

Are you submitting as an individual, or on behalf of an organisation?: Individual

First Name: Paul

Last Name: Drake

Organisation (if applicable): None

Trade Competition (please choose whichever applies): I/we could not gain an advantage in trade competition through this submission

If able to gain such an advantage:: My/our submission does not relate to trade competition or its effects

Postal address: PO Box 134
5 Waverley St
Karamea
Buller District

Email address: ekard@slingshot.co.nz

Phone number: 037826987

Variation being submitted on: Variation 2 – Coastal Natural Hazards Mapping

My submission: My Objection to the Variant 2 Natural Hazards Mapping.

First I must point out that my biggest fear is not the physical flooding of my property (which has been assessed as a one in 50 year event) but bureaucratic overreach that we had to endure during the COVID era.

With all due respect I will refuse to have my property tagged and be ordered off my property that I own freehold. I should not have to invoke the New Zealand bill of Rights and the the 1688 Bill of Rights to have my property rights protected.

I attended a meeting last week at the Karamea RSA officiated by Jessica Credmore, Rosalie Sampson and Mallisa of Future Buller. Three of us asked virtually the same question 'where does this agenda coming from?' and Mine was more specific 'Has Local Government New Zealand anything to do with TTPP?' I notice in your literature references are made to 'Local Government', Is that the same entity as LGNZ? I feel this was evaded. Furthermore does the UN Or the World Economic Forum WEF have any input into the above project?

Granted that the environmental reasons TTPP claim to map and zone our area are superficially plausible, however the science of global warming has been challenged organisations Like electroverse.com and The Great Global Warming Swindle by Martin Durkin. Electroverse claim that due to the grand solar minimum we are entering into a mini ice age and it's strange that 'global warming' has now been touted as 'climate change'.

I don't profess to be an expert on climate change but I have very qualified friends and we are of the view that there is a lot of fear mongering. We in Karamea are not an apathetic community we are following events of Kapiti C.A.L.M. and around the world.

I will make myself perfectly clear: I am not against the mapping and identification of risk zones for local council use but I am against any mandatory bullying (via insurance or local body rates) to serve an agenda from an external entity like the UN. ICLEI or the WEF etc.

I would like the following decision(s) to be made with respect to this Variation:

- (1) Do not change the existing laws that have been established by the national RMA act.
- (2) Cut all ties with the World Economic Forum, and all UN. ICLEI* organisations

Thank You

Paul Drake
