

**APPENDIX 2 – RECOMMENDATIONS FOR SCHEDULE THREE (SHED 3) – SITES AND AREAS OF SIGNIFICANCE TO MĀORI, SASM MAPS AND APPENDICES**

**Schedule Three (SCHED 3) – Sites and Areas of Significance to Māori**

All Sites and Areas of Significance to Māori shown in this Schedule are also shown on the planning maps, which outline each identified site or area.<sup>1</sup>

Where mapped Sites and Areas of Significance to Māori extend in to the coastal marine area, this Schedule only applies landward of the coastal marine area (above mean high water springs).<sup>2</sup>

All waterbodies that are identified as a whole on the planning maps as a Site or Area of Significance to Māori and listed in this Schedule include their active channels, beds, banks and immediate margins where they fall outside the outline on the planning maps. The planning maps are indicative of Poutini Ngāi Tahu relationship with the waterbody.<sup>3</sup>

Unique Identifier	Name	Values	Category <sup>4</sup>	Relevant Permitted Activity Rules
SASM 1	Kahurangi Point	Wāhi tohu	Whā (4)	Temporary Activities <b>Events</b> <sup>5</sup> – Rule SASM – R5, <b>Earthworks, Buildings, Structures - Rule SASM - R6</b> <sup>6</sup>

SCHEDULE 3 (SCHED 3A)

**SCHED 3A: CRITERIA AND PROCESS FOR CERTIFICATION OF PERMITTED ACTIVITIES**

**A number of the permitted activity rules within the SASM Sites and Areas of Significance to Māori – Ngā Wāhi Tāpua ki te Māori Chapter require certification to be provided by Poutini Ngāi Tahu in order to meet the conditions of the rule.**

**Suitably Qualified or Experienced Person (SQEP)**

**The certification process will be undertaken by an authorised representative of the relevant Poutini Ngāi Tahu Rūnanga who has the necessary expertise to assess activities against the criteria, and is therefore a SQEP for the purposes of certification in accordance with this Schedule.**

**Criterion**

**In order for an activity to be able to rely on the relevant permitted activity rule, the SQEP will be required to certify that:**

***“The proposed activity does not give rise to any unacceptable effects on any of the values of the identified SASM recorded in Schedule Three.”***

**General Process**

**The following elements of process support certification:**

- 1. Certification is specific to details of the proposed activity as provided to Poutini Ngāi Tahu;**
- 2. The outcome of the process will be communicated to those seeking to undertake the proposed activity within 10 working days of them providing specific details of the proposed activity to Poutini Ngāi Tahu; and**
- 3. In the event that the outcome of the process is that the SQEP cannot provide certification against the Criterion, then Poutini Ngāi Tahu will advise those seeking to undertake the proposed activity either:**

**(i) the nature of any effects of concern, in order to inform any subsequent process; or**

**(ii) that based on the specific details provided to Poutini Ngāi Tahu the SQEP cannot conclude that there are no effects of concern, which may be due to lack of information to support a definitive conclusion.**

**Optional Criterion and Process for Māori Land**

**The SQEP may determine, in relation to Māori Land, that tikanga applies in the circumstances and that, therefore, the General Process with associated Criterion is inappropriate for the purposes of certification.**

**In such circumstances the SQEP may instead certify that:**

***“The proposed activity will be undertaken in accordance with tikanga.”***

**In such circumstances the process between the parties will also be guided by tikanga.**

Note

More information on Poutini Ngāi Tahu Values can be found in the Tangata Whenua section of the Plan.

APPENDIX FOUR: ACCIDENTAL DISCOVERY PROTOCOLS

Appendix Four: Accidental Discovery Protocols Te Āpiti hanga Tuawhā: Ngā Tikana o te Kite Pokerehū

PRIOR TO COMMENCEMENT OF ANY WORKS, A COPY OF THIS ADP SHOULD BE MADE AVAILABLE TO ALL CONTRACTORS WORKING ON SITE.

Purpose:

In the event that an unidentified archaeological site is located during works, the Accidental Discovery Protocol (ADP) sets out the procedures that must be followed in the event that taonga (Māori artefacts), burial sites/kōiwi (human remains), or archaeological sites are accidentally discovered.

Background:

Land use activities involving earthworks have the potential to disturb material of cultural significance to tāngata whenua. In all cases, such material will be a taonga, and in some cases such material will also be tapu. Accidental discoveries may be indicators of additional sites in the area. They require appropriate care and protection, including being retrieved and handled with the correct Māori tikanga (protocol).

Under the Heritage New Zealand Pouhere Taonga Act 2014, an archaeological site is defined as any place associated with pre-1900 human activity, where there is material evidence relating to the history of New Zealand. It is an offence under s87 to modify or destroy the whole or any part of an archaeological site (known or unknown) without an authority from Heritage New Zealand irrespective of whether the works are permitted, or a consent has been issued under the Resource Management Act.

