217. With regard to **HH-R3**, Susan Aitken, on behalf of Poutini Ngāi Tahu, outlined the purpose of their further submissions on this rule, which was to emphasise that heritage is more than just archaeology and includes sites and areas of significance to Māori. She supported the s42A Report recommendation for the rule.

218. Martin Kennedy, on behalf of Westpower, retained his position that addition of "*or*" to the rule would be appropriate, although he did not provide reasons in his written evidence. Mr Kennedy advised that consultation with company representatives indicated that it would not be possible to replace an overhead line without digging a new hole. He considered that the rule was intended to capture fence posts and not posts or poles for network utilities, and that the rule would be unduly restrictive on Westpower activities if the recommendations of the reporting officer were accepted.

219. Stephanie Styles, on behalf of Manawa, in her tabled statement acknowledges the reporting officer's acceptance of their submission point.

220. Amy Young, on behalf of the Director General, in her tabled statement expressed support for the new advice note as worded in the reporting officer's recommendation.

221. Chris Horne, on behalf of the telecommunications companies, advised that the trenching of service connection requires a minimum of 200mm and a "spade width", with subsequent reinstatement of disturbed land. He considered that the level of excavation would be similar for maintaining existing assets as installing new ones.

222. With regard to **HH-R4**, Arlene Baird, on behalf of HNZPT, reiterated that she considered that repositioning and relocation are quite different activities with varying levels of potential impact on heritage values. She noted that repositioning maintains connection to the setting of the heritage item, which is lost when the item is relocated. She advised that Dr Ann McEwan in the pre-hearing meeting had suggested a cascade of activity status, based on the level of adverse effect, from non-complying for demolition to discretionary for relocation and restricted discretionary for repositioning. Ms Baird noted her agreement to the approach recommended by Dr McEwan, which she considered would appropriately give effect to the objectives and policies of the chapter.

223. Martin Kennedy, on behalf of Westpower, considered that if the activity status were to migrate to discretionary, then policy HH-P6 should incorporate the additional matter of discretion requested by Westpower.

224. Amy Young, on behalf of the Director General, in her tabled statement expressed support for the new advice note as worded in the reporting officer recommendation. She also supported the change in activity status to restricted discretionary, and the additional matters of discretion, including in relation to impact on Poutini Ngāi Tahu cultural values.

225. With regard to **HH-R5**, Amy Young, on behalf of the Director General, in her tabled statement expressed support for the reporting officer recommendations in response to their submission.

226. Graeme McCarrison, Andrew Kantor and Colin Clune, representing the telecommunications companies, indicated that a best practice guide for installing ultra-fast broadband into

heritage buildings developed by heritage specialists in consultation with HNZPT was a good example of how to manage potential adverse effects of RSI on heritage items. They considered this type of document to provide for a more efficient resource consent process, while appropriately managing effects on heritage values.

227. Chris Horne, on behalf of the telecommunications companies, queried whether compliance with a rule could be determined by a third party, and therefore whether the amendment recommended by the reporting officer regarding approval from HNZPT would be *ultra vires*. He recommended alternative wording that would allow for consultation with HNZPT.

228. With regard to **HH-R6**, Arlene Baird, on behalf of HNZPT, reluctantly accepted the reasoning and recommendation of the reporting officer in relation to splitting this rule. She noted that combining the activities in the rule was not standard practice or user friendly, but she did not consider that it would have a direct impact on heritage outcomes and accepted the position on that basis.

229. Martin Kennedy, on behalf of Westpower, noted support for the reporting officer recommendation to accept their submission point referencing energy and sought that the change be reflected in decision, but maintained that the rejected submission point seeking an additional matter of discretion should be accepted to ensure the matter is appropriately recognised and provided for in decision.

230. Stephanie Styles, on behalf of Manawa, in her tabled statement acknowledged the reporting officer's acceptance of their submission point.

231. With regard to **HH-R7**, the evidence of Arlene Baird, on behalf of HNZPT, as described in relation to HH-R4 is also relevant to this rule.

232. Susan Aitken, on behalf of Poutini Ngāi Tahu, noted agreement with the s42A recommendation for this rule, which would allow for consideration of Poutini Ngāi Tahu values, and increase historic heritage protection.

233. Amy Young, on behalf of the Director General, in her tabled statement expressed support for the new advice note as worded in the reporting officer recommendation.

234. With regard to **HH-R8**, Stephanie Styles, on behalf of Manawa, in her tabled statement acknowledged the reporting officer's acceptance of their submission point.

235. Amy Young, on behalf of the Director General, in her tabled statement expressed support for the new advice note as worded in the reporting officer recommendation.

236. With regard to **HH-R9**, Arlene Baird, on behalf of HNZPT, reiterated the reasons for requiring non-complying activity status and her strong agreement with the recommendation in the s42A Report to amend the activity status for demolition and destruction of a heritage item from discretionary to non-complying. She also supported the language in policy HH-P7 that made it clear that the activity "*will not be allowed*", except in the circumstances expressed in the policy.

237. Martin Kennedy, on behalf of Westpower, outlined the case for retaining discretionary activity status, rather than migrating to non-complying as requested by HNZPT. He noted there were no changes to objectives or policies to support the change, and that a blanket approach did not consider different circumstances, whether it be Building Act requirements or funding opportunities. He was concerned about the lack of additional methods to assist owners to

retain and maintain heritage items. He considered that the outcome needed to be sustainable for the community. He reiterated that it was the strong view of the TTPP Committee that discretionary status was the appropriate classification. He considered that the change in activity status warranted further analysis, including in relation to objectives and policies.

238. With regard to **HH-R10**, Susan Aitken, on behalf of Poutini Ngāi Tahu, expressed concern with the recommended restricted discretionary rule, as requested by Westpower and Manawa. She referenced discretionary rules INF-R24 – INF-R27, which were not specific to activities located within or affecting historic heritage items and areas, inferring that discretionary status was not too onerous. She noted that new network utility structures within SASM sites and areas are discretionary under SASM-R13. She identified that more work would be required to determine what types of activities could occur, and additional matters of discretion included. In her hearing statement she noted that a solar panel installation is only one example and that there are no parameters guiding the scale of activities that may adversely affect heritage values.

239. Martin Kennedy, on behalf of Westpower, considered that migration of the rule to restricted discretionary status means that an additional matter of discretion is needed that references the functional need and operational need of energy activities.

240. Stephanie Styles, on behalf of Manawa, in her tabled statement reiterated that discretionary activity status was too restrictive and did not give effect to the NPS-REG. She agreed with the amendment of activity status to restricted discretionary, but noted that then HH-R8 and HH-R10 would have the same activity status, so she recommended deleting HH-R10 as requested in the Manawa submission. She supported utilising the matters of discretion from HH-R8, but noted that the s42A Report recommendation for HH-R10 used almost entirely different matters of discretion. She recommended amalgamating the matters restricted for discretion in HH-R8, to cover new buildings, structures and associated earthworks within a historic heritage site or area, and deleting HH-R10.

241. With regard to the requested rule for mineral extraction, Susan Aitken, on behalf of Poutini Ngāi Tahu, noted support for the recommendation of the reporting officer, recognising the variety of mining activities in terms of scale, duration and impact.

Reporting Officer Reply Evidence

242. With regard to **HH-R3**, Ms Easton advised the Panel, in response to questions, that it would be possible to treat historic heritage areas differently than historic heritage items, and differently than archaeological sites, when considering the effects of network utilities. However, she considered that scope was limited to the Westpower submission point S547.179 and the telecommunications companies' submission point S663.036 in relation to this rule.

243. Ms Easton noted that she supported the Westpower submission point S547.148 requesting to add the word "*or*" at the end of clause 1(a) because she considered that it corrected a drafting error. In response to questions from the Panel she confirmed that a power pole replaced in the same location would be permitted under this rule, but would otherwise be restricted discretionary under the new recommended Rule HH-XX, and she considered this to be appropriate.

244. With regard to **HH-R4**, Ms Easton advised the Panel, in response to questions, that the reference to natural hazards in the rule was necessary because emergency powers under s330 of the RMA only apply to certain authorised persons. She advised that the heritage item may

not be owned by the local authority and the local authority may not consider it appropriate to use emergency powers to relocate a historic heritage item owned by another party.

245. With regard to **HH-R9**, Ms Easton provided a section 32AA assessment to accompany her recommendation to change the status of demolition and destruction of a heritage item from discretionary to non-complying. She also responded to a question from the Panel asking if the Plan should require records and photographic recording of heritage items before and during their demolition. She noted that as the activity would be non-complying, this matter could be brought in to a resource consent process. She suggested that an advice note could be an option, which she advised would not have any statutory weight, but would be appropriate given that there are no submission points specific to the matter.

246. With regard to **HH-R10**, Ms Easton advised the Panel that there may be scope in the Westpower submission point S547.185 and the Manawa submission point S438.069 to differentiate historic heritage items, historic heritage areas and archaeological sites when considering the effects of network utilities.

247. Ms Easton responded to questions from the Panel, and the evidence of Susan Aitken, agreeing that there should be a threshold at which RSI activities become discretionary. She provided recommended wording for a new restricted discretionary rule to provide those thresholds, with reference to permitted activity rules in other chapters of the Plan, as follows:

> **Rule HH -RXXX**
>
> **Energy Activities and Infrastructure Activities and associated Earthworks within a Historic Heritage Site or Area identified in Schedule One not meeting Permitted or Controlled Activity Standards**
>
> **Activity Status Restricted Discretionary**
>
> **Where:**
>
> **1. These are Permitted Energy Activities provided for in Rules ENG – R1 – ENG – R5; or**
>
> **2. These are Permitted Infrastructure Activities provided for in Rules INF – R1 – INF – R12; or**
>
> **3. These are Permitted Transport Activities provided for in Rules TRN – R1 – TRN – R6.**
>
> **Matters of Discretion**
>
> **a. The location of the energy or infrastructure activity within the heritage site or area;**
>
> **b. The impacts on the historic heritage values of the site or area;**
>
> **c. Any alternative locations or designs;**
>
> **d. Impacts on amenity, identity and character;**

> **e. Compliance with a conservation plan or report that has been proposed by a suitably qualified heritage professional;**
>
> **f. Relationship with adjoining sites of historic heritage value;**
>
> **g. How effects will be minimised through construction and maintenance; and**
>
> **h. Implementation of any advice received from the relevant Poutini Ngāi Tahu Rūnanga on ways to manage the effects of the activity on cultural values.**
>
> ***Advice Note: Where work is proposed that could modify an archaeological site (regardless of whether the site is scheduled as an archaeological site in Te Tai o Poutini Plan or not) obtaining archaeological authority from Heritage New Zealand Pouhere Taonga (HNZPT) is required before any work starts.***

248. In conjunction with introduction of the new restricted discretionary rule, Ms Easton also recommended amendment to the title of HH-R10 to read as follows:

> **~~New~~ Energy Activities and ~~New~~ Infrastructure Activities within a Historic Heritage Site or Area identified in Schedule One not provided for in another rule.**

Hearing Panel's Evaluation

249. With regard to **HH-R1**, the Panel had identified some minor amendments that are recommended to be made using the RMA First Schedule, Clause 16 for the purposes of consistency and clarity. The Panel agree with the recommendation of the reporting officer to add an advice note in response to the submission points of The O'Conor Institute Trust Board and Frank and Jo Dooley regarding management of the interior of heritage buildings. The Panel support the evidence of HNZPT that explained the matter of date stamping, and wording for an additional clause to the rule that improved on the submission wording, with an accompanying advice note. While the Panel accept that date stamping may be difficult to monitor and enforce, it is useful guidance that has regard to the HNZPT Act and responsibilities of HNZPT, in accordance with section 74(2)(b)(iia) of the RMA.

250. With regard to **HH-R2**, the Panel agrees with the recommendation of the reporting officer to accept the Westpower submission point that amends the title of the rule to accommodate energy supply, however the Panel considers that recommendations on Policy HH-P5 provide for ongoing adaptive reuse, which is likely to be reliant upon more than just energy supply upgrades. While the telecommunications companies did not submit on HH-R1, the Panel received evidence from their representatives that highlighted similar issues to those of Westpower with regard to enabling connections to heritage buildings to enable their ongoing use. The Panel therefore prefer the term "*service connection*" which allows for these types of connections that enable adaptive reuse of heritage buildings. The Panel also amend the rule to incorporate recommendation on the definition of '*heritage professional*' so that it reads '*suitably qualified or experienced heritage professional*'. The Panel has made some minor amendments to the rule.

251. With regard to **HH-R3**, the Panel has identified some minor amendments that are recommended to be made using the RMA First Schedule, Clause 16 for the purposes of consistency and clarity. The Panel generally agrees with the recommendations of the reporting officer, including the use of an ADP commitment process to implement the rule, with associated definition, because it provides an opportunity for the council and resource users to be reminded of the contents of the ADP. The Panel has considered whether network

utilities should be treated differently depending on the nature of the historic heritage affected, but find this to be unnecessary. The Panel consider that the addition of clause 3) requiring adherence to the standards in EW-R1 provides for the situations raised by Westpower and the telecommunications companies regarding ability to undertake earthworks in order to connect services to heritage items and enable adaptive reuse. The parameters in EW-R1 would allow for installation of new services, not just maintenance of existing services, and would allow for replacement of electricity poles. Provided clause 1) is adhered to and the ADP is followed, the Panel consider that this should be sufficient to address the matter without requiring resource consent for these types of activities.

252. With regard to **HH-R4**, the Panel accepts the advice of HNZPT and Dr Ann McEwan that repositioning should be restricted discretionary and relocation should be discretionary based on the differing scale and significance of adverse effects on historic heritage. The Panel generally supports the recommendations of the reporting officer, with the exception that the new clause e) has been reworded to provide for consideration of impacts on values of a SASM and advice received from Poutini Ngāi Tahu on how to manage identified impacts. The Panel agrees with BDC that the notification clause should be deleted, and do not favour the recommended amendment put forward by Ms Easton. The Panel appreciates the concerns of the community regarding ability to input to resource consent processes, but relies on sections 95-95G of the RMA to guide Council decisions regarding notification rather than direction in the Plan. The Panel consider this appropriate in particular because relocation is no longer recommended to be part of the rule.

253. With regard to **HH-R5**, the Panel agree with the reporting officer's recommendation regarding addition of the advice note regarding archaeological authority from HNZPT, but prefer the wording provided by Chris Horne for the telecommunications companies in relation to consultation with HNZPT. The Panel agree with Mr Horne that the alternative wording recommended by Ms Easton would constitute third party approval, which is a matter that has been thoroughly canvassed in the SASM Recommendation Report. The Panel agree with the reporting officer that it would not be sufficient to rely on HH-R3, which only covers the earthworks component, in response to BDC. HH-R5 enables visual matters to be considered and factors associated with connection to the building, which the Panel consider are matters relevant to protecting heritage values. However, the Panel do not agree that reference to '*energy activities'* is necessary, given that '*infrastructure*' is a defined term that covers electricity connections.

254. With regard to **HH-R6**, the Panel agree with the reporting officer's recommendations, with the exception that the Panel prefer "*service connection*" to "*supply of energy*" in the title of the rule.

255. With regard to **HH-R7**, the Panel agree with the reporting officer's recommendation that the rule should be discretionary, but consider that it should only apply to relocating heritage items, following the advice of Dr McEwan and HNZPT, in line with recommendation on HH-R4. The Panel also agree with BDC that the notification clause can be deleted, and therefore section 95-95G of the RMA will guide notification decisions. The Panel accept that there will be a high degree of public interest in the relocation of historic heritage items, and consider it appropriate that the Councils work with their communities when these matters arise, which may or may not involve public notification in every instance. The Panel considered the amended wording of the notification clause recommended by Ms Easton, but prefer that the full array of notification options provided by the Act are available to the Councils, to be considered in the circumstances of each case.

256. With regard to **HH-R8**, the Panel agree with Manawa that there is a discrepancy between the status of new buildings or structures within a historic heritage area and new infrastructure, including regionally significant infrastructure, when the considerations are similar. The Panel also agree that, given the reporting officer's stated intention to rely on the matters of discretion in HH-R8, it is sensible to include "*and infrastructure*" in the title of the rule, and incorporate other matters identified in relation to infrastructure and recommendations provided for amended HH-R10 by the reporting officer. The Panel prefer the blended recommendations of Stephanie Styles, rather than the new rule HH-RXX proposed by the reporting officer. The Panel consider that this is more efficient for the structure of the Plan. In making this recommendation, the Panel has considered the evidence of Susan Aitken on behalf of Poutini Ngāi Tahu and agree that where the activity takes place within a SASM site or area, the provisions of that chapter will classify the activity as discretionary, reflecting the additional values present. The Panel adopt the advice note because, although the Director General did not submit on this rule, the advice note has no weight in decision-making but is helpful to the Plan user and provides for consistency with other rules.

257. With regard to **HH-R9**, the Panel accept the advice of Dr McEwan and HNZPT regarding the appropriate classification of this activity as non-complying, to reflect the degree of difference in scale of effect between demolition and destruction of a historic heritage item or area, compared with relocation, and with repositioning of historic heritage items. The Panel have adopted activity classifications based on this differentiation in effect. The Panel are aware that the TTPP Committee were strongly in favour of a discretionary activity classification. Focus of the Panel has been on ensuring that the objectives and policies provide an appropriate pathway for demolition or destruction of a historic heritage item in particular circumstances. Policies HH-P1 and HH-P7 will be particularly relevant when applications are considered for demolition or destruction. The Panel have also had a focus on making the rule framework enabling of adaptive reuse of historic heritage items and areas. The Panel have been mindful of the challenges for owners of historic heritage, and have sought to strike a balance, whilst ensuring protection of historic heritage from inappropriate subdivision, use and development.

Hearing Panel's Recommendation

258. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends accepting or accepting in part the submission points footnoted below, and recommend the following changes to the **Historic Heritage – Ngā Tuku Ihotanga Rules**:

Historic Heritage Rules
Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.
Permitted Activities
HH - R1 Repairs and Maintenance of a Historic Heritage Item identified in Schedule One

Activity Status Permitted

Where:

1. There are no changes to the extent, floor levels, form, proportion and scale of the item;

2. There are no changes to the design, texture, or form of the fabric;

3. Use of materials ~~other than those that~~[66] are the same as the original, or the most significant fabric, or the closest equivalent; ~~or~~[67]

4. There[68] is no damage to the building or structure as a consequence of affixing scaffolding;

5. new materials, works or reconstructed elements are date stamped to indicate the time of their installation.[69]

Advice notes:

1. This rule applies only to the exterior of the heritage item, except where the 'Extent' in Schedule One includes 'fixtures and fittings'. The rule applies to 'fixtures and fittings' for those specific scheduled items, including interiors.[70]

2. Date stamping is a term used in heritage conservation to mean marking with a date, not necessarily a stamp, and is important to clearly distinguish replicated or introduced features and new areas of fabric from heritage fabric, so that changes to the heritage item can be readily understood in the future. The dating of new or introduced fabric may be undertaken by a number of permanent means. It is recommended that a builder's pencil is used with regard to masonry or timber, or small steel plate can be used on timber. A permanent marker pen may be used on steel elements. Marking should be in unobtrusive locations. Not all new fabric requires dating. Where there are areas of new or introduced material, it can be done on an example, rather than on every piece. It should be noted that some treated timber and plasterboard is already dated.[71]

Activity status where compliance not achieved:

Restricted Discretionary

HH - R2	**Earthquake Strengthening, Fire Protection, ~~and~~ Accessibility and Service Connection[72] Upgrades to a Historic Heritage Item Identified in Schedule One**

Activity Status Permitted

Where:

1. All performance standards for Rule HH – R1 are complied with; and

[66] RMA First Schedule, Clause 16
[67] Consequential to accepting Heritage New Zealand Pouhere Taonga S140.024
[68] RMA First Schedule, Clause 16
[69] Heritage New Zealand Pouhere Taonga S140.024
[70] The O'Conor Institute Trust Board (S466.013) and Frank and Jo Dooley (S478.056)
[71] Heritage New Zealand Pouhere Taonga S140.024
[72] Westpower Limited S547.177 and consequential to recommendation on HH-P5

2. An assessment from a **suitably qualified or experienced** ~~Hh~~**h**eritage ~~Architect~~ **professional**[73] is provided to the relevant council confirming the works are consistent with the values of the Historic Heritage item at least 10 working days prior to the commencement of the work**.**[74]

Activity Status where compliance not achieved:

Restricted Discretionary

HH – R3	**Minor earthworks in a Historic Heritage Item or[75] Area or Archaeological[76] Site identified in Schedule One**

Activity Status Permitted

Where:

1. These are earthworks that will not result in damage, demolition or destruction of heritage items and are associated with:

a. An activity permitted under Rule HH – R1 or Rule HH – R2; **or**[77]

b. Interments at existing cemetery or urupā; or

c. Archaeological survey by Heritage New Zealand - Pouhere Taonga or authorised representatives; or

d. Installing fence posts and the replacement of poles for overhead network utility lines**,**[78] provided the area of land disturbed is limited to what is necessary to maintain an existing fence or **overhead line**[79] along its existing alignment ~~and does not involve installation or digging of new post holes~~;[80] **or**[81]

e. Maintaining existing underground energy activity or **telecommunications**[82] assets **or installing new underground energy or telecommunications assets that enable ongoing use of the heritage item or area**;[83] **or**[84]

f. Maintaining and repairing regionally significant infrastructure within the existing footprint of that infrastructure; or[85]

~~f~~**g**. Maint~~enance~~**aining** and repair**ing** ~~of~~[86] existing drains within the existing footprint of the drain; or

~~g~~**h**. Maintaining roads, tracks, carparks, accessways or paved areas within the footprint or modified ground compromised by the existing road, track, carpark, accessway or paved area; and

[73] Federated Farmers S524.009
[74] RMA First Schedule, Clause 16
[75] RMA First Schedule, Clause 16, consistent with the title of Schedule One
[76] Heritage New Zealand Pouhere Taonga S140.025
[77] RMA First Schedule, Clause 16
[78] RMA First Schedule, Clause 16
[79] Westpower Limited S547.179
[80] Additional relief in response to Westpower Limited S547.179, and as a consequence of the addition of clause 3 to the rule.
[81] RMA First Schedule, Clause 16
[82] Chorus NZ Ltd, Spark NZ Trading Ltd, Vodafone NZ Ltd S663.036
[83] Chorus NZ Ltd, Spark NZ Trading Ltd, Vodafone NZ Ltd S663.036
[84] RMA First Schedule, Clause 16
[85] Manawa Energy Limited S438.066
[86] RMA First Schedule, Clause 16

2. ~~An Archaeological Authority has been issued by Heritage New Zealand – Pouhere Taonga, or~~[87] an Accidental Discovery Protocol commitment has been completed and submitted to the relevant ~~District~~[88] Council at least 10 working days prior to the commencement of any earthworks**; and**

3. All standards of Rule EW – R1 are complied with. [89]

Advice Note:

1. Where work is proposed that could modify an archaeological site (regardless of whether the site is scheduled as an archaeological site in Te Tai o Poutini Plan or not) obtaining archaeological authority from Heritage New Zealand – Pouhere Taonga (HNZPT) is required before any work starts.[90]

Activity Status where compliance not achieved:

Discretionary where these are not associated with another activity specifically provided for in a Controlled or Restricted Discretionary Activity Rule.

Controlled Activities

HH – R~~5~~4 New infrastructure Connections to a Historic Heritage Item identified in Schedule One

Activity Status Controlled

Where:

1. The new infrastructure connection is to a historic heritage building listed in Schedule One; **and**

2. **The application is accompanied by evidence of the outcome of consultation with Heritage New Zealand – Pouhere Taonga (HNZPT) or demonstration of how the connection is in accordance with any guideline developed by the infrastructure provider in consultation with HNZPT**.[91]

Matters of control are:

a. The location of the customer's connection to the heritage building;

b. The physical impact/damage to the heritage building; and

c. Visual impact and how the visual impact might affect heritage value.

Advice Note:

Where work is proposed that could modify an archaeological site (regardless of whether the site is scheduled as an archaeological site in Te Tai o Poutini Plan or not) obtaining archaeological

2.7. Historic Heritage Methods

Submissions and Further Submissions

259. The s42A Report, on page 49, summarises submissions and further submissions on the Methods of the Historic Heritage Chapter.

260. There were four submissions on the methods of the chapter as a whole. Greymouth Heritage Trust (S104.008) requested that there be a method for the Plan to require councils to provide for a Heritage Protection Fund and a Long-Term Heritage Assets Maintenance plan so that identified heritage assets are not left to "demolition by neglect". Lucina Brady (S322.002) identified that the Old Courthouse in Greymouth should be purchased and retained so that "History House" can be housed there. Heritage West Coast (S426.001) sought that Heritage

[137] Heritage New Zealand Pouhere Taonga S140.031
[138] RMA First Schedule, Clause 16

West Coast is recognised within the methods of the Plan. Laura Mills (S309.004) asked that heritage resources on the West Coast be reviewed to include additional sites in Schedule One.

261. With regard to **HH-M1**, there were two submissions in support from Te Mana Ora and HNZPT seeking that the method be retained as notified.

Section 42A Report Analysis and Recommendations

262. With regard to the submissions of Greymouth Heritage Trust and Lucina Brady, Ms Easton recognised the importance of funding heritage protection and maintenance, but did not consider it to be a matter for the district plan, and was rather a matter for the Council's long-term plans.

263. With regard to the submission from Heritage West Coast, Ms Easton noted that the group are one of many local heritage groups in the region. However, she acknowledged that it is appropriate to recognise local heritage groups within the methods of the Plan and recommends a new method for the councils to recognise these groups and the role they play in advocating for and maintaining historic heritage on the West Coast. Her recommended method is as follows:

HH – M3

Recognise the West Coast heritage groups, including Heritage West Coast, as significant stakeholders in relation to historic heritage matters and that they play an important role in advocating for and maintaining historic heritage values on the West Coast.

264. With regard to **HH-M1**, Ms Easton did not recommend any amendment to the method.

265. Ms Easton, in response to general submission points on the chapter as a whole from David Marshall (S347.004) and Greymouth Heritage Trust (S104.007), recommended a method to ensure that the process to add items or areas to Schedule One was clear for users of the Plan. The recommendation of Ms Easton for the new method reads as follows:

HH – M2

The TTPP Committee will consider the merits of inclusion of additional heritage items in the Plan as part of their regular monitoring of Plan implementation. People seeking additional items to be scheduled will need to provide an assessment by a suitably qualified heritage professional that identifies the merits of the item proposed to be scheduled against the criteria in Policy HH – P2. The owner of the item should also be willing for it to be scheduled in the Plan. Where such as assessment and confirmation of agreement to scheduling is provided to the TTPP Committee, the Committee will assess whether there is sufficient justification for scheduling, and if so schedule the item via a Committee-initiated Plan change.

266. Ms Easton, in response to a general submission point on Schedule One from HNZPT (S140.044), recommended a method to ensure that more detailed information would be made available for Plan users in relation to all items in Schedule 1A. This is further discussed in the section of this Recommendation Report that addresses the Schedules. The recommendation of Ms Easton for the new method reads as follows:

HH – M4

Detailed documentation of the historic heritage and/or archaeological values of the Schedule 1A and Schedule 1B historic heritage items will be undertaken by the end of 2026. This will be prioritised for development as follows:

1. Those items and areas which are on private land or are privately owned,

2. Items and areas on Crown land outside of the public conservation estate,

3. Items and areas on district or regional council lands,

4. Items and areas on public conservation land.

Hearing and Submitter Evidence/Statements

267. With regard to recommended method **HH-M2**, Arlene Baird, on behalf of HNZPT, recorded support for the method because it provides a clear pathway for the addition of items and areas, and archaeological sites, to Schedule One of the Plan.

268. Susan Aitken, on behalf of Poutini Ngāi Tahu, supported the addition of this method because it provides clarity for Plan users, including in relation to the process for archaeological sites to be added to Schedule One, and is consistent with policy HH-P9. She made the connection between this method and sites in Appendix Ten.

269. Martin Kennedy, on behalf of Westpower, supported the addition of the method but recommended an amendment that makes it clear that the process also applies to archaeological sites. He expressed concern in his evidence, and at the hearing, that there were no new methods proposed to support non-complying activity status for demolition or destruction of heritage items or areas. He considered that there needed to be support for owners to assist them to retain and maintain sites, or recognition by the Panel that there is currently no support.

270. Frida Inta, on behalf of herself and Buller Conservation Group, raised the point in her hearing statement that recommended HH-M2 should refer to HH-P3, not HH-P2.

271. With regard to recommended method **HH-M4**, Arlene Baird, on behalf of HNZPT, recorded support for the method in response to the HNZPT submission point, which will ensure that individual assessments are undertaken for scheduled items and areas in Schedule 1A. She further emphasised in her hearing statement that this was a compromise on the part of HNZPT and that reliance was placed on the Councils ensuring that resources were made available to undertake the assessments in the earliest timeframe possible.

272. Frida Inta, on behalf of herself and Buller Conservation Group, queried what would happen to the detailed documentation produced and sought further explanation in the method to make that clear.

Reporting Officer Reply Evidence

273. With regard to recommended method **HH-M2**, Ms Easton responded to a question from the Panel regarding whether there was a need to signal priorities in the method. She reiterated the limited resources available in the region and noted that she did not consider prioritisation

to be necessary, but considered that the prioritisation included in recommended method HH-M4 could be used.

274. With regard to recommended method **HH-M4**, Ms Easton, in response to questions from the Panel, explained that resources had been set aside to accomplish the individual heritage assessments within two years. She agreed that the method should indicate how the public will be able to access these assessments and recommended a corresponding amendment to the wording. She included both Schedule 1A and Schedule 1B in the revised wording.

Hearing Panel's Evaluation

275. With regard to method **HH-M1**, the Panel recommended retaining the method as notified.

276. With regard to method **HH-M2**, the Panel adopt the recommended wording provided by the reporting officer, with the exception that the Panel agrees with Mr Kennedy that archaeological sites need to be referenced, in addition to historic heritage items and areas.

277. With regard to method **HH-M3**, the Panel adopt the recommended wording provided by the reporting officer.

278. With regard to method **HH-M4**, the Panel adopt the recommended wording provided by the reporting officer, with the exception that reference to "*Schedule One*" is preferred, and it is not necessary to include historic heritage on public conservation land because this is outside the jurisdiction of the plan.

279. Further to Panel analysis and recommendations on policy HH-P9, the Panel recommend a further method that will alert Plan users to the potential presence of archaeological material, either archaeological sites of Māori origin listed in Appendix Ten or NZAA sites more generally, until such time as these sites have been verified as to their location and values.

Hearing Panel's Recommendation

280. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends accepting or accepting in part the submission points footnoted below, and recommend the following changes to the **Historic Heritage – Ngā Tuku Ihotanga Rules**:

HH-M1

Support owners of historic heritage items to maintain their assets through council appropriate resources, such as providing links to guidance documents on resource consent applications on council websites.

HH-M2

The TTPP Committee will consider the merits of inclusion of additional heritage items and areas, and archaeological sites in the Plan as part of their regular monitoring of Plan implementation. People seeking additional items to be scheduled will need to provide an assessment by a suitably qualified or experienced heritage professional that identifies the merits of the item proposed to be scheduled against the criteria in Policy HH – P3. The owner of the item should also be willing for it to be scheduled in the Plan. Where such an assessment and confirmation of agreement to scheduling is provided to the TTPP Committee, the Committee will assess whether there is

sufficient justification for scheduling, and if so, schedule the item via a Committee – initiated Plan Change.[139]

HH-M3

Recognise the West Coast heritage groups, including Heritage West Coast, as significant stakeholders in relation to historic heritage matters, and that they play an important role in advocating for and maintaining historic heritage values on the West Coast.[140]

HH-M4

Detailed documentation of historic heritage values of items, areas and archaeological sites listed in Schedule One will be undertaken by the end of 2026. The record of these assessments will be placed on the Te Tai o Poutini Plan website and directly linked to Schedule One. Priorities for assessment are as follows:

1. **Those items and areas which are on private land or are privately owned.**
2. **Items and areas on Crown land outside of the public conservation estate.**
3. **Items and areas on district or regional council lands.**[141]

HH-M5

A GIS alert layer will be created that can be accessed by users of the Plan to show the approximate location of unverified archaeological sites, including archaeological sites of Māori origin in Appendix Ten and other New Zealand Archaeological Association (NZAA) sites that are not listed in Schedule One. This layer will incorporate a 100 metre circular buffer area around the approximate location of the archaeological site to serve as an alert to users of the Plan that archaeological material may be uncovered during works in the area. The layer will be accompanied by an advisory note to that effect.

2.8. Historic Heritage Schedules

Submissions and Further Submissions

281. The s42A Report, on pages 50-52, summarises submissions and further submissions on Schedule One.

282. There were four submissions in support for the schedule in general from GDC and HNZPT, one opposed, one opposing in part and two seeking amendments.

283. Federated Farmers (S524.047) sought removal of this schedule on the basis that there were no rules associated with it.

[139] David Marshall S347.004 and Greymouth Heritage Trust S104.007
[140] Heritage West Coast S426.001
[141] Heritage New Zealand Pouhere Taonga S140.043, S140.044

284. HNZPT (S140.043) sought that an assessment of each item in Schedule 1A be provided. HNZPT (S140.044) sought clarification as to why some archaeological sites are included in Schedule 1B while others are not. HNZPT (S140.045) sought inclusion of definitions for the historic heritage values either within the policies or at the start of Schedule 1A, and provided those definitions.

285. HNZPT, in relation to specific scheduled items, sought addition of the phrase "*scheduled extent*" in relation to HH3, HH24, and HH88 (S140.067, S140.068 and S140.070). HNZPT sought removal of the sentence "*Refer to map in Appendix 1 of the registration report for further information*" from HH27, and removal of the sentence "*See extent map tabled at the Rārangi Kōrero Committee meeting on 30 April 2019*" from HH96 (S140.069 and S140.071). HNZPT sought addition of the phrase "*Historic Place Category 1*" in ARCH5, ARCH15 and ARCH16, and amendment of the Heritage List number for ARCH16 (S140.074, S140.075 and S140.076). HNZPT sought correction of references to Heritage List numbers and Historic Area references for ARCH27 and ARCH28 (S140.077 and S140.078).

286. HNZPT (S140.072) also sought that Seddon House be added to Schedule 1A and provided details to populate the schedule.

287. Laura Mills (S240.001 and S309.001) specifically supported the inclusion of Waiuta Historic Place, Waipuna Station Homestead, Blackwater School, Runanga Miners Hall, Remains of Taylorville Wallsend Swing Bridge, Heatherbell Hotel, Cobden Rail Bridge, Regent Theatre, St Patricks Presbytery and Dixon Park Band Rotunda. She also requested (S309.002) additions to the schedule for: the goldmining tunnels of the Woods Creek track at Rutherglen; Nelson Creek tunnels and swing bridge; the Greymouth Star on Werita Street; the old greenstone mine remains at Mt Griffin; the Hannan and Seddon law building on Werita Street; the fountain outside the Grey District Council; Londonderry rock at Kumara; WWII pill box at Blaketown tiphead; Taramakau rail bridge; Dillons Hut up the Taipo; payroll robbery memorial at Runanga; Cobden gun emplacement; hotpool remains near Gloriavale. She also requested (S240.003) that many of these be assessed by a trained historian, and including: heritage trees at Dixon Park; and trees off Kilgour Road in the Coronation Domain reserve.

288. A number of submitters[142], including Laura Mills and the Greymouth Heritage Trust, requested a Historic Heritage Area for the southern Paparoa area in recognition of the mining history of the Greymouth Coalfield. Paul Thomas (S134.001) referenced a GNS Science Report from November 2010 in support of the request. The Runanga Miners Hall Trust (S498.001) sought inclusion of the Brunner Mine Site (HH53–HH57), Blackball (HH48-HH52) and the Runanga Miners' Hall (HH47) up to the Strongman Mine memorial, and the towns of Dobson, Stillwater, Blackball, Taylorville, Runanga, Dunollie and Rapahoe, and the old town sites of Rewanui, Wallsend and Brunnerton.

289. The Greymouth Heritage Trust requested additions to the schedule, including: the Coal River Heritage Park (S104.002); Gows Creek 1.2km gold mining tunnel (S104.004); Woods Creek (S104.005); Greymouth Railways Signal Box Built 1904 (S104.006); and Nelson Creek Domain Gold Mining Area.

290. Frida Inta and Buller Conservation Group requested additions to the schedule, including: the midden site at Mokihinui (S552.054, S553.054); archaeological sites at Mokihinui and L28/36 at the Chasm Creek Walkway (S552.052, S552.204, S553.052, S553.204); the waka kereru site at Pages Stream (S552.212, S553.212). Additional requests included recording all known sites

[142] Kate Kennedy S3.001, Aisla Hart S7.001, Glen Johnston S74.001, S183.001, Paul Thomas S134.001, Runanga Miners Hall Trust S498.001, Greymouth Heritage Trust S104.001 and Laura Mills S17.001, S17.002

in Schedule One and Appendix Ten (S552.051, S553.051), including all historic buildings, structures and sites from the Buller District Plan (S552.205, S553.205), and amending the label for Mokihinui Cemetary on the planning maps so that it correctly says ARCH3, as in Schedule 1B (S552.053, S553.053).

291. Barbara King (S71.002, S71.003) sought a review of heritage features of Nelson Creek, mapping, and addition of Nelson Creek Community Church to the schedule.

292. Brendon McMahon (S306.001) sought a full assessment of the heritage and amenity values of Kumara township, and a heritage precinct overlay to ensure all future development is sensitive to the existing townscape and its heritage value.

293. Kathleen Maitland (S38.001) supported inclusion of the Ross Goldfields Historic Area, noting that the building is used by the Ross Goldfields Information & Heritage Centre rather than the Ross Community Society, and that it was in relationship with a significant kahikatea tree.

294. Northern Buller Communities Society Incorporated (S142.001) expressed concern that the Granity Mines Survey Office heritage item was wrongly sited on the map.

Section 42A Report Analysis and Recommendations

295. Ms Easton noted in response to the Federated Farmers submission point that they were mistaken in their assertion that the schedule is not referred to in any rules. She explained that these sites are protected under the HNZPT Act, and that there are over a thousand archaeological sites recorded in the region. She reiterated that many sites were previously identified in district plans, and that the schedule includes sites identified as important by local heritage groups during development of the Plan. She noted that all of the archaeological sites in Schedule 1B are on land in public ownership.

296. Ms Easton advised that the purpose of new method HH-M4 is to respond to the HNZPT submission point S140.043. She advised, in response to the HNZPT query regarding Schedule 1B, that the schedule contains cemeteries past and present, and historic heritage items and areas compiled from existing district plans and NZAA listings, as well as archaeological sites identified through the sites and area of significance to Māori identification process. She indicated that the result of the pre-hearing meeting with HNZPT was that Schedule 1B sites would also be subject to assessment indicated in recommended method HH-M4.

297. In relation to the submission points of HNZPT, Ms Easton recommended making the requested amendments to Schedule One, including adding explanatory text to Schedule One that incorporates definition of terms used to describe heritage values, and amendments to individual items, areas and archaeological sites. She recommended acceptance of the addition of Seddon House to Schedule 1B, on the basis of advice from Dr Ann McEwan that there was insufficient built heritage remaining to justify inclusion in Schedule 1A, but that it would be appropriate to record it as an archaeological site.

298. In response to the range of heritage items and areas requested for addition to the Plan by Laura Mills, these were assessed by Dr McEwan and attached as Appendix 3 to the s42A Report. A number of the heritage items and areas nominated by Laura Mills were recommended for inclusion in the Plan, including the Taramakau Rail Bridge, the Hall & Coulthard Memorial at Runanga, the former WWII Battery Observation Post on Cobden Hill, Dillon's Homestead Hut, and Kopara Hot Springs bathing pool. The reasons for other heritage items and areas not being recommended for scheduling included insufficient information, the

items being newer in origin, and trees and geological features not being a matter for Schedule One, or DOC management of items or areas.

299. Ms Easton advised that the matter of a Southern Paparoa Historic Area was considered by Dr McEwan and assessed as not meeting the criteria for scheduling in the Plan. She indicated, based on that advice, that the parties requesting this Historic Area should work with HNZPT on the proposal.

300. In response to the range of heritage items and areas requested for addition to the Plan by the Greymouth Heritage Trust, the advice of Dr McEwan included in Appendix 3 of the s24A Report did not support addition of any of the items or areas, either because there was insufficient information to support scheduling, or the items or areas did not meet the criteria for scheduling, or because public conservation land is outside the jurisdiction of the Plan. Dr McEwan noted that the Greymouth Railway Station signal box is already within scheduled area HH71, and also noted that she recognised the history and community importance of the items and areas identified.

301. Ms Easton noted that she could not act on the requests of Frida Inta and Buller Conservation Group because she did not have sufficient information. These items and areas were not included in the assessment of Dr McEwan in Appendix 3 to the s42A Report.

302. In response to the request of Barbara King for recognition of Nelson Creek township and community church, Ms Easton relied on the advice of Dr McEwan that the area is actively managed by DOC, and that the church is within a Historic Reserve, such that scheduling in the Plan was not warranted.

303. In response to the request of Brendon McMahon for a Kumara Historic Area, including the Theatre Royal Hotel, Empire Hotel, former BNZ and Seddon House site, Ms Easton relied on the advice of Dr McEwan that there was insufficient evidence to identify a clear extent for the proposed Historic Area. Dr McEwan noted that the Empire Hotel and Theatre Royal Hotel have been modified, the former BNZ is in partial reconstruction, and the Kumara Memorial Hall was built in 1950 to replace an earlier hall. She recognised the hall as a valued community asset, but did not recommend that these buildings or the area be added to the schedule. She did, however, support inclusion of St Patricks Catholic Church, Kumara on the schedule, in response to the submission.

304. Ms Easton supported amending the maps in response to the submission points of Northern Buller Communities Society Incorporated and Frida Inta that had identified errors. She did not note any further action in response to the submission of Kathleen Maitland, or others in support of the scheduled items and areas.

Hearing and Submitter Evidence/Statements

305. Arlene Baird, on behalf of HNZPT, supported the reporting officer's recommendation regarding the Seddon House site, in light of the assessment by Dr McEwan. She did not address the comments of Dr McEwan regarding the extent of HH24 and HH88.

306. Laura Mills presented evidence to the Panel focussed on the Hannan and Seddon building in Werita Street, Greymouth, and the Mt Griffin serpentine quarry remnants. She expressed a passion for local heritage, and outlined her research into both historic heritage items and areas for further consideration.

307. Frida Inta presented the Archsite records for the midden site in the areas of the Mokihinui estuary, with information about an adze find, and the Chasm Creek railway at Seddonville. She spoke to her request for the scheduled items and areas in the Buller District Plan to be carried over to the Plan, to ensure that the information and records in that prior district plan were not lost.

308. Susan Aitken, on behalf of Poutini Ngāi Tahu, noted that there are some sites listed in both Schedule One and Schedule Three, but otherwise Schedule One is predominantly colonial built heritage.

309. Martin Kennedy, on behalf of Westpower, acknowledged the reporting officer's acceptance of their submission points on Schedule One.

310. Stephanie Styles, on behalf of Manawa, reiterated that none of the historic heritage assets that form part of their operating hydroelectricity schemes are included in Schedule One.

Reporting Officer Reply Evidence

311. Ms Easton provided further assessments from Dr McEwan in response to the evidence received from Laura Mills and Frida Inta at the hearing. The outcome of those assessments was that only the Hannan and Seddon building in Werita Street, Greymouth was recommended for addition to the schedule, on the basis that it met the criteria for inclusion, and Dr McEwan indicated that a heritage record would be supplied for the building. For those that were not recommended for inclusion, Dr McEwan considered the archaeological sites would already be protected under the HNZPT Act, but they did not meet the criteria for inclusion on the schedule. She noted that the adze find at Mokihinui was not clearly connected to an archaeological site, inferring that it may have been transported to the river mouth area. She assessed the Chasm Creek railway site as having high amenity value, but could not determine that it was of sufficient archaeological significance to be included on the schedule.

312. Ms Easton provided a comprehensive assessment of the items and areas scheduled in the Buller District Plan, in response to the submissions of Frida Inta and Buller Conservation Group. She identified a significant number of items and areas that were included in Schedule One. She also identified a significant number of items and areas that were NZAA sites that did not appear to be of Māori origin, and therefore were not included in Appendix Ten, but neither did they contain accurate information regarding their location or values. She identified a midden site that is incorporated within a SASM in Schedule Three. She also identified a number of items and areas that were not historic sites, did not meet the criteria, or contained insufficient information for inclusion, and one that had been demolished.

Hearing Panel's Evaluation

313. The Panel agree with the reporting officer recommendations, for the reasons provided in evidence, including supporting evidence from Dr McEwan, with the exception that the entry for Seddon House, ARCH31, is recommended to not include the text related to "E*xtent*" because that is a matter for Schedule 1A rather than Schedule 1B, and is recommended to include its Category 1 Heritage List reference. The Panel also adopt the advice of Dr McEwan regarding the scheduled extent of HH24 and HH88, as alternative relief to the amendments sought by HNZPT. The Panel has otherwise relied on Appendix 1 in the right of reply of Ms Easton to populate the details in Schedule One for the newly added items, areas and archaeological sites, with the exception that there were no values provided for Dillons Homestead Hut. The Panel has relied on Appendix Four to the s42A Report that included the assessment of Dr McEwan, and the definitions provided by HNZPT to populate this aspect of

the schedule. Any values that may have been missed or recorded inaccurately will need to be amended by way of a plan change.

314. The Panel accept the advice of Dr McEwan, as did Ms Easton, regarding the request for a Southern Paparoa Mining Historic Area, on the basis that the parties are encouraged to approach HNZPT regarding identification of the area.

315. The Panel consider that recommended method HH-M5 will assist in responding to the concerns of Frida Inta regarding archaeological sites in the Buller District Plan that are not included in Schedule One of the TTPP.

Hearing Panel's Recommendation

316. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends accepting or accepting in part the submission points footnoted below, and recommend the following changes to the **Historic Heritage – Ngā Tuku Ihotanga Schedule One: Historic Heritage Items and Areas and Archaeological Sites – Te Rārangai Tuatahi: Ngā Rawa me ngā Whenua Tuku Iho**.

317. The Panel recommend that corrections to the maps are made, as requested by Northern Buller Communities Society Incorporated and Frida Inta, and recommended by the reporting officer.

318. Overall, the Panel recommend that Schedule One, including Schedule 1A and Schedule 1B, are retained as notified, with the exception of changes shown in the boxes below.

Schedule One: Historic Heritage Items and Areas and Archaeological Sites[143]

Te Rārangai Tuatahi: Ngā Rawa me ngā Whenua Tuku Iho

Assessment of the scheduled Historic Heritage Items and Areas **and Archaeological Sites**[144] has been undertaken using the criteria set out in the West Coast Regional Policy Statement Chapter 4, Method 3:

a. Historic;

b. Cultural;

c. Architectural;

d. Archaeological;

e. Technological;

f. Scientific;

g. Social;

h. Spiritual;

[143] RMA First Schedule, Clause 16
[144] RMA First Schedule, Clause 16

i. Traditional;

j. Contextual; and

k. Aesthetic.

The historic heritage values of historic heritage items and areas and archaeological sites in the Schedule are identified in the tables. A description of these historic heritage values is provided below.

Historical and social significance value: Historical and social significance values that demonstrate or are associated with a particular person, group, organisation, institution, event, phase or activity; the continuity and/or change of a phase or activity; social, historical, traditional, economic, political, or other patterns.

Cultural and spiritual value: Cultural and spiritual values that demonstrate or are associated with the distinctive characteristics of a way of life, philosophy, tradition, religion, or other belief, including: the symbolic or commemorative value of the place; significance to Tangata Whenua; and/or associations with an identifiable group and esteemed by this group for its cultural values.

Architectural and aesthetic value: Architectural and aesthetic values that demonstrate or are associated with a particular style, period or designer, design values, form, scale, colour, texture, and material of the place.

Technological and craftmanship value: Technological and craftmanship values that demonstrate or are associated with the nature and use of materials, finishes, and/or technological or construction methods that were innovative, or of notable quality for the period.

Contextual value: Contextual values that demonstrate or are associated with a relationship to the environment (constructed and natural); a landscape, setting, group, precinct or streetscape; a degree of consistency in terms of type, scale, form, materials, texture, colour, style, and/or detail; recognised landmarks and landscape that are recognised and contribute to the unique identity of the environment.

Archaeological and scientific significance value: Archaeological or scientific values that demonstrate or are associated with the potential to provide information through physical or scientific evidence and understanding about social, historical, cultural, spiritual, technological, or other values of past events, activities, structures or people.[145]

APPENDIX 1 - RECOMMENDATIONS

Definitions

Accidental Discovery Protocol Commitment	**means a written commitment to adhere to the accidental discovery protocol as contained in Appendix Four.** **Advice note: This does not replace any archaeological authority required by HNZPT.**
Archaeological site	**has the same meaning as in the Heritage New Zealand Pouhere Taonga Act 2014 (as set out below).** Means, **subject to section 42 (3) –** a) Any place in New Zealand, including any building or structure (or part of a building or structure), that- i. was associated with human activity that occurred before 1900 or is the site of the wreck of any vessel where the wreck occurred before 1900; and ii. provides or may provide, through investigation by archaeological methods, evidence relating to the history of New Zealand; and b) Includes a site for which a declaration is made under section 43 (1) ~~of the Heritage New Zealand Pouhere Taonga Act 2014~~
Heritage fabric	means any physical element, feature, material or finish which contributes to the heritage values, in whole or in part, of a structure, place, object **or** feature ~~or site~~
Historic heritage	~~means sites, buildings and areas identified in Schedule One Historic Heritage Items and Areas and Archaeological Sites~~ **has the same meaning as in section 2 of the RMA (as set out below) –** **a) means those natural and physical resources that contribute to an understanding and appreciation of New Zealand's history and cultures, deriving from any of the following qualities:** **i. archaeological;** **ii. architectural;** **iii. cultural;** **iv. historic;** **v. scientific;** **vi. technological; and** **b) includes –** **i. historic sites, structures, places, and areas; and** **ii. archaeological sites; and** **iii. sites and areas of significance to Māori, including wāhi tapu; and** **iv. surroundings associated with the natural and physical resources**

Suitably Qualified or Experienced Heritage Professional	means a person with a degree or recognised post-graduate qualification in a field related to heritage conservation or management**, which may include architecture,** and at least five years of experience in a heritage conservation or management role; **or otherwise, a person peer reviewed and recognised by Heritage New Zealand Pouhere Taonga as having experience in heritage conservation or management relevant to undertaking the required role**. **Advice Note: Relevant experience in heritage conservation or management includes cultural expertise held by members of Poutini Ngāi Tahu, and consultation with Poutini Ngāi Tahu is needed to identify expertise relevant to undertaking the required role.**

Historic Heritage Chapter

Overview

~~Sites~~ **Items**, areas, memorials and buildings may have historic heritage values if they are places or objects ~~which~~ **that** people associate with their identity, history, and events or cultural traditions.

Historic heritage values are important because they provide a tangible insight into our past and can be an important source of knowledge**,** and a social and cultural link to the past that is important to the community. The destruction or damage of heritage values can cause the loss of this knowledge**,** as well as a social/cultural link to the past.

As well as meeting the specific duties under section 6 of the Resource Management Act 1991, protecting historic heritage values can help teach people about their past, foster a sense of identity and community**,** and provide economic opportunities in heritage, tourism, recreation, restoration and marketing.

Te Tai o Poutini Plan manages different types of historic heritage.

Historic Heritage items are listed in Schedule One**, Schedule Two and Schedule Three. Schedule One predominantly covers the built and colonial heritage and also** ~~The schedule also~~ identifies if there are any interior elements of a heritage building that are also protected. **Schedule Two covers notable and heritage trees that are important to the community and Schedule Three reflects Poutini Ngāi Tahu historic heritage areas**.

Historic areas are also listed in Schedule One. There are eight historic areas – Denniston Historic Area, Reefton Historic Area, Waiuta Historic Area, Greymouth Railway Station Historic Area, Moana Railway Station Historic Area, Brunner Mines Historic Area, Jack's Mill School Historic Area and Ross Historic Area.

Under the Heritage New Zealand Pouhere Taonga Act 2014, ~~A~~**a**rchaeological sites are any place in Aotearoa New Zealand (including buildings and structures) that are associated with pre-1900 human activity, where there is evidence relating to the history of New Zealand that can be investigated using archaeological methods. There are a large number of archaeological sites identified in the West Coast/Te Tai o Poutini. While all archaeological sites are protected under **the** Heritage New Zealand Pouhere Taonga Act 2014, archaeological sites **predominantly related to European colonial history** of particular significance to the community on the West Coast/Te Tai o Poutini are included in Schedule One and the Historic Heritage rules also apply to these archaeological sites. **This schedule can also contain post-1900 items and areas**. **The archaeological sites listed in Schedule One, while an important part of the West Coast/Te Tai o Poutini, are not the full list**. Alongside this, the New Zealand Archaeological Association has identified a list of

archaeological sites of Māori origin. **Further investigation is required to ensure the exact spatial location and extent of these archaeological sites, therefore** ~~T~~**t**heseare included in Appendix Ten for information. **This appendix raises awareness for plan users, particularly resource consent applicants, of the increased likelihood of discovering archaeological material of Māori origin in the vicinity of these areas. Appendix Ten will be mapped and included as an "Alert Layer" on the e-plan maps. The Councils will continue to work with both Heritage New Zealand Pouhere Taonga and Poutini Ngāi Tahu over the next ten years to ensure that the archaeological sites of Māori origin are accurately mapped before being considered for inclusion in Schedule One via a plan change**.

Historic heritage and archaeological sites are also important to Poutini Ngāi Tahu **for values other than historic heritage**. Some of these sites and areas are identified, with other Sites **and Areas** of Significance to Māori, in Schedule Three. Notable trees of value to Poutini Ngāi Tahu are identified in Schedule Two. Where a site is scheduled in multiple locations, the provisions of all chapters must be considered. **Some objectives and policies of this chapter also apply to sites listed only in Schedule Two or Schedule Three**.

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to this chapter, a number of chapters also contain provisions that may be relevant to historic heritage, including:

• **Sites and Areas of Significance to Māori** – the Sites and Areas of Significance to Māori Chapter contains the provisions in relation to the sites and areas identified in Schedule Three.

• **Notable Trees** – the Notable Trees Chapter contains the provisions in relation to trees identified in Schedule Two.

• **Subdivision** – the Subdivision Chapter contains provisions which relate~~d~~ to the subdivision of land with historic heritage ~~sites~~ **items** and areas – in particular Rules SUB – R10 and SUB – R17.

• **Financial Contributions** – the Financial Contributions Chapter provides the framework and provisions that allow for waivers for financial contributions in circumstances where heritage **heritage** ~~sites and~~ items **and areas** are protected.

• **Signs** – The Signs Chapter contains provisions ~~which~~ **that** relate to signs that are placed on and around historic heritage ~~sites~~ **items** and areas – in particular Rule SUB – R7.

• **The Zone Chapters** – ~~T~~**t**he Zone chapters contain some provisions which exempt historic heritage buildings from complying with performance standards, for example visitor accommodation requirements in the Town Centre Zone.

• **Appendix Ten** – ~~T~~**t**his appendix contains NZAA listed archaeological sites of Māori origin. The exact spatial location and extent of these sites has not yet been clearly identified but they are included in this appendix for information purposes **and are a matter for consideration where resource consent is required for an activity that may impact an archaeological site. Appendix Ten will be mapped and included as an "Alert Layer" in the e-planning maps**. Like all archaeological sites, these **archaeological sites** are protected under the Heritage New Zealand Pouhere Taonga Act 2014.

Other relevant Statutory Provisions

Aside from Te Tai o Poutini Plan, there are other key Acts and regulations seeking to protect and conserve historic heritage.

The Heritage New Zealand Pouhere Taonga Act 2014 (HNZPT Act) – under this act it is unlawful to destroy, damage or modify an archaeological site (regardless of whether the site is scheduled in Te Tai o Poutini Plan or not) without obtaining an archaeological authority from Heritage New Zealand Pouhere Taonga (HNZPT) before work starts. An archaeological authority is required in addition to

any resource consent required by the Council. If you discover a previously unknown archaeological site (for example, when you are undertaking ~~earth~~works) you must stop any work that could affect the **archaeological** site and contact HNZPT for advice on how to proceed. If there are human remains**/kōiwi or taonga** revealed, then the Accidental Discovery Protocol in Appendix ~~Five~~ **Four** must be followed and if any artefacts are found they must be handed over to the Ministry for Culture and Heritage.

The Building Act 2004 – this Act and associated regulations manage earthquake-prone buildings. Earthquake strengthening to scheduled **historic** heritage buildings and items is a permitted activity so long as the strengthening work does not compromise the historic heritage building or item**'**s heritage values.

HH-O1

Recognise, protect and celebrate the benefits of historic heritage of the West Coast/Te Tai o Poutini and its contribution to wellbeing through supporting a sense of place, community identity, culture and economic opportunities.

HH-O2

Provide for development opportunities that are sensitive to the identified values of scheduled historic heritage items and areas while providing for the protection of these values.

HH-O3

Identify, assess and recognise historic heritage places and features that are valued locally, regionally and nationally to ensure their protection **from inappropriate subdivision, use and development** for future generations.

HH-O4

Protect historic heritage **from inappropriate subdivision, use and development** by ~~restricting~~ managing relocation, repositioning, internal and external alterations and additions to heritage items and ~~not~~ **only** allowing demolition and destruction **in limited circumstances**.

HH-P1

Recognise that historic heritage items **and areas** may be valued on a national, regional or local scale.

HH-P2

Identify, assess and map heritage buildings, features, places ~~and sites~~ and archaeological sites, in partnership with Poutini Ngāi Tahu and Te Rūnanga o Ngāi Tahu and in consultation with the community and key stakeholders.

HH-P3

Assess the values of historic items and areas using the criteria set out in Method 3 of Chapter 4 in the West Coast Regional Council Policy Statement:

a. Historic;

b. Cultural;

c. Architectural;

d. Archaeological;

e. Technological;

f. Scientific;

g. Social;

h. Spiritual;

i. Traditional;

j. Contextual; and

k. Aesthetic.

HH-P4

Enable the use, including adaptive reuse of historic heritage items identified in Schedule One, while ensuring that their identified values are maintained.

HH-P5

When considering the proposals for external alteration of historic heritage items identified in Schedule One, the following matters should be considered:

a. Any external alteration will not significantly detract from an item of historic heritage value; ~~or~~

b. The alterations are for the primary purpose of improving structural performance, fire safety, **upgrading energy supply** or physical access **to the heritage item;**

c. The alternations are necessary to enable the continued adaptive reuse of the heritage item while maintaining heritage values to the fullest extent possible.

HH-P6

When considering proposals for relocation or repositioning of historic heritage items identified in Schedule One, the following matters shall be considered:

a. The impact on the physical integrity of the item and practical considerations associated with relocating or repositioning;

b. Whether the item can be accommodated without having a significant adverse effect on the structure and heritage values of the item;

c. Whether the item is at immediate risk from natural hazards identified in the Natural Hazard Chapter of this plan;

d. Whether the relocation is to return an item to its original location;

e. The impact of the movement of the item on public access to the item;

f. The importance of the heritage item's setting to its heritage significance and the impact of relocation or repositioning on that significance; and

g. The historic heritage item and land it is sited on are in different ownership and ~~following investigation and assessment into~~ **there is no** practical option~~s~~ for the ~~retention of the historic heritage~~ item **to remain** in its current location~~, it is unreasonable for the item to remain.~~**;**

h. **Functional need and operational need of regionally significant infrastructure, where there is no practicable alternative location and heritage values of the item are maintained**.

HH-P7

Demolition and destruction of **a** historic heritage item~~s~~ identified in Schedule One will not be allowed unless it can be demonstrated, through investigation and assessment by a suitably qualified **or experienced** heritage professional that:

a. The extent of the work required to retain the heritage item~~s~~ is of such a scale that the heritage values and integrity of the heritage item would be significantly compromised;

b. **The item poses a significant risk to public safety and there is no practicable alternative to make the item safe;**

c. The costs to retain or repair the heritage item would be unreasonable;

d. All other viable alternatives, including relocation and repositioning**,** have been fully considered.

HH-P8

Internal alteration of historic heritage buildings identified in Schedule One assessed as having significant internal values will not be allowed unless it can be demonstrated that:

a. The alterations are for the primary purpose of improving structural performance, fire safety or physical access; or

b. It is in a serious state of disrepair, and cost to remedy is prohibitive; or

c. Any alteration will not detract from its heritage value; or

d. It is of a temporary or easily reversible manner and will support its ongoing use; or

e. It can be altered in part without significant adverse effects on the heritage values for which the item is listed in Schedule One.

HH-P9

The Councils will work with Heritage New Zealand Pouhere Taonga and Poutini Ngāi Tahu to create a yearly work programme ~~which~~ **that** will enable all NZAA sites ~~of Māori origin~~ ~~o~~**i**n Te Tai o Poutini to be accurately mapped within the next ten years, **prioritising sites of Māori origin**. These will be included in the planning maps as a Plan Change.

HH-P10

Only allow regionally significant infrastructure on or within historic heritage items or areas identified in Schedule One where it can be demonstrated that:

a) **functional need or operational need of the infrastructure means that there is no practicable alternative to its location; and**

b) **The infrastructure will protect and maintain the heritage values of the item or area.**

Historic Heritage Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.

Permitted Activities

HH - R1 Repairs and Maintenance of a Historic Heritage Item identified in Schedule One

Activity Status Permitted

Where:

1. There are no changes to the extent, floor levels, form, proportion and scale of the item;

2. There are no changes to the design, texture, or form of the fabric;

3. Use of materials ~~other than those that~~ are the same as the original, or the most significant fabric, or the closest equivalent; ~~or~~

4. There is no damage to the building or structure as a consequence of affixing scaffolding;

5. New materials, works or reconstructed elements are date stamped to indicate the time of their installation.

Advice notes:

1. This rule applies only to the exterior of the heritage item, except where the 'Extent' in Schedule One includes 'fixtures and fittings'. The rule applies to 'fixtures and fittings' for those specific scheduled items, including interiors.

2. Date stamping is a term used in heritage conservation to mean marking with a date, not necessarily a stamp, and is important to clearly distinguish replicated or introduced features and new areas of fabric from heritage fabric, so that changes to the heritage item can be readily understood in the future. The dating of new or introduced fabric may be undertaken by a number of permanent means. It is recommended that a builder's pencil is used with regard to masonry or timber, or small steel plate can be used on timber. A permanent marker pen may be used on steel elements. Marking should be in unobtrusive locations. Not all new fabric requires dating. Where there are areas of new or introduced material, it can be done on an example, rather than on every piece. It should be noted that some treated timber and plasterboard is already dated.

Activity status where compliance not achieved:

Restricted Discretionary

HH - R2	**Earthquake Strengthening, Fire Protection, ~~and~~ Accessibility and Service Connection Upgrades to a Historic Heritage Item Identified in Schedule One**

Activity Status Permitted

Where:

1. All performance standards for Rule HH – R1 are complied with; and

2. An assessment from a **suitably qualified or experienced** ~~H~~**h**eritage ~~Architect~~ **professional** is provided to the relevant council confirming the works are consistent with the values of the Historic Heritage item at least 10 working days prior to the commencement of the work**.**

Activity Status where compliance not achieved:

Restricted Discretionary

HH – R3	**Minor earthworks in a Historic Heritage Item or Area or Archaeological Site identified in Schedule One**

Activity Status Permitted

Where:

1. These are earthworks that will not result in damage, demolition or destruction of heritage items and are associated with:

a. An activity permitted under Rule HH – R1 or Rule HH – R2; **or**

b. Interments at existing cemetery or urupā; or

c. Archaeological survey by Heritage New Zealand - Pouhere Taonga or authorised representatives; or

d. Installing fence posts and the replacement of poles for overhead network utility lines**,** provided the area of land disturbed is limited to what is necessary to maintain an existing fence or **overhead line** along its existing alignment ~~and does not involve installation or digging of new post holes~~; **or**

e. Maintaining existing underground energy activity or **telecommunications** assets **or installing new underground energy or telecommunications assets that enable ongoing use of the heritage item or area**; **or**

f. Maintaining and repairing regionally significant infrastructure within the existing footprint of that infrastructure; or

~~f~~**g**. Maint~~enance~~**aining** and repair**ing** ~~of~~ existing drains within the existing footprint of the drain; or

~~g~~**h**. Maintaining roads, tracks, carparks, accessways or paved areas within the footprint or modified ground compromised by the existing road, track, carpark, accessway or paved area; and

2. ~~An Archaeological Authority has been issued by Heritage New Zealand – Pouhere Taonga, or~~ an Accidental Discovery Protocol commitment has been completed and submitted to the relevant ~~District~~ Council at least 10 working days prior to the commencement of any earthworks**; and**

3. All standards of Rule EW – R1 are complied with.

Advice Note:

Where work is proposed that could modify an archaeological site (regardless of whether the site is scheduled as an archaeological site in Te Tai o Poutini Plan or not) obtaining archaeological authority from Heritage New Zealand – Pouhere Taonga (HNZPT) is required before any work starts.

Activity Status where compliance not achieved:

Discretionary where these are not associated with another activity specifically provided for in a Controlled or Restricted Discretionary Activity Rule.

Controlled Activities

HH – R~~5~~4 New infrastructure Connections to a Historic Heritage Item identified in Schedule One

Activity Status Controlled

Where:

1. The new infrastructure connection is to a historic heritage building listed in Schedule One; **and**

2. **The application is accompanied by evidence of the outcome of consultation with Heritage New Zealand – Pouhere Taonga (HNZPT) or demonstration of how the connection is in accordance with any guideline developed by the infrastructure provider in consultation with HNZPT**.

Matters of control are:

a. The location of the customer's connection to the heritage building;

b. The physical impact/damage to the heritage building; and

c. Visual impact and how the visual impact might affect heritage value.

Advice Note:

Where work is proposed that could modify an archaeological site (regardless of whether the site is scheduled as an archaeological site in Te Tai o Poutini Plan or not) obtaining archaeological authority from Heritage New Zealand – Pouhere Taonga (HNZPT) is required before any work starts.

Activity Status where compliance not achieved:

Discretionary

Restricted Discretionary Activities

HH – R45 **~~Relocation or~~ Repositioning of a Historic Heritage item identified in Schedule One and associated earthworks**

Activity Status ~~Controlled~~ Restricted Discretionary

Where:

1. All performance standards for Rule HH – R1 are complied with; and
2. The item is being ~~relocated or~~ repositioned:

a. To its original location~~s~~; or

b. Due to an immediate threat from damage ~~sustained~~ by a ~~N~~**n**atural ~~H~~**h**azard identified:

i. In this plan; or

ii. By a suitably qualified **or experienced** heritage professional.

~~Matters of control are~~ Discretion is restricted to:

a. The capacity of the item to endure ~~relocation and~~ repositioning;

b. The capacity of the site or area to accommodate the item;

c. The impact on public access to the item; ~~and~~

d. The reduction in risk from natural hazards from the ~~relocation or~~repositioning**; and**

e. **Impacts of the activity on the cultural values of any site or area of significance to Māori, and advice received from Poutini Ngāi Tahu on managing identified impacts on cultural values.**

~~**Notification:** Proposals to relocate or reposition public monuments will always be publicly notified.~~

Advice Note:

Where work is proposed that could modify an archaeological site (regardless of whether the site is scheduled as an archaeological site in Te Tai o Poutini Plan or not) obtaining archaeological authority from Heritage New Zealand – Pouhere Taonga (HNZPT) is required before any work starts.

Activity Status where compliance not achieved:

~~Restricted~~ Discretionary

HH – R6 **Repairs and Maintenance, Earthquake Strengthening, Fire Protection, Service Connection and Accessibility Upgrades where Permitted Activity standards are not met, or Additions and Alterations to Historic Heritage Items identified in Schedule One**

Activity Status Restricted Discretionary

~~Where:~~

~~1. This includes necessary earthworks associated with the activity.~~

Discretion is restricted to:

a. ~~Compatibility of t~~**T**he form~~,~~ **and** materials ~~and setting with~~ **in relation to** the ~~H~~**h**istoric ~~H~~**h**eritage item **and its setting**;

b. Methods to minimise the loss or destruction of the values which contribute to the item's ~~H~~**h**istoric ~~H~~**h**eritage values as assessed by a suitably qualified **or experienced** heritage professional;

c. ~~Compatibility of t~~**T**he treatment of the exterior, including the façade;

d. The ongoing maintenance and enhancement of the ~~H~~**h**istoric ~~H~~**h**eritage values of the item;

e. The long-term viability, retention or ongoing functional use of the item;

f. Whether the works are in accordance with good practice conservation principles and methods as assessed by a suitably qualified **or experienced** heritage professional;

g. If the ~~H~~**h**istoric ~~H~~**h**eritage item is located within a ~~H~~**h**istoric ~~H~~**h**eritage area, that the works do not compromise the ability to interpret the ~~H~~**h**istoric ~~H~~**h**eritage area; and

h. Whether the works complement the form, fabric and setting of the ~~H~~**h**istoric ~~H~~**h**eritage area ~~which the item contributes to~~.

Activity Status where compliance not achieved:

~~Discretionary~~ **N/A**

HH – R~~8~~7	**New Buildings or Structures or Infrastructure and associated earthworks within a Historic Heritage Area identified in Schedule One**

Activity Status Restricted Discretionary

Discretion is restricted to:

a. Effects on the **form, fabric or setting of the historic heritage** area from the scale, location, design including materials, duration and extent of the proposal, the construction methodology and associated site works;

b. The effects of the inter-relationship between buildings, structures and features within that place;

c. Impact on the ability to view or interpret the historic heritage area;

~~c~~**d**. The purpose and necessity of the works and any alternatives considered;

~~d~~**e**. The provisions of a conservation plan where one has been prepared for the schedule**d** ~~H~~**h**istoric **heritage** ~~A~~**a**rea; ~~and~~

~~e~~**f**. Whether the building or structure is for a Poutini Ngāi Tahu cultural purpose**;**

g. Feedback from any consultation undertaken with Heritage New Zealand – Pouhere Taonga and Poutini Ngāi Tahu; and

h. Whether the works proposed enable development of regionally significant infrastructure.

Advice Note:

Where work is proposed that could modify an archaeological site (regardless of whether the site is scheduled as an archaeological site in Te Tai o Poutini Plan or not) obtaining archaeological authority from Heritage New Zealand – Pouhere Taonga (HNZPT) is required before any work starts.

Activity Status where compliance not achieved:

N/A

Discretionary Activities

HH – R~~7~~8 Relocation ~~or Repositioning~~ of a Historic Heritage item identified in Schedule One and associated earthworks ~~where compliance with HH - R4 is not achieved~~

Activity Status ~~Restricted~~ Discretionary

~~Where:~~

~~1. This includes necessary earthworks associated with the activity.~~

~~Discretion is restricted to:~~

~~a. Compatibility of the form materials and setting with in relation to the Historic Heritage item;~~

~~b. Methods to minimise the loss or destruction of the values which contribute to the item's Historic Heritage values as assessed by a suitably qualified heritage professional;~~

~~c. Compatibility of the treatment of the exterior, including the façade;~~

~~d. The ongoing maintenance and enhancement of the Historic Heritage values of the item;~~

~~e. The long-term viability, retention or ongoing functional use of the item;~~

~~f. Whether the works are in accordance with good practice conservation principles and methods as assessed by a suitably qualified heritage professional;~~

~~g. If the Historic Heritage item is located within a Historic Heritage area, that the works do not compromise the ability to interpret the Historic Heritage area; and~~

~~h. Whether the works complement the form, fabric and setting of the Historic Heritage area which the item contributes to~~.

~~**Notification:** Proposals to relocate or reposition public monuments will always be publicly notified.~~

Advice Note:

Where work is proposed that could modify an archaeological site (regardless of whether the site is scheduled as an archaeological site in Te Tai o Poutini Plan or not) obtaining archaeological authority from Heritage New Zealand – Pouhere Taonga (HNZPT) is required before any work starts.

Activity Status where compliance not achieved:

N/A

~~**HH–R10 New Energy Activities and New Infrastructure Activities and associated Earthworks within a Historic Heritage Site or Area identified in Schedule One**~~

~~**Activity Status Discretionary**~~

~~**Activity Status where compliance not achieved:** N/A~~

HH - R~~11~~9	**Earthworks within a Historic Heritage Area or that affect a Historic Heritage Item identified in Schedule One not provided for in another Rule.**
Activity Status Discretionary	
Activity Status where compliance not achieved:	
N/A	
Non-complying Activities	
HH – R~~9~~10	**Demolition and Destruction of a Historic Heritage Item or Area identified in Schedule One**
Activity Status ~~Discretionary~~ Non-complying	
Notification: Activities to demolish or destroy a **historic** ~~H~~**h**eritage ~~i~~**i**tem or ~~A~~**a**rea will always be limited notified to Heritage New Zealand – Pouhere Taonga.	
Activity Status where compliance not achieved:	
N/A	

Methods

HH-M1

Support owners of historic heritage items to maintain their assets through council appropriate resources, such as providing links to guidance documents on resource consent applications on council websites.

HH-M2

The TTPP Committee will consider the merits of inclusion of additional heritage items and areas, and archaeological sites in the Plan as part of their regular monitoring of Plan implementation. People seeking additional items to be scheduled will need to provide an assessment by a suitably qualified or experienced heritage professional that identifies the merits of the item proposed to be scheduled against the criteria in Policy HH – P3. The owner of the item should also be willing for it to be scheduled in the Plan. Where such an assessment and confirmation of agreement to scheduling is provided to the TTPP Committee, the Committee will assess whether there is sufficient justification for scheduling, and if so, schedule the item via a Committee – initiated Plan Change.

HH-M3

Recognise the West Coast heritage groups, including Heritage West Coast, as significant stakeholders in relation to historic heritage matters, and that they play an important role in advocating for and maintaining historic heritage values on the West Coast.

HH-M4

Detailed documentation of historic heritage values of items, areas and archaeological sites listed in Schedule One will be undertaken by the end of 2026. The record of these assessments will be placed on the Te Tai o Poutini Plan website and directly linked to Schedule One. Priorities for assessment are as follows:

1. **Those items and areas which are on private land or are privately owned.**

2. Items and areas on Crown land outside of the public conservation estate.

3. Items and areas on district or regional council lands.

HH-M5

A GIS alert layer will be created that can be accessed by users of the Plan to show the approximate location of unverified archaeological sites, including archaeological sites of Māori origin in Appendix Ten and other New Zealand Archaeological Association (NZAA) sites that are not listed in Schedule One. This layer will incorporate a 100 metre circular buffer area around the approximate location of the archaeological site to serve as an alert to users of the Plan that archaeological material may be uncovered during works in the area. The layer will be accompanied by an advisory note to that effect.

Schedules

Schedule One: Historic Heritage Items and Areas and Archaeological Sites

Te Rārangai Tuatahi: Ngā Rawa me ngā Whenua Tuku Iho

Assessment of the scheduled Historic Heritage Items and Areas **and Archaeological Sites** has been undertaken using the criteria set out in the West Coast Regional Policy Statement Chapter 4, Method 3:

a. Historic;

b. Cultural;

c. Architectural;

d. Archaeological;

e. Technological;

f. Scientific;

g. Social;

h. Spiritual;

i. Traditional;

j. Contextual; and

k. Aesthetic.

The historic heritage values of historic heritage items and areas and archaeological sites in the Schedule are identified in the tables. A description of these historic heritage values is provided below.

Historical and social significance value: Historical and social significance values that demonstrate or are associated with a particular person, group, organisation, institution, event, phase or activity; the continuity and/or change of a phase or activity; social, historical, traditional, economic, political, or other patterns.

Cultural and spiritual value: Cultural and spiritual values that demonstrate or are associated with the distinctive characteristics of a way of life, philosophy, tradition, religion, or other belief, including: the symbolic or commemorative value of the place; significance to Tangata Whenua; and/or associations with an identifiable group and esteemed by this group for its cultural values.

Architectural and aesthetic value: Architectural and aesthetic values that demonstrate or are associated with a particular style, period or designer, design values, form, scale, colour, texture, and material of the place.

Technological and craftmanship value: Technological and craftmanship values that demonstrate or are associated with the nature and use of materials, finishes, and/or technological or construction methods that were innovative, or of notable quality for the period.

Contextual value: Contextual values that demonstrate or are associated with a relationship to the environment (constructed and natural); a landscape, setting, group, precinct or streetscape; a degree of consistency in terms of type, scale, form, materials, texture, colour, style, and/or detail; recognised landmarks and landscape that are recognised and contribute to the unique identity of the environment.

Archaeological and scientific significance value: Archaeological or scientific values that demonstrate or are associated with the potential to provide information through physical or scientific evidence and understanding about social, historical, cultural, spiritual, technological, or other values of past events, activities, structures or people.

SCHED1A – Schedule of Historic Heritage Items and Areas

Unique Identifier	Name, Physical Address, Legal Address	Historic Heritage Values	Extent	Heritage New Zealand Pouhere Taonga Listing Reference and Category
HH3	War Memorial Torea St, Granity Buller Railway Land as shown on DP 15319 (NZ Gazette 1881, p 1127), Nelson Land District	Architectural, Contextual, Historic, Social, Technological	The extent includes part of the land described as Railway Land as shown on DP 15319 (NZ Gazette 1881, p.1127), Nelson Land District, and the structure known as War Memorial thereon. The concrete wall is included in, and marks the boundary of, the ~~registration~~ **scheduled extent.**	5020 Historic Place Category 2
HH24	Utopia Lodge (Former) 72 Queen St, Westport, Buller Lot 4 DP 4199 (CT NL2C/331), Nelson Land District	Aesthetic, Contextual, Social	Extent includes the land described as Lot 4 DP 4199 (CT NL2C/331), Nelson Land District, and the building known as Utopia Lodge (Former) thereon. ~~The modern addition to the rear of Utopia Lodge (Former) is~~	5033 Historic Place Category 2

			~~excluded from the registration~~	
HH27	Big River Quartz Mine Victoria Conservation Park, Big River, Buller Secs 1-4, Blk X and Crown Land Blk X (under action), Waitahu SD and Part Crown Forest Land Blk IV, Mawheraiti SD, (NZ Gazette 1981, p.1420 and NZ Gazette 1958, p.591) and Legal Road, Nelson Land District.	Archaeological, Historic, Technological	Extent includes part of the land described as Secs 1-4, Blk X, and Crown Land Blk X (under action), Waitahu SD and Pt Crown Forest Land Block IV, Mawheraiti Survey District, (NZ Gazette 1981, p.1420 and NZ Gazette 1958, p591), Nelson Land District and the Big River Quartz Mine and road thereon. This includes buildings and structures known as the poppet head, Mine Shafts, Mullock Heap, Cyanide Plant, Boilers, Winding Engines, Cable Trestles, Condenser Shell, Aerial Ropeway, Battery remains, Pelton Wheel remains, Smelter, Water Races, Miner's Cottage, Winding Engine House, and its fittings and fixtures, the following chattels: mine cages, pulley wheels, zinc boxes, tramway remnants, and the following class of chattels: all objects associated with the Big River Quartz Mine within the boundary. ~~(Refer to map in Appendix 1 of the registration report for further information)~~	7762 Historic Place Category 1

HH88	National Bank (Former), Revell and Hamilton St, Hokitika, Westland Sec 6 Town of Hokitika (RT WS3A/128), Westland Land District	Architectural, Contextual, Historic and Technological	Extent includes part of the land described as Sec 6 Town of Hokitika (RT WS3A/128), Westland Land District and the building known as the National Bank (Former) thereon. ~~The timber cottage on the land parcel is not included in the extent of the List entry~~	5057 Historic Place Category 2
HH96	Seddon Statue, 14 Sewell St, Hokitika, Westland Lot 1 DP 3239 (RT WS8B/652), Westland Land District. Located in front of Hokitika Government Buildings (otherwise known as Seddon House).	Cultural and Social	Extent includes part of the land described as Lot 1 DP 3239 (RT WS8B/652), Westland Land District and the structure known as Seddon Statue thereon. ~~See extent map tabled at the Rārangi Kōrero Committee meeting on 30 April 2019.~~	4995 Historic Place Category 1
HH117	**Taramakau Rail Bridge** **Rail corridor over the Taramakau River**	**Historical, Social, Cultural, Aesthetic, Technological, Contextual and Archaeological**	**The extent of setting is limited to the rail corridor in the immediate vicinity of the bridge.**	
HH118	**Dillons Homestead Hut** **Part 39004-GRA Pt Bed Taipo River BLK XII XVI** **Turiwhate SD BLK IX Otira SD**	**Historical, Social, Cultural, Aesthetic, Architectural, Technological, Contextual, and Archaeological**	**The extent of setting is limited to the immediate surrounds of the hut, rather than the land parcel as a whole.**	
HH119	**Hall & Coulthard Payroll Robbery Memorial, Runanga**	**Historical, Social, Cultural, Aesthetic and Contextual**	**The extent of setting is limited to the immediate surroundings of the monument, rather than the subject**	

	Parcel 3702214 [road reserve]		**road reserve as a whole.**	
HH120	**Cobden Battery Observation Post, Cobden Hill** **Parcel 3702264**	**Historical, Social, Cultural, Aesthetic, Technological**	**The extent of setting is the land parcel on which the emplacement is located.**	
HH121	**Kopara Hot Springs Bathing Pool** **Parcel 23676024, NZ Gazette 1940 p. 1785**	**Historical, Social, Cultural, Aesthetic and Contextual** **May have archaeological significance**	**The extent of setting is limited to the immediate surrounds of the pool, rather than the land parcel as a whole.** **[The bathing pool is located on the west side of the Haupiri River, immediately south of its confluence with Cone Creek; the site is part of a large block within the DoC estate.]**	
HH122	**St Patricks Catholic Church, Kumara** **Lot 2 DP 3528 Town of Kumara**	**Historical, Social, Cultural, Spiritual, Architectural, Aesthetic, Technological and Contextual**	**Extent includes the building and the land parcel on which it sits described as Lot 2 DP 3528 Town of Kumara.**	
HH123	**Hannan and Seddon Building, (Former WW Perkins Law Office), 4 Werita Street, Greymouth** **Section 91 Block 3 Greymouth**	**Historical, Social, Cultural, Spiritual, Archtectural, Aesthetic, Technological, Contextual, Archaeological and Scientific**	**Extent includes building and the land parcel on which it sits described as Section 91 Block 3 Greymouth.**

APPENDICES

Appendix 1 – Recommendations

PART A – INTRODUCTORY MATTERS

1. PRELIMINARY MATTERS

1.1. Introduction

1. Matters to do with our appointment and other preliminary matters applicable to all Hearing Panel's recommendations on the Proposed Te Tai o Poutini Plan (**pTTPP** or 'the Plan') are recorded and addressed in Recommendation Report 1.

2. This Recommendation Report relates to the Commercial and Industrial Zones - Ngā Takiwā Pakihi me ngā Takiwā Hanumi and Ngā Takiwā Ahumahi sections of the pTTPP; and contains the Hearing Panel's evaluations and recommendations to the TTPP Committee on the submissions and further submissions received on these sections in Part 1 (Definitions) Part 3, Appendix 3 and the planning maps.

3. The Section 32 Reports[1] provided an evaluation of the Commercial and Mixed Use Zones (CMUZ) and Industrial Zones (INZ) and how they were managed through the combined Plan, including the regulatory framework, resource management issues, the evidence base, consultation, information and analysis undertaken and evaluation of the options.

4. The Section 42A Officer's Report[2] ('s42A Report'), authored by Ms Briar Belgrave, a planner with Barker & Associates Consultancy acting as the Reporting Officer, was circulated prior to the hearing. The s42A Report provided an analysis of submissions and further submissions received; and made recommendations on changes to the notified plan provisions (the changes were included in Appendices 1A–1N and Appendix 3 (planning maps) and the recommendation on all submissions as to either accepted, accepted in part or rejected in Appendix 2. It also contained urban design advice from Ms Alicia Lawrie, an Urban Designer with Barker & Associates Consultancy

5. Ms Belgrave subsequently provided an Addendum s42A Report[3] prepared to address key matters raised by submitters in evidence filed before the hearing. The Addendum Report included five attachments relating to further recommendations on provisions and submissions.

6. The s42A Report assessed a total of 735 submission points and 71 further submission points on the CMUZ and INZ Chapters, Appendix Three: Design Guidelines, and relevant definitions and the planning maps. It provided summaries of all the submissions and further submissions received and the relief sought; an analysis of the proposed changes to provisions; and recommendations on changes to the plan provisions.

7. The matters raised by submitters were generally grouped in the s42A Report in relation to each of the following key issues for each of the two chapters:

    - Definitions (for both Chapters)
    - General Submissions;
    - Overview;

[1] Te Tai o Poutini Plan – Section 32 Evaluation Reports Eight and Nine

[2] Te Tai o Poutini Plan Section 42A Officer's Report Commercial and Industrial Zones - Ngā Takiwā Pakihi me ngā Takiwā Hanumi and Ngā Takiwā Ahumahi

[3] Addendum to Section 42A Report on Commercial and Industrial Zones

- Objectives;
- Policies;
- Rules;
- Rezonings
- Associated Planning Maps; and
- Town Centre Design Guidelines

8. A s32AA Evaluation for the changes was provided at the end of the s42A Report.

9. This Recommendation Report follows the same structure as the s42A Report. It provides a summary of the issues raised in submissions and further submissions, the s42A Report analysis and recommendations, submitter evidence and the Reporting Officer's reply evidence, before providing our evaluation and recommendation.

10. This Recommendation Report should be read in conjunction with the s42A Report and the tracked change version of the notified Plan provisions (attached as Appendix 1 to this Report). The tracked change version of the pTTPP provisions forms an integral part of the decision. It records all recommended amendments (additions and deletions) to the notified TTPP provisions made by the Panel. The tracked change version of the TTPP shows the Panel's recommended changes to the notified provisions in **bold and underlining**, indicating additions and strikethrough, indicating deletions. If there is any discrepancy between this Recommendation Report and the tracked change version of the Plan, the tracked change version of the Plan shown in Appendix 1 of this Report must prevail.

11. This Recommendation Report contains the reasons for the Panel's recommendations. These comprise either adoption of the reasoning and recommendations of the original section 42A Reports or the Reporting Officer's reply evidence (Councils' right of reply post hearing adjournment), or a specific reasoning by the Panel.

12. Where the Panel recommends the pTTPP provisions should remain as notified, it is because:

    (a) The Panel has adopted the reasoning and recommendation of the s42A Report or addendum to retain the provision as notified; or

    (b) The Panel has adopted the reasoning and recommendation to retain the provision as notified, as recommended in the Reporting Officer's reply evidence; or

    (c) The Panel has recommended retaining the provision as notified for reasons set out in this Recommendation Report.

13. Where there is a recommended change to a notified provision of the pTTPP, it is because:

    (a) The Panel has recommended an amendment to a provision for reasons set out in this Recommendation Report in response to a submission point, which the s42A Report did not recommend; or

    (b) The Panel adopted the reasoning and recommendation of the s42A Report to change the provision to that recommended in the original s42A Report; or

    (c) The Panel has adopted the reasoning and recommendation to that recommended in the Reporting Officer's reply evidence; or

(d) A consequential change has been necessary following on from a decision in either (a), (b) or (c).

14. Where there may be a different recommendation between the s42A Report and the Reporting Officer's addendum or reply evidence (i.e., the recommendation by the Reporting Officer has changed as a result of hearing the evidence of submitters), unless the Panel decision specifically adopts the original s42A Report's reasoning and recommendations, the reasoning and recommendations in the (later) reply to evidence has been adopted and it must be taken to prevail.

15. If there are circumstances where the Panel consider that alternative relief is more appropriate than that requested in submissions and further submission to give effect to the RMA, NZCPS, national policy statements and/or RPS, but are still within the scope of the relief sought, the relevant recommendation clearly sets out the nature of the change and the reason for the change. This is recorded in this Recommendation Report.

16. If any changes are recommended to the provisions (since the Section 32A Report was completed), a further evaluation, if required pursuant to section 32AA of the RMA, has been undertaken. Any such circumstances are referred to in this Recommendation Report in sufficient detail to demonstrate that a further evaluation was undertaken.

17. Clause 16(2) of the First Schedule of the RMA enables the Panel to recommend amendments to alter information, where such an alteration is of minor effect, or may correct any minor errors. In the Panel's recommendations below, each section considered in Part C of this Report and in the tracked change version of the notified Plan provisions (Appendix 1 of this Report) records any such minor amendments.

1.2. Terminology in this Report

18. Throughout this Report, the following abbreviations will be used:

Department of Corrections	Ara Poutama Aotearoa, Department of Corrections
BDC	Buller District Council
Councils	Buller District Council, Grey District Council, and Westland District Council
COMZ	Commercial Zone
CMUZ	Commercial and Mixed-Use Zones
FENZ	Fire and Emergency New Zealand
Foodstuffs	Foodstuffs (South Island) Properties Limited and Foodstuffs South Island Limited
Forest & Bird	Royal Forest & Bird Protection Society of NZ Inc
GDC	Grey District Council
GIZ	General Industrial Zone

INZ	Industrial Zones
KiwiRail	KiwiRail Holdings Limited
LIZ	Light Industrial Zone
MOE	Ministry of Education
MUZ	Mixed Use Zone
NCZ	Neighbourhood Centre Zone
Ngāi Tahu	Te Rūnanga o Ngāi Tahu, Te Runanga o Ngāti Waewae, Te Rūnanga o Makaawhio
NPSFM	National Policy Statement for Freshwater Management 2020
NPSUD	National Policy Statement on Urban Development 2020
pTTPP	Proposed Te Tai Poutini Plan
RMA or the Act	Resource Management Act 1991
RPS	West Coast Regional Policy Statement
SASM	Sites and Areas of Significance to Māori
SFF	Silver Fern Farms Limited
TCZ	Town Centre Zone
Waka Kotahi NZTA	NZ Transport Agency Waka Kotahi
WCRC	West Coast Regional Council
WDC	Westland District Council
WMP	Westland Milk Products

1.3. Hearing Arrangements

19. The hearing was held at the West Coast Regional Council Building on the 1st & 2nd of July 2024. Some submitters appeared by internet connection.

20. At the hearing, Ms Belgrave tabled a Planning Summary Statement to her s42A Report and an Addendum Report.

1.4. Appearances

21. The following submitters appeared at the hearing:

Mr Steve Tuck, Planner for Silver Fern Farms Limited

Mr Kevin Scanlon for Martin & Co Westport Ltd and Lumberland Building Market Westport

Mr Jonathan Bhana-Thomson for New Zealand Heavy Haulage Association Inc

Ms Frida Inta for Buller Conservation Group and herself

Mr Richard Black for Westland Milk Products

1.5. Overview of submitter evidence received

22. No legal submissions were received.

23. For those appearing at the hearing, the following evidence and/or statements were received:

    (a) Mr Steve Tuck, planner for Silver Fern Farms Limited (dated 30 May 2024 and a summary statement dated 26 June 2024);

    (b) Mr Kevin Scanlon, for Martin & Co Westport Ltd and Lumberland Building Market Westport (received 1 July 2024);

    (c) Mr Jonathan Bhana-Thomson, Chief Executive of the New Zealand Heavy Haulage Association Inc (dated 14 June 2024);

    (d) Mr Martin Kennedy, planner for Westpower Limited (dated 12 February 2024);

    (e) Ms Frida Inta (received 1 July 2024) on behalf of Buller Conservation Group and herself; and

    (f) Mr Richard Black, Planner for Westland Milk Products (dated 29 July 2024 [sic]).

24. Following the receipt of the s42A Report and the Addendum to the s42A Report, the following were received:

    (a) Robert Kinney, Chief Executive Officer of Isaac Construction Limited, provided the statement of evidence dated 30 May 2024. In his evidence, he outlines the current and future activities on the Isaac Construction landholdings at Kaiata, which supports the submission to rezone part of their site from LIZ to GIZ.

    (b) Kim Seaton, Consultant Planner on behalf of Isaac Construction Limited, provided a statement of evidence dated 30 May 2024. Her evidence addressed the submission to rezone part of the Isaac Construction site at Kaiata from LIZ to GIZ.

    (c) Darran Humpheson, Acoustic Consultant on behalf of Silver Fern Farms, provided the statement of evidence dated 7 March 2024. His evidence addressed the potential for reverse sensitivity from noise in relation to the Silver Fern Farms site at Hokitika.

    (d) Fire and Emergency New Zealand (FENZ) advised[4] it did not intend to appear at the hearing and that it accepted the recommendations by the reporting officer on many of the submission points. The letter provided additional discussion on those submission points that the reporting officer rejected.

[4] Letter from George van Pelt, Consultants Planner dated 21 June 2024.

(e) The Ministry of Education confirmed[5] that they would not be attending the hearing. The letter indicated their support for various recommendations in the S42A report and reiterated their submission point regarding noise.

(f) KiwiRail provided a letter[6] confirming that they would not be attending the hearing. The letter indicated that KiwiRail continued to seek amendments to building setback requirements from the rail corridor.

(g) Terra Firma Mining Limited (Terra Firma) provided a letter[7] confirming it would not be filing evidence and did not wish to be heard at the hearing. The letter responded to the Reporting Officers' recommendations on Terra Firma's submission points, which were essentially in support of the changes proposed.

(h) Pauline Hadfield, Consultant Planner on behalf of Griffen & Smith Ltd provided a statement of evidence dated 14 June 2024. The evidence responded to a point of clarification requested by the Reporting Officer.

(i) A Memorandum of Counsel on behalf of Foodstuffs (South Island) Limited (Foodstuffs) was received on 30 May 2024. The memorandum provided Foodstuffs' response to the Officer's recommendations in the section 42A report. It indicated support for the Officer's recommendation to accept/accept in part many of the submission points. It provided additional discussion on those submission points that the reporting officer rejected.

1.6. Right of Reply

25. Ms Belgrave provided a written Right of Reply (dated 3 October 2024) that included updated appendices showing tracked changes (and a clean version) to the notified provisions. Other appendices included a wiring assessment of objectives, policies and rules for the Industrial Zones.

26. Joint rights of reply were also received in response to submissions from KiwiRail[8] and Silver Fern Farms[9].

1.7. Procedural Steps and Issues

27. No procedural issuing arose from this hearing.

1.8. Site Visits

28. As part of this hearing, we undertook site visits as follows:

(a) The Silver Ferns Farm site at Hokitika

(b) The Westland Dairy site at Hokitika

(c) Kaiata Industrial area

[5] Letter from Daly Williams, Consultants Planner dated 1 July 2024
[6] Letter from Michelle Grinlinton-Hancock dated 28 May 2024
[7] Letter from Lucy Smith, Managing Director dated 30 May 2024
[8] Dated 7 October 2024
[9] Dated 17 October 2024

PART B - STATUTORY REQUIREMENTS AND DOCUMENTS

29. Part 3 - Area-Specific Matters - Te Wāhanga 3 - Ngā Take a Ia Rohe of the pTTPP contains a Zones - Ngā Takiwā section. The Zones section contains the two subsections relevant to this decision. Commercial and Mixed Zones - Ngā Takiwā Pakihi me ngā Takiwā Hanumi and Industrial Zones - Ngā Takiwā Ahumahi. These subsections comprise eight chapters, including the CMUZ, COMZ, MUZ, NCZ, TCZ, INZ, GIZ, and LIZ chapters. The CMUZ chapter contains objectives and policies for the four commercial and mixed-use zones, i.e., COMZ, MUZ, NCZ and TCZ, while the INZ chapter does the same for the industrial zones, i.e. GIZ and LIZ. Whereas the COMZ, MUZ, NCZ, TCZ, GIZ and LIZ chapters each contain rules to manage activities within their respective zone, and activity-specific standards with the Permitted Activity rules.

30. The Section 32 Report outlined the relevant statutory considerations applicable to commercial, mixed-use and industrial land, and the relationships between the sections of the RMA and higher order documents.

31. The section 42A Report highlighted the relevant sections of the RMA, and higher order statutory documents and relevant documents. The Panel notes in particular the following:

    (a) New Zealand Coastal Policy Statement 2010 (**NZCPS**);

    (b) National Policy Statement for Freshwater Management 2020 (**NPSFM**);

    (c) National Policy Statement for Indigenous Biodiversity 2023 (**NPSIB**);

    (d) Iwi Management Plans, Mana Whakahono a Rohe; and

    (e) West Coast Regional Policy Statement 2020 (**RPS**).

32. It is also noted there are three iwi management plans on the West Coast – the Te Rūnanga o Makaawhio Pounamu Management Plan, the Ngāti Waewae Pounamu Management Plan and the Lake Māhinapua Management Plan.

33. Clause 10 of the First Schedule of the RMA, states that providing decisions on individual submissions is unnecessary. The Panel's recommendations are made within the scope of the requested relief, either individual submissions or groups of submissions making similar requests, as specified in the reasons for the recommendation. References to relevant submissions are made in the footers.

34. The National Planning Standards set out the zones allowed for use in the Plan and provide the following information for the zones addressed in this decision:

    (a) Commercial Zone - Areas used predominantly for a range of commercial and community activities;

    (b) Mixed Use Zone - Areas used predominantly for a compatible mixture of residential, commercial, light industrial, recreational and/or community activities.

    (c) Neighbourhood Centre Zone - Areas used predominantly for small-scale commercial and community activities that service the needs of the immediate residential neighbourhood.

    (d) Town Centre Zone - Areas used predominantly for:

i. in smaller urban areas, a range of commercial, community, recreational and residential activities.

ii. in larger urban areas, a range of commercial, community, recreational and residential activities that service the needs of the immediate and neighbouring suburbs.

(e) General Industrial Zone - Areas used predominantly for a range of industrial activities. The zone may also be used for activities that are compatible with the adverse effects generated from industrial activities.

(f) Light Industrial Zone - Areas used predominantly for a range of industrial activities, and associated activities, with adverse effects (such as noise, odour, dust, fumes and smoke) that are reasonable to residential activities sensitive to these effects.

35. The Panel are satisfied that the proposed Commercial, Mixed Use and Industrial Zones are consistent with this national direction.

PART C – SUBMISSIONS, EVIDENCE, EVALUATION AND RECOMMENDATIONS

2. DEFINITIONS

Submissions and Further Submissions

36. Thirteen submission points and two further submission points relating to definitions were summarised in a Table on pages 15-16 of the s42A Report. Six submissions sought to retain the definition for '*industrial activity*'. Seven submissions sought amendments to other definitions.

37. The Panel has considered the relevant submissions and further submissions received and adopts the summaries in the s42A Report.

Section 42A Report

38. Ms Belgrave acknowledged the support from the six submission points[10] to retain the definition for '*industrial activity*'. She supports the relief sought as the definition is in accordance with the Planning Standards.

39. In response to the submission point made by BDC that sought to either delete all references to '*large format retail activities*' and '*retail activities*' from the pTTPP or define them, Ms Belgrave supported the relief in part. She recommends amending the definition for '*retail activity*' to include a detailed definition for the type of activities that are anticipated, which is in keeping with the definition for '*commercial activity*':

> *Retail activity:*
>
> ***means any commercial activity that uses land and/or buildings for displaying or offering of goods for sale or hire to the public.*** *Excludes service stations, trade retail and trade suppliers, car sales and drive-through restaurants.*

40. Ms Belgrave does not support the relief sought with respect to '*large format retail*'. This is because the term is only used in GRUZ-R30, and she sees an opportunity to consider the need for a definition in the Rural Zones hearing stream.

41. Ms Belgrave supports the submission point from Foodstuffs to include a definition for '*supermarket*'. She agrees that the wording sought in the submission is appropriate. It is:

> *'A retail activity that uses land and/or buildings for displaying or offering a comprehensive range of food, beverage and other disposable goods such as fresh meat and produce; chilled, frozen, packaged, canned and bottled foodstuffs and beverages; and housekeeping and other personal items for sale to the public.'*

42. In response to the submission point made by Birchfield Coal Mines Limited that sought the addition of *'firewood and coal supplies'* to the definition of '*trade retail and trade suppliers*', Ms Belgrave does not support the relief sought. She considers that the sale of firewood and coal supplies would fall within the definition of '*commercial activity*' and the proposed definition of '*retail activity*'. On that basis, she does not consider it necessary for inclusion in the '*trade retail and trade suppliers*' definition.

[10] Silver Fern Farms (S441.003), Birchfield Coal Mines Ltd (S601.007), BRM Developments Limited (S603.007), Birchfield Ross Mining Limited (S604.007), Phoenix Minerals Limited (S606.007), and Whyte Gold Limited (S607.007)

43. In response to two submission points made by GDC that sought the addition of a definition for '*waste management area'* and '*indoor storage space'*, Ms Belgrave does not support the relief sought as the submitter has not provided preferred wording for either term. Additionally, she considers that the ordinary meaning of the terms provides sufficient clarity.

44. In response to another submission point made by GDC that sought to add a definition for '*outdoor service space'*, Ms Belgrave advises that, as it is her recommendation to delete the requirements for an outdoor storage space in the CMUZ, she does not support including a definition for the term.

45. In response to a further submission point made by GDC that sought to add a definition for '*outlook space'*, Ms Belgrave recommends that, in the absence of preferred wording from the submitter, she does not support including a definition. She notes that '*outlook space'* is a requirement for residential units in the COMZ, and subject to the amendments recommended for COMZ-R5, the rule will provide sufficient clarity. Ms Belgrave also comments that this term is not defined in other second-generation plans or in the Medium Density Residential Standards.

46. The S42A report recommends that the Definitions be amended as follows:

> *Retail Activity:*
>
> ***means any commercial activity that uses land and/or buildings for displaying or offering of goods for sale or hire to the public.*** *Excludes service stations, trade retail and trade suppliers, car sales and drive-through restaurants.*
>
> ***Supermarket***
>
> ***A retail activity that uses land and/or buildings for displaying or offering a comprehensive range of food, beverage and other disposable goods such as fresh meat and produce; chilled, frozen, packaged, canned and bottled foodstuffs and beverages; and housekeeping and other personal items for sale to the public.***

Hearing and Submitter Evidence

47. The legal submissions made by Ms Alex Booker on behalf of Foodstuffs accept the S42A report recommendation relating to the definition of '*supermarket*'.

48. Despite not making any submissions on the definitions, Ms Frida Inta presented a statement at the hearing offering views on the S42A recommendation. She does not support the inclusion of a definition for '*supermarket*'.

49. No other evidence was presented at the hearing in relation to the submission points about the definitions.

Reporting Officer Reply Evidence

50. In response to questions from the Panel, Ms Belgrave considered the need for the inclusion of definitions for '*offices*' and '*services*'.

51. In response to these questions, she considers that the definition for '*commercial activity'* is sufficiently clear that an additional definition for '*services*' is not necessary.

52. Notwithstanding matters related to scope, she does consider that a definition for '*offices*' will provide helpful clarification to plan users, noting that the term is used in NCZ-R1 and NCZ-R11. It will also align with the definition for '*commercial activity'*.

