

MINUTE 22 REPLY

Frida Inta S553 Buller Conservation Group S552

2024.05.06

Representing myself and Buller Conservation Group

I did not receive Minute 22, although I have Minutes 21 and 23, saving Minutes in 2 separate archives.

I would like a chance to comment on Minute 22.

Overall I support the planner's recommendations in Minute 22.

However I do not support an inclusion of Economic Development in the TTPP Strategic Directions. It would unbalance the TTPP in favour of economic development at the expense of the other important issues encapsulated in Section 5: Purpose of the RMA . Economic development is an issue particularly important to most West Coasters, but no matter how important it is it cannot override other considerations under the RMA to produce a biased district-wide plan.

NENV - P2

- SNA project has not completed in the Buller.
- I am concerned at P2(b). SNAs are intended to protect the indigenous value within, so how can subdivision, use and development then be allowed within? Any deviation from full protection of SNAs needs to be addressed in the appropriate chapter, being ECO.
