Subject:	Submission for 1641 Kaniere-Kowhitirangi Road, HOKITIKA

Follow Up Flag:	Follow up
Flag Status:	Completed

This submission is being written in regards to our family property 1641 Kaniere-Kowhitirangi Road, RD1, Hokitika.

We have been made aware that our property has been marked with a Silent File - Wāhi Tapu.

We strongly disagree with how this has been marked without any explanation to landowners.

Our property is marked in such a way that we cant even know or look up information and this is unlawful and not right.

Being that we can't look up the information anytime then how can we be sure that nothing will be slipped in or changed dishonestly at a later date without our knowledge.

We don't feel that the consultation process has really been a fair.
There has been no consultation to the landowners directly about what was coming and what was happening to their land.
The only meetings available have been with the community involved and no one has really had definitive answers.

When requesting information through the email address given we were not given correct answers and told to contact Paul Madgwick ourselves we feel the Iwi representative should of gone to any property they are marking significant for Maori and explained why they are marking it significant and the expectations of the landowners also to show landowners evidence of what they are claiming.

Our land and surrounding farms is marked as a silent file we wish to know why?

We want to know what they are claiming we also understand there are no rulings showing for the land we own so we can go Status Quo. However we would like written assurance that future changes or rulings will not happen without landowners consultation.

Our family have owned and lived on the farm for 106 years and never found any evidence of maori activity.