53. Ms Belgrave recommends that the following definition be included for '*offices*':

Offices

"means a commercial activity where administrative, clerical, professional, management, or government activities are conducted"

54. In response to Ms Frida Inta's comments in her statement that question the need for '*supermarket*' to be defined, Ms Belgrave considers that the inclusion of the definition will provide a helpful clarification.

55. In response to questions from the Panel as to whether a definition of *'contaminated'* is required, Ms Belgrave advises that, due to other recommended amendments in the GIZ and LIZ, the word '*contaminated*' has been deleted. As such, the need for the word to be defined is no longer relevant.

Hearing Panel's Evaluation

56. The Panel agree with Ms Belgrave's recommendation and her justification not to include new definitions for *'waste management area', 'indoor storage space', 'outdoor service space'* or '*outlook space'*. We also agree with her recommendation not to amend the definition of '*trade retail and trade suppliers'*.

57. The Panel accept Ms Belgrave's recommendation to amend the definitions of '*Retail activity'* and to add a definition for *'Supermarket'* based on the submissions from BDC and Foodstuffs, respectively. We consider these to be appropriate amendments.

58. The Panel accept Ms Belgrave's justification in her right of reply not to include a definition for '*services'*.

59. The Panel accepts that adding a definition of '*offices*' would be helpful, but since we have not been able to find a submission to provide support and scope for that addition, we cannot accept Ms Belgrave's recommendation to include that definition. This addition could be the subject of a future plan change.

Hearing Panel's Recommendation

60. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are either accepted or accepted in part, and recommends the following changes to the **Definitions**:

Definitions - Ngā Tautuhinga	
Term	**Definition**

RETAIL ACTIVITY	**means any commercial activity that uses land and/or buildings for displaying or offering of goods for sale or hire to the public.**[11] Excludes service stations, trade retail and trade suppliers, car sales and drive through restaurants.
SUPERMARKET	**means a retail activity that uses land and/or buildings for displaying or offering a comprehensive range of food, beverage and other disposable goods such as fresh meat and produce; chilled, frozen, packaged, canned and bottled foodstuffs and beverages; and housekeeping and other personal items for sale to the public.**[12]

3. COMMERCIAL AND MIXED USE ZONE

3.1. Whole Chapter

Submissions and Further Submissions

61. Four submissions points and two further submission points relating to general matters or the Commercial and Mixed-Use Zones collectively were summarised in a Table on page 8 of the s42A Report. The Panel has considered the relevant submissions and further submissions received and adopts the summaries in the s42A Report.

Section 42A Report

62. In response to the submission points made by Foodstuffs to make amendments throughout the CMUZ provisions to provide for supermarkets, Ms Belgrave supports this submission in part. While she does not recommend specific provisions (particularly rules), she considers that amendments to definitions and other submission points made by Foodstuffs provide some relief to these general submission points.

63. In response to the submission points made by Ngāi Tahu that sought amendments to include Poutini Ngāi Tahu values as a matter for consideration for controlled and restricted discretionary activities and as a new objective, Ms Belgrave notes that this is a common submission point across multiple hearing streams. It has particularly been addressed in the Strategic Directions hearing stream, with the recommended amendment to UFD-O1. As to whether a new matter for control or discretion should be included in the provisions, Ms Belgrave assesses this issue when considering the relevant Plan provisions.

64. Ms Belgrave also acknowledges that sites and areas of significance to Māori are mapped, and that there are some within the urban environment. She also notes that existing objectives and policies refer to maintaining and enhancing amenity values (noting that this includes cultural attributes). On this basis, she does not recommend an additional objective.

65. Ms Belgrave did not make any recommendations to amend the provisions in response to these submission points.

Hearing and Submitter Evidence

66. The legal submissions made by Ms Alex Booker on behalf of Foodstuffs reiterate submission point S464.011 that express provisions are needed for supermarkets due to the restrictive

[11] Buller District Council (S538.013)
[12] Foodstuffs (South Island) Properties Limited and Foodstuffs South Island (S464.006)

permitted activity standard, which does not consider supermarket activity. These provisions, he submitted, should recognise the functional and operational needs of supermarkets and allow for design mitigation, rather than operation minimisation.

Reporting Officer Reply Evidence

67. There was no specific consideration of these general matters in the reply evidence.

Hearing Panel's Evaluation

68. The Panel agrees with Ms Belgrave's recommendations regarding submissions received on the Chapter as a Whole. We accept that an amendment relating to Poutini Ngāi Tahu values is relevant and that this has been appropriately addressed across multiple Hearing Streams. We also accept that no additional objective relating to cultural attributes is necessary in this part of the Plan.

69. The Panel agrees with Ms Belgrave's recommendation that the addition of a definition (discussed above) for '*supermarket*' partly but in our view sufficiently addresses the submission point made by Foodstuffs.

Recommendation

70. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends no changes in relation to the general matters raised in submissions and further submissions across the CMUZ.

3.2. Commercial and Mixed-Use Overview

Submissions and Further Submissions

71. No submissions or further submissions were received with respect to the CMUZ Overview.

3.3. Commercial and Mixed-Use Objectives

Submissions and Further Submissions

72. Eight submission points relating to the Commercial and Mixed-Use Zone Objectives (as a whole) were summarised in a Table on pages 19-20 of the s42A Report. Seven submission points sought to retain the objectives as notified. The eighth submission sought to add a new objective.

73. Six submission points and two further submission points relating to **CMUZ-O1** were summarised in a Table on page 21 of the s42A Report. Three submissions supported the retention of the objective as notified, and the other three sought amendments.

74. Two submission points and two further submission points relating to **CMUZ-O2** were summarised in a Table on page 22 of the s42A Report. One submission supported the retention of the objective as notified, and the other one sought an amendment, which was opposed by the two further submissions.

75. Two submission points relating to **CMUZ-O3** were summarised in a Table on page 23 of the s42A Report. One submission supported the retention of the objective as notified, and the other sought an amendment.

76. The Panel adopts these summaries and has considered all the relevant submissions and further submissions.

Section 42A Report

Objectives (General)

77. In relation to the objectives (as a group), Ms Belgrave acknowledged the support from the submitters that seek to retain the objectives as notified. The acknowledgement is subject to recommended amendments that arise from other submissions on specific objectives.

78. In response to the submission point made by the TTPP Committee that sought to add a new objective to the CMUZ, Ms Belgrave supports the relief sought to include an objective that outlines the role of each zone and the overall approach to the zoning framework. Because of the recommended objective, consequential amendments to CMUZ-O2 are also proposed to avoid repetition and to consolidate the two objectives.

79. The S42A report recommends that a new objective be added to the CMUZ chapter and that consequential amendments be made to CMUZ-O2 as follows:

> ***CMUZ – OX***
>
> ***The region's commercial needs are provided for via a suite of commercial zones that:***
>
> ***(a) recognise the importance of the West Coast/Te Tai o Poutini town centres;***
>
> ***(b) serve the immediate need of the local community;***
>
> ***(c) provide for mixed use and redevelopment opportunities at Greymouth; and***
>
> ***(d) provide for larger scale commercial activities in appropriate locations.***
>
> *CMUZ - O2*
>
> *To* ***~~recognise the importance of the West Coast/Te Tai o Poutini town centres and~~*** *maintain* ***~~their~~ the*** *integrity* ***of the West Coast/Te Tai o Poutini town centres*** *as a place of high-quality built environment character, community and visitor focus and identity.*

Objective 1

80. In relation to CMUZ-O1, Ms Belgrave acknowledged the support from the submitters that seek to retain the objective as notified. The acknowledgement is subject to recommended amendments that arise from other submissions.

81. Ms Belgrave does not support the relief sought by Foodstuffs to make amendments to refer to managing amenity effects on adjoining sensitive activities in place of minimising adverse effects on amenity within and adjoining commercial areas. She does not support an amendment to only refer to adjoining sensitive activities. However, she does acknowledge the concerns raised by Foodstuffs as to the restrictive nature of the objective. Therefore, she recommends rewording CMUZ-O1 into two separate objectives as follows:

> *To maintain and enhance the character and amenity values of commercial areas and town centres* ***while enabling ~~in a way that enables~~*** *commercial and other activities to support the local community and visitors*. ***~~while minimising adverse effects on amenity within and adjoining the commercial areas.~~***
>
> ***Avoid, remedy, and mitigate adverse effects of commercial and other activities within and adjoining the commercial areas.***

82. In response to the two submission points made by Buller Conservation Group and Frida Inta that sought amendments to recognise historical heritage, Ms Belgrave does not support the relief sought. This is because these values are managed in the Historic Heritage chapter and in Schedule One. The duplication sought by the submission is considered unnecessary.

83. The S42A report recommends that CMUZ-O1 be amended as follows:

> ***CMUZ-O1***
>
> *To maintain and enhance the character and amenity values of commercial areas and town centres* ***while enabling*** ~~***in a way that enables***~~ *commercial and other activities to support the local community and visitors.* ~~***while minimising adverse effects on amenity within and adjoining the commercial areas.***~~
>
> ***CMUZ-O2A***
>
> ***Avoid, remedy, and mitigate adverse effects of commercial and other activities within and adjoining the commercial areas****.*

Objective 2

84. In relation to CMUZ-O2, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the objective as notified. The acknowledgement is subject to recommended amendments that arise from other submissions.

85. Ms Belgrave does not support the relief sought by Forest and Bird to amend the objective to ensure that a '*high quality urban environment'* is one where natural values and biodiversity are maintained. She considers that these values are appropriately provided for elsewhere in the Plan and duplication is not necessary.

86. In response to the submission point made by the TTPP Committee and considered above as part of the objectives more generally, Ms Belgrave recommends consequential amendments to CMUZ-O2.

87. The S42A report recommends that CMUZ-O2 be amended as follows:

> *CMUZ - O2*
>
> *To* ~~***recognise the importance of the West Coast/Te Tai o Poutini town centres and***~~ *maintain* ~~***their***~~ ***the*** *integrity* ***of the West Coast/Te Tai o Poutini town centres*** *as a place of high-quality built environment character, community and visitor focus and identity.*

Objective 3

88. In relation to CMUZ-O3, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the objective as notified.

89. In response to the submission point made by Forest and Bird (that is the same as that made regarding CMUZ-O2), Ms Belgrave reiterates that she does not support the relief sought.

90. The S42A report recommends retaining CMUZ-O3 as notified.

Hearing and Submitter Evidence

91. The joint statement presented by Frida Inta and Buller Conservation Group raised questions regarding what type of adverse effect the recommended new objective (CMUZ-O2A) is seeking to manage. The recommended new objective is a result of a submission point by Foodstuffs on CMUZ-O1, and both Ms Inta and the BCG submitted CMUZ-O1. The joint statement considers that the wording sought by Foodstuffs to '*manage amenity effects on adjoining sensitive activities'* is more appropriate.

92. The legal submissions made by Ms Alex Booker on behalf of Foodstuffs accept the S42A report recommendation relating to CMUZ-O1 and CMUZ-O2A.

93. No other evidence was presented at the hearing in relation to the submission points on the CMUZ objectives.

Reporting Officer Reply Evidence

94. In response to the statement presented by Ms Inta at the hearing regarding CMUZ-O2A, Ms Belgrave clarified that the types of potential effects that might occur in the CMUZ could include amenity effects, particularly as the zones provide for residential units as a permitted activity, or visual and dominance effects associated with buildings that exceed the permitted building envelope. She also reiterated that she does not support the amendment to only refer to sensitive activities for the reasons set out in the S42A report.

Hearing Panel's Evaluation

95. The Panel agree with Ms Belgrave's recommendation to add a new objective to the CMUZ that sets out the purpose of each zone in the Chapter. We agree with the wording in the S42A report and the consequential amendments to CMUZ-O2.

96. The Panel agree with Ms Belgrave's recommended wording for CMUZ-O1 and the recommendation to separate it into two separate objectives. We acknowledge that Foodstuffs have confirmed their agreement with the wording in their legal submissions.

97. The Panel agree with Ms Belgrave's recommendation to retain CMUZ-O3 as notified.

98. We note that the addition of the new objectives results in a renumbering of these provisions, and we have revised them accordingly.

99. In relation to the remainder of the submissions on the Objectives, the Panel agree that these should be rejected based on the conclusions reached by Ms Belgrave.

Hearing Panel's Recommendation

100. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below be accepted or accepted in part and recommends that the following amendments be made to the **Commercial and Mixed-Use Zone Objectives**:

Commercial and Mixed Use Zones Objectives	
CMUZ – O1	To maintain and enhance the character and amenity values of commercial areas and town centres **while enabling** ~~in a way that enables~~ commercial and other

	activities to support the local community and visitors ~~while minimising adverse effects on amenity within and adjoining the commercial areas~~.[13]
CMUZ – O2	**Avoid, remedy, or mitigate adverse effects of commercial and other activities within and adjoining the commercial areas.**[14]
CMUZ – O~~2~~3[15]	To ~~recognise the importance of the West Coast/Te Tai o Poutini town centres and~~ maintain ~~their~~ **the** integrity **of the West Coast/Te Tai o Poutini town centres**[16] as a place of high-quality built environment character, community and visitor focus and identity.
CMUZ – O~~3~~4[17]	To recognise that Greymouth/Māwhera is the principal commercial and urban centre on the West Coast/Te Tai o Poutini and support its redevelopment through providing for a range of commercial and mixed use zones and activities within a high-quality urban environment.
CMUZ – O5	**The region's commercial needs are provided for via a suite of commercial zones that:** **(a) recognise the importance of the West Coast/Te Tai o Poutini town centres;** **(b) serve the immediate need of the local community;** **(c) provide for mixed use and redevelopment opportunities at Greymouth; and** **(d) provide for larger scale commercial activities in appropriate locations.**[18]

3.4. Commercial and Mixed Use Policies

Submissions and Further Submissions

101. Four submission points relating to the Commercial and Mixed Use Zone Policies (as a whole) were summarised in a Table on pages 23-24 of the s42A Report. All submissions supported the policies. However, three sought a point of clarification.

102. Three submission points relating to **CMUZ-P1** were summarised in a Table on pages 24-25 of the s42A Report. One submission point supported the retention of the policy as notified. Two submission points sought amendments.

103. Ten submission points relating to **CMUZ-P2** were summarised in a Table on pages 25-26 of the s42A Report. All submission points supported the retention of the policy as notified.

104. Six submission points relating to **CMUZ-P3** were summarised in a Table on page 26 of the s42A Report. All submission points supported the retention of the policy as notified.

105. Seven submission points and four further submission points relating to **CMUZ-P4** were summarised in a Table on page 27 of the s42A Report. One submission point supported the retention of the policy as notified. Six submission points sought amendments.

[13] Foodstuffs (S464.012)
[14] Foodstuffs (S464.012)
[15] Consequential numbering amendment
[16] Consequential to Te Tai o Poutini Plan Committee (S171.007)
[17] Consequential numbering amendment
[18] Te Tai o Poutini Plan Committee (S171.007)

106. Three submission points relating to **CMUZ-P5** were summarised in a Table on page 27 of the s42A Report. All submission points supported the retention of the policy as notified.

107. Two submission points relating to **CMUZ-P6** were summarised in a Table on page 30 of the s42A Report. One submission point supported the retention of the policy as notified, and the other sought amendments.

108. Two submission points and one further submission relating to **CMUZ-P7** were summarised in a Table on page 31 of the s42A Report. One submission point supported the retention of the policy as notified, and the other (and further submission) sought amendments.

109. Two submission points relating to **CMUZ-P8** were summarised in a Table on pages 31 - 32 of the s42A Report. Both submission points supported the retention of the policy as notified.

110. Three submission points relating to **CMUZ-P9** were summarised in a Table on page 32 of the s42A Report. One submission point supported the retention of the policy as notified, and the others sought amendments.

111. One submission point relating to **CMUZ-P10** was summarised in a Table on page 33 of the s42A Report. The submission point supported the retention of the policy as notified.

112. Three submission points relating to **CMUZ-P11** were summarised in a Table on page 33 of the s42A Report. Two submission points supported the retention of the policy as notified, and the other sought amendments.

113. Three submission points relating to **CMUZ-P12** were summarised in a Table on page 34 of the s42A Report. All the submission points supported the retention of the policy as notified.

114. Nine submission points and one further submission relating to **CMUZ-P13** were summarised in a Table on pages 34-36 of the s42A Report. Three submission points supported the retention of the policy as notified, and the others, including the further submission, sought amendments.

115. One submission point relating to **CMUZ-P14** was summarised in a Table on page 37 of the s42A Report. The submission point supported the retention of the policy as notified.

116. Four submission points and one further submission relating to **CMUZ-P15** were summarised in a Table on pages 37-38 of the s42A Report. Two submission points supported the retention of the policy as notified, and the others, including the further submission, sought amendments.

117. Two submission points relating to **CMUZ-P16** were summarised in a Table on page 40 of the s42A Report. Both submission points supported the retention of the policy as notified.

118. One submission point relating to **CMUZ-P17** was summarised in a Table on page 40 of the s42A Report. The submission point supported the retention of the policy as notified.

119. One submission point relating to **CMUZ-P18** was summarised in a Table on page 40 of the s42A Report. The submission point supported the retention of the policy as notified.

120. One submission point relating to **CMUZ-P19** was summarised in a Table on page 41 of the s42A Report. The submission point supported the retention of the policy as notified.

121. One submission point relating to **CMUZ-PREC1-P1** was summarised in a Table on page 41 of the s42A Report. The submission point supported the retention of the policy as notified.

122. One submission point relating to **CMUZ-PREC1-P2** was summarised in a Table on page 41 of the s42A Report. The submission point supported the retention of the policy as notified.

123. One submission point relating to **CMUZ-PREC1-P3** was summarised in a Table on page 42 of the s42A Report. The submission point supported the retention of the policy as notified.

124. One submission point relating to **CMUZ-PREC1-P4** was summarised in a Table on page 42 of the s42A Report. The submission point supported the retention of the policy as notified.

125. Two submission points and one further submission point relating to **CMUZ-PREC1-P5** were summarised in a Table on pages 42-43 of the s42A Report. The submission points sought an amendment to the policy.

126. One submission point relating to **CMUZ-PREC1-P6** was summarised in a Table on page 44 of the s42A Report. The submission point sought an amendment to the policy.

127. One submission point relating to **CMUZ-PREC2-P7** was summarised in a Table on page 44 of the s42A Report. The submission point sought an amendment to the policy.

128. Two submission points relating to **CMUZ-PREC2-P8** were summarised in a Table on page 45 of the s42A Report. The submission points supported the retention of the policy as notified.

129. Two submission points and one further submission point relating to **CMUZ-PREC2-P9** were summarised in a Table on page 45 of the s42A Report. The submission points sought amendment to the policy.

130. One submission point relating to **CMUZ-PREC3-P10** was summarised in a Table on page 42 of the s42A Report. The submission point supported the retention of the policy as notified.

131. One submission point relating to **CMUZ-PREC3-P11** was summarised in a Table on page 46 of the s42A Report. The submission point sought an amendment to the policy.

132. Two submission points and one further submission point relating to **CMUZ-PREC3-P12** were summarised in a Table on page 47 of the s42A Report. The submission points sought amendment to the policy.

133. One submission point relating to **CMUZ-PREC4-P13** was summarised in a Table on page 47 of the s42A Report. The submission point supported the retention of the policy as notified.

134. One submission point relating to **CMUZ-PREC4-P14** was summarised in a Table on page 48 of the s42A Report. The submission point supported the retention of the policy as notified.

135. One submission point and one further submission point relating to **a new policy** were summarised in a Table on page 48 of the s42A Report. The submission points sought to add a new policy.

136. The Panel adopts these summaries and has considered all the relevant submissions and further submissions.

Section 42A Report

Policies (General)

137. Ms Belgrave acknowledged the support from the submitters who generally support the policies as notified. The acknowledgement is subject to recommended amendments that arise from other submissions on specific policies.

138. In response to the three submission points made by BDC that sought clarification with respect to the terms '*precincts*' and '*town centres',* Ms Belgrave advises that each of the Town Centres is also subject to a Precinct, with provisions specific to each town (Westport, Greymouth, Reefton and Hokitika). Unfortunately, there is an error in the mapping, and the Precinct Overlays have not been mapped. However, to clarify the provisions, the COMZ objectives and policies apply across all TCZ's and then the suite of specific policies applies for each of the four Precincts.

139. The S42A report recommends amending the planning maps to include the four precincts overlaid with each spatial extent of the TCZs for Westport, Greymouth, Reefton and Hokitika.

CMUZ - Policy 1

140. In relation to CMUZ-P1, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified. The acknowledgement is subject to recommended amendments that arise from other submission points.

141. Ms Belgrave supports the submission point made by Waka Kotahi that sought to amend the typo (CUMZ to CMUZ) in the heading above the CMUZ policies.

142. In response to the submission point made by Ngāi Tahu that sought to ensure Poutini Ngāi Tahu values are considered as part of the urban environment, Ms Belgrave considered that, as this policy relates to the protection of cultural landscapes, the relief sought by the submission point is already achieved. Additionally, the submitter offered no specific wording with respect to this policy.

143. The S42A report recommends the following amendments to CMUZ – P1.

> ***Activities and Development in ~~CUMZ~~ CMUZ – Commercial and Mixed Use Zones***
>
> ***CMUZ – P1***
>
> *Where cultural landscapes are identified in commercial areas or developments, ensure activities are managed in a way that provides for the cultural relationships of Poutini Ngāi Tahu including;*
>
> *a. Protection of wāhi tapu and taonga sites in Schedule Three of the Plan using Poutini Ngāi Tahu culturally appropriate methods;*
>
> *b. Identification and utilisation of opportunities to enhance sites, values and other taonga of cultural significance to Ngāi Tahu; and*
>
> *c. Protection of the relationship of Poutini Ngāi Tahu with freshwater, including cultural wellbeing and use opportunities.*

CMUZ - Policy 2

144. In relation to CMUZ-P2, Ms Belgrave acknowledged the support from all the submitters that sought to retain the policy as notified.

145. Ms Belgrave recommends that CMUZ-P2 be retained as notified.

CMUZ - Policy 3

146. In relation to CMUZ-P3, Ms Belgrave acknowledged the support from all the submitters that sought to retain the policy as notified.

147. Ms Belgrave recommends that CMUZ-P3 be retained as notified.

CMUZ - Policy 4

148. In relation to CMUZ-P4, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified. The acknowledgement is subject to recommended amendments that arise from other submissions on specific policies.

149. In response to the submission point made by Foodstuffs that sought various amendments to the policy, Ms Belgrave supports the relief sought in part. The submission sought three areas of relief:

a. Deleting the reference to managing the effects of carparking; and

b. Including a consideration for operational and functional requirements of activities; and

c. Deleting the words '*and is expected to'*.

150. Ms Belgrave does not support deleting the reference to managing the effects of carparking. However, she does recommend replacing '*minimised*' with *'mitigated'*.

151. Ms Belgrave supports including a matter that recognises the functional and operational requirements of activities, particularly as a broad range of activities are provided for and anticipated within the CMUZ. She also supports deleting '*and is expected to'* as it simplifies the wording of the policy.

152. In response to the five submission points[19] that sought to delete clauses a - d from the policy, Ms Belgrave does not support the relief sought. This is because the clauses are relevant considerations for new developments within the CMUZ, achieving the policy and CMUZ-O2.

153. The S42A report recommends the following amendments to CMUZ – P4.

> ***CMUZ – P4***
>
> *New development in CMUZ - Commercial and Mixed Use Zones should have quality design outcomes* ***which*** ~~***and is expected to***~~*:*
>
> *a. Acknowledge, and respond to, the context of the site and the surrounding environment;*
>
> *b. Ensure the bulk, form and siting of new buildings maintains and enhances the quality of the environment;*
>
> *c. Provide a quality street frontage with visual interest and connection with the street; and*
>
> *d. Ensure visual effects from car parking areas are* ***mitigated*** ~~***minimised;***~~ ***and***
>
> ***e. Recognises the functional or operational need of activities.***

CMUZ - Policy 5 to Policy 8

[19] Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.011), Chris & Jan Coll (S558.346), Chris J Coll Surveying (S566.346), William McLaughlin (S567.405), and Laura Coll McLaughlin (S574.346)

154. Before considering the content of the submissions relating to these policies, Ms Belgrave sets out that CMUZ-P5, CMUZ-P6, CMUZ-P7 and CMUZ-P8 all relate to establishing new commercial zones rather than managing buildings and activities within the existing zones. She considers that these policies would be more appropriately located in the Strategic Direction chapter of the PTTPP. There is no specific submission seeking this relief. However, there are submission points by BDC seeking this relief for similar policies in the INZ. As such, Ms Belgrave considers there is consequential scope to delete these policies from the CMUZ chapter and relocate them (with any amendment resulting from relevant submissions) to the Strategic Direction chapter.

155. The S42A report recommends relocating CMUZ-P5, CMUZ-P6, CMUZ-P7 and CMUZ-P8 to the SD chapter.

CMUZ – Policy 5

156. In relation to CMUZ-P5, Ms Belgrave acknowledged the support from all the submitters that sought to retain the policy as notified.

157. Ms Belgrave recommends that CMUZ-P5 be retained as notified, although relocated to the Strategic Direction chapter under Urban Form and Development as an objective:

> ***UFD-O2***
>
> ***Support the redevelopment of brownfield sites for mixed use activities where:***
>
> ***a. A reduction in commercial or industrial land supply will not affect the ability to meet the anticipated needs of commercial and industrial activities including those with specific locational requirements;***
>
> ***b. The mixed use development would not hinder the establishment or ongoing operation of surrounding commercial activities;***
>
> ***c. There is sufficient capacity and a suitable connection to wastewater, water supply, stormwater and safe and efficient transport networks;***
>
> ***d. The anticipated amenity values of the adjoining commercial or industrial zone are not compromised;***
>
> ***e. If necessary, contaminated land is remediated in accordance with national and regional standards; and***
>
> ***f. The redevelopment does not impact on:***
>
> ***1. The vitality and strategic role of town centres as the focal points for commercial and other activities;***
>
> ***2. The efficient and effective use of land; and***
>
> ***3. Community and transport infrastructure investment in centres.***

CMUZ – Policy 6

158. In relation to CMUZ-P6, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified. The acknowledgement is subject to recommended amendments that arise from other submissions.

159. In response to the submission point made by Foodstuffs that sought to delete the words '*rather than pulling activity away from the centre'*, Ms Belgrave supports the relief sought as she considers the words to be superfluous, and deletion simplifies the policy.

160. The S42A report recommends deleting CMUZ-P6 from the CMUZ chapter and relocating an amended version in the SD chapter under Urban Form and Development as an objective.

> ***UFD – O3***
>
> ***Recognise the substantial investment by communities in town centres and their infrastructure by ensuring that any new CMUZ - Commercial and Mixed Use Zones are located where they support the function of town centres ~~rather than pulling activity away from the centre.~~***

CMUZ – Policy 7

161. In relation to CMUZ-P7, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified. The acknowledgement is subject to recommended amendments that arise from other submissions.

162. Ms Belgrave does not support the relief sought in the submission point made by Foodstuffs. The submission sought to amend the wording of the policy as follows:

> *New CMUZ - Commercial and Mixed Use Zones should ~~not~~ be **restricted** ~~located~~ in areas subject to significant risks from natural hazards, in wāhi tapu or significant natural areas.*

163. Ms Belgrave considers that the policy, as notified, does not prevent the rezoning of land in an urban zone when the relevant considerations are made.

164. The S42A report recommends deleting the CMUZ-P7 from the CMUZ and relocating it into the SD chapter under Urban Form and Development as an objective.

> ***UFD – O4***
>
> ***New CMUZ - Commercial and Mixed Use Zones should not be located in areas subject to significant risks from natural hazards, in wāhi tapu or significant natural areas.***

CMUZ – Policy 8

165. In relation to CMUZ-P8, Ms Belgrave acknowledged the support from all the submitters that sought to retain the policy as notified.

166. Ms Belgrave recommends that CMUZ-P8 be retained as notified, although relocated to the Strategic Direction chapter under Urban Form and Development as an objective:

> ***UFD – O5***
>
> ***Where new CMUZ - Commercial and Mixed Use Zones are developed these should fund and install infrastructure to the standards required by the Councils and the Plan. Where there is significant infrastructure serving multiple properties under different ownership this should be vested in the Council for ongoing maintenance and renewal.***

CMUZ – Policy 9

167. In relation to CMUZ-P9, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified. The acknowledgement is subject to recommended amendments that arise from other submissions.

168. In response to the submission points made by Waka Kotahi and GDC that sought to delete *'parking'* from the policy on the basis that it is not a mode of transport, Ms Belgrave supports

the relief sought in part. In the context of the policy, '*parking*' refers to cycle parking to encourage pedestrian-friendly streets. Therefore, Ms Belgrave recommends amendments to the policy to clarify the intention.

169. The S42A report recommends the following amendments to CMUZ – P9:

> *CMUZ – P9*
>
> *Provide a range of transport modes to and from the town centres including public transport, cycling routes and **associated cycle** parking and encouraging more pedestrian friendly streets.*

CMUZ – Policy 10

170. In relation to CMUZ-P10, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified.

171. Ms Belgrave recommends that CMUZ-P10 be retained as notified.

CMUZ – Policy 11

172. In relation to CMUZ-P11, Ms Belgrave acknowledged the support from Te Mana Ora and Grey District Council that sought to retain the policy as notified.

173. Ms Belgrave does not support the relief sought by FENZ, whose submission sought to have the words '*with sufficient capacity for firefighting purposes'* added after the reference to water supply. She does not consider that this level of detail is necessary in this policy, as the references to three waters infrastructure are only to identify the types of infrastructure that should be vested with the Council.

174. Ms Belgrave recommends that CMUZ-P11 be retained as notified.

CMUZ – Policy 12

175. In relation to CMUZ-P12, Ms Belgrave acknowledged the support from all the submitters that sought to retain the policy as notified.

176. Ms Belgrave recommends that CMUZ-P12 be retained as notified.

CMUZ - Policy 13

177. In relation to CMUZ-P13, Ms Belgrave acknowledged the support from the submitters that sought to retain the policy as notified. The acknowledgement is subject to recommended amendments that arise from other submission points.

178. In response to the five submission points[20] that sought to delete the reference to enhance the amenity of commercial areas, Ms Belgrave does not support the relief sought. She considers that while it is not always feasible or practical to enhance these values in a commercial setting, the policy also provides for their maintenance, and that it is relevant to include this in the policy.

[20] Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.012) Chris & Jan Coll (S558.347), Chris J Coll Surveying (S566.347), William McLaughlin (S567.406), and Laura Coll Mclaughlin (S574.347)

179. In response to the submission point made by Foodstuffs to make various amendments, Ms Belgrave supports the relief sought in part. The submission sought to add *'significant'* to clause (a) of the policy in reference to adverse effects to relax the policy. Ms Belgrave does not consider that the wording will enable non-compliance with the performance standards to be appropriately managed. She has recommended deleting the reference to the performance standards.

180. Foodstuffs also sought to amend clause (c) to '*encourage compact urban form'* of town centres. Ms Belgrave supports the requested amendment as it provides a clearer direction on the use and development outcomes anticipated in the zones.

181. The S42A report recommends the following amendments to CMUZ – P13:

> *CMUZ – P13*
>
> *Activities in the COMZ – Commercial, MUZ – Mixed-Use and NCZ – Neighbourhood Centre Zones should:*
>
> *a.* ***~~Meet performance standards on development and land use that maintain~~*** ***Maintain*** *or enhance the amenity of the commercial areas and* ***avoid, remedy, or mitigate*** ***~~do not create~~*** *adverse effects beyond the boundaries of these areas, particularly in respect of residential areas;*
>
> *b. Provide safe urban design (including pedestrian and vehicle safety); and*
>
> *c.* ***Encourage compact urban form*** ***~~Avoid the fragmentation~~*** *of town centres.*

CMUZ - Policy 14

182. In relation to CMUZ-P14, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified.

183. Ms Belgrave recommends that CMUZ-P14 be retained as notified.

CMUZ - Policy 15

184. In relation to CMUZ-P15, Ms Belgrave acknowledged the support from the submitters that sought to retain the policy as notified. The acknowledgement is subject to recommended amendments that arise from other submission points.

185. In response to the submission point made by Foodstuffs that sought to amend clause (k) and delete clause (l), Ms Belgrave supports the submission in part. Foodstuffs sought to have the words *'standard up to the street frontage and predominantly with verandahs over the footpath'* deleted from clause (k). The S42A report acknowledges that this amendment will simplify the policy. It also acknowledges that requirements for verandahs are specified for three of the precinct areas, while design requirements are specified for all of them. Additionally, this clause relates to buildings, while the policy generally is about activities. For these reasons, Ms Belgrave recommends deleting clause (k) in its entirety.

186. Ms Belgrave also supports deleting clause (l) that requires activities to be reliant on pedestrian movement as sought by Foodstuffs. In the submission, Foodstuffs identifies that supermarket customers rely on vehicles to transport their groceries and that the TCZ provides for a range of commercial activities that are not solely reliant on pedestrian movement. While town centres can be accessed on foot, not all activities will be. Ms Belgrave considers the clause of

the policy to be onerous and, in some cases, impractical. Therefore, she recommends that it be deleted.

187. In response to the submission point made by Te Mana Ora to make additions to clause (g) of the policy, Ms Belgrave does not support the additions. She acknowledges that the submission wording sets out good examples of a high-quality pedestrian environment, but the relief sought is considered to be too prescriptive for the policy.

188. The S42A report recommends the following amendments to CMUZ – P15:

CMUZ – P15

Activities within the TCZ – Town Centre Zones should:

a. Maintain or enhance natural and historic features and built form;

b. Adaptively reuse existing heritage buildings where practicable;

c. Recognise and implement good urban design;

d. Provide for low-speed vehicle movement;

e. Allow for noise associated with commercial activities including bars and restaurants;

f. Provide for commercial signs associated with on-site activities;

g. Provide a high-quality pedestrian environment, with pedestrian oriented street layout;

h. Have consolidated on-street parking;

i. Have efficient wastewater, water supply and stormwater infrastructure that maximises the use of existing services;

j. Allow for a range of transport options;

~~k. Have new buildings built to a high standard up to the street frontage and predominantly with verandahs over the footpath; and~~

~~l. Be activities reliant on pedestrian movement.~~

CMUZ - Policy 16

189. In relation to CMUZ-P16, Ms Belgrave acknowledged the support from Te Mana Ora and the Ministry of Education that both sought to retain the policy as notified.

190. Ms Belgrave recommends that CMUZ-P16 be retained as notified.

CMUZ - Policy 17

191. In relation to CMUZ-P17, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified.

192. Ms Belgrave recommends that CMUZ-P17 be retained as notified.

CMUZ - Policy 18

193. In relation to CMUZ-P18, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified.

194. Ms Belgrave recommends that CMUZ-P18 be retained as notified.

CMUZ - Policy 19

195. In relation to CMUZ-P19, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified.

196. Ms Belgrave recommends that CMUZ-P19 be retained as notified.

CMUZ – PREC 1 - Policy 1

197. In relation to CMUZ-PREC1-P1, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified.

198. Ms Belgrave recommends that CMUZ-PREC1-P1 be retained as notified.

CMUZ – PREC 1 - Policy 2

199. In relation to CMUZ-PREC1-P2, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified.

200. Ms Belgrave recommends that CMUZ-PREC1-P2 be retained as notified.

CMUZ – PREC 1 - Policy 3

201. In relation to CMUZ-PREC1-P3, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified.

202. Ms Belgrave recommends that CMUZ-PREC1-P3 be retained as notified.

CMUZ – PREC 1 - Policy 4

203. In relation to CMUZ-PREC1-P4, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified.

204. Ms Belgrave recommends that CMUZ-PREC1-P4 be retained as notified.

CMUZ – PREC 1 - Policy 5

205. In response to the submission point made by Te Mana Ora to make additions to clause (d) of the policy, Ms Belgrave does not support the additions. The submission is similar to that relating to CMUZ-P15 and Ms Belgrave acknowledges that the submission wording sets out good examples of a high-quality pedestrian environment, but the relief sought is considered to be too prescriptive for the policy.

206. In response to the submission point made by Foodstuffs that sought additions to take into account operational and functional need, Ms Belgrave does not support the addition. This is because it is recommended to add a reference to operational and functional need in CMUZ-P4[21] which applies to all CUMZ's, including the Town Centre Precincts.

207. Ms Belgrave recommends that CMUZ-PREC1-P5 is retained as notified.

CMUZ – PREC 1 - Policy 6

[21] The Panel notes that this policy was referred to as COMZ-P4 in the S42A report and record that this is a typo.

208. In response to the submission point made by Te Mana Ora to make additions to the policy to specify that access refers to walking and cycling, Ms Belgrave supports the addition as it is a helpful clarification.

209. The S42A report recommends the following amendments to CMUZ – PREC1 – P6:

> *CMUZ – PREC1 – P6*
>
> *Encourage **walking and cycling** access to and along the Grey/Māwhera River to the adjacent MUZ-Mixed Use Zone, the West Coast Wilderness Trail and Māwheranui Walkway.*

CMUZ – PREC 2 - Policy 7

210. In response to the submission point made by Te Mana Ora to make additions to the policy, Ms Belgrave does not support the additions. The submission is similar to that relating to CMUZ-P15, and Ms Belgrave acknowledges that the submission wording sets out good examples of a high-quality pedestrian environment, but the relief sought is considered to be too prescriptive for the policy.

211. Ms Belgrave recommends that CMUZ-PREC2-P7 be retained as notified.

CMUZ – PREC 2 - Policy 8

212. In relation to CMUZ-PREC2-P8, Ms Belgrave acknowledged the support from Ngāi Tahu and Te Mana Ora that both sought to retain the policy as notified.

213. Ms Belgrave recommends that CMUZ-PREC2-P8 be retained as notified.

CMUZ – PREC 2 - Policy 9

214. In response to the submission point made by Te Mana Ora to make additions to the policy referring to cycling, Ms Belgrave supports the addition.

215. In response to the submission point made by Foodstuffs that sought the addition of a new policy to take into account operational and functional need, Ms Belgrave does not support the addition. This is because it is recommended to add a reference to operational and functional needs in CMUZ-P4, which applies to all CUMZs, including the Town Centre Precincts.

216. The S42A report recommends the following amendments to CMUZ – PREC2 – P9:

> *CMUZ – PREC2 – P9*
>
> *Promote pedestrian **and cycling** links and pedestrian **and cycling** focused activity to link the Hokitika town centre to the Gibson Quay/Hokitika River and to the Hokitika beachfront.*

CMUZ – PREC 3 - Policy 10

217. In relation to CMUZ-PREC3-P10, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified.

218. Ms Belgrave recommends that CMUZ-PREC3-P10 be retained as notified.

CMUZ – PREC 3 - Policy 11

219. In response to the submission point made by Te Mana Ora to make additions to the policy, Ms Belgrave does not support the additions. The submission is like that relating to CMUZ-P15 and Ms Belgrave acknowledges that the submission wording sets out good examples of a high-quality pedestrian environment, but the relief sought is considered to be too prescriptive for the policy.

220. Ms Belgrave recommends that CMUZ-PREC3-P11 be retained as notified.

CMUZ – PREC 3 - Policy 12

221. In response to the submission point made by Te Mana Ora to make additions to the policy referring to cycling, Ms Belgrave supports the addition.

222. In response to the submission point made by Foodstuffs that sought the addition of a new policy to take into account operational and functional need, Ms Belgrave does not support the addition. This is because it is recommended to add a reference to operational and functional needs in CMUZ-P4, which applies to all CUMZs, including the Town Centre Precincts.

223. The S42A report recommends the following amendments to CMUZ – PREC3 – P12:

> *CMUZ – PREC3 – P12*
>
> *Promote pedestrian **and cycling** links and pedestrian **and cycling** focused activity to link Victoria Square to the Buller/Kaiwatiri Riverfront.*

CMUZ – PREC 4 - Policy 13

224. In relation to CMUZ-PREC4-P13, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified.

225. Ms Belgrave recommends that CMUZ-PREC4-P13 be retained as notified.

CMUZ – PREC 4 - Policy 14

226. In relation to CMUZ-PREC4-P14, Ms Belgrave acknowledged the support from Te Mana Ora that sought to retain the policy as notified.

227. Ms Belgrave recommends that CMUZ-PREC4-P14 be retained as notified.

CMUZ – PREC 4 - Policy 15 (New Policy)

228. In response to the submission point made by Foodstuffs that sought the addition of a new policy to take into account operational and functional need, Ms Belgrave does not support the addition. This is because it is recommended to add a reference to operational and functional needs in CMUZ-P4, which applies to all CUMZs, including the Town Centre Precincts.

229. Ms Belgrave does not recommend the addition of the new policy.

Hearing and Submitter Evidence

230. The legal submissions made by Ms Alex Booker on behalf of Foodstuffs accept the S42A report recommendation relating to CMUZ-P4 (with respect to operational and functional need), CMUZ-P13 (with respect to clause (c) and the addition of avoid, remedy and mitigate) and CMUZ-P15.

231. The legal submissions also accept the recommendation to relocate CMUZ-P6 to UFD-O3 and to amend the wording to delete '*rather than pulling away from the centre'*.

232. Ms Booker reiterates that for all other submission points made by Foodstuffs relating to the CMUZ policies, the position set out in the original submission is maintained.

233. The joint statement presented by Frida Inta and Buller Conservation Group requests that the words '*three waters'* be removed from CMUZ-P11 on the basis that it is an obsolete term.

234. Mr George van Pelt tabled a letter at the hearing on behalf of FENZ. The letter accepts the S42A recommendation not to make any changes to CMUZ-P11 as initially sought in the submission.

235. No evidence was presented at the hearing by any submitter relating to the policies of the CMUZ.

Reporting Officer Reply Evidence

236. In response to questions from the Panel regarding whether the precincts (PREC1-PREC4) were identified and mapped during notification, Ms Belgrave advised that they were not identified on the planning maps. However, there is reference to them in the text of the pTTPP in the rule headings. She confirmed that the spatial extent of each Precinct is the same as the land covered by the Town Centre zoning, noting that including the Precincts on the planning maps will not introduce any new information. The Panel note that the Overview in the CMUZ provides;

"*The TCZ - Town Centre Zone is found in the four main town centres of Reefton, Greymouth/Māwhera, Westport/Kawatiri and Hokitika. There are common policies and rules across the TCZ -Town Centre Zone; however, each town centre has a Precinct where specific additional policies and rules apply."*

We consider this to be of some assistance in clarifying that each Precinct covers the same area as the Town Centre zoning.

237. It is Ms Belgrave's recommendation to include the Precincts on the planning maps in response to submission point S538.395 by Buller District Council. It will also correct an error in the plan to cross-reference the rules to the maps.

238. Ms Belgrave provided a further assessment responding to discussions during the hearing and questions from the Panel regarding the recommendation in the S42A report to relocate several policies from the CMUZ (and INZ) chapters to the SD chapter. She reiterates the opinion set out in the S42A report that CMUZ-P5 to CMUZ-P8 are relevant to a plan change process and not for the direction of activities in the existing commercial zones. Additionally, she notes that the rules in these zones do not give effect to these policies.

239. Ms Belgrave's further assessment has resulted in the consolidation of the provisions proposed for relocation to the SD chapter. Ms Belgrave recommends that the following new objectives be added to the UFD part of the SD chapter:

UFD-OX:

Enable rezoning of brownfield sites for mixed use activities where:

d. The rezoning supports the effective and efficient use of land;

e. A reduction in commercial or industrial land supply will not affect the ability to meet the anticipated needs of commercial and industrial activities including those with specific locational requirements;

f. The mixed use development would not hinder the establishment or ongoing operation of surrounding commercial activities;

g. There is sufficient capacity and a suitable connection to wastewater, water supply, stormwater and safe and efficient transport networks; and

h. The anticipated amenity values of the adjoining commercial or industrial zone are not compromised.

UFD-OX2:

Require new CMUZ – Commercial and Mixed Use Zones and INZ – Industrial Zones to demonstrate the following:

a. Recognise the substantial investment by communities in town centres and their infrastructure by ensuring that any new CMUZ - Commercial and Mixed Use Zones are located where they support the function of town centres.

b. Locate outside of areas subject to significant risks from natural hazards, in wāhi tapu and sites and areas of significance to Māori, or significant natural areas.

c. Development maximises the efficient use of existing infrastructure where this is available.

d. All necessary infrastructure is funded and installed to the standards required by the Councils and the Plan. Where there is significant infrastructure serving multiple properties under different ownership this should be vested in the Council for ongoing maintenance and renewal.

UFD-OX3:

The vitality and strategic role of town centres is reinforced as the focal points for commercial and social activities.

240. Ms Belgrave's further assessment also considers the scope for making the recommended changes, noting that there is no specific submission that sought relocating the CMUZ policies to the SD chapter. Nevertheless, Ms Belgrave points to submissions[22] that sought to simplify and condense the pTTPP, and she considers the recommended changes to be in accordance with this relief.

241. Ms Belgrave has specifically considered the statement presented by Ms Inta at the hearing and comments that while she does not consider '*three waters*' to be an obsolete term, she does agree that deleting this phrase will simplify the policy. If the Panel agrees, she identifies that a consequential amendment to RESZ-P10 would also be appropriate to achieve consistency.

Hearing Panel's Evaluation

[22] Gina Hogart (S304.003), Suzanne Hills (S443.001), Shaun and Carissa du Plessis (S402.001).

242. The Panel has considered the submissions, further submissions and the various amendments proposed to the Commercial and Mixed Use policies.

243. In the first instance, the Panel agree with Ms Belgrave that no amendments are required to policies CMUZ-P1, CMUZ-P2, CMUZ-P3, CMUZ-P10, CMUZ-P11, CMUZ-P14, CMUZ-P16, CMUZ-17, CMUZ-P18, CMUZ-P19, CMUZ-PREC1-P1, CMUZ-PREC1-P2, CMUZ-PREC1-P3, CMUZ-PREC1-P4, CMUZ-PREC1-P5, CMUZ-PREC2-P7, CMUZ-PREC2-P8, CMUZ-PREC3-P10, CMUZ-PREC3-P11, CMUZ-PREC4-P13 and CMUZ-PREC4-P14.

244. With respect to CMUZ-P11, the Panel acknowledges Ms Inta's statement presented at the hearing that suggested removing the words '*three waters'* from the policy, and Ms Belgrave's right of reply evidence on the matter. However, as neither Mr Inta nor the Buller Conservation Group submitted on this policy, we have no scope to make any amendment. In any event, we do not consider the removal of the words is necessary.

245. The Panel accepts the evidence from Ms Belgrave that there is a mapping error insofar as the Precincts in each Town Centre have not been mapped. We also accept that the spatial extent of the four Precincts is the same as the TCZ for each location, based on Ms Belgrave's right of reply evidence which includes a further assessment that explains that each Precinct is referred to in each TCZ rule heading. Lastly, we observe that the last paragraph of the Overview in the CMUZ chapter provides the following guidance:

"The TCZ - Town Centre Zone is found in the four main town centres of Reefton, Greymouth/Māwhera, Westport/Kawatiri and Hokitika. There are common policies and rules across the TCZ - Town Centre Zone, however each town centre has a Precinct where specific additional policies and rules apply."

246. The Panel agree with Ms Belgrave to correct the typo in the Zone abbreviation at the start of the policies.

247. The Panel agree with Ms Belgrave's reasoning to amend CMUZ-P4 based on the submission from Foodstuffs, and we acknowledge that Foodstuffs has confirmed their agreement with the wording related to functional and operational needs in their legal submissions. We accept that there are situations where the actual functional and operation needs of a commercial development should be taken into account. We also agree to delete the words '*and is expected to'* and to replace *'minimised'* with *'mitigated'* in relation to visual effects from car parking areas.

248. The Panel has considered Ms Belgrave's recommendation to relocate CMUZ-P5 to CMUZ-P8 to the Strategic Directions Chapter. We disagree with this recommendation, as in our view the policies are too specific to be relocated to that part of the Plan. Regardless of this, we have recommended amendments to the Urban Form and Development section of the Strategic Directions Chapter, which will broadly provide context for the Commercial and Industrial provisions.

249. The Panel also acknowledges that no submissions were made to seek changes to CMUZ-P5 or CMUZ-P8, and that the submissions received in relation to CMUZ-P6 and CMUZ-P7 sought minor wording amendments by Foodstuffs. The Panel agrees with the amendment sought regarding CMUZ-P6. However, like Ms Belgrave, we do not consider the requested amendment to CMUZ-P7 to be necessary.

250. Notwithstanding that the Panel does not agree to relocate these policies, we have considered Ms Belgrave's right of reply evidence to simplify and consolidate these policies, relying on generalised submissions that sought to simplify and condense the pTTPP. In our view, the recommended redrafted policies remain lengthy and are no simpler than what was notified. We also consider that the scope to make these changes is tenuous. As such our recommendation is only to make the minor change sought by Foodstuffs to CMUZ-R6.

251. The Panel agree with Ms Belgrave's recommendation to clarify that the reference to *'parking'* in the context of CMUZ-P9 relates to cycle parking.

252. The Panel agree with Ms Belgrave's recommendation to remove the reference to the performance standards in clause (a) of CMUZ-P13 and to add the words *'avoid, remedy or mitigate'*. We also agree with the recommended amendment to clause (c) of the same policy. We acknowledge that the legal submissions for Foodstuffs accept the changes regarding the second and third matters. With respect to the reference to performance standards, we agree with Ms Belgrave that the notified wording will not enable non-compliances with the performance standards to be appropriately managed and so support the recommended wording.

253. The Panel agree with Ms Belgrave's recommendations to delete clauses (k) and (l) from CMUZ-R15. We acknowledge that the legal submissions for Foodstuffs accept these changes.

254. The Panel agree with Ms Belgrave that the additional wording of '*walking and cycling'* suggested by Te Mana Ora in CMUZ–PREC1–P6 is a helpful clarification, as is the addition of '*cycling*' in CMUZ–PREC2–P9 and CMUZ–PREC3–P12.

255. In relation the CMUZ-P12 the Panel note we have made and amendment to refer to regionally significant infrastructure which represents a Plan wide amendment.

256. In relation to the remainder of the submissions on the Policies, the Panel agree that these should be rejected based on the conclusions reached by Ms Belgrave.

Hearing Panel's Recommendation

257. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends accepting in part the submission point made by Buller District Council (S538.395) to amend the Planning Maps as follows:

    (a) Include a Westport Town Centre Precinct mapping overlay over the TCZ at Westport/Kawatiri;

    (b) Include a Greymouth Town Centre Precinct mapping overlay over the TCZ at Greymouth/Māwhera;

    (c) Include a Reefton Town Centre Precinct mapping overlay over the TCZ at Reefton; and

    (d) Include a Hokitika Town Centre Precinct mapping overlay over the TCZ at Hokitika.

258. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below be accepted or accepted in part and that the following amendments be made to the **Commercial and Mixed Use Zone Policies**:

Commercial and Mixed Use Zones Policies	
Activities and Development in ~~CUMZ~~ CMUZ[23] – Commercial and Mixed Zones	
CMUZ – P1	Where cultural landscapes are identified in commercial areas or developments, ensure activities are managed in a way that provides for the cultural relationships of Poutini Ngāi Tahu including; a. Protection of wāhi tapu and taonga sites in Schedule Three of the Plan using Poutini Ngāi Tahu culturally appropriate methods; b. Identification and utilisation of opportunities to enhance sites, values and other taonga of cultural significance to Ngāi Tahu; and c. Protection of the relationship of Poutini Ngāi Tahu with freshwater, including cultural wellbeing and use opportunities.
CMUZ – P2	A range of activities are anticipated within CMUZ - Commercial and Mixed Use Zones which meet the needs of the local community with convenient and safe access and opportunities for economic growth and social interaction.
CMUZ – P3	Residential activities and visitor accommodation may occur in the TCZ - Town Centre and MUZ - Mixed Use Zones particularly where this enables the redevelopment of important landmark and heritage buildings.
CMUZ – P4	New development in CMUZ - Commercial and Mixed Use Zones should have quality design outcomes ~~and is expected to~~ **which**[24]: a. Acknowledge, and respond to, the context of the site and the surrounding environment; b. Ensure the bulk, form and siting of new buildings maintains and enhances the quality of the environment; c. Provide a quality street frontage with visual interest and connection with the street; and d. Ensure visual effects from car parking areas are ~~minimised~~ **mitigated; and**[25] e. **Recognises the functional need or operational need of activities.**[26]
New Locations for CMUZ – Commercial and Mixed Use Zones	
CMUZ – P5	Support the redevelopment of brownfield sites for mixed use activities where: a. A reduction in commercial or industrial land supply will not affect the ability to meet the anticipated needs of commercial and industrial activities including those with specific locational requirements; b. The mixed use development would not hinder the establishment or ongoing operation of surrounding commercial activities; c. There is sufficient capacity and a suitable connection to wastewater, water supply, stormwater and safe and efficient transport networks;

[23] Waka Kotahi NZ Transport Agency (S450.207)
[24] Foodstuffs (S464.013)
[25] Foodstuffs (S464.013)
[26] Foodstuffs (S464.013)

	d. The anticipated amenity values of the adjoining commercial or industrial zone are not compromised; e. If necessary, contaminated land is remediated in accordance with national and regional standards; and f. The redevelopment does not impact on: 1. The vitality and strategic role of town centres as the focal points for commercial and other activities; 2. The efficient and effective use of land; and 3. Community and transport infrastructure investment in centres.
CMUZ – P6	Recognise the substantial investment by communities in town centres and their infrastructure by ensuring that any new CMUZ - Commercial and Mixed Use Zones are located where they support the function of town centres. ~~-rather than pulling activity away from the centre~~[27]
CMUZ – P7	New CMUZ - Commercial and Mixed Use Zones should not be located in areas subject to significant risks from natural hazards, in wāhi tapu or significant natural areas.
Infrastructure in Commercial and Mixed Use Zones	
CMUZ – P8	Where new CMUZ - Commercial and Mixed Use Zones are developed these should fund and install infrastructure to the standards required by the Councils and the Plan. Where there is significant infrastructure serving multiple properties under different ownership this should be vested in the Council for ongoing maintenance and renewal.
CMUZ – P9	Provide a range of transport modes to and from the town centres including public transport, cycling routes and **associated cycle**[28] parking and encouraging more pedestrian friendly streets.
CMUZ – P10	The use of energy efficient systems and products, low impact stormwater design and other environmentally sustainable elements in new building and development is encouraged.
CMUZ – P11	Ensure that developments are serviced with all required infrastructure in an effective and efficient manner. Where new infrastructure such as roads and three waters (wastewater, water supply, stormwater) is provided to service new commercial areas across multiple properties then this should be vested with the Council rather than be retained as private infrastructure.
CMUZ – P12	Avoid reverse sensitivity effects on **regionally significant** ~~strategic~~ infrastructure[29] including: a. Hokitika and Westport Airports and Greymouth Aerodrome; b. The rail network; c. The State Highway Network; d. The Ports of Westport and Greymouth;

[27] Foodstuffs (S464.014)
[28] Waka Kotahi NZ Transport Agency (S450.210), Grey District Council (S608.697)
[29] Consequential Plan wide amendment stemming from Energy, Infrastructure and Transport recommendation

	e. Community wastewater treatment and water supply plants; f. The National Grid.
Policies for Specific Commercial and Mixed Use Zones	
CMUZ – P13	Activities in the COMZ - Commercial, MUZ - Mixed-Use and NCZ - Neighbourhood Centre Zones should: a. ~~Meet performance standards on development and land use that maintain~~ **Maintain** or enhance the amenity of the commercial areas and ~~do not create~~ **avoid, remedy or mitigate**[30] adverse effects beyond the boundaries of these areas, particularly in respect of residential areas; a. Provide safe urban design (including pedestrian and vehicle safety); and b. ~~Avoid the fragmentation~~ **Encourage compact urban form**[31] of town centres.
CMUZ – P14	Trade retail and trade suppliers should locate in existing COMZ - Commercial Zone or MUZ - Mixed Use Zone but not within the TCZ - Town Centre Zone or in the NCZ - Neighbourhood Centre Zone.
CMUZ – P15	Activities within the TCZ - Town Centre Zones should: a. Maintain or enhance natural and historic features and built form; b. Adaptively reuse existing heritage buildings where practicable; c. Recognise and implement good urban design; d. Provide for low-speed vehicle movement; e. Allow for noise associated with commercial activities including bars and restaurants; f. Provide for commercial signs associated with on-site activities; g. Provide a high-quality pedestrian environment, with pedestrian oriented street layout; h. Have consolidated on-street parking; i. Have efficient wastewater, water supply and stormwater infrastructure that maximises the use of existing services; j. Allow for a range of transport options; ~~k. Have new buildings built to a high standard up to the street frontage and predominantly with verandahs over the footpath; and~~ ~~l. Be activities reliant on pedestrian movement.~~[32]
CMUZ – P16	The NCZ - Neighbourhood Centre Zone should provide for retail and community facilities which serve the immediate local community and should not undermine town centre function and identity.
CMUZ – P17	COMZ - Commercial Zoned areas within small settlements should primarily provide access to local shopping and community facilities to serve that settlement.

[30] Foodstuffs (S464.016)
[31] Foodstuffs (S464.016)
[32] Foodstuffs (S464.017)

CMUZ – P18	Encourage the redevelopment of sites within the MUZ - Mixed Use Zone.
CMUZ – P19	Over the long-term, promote the relocation of sporadic out-of-zone industrial activities in CMUZ - Commercial and Mixed Use Zones to INZ - Industrial Zoned areas
Additional Policies for Town Centre Precincts	
Town Centre Zone - Greymouth/Māwhera Town Centre Precinct Policies	
CMUZ – PREC1 – P1	Activities and development within the TCZ - PREC1 -Greymouth/Māwhera Town Centre Precinct should reflect the Greymouth/Māwhera CBD Redevelopment Plan and any subsequent plans for the town centre redevelopment and invigoration.
CMUZ – PREC1 – P2	Seek to intensify activity within the TCZ - PREC1 - Greymouth/Māwhera Town Centre Precinct by fully utilising the existing building stock – including allowing offices, cafes and restaurants, residential apartments and visitor accommodation in upper floors above street level.
CMUZ – PREC1 – P3	Celebrate Greymouth/Māwhera's unique historic and Poutini Ngāi Tahu heritage and identity by repurposing existing landmark and heritage buildings and the use of the Greymouth/Māwhera Town Centre Design Guidelines.
CMUZ – PREC1 – P4	Promote the development of green corridors connecting the Grey/Māwhera River to Victoria Park, Sawyers Creek Wetlands and the lagoon.
CMUZ – PREC1 – P5	Require high quality design outcomes in the TCZ - PREC1 - Greymouth/Māwhera Town Centre Precinct which adhere to the Greymouth/Māwhera Town Centre Design Guidelines. In particular, new development and additions and alterations to existing buildings are expected to: a. Acknowledge, and respond to, the context of the site and the surrounding environment; b. Create visual interest and be in keeping with streetscape values; c. Address Poutini Ngāi Tahu and historic heritage values and design elements; d. Create a vibrant, active pedestrian environment; e. Take into account sustainable building design and Crime Prevention through Environmental Design (CPTED) principles; f. Utilise the Greymouth Pounamu and Māori Heritage paint palette on building frontages; and g. Ensure continuous verandah coverage on the Main Street Frontage of the TCZ - PREC1 - Greymouth/Māwhera Town Centre Precinct.
CMUZ – PREC1 – P6	Encourage **walking and cycling**[33] access to and along the Grey/Māwhera River to the adjacent MUZ- Mixed Use Zone, the West Coast Wilderness Trail and Māwheranui Walkway.
Town Centre Zone - Hokitika Town Centre Precinct Policies	

[33] Te Mana Ora (S190.710)

CMUZ – PREC2 – P7	Reinforce the pedestrian priority in the TCZ - PREC2 - Hokitika Town Centre Precinct by requiring verandahs, active street frontage and a high quality pedestrian environment which reflects the Hokitika Town Centre Design Guidelines.
CMUZ – PREC2 – P8	Provide for and enable the inclusion of elements of Poutini Ngāi Tahu culture in the design of buildings and structures in the TCZ - PREC2 - Hokitika Town Centre Precinct.
CMUZ – PREC2 – P9	Promote pedestrian **and cycling** links and pedestrian **and cycling**[34] focused activity to link the Hokitika town centre to the Gibson Quay/Hokitika River and to the Hokitika beachfront.
Town Centre Zone – Westport/Kawatiri Town Centre Precinct Policies	
CMUZ – PREC3 – P10	Ensure that the design, scale and layout of commercial development and buildings in the TCZ - PREC3 - Westport/Kawatiri Town Centre Precinct is compatible with the character of the town.
CMUZ – PREC3 – P11	Reinforce Palmerston Street between Henley St and Rintoul St as the heart of Westport/Kawatiri by requiring verandahs, active street frontage and a high quality pedestrian environment.
CMUZ – PREC3 – P12	Promote pedestrian **and cycling** links and pedestrian **and cycling**[35] focused activity to link Victoria Square to the Buller/Kaiwatiri Riverfront.
Town Centre Zone – Reefton Town Centre Precinct Policies	
CMUZ – PREC4 – P13	Ensure that the design, scale, location and layout of development and buildings in the TCZ - PREC4 - Reefton Town Centre Precinct are compatible with the historic character of this area.
CMUZ – PREC4 – P14	Require new development and additions to exterior facades of buildings on the Main Street Frontage of the TCZ - PREC4- Reefton Town Centre Precinct to adhere to the Reefton Historic Town Centre Design Guidelines.

3.5. Commercial and Mixed Use Zones (Zoning and Rezoning)

Submissions and Further Submissions

259. Twenty-four submission points relating to the zoning of land in the Commercial and Mixed Use Zone were summarised in a Table on pages 48-50 of the s42A Report. Eleven submissions supported the zoning. Thirteen submissions sought an amendment to the zoning of land.

260. The Panel adopts these summaries and has considered all of the relevant submissions and further submissions.

Section 42A Report

[34] Te Mana Ora (S190.713)
[35] Te Mana Ora (S190.716)

261. Ms Belgrave acknowledges that as no substantive technical evidence was provided to support any commercial zoning requests, any recommended rezonings reflect clear errors in the zoning maps or where there are clear reasons with respect to achieving the zone objectives and policies and other higher order directives.

262. In relation to the zoning of specific properties, Ms Belgrave acknowledged the support from numerous submission points[36] to retain the zoning as notified.

263. In response to the four submission points[37] that sought to retain the CMUZ zoning as notified other than for the amendment sought regarding Lot 1 DP 16517, Pt Sec 104 Town of Westport/Lot 2 A 444, and Lot 1 DP 475753, Ms Belgrave acknowledged the support.

264. In response to the submission points made by the Avery Brothers and Te Mana Ora, Ms Belgrave acknowledges the more general support for the CMUZ zoning as notified.

265. In response to the submission point made by Griffen & Smith Limited that has queried the COMZ zoning of land northeast of Raleigh Street and west of the railway line Ms Belgrave agrees that this land is unlikely to be developed due to its topography and the presence of the stop bank. She recommends that it be rezoned to Open Space zone.

266. In response to the submission point made by the TTPP Committee to rezone three properties[38] that are all occupied by corner dairies or takeaway shops to NCZ from GRZ, Ms Belgrave supports the relief sought. These sites were accidental omissions from the notified zoning and in terms of consistency across the pTTPP, rezoning to NCZ will align with the rest of the region.

267. In response to the submission point made by Lara Kelly that sought to rezone land from GRZ to COMZ on the eastern side of SH6 from Weld Street to Stafford Street, Hokitika, Ms Belgrave supports the relief sought in part. She supports rezoning the four properties[39] that front Fitzherbert Street (SH6) to COMZ as they are currently being used for commercial purposes (petrol station, mechanics, motel and Kiwi Camps). She does not support rezoning all properties in the block.

268. In response to the five submission points[40] that sought to rezone land[41] on the corner of Russell and Pakington Street in Westport from GRZ to COMZ, Ms Belgrave supports the relief sought in part. She supports rezoning the land that is currently occupied by Mitre 10 (Lot 1 DP 16517, Pt Sec 104 Town of Wesport/Lot 2 A 444) as there are inefficiencies in having a split zone for an existing land use. However, Ms Belgrave does not support the rezoning of Lot 1 DP 475753 on the southern side of Pakington Street. The land is currently being used for car parking, and without any technical evidence or aspirations for the future use of the site, Ms Belgrave considers the notified zoning should be retained.

269. In response to the submission made by Griffen & Smith Limited (S253.004) that sought to rezone the land within the road and rail corridors around the Mitre 10 site in Greymouth from

[36] Leonie Avery (S507.079), Jared Avery (S508.079), Kyle Avery (S509.079), Avery Bros (S510.079), Bradshaw Farms (S511.079), Paul Avery (S512.079), Brett Avery (S513.079), Griffen & Smith Ltd (S253.001), Griffen & Smith Ltd (S253.002)
[37] Chris and Jan Coll (S558.349), Chris J Coll Surveying Limited (S566.349), William McLaughlin (S567.408), Laura Coll McLaughlin (S574.349)
[38] 23 Marine Parade, Donaldos Store, Carter's Beach; Lot 7 DP 16517, 46 Derby Street, Luffy's Corner Dairy and Grumpy's Takeaways, Westport; Section 675 TN OF Westport, 21 Disraeli Street, Arkwrights Dairy and Takeaways, Westport
[39] Lot 1 DP 3569, Lot 2 DP 3710, Lot 1 DP 1188, Lot 1 DP 2480 & Lot 2 DP 2480)
[40] Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.013), Chris & Jan Coll (S558.348), Chris J Coll Surveying Limited (S566.348), William McLaughlin (S567.407) and Laura Coll McLaughlin (S574.348)
[41] Lot 1 DP 16517, Pt Sec 104 Town of Wesport/Lot 2 A 444, Lot 1 DP 475753

GRZ to COMZ, Ms Belgrave does not support the relief sought. This is because, the submission is unclear as to what land is to be rezoned. She invited the submitter to clarify their position.

270. In Ms Belgrave's addendum to the S42A report, she acknowledged the planning evidence from Ms Pauline Hadfield in relation to the Griffen & Smith submission and advises that it has been reallocated to the Rural Zones hearing stream for consideration.

Hearing and Submitter Evidence

271. A statement presented by Mr Kevin Scanlon on behalf of Martin & Co Westport Ltd and Lumberland Building Market Westport acknowledged and supported the S42A report recommendation to rezone the land occupied by Mitre 10 (Lot 1 DP 16517, Pt Sec 104 Town of Wesport/Lot 2 A 444) to COMZ.

272. Mr Scanlon provided background to the use of the land on the southern side of Pakington Street (Lot 1 DP 475753). He confirmed that it is currently being used as a car park and that this is a condition of the resource consent that relates to the garden centre in the Mitre 10. On that basis, he reiterates that the land should also be rezoned to COMZ. Additionally, all the land is rated as one property.

273. Ms Hadfield evidence for Griffen & Smith Limited provided a map that identifies and clarifies the land in the vicinity of the Griffen & Smith Mitre 10 and the Blaketown Lagoon that she considers should be zoned to be in keeping with the adjoining zoning.

Reporting Officer Reply Evidence

274. In response to the information presented at the hearing by Mr Scanlon relating to the land on the southern side of Pakington Street (Lot 1 DP 475753), Ms Belgrave agrees that the clarification supports the rezoning of the land to COMZ and she supports the relief sought by the submitter.

Hearing Panel's Evaluation

275. The Panel agrees with the zoning amendments recommended by Ms Belgrave in her S42A report.

276. Additionally, following Mr Scanlon's statement to the Panel, we are satisfied that the land on the southern side of Pakington Street (Lot 1 DP 475753) is being used as a car park, which is a condition of the resource consent that relates to the garden centre in the Mitre 10. Therefore, we (and Ms Belgrave in her right of reply) recommend that this land should also be rezoned to COMZ.

277. In relation to the remainder of the submissions on rezoning, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

Hearing Panel's Recommendation

278. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part and recommends the following changes in zoning on the **Planning Maps** to the properties detailed in the Table below:

Zoning	
Precincts	Greymouth/Māwhera (PREC1) Hokitika (PREC2) Reefton (PREC4) Westport/Kawatiri (PREC3)[42]
Open Space Zone	Raleigh Street[43]
Neighbourhood Centre Zone	23 Marine Parade 46 Derby Street 21 Disraeli Street[44]
Commercial Zone	Properties between Weld Street and Stafford Street on SH6, being Lot 1 DP 16517, Pt Sec 104 Town of Wesport/Lot 2 A 444, Lot 1 DP 475753[45] 7 Pakington Street and 34 Russell Street[46] 8 Pakington Street and 36 Russell Street[47]

4. COMMERCIAL ZONE

4.1. General/Whole Chapter

Submissions and Further Submissions

279. Four submission points relating to general matters concerning the Commercial Zone were summarised in a Table on page 55 of the S42A Report. The Panel has considered the relevant submissions received and adopts the summaries in the s42A Report.

280. The Panel adopts these summaries and has considered all the relevant submissions and further submissions.

Section 42A Report

281. Ms Belgrave acknowledges the submission point made by Karen Lippiatt that sought to enable people to live in the COMZ. The submission sought no specific relief.

282. In response to the submission point made by the New Zealand Motor Caravan Association that sought to provide for camping and campgrounds as a permitted activity, Ms Belgrave does not support the relief sought. This is due to the potential for adverse amenity and character impacts within the COMZ and any surrounding residential areas.

283. In response to the submission point made by Martin & Co Westport Limited and Lumberland Building Market that sought to allow for building development as a permitted activity, such as

[42] Buller District Council (S538.395)
[43] Griffen & Smith Limited (S253.003)
[44] Te Tai o Poutini Plan Committee (S171.019)
[45] Lara Kelly (S421.003)
[46] Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.013), Chris & Jan Coll (S558.348), Chris J Coll Surveying Limited (S566.348), William McLaughlin (S567.407) and Laura Coll McLaughlin (S574.348)
[47] Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.013), Chris & Jan Coll (S558.348), Chris J Coll Surveying Limited (S566.348), William McLaughlin (S567.407) and Laura Coll McLaughlin (S574.348)

the buildings owned by the submitter in Westport, Ms Belgrave does not support the relief sought. This is mainly because the submitter has not identified specific activities for inclusion in the rules.

284. In response to the submission point made by Ngāi Tahu that sought to have Poutini Ngāi Tahu values as part of controlled and restricted discretionary activities, Ms Belgrave notes that this is a common submission point across multiple hearing streams. She also notes that the activities that fall into the controlled and restricted discretionary activity categories are varied, and without any specific drafting from the submitter, it is unclear what values may be impacted as a result of the non-compliances with the rules. Therefore, Ms Belgrave does not support the relief sought in the submission point.

285. Ms Belgrave did not make any recommendations to amend the provisions in response to these submission points.

Hearing and Submitter Evidence

286. No evidence was presented at the hearing in relation to these general submission points.

Reporting Officer Reply Evidence

287. There was no specific consideration of these general matters in the reply evidence.

Hearing Panel's Evaluation

288. The Panel agree with Ms Belgrave that no amendments to the COMZ are necessary in response to the general submission points and agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

Hearing Panel's Recommendation

289. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that no changes be made to the provisions in relation to the general matters raised in submissions across the COMZ and that the relevant submission points be rejected.

4.2. Commercial Zone Overview

Submissions and Further Submissions

290. One submission point and one further submission point relating to the Commercial Zone Overview were summarised in a Table on page 56 of the s42A Report. Both submission points sought to retain the overview as notified.

291. The Panel adopts this summary, having considered all relevant submissions and further submissions.

Section 42A Report

292. In relation to the submission point made by Foodstuffs and the supporting further submission made by Martin & Co Westport Limited and Lumberland Building Market Westport, Ms Belgrave acknowledged the support from the submitters that seek to retain the overview as notified.

293. Ms Belgrave recommends that the Commercial Zone Overview is retained as notified.

Hearing and Submitter Evidence

294. The legal submissions made by Ms Alex Booker on behalf of Foodstuffs accepts the S42A report recommendation relating to the Overview.

295. No other evidence was presented at the hearing in relation to the Overview.

Reporting Officer Reply Evidence

296. There was no specific consideration of these general matters in the reply evidence.

Hearing Panel's Evaluation

297. The Panel agree with Ms Belgrave to accept the submission points that sought to retain the COMZ Overview as notified, and therefore no changes are necessary. We agree that the submission points be accepted based on the conclusions reached by Ms Belgrave.

Hearing Panel's Recommendation

298. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends accepting the submission from Foodstuffs (S464.002) and further submission from Martin & Co Westport Limited and Lumberland Building Market Westport (FS140.015) and that no changes be made to the **Commercial Zone Overview**.

4.3. Commercial Zone – Rules

Submissions and Further Submissions

299. Eighteen submission points and three further submission points relating to **COMZ-R1** were summarised in a Table on pages 57-62 of the S42A Report. Two submission points supported the retention of the rule as notified. Thirteen submission points sought amendments.

300. Eight submission points and one further submission point relating to **COMZ-R2** were summarised in a Table on page 65 of the S42A Report. Two submission points supported the retention of the rule as notified. Six submission points sought amendments.

301. Nine submission points and one further submission point relating to **COMZ-R3** were summarised in a Table on page 66 of the S42A Report. Eight submission points supported the retention of the rule as notified. One submission point sought amendments.

302. Fourteen submission points and one further submission point relating to **COMZ-R4** were summarised in a Table on pages 69-71 of the S42A Report. Three submission points supported the retention of the rule as notified. Ten submission points sought to delete the rule, and the remaining one submission point sought amendments.

303. Ten submission points and one further submission point relating to **COMZ-R5** were summarised in a Table on page 66 of the S42A Report. Three submission points supported the retention of the rule as notified. Seven submission point sought amendments.

304. Eight submission points and one further submission point relating to **COMZ-R6** were summarised in a Table on pages 73-75 of the S42A Report. Two submission points supported the retention of the rule as notified. Six submission points sought amendments.

305. Seven submission points relating to **COMZ-R7** were summarised in a Table on pages 77-78 of the S42A Report. One submission point supported the retention of the rule as notified. Six submission points sought to delete the rule.

306. Eighteen submission points relating to **COMZ-R8** were summarised in a Table on page 76 of the S42A Report. Two submission points supported the retention of the rule as notified. Ten submission points sought to delete the rule, while the remaining six submission points sought to amend the rule.

307. Seven submission points relating to **COMZ-R9** were summarised in a Table on pages 79-80 of the S42A Report. All the submission points supported the retention of the rule as notified.

308. Seven submission points relating to **COMZ-R10** were summarised in a Table on page 80 of the S42A Report. Two submission points supported the retention of the rule as notified and five submissions sought amendment to the rule.

309. Seven submission points relating to **COMZ-R11** were summarised in a Table on page 81 of the S42A Report. Two submission points supported the retention of the rule as notified and five submissions sought to delete the rule.

310. The Panel adopts these summaries and has considered all the relevant submissions and further submissions.

Section 42A Report

COMZ-R1: Commercial Activities, Community Facilities, Emergency Service Facilities, Community Corrections Activity, Educational Facilities and Visitor Accommodation Activities and Buildings

311. Ms Belgrave acknowledged the support from Te Mana Ora and the Department of Corrections that support the rule as notified. The acknowledgement is subject to recommended amendments that arise from other submission points.

312. Ms Belgrave supports the relief sought in the submission point made by Waka Kotahi. The submission sought clarification as to whether the requirements of the rule are to be considered as performance standards, and if so, the activities listed in the heading should be a separate rule. Ms Belgrave acknowledges the confusion regarding the terminology used throughout the rules in this chapter. She therefore recommends that the rule heading be amended so it applies to all new buildings, additions and alterations to existing buildings, landscaping, and external storage and the activities be moved to a new separate rule.

313. The two submission points from the Ministry of Education and Foodstuffs both sought to amend the activity status of an activity that does not comply with the permitted standards of the rule. MOE sought that non-compliance with COMZ-R1.1 – 6 all be restricted discretionary, while Foodstuffs sought a restricted discretionary activity status apply when there is non-compliance with COMZ-R1.3 – 6. Ms Belgrave supports the relief sought by these submissions in part. She recommends that a restricted discretionary activity status should apply to COMZ-R1.2 – 6. This is because the potential effects associated with these infringements can be readily identified and a restricted discretionary activity status will provide improved efficiency and certainty for applicants. She recommends retaining the discretionary activity status for

any height infringement due to a greater range of potential effects on character and amenity. This recommendation creates a consequential amendment to COMZ-R6 to add additional matters of discretion.

314. In response to the submission point made by BDC that sought amendments to simplify the landscaping requirements on the basis that the notified controls are not workable for smaller-scale commercial development, Ms Belgrave supports the relief sought in part. She supports deleting COMZ-R1.3(ii), which relates to landscaping along a Residential Zone boundary, as other rules manage the form and location of buildings at this interface. Additionally, she also supports the deletion of the minimum height requirement for landscaping in COMZ-R1.3(i). Ms Belgrave recommends retaining clauses (iii) and (iv) as these will only apply to larger-scale developments.

315. In response to the second part of the submission point made by BDC to make minor amendments to COMZ-R1.5 and COMZ-R1.6, Ms Belgrave does not support the relief sought to COMZ-R1.5 as she does not consider the specificity to be necessary. Regarding COMZ-R1.6 Ms Belgrave agrees that the reference to a written approval is more appropriately included as an advice note. However, she recommends that the word '*setbacks*' be replaced by *'rules'*.

316. In response to the submission point made by Griffen & Smith Ltd to delete COMZ-R1.4 Ms Belgrave does not support the relief sought. The rule restricts the building length when it adjoins a Residential Zone and Ms Belgrave considers that long uninterrupted building elevations have the potential to adversely affect residential character.

317. Ms Belgrave supports the relief sought by Davis Ogilvie & Partners in their submission to change the word *'encouraged*' to *'required'* in COMZ-R1.3(iii) as it provides greater certainty.

318. In response to the five submission points[48] that sought to make the landscaping rules less onerous, Ms Belgrave considers that the proposed provisions for landscaping within COMZ-R1.3 are generally in keeping with landscaping requirements within commercial zones and areas and therefore does not support the relief sought. Additionally, the submitters have not suggested alternative wording.

319. In response to the five submission points[49] that sought to increase the maximum building height from 12m to 15m, Ms Belgrave supports the relief sought as it is consistent with the commercial zones in the operative District Plans.

320. Ms Belgrave does not support the relief sought by FENZ in their submission point to request amendments to COMZ-R1.5 so that screening of external storage areas does not obscure or obstruct access of emergency signage or response facilities such as hydrants. This is because she considers that it adds unnecessary complexity to the rule and that any screening (that is controlled by COMZ-R3) would be required on privately owned land.

321. The S42A report recommends that COMZ-R1 be amended as follows:

> ***COMZ-R1 <u>New Buildings, External Additions and Alterations to Existing Buildings, Landscaping, and External Storage</u> ~~Commercial Activities, Community Facilities, Emergency Service Facilities,~~***

[48] Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.014), Chris & Jan Coll (S558.350), Chris J Coll Surveying (S566.350), William McLaughlin (S567.409), and Laura Coll McLaughlin (S574.350)
[49] Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.014), Chris & Jan Coll (S558.352), Chris J Coll Surveying (S566.352), William McLaughlin (S567.410), and Laura Coll McLaughlin (S574.352)

~~Community Corrections Activity, Educational Facilities and Visitor Accommodation Activities and Buildings~~

Activity Status Permitted

Activity status where compliance not achieved:

*Restricted Discretionary where **rules** ~~standards~~ **2-6** ~~5 and 6~~ are not complied with. Discretionary where **rule 1 is** ~~standards 1-4 are~~ not complied with.*

Where:

1. *The maximum height above ground level is ~~12~~ **15** metres except that this does not apply to hose drying towers at Emergency Service Facilities;*
2. *…*
3. *Landscaping shall be provided as follows:*
   i. *The area adjoining the road frontage of all sites shall contain a minimum 1.5m landscaping strip ~~that will, within two years of being planted, reach a minimum height of 1m~~;*
   ~~ii. On sites adjoining a RESZ - Residential Zone a 2m wide landscaping strip shall be provided adjacent to the RESZ - Residential Zone boundary and shall be planted with species, which at maturity, will screen the buildings from the adjoining sites; and~~
   iii. *…*
4. *…*
5. *…*
6. *No building projects beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~. This standard does not apply to:*
   i. *Road boundaries;*
   ii. *Buildings on adjoining sites that have a common wall along the boundary;*
   iv. *Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;*
   v. *Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (eg finials, spires) provided these do not exceed the recession plane by more than 3m vertically;*
   vi. *Solar panels and solar water heaters provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically.*

Advice Notes

1. *Any landscaping required by this rule may be located in common areas, where the development comprises land and/or buildings in separate unit titles.*
2. ***Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.***
3. ~~***The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply***~~

322. The S42A report also recommends the addition of a new rule as follows:

COMZ-R2A Commercial Activities, Community Facilities, Emergency Service Facilities, Community Corrections Activity, Educational Facilities and Visitor Accommodation Activities

Activity status Permitted

Activity status when compliance not achieved: Restricted Discretionary

Where:

1. ***All performance standards for Rule COMZ - R1 are complied with.***

Advice Notes:

1. ***The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply***

COMZ-R2: Minor Structures

323. Ms Belgrave acknowledged the support from Te Mana Ora and FENZ that support the rule as notified. The acknowledgement is subject to recommended amendments that arise from other submission points.

324. In response to the six submission points[50] that sought to delete COMZ-R2.1 Ms Belgrave supports the relief in part. She supports amendments to simplify the rule to only refer to COMZ-R1.2 which relates to setbacks. The remaining clauses of COMZ-R2 set out the height requirements for minor structures.

325. The S42A report recommends that COMZ-R2 be amended as follows:

COMZ-R2 Minor Structures

Activity Status Permitted

Activity status where compliance not achieved: Discretionary

Where:

1. ~~***All performance standards for***~~ *Rule COMZ - R1****.2 is*** ~~***are***~~ *complied with;*
2. *Masts, poles, aerials and pou whenua must not exceed 7m in height;*
3. *…*

COMZ-R3: Fences, Walls and Retaining Walls

326. Ms Belgrave acknowledged the support from the eight submitters that support the rule as notified.

327. Ms Belgrave does not support the relief sought by Griffen & Smith Ltd that to amend the rule so that fences (or parts of fences) greater than 2m and adjoin a residential zone or road are required to be visually permeable. This is because she considers it more appropriate to consider these matters as part of a resource consent process for any fencing over 2m.

328. The S42A report recommends that COMZ-R3 be retained as notified.

COMZ-R4: Relocated Buildings

[50] Buller District Council (S538.397), Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.015), Chris & Jan Coll (S558.353), Chris J Coll Surveying Limited (S566.353), William McLaughlin (S567.411), and Laura Coll McLaughlin (S574.353)

329. In response to the ten submission points[51] that sought to delete COMZ-R4, Ms Belgrave supports the relief sought. She agrees with these submitters that the rule is unnecessary and creates duplication, as there is still a requirement to comply with COMZ-R1 and the Building Act.

330. Ms Belgrave notes that TCZ-R13 allows for relocated buildings as a restricted discretionary activity in the TCZ, which she considers an appropriate way to assess the amenity effects. Subject to scope, she suggests introducing a similar rule in the COMZ.

331. As a consequence of the recommendation to delete this rule, Ms Belgrave does not support the relief sought from the other four submission points to either amend or retain the rule.

332. The S42A report recommends that COMZ-R4 be deleted.

COMZ-R5: Residential Buildings and Activities

333. Ms Belgrave acknowledged the support from the three submitters that support the rule as notified. The acknowledgement is subject to recommended amendments that arise from other submission points.

334. In response to the six submission points[52] that sought amendments to the rule to make it less prescriptive, complex and onerous, Ms Belgrave considers that the intent of the rule is appropriate to achieve good quality amenity outcomes for residents, and able to co-locate with commercial activities in the COMZ. Nevertheless, she agrees that the rules can be simplified to reduce complexity, and she recommends the following amendments:

    a. Deleting the requirements to provide an outdoor service space as this creates duplication with the requirements for outdoor living space; and

    b. Amending the requirements for waste management space where it applies to a multi-unit developments; and

    c. Reducing the size requirements for outdoor living spaces for residential units with two or more bedrooms; and

    d. Amending the size requirements for outlook spaces to include a minimum depth in addition to a minimum width. (Ms Belgrave recommends the inclusion of a diagram to assist with interpretation).

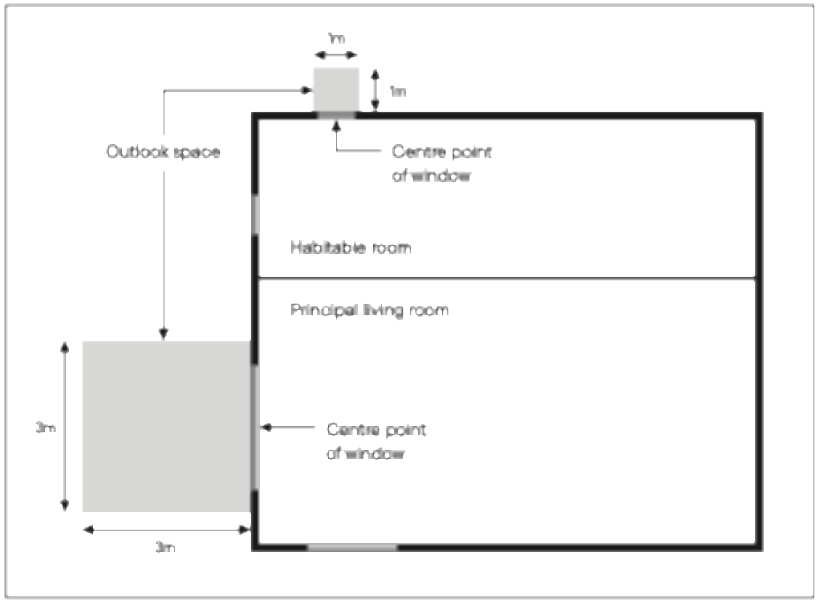
335. Ms Belgrave supports the relief sought by GDC to correct the typo in COMZ-R5.4(v)(3) from *'species'* to *'spaces'*.

336. Ms Belgrave also recommends deleting 'buildings' from the rule heading as a consequential amendment to the Waka Kotahi submission point (S450.213).

337. The S42A report recommends that COMZ-R5 be amended as follows:

COMZ-R5 Residential ~~Buildings and~~ Activities

[51] Chris and Jan Coll (S558.003, S558.355), Chris J Coll Surveying Limited (S566.003, S566.355), William McLaughlin (S567.003, S567.413) and Laura Coll McLaughlin (S574.003, S574.355), Buller District Council (S538.399), Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.017)



[52] Buller District Council (S538.400), Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.018), Chris & Jan Coll (S558.356), Chris J Coll Surveying Limited (S566.356), William McLaughlin (S567.414), and Laura Coll McLaughlin (S574.356)

Activity Status Permitted

Activity status where compliance not achieved: Non-complying

Where:

1. ***~~All performance standards for Rule COMZ - R1 are complied with~~****;*
2. *…*
3. *…*
4. *Each residential unit shall be provided with:*
   i. ***~~An outdoor service space of 3m² and a~~*** *A waste management area of 2m² per unit, each with a minimum dimension of 1.5 metres in* ***~~either~~*** *a private* ***~~or communal~~*** *area* ***or 9m² with a minimum dimension of 2.8m in a communal area****;*
   ii. *A single, indoor storage space of 4m³ with a minimum dimension of 1 metre*
   iii. *Any space designated for waste management, whether private or communal, shall not be located between the road boundary and any building and shall be screened from adjoining sites, roads, and adjoining outdoor living spaces by screening of the waste management area to a height of 1.5 metres; and*
   iv. *Each residential unit shall be provided with an outdoor living space of:*
      1. ***~~6~~*** ***8****m² minimum area and* ***~~1.5~~*** ***2*** *metres minimum dimension* ***~~for a studio or 1 bedroom unit~~***
      ~~2. 10m² minimum area and 1.5 metres minimum dimension for a 2 or 3 bedroom unit;~~
      ~~3. 15m² minimum area and 1.5 metres minimum dimension for 3 or more bedrooms~~
   v. *Each residential unit shall be provided with outlook space from each habitable room from the largest window in the room as follows:*
      1. *A principal living room must have an outlook space with a minimum dimension of 3 metres in width* ***and depth****;*
      2. *All other habitable rooms must have an outlook space with a minimum dimension of 1m in width* ***and depth****;*
      3. *The width of the outlook species spaces is measured from the centre point of the largest window on the building face to which it applies;*
      4. *Outlook spaces may be within the same site or over a public street or other public open space;*
      5. *Outlook spaces required from different rooms within the same building may overlap;*
      6. *Outlook space must:*
         a. *Be clear and unobstructed by buildings; and*
         b. *Not extend over an outlook space or outdoor living space required by another dwelling.*

COMZ-R6: Commercial Activities, Community Facilities, Educational Facilities, Emergency Service Facilities, Community Corrections Activities, and Visitor Accommodation Activities and Buildings not meeting the External Storage, Building Length or Recession Plane performance standards of Rule COMZ-R1

338. Ms Belgrave acknowledged the support from Te Mana Ora and Griffen & Smith Ltd that support the rule as notified. The acknowledgement is subject to recommended amendments that arise from other submission points.

339. Ms Belgrave reiterates the consequential amendment to add extra matters of discretion to this rule that arises from the recommendation responding to the MOE submission in relation to COMZ-R1:

    a. *Bulk, location and design of storage, buildings and structures;*
    b. *Effects on the safety, amenity and attractiveness of the street or public places;*
    c. *Visual dominance, privacy and shading effects on neighbouring sites; and*
    d. *Materials being stored and the period of time for storage.*

340. In response to the submission point made by BDC, (and an opposing further submission from Martin & Co) that sought to add two matters of discretion relating to shading, loss of sunlight and character and amenity, Ms Belgrave supports the relief sought in the original submission. This is because it will assist with making a full assessment of character and amenity effects as part of the resource consent process.

341. In response to the five submission points[53] that sought to amend COMZ-R6.1 to enable activities that do not create any increase in existing non-compliance, Ms Belgrave does not support the relief sought. This is because she considers it more appropriate that any non-compliance be considered thoroughly either to determine existing use rights or as a resource consent.

[53] Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.019), Chris & Jan Coll (S558.357), Chris J Coll Surveying (S566.357), William McLaughlin (S567.415), and Laura Coll McLaughlin (S574.357)

342. The S42A report appendix recommends that COMZ-R6 be amended as follows:

> ***COMZ-R6 ~~Commercial Activities, Community Facilities, Educational Facilities, Emergency Service Facilities, Community Corrections Activities, and Visitor Accommodation Activities and~~ New Buildings and External Additions and Alterations to Existing Buildings not meeting ~~the External Storage, Building Length or Recession Plane performance standards of~~ Rule COMZ-R1***
>
> *Activity Status Restricted Discretionary*
>
> *Activity status where compliance not achieved: Discretionary*
>
> *Where:*
>
> 1. *All performance standards for **Rule COMZ - R1.1 is ~~other than those that relate to External Storage and Recession Planes are~~** complied with.*
>
> *Discretion is restricted to:*
>
> ***~~a. Materials being stored;~~***
>
> ***~~b. Period of time for storage;~~***
>
> ***~~c. Distance from boundary; and~~***
>
> ***~~d. Bulk, location and design of storage, buildings and structures.~~***
>
> ***a. Bulk, location and design of storage, buildings and structures;***
>
> ***b. Effects on the safety, amenity and attractiveness of the street or public places;***
>
> ***c. Visual dominance, privacy and shading effects on neighbouring sites; and***
>
> ***d. Materials being stored and the period of time for storage.***

COMZ-R7: Relocated Buildings meeting Rule COMZ-R4 or Recession Plane performance standards of Rule COMZ-R1

343. In response to the six submission points[54] that sought to delete the rule, Ms Belgrave supports the relief sought as it is consequential to the recommendation to delete COMZ-R4.

344. Ms Belgrave rejects the relief sought to retain the rule by Te Mana Ora.

345. The S42A report recommends that COMZ-R7 be deleted.

COMZ-R8: Commercial Activities, Community Facilities, Educational Facilities, Emergency Service Facilities, Community Corrections Activities, Visitor Accommodation Activities and Buildings, Relocated Buildings, Minor Structures, Fences, Walls and Retaining Walls not meeting Permitted or Restricted Discretionary Activity Standards

346. In response to the ten submission points[55] that sought to delete the rule, Ms Belgrave supports the relief sought as it follows the recommendations to COMZ-R1 and COMZ-R6.

347. The recommendation to delete the rule also achieves the relief sought by the submission points[56] to delete provisions related to relocated buildings.

[54] Buller District Council (S538.402), Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.020), Chris & Jan Coll (S558.004), Chris J Coll Surveying (S566.004), William McLaughlin (S567.004), and Laura Coll McLaughlin (S574.004)
[55] Ministry of Education (S456.034), Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.021), Chris & Jan Coll (S558.358, S558.359), Chris J Coll Surveying Limited (S566.358, S566.359) William McLaughlin (S567.416, S567.417), and Laura Coll McLaughlin (S574.358, S574.359)
[56] Chris & Jan Coll (S558.005), Chris J Coll Surveying Limited (S566.005), William McLaughlin (S567.005), and Laura Coll McLaughlin (S574.005)

348. Given the recommendation to delete the rule, Ms Belgrave rejects the submission points to either retain the rule or make amendments to it.

349. The S42A report recommends that COMZ-R8 be deleted.

COMZ-R9: Residential Activities and Buildings not meeting the standards in Rule COMZ - R5

350. In response to the seven submission points[57] that sought to retain the rule, Ms Belgrave acknowledges the relief sought. However, as the non-complying activity status is already provided for in COMZ-R5, she recommends deleting COMZ-R9 to simplify the chapter.

351. The S42A report recommends that COMZ-R9 be deleted.

COMZ-R10: Industrial Activities

352. Ms Belgrave acknowledged the support from Te Mana Ora and Buller District Council that support the rule as notified.

353. In response to the five submission points[58] that sought to amend the non-complying activity status to discretionary, Ms Belgrave does not support the relief sought. This is because the location of industrial activities within the COMZ is not anticipated and has the potential to undermine the intended purpose to accommodate commercial and residential activities and may also generate a range of effects that adversely affect the higher level of amenity anticipated within the COMZ.

354. The S42A report recommends that COMZ-R10 be retained as notified.

COMZ-R11: Any activity not provided for by another Rule in the zone

355. Ms Belgrave acknowledged the support from Te Mana Ora and Buller District Council that support the rule as notified.

356. In response to the five submission points[59] that sought to delete the rule, Ms Belgrave does not support the relief sought. This is because she considers a catch all rule is the most efficient and effective way to manage activities that are not anticipated within the zone. Further, she considers a non-complying activity status to be appropriate given the activities are not anticipated and variable nature of potential effects.

357. The S42A report recommends that COMZ-R11 be retained as notified.

Hearing and Submitter Evidence

358. The legal submissions made by Ms Alex Booker on behalf of Foodstuffs accepts the S42A report recommendation relating to COMZ-R1 and COMZ-R8.

359. Ms Hadfield's evidence for Griffen & Smith Limited confirms that all recommendations in the S42A report relating to the rules in the COMZ are accepted by the submitter.

[57] S538.404; S190.728; S543.022; S558.360; S566.360; S567.418; S574.360
[58] Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.023), Chris & Jan Coll (S558.361), Chris J Coll Surveying Limited (S566.361), William McLaughlin (S567.419) and Laura Coll McLaughlin (S574.361)
[59] Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.024), Chris & Jan Coll (S558.363), Chris J Coll Surveying Limited (S566.363), William McLaughlin (S567.420) and Laura Coll McLaughlin (S574.363)

360. Mr George van Pelt tabled a letter at the hearing on behalf of FENZ. The letter accepts the S42A recommendation to not make any changes to COMZ-R1.5 as originally sought in the submission.

361. A letter from Ms Daly Williams on behalf of the Ministry of Education was tabled at the hearing. The letter accepts the separation of COMZ-R1 into two rules (one for buildings and one for activities). However, the Ministry sought to add an exemption for educational facilities in reference to the advice note and having to consider NOISE-R3.

362. A letter from Ms Michelle Grinlinton-Hancock on behalf of KiwiRail was tabled at the hearing. The letter draws the Panel's attention to the fact that none of KiwiRail's submission points were allocated to this hearing stream, and as a result the S42A report did not address any aspect of the submission made by KiwiRail. Despite this, KiwiRail sought relief relating to building setbacks from the rail corridor in all zones. In the COMZ a setback of 4.5m is sought[60].

363. Ms Grinlinton-Hancock explains in the letter that KiwiRail seeks setback controls to appropriately manage the health and safety of communities and ensure the ongoing operation of KiwiRail's network as nationally and regionally significant infrastructure. She sets out that a safety setback is critically important to enable landowners to safely access their properties, avoid significant safety risks, and protect the rail corridor from interference.

364. Despite not making any submissions on the rules of the COMZ, Ms Frida Inta presented a statement at the hearing offering views on the S42A recommendation. With respect to COMZ-R1, Ms Inta sought an addition to the end of COMZ-R1.3(i):

> *The area adjoining the road frontage of all sites shall contain a minimum 1.5m landscaping strip* ***~~that will, within two years of being planted, reach a minimum height of 1m~~*** ***to provide for shrubbery.***

365. Ms Inta does not agree with the S42A recommendation to delete COMZ-R1.3(ii). She considers that landscaping is necessary to soften the angular lines of buildings, create aesthetic appeal and ameliorate wind tunnelling. Her suggested amendment is as follows:

> *On sites adjoining a RESZ - Residential Zone a 2m wide landscaping strip shall be provided adjacent to the RESZ - Residential Zone boundary* ***~~and shall be planted with species, which at maturity, will screen the buildings from the adjoining sites.~~*** ***to provide for flora.***

366. Ms Inta's statement questions the permitted maximum 10m² area set in COMZ-R2.5 for minor structures, when she notes that the building code allows structures to be 30m² before a building consent is required.

367. The evidence presented by Mr Jonathan Bhana-Thomson on behalf of the NZ Heavy Haulage Association reiterated the relief sought in the original submission to provide for relocated buildings as a permitted activity. The statement sets out that the Association does not support the deletion of rules relating to relocated buildings.

368. Mr Bhana-Thomson's evidence sets out the process for relocating a building. It states that in his experience, the relocation of a building generally involves less construction disturbance than the on-site construction of a building. Other benefits include lower labour costs and the reuse of existing buildings. Additionally, he advises that there is no requirement in the

[60] As set out in evidence for Topic 1, to align with the road boundary setback rules.

Building Act to complete the relocation or reinstatement of a building within a particular timeframe.

369. Ms Inta's statement considers that if COMZ-R4 is to be deleted (as recommended by the reporting planner in the S42A report), then it would be necessary to include a reference to relocated buildings in COMZ-R1. She also considers that this would necessitate consequential changes to other rules throughout the CMUZs. Notwithstanding this, Ms Inta, considers that it is necessary to include rules for relocated buildings.

370. Ms Inta's statement does not agree with the S42A recommendation to delete '*buildings*' from the heading of COMZ-R5, as she considers that '*activities*' does not cover the spatial requirements in the rule.

Reporting Officer Reply Evidence

371. In relation to the recommended changes to COMZ-R1 and in response to questions from the Panel regarding the addition of a new rule, Ms Belgrave reconsidered the scope to enable this amendment. She explains that the new rule is consequential to the submission point made by Waka Kotahi. In order to respond to the relief sought to separate performance standards from specific activities, a new rule is necessary to provide for the activities listed in the notified version of the rule.

372. Consequential to the separation of COMZ-R1 into two rules (one for building controls and one for activities) and in response to Ms Inta's statement that was presented at the hearing, Ms Belgrave supports a number of amendments to restructure and relocate standards between the relevant rules. This has resulted in amendments to all the Commercial and Industrial chapters. However, the wording and intent of the provisions have not changed through this process, and no new additions have been made to the requirements of the standards.

373. In response to the letter tabled by KiwiRail at the hearing, a joint right of reply has been prepared as the issues traverse various hearing streams. The joint right of reply agrees that a building setback from the rail corridor is appropriate in certain circumstances. As part of the consideration the reporting planners have reviewed other plans, considered the variability of use (of the rail corridor) and the type of buildings/structures a setback should apply to. The planners also note that the railway designation is considerably wider than the railway line itself and so there is already an effective buffer between the railway activity and the adjacent private land. Additionally, the railway line is also generally parallel to the state highway.

374. With regard to the COMZ, the reporting planners do not support the relief sought by KiwiRail for a 4.5m building setback from the railway corridor. They consider that a 4.5m setback would have a significant impact on the land available for development, and that it is excessive in this zone (as well as the Mixed Use Zone). Notwithstanding that the reporting planners consider that it is more efficient to manage relevant effects through the designation process, they recommend a rule to require new buildings to be setback 1.5m from the railway corridor. The rule should exclude accessory buildings and structures. The recommended wording is as follows:

COMZ-R1

2. Any building or structure is set back:

iii. ***1.5m from the railway corridor boundary, excluding accessory buildings and structures***

375. In response to the evidence presented by Mr Bhana-Thomson on behalf of the NZ Heavy Haulage Association Ms Belgrave reconsidered the rules for relocated buildings in the COMZ, MUZ and NCZ. She also considered recommendations made for similar rules in the Residential Zones. Ms Belgrave understands that the purpose of the permitted activity standards for relocatable buildings is to manage potential amenity effects generally associated with achieving an acceptable exterior building quality within a specified timeframe.

376. On the understanding that the purpose of COMZ-R4 (and similar rules in MUZ and NCZ) is to address amenity effects and particularly through standards which require the timely finishing of building works, Ms Belgrave agrees that the standards can address the existing concerns for relocatable buildings and their visual appearance. Furthermore, she considers that a permitted activity status (and compliance with the relevant standards) will encourage redevelopment and revitalisation within the relevant Commercial and Mixed Use zones.

377. In regard to the restricted discretionary activity rule that applies to relocated buildings (COM-R7), Ms Belgrave considers it appropriate to include an additional matter of discretion that will relate to the timing of completing necessary building or reinstatement work. The recommended wording is:

> *Appearance of buildings* ***and the completion of any building reinstatement works identified in a building inspection report****.*

378. Subject to the addition of the above matter of discretion, Ms Belgrave recommends it appropriate to retain COMZ-R4 for relocated buildings (with minor amendments to Standard 2, consistent with the NZ Heavy Haulage Association submission). She notes that this is also consistent with the recommendations in the Residential Zone hearing stream.

379. The recommended wording is as follows:

> *COMZ-R4 Relocated Buildings*
>
> *Activity Status Permitted*
>
> *Where:*
>
> 1. *All performance standards for Rule COMZ - R1 are complied with;*
> 2. *Any relocated building intended for use as a dwelling must have been designed,* ***~~and~~*** *built****, and to be*** *used as a dwelling;*
> 3. *A building pre-inspection report shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the reinstatement works shall be completed within a 12 month period;*
> 4. *The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site; and*
> 5. *All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.*

380. The right of reply considers the question of whether there are provisions in the COMZ that will create opportunities for greater residential development. Ms Belgrave identifies rules COMZ-R1 and COMZ-R5 that provide for new buildings and residential activities as permitted activities. She comments that these permitted standards will encourage residential development by removing costs associated with a resource consent process.

