My submission: Variation 2, Coastal hazards 2.
Lengthen the timeframe for rebuilding after AF8 event from 5 years to ten, as there will be a shortage of labour and materials for years after an event of this size which will impact the length of the South Island at least. South Westland in particular is likely to present even more difficulties than other more connected districts. Just look at the Christchurch rebuild debacle to illustrate the possible time needed. I am primarily concerned with my residence at Okarito, but feel all coastal areas will face the same troubles.

I would like the following decision(s) to be made with respect to this Variation:

Lengthen the timeframe for rebuilding after AF8 event or similar from 5 years to ten.
