

## **2 Sturge street Cobden submission hearing 17th July 2024**

They are of our neighbors storm water pipes that drain into our property. This was requested by yesterday's panel.

There are roughly eight stormwater pipes that drain out into our property from neighboring properties.

There are two photos of where the stormwater drains away from ours to behind 4 sturge street and one of where water runoff enters our property from the council back drain that runs parallel to the gun emplacement walkway.

Kind regards  
Glen Scrivener