381. The right of reply considers the letter tabled by Ms Williams on behalf of the Ministry of Education and specifically the relief sought to include an exclusion from the noise provisions for education facilities. Ms Belgrave maintains her view that such an exclusion is not necessary. She does not consider it efficient to reiterate the exclusions that apply to designations, and that if education facilities establish outside of a designated site, then the noise provisions should be relevant for consideration.

Hearing Panel's Evaluation

COMZ-R1

382. The Panel agree with Ms Belgrave regarding her recommendation to separate COMZ-R1 into two rules (one for building controls and one for activities). We agree that this addresses the concerns raised by Waka Kotahi in their submission point. Furthermore, we accept Ms Belgrave's right of reply, evidence that the addition of a new rule is consequential to the submission point, and that it is necessary to provide for the activities listed in the notified version of the rule.

383. The new rule reference is COMZ-R5, and the Panel notes that because of the addition, there is a change to the numbering sequence throughout the chapter.

384. We acknowledge Ms Inta's statement (presented at the hearing) that commented on the recommended changes to COMZ-R1, and the separation of the rule into two. We are also aware that neither Ms Inta nor the Buller Conservation Group submitted to this rule. Notwithstanding that, the Panel agree with Ms Belgrave's right of reply evidence that recommends restructuring and relocating standards between the rules, ensuring that building related standards are in COMZ-R1 and that activity related standards are in the new rule, being COMZ-R5. However, we disagree that Ms Inta's statement provides scope for these changes, and we consider it more appropriate that these changes are consequential to the Waka Kotahi submission.

385. The Panel agree with Ms Belgrave's recommended response to the submission points made by the Ministry of Education and Foodstuffs to make non-compliance with clauses COMZ-R1 (2) – (5) a restricted discretionary activity, while retaining a full discretionary activity status for non-compliance with the building height clause. We acknowledge that the legal submissions for Foodstuffs accept these changes.

386. The Panel agree with Ms Belgrave's recommendation to delete the second part of COMZ-R1(3)(i) that relates to ensuring landscaping planting reach 1m in height. We acknowledge Ms Belgrave's recommendation also to delete COMZ-R1(3)(ii), citing the submission from BDC. However, the submission did not seek deletion of this clause, and therefore, we consider we have no scope to agree with Ms Belgrave's recommendation on this particular amendment.

387. The Panel agree with Ms Belgrave and the BDC that the exception in COMZ-R1(6) relating to the written approval is better included as an advice note. We also agree with Ms Belgrave's recommendation to refer to boundary '*rules*' (rather than '*setbacks*') to ensure all rules that are subject to the deemed permitted boundary activity process are captured.

388. The Panel acknowledges that Ms Pauline Hadfield's evidence on behalf of Griffen & Smith Limited accepts the recommended amendments made to the COMZ rules, and so effectively resolves their submission points.

389. The Panel agree with Ms Belgrave and Davis Ogilvie & Partners that replacing '*encouraged*' with *'required'* in COMZ-R1.3(iii) provides greater certainty and clarity.

390. The Panel agree with Ms Belgrave's reasons and recommendation to accept the relief sought in the multiple submission points to increase the maximum building height in the COMZ to 15m.

391. The Panel acknowledge that KiwiRail's submission points were not recorded or reported on in the S42A report. We have considered the submission, the letter tabled at the hearing and the joint right of reply prepared on the matter by Ms Belgrave and Ms Easton. We agree with the right of reply evidence that a 5m setback from the rail corridor is excessive and would result in inefficiencies in terms of land use. While we acknowledge the safety issue raised by KiwiRail, we consider a 1.5m setback, as recommended in the right of reply, more appropriate and would, we consider, still address the safety concerns around building maintenance. We also consider that the rule should refer to the setback being from the '*rail designation*' rather than the '*rail corridor*' to provide a definitive point of measurement.

392. In relation to the remainder of the submissions on COMZ-R1, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

COMZ-R2

393. The Panel agree with Ms Belgrave's recommendation to amend the wording of COMZ-R2(1) to ensure that the setback standards of COMZ-R1 apply. We also agree with the right of reply wording, which reflects a standardised approach for referencing rules and has been applied throughout the Plan.

394. In relation to the remainder of the submissions on COMZ-R2, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

COMZ-R3

395. The Panel agree with Ms Belgrave's recommendation to make no changes to COMZ-R3. We acknowledge that the only submitter that sought any amendment was Griffen & Smith Limited and we refer to Ms Pauline Hadfield's evidence on behalf of this submitter that accepts the recommended amendments made to the COMZ rules, and so effectively resolves their submission point.

COMZ-R4

396. The Panel acknowledge Ms Belgrave's revised position concerning the NZ Heavy Haulage Association Inc submission and statement presented at the hearing, and we accept her right of reply recommendation to retain COMZ-R4 with minor amendments.

COMZ-R5

397. The Panel agrees with Ms Belgrave's recommendations to amend clause 4 of the rule to simplify and reduce complexity regarding the requirements for residential units in the COMZ. We also agree with the inclusion of a diagram to illustrate and help with the interpretation of the outlook space part of the rule. However, we recommend amending the diagram so that the larger outdoor space has dimensions of 3m x 3m to reflect the wording of the rule. We also recommend consolidating COMZ-R5.4(iv) into a single clause, as the deletion of the

alternative dimensions for different-sized residential units makes the list structure of the clause redundant.

398. The Panel also agrees to correct the typo in COMZ-R5.4(v)(3) and to delete '*buildings'* from the rule heading as a consequential amendment to the Waka Kotahi submission point (S450.213).

399. The Panel acknowledge Ms Inta's statement that was presented at the hearing, which made a comment about the recommended changes to this rule. However, as neither Ms Inta nor the Buller Conservation Group made a submission on this rule, there is no scope to consider Ms Inta's statement.

400. In relation to the remainder of the submissions on COMZ-R5, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

401. Due to the changes to the numbering sequence, this rule becomes COMZ-R6 in our recommendation.

COMZ-R6

402. The Panel agree with Ms Belgrave that there is a need for consequential changes to this rule given the recommended separation of COMZ-R1 in response to the submission point from Waka Kotahi. We also agree with the recommended amendments to the matters of discretion that arise from the MOE submission in relation to COMZ-R1.

403. We also agree with separating COMZ-R6 into two restricted discretionary activity rules (in the same vein as the separation of COMZ-R1), and we agree with the recommended wording of the rule as set out in Ms Belgrave's right of reply evidence.

404. In relation to the remainder of the submissions on COMZ-R6, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

405. Due to the changes to the numbering sequence, these two rules become COMZ-R7 and COMZ-R8 in our recommendation.

COMZ-R7

406. The Panel acknowledge Ms Belgrave's revised position concerning the NZ Heavy Haulage Association Inc submission and statement presented at the hearing, and we accept her right of reply recommendation to retain COMZ-R7 with minor amendments.

407. The Panel notes at this point that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to '*landscape measures*' and '*landscape treatment*' have been removed from the matters of discretion and replaced with '*measures to mitigate landscape effects*' throughout the chapter.

408. In relation to the remainder of the submissions on COMZ-R7, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

409. Due to the changes to the numbering sequence, this rule becomes COMZ-R9 in our recommendation.

COMZ-R8

410. Having reviewed COMZ-R8 in an overall context the Panel disagree with Ms Belgrave that the rule should be deleted. This is a because of the fundamental structure of the rules in the Plan which requires there to be a corresponding rule when an activity status is escalated. Therefore, in this case we consider a discretionary activity rule is necessary to address the activities that would otherwise be a controlled or restricted discretionary activity where one or more of the performance standards are not complied with.

411. Subsequently, we have turned our minds to the performance standards of the rule and the appropriateness of retaining them, particularly as multiple submissions seek their deletion. With respect to standards 1 and 3, these are the same as the permitted standard and therefore there is nothing to be gained by retaining them in the discretionary activity rule. In terms of standard 2, as there is no policy that would direct or support the retention of the standard controlling the length of a building abutting a residential zone, and more particularly to support the escalation of any non-compliance with this to non-complying, we also recommend deleting this clause.

412. The Panel note that this aligns with our plan wide recommendation that the catch-all rule have an activity status of discretionary. We consider that the escalation of the construction of buildings, minor structures, fences, walls and retaining walls to a non-complying activity in the COMZ when activities that are not provided for is a discretionary activity to be inappropriate, especially in the context of the policy direction.

413. In relation to the remainder of the submissions on COMZ-R8, the Panel accepts the submission points that sought to delete the references to relocated buildings[61], as our previous recommendations on this matter mean that an activity status cannot escalate beyond restricted discretionary.

414. In relation to the remainder of the submissions on COMZ-R8, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

415. Due to the changes to the numbering sequence, this rule becomes COMZ-R10 in our recommendation.

COMZ-R9

416. For the same reasons that we do not support the recommendation to delete COMZ-R8, the Panel also disagrees with Ms Belgrave that COMZ-R9 should be deleted. This is a because the permitted rule for Residential Activities escalates non-compliance to a non-complying activity status and therefore to be consistent with the structure of the rules in the Plan, the rule should be retained. Therefore, we accept the submission points made regarding this rule.

417. However, the Panel recommends consequential changes to the wording of the rule heading to ensure co-ordination with the other rules in the table.

COMZ-R10

418. The Panel agree with Ms Belgrave's recommendation to retain this rule and agrees that the submission points that sought to change the activity status to discretionary should be rejected based on the conclusions reached by Ms Belgrave.

[61] Chris & Jan Coll (S558.005), Chris J Coll Surveying Limited (S566.005), William McLaughlin (S567.005), and Laura Coll McLaughlin (S574.005)

419. Notwithstanding our recommendation, the Panel notes that there is a gap in the policy direction to support this rule, and we are conscious that there is an absence of "avoid", or other suitably worded policy, that would indicate industrial activities should not be established in this zone. However, CMUZ-P19 does support the relocation of existing industrial activities already established in the zone to be moved in Industrial Zoned areas.

COMZ-R11

420. The Panel acknowledges that COMZ-R11 is a catch-all rule intended to manage activities not specifically provided for in the other rules. The Panel has considered this matter plan-wide and we agree with the submitters that such rules are better placed as discretionary; otherwise, they are unnecessarily limiting in our view and could have unforeseen consequences. Therefore, it is our recommendation to relocate this rule to the discretionary section of this chapter. We rely on the submissions of William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335) and Vance and Carol Boyd (S447.003) to provide the scope.

Hearing Panel's Recommendation

421. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommends the following changes to the **Commercial Zone Rules**:

Commercial Zone Rules		
Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.		
Permitted Activities		
COMZ - R1	**New Buildings and External Additions or Alterations to Existing Buildings** ~~Commercial Activities, Community Facilities, Emergency Service Facilities, Community Corrections Activity, Educational Facilities and Visitor Accommodation Activities and Buildings~~[62]	
Activity Status Permitted Where: 1. The maximum height above ground level is ~~12~~ **15**[63] metres except that this standard does not apply to hose drying towers at Emergency Service Facilities; 2. Any building or structure is set back:		**Activity status where compliance not achieved:** Restricted Discretionary where standards ~~5 and~~ **2 – 5** ~~6~~ are not complied with.

[62] Waka Kotahi (S450.213)
[63] Martin & Co Westport Ltd and Lumberland Building Market Westport (S543.014), Chris & Jan Coll (S558.352), Chris J Coll Surveying (S566.352), William McLaughlin (S567.410), Laura Coll McLaughlin (S574.352)

i. 3m from any RESZ - Residential Zone or OSRZ - Open Space and Recreation Zone; and ii. 3m from the road boundary, except for; sites with frontage to two roads in the COMZ - Commercial Zone can have a 3m setback on one road boundary and 1.5m setback on the other road boundary; iii. **1.5m from the railway designation boundary, excluding accessory buildings and structures.**[64] 3. Landscaping shall be provided as follows: i. The area adjoining the road frontage of all sites shall contain a minimum 1.5m landscaping strip ~~that will, within two years of being planted, reach a minimum height of 1m~~[65]; ii. On sites adjoining a RESZ - Residential Zone a 2m wide landscaping strip shall be provided adjacent to the RESZ - Residential Zone boundary and shall be planted with species, which at maturity, will screen the buildings from the adjoining sites; and iii. The planting of 1 tree per 20 carparking spaces is ~~encouraged~~ **required**[66] within any carparking area. iv. Stormwater facilities that provide water quality treatment and landscape amenity, should be incorporated into landscaped areas, where practicable, to achieve effective stormwater management in an integrated manner. 4. The maximum building length is 20m where this abuts a RESZ - Residential Zone; **and** ~~5. External storage is screened by a 1.8m fence or landscaping so that it is not visible from any adjoining residential zone boundary or adjoining public place; and~~[67] 5. No building projects beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing.~~[68] This standard does not apply to:	Discretionary where standard~~s~~ 1~~-4 are~~ **is**[71] not complied with.

5. MIXED USE ZONE

5.1. Mixed Use Zone Overview

Submissions and Further Submissions

422. One submission point relating to the Overview of the Mixed Use Zone was summarised in a Table on pages 80-81 of the S42A Report. The Panel has considered the relevant submissions received and adopts the summaries in the s42A Report.

Section 42A Report

423. In response to the submission point made by Ngāi Tahu that sought to have Poutini Ngāi Tahu values as part of controlled and restricted discretionary activities, Ms Belgrave notes that this is a common submission point across multiple hearing streams and has also been considered in relation to the CMUZ and COMZ. Ms Belgrave does not support the relief sought in the submission point.

424. Ms Belgrave did not make any recommendations to amend the provisions in response to this submission point.

Hearing and Submitter Evidence

425. No evidence was presented at the hearing in relation to this submission point.

Reporting Officer Reply Evidence

426. There was no specific consideration of this matter in the reply evidence.

Hearing Panel's Evaluation

427. The Panel agree with Ms Belgrave to retain the MUZ Overview as notified, and therefore no changes are necessary. We agree that the submission point received in relation to this part of the Plan be rejected based on the conclusions reached by Ms Belgrave.

Hearing Panel's Recommendation

428. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends rejecting the submission from Ngāi Tahu (S620.219) and that no changes be made to the **Mixed Use Zone Overview**.

5.2. Mixed Use Zone Rules

Submissions and Further Submissions

[108] William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335) and Vance and Carol Boyd (S447.003)

429. One submission point relating generally to the **MUZ Rules** was summarised in a Table on page 82 of the S42A Report. The submission sought amendments to the rules.

430. Five submission points relating to **MUZ-R1** were summarised in a Table on pages 82-84 of the S42A Report. One submission point supported the retention of the rule as notified. Four submission points sought amendments.

431. Four submission points relating to **MUZ-R2** were summarised in a Table on page 86 of the S42A Report. All the submission points supported the retention of the rule as notified.

432. Four submission points relating to **MUZ-R3** were summarised in a Table on pages 86-87 of the S42A Report. Two of the submission points supported the retention of the rule as notified. Two submission points sought amendments.

433. Seven submission points relating to **MUZ-R4** were summarised in a Table on pages 87-88 of the S42A Report. Five of the submission points supported the retention of the rule as notified. Two submission points sought amendments.

434. Four submission points relating to **MUZ-R5** were summarised in a Table on pages 89-90 of the S42A Report. Three of the submission points supported the retention of the rule as notified. One submission point sought amendments.

435. Three submission points relating to **MUZ-R6** were summarised in a Table on page 91 of the S42A Report. Two of the submission points supported the retention of the rule as notified. One submission point sought amendments.

436. Two submission points relating to **MUZ-R7** were summarised in a Table on page 91 of the S42A Report. All the submission points supported the retention of the rule as notified.

437. Nine submission points and one further submission relating to **MUZ-R8** were summarised in a Table on page 94 of the S42A Report. Three of the submission points supported the retention of the rule as notified, five submission points sought its deletion, and one submission point sought amendments.

438. Two submission points relating to **MUZ-R9** were summarised in a Table on page 94 of the S42A Report. All the submission points supported the retention of the rule as notified.

439. Two submission points relating to **MUZ-R10** were summarised in a Table on page 95 of the S42A Report. All the submission points supported the retention of the rule as notified.

440. Two submission points relating to **MUZ-R11** were summarised in a Table on page 95 of the S42A Report. All the submission points supported the retention of the rule as notified.

441. Two submission points relating to **MUZ-R12** were summarised in a Table on page 96 of the S42A Report. All the submission points supported the retention of the rule as notified.

442. Two submission points relating to **MUZ-R13** were summarised in a Table on page 96 of the S42A Report. All the submission points supported the retention of the rule as notified.

443. Two submission points relating to **MUZ-R14** were summarised in a Table on page 96 of the S42A Report. All the submission points supported the retention of the rule as notified.

444. The Panel adopts these summaries and has considered all the relevant submissions and further submissions.

Section 42A Report

MUZ - General

445. In response to the submission point from the NZ Motor Caravan Association that sought to provide for campgrounds and camping as a permitted activity, Ms Belgrave reiterates her comments set out in relation to the COMZ that she does not support the relief sought. This is because the potential for adverse amenity and character effects within the MUZ are more appropriately considered through the resource consent process.

446. The S42A report recommends no changes in response to this submission.

MUZ – R1 New Buildings and External Additions or Alterations to Existing Buildings

447. Ms Belgrave acknowledged the support from Te Mana Ora that support the rule as notified. The acknowledgement is subject to recommended amendments that arise from other submission points.

448. In response to the submission point made by Waka Kotahi, which sought clarification as to whether the requirements of the rule are to be considered as performance standards, and if so, the activities listed in the heading should be a separate rule, Ms Belgrave generally supports the relief sought. That said, MUZ-R1 only sets out the rules that apply to all new buildings and external additions or alterations to existing buildings, and that specific activities are managed under other rules. It is this format that is consistent with other rules throughout the pTTPP, and as such Ms Belgrave recommends that the general rule structure be retained for MUZ-R1. However, she does recommend the inclusion of '*external storage'* in the rule title to be consistent with other amendments to the COMZ.

449. Ms Belgrave partially supports the relief sought by the Ministry of Education, which sought a restricted discretionary activity status where the rules are not complied with. Similar to the consideration of the COMZ rule, she considers that a restricted discretionary activity status can be appropriately applied to non-compliances with the relevant rules (except building height) as the associated effects can be readily identified. This recommendation requires consequential amendments to MUZ-R9 as well as the addition of a new rule.

450. In response to the submission point made by BDC to reduce the maximum ground floor area of a building from 500m² to 300m², Ms Belgrave does not support the relief sought. This is because no detail is provided to justify the reduction, and 500m² is considered to retain flexibility and encourage new development within the MUZ.

451. In response to the other submission points made by BDC, Ms Belgrave does not support the fencing amendment but agrees that an advice note relating to the deemed permitted activity process is appropriate.

452. In response to the submission point made by Fire and Emergency NZ that sought amendments to MUZ-R1.5 similar to those in the COMZ relating to the screening of external storage areas, Ms Belgrave does not support the relief sought. This is because she considers that it adds unnecessary complexity to the rule.

453. Ms Belgrave's recommendation also includes deleting MUZ-R1.6, as this is consequential to her recommendation for the equivalent rule in the COMZ.

454. The S42A report recommends that MUZ-R1 be amended as follows:

> ***MUZ-R1 New Buildings, ~~and~~ External Additions and Alterations to Existing Buildings and External Storage***
>
> *Activity Status Permitted*
>
> *Activity status where compliance not achieved:*
>
> ***Restricted Discretionary where rules 1 and 3-7 are not complied with.*** *Discretionary* ***where rule 2 is not complied with****.*
>
> *Where:*
>
> *…*
>
> ***~~6. On sites adjoining a RESZ - Residential Zone a 2m wide landscaping strip shall be provided adjacent to the RESZ - Residential Zone boundary and shall be planted with species, which at maturity, will screen the buildings from the adjoining sites; and~~***
>
> *7. No building shall protrude beyond a building envelope defined by a recession plane as identified in accordance with Appendix Two to commence 2.5m above any RESZ - Residential Zone boundary* ***~~except where the neighbouring property owner's written approval is provided to the Council 10 working days to the works commencing~~****. >
> ***d. Materials being stored and the period of time for storage***

MUZ – R2 Commercial Activity, Community Facilities, Community Corrections Activity, Educational Facilities and Emergency Service Facilities

456. Ms Belgrave acknowledged the support from the four submitters[109] that sought to retain the rule as notified.

457. The S42A report recommends that MUZ-R2 be retained as notified.

MUZ – R3 Carparking and Vehicle Service Access

458. Ms Belgrave acknowledged the support from Te Mana Ora and Waka Kotahi that supported the rule as notified. The acknowledgement is subject to recommended amendments that arise from other submission points.

459. Ms Belgrave does not support the submission point made by BDC to delete MUZ-R3 or to include the requirements in TRN-S12. This is because Ms Belgrave considers that MUZ-R3 is focused on design matters that are directly relevant to the effects of new development in the MUZ, while TRN-S12 is focused on the construction requirements of carparking.

460. In response to the submission point made by Fire and Emergency NZ that sought to exclude emergency service activities from the design requirements for parking and access, Ms Belgrave agrees that as emergency services have operational needs that limit the location of parking and access relative to their building and because there will be a limited number of emergency service facilities being established in the MUZ, it is appropriate to exclude them from the requirements of the rule.

461. The S42A report recommends that MUZ-R3 be amended as follows:

> ***MUZ-R3 Carparking and Vehicle Service Access***
>
> *…*
>
> ***6. <u>Emergency service facilities are excluded from Rules MUZ-R3.1 – MUZ-R3.5</u>***

MUZ – R4 Residential Activities and Papakāinga

462. Ms Belgrave acknowledged the support from the five submission points[110] that supported the rule as notified. The acknowledgement is subject to recommended amendments that arise from other submission points.

463. In response to the submission point from Davis Ogilvie and Partners Ltd that requested amendments to MUZ-R4.5 to enable side or rear access to residential accommodation, Ms Belgrave does not support the relief sought. This is because providing access from publicly accessible places will contribute to achieving positive built outcomes in relation to amenity and safety. Nevertheless, amendments to the rule are recommended that will enable secondary accesses to be provided from the rear or side of a building.

464. In response to the submission point from BDC that sought the following relief, Ms Belgrave supports the submission in part:

[109] Te Mana Ora (Community and Public Health) of the NPHS/Te Whatu Ora (S190.733), Buller District Council (S538.409), Fire and Emergency New Zealand (S573.085), Department of Corrections (S349.010)
[110] Ngāi Tahu (S620.220), Te Mana Ora (Community and Public Health) of the NPHS/Te Whatu Ora (S190.735), Waka Kotahi (S450.218), Fire and Emergency New Zealand (S573.087), and Grey District Council (S608.703)

a. A cross-reference to MUZ-R1; and

b. Delete the requirement for residential units to be above street level; and

c. Delete the waste management part of the rule; and

d. Amendments to enable access from public frontage (other than a street).

465. Ms Belgrave does not consider it necessary to cross-reference MUZ-R1, as the rule will be relevant to all new buildings, including residential buildings.

466. Ms Belgrave does not support deleting the requirement for residential units to be above street level, as she considers that ground-floor space is more efficiently used to accommodate commercial activities, and it is appropriate to protect the ground floor in the MUZ for commercial activities.

467. Ms Belgrave supports the simplification of the waste management rules. However, she does not support the complete deletion of the rule, as requested by BDC. Rather, she supports an amendment similar to the COMZ recommendation.

468. Ms Belgrave considers that the recommended amendments to MUZ-R4.5 that respond to the Davis Ogilvie submission point will also address the BDC submission.

469. The S42A report recommends that MUZ-R4 be amended as follows:

MUZ-R4 Residential Activities and Papakāinga

Where:

1. *…*
2. *Each residential unit shall be provided with a waste management area of 2m² per unit, each with a minimum dimension of 1.5 metres in* ~~***either***~~ *a private* ~~***or communal***~~ *area* ***or 9m² with a minimum dimension of 2.8 metres in a communal area****.*
3. *…*
4. *…*
5. ***The principal residential*** ~~***Residential***~~ *accommodation entrance*~~***s***~~ *shall be provided directly from* ***a*** ~~***the***~~ *public street* ***or open space****.*

MUZ – R5 Visitor Accommodation

470. Ms Belgrave acknowledged the support from Te Mana Ora, Waka Kotahi and Fire and Emergency that supported the rule as notified. The acknowledgement is subject to recommended amendments that arise from other submission points.

471. In response to the submission point made by BDC, which sought amendments similar to those for MUZ-R4, Ms Belgrave makes identical recommendations. She reiterates that living accommodation should not be on the ground level and that cross-reference to MUZ-R1 is not considered necessary. She also continues to support amendments to increase the flexibility for the location of entrances.

472. The S42A report recommends that MUZ-R5 be amended as follows:

MUZ-R5 Visitor Accommodation

Where:

4. ***The principal visitor*** ~~***Visitor***~~ *accommodation entrance*~~*s*~~ *shall be provided directly from* ***a*** ~~***the***~~ *public street* ***or open space****.*

MUZ – R6 Minor Structures

473. Ms Belgrave acknowledged the support from Te Mana Ora, and Fire and Emergency that supported the rule as notified. The acknowledgement is subject to recommended amendments that arise from other submission point.

474. In response to the submission made by BDC that sought to delete MUZ-R6.1 and add a new rule, Ms Belgrave supports the inclusion of additional setbacks for minor structures. She also recommends including the requirements from MUZ-R1.4 into MUZ-R6, which includes setback requirements for structures adjacent to other zones. It is her view that these setback requirements are also relevant to minor structures.

475. The S42A report recommends that MUZ-R6 be amended as follows:

MUZ-R6 Minor Structures

Where:

~~***1. All performance standards for Rule MUZ - R2 are complied with;***~~

…

x. Any structure is set back:

i. 3m from any RESZ - Residential Zone, OSRZ - Open Space and Recreation Zone, INZ - Industrial Zone or PORTZ - Port Zone boundary;

ii. 4.5m from the road boundary; and

iii. 1m from internal boundaries.

MUZ – R7 Fences, Walls and Retaining Walls

476. Ms Belgrave acknowledged the support from Te Mana Ora and BDC that sought to retain the rule as notified.

477. The S42A report recommends that MUZ-R7 be retained as notified.

MUZ – R8 Relocated Buildings

478. In response to the five submission points[111] that sought to delete MUZ-R8, Ms Belgrave supports the relief sought. She reiterates the reasons set out regarding COMZ-R4 and agrees with the submitters that the rule is unnecessary and creates duplication, as there is still a requirement to comply with MUZ-R1 and the Building Act.

479. Because of the recommendation to delete this rule, Ms Belgrave does not support the relief sought from the other four submission points to either amend or retain the rule.

[111] Chris & Jan Coll (S558.006), Chris J Coll Surveying (S566.006), William McLaughlin (S567.006), Laura Coll McLaughlin (S574.006) and Buller District Council (S538.415)

480. The S42A report recommends that MUZ-R8 be deleted.

MUZ – R9 Commercial Activities, Community Facility, Educational Facility, Community Corrections Activity, Visitor Accommodation, Emergency Service Facilities and Buildings not meeting Permitted Activity Standards

481. Ms Belgrave acknowledged the support from Te Mana Ora and BDC that sought to retain the rule as notified. However, Ms Belgrave recommends that the rule be deleted to simplify the MUZ chapter and as a consequential amendment to MUZ-R1 and the addition of the restricted discretionary activity rule (MUZR9A) in response to the Ministry of Education submission (S456.035).

482. The recommended amendments will result in a restricted discretionary and discretionary activity status to non-compliance with rules under MUZ-R1. The discretionary activity status for an infringement of building height will provide a broad scope to consider relevant effects. For these reasons, Ms Belgrave considers that a non-complying activity status is not necessary.

483. The S42A report recommends that MUZ-R9 be deleted.

MUZ – R10 Minor Structures, Fences, Walls and Retaining Walls not meeting Permitted Activity Standards

484. Ms Belgrave acknowledged the support from Te Mana Ora and BDC that sought to retain the rule as notified. However, Ms Belgrave recommends that the rule be deleted to simplify the MUZ chapter, as a discretionary activity status is already provided for non-compliance with the permitted standard in MUZ-R6 and MUZ-R7.

485. The Ministry of Education submission (S456.035) provides scope as a consequential amendment.

486. The S42A report recommends that MUZ-R10 be deleted.

MUZ–R11 New Buildings and External Additions to Buildings not meeting Rule MUZ-R1

487. Ms Belgrave acknowledged the support from Te Mana Ora and BDC that sought to retain the rule as notified. However, Ms Belgrave recommends that the rule be deleted to simplify the MUZ chapter as a consequential amendment to the amendments to MUZ-R1 and MUZ-R9A.

488. The S42A report recommends that MUZ-R11 be deleted.

MUZ – R12 Residential Activities not meeting Permitted Activity standards

489. Ms Belgrave acknowledged the support from Te Mana Ora and BDC that sought to retain the rule as notified. However, Ms Belgrave recommends that the rule be deleted to simplify the MUZ chapter, as a discretionary activity status is already provided for non-compliance with the permitted standard in MUZ-R4 and MUZ-R5.

490. The S42A report recommends that MUZ-R12 be deleted.

MUZ – R13 Industrial Activities

491. Ms Belgrave acknowledged the support from Te Mana Ora and BDC that sought to retain the rule as notified.

492. The S42A report recommends that MUZ-R13 be retained as notified.

MUZ – R14 Any activity not provided for by another Rule in the zone

493. Ms Belgrave acknowledged the support from Te Mana Ora and BDC that sought to retain the rule as notified.

494. The S42A report recommends that MUZ-R14 be retained as notified.

Hearing and Submitter Evidence

495. A letter from Ms Daly Williams on behalf of the Ministry of Education was tabled at the hearing. The letter appears to accept the wording of MUZ-R1 and the consequential amendments to add a restricted discretionary activity rule.

496. Mr George van Pelt tabled a letter at the hearing on behalf of FENZ. The letter accepts the S42A recommendation not to make any changes to MUZ-R1.5 as initially sought in the submission. The letter also confirms that FENZ accept the S42A recommendations regarding MUZ – R2, MUZ – R3, MUZ – R4, MUZ – R5 and MUZ – R6.

497. A letter from Ms Michelle Grinlinton-Hancock on behalf of KiwiRail was tabled at the hearing. The letter draws the Panel's attention to the fact that none of KiwiRail's submission points were allocated to this hearing stream. As a result, the S42A report did not address any aspect of the submission made by KiwiRail. Despite this, KiwiRail sought relief relating to building setbacks from the rail corridor in all zones. In the MUZ a setback of 5m is sought[112].

498. Ms Grinlinton-Hancock explains in the letter that KiwiRail seeks setback controls to appropriately manage the health and safety of communities and ensure the ongoing operation of KiwiRail's network as nationally and regionally significant infrastructure. She sets out that a safety setback is critically important to enable landowners to safely access their properties, avoid significant safety risks, and protect the rail corridor from interference.

499. The evidence presented by Mr Jonathan Bhana-Thomson on behalf of the NZ Heavy Haulage Association reiterated the relief sought in the original submission to provide for relocated buildings as a permitted activity. The statement sets out that the deletion of rules relating to relocated buildings is not supported by the Association.

500. Mr Bhana-Thomson's evidence sets out the process for relocating a building and states that in his experience the relocation of a building generally involves less construction disturbance than the on-site construction of a building. Other benefits include lower labour costs, and the reuse of existing buildings. Additionally, he advises that there is no requirement in the Building Act to complete the relocation or reinstatement of a building within a particular timeframe.

Reporting Officer Reply Evidence

501. In response to the letter tabled by KiwiRail at the hearing, a joint right of reply has been prepared as the issues traverse various hearing streams. The joint right of reply agrees that a building setback from the rail corridor is appropriate in certain circumstances. As part of the consideration, the reporting planners have reviewed other plans, considered the variability of use (of the rail corridor) and the type of buildings/structures a setback should apply to. The

[112] As set out in evidence for Topic 1, to align with the road boundary setback rules.

planners also note that the railway designation is considerably wider than the railway line itself. So there is already an effective buffer between the railway activity and the adjacent private land. Additionally, the railway line is also generally parallel to the state highway.

502. Concerning the MUZ, the reporting planners do not support the relief sought by KiwiRail for a 5m building setback from the railway corridor. They consider that a 5m setback would have a significant impact on the land available for development, and that it is excessive in this zone. Notwithstanding that the reporting planners consider that it is more efficient to manage relevant effects through the designation process, they recommend a rule to require new buildings to be setback 1.5m from the railway corridor. The rule should exclude accessory buildings and structures. The recommended wording is as follows:

MUZ-R1

4. Any building or structure is set back:

i. 3m from any RESZ – Residential Zone OSRZ – Open Space and Recreation Zone, INZ - Industrial Zone or PORTZ - Port Zone boundary; and boundary;

ii. ***1.5m from the railway corridor boundary, excluding accessory buildings and structures***

503. Consequential to the separation of MUZ-R1 into two rules (one for building controls and one for activities) and in response to Ms Inta's statement that was presented at the hearing, Ms Belgrave supports several amendments to restructure and relocate standards between the relevant rules. This has resulted in amendments to all the Commercial and Industrial chapters. However, the wording and intent of the provisions have not changed through this process, and no new additions have been made to the requirements of the standards.

504. In response to the evidence presented by Mr Bhana-Thomson on behalf of the NZ Heavy Haulage Association, Ms Belgrave reconsidered the rules for relocated buildings in the COMZ, MUZ and NCZ. She also considered recommendations made for similar rules in the Residential Zones. Ms Belgrave understands that the purpose of the permitted activity standards for relocatable buildings is to manage potential amenity effects generally associated with achieving an acceptable exterior building quality within a specified timeframe.

505. On the understanding that the purpose of MUZ-R8 (and similar rules in COMZ and NCZ) is to address amenity effects, particularly through standards that require the timely completion of building works, Ms Belgrave agrees that the standards can address the existing concerns regarding relocatable buildings and their visual appearance. Furthermore, she considers that a permitted activity status (and compliance with the relevant standards) will encourage redevelopment and revitalisation within the relevant Commercial and Mixed Use zones.

506. Ms Belgrave recommends it is appropriate to retain MUZ-R8 for relocated buildings (with minor amendments to Standard 2, consistent with the NZ Heavy Haulage Association submission). She notes that this is also consistent with the recommendations in the Residential Zone hearing stream.

507. The recommended wording is as follows:

MUZ-R8 Relocated Buildings

Activity Status Permitted

Where:

1. All performance standards for Rule MUZ - R1 are complied with;

2. *Any relocated building intended for use as a dwelling must have been designed, **~~and~~** built**, and ~~to be~~** used as a dwelling;*
3. *A building pre-inspection report shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the reinstatement works shall be completed within a 12 month period;*
4. *The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site; and*
5. *All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.*

508. Attachment C of the right of reply sets out the tracked changes to the rules for the MUZ. In this, Ms Belgrave changes her S42A recommendation regarding MUZ-R9 and recommends retaining a version of the rule. This is because it applies a non-complying activity status to buildings exceeding 20m, and this requirement is not duplicated in MUZ-R1.

509. The recommended wording is as follows:

> ***MUZ-R9 ~~Commercial Activities, Community Facility, Educational Facility, Community Corrections Activity, Visitor Accommodation, Emergency Service Facilities and~~ Buildings not meeting Permitted Activity Standards***
>
> *Activity Status Discretionary*
>
> *Where:*
>
> 1. *The maximum height is 20m.*
>
> *Activity Status where compliance not achieved: Non-complying*

510. The right of reply considers the question of whether there are provisions in the MUZ that will create opportunities for greater residential development. Ms Belgrave identifies rules MUZ-R1 and MUZ-R4 that provide for new buildings and residential activities as permitted activities. She comments that these permitted standards will encourage residential development by removing costs associated with a resource consent process.

Hearing Panel's Evaluation

MUZ - General

511. The Panel agree with Ms Belgrave's recommendation to reject the submission point made by the New Zealand Motor Caravan Association and not provide for campgrounds and camping as a permitted activity in the MUZ.

MUZ – R1

512. The Panel agree with Ms Belgrave's recommended response to the submission point made by the Ministry of Education to make non-compliance with clauses MUZ-R1 (2) – (5) a restricted discretionary activity, while retaining a full discretionary activity status for non-compliance with the building height clause. This is consistent with the approach taken in the COMZ Chapter.

513. The Panel agree that due to the addition of the restricted discretionary activity status, the appropriate rule needs to be added to the rule table, and we agree with the wording in Ms Belgrave's right of reply evidence. This rule will be MUZ-R9.

514. We acknowledge the letter from Ms Daly Williams on behalf of the Ministry of Education that was tabled at the hearing that accepts the changes to MUZ-R1 and the addition of what will be MUZ-R9.

515. We acknowledge Ms Inta's statement (presented at the hearing) relating to the separation of activities and buildings within the rules. Her comments spanned the zones in this hearing stream. We are also aware that neither Ms Inta nor the Buller Conservation Group made a submission specifically on this rule. Notwithstanding that, the Panel agree with Ms Belgrave's right of reply evidence that recommends restructuring and relocating standards between the rules. In the case of this rule, that has amounted to transferring the performance standard relating to external storage to MUZ-R2. However, we do not agree that Ms Inta's statement provides scope for these changes, and we consider it more appropriate that these changes are consequential to the Waka Kotahi submission (S450.213).

516. The Panel agree with Ms Belgrave and the BDC that the exception in MUZ-R1(7) relating to the written approval is better included as an advice note. As set out in relation to the COMZ rule, we also agree to refer to boundary '*rules*' (rather than '*setbacks*') to ensure all rules that are subject to the deemed permitted boundary activity process are captured.

517. The Panel disagrees with Ms Belgrave regarding the consequential deletion of MUZ-R1(6), as we have not recommended deleting the equivalent rule in COMZ-R1 due to the lack of scope.

518. The Panel acknowledge that KiwiRail's submission points were not recorded or reported on in the S42A report. We have considered the submission, the letter tabled at the hearing and the joint right of reply prepared on the matter by Ms Belgrave and Ms Easton. We agree with the right of reply evidence that a 5m setback from the rail corridor is excessive and would result in inefficiencies in terms of land use. While we acknowledge the safety issue raised by KiwiRail, we consider a 1.5m setback, as recommended in the right of reply, more appropriate and would still address the safety concerns around building maintenance. We also consider that the rule should refer to the setback from the '*rail designation*' rather than the '*rail corridor*' to provide a definitive point of measurement.

519. In relation to the remainder of the submissions on MUZ-R1, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

MUZ-R2

520. The Panel acknowledges that all submissions made directly regarding this rule sought that it be retained as notified. However, we agree and acknowledge that the relocation of the performance standard from MUZ-R1 to MUZ-R2, which relates to external storage, generates consequential changes to the rule. Accordingly, we agree with the recommended wording in Ms Belgrave's right of reply and reject the submission points that all sought to retain the rule as notified.

521. We also agree that, due to the activity status escalating to a restricted discretionary activity if external storage is not appropriately screened, the addition of the restricted discretionary rule should be made to the rule table. We agree with the wording in Ms Belgrave's right of reply evidence. This rule will be MUZ-R10.

522. We record that these changes are all consequential to the Waka Kotahi submission (S450.213).

MUZ-R3

523. The Panel agree with Ms Belgrave's recommendation to reject the submission point made by Buller District Council to delete the rule. We agree that this rule is design-driven, rather than focused on the construction requirements, which TRA-S12 is centred on.

524. The Panel agree with Ms Belgrave's recommendation to accept the submission point from FENZ, and we agree with the wording as set out in her right of reply evidence.

525. In relation to the remainder of the submissions on MUZ-R3, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

MUZ-R4

526. The Panel agrees with Ms Belgrave's recommendation in response to the submission points made by BDC and Davis Ogilvie & Partners.

527. In relation to the remainder of the submissions on MUZ-R4, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

MUZ-R5

528. The Panel agree with Ms Belgrave's recommendation for MUZ-R5, except for MUZ-R5(4) where it appears that the word '*visitor*' has been transposed for '*residential*'. This is clearly a typographical error in the context of the rule. We acknowledge that the recommendation is consistent with the recommendation for MUZ-R4.

529. In relation to the remainder of the submissions on MUZ-R5, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

MUZ-R6

530. The Panel agree with Ms Belgrave's recommendation to include a performance standard related to setbacks which responds to the submission point from BDC. However, we disagree with the structure of how this is recommended to be incorporated into the rule. We instead prefer to be consistent with the equivalent COMZ rule and require that Standard 4 of MUZ-R1 be complied with.

531. We note that MUZ-R1 does not include a setback from the road boundary or internal boundaries, as recommended by Ms Belgrave in response to the BDC submission. However, we consider that these setbacks are not necessary for a minor structure in the MUZ, especially when they are not required for a building. Lastly, we also note that a reference to Standard 4 of MUZ-R1 will require a setback from a railway designation boundary, and we consider that to be appropriate.

MUZ-R7

532. The Panel agree that this rule should remain as notified, as there were no submissions that sought its amendment.

MUZ-R8

533. The Panel acknowledge Ms Belgrave's revised position concerning the NZ Heavy Haulage Association Inc submission and evidence presented at the hearing, and we accept her right of reply recommendation to retain MUZ-R8 with minor amendments.

MUZ-R9

534. The Panel agree with Ms Belgrave's right of reply recommendation to retain this rule, with the minor amendment to the title, which is consequential to the Ministry of Education submission on MUZ-R1.

535. The Panel also notes that due to the addition of the restricted discretionary activity rules, there is a change to the numbering sequence, and this rule becomes MUZ-R11 in our recommendation.

MUZ-R10 to MUZ-R12

536. Having reviewed these rules in an overall context, the Panel disagrees with Ms Belgrave that the rules should be deleted. This is because of the fundamental structure of the rules in the Plan, which requires a corresponding rule when an activity status is escalated. Therefore, in this case, we consider that a discretionary activity rule is necessary to address the activities where one or more of the performance standards in the corresponding permitted rule are not complied with. Therefore, we accept the submission points made regarding these rules which were all to retain them.

537. Due to the changes to the numbering sequence, these rules become MUZ-R12 to MUZ-R14 in our recommendation.

MUZ-R13

538. The Panel accept the submission points to retain this rule and agrees with Ms Belgrave's recommendation not to make any changes to this rule. However, we note that the rule number will change to MUZ-R16.

MUZ-R14

539. The Panel acknowledge that MUZ-R14 is a catch-all rule that is intended to manage activities that have not been specifically provided for in the other rules. The Panel has considered this matter plan wide and we agree with submitters that such rules are better placed as discretionary, otherwise they are unnecessarily limiting in our view and could have unforeseen consequences. Therefore, it is our recommendation to relocate this rule to the discretionary section of this chapter. We rely on the submissions of William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335) and Vance and Carol Boyd (S447.003) to provide the scope.

Hearing Panel's Recommendation

540. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommends the following changes to the **Mixed Use Zone Rules**:

Mixed Use Zone Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity is provided in General Approach.

Permitted Activities

MUZ - R1	**New Buildings and External Additions or Alterations to Existing Buildings**

Activity Status Permitted	**Activity status where compliance not achieved:**
Where: 1. The maximum ground floor area of the building is 500m²; 2. The maximum height above ground level is 12m except that this standard does not apply to hose drying towers at Emergency Service Facilities; 3. Any building on a Facade Control Street must have: i. A cantilevered continuous verandah to cover the full width of the footpath except that this does not apply to Heritage Buildings identified in Schedule One; ii. 20% of the facade devoted to display windows or transparent glazing; and iii. The principal public entrance to the building must be located on the front boundary; 4. Any building or structure is setback a minimum of: i. 3m from any RESZ - Residential Zone, OSRZ - Open Space and Recreation Zone, INZ - Industrial Zone or PORTZ - Port Zone boundary; **and** ii. **1.5m from the railway designation boundary, excluding accessory buildings and structures.**[113] ~~5. All external storage is screened by a 1.8m fence or landscaping so it is not visible from any adjoining residential zone boundary or any adjoining public space;~~[114] 5. On sites adjoining a RESZ - Residential Zone a 2m wide landscaping strip shall be provided adjacent to the RESZ - Residential Zone boundary and shall be planted with species,	**Restricted Discretionary where standards 1 and 3 to 6 are not complied with** Discretionary **where standard 2 is not complied with.**[117]

[113] KiwiRail (S442.093)
[114] Consequential to Waka Kotahi (S450.213)
[117] Ministry of Education (S456.035)

which at maturity, will screen the buildings from the adjoining sites; and 6. No building shall protrude beyond a building envelope defined by a recession plane as identified in accordance with Appendix Two to commence 2.5m above any RESZ - Residential Zone boundary ~~except where the neighbouring property owner's written approval is provided to the Council 10 working days to the works commencing.~~[115] This standard does not apply to: i. Road boundaries; ii. Buildings on adjoining sites that have a common wall along the boundary; iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard; iv. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and v. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically. **Advice Note:** **1. Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.** [116]	
MUZ – R2	**Commercial Activity, Community Facilities, Community Corrections Activity, Educational Facilities and Emergency Service Facilities**
Activity Status Permitted Where: 1. This is not visitor accommodation subject to Rule MUZ-R5; ~~2. Performance standards for Rule MUZ - R1 are complied with; and~~	**Activity status where compliance not achieved:** Refer Rule MUZ – R5 for Visitor Accommodation **Restricted discretionary where standard 3 is not complied with**

[115] Buller District Council (S538.408)
[116] Buller District Council (S538.408) – maybe also Cl 16

2. This is not a commercial garage, service station or emergency service activity located on a Facade Control Street**; and** **3.** **All external storage is screened by a 1.8m fence or landscaping so it is not visible from any adjoining residential zone boundary or any adjoining public space.** [118]	~~Activities not complying with Standard 2 or 3 are~~ Discretionary **where standard 2 is not complied with.** [119]
MUZ – R3 **Carparking and Vehicle Service Areas**	
Activity Status Permitted Where: 1. Provision for carparking and vehicle service access is made at the side or rear of the building; 2. If available all vehicle access should be from service lanes or streets other than those subject to Facade Controls; 3. No parking areas are located between the frontage of buildings and the street; 4. No carpark is provided on a Facade Control Street; ~~and~~ 5. For all sites adjoining a RESZ - Residential Zone all parking areas must be screened so they are not visible from the adjoining residential site**; and;** **6.** **Standards 1 to 5 of Rule MUZ-R3 do not apply to Emergency service facilities** [120] **Advice Note:** Carparking and Vehicle Service Access must comply with the standards outlined in the Transport Chapter.	**Activity status where compliance not achieved:** Non-complying
MUZ – R4 **Residential Activities and Papakāinga**	
Activity Status Permitted Where: 1. The residential activity or papākainga is: i. Located above street level; or ii. Located at street level but with no frontage to public open spaces or streets except for access; 2. Each residential unit shall be provided with a waste management area of 2m² per unit, each with a minimum dimension of 1.5 metres in ~~either~~ a private ~~or communal~~ area	**Activity status where compliance not achieved:** Discretionary

6. TOWN CENTRE ZONE

6.1. Town Centre Zone Overview

Submissions and Further Submissions

541. One submission point and one further submission point relating to the Overview of the Town Centre Zone was summarised in a Table in pages 97-98 of the S42A Report. The Panel has considered the relevant submissions received and adopts the summaries in the s42A Report.

Section 42A Report

542. In response to the submission point made by Foodstuffs that sought to make additions to the Overview text, Ms Belgrave supports the relief in part.

543. Ms Belgrave supports the addition of the word '*generally*' in reference to the heights of buildings in the TCZ.

544. Ms Belgrave does not support the requested additions to recognise existing supermarkets and existing
individual activities in the Overview, and the additional text referencing natural hazard risk does not change or add to the meaning of the Overview.

545. Ms Belgrave recommends that the TCZ Overview text is amended as follows:

> …
>
> *The four centres are **generally** characterised by 2-3 storey buildings located up to the street with verandahs and retail display windows. These town centres are pedestrian oriented and parking is*

[135] Consequential amendment stemming from William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335) and Vance and Carol Boyd (S447.003)
[136] Consequential amendment stemming from William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335) and Vance and Carol Boyd (S447.003)

available on the street. Residential living above ground floor and mixed use activities are provided for.

…

Hearing and Submitter Evidence

546. The legal submissions made by Ms Alex Booker on behalf of Foodstuffs reiterate the original submission, and she continues to seek the requested amendments to the Overview in the TCZ.

Reporting Officer Reply Evidence

547. There was no specific consideration of this matter in the reply evidence.

Hearing Panel's Evaluation

548. The Panel has considered the wording suggested by Foodstuffs for the Town Centre Zone Overview, and we agree with the reasoning and amendments proposed by Ms Belgrave, recommending that they be included.

Hearing Panel's Recommendation

549. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below be accepted or accepted in part and recommends the following changes to the **Town Centre Zone Overview**.

TCZ	**Town Centre Zone – Te Takiwā o te Pokapū o te Tāone**
Overview The TCZ - Town Centre Zone is found in the four main town centres of Reefton, Greymouth/Māwhera, Westport/Kawatiri and Hokitika. There are common policies and rules across the TCZ - Town Centre Zone, however each town centre has a Precinct where specific additional policies and rules apply. The four centres are **generally**[137] characterised by 2-3 storey buildings located up to the street with verandahs and retail display windows. These town centres are pedestrian oriented and parking is available on the street. Residential living above ground floor and mixed use activities are provided for. The architectural quality of buildings and the quality of the public realm (public spaces and the interaction between individual buildings and the public pedestrian environment) will strongly influence the attractiveness of the TCZ - Town Centre Zone and MUZ - Mixed Use Zone as places to visit, undertake business and live. The objectives, policies and rules for both zones enable a broad range of activities, in order to provide the flexibility necessary to accommodate future growth and change. More importantly, they also focus on the quality of buildings and the impact of new buildings on the public realm and on the walkability and pedestrian access within the town centres. This focus is important to enhancing the attractiveness of the town centres and encouraging new businesses, visitors and inner city living.	

[137] Foodstuffs (S464.028)

As the largest centre on the West Coast/Te Tai o Poutini, Greymouth/Māwhera is expected to provide for a diverse range of commercial, retail, community and recreation activities and offer a variety of employment and living opportunities. In Greymouth/Māwhera higher density residential developments such as apartments above ground floor are anticipated that will contribute to providing wider housing choices for the community. The MUZ - Mixed Use Zone in Greymouth/Māwhera is adjacent to the TCZ - Town Centre Zone.

The Town Centre and Mixed Use Design Guidelines seek to ensure that new building development in the town centres is of a high standard and that it enhances the characteristics and qualities that contribute to each town centre's unique sense of place.

The location of the Hokitika, Greymouth/Māwhera and Westport/Kawatiri town centres on the coast and adjacent to large rivers, means parts of the town centres are subject to risk from existing and future flood and coastal inundation. Te Tai o Poutini Plan enables development within the TCZ - Town Centre Zone and MUZ - Mixed Use Zone that responds to and manages the risk. However, it is also acknowledged that over time a movement away from the most hazardous locations is desired, and this is reflected in other parts of the Te Tai o Poutini Plan through the NH - Natural Hazards provisions.

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities, in the Town Centre Zone including:

- **Transport** - the Transport Chapter contains provisions in relation to transport matters, including traffic generation TRN - R12.
- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters** - there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Town Centre Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.
- **Natural Hazards** - in Westport/Kawatiri, Reefton, Hokitika and Greymouth/Māwhera there are areas of natural hazards and in some locations these may affect areas in the Town Centre Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards Chapter.
- **Subdivision** - The Subdivision Chapter sets out the requirements for the development of new infrastructure and connections as part of subdivision activities.
- **Financial Contributions** - The Financial Contributions Chapter sets out the requirements for contributions of costs for activities which impact on infrastructure.
- **General District Wide Matters** - provisions in relation to Noise, Light, Signs, Temporary Activities and Earthworks in particular may be relevant to activities in the Town Centre Zone.

6.2. Town Centre Zone Rules and Design Guidelines

Submissions and Further Submissions

550. Two submission points relating generally to the **TCZ Rules** were summarised in a Table on page 99 of the S42A Report. Both submissions sought amendments to the rules.

551. Six submission points and one further submission point relating to **TCZ-R1** were summarised in a Table on pages 99-102 of the S42A Report. Two submission points supported the retention of the rule as notified. Four submission points sought amendments.

552. Three submission points relating to **TCZ-R2** were summarised in a Table on pages 104-105 of the S42A Report. Two submission points supported the retention of the rule as notified. One submission point sought amendments.

553. Four submission points relating to **TCZ-R3** were summarised in a Table on page 106 of the S42A Report. Two submission points supported the retention of the rule as notified. Two submission points sought amendments.

554. Four submission points relating to **TCZ-R4** were summarised in a Table on pages 107-108 of the S42A Report. Three submission points supported the retention of the rule as notified. One submission point sought amendments.

555. Three submission points relating to **TCZ-R5** were summarised in a Table on page 108 of the S42A Report. All submission points supported the retention of the rule as notified.

556. Five submission points relating to **TCZ-R6** were summarised in a Table on page 109 of the S42A Report. Three submission points supported the retention of the rule as notified. One submission point sought to delete it, and one sought amendment.

557. Three submission points relating to **TCZ-R7** were summarised in a Table on page 110 of the S42A Report. All submission points supported the retention of the rule as notified.

558. Four submission points relating to **TCZ-R8** were summarised in a Table on page 111 of the S42A Report. Three submission points supported the retention of the rule as notified. One submission point sought amendments.

559. Two submission points relating to **TCZ-R9** were summarised in a Table on page 112 of the S42A Report. One submission point supported the retention of the rule as notified, and one submission point sought amendments.

560. Three submission points and two further submissions relating to **TCZ-R10** were summarised in a Table on pages 112-113 of the S42A Report. Two submission points supported the retention of the rule as notified. One submission point and two further submissions sought amendments.

561. Two submission points relating to **TCZ-R11** were summarised in a Table on page 113 of the S42A Report. All submission points supported the retention of the rule as notified.

562. Two submission points relating to **TCZ-R12** were summarised in a Table on page 114 of the S42A Report. All submission points supported the retention of the rule as notified.

563. Six submission points relating to **TCZ-R13** were summarised in a Table on page 114 of the S42A Report. One submission point supported the retention of the rule as notified. Five submission points sought it be deleted.

564. Two submission points relating to **TCZ-R14** were summarised in a Table on page 115 of the S42A Report. All submission points supported the retention of the rule as notified.

565. Four submission points relating to **TCZ-R15** were summarised in a Table on pages 115-116 of the S42A Report. One submission point supported the retention of the rule as notified. Three submission points sought amendments.

566. Two submission points relating to **TCZ-R16** were summarised in a Table on pages 116-117 of the S42A Report. All submission points supported the retention of the rule as notified.

567. Two submission points relating to **TCZ-R17** were summarised in a Table on page 117 of the S42A Report. One submission point supported the retention of the rule as notified, and the other sought an amendment.

568. Four submission points relating to **TCZ-R18** were summarised in a Table on page 118 of the S42A Report. One submission point supported the retention of the rule as notified. Two submission points sought amendments, and one sought to delete the rule.

569. Two submission points relating to **TCZ-R19** were summarised in a Table on page 119 of the S42A Report. All submission points supported the retention of the rule as notified.

570. Two submission points relating to **TCZ-R20** were summarised in a Table on page 119 of the S42A Report. One submission point supported retaining the rule as notified, and the other sought to delete the rule.

571. Two submission points relating to **TCZ-R21** were summarised in a Table on page 120 of the S42A Report. All submission points supported the retention of the rule as notified.

572. Fifteen submission points and one further submission point relating to **Appendix 3 – Town Centre Design Guidelines** were summarised in a Table on pages 120-125 of the S42A Report. Three submission points supported the retention of the Appendix as notified. One submission point sought to delete the Appendix. Eleven submission points sought amendments.

573. The Panel adopts these summaries and has considered all the relevant submissions and further submissions.

Section 42A Report

TCZ - General

574. In response to the submission point from Foodstuffs that sought to make specific provision for supermarkets, Ms Belgrave does not consider this necessary, as supermarkets are provided for as commercial activities in the TCZ.

575. In response to the submission point made by Ngāi Tahu that sought to have Poutini Ngāi Tahu values as part of controlled and restricted discretionary activities, Ms Belgrave notes that this is a common submission point across multiple hearing streams and for other zones in this stream. She reiterates her opinion regarding CMUZ and COMZ and does not support the relief sought in the submission point.

576. The S42A report recommends that no amendments be made to the TCZ chapter in response to these submissions.

TCZ – R1 Commercial Activities and Buildings, Community Corrections Activities, Community Facilities and Emergency Service Facilities

577. Ms Belgrave acknowledged the support from Te Mana Ora and the Department of Corrections that supported the rule as notified. The acknowledgement is subject to recommended amendments that arise from other submission points.

578. Ms Belgrave generally supports the relief sought in the submission point made by Waka Kotahi. The submission point is similar to those made in relation to the COMZ and the MUZ. It sought clarification as to whether the requirements of the rule should be considered performance standards, and if so, whether the activities listed in the heading should be addressed in a separate rule. Ms Belgrave acknowledges the confusion regarding the terminology used throughout the rules in this chapter. She therefore recommends that the rule heading be amended to apply to all new buildings, additions and alterations to existing buildings, landscaping, and external storage, and that the activities be moved to a new, separate rule.

579. In response to the submission point made by Foodstuffs that sought amendments to exclude existing supermarkets from TCZ-R1.1, TCZ-R1.4, and TCZ-R1.5, Ms Belgrave does not support the relief sought. This is because existing use rights will apply to existing buildings and activities, and so the requested exemption is not necessary.

580. In response to the submission point made by BDC that sought amendments to the glazing part of the rule, Ms Belgrave agrees that the amendment will simplify the rule but also recommends the inclusion of '*at the frontage'* to ensure that glazing is not required at the side and rear of building facades. Additionally, Ms Belgrave supports deleting TCZ-R1.5 as TCZ-R1.4 will appropriately manage streetscape amenity outcomes.

581. In response to the other parts of the submission point made by BDC that sought amendments related to fencing and the exceptions related to when a written approval is obtained, Ms Belgrave reiterates the recommendations she made on the same matter for the COMZ. That is to include an advice note but not to change the wording of the rule.

582. In response to the submission point made by FENZ, which sought amendments to exclude emergency services facilities from the ground floor façade controls, Ms Belgrave did not support the relief sought, as no specific assessment was provided with the submission.

583. In response to the other parts of the submission point made by FENZ that requested the inclusion of a new rule relating to water supply servicing, Ms Belgrave did not support the relief sought. She noted that it is uncommon to include general servicing controls in the zone chapters; instead, these are usually part of subdivision provisions. Furthermore, water supply servicing arrangements for new buildings are more appropriately managed under the requirements of the Building Code.

584. Ms Belgrave recommends that TCZ-R1 be amended as follows:

> ***TCZ-R1 <u>New Buildings, External Additions or Alterations to Existing Buildings, and External Storage</u> ~~Commercial Activities and Buildings, Community Corrections Activities, Community Facilities and Emergency Service Facilities~~***
>
> *Activity Status Permitted*
>
> *Non-complying where **<u>rules</u>** **~~standards~~** 1-3 are not complied with*
>
> *Discretionary where **<u>rules</u>** **~~standards~~** 4 to 6 are not met*

…

4. The ground floor façade of all buildings with a Main Street Frontage must have:

a. ***A minimum of 50% of the building façade at ground level must comprise clear glazing*** ~~***50% of the facade devoted to display windows or 75% of its height for at least 50% of the ground floor building frontage***~~*; and*

~~***5. No building shall create a featureless facade or blank wall on a Main Street Frontage at ground floor level wider than 3m.***~~

6. No building shall project beyond a building envelope defined by a recession plane as identified in accordance with Appendix Two to commence 2.5m above any RESZ - Residential Zone boundary ~~***except where the neighbouring property owner's written approval is provided to the Council 10 working days to the works commencing.***~~ *This standard does not apply to:*

…

Advice Notes:

1. Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.

TCZ – R2 Commercial Activities and Buildings, Community Facilities, Community Corrections Activities and Emergency Service Facilities in the TCZ - PREC2 Hokitika Town Centre Precinct

585. Ms Belgrave acknowledged the support from Te Mana Ora and FENZ, which supports the rule as notified. The acknowledgement is subject to recommended amendments that arise from the other submission point.

586. In response to the submission point made by Foodstuffs that sought amendments to exclude existing supermarkets from TCZ-R2.4 and TCZ-R2.5, Ms Belgrave did not support the relief sought. This is because existing use rights will apply to existing buildings and activities; therefore, the requested exemption is not necessary.

587. In response to submissions received relating to Appendix 3 – Town Centre Design Guidelines, Ms Belgrave recommends consequential amendments to TCZ-R2.

588. Ms Belgrave recommends that TCZ-R2 be amended as follows. The recommendations also take into account recommendations made in response to submissions received relating to the Hokitika Design Guidelines:

TCZ-R2 Commercial Activities and Buildings, Community Facilities, Community Corrections Activities and Emergency Service Facilities in the TCZ - PREC2 Hokitika Town Centre Precinct

...

4. ~~***Every***~~ ***New*** *building****s and additions and alterations to any building*** *with a Main Street Frontage must erect a cantilevered continuous verandah to cover the full width of the footpath except that this does not apply to Heritage Buildings identified in Schedule One; and*

~~***5. New buildings and additions and alterations to any Main Street Frontage façade must demonstrate that they meet the Hokitika Town Centre Urban Design Guidelines.***~~

Advice Note:

2. When designing new buildings in Hokitika Town Centre developers are encouraged to use the Hokitika Town Centre Urban Design Guidelines.

TCZ – R3 Commercial Activities and Buildings, Community Facilities, Community Corrections Activities and Emergency Service Facilities in the TCZ – PREC1 Greymouth/Māwhera Town Centre Precinct

589. Ms Belgrave acknowledged the support from Te Mana Ora and FENZ, which supports the rule as notified. The acknowledgement is subject to recommended amendments that arise from the other submission points.

590. In response to the submission point made by Ngāi Tahu that sought to include compliance with the design guidelines as a rule instead of an advice note, Ms Belgrave did not support the relief sought. This is because it would be difficult to demonstrate and enforce compliance with the guidelines; therefore, she recommended retaining it as an advice note.

591. In response to the submission point made by Foodstuffs that sought amendments to exclude existing supermarkets from TCZ-R3.3, Ms Belgrave did not fully support the relief sought. This is because existing use rights will apply to existing buildings and activities; therefore, the requested exemption is not necessary. Notwithstanding this, Ms Belgrave did support amendments to TCZ-R3.3 to clarify that the rule applies to new buildings, as well as any additions and alterations.

592. Ms Belgrave recommends that TCZ-R3 be amended as follows, noting that the recommendation includes consequential amendments following recommendations to TCZ-R1:

> ***TCZ-R3 Commercial Activities and Buildings, Community Facilities, Community Corrections Activities and Emergency Service Facilities in the CZ - PREC1 Greymouth/Māwhera Town Centre Precinct***
>
> *Activity Status Permitted*
>
> *Activity status where compliance not achieved:*
>
> *Discretionary where standard 2 is not complied with.*
>
> *Non-complying where standard 3 is not complied with.*
>
> ***~~Refer Rule TCZ - R1 where there is non- compliance with these standards~~***
>
> *…*
>
> *3. **~~Every~~** **New** buildings **and additions and alterations to any building** with a Main Street Frontage must erect a cantilevered continuous verandah (with no decorative poles) to extend from the shop frontage to be 400mm inside the kerbline. This requirement for a verandah does not apply to Historic Heritage buildings identified in Schedule One.*

TCZ – R4 Commercial Activities and Buildings, Community Facilities, Community Corrections Activities and Emergency Service Facilities in the TCZ – PREC3 Westport/Kawatiri Town Centre Precinct

593. Ms Belgrave acknowledged the support from Te Mana Ora, Buller District Council, and FENZ for the rule as notified. The acknowledgement is subject to recommended amendments that arise from the other submission points.

594. In response to the submission point made by Ngāi Tahu that sought to include compliance with the design guidelines as a rule instead of an advice note, Ms Belgrave does not support the relief sought. This is because it would be difficult to demonstrate and enforce compliance with the guidelines; therefore, she recommended retaining it as an advice note.

595. Ms Belgrave recommends that TCZ-R4 be amended to take account of consequential amendments following recommendations to TCZ-R1:

> ***TCZ-R4 Commercial Activities and Buildings, Community Facilities, Community Corrections Activities and Emergency Service Facilities in the CZ – PREC3 Westport/Kawatiri Town Centre Precinct***
>
> *Activity Status Permitted*
>
> *…*
>
> ~~***Refer Rule TCZ - R1 where there is non- compliance with these standards***~~

TCZ – R5 Commercial Activities and Buildings, Community Facilities, Community Corrections Activities and Emergency Service Facilities in the TCZ – PREC4 Reefton Town Centre Precinct

596. Ms Belgrave acknowledged the support from Te Mana Ora, BDC and FENZ that support the rule as notified. The acknowledgement is subject to recommended amendments that arise from the other submission points.

597. Ms Belgrave recommends that TCZ-R5 be amended to take account of recommendations made in response to submissions received relating to the Reefton Design Guidelines and consequential amendments following recommendations to TCZ-R1:

> ***TCZ-R5 Commercial Activities and Buildings, Community Facilities, Community Corrections Activities and Emergency Service Facilities in the CZ – PREC4 Reefton Town Centre Precinct***
>
> *Activity Status Permitted*
>
> *…*
>
> ~~***Refer Rule TCZ - R1 where there is non- compliance with these standards***~~
>
> *Where:*
>
> *…*
>
> ~~***5. New buildings and additions and alterations to the exterior facade with frontage to SH7 (Broadway) must demonstrate they meet the Reefton Heritage Town Design Guidelines.***~~
>
> ***Advice Note:***
>
> ***1. When designing new buildings in Reefton Town Centre developers are encouraged to use the Reefton Town Centre Urban Design Guidelines.***

TCZ – R6 Carparking and Vehicle Service Access

598. Ms Belgrave acknowledged the support from Te Mana Ora, Waka Kotahi, and GDC, which supports the rule as notified. The acknowledgement is subject to recommended amendments that arise from the other submission points.

599. Similar to the recommendation made in response to the submission point made by BDC regarding the MUZ carparking rule, Ms Belgrave did not support the submission point made by BDC to delete TCZ-R6 or to include the requirements in TRN-S12. This is because Ms

Belgrave considers that TCZ-R6 is focused on design matters that are directly relevant to the effects of new development in the TCZ, while TRN-S12 focuses on the construction requirements for car parking.

600. In response to the submission point made by Fire and Emergency NZ that sought to exclude emergency service activities from the design requirements for parking and access, Ms Belgrave agrees (as also set out with respect to the MUZ) that, as emergency services have operational needs that limit the location of parking and access relative to their building. Additionally, a limited number of emergency service facilities will be established in the TCZ; therefore, Ms Belgrave supported excluding emergency service facilities from the requirements of the rule.

601. The S42A report recommends that TCZ-R6 be amended as follows:

> ***TCZ-R6 Carparking and Vehicle Service Access***
>
> …
>
> ***7. Emergency service facilities are excluded from Rules TCZ-R6.1 – TCZ-R6.6***

TCZ – R7 Residential Activities in Existing Buildings

602. Ms Belgrave acknowledged the support from Te Mana Ora, Waka Kotahi and BDC that support the rule as notified. The acknowledgement is subject to recommended amendments that arise from consequential changes relating to other submission points.

603. Ms Belgrave recommends amendments that apply to waste management and residential accommodation entrances, which will achieve consistency with the recommendations to the equivalent rules in the COMZ and MUZ chapters.

604. The S42A report recommends that TCZ-R7 be amended as follows:

> ***TCZ-R7 Residential Activities in Existing Buildings***
>
> …
>
> 2. *Each residential unit shall be provided with a waste management area of 2m² per unit, each with a minimum dimension of 1.5 metres in* ***~~either~~*** *a private* ***~~or communal~~*** *area* ***or 9m² with a minimum dimension of 2.8 metres in a communal area.***
> 3. *…*
> 4. *…*
> 5. ***The principal residential ~~Residential~~*** *accommodation entrance****~~s are~~*** ***shall be*** *provided directly from* ***a ~~the~~*** *public street* ***or open space.***

TCZ – R8 Visitor Accommodation Activities and Buildings

605. Ms Belgrave acknowledged the support from Te Mana Ora, Waka Kotahi and FENZ that support the rule as notified. The acknowledgement is subject to recommended amendments that arise from the other submission points.

606. In response to the submission point made by BDC that sought to delete TCZ-R8.3 on the basis that it duplicates Standards in TCZ-R1, Ms Belgrave did not support the relief sought, as she considers that TCZ-R8 includes additional requirements specific to managing visual effects associated with the provision of waste management areas, separate from those in TCZ-R1.

Notwithstanding this, recommendations for amendments to the rules governing waste management and residential accommodation entrances are outlined below to ensure consistency with the proposed amendments to other CMUZ chapters.

607. The S42A report recommends that TCZ-R8 be amended as follows:

TCZ-R8 Visitor Accommodation Activities and Buildings

…

5. ***The principal visitor*** ~~***Visitor***~~ *accommodation entrance*~~***s***~~ ***shall be*** *provide*~~***d***~~ ~~***pedestrian access***~~ *directly from* ***a*** ~~***the***~~ *public street* ***or open space****.*[138]

TCZ – R9 Demolition of Existing Buildings

608. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified. The acknowledgement is subject to recommended amendments that arise from the other submission points.

609. In response to the submission point made by BDC that sought to make a minor grammatical amendment and remove the percentage reference, Ms Belgrave supported the relief sought. She agreed that the rule, as notified, will be confusing and create difficulties when determining compliance.

610. The S42A report recommends that TCZ-R9 be amended as follows:

TCZ-R9 Demolition of Existing Buildings

…

3. *If the building to be demolished is on a Main Street Frontage* ~~***that***~~ ***then*** *a pedestrian weather cover must be provided over the adjacent footpath* ~~***for 80% of the frontage***~~*. Where the site is to be redeveloped then a temporary structure can be provided for a maximum of 6 months in the TCZ - PREC1 - Greymouth/Māwhera and TCZ - PREC2 - Hokitika Town Centre Precincts and a maximum of 12 months in the TCZ - PREC3 - Westport and TCZ - PREC4 - Reefton Town Centre Precincts.*

TCZ – R10 Minor Structures

611. Ms Belgrave acknowledged the support from Te Mana Ora and BDC that supports the rule as notified. The acknowledgement is subject to recommended amendments that arise from the other submission points.

612. In response to the submission point made by FENZ that sought amendments to enable hose drying towers up to a maximum height of 15m, Ms Belgrave supported the relief sought. This is because the inclusion of a maximum height for hose drying towers under TCZ-R10 will provide helpful clarification. It is considered that a maximum height of 15m is appropriate, having regard to the maximum permitted building height within the Town Centre Precincts, and that the establishment of emergency service facilities in the Zone will be limited.

613. The S42A report recommends that TCZ-R10 be amended as follows:

TCZ-R10 Minor Structures

[138] The S42A report and tracked versions of the rule appears to use wording from TCZ-R7 – Residential Activities and so incorrectly referred to 'residential accommodation', and different phrasing. This is a typo. The recommended phrasing is the same as the S42A report, with 'visitor' replacing 'residential'.

…

4. Hose drying towers do not exceed 15m in height; and

…

TCZ – R11 Fences, Walls and Retaining Walls

614. Ms Belgrave acknowledged the support from Te Mana Ora and BDC, which supports the rule as notified.

615. The S42A report recommends retaining TCZ-R11 as notified.

TCZ – R12 Demolition of Buildings not meeting Permitted Activity Standards

616. Ms Belgrave acknowledged the support from Te Mana Ora and BDC, which supports the rule as notified.

617. The S42A report recommends retaining TCZ-R12 as notified.

TCZ – R13 Relocated Buildings

618. Ms Belgrave acknowledged the support from Te Mana Ora that support the rule as notified.

619. In response to the five submission points[139] that sought to delete the rule, Ms Belgrave did not support the relief sought. She considered that the matters of discretion under TCZ-R13 relate to the design, location, and appearance of buildings, as well as the extent to which the relevant Design Guidelines are met. It was her view that these matters are relevant to ensuring high-quality built form outcomes in the TCZ and are separate from considerations under the Building Act.

620. The S42A report recommends retaining TCZ-R13 as notified.

TCZ – R14 Visitor Accommodation Activities and Buildings and Residential Activities in Existing Buildings not meeting Permitted Activity Standards

621. Ms Belgrave acknowledged the support from Te Mana Ora and BDC, which supports the rule as notified.

622. Despite the support for this rule, Ms Belgrave recommended that the rule be deleted to simplify the TCZ chapter. Discretionary and non-complying activity status for non-compliance with the relevant rules is provided for under TCZ-R7 and TCZ-R8, and therefore, this rule is an unnecessary duplication.

623. The S42A report recommends deleting TCZ-R14.

TCZ – R15 Commercial Activities and Buildings Buildings, Community Facilities, Community Corrections Activities and Emergency Service Facilities not meeting the Permitted Activity Standards for Ground Floor Facade, Recession Plane or Height

624. Ms Belgrave acknowledged the support from Te Mana Ora that support the rule as notified.

[139] Chris and Jan Coll (S558.010), Chris J Coll Surveying Limited (S566.010), William McLaughlin (S567.010) and Laura Coll McLaughlin (S574.010) Buller District Council (S538.434)

625. In response to the submission points made by Foodstuffs and the BDC to delete the non-complying activity status, and in the case of the BDC submission, the deletion of TCZ-R15.1, Ms Belgrave recommended deleting the rule in its entirety to simplify the chapter. Discretionary and non-complying activity statuses are already provided for under TCZ-R1-TCZ-R5.

626. In response to the submission points made by BDC and GDC to correct the typo in the rule heading, given that Ms Belgrave recommended to delete the rule, these submission points are recommended to be rejected.

627. The S42A report recommends deleting TCZ-R15.

TCZ – R16 Minor Structures and Fences, Walls and Retaining Walls not meeting the Permitted Activity Standards

628. Ms Belgrave acknowledged the support from Te Mana Ora and BDC, which supports the rule as notified.

629. Despite the support for this rule, Ms Belgrave recommended that the rule be deleted to simplify the TCZ chapter. Discretionary and non-complying activity status for non-compliance with the relevant rules is provided for under TCZ-R10 and TCZ-R11, and therefore, this rule is an unnecessary duplication.

630. The S42A report recommends deleting TCZ-R16.

TCZ – R17 Residential Activities and Buildings in New Buildings

631. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified.

632. In response to the submission point from BDC to insert a discretionary activity status, Ms Belgrave notes the submission and comments that no amendment is necessary as the notified rule includes a discretionary activity status.

633. Ms Belgrave did recommend amendments to the waste management and outdoor living space part of the rule to achieve consistency with recommended amendments to the equivalent provisions in the COMZ and MUZ chapters. She also recommended deleting *'and Buildings'* from the rule title, as this appears to be an error.

634. The S42A report recommends that TCZ-R17 be amended as follows:

> ***TCZ-R17 Residential Activities ~~and Buildings~~ in New Buildings***
>
> *Where:*
>
> 1. *The ground floor is used for Commercial or Community Activities* ***~~and complies with the Performance Standards for Rule TCZ - R1;~~***
>
> 2. *Each residential unit is provided with* ***~~an outdoor service space of 3m² and~~*** *a waste management area of 2m² per unit, each with a minimum dimension of 1.5 metres in* ***~~either~~*** *a private* ***~~or communal~~*** *area* ***or 9m² with a minimum dimension of 2.8 metres in a communal area****;*
>
> *3. …*
>
> *4. …*

5. Each residential unit shall be provided with an outdoor living space of

a. 68**m² minimum area and **1.5** **2** metres minimum dimension **for a studio or 1 bedroom unit;

b. 10m² minimum area and 1.5 metres minimum dimension for a 2 or 3 bedroom unit;

*c. **15m² minimum area and 1.5 metres minimum dimension for 3 or more bedrooms**.*

TCZ – R18 Commercial Activities and Buildings, Community Facilities, Community Corrections Activities and Emergency Service Facilities not meeting the Permitted or Discretionary Activity Standards

635. In response to the submission point from BDC that sought to delete the rule, Ms Belgrave supported the relief sought as the rule is unnecessary following recommended amendments to TCZ-R1 and TCZ-R15.

636. Given the recommendation to delete the rule, Ms Belgrave did not support the relief sought by the other submitters.

637. The S42A report recommends deleting TCZ-R18.

TCZ – R19 Residential and Visitor Accommodation Activities not meeting the Permitted, Restricted Discretionary or Discretionary Activity Standards

638. Ms Belgrave acknowledged the support from Te Mana Ora and BDC, which supports the rule as notified.

639. The S42A report recommends retaining TCZ-R19 as notified.

TCZ – R20 Carparking and Vehicle Service Access not meeting the Permitted Activity Standards

640. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified. The acknowledgement is subject to recommended amendments that arise from the other submission points.

641. Ms Belgrave supports the relief sought by BDC to delete this rule, which would simplify the TCZ Chapter. The non-complying activity status is already provided in relation to this activity under TCZ-R6.

642. The S42A report recommends deleting TCZ-R20.

TCZ – R21 Industrial Activities

643. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified.

644. The S42A report recommends retaining TCZ-R21 as notified.

Appendix Three: Design Guidelines

645. The technical design evidence from Ms Alicia Lawrie has informed Ms Belgrave's recommendations regarding the Design Guidelines.

646. Ms Belgrave acknowledged the support from Ngāi Tahu that supports the Design Guidelines as notified, particularly those sections that relate to Poutini Ngāi Tahu Cultural Landscapes.

The acknowledgement is subject to recommended amendments that arise from the other submission points.

647. Ms Belgrave did not support the submission point made by the Proprietors of Mawhera Tiamana Mawhera Incorporation that opposed paragraphs in Sections 2.1 and 2.2 of the Design Guidelines. The submitter did not provide reasons for opposing the paragraphs; therefore, Ms Belgrave recommended rejecting the submission.

648. In response to the submission point made by Martin & Co Westport and Lumberland Building Market Westport, which sought to delete the reference to the Mitre 10 building and the supporting statement, Ms Belgrave supported the relief sought. This is because the building is located outside of the TCZ, and its inclusion in the Design Guideline could create confusion.

649. In response to the six submission points[140] that sought various relief in relation to the colour controls, Ms Lawrie considered this in her evidence, and Ms Belgrave has made recommendations based on that evidence.

650. Ms Belgrave agrees with Ms Laurie that the assessment of colour is subjective, and based on this, it creates inefficiencies and a lack of clarity, especially in the cases of Hokitika and Reefton, where the notified rules require compliance with the Design Guidelines to be a permitted activity. Notwithstanding this, implementing the colour controls will be difficult to enforce, regardless of whether the Guidelines are referenced as a permitted activity or an advisory note. Additionally, the colour guidelines would only apply if resource consent were required, so it would not capture a landowner simply painting their commercial building.

651. It is relevant to record that existing heritage buildings are subject to separate provisions in the Historic Heritage Chapter.

652. Ms Belgrave did not support the relief sought by Richard Arlidge to add a new indigenous colour palette specific to all Design Guidelines.

653. Based on the above, Ms Belgrave recommended deleting the colour controls from the Design Guidelines as they were notified. Her recommendation also includes amendments that identify and provide guidance to plan users on how colour may be used and applied to achieve high-quality built form and design outcomes. This includes referring to the existing photograph figures as examples of where colour has been used successfully to highlight specific design elements such as window details and entrances.

654. In response to the four submission points from Foodstuffs that sought to exempt supermarkets from the Design Guidelines, Ms Belgrave did not support the relief sought based on the evidence of Ms Lawrie. They both consider that the management of design outcomes is appropriate due to the scale of these activities and their potential to create effects on character and amenity. Ms Belgrave recommended amendments to the Design Guidelines for Hokitika and Westport/Kawatiri under GF6, and consequential amendments to Greymouth/Māwhera under GF7, to recognise a range of architectural design methods that may be utilised to achieve outcomes related to articulation and detail.

[140] Jan and Heward (S353.002), Grey District Council (S608.483), Kirsty Dittmer (S412.001), Joanne and Ken Dixon (S213.002), Robert Burdekin (S378.008) and Richard Alridge (S419.006)

655. Furthermore, recommending alternative design approaches as an advisory note rather than a rule for the Hokitika and Reefton Guidelines will achieve the desired outcomes, and this will partly address the matters raised by Foodstuffs.

656. In response to the submission point made by Kirsty Dittmer that sought multiple amendments to the Greymouth/Māwhera Guidelines, Ms Belgrave partially supported the relief sought. The specific considerations are set out below:

(a) Ms Belgrave did not support deleting the Existing Built Character from 2.1 Context as it provides relevant context to the Greymouth/Māwhera Town Centre.

(b) Ms Belgrave agreed that GC1 is unclear, and she supports the inclusion of referring to neighbouring properties, although she recommends alternative language.

(c) Ms Belgrave supported the amendment to delete the reference to 'other buildings'. However, she recommended retaining the examples of natural features.

(d) In response to IW6, Ms Belgrave agreed that the guideline is unclear. She recommended amendments to improve clarity in response to this submission point.

(e) Ms Belgrave did not support deleting the second sentence in BF1. However, she recommended minor amendments to refer to '*smaller vertical forms'* in place of '*smaller storefronts.*

(f) Ms Belgrave did not support the requested changes to remove the references to two-story buildings in BF4. She considered that taller buildings would create opportunities for visual interest and contribute to a defined street edge. It is also appropriate in the context of the rules that allow building heights of up to 20m.

(g) Ms Belgrave did not support deleting references to symmetrically located windows in GF1 as this is a design element that contributes to the character of the Town Centre as set out in "2.1 Context". Notwithstanding, minor amendments are recommended to provide greater flexibility to achieve the desired built form outcomes.

(h) In response to GF2, Ms Belgrave agreed that the reference to full glazed facades is unclear, and she supports deleting the reference to requiring vertical solid breaks at frequent intervals at fully glazed facades. However, she recommended retaining the reference to not obscuring glazing or the visual connection from the outside into the building, as this achieves visual permeability.

(i) Ms Belgrave did not support the addition of the words '*where feasible'* to the end of GF3. She considered that an active reception and waiting area should be located on the ground floor and along the main street frontage to be a relevant design consideration.

(j) Ms Belgrave did not support the addition of the words '*is preferred'* in reference to the upper area in GF5, as she noted that symmetry has been identified as a feature that contributes to the character of the Town Centre.

(k) Ms Belgrave supported the inclusion to allow for consideration of sufficient clearance for taller vehicles, and she considered this relevant to the design and location of verandahs within the Town Centre. However, she did not support deleting the bullet point to avoid obscuring windows or architectural details, as this could encourage structures and signage to be located above verandahs.

(l) Ms Belgrave did not support deleting GL1 in its entirety. This is because this guideline identifies location-specific requirements for Mackay Street and Māwhera Quay, which are subject to controls for main street frontage and façade control. Nevertheless, she did recommend some amendments to encourage buildings to achieve cohesiveness with the port warehouse character and to ensure that GL1 reads as a guideline rather than a rule.

657. Consequential to the recommended amendments to the Greymouth/Māwhera Design Guidelines, Ms Belgrave recommended several related amendments to the Hokitika, Reefton, and Westport/Kawatiri Design Guidelines to achieve consistency.

Hearing and Submitter Evidence

658. The legal submissions made by Ms Alex Booker on behalf of Foodstuffs reiterate the original submission, and she continued to seek the requested amendments to TCZ-R1. She commented that, for operational and functional reasons, it may not always be appropriate for a supermarket to be built up to the front boundary; in such cases, any new supermarket not complying with the setback would be considered a non-complying activity.

659. Ms Booker reiterated the above in relation to TCZ-R2 as well. She also made comments that it is unclear whether the Council will approve licences to occupy airspace for verandahs.

660. Ms Booker accepted the recommended amendments to TCZ-R3 and the deletion of TCZ-R15.

661. Ms Booker reiterates the original submission concerning TCZ-R18, and she continued to seek that the non-complying activity status where non-compliances exist for commercial activities (and in particular supermarkets) be changed to discretionary.

662. Ms Booker accepted the recommended amendments to the Town Centre Urban Design Guidelines.

663. Mr George van Pelt tabled a letter at the hearing on behalf of FENZ. The letter accepted the S42A recommendation not to make any changes to TCZ-R1. They accept the recommendation regarding TCZ-R1.4. While they acknowledged that they will not pursue the submission point relating to the provision of a water supply, it is noted that the Building Act 2004 alone does not adequately provide for the provision of a water supply (including firefighting water supply) to new developments.

664. Mr van Pelt's letter also accepts the recommended wording for TCZ-R10.

665. A letter from Ms Michelle Grinlinton-Hancock on behalf of KiwiRail was tabled at the hearing. The letter draws the Panel's attention to the fact that none of KiwiRail's submission points were allocated to this hearing stream. As a result, the S42A report did not address any aspect of the submission made by KiwiRail. Despite this, KiwiRail sought relief relating to building setbacks from the rail corridor in all zones. In the TCZ, a setback of 5m is sought.[141]

666. Ms Grinlinton-Hancock explains in the letter that KiwiRail seeks setback controls to appropriately manage the health and safety of communities and ensure the ongoing operation of KiwiRail's network, as it is nationally and regionally significant infrastructure. She sets out that a safety setback is critically important to enable landowners to safely access their properties, avoid significant safety risks, and protect the rail corridor from interference.

[141] As set out in evidence for Topic 1, to align with the road boundary setback rules.

667. Despite not making any submissions on the rules of the TCZ, Ms Frida Inta presented a statement at the hearing offering views on the S42A recommendation. With respect to TCZ-R13, Ms Inta raised questions regarding the activity status of restricted discretionary noting that in the other Mixed-Use Zones, there were permitted rules for relocated buildings.

668. Ms Inta also observes that the heading for TCZ-R17 should have the words '*and Buildings'* removed. Ms Belgrave identified this error in the S42A report.

669. Ms Inta disagrees with the S42A recommendation regarding the appropriateness of the green building in GF8 of the Westport/Kawatiri Design Guidelines.

Reporting Officer Reply Evidence

670. In relation to the recommended changes to TCZ-R1 and in response to questions from the Panel regarding the addition of a new rule, Ms Belgrave reconsidered the scope to enable this amendment. She explains that the new rule is consequential to the submission point made by Waka Kotahi. In order to respond to the relief sought to separate performance standards from specific activities a new rule is necessary to provide for the activities listed in the notified version of the rule.

671. Consequential to the separation of COMZ-R1 into two rules (one for building controls and one for activities) and in response to Ms Inta's statement that was presented at the hearing, Ms Belgrave supports several amendments to restructure and relocate standards between the relevant rules. This has resulted in amendments to all the Commercial and Industrial chapters. However, the wording and intent of the provisions have not changed through this process, and no new additions have been made to the requirements of the standards.

672. Following questions from the Panel in relation to the interpretation of the glazing requirements at TCZ-R1.4 Ms Belgrave made recommendations to amend the wording to improve the clarity of the rule. She recommended deleting the phrase *'of the building façade at ground level'* as the phase '*ground floor façade'* is in the first part of the rule:

> *4. The ground floor façade of all buildings with a Main Street Frontage must have:*
>
> *a.* ***A minimum of 50%*** ~~***of the building façade at ground level must comprise***~~ ***comprising of clear glazing*** ~~***50% of the facade devoted to display windows or 75% of its height for at least 50% of the ground floor building frontage***~~

673. In response to the letter tabled by KiwiRail at the hearing, a joint right of reply has been prepared as the issues traverse various hearing streams. The joint right of reply agrees that a building setback from the rail corridor is appropriate in certain circumstances. As part of the consideration, the reporting planners have reviewed other plans, considered the variability of use (of the rail corridor) and the type of buildings/structures a setback should apply to. The planners also note that the railway designation is considerably wider than the railway line itself. So, there is already an effective buffer between the railway activity and the adjacent private land. Additionally, the railway line is also generally parallel to the state highway.

674. Concerning the TCZ, the reporting planners do not support KiwiRail's request for a 5m building setback from the railway corridor. They consider that a 5m setback would have a significant impact on the land available for development and is excessive in this zone. Notwithstanding that the reporting planners consider it more efficient to manage relevant effects through the designation process, they recommend a rule to require new buildings to be set back 1.5m

from the railway corridor. The rule should exclude accessory buildings and structures. The recommended wording is as follows:

TCZ-R1

3. Any building or structure is set back:

b. 3m from any RESZ – Residential Zone boundary;

c. ***1.5m from the railway corridor boundary, excluding accessory buildings and structures***

675. Ms Belgrave has further considered the wording of TCZ-R9 in her Right of Reply with respect to clarifying where the pedestrian weather cover is to be provided. She recommends adding the word '*immediately*' to the rule that will ensure that there is no disruption to the continued provision of verandas for pedestrians.

676. The right of reply considers the question of whether there are provisions in the TCZ that will assist in achieving revitalisation (including in the Greymouth Town Centre) as identified in the section 32 report. Ms Belgrave identifies rules TCZ-R1, TCZ-R3 and TCZ-R9 that, in her opinion, will encourage revitalisation through providing for new development without the need for resource consent. She also considers that rules TCZ-R1 and TCZ-R7 will also encourage residential development in the TCZ.

Town Centre Urban Design Guidelines

677. Ms Belgrave's right of reply outlined some discussion regarding the Design Guidelines in response to questions from the Panel that were asked during the hearing. She confirmed that there are existing '*revitalisation plans'* that apply to both Greymouth and Westport, which act as a form of design guideline. Neither of these plans has any statutory weight. Ms Belgrave understands that a similar plan was being prepared for Hokitika, but that was paused given the progression of the pTTPP.

678. Ms Belgrave comments that the development outcomes achieved in Reefton are the result of voluntary commitments generally made by one landowner who was guided by Design Guidelines prepared by Heritage NZ for Reefton.

679. Ms Belgrave's right of reply addressed the question of whether, if the Design Guidelines are voluntary, an application in Reefton would be assessed, should it pull firmly against the heritage fabric of the town. She notes that there are no scheduled historic heritage areas within the Reefton Town Centre, and that all sites and areas identified in Schedule One are located in the adjoining Residential Zone. Ms Belgrave confirms that the Guidelines would be voluntary in the case of a new build or alteration in the Reefton Town Centre that complies with TCZ-R5. However, in the case of any application requiring resource consent, it will be necessary to consider the Design Guidelines.

680. Ms Belgrave reviewed other District Plans that include supporting Design Guidelines. There is a variety in the approach. Some of these documents are located outside the District Plan and are referenced through advice notes; others are appendices, over which discretion is reserved. Other methods to consider in urban design include requiring an Urban Design Assessment as part of a resource consent application.

681. In her consideration for the most appropriate method for the pTTPP, Ms Belgrave reiterates her support for the approach set out in the notified pTTPP. This includes references to the

Design Guidelines as advice notes for permitted activities, references to them in policies, and as a matter of discretion in relevant rules.

682. The Panel asked questions regarding the relationship between the heritage provisions and the Design Guidelines in Reefton. Ms Belgrave commented that when the desire is to protect historic heritage values, the Historic Heritage Chapter and Schedule One are the more appropriate methods for achieving this. Nevertheless, the Design Guidelines will still provide a helpful guide.

683. In response to questions as to whether guidelines help with assessing resource consent applications, Ms Belgrave advises that, in her experience, they can be a helpful inclusion in the District Plan. This is because they assist in making a quantitative, design-based assessment, and they can provide certainty to both applicants and decision-makers on the anticipated design outcomes.

684. The Panel asked questions regarding the scope for making the recommended changes set out in the S42A report. Ms Belgrave's right of reply advises that the amendments have been recommended in response to, and consequential to, submissions received that addressed the following themes:

(a) Colour controls[142]; and

(b) Not recognising alternative urban design methods[143]; and

(c) Matters of detail in the Greymouth/Māwhera Guidelines[144].

685. Ms Belgrave advises that each of the recommended amendments has been linked to a submission point, and these have been identified by footnote. To achieve consistency across all four Design Guidelines, Ms Belgrave has recommended consequential amendments based on the recommendations responding to Ms Dittmer's submission across the Design Guidelines for Hokitika, Reefton, and Westport/Kawatiri.

686. Ms Belgrave did not recommend any additional amendments to the Design Guidelines as part of her right of reply.

Hearing Panel's Evaluation

TCZ – R1

687. The Panel agree with Ms Belgrave and supports the submission point made by Waka Kotahi to redraft this rule to separate buildings from activities. We acknowledge that this follows our recommendations for the COMZ and the MUZ, and so is a consistent approach. We acknowledge that this involves relocating the maximum height controls from TCZ-R2 to TCZ-R5. We disagree with Ms Belgrave that the scope for enabling this comes from Ms Inta's hearing notes, as neither she nor Buller Conservation Group submitted these rules. Instead, we rely on the submission from Waka Kotahi (S450.221).

688. The Panel agree with Ms Belgrave's recommendation to accept parts of the submission point made by BDC related to glazing. We agree with the wording as set out in the right of reply

[142] Jan and Heward (S353.002), Grey District Council (S608.483), Kirsty Dittmer (S412.001), Joanne and Ken Dixon (S213.002), Robert Burdekin (S378.008)
[143] Foodstuffs (S464.003, S464.053, S464.054, S464.055)
[144] Kirsty Dittmer (S412.001)

evidence at paragraph 56 (as opposed to Attachment 1D). We agree that it is not necessary to repeat at *ground level'* in point (a) of the rule. We also agree to move the exceptions related to obtaining written approval to an advice note in the same manner as addressed in the COMZ and MUZ.

689. The Panel acknowledge that KiwiRail's submission points were not recorded or reported on in the S42A report. We have considered the submission, the letter tabled at the hearing and the joint right of reply prepared on the matter by Ms Belgrave and Ms Easton. We agree with the right of reply evidence that a 5m setback from the rail corridor is excessive and would result in inefficiencies in terms of land use. While we acknowledge the safety issue raised by KiwiRail, we consider a 1.5m setback, as recommended in the right of reply, more appropriate and would still address the safety concerns around building maintenance. We also consider that the rule should refer to the setback from the '*rail designation*' rather than the '*rail corridor*' to provide a definitive point of measurement.

690. In relation to the remainder of the submissions on TCZ-R1, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

TCZ – R2 to TCZ – R5

691. The Panel agree with the consequential changes to these rules as set out in Ms Belgrave's right of reply recommendation. Although we rely on the submission from Waka Kotahi (S450.221) to relocate the provisions to reflect the separation of buildings from activities.

692. In relation to the remainder of the submissions on rules TCZ-R2 to TCZ-R5, the Panel agree that these be rejected based on the conclusions reached by Ms Belgrave.

TCZ – R6

693. The Panel agree that it is appropriate to exclude emergency service facilities from the parking and access design requirements and recommends an addition to the rule to reflect this.

694. In relation to the remainder of the submissions on rule TCZ-R6, the Panel agree that these should be rejected based on the conclusions reached by Ms Belgrave.

TCZ – R7

695. The Panel agree with Ms Belgrave's recommendation to make consequential amendments to this rule arising from the BDC submission (S538.411) in relation to waste management. This is consistent with the recommendations made in the COMZ and MUZ chapters.

696. The Panel disagrees with Ms Belgrave's right of reply recommendation that a non-complying activity status should be added to the rule when standard 1 is not complied with. Ms Belgrave's recommendation for this rule is consequential to her recommendation to delete the corresponding discretionary and non-complying rules for the same activity. As outlined in the COMZ and MUZ, the fundamental structure of the rules in the Plan necessitates the inclusion of corresponding rules when an activity status is escalated, and we recommend incorporating these rules into the Plan. Therefore, in this case, any non-compliance with the standards of this rule will result in the activity status being escalated to discretionary. Then, from that rule, it will be determined if the activity becomes non-compliant.

697. In relation to the remainder of the submissions on MUZ-R7, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

TCZ – R8

698. The Panel agree with Ms Belgrave's recommendation to make consequential amendments for TCZ-R8, except for TUZ-R8(5), where it appears that the word '*visitor*' has been transposed for '*residential*'. This is clearly a typographical error in the context of the rule.

699. The Panel disagrees with Ms Belgrave's right of reply recommendation that a non-complying activity status should be added to the rule when standard 1 is not complied with. This is for the same reasons as set out above in relation to TCZ-R7.

700. In relation to the remainder of the submissions on MUZ-R8, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

TCZ – R9

701. The Panel agrees with the minor amendments recommended by Ms Belgrave to this rule in response to the BDC submission, including those set out in her right of reply. The amended wording simplifies the rule, and we also recommend these amendments.

TCZ – R10

702. The Panel agree with the recommendation to make an addition to the rule in response to the submission point from FENZ to provide for hose drying towers. We acknowledge that FENZ accept the wording in their letter presented at the hearing.

TCZ – R11

703. The Panel agree that the submission points to retain this rule should be accepted, and that no amendments be made to the rule based on the conclusions reached by Ms Belgrave.

TCZ – R12 and TCZ – R13

704. The Panel notes that as part of a Plan-wide amendment stemming from a submission by Manawa (S438.100) references to '*landscape measures*' and '*landscape treatment*' have been removed from the matters of control and discretion and replaced with '*measures to mitigate landscape effects*' throughout the chapter. We recommend that this amendment be made to both these rules.

TCZ – R14, TCZ – R15 and TCZ – R16

705. Having reviewed these rules in an overall context, the Panel disagrees with Ms Belgrave that the rules should be deleted. This is due to the fundamental structure of the rules in the Plan, which requires a corresponding rule when an activity status is escalated. Therefore, in this case, we consider that a discretionary activity rule is necessary to address activities where one or more of the performance standards in the corresponding permitted rule are not met. Therefore, we accept the submission points made regarding these rules to retain them.

706. As a consequence of retaining the rules, and due to the recommendations to amend the permitted activity rules separating buildings from activities, it is necessary to make similar amendments to TCZ-R15. We rely on the submission from Waka Kotahi to make these amendments.

TCZ – R17

707. The Panel agree with Ms Belgrave's recommendation to amend the waste management and outdoor living space part of the rule to achieve consistency with recommended amendments to the equivalent provisions in the COMZ and MUZ chapters.

708. We also agree with the recommendation to delete "*and Buildings*" from the title of the rule, as we agree it appears to be an error.

709. In the case of this rule, the Panel disagrees that the reference to TCZ-R1 should be deleted. We consider that 'new buildings' primarily associated with a residential activity would need to address the standards in Rule 1. We consider that if reference to Rule 1 is removed, a building, in this case, would be able to be undertaken without meeting the Rule 1 standards.

710. The Panel also notes that there appears to be an error in Clause 4, which references compliance TCZ-R8. We consider this should be TCZ-R7 and recommend this amendment be made using Clause 16(2) of the RMA.

TCZ - R18

711. The Panel notes that BDC sought to delete the rule, which Ms Belgrave supported, considering it unnecessary following recommended amendments to TCZ-R1 and TCZ-R15. Given the recommendation to delete the rule, Ms Belgrave did not support the relief sought by the other submitters.

712. Having reviewed these rules in an overall context, the Panel disagrees with Ms Belgrave that the rules should be deleted. This is because of the fundamental structure of the rules in the Plan, which requires a corresponding rule when an activity status is escalated. Therefore, in this case, we consider that a discretionary activity rule is necessary to address activities where one or more of the performance standards in the corresponding permitted rule are not met. Therefore, we accept the submission points made regarding these rules which were all to retain them.

713. The Panel agrees with BDC that relocated buildings should be included in this rule, as TCZ-R13 defaults to discretionary but then requires meeting TCZ-Rule 1 to maintain this status.

714. The Panel agrees that this rule should remain non-complying.

TCZ – R19

715. The Panel recommends TCZ-R19 be retained as notified.

TCZ – R20

716. As referred to above, the Panel disagrees with Ms Belgrave that the rules should be deleted. This is because of the fundamental structure of the rules in the Plan, which requires a corresponding rule when an activity status is escalated. Therefore, in this case, we consider that a discretionary activity rule is necessary to address activities where one or more of the performance standards in the corresponding permitted rule are not met. Therefore, we accept the submission points made regarding these rules, which were all to retain them.

TCZ – R21 Industrial Activities

717. The Panel notes that there are two TCZ-R21 rules which is clearly an error. In terms of the first rule relating to Industrial Activities, the Panel recommends it be retained as notified.

TCZ – R21 Any activity not provided for by another Rule in the zone

718. In terms of the second TCZ-R21 rule, the Panel acknowledges that it is a 'catch-all' rule intended to manage activities that have not been specifically provided for in the other rules. The Panel has considered this matter plan-wide and we agree with the submitters that such rules are better placed as discretionary; otherwise, they are unnecessarily limiting in our view and could have unforeseen consequences. Therefore, it is our recommendation to relocate this rule to the discretionary section of this chapter. We rely on the submissions of William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335) and Vance and Carol Boyd (S447.003) to provide the scope.

Appendix Three: Design Guidelines

719. The Panel has considered the matter of the design guidelines. The fundamental problem we have identified is that a permitted activity rule cannot include a standard that requires subjective assessment. Other than relying on voluntary application, if the Plan were seeking to apply the design guidelines, this could only be achieved by changing the status of the current permitted activity rules to controlled activity or restricted discretionary. Those changed rules would include the design guidelines as a matter to be assessed via a resource consent process. We have reviewed all submissions on this matter and do not consider that any are seeking to elevate the status of the design guidelines beyond a permitted status. We do acknowledge that relocated buildings are subject to consideration of the design guidelines at a restricted discretionary status.

720. The Panel accept that the design guidelines have a place in the Plan and, in our opinion, that can only be as guidance via an advice note given the above. We acknowledge that they play an important role in ensuring retention of the heritage design themes of both Reefton and Hokitika, which supports tourism in those towns. We also accept that they address amenity aspects in all four main centres. Accordingly, we support their retention in the Plan, and we agree with Ms Belgrave that this can only be at the advice note level, given submissions and the Plan structure.

721. The Panel agrees that Mitre 10 building in Westport should be deleted from the guidelines because the building is located outside of the TCZ and its inclusion in the Design Guideline could create confusion.

722. Regarding the remainder of the guidelines, the Panel acknowledges the changes sought, in particular, by submitters K. Dittmers, Foodstuffs, and J. Heward. Many of the changes sought both refinements and limitations. We generally accept the recommendations of Ms Belgrave, which principally stem from, and reflect at least in part, the amendments sought by those submitters, and which were informed by Ms Laurie's expert input.

723. The Panel has made some further refinements to increase the clarity of the guidelines, and we recommend the changes as detailed below.

724. The Panel notes that there are some matters we are unable to amend. In this context, we note that there appear to be guidelines missing in relation to the Westport section, such as Building Signage and Building Entries. We also note that there appears to be a double-up in photos under BF 5 in the Greymouth section.

