My submission: I fail to see how information as at a specific date, ie today for example, exaggeration excused, can form a decision 20, 30, 50 years away. The natural environment is a living beast. The proposal is at best speculation, even if it includes specialist, (expert), advice.
Whilst not suggesting the word scaremongering, the proposal is hiking up insurance premiums, and devaluing property values - something which community Mums and Dads rely on for, among other things, future security. Consider reverse mortgages for example

I would like the following decision(s) to be made with respect to this Variation: Listen to the community, pay heed to that which they comment upon. This does not mean ignoring specialist advice, however the two need to be read in conjunction

Please indicate if you wish to speak to your submission: I do not wish to speak to my submission – (please note that with this option you will receive less correspondence in relation to the hearings but you can keep up to date on the TTPP website)
