Variation being submitted on:	Variation 2 – Coastal Natural Hazards Mapping
My submission:	<p>The maps contain significant errors.</p> <p>There is no data verification in relation to humps and hollows and LIDAR.</p> <p>The modeling assumes some Sea Level rise, What assumptions have been included and is that acceptable throughout the whole coast?</p> <p>Does the Modeling include earthquake rise of land because this is just as probable as Sea Level rise</p>
I would like the following decision(s) to be made with respect to this Variation:	<p>Fix all errors in the maps eg Sea being included and parts of rivers being excluded when adjoining land is included.</p> <p>Remove all hump and hollow land from variation as LIDAR is not accurate enough.</p> <p>Add some Earthquake assumptions</p> <p>Verify whether the Sea level assumptions are appropriate as some parts of the coast will be rising and falling naturally in respect tom the MHTL</p> <p>The proposed variation Must not proceed until the proposed mapping is accurate and relevant to the situation in each specific area of the coast.</p>