725. In relation to the remainder of the submissions on the Guidelines, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

Hearing Panel's Recommendation

726. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part and recommends the following changes to the **Town Centre Zone Overview**:

Town Centre Zone Rules	
Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.	
Permitted Activities	
TCZ - R1	**New Buildings, External Alterations or Alterations to Existing Buildings** ~~Commercial Activities and Buildings, Community Corrections Activities, Community Facilities and Emergency Service Facilities~~[145]
Activity Status Permitted Where: **1. The maximum height above ground level is;** **a. 20 metres in TCZ – PREC1 - Greymouth/Māwhera Town Centre Precinct.** **b. 12 metres in TCZ – PREC2 – Hokitika Town Centre Precinct.** **c. 15 metres in TCZ – PREC3 – Westport/Kawatiri Town Centre Precinct.** **d. 12 metres in TCZ – PREC4 – Reefton Town Centre Precinct.** **Except that hose drying towers at Emergency Service Facilities are exempt from this standard;**[146] 2. Any building is located: a. On the front boundary of the site; b. With no setback from the street boundary, except that a recess of up to 0.5m within the facade of the building is permitted;	**Activity status where compliance not achieved:** Non-complying where standards ~~1~~ **2**-3 are not complied with. Discretionary where standards **1 and** 4 to **5** ~~6~~ are not ~~met~~ **complied with**.[154]

[145] Waka Kotahi (S450.221)
[146] Consequential to Waka Kotahi (S450.221)
[154] Ministry of Education (S456.036)

3. Any building is setback a minimum of a. 3m from any RESZ - Residential Zone boundary; b. **1.5m from the railway corridor designation, excluding accessory buildings and structures**[147] ~~3. All external storage is screened by a 1.8m fence or landscaping so it is not visible from any adjoining residential zone boundary or any adjoining public space;~~[148] 4. The ground floor facade of all buildings with a Main Street Frontage must have: a. ~~50% of the facade devoted to display windows or 75% of its height for at least 50% of the ground floor building frontage~~ **A minimum of 50% comprising of clear glazing**;[149] and b. One public entrance with glazing comprising at least 40% of the doors; except that Any Heritage Building in Schedule One is exempt from this requirement. ~~5. No building shall create a featureless facade or blank wall on a Main Street Frontage at ground floor level wider than 3m;~~[150] 5. No building shall project beyond a building envelope defined by a recession plane as identified in accordance with Appendix Two to commence 2.5m above any RESZ - Residential Zone boundary ~~except where the neighbouring property owner's written approval is provided to the Council 10 working days to the works commencing~~[151]. This standard does not apply to: a. Road boundaries; b. Buildings on adjoining sites that have a common wall along the boundary; c. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard; d. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and

5. Any other structure does not exceed 10m² and 2m in height.	
TCZ – R11 Fences, Walls and Retaining Walls	
Activity Status Permitted Where: 1. Fences, walls and retaining walls are a maximum 2m height above ground level; and 2. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall.	**Activity status where compliance not achieved:** Discretionary
Controlled Activities	
TCZ – R12 Demolition of Buildings not meeting Permitted Activity Standards	
Activity Status Controlled Where: 1. These are not Heritage Buildings identified in Schedule One. **Matters of control are:** a. Site rehabilitation and ~~landscape measures~~ **measures to mitigate landscape effects**[196]; and b. Weather protection for pedestrians.	**Activity status where compliance not achieved:** Discretionary under Rule HH – R9.
Restricted Discretionary Activities	
TCZ – R13 Relocated Buildings	
Activity Status Restricted Discretionary Where: 1. Permitted Activity performance standards for TCZ - R1 are complied with; and 2. Relevant Permitted Activity performance standards for TCZ - R2, TCZ - R3, TCZ - R4 and TCZ - R5 are complied with. **Discretion is restricted to:** a. Design and location of buildings; b. Appearance of buildings;	**Activity status where compliance not achieved:** Discretionary

[196] Consequential Plan wide amendment to Manawa Energy Limited (S438.100)

c. The extent to which the building meets any relevant Town Centre Design Guidelines; and d. ~~Landscape Measures~~ **Measures to mitigate landscape effects**.[197]	
Discretionary Activities	
TCZ – R14	**Visitor Accommodation Activities ~~and Buildings~~[198] and Residential Activities in Existing Buildings not meeting Permitted Activity Standards**
Activity Status Discretionary Where: 1. Except where this is Heritage Building listed in Schedule One, the ground floor is used for Commercial or Community Activities. **Advice Note:** 1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.	**Activity status where compliance not achieved:** Non-complying
TCZ – R15	~~Commercial Activities and~~ **New Buildings, External Alterations or Alterations to Existing Buildings** ~~Buildings, Community Facilities, Community Corrections Activities and Emergency Service Facilities~~[199] **and Relocated Buildings**[200] **not meeting the Permitted Activity Standards for Ground Floor Facade, Recession Plane or Height**
Activity Status Discretionary Where: 1. All other performance standards for Rule TCZ - R1 ~~and where relevant for TCZ - R2, TCZ - R3, TCZ - R4 and TCZ - R5~~[201] are complied with.	**Activity status where compliance not achieved:** Non-complying
TCZ – R16	**Minor Structures and Fences, Walls and Retaining Walls not meeting the Permitted Activity Standards**
Activity Status Discretionary	**Activity status where compliance not achieved:** N/A
TCZ – R17	**Residential Activities ~~and Buildings~~[202] in New Buildings**

Greymouth/Māwhera Town Centre and Mixed Use Zone Urban Design Guidelines

1.0 Introduction

This document has been developed to provide direction to those planning, design and reviewing development proposals in the Greymouth/Māwhera town centre and new mixed use area. This guide seeks to achieve high quality building design that:

- Responds to the context
- Is visually interesting and in keeping with the streetscape values
- Addresses cultural and built heritage values and design elements
- Creates a vibrant, active pedestrian environment
- Incorporates new and innovative design where appropriate
- Takes into account Poutini Ngāi Tahu values.

1.1 When does the Design Guide apply?

[208] Consequential amendment stemming from William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335), Vance and Carol Boyd (S447.003)

Under Te Tai o Poutini Plan rules, all new buildings within the Greymouth/Māwhera Town Centre Zone and Mixed Use Zone are ~~required~~ **encouraged**[209] to be assessed against these design guidelines. Where resource consents are required the Councils will use this guide to help assess and make decisions on those consent applications.

2.0 Greymouth/Māwhera Design Guidelines

2.1 Context

Connection with the Natural Environment

The Grey/Māwhera River provides a natural edge to the town centre and a link to its cultural heritage. The vegetated hills behind Greymouth/Māwhera are an important backdrop to the town and an acknowledged outstanding natural landscape. Keeping access to the Grey/Māwhera River and a visual link between the town centre and the surrounding hills is essential.

Existing built character

The core of Greymouth/ Māwhera's town centre retains a coherent collection of nineteenth and early twentieth century buildings and architecture/building methods of this period. This represents an important part of the historic heritage resource of the West Coast/Te Tai o Poutini.

The following design elements that contribute positively to the character of the town are identified as:

- Building edge – buildings are often built to the street boundary.
- Continuous façade – buildings tend to abut one another creating a sense of enclosure
- Human scale – buildings give a sense of human scape at the publicly occupied edges. They contain proportions, textures and physical elements that fit with the size of people.
- Prominent corner buildings – corner buildings are often taller than the adjoining buildings. This additional height helps define the edge of a block and create a visual anchor point.
- Verandahs – this is a key feature in the main street frontage streets in the Town Centre Zone and Façade Control Streets in the Mixed-Use Zone which provide shelter for pedestrians.
- Main Street frontage streets in the Greymouth/Māwhera Town Centre Zone are: Māwhera Quay, Mackay Street, Tainui Street, Guiness Street, Albert Street, Werita Street, Custom Street and Tarapuhi Street
- Façade Control Streets in the Greymouth/Māwhera Mixed Use Zone are: Mackay Street,Boundary Street, Richmond Quay, Gresson Street, Herbert Street, Guiness Street and Tarapuhi Street.
- Four distinct parts of building – traditional buildings show four distinct parts – base, verandah, upper area and parapet
- Rhythm and repetition – windows are often at regular intervals, symmetry of façade features
- Visual interest – although commonalities exist between buildings, each building expresses an individual character
- Active frontage – windows exist on all floor levels of a building's façade

[209] Foodstuffs (S464.053)

Poutini Ngāi Tahu Cultural Landscapes

Many buildings within the town centre reflect Greymouth/Māwhera's colonial and settler history, however there is limited representation of a much longer Poutini Ngāi Tahu history. Greymouth/Māwhera is solely located within the takiwa of Te Rūnanga o Ngāti Waewae and they are the key Poutini Ngā Tahu contacts for designers of buildings in Greymouth/Māwhera.

Poutini Ngāi Tahu culture and identity highlight the West Coast's point of difference in the world and offer design opportunities for the future.

The guidelines in Section 2.2 are based on the Ngāi Tahu Subdivision and Development Guidelines, which are a set of urban design principles founded on core Maori cultural values and designed to provide practical guidance for enhancing outcomes for the design environment. These principles have arisen to enable greater iwi and hapū presence, visibility and participation in the design of the physical environment.

The use of Poutini Ngāi Tahu design guidelines is predicated on the development of high-quality durable relationships being developed between Te Rūnanga o Ngāti Waewae, Pokeka Environmental =their mandated design professionals, developers and the Council. Robust relationships between these groups provide opportunities for unlocking a rich store of design potential.

2.2 Guidelines

Context

GC1 Complement the ~~existing~~ **bulk and form of the existing** built context ~~with visual links through similarity of overall bulk and form. New development should attempt to complete, improve and enhance the setting of individual buildings or groups of buildings listed as scheduled historic heritage items in Te Tai o Poutini Plan.~~ New buildings/structures **which immediately adjoin scheduled heritage items** shall **aim to** complement and support, rather than dominate these scheduled buildings and structures.[210]

GC2 Take into account the wider surroundings, including natural features, such as views to ~~other buildings,~~ the mountains and the Māwhera/Grey River.[211]

Poutini Ngāi Tahu Cultural Landscapes

IW1 Mana/authority – The development of a high-level relationship with Te Rūnanga o Ngāti Waewae is essential prior to commencing design approaches which will maximise the opportunities for design outcomes. A cultural landscape approach is the most appropriate means to identify, assess and manage the potential effects of subdivision and development on cultural values and significant sites.

IW2 Te Reo, whakapapa/naming – Consultation with Te Rūnanga o Ngāti Waewae on the use of correct ancestral names, including macrons, and the recognition of traditional place names in keeping with the mita (pronunciation of language) of Poutini Ngāi Tahu through signage, wayfinding, street names in new subdivisions and names of public buildings, parks and places.

[210] Kirsty Dittmer (S412.001)
[211] Kirsty Dittmer (S412.001)

IW3 Tohu/landmarks – Significant wider cultural landmarks (including wāhi tapu, maunga, awa, puna, mahinga kai and ancestral kāinga) and associated narratives are acknowledged in the spatial orientation and layout of any new development, allowing visual connection to significant sites to be created, preserved and enhanced.

IW4 Taiao/environment – Landscape design includes a selection of indigenous plant and tree species where possible and reflects cultural perspectives, ideas and materials. Indigenous biodiversity objectives should be incorporated into development plans and indigenous species used for street trees, open space and reserves, native ground cover species for swales and stormwater management.

IW5 Mauri Tū/environmental health - Use of land - based treatment of wastewater, rainwater collection systems, grey-water recycling systems, stormwater treatment, passive solar design, and hard landscape and building materials which are locally sourced and of high cultural value to Poutini Ngāi Tahu are explored in the design process.

IW6 Mahi Toi/creative expression – **When** Poutini Ngāi Tahu narratives are ~~creatively~~ reinscribed through architectural ~~design~~ and building **design**, integrated artwork. ~~and~~ Te Rūnanga o Ngāti Waewae mandated design professionals and artists are appropriately engaged in ~~such~~ **this** process~~es~~[212].

IW7 Ki uta ki tai/from the mountains to the sea. Opportunities are explored through partnership engagement with Poutini Ngāi Tahu to reflect the Poutini Ngāi Tahu view of the environment and resource management. Ki uta ki tai is a traditional concept representing kaitiakitanga from the mountains and inland lakes, down the rivers to hapua/lagoons to the sea. Kaitiakitanga reflects the special relationship Ngāi Tahu has with its environmental heritage. It is fundamental to the tribe's culture and identity. Ki uta ki tai encapsulates the need to recognise and manage the interconnectedness of the whole environment.

Built Form

BF1 Mass/Scale - New buildings shall relate to the scale of adjacent buildings. Where very wide buildings are proposed, their bulk and width shall be reduced by dividing the façade up ~~by vertical divisions~~ into ~~several smaller "storefronts"~~ **visually smaller vertical forms** – something commonly used in the existing Greymouth/Māwhera building stock. Windows and doors and other architectural details shall be used to reduce the mass of structures. Where a building over three stories is proposed, the section above three stories shall be stepped back from the line of view from the street.[213]

This long low building shape should be avoided. Two storey rather than one storey buildings give better containment to the streetscape. This building also lacks windows and has limited design features and detail to add interest to the building. The buildings colours are also very out of

[212] Kirsty Dittmer (S412.001)
[213] Kirsty Dittmer (S412.001)

character with other buildings in the vicinity

An example of a wide building with vertical divisions and the use of colour and different materials to break up the facade.

BF2 Location to front – Buildings are to be positioned so their front walls abut the (footpath) boundary.

BF3 Continuity – on Main Street Frontage and Façade Control Streets buildings are to extend across the full width of the site frontage to ensure that the street's "built" edge is continuous. Exceptions to the continuous frontage are for walking access connections and outdoor dining areas/courtyards. The façade will be indicative of the bulk of the building behind (i.e., not just a façade). Beyond Main Street Frontage and Façade Control Streets, maintaining a continuous frontage is still encouraged to maintain a sense of enclosure, however it is not essential.

BF4 Height – New buildings should ideally be at least two storeys in height, but at a minimum, shall appear similar in height to the existing neighbouring buildings.

Any upper floor areas visible in the layout of the façade are to be potentially usable space rather than a false façade.

BF5 Corner buildings. Buildings on corners and main junctions are highly visible which means that building design is especially important. Buildings on corners are able to be visually emphasised with architectural elements such as taller forms, or parapets, cornice, pediment or similar features that wrap around the building.

This building expresses well to the corner with a specific corner facade.

This building does not include any corner features to emphasise its position.

Location Specific Guidance

BF6 Pedestrian Access Lanes – existing pedestrian access lanes shall be retained and enhanced. Lanes should be well lit, attractive and safe. Pedestrian routes shall be lit at a minimum of 10 lux. Buildings facing the lanes shall have ground level openings (windows or doors) to provide connection with the public space and allow natural surveillance of the walkway.

BF7 Roofs/Down pipes – Roofs are encouraged to sit below the height of the parapet and not be visible from the street. Drainpipes should be designed so they are a discrete part of the building and not visually intrusive.

Facades

GF1 Openings – Buildings are to have windows on all street facades with minimum glazing as specified in the relevant rules. ~~Symmetrically located windows~~ **Create visual interest and symmetry by positioning windows at regular intervals** ~~are required~~ above ground level, and main doors at ground level are to be oriented to the street (i.e., not at the side or the back). Entrances shall be wide enough to accommodate wheelchairs and pushchairs. Buildings that have more than one frontage (i.e., corner) are to include windows and doors on both facades if there is sufficient length of frontage. The design of side and back elevations that are visible from the street or any other public space should be consistent with the design of the main building frontage.[214]

GF2 Visual permeability – The ground floor window of buildings (including glazed doors) in Main Street Frontages must be no less than 50% of the frontage in the Town Centre Zone and on Façade Control Streets in the Mixed Use Zone must have a minimum 20% glazing. ~~On all facades, fully glazed facades will not be permitted unless there are vertical solid breaks at frequent intervals.~~ The glazing is not to be blocked out with opaque or reflective film, or other treatment that obscures the visual connection from the outside into the building.[215]

GF3 Office/Commercial Activity – where the ground floor is used for offices/commercial activity in Main Street Frontage Streets, the display area immediately behind the windows should be designed as reception and waiting areas.

GF4 Shop fronts and entries – Building entries and shop fronts in Main Street Frontage Streets should be glazed and entries recessed. This allows pedestrians to stop and view the display area and gives depth to the entrance.

GF5 Four elements – Building facades are to show the following distinct elements:

[214] Kirsty Dittmer (S412.001)
[215] Kirsty Dittmer (S412.001)

Base (Ground) – in Main Street Frontage streets this should predominantly be a shopfront with vertical division and a recessed entrance

Verandah/Canopy/Balcony – style of verandah/canopy/balcony to be consistent with the building (more detail provided in GF6)

Upper Area – symmetrical placement of windows.

Parapet/Top – top outline of the façade extended or modulated by elements reflecting the building structure and roof form, and generally masking the roof.

GF6 Verandah/canopy/balcony -Verandahs are a requirement in Main Street Frontage Streets and Façade Control Streets and are subject to performance standards in the rules. Verandahs should:

- Complement the building style of the building to which they are attached
- Extend over the footpath and full width of the building frontage. **Setback the verandah to allow clearance for taller vehicles.**[216]
- Take cues from neighbouring verandahs in terms of height, proportion and style, whilst allowing for variation in design features
- Be fully cantilevered with no decorative poles or obstructions of the footpath
- Not obscure windows or architectural details
- Verandahs on corner buildings should wrap around the building and extend the full width of both frontages (even if only one frontage is classed as a Main Street Frontage or Façade Control Street).

Balconies should be designed to be in keeping with the overall architectural detail of the building. Balustrades should allow for views and natural surveillance of the street.

GF7 Articulation and Detail – building facades should **achieve visual interest to support the pedestrian experience. This may** include articulation and detailing**, such as**~~. Façade articulation may include~~ setbacks, projected bays, balconies **and fencing and landscaping.** ~~etc.~~ Building facades should have detail and depth and not be on a flat plane.[217]

GF8 Material and Colour – **use materials, texture and colour to highlight the building's form and details** ~~building colours, whether a painted finish or natural materials should highlight features~~ such as joinery, decoration or repetition of the building form

- ~~Use colours that are consistent with the existing range of colours in the town centre and be consistent with the Pounamu and Māori Heritage colour palette developed as part of the CBD Redevelopment Plan.~~
- ~~Side and rear walls should be painted in the same colours as the building's main façade. Side and rear walls also provide an opportunity for murals to be painted. In these cases colours can deviate from the building's main façade.~~
- ~~Bright colours designed to call attention to the building are not acceptable~~

[216] Kirsty Dittmer (S412.001)
[217] Foodstuffs (464.055)

- ~~Painting the whole building one block colour as a "sign" to brand the building is not acceptable.~~[218]

Colour has been used successfully on this building to highlight window details, the entrance and detailed lines on the building. The colours are in keeping with a traditional colour palette suitable for other buildings in the town centre. ~~The colours used on this building on the left are very bold and not consistent with other building colours in the vicinity.~~[219]

~~Colour has been used successfully on this building to highlight window details, the entrance and detailed lines on the building. The colours are in keeping with a traditional heritage palette suitable for other buildings in the town centre.~~ **The colours used on this building on the left are very bold and not consistent with other building colours in the vicinity.**[220]

GF9 Building Signage - Signage should not project above the roofline or obscure architectural features.

GF10 Lighting – Buildings can have lighting to highlight building façade features and provide under verandah light to the footpath. Choose lighting fixtures in a style that is appropriate to the building and not susceptible to vandalism.

GF 11 Building entries (non-Main Street Frontage or Façade Control Streets) – Building entries are encouraged to have a canopy or verandah to provide protection from the weather and emphasise the entry point.

GF12 Outdoor dining areas. – These are encouraged on footpaths adjoining buildings within the town centre to give vitality and encourage occupation of the street. The location, size and layout need to take into account public access, pedestrian circulation and the safety of patrons and motorists.

GF13 Mechanical equipment – Try and maintain the integrity of the general form of the building by avoiding detracting secondary features such as air conditioning plants or other mechanical equipment above or in front of the façade, and visible from the street.

[218] Kirsty Dittmer (S412.001), J & R Heward (S353.002) Grey District Council (S608.483)
[219] Kirsty Dittmer (S412.001), J & R Heward (S353.002) Grey District Council (S608.483)
[220] Kirsty Dittmer (S412.001), J & R Heward (S353.002) Grey District Council (S608.483)

Strengthening and Restoration

GS1 External strengthening – if external strengthening has to be used, either avoid the street façade or design strengthening structures as a visible and explicit design feature of the elevation. Do not obscure features such as windows.

GS2 Façade retention – For heritage and landmark buildings, retaining a building's street façade is preferable to its demolition. Where only the façade is retained, fit the new structure behind the façade features – reusing window and door openings. Keep the new structure below the façade height and give the visual appearance of retained floors.

Location Specific Requirements

GL1 Mackay Street and Māwhera Quay ~~a~~ focus ~~is~~ on restoration and repurposing of existing buildings. **Any replacement** ~~Replacement~~ buildings should **consider** ~~have~~ a scale and style that reflects port warehouses in keeping with **Mackay Street and Mawhera Quay's** ~~the~~ riverfront position.[221]

Hokitika Town Centre Urban Design Guidelines

1.0 Introduction

This document has been developed to provide direction to those planning, designing and reviewing development proposals in the Hokitika town centre. This guide seeks to achieve high quality building design that:

- Responds to the context
- Is visually interesting and in keeping with the streetscape values
- Addresses cultural and built heritage values and design elements
- Creates a vibrant, active pedestrian environment
- Incorporates new and innovative design where appropirate
- Takes into account CPTED principles and the Poutini Ngāi Tahu values.

1.1 When does the Design Guide apply?

Under Te Tai o Poutini Plan rules, all new buildings within the Hokitika Town Centre Zone are ~~required~~ **encouraged** to be assessed against these design guidelines. Where resource consents are required the Councils will use this guide to help assess and make decisions on those consent applications.[222]

2.0 Hokitika Design Guidelines

2.1 Context

Hokitika means 'return directly' in Māori. The name embraces the story of a battle of control of the pounamu source. Invading Ngāi Tahu who wanted control of the pounamu source were devastatingly defeated at Lake Mahinapua by local tribe Ngāti Wairangi. The sole surviving chief Hikatutae turned back here and 'returned directly' to Kaiapoi. Several battles later Ngāi Tahu won,

[221] Kirsty Dittmer (S412.001)
[222] Foodstuffs (464.055)

but at a truly heavy price. Today Poutini Ngāi Tahu honour their role as rangatira, carvers and traders of this revered stone.

The town of Hokitika grew from the discovery of another precious resource - gold. The West Coast's gold rushes, many led by Maori, attracted thousands of gold-seekers. Between 1864 and 1867 ships brought 37,000 seekers into Hokitika Port through its treacherous river mouth resulting in countless shipwrecks. Carved out of the rainforest wilderness, Hokitika grew from the 'Crooked Mile' of Revell Street on the dunes to a wide-streeted goldfields capital,

Defined Centre

Hokitika is a well defined centre with a grid layout and natural edges from the Hokitika River and Hokitika Beach and a human edge created by the railway line. There is a strongly defined entrance into the town, with the town clock creating a core focal point.

Connection with the Natural Environment

The Hokitika River/Gibson Quay and Beachfront provide natural edges to the town centre and a link to its cultural and natural heritage. Alongside this Hokitika is notable for its views towards the Southern Alps. Maintaining visual connections and improving access to the beach and Gibson Quay are essential.

Existing built character

Hokitika Town Centre has an interesting mix of historic nineteenth and early twentieth century buildings as well as more modern, but largely sympathetic, buildings. The historic heritage represents an important part of the historic heritage resource of Westland and the West Coast and is centred around Revell Street.

The following design elements that contribute positively to the character of the town are identified as:

- Building edge – buildings are often built to the street boundary.
- Continuous façade – buildings tend to abut one another creating a sense of enclosure
- Human scale – buildings give a sense of human scape at the publicly occupied edges. They contain proportions, textures and physical elements that fit with the size of people.
- Prominent corner buildings – corner buildings are often taller than the adjoining buildings. This additional height helps define the edge of a block and create a visual anchor point.
- Verandahs – this is a key feature in the main street frontage streets in the Town Centre Zone which provide shelter for pedestrians.
    - Main Street frontage streets in the Hokitika Town Centre Zone are: Weld Street, Sewell Street, Hamilton Street, Revell Street, Tancred Street, Camp Street, Wharf Street, Gibson Quay
- Four distinct parts of building – traditional buildings show four distinct parts – base, verandah, upper area and parapet

- Visual interest – although commonalities exist between buildings, each building expresses an individual character

- Active frontage – windows exist on all floor levels of a building's façade

Revell Street Heritage Character Area

The Revell Street Heritage Area (From Ocean View/110 Revell Street to Camp Street) is characterised by having a large number of late nineteenth and early twentieth century buildings which recall the late Victorian era mining town character.

Revell Street Heritage Character Area Buildings

While only a handful of these are listed historic buildings, retaining the other character buildings from this era, and ensuring that new buildings are sympathetic to the area is very important.

In terms of character, buildings that contribute positively to the character of Revell Street

- Are built to the street boundary
- Are rectangular with elongated or tall proportions
- Are designed based on early West Coast heritage styles
- Have tall horizontal or stepped parapets hiding the roof behind
- Have verandahs (although some of the large hotels do not and historically many did not)
- Have similar alignment of parapets and shopfronts
- Are constructed of timber with timber shopfronts

The shop front design of buildings contributing to the character of Revell Street also has general level of consistency:

- A large display window which can be divided into large symmetrical panes particularly in the older shops
- Recessed or flat entries either to one side, or, for the older shops, centrally located

- A bulkhead, or base to the shopfront, which is panelled on the older shops

Poutini Ngāi Tahu Cultural Landscapes

Many buildings within the town centre reflect Hokitika's colonial and settler history, however there is limited representation of a much longer iwi history. Poutini Ngāi Tahu culture and identity highlight the West Coast's point of difference in the world and offer design opportunities for the future.

The guidelines in Section 2.2 are based on the Ngāi Tahu Subdivision and Development Guidelines, which are a set of urban design principles founded on core Maori cultural values and designed to provide practical guidance for enhancing outcomes for the design environment. These principles have arisen to enable greater iwi and hapū presence, visibility and participation in the design of the physical environment.

The use of Poutini Ngāi Tahu design guidelines is predicated on the development of high-quality durable relationships being developed between Ngāti Waewae and Ngāti Māhaki oMakaawhio, Pokeka Environmental - their mandated design professionals, developers and the Council. Robust relationships between these groups provide opportunities for unlocking a rich store of design potential.

2.2 Guidelines

Context

GC1 Complement the ~~existing~~ **bulk and form of the existing** buil**dings**~~.t context with visual links through similarity of overall bulk and form. New development should attempt to complete, improve and enhance the setting of individual buildings or groups of buildings listed as heritage items in Te Tai o Poutini Plan.~~ New buildings/structures **which immediately adjoin scheduled heritage items** shall **aim to** complement and support, rather than dominate these listed buildings.[223]

GC2 Take into account the wider surroundings, including natural features, such as views to Ngā Tiritiri-o-te-Moana/Southern Alps and links to the beach and the river.

Poutini Ngāi Tahu

IW1 Cultural Landscapes – A cultural landscape approach is the most appropriate means to identify, assess and manage the potential effects of subdivision and development on cultural values and significant sites.

IW2 Te Reo, whakapapa/naming – Consultation with the relevant Poutini Ngāi Tahu Papatipu Rūnanga on the use of appropriate ancestral names, including macrons, and the recognition of traditional place names in keeping with the mita (pronunciation of language) of Poutini Ngāi Tahu through signage, wayfinding, street names in new subdivisions and names of public buildings, parks and places.

IW3 Tohu/landmarks – Significant wider cultural landmarks (including wāhi tapu, maunga, awa, puna, mahinga kai and ancestral kāinga) and associated narratives approved by Poutini Ngāi Tahu

[223] Kirsty Dittmer (S412.001)

are acknowledged in the spatial orientation and layout of any new development, allowing visual connection to significant sites to be created, preserved and enhanced.

IW4 Taiao/environment – Landscape design includes a selection of indigenous plant and tree species where possible and reflects cultural perspectives, ideas and materials. Indigenous biodiversity objectives should be incorporated into development plans and indigenous species used for street trees, open space and reserves, native ground cover species for swales and stormwater management.

IW5 Mauri Tū/environmental health - Use of land - based treatment of wastewater, rainwater collection systems, grey-water recycling systems, stormwater treatment, passive solar design, and hard landscape and building materials which are locally sourced and of high cultural value to Poutini Ngāi Tahu are explored in the design process.

IW6 Mahi Toi/creative expression – **When iwi** ~~Iwi~~/hapū narratives are ~~creatively~~ reinscribed through architectural ~~design~~ and building **design**, integrated artwork**.** ~~**and**~~ Poutini Ngāi Tahu Papatipu Rūnanga mandated design professionals and artists are appropriately engaged in ~~such~~ **this** process~~es~~.[224]

IW7 Ki uta ki tai/from the mountains to the sea. Opportunities are explored through partnership engagement with Poutini Ngāi Tahu to reflect the Poutini Ngāi Tahu view of the environment and resource management. Ki uta ki tai is a traditional concept representing kaitiakitanga from the mountains and inland lakes, down the rivers to hapua/lagoons to the sea. Kaitiakitanga reflects the special relationship Ngāi Tahu has with its environmental heritage. It is fundamental to the tribe's culture and identity. Ki uta ki tai encapsulates the need to recognise and manage the interconnectedness of the whole environment.

Built Form

BF1 Mass/Scale -New buildings should relate to the scale of adjacent buildings. Where very wide buildings are proposed, their bulk and width shall be reduced by dividing the façade up ~~by vertical divisions~~ into ~~several smaller "storefronts"~~ **visually smaller vertical forms**. Windows and doors and other architectural details shall be used to reduce the mass of structures. Where a building over three stories is proposed, the section above three stories should be stepped back from the line of view from the street.[225]

This long low building shape should be avoided. This building also lacks windows and has limited design features and detail to add interest to the building. The buildings colours are also very out of character with other buildings in the vicinity

[224] Kirsty Dittmer (S412.001)
[225] Kirsty Dittmer (S412.001)

An example of a wide building with vertical divisions and the use of colour and different materials to break up the facade.

BF2 Location to front – Buildings are to be positioned so their front walls abut the (footpath) boundary

BF3 Continuity – on Main Street Frontage streets buildings are to extend across the full width of the site frontage to ensure that the street's "built" edge is continuous. Exceptions to the continuous frontage are for walking access connections and outdoor dining areas/courtyards. The façade will be indicative of the bulk of the building behind (i.e., not just a façade). Beyond Main Street Frontage Streets, maintaining a continuous frontage is still encouraged to maintain a sense of enclosure, however it is not essential.

BF4 Height – New buildings should ideally be at least two storeys in height, but at a minimum, should appear similar in height to the existing neighbouring buildings

Any upper floor areas visible in the layout of the façade should be potentially usable space rather than a false façade.

BF5 Corner buildings. Buildings on corners and main junctions are highly visible which means that building design is especially important. Buildings on corners are able to be visually emphasised with architectural elements such as taller forms, or parapets.

This building expresses well to the corner with the second story providing height, and the window facing into the corner.

BF6 Pedestrian Access Lanes – existing pedestrian access lanes shall be retained and enhanced. Lanes should be well lit, attractive and safe. Pedestrian routes shall be lit at a minimum of 10 lux. Buildings facing the lanes should have ground level openings (windows or doors) to provide connection with the public space and allow natural surveillance of the walkway.

BF7 Roofs– Roof form in Hokitika town centre is variable with some below the parapet and others pitched and visible from the street. Either is acceptable except there are some specific requirements for the Revell Street heritage area

Rooflines hidden behind a parapet

Mixed rooflines

GF1 Openings – Buildings are to have windows on all street facades with minimum glazing as specified in the relevant rules. Main doors at ground level are to be oriented to the street (i.e. not at the side or the back). Entrances shall be wide enough to accommodate wheelchairs and pushchairs. Buildings that have more than one frontage (i.e., corner) are to include windows and doors on both facades if there is sufficient length of frontage. The design of side and back elevations that are visible from the street or any other public space should be consistent with the design of the main building frontage.

GF2 Visual permeability – The ground floor window area of buildings (including glazed doors) in Main Street Frontage must be no less than 50% of the frontage in the Town Centre Zone. ~~On all facades, fully glazed facades will not be permitted unless there are vertical solid breaks at frequent intervals.~~ The glazing is not to be blocked out with opaque or reflective film, or other treatment that obscures the visual connection from the outside into the building.[226]

GF3 Shop fronts and entries – Building entries and shop fronts on Main Street Frontage Streets should be glazed and entries recessed. This allows pedestrians to stop and view the display area and gives depth to the entrance.

GF4 Four elements – Building facades are to show the following distinct elements:

Base (Ground) – in Main Street Frontage streets this should predominantly be a shopfront with vertical division and a recessed entrance

Verandah/Canopy/Balcony – style of verandah/canopy/balcony to be consistent with the building (more detail provided in GF5)

Upper Area –windows if building is more than 1 storey in height.

Parapet/Roof – Parapet with top outline of the façade extended or modulated by elements reflecting the building structure and roof form masking the roof, or roof form clearly evident.

GF5 Verandah/canopy/balcony -Verandahs are a requirement on Main Street Frontage streets and are subject to performance standards in the rules. Verandahs should:

[226] Kirsty Dittmer (S412.001)

- Complement the building style of the building to which they are attached
- Extend over the footpath and full width of the building frontage. **Setback the verandah to allow clearance for taller vehicles.**[227]
- Take cues from neighbouring verandahs in terms of height, proportion and style, whilst allowing for variation in design features
- Not obscure windows or architectural details
- Verandahs on corner buildings should wrap around the building and extend the full width of both frontages (even if only one frontage is classed as a Main Street Frontage).

Balconies should be designed to be in keeping with the overall architectural detail of the building. Balustrades should allow for views and natural surveillance of the street.

GF6 Articulation and Detail – building facades should **achieve visual interest to support the pedestrian experience. This may** include articulation and detailing~~. Façade articulation may include~~ setbacks, projected bays, balconies **and fencing and landscaping** ~~etc~~. Building facades should have detail and depth and not be on a flat plane.[228]

GF7 Material and Colour – **use materials, texture and colour to highlight the building's form and details** ~~building colours, whether a painted finish or natural materials should highlight features~~ such as joinery, decoration or repetition of the building form

- ~~Use colours that are consistent with the existing range of colours in the town centre.~~
- ~~Side and rear walls should be painted in the same colours as the building's main façade. Side and rear walls also provide an opportunity for murals to be painted. In these cases colours can deviate from the building's main façade.~~
- ~~Bright colours designed to call attention to the building are not acceptable~~
- ~~Painting the whole building one block colour as a "sign" to brand the building is not acceptable.~~ [229]

Before **After**

Colour and Signage are key to achieving a good design outcomes. This building has been transformed by the change to a sympathetic colour and incorporation of a well designed sign reflecting Poutini Ngāi Tahu values.

[227] Kirsty Dittmer (S412.001)
[228] Foodstuffs (464.055)
[229] J & R Heward (353.002)

Colour has been used successfully on this building to highlight window details, the entrance and detailed lines on the building. The colours are in keeping with a traditional heritage palette ***<u>suitable for other buildings in the town centre</u>***.[230]

~~Colour has been inappropriately used on these shops. They are not in keeping with the surrounding area, and also being used as a "sign" to advertise a product~~. **<u>The colours used on these buildings are very bold and not consistent with the other building colours in the vicinity.</u>**[231]

GF8 Building Signage -Signage should not project above the roofline or obscure architectural features.

GF9 Lighting – Buildings can have lighting to highlight building façade features and provide under verandah light to the footpath. Choose lighting fixtures in a style that is appropriate to the building and not susceptible to vandalism.

GF10 Building entries (non-Main Street Frontage Streets) – Building entries are encouraged to have a canopy or verandah to provide protection from the weather and emphasise the entry point.

GF11 Outdoor dining areas. – These are encouraged on footpaths adjoining buildings within the town centre to give vitality and encourage occupation of the street. The location, size and layout need to take into account public access, pedestrian circulation and the safety of patrons and motorists.

GF12 Mechanical equipment – Try and maintain the integrity of the general form of the building by avoiding detracting secondary features such as air conditioning plants or other mechanical equipment above or in front of the façade, and visible from the street.

Strengthening and Restoration

[230] J & R Heward (353.002)
[231] J & R Heward (353.002)

GS1 External strengthening – if external strengthening has to be used, either avoid the street façade or design strengthening structures as a visible and explicit design feature of the elevation. Do not obscure features such as windows.

GS2 Façade retention – For heritage and landmark buildings, retaining a building's street façade is preferable to its demolition. Where only the façade is retained, fit the new structure behind the façade features – reusing window and door openings. Keep the new structure below the façade height and give the visual appearance of retained floors.

Revell Street Heritage Character Area

GR1 Adapting existing historic buildings – when making additions, these should be on elevations not visible from the street and compatible with the architectural character of the building. Additions should not dominate the original building or contrast harshly with the original materials, building and roof form, proportions, colour or scale.

GR2 New Buildings - New buildings should be in sympathy with the historic building stock. Key aspects that will assist this are:

- Building to the street (footpath boundary)
- Above verandah having a horizontal parapet hiding the roof with a flat weatherboard cladding or similar flat fitting facing material facing the street
- The parapet should be simple with simplified or modern interpretation of existing detailing
- The verandah should extend the full width of the footpath
- Awnings are discouraged
- Shopfronts should be made of timber
- Entries should be recessed and angled
- The use of roller shutters, security grills or other forms of non-traditional additions to shopfronts should be avoided.

GR3 - New Two-storied buildings

- The first-floor design should have symmetrically located, discreet window openings matching the proportion of ground floor windows.
- Where there is no parapet, eaves should project beyond the face of the wall.
- The building can have a single or two-storied verandah.
- On the ground floor the building could have a shopfront matching the design guide or repeat the openings on the first floor.

Reefton Heritage Town Design Guidelines

1.0 Introduction

This document has been developed to provide guidance to those preparing and reviewing development proposals in the Reefton town centre. This guide seeks to achieve high quality building design that:

- Responds to the historical context
- Is visually interesting and in sympathy with the streetscape values
- Addresses cultural and built heritage values and design elements
- Creates a vibrant, active pedestrian environment

1.1 When does the Design Guide apply?

Under Te Tai o Poutini Plan rules within the Reefton Town Centre Zone, all new buildings and alterations to the exterior facade of existing buildings are ~~required~~ **encouraged**[232] to be assessed against these design guidelines. Where resource consents are required the Councils will use this guide to help assess and make decisions on those consent applications.

These guidelines however have been developed to support the wider heritage character of Reefton and developers of new buildings or those undertaking alterations of existing character buildings are encouraged to use them.

2.0 Reefton Heritage Town Design Guidelines

2.1 Context

The historic significance of Reefton and its heritage values is recognised by the registration of parts of Reefton as an historic area under the Historic Places – Pouhere Taonga Act. The main commercial street, Broadway, retains a number of mid to late nineteenth and early twentieth century buildings contributing to its late Victorian era mining town character.

Reefton has such high heritage and recreation values that retaining the existing heritage buildings is essential and any new buildings should be designed to be sympathetic with and enhance the existing character and values.

Within this design guide there are three main categories of building – each with a different approach to new building works.

- Historic buildings - these include listed historic heritage buildings [refer Schedule 1 of Te Tai o Poutini Plan] but also unscheduled historic buildings centred around Bridge St and Broadway such as the BNZ Bank, Broadway Supplies Building, Caples/Conlon Villa (Bellbird Motel), Homemakers Hardware Shop, Old National Bank, Wilson's Hotel and Hotel Reefton. These should be retained, with modifications kept to a minimum.
- Contributory buildings – these should be retained but can be modified to a greater degree in a sympathetic manner.
- Non-contributory – which are neutral or intrusive in the street and can be demolished or modified to be more in sympathy with the character of the street (a nod to the past).

Broadway Character

Broadway is a long wide, open street with single and two storied commercial buildings lining it. Generally the buildings that contribute positively to the character of Broadway

- Are built to the street boundary

[232] Foodstuffs (S464.053)

- Are rectangular with elongated or tall proportions
- Are designed based on early West Coast heritage styles
- Have tall horizontal or stepped parapets hiding the roof behind
- Have verandahs (although one or two do not and historically many did not)
- Are connected or are joined by fences on the street boundary
- Are long and narrow
- Are of different heights, with little or no alignment of parapets or shopfronts
- Are constructed of timber with timber shopfronts

Verandahs are of different designs:

- Unadorned or decorated posts
- With or without brackets
- With or without signage on the fascia
- With or without fascias
- With or without cheeks
- Skillion or bullnosed roofs

The shop front design of buildings contributing to the character of Broadway also has general level of consistency:

- A large display window which can be divided into large symmetrical panes particularly in the older shops
- Recessed or flat entries either to one side, or, for the older shops, centrally located
- A bulkhead, or base to the shopfront, which is panelled on the older shops

2.2 Design Guidelines

2.2.1 Historic buildings

1. **General Principles:** Generally visible external work should be limited to repairs, maintenance, restoration or reconstruction. Key principles are:

    - To maintain rather than repair

- To repair rather than replace
- If replacement is essential try and use materials that match the original as closely as possible (like for like)
- Use a date stamp so that replacements can be identifiable on close inspection.
- Restore original colour schemes where possible [Refer to Resene heritage colours for the period pre – 1920 and note this does not include blue].
- Painting the whole building one block colour as a "sign" to brand the building is not acceptable.

2. **Adaptation:** When adapting the exterior of a historic building:

- Retain, repair and maintain all significant external fabric
- Avoid removal or obscuring significant external fabric, elements and features
- Respect the style, form, planning, materials, craftsmanship, scale and patina of the building

3. **Additions:** When making additions, these should

- Be on elevations not visible from the street
- Avoid additions on significant elevations, including the roof
- Be compatible with the architectural character of the building
- Not dominate the original building
- Not contrast harshly with original materials, building and roof form, proportions, colour or scale
- Maintain the same orientation and proportions of building composition as the original
- If a large addition, be separate from the original building and follow the guidelines for new buildings

4. **New Elements:** Where removal or replacement of non-original elements is proposed try and restore or reconstrut the original elements.

5. **Strengthening** Strengthening work for earthquake protection should be installed on the interior or within the existing structure. Where this is not possible locate it away from the front elevation.

2.2.2 Contributory Buildings

1. **General Principles:** The general principles are similar to those of heritage buildings except that retention of original fabric on non-visible elevations is less important.

2. **Additions:** When additions are proposed, these should:

   - Be on elevations not visible from the street
   - Be compatible with the architectural character of the building
   - Not dominate the original building
   - Not contrast harshly with original materials, building and roof form, proportions, colour, or scale
   - Maintain the same orientation, proportions and rhythm of building composition as the original
   - If a large addition, be separate from the original building and follow the guidelines for new buildings
   - Not negatively affect the setting of or views to or from the building
   - Should be of a respectful new design based on a simplified modern interpretation of the original
   - Where the original verandah design is suspended or cantilevered from the wall, do not install “dummy” verandah posts.

2.2.3 Non-contributory buildings

Demolition is acceptable and encouraged when possible. The design guides for new buildings and for additions and alterations to existing buildings should be followed. Where additions and alterations are to be carried out, the intention is to design modifications to regain greater consistency with the existing significant and heritage buildings.

2.2.4 New single storied buildings

1. **Location**

- The building should be constructed up to the street (footpath) boundary
- Where the building does not extend the full width of the site there should be a fence from the building to the boundary.
- If there is an existing neighbouring building, it is acceptable to locate the new building against the existing building.

2. **Form**

- The building should be rectangular in plan and face the street
- The façade of the building should be rectangular with the proportion elongated or tall.

3. **Above verandah design**

- The building should have a horizontal parapet hiding the roof with a flat weatherboard cladding or similar flat fitting facing material facing the street,
- Where the building is to be constructed alongside an existing building, the parapet should be of a different height to the neighbouring building but no taller than existing Victorian or Edwardian buildings.
- The parapet for single story buildings should be between one-third to one half the total elevation height.
- The parapet should be simple with simplified or modern interpretation of existing detailing and not copy original detailing.

4. **Verandah**

- Buildings on Broadway are required to have a verandah (refer Plan rules) which should have a timber frame with a roof supported on timber posts

- The verandah should extend the full width of the footpath **Setback the verandah to allow clearance for taller vehicles**.[233]
- Awnings are discouraged.
- Cast iron filigree is discouraged.
- Non-alignment of verandahs with neighbouring buildings is encouraged.

5. Shopfront design.

- Shopfronts should be made of timber.
- Entries should be recessed and angled.
- In wide shops entries should be central, in narrow shops entries next to the side boundary wall is preferred.
- The stall board should be 300-600mm high,
- Windows should extend from the stall board to the underside of the verandah framing. The street pane should be divided vertically and horizontally with glazing bars.
- Recessed entry glazing should match the design of street glazing.
- The door should be glazed and panelled with a toplight.
- The use of roller shutters, security grills or other forms of non-traditional additions to shopfronts should be avoided.

6. Roofs

- The roof should be hidden behind a parapet. A pitch of between 30-45 degrees is ideal, with corrugated metal or timber shingles.

7. Materials

- Wall materials should be painted corrugated metal or timber weatherboard.
- Joinery should be timber

8. Corner buildings

- Corner buildings can be chamfered or square
- Parapets to corner buildings should return around the corner for the full length of the building.
- Entries to corner buildings should be at the corner.

9. Signage

- Signage on buildings should be symmetrical about the face of the element on which it is located and generally extend the full width.
- Signage in upper case lettering is encouraged.
- Signage should relate to the business or owner- not advertising products.
- Antique, Fat Clarendon, San serif lettering styles or similar are encouraged so as to give the impression of traditional hand sign writing.

[233] Kirsty Dittmer (S412.001)

- Other acceptable styles are Tuscan, Fat -faces, Fat Italics, Fat Gothic and Sans Serif compressed.

10.Fencing

- Fencing should be sympathetic to the era.

11.Colours

- Colours should be taken from the Resene or Aalto Heritage colour chart and be a three or four colour scheme. Note these should be the pre-1920s colours.

12.Lights

- Lighting should highlight the architectural character and lighting under the verandah is encouraged.

2.2.5 New two-storied buildings

- The first-floor design should have symmetrically located, discreet window openings matching the proportion of ground floor windows.
- Where there is no parapet, eaves should project beyond the face of the wall.
- The building can have a single or two-storied verandah.
- On the ground floor the building could have a shopfront matching the design guide or repeat the openings on the first floor. One of the openings should be a door and this can be wider than other openings.

Westport/Kawatiri Town Centre and Mixed Use Zone Urban Design Guidelines

1.0 Introduction

This document has been developed to provide direction to those planning, design and reviewing development proposals in the Westport/Kawatiri town centre and new mixed use area. This guide seeks to achieve high quality building design that:

- Responds to the context
- Is visually interesting and in keeping with the streetscape values
- Addresses cultural and built heritage values and design elements
- Creates a vibrant, active pedestrian environment
- Incorporates new and innovative design where appropirate
- Takes into account Poutini Ngāi Tahu values.

1.1 When does the Design Guide apply?

Under Te Tai o Poutini Plan rules, all new buildings within the Westport/Kawatiri Town Centre Zone and Mixed Use Zone are ~~required~~ **encouraged**[234] to be assessed against these design guidelines. Where resource consents are required the Councils will use this guide to help assess and make decisions on those consent applications.

[234] Foodstuffs (S464.055)

2.0 Westport/Kawatiri Design Guidelines

2.1 Context

Connection with the Natural Environment

The Buller/Kawatiri River provides a natural edge to the town centre and a link to its cultural heritage and the Kawatiri River Trail. Improving access to the Buller/Kawatiri River is important. Victoria Park lies directly behind the town centre - visual and access links through to Victoria Park should be improved.

Existing built character

Palmerston Street retains a mixed collection of nineteenth and early twentieth century buildings and architecture/building methods of this period. This represents an important part of the historic heritage resource of the Buller and West Coast.

The following design elements that contribute positively to the character of the town are identified as:

- Building edge – buildings are often built to the street boundary.
- Continuous façade – buildings tend to abut one another creating a sense of enclosure
- Human scale – buildings give a sense of human scape at the publicly occupied edges. They contain proportions, textures and physical elements that fit with the size of people.
- Prominent corner buildings – corner buildings are often taller than the adjoining buildings. This additional height helps define the edge of a block and create a visual anchor point.
- Verandahs of similar heights and shapes with decorative poles – this is a key feature in Palmerston Street which provides shelter for pedestrians.
- Visual interest – although commonalities exist between buildings, each building expresses an individual character
- Active frontage – windows exist on all floor levels of a building's façade

Poutini Ngāi Tahu Cultural Landscape

Many buildings within the town centre reflect Westport/Kawatiri's colonial and settler history, however there is limited representation of a much longer Poutini Ngāi Tahu history. Poutini Ngāi Tahu culture and identity highlight the West Coast's point of difference in the world and offer design opportunities for the future. Westport/Kawatiri is entirely within the takiwa of Te Rūnanga o Ngāti Waewae and they are the key Poutini Ngā Tahu contacts for designers of buildings in Westport/Kawatiri.

The guidelines in Section 2.2 are based on the Ngāi Tahu Subdivision and Development Guidelines, which are a set of urban design principles founded on core Maori cultural values and designed to provide practical guidance for enhancing outcomes for the design environment. These principles have arisen to enable greater iwi and hapū presence, visibility and participation in the design of the physical environment.

The use of Poutini Ngāi Tahu design guidelines is predicated on the development of high-quality durable relationships being developed between Te Rūnanga o Ngāti Waewae, their mandated

design professionals, developers and the Council. Robust relationships between these groups provide opportunities for unlocking a rich store of design potential.

2.2 Guidelines

Context

GC1 Complement the ~~existing~~ **bulk and form of the existing** built context ~~with visual links through similarity of overall bulk and form. New development should attempt to complement, improve and enhance the setting of individual buildings or groups of buildings listed as heritage items in Te Tai o Poutini Plan.~~ New buildings/structures **which immediately adjoin scheduled heritage items** shall **aim to** complement and support, rather than dominate these listed buildings.[235]

GC2 Take into account the wider surroundings, including natural features, such as views to ~~buildings,~~ the mountains and the river.[236]

Poutini Ngāi Tahu Cultural Landscapes

IW1 Mana/authority – The development of a high-level relationship with Te Rūnanga o Ngāti Waewae is essential prior to commencing design approaches which will maximise the opportunities for design outcomes. A cultural landscape approach is the most appropriate means to identify, assess and manage the potential effects of subdivision and development on cultural values and significant sites.

IW2 Te Reo, whakapapa/naming – Consultation with Te Rūnanga o Ngāti Waewae on the use of correct ancestral names, including macrons, and the recognition of traditional place names in keeping with the mita (pronunciation of language) of Poutini Ngāi Tahu through signage, wayfinding, street names in new subdivisions and names of public buildings, parks and places.

IW3 Tohu/landmarks – Significant wider cultural landmarks (including wāhi tapu, maunga, awa, puna, mahinga kai and ancestral kāinga) and associated narratives are acknowledged in the spatial orientation and layout of any new development, allowing visual connection to significant sites to be created, preserved and enhanced.

IW4 Taiao/environment – Landscape design includes a selection of indigenous plant and tree species where possible and reflects cultural perspectives, ideas and materials. Indigenous biodiversity objectives should be incorporated into development plans and indigenous species used for street trees, open space and reserves, native ground cover species for swales and stormwater management.

IW5 Mauri Tū/environmental health - Use of land - based treatment of wastewater, rainwater collection systems, grey-water recycling systems, stormwater treatment, passive solar design, and hard landscape and building materials which are locally sourced and of high cultural value to Poutini Ngāi Tahu are explored in the design process.

IW6 Mahi Toi/creative expression –**When** Poutini Ngāi Tahu narratives are ~~creatively~~ reinscribed through architectural ~~design~~ and building **design**, integrated artwork**.** ~~and~~ Te Runanga o Ngāti Waewae mandated design professionals and artists are appropriately engaged in **this** ~~such~~ process~~es~~.[237]

[235] Kirsty Dittmer (S412.001)
[236] Kirsty Dittmer (S412.001)
[237] Kirsty Dittmer (S412.001)

IW7 Ki uta ki tai/from the mountains to the sea. Opportunities are explored through partnership engagement with Poutini Ngāi Tahu to reflect the Poutini Ngāi Tahu view of the environment and resource management. Ki uta ki tai is a traditional concept representing kaitiakitanga from the mountains and inland lakes, down the rivers to hapua/lagoons to the sea. Kaitiakitanga reflects the special relationship Ngāi Tahu has with its environmental heritage. It is fundamental to the tribe's culture and identity. Ki uta ki tai encapsulates the need to recognise and manage the interconnectedness of the whole environment.

Built Form

BF1 Mass/Scale -New buildings shall relate to the scale of adjacent buildings. Where very wide buildings are proposed, their bulk and width shall be reduced by dividing the façade up ~~by vertical divisions into several smaller "storefronts"~~ **visually smaller vertical forms**. Windows and doors and other architectural details shall be used to reduce the mass of structures. Where a building over three stories is proposed, the section above three stories shall be stepped back from the line of view from the street.[238]

~~*This long low building shape should be avoided. This building also lacks windows and has limited design features and detail to add interest to the building. The buildings colours are also very out of character with other buildings in the vicinity and are part of a sign to brand the building.*~~[239]

BF2 Location to front – Buildings are to be positioned so their front walls abut the (footpath) boundary

BF3 Continuity – on Palmerston Street buildings are to extend across the full width of the site frontage to ensure that the street's "built" edge is continuous. Exceptions to the continuous frontage are for walking access connections and outdoor dining areas/courtyards. Beyond Palmerston Street, maintaining a continuous frontage is still encouraged to maintain a sense of enclosure, however it is not essential.

BF4 Height – New buildings should appear similar in height to the existing neighbouring buildings.

Any upper floor areas visible in the layout of the façade should be potentially usable space rather than a false façade.

BF5 Corner buildings. Buildings on corners and main junctions are highly visible which means that building design is especially important. Buildings on corners are encouraged to be visually emphasised with architectural elements such as taller forms, or parapets.

[238] Kirsty Dittmer (S412.001)
[239] Martin and Co Westport Ltd and Lumberland Building Market Westport (S543.002)

This building expresses well to the corner with the second story providing height, and the door facing into the corner.

This building was not built with any corner features to emphasise its position. The more recent sign and verandah modifications have tried to address its corner position.

BF6 Roofs– Westport/Kawatiri has a variable range of rooflines with some below the height of the parapet and others pitched and visible from the street. Either is acceptable.

Roofline hidden behind parapet

Mixed rooflines

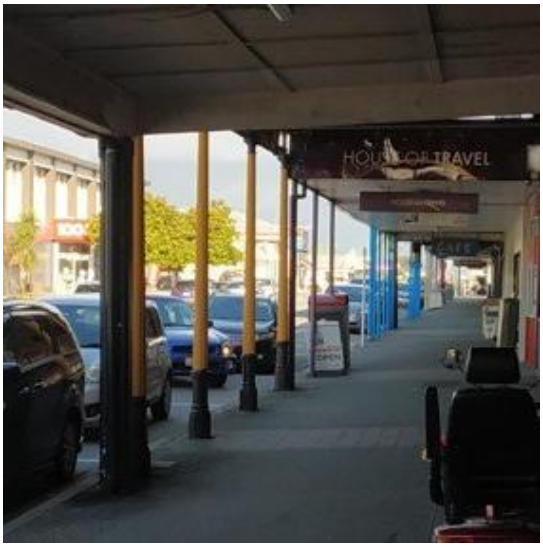
GF1 Openings – Buildings are to have windows on all street facades with minimum 50% glazing as specified in the relevant rules. Main doors at ground level are to be oriented to the street (i.e., not at the side or the back). Entrances shall be wide enough to accommodate wheelchairs and pushchairs. Buildings that have more than one frontage (i.e., corner) are to include windows and doors on both facades if there is sufficient length of frontage. The design of side and back elevations

that are visible from the street or any other public space should be consistent with the design of the main building frontage.

GF2 Visual permeability – The ground floor window area of buildings (including glazed doors) in Palmerston Street must be no less than 50% of the frontage in the Town Centre Zone. ~~On all facades, fully glazed facades will not be permitted unless there are vertical solid breaks at frequent intervals.~~ The glazing is not to be blocked out with opaque or reflective film, or other treatment that obscures the visual connection from the outside into the building.[240]

GF3 Office/Commercial Activity – where the ground floor is used for offices/commercial activity on Palmerston Street, the display area immediately behind the windows should be designed as reception and waiting areas.

GF4 Shop fronts and entries – Building entries and shop fronts in Palmerston Street should be glazed and entries recessed. This allows pedestrians to stop and view the display area and gives depth to the entrance. Glazed areas should be partitioned with glazing bars rather than single sheet/plate glass display windows.



Window facades with glazing bars are a typical feature of the Westport shop frontages.

GF5 Verandah/canopy/balcony -Verandahs are a requirement on Palmerston Street and are subject to performance standards in the rules. Verandahs should:

- Complement the style of the building to which they are attached
- Extend over the footpath and full width of the building frontage. **Setback the verandah to allow clearance for taller vehicles.**[241]
- Include decorative poles where possible
- Take cues from neighbouring verandahs in terms of height, proportion and style, whilst allowing for variation in design features
- Not obscure windows or architectural details
- Verandahs on corner buildings should wrap around the building and extend the full width of both frontages.

[240] Kirsty Dittmer (S412.001)
[241] Kirsty Dittmer (S412.001)

Decorative Street Poles from the verandahs give a sense of safety and enclosure and are a particular character of Westport town centre

GF6 Articulation and Detail – building facades should **achieve visual interest to support the pedestrian experience. This may** include articulation and detailing~~. Façade articulation may include~~ setbacks, projected bays, balconies**, and fencing and landscaping** ~~etc~~. Building facades should have detail and depth and not be on a flat plane.[242]

GF8 Material and Colour – **use materials, texture and colour to highlight the building's form and details** ~~building colours, whether a painted finish or natural materials should highlight features~~ such as joinery, decoration or repetition of the building form

- ~~Use colours that are consistent with the existing range of colours in the town centre.~~
- ~~Side and rear walls should be painted in the same colours as the building's main façade. Side and rear walls also provide an opportunity for murals to be painted. In these cases colours can deviate from the building's main façade.~~
- ~~Bright colours designed to call attention to the building are not acceptable~~
- ~~Painting the whole building one block colour as a "sign" to brand the building is not acceptable.~~[243]

Colour has been used successfully on this building to highlight window details, the entrance and detailed lines on the building. The colours are in keeping with a traditional heritage palette ***suitable for other buildings in the town centre.***[244]

[242] Foodstuffs (464.005)
[243] J & K Dickson (S213.002), R Burdekin (378.008), J Heward (S535.002)
[244] J & K Dickson (S213.002), R Burdekin (378.008), J Heward (S535.002)

~~*Colour has been used inappropriately on this building. It does not fit with the character of the town and also is used to brand the building for sale of a particular product*~~. ***The colours on this building are very bold and not consistent with other building colours in the vicinity.***[245]

GF9 Lighting – Buildings can have lighting to highlight building façade features and provide under verandah light to the footpath. Choose lighting fixtures in a style that is appropriate to the building and not susceptible to vandalism.

GF10 Outdoor dining areas. – These are encouraged on footpaths adjoining buildings within the town centre to give vitality and encourage occupation of the street. The location, size and layout needs to take into account public access, pedestrian circulation and the safety of patrons and motorists.

GF13 Mechanical equipment – Maintain the integrity of the general form of the building by avoiding detracting secondary features such as air conditioning plants or other mechanical equipment above or in front of the façade, and visible from the street.

Strengthening and Restoration

GS1 External strengthening – if external strengthening has to be used, either avoid the street façade or design strengthening structures as a visible and explicit design feature of the elevation. Do not obscure features such as windows or modulation.

GS2 -Façade retention – For heritage and landmark buildings, retaining a building's street façade is preferable to its demolition. Where only the façade is retained, fit the new structure behind the façade features – reusing window and door openings where possible. Keep the new structure below the façade height and give the visual appearance of retained floors.

7. NEIGHBOURHOOD CENTRE ZONE

7.1. Neighbourhood Centre Zone Rules

Submissions and Further Submissions

728. One submission point relating generally to the **NCZ Rules** was summarised in a Table on page 129 of the S42A Report. The submission sought amendments to the rules.

729. Five submission points relating to **NCZ-R1** were summarised in a Table on pages 130-134 of the S42A Report. One submission point supported the retention of the rule as notified. Four submission points sought amendments.

[245] J & K Dickson (S213.002), R Burdekin (378.008), J Heward (S535.002)

730. Two submission points and one further submission relating to **NCZ-R2** were summarised in a Table on page 136 of the S42A Report. One submission point supported the retention of the rule as notified. One submission point sought amendments.

731. One submission point relating to **NCZ-R3** was summarised in a Table on page 137 of the S42A Report. The submission point supported the retention of the rule as notified.

732. Eight submission points and one further submission relating to **NCZ-R4** were summarised in a Table on pages 137-138 of the S42A Report. Three submission points supported the retention of the rule as notified. Four submission points sought to delete the rule, and one submission point sought amendments.

733. One submission point relating to **NCZ-R5** was summarised in a Table on page 139 of the S42A Report. The submission point supported the retention of the rule as notified.

734. One submission point relating to **NCZ-R6** was summarised in a Table on page 139 of the S42A Report. The submission point supported the retention of the rule as notified.

735. Five submission points relating to **NCZ-R7** were summarised in a Table on page 140 of the S42A Report. One submission point supported the retention of the rule as notified. Four submission points sought it be deleted.

736. One submission point relating to **NCZ-R8** was summarised in a Table on page 141 of the S42A Report. The submission point supported the retention of the rule as notified.

737. Two submission points relating to **NCZ-R9** were summarised in a Table on page 141 of the S42A Report. One submission point supported the retention of the rule as notified. One submission point sought amendments.

738. One submission point relating to **NCZ-R10** was summarised in a Table on page 142 of the S42A Report. The submission point supported the retention of the rule as notified.

739. Two submission points relating to **NCZ-R11** were summarised in a Table on page 143 of the S42A Report. One submission point supported the retention of the rule as notified. One submission point sought amendments.

740. Five submission points relating to **NCZ-R12** were summarised in a Table on page 144 of the S42A Report. One submission point supported the retention of the rule as notified. Four submission points sought it be deleted.

741. One submission point relating to **NCZ-R13** was summarised in a Table on page 144 of the S42A Report. The submission point supported the retention of the rule as notified.

742. One submission point relating to **NCZ-R14** was summarised in a Table on page 145 of the S42A Report. The submission point supported the retention of the rule as notified.

743. The Panel adopts these summaries and has considered all the relevant submissions and further submissions.

Section 42A Report

NCZ – General- Overview

744. In response to the submission point made by Ngāi Tahu that sought to have Poutini Ngāi Tahu values considered as part of the urban environment and as part of controlled and restricted discretionary activities, Ms Belgrave noted that this is a common submission point across multiple hearing streams and for other zones in this stream. She reiterated her opinion regarding the previous zones and did not support the relief sought in the submission point.

745. The S42A report recommends that no amendments be made to the NCZ chapter in response to this submission.

NCZ – R1 Commercial Activities and Buildings, Community Facilities and Emergency Service Facilities

746. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified. The acknowledgement is subject to recommended amendments that arise from the other submission points.

747. Ms Belgrave reiterated her recommendations from previous zones in response to the submission point made by Waka Kotahi. The submission sought clarification on whether the rule's requirements should be considered performance standards. They requested that the performance standards under NCZ-R1 are included in a separate rule or relocated as standards. Ms Belgrave supported amendments to NCZ-R1 so that the rule applies to all new buildings, additions and alterations to existing buildings, external and heavy vehicle storage, and hours of operation. She recommended that these be transferred to a new rule to improve clarity and differentiate between NCZ-R1 and the new rule NCZ-R5A

748. In response to the submission point made by the Ministry of Education that sought to include education facilities as a permitted activity and that a restricted discretionary activity status applies to all non-compliances with the rule, Ms Belgrave supported the relief sought in part. She recommended including education facilities as a permitted activity in a new rule (NCZ-R4A), provided the activity does not exceed 250m² GFA. Ms Belgrave reiterated previous recommendations to retain a discretionary activity status for non-compliances for those standards where there is a greater range of potential effects on character and amenity, particularly to adjacent residential zones.

749. In response to the submission point made by Foodstuffs that sought to increase the permitted GFA for supermarkets to 1,000m², Ms Belgrave did not support the relief sought. This is because larger-scale activities may have potential effects, such as those associated with building bulk and scale, and the character and amenity of adjacent residential areas, which can be assessed through the resource consent process, particularly given the spatial extent and purpose of the NCZ.

750. Ms Belgrave supported the relief sought by FENZ to exclude vehicles associated with emergency service activities from the restrictions placed on the number of heavy vehicles stored on a site, which she recommended be included in the new rule NCZ-R5A.

751. Ms Belgrave acknowledged and recommended consequential changes to notified NCZ-R1.11 in response to a submission point by BDC that sought amendments related to when a written approval is obtained. Ms Belgrave reiterated the recommendations she made on the same matter for the other zones. That is to move the detail to an advice note.

752. Ms Belgrave recommended that NCZ-R1 is amended as follows:

NCZ-R1 New Buildings, External Additions or Alterations to Existing Buildings, and External Storage ~~Commercial Activities and Buildings, Community Facilities and Emergency Service Facilities~~

Activity Status Permitted

Activity status where compliance not achieved:

*Restricted discretionary where **~~standards~~** **rules** **~~9 to 11~~** **3 to 11** are not complied with.*

*Discretionary where **~~standards~~** **rules** 1-**2** **~~to 8~~** are not complied with.*

Where:

1. ***Education Facilities**, Community Facilities, Emergency Service Facilities, retail and office activities are a maximum of 250m2 gross floor area per activity provided;*

~~2. The activity does not include:~~

~~i. Drive through restaurants;~~

~~ii. Service stations;~~

~~iii. Motor vehicle sales;~~

~~iv. Yard-based retail activities;~~

~~v. Trade retail and trade suppliers; or~~

~~vi. Bars/taverns~~

…

5. *No more than one heavy vehicle is stored on the site, **excluding heavy vehicles ancillary to emergency service facilities**;*

…

10. *No building shall protrude beyond a building envelope defined by a recession plane as outlined in Appendix Two to commence 2.5m above any residential site boundary **~~except where the neighbouring property owner's written approval is provided to the Council 10 working days to the works commencing~~**. This standard does not apply to:*

…

Advice Note:

1. ***Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.***

~~2. The acoustic insulation requirements for noise sensitive activities set out in Rule NOISE – R3 also apply.~~

753. The S42A report also recommends the addition of a new rule as follows:

NCZ-R5A Commercial Activities and Buildings, Community Facilities, Education Facilities and Emergency Service Facilities

Activity status Permitted

Activity status when compliance not achieved:

Restricted Discretionary where standard 1 is not complied with

Non-complying where standard 2 is not complied with

Where:

1. ***All performance standards for Rule NCZ - R1 are complied with, and***
2. ***The activity does not include:***

i. Drive through restaurants;

ii. Service stations;

iii. Motor vehicle sales;

iv. Yard-based retail activities;

v. Trade retail and trade suppliers; or

vi. Bars/taverns

Advice Notes:

1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply

NCZ – R2 Minor Structures

754. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified. The acknowledgement is subject to recommended amendments that arise from the other submission points.

755. In response to the submission point made by FENZ that sought amendments to enable hose drying towers up to a maximum height of 15m, Ms Belgrave supported the relief sought in part. She agreed that the inclusion of a maximum height for hose drying towers under NCZ-R2 will provide helpful clarification. Ms Belgrave considered the requested maximum height of 15m to be inappropriate in this zone and instead recommends a height of 12m. She considered this appropriate, having regard to the maximum permitted building height of 10m within the NCZ, the spatial extent of the zone, the proximity of residential areas and that the establishment of emergency service facilities in the Zone will be limited.

756. Ms Belgrave acknowledged and recommended consequential changes to NCZ-R2.1 to refer to the relevant rule in NCZ-R1 that relates to the required setbacks for buildings and structures. She notes that this will achieve consistency with submission points made by BDC. The S42A report recommends that NCZ-R2 be amended as follows:

NCZ-R2 Minor Structures

~~All performance standards for~~ *Rule NCZ - R1****.9 is ~~are~~*** *complied with;*

…

5. Hose drying towers do not exceed 12m in height; and

…

However, we note that until the final form of NCZ-R1 is finalised, other rule numbers and cross-references will change.

NCZ – R3 Fences, Walls and Retaining Walls

757. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified.

758. The S42A report recommends retaining NCZ-R3 as notified.

NCZ – R4 Relocated Buildings

759. In response to the four submission points[246] that sought to delete NCZ-R4, Ms Belgrave supported the relief sought. She reiterated the reasons set out regarding the Relocated Building rules for the previous zones. She agreed with the submitters that the rule is unnecessary and creates duplication, as there is still a requirement to comply with the Building Act.

760. As a consequence of the recommendation to delete this rule, Ms Belgrave did not support the relief sought from the other four submission points to either amend or retain the rule.

761. The S42A report recommends that NCZ-R4 be deleted.

NCZ – R5 Residential Activities and Residential Units

762. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified.

763. Ms Belgrave recommended consequential changes to delete NCZ-R5.1, as the listed performance standards in NCZ-R5.1 are no longer relevant due to the recommended changes to NCZ-R1.

764. The S42A report recommends making consequential changes to NCZ-R5 as follows:

> ***NCZ-R5 Residential Activities and Residential Units***
>
> ***Activity status Permitted***
>
> *Where:*
>
> *1.* ~~***Performance standards 1, 3 and 6 of Rule NCZ - R1 are complied with***~~*;*
>
> *…*

NCZ – R6 Demolition of Buildings

765. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified.

766. The S42A report recommended retaining NCZ-R6 as notified.

NCZ – R7 Relocated Buildings not meeting Permitted Activity Standards

767. In response to the four submission points[247] that sought to delete NCZ-R7, and consequential to the recommendation to delete NCZ-R4, Ms Belgrave supported the relief sought.

768. As a consequence of the recommendation to delete this rule, Ms Belgrave did not support the relief sought from the other submission point to retain the rule.

769. The S42A report recommends that NCZ-R7 be deleted.

NCZ – R8 Demolition of Buildings not meeting Permitted Activity Standards

[246] Chris and Jan Coll (S558.007), Chris J Coll Surveying Limited (S566.007), William McLaughlin (S567.007) and Laura Coll McLaughlin (S574.007)

[247] Chris and Jan Coll (S558.008), Chris J Coll Surveying Limited (S566.008), William McLaughlin (S567.008), and Laura Coll McLaughlin (S574.008)

770. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified.

771. The S42A report recommends retaining NCZ-R8 as notified.

NCZ – R9 Commercial Activities and Buildings, Emergency Service Facilities and Community Facilities not meeting Permitted Activity Standards

772. Ms Belgrave acknowledged the support from Te Mana Ora of the rule as notified. The acknowledgement is subject to recommended amendments that arise from the other submission points.

773. In response to the submission point made by Foodstuffs that sought to increase the permitted GFA for supermarkets to 1,000m², Ms Belgrave did not support the relief sought for the same reasons as set out with respect to NCZ-R1.

774. Ms Belgrave recommended amendments to NCZ-R9 that are consequential to the amendments sought by the Ministry of Education to apply a restricted discretionary activity status to non-compliances under NCZ-R1. As such, Ms Belgrave recommended additions to the matters for discretion.

775. Ms Belgrave also recommended amending the title of the rule, which is consequential to the changes recommended to NCZ-R1.

776. The S42A report recommends making consequential changes to NCZ-R9 as follows:

> ***NCZ-R9 ~~Commercial Activities and Buildings, Emergency Service Facilities and Community Facilities~~ New Buildings and External Additions and Alterations to Existing Buildings not meeting NCZ-R1 ~~Permitted Activity Standards~~***
>
> ***Activity status Restricted Discretionary***
>
> *Where:*
>
> 1. ***~~The gross floor area is greater than 250m2 per activity but all other Performance Standards for 1- 8 for~~*** *Rule NCZ - R1**.1 and NCZ – R1.2** are complied with.*
>
> ***Discretion is restricted to:***
>
> ***~~a. Design and location of buildings;~~***
>
> ***~~b. Design and location of parking, loading and access areas; and~~***
>
> ***~~c. Landscape measures~~***
>
> ***a. Bulk, location and design of storage, buildings and structures;***
>
> ***b. Effects on the safety, amenity and attractiveness of the street or public places;***
>
> ***c. Visual dominance, privacy and shading, and nuisance effects on neighbouring sites; and***
>
> ***d. Materials being stored and the period of time for storage.***

NCZ – R10 Residential Activities and Residential Units not meeting Permitted Activity Standards

777. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified.

778. The S42A report recommends retaining NCZ-R10 as notified.

NCZ – R11 Commercial Activities, Community Facilities, Emergency Service Activities and Visitor Accommodation Activities not meeting the Permitted or Restricted Discretionary Activity Standards

779. Ms Belgrave acknowledged the support from Te Mana Ora that support the rule as notified. However, the acknowledgement is subject to the recommendation to delete the rule.

780. Ms Belgrave sets out that the recommendation to separate the notified version of NCZ-R1 into two rules (one for activities, and one for buildings), in response to the submission by Waka Kotahi, will ensure that the activities identified in NCZ-R11.2 will be non-complying if compliance is not met.

781. In response to the submission point made by Foodstuffs that sought to exclude expansions or redevelopment of supermarkets from NCZ-R11.1, Ms Belgrave partially supported the relief sought. Foodstuffs considers that a non-complying activity status for a supermarket exceeding 250m² is inappropriate. They noted that this would effectively render all supermarkets a non-complying activity due to the gross floor area restrictions. Ms Belgrave noted that there is an inconsistency between the notified versions of rules NCZ-R1 and NCZ-R11, where non-compliance with the GFA would be a discretionary activity in NCZ-R1 and non-compliant under NCZ-R11. She considered that a discretionary activity status is appropriate to evaluate potential effects associated with building bulk and scale in the NCZ and potential effects on the character and amenity of adjacent residential areas. Therefore, she recommended deleting NCZ-R11 and retaining NCZ-R1.

782. The S42A report recommends deleting NCZ-R11 as notified.

NCZ – R12 Residential Activities, Residential Units, Minor Structures, Fences, Walls, Retaining Walls and Relocated Buildings not meeting the Permitted or Restricted Discretionary Standards

783. Ms Belgrave acknowledged the support from Te Mana Ora of the rule as notified. However, the acknowledgement is subject to the recommendation to delete the rule. Ms Belgrave noted that a discretionary activity status for non-compliance with the relevant rules is already provided for under NCZ-R2, NCZ-R3, and NCZ-R10

784. As a consequence of the recommendation to delete this rule, Ms Belgrave partially supported the relief sought from the four submission points[248] to delete part of the rule heading.

785. The S42A report recommends that NCZ-R12 be deleted.

NCZ – R13 Industrial Activities

786. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified.

787. The S42A report recommends retaining NCZ-R13 as notified.

NCZ – R14 Any activity not provided for by another Rule in the zone

788. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified.

789. The S42A report recommends retaining NCZ-R14 as notified.

Hearing and Submitter Evidence

790. The legal submissions made by Ms Alex Booker on behalf of Foodstuffs reiterate the original submission to allow a 1,000m² GFA for supermarkets, and she continues to seek the requested

[248] Chris and Jan Coll (S558.009), Chris J Coll Surveying Limited (S566.009), William McLaughlin (S567.009), and Laura Coll McLaughlin (S574.009)

amendments to NCZ-R1 and NCZ-R9. She commented that a supermarket cannot operate with a GFA of 250m² or less.

791. Ms Booker does accept the S42A recommendation to delete NCZ-R11.

792. Mr George van Pelt tabled a letter at the hearing on behalf of FENZ. The letter accepts the S42A recommendation to NCZ-R1 as initially sought in the submission.

793. A letter from Ms Daly Williams on behalf of the Ministry of Education was tabled at the hearing. The letter does not explicitly refer to the NCZ rules, but it does accept the separation of COMZ-R1 into two rules (one for buildings and one for activities). It also continues to seek an exemption for educational facilities in reference to the advice note and the need to consider NOISE-R3. It is assumed that the same applies to the NCZ.

794. A letter from Ms Michelle Grinlinton-Hancock on behalf of KiwiRail was tabled at the hearing. The letter draws the Panel's attention to the fact that none of KiwiRail's submission points were allocated to this hearing stream. As a result, the S42A report did not address any aspect of the submission made by KiwiRail. Despite this, KiwiRail sought relief relating to building setbacks from the rail corridor in all zones. In the NCZ a setback of 5m is sought[249].

795. Ms Grinlinton-Hancock explains in the letter that KiwiRail seeks setback controls to appropriately manage the health and safety of communities and ensure the ongoing operation of KiwiRail's network, as it is nationally and regionally significant infrastructure. She sets out that a safety setback is critically important to enable landowners to safely access their properties, avoid significant safety risks, and protect the rail corridor from interference.

796. Despite not making any submissions on the rules of the NCZ, Ms Frida Inta presented a statement at the hearing offering views on the S42A recommendation. With respect to NCZ-R1, Ms Inta observed that, despite the reporting officer recommending separating activities from performance standards (as sought by Waka Kotahi), the S42A recommendation for the rule continues to refer to both. In particular, she suggests that references to vehicle storage and hours of operation be relocated to the new rule.

797. The evidence presented by Mr Jonathan Bhana-Thomson on behalf of the NZ Heavy Haulage Association reiterated the relief sought in the original submission to provide for relocated buildings as a permitted activity. The evidence sets out that the Association does not support the deletion of rules relating to relocated buildings.

798. Mr Bhana-Thomson's evidence sets out the process for relocating a building. It states that, in his experience, relocating a building generally involves less construction disturbance than on-site construction. Other benefits include lower labour costs and the reuse of existing buildings. Additionally, he advises that there is no requirement in the Building Act to complete the relocation or reinstatement of a building within a particular timeframe.

Reporting Officer Reply Evidence

799. Consequent to the separation of NCZ-R1 into two rules (one for building controls and one for activities) and in response to Waka Kotahi's submission and to Ms Inta's statement that was presented at the hearing, which sought to simplify plan provisions, Ms Belgrave supports several amendments to restructure and relocate standards between the relevant rules. This has resulted in amendments to all the Commercial and Industrial chapters. However, the

[249] As set out in evidence for Topic 1, to align with the road boundary setback rules.

wording and intent of the provisions have not changed through this process, and no new additions have been made to the requirements of the standards.

800. In response to the letter tabled by KiwiRail at the hearing, a joint right of reply has been prepared as the issues traverse various hearing streams. The joint right of reply agrees that a building setback from the rail corridor is appropriate in certain circumstances. As part of the consideration, the reporting planners have reviewed other plans, considered the variability of use (of the rail corridor) and the type of buildings/structures a setback should apply to. The planners also note that the railway designation is considerably wider than the railway line itself. Therefore, an effective buffer already exists between the railway activity and the adjacent private land. Additionally, the railway line is also generally parallel to the state highway.

801. Concerning the NCZ, the reporting planners do not support the relief sought by KiwiRail for a 5m building setback from the railway corridor. They consider that a 5m setback would have a significant impact on the land available for development and is excessive in this zone. Notwithstanding that the reporting planners consider it more efficient to manage relevant effects through the designation process, they recommend a rule to require new buildings to be set back 1.5m from the railway corridor. The rule should exclude accessory buildings and structures. The recommended wording is as follows:

NCZ-R1

4. *Any building or structure, **excluding buildings for residential activities and residential units**, is set back:*

   iv. ***1.5m from the railway corridor boundary, excluding accessory buildings and structures***

5. *Buildings for residential activities and residential units, are set back:*

   ii. ***1.5m from the railway corridor boundary, excluding accessory buildings; and***

802. In response to the evidence presented by Mr Bhana-Thomson on behalf of the NZ Heavy Haulage Association, Ms Belgrave reconsidered the rules for relocated buildings in the COMZ, MUZ and NCZ. She also considered recommendations made for similar rules in the Residential Zones. Ms Belgrave understands that the purpose of the permitted activity standards for relocatable buildings is to manage potential amenity effects generally associated with achieving an acceptable exterior building quality within a specified timeframe.

803. On the understanding that the purpose of NCZ-R4 (and similar rules in COMZ and MUZ) is to address amenity effects, particularly through standards that require the timely completion of building works, Ms Belgrave agrees that the standards can address the existing concerns regarding relocatable buildings and their visual appearance. Furthermore, she considers that a permitted activity status (and compliance with the relevant standards) will encourage redevelopment and revitalisation within the relevant Commercial and Mixed Use zones.

804. Ms Belgrave recommends it is appropriate to retain NCZ-R4 for relocated buildings (with minor amendments to Standard 2, consistent with the NZ Heavy Haulage Association submission). She notes that this is also consistent with the recommendations in the Residential Zone hearing stream.

805. The recommended wording is as follows:

NCZ-R4 Relocated Buildings

Activity Status Permitted

Where:

1. *All performance standards for Rule NCZ - R1 are complied with;*
2. *Any relocated building intended for use as a dwelling must have been designed, **~~and~~** built**, and ~~to be~~** used as a dwelling;*
3. *A building pre-inspection report shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the reinstatement works shall be completed within a 12 month period;*
4. *The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site; and*
5. *All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.*

806. Consequent to the above recommendation to retain NCZ-R4, Ms Belgrave also recommends retaining NCZ-R7. She recommends additions to the matters of control that respond to Mr Bhana-Thomson's letter.

807. The recommended wording is as follows:

NCZ-R7 Relocated Buildings not meeting Permitted Activity Standards

Activity Status Controlled

Where:

1. *All performance standards for Rule NCZ - R1 are complied with.*

Matters of control are:

d. *Design and location of structures;*

e. *Landscape measures; and*

f. *Appearance of buildings **and the completion of any building reinstatement works identified in a building inspection report***

808. In response to the discussion during the hearing regarding Airbnb, Ms Belgrave reviewed the S32 report on the Commercial and Mixed Zones. She did not identify any specific issues relating to them. Notwithstanding, she did identify a need to reinforce a hierarchy of West Coast centres that are suitable for visitor accommodation.

809. Additionally, she identified an error in the NCZ chapter where, as notified, NCZ-R11 provides for visitor accommodation activities that do not meet the permitted standard. However, there is no permitted standard for visitor accommodation in the NCZ. Furthermore, it is recommended that NCZ-R11 be deleted to reduce duplication across the rules. At the time of the hearing, the rules did not provide for visitor accommodation in the NCZ, and so visitor accommodation would default to a non-complying activity under NCZ-R14.

810. Ms Belgrave considers it relevant to provide for visitor accommodation as a permitted activity in the NCZ, subject to performance standards, similar to those in the COMZ, MUZ and TCZ. She has therefore recommended a new rule to make provision for this. The recommended wording is as follows:

NCZ-R5A Visitor Accommodation

Activity Status Permitted

Where:

1. *The visitor accommodation is located*
    i. *In a Heritage Building listed in Schedule One; or*
    ii. *Above street level; or*
    iii. *At street level but with no frontage to public open spaces or streets except for access*
2. *Any space designed for waste management, whether private or communal, shall not be located between the road boundary and any building, and shall be screened from adjoining sites, roads and adjoining outdoor living spaces by screening of the waste management area to a height of 1.5 metres;*
3. *Visitor accommodation entrances shall be clearly separated and distinguished from commercial entrances; and*
4. *The principal residential accommodation entrance shall be provided directly from a public street or open space.*

Advice Note

1. *The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.*

Activity status where compliance not achieved: *Discretionary*

811. Overall, Ms Belgrave considers that the pTTPP includes several provisions that adequately manage the potential design and amenity effects of Airbnb and visitor accommodation.

812. The right of reply considers the question of whether there are provisions in the NCZ that will create opportunities for greater residential development. Ms Belgrave identifies rules NCZ-R1 and NCZ-R5 that provide for new buildings and residential activities in existing buildings as permitted activities. She comments that these permitted standards will encourage residential development by removing costs associated with the resource consent process.

813. The right of reply considers the letter tabled by Ms Williams on behalf of the Ministry of Education, and specifically the relief sought to include an exclusion from the noise provisions for education facilities. Ms Belgrave maintains her view that such an exclusion is not necessary. She does not consider it efficient to reiterate the exclusions that apply to designations, and that if education facilities are established outside of a designated site, then the noise provisions should be relevant for consideration.

Hearing Panel's Evaluation

Overview

814. In relation to the Overview, the Panel agrees, for the reasons provided by Ms Belgrave, that no amendments to the Overview are required and recommends that the Overview be retained as notified.

NCZ-R1

815. In relation to NCZ-R1, Ms Belgrave recommends many amendments to that rule, as well as creating a new rule and recommending additional changes to other rules. We have carefully

considered the scope available to support making those amendments. We consider the Waka Kotahi submission s450.220 to provide sufficient scope. We note the submission seeks to;

Amend the rule to clarify the intent of the rule as to whether these are considered as performance standards, and if so, a new separate rule should be created for the activities listed in the heading, or move the standards for the zone into a separate standards table, with all rules referring to those standards.

816. In particular, we consider that part of the Waka Kotahi submission, which addresses moving the standards for the zone into a separate table with all rules referring to those standards, provides significant flexibility in moving standards from the various rules. We agree with her that her reply recommendations do not alter the intent of the rules, nor does the shifting of multiple standards between the rules make complying with the rules more onerous.

817. In reaching our recommendations, we have given more weight to the Waka Kotahi submission than to the evidence provided by Ms Inta at the hearing. We do accept, though, that the evidence did reference the Waka Kotahi submission, and it was critical that the Officer had not recommended sufficient changes to give effect to that submission. Additionally, Ms Initas' own submission, albeit a general one, sought to simplify Plan provisions, and to a limited extent, we rely on that submission to support our recommendations set out below.

818. Taking into account the above and Ms Belgrave's reasons, particularly those in her reply, we recommend that NCZ-R1 be amended as set out below, including the removal of standards to other rules and the addition of standards from different rules, as well as including new rules.

819. Given the issue addressed in submissions from Foodstuffs, we record that we agree with Ms Belgrave that the maximum gross floor area for a supermarket should be 250 m², even though that standard ultimately resides in NCZ-R4A.

820. The Panel agrees with Ms Belgrave's recommendation and supporting reasons to reposition advice note 2 to another rule consequent upon the recommended changes to NCZ-R1 and the transfer of notified standards between rules, noting this repositioning of advice notes occurs in the equivalent rules in COMZ, MUZ, and TCZ chapters.

NCZ-R2

821. In relation to NCZ-R2, the Panel agrees with Ms Belgrave's recommendation, for the reasons she provides, to include a new standard 5. relating to hose drying towers as sought by Fire and Emergency. We agree with the consequential amendment to standard 1. arising from the recommended amendments to NCZ-R1 for the reasons Ms Belgrave provides.

NCZ-R3

822. In relation to NCZ-R3, the Panel agrees with Ms Belgrave's recommendation, for the reasons she provides, that this rule be retained as notified.

NCZ-R4

823. In relation to NCZ-R4, the Panel agrees with Ms Belgrave's recommendation, as outlined in her reply, paragraphs 100 to 115, to reverse her earlier recommendation to delete this rule and retain it, including other notified rules for this zone related to relocated buildings.

824. However, The Panel records that we have already addressed relocated buildings in other chapters in the Plan. Ms Easton, as reporting for those other chapters has already provided revised wording for the rules dealing with relocated buildings. We consider we should utilise her wording for Plan consistency while at the same time addressing the submission of New Zealand Heavy Haulage Association. The full discussion on this issue is covered in the Settlement chapter recommendation.

New Rule

825. In relation to NCZ-4A, the Panel agrees with Ms Belgrave's recommendations to amend this rule, which are consequential on the amendments to NCZ-R1. We agree with the recommendation to include Education facilities up to a maximum of 250m^2. In relation to the inclusion of education facilities, we note that the purpose of the NCZ is to serve surrounding residential areas by providing for the day-to-day needs of residents. In our view, the location of small-scale education facilities, such as childcare services, within the NCZ is appropriate and will have comparable effects to community facilities, which are provided for as a permitted activity. The remaining amendments to this rule result from the relocation of standards previously included in NCZ-R1 at the time of notification. We agree with Ms Belgrave's recommendations and her reasons to relocate them to this rule.

826. The Panel notes however that we have had to address the activity status cascade of as a result of these amendments which has resulted in the Commercial Activities, Community Facilities, Education Facilities and Emergency Service Facilities defaulting to discretionary and/or non-complying depending on which standards are not met. We have identified a particular concern with the non-complying status which is driven from the notified Plan – in short, the notified Plan contained a major error in that a list of activities in NCZ-R1 - Standard 2 defaulted to discretionary and then straight to non-complying. We consider this major error has had flow on effects in Ms Belgrave's assessment which has not been identified. We also note that there is very little within the policy framework which would support a non-complying status for these activities.

827. On the basis of the above, the Panel considers that the activities in notified NCZ-R1 - Standard 2 should default to discretionary status and we recommend this amendment.

*NCZ-R*5

828. In relation to NCZ-R5, the Panel agrees with Ms Belgrave's recommendations and the reasons for them, which result from recommended amendments to NCZ-R1 and relocation of standards between this rule and NCZ-R1.

New Rule

829. In relation to NCZ-R5A, the Panel agrees with Ms Belgrave's recommendation and her reasons to include a new rule addressing visitor accommodation. She noted that visitor accommodation is permitted in the COMZ R1 as notified and in COMZ-R5A as recommended, permitted in the MUZ at R5, and in the TCZ as per rule 8. She advised that it was an error to notify the NCZ chapter, as NCZ-R11 provided for visitor accommodation that did not meet permitted activity standards, but there were no notified rules providing for visitor accommodation as a permitted activity. She further informed us that the intention is to delete NCZ-R11 due to duplication, with the result that NCZ-R14 would apply to visitor accommodation with a status of non-compliant. Including a permitted activity status rule for

visitor accommodation would result in a consistent approach to that activity across NCZ, COMZ, MUZ, and TCZ, which would be appropriate.

NCZ-R6

830. In relation to NCZ-R6, the Panel agree with Ms Belgrave's recommendation and her reasons for recommending this rule be retained as notified.

NCZ-R7

831. In relation to NCZ-R7, the Panel agrees with Ms Belgrave's recommendation and her reasons detailed in her reply at paragraphs 110 to 115 that retaining this rule in the NCZ and in COMZ and MUZ, however we did not agree with the amended matters of control, in particular to ensure completion of building reinstatement works. We have amended the matters of control to include landscape mitigation and to refer to the reasons for non-compliance with Standards 3 and 4 of NCZ-R4 as a matter of control.

NCZ-R8

832. In relation to NCZ-R8, the Panel agrees with Ms Belgrave's recommendation and her reasons for it that this rule be retained as notified.

NCZ-R9

833. In relation to NCZ-R9, the Panel agrees with Ms Belgrave's recommendation and her reasons for it that this rule be amended consequent to the amendments sought by the Ministry of Education (S456.036) to apply a restricted discretionary activity status to non-compliances with NCZ-R1. Similar to the COMZ and MUZ, we consider that the following matters of discretion will ensure that the relevant effects of non-compliance with the rules under NCZ-R1, excluding infringements to maximum gross floor area and building height and the activities not provided for, can be addressed through the resource consent process:

- Bulk, location, and design of storage, building and structures;
- Effects on the safety, amenity and attractiveness of the street or public places;
- Visual dominance, privacy and shading, and nuisance effects on neighbouring sites; and
- Materials being stored and the period of time for storage.

834. We support the recommendation to delete the notified clauses a to c and replace them with the above assessment matters. Consequently, we also recommend that NCZ-R9 be applied to new buildings and external additions and alterations to existing buildings not meeting NCZ-R1. This recommendation results in an amendment to the rule heading.

New Rule

835. In regard to NCZ-R9A, the Panel agrees with Ms Belgrave's recommendation and her reasons for adding this new rule. Effectively, this new rule serves as the default rule when NCZ-R5A is not complied with, drawing on NCZ-R9 and NCZ-R4 for the relevant matters.

NCZ-R10

836. In regard to NCZ-R10, the Panel agrees with Ms Belgrave's recommendation, and her reasons for it, to retain this rule as notified, with the exception of adding the word '*building*' to clause 3. Immediately after the word maximum and before the word height so as to ensure rule clarity. We accept this recommendation as a clause 16 amendment.

NCZ-R11

837. In regard to NCZ-R11 (now NCZ-R14), the Panel notes Ms Belgrave's recommendation within her s42A is to delete this rule to simplify the NCZ chapter, as a discretionary activity status for non-compliance with the relevant rules is already provided for under NCZ-R2, NCZ-R3, and NCZ-R10. However, we disagree and recommend retaining this rule to ensure consistency across the Plan, where a default rule is provided.

838. The Panel also note that Education Facilities was missing from the original rule and we have added it in as a Clause 16(2) of the RMA recommendation.

839. The Panel has also deleted reference to the list of activities previously referred to and contained in new NCZ-R5. We consider the way the rules are now structured referencing these activities is unnecessary because the default activity status in Rule NCZ-R5 for these activities is discretionary.

NCZ-R12

840. In regard to NCZ-R12 (now NCZ-R15), the Panel again notes Ms Belgrave's recommendation within her s42A is to delete this rule to simplify the NCZ chapter, as a discretionary activity status for non-compliance with the relevant rules is already provided for under NCZ-R2, NCZ-R3, and NCZ-R10. However, we disagree and recommend retaining this rule to ensure consistency across the Plan, where a default rule is provided.

NCZ-R13

841. In regard to NCZ-R13 (now NCZ-R17), the Panel agrees with Ms Belgrave's recommendation, and her reasons for it, as detailed in her s42A, to retain this rule as notified.

NCZ-R14

842. The Panel acknowledges that NCZ-R14 (now NCZ-R16) is a 'catch-all' rule intended to manage activities not specifically provided for in the other rules. The Panel has considered this matter plan-wide and we agree with the submitters that such rules are better placed as discretionary; otherwise, they are unnecessarily limiting in our view and could have unforeseen consequences. Therefore, it is our recommendation to relocate this rule to the discretionary section of this chapter.

Hearing Panel's Recommendation

843. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part and recommends the following changes to the **Neighbourhood Centre Zone Rules**:

Neighbourhood Centre Zone

Overview

The NCZ - Neighbourhood Centre Zone provides for a range of small-scale commercial, retail and community activities that provide for day-to-day needs of the surrounding residential neighbourhood. Neighbourhood Centres provide a limited range of services, employment and living opportunities at a scale appropriate to the residential neighbourhood they are located in. In general, Neighbourhood Centres are of low to medium density.

Neighbourhood Centres are generally located near the street edge, sometimes with verandahs and retail display windows along the frontage. Typically, buildings are 1-2 storeys high. Parking is usually available on the street.

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities, in the Neighbourhood Centre Zone including:

- **Transport** - the Transport Chapter contains provisions in relation to transport matters, including traffic generation TRN - R12.
- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters** - there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Neighbourhood Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.
- **Natural Hazards** - in Westport/Kawatiri, Reefton, Hokitika and Greymouth/Māwhera there are areas of natural hazards and in some locations these may affect areas in the Neighbourhood Centre Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards Chapter.
- **Subdivision** - The Subdivision Chapter sets out the requirements for the development of new infrastructure and connections as part of subdivision activities.
- **Financial Contributions** - The Financial Contributions Chapter sets out the requirements for contributions of costs for activities which impact on infrastructure.
- **General District Wide Matters** - provisions in relation to Noise, Light, Signs, Temporary Activities and Earthworks in particular may be relevant to activities in the Neighbourhood Centre Zone.

Neighbourhood Centre Zone Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity is provided in General Approach.

Permitted Activities

NCZ - R1	**New Buildings, External Additions and Alterations to Existing Buildings ~~Commercial Activities and Buildings, Community Facilities and Emergency Service Facilities~~**[250]

Activity Status Permitted

Where:

~~1. Community Facilities, Emergency Service Facilities, retail and office activities are a maximum of 250m² gross floor area per activity provided;~~

2. ~~The activity does not include:~~

   ~~i. Drive through restaurants;~~

   ~~ii. Service stations;~~

   ~~iii. Motor vehicle sales;~~

   ~~iv. Yard-based retail activities;~~

   ~~v. Trade retail and trade suppliers; or~~

   ~~vi. Bars/taverns;~~

1. The maximum height above ground level is 10 metres except that this standard does not apply to hose drying towers at Emergency Service Facilities;

~~2. External storage is screened by a 1.8m fence or landscaping so that it is not visible from any adjoining residential zone boundary or adjoining public place;~~

2. Maximum site coverage is 60%;

~~3. No more than one heavy vehicle is stored on the site;~~

~~4. Activities other than Emergency Services shall be limited to the following hours of operation:~~

   ~~i. 6am – 11pm weekdays; and~~

   ~~ii. 7am – 10 pm weekends and public holidays; except where~~

      ~~a. The entire activity is located within a building; and~~

      ~~b. There are no visitors, customers or deliveries outside the above hours.~~[251]

3. The maximum building length is 20m where this abuts a RESZ - Residential Zone;

4. Any building or structure**, excluding buildings for residential activities and residential units** [252]is set back

   i. 2m from a RESZ - Residential Zone or OSRZ - Open Space and Recreation Zone boundary;

   ii. 3m from the road boundary; or

   iii. For sites with frontage to two roads in the NCZ - Neighbourhood Centre Zone:

[250] Waka Kotahi (S450.220)
[251] Waka Kotahi (S450.220)
[252] Waka Kotahi (S450.220) consequent on relocate of NCZ-R5

a. 3m on one road boundary; and

b. 1.5m on the other road boundary;

iv. 1.5m from the railway designation boundary, excluding accessory buildings and structures [253]

5. Buildings for residential activities and residential units are set back:

i. 5m from road boundaries, except that a roof overhang may encroach 750mm into the setback

ii. 1 m from all other site boundaries, except that Duplexes do not require a setback from the side boundary of the other duplex unit; and[254]

iii. 1.5m from the railway designation boundary, excluding accessory buildings; and[255]

6. A landscape buffer of 1m width must be provided along the frontage between the street and any car parking, loading or service areas which are visible from the street frontage. This rule excludes access points;

7. No building shall protrude beyond a building envelope defined by a recession plane as outlined in Appendix Two to commence 2.5m above any residential site boundary ~~except where the neighbouring property owner's written approval is provided to the Council 10 working days to the works commencing~~.[256] This standard does not apply to:

i. Road boundaries;

ii. Buildings on adjoining sites that have a common wall along the boundary;

iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;

iv. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or

v. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically.

Advice Note:

~~1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.~~[257]

1. Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.[258]

Activity status where compliance not achieved:

[253] KiwiRail (S442.51)
[254] Waka Kotahi (S450.220) consequent relocation from NCZ-R5
[255] KiwiRail (S442.51)
[256] Buller District Council (S538.458)
[257] Waka Kotahi (S450.220)
[258] Buller District Council (S538.458)

Discretionary where standards 1 to **2** ~~8~~ are not complied with.

Restricted Discretionary where standards **3 to 7** ~~9-11~~ are not complied with.[259]

NCZ – R2	Minor Structures

Activity Status Permitted

Where:

1. All performance standards for Rule NCZ - R1**.6** ~~are~~ **is** [260]complied with;
2. Masts, poles, aerials and pou whenua must not exceed 7m in height;
3. Any antenna dish must be less than 1m in diameter;
4. Any ornamental or garden structure must not exceed 2.4 m in height; ~~and~~
5. Any other structure must not exceed 10m² and 2m in height**; and**
6. **Hose drying towers must not exceed 12m in height.**[261]

Activity status where compliance not achieved: Discretionary

NCZ – R3	Fences, Walls and Retaining Walls

Activity Status Permitted

Where:

1. Fences, walls and retaining walls are a maximum 2m height above ground level; and
2. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall or wall.

Activity status where compliance not achieved: Discretionary

NCZ – R4	Relocated Buildings

Activity Status Permitted

Where:

1. All performance standards for Rule NCZ - R1 are complied with;
2. Any relocated building intended for use as a dwelling must have been designed, ~~and~~ built**, and** ~~to be~~ used as a dwelling; [262]

[259] Waka Kotahi (S450.220)
[260] Consequent stemming from Buller District Council (S538.413)
[261] Fire and Emergency New Zealand (S573.092)
[262] New Zealand Heavy Haulage Association Inc (S616.003)

3. A building pre-inspection report **in accordance with Appendix 11**[263] shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the **exterior** reinstatement works **including connections to infrastructure services and closing in and ventilation of the foundations** shall be completed within a 12-month period **of the building being delivered to the site; and** [264]

4. The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site.~~; and~~

~~5. All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.~~[265]

Activity status where compliance not achieved: Controlled

NCZ – R5	**Commercial Activities, Community Facilities, Education Facilities**[266] **and Emergency Service Facilities**[267]

Activity Status Permitted

Where:

1. **Education Facilities,**[268] **Community Facilities, Emergency Service Facilities, retail and office activities are a maximum of 250m² gross floor area per activity;**
2. **The activity does not include:**
   i. **Drive through restaurants;**
   ii. **Service stations;**
   iii. **Motor vehicle sales;**
   iv. **Yard-based retail activities;**
   v. **Trade retail and trade suppliers; or**
   vi. **Bars/taverns**
3. **External storage is screened by a 1.8m fence or landscaping so that it is not visible from any adjoining residential zone boundary or adjoining public place**
4. **No more than one heavy vehicle is stored on the site, excluding heavy vehicles ancillary to emergency service facilities**[269]
5. **Activities other than Emergency Services shall be limited to the following hours of operation:**

[263] New Zealand Heavy Haulage Association Inc (S616.003)
[264] Chris and Jan Coll (S558.007), Chris J Coll Surveying Limited (S566.007), William McLaughlin (S567.007), Laura Coll McLaughlin (S574.007)
[265] Chris and Jan Coll (S558.007), Chris J Coll Surveying Limited (S566.007), William McLaughlin (S567.007), Laura Coll McLaughlin (S574.007)
[266] Ministry of Education (S456.036)
[267] Consequential to Waka Kotahi (S450.220)
[268] Ministry of Education (S450.036)
[269] Fire and Emergency New Zealand (S573.091)

i. **6am – 11pm weekdays; and**

ii. **7am – 10 pm weekends and public holidays; except where**

a. **The entire activity is located within a building; and**

b. **There are no visitors, customers or deliveries outside the above hours.**

Advice Note:

1. **The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.**

Activity status where compliance not achieved:

Restricted Discretionary where standards 3 to 5 are not complied with.

