

SUBMISSIONS ON TE TAI O POUTINI PLAN Under Clause 6 of the First Schedule of the Resource Management Act 1991

To: West Coast Regional Council

By email: info@ttpp.nz

Submitter: BRM Developments Limited

Address for Service: Tai Poutini Resources Ltd

PO Box 257

Greymouth 7840

Jorja.hunt@tprl.co.nz

1. Submitters

- 1.1 On behalf of BRM Developments Limited (the submitter), we submit on the Proposed Te Tai o Poutini Plan.
- 1.2 The submitter could not gain an advantage in trade competition through this submission.
- 1.3 The submitter owns multiple land holdings in the West Coast Region, and in addition has numerous mining permits, resource consents, and other lawfully established and operating activities.
- 1.4 The reasons for the submission and the relief sought are set out below and comprehensive provision by provision detail is included in the attached table in the template provided by the West Coast Regional Council.
- 1.5 The suggested revisions do not limit the generality of the reasons for the submission.
- 1.6 The submitter wishes to be heard in support of this submission.
- 1.7 The reasons for the submission and the relief sought are set out below.
- 1.8 The submitter will consider presenting a joint case with others presenting similar submissions.

Date: November 2022

Project: Phoenix Mining Limited – TTPP Submission

- 1.9 The specific provisions which this submission relates to are:
 - 1.9.1 Whole Plan
 - 1.9.2 Introduction Description of the Districts
 - 1.9.3 How The Plan Works Minerals Extraction Zone
 - 1.9.4 Definitions
 - 1.9.5 Strategic Direction Overview
 - 1.9.6 MIN O1
 - 1.9.7 MIN O2
 - 1.9.8 MIN O3
 - 1.9.9 MIN O4
 - 1.9.10 MIN O6
 - 1.9.11 NENV 03
 - 1.9.12 NENV O4
 - 1.9.13 POU P10
 - 1.9.14 Ecosystems and Indigenous Biodiversity
 - 1.9.15 ECO O2
 - 1.9.16 ECO O4
 - 1.9.17 ECO P2

- 1.9.56 MAPS/ZONING REZONE REQUEST

2. Background to the submission

2.1 BRM Developments Limited hold a number of mining, exploration permits and resource consents at the lanthe Forest which is owned by Ngai Tahu Forestry and have been operating in the area for approximately 10 years. Their Mining Permit MP52010 has recently been extended until 2030 and their other Mining Permit MP54079 is currently awaiting a decision on the extension. The extent of the alluvial gold field is a little unknown given the geology present such as the glacial outwash channels. The proposed mineral extraction zone will therefore allow for further mining to developed in close proximity to the current mining. A map of the submitter's interests is shown in **Attachment A**.

3. Summary of submission

- 3.1 The submitters have carefully considered the Proposed Plan and are supportive of a number of provisions which generally align with the provisions that the submitters were consulted on during the pre-notification phase of the Proposed Plan development, in particular the inclusion of the Minerals Extraction Zone over the lanthe Forest. However, a number of provisions have been included which were not consulted upon, and which affect the application of the provisions which were consulted on.
- 3.2 The submitter considers that the Proposed Plan does not entirely give effect to the enabling framework set by the recent West Coast Regional Policy Statement 2020, which provides for economic development and activity, while also seeking to protect the environment.
- 3.3 The submission seeks specific relief to ensure there is a consenting pathway for the submitters' current and future alluvial mining operations, and recognition of the significance of the mining industry to the West Coast Region as it underpins economic and social wellbeing. Mining and the industries which support it provide job stability and high wage employment, retention of talent and people, foster social connections and are an absolutely vital component of the West Coast community. The Proposed Plan needs to support this vital industry, as the preceding three District Plans have done for the past 15 years.

Project: Phoenix Minerals Limited – TTPP Submission

Date: November2022

3.4 The submission supports aspects of the Proposed Plan which recognise the importance of the mining industry and seeks amendments to aspects which are problematic or restrictive.

4. Reasons for the submission

4.1 The specific reasons for each submission point on specific provisions are included in **Attachment B**.

5. Relief sought

- 5.1 The specific relief sought is enclosed in the table attached as **Attachment B** to this submission.
- 5.2 Alternative, consequential, or necessary additional relief to give effect to the matters raised generally in this submission, and to address any matters affected by introduced by national environmental standards and national policy statements.

