### My submission:

(Include whether you support or oppose the specific provisions or wish to have them amended, and the reasons for your views.)

Strongly Oppose

We have found the whole proposal  
deceptive because this is not natural  
erosion but man made.  
The information - mapping supplied  
was confusing and deceptive. The data  
is not conclusive nor credible. We found

that the process was set to confuse and was difficult to navigate and the time frame to react and submit was ridiculous and did not allow time to get professional opinion and this has made it difficult to respond - a very deceptive document.

If you are going to allow a one metre rise in sea level over one hundred years you have to include the Alpine fault rupture as per core samples that will increase the land by at least one metre which would make your probability counter active.

(Please feel free to use additional sheets)

I would like the following decision(s) to be made with respect to this Variation:

Taking into account the above this proposal needs to be withdrawn and prior mapping reinstated as this is not natural erosion but man made