Discretionary where standard 1 and 2 is not complied with[270]

NCZ – R6	**Visitor Accommodation**

Activity Status Permitted

Where:

1. **The visitor accommodation is located**

i. **In a Heritage Building listed in Schedule One; or**

ii. **Above street level; or**

iii. **At street level but with no frontage to public open spaces or streets except for access**

2. **Any space designed for waste management, whether private or communal, shall not be located between the road boundary and any building, and shall be screened from adjoining sites, roads and adjoining outdoor living spaces by screening of the waste management area to a height of 1.5 metres;**

3. **Visitor accommodation entrances shall be clearly separated and distinguished from commercial entrances; and**

4. **The principal residential accommodation entrance shall be provided directly from a public street or open space.**

Advice Note

1. **The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.**

Activity status where compliance not achieved: Discretionary[271]

NCZ – R~~5~~7	**Residential Activities and Residential Units**

[270] Consequential to Waka Kotahi (S450.220)
[271] Clause 16 Reporting Officer recommendation as Visitor Accommodation omitted in error

Activity Status Permitted

Where:

~~1. Performance standards 1, 3 and 6 of Rule NCZ - R1 are complied with;~~ [272]

1. Residential unit density is no more than

   a. 1 unit per 350m² net site area; or

   b. 1 unit per 300m² net site area where two or more adjoining sites are developed;

~~2. Maximum building height above ground level of 10m;~~

~~3. Maximum site coverage is 60%;~~

~~4. Buildings are setback a minimum 4.5m from road boundaries, except that a roof overhang may encroach 750mm into the setback;~~

~~5. Buildings are setback a minimum of 1m from all other site boundaries, except that:~~

   ~~a. Duplexes do not require a setback from the side boundary of the other duplex unit; and~~

   ~~b. Setbacks are not required from adjacent residential boundaries where the neighbouring property owner's written approval is provided to the Council 10 working days ahead of the work commencing;~~ [273]

2. There is no more than 1 minor residential unit with a maximum gross floor area of 65m² per 500m² net site area; ~~and~~

3. A minimum of 30m² of outdoor living space is provided per residential unit and 12m² per minor residential unit which is separate to the outdoor space for the principal dwelling and excluding any parking and manoeuvring areas; **and**

4. No more than one heavy vehicle is stored on the site. [274]

Activity status where compliance not achieved: Restricted Discretionary

NCZ – R~~6~~8	**Demolition of Buildings**

Activity Status Permitted

Where:

1. There is no redevelopment then the site is completely cleared of demolition materials and re-grassed within 12 months.

Activity status where compliance not achieved: Controlled

Controlled Activities

[272] Consequential to Waka Kotahi (S450.220)

8. INDUSTRIAL ZONES

8.1. Industrial Overview

Submissions and Further Submissions

844. One submission point relating to the Overview was summarised in a Table on page 145 of the s42A Report. The Panel adopts these summaries and has considered all of the relevant submissions and further submissions.

Section 42A Report

845. Ms Belgrave acknowledged the support from Silver Fern Farms that supports the Overview as notified.

846. The S42A report recommends retaining the Industrial Zone Overview as notified.

Hearing and Submitter Evidence

847. No evidence was presented at the hearing in relation to this submission point.

Reporting Officer Reply Evidence

848. There was no specific consideration of this matter in the reply evidence.

Hearing Panel's Evaluation

849. The Panel accept that no amendments as necessary as a result of the above submission.

Hearing Panel's Recommendation

850. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends no changes to the **Industrial Zone Overview**.

[287] Consequential amendment stemming from William McLaughlin (S567.449), Chris & Jan Coll (S558.394), Chris J Coll Surveying Limited (S566.394) Laura Coll McLaughlin (574.394)
[288] Consequential amendment stemming from William McLaughlin (S567.449), Chris & Jan Coll (S558.394), Chris J Coll Surveying Limited (S566.394) Laura Coll McLaughlin (574.394)

8.2. General/Whole Chapter

Submissions and Further Submissions

851. Five submissions points and one further submission point concerning the Industrial Zones were summarised in a Table on pages 145-146 of the s42A Report. The Panel adopts these summaries and has considered to all of the relevant submissions and further submissions.

Section 42A Report

852. Ms Belgrave acknowledges the submission point made by Westland District Council that supported the objectives and policies as notified and sought their retention.

853. Ms Belgrave does not support the relief sought in the submission point made by Forest and Bird. The submission sought amendment to the zone provisions to be clear that the Natural Environment and District Wide chapters all apply, and that no lesser standard of effects management is applied, in particular on biodiversity values. Ms Belgrave does not consider amendments necessary as is common for these matters to be managed outside of the zone chapters. Notwithstanding, cross references are included in the Overview text in the GIZ and LIZ.

854. In response to the submission point made by GDC that sought to remove all references to 'Site or Area of Significance to Māori' Ms Belgrave does not support the relief sought as the submitter provides no justification for the request. Ngāi Tahu oppose the submission by way of further submission.

855. In response to the submission points made by Ngāi Tahu that sought to have Poutini Ngāi Tahu values as part of controlled and restricted discretionary activities, Ms Belgrave notes that this is a common submission point across multiple hearing streams and has also been considered in relation to the other zones. Ms Belgrave does not support the relief sought in the submission points.

856. Ms Belgrave did not make any recommendations to amend the INZ provisions in response to these submission points.

Hearing and Submitter Evidence

857. No evidence was presented at the hearing in relation to this submission point.

Reporting Officer Reply Evidence

858. There was no specific consideration of this matter in the reply evidence.

Hearing Panel's Evaluation

859. In relation to the Forest and Bird submission the Panel generally agrees with Ms Belgrave. We consider that the word '*including*' in the zone overviews ensures that consideration can be given to any other District wide chapters.

860. In relation to the remainder of the submissions on the General/Whole Chapter, the Panel agrees that these should be rejected based on the conclusions reached by Ms Belgrave.

Hearing Panel's Recommendation

861. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends no changes to the general matters raised in submissions and further submission across the **Industrial Zone**.

8.3. Industrial Objectives

Submissions and Further Submissions

862. Six submission points and three further submission points relating to **INZ-O1** were summarised in a Table on pages 147-148 of the s42A Report. Two submissions supported the retention of the objective as notified, three sought amendments and one sought to add a new policy.

863. Six submission points relating to **INZ-O2** were summarised in a Table on pages 149-150 of the s42A Report. Four submissions supported the retention of the objective as notified, one sought amendment and one sought its deletion.

864. The Panel adopts these summaries and has considered all the relevant submissions and further submissions.

Section 42A Report

Objective 1

865. In relation to INZ-O1, Ms Belgrave acknowledged the support from the submitters that seek to retain the objective as notified. The acknowledgement is subject to recommended amendments that arise from other submissions.

866. In response to the submission point made by Silver Ferns Farms that sought to delete the words 'and does not compromise the amenity of adjoining areas' from the end of the objective, Ms Belgrave does not support the relief sought. Silver Fern Farms seeks an objective that enables and promotes the operation of industry in their designated zones by imposing amenity values which are compatible with the purpose of the zoning. Reverse sensitivity concerns are also raised. It is Ms Belgrave's view that the management of the interface with more sensitive zones is a relevant matter under INZ-O1 and the rules of the GIZ and LIZ provide context and certainty to plan users as to the appropriate level of amenity to be achieved. Notwithstanding, Ms Belgrave does recommend amending '*adjoining areas'* to '*adjoining zones'*.

867. In response to the similar submission points made by the Director General and Fire and Emergency NZ that sought additional wording to the objective to provide for compatible non-industrial activities, Ms Belgrave does not support the relief sought of either submitter. She does not consider it necessary for the objective to recognise all permitted activities as the primary purpose of the zone is to provide for industrial activities.

868. Ms Belgrave recommends partly accepting the submission made by Westland Milk Products that sought the addition of a new policy to recognise the economic and employment contributions industrial activities provide. Ms Belgrave acknowledges that the benefits of industrial activities is a relevant matter for consideration in the INZ chapter. However, she considers that the recognition of the benefits is more appropriately provided in INZ-O1 and she recommends the following:

INZ-O1

> ***~~To provide for the efficient and effective operation and development of industrial activities~~ Recognise that industrial activities contribute to economic and social wellbeing, and are enabled*** *in the INZ - Industrial Zones in a manner that maintains a standard of amenity appropriate to these areas and does not compromise the amenity of adjoining* ***~~areas~~ zones****.*

869. After having reviewed Mr Black's evidence for Westland Milk Products, Ms Belgrave acknowledged the relevance of providing for the efficient and effective operation of activities in the INZ. However, she does not consider a new objective is required. She recommends the following wording in response to Mr Black's evidence.

> ***INZ-O1***
>
> ***~~To provide for the efficient and effective operation and development of industrial activities~~ Recognise that industrial activities contribute to economic and social wellbeing, and provide for their efficient and effective operation and development ~~are enabled~*** *in the INZ - Industrial Zones in a manner that maintains a standard of amenity appropriate to these areas and does not compromise the amenity of adjoining* ***zones ~~areas~~.***

Objective 2

870. In response to the submission point made by BDC that sought to delete this objective Ms Belgrave supports the relief sought. She agrees that the objective provides direction for new industrial zoned land, and in that respect is more appropriately located in the Strategic Directions Chapter.

871. In response to the clarification sought by BDC as to what activities constitute '*light*' and *'heavy'* industries, Ms Belgrave explains that the pTTPP does not include a Heavy Industry zone, and that the Planning Standards include a description for each industrial zone which is included in the pTTPP. As such, additional clarification is not necessary.

872. In response to the submission point made by Waka Kotahi that sought to change '*encourage*' to '*require'*, Ms Belgrave supports the relief sought subject to the objective being relocated to the SD Chapter. She agrees that '*require*' provides greater certainty.

873. As a consequence of the recommendation to relocate the objective, Ms Belgrave does not support the relief sought by the submissions to retain the objective as notified.

874. The S42A report recommends deleting INZ-O2 from the INZ Chapter and relocating an amended version in the Strategic Direction Chapter, under Urban Form and Development:

> ***UFD-O6 To require ~~encourage~~ new industrial development to locate within INZ - Industrial Zoned land, and where new land is proposed for industrial zoning or uses ensure that this development maximises the efficient use of existing infrastructure and where such infrastructure does not exist, the development of new infrastructure to the standards required by the Council and Te Tai o Poutini Plan.***

Hearing and Submitter Evidence

875. Ms Lucy Smith tabled a letter on behalf of Terra Firma Mining Limited. The letter set out that Terra Firma supported the notified version of INZ-O1 as it referred to the *'efficient and effective operation and development of industrial activities'*. The S42A recommendation deleted this phrase and replaced it with *'recognise that industrial activities contribute to economic and social wellbeing and are enabled'*. Ms Smith considers that both phrases are relevant and they should be included as separate objectives.

876. Mr Steve Tuck's evidence for Silver Fern Farms reiterates the submission point relating to INZ-O1 with reference to the existing meat processing facility in Hokitika. He identifies that the notified version of LIZ-O1 places obligation on industry to manage cross-zone effects. In the case of the Hokitika site where it is also proposed to re-zone adjoining land GRZ, Mr Tuck considers that this obligation overrides the strategic outcomes sought for industrial zones. He considers that the objective prioritises residential amenity considerations despite the existing well established industrial activity. He seeks amendment to the objective to ensure that existing industry is not obliged to adapt to incompatible encroachments. His suggested wording is as follows:

> ***INZ-O1*** *Recognise that industrial activities contribute to economic and social wellbeing, and are enabled in the INZ - Industrial Zones in a manner that maintains a standard of amenity appropriate to these areas and does not compromise the amenity of adjoining zones,* ***excepting amenity effects generated by the meat processing facility located at Lot 1 DP 545864 and Lot 2 DP 545864 on adjacent residential zones.***

877. Mr Tuck's evidence in relation to INZ-O2, he supports relocating the objective to the Strategic Directions chapter. However, he recommends additions to the wording to capture the outcome of the related policy (INZ-P2) regarding natural hazard risk and sites of significance to Māori. His suggested wording is as follows:

> ***~~INZ-O2~~ UFD-O6*** *To* ***require*** ***~~encourage~~*** *new industrial development to locate within INZ - Industrial Zoned land, and where new land is proposed for industrial zoning or uses****,*** *ensure that this* ***land is free of significant constraints and that*** *development maximises the efficient use of existing infrastructure and where such infrastructure does not exist, the development of new infrastructure to the standards required by the Council and Te Tai o Poutini Plan.*

878. Mr George van Pelt tabled a letter at the hearing on behalf of FENZ. The letter accepts the S42A recommendation not to make any changes to INZ-O1, in accordance with what was originally sought in the submission.

879. Mr Richard Black's evidence for Westland Milk Products supports the S42A recognition of economic and social well-being within INZ-O1 (rather than a new policy as sought in the submission). However, he does not support deleting '*the efficient and effective operation and development of industrial activities*' as this is a critical outcome for industrial zones. It is his recommendation to include this wording as a separate objective:

> ***INZ-O3 The contribution of industrial activities to economic and social wellbeing is recognised.***

Reporting Officer Reply Evidence

880. As part of the right of reply, Ms Belgrave has completed a '*wiring assessment*' of the objectives, policies and rules in the INZ, GIZ and LIZ Chapters. She notes that given the recommendation to relocate INZ-O2 to the SD Chapter, the INZ Chapter includes a single objective:

> ***INZ-O1***
>
> ***~~To provide for the efficient and effective operation and development of industrial activities~~ Recognise that industrial activities contribute to economic and social wellbeing, and provide for their efficient and effective operation and development ~~are enabled~~*** *in the INZ - Industrial Zones in a manner that maintains a standard of amenity appropriate to these areas and does not compromise the amenity of adjoining* ***zones ~~areas~~.***

881. Her wiring assessment confirms that the objective is well aligned to the policies and rules relating to the range of industrial activities and managing the effects of these activities, but it does not align with INZ-P5, INZ-P7 and INZ-P11 that are focused on managing sites of significance to Māori, avoiding incompatible activities or managing the effects of stormwater runoff. She also identifies that there is a gap in the policies in terms of managing amenity effects within the INZ.

882. To address the identified gaps, Ms Belgrave recommends the various amendments, (some of which relate to the policies of the INZ and will be addressed in the relevant section of this decision). In terms of the objectives, she recommends the following:

> ***INZ-O1****: Recognise that industrial activities contribute to the economic and social wellbeing, and provide for their efficient and effective operation and development in the INZ- Industrial Zones* ~~***in a manner that maintains a standard of amenity appropriate to these areas and does not compromise the amenity of adjoining zones areas.***~~
>
> ***INZ-OX: Require activities in the INZ – Industrial Zones to maintain a standard of amenity appropriate to these areas and which does not compromise the amenity of adjoining zones.***
>
> ***INZ-OX: Manage the effects generated by industrial activities on waterbodies and coastal water.***
>
> ***INZ-OX: The role and function of the INZ – Industrial Zones is not compromised through the establishment of incompatible activities.***

883. With respect to scope for the recommended changes, Ms Belgrave considers that the changes fall within the ambit of clause 16(2). Additionally, the amendments will simplify the wording which is within the scope of three submission points[289] that sought the general simplification of the whole Plan.

884. Ms Belgrave's right of reply also provides a response to questions from the Panel regarding the relocation of some objectives to the Strategic Direction Chapter (in this instance INZ-O2). She considers that INZ-O2 is applicable to areas where a new Industrial zoning is proposed through a plan change process and is less applicable to live zoned Industrial land managed by the GIZ and LIZ Chapters. Therefore, she reiterates that the SD Chapter is the appropriate location for the objective, and that the proposed new objective (UFD-OX2) as set out in the CMUZ part of this decision consolidates the intent of INZ-O2. Therefore, it is Ms Belgrave's recommendation that the S42A recommendation to insert UFD-O6 be deleted.

885. A joint right of reply has been prepared in response to the Silver Fern Farms evidence as the issues traverse various hearing streams. The joint right of reply acknowledges that the rationale for many of the submission points made by Silver Fern Farms relate to reverse sensitivity. Notwithstanding that, the reporting planners do not support the specific *'carve out'* provisions that look to provide exemptions for the Hokitika site. This is because it is not in accordance with best practice for plan drafting nor is it considered that it will resolve the issues Silver Fern Farms raise as the subdivision has been approved and the development of houses is already taking place.

886. The joint right of reply also considers the relocation of INZ-O2 to the SD chapter and the amended wording offered by Mr Tuck. It is Ms Belgrave's opinion that the additional words are unnecessary.

[289] Gina Hogart (S304.003), Suzanne Hills (S443.001), Shaun and Carissa du Plessis (S402.001).

Hearing Panel's Evaluation

887. As indicated in the Commercial zones, the Panel does not support moving objectives and/or Policies into the Strategic Directions chapter on the basis that the provisions are too specific to be relocated to that part of the Plan. Regardless of this, we have recommended amendments to the Urban Form and Development section of the Strategic Directions Chapter, which will broadly provide context for the Commercial and Industrial provisions.

888. In terms of INZ-O1, the Panel agree that recognising that benefits of industrial activities in appropriate in the policy framework as sought by Westland Milk Products. We therefore agree with the rewording of the objective as proposed by Ms Belgrave in the s42A report and recommend it be included.

889. The Panel agree with Waka Kotahi's submission to amend 'encourage' to 'require' in Objective 2 and recommend this amendment.

890. In term of Silver fern Farms submissions we note that reserve sensitivity in terms of industrial development has now been addressed in Strategic Direction policy UFD-P1.

Hearing Panel's Recommendation

891. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends the following changes to the **Industrial Zone Objectives**:

INZ – O1	~~To provide for the~~ **Recognise that industrial activities contribute to economic and social wellbeing and provide for their** efficient and effective operation and development ~~of industrial activities~~[290] in the INZ - Industrial Zones**.** in a manner that maintains a standard of amenity appropriate to these areas and does not compromise the amenity of adjoining **zones**~~areas.~~[291]
INZ – O2	To ~~encourage~~**require**[292] new industrial development to locate within INZ - Industrial Zoned land, and where new land is proposed for industrial zoning or uses ensure that this development maximises the efficient use of existing infrastructure and where such infrastructure does not exist, the development of new infrastructure to the standards required by the Council and Te Tai o Poutini Plan.

8.4. Industrial Policies

Submissions and Further Submissions

892. Six submission points relating to **INZ-P1** were summarised in a Table on pages 150-151 of the s42A Report. One submission point supported the retention of the policy as notified. Five submission points supported the retention of the policy as notified. One submission sought it be deleted.

893. Three submission points relating to **INZ-P2** were summarised in a Table on pages 151-152 of the s42A Report. Two submission points supported the retention of the policy as notified. One submission sought it be deleted.

[290] Westland Milk Products (S63.008)
[291] Silver Firm Farms (S441.043)
[292] Waka Kotahi (S450.225)

894. Five submission points relating to **INZ-P3** were summarised in a Table on page 152 of the s42A Report. Four submission points supported the retention of the policy as notified. One submission sought it be deleted.

895. Five submission points and one further submission points relating to **INZ-P4** were summarised in a Table on page 153 of the s42A Report. Three submission points supported the retention of the policy as notified. Two submission points sought it be deleted.

896. Three submission points relating to **INZ-P5** were summarised in a Table on page 154 of the s42A Report. All submission points supported the retention of the policy as notified.

897. Four submission points relating to **INZ-P6** were summarised in a Table on page 155 of the s42A Report. Three submission points supported the retention of the policy as notified and one submission point sought amendments.

898. Three submission points relating to **INZ-P7** were summarised in a Table on pages 155-156 of the s42A Report. Two submission points supported the retention of the policy as notified and one submission point sought amendments.

899. Three submission points relating to **INZ-P8** were summarised in a Table on page 157 of the s42A Report. One submission point supported the retention of the policy as notified and one submission point sought amendments.

900. Three submission points relating to **INZ-P9** were summarised in a Table on page 158 of the s42A Report. One submission point supported the retention of the policy as notified and two submission points sought amendments.

901. Three submission points relating to **INZ-P10** were summarised in a Table on page 159 of the s42A Report. Two submission points supported the retention of the policy as notified and one submission point sought to delete it.

902. Five submission points and one further submission relating to **INZ-P11** were summarised in a Table on page 160 of the s42A Report. Three submission points supported the retention of the policy as notified and two submission points sought amendment.

903. The Panel adopts these summaries and has considered all the relevant submissions and further submissions.

Section 42A Report

INZ – Policy 1

904. In response to the submission point made by BDC that sought to delete this policy Ms Belgrave supports the relief sought. She agrees that similar to INZ-O2, INZ-P1 does not relate to the existing Industrial Zones but instead provides direction for new industrial zoned land. Therefore, she recommends it be relocated to the Strategic Directions Chapter.

905. As a consequence of the recommendation to relocate the policy, Ms Belgrave does not support the relief sought by the other submissions to retain the objective as notified.

906. The S42A report recommends deleting INZ-P1 from the INZ Chapter and relocating it to the Strategic Direction Chapter, under Urban Form and Development as UFD-O7.

INZ – Policy 2

907. In response to the submission point made by BDC that sought to delete this policy Ms Belgrave supports the relief sought. This is for similar reasons to those already set out and she recommends that it be relocated to the Strategic Directions Chapter.

908. As a consequence of the recommendation to relocate the policy, Ms Belgrave does not support the relief sought by the other submissions to retain the objective as notified.

909. The S42A report recommends deleting INZ-P2 from the INZ Chapter and relocating it to the Strategic Direction Chapter, under Urban Form and Development as UFD-O8.

INZ – Policy 3

910. In response to the submission point made by BDC that sought to delete this policy Ms Belgrave supports the relief sought. This is for similar reasons to those already set out and she recommends that it be relocated to the Strategic Directions Chapter.

911. As a consequence of the recommendation to relocate the policy, Ms Belgrave does not support the relief sought by the other submissions[293] to retain the objective as notified.

912. The S42A report recommends deleting INZ-P3 from the INZ Chapter and relocating it to the Strategic Direction Chapter, under Urban Form and Development as UFD-O9.

INZ – Policy 4

913. In response to the submission points made by BDC and Westland Farm Services that sought to delete this policy Ms Belgrave supports the relief sought. This is for similar reasons to those already set out as well as an acknowledgement that the availability of suitable Industrially zoned land is difficult to determine with certainty. In this case it is not recommended that the policy be relocated to the Strategic Directions Chapter.

914. As a consequence of the recommendation to delete the policy, Ms Belgrave does not support the relief sought by the other submissions[294] to retain the objective as notified.

915. The S42A report recommends deleting INZ-P4 from the INZ Chapter.

INZ – Policy 5

916. Ms Belgrave acknowledged the support from Te Mana Ora, Silver Fern Farms and Ngāi Tahu that supports the policy as notified.

917. The S42A report recommends retaining INZ-P5 as notified.

INZ – Policy 6

918. Ms Belgrave acknowledged the support from Te Mana Ora, the Department of Corrections and Terra Firma that supports the rule as notified. This is subject to the recommended amendments that are set out below.

[293] Te Mana Ora (S190.790), Silver Fern Farms (S441.047), Waka Kotahi (S450.227), Grey District Council (S608.709)
[294] Te Mana Ora (S190.791), Silver Fern Farms (S441.048), Waka Kotahi (S450.228)

919. In response to the submission point from Silver Fern Farms that sought to change the wording of the policy on the basis that the word '*acceptable*' is vague, Ms Belgrave does not support the proposed wording. However, she does agree that 'acceptable' does not provide sufficient certainty.

920. The S42A report recommends amending INZ-P6 as follows:

> *Provide for a wide range of industrial and compatible activities within the INZ – Industrial Zones, while* ***maintaining the amenity values of any adjacent RESZ – Residential Zone, OSRZ – Open Space and Recreation Zone, MUZ – Mixed Use Zone or SETZ – Settlement Zone*** ~~***ensuring an acceptable level of environmental quality and amenity within the zones.***~~

921. As a result of the statement from Terra Firma, Ms Belgrave reconsidered the wording of INZ-P6 in her addendum to the S42A report. She agrees that a duplication is created by INZ-P6 and INZ-P8, and as such supports the amended wording suggested by Ms Smith (and Silver Ferns Farms) for INZ-P6, which is:

> *Provide for a wide range of industrial and compatible activities* ***and corresponding environmental quality and amenity****, within the INZ – Industrial Zones,* ~~***while ensuring an acceptable level of environmental quality and amenity within the zones.***~~

INZ – Policy 7

922. Ms Belgrave acknowledged the support from Te Mana Ora, and Waka Kotahi that supports the policy as notified. This is subject to the recommended amendments that are set out below.

923. In response to the submission point made by Silver Fern Farms that sought amendments to delete '*other*' industrial activities and to recognise that ancillary residential activities are not to be excluded from the Industrial zones under INZ-P7(a), Ms Belgrave supports the relief sought. However, she recommends alternative wording to clarify the wording.

924. The S42A report recommends amending INZ-P7 as follows:

> *Avoid activities that may be incompatible with* ~~***other***~~ *industrial activities from establishing in the INZ - Industrial Zones, to ensure the safe and efficient operation of industrial activities. This includes:*
>
> *(a) Excluding activities (such as residential* ***activities*** *and visitor accommodation* ***that are not ancillary to an industrial activity***~~***,***~~*) that conflict with the intended purpose of the zone through the potential for reverse sensitivity effects; or by reducing the land available for industrial and service activities;*
>
> *(b) …*
>
> *(c) …*

INZ – Policy 8

925. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified. This is subject to the recommended amendments that are set out below.

926. In response to the submission point from Silver Fern Farms that sought to replace INZ-P8 with a policy that seeks to manage the effects of the adverse effects within the zone to maintain the character and amenity of adjoining zones Ms Belgrave supports the relief in part. She considers that the word '*protects*' in the notified policy does not effectively recognise and

provide for the nature of industrial activities. She also does not consider that the notified wording will enable non-compliance with the performance standards to be appropriately managed. As such she has recommended deleting the reference to the performance standards, which aligns with her recommendation for CMUZ-P13.

927. In response to the submission point made by Westland Milk Products that sought to include the words '*where necessary'* to the policy, Ms Belgrave does not support the relief sought. She does not consider the addition appropriate as the requirement to avoid, remedy, or mitigate adverse effects is applicable to all development.

928. The S42A report recommends the following amendments to INZ-P8:

> *INZ-P8*
>
> ***~~Impose performance standards on~~ Avoid, remedy or mitigate adverse effects of*** *development and land use in the INZ - Industrial Zones* ***to maintain ~~that protects~~*** *the amenity values of the commercial, residential and rural areas surrounding the INZ - Industrial Zones.*

929. Consequential to the statement from Terra Firma relating to INZ-P6 and how it duplicates INZ-P8, Ms Belgrave reconsidered the wording of both INZ-P6 and INZ-P8 in her addendum to the S42A report. She recommends amendments to INZ-P8 that are consequential to the recommended changes to INZ-P6. The recommended wording in the addendum is:

> *INZ-P8*
>
> ***~~Impose performance standards on~~ Avoid, remedy or mitigate adverse effects of*** *development and land use in the INZ - Industrial Zones* ***to maintain ~~that protects~~*** *the amenity values of the commercial, residential* ***open space and recreation,*** *and rural areas surrounding the INZ - Industrial Zones.*

INZ – Policy 9

930. Ms Belgrave acknowledged the support from Te Mana Ora that supports the rule as notified. This is subject to the recommended amendments that are set out below.

931. In response to the submission point made by Silver Fern Farms that sought to clarify the subjectivity of the policy, Ms Belgrave agrees that the policy creates uncertainties for plan users and she recommends amendments to the policy to improve clarity.

932. In response to the submission point made by Waka Kotahi that sought an addition to maintain the safe function of the road, Ms Belgrave supports the relief sought.

933. The S42A report recommends the following amendments to INZ-P9:

> *INZ-P9*
>
> ***~~Industrial sites at the gateways to Hokitika (SH6), Reefton (SH7 and SH69), Greymouth/Māwhera (SH6) and Westport/Kawatiri (SH 67), and where in close proximity to residential areas, should not detract from the visual amenity of the road frontage, through the inclusion of landscaping and tree planting.~~***
>
> ***Manage effects on visual amenity along road frontages of the INZ – Industrial Zones that are adjacent to state highways and residential areas with landscaping and tree planting, while ensuring the safe function of the road.***

INZ – Policy 10

934. In response to the submission point made by Buller District Council that sought to delete this policy Ms Belgrave supports the relief sought. She agrees that similar to a number of other objectives and policies, INZ-P10 does not relate to the existing Industrial Zones but instead provides direction for new industrial zoned land. Therefore, she recommends it be relocated to the Strategic Directions Chapter.

935. As a consequence of the recommendation to relocate the policy, Ms Belgrave supports the relief in part sought by the other submissions to retain the objective as notified.

936. The S42A report recommends deleting INZ-P10 from the INZ Chapter and relocating it to the Strategic Direction Chapter, under Urban Form and Development as UFD-O10.

INZ – Policy 11

937. Ms Belgrave acknowledged the support from Te Mana Ora, GDC and Ngāi Tahu that supports the rule as notified. This is subject to the recommended amendments that are set out below.

938. In response to the submission point made by Silver Fern Farms that sought to narrow the focus of the policy so that it focuses on the stormwater network Ms Belgrave considers that INZ-P11 is appropriate and provides for the management of effects that are separate to regional council functions. Nevertheless, Ms Belgrave does recommend minor amendments to refer to the management of adverse effects on any waterbody or coastal water as this will achieve consistency with RMA terminology

939. The proposed additions sought by Westland Milk Products is not supported by Ms Belgrave, as she considers that they have the potential to change the intent of the policy.

940. The S42A report recommends the following amendments to INZ-P11:

> *INZ-P11*
>
> *Require the careful on-site management and treatment of stormwater from industrial buildings and sites* ***so that adverse effects on any waterbody or coastal water are avoided, remedied, or mitigated*** ~~***in order to safeguard the health and wellbeing of waterbodies, freshwater ecosystems and receiving environments***~~.

Hearing and Submitter Evidence

941. Mr Steve Tuck's evidence for Silver Fern Farms he supports relocating INZ-P1 to INZ-P3 to the Strategic Directions chapter. However, he recommends that they continue to be policies in which case they will implement UFD-O6.

942. Mr Tuck accepts and supports the deletion of INZ-P4 as he agrees that the policy is redundant given the combination of directions in non-industrial zones discouraging industry and the enabling of industry in GIZ and LIZ.

943. Mr Tuck's evidence regarding INZ-P6 and INZ-P8 makes the same points that he made in relation to INZ-O1. He identifies that the S42A (prior to the addendum) versions of the policies places obligation on industry to manage cross-zone effects. In the case of the Hokitika site where it is also proposed to re-zone adjoining land GRZ, Mr Tuck considers that this obligation overrides the strategic outcomes sought for industrial zones. He considers that the policies

prioritise residential amenity considerations despite the existing well established industrial activity. He seeks amendment to the policies to ensure that existing industry is not obliged to adapt to incompatible encroachments. His suggested wording is as follows:

> ***INZ-P6*** *Provide for a wide range of industrial and compatible activities within the INZ – Industrial Zones, while maintaining the amenity values of any adjacent RESZ – Residential Zone, OSRZ – Open Space and Recreation Zone, MUZ – Mixed Use Zone or SETZ – Settlement Zone**, excepting the residential zone located adjacent to the meat processing facility located at Lot 1 DP 545864 and Lot 2 DP 545864.***
>
> ***INZ-P8*** *Avoid, remedy or mitigate adverse effects of development and land use within the INZ – Industrial Zones to maintain the amenity values of the commercial, residential and rural areas adjoining the INZ- Industrial Zones**, excepting the residential zone located adjacent to the meat processing facility located at Lot 1 DP 545864 and Lot 2 DP 545864.***

944. Furthermore, Mr Tuck also proposes a new policy as he considers that there is an absence of management for cross-zone reverse sensitivity effects. The proposed policy will protect strategically important industry from the reverse sensitivity effects of incompatible zones encroaching nearby. He considers this necessary to prevent the erosion of industrial zones by incompatible zones and activities, which would in his view exacerbate the key issues identified in the section 32 report. He suggests the following:

> ***INZ-P(XX) Protect industrial zones and activities from the reverse sensitivity effects of incompatible zones and activities in adjacent locations.***

945. Mr Tuck's evidence generally supports the amendments recommended to INZ-P7. However, he also suggests that the word *'custodial'* be deleted from part (c) of the policy. He considers that this would better align sub-clause (c) with the direction in sub-clause (a). Sub-clause (a) contemplates residential activities ancillary to industry, whether or not they are "*custodial*" residential activities. So to avoid difficulties in applying the relevant rule to non-custodial activities with a residential component that are ancillary to industry, (such as seasonal worker accommodation), the policy would be improved if '*custodial*' is deleted.

946. Mr Tuck's evidence supports the amendments to INZ-P9.

947. In reference to INZ-P10, Mr Tuck supports the deletion of the policy but does not consider it necessary that it be relocated to the SD Chapter.

948. Mr Tuck's evidence accepts that INZ-P11 could be useful in the context of the District Council's role as the operator of the reticulated stormwater network, and at Appendix 1 of his evidence he considers that the policy should be retained as notified.

949. Ms Lucy Smith's statement on behalf of Terra Firma Mining Limited considers that the recommended amendments to INZ-P6 changes the focus of the policy from the environmental quality and amenity within the zones to the amenity of adjacent zones. Ms Smith notes that this duplicates the intent of recommended amendments to INZ-P8. As such, she supports the amended wording sought by Silver Fern Farms in their original submission.

950. Mr Richard Black's evidence for Westland Milk Products confirms that he generally supports the S42A wording for INZ-P11 despite it not being the same as sought in Westland Milk Products' submission.

Reporting Officer Reply Evidence

951. As set out regarding the INZ Objectives, Ms Belgrave's right of reply responds to questions from the Panel regarding the relocation of some policies to the Strategic Direction Chapter. She considers that INZ-P1, INZ-P2 and INZ-P3 apply to areas where a new Industrial zoning is proposed through a plan change process and are less applicable to live-zoned Industrial land managed by the GIZ and LIZ Chapters. Therefore, she reiterates that the SD Chapter is the appropriate location for these policies, and that the proposed new objective (UFD-OX2) as set out in the CMUZ part of this decision consolidates their intent. Therefore, Ms Belgrave recommends that the S42A recommendation to insert UFD-O7 to UFD-O9 be deleted.

952. As part of the wiring assessment, Ms Belgrave identified that INZ-P5 did not correlate to INZ-O1. As such, she considers it appropriate to delete this policy from the INZ Chapter. She considers that it is appropriate for SASM to be managed within the SASM Chapter, which is in accordance with Section 7 of the National Planning Standards. As both the GIZ and LIZ chapters include a cross-reference to the SASM Chapter, where the outcomes sought under INZ-P5 are provided for in accordance with SASM-P1 – SASM-P4, no other changes are recommended.

953. The wiring assessment also identified a gap in policies relating to the management of amenity effects within the INZ. As such, Ms Belgrave recommends amendments to INZ-P8 to ensure that amenity values within the INZ are managed and to improve the clarity of this policy

954. Like policies INZ-P1 to INZ-P3, Ms Belgrave recommends that INZ-P10 should be relocated to the Strategic Directions Chapter as it is more likely to apply to areas where a new Industrial zoning is proposed through a plan change process than locations where the zoning already exists. Ms Belgrave reconsidered this in her right of reply following questions from the Panel as to the necessity of the policy. She maintains that the policy is relevant, noting that it may apply to resource consent applications that seek to relocate existing activities, or to plan change applications that seek to establish new industrial zoning in appropriate locations to facilitate the relocation of existing activities.

955. A joint right of reply has been prepared in response to the Silver Fern Farms evidence as the issues traverse various hearing streams. The joint right of reply acknowledges that the rationale for many of the submission points made by Silver Fern Farms relate to reverse sensitivity. Notwithstanding that, the reporting planners do not support the specific 'carve out' provisions that look to provide exemptions for the Hokitika site.

956. The joint right of reply points out that including site specific detail in the objectives and policies is not in accordance with best practice plan drafting. Furthermore, as the subdivision of the land adjacent to the Hokitika site has been approved and the development of houses has already taken place, the suggested worded for the objectives and policies is not considered to resolve the issues Silver Fern Farms raised.

957. The joint right of reply supports deleting the word 'custodial' from INZ-P7(c).

958. Ms Belgrave considers in the joint right of reply that INZ-P10 provides high-level strategic direction on the location of industrial activities; therefore, in response to Mr Tuck's view that it is not relocated to the SD Chapter, she remains of the view that its relocation is appropriate. Furthermore, she also considers that the combination of INZ-O1, INZ-OX1, INZ-P6 and INZ-P7 will provide adequate direction to protect industrial zones from incompatible activities, and the additional policy proposed by Mr Tuck is unnecessary.

959. A legal memorandum prepared by Wynn Williams was provided as part of the right of reply to specifically consider and respond to questions from the Panel related to the lawfulness of the stormwater treatment provisions. The memo confirms that it is permissible for there to be overlaps between regional and district plans, provided that each is consistent with the respective council's functions.

Hearing Panel's Evaluation

960. The Panel disagrees with Ms Belgrave regarding the relocation of Policies 1-3 into the Strategic Directions Chapter, as already indicated. We further consider that it is appropriate to have *'rezoning'* type policies contained within the appropriate zone chapters, because a plan change will need to be considered in conjunction with other zone policies.

961. In terms of INZ-P4, the Panel acknowledges that the policy is a little unusual. As we understand it is seeking to encourage industrial activities to locate within industrial zones where suitable land is available. We accept that industrial zones are likely to better provide the necessary infrastructure and enable better management of effects. On this basis we consider the policy has some merit in considerations where activities are seeking to locate out-of-zone. On balance therefore we recommend it should be retained as sought by some submitters.

962. The Panel disagrees with Ms Belgrave in terms of deleting INZ-P5. We note that no submitter sought its deletion so therefore there is no scope for tis deletion. Further, there are a number industrially zoned areas within a SASM. We therefore recommend the policy be retained.

963. In terms of INZ-P6 (and INZ-P8), the Panel agrees with the statement from Terra Firma Mining Ltd that the focus of policy 6 should be environmental quality and amenity within the zones and that it is policy 8 that deals with amenity effects at the zone boundary as sought by Silver Fern Farms. We have therefore made amendments to ensure that this is the case in terms of both INZ-P6 and INZ-P8. We recommended these amendments be adopted.

964. The Panel agrees with the amendment to INZ-P7 proposed by Ms Belgrave in response to the Silver Ferns Farms submission. We accept ancillary residential units are anticipated in the Industrial zones to support industrial activities. We recommend the amendments are adopted.

965. The Panel agrees with the reworded INZ-P9 proposed by Ms Belgrave. We acknowledge that the notified wording is somewhat cumbersome and that the revised wording addresses the submissions of both Silver Fern Farms and Waka Kotahi. We recommend these amendment se included.

966. In terms of INZ-P10, the Panel do not agree with Ms Belgrave that this should be moved to Strategic Directions. We recommend this policy be retained as notified.

967. In relation to INZ-P11, the Panel has closely considered the issue of stormwater management. While we acknowledge the Wynn Williams legal opinion confirming that district plans can regulate stormwater quality prior to discharge district councils, we consider there would be a high level of duplication. We note that Silver Fern Farms has sought that the policy be narrowed so that it focuses on discharges of stormwater into the Council controlled stormwater network. However, in our view these are essentially subdivision and building consent matters.

968. The Panel has considered stormwater alongside the reality of how developments take place, we do not consider there is a need to regulate stormwater within these provisions. When

development such as a subdivision is consented conditions imposed by the Regional Council and District Council relating to stormwater and its quality before discharge will be considered and included. The Panel notes that BDC have sought to delete the rules stemming from this policy and we agree and note that our recommendations are to delete the provisions and related advice notes associated with stormwater.

969. Finally, the Panel does not support the carving out of the Silver Ferns site in terms of policy provisions. We agree with the planners JWS that there is no justification for this approach. We also note that reserve sensitivity in terms of industrial development has been addressed in Strategic Direction policy UFD-P1.

Hearing Panel's Recommendation

970. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends the following changes to the **Industrial Zone Policies**:

Industrial Zone Policies	
INZ – P1	Recognise the substantial investment in infrastructure by ensuring that any new industrial areas are located where they support the efficient use of infrastructure.
INZ – P2	New industrial areas should not be located in areas subject to significant risks from natural hazards, or in sites and areas of significance to Māori.
INZ – P3	Where new industrial areas are developed the developers of these areas shall fund and install infrastructure to the standards required by the Councils and the Plan. Where there is significant infrastructure serving multiple properties under different ownership this should be vested in the Council for ongoing maintenance and renewal.
INZ – P4	Where suitable land for industrial use is available within INZ - Industrial Zones, industrial activities should in the first instance be located in those zones, and not proliferate through the rural areas and settlements.
INZ – P5	Where sites or areas of significance to Māori are identified in industrial areas or developments, ensure activities are managed in a way that provides for the cultural relationships of Poutini Ngāi Tahu including: a. Protection of wāhi tapu and taonga sites identified in Schedule Three of the Plan using culturally appropriate methods; and b. Identification and utilisation of opportunities to enhance sites, values and other taonga of cultural significance to Poutini Ngāi Tahu; and c. Protection of the relationship of tangata whenua with freshwater, including cultural use opportunities.
INZ – P6	Provide for a wide range of industrial and compatible activities within the INZ – Industrial Zones, while **maintaining the amenity values.** ~~ensuring an acceptable level of environmental quality and amenity within the zones.~~[295]

[295] Terra Firma Mining Ltd (S537.023), Silver Fern Farms (S441.050)

INZ – P7	Avoid activities that may be incompatible with ~~other~~[296] industrial activities from establishing in the INZ - Industrial Zones, to ensure the safe and efficient operation of industrial activities. This includes: a. Excluding activities (such as residential **activities** and visitor accommodation **that are not ancillary to an industrial activity**)[297] that conflict with the intended purpose of the zone through the potential for reverse sensitivity effects; or by reducing the land available for industrial and service activities; b. Excluding retail and commercial activities from GIZ - General Industrial Zoned land that do not support or are not related to industrial and service activities, and to minimise the development of GIZ - General Industrial Zoned land for non-industrial purposes; and c. Restricting residential activities in the INZ - Industrial Zones to only ~~custodial~~[298] units for people whose duties require them to live on site.
INZ – P8	~~Impose performance standards on~~ **Avoid, remedy or mitigate adverse effects of** development and land use in the INZ - Industrial Zones **to maintain**~~that protects~~ the amenity values of ~~the~~ commercial, residential**, open space and recreation** and rural areas **located at zone boundaries** ~~surrounding the INZ - Industrial Zones~~.[299]
INZ – P9	~~Industrial sites at the gateways to Hokitika (SH6), Reefton (SH7 and SH69), Greymouth/Māwhera (SH6) and Westport/Kawatiri (SH 67), and where in close proximity to residential areas, should not detract from the visual amenity of the road frontage, through the inclusion of landscaping and tree planting.~~ **Manage effects on visual amenity along road frontages of the INZ – Industrial Zones that are adjacent to state highways and residential areas with landscaping and tree planting, while ensuring the safe function of the road.**[300]
INZ – P10	Over the long-term, promote the relocation of sporadic out-of-zone industrial activities in residential, commercial and rural areas to industrial zoned areas.
~~**INZ – P11**~~	~~Require the careful on-site management and treatment of stormwater from industrial buildings and sites in order to safeguard the health and wellbeing of waterbodies, freshwater ecosystems and receiving environments.~~[301]

8.5. Industrial Zones (General and Light) (Zoning and Rezoning)

Submissions and Further Submissions

971. Nineteen submission points relating to the zoning of land in the General Industrial Zone and Light Industrial Zone were summarised in a Table on pages 161-163 of the s42A Report. Twelve submissions supported the zoning. Seven submissions sought an amendment to the zoning of land.

[296] Silver Fern Farms (S441.051)
[297] Silver Fern Farms (S441.051)
[298] Silver Fern Farms (S441.051)
[299] Silver Fern Farms (S441.052)
[300] Waka Kotahi (S450.230), Silver Fern Farms (S441.053)
[301] Silver Fern Farms (S441.052) and Consequential stemming from Buller District Council (S538.458)

972. The Panel adopts these summaries and has considered all the relevant submissions and further submissions.

Section 42A Report

973. Ms Belgrave's approach to the consideration of these submissions is the same as how she considered the commercial zoning requests. She acknowledges that, as no substantive technical evidence was provided to support any industrial zoning requests, any recommended rezonings reflect clear errors in the zoning maps or where there are clear reasons for achieving the zone objectives, policies, and other higher-order directives.

974. In relation to the zoning of specific properties, Ms Belgrave acknowledged the support from twelve submission points[302] to retain the zoning as notified.

975. Lara Kelly's submission point sought a review of the industrial zoned land in Hokitika to ensure that sufficient land is available to accommodate future growth, specifically querying the industrial zoning of land at Kaniere (Lot 3, DP 2887). She also made requests that alternative sites be considered for rezoning at Adair Road and north of Hokitika, between West Drive and along State Highway 6 to One Mile Line Road. In lieu of any technical evidence, Ms Belgrave recommends that the industrial zoning be retained in Kaniere. Regarding the request to consider alternative locations for industrial zoning at Adair Road, Ms Belgrave advises that the council has consented to rural lifestyle development in this area, which has resulted in land fragmentation and the potential for reverse sensitivity effects. Therefore, she considers that it is not a feasible alternative. Similarly, in the West Drive area, a residential plan change has occurred, which creates the potential for reverse sensitivity effects. Ms Belgrave does not support industrial zoning in this area.

976. In Ms Belgrave's S42A Addendum report, she advises that she has been made aware of a submission from Ngāi Tahu (S620.014) that relates to Lot 3 DP 2887 and which was not previously considered. The submission sought to change the zoning of the property to General Rural to reflect the existing use of the property, which is forestry. Ms Belgrave also identifies topographical constraints on the site, and as such, she agrees with Ngāi Tahu that the site is best zoned GRZ as it would be unlikely to support industrial activities. For clarity, Ms Belgrave continues to support the LIZ zoning along the road on Pt RS 4520.

977. In response to the submission point made by Isaac Construction that sought to split zone Lot 2 DP 508311 between GIZ and LIZ, in the absence of any technical evidence, Ms Belgrave does not support the relief sought.

978. However, in her addendum to the S42A report and after considering the statement and evidence presented in support of the submission made by Isaac Construction, Ms Belgrave agrees that retaining 50m of LIZ on Lot 2 DP 508311 as it adjoins the eastern and southeastern

[302] Isaac Construction (S258.001), Westland Milk Products (S63.001, S63.002, S63.006, S63.005 and S63.007), Peter Haddock (S417.001), Lara Kelly (S421.002), Durham Havill (S431.001), Terra Firma Mining Limited (S537.034), Cape Foulwind Stape 1 Ltd (S557.002), T Croft (S460.001)

boundary and rezoning the remainder of the property as GIZ would provide more flexibility and consistency with the application of industrial zones than is currently proposed.

979. In response to the submission point made by Neville Higgs that sought to rezone Pt Lot 116 DP 359532 on the western side of Marsden Road south of Pope Road and between Marsden Road and Sawyers Creek from GIZ to SPZ- FUZ, Ms Belgrave does not support the relief sought. This is because there is a lack of technical information to support the request, and the requested rezoning would create an unusual zoning pattern. Notwithstanding the recommendation, Ms Belgrave acknowledges that the shape of the property is unlikely to be used for industrial purposes; it could potentially create some reverse sensitivity issues with the surrounding residential uses, and the adjoining waterbody also creates potential concerns. Therefore, she acknowledges that the request to rezone the property to FUZ has potential merit and she suggests that the submitter provide technical evidence to allow further consideration.

980. In response to the submission points made by Terra Firma Mining Limited that sought to rezone the access lot adjacent to Reefton Engineering, being Sec 3 SO 12150 to GIZ, Ms Belgrave supports the relief sought. This is because the land is in the same ownership as the surrounding GIZ land, and the existing use means that it is more appropriate for the land to be GIZ than GRZ.

981. In response to the submission point made by Westland Milk Products that sought to rezone Lots 1 and 2 DP 1431 (66 Livingstone Street, Hokitika) from GRZ to LIZ, Ms Belgrave does not support the relief sought. Notwithstanding, she acknowledges that a dairy currently occupies the property, and while not owned by Westland Milk Products, is surrounded by the company's operations on two sides. Ms Belgrave considers that the NCZ would more appropriately align with the existing use of the site. However, she believes that there is currently insufficient information to recommend changing the zone of the property.

982. Ms Belgrave supports the submission point made by Westdrest Limited, which sought to rezone RT WS3A/2 from GIZ to LIZ, on the basis that activities associated with LIZ are likely to have a lesser effect on the adjoining residential land.

983. In response to the submission point made by Joan Blacktopp, which sought amendments to have Lots 2, 3, and 4 DP 459988 zoned either GIZ or LIZ, Ms Belgrave notes that the land is proposed to be zoned LIZ in the pTTPP and, as such, records that no amendment is necessary.

Hearing and Submitter Evidence

984. Isaac Construction Limited presented evidence at the hearing from Ms Kim Seaton and a statement from their Chief Executive Officer, Mr Robert Kinney, in support of their submission to rezone part of the site in Kaiata from LIZ to GIZ. The evidence reiterated the relief sought in the submission, namely that the majority of the site be rezoned to GIZ, while retaining a 50m wide strip on the eastern and southeastern boundaries as LIZ. Mr Kinney's statement set out the existing and anticipated future activities for the site, all of which best align with the GIZ. While Ms Seaton's evidence, which included a S32 evaluation, confirms that the change from LIZ to GIZ is an efficient and effective proposal, with the benefits of rezoning to GIZ outweighing the potential costs, and that GIZ is the more appropriate option for the majority of the site. Her evidence also considers that the retention of a 50m strip of land as LIZ on the eastern and southeastern boundaries will avoid the potential for GIZ activities to generate reverse sensitivity effects on the neighbouring more sensitive zones.

985. Mr Black's evidence for Westland Milk Products provides additional detail about the land at 66 Livingstone Street in Hokitika. The submission sought to rezone this land to LIZ (from GRZ), while Ms Belgrave's S42A report suggested that the NCZ may be more appropriate given the existing use of the property (a corner dairy). Mr Black has considered the S42A suggestion and agrees that NCZ is the most appropriate zone for the land at 66 Livingston Street.

Reporting Officer Reply Evidence

986. In response to Mr Black's evidence for Westland Milk Products relating to 66 Livingstone Street, Ms Belgrave's recommendation to retain the notified zoning of the property is unchanged. She advises that this is because there is no technical evidence to support rezoning or any advice (from the property owner) as to the aspirations for the site.

Hearing Panel's Evaluation

987. In relation to Lara Kelly's submission point that sought a review of the industrial zoned land in Hokitika to ensure that sufficient land is available to accommodate future growth, specifically querying the industrial zoning of land at Kaniere (Lot 3, DP 2887) and her requests that alternative sites be considered for rezoning at Adair Road and north of Hokitika, between West Drive and along State Highway 6 to One Mile Line Road, the Panel agrees with Ms Belgrave not to support the submission in particular we agree that the industrial zoning be retained in Kaniere. We accept Ms Belgrave's reasons for not rezoning the additional land the submitter sought to be rezoned.

988. In relation to the submission from Ngāi Tahu (S620.014) that relates to Lot 3 DP 2887 and sought to change the zoning of the property to General Rural to reflect the existing use of the property, which is forestry, the Panel agrees with Ms Belgrave's recommendation and the reasons for it that Lot 3 DP 2887 be rezoned to GRZ.

989. In relation to the submission point made by Isaac Construction that sought to split zone Lot 2 DP 508311 between GIZ and LIZ the Panel agrees with Ms Belgraves' recommendation and the reasons for it to rezone Lot 2 DP 508311, as detailed in Ms Seaton's evidence, to GIZ and LIZ with the retention of a 50m strip of land as LIZ on the eastern and southeastern boundaries, which will avoid the potential for GIZ activities to generate reverse sensitivity effects on the neighbouring more sensitive zones.

990. In relation to the submission point made by Neville Higgs that sought to rezone Pt Lot 116 DP 359532 on the western side of Marsden Road south of Pope Road and between Marsden Road and Sawyers Creek from GIZ to SPZ-FUZ, the Panel agrees with Ms Belgrave that there is merit for this site in considering rezoning to SPZ-FUZ. We appreciate Ms Belgrave expressed concern about the sufficiency of information available to support the request; however, taking the context of the site into account, we considered we had sufficient information to support the rezoning request and recommend it.

991. In relation to the submission points made by Terra Firma Mining Limited, which sought to rezone the access lot adjacent to Reefton Engineering, being Section 3, SO 12150, to GIZ, Ms Belgrave supports the relief sought. This is because the land is in the same ownership as the surrounding GIZ land, and the existing use makes it more suitable for the land to be used by GIZ than GRZ. The Panel agrees with that recommendation and reasoning.

992. In relation to the submission point made by Westland Milk Products that sought to rezone Lots 1 and 2 DP 1431 (66 Livingstone Street, Hokitika) from GRZ to LIZ, the Panel accepts Mr

Blacks evidence provides sufficient information to support rezoning the site to NCZ. We have therefore recommended the site be rezoned.

993. In relation to the submission point made by Westdrest Limited that sought to rezone RT WS3A/2 from GIZ to LIZ on the basis that activities associated with LIZ are likely to have a lesser effect on the adjoining residential land, the Panel agrees with Ms Belgrave's recommendation to rezone the site for the reasons she provides.

994. In relation to the submission point made by Joan Blacktopp, which sought amendments to have Lots 2, 3, and 4 DP 459988 zoned either GIZ or LIZ, Ms Belgrave notes that the land is proposed to be zoned LIZ in the pTTPP and, as such, records that no amendment is necessary. The Panel agrees with her recommendation for the reasons she provides.

Hearing Panel's Recommendation

995. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted and recommends the following changes to the **Planning Maps**:

Zoning	
Kaniere (Lot 3 DP 2887)	Rezone to GRZ[303]
Fairhall Road, Kaiata, Greymouth	Rezone to GIZ retaining a 50m wide strip LIZ[304]
Marsden Road, Greymouth (Pt Lot 116 DP 359532)	Rezone from LIZ to FUZ[305]
Elizabeth Street, Reefton (Sec 3 SO 12150)	Rezone to GIZ from GRZ [306]
66 Livingstone Street, Hokitika	Rezone from GRZ to NCZ.[307]
West Drive, Arahura Valley, Hokitika (Pt RS 1151)	Rezone from GIZ to LIZ[308]

8.6. General Industrial Zone Overview

Submissions and Further Submissions

[303]Poutini Ngāi Tahu (S620.014)
[304] Isaac Construction (S258.002)
[305] Neville Higgs (S329.002)
[306] Terria Firma Ltd (S537.034)
[307] Westland Milk Products (63.003)
[308] Westdrest Ltd (S93.001)

996. Two submission points relating to the Overview of the General Industrial Zone were summarised in a Table on page 169 of the S42A Report. The Panel has considered the relevant submissions received and adopts the summaries in the s42A Report.

Section 42A Report

997. In response to the submission points made by Silver Fern Farms and Ngāi Tahu that both sought to retain the Overview text as notified for the General Industrial Zone, Ms Belgrave acknowledges the support.

998. The S42A report recommends that the GIZ Overview text be retained as notified.

Hearing and Submitter Evidence

999. No evidence was presented at the hearing in relation to this submission point.

Reporting Officer Reply Evidence

1000. There was no specific consideration of this matter in the reply evidence.

Hearing Panel's Evaluation

1001. The Panel accepts Ms Belgrave's recommendation for the reasons she provides to retain the General Industrial Zone overview as notified.

Hearing Panel's Recommendation

1002. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends no changes to the **General Industrial Zone Overview**.

8.7. General Industrial Zone Rules

Submissions and Further Submissions

1003. Three submission points relating generally to the **GIZ Rules** were summarised in a Table on page 170 of the S42A Report. One submission sought amendments to the rules, and two submissions supported the discretionary activities.

1004. Twenty submission points and eleven further submission points relating to **GIZ – R1** were summarised in a Table on pages 170-174 of the s42A Report. Five submission points supported the retention of the rule as notified. Fifteen submissions sought amendments. Nine further submissions support the amendments sought by the submissions, and two further submissions oppose the amendments sought by the submissions.

1005. Eight submission points relating to **GIZ–R2** were summarised in a Table on page 177 of the s42A Report. Two submission points supported the retention of the rule as notified. Five submissions sought amendments. One submission sought the deletion of the rule.

1006. Seven submission points relating to **GIZ–R3** were summarised in a Table on page 178 of the s42A Report. All submission points supported the retention of the rule as notified.

1007. Eleven submission points relating to **GIZ–R4** were summarised in a Table on pages 179-180 of the s42A Report. Two submission points supported the retention of the rule as notified. Nine submissions sought amendments.

1008. Thirteen submission points relating to **GI - R5** were summarised in a Table on pages 181-182 of the s42A Report. Three submission points supported the retention of the rule as notified. Ten submissions sought amendments.

1009. Eight submission points and three further submissions relating to **GIZ – R6** were summarised in a Table on pages 183-184 of the s42A Report. Three submission points supported the retention of the rule as notified. Five submissions sought amendments.

1010. Six submission points relating to **GIZ – R7** were summarised in a Table on pages 184-185 of the s42A Report. One submission point supported the retention of the rule as notified. Five submissions sought amendments.

1011. Six submission points relating to **GIZ – R8** were summarised in a Table on page 186 of the s42A Report. One submission point supported the retention of the rule as notified. Five submissions sought amendments.

1012. Ten submission points and two further submissions relating to **GIZ – R9** were summarised in a Table on pages 187-189 of the s42A Report. Three submission points supported the retention of the rule as notified. Six submissions sought amendments. One submission sought that the rule be deleted.

1013. Seven submission points and one further submission relating to **GIZ – R10** were summarised in a Table on page 190 of the s42A Report. Five submission points supported the retention of the rule as notified. One submission sought amendments, while another sought its deletion.

1014. Two submission points relating to **GIZ – R11** were summarised in a Table on page 191 of the s42A Report. One submission point supported the retention of the rule as notified. One submission sought amendments.

1015. Six submission points relating to **GIZ – R12** were summarised in a Table on pages 191-192 of the s42A Report. Five submission points supported the retention of the rule as notified. One submission sought amendments.

1016. Two submission points relating to **GIZ – R13** were summarised in a Table on page 193 of the s42A Report. One submission point supported the retention of the rule as notified, while another sought to delete it.

1017. Four submission points and one further submission relating to **GIZ – R14** were summarised in a Table on pages 193-194 of the s42A Report. Three submission points supported the retention of the rule as notified, and one submission sought to delete it.

1018. Six submission points and two further submissions relating to **GIZ – R15** were summarised in a Table on pages 194-195 of the s42A Report. One submission point supported the retention of the rule as notified, and five submissions sought to amend it.

1019. The Panel adopts these summaries and has considered all the relevant submissions and further submissions.

Section 42A Report

GIZ - General

1020. Ms Belgrave acknowledged the support from William McLaughlin and Laura Coll McLaughlin who both support the discretionary activity rules in the GIZ as notified.

1021. In response to the submission point from Ngāi Tahu that sought to include a new matter of discretion to consider the effects on sites and areas of significance to Māori for all restricted discretionary activities, Ms Belgrave does not support the relief sought. This is because new buildings and structures within sites and areas of significance to Māori require resource consent under SASM-R6 unless a written approval is provided. Therefore, the concerns raised in the submission from Ngāi Tahu are managed by SASM-R6, and the inclusion of the requested matter of discretion is not necessary in the GIZ.

1022. The S42A report recommends no changes in response to these submissions.

GIZ – R1 Industrial Activities and Industrial Buildings

1023. Ms Belgrave acknowledged the support from the five submission points[309] who support the rule as notified. This is subject to the recommended amendments outlined below.

1024. Ms Belgrave acknowledges the submission point from GDC that sought to ensure the standards do not create unrealistic or unsuitable requirements. She recommends various amendments to the rule based on other submissions and notes this submission.

1025. In response to the submission point made by Waka Kotahi, which sought clarification on whether the requirements of the rule should be considered performance standards, and if so, whether the activities part of the rule should be separate from the buildings, Ms Belgrave generally supports the relief sought. The submission is similar to others made by Waka Kotahi in other zones, and Ms Belgrave's recommendation for a new rule that provides for the activities referred to in GIZ-R1 aligns with her previous recommendations.

1026. In response to the submission point made by Westland Milk Products that sought to make non-compliance with GIZ-R1(8) a restricted discretionary activity, Ms Belgrave supports the relief sought in part. Four further submissions also support the submission[310]. This is because the potential effects associated with non-compliance with GIZ-R1(2)-(8) can be readily identified. However, she maintains that any non-compliance with the height rule (GIZ-R1(1)) should remain as a discretionary activity. Because of this recommendation, Ms Belgrave has recommended that additional matters of discretion be included at GIZ-R9.

1027. As a result of the evidence from Mr Richard Black, Ms Belgrave reconsidered the activity status that should apply to non-compliance with the height rule. She revised her position on the basis that there is a functional need for industrial activities to exceed the permitted height limit. Additionally, other rules will manage the potential effects associated with building bulk and industrial sites, which generally tend to be larger in size, thereby providing opportunities to internalise potential effects. Consequential amendments to GIZ-R9 are also proposed in the form of matters of discretion.

1028. In response to the submission points made by Westland Milk Products and BDC, which sought various amendments to the building setback rules, Ms Belgrave supports the reduction in the

[309] Te Mana Ora (Community and Public Health) of the NPHS/Te Whatu Ora (S190.800), Chris & Jan Coll (S558.364), Chris J Coll Surveying Limited (S566.364), William McLaughlin (S567.421), and Laura Coll Mclaughlin (S574.364)
[310] Silver Fern Farms (FS.101.034), Isaac Construction Ltd. (FS106.004), and CMP Kokiri (FS135.001, FS135.011)

setback from a road boundary from 5m to 2m, as sought by Westland Milk Products. Consequently, she does not support the increase in setback from roads from 5m to 10m, as sought by BDC. The BDC submission also sought to increase the setback from 5m to 10m with respect to adjoining sensitive zones. Ms Belgrave does not support this relief either.

1029. In response to the submission point from BDC that sought to make amendments to GIZ-R1(4), adding a minimum fence height and ensuring it is solid, Ms Belgrave does not support the relief sought.

1030. Ms Belgrave supports the relief sought by BDC concerning GIZ-R1(5) to delete the words '*beyond the zone boundary'* as it will improve the clarity of the rule.

1031. In response to the three submission points[311] that sought to delete GIZ-R1(6) on the basis that air discharges are a regional council function, Ms Belgrave supports the relief sought. This recommendation will also address the submission points from BDC and Birchfield Mining Limited, which sought a correction to the LIZ reference. Consequent to the recommendation to delete GIZ-R1(6), Ms Belgrave does not support the relief sought in the submission points made by Buller Conservation Group and Frida Inta to make additions relating to odour or air pollution.

1032. Ms Belgrave supports the relief sought by Westland Milk Products to amend GIZ-R1(7) to exclude access points from the landscaping requirements.

1033. In response to the submission points[312] that relate to GIZ-R1(8) Ms Belgrave agrees that the discharge of stormwater is a regional council function. However, the rule relates to the treatment of stormwater prior to discharge and is therefore relevant under the district plan. Nevertheless, she recommends amendments to the wording of the rule.

1034. As a result of the evidence from Mr Richard Black regarding the management of stormwater, Ms Belgrave reconsidered her recommendation for the wording of GIZ-R1(8) in her addendum to the S42A report. She agrees that stormwater treatment can be required by other rules in the pTTPP and that GIZ-R1(8) should not create unnecessary duplication. On that basis, she recommends amendments to confirm that treatment is required for car parking areas greater than 1,000m² and to exclude areas that discharge lawfully into a trade waste system. While Ms Belgrave does not support excluding the treatment of stormwater from roof areas, she does recommend deleting the word '*contaminated*' as it creates uncertainty for when treatment is necessary.

1035. In response to the submission point made by BDC, which sought amendments to GIZ-R1(9) to include a reference to written approvals as an advice note, Ms Belgrave agrees that this is more appropriately included as such, similar to her previous recommendations on the same matter. She does recommend that the word '*setbacks*' be replaced by '*rules*'.

1036. Ms Belgrave also makes a recommendation that is consequential to the submission made by BDC in relation to LIZ-R1(9) to include a reference to Appendix 2 instead of a 35 degree recession plane.

1037. In response to the submission points made by Fire and Emergency NZ that sought the inclusion of two new rules relating to water supply servicing, Ms Belgrave does not support the relief

[311] Buller District Council (S538.443), Birchfield Ross Mining Limited (S604.073), and Whyte Gold Limited (S607.058)
[312] Silver Fern Farms (S441.057), Buller District Council (S538.443), Birchfield Ross Mining Limited (S604.120), and Whyte Gold Limited (S607.094)

sought. This is for the same reasons set out with respect to other zones in this decision that respond to similar submissions from FENZ.

1038. The S42A report (including the addendum) recommends amending GIZ-R1 as follows:

> ***GIZ-R1 New Buildings and External Additions and Alterations to Existing Buildings, Landscaping, External Storage, and Blasting and Vibration ~~Industrial Activities and Industrial Buildings~~***
>
> *Activity Status Permitted*
>
> *Activity status where compliance not achieved:*
>
> ***~~Discretionary where Standards 1-8 are not complied with.~~***
>
> *Restricted discretionary where **Rules 1-8 are ~~Standard 9~~** is not complied with.*
>
> *Where:*
>
> *…*
>
> *3. Buildings are setback a minimum:*
>
> *a. 10m from State Highways; **~~and~~***
>
> ***b. 2m from road boundaries; and***
>
> *c. 5m from **~~road boundaries~~**, any RESZ - Residential Zone, OSRZ - Open Space and Recreation Zone or SETZ - Settlement Zone boundary and the Rail Corridor.*
>
> *…*
>
> *5. No blasting or vibration **~~beyond the zone boundary~~** shall occur outside the hours of 0800 to 1800 hours weekdays and 0900 to 1600 hours on weekends and public holidays;*
>
> ***~~6. There shall be no offensive or objectionable dust nuisance at or beyond the LIZ - Light Industrial Zone boundary as a result of the activity;~~***
>
> *7. The area adjoining the road frontage of all sites **(excluding access points),** and the side boundary of a site that adjoins a RESZ - Residential, SETZ - Settlement, OSZ - Open Space or MUZ - Mixed Use Zone shall contain landscaping with a minimum width of 2 metres, of a standard that does not restrict road visibility, or obstruct signage or accessways within the road corridor;*
>
> *8. **~~Contaminated~~** stormwater run-off associated with any industrial activity**, ~~or~~** building, **and associated impermeable parking areas greater than 1,000m² ~~including stormwater runoff from any earthworks,~~** shall be collected and treated prior to discharge**. This rule does not apply to areas that discharge lawfully into an authorised trade waste system. ~~to ensure there are no significant adverse effects on water quality~~**;*
>
> *9. No building shall project beyond a building envelope **in accordance with Appendix Two ~~defined by a 35 degree recession plane~~** to commence 2.5m above any RESZ - Residential, OSZ - Open Space, SARZ - Sport and Recreation Zone, MUZ – Mixed Use or SETZ - Settlement Zone boundary **~~except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~**. This standard does not apply to:*
>
> *a. …*
>
> *…*
>
> *Advice Notes:*
>
> *…*
>
> ***4. Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.***

1039. The S42A report also recommends the addition of a new rule as follows:

> ***GIZ-R2A Industrial Activities***
>
> ***Activity Status Permitted***
>
> ***Activity status where compliance not achieved: Restricted Discretionary***
>
> ***Where:***
>
> ***1. All performance standards for Rule GIZ - R1 are complied with.***

GIZ – R2 Minor Structures

1040. Ms Belgrave acknowledged the support from Te Mana Ora and FENZ who support the rule as notified. This is subject to the recommended amendments outlined below.

1041. In response to the five submission points[313] that sought GIZ-R2(1) be deleted, Ms Belgrave supports the relief sought. This is because the potential effects of structures can be appropriately managed through the other rules for maximum height and area, and that compliance with the rules within GIZ-R1 is not necessary or applicable. Additionally, GIZ-R2.1 specifically excludes any setback requirement.

1042. In response to the submission point made by Silver Fern Farms that sought to delete GIZ-R2 in full, Ms Belgrave does not support the relief sought. The submitter considers that the implementation of the rule is unclear in the context of GIZ-R1. Ms Belgrave considers that the rule provides exemptions for minor structures and is helpful in this context.

1043. The S42A report recommends amending GIZ-R2 as follows

> ***GIZ-R2 Minor Structures***
>
> *Activity Status permitted*
>
> *Activity status where compliance not achieved: Restricted Discretionary*
>
> *Where:*
>
> ~~***1. All performance standards for Rule GIZ - R1 are complied with - except that compliance with standard 3 (setbacks) is not required.***~~
>
> *…*

GIZ – R3 Fences, Walls and Retaining Walls

1044. Ms Belgrave acknowledged the support from the submitters[314] who support the rule as notified.

1045. The S42A report recommends retaining GIZ-R3 as notified.

GIZ – R4 Commercial Activities

[313] Buller District Council (S538.444), Chris & Jan Coll (S558.365), Chris J Coll Surveying Limited (S566.365), William McLaughlin (S567.422), and Laura Coll McLaughlin (S574.365)

[314] Te Mana Ora (Community and Public Health) of the NPHS/Te Whatu Ora (S190.802), Chris & Jan Coll (S558.366), Buller District Council (S538.445), Chris J Coll Surveying Limited (S566.366), William McLaughlin (S567.423), Fire and Emergency New Zealand (S573.106), and Laura Coll McLaughlin (S574.366)

1046. Ms Belgrave acknowledged the support from Te Mana Ora and FENZ who support the rule as notified. This is subject to the recommended amendments that are set out below.

1047. In response to the five submission points[315] that sought to change the activity status for non-compliance from non-complying to discretionary, Ms Belgrave does not support the relief sought. She recommends retaining the non-complying activity status for GIZ-R4(2) which seeks to limit the scale of commercial activities in the GIZ, as large-scale commercial activities have the potential to undermine the primary purpose of the zone. With respect to non-compliance with GIZ-R4(1), Ms Belgrave recommends a restricted discretionary activity status which is consequential to the relief sought by Westland Milk Products in relation to GIZ-R1.

1048. Ms Belgrave does not support the relief sought by the four submission points[316] that sought to amend GIZ-R4(1) to also enable activities that do not increase the extent of existing non-compliance with the relevant performance standards. This is because she considers it more appropriate that any non-compliance be considered thoroughly either to determine existing use rights or as a resource consent. Her recommendation aligns with similar submissions in relation to COMZ-R6.

1049. The S42A report recommends amending GIZ-R4 as follows, noting that these recommendations also include consequential changes related to the recommendations to GIZ-R1:

> ***GIZ-R4 Commercial Activities***
>
> *Activity Status permitted*
>
> *Activity status where compliance not achieved:*
>
> ***Restricted Discretionary where standard 1 is not complied with***
>
> *Non-complying* ***where standard 2 is not complied with***
>
> *Where:*
>
> *1. All performance standards for Rule GIZ - R1****.4 to GIZ – R1.7*** *are complied with; and*
>
> …

GIZ – R5 Ancillary Residential Activities

1050. Ms Belgrave acknowledged the support from Te Mana Ora, Waka Kotahi and FENZ who support the rule as notified. This is subject to the recommended amendments outlined below.

1051. In response to the submission point made by BDC that sought to delete the word '*single*' from GIZ-R5(2), Ms Belgrave supports the relief sought as it simplifies the rule.

1052. Ms Belgrave does not support the submission point made by Silver Fern Farms that sought to delete GIZ-R5(2), which limits ancillary residential units to one per site. She considers that the restriction is appropriate as it will ensure that any residential units are of a scale and intensity that is ancillary to a commercial or industrial activity.

[315] Buller District Council (S538.446), Chris & Jan Coll (S558.368), Chris J Coll Surveying Limited (S566.368), William McLaughlin (S567.425), and Laura Coll McLaughlin (S574.368)
[316] Chris & Jan Coll (S558.367), Chris J Coll Surveying Limited (S566.367), William McLaughlin (S567.424), and Laura Coll McLaughlin (S574.367)

1053. In response to the four submission points[317] that sought to amend GIZ-R5(1) also to enable activities that do not increase the extent of existing non-compliance with the relevant performance standards, Ms Belgrave does not support the relief sought for the same reasons already set out in relation to GIZ-R4 (and other rules).

1054. In response to the four submission points[318] that sought to change the activity status for non-compliance from non-complying to discretionary, Ms Belgrave does not support the relief sought. This is because she considers a non-complying activity status is appropriate as large-scale residential activities, or a proliferation of residential activities have the potential to undermine the purpose of the GIZ and are not anticipated within the GIZ.

1055. The S42A report recommends amending GIZ-R5 as follows:

> ***GIZ-R5 Ancillary Residential Activities***
>
> *Activity Status permitted*
>
> *Activity status where compliance not achieved: Non-complying*
>
> *Where:*
>
> *1. …*
>
> *2. One* ~~***single***~~ *residential unit per site is provided; and*
>
> *3. …*

GIZ – R6 Emergency Service Facility, Carparking Lots and Buildings, Trade and Industry Training, Community Corrections Activity, Gymnasium and Public Transport Facility

1056. Ms Belgrave acknowledged the support from Te Mana Ora, Department of Corrections and FENZ, who support the rule as notified.

1057. In response to the submission point made by BDC that sought to add a definition for '*public transport facility*', Ms Belgrave does not support the relief sought on the basis that the ordinary meaning of the term provides sufficient certainty.

1058. In response to the four submission points and three further submission points[319] that sought to amend GIZ-R6(1) also to enable activities that do not increase the extent of existing non-compliance with the relevant performance standards, Ms Belgrave does not support the relief sought for the same reasons already set out in relation to previous rules.

1059. The S42A report recommends retaining GIZ-R6 as notified.

GIZ – R7 Agricultural, Pastoral and Horticultural Activities

1060. Ms Belgrave acknowledged the support from Te Mana Ora, who support the rule as notified.

1061. In response to the four submission points[320] that sought to amend GIZ-R7(1) also to enable activities that do not increase the extent of existing non-compliance with the relevant

[317] Chris & Jan Coll (S558.369), Chris J Coll Surveying Limited (S566.369), William McLaughlin (S567.426), and Laura Coll McLaughlin (S574.369)
[318] Chris & Jan Coll (S558.370), Chris J Coll Surveying Limited (S566.370), William McLaughlin (S567.427), and Laura Coll McLaughlin (S574.370)
[319] Chris & Jan Coll (S558.371), Chris J Coll Surveying Limited (S566.371), William McLaughlin (S567.428), and Laura Coll McLaughlin (S574.371), International Panel and Lumber (West Coast) Ltd (FS98.002, FS98.003, FS98.004)
[320] Chris & Jan Coll (S558.372), Chris J Coll Surveying Limited (S566.372), William McLaughlin (S567.429), and Laura Coll McLaughlin (S574.372)

performance standards, Ms Belgrave does not support the relief sought for the same reasons already set out in relation to previous similar rules.

1062. In response to the submission point made by BDC that sought to add definitions to the pTTPP, Ms Belgrave comments that the terms do not apply to this rule.

1063. The S42A report recommends retaining GIZ-R7 as notified.

GIZ – R8 Aquacultural Activities

1064. Ms Belgrave acknowledged the support from Te Mana Ora, who support the rule as notified.

1065. In response to the submission point made by BDC that sought to add a definition for '*aquaculture activities'*, Ms Belgrave does not support the relief sought on the basis that the term is defined in the RMA, and duplication in the pTTPP is not considered necessary.

1066. In response to the four submission points[321] that sought to amend GIZ-R8(1) to also enable activities that do not increase the extent of existing non-compliance with the relevant performance standards, Ms Belgrave does not support the relief sought for the same reasons already set out in relation to previous rules.

1067. The S42A report recommends retaining GIZ-R8 as notified.

GIZ – R9 Industrial Activities and Buildings not meeting Permitted Activity Standards

1068. Ms Belgrave acknowledged the support from Te Mana Ora, Waka Kotahi and Grey District Council who support the rule as notified. This is subject to the recommended amendments outlined below.

1069. In response to the submission points[322] that sought to change details relating to the activity status for non-compliance with this rule, Ms Belgrave considers that a restricted discretionary activity status is appropriate, except for building height. As such, Ms Belgrave does not support BDC's submission to have all non-compliances assessed as a discretionary activity. Furthermore, she does partially support Westland Milk Products' submission to have the restricted discretionary activity status apply to most non-compliances with GIZ-R1 (the only exception being height). However, she does not support the addition of the matters of discretion sought by Westland Milk Products, and instead recommends the following matters:

- *Bulk, location, and design of buildings.*
- *Effects on the safety, amenity and attractiveness of the street or public places.*
- *Visual dominance, shading, and nuisance effects on neighbouring sites.*
- *Design and location of parking and access.*
- *Landscape treatment.*

1070. As a result of the evidence from Mr Richard Black for Westland Milk Products, (and as set out in relation to GIZ-R1), Ms Belgrave reconsidered the activity status that should apply to non-compliance with the height rule, and ultimately has recommended that as there is a functional need for industrial activities to exceed the permitted height limit it is appropriate in this zone to include all non-compliances with GIZ-R1 as a restricted discretionary activity.

[321] Chris & Jan Coll (S558.374), Chris J Coll Surveying Limited (S566.374), William McLaughlin (S567.430), and Laura Coll McLaughlin (S574.374)
[322] Westland Milk Products (S63.012) & Buller District Council (S538.451)

Consequential amendments to GIZ-R9 are also proposed in the form of matters of discretion as follows:

- *Bulk, location, and design of buildings.*
- *Effects on the safety, amenity and attractiveness of the street or public places.*
- ***Amenity,*** *visual dominance, shading, and nuisance effects on neighbouring sites.*
- *Design and location of parking and access.*
- *Landscape treatment.*
- ***Characteristics of the site and development that are relevant to the rule.***

1071. In response to the submission point made by Silver Fern Farms that sought to delete the matter of discretion relating to hazardous substances (GIZ-R9(c)), Ms Belgrave supports the deletion as it does not have a clear relationship with the rules as notified in GIZ-R1.

1072. In response to the four submission points[323] that sought to amend GIZ-R9(1) also to enable activities that do not increase the extent of existing non-compliance with the relevant performance standards, Ms Belgrave does not support the relief sought for the same reasons already set out in relation to previous rules.

1073. The S42A report (including the addendum) recommends amending GIZ-R9 as follows:

GIZ-R9 ~~Industrial Activities and~~ New Buildings and External Additions and Alterations to Existing Buildings not meeting Permitted Activity standards

Activity Status Restricted Discretionary

Activity status where compliance not achieved: Discretionary

Where:

~~1. The building projects in the recession plane; and~~

2. ***~~All other performance standards for~~*** *Rule GIZ – R1****.1 ~~are~~ is*** *complied with.*

Discretion is restricted to:

~~a. Design and location of buildings;~~

~~b. Design and location of parking and access;~~

~~c. Management of hazardous substances in accordance with the objectives and policies of the Hazardous Substances chapter; and~~

~~d. Landscape treatment.~~

a. Bulk, location, and design of buildings.

b. Effects on the safety, amenity and attractiveness of the street and public places.

c. Amenity, visual dominance, shading, and nuisance effects on neighbouring sites.

d. Design and location of parking and access.

e. Landscape treatment.

f. Characteristics of the site and development that are relevant to the rule

GIZ – R10 Minor Structures not meeting Permitted Activity Standards

[323] Chris & Jan Coll (S558.375), Chris J Coll Surveying Limited (S566.375), William McLaughlin (S567.431), and Laura Coll McLaughlin (S574.375)

1074. Ms Belgrave acknowledged the support from five submitters[324] who support the rule as notified.

1075. In response to the submission point made by Silver Fern Farms that sought to delete GIZ-R10 as a consequence of their submission to delete GIZ-R2, Ms Belgrave does not support the submission as her recommendation regarding GIZ-R2 is to retain the rule.

1076. Ms Belgrave does not support the minor amendment to the matter of discretion relating to landscaping as sought by BDC. She considers the matter of discretion to be sufficiently clear and the amendment unnecessary.

1077. The S42A report recommends retaining GIZ-R10 as notified.

GIZ – R11 Fences, Walls and Retaining Walls not meeting Permitted Activity Standards

1078. Ms Belgrave acknowledged the support from Te Mana Ora who support the rule as notified.

1079. Ms Belgrave does not support the minor amendment to the matter of discretion relating to landscaping as sought by BDC. She considers the matter of discretion to be sufficiently clear and the amendment unnecessary.

1080. The S42A report recommends retaining GIZ-R11 as notified.

GIZ – R12 Industrial Activities and Buildings, Aquaculture Activities, Agricultural, Pastoral and Horticultural Activities not meeting Permitted or Restricted Discretionary Activity Standards

1081. Ms Belgrave acknowledged the support from the five submitters[325] who support the rule as notified. This is subject to the recommended amendments outlined below.

1082. In response to the submission point made by BDC that sought to delete GRZ-R12, Ms Belgrave supports the relief sought, given the recommendations to amend GIZ-R1 and GRZ-R9. Additionally, a discretionary activity status is already provided for under GIZ-R7 and GIZ-R8 for those particular activities.

1083. The S42A report recommends deleting GIZ-R12.

GIZ – R13 Emergency Service Facility, Carparking Lots and Buildings, Trade and Industry Training, Community Corrections Activity, Gymnasium, Public Transport Facility and Bulk Fuel Supply Infrastructure not meeting Permitted Activity Standards

1084. Ms Belgrave acknowledged the support from Te Mana Ora who support the rule as notified.

1085. In response to the submission point made by BDC that sought to delete GRZ-R13, Ms Belgrave supports the relief sought, as a discretionary activity status is already provided for under GIZ-R6 for these activities.

1086. The S42A report recommends deleting GIZ-R13.

[324] Te Mana Ora (S190.809), Chris & Jan Coll (S558.376), Chris J Coll Surveying Limited (S566.376), William McLaughlin (S567.432), and Laura Coll McLaughlin (S574.376)
[325] Te Mana Ora (Community and Public Health) of the NPHS/Te Whatu Ora (S190.811), Chris & Jan Coll (S558.377), Chris J Coll Surveying Limited (S566.377), William McLaughlin (S567.433), and Laura Coll McLaughlin (S574.377)

GIZ – R14 Community Facilities and Educational Facilities

1087. Ms Belgrave acknowledged the support from Te Mana Ora, the Ministry of Education and Chris & Jan Coll, who support the rule as notified. This is subject to the recommended amendments outlined below.

1088. In response to the submission point from BDC that sought to delete GRZ-R14 and replace it with an alternative rule that would result in Community Facilities and Educational Activities being non-complying activities, Ms Belgrave supports the relief sought in part. She considers that in some instances, some educational facilities may have an operational need to locate within the GIZ and be close to other industrial activities. However, she agrees with the BDC that community facilities are generally not anticipated in the GIZ, and she recommends that the catch-all rule under GIZ-R15 be used to manage this activity.

1089. In Ms Belgrave's addendum report, she acknowledges the evidence of Mr Tuck for Silver Fern Farms, who made a further submission to support the retention of the rule partially. The matter raised was with respect to educational activities, and Ms Belgrave agrees that the terminology should be amended to '*educational facilities'* to be in line with the National Planning Standards. Furthermore, the addition of '*tertiary*' to describe the type of educational facilities that might be appropriate in the GIZ responds to the concerns in Mr Tuck's evidence.

1090. The S42A report (including the addendum) recommends amending GIZ-R14 as follows:

> ***GIZ-R14 ~~Community Facilities~~ and Tertiary Education Facilities ~~Activities~~***
>
> *Activity Status Discretionary*
>
> *Activity status where compliance not achieved: N/A*

GIZ – R15 Any Activities not provided for by another Rule in the zone

1091. Ms Belgrave acknowledged the support from Te Mana Ora, who support the rule as notified. This is subject to the recommended amendments outlined below.

1092. In response to the four submission points[326] that sought to amend the non-complying activity status to discretionary, Ms Belgrave does not support the relief sought as she considers a non-complying activity status is more appropriate to manage activities that are not anticipated within the GIZ. This also addresses the consequential matter of the BDC submission, which sought to amend the non-complying rule to apply only to residential activities, community facilities, education facilities, and health facilities, while all other activities would remain discretionary. As set out in relation to GIZ-R14, Ms Belgrave agrees that some educational facilities are discretionary, but she considers all others are non-compliant with the GIZ.

1093. The S42A report recommends retaining GIZ-R15 as notified.

Hearing and Submitter Evidence

1094. Ms Richard Black's evidence for Westland Milk Products acknowledges that the S42A report accepts in part the change in activity status for any non-compliance with rules in GIZ-R1. He comments on the S42A recommendation for GIZ-R9. While he generally agrees with the recommendation, he reiterates the submission point that a restricted discretionary activity

[326] Chris & Jan Coll (S558.379), Chris J Coll Surveying Limited (S566.379), William McLaughlin (S567.435), and Laura Coll McLaughlin (S574.379)

status should also apply to any non-compliance with the height limit. He accepts the amended list of matters that discretion is restricted to, but seeks to add one additional matter being:

- *Effects on built form and character of the surrounding area.*

1095. Mr Richard Black's evidence for Westland Milk Products confirms that he generally supports the amendments to the stormwater standard as it provides for the appropriate management of contaminated stormwater runoff. However, he remains concerned that the rule may require treating stormwater where the risk of contaminants entering stormwater runoff is no greater than that for non-industrial uses. Therefore, he suggests the following wording for GIZ-R1(8):

> *Contaminated stormwater run-off associated with any industrial activity or building, **~~including stormwater runoff from any earthworks,~~** shall be collected and treated prior to discharge **~~to ensure there are no significant adverse effects on water quality.~~** **This requirement applies only in areas where an activity may result in the discharge of environmentally hazardous substances and excludes the following areas:***
>
> - ***all areas that discharge lawfully into an authorised trade waste system;***
> - ***areas not used for the industrial or trade process, including vehicle access and car parking areas; and***
> - ***building roof areas.***

1096. Mr Steve Tuck's evidence for Silver Fern Farms discusses the stormwater management controls of GIZ-R1(8)[327]. He reiterates that the management of stormwater discharges is regulated by the Regional Council and, as such, supports deleting GIZ-R1(8) in its entirety to avoid duplication of regulation.

1097. Mr Tuck's evidence discusses GIZ-R14 and whether educational activities/facilities should be a discretionary or non-complying activity in the GIZ. His position comes from managing reverse sensitivity effects. He acknowledges that in some instances it could be appropriate for educational facilities to be in the GIZ, but a non-complying activity status is an efficient way to manage these activities. Nevertheless, he does offer an alternative that would apply a discretionary activity status to specific educational facilities, such as trade training or laboratories.

1098. Mr Tuck's evidence also suggests using the term '*educational facilities'*, which is in line with the National Planning Standards.

1099. Mr Tuck's evidence for Silver Fern Farms accepts the S42A recommendation with respect to GIZ-R5, GIZ-R9, GIZ-R10 and GIZ-R15.

1100. The joint statement presented by Ms Frida Inta and Buller Conservation Group reiterates their previous comments regarding the confusion between the matters GIZ-R1 seeks to control. The statement notes that, despite the intention to separate spatial controls (activities) from performance standards (building controls), this has not been completely achieved.

1101. Ms Inta's statement also reiterates her submission that odour should be included in GIZ-R1(6). She considers that both dust and odour can result from activities taking place in the GIZ, and therefore it is appropriate for a district plan to include rules to manage these effects.

[327] Renumbered to GIZ-R1(7) in the S42A report

1102. Mr Tuck's evidence for Silver Fern Farms accepts the S42A report recommendation concerning GIZ-R2.

1103. Mr George van Pelt tabled a letter at the hearing on behalf of FENZ. While the letter acknowledges that they will not pursue the submission point relating to the provision of water supply, it does note that the Building Act 2004 alone does not adequately provide for the provision of water supply (including firefighting water supply) to new development.

Reporting Officer Reply Evidence

1104. Consequential to the separation of GIZ-R1 into two rules (one for building controls and one for activities) and in response to Ms Inta's statement that was presented at the hearing, Ms Belgrave supports several amendments to restructure and relocate standards between the relevant rules. This has resulted in amendments to all the Commercial and Industrial chapters. However, the wording and intent of the provisions have not changed through this process, and no new additions have been made to the requirements of the standards.

1105. For the amendments to GIZ-R1, as with the Commercial and Industrial chapters, Ms Belgrave has relied upon the Waka Kotahi submissions, which for this chapter is, S450.231, to bring about significant changes to GIZ-R1 and subsequent rules, particularly the reallocation of standards between the rules in this chapter. which sought,

However, the rule has been identified as the performance standards for subsequent rules, but R1 does not state that it is a performance standard and only relates to the activities listed in the heading. The subsequent rules don't always relate back to the activities in the headings, e.g., minor structures, fences, walls, or retaining walls. It is recommended that GIZ-R1 be amended to clarify the intent of the rule as to whether these are considered as performance standards, and if so, a new separate rule should be created for the activities listed in the heading.

1106. In response to the Panel's discussion and questions regarding whether odour can be an amenity issue and therefore a matter for consideration in the pTTPP, Ms Belgrave advises that she considers it to be relevant. Notwithstanding that, she does not think it appropriate to manage these effects in the GIZ (or the LIZ) as the purpose of these zones is to accommodate industrial activities that are recognised to generate adverse amenity effects, including odour. Therefore, Ms Belgrave continues to support the deletion of GIZ-R1(6) and rejecting the submission points made by Ms Frida Inta and Buller Conservation Group. She notes that the environmental effects of air discharges are appropriately managed under the West Coast Regional Air Quality Plan.

1107. During the hearing, the Panel queried the lawfulness of the stormwater rules as well as whether a definition of '*contaminated*' was needed. As set out in the right of reply, Ms Belgrave confirms that Wynn Williams has confirmed it is lawful for there to be an overlap in provisions between the pTTPP and the Regional Land and Water Plan. Specifically, as GIZ-R1(7) seeks to manage the effects of land use on water quality (rather than the actual discharge), the rule is lawful.

1108. Ms Belgrave's right of reply sets out that she considers rules related to stormwater in the GIZ are appropriate, particularly as impervious areas within the Industrial Zones have the most significant risk of pollutants entering the reticulated network through stormwater runoff flows when compared to other urban zones. She confirms that she considers that the rule will not create duplication with the Regional Plan. Further, she believes that the rule gives effect to

provisions related to water quality in the NPS-FW and the West Coast Regional Policy Statement.

1109. In response to the Panel's question as to the need for a definition of *'contaminated'*, Ms Belgrave advises that the reworded stormwater rule no longer includes the word, negating the need (or otherwise) for a definition. It is her view that the revised wording improves the clarity of the rule.

1110. In her right of reply, Ms Belgrave offered additional assessment and consideration of the term '*residential unit'* concerning GIZ-R5 (and LIZ-R3). She reiterates that, in her opinion, only one residential unit should be permitted in the GIZ.

1111. Ms Belgrave's right of reply reconsiders the activity status for '*community facilities'* and '*educational facilities'* in the GIZ (and the LIZ) and whether they are equal in terms of effects. Ms Belgrave has recommended that only tertiary educational facilities be provided for as a discretionary activity where there is an operational need to do so. It is Ms Belgrave's opinion that all other educational facilities and community facilities could have reverse sensitivity effects in the GIZ. As such she reiterates that a non-complying activity status is appropriate.

1112. Ms Belgrave's recommended wording for GIZ-R9 includes a correction consequential to Mr Black's evidence on behalf of Westland Milk Products to delete GIZ-R9(2) completely.

Hearing Panel's Evaluation

GRZ-R1

1113. In relation to GIZ-R1, Ms Belgrave recommends many amendments to that rule, as well as creating a new rule and recommending additional changes to other rules. We have carefully considered the scope available to support making those amendments. We consider the Waka Kotahi submission s450.231the Waka Kotahi submission, which addresses moving the standards for the zone into a separate table with all rules referring to those standards, provides significant flexibility in moving standards from the various rules. We agree with her that her reply recommendations do not alter the intent of the rules, nor does the shifting of multiple standards between the rules make complying with the rules more onerous.

1114. In reaching our recommendations, we have given more weight to the Waka Kotahi submission than to the evidence provided by Ms Inta at the hearing. We do accept, though, that the evidence did reference the Waka Kotahi submission, and it was critical that the Officer had not recommended sufficient changes to give effect to that submission. Additionally, Ms Initas' own submission, albeit a general one, sought to simplify Plan provisions, and to a limited extent, we rely on that submission to support our recommendations set out below.

1115. Taking into account the above and Ms Belgrave's reasons, particularly those in her reply, the Panel recommend that GIZ-R1 be amended, including its heading, as set out below, including the removal of standards to other rules and the addition of standards from different rules, as well as including new rules. We consider the approach of differentiating between Industrial and Commercial activities and building is appropriate in the context of the Industrial zones. We note that this generates a number of amendments to the rules.

1116. In relation to the setback rules the submission points made by Westland Milk Products and BDC, sought various amendments. Ms Belgrave supported the reduction in the setback from a road boundary from 5m to 2m, as sought by Westland Milk Products. Consequently, she does not support the increase in setback from roads from 5m to 10m, as sought by BDC. The

BDC submission also sought to increase the setback from 5m to 10m with respect to adjoining sensitive zones. Ms Belgrave does not support this relief either. The Panel agrees with her recommendations on setbacks for the reasons she provides.

1117. The Panel agrees with Ms Belgrave's recommendation to relocate both standards 4 and 5, as notified, to GIZ-R3A and GIZ-R4, respectively. She recommends relocation to address the submission point made by Waka Kotahi.

1118. In response to the three submission points[328] that sought to delete GIZ-R1(6), as notified, on the basis that air discharges are a regional council function, Ms Belgrave supports the relief sought. This recommendation will also address the submission points from BDC and Birchfield Mining Limited, which sought a correction to the LIZ reference. Consequent to the recommendation to delete GIZ-R1(6), Ms Belgrave does not support the relief sought in the submission points made by Buller Conservation Group and Frida Inta to make additions relating to odour or air pollution. The Panel agrees with this recommendation and the reasons Ms Belgrave provides to support it.

1119. The Panel agrees with Ms Belgrave's recommendation to support the relief sought by Westland Milk Products to amend GIZ-R1(7), as notified, to exclude access points from the landscaping requirements as a practical outcome.

1120. The Panel acknowledges Ms Belgrave's recommendation arising from her consideration of the evidence from Mr Richard Black regarding the management of stormwater. We also acknowledge the Wynn Williams legal opinion confirming that a district plan can regulate stormwater quality prior to discharge.

1121. However, when the Panel considers the proposed rules which deal with stormwater alongside the reality of how developments take place, we do not consider there is a need to regulate stormwater. When development such as a subdivision is consented conditions imposed by the Regional Council and District Council relating to stormwater and its quality before discharged will be considered and included. If the recommended rule remained in place that would result in further resource consents in some cases being required to discharge stormwater from building and hard stand development following subdivisions. This causes a doubling up leading to inefficiencies. In this context we agree with Buller District Council and recommend that the provisions and related advice notes associated with stormwater be deleted.

1122. In response to the submission point made by BDC, which sought amendments to GIZ-R1(9), as notified, to include a reference to written approvals as an advice note, Ms Belgrave agrees that this is more appropriately included as such, similar to her previous recommendations on the same matter. She does recommend that the word '*setbacks*' be replaced by '*rules*'. Ms Belgrave also recommends that, as a consequence of the submission made by BDC in relation to LIZ-R1(9), a reference to Appendix 2 instead of a 35-degree recession plane be included. The Panel agrees with these recommendations for amendment for the reasons Ms Belgrave provides

GIZ-R2

1123. In relation to GIZ-R2 in response to the five submission points[329] that sought GIZ-R2(1) be deleted, Ms Belgrave supports the relief sought. This is because the potential effects of

[328] Buller District Council (S538.443), Birchfield Ross Mining Limited (S604.073), and Whyte Gold Limited (S607.058)
[329] Buller District Council (S538.444), Chris & Jan Coll (S558.365), Chris J Coll Surveying Limited (S566.365), William McLaughlin (S567.422), and Laura Coll McLaughlin (S574.365)

structures can be appropriately managed through the other rules for maximum height and area, and compliance with the rules within GIZ-R1 is not necessary or applicable. Additionally, GIZ-R2.1 specifically excludes any setback requirement. The Panel agrees with these recommendations for the reasons Ms Belgrave provides.

GIZ-R3 and New Rule

1124. In relation to GIZ-R3, the Panel agrees with Ms Belgrave for the reasons she provides that this rule be retained as notified.

1125. In relation to proposed new rule GIZ-R3A (now GIZ-R4), the Panel agrees with Ms Belgrave's recommendation for the rule heading to be *'Industrial Activities'* this stems from the changes referred to in GIZ-R1. Additionally, the Panel agrees there is no need to include the requirement to meet the performance standards in GIZ-R1 and the inclusion of the relevant Standards from GIZ-R1 that apply to Industrial Activities all of which are consequent upon the relief Waka Kotahi sought in its submission S450.231.

1126. The Panel agrees with the amendment to Standard 1 sought by Buller District Council to include a solid fence as an option.

1127. The Panel recommends the above amendment be adopted.

GIZ-R4

1128. In relation to rule GIZ-R4 (now GIZ-R5), the Panel generally agrees with Ms Belgrave's recommendation to delete the notified Standard 1 with the relevant Standards that apply to commercial activities being included as new Standards. However, the Panel considers blasting is extremely unlikely to occur in conjunction with a Commercial Activity in the GIZ and therefore we do not recommend it is included in these provisions. Therefore, we consider Standard 1 (a) and (b), be included with Standard 3 (renumbered Standard 2) being retained. We consider this gives effect to the relief sought by Waka Kotahi.

GIZ-R5

1129. In relation to rule GIZ-R5 (now GIZ-R6), the Panel agrees to the deletion of the word '*single*' from Standard 2, as sought by BDC, for the reasons provided by Ms Belgrade, namely that the deletion simplifies the rule.

GIZ-R6

1130. In relation to rule GIZ-R6 (now GIZ-R7), the Panel agrees with Ms Belgrave's recommendation to retain the rule as notified for the reasons she provides.

GIZ-R7

1131. In relation to rule GIZ-R7 (now GIZ-R8), the Panel agrees with Ms Belgrave's recommendation to retain the rule as notified for the reasons she provides.

GIZ-R8

1132. In relation to rule GIZ-R8 (now GIZ-R9), the Panel agrees with Ms Belgrave's recommendation to retain the rule as notified for the reasons she provides.

GIZ-R9

1133. In relation to rule GIZ-R9 (now GIZ-R10), the Panel agrees with Ms Belgrave's recommendations to amend the rule. We note that she has given close consideration to the evidence presented by Mr Black on behalf of Westland Milk Products, particularly as it relates to changes in the matters of discretion. We agree with those changes for the reasons she provides, including the new suite of matters of discretion numbered (a) to (f), which result in the deletion of notified clauses (a) and (b). We consider these matters to be appropriate for assessment matters associated with building development. We agree with Ms Belgrave when she supports the submission of Siver Fern Farms to delete the notified clause (c), as hazardous substances do not have a clear relationship with the rules as notified in GIZ-R1. We therefore recommend that the revised rule be adopted.

1134. The Panel notes that new rule GIZ-R11 is a consequential amendment associated with the changes above which introduces a restricted discretionary status for Industrial and Commercial activities and we recommend it be adopted.

GIZ-R10

1135. The Panel notes in terms of GIZ-R10 (now GIZ-R12) that Ms Belgrave does not support deleting the rule as sought by Silver Fern Farms based on her recommendation to retain GIZ-R2. We note that Mr Tuck for Silver Fern Farms supports the recommendation.

1136. The Panel notes at this point that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to '*landscape measures*' and '*landscape treatment*' have been removed from the matters of discretion and replaced with '*measures to mitigate landscape effects*' throughout the chapter.

GIZ-R11

1137. Other than the amendment to landscape treatment referred to above no amendments to GIZ-R11 (now GIZ-R13) are recommended.

GIZ-R12 and GIZ-R13

1138. Having reviewed these rules in an overall context, the Panel disagrees with Ms Belgrave that the rules should be deleted. This is because of the fundamental structure of the rules in the Plan, which requires a corresponding rule when an activity status is escalated. Therefore, in this case, we consider that a discretionary activity rule is necessary to address the activities where one or more of the performance standards in the corresponding permitted rule are not complied with. Therefore, we accept the submission points made regarding these rules which were all to retain them.

1139. The Panel notes the removal of Industrial Activities from rule GIZ-R12 (now GIZ-R14) as they are recommended to be covered in new rule GIZ-R11 and default is to restricted discretionary activities where compliance is not achieved.

GIZ-R14 (now GIZ-R16)

1140. The Panel accept Ms Belgrave's contention that some educational facilities may have an operational need to locate within the GIZ and be close to industrial activities particularly for training purposes. However, we agree with BDC that Community Facilities are not an anticipated activity within the GIZ and have the potential to create reverse sensitivity effects

on existing industrial activities. We also accept that the addition of the term 'tertiary' to describe the types of educational facilities, such as some trade training facilities or laboratories that might be appropriate in the GIZ responds to the concerns expressed by Mr Tuck's in evidence. We recommend Community Facilities be deleted from the rule and tertiary be added to Education Facilities.

GIZ-R15

1141. The Panel acknowledges that GIZ-R15 is a 'catch-all' rule intended to manage activities not specifically provided for in the other rules. The Panel has considered this matter plan-wide and we agree with the submitters that such rules are better placed as discretionary; otherwise, they are unnecessarily limiting in our view and could have unforeseen consequences. Therefore, it is our recommendation to relocate this rule to the discretionary section of this chapter (now GIZ-R17).

GIZ-R18 New Rule

1142. The Panel has recommended the inclusion of a new rule GIZ-R18 to provide for those non-complying activities (Residential and larger Retail) which are identified in the previous rules in line with our determination that such rules are required in terms of the Plan's structure. We also agree with Ms Belgrave that a non-complying status is appropriate for Community Facilities, Non-Tertiary Education Facilities which are not anticipated or appropriate within the General Industrial zone, particularly for reasons of reverse sensitivity. In that category we have also included Health Facilities as sought by BDC.

Hearing Panel's Recommendation

1143. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part and recommends the following changes to the **General Industrial Zone Rules**:

General Industrial Zone Rules	
Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity is provided in General Approach.	
Permitted Activities	
GIZ - R1	**New Buildings, External Additions and Alterations to Existing Buildings ~~Industrial Activities and Industrial Buildings~~** [330]
Activity Status Permitted	
Where:	
1. The maximum building height above ground level is 20m;	

[330] Waka Kotahi (S450.231)

2. Maximum site coverage is 80%;

3. Buildings are setback a minimum:

    a. 10m from State Highways; ~~and~~

    b. **2m from road boundaries; and**[331]

    c. 5m from ~~road boundaries,~~[332] any RESZ - Residential Zone, OSRZ - Open Space and Recreation Zone or SETZ - Settlement Zone boundary and the Rail Corridor;

~~4. All external storage and car parking areas shall be screened by a fence or landscaping so that:~~

~~a. It is not visible from any adjacent RESZ - Residential Zone or SETZ - Settlement Zone boundary or adjacent public place; and~~

~~b. The fence or landscaping is set back from the road boundary so that it does not restrict visibility;~~

~~5. No blasting or vibration beyond the zone boundary shall occur outside the hours of 0800 to 1800 hours weekdays and 0900 to 1600 hours on weekends and public holidays;~~ [333]

~~6. There shall be no offensive or objectionable dust nuisance at or beyond the LIZ - Light Industrial Zone boundary as a result of the activity;~~[334]

4. The area adjoining the road frontage of all sites **(excluding access points)**,[335] and the side boundary of a site that adjoins a RESZ - Residential, SETZ - Settlement, OSZ - Open Space or MUZ - Mixed Use Zone shall contain landscaping with a minimum width of 2 metres, of a standard that does not restrict road visibility, or obstruct signage or accessways within the road corridor;

~~7. Contaminated stormwater run-off associated with any industrial activity or building, including stormwater runoff from any earthworks, shall be collected and treated prior to discharge to ensure there are no significant adverse effects on water quality;~~[336]

5. No building shall project beyond a building envelope ~~defined by a 35 degree recession plane~~ **in accordance with Appendix Two** to commence 2.5m above any RESZ - Residential, OSZ - Open Space, SARZ - Sport and Recreation Zone, MUZ - Mixed Use or SETZ - Settlement Zone boundary ~~except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~. This standard does not apply to:[337]

    a. Road boundaries;

    b. Buildings on adjoining sites that have a common wall along the boundary;

[331] Westland Milk Products (S63.013)
[332] Westland Milk Products (S63.013)
[333] Waka Kotahi (S450.231)
[334] Buller District Council (538.443), Birchfield Ross Mining Ltd (S604.073), Whyte Gold Ltd (S607.058)
[335] Westland Milk Products (S63.014)
[336] Buller District Council (538.443), Westland Milk Products (S63.011)
[337] Buller District Council (538.443)

c. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;

d. Antennas, aerials, satellite dishes (less than 1.2m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and

e. Solar panels and solar water heaters provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically.