Date: November2022

Signed on behalf of BRM Developments Limited

Instructions: This spreadsheet template has been made available to assist submitters wishing to make submissions on a significant number of provisions in the Proposed Plan.

If you are using this spreadsheet, please also complete a submission form with the details of the submitter. This can be done by either:

1. downloading and completing a submission form from the Council's website and lodging the from and this spreadhseet via email to info@ttpp.nz; or

2. using the online submission tool accessible from the Council's website to upload this document as a supporting document. If you choose this method, please add one submission point to your online submission and select [General] as the Plan Section and [General] as the Provision.

To add your submission points to this spreadsheet, please scroll to the relevant Plan Section and click the '+' symbol to expand the group to show all of the provisions within that section. In the row containing the provision you wish to submit on, select one of the options from the Support/oppose column (click in the relevant cell and an arrow button will appear that presents a dropdown list). Add the reasons and the decision you seek in the next two columns. Please ensure you add both reasons and decision sought as these are an important part of your submission. If you are asking for a new provision to be added to a section, please include that in the row for the first provision in that section (the spreadsheet does not allow new rows to be added). Similarly, if you wish to make a submission that relates to a whole section of the Plan, please include that in row for the first provision in that section.

If you require any assistance with using this spreadsheet, please contact the District Plan team at info@ttpp.nz.

Include functionl and operational need in ECO - P7 as per relief sought above, and/or amend ECO - R5 as follows:

Discretion is restricted to:

a.Whether there are other regulations impacting the site that have meant

the land is unable to be used for economic rural uses: b.Constraints imposed by functional or operational need of network utilities and critical infrastructure;

c.Effects on habitats of any threatened or protected species;

d.Effects on the threat status of land environments in category one or two of the Threatened Environments Classification;

e.Effects on ecological functioning and the life supporting capacity of air, water, soil and ecosystems;

f.Effects on the intrinsic values of ecosystems;

g.Effects on recreational values of public land; and h.The matters outlined in Policies ECO - P6 and ECO - P7 ; and

i. The functional or operational need for the activity to locate within Support in part The restricted discretionary activity status for indigenous vegetation clearanc the area where indigenous vegetation clearance is proposed to occur.

Support The discretionary activity status for vegetation clearance within the specified Retain as notified.

Support This objective provides for activities to occur, provided adverse effects are av Retain as notified.

Amend NC - O3 as follows:

To provide for activities which have a functional or operational need to locate in the margins of lakes, rivers and wetlands in such a way that the

Support in part This objective recognises the functional need of some activities to occur with impacts on natural character are minimised

Amend NC - P2 as follows:

Provide for indigenous vegetation removal, minerals extraction, exploration and prospecting activities and earthworks within riparian margins of lakes, rivers and wetlands where significant adverse effects on natural character

Support in part This objective recognises the functional and/or operational need of some act are minimised as far as practicable and:

Amend NC - P3 as follows:

Provide for buildings and structures within riparian margins of lakes, rivers

Support in part This policy recognises the functional need of some activities to occur within ta.Have a functional or operational need for their location; and

Amend NC - R3 as follows:

Indigenous Vegetation Clearance and Earthworks excluding minerals extraction, exploration and prospecting activities, not meeting the Permitted Activity Rules Activity Status Discretionary

Alternatively, amend the definition of earthworks to specifically exclude minerals extraction, exploration and prospecting activities so that these

Oppose in part Because the definition of Earthworks does not specifically exclude minerals e rules do not apply to these activities.

Management Plan as follows:

Management Plan as follows:

1.Introduction
I.Statutory Approvals – status
II.Location
III.Overview of the mineral extraction operations
2.Recieving Environment (address all that are relevant)
I.Climate
II.Geology
III.Hydrology – including presence of lakes, wetlands and waterways
iv.Terrestrial ecology including presence of lakes, wetlands and waterways
iv.Terrestrial ecology including presence of lakes, wetlands and waterways
iv.Terrestrial ecology including presence of lakes, wetlands and waterways
iv.Coastal environment
3.Management of Environmental Effects
I.Terrestrial Ecology (address all that are relevant)
a Native vegetation
b. Native found
c.Significant natural areas
d.Key species
e.Key risks to be managed
f.Any specific species or ecosystem management plans
II.Landscape values
a Landscape values
iI.Landscape values
b.Neighbouring landsuses
