

To whom it may concern

I wish to make a submission regarding the new TTPP coastal hazards variation on our property.

Our address is 6 Ives street Héctor, Valuation number 1879032901

We reject your new proposal and conditions you are forcing upon us, we accepted the original Hazard alert over lay with reservation but now you present to us the new one which is approximately 30 meters outside the original. How can you be that far out with all the current technology and the fact we all have surveyed sections, It makes a big difference to our home, going from a 5 year time frame rebuild and a discretionary activity consent. To a 2 year time frame and non complying activity resource consent. Then there is the proposed plan, which is a strong policy of discouraging new development.

Only a few short years ago, we made a decision to stay in this area and built a seawall. As did the council and NZTA. Neighbour's also built a joining wall. We believed that in doing so we would have some protection from the rising sea for some time to come. We had hoped to build a granny flat for our older age. But with your new decision-making this idea is now squashed as is the value of our home going forward. We would like to keep status quo on the existing plan going forward.

The way you are choosing to change things looks to us like pensioner bashing!! Simply wiping the value off our homes.

Please reconsider your proposal

Thank you

Michael and Vivian Nixon