Advice Notes:

1. Any landscaping required by this rule may be located in common areas, where the development comprises land and/or buildings in separate unit titles.

~~2. Stormwater facilities that support multiple uses such water quality treatment, biodiversity enhancement and landscape amenity, should be incorporated into landscaped areas, where practicable, to achieve effective stormwater management in an integrated manner.~~

~~3. The Auckland Design Manual Guideline Document GD 2017/01 Stormwater Management Devices in the Auckland Region provides information on best practice stormwater design options for stormwater treatment.~~[338]

2. Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.[339]

Activity status where compliance not achieved:

~~Discretionary where Standards 1-8 are not complied with.~~

Restricted Discretionary ~~where Standard 9 is not complied with.~~[340]

GIZ – R2 Minor Structures

Activity Status Permitted

Where:

~~1. All performance standards for Rule GIZ - R1 are complied with - except that compliance with standard 3 (setbacks) is not required.~~[341]

1. Masts, poles, aerials and pou whenua must not exceed 7m in height;

2. Any antenna dish must be less than 1.2m in diameter and not project more than 3.5m above the highest point of any building they are attached to;

3. Any ornamental or garden structure must not exceed 2.4 m in height; and

[338] Buller District Council (538.443), Westland Milk Products (S63.011)
[339] Buller District Council (538.443)
[340] Waka Kotahi (S450.231)
[341] Buller District (538.444) Chris & Jan Coll (S558.365), Chris J Coll Surveying Limited (S566.365), William McLaughlin (S567.422), and Laura Coll McLaughlin (S574.365)

4. Any other structure must not exceed 10m² and 2m in height.

Activity status where compliance not achieved: Restricted Discretionary

GIZ – R3 Fences, Walls and Retaining Walls

Activity Status Permitted

Where:

1. Fences, walls and retaining walls are a maximum 2m height above ground level; and

2. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall or wall**.**

Activity status where compliance not achieved: Restricted Discretionary

GIZ – R4 Industrial Activities

Activity Status Permitted

Where:

1. All external storage and car parking areas shall be screened by a minimum 1.8m high solid fence[342] **or landscaping so that:**

   a. It is not visible from any adjacent RESZ - Residential Zone or SETZ - Settlement Zone boundary or adjacent public place; and

   b. The fence or landscaping is set back from the road boundary so that it does not restrict visibility;

2. No blasting or vibration shall occur outside the hours of 0800 to 1800 hours weekdays and 0900 to 1600 hours on weekends and public holidays;

Activity status where compliance not achieved: Restricted Discretionary[343]

GIZ – R45 Commercial Activities

Activity Status Permitted

Where:

~~1. All performance standards for Rule GIZ - R1 are complied with; and~~

1. All external storage and car parking areas shall be screened by a 1.8m fence or landscaping so that:

   a. It is not visible from any adjacent RESZ - Residential Zone or SETZ - Settlement Zone boundary or adjacent public place; and

[342] Buller District Council (538.443)
[343] Consequential to Waka Kotahi (S440.231), Buller District Council (538.443)

b. <u>The fence or landscaping is set back from the road boundary so that it does not restrict visibility;</u>

2. Any retail activity shall occupy no more than 250m² or 25% of the Gross Floor Area of all buildings on the same site, whichever is the lesser.

Activity status where compliance not achieved:

<u>Restricted Discretionary where standard 1 is not complied with</u>

Non-complying **<u>where standard 2 is not complied with</u>**[344]

GIZ – R~~5~~<u>6</u> Ancillary Residential Activities

Activity Status Permitted

Where:

1. All performance standards for Rule GIZ - R1 are complied with;
2. One ~~single~~ residential unit per site is provided; and[345]
3. The residential activity is ancillary to the commercial or industrial activity on the site.

Advice Note:

1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.

Activity status where compliance not achieved: Non-complying

GIZ – R~~6~~<u>7</u> Emergency Service Facility, Carparking Lots and Buildings, Trade and Industry Training, Community Corrections Activity, Gymnasium and Public Transport Facility

Activity Status Permitted

Where:

1. All performance standards for Rule GIZ - R1 are complied with.

Activity status where compliance not achieved: Discretionary

GIZ – R~~7~~<u>8</u> Agricultural, Pastoral and Horticultural Activities

Activity Status Permitted

Where:

1. All performance standards for Rule GIZ - R1 are complied with.

[344] Consequential to Waka Kotahi (S440.231)
[345] Buller District Council (538.447)

Activity status where compliance not achieved: Discretionary

Activity Status Non-complying

Activity status where compliance not achieved: N/A[354]

8.8. Light Industrial Zone Rules

Submissions and Further Submissions

1144. Six submission points relating generally to the **LIZ Rules** was summarised in a Table on pages 195-196 of the S42A Report. Four submission points sought amendments to the rules and two submission points supported the discretionary activities.

1145. Fourteen submission points and four further submission points relating to **LIZ – R1** were summarised in a Table on pages 197-200 of the s42A Report. Five submission points supported the retention of the rule as notified. Nine submission points sought amendments.

[352] Silver Fern Farms (FS101.035)
[353] William McLaughlin (S567.435), Chris & Jan Coll (S558.379), Chris J Coll Surveying Limited (S566.379) Laura Coll McLaughlin (574.379)
[354] Consequential Amendment resulting from Waka Kotahi (450.231), Buller District Council (538.457)

1146. Seven submission points relating to **LIZ – R2** were summarised in a Table on pages 202-203 of the s42A Report. Two submission points supported the retention of the rule as notified. Five submission points sought amendments.

1147. Eleven submission points relating to **LIZ – R3** were summarised in a Table on pages 204-205 of the s42A Report. Two submission points supported the retention of the rule as notified. Nine submission points sought amendments.

1148. Eight submission points relating to **LIZ – R4** were summarised in a Table on pages 206-207 of the s42A Report. Four submission points supported the retention of the rule as notified. Four submissions sought amendments.

1149. Six submission points relating to **LIZ – R5** were summarised in a Table on page 207 of the s42A Report. One submission point supported the retention of the rule as notified. Five submission points sought amendments.

1150. Six submission points relating to **LIZ – R6** were summarised in a Table on page 208 of the s42A Report. All submission points supported the retention of the rule as notified.

1151. Six submission points relating to **LIZ – R7** were summarised in a Table on page 209 of the s42A Report. Two submission points supported the retention of the rule as notified. Four submission points sought amendments.

1152. Six submission points relating to **LIZ – R8** were summarised in a Table on page 210 of the s42A Report. Two submission points supported the retention of the rule as notified. Four submission points sought amendments.

1153. Eight submission points and two further submission points relating to **LIZ – R9** were summarised in a Table on pages 211-212 of the s42A Report. Two submission points supported the retention of the rule as notified. Five submission points sought amendments. One submission point sought the rule be deleted.

1154. Seven submission points relating to **LIZ – R10** were summarised in a Table on page 213 of the s42A Report. Six submission points supported the retention of the rule as notified. One submission point sought amendments.

1155. Seven submission points relating to **LIZ – R11** were summarised in a Table on page 214 of the s42A Report. Six submission points supported the retention of the rule as notified. One submission point sought amendments.

1156. Two submission points relating to **LIZ – R12** were summarised in a Table on page 215 of the s42A Report. One submission point supported the retention of the rule as notified. One submission point sought amendments.

1157. Two submission points relating to **LIZ – R13** were summarised in a Table on page 216 of the s42A Report. One submission point supported the retention of the rule as notified. One submission point sought amendments.

1158. Three submission points relating to **LIZ – R14** were summarised in a Table on pages 216-217 of the s42A Report. One submission point supported the retention of the rule as notified. Two submission points sought amendments.

1159. Six submission points relating to **LIZ – R15** were summarised in a Table on page 218 of the s42A Report. One submission point supported the retention of the rule as notified. Five submission points sought amendments.

1160. The Panel adopts these summaries and has considered all the relevant submissions and further submissions.

Section 42A Report

LIZ - General

1161. Ms Belgrave acknowledged the support from William McLaughlin and Laura Coll McLaughlin who both support the discretionary activity rules in the GIZ as notified.

1162. In response to the submission point made by GDC that sought to delete the references to a Heavy Industrial Zone, Ms Belgrave supports the relief sought, as this zone does not exist in the pTTPP and is therefore an error.

1163. In response to the submission points made by Ngāi Tahu[355] that sought amendments to include 'effects on sites and areas of significance to Māori' as a matter of discretion for all restricted discretionary rules, Ms Belgrave does not support the relief sought. This is because she refers to SASM-R6 which requires all buildings and structures within sites and areas of significance to Māori to obtain written approval from the relevant Poutini Ngāi Tahu rūnanga. She considers that any relevant effects generated by activities in the LIZ can be managed under SASM-R6 where necessary.

1164. In response to the submission point made by the New Zealand Motor Caravan Association that sought to provide for campgrounds and camping as a restricted discretionary activity, Ms Belgrave does not support the relief sought. This is because she considers the activity may generate reverse sensitivity effects that have the potential to undermine the integrity of the INZ/LIZ.

1165. The S42A report states that it makes no amendments in response to these submissions. However, the tracked changes in the appendix delete the reference to HIZ in the Overview.

LIZ – R1 Industrial Activities and Industrial Buildings

1166. Ms Belgrave acknowledged the support from the five submission points[356] who support the rule as notified. This is subject to the recommended amendments outlined below.

1167. Ms Belgrave acknowledges the submission point from GDC that sought to ensure the standards do not create unrealistic or unsuitable requirements. She recommends various amendments to the rule based on other submissions and notes this submission.

1168. In response to the submission point made by Waka Kotahi that sought clarification as to whether the requirements of the rule are to be considered as performance standards, and if so, the activities part of the rule should be separate from the buildings, Ms Belgrave generally supports the relief sought. The submission is similar to others made by Waka Kotahi in other

[355] Ngāi Tahu (S620.232, S620.233)
[356] Te Mana Ora (Community and Public Health) of the NPHS/Te Whatu Ora (S190.816), Chris & Jan Coll (S558.380), Chris J Coll Surveying Limited (S566.380), William McLaughlin (S567.436), and Laura Coll Mclaughlin (S574.380)

zones, and Ms Belgrave's recommendation for a new rule that provides for the activities referred to in LIZ-R1 aligns with her previous recommendations.

1169. In response to the submission point made by Westland Milk Products that sought to make non-compliance with LIZ-R1(8) a restricted discretionary activity, Ms Belgrave supports the relief sought in part. The submission is also supported by a further submission from Isaac Construction. This submission point is like that made in relation to GIZ-R1(8) and Ms Belgrave makes the same recommendation. She considers that because the potential effects associated with non-compliance with LIZ-R1(2)-(8) can be readily identified, non-compliance with these rules should be restricted discretionary. She maintains that any no-compliance with the height rule (LIZ-R1(1)) should remain as a discretionary activity. As a consequence of this recommendation, Ms Belgrave has recommended additional matters of discretion be included at LIZ-R9.

1170. As a result of the evidence from Mr Richard Black, Ms Belgrave reconsidered the activity status that should apply to non-compliance with the height rule. She revised her position on the basis that there is a functional need for industrial activities to exceed the permitted height limit. Additionally, there are other rules that will manage the potential effects associated with building bulk and industrial sites generally tend to be larger in size so there are opportunities to internalise potential effects. Consequential amendments to LIZ-R9 are also proposed in the form of matters of discretion.

1171. In response to the submission points made by Westland Milk Products and BDC that sought amendments to the building setbacks, Ms Belgrave supports the reduction in the road boundary setback as sought by Westland Milk Products. This is because a 2m setback aligns with the landscaping requirements and enables the efficient use of LIZ land. However, she does not support increasing the building setback from a residential zone from 5m to 10m as sought by BDC.

1172. In response to the submission point from BDC that sought to make amendments to LIZ-R1(4) adding a minimum fence height and ensuring it be solid, Ms Belgrave does not support the relief sought.

1173. In response to the submission points from BDC and Birchfield Ross Mining Limited that sought to delete LIZ-R1(6) on the basis that air discharges are a regional council function Ms Belgrave supports the relief sought, and recommends the rule be deleted.

1174. Ms Belgrave supports the relief sought by Westland Milk Products to amend LIZ-R1(7) to exclude access points from the landscaping requirements.

1175. Ms Belgrave supports in part the submission point made by BDC that sought to delete LIZ-R1(7)(a) in relation to tree planting on the basis that the term 'encourages' does not provide sufficient certainty. Rather than deleting the rule, Ms Belgrave recommends replacing 'encourages' with 'required' which is consistent with the CMUZ provisions.

1176. In response to the submission point from Birchfield Coal Mines Limited that relate to LIZ-R1(8) Ms Belgrave agrees that the discharge of stormwater is a regional council function. However, (and as discussed with reference to the similar rule in the GIZ), the rule relates to the treatment of stormwater prior to discharge and is therefore relevant under the district plan. Nevertheless, she recommends amendments to the wording of the rule.

1177. As a result of the evidence from Mr Richard Black for Westland Milk Products regarding the management of stormwater in the GIZ, Ms Belgrave reconsidered her recommendation for the wording of LIZ-R1(8) as a consequential amendment in her addendum to the S42A report. She agrees that stormwater treatment can be requirement by other rules in the pTTPP and that LIZ-R1(8) should not create unnecessary duplication. On this basis she recommends amendments to confirm that treatment is required for car parking areas greater than 1,000m² and to exclude areas that discharge lawfully into a trade waste system. While Ms Belgrave does not support excluding the treatment of stormwater from roof areas she does recommend deleting the word 'contaminated' as it creates uncertainty for when treatment is necessary.

1178. In response to the submission point made by BDC that sought amendments to LIZ-R1(9) to include the reference to written approvals as an advice note, Ms Belgrave agrees that this is more appropriately included as such, similar to her previous recommendations on the same matter. She does recommend that the word 'setbacks' be replaced by 'rules'.

1179. In response to the submission point made by the BDC that sought to include a reference to Appendix 2 instead of a 35 degree recession plane, Ms Belgrave comments that LIZ-R1(9) already includes this reference and so no amendment is necessary.

1180. In response to the submission points made by Fire and Emergency NZ (FENZ) that sought the inclusion of two new rules relating to water supply servicing, Ms Belgrave does not support the relief sought. This is for the same reasons set out with respect to other zones in this decision that responds to similar submissions from FENZ.

1181. The S42A report (including the addendum) recommends amending LIZ-R1 as follows:

> ***LIZ-R1 New Buildings, External Additions and Alterations to Existing Buildings, Landscaping, External Storage, and Blasting and Vibration ~~Industrial Activities and Industrial Buildings~~***
>
> *Activity Status Permitted*
>
> *Activity status where compliance not achieved:*
>
> ***~~Discretionary where Standards 1-8 are is not complied with~~**.*
>
> *Restricted discretionary where **Rules 1-8 are ~~Standard 9 is~~** not complied with.*
>
> *Where:*
>
> *…*
>
> *3. Buildings are setback a minimum:*
>
> *i. 10m from state Highways; **~~and~~***
> ***i. 2m from road boundaries; and***
> *ii. 5m from **~~road boundaries~~**, any Residential Zone, Open Space Zone or Settlement Zone boundary and the Rail Corridor.*
>
> *…*
>
> ***~~6. There shall be no offensive or objectionable dust nuisance at or beyond the LIZ – Light Industrial Zone boundary as result of the activity.~~***
>
> *6. The area adjoining the road frontage of all sites **(excluding access points),** and the side boundary of a site that adjoins a RESZ - Residential, SETZ - Settlement, OSZ - Open Space, SARZ - Sport and Recreation Zone or MUZ - Mixed Use Zone shall contain landscaping as follows:*
>
> *…*

*c. The planting of 1 tree per 20 carparking spaces is **required** ~~**encouraged**~~ within any carparking area.*

*7. ~~**Contaminated**~~ stormwater run-off associated with any industrial activity ~~**or**~~ building **and associated impermeable parking areas greater than 1,000m²** , ~~**including stormwater runoff from earthworks**~~, shall be collected and treated prior to discharge. **This rule does not apply to areas that discharge lawfully into an authorised trade wate system.** ~~**to ensure there are no significant adverse effects on water quality**~~; and*

*8. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any RESZ - Residential, OSZ - Open Space, SARZ - Sports and Active Recreation, MUZ - Mixed Use or SETZ - Settlement Zone boundary ~~**except where neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing**~~. This standard does not apply to:*

…

Advice Notes:

…

4. Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.

1182. The S42A report also recommends the addition of a new rule as follows:

LIZ-R2A Industrial Activities

Activity Status Permitted

Activity status where compliance not achieved: Restricted Discretionary

Where:

1. All performance standards for Rule LIZ - R1 are complied with.

LIZ – R2 Commercial Activities

1183. Ms Belgrave acknowledged the support from Te Mana Ora and FENZ who support the rule as notified. This is subject to the recommended amendments that are set out below.

1184. In response to the submission made by BDC that sought to replace '*retail*' with '*commercial*' in LIZ-R2(2), on the basis that some of the activities in the list are specifically excluded from the definition of '*retail activity*'. Ms Belgrave supports the relief sought by deleting the word 'retail'. She does not support its replacement with '*commercial*'.

1185. Ms Belgrave does not support the four submission points[357] that sought to amend LIZ-R2(1) to also enable activities that do not increase the extent of existing non-compliance with the relevant performance standards. This is because she considers it more appropriate that any non-compliance be considered thoroughly either to determine existing use rights or as a resource consent. Her recommendation aligns with similar submissions in relation to COMZ-R6 and rules in the GIZ.

1186. Ms Belgrave recommends consequential amendments to the activity status for non-compliances with the rules as a result of the Westland Milk Products submission to LIZ-R1.

[357] Chris & Jan Coll (S558.381), Chris J Coll Surveying Limited (S566.381), William McLaughlin (S567.437), and Laura Coll McLaughlin (S574.381)

1187. The S42A report recommends amending LIZ-R2 as follows:

> ***LIZ-R2 Commercial Activities***
>
> *Activity Status Permitted*
>
> *Activity status where compliance not achieved:*
>
> ***Restricted discretionary where standard 1 is not complied with.***
>
> *Discretionary* ***where standard 2 is not complied with.***
>
> *Where:*
>
> *1. …*
>
> *2. Any* ~~***Retail A***~~ *activities are:*

LIZ – R3 Ancillary Residential Activities

1188. Ms Belgrave acknowledged the support from Te Mana Ora and Waka Kotahi who support the rule as notified. This is subject to the recommended amendments that are set out below.

1189. In response to the submission point made by BDC that sought to delete the word 'single' from LIZ-R3(2), Ms Belgrave supports the relief sought as it simplifies the rule.

1190. In response to the four submission points[358] that sought to amend LIZ-R3(1) to also enable activities that do not increase the extent of existing non-compliance with the relevant performance standards, Ms Belgrave does not support the relief sought for the same reasons already set out in relation to GIZ-R5 and LIZ-R2 (and other rules).

1191. In response to the four submission points[359] that sought to change the activity status for non-compliance from non-complying to discretionary, Ms Belgrave does not support the relief sought. This is because she considers a non-complying activity status is appropriate as large scale residential activities, or a proliferation of residential activities have the potential to undermine the purpose of the LIZ and are not anticipated within the LIZ.

1192. The S42A report recommends amending LIZ-R3 as follow:

> ***LIZ-R3 Ancillary Residential Activities***
>
> *Activity Status Permitted*
>
> *Activity Status where compliance not achieved: Non-Complying*
>
> *Where:*
>
> *1. All performance standards for Rule LIZ - R1 are complied with;*
>
> *2. One* ~~***single***~~ *residential unit per site is provided; and*
>
> *…*

LIZ – R4 Emergency Service Facility, Carparking Lots and Buildings, Trade and Industry Training, Community Corrections Activity, Gymnasium and Public Transport Facility

[358] Chris & Jan Coll (S558.382), Chris J Coll Surveying Limited (S566.382), William McLaughlin (S567.438), and Laura Coll McLaughlin (S574.382)

[359] Chris & Jan Coll (S558.383), Chris J Coll Surveying Limited (S566.383), William McLaughlin (S567.439), and Laura Coll McLaughlin (S574.383)

1193. Ms Belgrave acknowledged the support from the four submission points[360] that supported the rule as notified.

1194. In response to the four submission points[361] that sought to amend LIZ-R4(1) to also enable activities that do not increase the extent of existing non-compliance with the relevant performance standards, Ms Belgrave does not support the relief sought for the same reasons already set out in relation to previous rules.

1195. The S42A report recommends retaining LIZ-R4 as notified.

LIZ – R5 Minor Structures

1196. Ms Belgrave acknowledged the support from Te Mana Ora who support the rule as notified. This is subject to the recommended amendments that are set out below.

1197. In response to the five submission points[362] that sought LIZ-R5(1) be deleted, Ms Belgrave supports the relief sought. This is because the potential effects of structures can be appropriately managed through the other rules for maximum height and area, and that compliance with the rules within LIZ-R1 is not necessary or applicable. Additionally, LIZ-R5.1 specifically excludes any setback requirement.

1198. Ms Belgrave recommends a consequential amendment that responds to a FENZ submission point to include a maximum height for hose drying towers to achieve consistency with the recommended amendments in the CMUZ.

1199. The S42A report recommends amending LIZ-R5 as follows:

> ***LIZ-R5 Minor Structures***
>
> *Activity Status Permitted*
>
> *Activity status where compliance not achieved: Restricted Discretionary*
>
> *Where:*
>
> 1. ~~***All performance standards for Rule LIZ - R1 are complied with - except that compliance with standard 3 (setbacks) is not required***~~.
>
> *…*
>
> ***5. Hose drying towers do not exceed 15m in height; and***
>
> *…*

LIZ – R6 Fences, Walls and Retaining Walls

1200. Ms Belgrave acknowledged the support from the six submission points[363] who support the rule as notified.

1201. The S42A report recommends retaining LIZ-R4 as notified.

[360] Te Mana Ora (Community and Public Health) of the NPHS/Te Whatu Ora (S190.819), Buller District Council (S538.461), Fire and Emergency New Zealand (S573.112), and Department of Corrections (S349.010)
[361] Chris & Jan Coll (S558.385), Chris J Coll Surveying Limited (S566.385), William McLaughlin (S567.440), and Laura Coll McLaughlin (S574.385)
[362] Buller District Council (S538.462), Chris & Jan Coll (S558.386), Chris J Coll Surveying Limited (S566.386), William McLaughlin (S567.441), and Laura Coll McLaughlin (S574.386)
[363] Buller District Council (S538.463), Te Mana Ora (Community and Public Health) of the NPHS/ Te Whatu Ora (S190.821), Chris & Jan Coll (S558.387), Chris J Coll Surveying Limited (S566.387), William McLaughlin (S567.442) and Laura Coll McLaughlin (S574.387)

LIZ – R7 Agricultural, Pastoral and Horticultural Activities

1202. Ms Belgrave acknowledged the support from BDC and Te Mana Ora who support the rule as notified.

1203. In response to the four submission points[364] that sought to amend LIZ-R7(1) to also enable activities that do not increase the extent of existing non-compliance with the relevant performance standards, Ms Belgrave does not support the relief sought for the same reasons already set out in relation to previous rules.

1204. The S42A report recommends retaining LIZ-R7 as notified.

LIZ – R8 Aquaculture Activities

1205. Ms Belgrave acknowledged the support from BDC and Te Mana Ora who support the rule as notified.

1206. In response to the four submission points[365] that sought to amend LIZ-R8(1) to also enable activities that do not increase the extent of existing non-compliance with the relevant performance standards, Ms Belgrave does not support the relief sought for the same reasons already set out in relation to previous rules.

1207. The S42A report recommends retaining LIZ-R8 as notified.

LIZ – R9 Industrial Activities and Buildings not meeting Rule LIZ-R1

1208. Ms Belgrave acknowledged the support from Te Mana Ora and Waka Kotahi who support the rule as notified.

1209. In response to the submission points[366] that sought to change details relating to the activity status for non-compliance with this rule, Ms Belgrave considers that a restricted discretionary activity status is appropriate, with the exception of building height. As such, Ms Belgrave does not support BDC's submission to have all non-compliances assessed as a discretionary activity. Furthermore, she does partially support Westland Milk Product's submission to have the restricted discretionary activity status apply to most non-compliances with LIZ-R1 (the only exception being height). However, she does not support the addition of the matters of discretion sought by Westland Milk Products, and instead recommends the following matters:

    - *Bulk, location, and design of buildings.*
    - *Effects on the safety, amenity and attractiveness of the street or public places.*
    - *Visual dominance, shading, and nuisance effects on neighbouring sites.*
    - *Design and location of parking and access.*
    - *Landscape treatment.*

1210. As a result of the evidence from Mr Richard Black for Westland Milk Products, (and as set out in relation to LIZ-R1), Ms Belgrave reconsidered the activity status that should apply to non-compliance with the height rule, and ultimately has recommended that as there is a functional need for industrial activities to exceed the permitted height limit it is appropriate in this zone

[364] Chris & Jan Coll (S558.388), Chris J Coll Surveying Limited (S566.388), William McLaughlin (S567.443), and Laura Coll McLaughlin (S574.388)
[365] Chris & Jan Coll (S558.389), Chris J Coll Surveying Limited (S566.389), William McLaughlin (S567.444), and Laura Coll McLaughlin (S574.389)
[366] Westland Milk Products (S63.016) and Buller District Council (S538.466)

to include all non-compliances with LIZ-R1 as a restricted discretionary activity. Consequential amendments to LIZ-R9 are also proposed in the form of matters of discretion as follows:

- *Bulk, location, and design of buildings.*
- *Effects on the safety, amenity and attractiveness of the street or public places.*
- ***Amenity**, visual dominance, shading, and nuisance effects on neighbouring sites.*
- *Design and location of parking and access.*
- *Landscape treatment.*
- ***Characteristics of the site and development that are relevant to the rule.***

1211. In response to the four submission points[367] that sought amend LIZ-R9(1) to also enable activities that do not increase the extent of existing non-compliance with the relevant performance standards, Ms Belgrave does not support the relief sought for the same reasons already set out in relation to previous rules.

1212. The S42A report (including the addendum) recommends amending LIZ-R9 as follows:

> ***LIZ-R9 ~~Industrial Activities and~~ New Buildings and External Additions and Alterations to Existing Buildings not meeting Rule LIZ - R1***
>
> *Activity Status Restricted Discretionary*
>
> *Activity status where compliance not achieved: Discretionary*
>
> *Where:*
>
> ***~~1. The building projects into the recession plane; and~~***
>
> *2. ~~**All other performance standards for**~~ Rule LIZ-R1**.1** ~~**are**~~ **is** complied with.*
>
> *Discretion is restricted to:*
>
> ***~~a. Design and location of buildings;~~***
>
> ***~~b. Design and location of parking and access; and~~***
>
> ***~~c. Landscape treatment.~~***
>
> ***a. Bulk, location, and design of buildings.***
>
> ***b. Effects on the safety, amenity and attractiveness of the street or public places.***
>
> ***c. Amenity, visual dominance, shading, and nuisance effects on neighbouring sites.***
>

>
> ***f. Characteristics of the site and development that are relevant to the rule***

LIZ – R10 Minor Structures not meeting Rule LIZ-R5

1213. Ms Belgrave acknowledged the support from six submitters[368] who support the rule as notified.

1214. Ms Belgrave does not support the minor amendment to the matter of discretion relating to landscaping as sought by BDC. She considers the matter of discretion is sufficiently clear and the amendment is unnecessary.

[367] Chris & Jan Coll (S558.390), Chris J Coll Surveying Limited (S566.390), William McLaughlin (S567.445), and Laura Coll McLaughlin (S574.390)
[368] Te Mana Ora (Community and Public Health) of the NPHS/Te Whatu Ora (S190.825), Waka Kotahi (S450.237), Chris & Jan Coll (S558.391), Chris J Coll Surveying Limited (S566.391), William McLaughlin (S567.446) and Laura Coll McLaughlin (S574.391)

1215. The S42A report recommends retaining LIZ-R10 as notified.

LIZ – R11 Fences, Walls and Retaining Walls not meeting Rule LIZ-R6

1216. Ms Belgrave acknowledged the support from six submitters[369] who support the rule as notified.

1217. Ms Belgrave does not support the minor amendment to the matter of discretion relating to landscaping as sought by BDC. She considers the matter of discretion is sufficiently clear and the amendment is unnecessary.

1218. The S42A report recommends retaining LIZ-R11 as notified.

LIZ – R12 Industrial Activities and Buildings, Commercial, Aquaculture and Agricultural, Pastoral and Horticultural Activities not meeting Permitted or Restricted Discretionary Activity Standards

1219. Ms Belgrave acknowledged the support from Te Mana Ora who support the rule as notified. This is subject to the recommended amendments that are set out below.

1220. In response to the submission point made by BDC that sought to delete LRZ-R12, Ms Belgrave supports the relief sought given the recommendations to amend LIZ-R1 and LRZ-R9. Additionally, a discretionary activity status, is already provided for under LIZ-R2, LIZ-R7 and LIZ-R8 for those particular activities.

1221. The S42A report recommends deleting LIZ-R12.

LIZ – R13 Emergency Service Activities, Carparking Lots and Buildings, Trade and Industry Training, Community Corrections Activity, Gymnasium, Public Transport Facility not meeting Permitted Activity Standards

1222. Ms Belgrave acknowledged the support from Te Mana Ora who support the rule as notified. This is subject to the recommended amendments that are set out below.

1223. In response to the submission point made by BDC that sought to delete LRZ-R13, Ms Belgrave supports the relief sought as a discretionary activity status is already provided for under LIZ-R4 for these activities.

1224. The S42A report recommends deleting LIZ-R13.

LIZ – R14 Community Facilities and Educational Facilities

1225. Ms Belgrave acknowledged the support from Te Mana Ora who support the rule as notified. This is subject to the recommended amendments that are set out below.

1226. In response to the submission point from BDC that sought to delete LRZ-R14 and replace it with an alternative rule that would result in Community Facilities and Educational Activities being non-complying activities, Ms Belgrave supports the relief sought in part. She considers that in some instances some educational facilities may have an operational need to locate within the LIZ and be close to other industrial activities. However, she agrees with the BDC

[369] Te Mana Ora (Community and Public Health) of the NPHS/Te Whatu Ora (S190.826), Waka Kotahi (S450.238), Chris & Jan Coll (S558.392), Chris J Coll Surveying Limited (S566.392), William McLaughlin (S567.447) and Laura Coll McLaughlin (S574.392)

that community facilities are generally not anticipated in the LIZ, and she recommends that this activity be managed by the catch-all rule under LIZ-R15.

1227. In response to the submission point made by the MOE that sought a restricted discretionary activity status for community facilities and educational facilities, Ms Belgrave does not support the relief sought. As above, she recommends a non-complying activity status for community facilities but acknowledges that some forms of educational facilities may be appropriate in the LIZ. However, not as a restricted discretionary activity.

1228. In Ms Belgrave's addendum report she acknowledges the evidence of Mr Tuck for Silver Fern Farms who made a further submission in relation to this matter in the GIZ to partially support the retention of the rule. The matter raised was with respect to educational activities and Ms Belgrave considers that the addition of 'tertiary' to describe the type of educational facilities that might be appropriate in the GIZ responds to the concerns in Mr Tuck's evidence. Ms Belgrave considers that these amendments should also apply in the LIZ as a consequential amendment.

1229. The S42A report (including the addendum) recommends amending LIZ-R14 as follows:

> ***LIZ-R14 ~~Community Facilities~~ and Tertiary Education Facilities***
>
> *Activity Status Discretionary*
>
> *Activity status where compliance not achieved: N/A*

LIZ – R15 Any Activities not provided for by another Rule in the zone

1230. Ms Belgrave acknowledged the support from Te Mana Ora who support the rule as notified.

1231. In response to the four submission points[370] that sought to amend the non-complying activity status to discretionary, Ms Belgrave does not support the relief sought as she considers a non-complying activity status is more appropriate to manage activities that are not anticipated within the LIZ. This also addresses the consequential matter of the BDC submission that sought the amendment to the non-complying rule so that it only apply to residential activities, community facilities, education facilities, and health facilities, while all other activities be discretionary. As set out in relation of LIZ-R14, Ms Belgrave agrees that some educational facilities be discretionary, but she considers all others be non-complying in the LIZ.

1232. The S42A report recommends retaining LIZ-R15 as notified.

Hearing and Submitter Evidence

1233. Ms Richard Black's evidence for Westland Milk Products acknowledges that the S42A report accepts in part the change in activity status for any non-compliance with rules in LIZ-R1. He comments on the S42A recommendation for LIZ-R9, and while he generally agrees with the recommendation, he reiterates the submission point that a restricted discretionary activity status should also apply to any non-compliance with the height limit. He accepts the amended list of matters that discretion is restricted to, but seeks to add one additional matter being:

- *Effects on built form and character of the surrounding area.*

[370] Chris & Jan Coll (S558.394), Chris J Coll Surveying Limited (S566.394), William McLaughlin (S567.449), and Laura Coll McLaughlin (S574.394)

1234. Mr Richard Black's evidence for Westland Milk Products confirms that he generally supports the amendments to the stormwater standard as it provides for the appropriate management of contaminated stormwater runoff. However, he remains concerned that the rule may capture a requirement to treat stormwater where the risk of contaminants entering stormwater runoff is no greater than non-industrial uses. Therefore, he suggests the following wording for LIZ-R1(8):

> *Contaminated stormwater run-off associated with any industrial activity or building, **~~including stormwater runoff from any earthworks,~~** shall be collected and treated prior to discharge **~~to ensure there are no significant adverse effects on water quality.~~** **This requirement applies only in areas where an activity may result in the discharge of environmentally hazardous substances and excludes the following areas:***
>
> - ***all areas that discharge lawfully into an authorised trade waste system;***
> - ***areas not used for the industrial or trade process, including vehicle access and car parking areas; and***
> - ***building roof areas.***

1235. The joint statement presented by Ms Frida Inta and Buller Conservation Group reiterates their previous comments regarding the confusion between the matters GIZ-R1 seeks to control. The statement notes that despite the intention to separate spatial controls (activities) from performance standards (building controls), that has not completely happened. The statement indicates that the concerns also relate to the LIZ.

1236. Mr George van Pelt tabled a letter at the hearing on behalf of FENZ. While the letter acknowledges that they will not pursue the submission point relating to the provision of water supply, it does note that the Building Act 2004 alone does not adequately provide for the provision to water supply (including firefighting water supply) to new development.

Reporting Officer Reply Evidence

1237. Consequential to the separation of LIZ-R1 into two rules (one for building controls and one for activities) and in response to Ms Inta's statement that was presented at the hearing, Ms Belgrave supports a number of amendments to restructure and relocate standards between the relevant rules. This has resulted in amendments to all the Commercial and Industrial chapters. However, the wording and intent of the provisions have not changed through this process, and no new additions have been made to the requirements of the standards.

1238. The comments with respect to the lawfulness of the stormwater rules as set out in response to the GIZ also apply with regard to the LIZ.

1239. The discussion in the right of reply, regarding the term 'residential unit' with regard to GIZ-R5 also apply with respect to LIZ-R3. As above, Ms Belgrave reiterates that only one residential unit should be permitted in the LIZ.

1240. The comments set out in the GIZ right of reply summary regarding 'educational facilities' and community facilities' is also relevant with respect to the LIZ.

1241. Ms Belgrave's recommended wording for LIZ-R9 includes a correction consequential to Mr Black's evidence on behalf of Westland Milk Products to completely delete LIZ-R9(2).

Hearing Panel's Evaluation

1242. Recognising the strong similarity between the GIZ and LIZ plan provisions and commonality of submissions in the two zones and to avoid repetition, the Panel has decided to restrict its evaluation of the LIZ plan provisions to only those situations where those provisions differ and to where different outcomes have been sought via submission. In all other instances both the evaluation and the outcome detailed in the GIZ section applies to LIZ section. We note that submission points on GIZ and LIZ differ, but we have provided for that by utilising footnotes to reference the relevant submission point for the plan provision within the recommendation box below.

LIZ-R2 (now LIZ-R3) – Commercial Activities

1243. The Panel has looked closely at the screening provision and on balance we consider that for Commercial Activities car parking area do not need to be screened. The effects of having car parks visible is we consider appropriate for commercial activities within the LIZ. We consider the visibility of car parking activity associated with a commercial activity building is an expected outcome because the car parks support and signals the presence of a commercial activity.

1244. The Panel has reviewed the BDC submission on deleting Retail from notified standard 3. (2 as renumbered) and replacing it with Commercial. We consider this will have unintended consequences because it would limit Commercial Activities to only those listed in subparagraphs i-iv., which could not have been the intent of the submitter.

1245. The Panel understands the submitter intent was to limit retail activities to those listed in subparagraphs i.-iv. However, the definition of Retail Activities specifically excludes those activities listed in the subparagraph. These activities are defined as Commercial Activities under the Plan. We consider retaining the word Retail, deleting subparagraphs i.-iv. and retaining subparagraph v. supports the submitters intent. This amendment results in any Retail Activity that in not a convenience store, restaurant, cafe and takeaway food outlet with a maximum gross floor area of 250m^2 is not a permitted activity, and would require a discretionary resource consent.

LIZ-R5 (renumbered LIZ-R6) – Minor Structures

1246. The Panel acknowledges Ms Belgrave's recommended amendment to include a maximum height for hose drying towers, so as to achieve consistency with amendments proposed in the CMUZ. The Panel supports that recommendation.

LIZ-R9 (renumbered LIZ-R10) - New Buildings and External Additions and Alterations Existing Buildings not meeting Rule LIZ - R1

1247. The Panel notes at this point that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to 'landscape measures' and 'landscape treatment' have been removed from the matters of discretion and replaced with 'measures to mitigate landscape effects' throughout the chapter.

LIZ-R13 (renumbered LIZ-15) - Emergency Service Activities, Carparking Lots and Buildings, Trade and Industry Training, Community Corrections Activity, Gymnasium, Public Transport Facility Retail Activities not meeting Permitted Activity Standards

1248. The Panel has noted that there is no default status reference to Retail Activities stemming from LIZ-R2 (renumbered LIZ-R3). Rule LIZ-R2 indicates that the default status for Retail Activities is discretionary however there is no rule associated with this. We consider this is an

error and we have utilised clause 16(2) of the RMA to rectify this by including Retail Activities in LIZ-R13 (renumbered LIZ-15).

LIZ-R15 (renumbered LIZ-R17) - Any Activity not provided for by another Rule in the zone

1249. The Panel acknowledges that LIZ-R15 is a 'catch-all' rule intended to manage activities not specifically provided for in the other rules. The Panel has considered this matter plan-wide and we agree with the submitters that such rules are better placed as discretionary; otherwise, they are unnecessarily limiting in our view and could have unforeseen consequences. Therefore, it is our recommendation to relocate this rule to the discretionary section of this chapter (now LIZ-R17).

LIZ-R18 - Residential Activities, Community Facilities, Non Tertiary Educational Facilities and Health Facilities

1250. The Panel has recommended the inclusion of a new rule LIZ-R18 to provide for those non-complying activities (Residential) which is identified in the previous rules in line with our determination that such rules are required in terms of the Plan's structure. We also agree with Ms Belgrave that a non-complying status is appropriate for Community Facilities, Non-Tertiary Education Facilities which are not anticipated or appropriate within the General Industrial zone, particularly for reasons of reverse sensitivity. In that category we have also included Health Facilities as sought by BDC.

Hearing Panel's Recommendation

1251. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part and recommends the following changes to the **Light Industrial Zone Rules**:

Overview

The LIZ - Light Industrial Zone complements the ~~HIZ - Heavy and~~[371] GIZ - General Industrial Zones by specifically providing for industrial activities that are unlikely to produce objectionable environmental effects but there may still be some adverse effects including those associated with odour, dust or noise.

Activities within this zone may include light manufacturing, contractors' depots and automotive repair and service industries and some compatible commercial activities. Aquaculture activities such as fish or seaweed farming and processing are also appropriate in this zone.

It may also provide a buffer between other INZ - Industrial Zones and RESZ - Residential or MUZ - Mixed Use Zones.

The National Policy Statement on Urban Development (NPSUD) imposes a responsibility to ensure that there is sufficient business land to meet the future demands of the district and that this development is in the right location and appropriately serviced.

The INZ - Industrial Objectives and Policies and the LIZ - Light Industrial Zone Rules provide the framework for managing the effects of development and ensuring that a reasonable standard of

[371] Grey District Council (S608.102)

amenity and environmental quality is retained within the zone, and that there are not significant adverse effects on the amenity and quality of the environment in surrounding areas.

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities, in the Light Industrial Zone including:

- **Transport** - the Transport Chapter contains provisions in relation to transport matters, including traffic generation TRN - R12.
- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters** - there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Light Industrial Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.
- **Natural Hazards** - natural hazards are widespread on the coast and in some locations natural hazard overlays may affect areas in the Light Industrial Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards Chapter.
- **Natural Character and Margins of Waterbodies** -in some locations areas of Light Industrial Zone may extend into the riparian margins of waterbodies. The Natural Character and Margins of Waterbodies Chapter contains provisions on how these areas must be managed.
- **Subdivision** - The Subdivision Chapter sets out the requirements for the development of new infrastructure and connections as part of subdivision activities.
- **Financial Contributions** - The Financial Contributions Chapter sets out the requirements for contributions of costs for activities which impact on infrastructure.
- **General District Wide Matters** - provisions in relation to Noise, Light, Signs, Temporary Activities and Earthworks in particular may be relevant to activities in the Light Industrial Zone.

Light Industrial Zone Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity is provided in General Approach.

Permitted Activities

LIZ - R1	**<u>New Buildings, External Additions and Alterations to Existing Buildings</u>** **~~Industrial Activities and Industrial Buildings~~**[372]

Activity Status Permitted

Where:

[372] Waka Kotahi (S450.234)

1. The maximum building height above ground level is 12m;

2. Maximum site coverage is 65%;

3. Buildings are setback a minimum:

    i. 10m from State Highways; and

    ii. **2m from road boundaries; and**

    iii. 5m from ~~road boundaries~~,[373] any Residential Zone, Open Space Zone or Settlement Zone boundary and the Rail Corridor;

~~4. All external storage and car parking areas shall be screened by a 1.8m fence or landscaping so that:~~

    ~~i. It is not visible from any adjacent RESZ - Residential Zone or SETZ - Settlement Zone boundary or adjacent public place; and~~

    ~~ii. The fence or landscaping is set back from the road boundary so that it does not restrict visibility;~~

~~5. No blasting or vibration shall occur outside the hours of 0800 to 1800 hours weekdays and 0900 to 1600 hours on Saturdays with no blasting or vibration to be undertaken on Sundays or public holidays;~~[374]

~~6. There shall be no offensive or objectionable dust nuisance at or beyond the LIZ - Light Industrial Zone boundary as a result of the activity;~~[375]

7. The area adjoining the road frontage of all sites **(excluding access points)**,[376] and the side boundary of a site that adjoins a RESZ - Residential, SETZ - Settlement, OSZ - Open Space, SARZ - Sport and Recreation Zone or MUZ - Mixed Use Zone shall contain landscaping as follows:

    a. A minimum width of 2 metres that will, within two years of being planted, reach a minimum height of 1m, provided that lower heights are acceptable where this will otherwise restrict visibility within the State Highway corridor; and

    b. On sites adjoining a RESZ - Residential Zone shall be planted with species, which at maturity, will provide screening from the adjoining sites; and

    c. The planting of 1 tree per 20 carparking spaces is encouraged within any carparking area.

~~8. Contaminated stormwater run-off associated with any industrial activity or building, including stormwater runoff from any earthworks, shall be collected and treated prior to discharge to ensure there are no significant adverse effects on water quality;~~[377]

9. No building shall project beyond a building envelope ~~defined by a recession plane as~~ [378]defined in Appendix Two to commence 2.5m above any RESZ - Residential, OSZ - Open Space, SARZ -

[373] Consequential amendment from Westland Milk Products (S63.013) Buller District Council (S538.458)
[374] Waka Kotahi (S450.234)
[375] Buller District Council (S538.458), Birchfield Ross Mining Ltd (S604.083)
[376] Westland Milk Products (S63.018
[377] Buller District Council (S538.458)
[378] Buller District Council (S538.447)

Sports and Active Recreation, MUZ - Mixed Use or SETZ - Settlement Zone boundary ~~except where neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~. This standard does not apply to:[379]

i. Road boundaries;

ii. Buildings on adjoining sites that have a common wall along the boundary;

iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;

iv. Antennas, aerials, satellite dishes (less than 1.2m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and

v. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically.

Advice Notes:

1. Any landscaping required by this rule may be located in common areas, where the development comprises land and/or buildings in separate unit titles.

~~2. Stormwater facilities that support multiple uses such water quality treatment, biodiversity enhancement and landscape amenity, should be incorporated into landscaped areas, where practicable, to achieve effective stormwater management in an integrated manner.~~

~~3. The Auckland Design Manual Guideline Document GD 2017/01 Stormwater Management Devices in the Auckland Region provides information on best practice stormwater design options for stormwater treatment.~~[380]

2. Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.[381]

Activity status where compliance not achieved:

~~Discretionary where Standards 1-8 are not complied with.~~

Restricted Discretionary ~~where Standard 9 is not complied with~~[382]

LIZ – R2 Industrial Activities

Activity Status Permitted

Where:

1. All external storage and car parking areas shall be screened by a minimum 1.8m high solid[383] **fence or landscaping so that:**

[379] Buller District Council (S538.458)
[380] Buller District Council (S538.458)
[381] Buller District Council (S538.458)
[382] Waka Kotahi (S450.234)
[383] Buller District Council (S538.458)

a. It is not visible from any adjacent RESZ - Residential Zone or SETZ - Settlement Zone boundary or adjacent public place; and

b. The fence or landscaping is set back from the road boundary so that it does not restrict visibility;

2. No blasting or vibration shall occur outside the hours of 0800 to 1800 hours weekdays and 0900 to 1600 hours on Saturdays with no blasting or vibration to be undertaken on Sundays or public holidays;

Activity status where compliance not achieved: Restricted Discretionary[384]

LIZ – R~~2~~3 Commercial Activities

Activity Status Permitted

Where:

~~**1.** All performance standards for Rule GIZ - R1 are complied with; and~~

1. All external storage shall be screened by a 1.8m fence[385] **or landscaping so that:**

a. It is not visible from any adjacent RESZ - Residential Zone or SETZ - Settlement Zone boundary or adjacent public place; and

b. The fence or landscaping is set back from the road boundary so that it does not restrict visibility;[386]

2. Any Retail Activities are:

i. ~~Motor vehicle sales yards~~ Convenience stores;

ii. ~~Service stations~~ Restaurants;

iii. ~~Trade retail and trade suppliers~~ Cafes;

iv. ~~Drive through restaurants~~ Takeaway food outlets; ~~or~~

with a maximum gross floor area of 250m².[387]

Activity status where compliance not achieved:

Restricted Discretionary where standard 1 is not complied with

Discretionary **where standard 2 is not complied with**[388]

LIZ – R~~3~~4 Ancillary Residential Activities

[384] Waka Kotahi (S450.234)
[385] Buller District Council (S538.458)
[386] Waka Kotahi (S450.234)
[387] Buller District Council (S538.459)
[388] Waka Kotahi (S450.234)

Activity Status Permitted

Where:

1. All performance standards for Rule LIZ-R1 are complied with;

1. One ~~single~~ residential unit per site is provided; and[389]

2. The residential activity is ancillary to the commercial or industrial activity on the site.

Advice Note:

1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.

Activity status where compliance not achieved: Non-complying

LIZ – R4<u>5</u>	**Emergency Service Facility, Carparking Lots and Buildings, Trade and Industry Training, Community Corrections Activity, Gymnasium and Public Transport Facility**

Activity Status Permitted

Where:

1. All performance standards for Rule LIZ - R1 are complied with except that hose drying towers associated with an Emergency Service Facility are exempt from height standards.

Activity status where compliance not achieved: Discretionary

LIZ – R~~5~~<u>6</u>	**Minor Structures**

Activity Status Permitted

Where:

~~1. All performance standards for Rule LIZ - R1 are complied with - except that compliance with standard 3 (setbacks) is not required.~~[390]

1. Masts, poles, aerials and pou whenua must not exceed 7m in height;

2. Any antenna dish must be less than 1.2m in diameter and not project more than 3.5m above the highest point of any building they are attached to;

3. Any ornamental or garden structure must not exceed 2.4 m in height; ~~and~~

4. **<u>Hose drying towers do not exceed 15m in height; and</u>**[391]

5. Any other structure must not exceed 10m² and 2m in height.

APPENDIX 1 – RECOMMENDATIONS ON PLAN PROVISIONS

Definitions - Ngā Tautuhinga	
Term	**Definition**
RETAIL ACTIVITY	**means any commercial activity that uses land and/or buildings for displaying or offering of goods for sale or hire to the public.** Excludes service stations, trade retail and trade suppliers, car sales and drive through restaurants.
SUPERMARKET	**means a retail activity that uses land and/or buildings for displaying or offering a comprehensive range of food, beverage and other disposable goods such as fresh meat and produce; chilled, frozen, packaged, canned and bottled foodstuffs and beverages; and housekeeping and other personal items for sale to the public.**

Commercial and Mixed Use Zones Objectives	
CMUZ – O1	To maintain and enhance the character and amenity values of commercial areas and town centres **while enabling** ~~in a way that enables~~ commercial and other activities to support the local community and visitors ~~while minimising adverse effects on amenity within and adjoining the commercial areas~~.
CMUZ – O2	**Avoid, remedy, or mitigate adverse effects of commercial and other activities within and adjoining the commercial areas.**
CMUZ – O~~2~~3	To ~~recognise the importance of the West Coast/Te Tai o Poutini town centres and~~ maintain ~~their~~ **the** integrity **of the West Coast/Te Tai o Poutini town centres** as a place of high-quality built environment character, community and visitor focus and identity.
CMUZ – O~~3~~4	To recognise that Greymouth/Māwhera is the principal commercial and urban centre on the West Coast/Te Tai o Poutini and support its redevelopment through providing for a range of commercial and mixed use zones and activities within a high-quality urban environment.
CMUZ – O5	**The region's commercial needs are provided for via a suite of commercial zones that:** **(e) recognise the importance of the West Coast/Te Tai o Poutini town centres;** **(f) serve the immediate need of the local community;** **(g) provide for mixed use and redevelopment opportunities at Greymouth; and** **(h) provide for larger scale commercial activities in appropriate locations.**

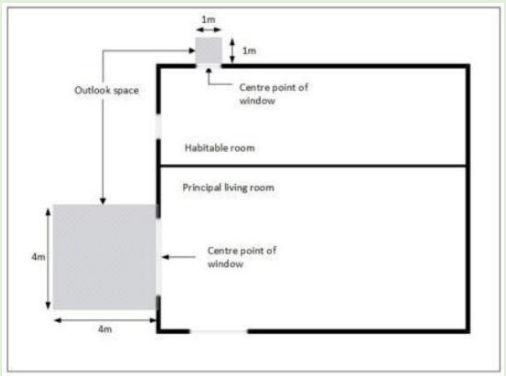
Commercial and Mixed Use Zones Policies	
Activities and Development in ~~CUMZ~~ CMUZ – Commercial and Mixed Zones	
CMUZ – P1	Where cultural landscapes are identified in commercial areas or developments, ensure activities are managed in a way that provides for the cultural relationships of Poutini Ngāi Tahu including;

	a. Protection of wāhi tapu and taonga sites in Schedule Three of the Plan using Poutini Ngāi Tahu culturally appropriate methods; b. Identification and utilisation of opportunities to enhance sites, values and other taonga of cultural significance to Ngāi Tahu; and c. Protection of the relationship of Poutini Ngāi Tahu with freshwater, including cultural wellbeing and use opportunities.
CMUZ – P2	A range of activities are anticipated within CMUZ - Commercial and Mixed Use Zones which meet the needs of the local community with convenient and safe access and opportunities for economic growth and social interaction.
CMUZ – P3	Residential activities and visitor accommodation may occur in the TCZ - Town Centre and MUZ - Mixed Use Zones particularly where this enables the redevelopment of important landmark and heritage buildings.
CMUZ – P4	New development in CMUZ - Commercial and Mixed Use Zones should have quality design outcomes ~~and is expected to~~ **which**: a. Acknowledge, and respond to, the context of the site and the surrounding environment; b. Ensure the bulk, form and siting of new buildings maintains and enhances the quality of the environment; c. Provide a quality street frontage with visual interest and connection with the street; and d. Ensure visual effects from car parking areas are ~~minimised~~ **mitigated; and** e. **Recognises the functional need or operational need of activities.**
New Locations for CMUZ – Commercial and Mixed Use Zones	
CMUZ – P5	Support the redevelopment of brownfield sites for mixed use activities where: a. A reduction in commercial or industrial land supply will not affect the ability to meet the anticipated needs of commercial and industrial activities including those with specific locational requirements; b. The mixed use development would not hinder the establishment or ongoing operation of surrounding commercial activities; c. There is sufficient capacity and a suitable connection to wastewater, water supply, stormwater and safe and efficient transport networks; d. The anticipated amenity values of the adjoining commercial or industrial zone are not compromised; e. If necessary, contaminated land is remediated in accordance with national and regional standards; and f. The redevelopment does not impact on: 4. The vitality and strategic role of town centres as the focal points for commercial and other activities; 5. The efficient and effective use of land; and 6. Community and transport infrastructure investment in centres.

CMUZ – P6	Recognise the substantial investment by communities in town centres and their infrastructure by ensuring that any new CMUZ - Commercial and Mixed Use Zones are located where they support the function of town centres. ~~-rather than pulling activity away from the centre~~
CMUZ – P7	New CMUZ - Commercial and Mixed Use Zones should not be located in areas subject to significant risks from natural hazards, in wāhi tapu or significant natural areas.
Infrastructure in Commercial and Mixed Use Zones	
CMUZ – P8	Where new CMUZ - Commercial and Mixed Use Zones are developed these should fund and install infrastructure to the standards required by the Councils and the Plan. Where there is significant infrastructure serving multiple properties under different ownership this should be vested in the Council for ongoing maintenance and renewal.
CMUZ – P9	Provide a range of transport modes to and from the town centres including public transport, cycling routes and **associated cycle** parking and encouraging more pedestrian friendly streets.
CMUZ – P10	The use of energy efficient systems and products, low impact stormwater design and other environmentally sustainable elements in new building and development is encouraged.
CMUZ – P11	Ensure that developments are serviced with all required infrastructure in an effective and efficient manner. Where new infrastructure such as roads and three waters (wastewater, water supply, stormwater) is provided to service new commercial areas across multiple properties then this should be vested with the Council rather than be retained as private infrastructure.
CMUZ – P12	Avoid reverse sensitivity effects on **regionally significant** ~~strategic~~ infrastructure including: a. Hokitika and Westport Airports and Greymouth Aerodrome; b. The rail network; c. The State Highway Network; d. The Ports of Westport and Greymouth; e. Community wastewater treatment and water supply plants; f. The National Grid.
Policies for Specific Commercial and Mixed Use Zones	
CMUZ – P13	Activities in the COMZ - Commercial, MUZ - Mixed-Use and NCZ - Neighbourhood Centre Zones should: a. ~~Meet performance standards on development and land use that maintain~~ **Maintain** or enhance the amenity of the commercial areas and ~~do not create~~ **avoid, remedy or mitigate** adverse effects beyond the boundaries of these areas, particularly in respect of residential areas; b. Provide safe urban design (including pedestrian and vehicle safety); and c. ~~Avoid the fragmentation~~ **Encourage compact urban form** of town centres.

CMUZ – P14	Trade retail and trade suppliers should locate in existing COMZ - Commercial Zone or MUZ - Mixed Use Zone but not within the TCZ - Town Centre Zone or in the NCZ - Neighbourhood Centre Zone.
CMUZ – P15	Activities within the TCZ - Town Centre Zones should: a. Maintain or enhance natural and historic features and built form; b. Adaptively reuse existing heritage buildings where practicable; c. Recognise and implement good urban design; d. Provide for low-speed vehicle movement; e. Allow for noise associated with commercial activities including bars and restaurants; f. Provide for commercial signs associated with on-site activities; g. Provide a high-quality pedestrian environment, with pedestrian oriented street layout; h. Have consolidated on-street parking; i. Have efficient wastewater, water supply and stormwater infrastructure that maximises the use of existing services; j. Allow for a range of transport options; ~~k. Have new buildings built to a high standard up to the street frontage and predominantly with verandahs over the footpath; and~~ ~~l. Be activities reliant on pedestrian movement.~~
CMUZ – P16	The NCZ - Neighbourhood Centre Zone should provide for retail and community facilities which serve the immediate local community and should not undermine town centre function and identity.
CMUZ – P17	COMZ - Commercial Zoned areas within small settlements should primarily provide access to local shopping and community facilities to serve that settlement.
CMUZ – P18	Encourage the redevelopment of sites within the MUZ - Mixed Use Zone.
CMUZ – P19	Over the long-term, promote the relocation of sporadic out-of-zone industrial activities in CMUZ - Commercial and Mixed Use Zones to INZ - Industrial Zoned areas
Additional Policies for Town Centre Precincts	
Town Centre Zone - Greymouth/Māwhera Town Centre Precinct Policies	
CMUZ – PREC1 – P1	Activities and development within the TCZ - PREC1 -Greymouth/Māwhera Town Centre Precinct should reflect the Greymouth/Māwhera CBD Redevelopment Plan and any subsequent plans for the town centre redevelopment and invigoration.
CMUZ – PREC1 – P2	Seek to intensify activity within the TCZ - PREC1 - Greymouth/Māwhera Town Centre Precinct by fully utilising the existing building stock – including allowing offices, cafes and restaurants, residential apartments and visitor accommodation in upper floors above street level.
CMUZ – PREC1 – P3	Celebrate Greymouth/Māwhera's unique historic and Poutini Ngāi Tahu heritage and identity by repurposing existing landmark and heritage buildings and the use of the Greymouth/Māwhera Town Centre Design Guidelines.

CMUZ – PREC1 – P4	Promote the development of green corridors connecting the Grey/Māwhera River to Victoria Park, Sawyers Creek Wetlands and the lagoon.
CMUZ – PREC1 – P5	Require high quality design outcomes in the TCZ - PREC1 - Greymouth/Māwhera Town Centre Precinct which adhere to the Greymouth/Māwhera Town Centre Design Guidelines. In particular, new development and additions and alterations to existing buildings are expected to: a. Acknowledge, and respond to, the context of the site and the surrounding environment; b. Create visual interest and be in keeping with streetscape values; c. Address Poutini Ngāi Tahu and historic heritage values and design elements; d. Create a vibrant, active pedestrian environment; e. Take into account sustainable building design and Crime Prevention through Environmental Design (CPTED) principles; f. Utilise the Greymouth Pounamu and Māori Heritage paint palette on building frontages; and g. Ensure continuous verandah coverage on the Main Street Frontage of the TCZ - PREC1 - Greymouth/Māwhera Town Centre Precinct.
CMUZ – PREC1 – P6	Encourage **walking and cycling** access to and along the Grey/Māwhera River to the adjacent MUZ- Mixed Use Zone, the West Coast Wilderness Trail and Māwheranui Walkway.
Town Centre Zone - Hokitika Town Centre Precinct Policies	
CMUZ – PREC2 – P7	Reinforce the pedestrian priority in the TCZ - PREC2 - Hokitika Town Centre Precinct by requiring verandahs, active street frontage and a high quality pedestrian environment which reflects the Hokitika Town Centre Design Guidelines.
CMUZ – PREC2 – P8	Provide for and enable the inclusion of elements of Poutini Ngāi Tahu culture in the design of buildings and structures in the TCZ - PREC2 - Hokitika Town Centre Precinct.
CMUZ – PREC2 – P9	Promote pedestrian **and cycling** links and pedestrian **and cycling** focused activity to link the Hokitika town centre to the Gibson Quay/Hokitika River and to the Hokitika beachfront.
Town Centre Zone – Westport/Kawatiri Town Centre Precinct Policies	
CMUZ – PREC3 – P10	Ensure that the design, scale and layout of commercial development and buildings in the TCZ - PREC3 - Westport/Kawatiri Town Centre Precinct is compatible with the character of the town.
CMUZ – PREC3 – P11	Reinforce Palmerston Street between Henley St and Rintoul St as the heart of Westport/Kawatiri by requiring verandahs, active street frontage and a high quality pedestrian environment.
CMUZ – PREC3 – P12	Promote pedestrian **and cycling** links and pedestrian **and cycling** focused activity to link Victoria Square to the Buller/Kaiwatiri Riverfront.
Town Centre Zone – Reefton Town Centre Precinct Policies	



CMUZ – PREC4 – P13	Ensure that the design, scale, location and layout of development and buildings in the TCZ - PREC4 - Reefton Town Centre Precinct are compatible with the historic character of this area.
CMUZ – PREC4 – P14	Require new development and additions to exterior facades of buildings on the Main Street Frontage of the TCZ - PREC4- Reefton Town Centre Precinct to adhere to the Reefton Historic Town Centre Design Guidelines.

Commercial Zone Rules		
Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.		
Permitted Activities		
COMZ - R1	**New Buildings and External Additions or Alterations to Existing Buildings** ~~Commercial Activities, Community Facilities, Emergency Service Facilities, Community Corrections Activity, Educational Facilities and Visitor Accommodation Activities and Buildings~~	
Activity Status Permitted Where: 1. The maximum height above ground level is ~~12~~ **15** metres except that this standard does not apply to hose drying towers at Emergency Service Facilities; 2. Any building or structure is set back: i. 3m from any RESZ - Residential Zone or OSRZ - Open Space and Recreation Zone; and ii. 3m from the road boundary, except for; sites with frontage to two roads in the COMZ - Commercial Zone can have a 3m setback on one road boundary and 1.5m setback on the other road boundary; iii. **1.5m from the railway designation boundary, excluding accessory buildings and structures.** 3. Landscaping shall be provided as follows: i. The area adjoining the road frontage of all sites shall contain a minimum 1.5m landscaping strip ~~that will, within two years of being planted, reach a minimum height of 1m~~; ii. On sites adjoining a RESZ - Residential Zone a 2m wide landscaping strip shall be provided adjacent to the RESZ - Residential Zone boundary and shall be planted with species, which at maturity, will screen the buildings from the adjoining sites; and		**Activity status where compliance not achieved:** Restricted Discretionary where standards ~~5 and~~ **2 – 5** ~~6~~ are not complied with. Discretionary where standard~~s~~ 1~~-4 are~~ **is** not complied with.

iii. The planting of 1 tree per 20 carparking spaces is ~~encouraged~~ **required** within any carparking area. iv. Stormwater facilities that provide water quality treatment and landscape amenity, should be incorporated into landscaped areas, where practicable, to achieve effective stormwater management in an integrated manner. 4. The maximum building length is 20m where this abuts a RESZ - Residential Zone; **and** ~~5. External storage is screened by a 1.8m fence or landscaping so that it is not visible from any adjoining residential zone boundary or adjoining public place; and~~ 5. No building projects beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing.~~ This standard does not apply to: i. Road boundaries; ii. Buildings on adjoining sites that have a common wall along the boundary; iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard; iv. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (eg finials, spires) provided these do not exceed the recession plane by more than 3m vertically; v. Solar panels and solar water heaters provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically. **Advice Notes:** 1. Any landscaping required by this rule may be located in common areas, where the development comprises land and/or buildings in separate unit titles. 2. **Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.** ~~3. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.~~	
COMZ – R2	**Minor Structures**

Activity Status Permitted Where: 1. ~~All performance standards for~~ **Standard 2 for** Rule COMZ - R1 **is** ~~are~~ complied with; 2. Masts, poles, aerials and pou whenua must not exceed 7m in height; 3. Any antenna dish must be less than 1m in diameter; 4. Any ornamental or garden structure must not exceed 2.4 m in height; and 5. Any other structure must not exceed 10m² and 2m in height.	**Activity status where compliance not achieved:** Discretionary
COMZ – R3 **Fences, Walls and Retaining Walls**	
Activity Status Permitted Where: 1. Fences, walls and retaining walls are a maximum 2m height above ground level; and 2. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall or wall. **Advice Note:** Retaining walls greater than 1m in height should be subject to engineered design and meet the Building Code.	**Activity status where compliance not achieved:** Discretionary
COMZ – R4 **Relocated Buildings**	
Activity Status Permitted Where: 1. All performance standards for Rule COMZ - R1 are complied with; 2. Any relocated building intended for use as a dwelling must have been designed**,** ~~and~~ built**, and** ~~to be~~ used as a dwelling; 3. A building pre-inspection report **in accordance with Appendix 11** shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the **exterior** reinstatement works **including connections to infrastructure services and closing in and ventilation of the foundations** shall be completed within a 12-month period **of the building being delivered to the site; and**; 4. The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site.~~; and~~ ~~5. All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is~~	**Activity status where compliance not achieved:** **Refer to COMZ-R1 for where standard 1 is not complied with.** Restricted Discretionary **where standards 2 to 5 are not complied with.**

~~to include connections to all infrastructure services and closing in and ventilation of the foundations.~~	
COMZ – R5	**Commercial Activities, Community Facilities, Emergency Service Facilities, Community Corrections Activity, Educational Facilities and Visitor Accommodation Activities**
Activity status Permitted **Where:** **1. External storage is screened by a 1.8m fence or landscaping so that it is not visible from any adjoining residential zone boundary or adjoining public place** **Advice Note:** **1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.**	**Activity status when compliance not achieved: Restricted Discretionary**
COMZ – R~~5~~6	**Residential ~~Buildings and~~ Activities**
Activity Status Permitted Where: ~~1. All performance standards for Rule COMZ - R1 are complied with;~~ 1. This is ancillary to a Commercial Activity; 2. It is not ancillary to a Commercial Activity, the activity is located above the ground floor level of a Commercial Activity; and 3. Each residential unit shall be provided with: i. ~~An outdoor service space of 3 m² and a~~ **A** waste management area of 2m² per unit, each with a minimum dimension of 1.5 metres in ~~either~~ a private ~~or communal~~ area **or 9m² with a minimum dimension of 2.8m in a communal area**; ii. A single, indoor storage space of 4m³ with a minimum dimension of 1 metre; iii. Any space designated for waste management, whether private or communal, shall not be located between the road boundary and any building and shall be screened from adjoining sites, roads, and adjoining outdoor living spaces by screening of the waste management area to a height of 1.5 metres; and iv. Each residential unit shall be provided with an outdoor living space of **8m² minimum area and 2 metres minimum dimension;** ~~1. 6m² minimum area and 1.5 metres minimum dimension for a studio or 1 bedroom unit~~; ~~2. 10m² minimum area and 1.5 metres minimum dimension for a 2 or 3 bedroom unit;~~	**Activity status where compliance not achieved:** Non-complying

~~3. 15m² minimum area and 1.5 metres minimum dimension for 3 or more bedrooms;~~ v. Each residential unit shall be provided with outlook space from each habitable room from the largest window in the room as follows: 1. A principal living room must have an outlook space with a minimum dimension of 3 metres in width **and depth**; 2. All other habitable rooms must have an outlook space with a minimum dimension of 1m in width **and depth**; 3. The width of the outlook ~~species~~ **spaces** is measured from the centre point of the largest window on the building face to which it applies; 4. Outlook spaces may be within the same site or over a public street or other public open space; 5. Outlook spaces required from different rooms within the same building may overlap; 6. Outlook spaces must: c. Be clear and unobstructed by buildings; and d. Not extend over an outlook space or outdoor living space required by another dwelling.  **Advice Note:** 1. In meeting the outdoor living space requirements, decks and balconies will be included within the calculation. 2. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.	
Restricted Discretionary Activities	
COMZ – R~~6~~7	~~Commercial Activities, Community Facilities, Educational Facilities, Emergency Service Facilities, Community Corrections Activities, and Visitor Accommodation Activities and~~ **New Buildings and External Additions and Alterations to Existing Buildings not meeting** ~~the External Storage, Building Length or Recession Plane performance standards of~~ **Rule COMZ - R1**

Activity Status Restricted Discretionary Where: 1. ~~All performance standards for Rule COMZ - R1 other than those that relate to External Storage and Recession Planes are~~ **Performance standard 1 for Rule COMZ-R1 is** complied with. **Discretion is restricted to:** ~~a. Materials being stored;~~ ~~b. Period of time for storage;~~ ~~c. Distance from boundary; and~~ d. Bulk, location and design of storage, buildings and structures. e. **Effects on the safety, amenity and attractiveness of the street or public places; and** **f. Visual dominance, privacy and shading effects on neighbouring sites**	**Activity status where compliance not achieved:** Discretionary
COMZ – R8	**Commercial Activities, Community Facilities, Emergency Service Facilities, Community Corrections Activity, Educational Facilities and Visitor Accommodation Activities not meeting Rule COMZ-R5**
Activity Status Restricted Discretionary **Discretion is restricted to:** **a. Effects on the safety, amenity and attractiveness of the street or public places; and** **b. Materials being stored and the period of time for storage.**	**Activity status where compliance not achieved: N/A**
COMZ – R~~7~~9	**Relocated Buildings not meeting Rule COMZ - R4** ~~or Recession Plane performance standards of Rule COMZ - R1~~
Activity Status Restricted Discretionary ~~Where:~~ ~~1. All performance standards for Rule COMZ - R1 are complied with.~~ **Discretion is restricted to:** a. Design and location of structures; b. ~~Landscape measures~~ **Measures to mitigate landscape effects;** and c. Appearance of buildings **and the completion of any building reinstatement works identified in a building inspection report**.	**Activity status where compliance not achieved:** ~~Discretionary~~ **N/A**
Discretionary Activities	
COMZ – R~~8~~10	~~Commercial Activities, Community Facilities, Educational Facilities, Emergency Service Facilities, Community Corrections Activities, Visitor Accommodation Activities and~~ **New Buildings and External Additions and Alterations to Existing Buildings,** ~~Relocated Buildings,~~ **Minor Structures, Fences, Walls and Retaining Walls not meeting Permitted or Restricted Discretionary Activity Standards**

Activity Status Discretionary ~~Where:~~ ~~1. The maximum height is 15m;~~ ~~2. Maximum building length abutting a residential zone is 35m, and~~ 3. ~~Any building or structure is set back 3m from any Residential Zone or Open Space Zone.~~	**Activity status where compliance not achieved:** ~~Non-complying~~ **N/A**
COMZ – R11	**Any activity not provided for by another Rule in the zone**
Activity Status Discretionary	**Activity status where compliance not achieved: N/A**
Non-complying Activities	
COMZ – R9~~1~~2	**Residential Activities ~~and Buildings~~ not meeting the standards in Rule COMZ - R~~5~~6**
Activity Status Non-complying	**Activity status where compliance not achieved:** N/A
COMZ – R~~10~~13	**Industrial Activities**
Activity Status Non-complying	**Activity status where compliance not achieved:** N/A
~~**COMZ – R11**~~	~~**Any activity not provided for by another Rule in the zone**~~
~~Activity Status Non-complying~~	~~Activity status where compliance not achieved: N/A~~

Mixed Use Zone Rules	
Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity is provided in General Approach.	
Permitted Activities	
MUZ - R1	**New Buildings and External Additions or Alterations to Existing Buildings**
Activity Status Permitted Where: 1. The maximum ground floor area of the building is 500m²; 2. The maximum height above ground level is 12m except that this standard does not apply to hose drying towers at Emergency Service Facilities;	**Activity status where compliance not achieved:** **Restricted Discretionary where standards 1 and 3 to 6 are not complied with**

3. Any building on a Facade Control Street must have: i. A cantilevered continuous verandah to cover the full width of the footpath except that this does not apply to Heritage Buildings identified in Schedule One; ii. 20% of the facade devoted to display windows or transparent glazing; and iii. The principal public entrance to the building must be located on the front boundary; 4. Any building or structure is setback a minimum of: i. 3m from any RESZ - Residential Zone, OSRZ - Open Space and Recreation Zone, INZ - Industrial Zone or PORTZ - Port Zone boundary; **and** ii. **1.5m from the railway designation boundary, excluding accessory buildings and structures.** ~~5. All external storage is screened by a 1.8m fence or landscaping so it is not visible from any adjoining residential zone boundary or any adjoining public space;~~ 5. On sites adjoining a RESZ - Residential Zone a 2m wide landscaping strip shall be provided adjacent to the RESZ - Residential Zone boundary and shall be planted with species, which at maturity, will screen the buildings from the adjoining sites; and 6. No building shall protrude beyond a building envelope defined by a recession plane as identified in accordance with Appendix Two to commence 2.5m above any RESZ - Residential Zone boundary ~~except where the neighbouring property owner's written approval is provided to the Council 10 working days to the works commencing.~~ This standard does not apply to: i. Road boundaries; ii. Buildings on adjoining sites that have a common wall along the boundary; iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard; iv. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and v. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically. **Advice Note:**	Discretionary **where standard 2 is not complied with.**

1. <u>Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.</u>	
MUZ – R2	**Commercial Activity, Community Facilities, Community Corrections Activity, Educational Facilities and Emergency Service Facilities**
Activity Status Permitted Where: 1. This is not visitor accommodation subject to Rule MUZ-R5; ~~2. Performance standards for Rule MUZ - R1 are complied with; and~~ **<u>4.</u>** This is not a commercial garage, service station or emergency service activity located on a Facade Control Street**<u>; and</u>** **<u>5. All external storage is screened by a 1.8m fence or landscaping so it is not visible from any adjoining residential zone boundary or any adjoining public space.</u>**	**Activity status where compliance not achieved:** Refer Rule MUZ – R5 for Visitor Accommodation **<u>Restricted discretionary where standard 3 is not complied with</u>** ~~Activities not complying with Standard 2 or 3 are~~ Discretionary **<u>where standard 2 is not complied with.</u>**
MUZ – R3	**Carparking and Vehicle Service Areas**
Activity Status Permitted Where: 1. Provision for carparking and vehicle service access is made at the side or rear of the building; 2. If available all vehicle access should be from service lanes or streets other than those subject to Facade Controls; 3. No parking areas are located between the frontage of buildings and the street; 4. No carpark is provided on a Facade Control Street; ~~and~~ 5. For all sites adjoining a RESZ - Residential Zone all parking areas must be screened so they are not visible from the adjoining residential site**; and** **6. <u>Standards 1 to 5 of Rule MUZ-R3 do not apply to Emergency service facilities</u>** **Advice Note:** Carparking and Vehicle Service Access must comply with the standards outlined in the Transport Chapter.	**Activity status where compliance not achieved:** Non-complying
MUZ – R4	**Residential Activities and Papakāinga**
Activity Status Permitted Where: 1. The residential activity or papākainga is: i. Located above street level; or	**Activity status where compliance not achieved:** Discretionary

ii. Located at street level but with no frontage to public open spaces or streets except for access; 2. Each residential unit shall be provided with a waste management area of 2m² per unit, each with a minimum dimension of 1.5 metres in ~~either~~ a private ~~or communal~~ area **or 9m² with a minimum dimension of 2.8 metres in a communal area**; 3. Any space designed for waste management, whether private or communal, shall not be located between the road boundary and any building, and shall be screened from adjoining sites, roads and adjoining outdoor living spaces by screening of the waste management area to a height of 1.5 metres; 4. Residential accommodation entrances shall be clearly separated and distinguished from commercial entrances; 5. **The principal residential** ~~Residential~~ accommodation entrance~~s~~ shall be provided directly from **a** ~~the~~ public street **or open space**. **Advice Note:** The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.	
MUZ – R5	**Visitor Accommodation**
Activity Status Permitted Where: 1. The visitor accommodation is located i. In a Heritage Building listed in Schedule One; or ii. Above street level; or iii. At street level but with no frontage to public open spaces or streets except for access 2. Any space designed for waste management, whether private or communal, shall not be located between the road boundary and any building, and shall be screened from adjoining sites, roads and adjoining outdoor living spaces by screening of the waste management area to a height of 1.5 metres; 3. Visitor accommodation entrances shall be clearly separated and distinguished from commercial entrances; and 4. **The principal visitor** ~~Visitor~~ accommodation entrance~~s~~ shall be provided directly from **a** ~~the~~ public street **or open space**. **Advice Note:** The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.	**Activity status where compliance not achieved:** Discretionary
MUZ – R6	**Minor Structures**

Activity Status Permitted **Where:** 1. ~~All performance standards for~~ **Standard 4 of** Rule MUZ - R~~2~~**1 is** ~~are~~ complied with; 2. Masts, poles, aerials and pou whenua must not exceed 7m in height; 3. Any antenna dish must be less than 1m in diameter; 4. Any ornamental or garden structure must not exceed 2.4 m in height; and 5. Any other structure must not exceed 10m² and 2m in height.	**Activity status where compliance not achieved:** Discretionary
MUZ – R7	**Fences, Walls and Retaining Walls**
Activity Status Permitted Where: 1. Fences, walls and retaining walls are a maximum 2m height above ground level; and 2. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall or wall.	**Activity status where compliance not achieved:** Discretionary
MUZ – R8	**Relocated Buildings**
Activity Status Permitted Where: 1. All performance standards for Rule MUZ - R1 are complied with; 2. Any relocated building intended for use as a dwelling must have been designed, ~~and~~ built**, and** ~~to be~~ used as a dwelling; 3. A building pre-inspection report **in accordance with Appendix 11** shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the **exterior** reinstatement works **including connections to infrastructure services and closing in and ventilation of the foundations** shall be completed within a 12-month period **of the building being delivered to the site; and** 4. The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site.~~; and~~ ~~5. All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all~~	**Activity status where compliance not achieved:** **Refer Rule MUZ – R1 for where standard 1 is not complied with.** Discretionary **where standards 2 to 5 are not complied with.**

~~infrastructure services and closing in and ventilation of the foundations.~~	
Restricted Discretionary Activities	
MUZ – R9	**New Buildings and External Additions or Alterations to Existing Buildings not meeting Rule MUZ – R1**
Activity Status Restricted Discretionary **Where:** **1. Performance standard 2 for Rule MUZ-R1 is complied with.** **Discretion is restricted to:** **a. Bulk, location and design of storage, buildings and structures** **b. Effects on the safety, amenity and attractiveness of the street or public places; and** **c. Visual dominance, privacy and shading effects on neighbouring sites.**	**Activity status where compliance not achieved: Discretionary**
MUZ – R10	**Commercial Activity, Community Facilities, Community Corrections Activity, Educational Facilities and Emergency Service Facilities not meeting Rule MUZ-R2**
Activity Status Restricted Discretionary **Where:** **1. Performance standard 2 for Rule MUZ-R2 is complied with** **Discretion is restricted to:** **a. Effects on the safety, amenity and attractiveness of the street or public places; and** **b. Materials being stored and the period of time for storage.**	**Activity status where compliance not achieved: Discretionary**
Discretionary Activities	
MUZ – R9~~1~~11	~~Commercial Activities, Community Facility, Educational Facility, Community Corrections Activity, Visitor Accommodation, Emergency Service Facilities and~~ **Buildings not meeting Permitted Activity Standards**
Activity Status Discretionary Where: 1. The maximum height is 20m.	**Activity status where compliance not achieved:** Non-complying
MUZ – R~~1~~2	**Minor Structures, Fences, Walls and Retaining Walls not meeting Permitted Activity Standards**

TCZ	**Town Centre Zone – Te Takiwā o te Pokapū o te Tāone**

Overview

The TCZ - Town Centre Zone is found in the four main town centres of Reefton, Greymouth/Māwhera, Westport/Kawatiri and Hokitika. There are common policies and rules across the TCZ - Town Centre Zone, however each town centre has a Precinct where specific additional policies and rules apply.

The four centres are **generally** characterised by 2-3 storey buildings located up to the street with verandahs and retail display windows. These town centres are pedestrian oriented and parking is available on the street. Residential living above ground floor and mixed use activities are provided for.

The architectural quality of buildings and the quality of the public realm (public spaces and the interaction between individual buildings and the public pedestrian environment) will strongly influence the attractiveness of the TCZ - Town Centre Zone and MUZ - Mixed Use Zone as places to visit, undertake business and live. The objectives, policies and rules for both zones enable a broad range of activities, in order to provide the flexibility necessary to accommodate future growth and change. More importantly, they also focus on the quality of buildings and the impact of new buildings on the public realm and on the walkability and pedestrian access within the town centres. This focus is important to enhancing the attractiveness of the town centres and encouraging new businesses, visitors and inner city living.

As the largest centre on the West Coast/Te Tai o Poutini, Greymouth/Māwhera is expected to provide for a diverse range of commercial, retail, community and recreation activities and offer a variety of employment and living opportunities. In

Greymouth/Māwhera higher density residential developments such as apartments above ground floor are anticipated that will contribute to providing wider housing choices for the community. The MUZ - Mixed Use Zone in Greymouth/Māwhera is adjacent to the TCZ - Town Centre Zone.

The Town Centre and Mixed Use Design Guidelines seek to ensure that new building development in the town centres is of a high standard and that it enhances the characteristics and qualities that contribute to each town centre's unique sense of place.

The location of the Hokitika, Greymouth/Māwhera and Westport/Kawatiri town centres on the coast and adjacent to large rivers, means parts of the town centres are subject to risk from existing and future flood and coastal inundation. Te Tai o Poutini Plan enables development within the TCZ - Town Centre Zone and MUZ - Mixed Use Zone that responds to and manages the risk. However, it is also acknowledged that over time a movement away from the most hazardous locations is desired, and this is reflected in other parts of the Te Tai o Poutini Plan through the NH - Natural Hazards provisions.

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities, in the Town Centre Zone including:

- **Transport** - the Transport Chapter contains provisions in relation to transport matters, including traffic generation TRN - R12.
- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters** - there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Town Centre Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.
- **Natural Hazards** - in Westport/Kawatiri, Reefton, Hokitika and Greymouth/Māwhera there are areas of natural hazards and in some locations these may affect areas in the Town Centre Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards Chapter.
- **Subdivision** - The Subdivision Chapter sets out the requirements for the development of new infrastructure and connections as part of subdivision activities.
- **Financial Contributions** - The Financial Contributions Chapter sets out the requirements for contributions of costs for activities which impact on infrastructure.
- **General District Wide Matters** - provisions in relation to Noise, Light, Signs, Temporary Activities and Earthworks in particular may be relevant to activities in the Town Centre Zone.

Town Centre Zone Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.

Permitted Activities

TCZ - R1	**New Buildings, External Alterations or Alterations to Existing Buildings** ~~Commercial Activities and Buildings, Community Corrections Activities, Community Facilities and Emergency Service Facilities~~

Activity Status Permitted Where: **1. The maximum height above ground level is;** **e. 20 metres in TCZ – PREC1 - Greymouth/Māwhera Town Centre Precinct.** **f. 12 metres in TCZ – PREC2 – Hokitika Town Centre Precinct.** **g. 15 metres in TCZ – PREC3 – Westport/Kawatiri Town Centre Precinct.** **h. 12 metres in TCZ – PREC4 – Reefton Town Centre Precinct.** **Except that hose drying towers at Emergency Service Facilities are exempt from this standard;** 2. Any building is located: a. On the front boundary of the site; b. With no setback from the street boundary, except that a recess of up to 0.5m within the facade of the building is permitted; 3. Any building is setback a minimum of a. 3m from any RESZ - Residential Zone boundary; b. **1.5m from the railway corridor designation, excluding accessory buildings and structures** ~~4. All external storage is screened by a 1.8m fence or landscaping so it is not visible from any adjoining residential zone boundary or any adjoining public space;~~ 4. The ground floor facade of all buildings with a Main Street Frontage must have: a. ~~50% of the facade devoted to display windows or 75% of its height for at least 50% of the ground floor building frontage~~ **A minimum of 50% comprising of clear glazing**; and b. One public entrance with glazing comprising at least 40% of the doors; except that Any Heritage Building in Schedule One is exempt from this requirement. ~~5. No building shall create a featureless facade or blank wall on a Main Street Frontage at ground floor level wider than 3m;~~ 5. No building shall project beyond a building envelope defined by a recession plane as identified in accordance with Appendix Two to commence 2.5m above any RESZ - Residential Zone	**Activity status where compliance not achieved:** Non-complying where standards ~~1~~ **2** ~~3~~ are not complied with. Discretionary where standards **1 and** 4 to **5** ~~6~~ are not ~~met~~ **complied with**.

boundary ~~except where the neighbouring property owner's written approval is provided to the Council 10 working days to the works commencing~~. This standard does not apply to: a. Road boundaries; b. Buildings on adjoining sites that have a common wall along the boundary; c. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard; d. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and e. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically. **Advice Notes:** **1. Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.** **2. When designing new buildings or additions and alterations to existing buildings in the Town Centre Zone, developers are encouraged to use the relevant Design Guidelines:** **a. the Hokitika Town Centre Urban Design Guidelines; or** **b. Greymouth/Māwhera Town Centre and Mixed Use Urban Design Guidelines; or** **c. Westport/Kawatiri Town Centre and Mixed Use Zone Urban Design Guidelines; or** **d. Reefton Town Centre Urban Design Guidelines**.	
TCZ – R2	**Commercial Activities ~~and Buildings~~, Community Facilities, Community Corrections Activities and Emergency Service Facilities in the TCZ - PREC2 Hokitika Town Centre Precinct**
Activity Status Permitted Where: ~~1. All performance standards from Rule TCZ - R1 are complied with;~~ 1. Any commercial activity on a Main Street Frontage does not include: a. Motor vehicle sales yards; b. Service stations;	**Activity status where compliance not achieved:** ~~Discretionary where standard 3 is not complied with.~~ Non-complying ~~where standards 2, 4 and 5 are not complied with.~~

c. Yard based retail; d. Trade retail and trade suppliers; e. Drive through restaurants. ~~2. The maximum height above ground level is 12 metres except that hose drying towers at an Emergency Service Facility are exempt from this standard;~~ 2. ~~Every~~ **New** building**s and additions and alterations to any building** with a Main Street Frontage must erect a cantilevered continuous verandah to cover the full width of the footpath except that this does not apply to Heritage Buildings identified in Schedule One; and **3. All external storage is screened by a 1.8m fence or landscaping so it is not visible from any adjoining residential zone boundary or any adjoining public space.** **~~4.~~** ~~New buildings and additions and alterations to any Main Street Frontage facade must demonstrate that they meet the Hokitika Town Centre Urban Design Guidelines.~~	~~Refer Rule TCZ - R1 where there is non-compliance with these standards~~
TCZ – R3	**Commercial Activities** ~~and Buildings~~**, Community Facilities, Community Corrections Activities and Emergency Service Facilities in the TCZ - PREC1 Greymouth/Māwhera Town Centre Precinct**
Activity Status Permitted Where: ~~1. All performance standards from Rule TCZ - R1 are complied with~~; ~~2. The maximum height above ground level is 20 metres~~; 1. ~~Every~~ **New** building**s and additions and alterations to any building** with a Main Street Frontage must erect a cantilevered continuous verandah (with no decorative poles) to extend from the shop frontage to be 400mm inside the kerbline. This requirement for a verandah does not apply to Historic Heritage buildings identified in Schedule One**;and** **2. All external storage is screened by a 1.8m fence or landscaping so it is not visible from any adjoining residential zone boundary or any adjoining public space.** **Advice Note:** 1. The verandah shall extend from the shop frontage to be 400mm inside the kerbline. The verandah, if on a corner, shall be splayed so as to be 400mm back from the kerbline. **~~2.~~** ~~When designing new buildings in Greymouth/Māwhera Town Centre developers are encouraged to use the Greymouth/Māwhera Town Centre and Mixed Use Urban Design Guidelines.~~	**Activity status where compliance not achieved:** ~~Discretionary where standard 2 is not complied with.~~ Non-complying ~~where standard 3 is not complied with.~~ ~~Refer Rule TCZ - R1 where there is non-compliance with these standards.~~

TCZ – R4	**Commercial Activities ~~and Buildings~~, Community Facilities and Emergency Service Facilities in the TCZ - PREC3 - Westport/Kawatiri Town Centre Precinct**
Activity Status Permitted Where: ~~1. All performance standards from Rule TCZ - R1 are complied with;~~ 1. Any commercial activity on a Main Street Frontage does not include: f. Motor vehicle sales yards; g. Service stations; h. Yard based retail; i. Trade retail and trade suppliers; j. Drive through restaurants. ~~2. The maximum height above ground level is 15 metres~~; 2. Every building with a Main Street Frontage must erect a cantilevered continuous verandah to cover the full width of the footpath. This requirement to provide a verandah does not apply to Heritage Buildings identified in Schedule One**; and** **3. All external storage is screened by a 1.8m fence or landscaping so it is not visible from any adjoining residential zone boundary or any adjoining public space.** **Advice Note:** 1. When erecting a cantilevered verandah, poles are encouraged for decorative purposes. 2. ~~When designing new buildings for the Westport/Kawatiri Town Centre developers are encouraged to use the Westport/Kawatiri Town Centre and Mixed Use Zone Urban Design Guidelines~~.	**Activity status where compliance not achieved:** ~~Discretionary where standards 3 is not complied with~~ Non-complying ~~where standard 2 or 4 is not complied with~~ ~~Refer Rule TCZ - R1 where there is non-compliance with these standards~~

TCZ – R5	**Commercial Activities ~~and Buildings~~, Community Facilities, Community Corrections Activities and Emergency Service Facilities in the TCZ - PREC4 - Reefton Town Centre Precinct**
Activity Status Permitted Where: ~~1. All performance standards from Rule TCZ - R1 are complied with;~~ ~~2. The maximum height above ground level is 12 metres except that hose drying towers at Emergency Service Facilities are exempt from this standard~~; 3. Every building with a frontage to SH7 (Broadway) must erect a continuous verandah to cover the full width of the footpath with a timber frame and a roof supported on timber poles;	**Activity status where compliance not achieved:** ~~Discretionary where standard 2 are not complied with.~~ Non-complying ~~where standards 3, 4 and 5 are not complied with.~~ ~~Refer Rule TCZ - R1 where there is non-compliance with these standards.~~

4. Any commercial activity does not include: f. Car sales yards; g. Service stations; h. Yard based retail; i. Trade retail and trade suppliers; j. Drive through restaurants; ~~and~~ ~~5. New buildings and additions and alterations to the exterior facade with frontage to SH7 (Broadway) must demonstrate they meet the Reefton Heritage Town Design Guidelines.~~	
TCZ – R6	**Carparking and Vehicle Service Access**
Activity Status Permitted Where: 1. Provision for carparking and vehicle service access is made at the side or rear of the building; 2. If available all vehicle access should be from service lanes; 3. No parking areas are located between the frontage of buildings and the street; 4. No carpark is provided on a Main Street Frontage; 5. For all sites adjoining a RESZ - Residential Zone all parking areas must be screened so they are not visible from the adjoining residential site; and 6. Where the entire site is developed as a carpark, this must incorporate pedestrian wet weather cover for the footpath, planting and landscape measures which have been assessed as meeting the requirements of the relevant Town Centre Design Guidelines **7. <u>Emergency service facilities are excluded from Standards 1 to 6 of Rule TCZ-R6.</u>** **Advice Note:** Carparking and Vehicle Service Access must comply with the standards outlined in the Transport Chapter.	**Activity status where compliance not achieved:** Non-complying
TCZ – R7	**Residential Activities in Existing Buildings**
Activity Status Permitted Where: 1. The residential activity is located a. Above street level; except b. Where this is a Heritage Building listed in Schedule One, then the activity may occur at street level; 2. Each residential unit shall be provided with a waste management area of 2m² per unit, each with a minimum dimension of 1.5 metres in ~~either~~ a private ~~or communal~~ area	**Activity status where compliance not achieved:** Discretionary

or 9m² with a minimum dimension of 2.8m in a communal area; 3. Any space designed for waste management, whether private or communal, shall not be located between the road boundary and any building, and shall be screened from adjoining sites, roads and adjoining outdoor living spaces by screening of the waste management area to a height of 1.5 metres. 4. Residential accommodation entrances are clearly separated and distinguished from commercial entrances; and 5. **The principal residential** ~~Residential~~ accommodation entrance~~s are~~ **shall be** provided directly from **a** ~~the~~ public street **or open space**. **Advice Note:** 1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.	
TCZ – R8	**Visitor Accommodation Activities** ~~and Buildings~~
Activity Status Permitted Where: ~~1. All performance standards from Rule TCZ - R1 are complied with;~~ 1. The visitor accommodation activity is located; c. Above street level; except d. At street level and above street level in any Heritage Building listed in Schedule One; 2. Any space designed for waste management, whether private or communal, shall not be located between the road boundary and any building, and shall be screened from adjoining sites, roads and adjoining outdoor living spaces by screening of the waste management area to a height of 1.5 metres; 3. Visitor accommodation entrances are clearly separated and distinguished from commercial entrances; and 4. **The principal visitor** ~~Visitor~~ accommodation entrance~~s~~ **shall be** provide**d** ~~pedestrian access~~ directly from **a** ~~the~~ public street **or open space**. **Advice Note:** 1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.	**Activity status where compliance not achieved:** Discretionary
TCZ – R9	**Demolition of Existing Buildings**
Activity Status Permitted Where: 1. These are not Heritage Buildings identified in Schedule One;	**Activity status where compliance not achieved:**

2. Where the building is not replaced within 12 months: c. Then the site is completely cleared of demolition materials and a level surface with cover sufficient to ensure no dust nuisance created within 3 months of demolition; and d. A landscaping strip of 1.5m width is provided; 3. If the building to be demolished is on a Main Street Frontage ~~that~~ **then** a pedestrian weather cover must be provided over the **immediately** adjacent footpath ~~for 80% of the frontage~~. Where the site is to be redeveloped then a temporary structure can be provided for a maximum of 6 months in the TCZ - PREC1 - Greymouth/Māwhera and TCZ - PREC2 - Hokitika Town Centre Precincts and a maximum of 12 months in the TCZ - PREC3 - Westport and TCZ - PREC4 - Reefton Town Centre Precincts.	Controlled where Standards 2 and 3 are not complied with. Refer to Rule HH - R9 for Demolition of Historic Heritage buildings listed in Schedule One.
TCZ – R10 **Minor Structures**	
Activity Status Permitted **Where:** 1. Masts, poles, aerials and pou whenua does not exceed 7m in height; 2. Any antenna dish is less than 1m in diameter; 3. Any ornamental structure does not exceed 2.4m in height; ~~and~~ 4. **Hose drying towers do not exceed 15m in height; and** 5. Any other structure does not exceed 10m² and 2m in height.	**Activity status where compliance not achieved:** Discretionary
TCZ – R11 **Fences, Walls and Retaining Walls**	
Activity Status Permitted Where: 1. Fences, walls and retaining walls are a maximum 2m height above ground level; and 2. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall.	**Activity status where compliance not achieved:** Discretionary
Controlled Activities	
TCZ – R12 **Demolition of Buildings not meeting Permitted Activity Standards**	
Activity Status Controlled Where: 1. These are not Heritage Buildings identified in Schedule One. **Matters of control are:** a. Site rehabilitation and ~~landscape measures~~ **measures to mitigate landscape effects**; and b. Weather protection for pedestrians.	**Activity status where compliance not achieved:** Discretionary under Rule HH – R9.

Restricted Discretionary Activities	
TCZ – R13	**Relocated Buildings**
Activity Status Restricted Discretionary Where: 1. Permitted Activity performance standards for TCZ - R1 are complied with; and 2. Relevant Permitted Activity performance standards for TCZ - R2, TCZ - R3, TCZ - R4 and TCZ - R5 are complied with. **Discretion is restricted to:** a. Design and location of buildings; b. Appearance of buildings; c. The extent to which the building meets any relevant Town Centre Design Guidelines; and d. ~~Landscape Measures~~ **Measures to mitigate landscape effects**.	**Activity status where compliance not achieved:** Discretionary
Discretionary Activities	
TCZ – R14	**Visitor Accommodation Activities ~~and Buildings~~ and Residential Activities in Existing Buildings not meeting Permitted Activity Standards**
Activity Status Discretionary Where: 1. Except where this is Heritage Building listed in Schedule One, the ground floor is used for Commercial or Community Activities. **Advice Note:** 1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.	**Activity status where compliance not achieved:** Non-complying
TCZ – R15	~~Commercial Activities and~~ **New Buildings, External Alterations or Alterations to Existing Buildings** ~~Buildings, Community Facilities, Community Corrections Activities and Emergency Service Facilities~~ **and Relocated Buildings not meeting the Permitted Activity Standards for Ground Floor Facade, Recession Plane or Height**
Activity Status Discretionary Where: 1. All other performance standards for Rule TCZ - R1 ~~and where relevant for TCZ - R2, TCZ - R3, TCZ - R4 and TCZ - R5~~ are complied with.	**Activity status where compliance not achieved:** Non-complying
TCZ – R16	**Minor Structures and Fences, Walls and Retaining Walls not meeting the Permitted Activity Standards**
Activity Status Discretionary	**Activity status where compliance not achieved:** N/A
TCZ – R17	**Residential Activities ~~and Buildings~~ in New Buildings**

Activity Status Discretionary Where: 1. The ground floor is used for Commercial or Community Activities and complies with the Performance Standards for Rule TCZ - R1; 2. Each residential unit is provided with ~~an outdoor service space of 3m² and~~ a waste management area of 2m² per unit, each with a minimum dimension of 1.5 metres in ~~either~~ a private ~~or communal~~ area **or 9m² with a minimum dimension of 2.8 metres in a communal area**; 3. Each residential unit is provided with a single indoor storage space of 4m² with a minimum dimension of 1 metre; 4. All performance standards for Rule TCZ - R~~8~~**7** are complied with; and 5. Each residential unit shall be provided with an outdoor living space of **8m²minimum area and 2 metres minimum dimension;** d. ~~6m² minimum area and 1.5 metres minimum dimension for a studio or 1 bedroom unit;~~ e. ~~10m² minimum area and 1.5 metres minimum dimension for a 2 or 3 bedroom unit;~~ f. ~~15m² minimum area and 1.5 metres minimum dimension for 3 or more bedrooms.~~	**Activity status where compliance not achieved:** Non-complying
TCZ – R18	**Any activity not provided for by another Rule in the zone**
Activity Status Discretionary	**Activity status where compliance not achieved:** N/A
Non-complying Activities	
TCZ – R1~~8~~9	**Commercial Activities and Relocated Buildings, Community Facilities, Community Corrections Activities and Emergency Service Facilities not meeting the Permitted or Discretionary Activity Standards**
Activity Status Non-complying **Activity status where compliance not achieved:** N/A	
TCZ – R~~19~~20	**Residential and Visitor Accommodation Activities not meeting the Permitted, Restricted Discretionary or Discretionary Activity Standards**
Activity Status Non-complying **Activity status where compliance not achieved:** N/A	
TCZ – R2~~0~~1	**Carparking and Vehicle Service Access not meeting the Permitted Activity Standards**
Activity Status Non-complying **Activity status where compliance not achieved: N/A**	
TCZ – R2~~1~~2	**Industrial Activities**
Activity Status Non-complying	

Activity status where compliance not achieved: N/A

~~**TCZ –R21 Any activity not provided for by another Rule in the zone**~~

~~**Activity Status Non-complying**~~

~~**Activity status where compliance not achieved:** N/A~~

Greymouth/Māwhera Town Centre and Mixed Use Zone Urban Design Guidelines

1.0 Introduction

This document has been developed to provide direction to those planning, design and reviewing development proposals in the Greymouth/Māwhera town centre and new mixed use area. This guide seeks to achieve high quality building design that:

- Responds to the context
- Is visually interesting and in keeping with the streetscape values
- Addresses cultural and built heritage values and design elements
- Creates a vibrant, active pedestrian environment
- Incorporates new and innovative design where appropriate
- Takes into account Poutini Ngāi Tahu values.

1.1 When does the Design Guide apply?

Under Te Tai o Poutini Plan rules, all new buildings within the Greymouth/Māwhera Town Centre Zone and Mixed Use Zone are ~~required~~ **encouraged** to be assessed against these design guidelines. Where resource consents are required the Councils will use this guide to help assess and make decisions on those consent applications.

2.0 Greymouth/Māwhera Design Guidelines

2.1 Context

Connection with the Natural Environment

The Grey/Māwhera River provides a natural edge to the town centre and a link to its cultural heritage. The vegetated hills behind Greymouth/Māwhera are an important backdrop to the town and an acknowledged outstanding natural landscape. Keeping access to the Grey/Māwhera River and a visual link between the town centre and the surrounding hills is essential.

Existing built character

The core of Greymouth/ Māwhera's town centre retains a coherent collection of nineteenth and early twentieth century buildings and architecture/building methods of this period. This represents an important part of the historic heritage resource of the West Coast/Te Tai o Poutini.

The following design elements that contribute positively to the character of the town are identified as:

- Building edge – buildings are often built to the street boundary.
- Continuous façade – buildings tend to abut one another creating a sense of enclosure
- Human scale – buildings give a sense of human scape at the publicly occupied edges. They contain proportions, textures and physical elements that fit with the size of people.

- Prominent corner buildings – corner buildings are often taller than the adjoining buildings. This additional height helps define the edge of a block and create a visual anchor point.
- Verandahs – this is a key feature in the main street frontage streets in the Town Centre Zone and Façade Control Streets in the Mixed-Use Zone which provide shelter for pedestrians.
- Main Street frontage streets in the Greymouth/Māwhera Town Centre Zone are: Māwhera Quay, Mackay Street, Tainui Street, Guiness Street, Albert Street, Werita Street, Custom Street and Tarapuhi Street
- Façade Control Streets in the Greymouth/Māwhera Mixed Use Zone are: Mackay Street,Boundary Street, Richmond Quay, Gresson Street, Herbert Street, Guiness Street and Tarapuhi Street.
- Four distinct parts of building – traditional buildings show four distinct parts – base, verandah, upper area and parapet
- Rhythm and repetition – windows are often at regular intervals, symmetry of façade features
- Visual interest – although commonalities exist between buildings, each building expresses an individual character
- Active frontage – windows exist on all floor levels of a building's façade

Poutini Ngāi Tahu Cultural Landscapes

Many buildings within the town centre reflect Greymouth/Māwhera's colonial and settler history, however there is limited representation of a much longer Poutini Ngāi Tahu history. Greymouth/Māwhera is solely located within the takiwa of Te Rūnanga o Ngāti Waewae and they are the key Poutini Ngā Tahu contacts for designers of buildings in Greymouth/Māwhera.