Protocol:

Immediately following the discovery of any human remains or material suspected to be a taonga, kōiwi or archaeological site, the owner of the site or the consent holder must take the following steps shall be taken:

1. ~~Cease works and secure the area~~ Immediately cease ~~a~~All works **on the site will cease immediately at that place and** within 20m of any part of **around** the discovery **the site, including** shutting down all earth disturbing machinery and stopping all earthmoving activity.
  - ~~Secure the area of the discovery, including a sufficient buffer area to ensure that all sensitive material remains undisturbed;~~
2. ~~Inform relevant authorities and parties~~ Immediate steps will be taken to secure the site to ensure the archaeological material is not further disturbed.

3. Inform the following parties immediately of the discovery:

- The New Zealand Police;
- Poutini Ngāi Tahu;
- Heritage New Zealand Pouhere Taonga;
- The relevant District Council in all cases.

**The contractor/works supervisor/owner will notify the Rūnanga, Council and the Area Archaeologist of Heritage New Zealand. In the case of kōiwi (human remains), the New Zealand Police must be notified.**

3. Wait for and enable inspection of the site

- The New Zealand Police are required to investigate the human remains to determine whether they are those of a missing person or are a crime scene. The remainder of this process will not apply until the New Zealand Police confirm that they have no further interest in the discover.
- A site inspection for the purpose of initial assessment and response will be arranged by the Council in consultation with Heritage New Zealand Pouhere Taonga and appropriate Poutini Ngāi Tahu representatives;
- Following site inspection and consultation with all relevant parties (including the owner and consent holder), the Council will determine the area within which work must cease, until the requirements of this Rule are met.

**4. The Rūnanga and Heritage New Zealand will jointly appoint/advise a qualified archaeologist who will confirm the nature of the accidentally discovered material.**

**5. If the material is confirmed as being archaeological, the contractor/works supervisor/owner will ensure that an archaeological assessment is carried out by a qualified archaeologist, and if appropriate, an archaeological authority is obtained from Heritage New Zealand before work resumes (as per the Heritage New Zealand Pouhere Taonga Act 2014).**

**6. The contractor/works supervisor/owner will also consult the Rūnanga on any matters of tikanga (protocol) that are required in relation to the discovery and prior to the commencement of any investigation.**

**7. If kōiwi (human remains) are uncovered, in addition to the steps above, the area must be treated with utmost discretion and respect, and the kōiwi dealt with according to both law and tikanga, as guided by the Rūnanga. Remains are not to be moved until such time as Rūnanga, NZ Police and Heritage New Zealand have responded.**

4. Recommencement of work

Work within the area determined by the Council must not recommence until all of the following requirements, so far as relevant to the discovery, have been met:

1. Heritage New Zealand has confirmed that an archaeological authority has been approved for the work or that none is required;
2. Any required notification under the Protected Objects Act 1975 has been made to the Ministry for Culture and Heritage;
3. Any material of scientific or educational importance has been recorded and if appropriate recovered and preserved;

~~4. Where the site is of Māori origin and an authority from Heritage New Zealand Pouhere Taonga is not required the Council will confirm, in consultation with Poutini Ngāi Tahu, that:~~

- ~~○ Any kōiwi have either been retained where discovered or removed in accordance with the appropriate tikanga; and~~
- ~~○ Any agreed revisions to the planned works to be/have been made in order to address adverse effects on Māori cultural values.~~

~~5. Resource consent has been granted for any alteration or amendment to the earthworks or land disturbance that may be necessary to avoid the sensitive materials and that is not otherwise permitted under the Plan or allowed by any existing resource consent.~~

**8. Works in the site area shall not recommence until authorised by the Rūnanga, Heritage New Zealand (and the NZ Police in the case of kōiwi) and any other authority with statutory responsibility, to ensure that all statutory and cultural requirements have been met.**

**9. All parties will work towards work recommencing in the shortest possible timeframe while ensuring that any archaeological sites discovered are protected until as much information as practicable is gained and a decision regarding their appropriate management is made, including obtaining an archaeological authority under the Heritage New Zealand Pouhere Taonga Act 2014 if necessary. Appropriate management may include recording or removal of archaeological material.**

**10. Although bound to uphold the requirements of the Protected Objects Act 1975, the contractor/works supervisor/owner recognises the relationship between Ngāi Tahu whānui, including its Rūnanga, and any taonga (Māori artefacts) that may be discovered. Where Rūnanga so request, any information recorded as the result of the find such as a description of location and content, is to be provided for their records.**

**IF IN DOUBT, STOP AND ASK; TAKE A PHOTO AND SEND IT TO THE HERITAGE NEW ZEALAND ARCHAEOLOGIST**
