procrastination. Likewise, mining on PCL to be prohibited. Mining beneath PCL may be a discretionary activity on condition that all associated infrastructure is off PCL and there is no impact at any stage on the overlying PCL.
FS81.2	S473.003	Allow	Support	Fully support this submission and the reasoning behind it. We are very fortunate to be blessed with these lowland forests, coastal forests and wetlands on the Coast.

---

---

FS81.3	S473.016	Allow	Support	<p>Buller and Westland need to be penalised for failing to carry out their statutory duties to map all SNAs and ONLs in their territories over the past 32 years.</p> <p>No credible excuse for the delay. Only cowardice and lack of political will.</p>
FS81.4	S473.004	Allow	Support	<p>MNZs should be deleted, and all mining consent applications to be publicly notified.</p> <p>All applications for coal, natural gas or petroleum extraction to be subject to impacts on climate change assessments.</p>

Allow

Support

Fully support the reasoning behind this submission. The importance of indigenous ecosystems, especially wetlands and forests, in sequestering carbon, and purifying the air and water cannot be overstated. The TTPP must provide for active care and protection of wetlands and forests in the light of climate change. That is a statutory requirement for councils throughout NZ.