Poutini Ngāi Tahu culture and identity highlight the West Coast's point of difference in the world and offer design opportunities for the future.

The guidelines in Section 2.2 are based on the Ngāi Tahu Subdivision and Development Guidelines, which are a set of urban design principles founded on core Maori cultural values and designed to provide practical guidance for enhancing outcomes for the design environment. These principles have arisen to enable greater iwi and hapū presence, visibility and participation in the design of the physical environment.

The use of Poutini Ngāi Tahu design guidelines is predicated on the development of high-quality durable relationships being developed between Te Rūnanga o Ngāti Waewae, Pokeka Environmental =their mandated design professionals, developers and the Council. Robust relationships between these groups provide opportunities for unlocking a rich store of design potential.

2.2 Guidelines

Context

GC1 Complement the ~~existing~~ **bulk and form of the existing** built context ~~with visual links through similarity of overall bulk and form. New development should attempt to complete, improve and enhance the setting of individual buildings or groups of buildings listed as scheduled historic heritage items in Te Tai o Poutini Plan.~~ New buildings/structures **which immediately adjoin scheduled heritage items** shall **aim to** complement and support, rather than dominate these scheduled buildings and structures.

GC2 Take into account the wider surroundings, including natural features, such as views to ~~other buildings,~~ the mountains and the Māwhera/Grey River.

Poutini Ngāi Tahu Cultural Landscapes

IW1 Mana/authority – The development of a high-level relationship with Te Rūnanga o Ngāti Waewae is essential prior to commencing design approaches which will maximise the opportunities for design outcomes. A cultural landscape approach is the most appropriate means to identify, assess and manage the potential effects of subdivision and development on cultural values and significant sites.

IW2 Te Reo, whakapapa/naming – Consultation with Te Rūnanga o Ngāti Waewae on the use of correct ancestral names, including macrons, and the recognition of traditional place names in keeping with the mita (pronunciation of language) of Poutini Ngāi Tahu through signage, wayfinding, street names in new subdivisions and names of public buildings, parks and places.

IW3 Tohu/landmarks – Significant wider cultural landmarks (including wāhi tapu, maunga, awa, puna, mahinga kai and ancestral kāinga) and associated narratives are acknowledged in the spatial orientation and layout of any new development, allowing visual connection to significant sites to be created, preserved and enhanced.

IW4 Taiao/environment – Landscape design includes a selection of indigenous plant and tree species where possible and reflects cultural perspectives, ideas and materials. Indigenous biodiversity objectives should be incorporated into development plans and indigenous species used for street trees, open space and reserves, native ground cover species for swales and stormwater management.

IW5 Mauri Tū/environmental health - Use of land - based treatment of wastewater, rainwater collection systems, grey-water recycling systems, stormwater treatment, passive solar design, and hard landscape and building materials which are locally sourced and of high cultural value to Poutini Ngāi Tahu are explored in the design process.

IW6 Mahi Toi/creative expression – **When** Poutini Ngāi Tahu narratives are ~~creatively~~ reinscribed through architectural ~~design~~ and building **design**, integrated artwork. ~~and~~ Te Rūnanga o Ngāti Waewae mandated design professionals and artists are appropriately engaged in ~~such~~ **this** process~~es~~.

IW7 Ki uta ki tai/from the mountains to the sea. Opportunities are explored through partnership engagement with Poutini Ngāi Tahu to reflect the Poutini Ngāi Tahu view of the environment and resource management. Ki uta ki tai is a traditional concept representing kaitiakitanga from the mountains and inland lakes, down the rivers to hapua/lagoons to the sea. Kaitiakitanga reflects the special relationship Ngāi Tahu has with its environmental heritage. It is fundamental to the tribe's culture and identity. Ki uta ki tai encapsulates the need to recognise and manage the interconnectedness of the whole environment.

Built Form

BF1 Mass/Scale - New buildings shall relate to the scale of adjacent buildings. Where very wide buildings are proposed, their bulk and width shall be reduced by dividing the façade up ~~by vertical divisions~~ into ~~several smaller "storefronts"~~ **visually smaller vertical forms** – something commonly used in the existing Greymouth/Māwhera building stock. Windows and doors and other architectural details shall be used to reduce the mass of structures. Where a building over three stories is proposed, the section above three stories shall be stepped back from the line of view from the street.

This long low building shape should be avoided. Two storey rather than one storey buildings give better containment to the streetscape. This building also lacks windows and has limited design features and detail to add interest to the building. The buildings colours are also very out of character with other buildings in the vicinity

An example of a wide building with vertical divisions and the use of colour and different materials to break up the facade.

BF2 Location to front – Buildings are to be positioned so their front walls abut the (footpath) boundary.

BF3 Continuity – on Main Street Frontage and Façade Control Streets buildings are to extend across the full width of the site frontage to ensure that the street's "built" edge is continuous. Exceptions to the continuous frontage are for walking access connections and outdoor dining areas/courtyards. The façade will be indicative of the bulk of the building behind (i.e., not just a façade). Beyond Main Street Frontage and Façade Control Streets, maintaining a continuous frontage is still encouraged to maintain a sense of enclosure, however it is not essential.

BF4 Height – New buildings should ideally be at least two storeys in height, but at a minimum, shall appear similar in height to the existing neighbouring buildings.

Any upper floor areas visible in the layout of the façade are to be potentially usable space rather than a false façade.

BF5 Corner buildings. Buildings on corners and main junctions are highly visible which means that building design is especially important. Buildings on corners are able to be visually emphasised with architectural elements such as taller forms, or parapets, cornice, pediment or similar features that wrap around the building.

This building expresses well to the corner with a specific corner facade.

This building does not include any corner features to emphasise its position.

Location Specific Guidance

BF6 Pedestrian Access Lanes – existing pedestrian access lanes shall be retained and enhanced. Lanes should be well lit, attractive and safe. Pedestrian routes shall be lit at a minimum of 10 lux. Buildings facing the lanes shall have ground level openings (windows or doors) to provide connection with the public space and allow natural surveillance of the walkway.

BF7 Roofs/Down pipes – Roofs are encouraged to sit below the height of the parapet and not be visible from the street. Drainpipes should be designed so they are a discrete part of the building and not visually intrusive.

Facades

GF1 Openings – Buildings are to have windows on all street facades with minimum glazing as specified in the relevant rules. ~~Symmetrically located windows~~ **Create visual interest and symmetry by positioning windows at regular intervals** ~~are required~~ above ground level, and main doors at ground level are to be oriented to the street (i.e., not at the side or the back). Entrances shall be wide enough to accommodate wheelchairs and pushchairs. Buildings that have more than one frontage (i.e., corner) are to include windows and doors on both facades if there is sufficient length of frontage. The design of side and back elevations that are visible from the street or any other public space should be consistent with the design of the main building frontage.

GF2 Visual permeability – The ground floor window of buildings (including glazed doors) in Main Street Frontages must be no less than 50% of the frontage in the Town Centre Zone and on Façade Control Streets in the Mixed Use Zone must have a minimum 20% glazing. ~~On all facades, fully glazed facades will not be permitted unless there are vertical solid breaks at frequent intervals.~~ The glazing is not to be blocked out with opaque or reflective film, or other treatment that obscures the visual connection from the outside into the building.

GF3 Office/Commercial Activity – where the ground floor is used for offices/commercial activity in Main Street Frontage Streets, the display area immediately behind the windows should be designed as reception and waiting areas.

GF4 Shop fronts and entries – Building entries and shop fronts in Main Street Frontage Streets should be glazed and entries recessed. This allows pedestrians to stop and view the display area and gives depth to the entrance.

GF5 Four elements – Building facades are to show the following distinct elements:

Base (Ground) – in Main Street Frontage streets this should predominantly be a shopfront with vertical division and a recessed entrance

Verandah/Canopy/Balcony – style of verandah/canopy/balcony to be consistent with the building (more detail provided in GF6)

Upper Area – symmetrical placement of windows.

Parapet/Top – top outline of the façade extended or modulated by elements reflecting the building structure and roof form, and generally masking the roof.

GF6 Verandah/canopy/balcony -Verandahs are a requirement in Main Street Frontage Streets and Façade Control Streets and are subject to performance standards in the rules. Verandahs should:

- Complement the building style of the building to which they are attached
- Extend over the footpath and full width of the building frontage. **Setback the verandah to allow clearance for taller vehicles.**
- Take cues from neighbouring verandahs in terms of height, proportion and style, whilst allowing for variation in design features
- Be fully cantilevered with no decorative poles or obstructions of the footpath
- Not obscure windows or architectural details
- Verandahs on corner buildings should wrap around the building and extend the full width of both frontages (even if only one frontage is classed as a Main Street Frontage or Façade Control Street).

Balconies should be designed to be in keeping with the overall architectural detail of the building. Balustrades should allow for views and natural surveillance of the street.

GF7 Articulation and Detail – building facades should **achieve visual interest to support the pedestrian experience. This may** include articulation and detailing**, such as**. ~~Façade articulation may include~~ setbacks, projected bays, balconies **and fencing and landscaping.** ~~etc.~~ Building facades should have detail and depth and not be on a flat plane.

GF8 Material and Colour – **use materials, texture and colour to highlight the building's form and details** ~~building colours, whether a painted finish or natural materials should highlight features~~ such as joinery, decoration or repetition of the building form

- ~~Use colours that are consistent with the existing range of colours in the town centre and be consistent with the Pounamu and Māori Heritage colour palette developed as part of the CBD Redevelopment Plan.~~
- ~~Side and rear walls should be painted in the same colours as the building's main façade. Side and rear walls also provide an opportunity for murals to be painted. In these cases colours can deviate from the building's main façade.~~
- ~~Bright colours designed to call attention to the building are not acceptable~~
- ~~Painting the whole building one block colour as a "sign" to brand the building is not acceptable.~~

Colour has been used successfully on this building to highlight window details, the entrance and detailed lines on the building. The colours are in keeping with a traditional colour palette suitable for other buildings in the town centre. ~~The colours used on this building on the left are very bold and not consistent with other building colours in the vicinity.~~

~~Colour has been used successfully on this building to highlight window details, the entrance and detailed lines on the building. The colours are in keeping with a traditional heritage palette suitable for other buildings in the town centre.~~ **The colours used on this building on the left are very bold and not consistent with other building colours in the vicinity.**

GF9 Building Signage - Signage should not project above the roofline or obscure architectural features.

GF10 Lighting – Buildings can have lighting to highlight building façade features and provide under verandah light to the footpath. Choose lighting fixtures in a style that is appropriate to the building and not susceptible to vandalism.

GF 11 Building entries (non-Main Street Frontage or Façade Control Streets) – Building entries are encouraged to have a canopy or verandah to provide protection from the weather and emphasise the entry point.

GF12 Outdoor dining areas. – These are encouraged on footpaths adjoining buildings within the town centre to give vitality and encourage occupation of the street. The location, size and layout need to take into account public access, pedestrian circulation and the safety of patrons and motorists.

GF13 Mechanical equipment – Try and maintain the integrity of the general form of the building by avoiding detracting secondary features such as air conditioning plants or other mechanical equipment above or in front of the façade, and visible from the street.

Strengthening and Restoration

GS1 External strengthening – if external strengthening has to be used, either avoid the street façade or design strengthening structures as a visible and explicit design feature of the elevation. Do not obscure features such as windows.

GS2 Façade retention – For heritage and landmark buildings, retaining a building's street façade is preferable to its demolition. Where only the façade is retained, fit the new structure behind the façade features – reusing window and door openings. Keep the new structure below the façade height and give the visual appearance of retained floors.

Location Specific Requirements

GL1 Mackay Street and Māwhera Quay ~~a~~ focus ~~is~~ on restoration and repurposing of existing buildings. **Any replacement** ~~Replacement~~ buildings should **consider** ~~have~~ a scale and style that reflects port warehouses in keeping with **Mackay Street and Mawhera Quay's** ~~the~~ riverfront position.

Hokitika Town Centre Urban Design Guidelines

1.0 Introduction

This document has been developed to provide direction to those planning, designing and reviewing development proposals in the Hokitika town centre. This guide seeks to achieve high quality building design that:

- Responds to the context
- Is visually interesting and in keeping with the streetscape values
- Addresses cultural and built heritage values and design elements
- Creates a vibrant, active pedestrian environment
- Incorporates new and innovative design where appropirate
- Takes into account CPTED principles and the Poutini Ngāi Tahu values.

1.1 When does the Design Guide apply?

Under Te Tai o Poutini Plan rules, all new buildings within the Hokitika Town Centre Zone are ~~required~~ **encouraged** to be assessed against these design guidelines. Where resource consents are required the Councils will use this guide to help assess and make decisions on those consent applications.

2.0 Hokitika Design Guidelines

2.1 Context

Hokitika means 'return directly' in Māori. The name embraces the story of a battle of control of the pounamu source. Invading Ngāi Tahu who wanted control of the pounamu source were devastatingly defeated at Lake Mahinapua by local tribe Ngāti Wairangi. The sole surviving chief Hikatutae turned back here and 'returned directly' to Kaiapoi. Several battles later Ngāi Tahu won, but at a truly heavy price. Today Poutini Ngāi Tahu honour their role as rangatira, carvers and traders of this revered stone.

The town of Hokitika grew from the discovery of another precious resource - gold. The West Coast's gold rushes, many led by Maori, attracted thousands of gold-seekers. Between 1864 and 1867 ships brought 37,000 seekers into Hokitika Port through its treacherous river mouth resulting in countless shipwrecks. Carved out of the rainforest wilderness, Hokitika grew from the 'Crooked Mile' of Revell Street on the dunes to a wide-streeted goldfields capital,

Defined Centre

Hokitika is a well defined centre with a grid layout and natural edges from the Hokitika River and Hokitika Beach and a human edge created by the railway line. There is a strongly defined entrance into the town, with the town clock creating a core focal point.

Connection with the Natural Environment

The Hokitika River/Gibson Quay and Beachfront provide natural edges to the town centre and a link to its cultural and natural heritage. Alongside this Hokitika is notable for its views towards the

Southern Alps. Maintaining visual connections and improving access to the beach and Gibson Quay are essential.

Existing built character

Hokitika Town Centre has an interesting mix of historic nineteenth and early twentieth century buildings as well as more modern, but largely sympathetic, buildings. The historic heritage represents an important part of the historic heritage resource of Westland and the West Coast and is centred around Revell Street.

The following design elements that contribute positively to the character of the town are identified as:

- Building edge – buildings are often built to the street boundary.
- Continuous façade – buildings tend to abut one another creating a sense of enclosure
- Human scale – buildings give a sense of human scape at the publicly occupied edges. They contain proportions, textures and physical elements that fit with the size of people.
- Prominent corner buildings – corner buildings are often taller than the adjoining buildings. This additional height helps define the edge of a block and create a visual anchor point.
- Verandahs – this is a key feature in the main street frontage streets in the Town Centre Zone which provide shelter for pedestrians.
    - Main Street frontage streets in the Hokitika Town Centre Zone are: Weld Street, Sewell Street, Hamilton Street, Revell Street, Tancred Street, Camp Street, Wharf Street, Gibson Quay
- Four distinct parts of building – traditional buildings show four distinct parts – base, verandah, upper area and parapet
- Visual interest – although commonalities exist between buildings, each building expresses an individual character
- Active frontage – windows exist on all floor levels of a building's façade

Revell Street Heritage Character Area

The Revell Street Heritage Area (From Ocean View/110 Revell Street to Camp Street) is characterised by having a large number of late nineteenth and early twentieth century buildings which recall the late Victorian era mining town character.

Revell Street Heritage Character Area Buildings

While only a handful of these are listed historic buildings, retaining the other character buildings from this era, and ensuring that new buildings are sympathetic to the area is very important.

In terms of character, buildings that contribute positively to the character of Revell Street

- Are built to the street boundary
- Are rectangular with elongated or tall proportions
- Are designed based on early West Coast heritage styles
- Have tall horizontal or stepped parapets hiding the roof behind
- Have verandahs (although some of the large hotels do not and historically many did not)
- Have similar alignment of parapets and shopfronts
- Are constructed of timber with timber shopfronts

The shop front design of buildings contributing to the character of Revell Street also has general level of consistency:

- A large display window which can be divided into large symmetrical panes particularly in the older shops
- Recessed or flat entries either to one side, or, for the older shops, centrally located
- A bulkhead, or base to the shopfront, which is panelled on the older shops

Poutini Ngāi Tahu Cultural Landscapes

Many buildings within the town centre reflect Hokitika's colonial and settler history, however there is limited representation of a much longer iwi history. Poutini Ngāi Tahu culture and identity highlight the West Coast's point of difference in the world and offer design opportunities for the future.

The guidelines in Section 2.2 are based on the Ngāi Tahu Subdivision and Development Guidelines, which are a set of urban design principles founded on core Maori cultural values and designed to provide practical guidance for enhancing outcomes for the design environment. These principles have arisen to enable greater iwi and hapū presence, visibility and participation in the design of the physical environment.

The use of Poutini Ngāi Tahu design guidelines is predicated on the development of high-quality durable relationships being developed between Ngāti Waewae and Ngāti Māhaki oMakaawhio, Pokeka Environmental - their mandated design professionals, developers and the Council. Robust relationships between these groups provide opportunities for unlocking a rich store of design potential.

2.2 Guidelines

Context

GC1 Complement the ~~existing~~ **bulk and form of the existing** buil**dings**.~~t context with visual links through similarity of overall bulk and form. New development should attempt to complete, improve and enhance the setting of individual buildings or groups of buildings listed as heritage items in Te Tai o Poutini Plan.~~ New buildings/structures **which immediately adjoin scheduled heritage items** shall **aim to** complement and support, rather than dominate these listed buildings.

GC2 Take into account the wider surroundings, including natural features, such as views to Ngā Tiritiri-o-te-Moana/Southern Alps and links to the beach and the river.

Poutini Ngāi Tahu

IW1 Cultural Landscapes – A cultural landscape approach is the most appropriate means to identify, assess and manage the potential effects of subdivision and development on cultural values and significant sites.

IW2 Te Reo, whakapapa/naming – Consultation with the relevant Poutini Ngāi Tahu Papatipu Rūnanga on the use of appropriate ancestral names, including macrons, and the recognition of traditional place names in keeping with the mita (pronunciation of language) of Poutini Ngāi Tahu through signage, wayfinding, street names in new subdivisions and names of public buildings, parks and places.

IW3 Tohu/landmarks – Significant wider cultural landmarks (including wāhi tapu, maunga, awa, puna, mahinga kai and ancestral kāinga) and associated narratives approved by Poutini Ngāi Tahu are acknowledged in the spatial orientation and layout of any new development, allowing visual connection to significant sites to be created, preserved and enhanced.

IW4 Taiao/environment – Landscape design includes a selection of indigenous plant and tree species where possible and reflects cultural perspectives, ideas and materials. Indigenous biodiversity objectives should be incorporated into development plans and indigenous species used for street trees, open space and reserves, native ground cover species for swales and stormwater management.

IW5 Mauri Tū/environmental health - Use of land - based treatment of wastewater, rainwater collection systems, grey-water recycling systems, stormwater treatment, passive solar design, and hard landscape and building materials which are locally sourced and of high cultural value to Poutini Ngāi Tahu are explored in the design process.

IW6 Mahi Toi/creative expression – **When iwi** ~~Iwi~~/hapū narratives are ~~creatively~~ reinscribed through architectural ~~design~~ and building **design**, integrated artwork**.** ~~**and**~~ Poutini Ngāi Tahu Papatipu Rūnanga mandated design professionals and artists are appropriately engaged in ~~such~~ **this** process~~es~~.

IW7 Ki uta ki tai/from the mountains to the sea. Opportunities are explored through partnership engagement with Poutini Ngāi Tahu to reflect the Poutini Ngāi Tahu view of the environment and resource management. Ki uta ki tai is a traditional concept representing kaitiakitanga from the mountains and inland lakes, down the rivers to hapua/lagoons to the sea. Kaitiakitanga reflects the special relationship Ngāi Tahu has with its environmental heritage. It is fundamental to the tribe's

culture and identity. Ki uta ki tai encapsulates the need to recognise and manage the interconnectedness of the whole environment.

Built Form

BF1 Mass/Scale -New buildings should relate to the scale of adjacent buildings. Where very wide buildings are proposed, their bulk and width shall be reduced by dividing the façade up ~~by vertical divisions~~ into ~~several smaller "storefronts"~~ **visually smaller vertical forms**. Windows and doors and other architectural details shall be used to reduce the mass of structures. Where a building over three stories is proposed, the section above three stories should be stepped back from the line of view from the street.

This long low building shape should be avoided. This building also lacks windows and has limited design features and detail to add interest to the building. The buildings colours are also very out of character with other buildings in the vicinity

An example of a wide building with vertical divisions and the use of colour and different materials to break up the facade.

BF2 Location to front – Buildings are to be positioned so their front walls abut the (footpath) boundary

BF3 Continuity – on Main Street Frontage streets buildings are to extend across the full width of the site frontage to ensure that the street's "built" edge is continuous. Exceptions to the continuous frontage are for walking access connections and outdoor dining areas/courtyards. The façade will be indicative of the bulk of the building behind (i.e., not just a façade). Beyond Main Street Frontage Streets, maintaining a continuous frontage is still encouraged to maintain a sense of enclosure, however it is not essential.

BF4 Height – New buildings should ideally be at least two storeys in height, but at a minimum, should appear similar in height to the existing neighbouring buildings

Any upper floor areas visible in the layout of the façade should be potentially usable space rather than a false façade.

BF5 Corner buildings. Buildings on corners and main junctions are highly visible which means that building design is especially important. Buildings on corners are able to be visually emphasised with architectural elements such as taller forms, or parapets.

This building expresses well to the corner with the second story providing height, and the window facing into the corner.

BF6 Pedestrian Access Lanes – existing pedestrian access lanes shall be retained and enhanced. Lanes should be well lit, attractive and safe. Pedestrian routes shall be lit at a minimum of 10 lux. Buildings facing the lanes should have ground level openings (windows or doors) to provide connection with the public space and allow natural surveillance of the walkway.

BF7 Roofs– Roof form in Hokitika town centre is variable with some below the parapet and others pitched and visible from the street. Either is acceptable except there are some specific requirements for the Revell Street heritage area

Rooflines hidden behind a parapet

Mixed rooflines

GF1 Openings – Buildings are to have windows on all street facades with minimum glazing as specified in the relevant rules. Main doors at ground level are to be oriented to the street (i.e. not at the side or the back). Entrances shall be wide enough to accommodate wheelchairs and pushchairs. Buildings that have more than one frontage (i.e., corner) are to include windows and doors on both facades if there is sufficient length of frontage. The design of side and back elevations that are visible from the street or any other public space should be consistent with the design of the main building frontage.

GF2 Visual permeability – The ground floor window area of buildings (including glazed doors) in Main Street Frontage must be no less than 50% of the frontage in the Town Centre Zone. ~~On all facades, fully glazed facades will not be permitted unless there are vertical solid breaks at frequent intervals.~~ The glazing is not to be blocked out with opaque or reflective film, or other treatment that obscures the visual connection from the outside into the building.

GF3 Shop fronts and entries – Building entries and shop fronts on Main Street Frontage Streets should be glazed and entries recessed. This allows pedestrians to stop and view the display area and gives depth to the entrance.

GF4 Four elements – Building facades are to show the following distinct elements:

Base (Ground) – in Main Street Frontage streets this should predominantly be a shopfront with vertical division and a recessed entrance

Verandah/Canopy/Balcony – style of verandah/canopy/balcony to be consistent with the building (more detail provided in GF5)

Upper Area –windows if building is more than 1 storey in height.

Parapet/Roof – Parapet with top outline of the façade extended or modulated by elements reflecting the building structure and roof form masking the roof, or roof form clearly evident.

GF5 Verandah/canopy/balcony -Verandahs are a requirement on Main Street Frontage streets and are subject to performance standards in the rules. Verandahs should:

- Complement the building style of the building to which they are attached
- Extend over the footpath and full width of the building frontage. **Setback the verandah to allow clearance for taller vehicles.**
- Take cues from neighbouring verandahs in terms of height, proportion and style, whilst allowing for variation in design features
- Not obscure windows or architectural details
- Verandahs on corner buildings should wrap around the building and extend the full width of both frontages (even if only one frontage is classed as a Main Street Frontage).

Balconies should be designed to be in keeping with the overall architectural detail of the building. Balustrades should allow for views and natural surveillance of the street.

GF6 Articulation and Detail – building facades should **achieve visual interest to support the pedestrian experience. This may** include articulation and detailing~~. Façade articulation may include~~ setbacks, projected bays, balconies **and fencing and landscaping** ~~etc~~. Building facades should have detail and depth and not be on a flat plane.

GF7 Material and Colour – **use materials, texture and colour to highlight the building's form and details** ~~building colours, whether a painted finish or natural materials should highlight features~~ such as joinery, decoration or repetition of the building form

- ~~Use colours that are consistent with the existing range of colours in the town centre.~~
- ~~Side and rear walls should be painted in the same colours as the building's main façade. Side and rear walls also provide an opportunity for murals to be painted. In these cases colours can deviate from the building's main façade.~~
- ~~Bright colours designed to call attention to the building are not acceptable~~
- ~~Painting the whole building one block colour as a "sign" to brand the building is not acceptable.~~

Before

After

Colour and Signage are key to achieving a good design outcomes. This building has been transformed by the change to a sympathetic colour and incorporation of a well designed sign reflecting Poutini Ngāi Tahu values.

Colour has been used successfully on this building to highlight window details, the entrance and detailed lines on the building. The colours are in keeping with a traditional heritage palette ***suitable for other buildings in the town centre****.*

~~Colour has been inappropriately used on these shops. They are not in keeping with the surrounding area, and also being used as a "sign" to advertise a product~~. **The colours used on these buildings are very bold and not consistent with the other building colours in the vicinity.**

GF8 Building Signage -Signage should not project above the roofline or obscure architectural features.

GF9 Lighting – Buildings can have lighting to highlight building façade features and provide under verandah light to the footpath. Choose lighting fixtures in a style that is appropriate to the building and not susceptible to vandalism.

GF10 Building entries (non-Main Street Frontage Streets) – Building entries are encouraged to have a canopy or verandah to provide protection from the weather and emphasise the entry point.

GF11 Outdoor dining areas. – These are encouraged on footpaths adjoining buildings within the town centre to give vitality and encourage occupation of the street. The location, size and layout need to take into account public access, pedestrian circulation and the safety of patrons and motorists.

GF12 Mechanical equipment – Try and maintain the integrity of the general form of the building by avoiding detracting secondary features such as air conditioning plants or other mechanical equipment above or in front of the façade, and visible from the street.

Strengthening and Restoration

GS1 External strengthening – if external strengthening has to be used, either avoid the street façade or design strengthening structures as a visible and explicit design feature of the elevation. Do not obscure features such as windows.

GS2 Façade retention – For heritage and landmark buildings, retaining a building's street façade is preferable to its demolition. Where only the façade is retained, fit the new structure behind the façade features – reusing window and door openings. Keep the new structure below the façade height and give the visual appearance of retained floors.

Revell Street Heritage Character Area

GR1 Adapting existing historic buildings – when making additions, these should be on elevations not visible from the street and compatible with the architectural character of the building. Additions should not dominate the original building or contrast harshly with the original materials, building and roof form, proportions, colour or scale.

GR2 New Buildings - New buildings should be in sympathy with the historic building stock. Key aspects that will assist this are:

- Building to the street (footpath boundary)
- Above verandah having a horizontal parapet hiding the roof with a flat weatherboard cladding or similar flat fitting facing material facing the street
- The parapet should be simple with simplified or modern interpretation of existing detailing
- The verandah should extend the full width of the footpath
- Awnings are discouraged
- Shopfronts should be made of timber
- Entries should be recessed and angled
- The use of roller shutters, security grills or other forms of non-traditional additions to shopfronts should be avoided.

GR3 - New Two-storied buildings

- The first-floor design should have symmetrically located, discreet window openings matching the proportion of ground floor windows.
- Where there is no parapet, eaves should project beyond the face of the wall.
- The building can have a single or two-storied verandah.
- On the ground floor the building could have a shopfront matching the design guide or repeat the openings on the first floor.

Reefton Heritage Town Design Guidelines

1.0 Introduction

This document has been developed to provide guidance to those preparing and reviewing development proposals in the Reefton town centre. This guide seeks to achieve high quality building design that:

- Responds to the historical context
- Is visually interesting and in sympathy with the streetscape values
- Addresses cultural and built heritage values and design elements
- Creates a vibrant, active pedestrian environment

1.1 When does the Design Guide apply?

Under Te Tai o Poutini Plan rules within the Reefton Town Centre Zone, all new buildings and alterations to the exterior facade of existing buildings are ~~required~~ **encouraged** to be assessed against these design guidelines. Where resource consents are required the Councils will use this guide to help assess and make decisions on those consent applications.

These guidelines however have been developed to support the wider heritage character of Reefton and developers of new buildings or those undertaking alterations of existing character buildings are encouraged to use them.

2.0 Reefton Heritage Town Design Guidelines

2.1 Context

The historic significance of Reefton and its heritage values is recognised by the registration of parts of Reefton as an historic area under the Historic Places – Pouhere Taonga Act. The main commercial street, Broadway, retains a number of mid to late nineteenth and early twentieth century buildings contributing to its late Victorian era mining town character.

Reefton has such high heritage and recreation values that retaining the existing heritage buildings is essential and any new buildings should be designed to be sympathetic with and enhance the existing character and values.

Within this design guide there are three main categories of building – each with a different approach to new building works.

- Historic buildings - these include listed historic heritage buildings [refer Schedule 1 of Te Tai o Poutini Plan] but also unscheduled historic buildings centred around Bridge St and Broadway such as the BNZ Bank, Broadway Supplies Building, Caples/Conlon Villa (Bellbird Motel), Homemakers Hardware Shop, Old National Bank, Wilson's Hotel and Hotel Reefton. These should be retained, with modifications kept to a minimum.
- Contributory buildings – these should be retained but can be modified to a greater degree in a sympathetic manner.
- Non-contributory – which are neutral or intrusive in the street and can be demolished or modified to be more in sympathy with the character of the street (a nod to the past).

<u>Broadway Character</u>

Broadway is a long wide, open street with single and two storied commercial buildings lining it. Generally the buildings that contribute positively to the character of Broadway

- Are built to the street boundary
- Are rectangular with elongated or tall proportions
- Are designed based on early West Coast heritage styles

- Have tall horizontal or stepped parapets hiding the roof behind
- Have verandahs (although one or two do not and historically many did not)
- Are connected or are joined by fences on the street boundary
- Are long and narrow
- Are of different heights, with little or no alignment of parapets or shopfronts
- Are constructed of timber with timber shopfronts

Verandahs are of different designs:

- Unadorned or decorated posts
- With or without brackets
- With or without signage on the fascia
- With or without fascias
- With or without cheeks
- Skillion or bullnosed roofs

The shop front design of buildings contributing to the character of Broadway also has general level of consistency:

- A large display window which can be divided into large symmetrical panes particularly in the older shops
- Recessed or flat entries either to one side, or, for the older shops, centrally located
- A bulkhead, or base to the shopfront, which is panelled on the older shops

2.2 Design Guidelines

2.2.1 Historic buildings

1. **General Principles:** Generally visible external work should be limited to repairs, maintenance, restoration or reconstruction. Key principles are:
    - To maintain rather than repair
    - To repair rather than replace
    - If replacement is essential try and use materials that match the original as closely as possible (like for like)
    - Use a date stamp so that replacements can be identifiable on close inspection.

- Restore original colour schemes where possible [Refer to Resene heritage colours for the period pre – 1920 and note this does not include blue].
- Painting the whole building one block colour as a "sign" to brand the building is not acceptable.

2. **Adaptation:** When adapting the exterior of a historic building:
   - Retain, repair and maintain all significant external fabric
   - Avoid removal or obscuring significant external fabric, elements and features
   - Respect the style, form, planning, materials, craftsmanship, scale and patina of the building
3. **Additions:** When making additions, these should
   - Be on elevations not visible from the street
   - Avoid additions on significant elevations, including the roof
   - Be compatible with the architectural character of the building
   - Not dominate the original building
   - Not contrast harshly with original materials, building and roof form, proportions, colour or scale
   - Maintain the same orientation and proportions of building composition as the original
   - If a large addition, be separate from the original building and follow the guidelines for new buildings
4. **New Elements:** Where removal or replacement of non-original elements is proposed try and restore or reconstrut the original elements.
5. **Strengthening** Strengthening work for earthquake protection should be installed on the interior or within the existing structure. Where this is not possible locate it away from the front elevation.

2.2.2 Contributory Buildings

1. **General Principles:** The general principles are similar to those of heritage buildings except that retention of original fabric on non-visible elevations is less important.

2. **Additions:** When additions are proposed, these should:
    - Be on elevations not visible from the street
    - Be compatible with the architectural character of the building
    - Not dominate the original building
    - Not contrast harshly with original materials, building and roof form, proportions, colour, or scale
    - Maintain the same orientation, proportions and rhythm of building composition as the original
    - If a large addition, be separate from the original building and follow the guidelines for new buildings
    - Not negatively affect the setting of or views to or from the building
    - Should be of a respectful new design based on a simplified modern interpretation of the original
    - Where the original verandah design is suspended or cantilevered from the wall, do not install "dummy" verandah posts.

2.2.3 Non-contributory buildings

Demolition is acceptable and encouraged when possible. The design guides for new buildings and for additions and alterations to existing buildings should be followed. Where additions and alterations are to be carried out, the intention is to design modifications to regain greater consistency with the existing significant and heritage buildings.

2.2.4 New single storied buildings

1. **Location**
    - The building should be constructed up to the street (footpath) boundary
    - Where the building does not extend the full width of the site there should be a fence from the building to the boundary.
    - If there is an existing neighbouring building, it is acceptable to locate the new building against the existing building.
2. **Form**

- The building should be rectangular in plan and face the street
- The façade of the building should be rectangular with the proportion elongated or tall.

3. Above verandah design

- The building should have a horizontal parapet hiding the roof with a flat weatherboard cladding or similar flat fitting facing material facing the street,
- Where the building is to be constructed alongside an existing building, the parapet should be of a different height to the neighbouring building but no taller than existing Victorian or Edwardian buildings.
- The parapet for single story buildings should be between one-third to one half the total elevation height.
- The parapet should be simple with simplified or modern interpretation of existing detailing and not copy original detailing.

4. Verandah

- Buildings on Broadway are required to have a verandah (refer Plan rules) which should have a timber frame with a roof supported on timber posts
- The verandah should extend the full width of the footpath **Setback the verandah to allow clearance for taller vehicles**.[401]
- Awnings are discouraged.
- Cast iron filigree is discouraged.
- Non-alignment of verandahs with neighbouring buildings is encouraged.

5. Shopfront design.

- Shopfronts should be made of timber.
- Entries should be recessed and angled.
- In wide shops entries should be central, in narrow shops entries next to the side boundary wall is preferred.
- The stall board should be 300-600mm high,
- Windows should extend from the stall board to the underside of the verandah framing. The street pane should be divided vertically and horizontally with glazing bars.
- Recessed entry glazing should match the design of street glazing.
- The door should be glazed and panelled with a toplight.
- The use of roller shutters, security grills or other forms of non-traditional additions to shopfronts should be avoided.

6. Roofs

- The roof should be hidden behind a parapet. A pitch of between 30-45 degrees is ideal, with corrugated metal or timber shingles.

7. Materials

- Wall materials should be painted corrugated metal or timber weatherboard.

[401] Kirsty Dittmer (S412.001)

- Joinery should be timber

8. Corner buildings

- Corner buildings can be chamfered or square
- Parapets to corner buildings should return around the corner for the full length of the building.
- Entries to corner buildings should be at the corner.

9. Signage

- Signage on buildings should be symmetrical about the face of the element on which it is located and generally extend the full width.
- Signage in upper case lettering is encouraged.
- Signage should relate to the business or owner- not advertising products.
- Antique, Fat Clarendon, San serif lettering styles or similar are encouraged so as to give the impression of traditional hand sign writing.
- Other acceptable styles are Tuscan, Fat -faces, Fat Italics, Fat Gothic and Sans Serif compressed.

10. Fencing

- Fencing should be sympathetic to the era.

11. Colours

- Colours should be taken from the Resene or Aalto Heritage colour chart and be a three or four colour scheme. Note these should be the pre-1920s colours.

12. Lights

- Lighting should highlight the architectural character and lighting under the verandah is encouraged.

2.2.5 New two-storied buildings

- The first-floor design should have symmetrically located, discreet window openings matching the proportion of ground floor windows.
- Where there is no parapet, eaves should project beyond the face of the wall.
- The building can have a single or two-storied verandah.
- On the ground floor the building could have a shopfront matching the design guide or repeat the openings on the first floor. One of the openings should be a door and this can be wider than other openings.

Westport/Kawatiri Town Centre and Mixed Use Zone Urban Design Guidelines

1.0 Introduction

This document has been developed to provide direction to those planning, design and reviewing development proposals in the Westport/Kawatiri town centre and new mixed use area. This guide seeks to achieve high quality building design that:

- Responds to the context
- Is visually interesting and in keeping with the streetscape values

- Addresses cultural and built heritage values and design elements
- Creates a vibrant, active pedestrian environment
- Incorporates new and innovative design where appropirate
- Takes into account Poutini Ngāi Tahu values.

1.1 When does the Design Guide apply?

Under Te Tai o Poutini Plan rules, all new buildings within the Westport/Kawatiri Town Centre Zone and Mixed Use Zone are ~~required~~ **encouraged** to be assessed against these design guidelines. Where resource consents are required the Councils will use this guide to help assess and make decisions on those consent applications.

2.0 Westport/Kawatiri Design Guidelines

2.1 Context

Connection with the Natural Environment

The Buller/Kawatiri River provides a natural edge to the town centre and a link to its cultural heritage and the Kawatiri River Trail. Improving access to the Buller/Kawatiri River is important. Victoria Park lies directly behind the town centre - visual and access links through to Victoria Park should be improved.

Existing built character

Palmerston Street retains a mixed collection of nineteenth and early twentieth century buildings and architecture/building methods of this period. This represents an important part of the historic heritage resource of the Buller and West Coast.

The following design elements that contribute positively to the character of the town are identified as:

- Building edge – buildings are often built to the street boundary.
- Continuous façade – buildings tend to abut one another creating a sense of enclosure
- Human scale – buildings give a sense of human scape at the publicly occupied edges. They contain proportions, textures and physical elements that fit with the size of people.
- Prominent corner buildings – corner buildings are often taller than the adjoining buildings. This additional height helps define the edge of a block and create a visual anchor point.
- Verandahs of similar heights and shapes with decorative poles – this is a key feature in Palmerston Street which provides shelter for pedestrians.
- Visual interest – although commonalities exist between buildings, each building expresses an individual character
- Active frontage – windows exist on all floor levels of a building's façade

Poutini Ngāi Tahu Cultural Landscape

Many buildings within the town centre reflect Westport/Kawatiri's colonial and settler history, however there is limited representation of a much longer Poutini Ngāi Tahu history. Poutini Ngāi Tahu culture and identity highlight the West Coast's point of difference in the world and offer design opportunities for the future. Westport/Kawatiri is entirely within the takiwa of Te Rūnanga o Ngāti Waewae and they are the key Poutini Ngā Tahu contacts for designers of buildings in Westport/Kawatiri.

The guidelines in Section 2.2 are based on the Ngāi Tahu Subdivision and Development Guidelines, which are a set of urban design principles founded on core Maori cultural values and designed to provide practical guidance for enhancing outcomes for the design environment. These principles have arisen to enable greater iwi and hapū presence, visibility and participation in the design of the physical environment.

The use of Poutini Ngāi Tahu design guidelines is predicated on the development of high-quality durable relationships being developed between Te Rūnanga o Ngāti Waewae, their mandated design professionals, developers and the Council. Robust relationships between these groups provide opportunities for unlocking a rich store of design potential.

2.2 Guidelines

Context

GC1 Complement the ~~existing~~ **bulk and form of the existing** built context ~~with visual links through similarity of overall bulk and form. New development should attempt to complement, improve and enhance the setting of individual buildings or groups of buildings listed as heritage items in Te Tai o Poutini Plan.~~ New buildings/structures **which immediately adjoin scheduled heritage items** shall **aim to** complement and support, rather than dominate these listed buildings.

GC2 Take into account the wider surroundings, including natural features, such as views to ~~buildings,~~ the mountains and the river.

Poutini Ngāi Tahu Cultural Landscapes

IW1 Mana/authority – The development of a high-level relationship with Te Rūnanga o Ngāti Waewae is essential prior to commencing design approaches which will maximise the opportunities for design outcomes. A cultural landscape approach is the most appropriate means to identify, assess and manage the potential effects of subdivision and development on cultural values and significant sites.

IW2 Te Reo, whakapapa/naming – Consultation with Te Rūnanga o Ngāti Waewae on the use of correct ancestral names, including macrons, and the recognition of traditional place names in keeping with the mita (pronunciation of language) of Poutini Ngāi Tahu through signage, wayfinding, street names in new subdivisions and names of public buildings, parks and places.

IW3 Tohu/landmarks – Significant wider cultural landmarks (including wāhi tapu, maunga, awa, puna, mahinga kai and ancestral kāinga) and associated narratives are acknowledged in the spatial orientation and layout of any new development, allowing visual connection to significant sites to be created, preserved and enhanced.

IW4 Taiao/environment – Landscape design includes a selection of indigenous plant and tree species where possible and reflects cultural perspectives, ideas and materials. Indigenous biodiversity objectives should be incorporated into development plans and indigenous species used for street trees, open space and reserves, native ground cover species for swales and stormwater management.

IW5 Mauri Tū/environmental health - Use of land - based treatment of wastewater, rainwater collection systems, grey-water recycling systems, stormwater treatment, passive solar design, and hard landscape and building materials which are locally sourced and of high cultural value to Poutini Ngāi Tahu are explored in the design process.

IW6 Mahi Toi/creative expression –**When** Poutini Ngāi Tahu narratives are ~~creatively~~ reinscribed through architectural ~~design~~ and building **design**, integrated artwork**.** ~~and~~ Te Runanga o Ngāti Waewae mandated design professionals and artists are appropriately engaged in **this** ~~such~~ process~~es~~.

IW7 Ki uta ki tai/from the mountains to the sea. Opportunities are explored through partnership engagement with Poutini Ngāi Tahu to reflect the Poutini Ngāi Tahu view of the environment and resource management. Ki uta ki tai is a traditional concept representing kaitiakitanga from the mountains and inland lakes, down the rivers to hapua/lagoons to the sea. Kaitiakitanga reflects the special relationship Ngāi Tahu has with its environmental heritage. It is fundamental to the tribe's culture and identity. Ki uta ki tai encapsulates the need to recognise and manage the interconnectedness of the whole environment.

Built Form

BF1 Mass/Scale -New buildings shall relate to the scale of adjacent buildings. Where very wide buildings are proposed, their bulk and width shall be reduced by dividing the façade up ~~by vertical divisions into several smaller "storefronts"~~ **visually smaller vertical forms**. Windows and doors and other architectural details shall be used to reduce the mass of structures. Where a building over three stories is proposed, the section above three stories shall be stepped back from the line of view from the street.

~~*This long low building shape should be avoided. This building also lacks windows and has limited design features and detail to add interest to the building. The buildings colours are also very out of character with other buildings in the vicinity and are part of a sign to brand the building.*~~

BF2 Location to front – Buildings are to be positioned so their front walls abut the (footpath) boundary

BF3 Continuity – on Palmerston Street buildings are to extend across the full width of the site frontage to ensure that the street's "built" edge is continuous. Exceptions to the continuous frontage are for walking access connections and outdoor dining areas/courtyards. Beyond Palmerston Street, maintaining a continuous frontage is still encouraged to maintain a sense of enclosure, however it is not essential.

BF4 Height – New buildings should appear similar in height to the existing neighbouring buildings.

Any upper floor areas visible in the layout of the façade should be potentially usable space rather than a false façade.

BF5 Corner buildings. Buildings on corners and main junctions are highly visible which means that building design is especially important. Buildings on corners are encouraged to be visually emphasised with architectural elements such as taller forms, or parapets.

This building expresses well to the corner with the second story providing height, and the door facing into the corner.

This building was not built with any corner features to emphasise its position. The more recent sign and verandah modifications have tried to address its corner position.

BF6 Roofs– Westport/Kawatiri has a variable range of rooflines with some below the height of the parapet and others pitched and visible from the street. Either is acceptable.

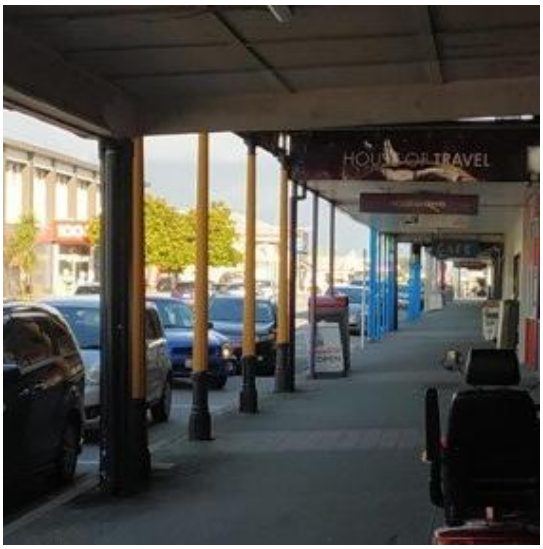
Roofline hidden behind parapet

Mixed rooflines

GF1 Openings – Buildings are to have windows on all street facades with minimum 50% glazing as specified in the relevant rules. Main doors at ground level are to be oriented to the street (i.e., not at the side or the back). Entrances shall be wide enough to accommodate wheelchairs and pushchairs. Buildings that have more than one frontage (i.e., corner) are to include windows and doors on both facades if there is sufficient length of frontage. The design of side and back elevations that are visible from the street or any other public space should be consistent with the design of the main building frontage.

GF2 Visual permeability – The ground floor window area of buildings (including glazed doors) in Palmerston Street must be no less than 50% of the frontage in the Town Centre Zone. ~~On all facades, fully glazed facades will not be permitted unless there are vertical solid breaks at frequent intervals.~~ The glazing is not to be blocked out with opaque or reflective film, or other treatment that obscures the visual connection from the outside into the building.

GF3 Office/Commercial Activity – where the ground floor is used for offices/commercial activity on Palmerston Street, the display area immediately behind the windows should be designed as reception and waiting areas.



GF4 Shop fronts and entries – Building entries and shop fronts in Palmerston Street should be glazed and entries recessed. This allows pedestrians to stop and view the display area and gives depth to the entrance. Glazed areas should be partitioned with glazing bars rather than single sheet/plate glass display windows.

Window facades with glazing bars are a typical feature of the Westport shop frontages.

GF5 Verandah/canopy/balcony -Verandahs are a requirement on Palmerston Street and are subject to performance standards in the rules. Verandahs should:

- Complement the style of the building to which they are attached
- Extend over the footpath and full width of the building frontage. **Setback the verandah to allow clearance for taller vehicles.**
- Include decorative poles where possible
- Take cues from neighbouring verandahs in terms of height, proportion and style, whilst allowing for variation in design features
- Not obscure windows or architectural details
- Verandahs on corner buildings should wrap around the building and extend the full width of both frontages.

Decorative Street Poles from the verandahs give a sense of safety and enclosure and are a particular character of Westport town centre

GF6 Articulation and Detail – building facades should **achieve visual interest to support the pedestrian experience. This may** include articulation and detailing~~. Façade articulation may include~~ setbacks, projected bays, balconies**, and fencing and landscaping** ~~etc~~. Building facades should have detail and depth and not be on a flat plane.

GF8 Material and Colour – **use materials, texture and colour to highlight the building's form and details** ~~building colours, whether a painted finish or natural materials should highlight features~~ such as joinery, decoration or repetition of the building form

- ~~Use colours that are consistent with the existing range of colours in the town centre.~~
- ~~Side and rear walls should be painted in the same colours as the building's main façade. Side and rear walls also provide an opportunity for murals to be painted. In these cases colours can deviate from the building's main façade.~~
- ~~Bright colours designed to call attention to the building are not acceptable~~
- ~~Painting the whole building one block colour as a "sign" to brand the building is not acceptable.~~

Colour has been used successfully on this building to highlight window details, the entrance and detailed lines on the building. The colours are in keeping with a traditional heritage palette ***suitable for other buildings in the town centre*****.**

~~*Colour has been used inappropriately on this building. It does not fit with the character of the town and also is used to brand the building for sale of a particular product.*~~ ***The colours on this building are very bold and not consistent with other building colours in the vicinity.***

GF9 Lighting – Buildings can have lighting to highlight building façade features and provide under verandah light to the footpath. Choose lighting fixtures in a style that is appropriate to the building and not susceptible to vandalism.

GF10 Outdoor dining areas. – These are encouraged on footpaths adjoining buildings within the town centre to give vitality and encourage occupation of the street. The location, size and layout needs to take into account public access, pedestrian circulation and the safety of patrons and motorists.

GF13 Mechanical equipment – Maintain the integrity of the general form of the building by avoiding detracting secondary features such as air conditioning plants or other mechanical equipment above or in front of the façade, and visible from the street.

Strengthening and Restoration

GS1 External strengthening – if external strengthening has to be used, either avoid the street façade or design strengthening structures as a visible and explicit design feature of the elevation. Do not obscure features such as windows or modulation.

GS2 -Façade retention – For heritage and landmark buildings, retaining a building's street façade is preferable to its demolition. Where only the façade is retained, fit the new structure behind the

façade features – reusing window and door openings where possible. Keep the new structure below the façade height and give the visual appearance of retained floors.

Neighbourhood Centre Zone

Overview

The NCZ - Neighbourhood Centre Zone provides for a range of small-scale commercial, retail and community activities that provide for day-to-day needs of the surrounding residential neighbourhood. Neighbourhood Centres provide a limited range of services, employment and living opportunities at a scale appropriate to the residential neighbourhood they are located in. In general, Neighbourhood Centres are of low to medium density.

Neighbourhood Centres are generally located near the street edge, sometimes with verandahs and retail display windows along the frontage. Typically, buildings are 1-2 storeys high. Parking is usually available on the street.

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities, in the Neighbourhood Centre Zone including:

- **Transport** - the Transport Chapter contains provisions in relation to transport matters, including traffic generation TRN - R12.
- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters** - there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Neighbourhood Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.
- **Natural Hazards** - in Westport/Kawatiri, Reefton, Hokitika and Greymouth/Māwhera there are areas of natural hazards and in some locations these may affect areas in the Neighbourhood Centre Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards Chapter.
- **Subdivision** - The Subdivision Chapter sets out the requirements for the development of new infrastructure and connections as part of subdivision activities.
- **Financial Contributions** - The Financial Contributions Chapter sets out the requirements for contributions of costs for activities which impact on infrastructure.
- **General District Wide Matters** - provisions in relation to Noise, Light, Signs, Temporary Activities and Earthworks in particular may be relevant to activities in the Neighbourhood Centre Zone.

Neighbourhood Centre Zone Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity is provided in General Approach.

Permitted Activities

NCZ - R1	**New Buildings, External Additions and Alterations to Existing Buildings ~~Commercial Activities and Buildings, Community Facilities and Emergency Service Facilities~~**

Activity Status Permitted

Where:

~~1. Community Facilities, Emergency Service Facilities, retail and office activities are a maximum of 250m² gross floor area per activity provided;~~

2. ~~The activity does not include:~~

~~vii. Drive through restaurants;~~

~~viii. Service stations;~~

~~ix. Motor vehicle sales;~~

~~x. Yard-based retail activities;~~

~~xi. Trade retail and trade suppliers; or~~

~~xii. Bars/taverns;~~

1. The maximum height above ground level is 10 metres except that this standard does not apply to hose drying towers at Emergency Service Facilities;

~~2. External storage is screened by a 1.8m fence or landscaping so that it is not visible from any adjoining residential zone boundary or adjoining public place;~~

2. Maximum site coverage is 60%;

~~3. No more than one heavy vehicle is stored on the site;~~

~~4. Activities other than Emergency Services shall be limited to the following hours of operation:~~

~~iii. 6am – 11pm weekdays; and~~

~~iv. 7am – 10 pm weekends and public holidays; except where~~

~~c. The entire activity is located within a building; and~~

~~d. There are no visitors, customers or deliveries outside the above hours.~~

3. The maximum building length is 20m where this abuts a RESZ - Residential Zone;

4. Any building or structure**, excluding buildings for residential activities and residential units** is set back

   i. 2m from a RESZ - Residential Zone or OSRZ - Open Space and Recreation Zone boundary;

   ii. 3m from the road boundary; or

   iii. For sites with frontage to two roads in the NCZ - Neighbourhood Centre Zone:

      a. 3m on one road boundary; and

      b. 1.5m on the other road boundary;

   iv. 1.5m from the railway designation boundary, excluding accessory buildings and structures

5. Buildings for residential activities and residential units are set back:

   i. 5m from road boundaries, except that a roof overhang may encroach 750mm into the setback

ii. 1 m from all other site boundaries, except that Duplexes do not require a setback from the side boundary of the other duplex unit; and

iii. 1.5m from the railway designation boundary, excluding accessory buildings; and

6. A landscape buffer of 1m width must be provided along the frontage between the street and any car parking, loading or service areas which are visible from the street frontage. This rule excludes access points;

7. No building shall protrude beyond a building envelope defined by a recession plane as outlined in Appendix Two to commence 2.5m above any residential site boundary ~~except where the neighbouring property owner's written approval is provided to the Council 10 working days to the works commencing~~. This standard does not apply to:

   i. Road boundaries;

   ii. Buildings on adjoining sites that have a common wall along the boundary;

   iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;

   iv. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or

   v. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically.

Advice Note:

~~1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.~~

1. Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.

Activity status where compliance not achieved:

Discretionary where standards 1 to **2** ~~8~~ are not complied with.

Restricted Discretionary where standards **3 to 7** ~~9-11~~ are not complied with.

NCZ – R2	**Minor Structures**

Activity Status Permitted

Where:

1. All performance standards for Rule NCZ - R1**.6** ~~are~~ **is** complied with;
2. Masts, poles, aerials and pou whenua must not exceed 7m in height;
3. Any antenna dish must be less than 1m in diameter;
4. Any ornamental or garden structure must not exceed 2.4 m in height; ~~and~~
5. Any other structure must not exceed 10m² and 2m in height**; and**
6. **Hose drying towers must not exceed 12m in height.**

Activity status where compliance not achieved: Discretionary

NCZ – R3	**Fences, Walls and Retaining Walls**

Activity Status Permitted

Where:

1. Fences, walls and retaining walls are a maximum 2m height above ground level; and
2. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall or wall.

Activity status where compliance not achieved: Discretionary

NCZ – R4	**Relocated Buildings**

Activity Status Permitted

Where:

1. All performance standards for Rule NCZ - R1 are complied with;
2. Any relocated building intended for use as a dwelling must have been designed, ~~and~~ built**, and** ~~to be~~ used as a dwelling;
3. A building pre-inspection report **in accordance with Appendix 11**[402] shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the **exterior** reinstatement works **including connections to infrastructure services and closing in and ventilation of the foundations** shall be completed within a 12-month period **of the building being delivered to the site; and**
4. The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site.~~; and~~
5. ~~All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.~~

Activity status where compliance not achieved: Controlled

NCZ – R5	**Commercial Activities, Community Facilities, Education Facilities and Emergency Service Facilities**

Activity Status Permitted

Where:

1. **Education Facilities,**[403] **Community Facilities, Emergency Service Facilities, retail and office activities are a maximum of 250m² gross floor area per activity;**
2. **The activity does not include:**
   - i. **Drive through restaurants;**
   - ii. **Service stations;**
   - iii. **Motor vehicle sales;**
   - iv. **Yard-based retail activities;**
   - v. **Trade retail and trade suppliers; or**

[402] New Zealand Heavy Haulage Association Inc (S616.003)
[403] Ministry of Education (S450.036)

vi. Bars/taverns

3. External storage is screened by a 1.8m fence or landscaping so that it is not visible from any adjoining residential zone boundary or adjoining public place
4. No more than one heavy vehicle is stored on the site, excluding heavy vehicles ancillary to emergency service facilities
5. Activities other than Emergency Services shall be limited to the following hours of operation:
   i. 6am – 11pm weekdays; and
   ii. 7am – 10 pm weekends and public holidays; except where
      a. The entire activity is located within a building; and
      b. There are no visitors, customers or deliveries outside the above hours.

Advice Note:

1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.

Activity status where compliance not achieved:

Restricted Discretionary where standards 3 to 5 are not complied with.

Discretionary where standard 1 and 2 is not complied with

NCZ – R6	Visitor Accommodation

Activity Status Permitted

Where:

1. The visitor accommodation is located
   i. In a Heritage Building listed in Schedule One; or
   ii. Above street level; or
   iii. At street level but with no frontage to public open spaces or streets except for access
2. Any space designed for waste management, whether private or communal, shall not be located between the road boundary and any building, and shall be screened from adjoining sites, roads and adjoining outdoor living spaces by screening of the waste management area to a height of 1.5 metres;
3. Visitor accommodation entrances shall be clearly separated and distinguished from commercial entrances; and
4. The principal residential accommodation entrance shall be provided directly from a public street or open space.

Advice Note

1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.

Activity status where compliance not achieved: Discretionary

NCZ – R~~5~~7	Residential Activities and Residential Units

Activity Status Permitted

Where:

~~1. Performance standards 1, 3 and 6 of Rule NCZ - R1 are complied with;~~

1. Residential unit density is no more than

   c. 1 unit per 350m² net site area; or

   d. 1 unit per 300m² net site area where two or more adjoining sites are developed;

~~2. Maximum building height above ground level of 10m;~~

~~3. Maximum site coverage is 60%;~~

~~4. Buildings are setback a minimum 4.5m from road boundaries, except that a roof overhang may encroach 750mm into the setback;~~

~~5. Buildings are setback a minimum of 1m from all other site boundaries, except that:~~

   ~~c. Duplexes do not require a setback from the side boundary of the other duplex unit; and~~

   ~~d. Setbacks are not required from adjacent residential boundaries where the neighbouring property owner's written approval is provided to the Council 10 working days ahead of the work commencing;~~

2. There is no more than 1 minor residential unit with a maximum gross floor area of 65m² per 500m² net site area; ~~and~~

3. A minimum of 30m² of outdoor living space is provided per residential unit and 12m² per minor residential unit which is separate to the outdoor space for the principal dwelling and excluding any parking and manoeuvring areas; **and**

4. No more than one heavy vehicle is stored on the site.

Activity status where compliance not achieved: Restricted Discretionary

NCZ – R~~6~~8	**Demolition of Buildings**

Activity Status Permitted

Where:

1. There is no redevelopment then the site is completely cleared of demolition materials and re-grassed within 12 months.

Activity status where compliance not achieved: Controlled

Controlled Activities

NCZ – R~~7~~9	**Relocated Buildings not meeting Permitted Activity Standards**

Activity Status Controlled

Where:

1. All performance standards for Rule NCZ - R1 are complied with.

Matters of control are:

a. Design and location of structures;

b. ~~Landscape measures~~; **Measures to mitigate landscape effects**

c. Appearance of buildings**; and**

d. Reasons for non-compliance with Standards 3 and 4 of NCZ-R4.

Activity status where compliance not achieved: Discretionary

NCZ – R~~8~~10	**Demolition of Buildings not meeting Permitted Activity Standards**

Activity Status Controlled

Matters of control are:

a. Timing and scope of landscape and site reinstatement measures.

Activity status where compliance not achieved: N/A

Restricted Discretionary Activities

NCZ – R~~9~~11	**~~Commercial Activities and Buildings, Emergency Service Facilities and Community Facilities~~ New Buildings and External Additions and Alterations to Existing Buildings not meeting NCZ-R1 ~~Permitted Activity Standards~~**

Activity Status Restricted Discretionary

Where:

1. ~~The gross floor area is greater than 250m² per activity but all other~~ Performance Standard~~s for~~ 1~~ – 8~~ for Rule NCZ - R1 ~~are~~ is complied with.

Discretion is restricted to:

~~a. Design and location of buildings;~~

~~b. Design and location of parking, loading and access areas; and~~

e. ~~Landscape measures.~~ **Measures to mitigate landscape effects**

f. **Bulk, location and design of storage, buildings and structures;**

g. **Effects on the safety, amenity and attractiveness of the street or public places;**

h. **Visual dominance, and privacy and shading, effects on neighbouring sites;**

Activity status where compliance not achieved: Discretionary

NCZ-R12	**Commercial Activities, Community Facilities, Education Facilities and Emergency Service Facilities not meeting Permitted Activity Standards 3-5 of NCZ-R5**

Activity Status Restricted Discretionary

Discretion is restricted to:

a. Effects on the safety, amenity and attractiveness of the street or public places;

b. Visual dominance and nuisance effects on neighbouring sites;

c. Design and location of parking, loading and access areas;

d. Location and design of storage; and

e. The materials being stored and the period of time for storage.

Activity status where compliance not achieved: N/A

NCZ – R1~~0~~3	**Residential Activities and Residential Units not meeting Permitted Activity Standards**

Activity Status Restricted Discretionary

Where:

1. The minimum net site area is 200m²;

2. The maximum **building** [404]height is 10m;
3. Maximum building coverage is 50%; and
4. All Permitted Activity performance standards for Rules NOISE - R1, - R2, - R3 and - R6, LIGHT - R4 and SIGN - R17 are complied with.

Discretion is restricted to:

a. The extent to which there is sufficient availability and capacity in the water supply, wastewater, stormwater and transport networks to service the development or the need for development of a suitable alternative;

b. Design and location of parking and access;

c. Design and location of buildings and compliance with the Medium Density Housing Design Guidelines in Appendix Three; and

d. ~~Landscape measures~~ **Measures to mitigate landscape effects**.

Activity status where compliance not achieved: Discretionary

Discretionary Activities

NCZ – R1~~1~~4	**Commercial Activities, Community Facilities, Education Facilities** [405] **Emergency Service Activities not meeting Standard 1 or 2 of NCZ-R5 or Visitor Accommodation ~~the Permitted or Restricted Discretionary Activity Standards~~**

Activity Status Discretionary

~~1. Retail and office activities are a maximum of 250m^2 gross floor area per activity;~~

~~2. The activity does not include:~~

~~i. Drive through restaurants;~~

~~ii. Service stations;~~

~~iii. Yard-based retail activities;~~

~~iv. Motor vehicle sales; or~~

v. ~~Trade retail and trade suppliers~~**.**

Activity status where compliance not achieved: N/A

NCZ – R1~~2~~5	**Residential Activities, Residential Units, Minor Structures, Fences, Walls, Retaining Walls and Relocated Buildings not meeting the Permitted or Restricted Discretionary Standards**

NCZ – R1~~4~~6	**Any activity not provided for by another Rule in the zone**

Activity Status Discretionary

Activity status where compliance not achieved: N/A

Non-complying Activities

NCZ – R1~~3~~7	**Industrial Activities**

[404] Clause 16(2) of the RMA
[405] Clause 16(2) of the RMA

Activity Status Non-complying	
Activity status where compliance not achieved: N/A	
~~**NCZ – R14**~~	~~**Any activity not provided for by another Rule in the Zone**~~
~~**Activity Status Non-complying**~~	
~~**Activity status where compliance not achieved:** N/A~~	

Industrial Zones

INZ – O1	~~To provide for the~~ **Recognise that industrial activities contribute to economic and social wellbeing and provide for their** efficient and effective operation and development ~~of industrial activities~~ in the INZ - Industrial Zones**.** in a manner that maintains a standard of amenity appropriate to these areas and does not compromise the amenity of adjoining **zones**~~areas.~~
INZ – O2	To ~~encourage~~**require** new industrial development to locate within INZ - Industrial Zoned land, and where new land is proposed for industrial zoning or uses ensure that this development maximises the efficient use of existing infrastructure and where such infrastructure does not exist, the development of new infrastructure to the standards required by the Council and Te Tai o Poutini Plan.

Industrial Zone Policies	
INZ – P1	Recognise the substantial investment in infrastructure by ensuring that any new industrial areas are located where they support the efficient use of infrastructure.
INZ – P2	New industrial areas should not be located in areas subject to significant risks from natural hazards, or in sites and areas of significance to Māori.
INZ – P3	Where new industrial areas are developed the developers of these areas shall fund and install infrastructure to the standards required by the Councils and the Plan. Where there is significant infrastructure serving multiple properties under different ownership this should be vested in the Council for ongoing maintenance and renewal.
INZ – P4	Where suitable land for industrial use is available within INZ - Industrial Zones, industrial activities should in the first instance be located in those zones, and not proliferate through the rural areas and settlements.
INZ – P5	Where sites or areas of significance to Māori are identified in industrial areas or developments, ensure activities are managed in a way that provides for the cultural relationships of Poutini Ngāi Tahu including: d. Protection of wāhi tapu and taonga sites identified in Schedule Three of the Plan using culturally appropriate methods; and e. Identification and utilisation of opportunities to enhance sites, values and other taonga of cultural significance to Poutini Ngāi Tahu; and f. Protection of the relationship of tangata whenua with freshwater, including cultural use opportunities.

INZ – P6	Provide for a wide range of industrial and compatible activities within the INZ – Industrial Zones, while **maintaining the amenity values**. ~~ensuring an acceptable level of environmental quality and amenity within the zones~~
INZ – P7	Avoid activities that may be incompatible with ~~other~~ industrial activities from establishing in the INZ - Industrial Zones, to ensure the safe and efficient operation of industrial activities. This includes: d. Excluding activities (such as residential **activities** and visitor accommodation **that are not ancillary to an industrial activity**) that conflict with the intended purpose of the zone through the potential for reverse sensitivity effects; or by reducing the land available for industrial and service activities; e. Excluding retail and commercial activities from GIZ - General Industrial Zoned land that do not support or are not related to industrial and service activities, and to minimise the development of GIZ - General Industrial Zoned land for non-industrial purposes; and f. Restricting residential activities in the INZ - Industrial Zones to only ~~custodial~~ units for people whose duties require them to live on site.
INZ – P8	~~Impose performance standards on~~ **Avoid, remedy or mitigate adverse effects of** development and land use in the INZ - Industrial Zones **to maintain**~~that protects~~ the amenity values of the commercial, residential**, open space and recreation** and rural areas **located at zone boundaries**~~ surrounding the INZ - Industrial Zones.~~
INZ – P9	~~Industrial sites at the gateways to Hokitika (SH6), Reefton (SH7 and SH69), Greymouth/Māwhera (SH6) and Westport/Kawatiri (SH 67), and where in close proximity to residential areas, should not detract from the visual amenity of the road frontage, through the inclusion of landscaping and tree planting.~~ **Manage effects on visual amenity along road frontages of the INZ – Industrial Zones that are adjacent to state highways and residential areas with landscaping and tree planting, while ensuring the safe function of the road.**
INZ – P10	Over the long-term, promote the relocation of sporadic out-of-zone industrial activities in residential, commercial and rural areas to industrial zoned areas.
~~**INZ – P11**~~	~~Require the careful on-site management and treatment of stormwater from industrial buildings and sites in order to safeguard the health and wellbeing of waterbodies, freshwater ecosystems and receiving environments.~~

General Industrial Zone Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity is provided in General Approach.

Permitted Activities

GIZ - R1	**New Buildings, External Additions and Alterations to Existing Buildings** ~~**Industrial Activities and Industrial Buildings**~~

Activity Status Permitted

Where:

1. The maximum building height above ground level is 20m;
2. Maximum site coverage is 80%;
3. Buildings are setback a minimum:
    a. 10m from State Highways; ~~and~~
    b. **2m from road boundaries; and**
    c. 5m from ~~road boundaries~~, any RESZ - Residential Zone, OSRZ - Open Space and Recreation Zone or SETZ - Settlement Zone boundary and the Rail Corridor;

~~4. All external storage and car parking areas shall be screened by a fence or landscaping so that:~~

~~a. It is not visible from any adjacent RESZ - Residential Zone or SETZ - Settlement Zone boundary or adjacent public place; and~~

~~b. The fence or landscaping is set back from the road boundary so that it does not restrict visibility;~~

~~5. No blasting or vibration beyond the zone boundary shall occur outside the hours of 0800 to 1800 hours weekdays and 0900 to 1600 hours on weekends and public holidays;~~

~~6. There shall be no offensive or objectionable dust nuisance at or beyond the LIZ - Light Industrial Zone boundary as a result of the activity;~~

4. The area adjoining the road frontage of all sites **(excluding access points)**, and the side boundary of a site that adjoins a RESZ - Residential, SETZ - Settlement, OSZ - Open Space or MUZ - Mixed Use Zone shall contain landscaping with a minimum width of 2 metres, of a standard that does not restrict road visibility, or obstruct signage or accessways within the road corridor;

~~5. Contaminated stormwater run-off associated with any industrial activity or building, including stormwater runoff from any earthworks, shall be collected and treated prior to discharge to ensure there are no significant adverse effects on water quality;~~

5. No building shall project beyond a building envelope ~~defined by a 35 degree recession plane~~ **in accordance with Appendix Two** to commence 2.5m above any RESZ - Residential, OSZ - Open Space, SARZ - Sport and Recreation Zone, MUZ - Mixed Use or SETZ - Settlement Zone boundary ~~except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~. This standard does not apply to:
    a. Road boundaries;
    b. Buildings on adjoining sites that have a common wall along the boundary;
    c. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;
    d. Antennas, aerials, satellite dishes (less than 1.2m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and
    e. Solar panels and solar water heaters provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically.

Advice Notes:

1. Any landscaping required by this rule may be located in common areas, where the development comprises land and/or buildings in separate unit titles.

~~2. Stormwater facilities that support multiple uses such water quality treatment, biodiversity enhancement and landscape amenity, should be incorporated into landscaped areas, where practicable, to achieve effective stormwater management in an integrated manner.~~

~~3. The Auckland Design Manual Guideline Document GD 2017/01 Stormwater Management Devices in the Auckland Region provides information on best practice stormwater design options for stormwater treatment.~~

2. Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.

Activity status where compliance not achieved:

~~Discretionary where Standards 1-8 are not complied with.~~

Restricted Discretionary ~~where Standard 9 is not complied with.~~

GIZ – R2 Minor Structures

Activity Status Permitted

Where:

~~1. All performance standards for Rule GIZ - R1 are complied with - except that compliance with standard 3 (setbacks) is not required.~~

1. Masts, poles, aerials and pou whenua must not exceed 7m in height;
2. Any antenna dish must be less than 1.2m in diameter and not project more than 3.5m above the highest point of any building they are attached to;
3. Any ornamental or garden structure must not exceed 2.4 m in height; and
4. Any other structure must not exceed 10m² and 2m in height.

Activity status where compliance not achieved: Restricted Discretionary

GIZ – R3 Fences, Walls and Retaining Walls

Activity Status Permitted

Where:

1. Fences, walls and retaining walls are a maximum 2m height above ground level; and
2. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall or wall**.**

Activity status where compliance not achieved: Restricted Discretionary

GIZ – R4 Industrial Activities

Activity Status Permitted

Where:

1. All external storage and car parking areas shall be screened by a minimum 1.8m high solid fence or landscaping so that:

a. It is not visible from any adjacent RESZ - Residential Zone or SETZ - Settlement Zone boundary or adjacent public place; and

b. The fence or landscaping is set back from the road boundary so that it does not restrict visibility;

2. No blasting or vibration shall occur outside the hours of 0800 to 1800 hours weekdays and 0900 to 1600 hours on weekends and public holidays;

Activity status where compliance not achieved: Restricted Discretionary

GIZ – R~~4~~5 Commercial Activities

Activity Status Permitted

Where:

~~1. All performance standards for Rule GIZ - R1 are complied with; and~~

1. All external storage and car parking areas shall be screened by a 1.8m fence or landscaping so that:

a. It is not visible from any adjacent RESZ - Residential Zone or SETZ - Settlement Zone boundary or adjacent public place; and

b. The fence or landscaping is set back from the road boundary so that it does not restrict visibility;

2. Any retail activity shall occupy no more than 250m² or 25% of the Gross Floor Area of all buildings on the same site, whichever is the lesser.

Activity status where compliance not achieved:

Restricted Discretionary where standards 1 are not complied with

Non-complying **where standard 2 is not complied with**

GIZ – R~~5~~6 Ancillary Residential Activities

Activity Status Permitted

Where:

1. All performance standards for Rule GIZ - R1 are complied with;
2. One ~~single~~ residential unit per site is provided; and
3. The residential activity is ancillary to the commercial or industrial activity on the site.

Advice Note:

1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.

Activity status where compliance not achieved: Non-complying

GIZ – R~~6~~7 Emergency Service Facility, Carparking Lots and Buildings, Trade and Industry Training, Community Corrections Activity, Gymnasium and Public Transport Facility

Activity Status Permitted

Where:

1. All performance standards for Rule GIZ - R1 are complied with.

Activity status where compliance not achieved: Discretionary

GIZ – R~~7~~8 Agricultural, Pastoral and Horticultural Activities

Activity Status Permitted

Where:

1. All performance standards for Rule GIZ - R1 are complied with.

Activity status where compliance not achieved: Discretionary

GIZ – R~~8~~9 Aquaculture Activities

Activity Status Permitted

Where:

1. All performance standards for Rule GIZ - R1 are complied with.

Activity status where compliance not achieved: Discretionary

Restricted Discretionary Activities

GIZ – R~~9~~10 ~~Industrial Activities and~~ New Buildings and External Additions and Alterations to Existing Buildings not meeting Permitted Activity standards

Activity Status Restricted Discretionary

Where:

~~1. The building projects into the recession plane; and~~

1. ~~All other performance standards for Rule GIZ - R1 are complied with~~.

Discretion is restricted to:

~~a. Design and location of buildings;~~

~~b. Design and location of parking and access;~~

~~c. Management of hazardous substances in accordance with the objectives and policies of the Hazardous Substances chapter; and~~

~~d. Landscape treatment.~~

a. Bulk, location, and design of buildings.

b. Effects on the safety, amenity and attractiveness of the street or public places.

c. Amenity, visual dominance, shading, and nuisance effects on neighbouring sites.

d. Design and location of parking and access.

e. Measures to mitigate landscape effects.

f. Characteristics of the site and development that are relevant to the rule.

Activity status where compliance not achieved: ~~Discretionary~~ **N/A**

GIZ – R11 Industrial Activities and Commercial Activities not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Discretion is restricted to:

a. Effects on the safety, amenity and attractiveness of the street or public places.

b. Amenity and nuisance effects on neighbouring sites.

c. Measures to mitigate landscape effects.

Activity status where compliance not achieved: N/A

GIZ – R1~~0~~2 Minor Structures not meeting Permitted Activity standards

Activity Status Restricted Discretionary

Discretion is restricted to:

a. Design and location of structures; and

b. ~~Landscape treatment~~ **Measures to mitigate landscape effects**.

Activity status where compliance not achieved: N/A

GIZ – R1~~1~~3	**Fences, Walls and Retaining Walls not meeting Permitted Activity standards**

Activity Status Restricted Discretionary

Discretion is restricted to:

a. Design and location of structures; and

b. ~~Landscape treatment~~ **Measures to mitigate landscape effects**.

Activity status where compliance not achieved: N/A

Discretionary Activities

GIZ – R1~~2~~4	**~~Industrial Activities and~~ New Buildings and External Additions and Alterations to Existing Buildings, Aquaculture Activities, Agricultural, Pastoral and Horticultural Activities not meeting Permitted or Restricted Discretionary Activity Standards**

Activity Status Discretionary

Advice Note: When assessing applications for resource consent under this rule, where relevant, objectives and policies of the Hazardous Substances chapter should be considered.

Activity status where compliance not achieved: N/A

GIZ – R1~~3~~5	**Emergency Service Facility, Carparking Lots and Buildings, Trade and Industry Training, Community Corrections Activity, Gymnasium, Public Transport Facility and Bulk Fuel Supply Infrastructure not meeting Permitted Activity Standards**

Activity Status Discretionary

Advice Note: When assessing applications for resource consent under this rule, where relevant, objectives and policies of the Hazardous Substances chapter should be considered.

Activity status where compliance not achieved: N/A

GIZ – R14~~5~~6	**~~Community Facilities and~~ Tertiary Educational Facilities ~~Activities~~**

Activity Status Discretionary

Activity status where compliance not achieved: N/A

GIZ – 17	**Any Activity not provided for by another Rule in the zone**

Activity Status Discretionary

Activity status where compliance not achieved: N/A

Non-complying Activities

GIZ – R1~~5~~8	**Residential Activities, Community Facilities, Non-Tertiary Education Facilities Retail Activities (greater than 250m^2 or 25% of the gross area of the building on the site whichever is the lesser) and Health Facilities**

Activity Status Non-complying

Activity status where compliance not achieved: N/A

Overview

The LIZ - Light Industrial Zone complements the ~~HIZ - Heavy and~~ GIZ - General Industrial Zones by specifically providing for industrial activities that are unlikely to produce objectionable environmental effects but there may still be some adverse effects including those associated with odour, dust or noise.

Activities within this zone may include light manufacturing, contractors' depots and automotive repair and service industries and some compatible commercial activities. Aquaculture activities such as fish or seaweed farming and processing are also appropriate in this zone.

It may also provide a buffer between other INZ - Industrial Zones and RESZ - Residential or MUZ - Mixed Use Zones.

The National Policy Statement on Urban Development (NPSUD) imposes a responsibility to ensure that there is sufficient business land to meet the future demands of the district and that this development is in the right location and appropriately serviced.

The INZ - Industrial Objectives and Policies and the LIZ - Light Industrial Zone Rules provide the framework for managing the effects of development and ensuring that a reasonable standard of amenity and environmental quality is retained within the zone, and that there are not significant adverse effects on the amenity and quality of the environment in surrounding areas.

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities, in the Light Industrial Zone including:

- **Transport** - the Transport Chapter contains provisions in relation to transport matters, including traffic generation TRN - R12.

- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters** - there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Light Industrial Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.

- **Natural Hazards** - natural hazards are widespread on the coast and in some locations natural hazard overlays may affect areas in the Light Industrial Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards Chapter.

- **Natural Character and Margins of Waterbodies** -in some locations areas of Light Industrial Zone may extend into the riparian margins of waterbodies. The Natural Character and Margins of Waterbodies Chapter contains provisions on how these areas must be managed.

- **Subdivision** - The Subdivision Chapter sets out the requirements for the development of new infrastructure and connections as part of subdivision activities.

- **Financial Contributions** - The Financial Contributions Chapter sets out the requirements for contributions of costs for activities which impact on infrastructure.

- **General District Wide Matters** - provisions in relation to Noise, Light, Signs, Temporary Activities and Earthworks in particular may be relevant to activities in the Light Industrial Zone.

Light Industrial Zone Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity is provided in General Approach.

Permitted Activities

LIZ - R1 **<u>New Buildings, External Additions and Alterations to Existing Buildings</u>** ~~**Industrial Activities and Industrial Buildings**~~

Activity Status Permitted

Where:

1. The maximum building height above ground level is 12m;

2. Maximum site coverage is 65%;

3. Buildings are setback a minimum:

   i. 10m from State Highways; and

   ii. **<u>2m from road boundaries; and</u>**

   iii. 5m from ~~road boundaries~~, any Residential Zone, Open Space Zone or Settlement Zone boundary and the Rail Corridor;

4. All external storage and car parking areas shall be screened by a 1.8m fence or landscaping so that:

   ~~iii. It is not visible from any adjacent RESZ - Residential Zone or SETZ - Settlement Zone boundary or adjacent public place; and~~

   ~~iv. The fence or landscaping is set back from the road boundary so that it does not restrict visibility;~~

~~5. No blasting or vibration shall occur outside the hours of 0800 to 1800 hours weekdays and 0900 to 1600 hours on Saturdays with no blasting or vibration to be undertaken on Sundays or public holidays;~~

~~6. There shall be no offensive or objectionable dust nuisance at or beyond the LIZ - Light Industrial Zone boundary as a result of the activity;~~

4. The area adjoining the road frontage of all sites **(excluding access points)**, and the side boundary of a site that adjoins a RESZ - Residential, SETZ - Settlement, OSZ - Open Space, SARZ - Sport and Recreation Zone or MUZ - Mixed Use Zone shall contain landscaping as follows:

    a. A minimum width of 2 metres that will, within two years of being planted, reach a minimum height of 1m, provided that lower heights are acceptable where this will otherwise restrict visibility within the State Highway corridor; and

    b. On sites adjoining a RESZ - Residential Zone shall be planted with species, which at maturity, will provide screening from the adjoining sites; and

    c. The planting of 1 tree per 20 carparking spaces is encouraged within any carparking area.

~~5. Contaminated stormwater run-off associated with any industrial activity or building, including stormwater runoff from any earthworks, shall be collected and treated prior to discharge to ensure there are no significant adverse effects on water quality;~~

5. No building shall project beyond a building envelope ~~defined by a recession plane as~~ [406]defined in Appendix Two to commence 2.5m above any RESZ - Residential, OSZ - Open Space, SARZ - Sports and Active Recreation, MUZ - Mixed Use or SETZ - Settlement Zone boundary ~~except where neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~. This standard does not apply to:

    i. Road boundaries;

    ii. Buildings on adjoining sites that have a common wall along the boundary;

    iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;

    iv. Antennas, aerials, satellite dishes (less than 1.2m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and

    v. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically.

Advice Notes:

1. Any landscaping required by this rule may be located in common areas, where the development comprises land and/or buildings in separate unit titles.

~~2. Stormwater facilities that support multiple uses such water quality treatment, biodiversity enhancement and landscape amenity, should be incorporated into landscaped areas, where practicable, to achieve effective stormwater management in an integrated manner.~~

~~3. The Auckland Design Manual Guideline Document GD 2017/01 Stormwater Management Devices in the Auckland Region provides information on best practice stormwater design options for stormwater treatment.~~

[406] Buller District Council (S538.447)

2. Where boundary rules are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to Council.

Activity status where compliance not achieved:

~~Discretionary where Standards 1-8 are not complied with.~~

Restricted Discretionary ~~where Standard 9 is not complied with~~

LIZ – R2 Industrial Activities

Activity Status Permitted

Where:

1. **All external storage and car parking areas shall be screened by a minimum 1.8m high solid**[407] **fence or landscaping so that:**
   a. **It is not visible from any adjacent RESZ - Residential Zone or SETZ - Settlement Zone boundary or adjacent public place; and**
   b. **The fence or landscaping is set back from the road boundary so that it does not restrict visibility;**
2. **No blasting or vibration shall occur outside the hours of 0800 to 1800 hours weekdays and 0900 to 1600 hours on Saturdays with no blasting or vibration to be undertaken on Sundays or public holidays;**

Activity status where compliance not achieved: Restricted Discretionary

LIZ – R~~2~~3 Commercial Activities

Activity Status Permitted

Where:

~~**1.** All performance standards for Rule GIZ - R1 are complied with; and~~

1. **All external storage shall be screened by a 1.8m fenceor landscaping so that:**
   a. **It is not visible from any adjacent RESZ - Residential Zone or SETZ - Settlement Zone boundary or adjacent public place; and**
   b. **The fence or landscaping is set back from the road boundary so that it does not restrict visibility;**
2. Any Retail Activities are:
   i. ~~Motor vehicle sales yards~~ Convenience stores;
   ii. ~~Service stations~~ Restaurants;

[407] Buller District Council (S538.458)

iii. ~~Trade retail and trade suppliers~~ Cafes;

iv. ~~Drive through restaurants~~ Takeaway food outlets; ~~or~~

with a maximum gross floor area of 250m².

Activity status where compliance not achieved:

Restricted Discretionary where standard 1 is not complied with

Discretionary **where standard 2 is not complied with**

LIZ – R~~3~~4	**Ancillary Residential Activities**

Activity Status Permitted

Where:

1. All performance standards for Rule LIZ-R1 are complied with;
2. One ~~single~~ residential unit per site is provided; and
3. The residential activity is ancillary to the commercial or industrial activity on the site.

Advice Note:

1. The acoustic insulation requirements for noise sensitive activities as set out in Rule NOISE - R3 also apply.

Activity status where compliance not achieved: Non-complying

LIZ – R4~~5~~	**Emergency Service Facility, Carparking Lots and Buildings, Trade and Industry Training, Community Corrections Activity, Gymnasium and Public Transport Facility**

Activity Status Permitted

Where:

1. All performance standards for Rule LIZ - R1 are complied with except that hose drying towers associated with an Emergency Service Facility are exempt from height standards.

Activity status where compliance not achieved: Discretionary

LIZ – R~~5~~6	**Minor Structures**

Activity Status Permitted

Where:

~~1. All performance standards for Rule LIZ - R1 are complied with - except that compliance with standard 3 (setbacks) is not required.~~

1. Masts, poles, aerials and pou whenua must not exceed 7m in height;

2. Any antenna dish must be less than 1.2m in diameter and not project more than 3.5m above the highest point of any building they are attached to;

3. Any ornamental or garden structure must not exceed 2.4 m in height; ~~and~~

4. **Hose drying towers do not exceed 15m in height; and**

5. Any other structure must not exceed 10m² and 2m in height.

Activity status where compliance not achieved: Restricted Discretionary

LIZ – R~~6~~7 Fences, Walls and Retaining Walls

Activity Status Permitted

Where:

1. Fences, walls and retaining walls are a maximum 2m height above ground level; and

2. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall or wall.

Activity status where compliance not achieved: Restricted Discretionary

LIZ – R~~7~~8 Agricultural, Pastoral and Horticultural Activities

Activity Status Permitted

Where:

1. All performance standards for Rule LIZ - R1 are complied with.

Activity status where compliance not achieved: Discretionary

LIZ – R~~8~~9 Aquaculture Activities

Activity Status Permitted

Where:

1. All performance standards for Rule LIZ - R1 are complied with.

Activity status where compliance not achieved: Discretionary

Restricted Discretionary Activities

LIZ – R~~9~~10 ~~Industrial Activities and~~ New Buildings and External Additions and Alterations to Existing Buildings not meeting Rule LIZ - R1

Activity Status Restricted Discretionary

~~Where:~~

~~a. The building projects into the recession plane; and~~

~~b. All other performance standards for Rule LIZ - R1 are complied with.~~

Discretion is restricted to:

~~a. Design and location of buildings;~~

~~b. Design and location of parking and access; and~~

~~c. Landscape treatment.~~

a. Bulk, location, and design of buildings;

b. Effects on the safety, amenity and attractiveness of the street or public places;

c. Amenity, visual dominance, shading, and nuisance effects on neighbouring sites;

d. Design and location of parking and access;

e. Measures to mitigate landscape effects; and

f. Characteristics of the site and development that are relevant to the rule

Activity status where compliance not achieved: ~~Discretionary~~ N/A

LIZ – R11	**Industrial Activities and Commercial Activities not meeting Permitted Activity Standards**

Activity Status Restricted Discretionary

Discretion is restricted to:

a. Effects on the safety, amenity and attractiveness of the street or public places;

b. Amenity and nuisance effects on neighbouring sites; and

c. Measures to mitigate landscape effects.

Activity status where compliance not achieved: N/A

LIZ – R1~~0~~2	**Minor Structures not meeting Rule LIZ - R~~5~~6**

Activity Status Restricted Discretionary

Discretion is restricted to:

a. Design and location of structures; and

b. ~~Landscape treatment~~ **Measures to mitigate landscape effects**.

Activity status where compliance not achieved: N/A

LIZ – R11~~3~~3	**Fences, Walls and Retaining Walls not meeting Rule LIZ - R~~6~~7**

Activity Status Restricted Discretionary

Discretion is restricted to:

a. Design and location of structures; and

b. ~~Landscape treatment~~ **Measures to mitigate landscape effects**

Activity status where compliance not achieved: N/A

Discretionary Activities

LIZ – R12~~4~~4	**Industrial Activities and Buildings, Commercial, Aquaculture and Agricultural, Pastoral and Horticultural Activities not meeting Permitted or Restricted Discretionary Activity Standards**

Activity Status Discretionary

Activity status where compliance not achieved: N/A

LIZ – R13~~3~~5	**Emergency Service Activities, Carparking Lots and Buildings, Trade and Industry Training, Community Corrections Activity, Gymnasium, Public Transport Facility Retail Activities not meeting Permitted Activity Standards**

Activity Status Discretionary

Activity status where compliance not achieved: N/A

LIZ – R14~~6~~6	**~~Community Facilities and~~ Tertiary Educational Facilities**

Activity Status Discretionary

Activity status where compliance not achieved: N/A

LIZ – R15~~7~~7	**Any Activity not provided for by another Rule in the zone**

Activity Status Discretionary

Non-complying Activities

LIZ – R18	**Residential Activities, Community Facilities, Non Tertiary Educational Facilities and Health Facilities**

Activity Status Non-Complying

Activity status where compliance not achieved: N/A

APPENDICES

Appendix 1 - Recommendations

PART A – INTRODUCTORY MATTERS

1. PRELIMINARY MATTERS

1.1. Introduction

1. Matters to do with our appointment and other preliminary matters applicable to all Hearing Panel's recommendations on the Proposed Te Tai o Poutini Plan (**pTTPP** or 'the Plan') are recorded and addressed in Recommendation Report 1.

2. This Recommendation Report relates to Natural Character and Margins of Waterbodies – Ngā Ahua me ngā Mahi ka Noho Hāngai ki ngā Hopua Wai (**NC**) Chapter in the Natural Environment – Nga Uara Taiao Aotūroa section of the pTTPP; and Activities on the Surface of Water – Ngā mahi ki te kārewa o te wai (**ASW**) Chapter in the General District Wide Matters - Ngā Kaupapa ā-Rohe Whānui section of the pTTPP. The Report contains the Hearing Panel's recommendations to Council on the submissions and further submissions received on these two chapters of the Plan.

3. The Section 32 Report[1] provided an evaluation of the options for the management of Natural Character and Waterbodies through the combined Plan, including the regulatory and policy direction, key resource management issues, the evidence base (research, consultation, information and analysis undertaken), the operative District Plan provisions, an analysis of best practice and an evaluation of the options.

4. The Section 42A Officer's Report[2] ('s42A Report'), authored by Ms Lois Easton, a planner with Kererū Consultants acting as the Reporting Officer, was circulated prior to the hearing. The s42A Report provided an analysis of submissions and further submissions received.

5. A total of 48 submissions and 22 further submissions relating to the Natural Character of Waterbodies and Activities on the Surface of Water were received

6. The s42A Report assessed a total of 323 submissions points and 151 further submission points on the Natural Character and Margins of Waterbodies; and 89 submission points and 40 further submission points relating to the Activities on the Surface of Water. It provided summaries of the submissions and further submissions received and the relief sought; an analysis of the proposed changes to provisions; and recommendations on changes to the plan provisions (see Appendix 1 of s42A Report) and the accept/accept in part/reject recommendations for individual submission and further submission points (see Appendix 2 of the s42A Report).

7. The matters raised by submitters were grouped in the s42A Report in relation to each of the following key issues for each of the two chapters:

    - General/Whole Chapter;
    - Overview;

[1] Te Tai o Poutini Plan – Section 32 Evaluation Report Five Natural Environment Values – Ngā Uara Taiao Aotūroa Ecosystems and Biodiversity -Ngā Pūnaha Rauropi me te Kanorau Koiora Natural Features and Landscapes - Ngā Āhua me ngā Horanuku Aotūroa Coastal Environment – Te Taiao o te Takutai Natural Character and Water

[2] Te Tai o Poutini Plan Section 42A Officer's Report Natural Character and Margins of Waterbodies and Activities on the Surface of Water

- Objectives;
- Policies;
- Rules

8. This Recommendation Report follows the same structure as the s42A Report and provides a brief summary of the issues raised in submissions and further submissions, the s42A Report analysis and recommendations, submitter evidence and the Reporting Officer's reply evidence, before providing our evaluation and recommendation.

9. This Recommendation Report should be read in conjunction with the s42A Report and the tracked change version of the notified Plan provisions (attached as Appendix 1 to this Report). The tracked change version of the TTPP provisions forms an integral part of the decision and records all recommended amendments (additions and deletions) to the notified TTPP provisions made by the Panel. The tracked change version of the TTPP shows the Panel's recommended changes to the notified provisions in **bold and underlining** indicating additions and ~~strikethrough~~ indicating deletions. If there is any discrepancy between this Recommendation Report and the tracked change version of the Plan, the tracked change version of the Plan shown in Appendix 1 of this Report must prevail.

10. This Recommendation Report contains the reasons for the Panel's recommendations. These comprise either adoption of the reasoning and recommendations of the original section 42A Reports or the Reporting Officer's reply evidence (Councils' right of reply post hearing adjournment), or a specific reasoning by the Panel.

11. Where the Panel recommends the TTPP provisions should remain as notified, it is because:

    (a) The Panel has adopted the reasoning and recommendation of the s42A Report or Addendum to retain the provision as notified; or

    (b) The Panel has adopted the reasoning and recommendation to retain the provision as notified as recommended in the Reporting Officer's reply evidence; or

    (c) The Panel has recommended to retain the provision as notified for reasons set out in this Recommendation Report.

12. Where there is a recommended change to a notified provision of the TTPP, it is because:

    (a) The Panel has recommended amendment to a provision for reasons set out in this Recommendation Report in response to a submission point, which the s42A Report or Addendum did not recommend; or

    (b) The Panel adopted the reasoning and recommendation of the s42A Report or Addendum to change the provision to that recommended in those reports; or

    (c) The Panel has adopted the reasoning and recommendation to that recommended in the Reporting Officer's reply evidence; or

    (d) A consequential change has been necessary following on from a decision in either (a), (b) or (c).

13. Where there may be a different recommendation between the s42A Report and the Reporting Officer's Addendum or reply evidence (i.e., the recommendation by the Reporting Officer has changed as a result of hearing the evidence of submitters), unless the Panel recommendation specifically adopts the original s42A Report's reasoning and recommendations, the reasoning and recommendations in the (later) reply to evidence has been adopted and it must be taken to prevail.

14. If there are circumstances where the Panel consider that alternative relief is more appropriate than that requested in submissions and further submission to give effect to the RMA, national policy statements and/or RPS, but are still within the scope of the relief sought, the relevant recommendation clearly sets out the nature of the change and the reason for the change. This is recorded in this Recommendation Report.

15. If any changes are recommended to the provisions (since the Section 32A Report was completed) a further evaluation is undertaken, if required, pursuant to section 32AA of the RMA. Any such circumstances are referred to in this Recommendation Report in sufficient detail to demonstrate a further evaluation was undertaken.

16. Clause 16(2) of the First Schedule of the RMA enables the Panel to recommend amendments to alter information, where such an alteration is of minor effect, or may correct any minor errors. In the Panel's recommendations below, each section considered in Part C of this Report and in the tracked change version of the notified Plan provisions (Appendix 1 of this Report) records any such minor amendments.

1.2. Terminology in this Report

17. Throughout this Report, the following abbreviations will be used:

ASW	Activities on the Surface of Water
Bathurst	Bathurst Resources Limited and BT Mining Limited
ECO	Ecosystems and Indigenous Biodiversity
EIT	Energy, Infrastructure and Transport
BDC	Buller District Council
Te Mana Ora	Community and Public Health (Te Whatu Ora
Councils	Buller District Council, Grey District Council, and Westland District Council
DOC	Department of Conservation
Director General	Director General of Conservation

Forest & Bird	Royal Forest and Bird Protection Society of NZ incorporated
GDC	Grey District Council
Manawa	Manawa Energy Limited
WCRCP	Proposed West Coast Regional Coastal Plan 2016
NC	Natural Character and Margins of Waterbodies
NPSIB	National Policy Statement for Indigenous Biodiversity 2023
NPSFM	National Policy Statement for Freshwater Management 2020
NESF	National Environmental Standard for Freshwater
NPS	National Planning Standards
NZCPS	New Zealand Coastal Policy Statement
Poutini Ngāi Tahu	Te Rūnanga o Ngāi Tahu, Te Runanga o Ngāti Waewae, Te Rūnanga o Makaawhio
pTTPP	Proposed Te Tai Poutini Plan
RMA or the Act	Resource Management Act 1991
RPS	West Coast Regional Policy Statement
SNA	Significant Natural Area
SASM	Sites and Areas of Significance to Māori
Transpower	Transpower New Zealand Limited
Waka Kotahi NZTA	NZ Transport Agency Waka Kotahi
WCRC	West Coast Regional Council
WDC	Westland District Council

1.3. Hearing Arrangements

18. The hearing was held at the RSA Hokitika, 22 Sewell Street, Hokitika on the 20 and 21 of February 2024. A number of submitters appeared remotely by internet connection.

19. At the hearing, Ms Easton tabled a Planning Summary Statement to her s42A Report and Addendum Report with an updated Appendix 1 (recommended provisions with tracked changes) and Appendix 2 (Reporting Officer recommendations on submissions and further submissions).

1.4. Appearances

20. The following submitters appeared at the hearing:

Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu ('Poutini Ngāi Tahu') - Ms Rachel Pull, Senior Environmental Advisor

Bathurst Resources Limited and BT Mining Limited ('Bathurst')
- Mr Joshua Leckie, Legal Counsel
- Ms Claire Hunter, Planner

Westpower Limited
- Mr Roger Griffiths, General Manager – Generation and Technology for Westpower
- Ms Sylvie Saskova, Technical Administrator for Westpower
- Mr Martin Kennedy, Planner

Director General of Conservation ('Director General')
- Mr Matt Pemberton, Counsel
- Ms Amy Young, Planner

West Coast Fish and Game Council ('Fish and Game')
- Mr Dean van Mierlo, Solicitor
- Mr Dean Kelly, Manager for West Coast Fish and Game Council
- Ms Helen Brosnan, Senior Policy Advisor for West Coast Fish and Game Council

Ms Frida Inta for herself and on behalf of the Buller Conservation Group

Nikau Deer Farm Limited - Mr George and Mrs Carol Coates

Jet Boating NZ - Mr Malcolm Smith

Manawa Energy Limited ('Manawa') - Ms Stephanie Styles, Planner

Herenga ā Nuku Aoteoroa/Outdoor Access Commission – Ms Inger Perkins, Field Advisor

Lake Māhinapua Aquatic Club Incorporated - Mr Rob Daniel, Consultant Advisor

1.5. Overview of submitter evidence and statements received

21. For those appearing at the hearing, legal submissions were received from:

(a) Mr Joshua Leckie/Ms Christina Sheard for Bathurst (dated 5 February 2024);

(b) Mr Matt Pemberton for the Director General of Conservation (dated 5 February 2024); and

(c) Mr Dean van Mierlo for West Coast Fish and Game Council (dated 5 February 2024).

22. For those appearing at the hearing, the following evidence and/or statements were received:

(a) Ms Claire Hunter, Planner for Bathurst (dated 12 February 2024);

(b) Ms Amy Young, Planner for the Director General of Conservation (dated 22 January 2024);

(c) Ms Stephanie Styles, Planner for Manawa (dated 22 January 2024) and supplementary evidence (dated 21 February 2024);

(d) Ms Rachel Pull for, Senior Environmental Advisor for Ngāi Tahu (dated 19 January 2024);

(e) Ms Inger Perkins Regional, Field Advisor for Herenga ā Nuku Aotearoa/Outdoor Access Commission (dated 20 February 2024);

(f) Mr Malcolm Smith, Consultant Advisor for Jet Boating NZ (undated)

(g) Mr Dean Kelly, Manager for West Coast Fish and Game Council (dated 22 January 2024)

(h) Mr Helen Brosnan, Senior Policy Advisor for West Coast Fish and Game Council (dated 22 January 2024);

(i) Mr George Coates for Nikau Deer Farm Ltd (dated 21 February 2024);

(j) Mr Joshua Leckie on behalf of Bathurst Resources Limited and B T Mining Ltd (dated 5 February 2024);

(k) Mr Martin Kennedy, Planner for Westpower (dated 20 February 2024); and

(l) Ms Frida Inta on behalf of herself and Buller Conservation Group (dated 19 February 2024).

23. Following the receipt of the s42A Report and the Addendum Report:

(a) Transpower advised[3] it did not intend to appear at the hearing and that the substance of the relief it had sought had been accepted by the Reporting Officer. Transpower identified one exception where it would prefer to support the use of the words '*avoided, remedied or mitigated*' in Objective NC-O1 and questioned the need for the objective to address effects.

(b) Chris Horne, planner on behalf of Chorus, Spark, One NZ and Forty South advised[4] that the Companies wished to record their support for the s42A Report recommendations in regard to all of their submissions on this topic and would not be filing any evidence.

[3] Letter from Rebecca Eng, Technical Lead – Policy, Transpower New Zealand Limited dated 22 January 2024.

[4] Letter from Chris Horne, Consultant Planner dated 23 January 2024

24. Following the hearing adjournment, the following further information responding to matters raised in the hearing was received:

    (a) A response from Ms Pull on behalf of Poutini Ngāi Tahu confirming that the use of Kaimata/New River for recreational jet boating above the State Highway bridge is acceptable (dated 2 March 2024);

    (b) A supplementary statement of planning evidence from Ms Styles for Manawa (dated 21 February 2024) updating the Panel on any outstanding requested changes in the provisions to provide clarity for the Panel;

    (c) A response from Jet Boating NZ confirming its support for the proposed amendment presented by Poutini Ngāi Tahu in relation to allowing recreation jet boating above the State Highway bridge at Kaimata/New River; and

    (d) A response from Mr George Coates to questions by the Panel to clarify terminology used in relation to natural hazard structures.

1.6. Right of Reply

25. Ms Easton provided a written Right of Reply (dated 28 March 2024) that included an updated Appendix 1 showing tracked changes to the notified provisions (Attachment 1).

1.7. Procedural Steps and Issues

26. No procedural matters or issues were identified during the hearing

1.8. Site Visits

27. As part of our general site visits around the region, we visited Lake Māhinapua and Lake Brunner.

PART B - STATUTORY REQUIREMENTS AND DOCUMENTS

28. The Section 32 Report outlined the relevant statutory considerations applicable to natural character and the margins of waterbodies and activities on the surface of water; and the relationships between the sections of the RMA and higher order documents.

29. The s42A Report highlighted the relevant sections 6, 7 and 8 of the RMA, the National Policy Statement for Freshwater Management (**NPSFM**), National Policy Statement for Indigenous Biodiversity 2023 (**NPSIB**), National Policy Statement for Renewable Electricity Generation 2011 (**NPSREG**), Resource Management (National Environmental Standards for Electricity Transmission Activities) Regulations 2009 (**NESETA**), and National Environmental Standard for Freshwater (**NESF**), two National Water Conservation Orders (Water Conservation (Buller River) Order 2001 and Water Conservation (Grey River) Order 1991) and the National Planning Standards (**NPS**).

