This has been an undemocratic process. The information was appalling & made out those were finite plans. No consultation was done. Very poor information received.

TIPP plans are impacting on wellbeing of community & it's very existence. This has caused a great deal of stress & suffering.

The plan is skewed to one viewpoint & does not consider other scientific viewpoints.

There is no balanced information and a complete lack of scientific data to back up plans.

There is only modelling that is really at best a guess to what authors of the plan want to happen and is not based on reality.

We have not been informed of any actual measurements and data.

The managed retreat process is a form of social engineering. People have lived here for many generations and can manage

risks. This is overreach. This is bordering on human rights abuse. This is unaffordable and many people will suffer.

I would like the following decision(s) to be made with respect to this Variation:

I would like the TPP plan to be reviewed.

I would like Tink & Taylor section 3.2.2 report, states values have not been used. Why? There also appears to be a lack of consistency that is poor plan writing.

All submitters have the opportunity to present their submission to Commissioners during the hearing process. Please indicate if you wish to speak to your submission

☒ I wish to speak to my submission

☒ I do not wish to speak to my submission

(please note that with this option you will receive less correspondence in relation to the hearings but you can keep up to date on the TPP website)

If any others making similar submissions wish to be heard:

☐ Yes, I would consider presenting a joint case with them

☒ No, I would prefer to present my own individual case
