Schedule XXX

A number of the rules within the SASM Sites and Areas of Significance to Māori - Ngā Wāhi Tāpua ki te Māori chapter require certification to confirm if an activity meets the conditions of the rule and falls within the permitted activity rule. Where certification is not achieved, the activity will become a Discretionary Activity.

The certification process will be undertaken by an authorised representative of the relevant Poutini Ngāi Tahu Rūnanga.

The table below sets out the criteria that will be applied to the certification process. More information on the criteria can be found in the Tangata Whenua section of the Plan.

Criterion	Why this criterion is important to assess against Schedule 3 Values	How this criterion is used to measure against the specific SASM rules
Kaitiakitanga	Poutini Ngāi Tahu value that includes having the intergenerational responsibility for ensuring resources are managed in a manner beneficial to the resource.	Review the proposed activity against the listed values of the area or site (set out in Schedule 3) to determine if natural resources will be protected or managed in a way beneficial to the values at the site, including ensuring resource availability for future generations.
Tino Rangatiratanga	Poutini Ngāi Tahu value that involves having the mana to determine how a resource is to be used and managed, and by whom. This value is about recognising the relationship of Poutini Ngāi Tahu within the site and their ability to be actively involved in decision making processes.	Review the proposed activity against the listed values of the area or site (set out in Schedule 3) to determine if the proposed activity will impact the relationship of Poutini Ngāi Tahu with the values associated with the site.
Mauri	Poutini Ngāi Tahu value that involves preserving the physical and spiritual health/life force of the environment.	Review the proposed activity against the listed values of the area or site (set out in Schedule 3) to determine if the activity will maintain or enhance the mauri of the site.

Mahinga kai	<u>Poutini Ngāi Tahu practice that involves the gathering of food and other natural resources. It includes the social and educational elements as well as the process of gathering of natural resources.</u>	<u>Review the proposed activity against the listed values of the area or site (set out in Schedule 3) to determine if the activity will adversely affect mahinga kai, which includes use and access to mahinga kai.</u>
Ki Uta Ki Tai	<u>Poutini Ngāi Tahu principle that reflects the interdependent nature and function of the various elements of the environment within a catchment.</u>	<u>Review the proposed activity against the listed values of the area or site (set out in Schedule 3) to determine if the activity will adversely affect the whenua surrounding the site or any nearby waterways.</u>
Wāhi tapu	<u>Poutini Ngāi Tahu value that indicates an area of sacredness or restriction.</u>	<u>Note any Wāhi Tapu values on the site and if the activity will be carried out according to tikanga and kawa to determine if there are adverse effects.</u>
Taonga	<u>Poutini Ngāi Tahu value that indicates a site or resource highly prized and important. Taonga are treasures to be protected.</u>	<u>Review the proposed activity against the listed values of the area or site (set out in Schedule 3) to determine if the activity will adversely affect the identified taonga.</u>

Advice Note: upon receiving certification from the authorised representative of the relevant Poutini Ngāi Tahu Rūnanga, the applicant must provide the certification to the relevant District Council at least 10 working days prior to the activity commencing.