30. In relation to the Water Conservation Orders, the s42A Report noted that most of the provisions relate to regional council functions, but that both also include a clause stating that a resource consent shall not be granted under section 9 of the Act (relating to land use) if the effect would be that the provisions of the water conservation order could not be observed. The Report noted that consents could only be issued by the district councils if they ensured that the values listed for the Buller River and Grey River were protected.

31. Clause 10 of the First Schedule states that it is not necessary to provide decisions on individual submissions. Recommendation of the Panel are made within the scope of requested relief, either individual submissions or groups of submissions making similar requests, as specified in reasons for recommendation.

32. The NPS mandatory direction 7.20 requires provisions relating to natural character of wetlands, lakes and rivers and their margins to be located in the Natural Character chapter of the Natural Environment Values section of the Plan. Mandatory direction 7.24 requires provisions relating to the management of activities on the surface of water to be located in the Activities on the Surface of Water chapter of the General District-wide Maters section of the Plan. The Panel is satisfied the Plan structure is consistent with this national direction.

PART C – SUBMISSIONS, EVIDENCE, EVALUATION AND RECCOMENDATIONS

2. NATURAL CHARACTER AND MARGINS OF WATERBODIES

2.1. NC General/Whole Chapter

Submissions and Further Submissions

33. Ten submission points and three further submission points relating to general matters on the whole NC Chapter were summarised in a Table on pages 12-13 of the s42A Report. One submission point was neutral, two submission points sought to retain the objectives, policies and rules, as notified, and six sought changes. The Panel has considered the relevant submissions and further submissions received and adopts the summaries in the s42A Report.

Section 42A Report

34. The s42A Report supported Forest & Bird's (S560.508) to move provisions relating to vegetation clearance to the Ecosystems and Indigenous Biodiversity (**ECO**) Chapter of the Plan, with cross references from the NC Chapter. It recommended moving Rule NC-R1 and Rule NC-R3 to the ECO Chapter. It noted Forest & Bird's (S560.044) request, that if the NC Chapter is retained, it should be referenced throughout the Plan. It did not support cross referencing within the rules because there were already specific references in the overview of each chapter guiding refence to other chapters where appropriate.

35. The s42A Report acknowledged Forest & Bird's submission (S560.243) requesting that the rules governing vegetation clearance be as least as stringent as the ECO Chapter and address RMA s6(c) matters. It noted this would be required when the rules affected were considered within the context of the ECO Chapter provisions.

36. The s42A Report did not support G.E and C.J Coates' request (S415.006) to delete the NC Chapter because they consider it does not align with the Regional Council rules and there is sufficient protection of waterbodies through land administered by the Department of Conservation (**DOC**).

37. The s42A Report supported in part the West Coast Regional Council's (S488.022) to ensure that there are no adverse effects on the social or economic welling being of West Coast people and communities. It considered it was unlikely no adverse effects on people and communities could be guaranteed. In response to a question from the Panel, Ms Easton agreed there was no national direction requiring no adverse effects on people.

38. The s42A Report did not support Grey District Council's request to remove all references to Sites of Significance to Māori (**SASM**) in the NC Chapter because this gives effect to RMA s6(e) as a matter of national importance.

39. There were no further recommendations from the Reporting Officer regarding the Whole Chapter.

Hearing and Submitter Evidence/Statements

40. Mr and Mrs Coates presented a statement to the Panel proposing that the NC Chapter should be removed in its entirety, as they considered it does not align with the Regional Council rules.

They considered there was insufficient evidence to support the rules and insufficient consideration of private property rights. They indicated that there were inadequate provisions to enable them to operate their farm in an efficient manner, including the ability to realign watercourses, clear vegetation for existing and new fence lines, establish and maintain farm tracks, and create new bridges wider than 3m.[5]

Reporting Officer Reply Evidence

41. There was no change to the Reporting Officer's view expressed in the 42A Report in response to the presentation by Mr and Mrs Coates in her Right of Reply. She remained of the view that it was not appropriate to remove the entire NC Chapter.

Hearing Panel's Evaluation

42. The Panel agrees with Ms Easton that it is not appropriate to remove the NC Chapter, or to remove references to overlays or references to SASM in the NC Chapter.

43. The Panel has considered the concerns raised by Mr and Mrs Coates in relation to their ability to operate their farm and are satisfied the provisions enable the continuation of existing lawfully established activities and new activities that have minor adverse effects. We consider new activities with the potential for more than minor adverse effects on the natural character of waterbodies should be assessed through the resource consent process.

44. The Panel is satisfied that provisions align with Regional Council rules and do not duplicate Regional Council function. The Panel accepts Ms Easton's recommendation to reject Mr and Mrs Coates submission point to remove the whole NC Chapter.

45. The Panel acknowledges the Plan provisions must give effect to the purpose and principles of the RMA and the higher statutory order direction. There is no require to have no adverse effects on people and communities, however, the Panel considers the provisions sufficiently provide for existing activities and new activities that have minor adverse effects. The Panel notes the s32 evaluation accompanying the Plan considers the social and economic impacts of the proposed regulations and specifically note that the approach taken is not new and is a refinement of existing regulations relating to the margins of waterbodies.

46. The Panel accepts Ms Easton's recommendation to move all vegetation clearance provisions to the ECO Chapter, with cross references in the NC Chapter, is appropriate. The Panel notes this affects rules NC-P2, NC-R1 and NC-R3, which is addressed below.

2.2. NC Overview

Submissions and Further Submissions

47. Ten submission points and one further submission point relating to the Overview were summarised in a table on pages 17-18 of the S42A report. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

[5] Statement of evidence presented 21 March 2024

48. All submission points sought amendments to include additional wording in the Overview except for one submission which supported retaining the wording as notified.

Section 42A Report

49. The s42A Report did not support Forest & Bird's (S540.244) request to provide more detailed explanation of the relationship with the NESF and the activities regulated by the NESF because it is focussed on Regional Council functions. However, it recommended adding short statement to clarify this relationship and the

50. The s42A Report supported minor amendments to the Overview wording to improve clarity and make it clear that the rules that apply to other chapters are applicable in the NC Chapter as well. It recommended the following amendments:

> *Overview*
>
> *Waterbodies and their margins are an important part of the West Coast/Te tai Poutini, waterbodies are connected Ki uta ki tai from the mountains to the sea) and have important values, including for biodiversity, cultural,* ***recreational*** *or historical reasons.*
>
> *Under section 31 of the RMA district councils are responsible for the management of activities on land, including the margin of water bodies.* ***Natural Character and the margins of waterbodies require protection as a matter of national importance under Section 6(a) of the RMA. Te Tai o Poutini Plan also manages activities on the surface of waterbodies****.*
>
> *[ ]*
>
> *Rivers, streams, lakes and wetlands have important ecological, natural character,* ***recreational*** *and hydrological values. They provide for habitat for native plants, fish, birds, lizards, frogs, insects and aquatic and terrestrial macroinvertebrate aquatic life* ***and opportunities for access to and along waterways.***
>
> ***Some waterbodies (both natural and artificial) also form an important resource for the generation of hydroelectricity which contributes to the wellbeing of people and communities***
>
> *[ ]*
>
> *The National Environmental Standard for Freshwater Management 2020 (NESFM) has specific rules which relate to freshwater in particular* ~~*as relate*~~ ***in relation*** *to activities in the margins of natural inland wetlands.* ***These rules relate to the regional functions of the West Coast Regional Council and are administered by the organisation. The provisions in Te Tai o Poutini Plan have been developed considering the NESF and what additional provisions are required to fulfil the statutory functions of the district councils in relation to natural character of waterbodies. Te Tai O Poutini plan provisions in relation to riparian margins of wetlands only relate to wetlands in the coastal marine area to avoid duplication with the NESF.***
>
> *[ ]*
>
> *EARTHWORKS - The Earthworks Chapter includes provisions around earthworks management.* ***These relate to requirements for earthworks within zones and include***

general standards for earthworks. These rules apply in addition to rules on earthworks within the Natural Character of Waterbodies Chapter.

ECOSYSTEMS AND INDIGINOUS BIODIVERSITY – The Ecosystems and Indigenous Biodiversity Chapter contains provisions around vegetation clearance, including in the margins of waterbodies.

[ ]

ENERGY, INFRASTRUCTURE and TRANSPORT- The Infrastructure and Transport Chapter contains policies that are also relevant and should be assessed in relation to energy infrastructure or transport activities that trigger resource consent on the Natural Character of Waterbodies Rules.

Hearing and Submitter Evidence/Statements

51. Ms Rachel Pull, on behalf of Poutini Ngāi Tahu, clarified that the further submission (FS41.664) only opposed Herenga ā Nuku Aotearoa/Outdoor Access Commission's submission point in relation to the request to add further government departments to the third paragraph of the Overview. She considered this was not appropriate because the third paragraph recognised the legislative relationship between Councils and mana whenua in relation to waterbodies. She noted the further submission recommended the agencies listed be added as an Advice Note for public information purposes at the end of the Overview, as follows:

> ***Other Relevant Government Bodies***
> ***Aside from Regional and local government there are other key agencies and government groups involved in the integrated management of waterbodies. These include***
> - ***The Department of Conservation***
> - ***NZ Landcare Trust***
> - ***Catchment care and other restoration groups and***
> - ***The Herenga ā Nuku Aotearoa Outdoor Access Commission***

52. Ms Pull did not support the s42A Report recommendation to include cross referencing to the Energy, Infrastructure and Transport (**EIT**) chapters given it is standard practice to consider any relevant provisions when processing a resource consent. She highlighted the chapters of the Natural Environment Values section of the Plan include a statement under the policies of the chapter to refer to the policies of the EIT chapters, with the exception of the Public Access Chapter). She considered a specific reference would draw attention to them and imply they require special consideration of the EIT chapters. She requested removal of the statement from the policies section of the Natural Environment Values chapters ((Ecosystems and Indigenous Biodiversity, Natural Features and Landscapes, and Natural Character and the Margins of Waterbodies) as follows:

> ~~*Also where relevant refer to policies in the Energy, Infrastructure and Transport Chapters.*~~

53. Ms Pull sought to add the following to the Overview of the NC and ASW Chapters under 'Other relevant Te Tai o Poutini Plan Provisions':

> ***Energy, Infrastructure and Transport – The Energy, Infrastructure and Transport chapters contain provisions that manage Energy, Infrastructure and Transport activities and potential reserve sensitivity.***

54. Ms Pull's recommended amendment to the Overview to add other agencies as an Advice Note.

55. Ms Inger Perkins, on behalf of Herenga ā Nuku Aotearoa/Outdoor Access Commission, requested the following sentence be extended as follows in the Overview:

> *Waterbodies are connected (Ki uta ki tai) from the mountains to the sea) and have important values including for biodiversity, cultural**, recreational** or historical reasons*

56. Ms Perkins accepted the further submission from Poutini Ngāi Tahu in opposition to including the requested addition of other agencies to the Overview and agreed with including an Advice Note as suggested by Ms Pull. However, Ms Perkins considered there was one notable omission from the list and recommended that the West Coast Fish and Game Council be added.

57. Ms Perkins also requested the following addition to the end of the Overview:

> ***Rivers streams, lakes and wetlands have important recreational values including opportunities for access to and along waterways.***

58. Ms Stephanie Styles, on behalf of Manawa Energy Limited ('Manawa'), sought to include a reference to hydroelectricity in the Overview to acknowledge the important resource that waterbodies are for the region in terms of providing for hydroelectricity generation.

59. Mr Martin Kennedy, on behalf of Westpower Limited, sought additional text in the Overview to give effect to the interrelationship between natural character and infrastructure that is significant to the region, as recognised in RPS Chapter 6, Policies 3 and 6 as follows:

> ***There is a considerable network of energy activities and infrastructure, including critical infrastructure, on the West Coast that services the communities spread throughout the region and into neighbouring regions. Such activities have been, and will continue to be developed and undertaken recognising and taking into account the local conditions. Given the topography and extent of waterbodies and landscapes on the West Coast practical management solutions are required to ensure maintenance and enhancement of the supply of renewable energy to, and between, communities for the benefit of those communities and the wider environment from the use and development of renewable energy. The National Policy Statement for Renewable Electricity Generation also recognises the constraints and requirements of such activities including, amongst other matters, being located where the resource is.***

60. Ms Frida Inta, on behalf of herself and Buller Conservation Group, requested the following amendments to the wording of the Overview wording:

> *Waterbodies and their margins are **a vital underpinning** ~~an important part~~ of the West Coast **Region**/Te Tai Poutini **and its prosperity**. Waterbodies are connected (Ki uta ki tai*

from the mountains to the sea) and have important values, including ***those*** *for biodiversity,* ***ecosystem services,*** *cultur**e**~~al~~, recreation~~al~~ or histor**y**~~ical reasons~~.*

61. Ms Inta stated waterbodies are more than an important part of the West Coast, they *are* the West Coast, and she considered the proposed sentence overtly understated their importance. She considered the changes sought to correct grammatical errors and include reference to '*ecosystem services'.*

Reporting Officer Reply Evidence

62. At the hearing, Ms Easton recommended adding the Advice Note agreed to by Ms Pull and Ms Perkins to the end of the Overview. She also agreed it was appropriate to add the West Coast Fish and Game Council. However, the Panel note that this Advice Note was not included in Ms Easton's Right of Reply. The Panel considers this was an oversight given her response to questions at the hearing.

Hearing Panel's Evaluation

63. The Panel accepts that Ms Easton's recommended amendments to the Overview provide greater clarity for most of the issues sought by submitters, as shown in Appendix 1 of the s42A Report.

64. The Panel accepts the recommendation to add a new Advice Note as agreed by Ms Pull and Ms Perkins, with the addition of the West Coast Fish and Game Council.

65. The Panel accepts Ms Easton's recommendation to reject the proposed amendments to the Overview proposed by Mr Kennedy on behalf of Westpower given this only repeats what is already stated throughout the Plan.

66. The Panel accepts the Buller Conservation Group's submission point (S552.094), as recommended by Ms Easton, but considers that the further text changes sought by Ms Inta at the hearing are not within the scope of the Buller Conservation Groups original submission point.

67. The Panel accepts the Reporting Officer's recommendation to add wording clarifying the NESF and the functions of the Regional Council and accept in part Forest & Bird's submission. However, the Panel recommends the overview is corrected to refer to the Resource Management (National Environmental Standard for Freshwater) Regulation 2020 (NESF).

68. The Panel considers it is appropriate to update the reference in the Overview to the Resource Management (National Environmental Standards for Commercial Forestry) Regulations 2017 (**NES-CF**), which has replaced the NES-PF.

69. The Panel has also made minor corrections to the Overview to reflect the replacement of the NES-PF with the NES-CF, correct the use of capitals and grammatical errors.

Recommendation

70. For the reasons outlined above, and subject to our considerations of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in footnotes below are

accepted or accepted in part, and recommends the following changes to the Natural Character and Margins of Waterbodies Overview:

OVERVIEW

Waterbodies and their margins are an important part of the West Coast/Te Tai Poutini. Waterbodies are connected (~~K~~**k**i uta ki tai**,** from the mountains to the sea) and have important values, including for biodiversity, cultural**, recreational**[6] or historical reasons.

Under section 31 of the RMA district councils are responsible for the management of activities on land, including the margins of waterbodies. **Natural Character and the margins of waterbodies require protection as a matter of national importance under Section 6(a) of the RMA[7]. Te Tai o Poutini Plan also manages activities on the surface of waterbodies**.[8]

The West Coast Regional Council has responsibility for the management of wetlands, lakes and rivers**,** including land uses in the beds of rivers. This section of Te Tai o Poutini Plan focuses on the natural character of the margins of wetlands, lakes and rivers**,** thereby avoiding duplication with Regional Council functions.

The three district council**s** work with the West Coast Regional Council and Poutini Ngāi Tahu to ensure waterbodies are managed in an integrated way.

Poutini Ngāi Tahu have a special relationship with the mauri of waterbodies and ancestral, cultural spiritual or historical associations with waterbodies. Many waterbodies in the West Coast/TeTai o Poutini are identified as statutory acknowledgement area**s** and there are also nohoanga entitlements in place in some locations. These waterbodies contain~~er~~ associated ~~kainga~~**kāinga**, ~~pa~~ **pā,** important sites for the gathering of kai, **t**~~T~~auranga ika and specialised zones for various activities of high cultural value**,** such as cleansing, iriiringa, food preparation and bathing, which continue to be vital to the wellbeing, livelihood and lifestyle of Poutini Ngāi Tahu.

Rivers, streams, lakes and wetlands have important ecological, natural character**, recreational** [9] and hydrological values**.** ~~t~~**T**hey provide important habitat for native plants, fish, birds, lizards, frogs, insects and aquatic and terrestrial macroinvertebrate aquatic life **and opportunities for access to and along waterways.**[10]

Some waterbodies (both natural and artificial) also form an important resource for the generation of hydroelectricity, which contributes to the wellbeing of people and communities.[11]

The National Policy Statement for Freshwater Management 2020 (NPSFM) guides decision-making regarding the freshwater resources of New Zealand/Aotearoa. In particular**,** the councils must have regard to its objectives and policies in consent decision-making.

The Resource Management (National Environmental Standard for Freshwater) Regulations 2020 (NESF) has specific rules which relate to freshwater, in particular in relation to activities in the margins of freshwater wetlands. **These rules relate to the regional functions of the West Coast**

[6] Herenga ā Nuku Aotearoa Outdoor Access Commission S274.004
[7] Buller Conservation Group S552.094
[8] Director General of Conservation S602.100

[11] Manawa Energy Limited S438.103

Regional Council and are administered by that organisation. The provisions in Te Tai o Poutini Plan have been developed considering the NESF and what additional provisions are required to fulfil the statutory functions of the district councils in relation to natural character of waterbodies. The Tai o Poutini Plan provisions in relation to riparian margins of wetlands only relate to wetlands in the coastal marine area to avoid duplication with the NESF.[12]

~~Plantation~~ **Commercial** Forestry

~~Plantation~~**Commercial** forestry is principally regulated by the Resource Management (National Environmental Standard for ~~Plantation~~**Commercial** Forestry) Amendment Regulations 2023 (NES-~~P~~**C**F).[13] However the NES-~~P~~**C**F allows that district plans can be more stringent where this gives effect to an objective in the National Policy Statement for Freshwater Management. Where provisions within this chapter over-rule the requirements of the NES-~~P~~**C**F an advice note to that effect is included within the rule.

Other relevant Te Tai o Poutini Plan provisions.

It is important to note that in addition to the zone chapters a number of District **w**~~W~~ide and Overlay chapters also contain provisions that may be relevant for waterbodies, including:

- Public Access - The Public Access Chapter contains provisions relating to the provision and maintenance of public access to waterbodies.
- Subdivision - The Subdivision Chapter contains provisions which manage subdivision and specific standards in relation to the provision of esplanade reserves and strips, in particular SUB- S9
- Activities on the Surface of water – The Activities on the Surface of Water Chapter contains provisions that mange activities that occur on the surface of water.
- Coastal Environment – The Coastal environment Chapter contains provisions that manage the natural character of the coastal environment.
- Earthworks - The Earthworks Chapter includes provisions around earthworks management. **These relate to requirements for earthworks within zones and include general standards for earthworks. These rules apply in addition to rules on earthworks within the Natural Character of Waterbodies Chapter.** [14]
- **Ecosystems and Indigenous Biodiversity – The Ecosystems and Indigenous Biodiversity Chapter contains provisions around vegetation clearance, including in the margins of waterbodies.**[15]
- **Energy, Infrastructure and Transport - The Energy, Infrastructure and Transport Chapter contains policies that are also relevant and should be assessed in relation to energy infrastructure or transport activities that trigger resource consent under Natural Character of Waterbodies Rules.** [16]

Aside from regional and local government there are other key agencies and government groups involved in the integrated management of waterbodies. These include:

- **Department of Conservation;**
- **West Coast Fish and Game Council**
- **NZ Landcare Trust;**
- **Catchment care and other restoration groups; and**
- **Herenga ā Nuku Aotearoa, the Outdoor Access Commission.** [18]

2.3. NC Definitions

Submissions and Further Submissions

71. Twenty-two submission points and seven further submission points relating to definitions were summarised in a Table on pages 18-21 of the s42A Report.

72. One submission supported retaining the definition of '***Artificial Lake or Pond***' as notified.

73. Two submission points and one further submission point supported retaining the definition of '***Lake***' as notified, with one requesting the exclusion of a dredge pond. One submission opposed the definition and requested use of the RMA interpretation, with one further submission point opposing this submission point.

74. Five submission points sought amendments to the definition of '***Riparian Margin***' and two further submissions supported two of the submission points.

75. Four submissions points and eight further submission points relating to the '*extent of riparian margins'* were summarised on page 48 of the s42A Report and assessed in relation to the NC rules. Four submissions sought amendments to the definition; and seven further submission points opposed the amendments sought and one further submission supported the amendments in part. These submission points are addressed here in relation to the definition of '*Riparian Margin*', as well as in relation to the rules.

76. One submission point supported the definition of '***River***' as notified and three submission points sought amendments.

77. One submission point supported the definition of '***Waterbody***' as notified and one submission point sought amendment to clarify the relationship between the definition and the zone.

78. Two submission points supported the definition of '***Wetland***' as notified.

79. Two submission points sought new definitions for '***Bank***' and two further submission points opposed these submission points.

80. Three submission points sought a new definition for '***Watercraft***' and one further submission supported in part.

[18] Herenga ā Nuku Aotearoa Outdoor Access Commission S274.004

81. The Panel has considered the relevant submissions and further submissions and adopts the summaries in the s42A Report.

Section 42A Report

82. The s42A Report did not support the request to use the RMA definition of '*Lake*' given the definition would potentially capture a range of artificially constructed ponds associated with other activities.

83. The s42A Report supported the changes to the definition of '*Riparian Margin*' to refer to rivers and not streams. The Report agreed it was not clear where the riparian margin is measured from but considered it should be measured from the point of '*annual fullest flow'* for any lake or wetland. It did not support a reduction of the distance determining the riparian margin given the rule changes recommended allow for farming to continue. It also supported the addition of '*within the coastal marine area*' to specify that only wetlands within the coastal marine area are included within the definition (S620.041, FS79.7 and FS222.338).

84. The s42A Report did not support Manawa's request (S478.017) to standardise the width of the riparian margin to 10m given the different functions of the District Councils and the Regional Council. It also considered the riparian margins should not be substantially different between the Plan and the West Coast Regional Land and Water Plan (**RLWP**). It noted the RLWP has 20m riparian margins for lakes and recommended Manawa's requested to reduce this to 10m should be rejected.

85. The s42A Report did not support the requests to increase the riparian margin to 15m wide and recommended rejecting these submission points (S552.027 and S312.010) and accepting the six further submissions opposing this increase (FS232.048, FS150.028, FS215.028, FS215.029, FS104.040, FS222.027, FS231.041). It noted that the RLWP riparian margins for a river >3m is between 3-10m.

86. The s42A Report considered there was some merit in including 1-3m wide rivers in the definition given the riparian areas can have significant natural character. It noted the RLWP provides for 3m (pasture) or (5m (indigenous vegetation) riparian margin width for streams on low slope land and 10m width indigenous vegetation on land >12 degrees slope. In response to questions, Ms Easton considered 1-3m wide streams could have a 3m wide riparian margin, which would be consistent with the stock exclusion regulations.

87. The S42A Report did not support the request to identify the difference between intermittent and ephemeral waterbodies or the request to use the definition used in the RLWP given the definition of '*River*' is set by NPS.

88. The s42A Report supported Poutini Ngāi Tahu's request to clarify the relationship between the definition of '*Waterbody*' and zones, given the identification of waterbodies on the zone planning maps is confusing. It noted that only some waterbodies are identified on the planning maps, and a waterbody is not a zone in the planning maps. It recommended the identification of 'waterbody' is removed from the zone maps/layer and the areas identified be zoned General Rural Zone (**GRUZ**).

89. The s42A Report did not support the addition of a new definition for '*Bank*' given the term is not used in the Plan.

90. The s42A Report supported the addition of a new definition for '*Watercraft*' with a qualifier at the end to identify motorised watercraft.

Hearing and Submitter Evidence/Statements

91. Ms Styles, on behalf of Manawa, requested that the definition of '*Riparian Margin'* is simplified to a distance of 10m from all waterbodies because 20m for lakes would subject Manawa to unnecessary consenting requirements. She supported the 10m setback as notified for wetlands if these are to be addressed by a rule in the Plan. She disagreed with the s42A Report recommendation and noted the District Council and Regional Council functions are quite different in respect of riparian margins, with the District Council functions relating to the effects of land use and public access. She considered 'following' the RLWP provisions would result in unnecessary duplication and consenting costs.

92. Ms Styles noted Manawa has specific interests in riparian setbacks as its assets and operations are functionally and operationally required to be located within and adjacent to waterbodies, including natural lakes and rivers e.g. Kawhaka Creek and the Arnold River, and many artificial or modified waterbodies such as Kumara reservoir and Dillmans canal. She considered the 20m riparian margin from lakes may subject a greater number of Manawa activities to potential consenting requirements that are unnecessary for the district councils to manage, such as earthworks, vegetation clearance and structural maintenance.

93. Ms Pull, for Poutini Ngāi Tahu, requested (S620.041) an additional clause be added to the definition of '*Riparian Margin*' to be consistent with the RLWP and ensure control of indigenous biodiversity on land with a slope of less than 12 degrees, as follows:

> *(d) 5m of any river with an average bed width between 1-3m*

94. Ms Pull noted she disagreed with Ms Easton that waterbodies on the zone planning maps should be zoned GRUZ and considered the zoning should be that of the adjacent land (the same as roads). She did not support removing waterbodies from the zone planning maps.

95. Mr Martin Kennedy, on behalf of Westpower, sought to have the definition of '*River*' aligned with the RLWP definition to give consistency of interpretation and implementation of documents.

96. Ms Amy Young, on behalf of the Director General of Conservation ('**Director General**') supported the new definition for '*Watercraft'* recommended in the s42A Report.

97. Ms Inta, on behalf of herself and Buller Conservation Group, sought to have the definition of '*Riparian Margin'* amended to include '*the point at which terrestrial vegetation commences'.* She also sought the addition of the Buller District Council (**BDC**) Plan definition for '*Bank*'.

Reporting Officer Reply Evidence/Statements

98. Ms Easton responded to questions from the Panel regarding the definition of '*Riparian Margin*' used in NPS and the RLWP. She did not support using the RLWP definition given it is lengthy and complex. She noted the NPS definition for '*Bed*' is the same as the RMA definition.

99. To address concerns relating to clarity around where the riparian margin is measured from, she recommended adding '*As measured from the point of annual fullest flow for a river or*

annual fullest water level for a lake or wetland' to the definitions. To further assist, Ms Easton recommended adding new definitions for '*Fullest flow*' (based on the RLWP definition) '*Bank*' (based on its ordinary meaning) and '*Bed*' (using the RMA meaning).

100. In response to questions, Ms Easton did not support the zoning of waterbodies to that of the adjacent land and was not comfortable if the zoning changed in the middle of a waterbody.

101. In her Right of Reply, Ms Easton provided further information of the extent of waterways <3m wide throughout the West Coast, the extent of these waterways in indigenous vegetation, and rules in the RLWP and NES-CF. She noted that most of the public conservation land administered by DOC is covered by indigenous vegetation and would have riparian margins under the RLWP of either 5m or 10m. For land outside public conservation land, Ms Easton used NIWA's River Environment Classification maps to review river 'order 1' (the smallest classified) streams and noted that most were not significantly vegetated on their margins and were on the flatter, more developed areas. Ms Easton considered that earthworks and vegetation clearance in riparian margins of these smaller waterbodies are restricted under the RLWP provisions, which provided a good degree of management of potential adverse effects on natural character.

102. Ms Easton also provided further information on restrictions in riparian margins under the NES-CF and the stock exclusion regulations; and riparian margins from lakes in the NES-CF and in other district plans.

103. Ms Easton considered the issue of '*naturalised lakes'* and the definition of a wetland under the NPS-FM. She noted this specifically included wetlands that had developed in or around a deliberately constructed waterbody, since the construction of the waterbody. She considered that a 'naturalised' artificial lake is likely to have developed this wetland fringe and would therefore meet the definition of natural inland wetland.

104. Ms Easton advised that if the Panel is concerned that 'naturalised' artificial lakes should be excluded from the definition of '*Artificial Lake or Pond*', this could be amended by amending the definition of '*Artificial Lakes or Ponds*' as follows:

> *means a body of freshwater created by human intervention in a location where a lake or pond did not naturally exist and includes man made reservoirs.* ***Where the artificial lake has established a wetland margin that meets the NPSFM definition of natural inland wetland, this shall not be considered an artificial lake.***

105. However, Ms Easton noted there is no submission seeking an amendment to the definition of '*Artificial Lake or Pond*' or any changes to the rule, so was likely to be out of the scope of submissions.

Hearing Panel's Evaluation

106. The Panel notes the NPS include a definition for '*Lake*' that has the same meaning as the RMA definition. Where a term is defined in the NPS the Plan must use the definition as defined in the NPS.

107. The Panel notes the proposed Plan definition is intended to avoid capturing a range of ponds artificially constructed as part of mining activity, sediment ponds for earthworks and farm ponds for stock water. The Panel agrees this is the intent but accept the Forest & Bird

submission points (S560.066 and S560.424) to use the RMA definition given it is a listed definition in the Planning Standards and its use is mandatory.

108. The Panel considers the proposed Plan definition of '*Artificial Lake or Pond'* addresses exceptions without changing the RMA definition. The Panel considers that adding an Advice Note to the definition, cross referencing the Plan definition of '*Artificial Lake or Pond*', is not necessary because the definition is clear.

109. The Panel acknowledges the Federated Farmers submission point seeking to reduce the distances in the definition of '*Riparian Margin*' if the rules do not allow for farming activities to continue; and the reduction in the distance from 20m to 10m for any waterbody, as sought by Manawa (S438.017).[19]

110. The Panel accepts Ms Easton's recommendation not to reduce the riparian margin for lakes from 20m to 10m and rejects Manawa's submission point requesting simplification to 10m for all waterbodies. The Panel considers 20m is consistent with the RLWP and other district plans, as outlined in Ms Easton's Reply.

111. The Panel accepts Poutini Ngāi Tahu's submission point (S620.041) that streams 1-3m wide should be included in the 'Riparian Margin' definition. However, the Panel consider this should be 3m wide, which is consistent with the stock exclusion rule in the LWRP for pasture on low slope land. The Panel accepts Ms Easton's view that many of the lowland small streams are surrounded by pastural farmland and that the majority of small streams with indigenous vegetation are within public conservation land. The Panel is also conscious that any indigenous vegetation clearance is subject to the ECO Chapter rules.

112. The Panel accepts Ms Easton's recommendation to reject the submission point from Federated Farmers (S524.017) to reduce the riparian margin distance given the rule framework enables existing farm operations to continue without unnecessary restriction.

113. The Panel accepts Ms Easton's recommendation to delete '*stream or*' from the definition of '*Riparian Margin'* given the NPS definition (RMA definition) of '*River*'; and to add '*that is located in the coastal marine area'* to clarify that only wetlands in the coastal marine area are included.

114. To assist in clarifying where the '*Riparian Margin*' is measured from, the Panel accepts Ms Easton's recommendation to add new definitions for '*Fullest Flow'*, '*Bank*' and '*Bed*', as set out in her Right of Reply. However, we note that '*Bed*' is already included in the definitions in the Plan.

115. The Panel rejects the submission point of Westpower (S547.036) to use the RLWP definition of '*River*' given the Plan must use the NPS definition, which is the same as the RMA definition. The Panel also rejects Ms Inta and the Buller Conservation Group's submission points (S552.029 and S553.029) to differentiate between intermittent and ephemeral waterways

[19] The Panel notes submission points S552.027, FS232.048, FS150.028, FS215.028, FS215.029, FS104.040, FS222.027, FS231.041, S312.010, S478.017, S620.041, FS79.7 and FS222.338 were included in the Table on page 48 of the s42A Report in relation to the extent of 'Riparian Margin' in the definition. These submission points were addressed in relation to the rules in terms of the extent of riparian margins in paragraphs 175-179 of the s42A Report.

and to add cross-reference to the RLWP given the definition used is based on the RMA definition and the RLWP is not consistent with this definition.

116. The Panel accepts Ms Easton's recommended new definition for '*Watercraft*'.

117. The Panel accepts Ms Easton's recommendation to that waterbodies should be zoned General Rural Zone on planning maps to avoid confusion. We do not consider it is appropriate to zone them according to the adjacent land given the potential for different zoning on either side of the waterbody. The Panel is mindful that regulation of water and the beds of waterbodies is a Regional Council function.

Recommendation

118. For the reasons outlined above, and subject to our considerations of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in footnotes below are accepted or accepted in part, and recommends the following changes and additions to the **Definitions** to:

RIPARIAN MARGIN

means all land within:

a. 10m of any wetland **that is located in the coastal marine area**;[20]
b. 20m[21] of any lake; and
c. 10m of any ~~stream or~~ river[22] with an average bed width greater than 3m; **and**
d. **3m of any river with an average bed width greater than 1m and less than 3m**. [23]

As measured from the point of annual fullest flow for a river or annual fullest water level for a lake or mean high water springs for a coastal wetland.[24]

Advice Note: Activities within 10m of a natural inland wetland are regulated under the NESF and administered by the West Coast Regional Council.

WATERCRAFT[25]

means a boat or other vessel that travels on water. This excludes fixed structures on water and use for residential activities.

In relation to the Activities on the Surface of water provisions motorised watercraft means a watercraft that is operated or propelled by a motor.

BANK[26]

means the land on either side of a river which confines the natural flow of the water whether the normal flow, or flood flows.

[20] Royal Forest and Bird Protection Society of New Zealand Inc S560.076
[21] Manawa Energy Limited S438.017
[22] Director General of Conservation S602.015
[23] Te Rūnanga O Ngāti Waewae, Te Rūnanga O Makaawhio and Te Rūnanga O Ngāi Tahu S620.041 and Buller Conservation Group S552.027
[24] Buller Conservation Group S552.028 and Frida Inta S553.028
[25] Department of Conservation S602.130 S602.022 and Ngai Tahu S620.191 620192
[26] Consequential amendment to Buller Conservation Group S552.028 and Frida Inta S553.028

FULLEST FLOW[27]

means the maximum amount of flow or highest water level that can occur without the river water overtopping the banks and beginning to flow over the flood plain.

2.4. NC Objectives

Submissions and Further Submissions

119. Nine submission points relating to the objectives as a whole were summarised on page 23 of the s42A Report, all sought to retain the objectives as notified.

120. Twenty-one submission points and seven further submission points relating to **Objective NC-01** were summarised on page 24-26 of the s42A Report. Twelve submission points sought to retain the Objective as notified, eight submission points sought amendments; and seven further submissions opposed the amendments sought and one further submission point supported one amendment in part.

121. Eight submission points relating to **Objective NC-02** were summarised on page 27 of the s42A Report, all sought to retain the Objectives as notified.

122. Twenty-two submission points and ten further submission points relating to **Objective NC-03** were summarised on pages 27-30 of the s42A Report. Five submission points sought to retain the Objective as notified, one submission point sought to delete the Objective and 16 submission points sought amendments; and five further submission opposed one submission point to retain the Objective, four further submission point supported some of the amendments and one further submission point opposed one amendment.

123. The Panel has considered the relevant submissions and further submissions received and adopts the summaries in the s42A Report.

Section 42A Report

124. In relation to **Objective NC-01**, the s42A Report did not support deleting the Objective given there are a range of activities that have a functional or operational need to locate on the edge of rivers and lakes.

125. It also did not support deleting '*while providing for appropriate subdivision, use and development*' or '*where adverse effects can be avoided or mitigated'*.

126. The s42A Report did not support separating the Objective into two or adding reference to taking a '*precautionary approach'.*

[27] Consequential amendment to Buller Conservation Group S552.028 and Frida Inta S553.028

127. The s42A Report supported replacing '*providing for*' with '*allow*' and adding '*appropriately managed in accordance with the effects management hierarchy*', as follows, as requested by the Director General[28]:

> ***NC-01***
> *To preserve the natural character of lakes, rivers and wetlands and their margins while ~~providing for~~ **allowing** appropriate subdivision, use and development where adverse effects can be ~~avoided or mitigated~~ **appropriately managed in accordance with the effects management hierarchy.***

128. In relation to Objective **NC-02**, the s42A Report highlighted all of the submissions received were in support of retaining it as notified.

129. In relation to **Objective NC-03**, the s42A Report supported the 12 submission points requesting to include '*or operational*' to refer to both functional and operational needs[29]. It did not support adding '*technical and locational*' given the '*functional or operational need*' sufficiently covers these matters; and the Plan includes a definition for '*functional need*' and recommends a new definition for '*operational need*'.

130. The s42A Report did not support deleting reference to '*natural character*', as requested by Manawa[30], given the preservation and protection of the natural character of the margins of waterbodies from inappropriate subdivision, use and development is a RMA s6 matter.

131. The s42A Report acknowledged that while some of the amendments sought had merit, overall, the following proposed amendments sought by the Director General[31] were the most appropriate and aligned closer with the RMA direction set out in s6:

> ***NC-03***
> *To provide for activities which have a functional **or operational** need to locate in the margins of lakes, rivers and wetlands ~~in such a way that the impacts~~ **while ensuring adverse effects** on natural character are minimised.*

Hearing and Submitter Evidence/Statements

132. Ms Styles, for Manawa, confirmed she was comfortable with the s42A Report recommendation for Objective NC-01 given the submission point sought to add 'remedy' and the effect management hierarchy includes provision for remedying effects.

133. In relation to NC-03, Ms Styles opposed use of the term '*minimise*' sought. She sought simplification of the Objective by deletion of '*while ensuring adverse effects on natural character are minimised*'. She requested the following wording:

[28] Director General of Conservation S602.101
[29] WMS Group S599.069, Tiga Minerals and Metals Limited S493.064, Birchfield Coal Mines S601.050, BRM Developments S603.034, Birchfield Ross Mining Limited S604.044, Phoenix Minerals Limited S606.035, Whyte Gold Limited S607.033, KiwiRail Holdings Limited S442.060, Bathurst Resources S491.024, Waka Kotahi S450.102, Manawa Energy S438.105 and Chorus NZ Ltd, Spark NZ Trading Ltd, Vodafone NZ Ltd S663.050
[30] S438.105
[31] S602.103

> ***NC-03***
> ~~*To provide for a*~~***Activities*** *which have a functional* ***or operational*** *need to locate in the margins of lakes, rivers and wetlands* ***are provided for.*** ~~*in such a way that the impacts on natural character are minimised.*~~

134. Ms Inta, on behalf of herself and Buller Conservation Group, sought to rewrite Objective NC-01 to require protection and not to provide for development at the expense of protection; and to correct poor grammar by moving '*adverse*' to the front of effects management hierarchy. In relation to Objective NC-03, she requested use of the RPS terminology or at the very least a reference to RPS Chapter 7A Policy 3.

135. Ms Young, for the Director General, supported the s42A Report recommendations.

136. Mr Kennedy provided further clarification on Westpower's request to split Objective NC-01 into two parts to give a clearer intention of the outcomes and to better reflect RPS Chapter 7A Objective 1 and 2. He also sought that Objective NC-03 be reworded as sought in submission point S547.314 to give effect to the RPS.

137. Mr Joshua Leckie and Ms Christina Sheard, for Bathurst Resources Limited and B T Mining Limited, provided legal submission in support of the s42A Report recommendations regarding the inclusion of reference to both operational and functional need. They opposed the proposed changes to Objective NC 01 as recommended to replace '*provide for*' with '*allow*' (as proposed by the Director General) because this inappropriately narrowed the scope and application of the objective.

138. Ms Clare Hunter, for Bathurst, also provided planning evidence opposing the s42A Report recommendations in relation to replacing '*providing for*' with '*allowing*' in Objective NC-01. She supported adding 'or operational' to Objective NC-03.

Reporting Officer Reply Evidence

139. In her Right of Reply, having considered the evidence and statements, Ms Easton made no changes to her recommendations on amendments to the objectives. She addressed the scope available to make changes to the Objectives NC-01 to NC-03 and advised there is minimal scope available to amend NC-02 given all submissions supported this objective as notified.

140. In considering Bathurst's opposition to replacing 'provide for' with 'allow' (as requested by the Director General) in NC-01, Ms Easton considered 'allow' should be used for permitted activities and '*provide for'* used for permitted activities or where a resource consent is required. She considered the appropriate term for use in an objective was '*provide for'*, although this change was not reflected in the updates to provisions in her Right of Reply.

Hearing Panel's Evaluation

141. In relation to **Objective NC-01**, the Panel disagrees with Ms Easton that the wording proposed by the Director General is the most aligned with RMA s6(a). In giving effect to RMA Part 2 matters of national importance the Panel must recognise and provide for -

> *s6(a) The preservation of the natural character of the coastal environment (including the coastal marine area), wetlands, and lakes and rivers and their margins, and the protection of them from inappropriate subdivision, use and development.*

142. The Panel considers the first part of the objective (as notified) combined with the wording proposed by Forest & Bird (S560.245) is consistent with the wording of s6(a). ***NC-01***

> *To preserve the natural character of lakes, rivers and wetlands and their margins ~~while~~ **and the protection of them from in**appropriate subdivision, use and development ~~where adverse effects can be avoided or mitgated~~.*

143. The Panel notes the above is also closely aligned with the wording of RPS Chapter 7B Objective 1:

> *To protect the natural character of the region's wetlands, and lakes and rivers and their margins, from inappropriate subdivision, use and development.*

144. The Panel considers the correct approach requires the preservation of natural character and the protection from inappropriate subdivision, use and development. How to achieve this objective, in terms of providing guidance on what is appropriate and the management of adverse effects, are matters for the policies. The Panel also considers that '*providing for'* or '*allowing*' appropriate subdivision, use and development is achieved through the rule framework with the guidance of policies. The Panel therefore rejects the Director General's submission point (S602.101) and recommends *'providing for'* as retained as notified.

145. The Panel partly accepts the submission points of Ms Inta (S553.095), Buller Conservation Group (S552.095) and Forest & Bird (S560.245) which combine to form the Panel's recommended wording of Objective NC-01. The Panel also partly accepts the Grey District Council's submission point (S608.064) given the recommendation to delete '*where adverse effects can be avoided*'.

146. The Panel accepts Ms Easton's recommendation to reject Westpower's (S547.313) request for NC-01 to be split two objectives given these simply repeat the RPS objective wording. The Panel also considers that the RPS objectives are not entirely consistent with RMA s6(a) because they do not reflect the obligation to '*preserve*' natural character of waterbodies and their margins.

147. The Panel agrees with Ms Easton that it is not appropriate to add reference to '*the precautionary approach*' to NC-01 and reject Te Mana Ora's submission point (S190.364).

148. In relation to **Objective NC-02**, the Panel accepts Ms Easton's recommendation to retain it as notified.

149. In relation to **Objective NC-03**, the Panel do not agree with Ms Easton that it is appropriate to add *'or operational need'* given the direction of the TTPP definitions of '*Functional Need'* and '*Operational Need*'. The Panel considers that to give effect to RMA s6(a) direction to preserve and protect, the threshold should be high and '*Functional Need*' requires an assessment to demonstrate the activity can only occur in the location through consideration of alternatives.

'Operational Need', is a much lower threshold requiring an assessment of technical, logistical or operational characteristics or constraints, which may include financial considerations. The RPS Chapter 6, Policy 3 only requires particular regard to such constraints in relation to regionally and nationally significant electricity transmission, distribution and renewable electricity generation infrastructure.

150. The Panel considers adding '*or Operational Needs*' significantly changes the intent of Objective NC-03, which is to provide for those activities that must locate within the margins of lakes and waterbodies. The Panel considers a high threshold is appropriate to give effect to the RMA and the RPS. [Note the definition of functional need includes 'can <u>only</u> locate', whereas 'operational need' is much wider NPS-IB definitions – relating effects on SNA.] RPS-REG Policy C1 'particular regard to the need locate where the RE resource is available'

151. The Panel agrees with Ms Easton that it is unnecessary to add '*technical*', '*locational*' and '*constraints or requirements'* given the definition of 'Functional Need' and 'Operational Need' and rejects Westpower's submission point (S547.314).

152. The Panel accepts Ms Easton's recommendation to amend Objective NC-03 by deleting '*in such a way that the impacts'* and replacing this with *'while ensuring adverse effects'*, as requested by the Director General (S602.103).

153. The Panel notes Ms Inta and the Buller Conservation Grupo did not make a submission point in relation to Objective NC-03.

154. The Panel rejects NZTA Waka Kotahi's submission point to add '*any significant adverse effects*' (S450.102).

<u>Hearing Panel's Recommendations</u>

155. For the reasons outlined above, and subject to our considerations of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in footnotes below are accepted or accepted in part, and recommends the following changes to the **Objectives** in the NC Chapter set out below:

Natural Character and the Margins of Waterbodies Objectives
NC - 01
To preserve the natural character of lakes, rivers and wetlands and their margins ~~while providing for~~ **<u>and the protection of them from in</u>**appropriate[32] subdivision, use and development ~~where adverse effects can be avoided or mitigated~~.[33]
NC – 02

[32] Royal Forest and Bird Protection Society of New Zealand Inc S560.245
[33] Buller Conservation Group S552.095 and Frida Inta S553.095

To recognise and provide for the relationship of Poutini Ngāi Tahu and their traditions, values and interests associated with the natural character of lakes, rivers and wetlands and their margins. notified.
NC – 03
To provide for activities which have a functional need to locate in the margins of lakes, rivers and wetlands ~~in such a way that the impacts~~ **while ensuring adverse effects**[34] on natural character are minimised.

2.5. NC Policies

Submissions and Further Submissions

156. Eight submission points relating to the whole of the NC policies were summarised on page 32 of the s42A Report, with all supporting retain the policies as notified.

157. Twelve submission points and eight further submission points relating to **Policy NC-P1** were summarised on pages 32-34 of the s42A Report. Three submission points either supported the Policy be retained, two sought to delete the Policy, six submissions the policy in part or sought to amend the Policy and one submission point opposed in part. Five further submissions sought to disallow one submission point, and two further submissions sought to allow one submission point.

158. Twenty-six submission points and 16 further submission points relating to **Policy NC-P2** were summarised on pages 35-38 of the s42A Report. Five submission points supported retaining the Policy as notified, one submission point sought to delete the Policy and 20 submission points sought wording amendments. Twelve further submission points opposed the wording amendments sought and four further submission points supported the wording amendments sought.

159. Twenty submission points and two further submission points relating to **Policy NC-P3** were summarised on pages 40-43 of the s42A Report. Five submission points supported the Policy as notified, one submission point sought to delete the Policy, and 14 submission points either supported the policy in part or sought wording amendments to the Policy. Two further submission points sought to allow the amendments sought in the submissions.

160. Seven submission points and one further submission points relating to **Policy NC-P4** were summarised on page 43 of the s42A Report. Five submission points supported the Policy as notified, two submission points sought wording amendments and one further submission point sought to disallow one of the wording amendments sought.

161. Eight submission points and two further submission points relating to **Policy NC-P5** were summarised on pages 43-44 of the s42A Report. Four submission points supported the Policy as notified and four submission points sought wording amendments. Two further submissions sought to disallow wording amendments sought.

[34] Director General of Conservation S602.103

Section 42A Report

162. In relation to **Policy NC-P1**, the s42A Report did not support its deletion (Frida Inta S553.096 and Buller Conservation Group S552.096) given it sets the overall principles for what activities may be acceptable within the margins of a waterbody.

163. The s42A Report did not support replacing '*Minimise*' with '*Avoid, remedy or mitigate*' (Westpower S547.315, NZTA Waka Kotahi S450.103 and Manawa S438.106) or just '*mitigate*' (GDC S608.608) because the RMA s6(a) requirement to preserve natural character is a high threshold. It also did not support its replacement with '*Avoid*' (Forest & Bird S560.248) because this was an even higher threshold, which should be accompanied by non-complying activity status rules; and noted this was inappropriate given the wide range of existing activities in the margins of waterbodies and the substantially modified lowlands of the West Coast.

164. The s42A Report supported the amendments sought to add '*development*' (Forest & Bird S560.248); the addition of '*is of a form and scale that*' (Director General of Conservation S602.104); and '*including public access*' (Herenga ā Nuku Outdoor Access Commission S274.009). However, it recommended adding '*and maintains or enhances public access'* to better give effect to RMA s6(d).

165. In relation to **Policy NC-P2**, the s42A Report supported the replacement of `*provide for*` with '*allow*' (Director General of Conservation S602.105); the replacement of '*minimised*' with '*avoided, remedied or mitigated*' (Westpower S547.316, Grey District Council S608.609 and Manawa S438.107); the addition of '*energy activities'* to clause (b) (Westpower S547.317); and the addition of '*activities or Māori purpose activities in accordance with an Iwi/Papatipu Rūnanga Management Plan'* (Poutini Ngai Tahu S620.174).

166. The s42A Report supported the replacement of '*cultural purposes' with 'activities for Māori Purpose Activities'* (Poutini Ngāi Tahu S620.174). However, it recommended the Iwi/Papatipu Rūnanga Management plan that is referenced within Rule NC – R1, was also included as only those activities in accordance with a Papatipu Rūnanga Management Plan are permitted in that rule.

167. The s42A Report supported in part the request to add a new clause (g) '*Adverse effects on significant indigenous vegetation and significant habitats of indigenous fauna are avoided*' but recommended adding reference to locating activities outside Significant Natural Areas (**SNA**), in accordance with Policy 8 of the NPS-IB, at the beginning of the Policy.

168. The s42A Report did not support deleting the policy (Forest & Bird); adding '*subject to regional rules'* and deleting '*where significant*' (Frida Inta S553.097 and Buller Conservation Group S552.097); adding *'minerals extraction, exploration and prospecting activities*' (WMS Group S599.070, Birchfield Coal Mines S601.051, BRM Developments S603.035, Birchfield Ross Mining Limited S604.045 Phoenix Minerals Limited S606.036, Whyte Gold Limited S607.034); adding 'to undertake legally established activities' (Bathurst Resource S491.025); adding a

new clause 'for food production purposes' (Hort NZ S486.036 and Federated Farmers S524.077); the addition of '*energy activities where there is a technical, locational'* to clause (c) (Westpower S547.318); and adding '*regionally significant infrastructure'* and replacing *'activities'* with '*structures*' (Manawa S438.107); or '*critical infrastructure'* (Westpower S547.317).

169. However, at the hearing, Ms Easton reconsidered her recommendation and agreed that replacing '*infrastructure'* with '*regionally significant infrastructure'* was appropriate because it reduced the scope of the policy and better aligned with the RPS.

170. In relation **Policy NC-P3**, the s42A Report did not support deleting the policy (Forest & Bird S560.250 and S560.515). It supported the addition of the '*or operational*' (Tiga Minerals S493.066, WMS Group S599.071, Birchfield Coal Mines S601.052, BRM Developments S603.036, Birchfield Ross Mining Ltd S604.046, Phoenix Minerals Ltd S606.037, Whyte Gold Ltd S607.035, Bathurst Resources and BT Mining Ltd S491.026, NZTA Waka Kotahi S450.105 and Manawa S438.108).

171. The s42A Report, did not support Westpower's (S547.319) request to add '*technical*', '*locational*' and '*constraints or requirements'* given the definition of '*Functional Need'* and '*Operational Need*'; or the request to replace '*adversely affect'* with '*avoid, remedy or mitigate adverse effects on'* (S547.320).

172. In relation to **Policy NC-P4**, the s42A Report supported the adding '*including weed and pest, control*' (New Zealand Agricultural Aviation Association S166.017); and recommended the addition of an Advice Note instead of a new method or rule (partly accepting Forest & Bird S560.259 and S560.516).

173. In relation to **Policy NC-P5**, the s42A Report supported moving the Policy to the Public Access Chapter (S553.098 and S552.098); and adding '*or for health and safety reasons*' and '*and/or health and safety'* to clause (b) (Westpower S547.321 and Manawa S438.109).

Hearing and Submitter Evidence/Statements

174. Ms Pull, for Poutini Ngāi Tahu, questioned the need for specific references to other parts of the Plan and considered this implied they required special attention. She also noted a lack of consistency in the cross-referencing wording between chapters. She considered the existing refences to the EIT policies should be deleted and added to '*Other relevant Te Tai o Poutini Plan Provisions*' section of the overviews. She supported the s42A Report recommendations to retain NC-P3 as notified.

175. Mr Leckie and Ms Hunter, for Bathurst, sought changes to include reference to '*functional need*' in Policy NC-P3 and supported the amendments recommended in the s42A Report. Mr Leckie also sought greater recognition of lawfully established activities when undertaking activities that have a functional or operational need to locate in and around margins of waterbodies to be included in Policy NC-P2. He considered it was appropriate to not trigger the need for a district council resource consent if a land use activity had been lawfully

established and was authorised by a Coal Mining License. Ms Hunter supported the proposed amendments set out in paragraphs 103 and 131 of the s42A Report and amendments to NC-P2 to enable removal of indigenous vegetation and earthworks within riparian margins of waterbodies, to enable these activities to occur where they are lawfully established activities.

176. Mr Kennedy, for Westpower, considered the s42A Report recommended wording for NC-P1 was inconsistent with the RPS and sought the following wording:

> *Avoid, remedy or mitigate the adverse effects of activities on the elements, patterns and processes that together contribute to the natural character of wetlands, lakes and rivers and their margins.*

177. Mr Kennedy considered including public access in NC-P1 suggested that maintenance and enhancement of access is required in all instances and should be a separate matter included in the Public Access Chapter.

178. Mr Kennedy supported the s42A Report recommendation to insert '*energy activities*' in Policy NC-P2. In relation to Policy NC-P3, Mr Kennedy disagreed with the s42A Report recommendation and considered clause (b) should be amended as follows:

> *They ~~are of a form and scale that will not adversely effect~~ avoid, **remedy, or mitigate adverse effects** on the natural character of the riparian **margin**~~area~~.*

179. Mr Kennedy also sought alterations to Policy NC-P5 (now proposed to be PA-P1) to add '*or for health and safety reasons due to the operational requirements of regionally significant infrastructure'* and '*and/or health and safety*'; and delete '*natural hazard structures'*.

180. Mr Pemberton, for the Director General considered Policy NC-P3 should be retained as notified. He noted the NPS-FM only makes limited allowances for activities which have a functional need, however there are no provisions for activities on the basis of an operational need. He notes the NPS-IB allows some activities within SNA that have an operational need but that this is not directly applicable to Policy NC-P3, which relates to effects on the natural character of riparian areas. He considered providing a pathway for buildings and structures within riparian margins was not consistent with section 6(a) of the RMA in relation to recognising and providing for the preservation of natural character of wetlands, lakes and rivers and their margins.

181. Ms Young, for the Director General, supported the amendments to Policies NC-P1 and NC-P2, as proposed in the Director General's submission. She did not consider that buildings that have an operational need should be afforded the same level of leniency as buildings and structures that have a functional need. She highlighted riparian margins are sensitive areas and provide habitat for spawning threatened indigenous species. She considered avoiding buildings and structures that do not have a functional need in these areas was preferable and Policy NC-P3 should be retained as notified.

182. Ms Perkins, for Herenga ā Nuku Aotearoa/Outdoor Access Commission highlighted the request to add '*and maintains or enhances public access*' to Policy NC-P1.

183. Ms Inta, for herself and the Buller Conservation Group, disagreed with the recommended wording of Policy NC-P1, as she considered there was no reference to protecting the natural environment compared with other chapters that used the word protect on numerous occasions. In relation to Policy NC-P2, she questioned how wide the gap is between '*minor*' and '*significant*' and referred to RPS Chapter 7A Policy 4 in support of her evidence that uses '*no more than minor*'. She considered Policy NC-P2 breached the provisions of RPS and the RLWP. She highlighted that indigenous vegetation removal had been deleted from the rules in the NC Chapter given it is addressed in the Ecosystems and Indigenous Biodiversity (**ECO**) Chapter, and therefore indigenous vegetation should also be removed from Policy NC-P2.

184. Ms Styles, for Manawa, noted that '*natural character values*' in Policy NC-P1 could be interpreted in a variety of ways, in different contexts. To address this, she sought rewording of the policy to remove '*minimise'* and refer to '*identified natural character values*' to enable decisions to be based on the special values that merit protection and to reduce ambiguity when applying the policy. She also wanted to see a list of identified values somewhere in the Plan where it is applicable. She recommended the following wording:

> ***NC – P1***
> *~~Minimise~~ **Avoid, remedy or mitigate** the adverse effects of activities on the natural character of the riparian margins of lakes, rivers and wetlands by ensuring that subdivision, **development** and land use ~~is of a form and scale that maintains~~ **protects** the elements, patterns and processes that contribute to ~~their~~ **the identified** natural character **attributes~~, and maintains or enhances public access~~**.*

185. In relation to Policy NC-P2, Ms Styles cautioned against applying any recommended changes to have the policy applied outside SNA given the NPS-REG, NPS-IB and NPS-FM; and considered applying the policy outside SNA was not appropriate or consistent with the NPS-IB which do not apply to renewable electricity generation activities. She requested the following amendments to reflect the terminology used in the NPS-REG and the definitions in the TTPP:

> ***NC – P2***
> *~~Provide for~~ **Allow** ~~indigenous vegetation removal and~~ earthworks within riparian margins of lakes, rivers and wetlands where:*
> *~~1. This is located outside of a significant natural area; and~~*
> *~~1~~2.~~s~~Significant adverse effects on natural character are ~~minimised~~ **avoided, remedied or mitigated** as far as practicable; and:*
> *a. It is for the purpose of natural hazard mitigation; or*
> *b. It is for the maintenance, repair, upgrade and extension of network utilities, ~~energy activities~~ and **regionally significant** infrastructure including the national grid; or*
> *c. It is for the establishment, operation, maintenance or upgrading of renewable ~~energy~~ **electricity** generation ~~structures~~ **activities** or infrastructure here this has a functional or operational need to be located in a riparian margin; or*

*d. It is for Poutini Ngāi Tahu ~~cultural purposes~~ **Activities or Māori Purpose Activities in accordance with an Iwi/Papatipu Rūnanga Management Plan**; or*
e. It is for the repair and maintenance of legally established structures; or
f. The activity has a functional or operational need to be located adjoining a waterbody.

186. Ms Styles further reiterated to the Panel the need to be clear on what is being protected in Policy NC-P3. She requested the following amendments:

NC – P3
*Provide for buildings and structures within riparian margins of lakes, rivers and wetlands where these: a. Have a functional need or **operational need** for their location; and b. They are of a form and scale that will not adversely ~~effect~~ **affec**t the **identified** natural character of the riparian area.*

187. Ms Styles had no concerns regarding the recommendation to move Policy NC-P5 into the Public Access Chapter.

Reporting Officer Reply Evidence

188. Having heard the evidence and undertaken further analysis Ms Easton considered Policy NC-P1 reflected RPS direction and references the elements, patterns and process. She considered there was no justification to include identified natural character values as sought by Manawa; and any concern relating to assessing indigenous vegetation clearance could be addressed by amending the Advice Note to direct Plan users to Policy NC-P2.

189. Revised Appendix 1 of the Right of Reply recommended the following amendments:

NC-P1

*Minimise the adverse effects of activities on the natural character of the riparian margins of lakes, rivers and wetlands by ensuring that subdivision, **development** and land use **is of a form and scale that** maintains the elements, patterns and processes that contribute to their natural character, **and maintains or enhances public access.***

NC-P2

Provide for indigenous vegetation removal and earthworks within riparian margins of lakes, rivers and wetlands where:

1. This is located outside of a significant natural area; and
*2. ~~s~~**S**ignificant adverse effects on natural character are ~~minimised~~ **avoided, remedied or mitigated** as far as practicable and*
a. It is for the purpose of natural hazard mitigate; or
*b. It is for the maintenance, repair, upgrade and extension of network utilities, **energy activities** and infrastructure including the national grid; or*
c. It is for the establishment, operation, maintenance or upgrading of renewable energy generation structure or infrastructure where this has

a functional or operational need to be located in the riparian margin; or

d. *It is for Poutini Ngāi Tahu* ~~*cultural purposes*~~***Activities or Māori purpose Activities in accordance with an Iwi/Papatipu Runanga Management Plan; or***
e. *It is for the repair and maintenance of legally established structures or*
f. *The activity has a functional or operational need to be located adjoining a waterbody*

NC-P3

Provide for ***new*** *buildings and structures* ***and the upgrading of existing buildings and structures*** *within riparian margins of lakes, rivers and wetlands where these:*

a. *Have a functional need* ***or operational need*** *for their location; and*
b. *They are of a form and scale that will not adversely* ~~*effect*~~ ***affect*** *the natural character of the riparian area.*

NC-P4

Encourage the restoration and enhancement of the natural character of the riparian margins of lakes, rivers and wetlands ***including pest plant and pest animal control.***

Advice Note:

1 The Objective and policy in the Public Access Chapter should also be considered when assessing resource consent in relation to activities in the margins of waterbodies

Hearing Panel's Evaluation

190. In relation to **Policy NC-P1**, the Panel disagrees with Ms Easton that '*Minimise*' is a higher threshold than '*Avoid, remedy or mitigate'* and consider this assumes that minimising effects can achieve the preservation of natural character and its protection from inappropriate development. The Panel considers there will be circumstances where adverse effects on the natural character of waterbodies will need to be avoided and other circumstances where remedy or mitigating adverse effects may achieve the outcome of preservation and protection. The Panel accepts the submission points seeking to replace '*Minimise*' with '*Avoid, remedy or mitigate*' (Westpower S547.315, NZTA Waka Kotahi S450.103 and Manawa S438.106) gives effect to RMA s6(a) and the RPS.

191. The Panel considers replacing '*Minimise*' with '*Avoid'* is too restrictive given it is anticipated that some specified activities (i.e. RSI and REG activities) will have a functional need to locate within the margins of waterbodies.

192. The Panel also accept Manawa's (S438.107) request to replace '*structures*' with '*activities*' in clause (c) given the pTTPP definition for '*Renewable Electricity Generation Activities*' includes structures.

193. The Panel disagrees with Ms Easton's recommendation to add `*is of a form and scale*` (Director General S602.104) to NC-P1 because we agree with Ms Styles that it adds subjectivity, and it is unclear how activities would be assessed in relation to this policy.

194. The Panel partly accepts Manawa's request to replace '*maintains the elements, patterns and processes that contribute to natural character'* with '*protects the identified natural character values'* (Manawa S438.106) but consider that this should not include the word '*identified*' because the preservation of the natural character of margins of waterbodies require is not limited to identified values. It is appropriate to identify these values through a site-specific assessment in relation to considering a proposal.

195. The Panel agrees with Ms Easton's recommendation to add `*development'* (Forest & Bird S560.248) to better aligned with the wording of the RMA.

196. The Panel disagrees with Ms Easton's recommendation to add '*and maintains or enhances public access'* (Herenga ā Nuku Outdoor Access Commission S274.009) at the end of the policy. We accept the evidence of Ms Styles that this is not appropriate in relation to the NC provisions and should be addressed in the Public Access (**PA**) provisions. The Panel agrees and this is considered in the Panel's Recommendation Report on the PA Chapter

197. In relation to Policy **NC-P2**, the Panel agree with Ms Easton's recommendation to replace '*minimise*' with '*avoided, remedied or mitigated*' (Westpower S547.316, and Manawa S438.107) to give effect to RMA s6(a) and the RPS. However, we consider this requires the consequential deletion of '*as far as practicable*' given this relates to significant adverse effects which must be avoided either directly, or through remediation and mitigation, to achieve the preservation and protection of natural character of the margins of waterbodies. To only go as far as '*as far as practicable*' will not achieve preservation and protection of natural character values in the margins of waterbodies, as a matter of national importance.

198. Similarly, the Panel accepts the request to delete '*significant*' (Frida Inta S553.097 and Buller Conservation Group S552.097) because to allow environmental effects up to this threshold is not consistent with the directive of RMA s6(a) or RPS Chapter 7A, Policy 4 to only allow activities with no more than minor adverse effects would potentially lead to cumulative effects and will not achieve preservation and protection of natural character values in the margins of waterbodies, as a matter of national importance. The Panel considers this recommendation also negates the need to add a new clause (1) in relation to the protection of significant biodiversity and habitats by limiting effects on natural character to 'no more than minor'.

199. The Panel also disagrees with Ms Easton's recommendation to include '*energy activities*' in clause (b) and agree with that this is not appropriate in clause (c) given the TTPP for '*Energy Activities'* and the direction of the NPSREG, NPSET and RPS. Similarly, the Panel considers the amendment sought by Manawa to replace '*renewable energy generation structures or infrastructure*' with '*renewable electricity generation activities*` in clause (c) is appropriate and aligns better with direction in the NPS-REG. However, the Panel agrees with Mr Kennedy and

Ms Styles that '*infrastructure'* should be '*regionally significant infrastructure'* to align with the RPS and its direction regarding functional or operational need in relation to RSI and renewable electricity generation. The Panel agree that '*infrastructure*' is too broad to give effect to the higher order statutory direction.

200. For the same reasons, the Panel considers that '*infrastructure'* should be '*regionally significant infrastructure'* clause (c), as a consequential amendment to the Westpower and Manawa submission points relating to clause (b). We note the request by Forest & Bird to delete this policy also provides wide scope for this amendment.

201. The Panel agree with Ms Easton to replace '*cultural purposes*' with *`Activities or Māori Purpose Activities in accordance with an Iwi/Papatipu Rūnanga Management Plan'* in clause (d).

202. The Panel has carefully considered the appropriate use of functional need or operational need in light of the higher order statutory direction and our recommendations on the NC Objectives. We consider *'operational needs*' should only be used where this is consistent with the national direction given this is a much lower threshold and reduces the level of protection required. We agree that the NPS-IB provisions are specific to activities within SNA and consider giving effect to this direction must be undertaken in conjunction with the identification of SNA. Furthermore, with the removal of vegetation clearance, the policy is now focused on earthworks within the margins of waterbodies.

203. The Panel considers the inclusion of '*operational need*' should be limited to regionally and nationally significant electricity transmission, distribution and renewable electricity generation infrastructure and RSI, to give effect to the NPSREG, NPSET and RPS. These activities are captured in clause (b). The Panel accepts that other activities should only be located in the margins of waterbodies where the higher threshold of functional need can be met given the importance and sensitivity of these areas to earthworks and disturbance. The Panel also agrees with Ms Styles that the policy should not be broadened by adding 'energy activities' given the definition in the pTTPP includes non-renewable energy generation. The Panel agrees with Ms Styles and Mr Kennedy that the policy should apply to '*regionally significant infrastructure*' and not '*infrastructure*'; and accept this is consistent with national direction and the RPS.

204. For the same reasons, the Panel recommends deleting '*operational need'* from clause (f) to be consistent with NC-O3 and to give effect to national direction. The Panel considers this is within the scope of the request to delete the policy.

205. The Panel agree with Ms Easton's recommendations to reject the other submissions seeking changes for the reasons outlined in the s42A Report.

206. In relation to **NC-P3**, the Panel disagree with Ms Easton's recommendation to add '*or operational needs*' to clause (a) for the reasons discussed above in relation to NC-O3 and NC-P2.

207. The Panel agree with Ms Easton's recommended amendments to correct '*effect*' by replacing it with '*affect'* as sought by the Grey District Council; and to reject Westpower's suggested rewording to address this. The Panel also considers replacing *'area'* with '*margin*' in clause (b), as a RMA First Schedule clause 16(2) correction is appropriate for clarity. Similarly, the Panel accept Ms Easton's recommended wording additions clarify the intent to apply to both existing and new activites.

208. In relation to **NC-P4**, the Panel agree with Ms Easton's recommendation to add `*including pest plant and pest animal control*` as sought by NZ Agricultural Aviation Association to enable such activities.

209. The Panel agree with Ms Easton's revised recommendation to not include Advice Note (2), as shown in the s42A Report, in NC-P4 due to her consideration of further legal information from the Director General.

210. In relation to **NC-P5**, the Panel agree with Ms Easton to delete NC-P5 and move this into the Public Access Chapter. We agree with Ms Easton that the additions sought by Westpower, in relation to health and safety, are not appropriate given the requirement to maintain public access to and along the margins of waterbodies. However, we consider the wording sought by Manawa in relation to the operational needs of RSI is appropriate; and therefore, recommend accepting Manawa's submission point (S438.109).

Hearing Panel's Recommendation

211. For the reasons outlined above, and subject to our considerations of Part 2 of the RMA the Panel recommends that the relevant submission points identified in footnotes below are accepted or accepted in part, and recommends the following changes to the **NC Policies**:

NC-P1

Avoid, remedy or mitigate[35] adverse effects on the natural character of the riparian margins of lakes, rivers and wetlands by ensuring that subdivision, **development**[36] and land use maintains the elements, patterns and processes that contribute to their natural character.

NC-P2

Provide for ~~indigenous vegetation removal and~~[37] earthworks within riparian margins of lakes, rivers and wetlands where ~~significant~~ adverse effects on natural character are ~~minimised as far as practicable~~ **avoided, remedied or mitigated**[38] and:

a. It is for the purpose of natural hazard mitigation; or

b. It is for the maintenance, repair, upgrade and extension of network utilities, and **regionally significant**[39] infrastructure including the national grid; or

[35] Westpower Limited (S547.315), NZTA Waka Kotahi (S450.103) and Manawa Energy Limited (S438.106)
[36] Royal Forest and Bird Protection Society of New Zealand Inc (S560.248)
[37] Consequential amendment Royal Forest and Bird Protection Society of New Zealand Inc (S560.508)
[38] Westpower Limited (S547.316), Grey District Council (S608.609) and Manawa Energy Limited (S438.107)
[39] Manawa Energy Limited (S438.107), Westpower Limited (S547.317)

c It is for the establishment, operation, maintenance or upgrading of renewable electricity generation **actvities**~~structures~~[40] or **regionally significant**[41] infrastructure where this has a functional or operational need to be located in a riparian margin; or

d It is for Poutini Ngāi Tahu ~~cultural purposes~~**Activities or Māori Purpose Activities in accordance with an Iwi/Papatipu Rūnanga Management Plan;**[42] or

e It is for the repair and maintenance of legally established structures; or

f. The activity has a functional ~~or operational~~[43] need to be located adjoining a waterbody.

NC-P3

Provide for **new** buildings and structures **and the upgrading of existing buildings and structures**[44] within riparian margins of lakes, rivers and wetlands where these:

a. Have a functional need for their location; and

b. They are of a form and scale that will not adversely ~~effect~~ **affect**[45] the natural character of the riparian ~~area~~**margin**.[46]

NC-P4

Encourage the restoration and enhancement of the natural character of the riparian margins of lakes, rivers and wetlands **including pest plant and pest animal control.**[47]

Advice Note:

The objective and policy in the Public Access Chapter should also be considered when assessing resource consents in relation to activities in the margins of waterbodies.[48]

~~**NC-P5**~~

~~Reduction in public access to waterbodies can be considered when natural hazard mitigation works are required to protect communities from a significant natural hazard threat. When assessing proposals for natural hazard structures, effects on public access should be considered and ways to minimise them found, including:~~

~~a. Provision of alternate certain and enduring access; and~~

~~b. Provision of public amenity or opportunity for environmental benefit along the structure, provided that the physical integrity of the structure is maintained.~~[49]

Public Access – Te Āheinga Tūmatanui

[40] Manawa Energy Limited (S438.107)
[41] Royal Forest and Bird Protection Society of New Zealand Inc (S560.249) and consequential amendment to Manawa Energy Limited (S438.107), Westpower Limited (S547.317)
[42] Te Rūnanga O Ngāti Waewae, Te Rūnanga O Makaawhio and Te Rūnanga O Ngāi Tahu S620.174
[43] Royal Forest and Bird Protection Society of New Zealand Inc (S560.249)
[44] Clause 16(2) First Schedule of the RMA
[45] Grey District Council (S608.610)
[46] Clause 16(2) First Schedule of the RMA
[47] New Zealand Agricultural Aviation Association (S166.017)
[48] Buller Conservation Group (S552.098) and Frida Inta (S553.098)
[49] Buller Conservation Group (S552.098) and Frida Inta (S553.098)

~~NC-P5~~PA-P1[50]

Reduction in public access to waterbodies can be considered when natural hazard mitigation works are required to protect communities from a significant natural hazard threat or when required for public safety due to the operational requirements of regionally significant infrastructure.[51] When assessing proposals ~~for natural hazard structures~~,[52] effects on public access should be considered and ways to minimise them found, including:

a. Provision of alternate certain and enduring access; and

b. Provision of public amenity or opportunity for environmental benefit along the structure, provided that the physical integrity of the structure is maintained.

2.6. NC Rules

Submissions and Further Submissions

211. Seventeen submission points and 18 further submission points relating to the whole of the NC rules were summarised on pages 46-48 of the s42A Report, with all, except one, seeking amendments.

212. Eight submission points relating to **Rule NC-R1** were summarised on pages 53-57 of the s42A Report. Three submission points sought retention of the rule as notified and two submission points sought amendments. Seven submission points sought to reduce the range of permitted activities within the rule, with nine further submission points in opposition. Sixteen submission points sought to increase the range of permitted activities, with three further submission points in opposition and three further submission points in support. Seven submission points specific to natural hazard mitigation (clause (j) in the rule) sought amendments, with one further submission point in support and one further submission point in opposition. Five submission points on the volume of earthworks and area of vegetation clearance allowed sought amendments.

213. Twenty-two submission points and seven further submission points relating to **Rule-R2** were summarised on pages 62-65 of the s42A Report. Two submission points sought retention of the rule as notified, one submission point sought to delete the rule and 19 submission points sought amendments. Three further submission points opposed the wording amendments sought and three further submission points supported the word amendments sought.

214. Eleven submission points and two further submission points relating to **Rule NC-R3** (hazard mitigation structures) were summarised on pages 67-68 of the s42A Report. Two submission points supported the rule as notified, two submission points sought to delete the rule, and eight submission points sought amendments. Two further submission points opposed the amendments sought.

[50] Buller Conservation Group (S552.098) and Frida Inta (S553.098)
[51] Manawa Energy Limited (S438.107), Westpower Limited (S547.317)
[52] Consequential amendment to Buller Conservation Group (S552.098) and Frida Inta (S553.098)

215. Twenty-one submission points and two further submission points relating to **Rule NC-R3** (indigenous vegetation and earthworks not meeting permitted activity standards) were summarised on pages 69-71 of the s42A Report. Two submission points supported the rule as notified, five submission points sought to correct a numbering error, and 13 submission points sought amendments. Two further submission points opposed the amendments sought.

216. Seven submission points and one further submission points relating to **Rule NC-R4** were summarised on page 72 of the s42A Report. Five submission points sought to retain the rule as notified, two submission points sought to correct the numbering, and one sought to retain at least a discretionary activity status.

217. Sixteen submission points and one further submission point relating to **Rule NC-R5** were summarised on pages 73-74 of the s 42A Report. One submission point supported the rule as notified, two submission points sought to correct a numbering error, two submission points sought to delete the rule, and 11 submission points sought amendments. One further submission point supported the submission point to delete the rule.

218. Eight submission points sought **new rules** and twelve further submissions opposed new rules requested and one further submission supported a new rule.

Section 42A Report

219. In relation to the **Rules as a Whole**, the s42A Report supported correcting the numbering (Grey District Council S608.619), avoiding duplication with the NESF and regional council functions (Forest & Bird S560.252 and S560.509, Westpower S547.401, Grey District Council S608.614, S608.615 and S608.616).

220. The s42A Report did not support better protection for watercourses during development (Marie Elder S352.007) because it was not clear what changes to the provisions were sought; and did not support including more stringent rules than the NESF for natural wetlands (Forest & Bird S560.039).

221. In relation to Forest & Bird's request (S560.041) to revise the rules to give effect to RMA S6(a) requirements and to remove all permitted activities within riparian margins, the s42A Report did not support this because it considered there were a number of other matters that needed to be weighed alongside s6(a), including 6(e) and 6(h), the national direction of the NPSREG and NPSET, and the RPS. It noted RPS Chapter 7A Policy 4 and highlighted there were a wide range of existing uses that exist in the margins of waterbodies, that can only be undertaken in the margins of waterbodies. It noted the ECO Chapter provided for a range of permitted activities for vegetation clearance and that the NC rules have fewer permitted activities. For these reasons, it did not support a wholesale increase in stringency.

222. In relation to **Rule NC-R1**, the s42A Report supported, in part, clarifying the relationship of the ASW Chapter with the Energy Chapter as sought by Transpower (S299.084), if clause (b) is retained. It did not support changing the activity status when compliance is not achieved from

discretionary to restricted discretionary (Laura Coll McLaughlin S574.135, William McLaughlin S567.213, Chris & Jan Coll S558.135 and Chris J Coll Surveying Limited S566.135) given the preservation of natural character in margins of waterbodies is a RMA s6(a) matter of national importance.

223. The s42A Report did not support deleting Rule NC-R1 (Forest & Bird S560.253) because it considered lowland areas are already substantially modified and that within this context there are appropriate activities which should be permitted. It highlighted that the NESF specifically allows for earthworks and vegetation clearance for natural hazards work within riparian margins of wetlands, as well as for arable and horticulture uses; both the NPSREG and NESETA anticipate permitted activities; and the NPS-IB does not apply to renewable electricity generation and electricity transmission. It also noted the LWRP permitted activity standards apply in riparian margins in relation to water quality, earthworks and vegetation clearance.

224. The s42A Report did not support deleting Rule NC-R1 clauses (1)(a), (h) or (i) (Buller Conservation Group S552.099 and S552.215, and Frida Inta S553.099 and S553.219), as it considered fence lines can be key in reducing the impact of stock access on waterbodies, and regulations require the fencing of cattle 3m from and waterways >1m wide. It noted that enabling Poutini Ngāi Tahu activities and those on Māori Purpose zoned land gave effect to RMA s6(e) matters of national importance. It also did not support combining clauses (f) and (g) (Buller Conservation Group S522.214 and Frida Inta S552.218).

225. The s42A Report supported widening NC-R1(b) to all infrastructure or energy activities (Westpower S547.323) given there was very little difference in terms of the extent of the activities covered. Similarly, it also supported in part the widening clause (c) to include energy activities and infrastructure where such activities are located underground (Westpower S547.324) but not where these are above ground.

226. The s42A Report did not support adding '*to undertake legally established activities'* clause (e) (Bathurst (491.027) given this would substantially expand the range of activities and no detail was provided about the types and scale of activities sought.

227. The s42A Report did not support increasing the limit in clause (g) from 3m to 10m (Westpower S547.325) given the potential for significant adverse effects and the need to assess effects through a resource consent process.

228. The s42A Report supported adding '*or a site of significance to Māori in Schedule Three*' (Poutini Ngāi Tahu SS620.176) to clause (j) to give effect to RMA s6(e).

229. The s42A Report supported in part to add a new clause to Rule NC-R1 to include '*New network utilities and regionally significant infrastructure where these are underground and located within a formed legal road or attached to an existing bridge*' (Chorus NZ Ltd, Spark NZ Trading Ltd and Vodaphone NZ Ltd S663.051). It noted that if these are underground service there is no visual impact on natural character of the riparian area. It also supported adding '*<u>formed</u> legal road*', as sought by Poutini Ngāi Tahu (FS41.728).

230. The s42A Report supported adding a new clause '*Clearance of pest plants and pest animals for biosecurity purposes'*, as sought by NZ Agricultural Aviation Association (S166.018), but recommended using wording consistent with Policy NC-P4.

231. The s42A Report did not support including whitebaiting or structures associated with whitebaiting in Rule NC-R1 because these structures are addressed under Rule NC-R2.

232. The s42A Report supported, in part, the submissions from Buller Conservation Group (S552.218) and Frida Inta (S553.333) to address the issue of lands that are mapped as waterbodies in the planning maps. It recommended removing the waterbody identifier on the zoning layer and zoning these areas General Rural.

233. The s42A Report did not support the inclusion of a new clause for clearance and earthworks for '*bridges and/or dams as part of a Temporary Military Activity'* as a permitted activity, as sought by the NZ Defence Force (S519.030).

234. The s42A Report did not support adding new clauses '*food production purposes*` and '*biosecurity purposes*'; but recommended using '*Arable, horticultural or pastoral farming use where this is a lawfully established activity that is no greater in intensity, scale or character over time than at 14 July 2022*' using wording consistent with the NESF and NPS-IB as alternative relief (Hort NZ S486.037 and Federated Farmers of New Zealand S524.079).

235. In relation to submissions on natural hazard mitigation in Rule NC-R1, the s42A Report recommended deleting reference to `*natural hazard activities*` and replacing this with 'hazard mitigation structures'. It recommended new clause '*Maintenance and repair of natural hazard mitigation structures*' and amending clause (j) to '*New Hazard mitigation structures and upgrading of existing hazard mitigation structures undertaken by a statutory agency or their nominated contractor*'. It considered this enabled maintenance and repair of existing hazard mitigation structures regardless of who undertakes the activity, while retaining the specification that such vegetation clearance and earthworks for new natural hazard mitigation structures should be undertaken by a statutory agency or their authorised contractor. It also recommended that clause (5) should amended so that restrictions only apply to natural hazard mitigation structures owned or managed by a statutory agency.

236. In relation to submissions on the volume of earthworks/area of vegetation clearance allowed in Rule NC-R1, the s42A Report did not support the addition of offsetting by riparian margin enhancement (Frida Inta S553.223). It did not consider the rule was too restrictive given it would enable maintenance and construction of up to a 3m wide river crossing. It did not support an increase in the area of vegetation clearance or volume of earthworks as sought by Westpower (S547.327 and S547.326) and Manawa (S438.110) given this would increase adverse effects.

237. The S42A Report did not support changing the activity where compliance is not achieved from discretionary to restricted discretionary, as sought by Manawa (S438.110). It did support the

submission point from Manawa seeking to replace *'critical infrastructure'* with *`regionally significant infrastructure'.*

238. In relation to **Rule NC-R2**, the s42A Report did not support the deleting the rule (Forest & Bird (S560.254) and making the activities discretionary given the range of existing activities and the need to provide for their ongoing existence and operation. It again highlighted the context of the substantially modified lowlands of the West Coast.

239. The s42A Report supported adding `*including energy activities and infrastructure*' to clause (a) (Westpower S547.328 and KiwiRail S442.063) and consistency with similar amendments to Rule ASW-R1. It also supported adding a new clause to allow temporary maimai for game bird hunting (West Coast Fish and Game Council S302.005); as well as a timeframe for removal at the end of the season (Grey District Council FS1.080).

240. The s42A Report supported including '*have a functional need to be located in the riparian margin*' in the first part of the rule (Buller Conservation Group S552.100 and Frida Inta S553.100) but recommended this is `*functional or operational need*` to be consistent with the policy. It did not support adding '*technical, locational, functional or operational constraints or requirements'* (Westpower S547.329).

241. The s42A Report supported in part the submission from NZ Defence Force (S519.031) that temporary bridges that do not include earthworks or vegetation clearance are appropriate but did not consider temporary dams are appropriate within a riparian margin.

242. The s42A Report did not support adding a new clause '*Associated with a lawfully established activity and have an operational or functional need to be in that location'* (Bathurst Resources S491.111) given the word 'associated' would expand the definition of lawfully established activities. It did not support the deleting clause (e) `*natural hazard mitigation structures being constructed by a statutory authority or their nominated contractor*`[53] given the need for restrictions to give effect to RMA s6.

243. The s42A Report supported adding a new clause '*Pump sheds*', as sought by Horticulture NZ (S524.080). It did not support the deletion of network utilities, parks facilities, natural hazard mitigation structures, renewable electricity generation facilities and stormwater discharge structures and water supply intake structures from the permitted activities (Director General S602.108) given the need to provide for existing activities. It considered that separate rules were appropriate to deal with the substantive issue of which activities are permitted.

244. In relation to **Rule NC-R3** (Natural Hazard Mitigation Structures), the s42A Report recommended its deletion given amendments to Rule NC-R2 provide for natural hazard mitigation structures. However, it supported a new restricted discretionary rule for natural hazard mitigation structures within riparian margins not meeting permitted activity standards.

[53] Grey District Council (S608.066), Buller District Council (S538.224, William McLaughlin (S567.216), Chris & Jan Coll (S558.136), Chris J Coll Surveying Limited (S566.136) and Laura Coll McLaughlin (S574.136)

245. In relation to **Rule-NC-R3** (Indigenous Vegetation and Earthworks not meeting Permitted Activity standards), the s42A Report did not support amending the heading to add '*or controlled*' or a new controlled activity rule.[54] It did not support adding '*excluding mineral extraction, exploration and prospecting activities*'[55](Bathurst Resources S491.111) given the potential for significant adverse effects on natural character. It noted the strategic direction supporting minerals extraction and the direction on the natural environment have equal weight; and mineral extraction cannot override the RMA and other national direction.

246. In relation to a submission from Forest & Bird (S560.256) seeking to ensure that the rules are no more lenient than the NESF, the s42A Report recommended that rules in relation to vegetation clearance be moved to the ECO Chapter. It did not recommend the same rules apply to the margins of waterbodies as they are to be considered in a separate manner and that national instruments recognise that different activities have functional or operational needs to locate in the margins of waterbodies.

247. In relation to **Rule NC-R4**, the s42A Report recommended correcting rule numbering. It did not support the submission from Forest & Bird (S560.257) seeking that the rules are no more lenient than the NESF or the ECO or EW Chapter rules given the Rule NC-R4 specifically addresses buildings and structures and effects on natural character of the margins of waterbodies is a separate matter under the RMA.

248. In relation to **Rule NC-R5**, the s42A Report recommended correcting rule numbering. It did not support deleting the rule (Buller District Council S538.227 and Director General of Conservation S602.111) or changing the activity status from discretionary to controlled.[56] It did not support the submission from Forest & Bird (S560.257) seeking that the rules are no more lenient than the NESF or the ECO or EW Chapter rules given the Rule NC-R4 specifically addresses buildings and structures and effects on natural character of the margins of waterbodies is a separate matter under the RMA.

249. In relation to requests for **new rules**, the s42A Report did not support new controlled activity rules for new hazard mitigation structure or for earthworks, vegetation clearance, building and structures given this may be inappropriate within a riparian margin and consent cannot be declined for a controlled activity. It did not support a new restricted discretionary activity rule for earthworks not meeting the permitted activity standard given the wording of RMA s6(a).

250. The s42A Report noted it was not opposed in principle to a new non-complying activity rule for activities that are likely to cause significant adverse effects but sought further information from the submitter. It did not support a prohibited activity where reductions in setbacks are sought.

[54] Westpower (S547.331 and S547.333), Chris & Jan Coll (S558.143), Chris J Coll Surveying Limited (S566.143) and Laura Coll McLaughlin (S574.143)

[55] WMS Group (S599.072), TiGa Minerals and Metals Limited (S493.067), Birchfield Coal Mines Ltd (S601.053), BRM Developments Limited (S603.037), Birchfield Ross Mining Limited (S604.047), Phoenix Minerals Limited (S606.038) and Whyte Gold Limited (S607.036)

[56] William McLaughlin (S567.220, S567.212, S567.215, S547.217), Chris & Jan Coll (S558.134, S558.137 and S558.139), Chris J Coll Surveying Limited (S566.134, S566.137 and S566.139), Laura Coll McLaughlin (S574.134, S547.137 and S574.139) and Grey District Council (S608.067)

Hearing and Submitter Evidence/Statements

251. Ms Pull, for Poutini Ngāi Tahu, sought to amend Rule NC-R2 as follows:

> *NC-R2 Buildings and Structures within the Riparian Margin of a River, Lake or Wetland*
> *Activity Status: Permitted*
> *Where:*
> 1. ***All standards in Rule NC-R1 and ECO-RX in relation to riparian margins are complied with; and***
> 2. *Where the buildings and structures…*

252. Ms Pull clarified that the further submission (FS41.189) was concerned with unmanaged effects from temporary bridges and that the reasons given in the s42A Report adding a new clause stated that temporary bridges do not include earthworks or vegetation clearance. She considered this would clarify how the activity is required to comply with the earthworks and vegetation clearance limits in the riparian margin; and was similar to how the earthworks permitted activities are organised.

253. Ms Styles, for Manawa, noted in relation to all the rules that they must give effect to the NPS-REG and not impose higher levels of restrictions on REG activities than other similar activities. She highlighted the need for consistent terminology throughout the Plan relating to REG activities and RSI to avoid confusion in interpretation.

254. In relation to NC-R1, Ms Styles sought that the quantity limits do not apply to REG activities or are significantly increased to reasonably provide for RSI activities. She noted that unlike ONL, riparian margins are confined to a linear area and large areas can need to be used as part of a power scheme or access. She considered placing restriction on existing REG activities fails to give effect to the higher order direction. She recommended excluding maintenance, operation, minor upgrade and repair of existing REG activities. She considered the default status should be restricted discretionary, which was similar to other rules dealing with similar matters.

255. Ms Styles saw merit in relocating indigenous vegetation clearance with riparian margins to the ECO Chapter but highlighted the need to avoid duplication or confusion. She considered the new rules were in effect a duplication of NC-R1 and NC-R3 but apply to vegetation clearance only. She had the same concerns in relation to the new rules and the request for a restricted discretionary default activity status and not discretionary.

256. Mr Kennedy, for Westpower, considered that if riparian margins of 5m were required for waterways with bed widths <3m there would be significant regulatory impacts that had not been assessed. He noted the further submission (FS222.027 and FS222.0338) to disallow these submissions remained valid.

257. Mr Kennedy noted the recommended changes to NC-R1 in the s42A Report was wider than the clarification sought (S547.324) and it was unclear how the rule would provide for both above and below ground connections, as the notified wording intended. He requested the

amendment should use the wording originally submitted. He considered the area and volume limits should be 30m^2 and 30m^3 respectively based on a 10m wide riparian margin and a 3m crossing. He considered clauses (2) and (3) should apply to '*new*' indigenous vegetation clearance and earthworks; noting this may now apply to new ECO-RX. He considered '*minor upgrading*' was too restrictive for RSI activities and noted there was scope to provide a restricted discretionary activity rule.

258. Ms Young highlighted the Director General's submission to delete the following activities from Rule NC-R2:
- *Network utilities;*
- *Parks facilities*
- *Natural hazard mitigation structures constructed by a statutory agency or their nominated contractor;*
- *Renewable electricity generation facilities where these have a functional need to locate within the riparian margin;*
- *Stormwater discharge structures and water supply intake structures constructed in accordance with NZS 4404 Code of Practice for Land Development and Subdivision Infrastructure.*

259. Ms Young considered these activities should not be permitted and should be assessed through a resource consent process to enable appropriate conditions to be imposed. She recommended that these activities and hazard mitigation structures should be restricted discretionary activities.

Reporting Officer Reply Evidence

260. In her Right of Reply, Ms Easton noted that the maximum limit of 25m^2 proposed under Rule NC-R1 was the same as the RLWP rule. She highlighted that the vegetation clearance and earthworks rules under the NESF are very strict within 10m of a wetland, with limited permitted activities and activities requiring resource consent, outside of those specified, being a non-complying activity. She clarified the district council functions in this regard relate to vegetation clearance and earthworks within a margin of a wetland.

261. In Reply, Ms Easton relation recommended one additional change to NC-R1 to replace 20m^2 with 25m^2 in clause (3). There were no other changes to the other NC rules identified in her updated Appendix 1.

Hearing Panel's Evaluation

262. The Panel recommends consistency changes to the NC rules to use the phrase *'statutory agency or authorised contractor acting on its behalf'* which clarifies that the statutory agency is in control. The Panel notes this is a plan-wide issue, and that this approach is consistent with the Panel's recommended wording for Rule EW-R2(2)(g) in relation to hazard mitigation structures, as well as elsewhere in the Plan.

263. The Panel has considered Ms Easton's clarifications regarding duplication of regional council functions under the NESF. We accept her advice that district council functions are limited to

the riparian margins of 'coastal' wetlands (i.e. those that do not meet the definition of a natural inland wetland).

264. In relation to **Rule NC-R1**, the Panel accepts Ms Easton's recommended amendments and new clauses; and her recommendation to clarify indigenous vegetation clearance is recommended to addressed in the ECO Chapter by removing the reference in the rule heading and recommending new Rule ECO-RX and new Rule ECO-RXX. However, we note that both these recommended new ECO rules have changed substantially as the result of expert caucassing and the resulting recommendations in the ECO hearing. Although this is primarily structural in terms of separating out permitted activites into separate rules and the substance of the new rules relied on by Ms Easton remains very similar in scope and scale.

265. In the ECO Recommendation Report, recommended ECO-R1(2) addresses vegetation clearance in riparian margins and limits this to 20m^2 per 200 metres of linear length, as a permitted activity, with a default to a discretionary activity. We agree this is appropriate to ensure effects on natural character values are no more than minor. We noted this is consistent with the relief sought by Manawa (S438.110). We also consider this outcome partly addresses the relief sought by Forest and Bird (S560.253) because it defaults to a discretionary activity.

266. The Panel considers it is appropriate to add '*lawfully established'* in relation to hazard mitigation structures in new clause (k) and existing farm use in new clause (n). This is consistent with clause (f) and the Panel's approach plan-wide. However, we have simplified the wording to remove reference to '*character, intensity and scale*' in clause (n) because this is inherent in RMA s10.

267. The Panel has carefully considered the submission from Westpower seeking to increase the permitted width for establishing a river crossing point from 3m (as notified) to 10m for energy activities. The Panel consider this increase is too permissive for earthworks within the margins of waterbodies given the potential for more than minor adverse effects on natural character, which should be assessed through a resource consent process.

268. The Panel accepts the submissions seeking to delete clause (5) because new clauses (k) and (l), replacing clause (j) (as notified) appropriately address hazard mitigation structures.

269. In relation to **Rule NC-R2**, the Panel disagrees with Ms Easton's recommendation to add '*or operational need'* to locate buildings or structures within the riparian margin, for the reasons discussed in relation to the policies. The Panel considers the list of matters provided for is appropriate.

270. The Panel considers it is not appropriate to add *'energy activities'* to clause (a) given its definition in the pTTPP, national direction and the RPS. However, we agree that '*infrastructure*' should be replaced with '*regional significant infrastructure'* for the same reasons. We note that renewable electricity generation facilities are appropriately included in clause (f) but consider this shound be '*renewable electricity generation <u>activites</u>'*.

271. The Panel accepts Ms Easton's recommendations to include the addition to clause (b) but considers the words '*game bird*' are not needed.

272. The Panel accepts the addition of new clauses (h) and (i) given these activities have the functional need to be located within the margins of waterbodies. In response to a question from the Panel, Ms Easton advised that if a limit of the size of pump shed was necessary $5m^2$ was appropriate. We consider it is appropriate to include a maximum size limit given the potential for more than minor adverse effects.

273. The Panel considers it is appropriate to include new advice note (2), as a consequential amendment to the West Coast Fish and Game Council's request to add temporary mai mai, to be consistent with advice note (3) in NC-R2.

274. In relation to **Rule NC-R3**, the notes that the notified plan had two rules labelled NC-R3. The Panel agrees with the reasoning and recommendation to change the activity status for natural hazard mitigation structures to from permitted to restricted discretionary with addition of matters of discretion for clarity; and to delete the Indigenous vegetation clearance as a consequential amendment to moving vegetation clearance to the ECO Chapter. To achieve this, we accept the recommendation to delete the permitted activity rule NC-R3; and amending notified discretionary activity NC-R5 to be restricted discretionary and renumbering this NC-R3.

275. In relation to **Rule NC-R4,** the Panel agrees with Ms Easton's recommendation retain this rule as notified, except for renumbering this NC-R5.

276. In relation to **Rule NC-R5,** the Panel agrees Ms Easton's recommendation to change the numbering sequence on this rule.

Hearing Panel's Recommendation

277. For the reasons outlined, and subject to Part 2 of the RMA, the Panel recommends that the relevant submission points identified in footnotes below are accepted or accepted in part, and recommends the following amendments to the **NC Rules**:

Natural Character and the Margins of Waterbodies Rules
Note: There may be a number of plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this chapter as well as rules in other chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of these identified rules. Details of the steps Plan users should take to determine the status of an activity are provided for in General Approach.
Permitted Activities

NC - R1	**~~Indigenous Vegetation Clearance and~~**[57] **Earthworks within the Riparian Margin of a River, Lake or Wetland**

Activity status Permitted

1. Where this is outside of any Significant Natural Area identified in Schedule Four and for:

a. Fence lines; or
b. Maintenance, operation, minor upgrade and repair of network utilities ~~critical~~ **regionally significant**[58] infrastructure or renewable electricity generation activities; **or**
c. **New network utilities and regionally significant**[59] **infrastructure where these are underground and located within a formed legal road or attached to an existing bridge; or**[60]
d. Connections to wastewater, stormwater and reticulated network utility systems **and underground energy and infrastructure connections**;[61] or
e. Installation of an environmental monitoring and extreme weather event monitoring facility; or
f. Maintenance and repair of lawfully established structures; or
g. The construction of parks facilities, parks furniture or public access points within an Open Space and Recreation Zone; or
h. The establishment of a river crossing point up to 3m wide; or
i. Poutini Ngāi Tahu Activities; or
j. Activities on Māori Purpose Zoned Land **or a site of significance to Māori in Schedule Three**[62] and **is**[63] undertaken in accordance with an Iwi/Papatipu Rūnanga Management Plan; or
k. **Maintenance and repair of lawfully established natural hazard mitigation structures; or**[64]
l. **New** ~~N~~natural hazard mitigation ~~actvities~~ **structures and upgrading of existing natural hazard mitigation structures** undertaken by a statutory agency or ~~their nominated~~ **authorised** contractor **acting on its behalf; or**[65]
m. **Clearance of pest plants and pest animals for biosecurity purposes; or**[66]
n. **Arable, horticultural or pastoral farming use where this activity is lawfully established at 14 July 2022**; **and** [67]

~~2. The amount of indigenous vegetation clearance is not greater than 20m^2 per 200m length of Riparian Margin;~~ [68]

3. The amount of earthworks is not greater than **25**[69]~~20~~m^3 per 200m length of Riparian Margin; **and**
4. All earthworks stockpiles are located outside of the riparian margin of the waterbody**.**~~; and~~

3. ACTIVITIES ON SURFACE OF WATER CHAPTER

3.1 ASW General/Whole Chapter

Submissions and Further Submissions

278. Eight submission points and one further submission point relating to general matters/whole ASW Chapter were summarised in a table on page 80 of the s42A Report. Three submission points were in support of retaining the chapter as notified, one submission point sought to remove all references to Site or Area of Significance to Māori (**SASM**) in the Chapter and one further submission opposed this. Three submission points sought amendments to the Overview.

279. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

[88] Consequential amendment Royal Forest and Bird Protection Society of New Zealand Inc (S560.508)
[89] RMA First Schedule Clause 16(2) amendment
[90] RMA First Schedule Clause 16(2) amendment
[91] RMA First Schedule Clause 16(2) amendment
[92] Consequential amendment from new restricted discretionary rule (William McLaughlin S567.220, Chris & Jan Coll S558.134, Chris J Coll Surveying Limited S566.134, and Laura Coll McLaughlin S574.134, Grey District S608.067)

Section 42A Report

280. The s42A Report did not support the Grey District Council submission point (S608.078) that sought to remove the any reference to SASM from the Chapter because s6(e) and (f) of the RMA requires recognising and providing for the relationship of Māori and their culture and traditions with their ancestral lands, water, sites, waahi tapu and other taonga; and the protection of historic heritage, which includes the definition of Sites of Significance to Māori.

281. The s42A Report supported in part Westpower's submission points (S547.394 and S547.395) seeking changes to the Overview to highlight the needs of energy activities and infrastructure and recommended amended wording that fits with wording used in the Overview of other chapters.

282. The s42A Report noted one request to add references in to the Strategic Objectives and Policies in the Overview but considered this was unnecessary given there is already a reference to them and a link in place for this.

283. The s42A Report recommendation in relation to amending the Overview to give relief to the submissions seeking changes.

> *Overview*
> *On the West Coast/Te Tai o Poutini a range of activities occur on the surface of rivers, streams, lagoons and lakes. These include activities that have a functional need to locate on water surfaces such as jetties and piers, recreation activities like fishing and boating and cultural activities undertaken by Poutini Ngāi Tahu.* ***Some waterbodies (both natural and artificial) also form an important resource for the generation of hydroelectricity which contributes to the wellbeing of people and communities.***
> *[ ]*
> ***• Energy, Infrastructure and Transport -The Energy, Infrastructure and Transport Chapter contains policies that are also relevant and should be assessed in relation to Energy, Infrastructure or Transport Activities that trigger resource consent under the Activities on the Surface of Water Rules.***

Hearing and Submitter Evidence/Statements

284. Ms Inta objected to the recommended addition in the Overview of '*Some waterbodies (both natural and artificial) also form an important resource for the generation of hydroelectricity'*, She noted the chapter was about activities on the surface of water whereas hydro encompasses the whole of the waterbody and the activities should be about only boats or things that float on the water.

285. Mr Kennedy, for Westpower, noted partial support of what was sought by Westpower in the Overview in the s42A Report recommendation. However, he considered that rather than giving reference to hydroelectricity under the heading of 'Strategic Objectives and Policies'

this should be relocated under 'Other Relevant Te Tai Poutini Plan provisions'. He considered this would provide consistency across the whole document.

286. Ms Styles, on behalf of Manawa, acknowledged the recommended amendment in the s42A Report to the provisions in the Overview and agreed with this recommendation.

287. Ms Pull, on behalf of Poutini Ngāi Tahu, opposed the recommended reference to the policies of the Energy, Infrastructure and Transport Chapter and suggested a revised wording, as follows:

> ***Energy, Infrastructure and Transport – The Energy, Infrastructure and Transport chapters contain provisions that manage Energy, Infrastructure and Transport activities and potential reserve sensitivity.***

Reporting Officer Reply Evidence

288. Ms Easton's Right of Reply made no changes to the recommendations to the Overview shown in Appendix 1 of the s42A Report.

Hearing Panel's Evaluation

289. The Panel notes that Ms Inta did not specifically submit on the ASW Overview but opposed the s42A Report recommendation based on the proposed wording of the additional sentence. The Panel are conscious that the wording of the additional sentence proposed is different to that requested by Westpower (S547.395) and that Ms Inta did not have the opportunity to make a further submission on the recommended wording. The Panel accepts this recommended wording is alternative relief to the submission point but consider it could not be anticipated by submitters.

290. While the Panel agrees that activities on the surface of water can and do provide benefits for the community and environment, there is no statutory direction in the RMA or RPS to '*recognise and provide*' for surface water activities that provide benefits. The Panel agrees that any benefits are relevant considerations in a consent process. The Panel considers the additional sentence wording can be improved to better reflect the amendment sought as follows:

> ***Activities on the surface of water can provide benefits and contribute to the wellbeing of people and communities.***

291. The Panel therefore partly accept Westpower's submission point (S547.395).

292. The Panel rejects the Grey District Council submission point (S608.078) seeking to remove references to SASM from the Chapter and accepts Poutini Ngāi Tahu's further submission (FS41.020). The Panel agrees that identifying SASM recognises and provides for RMA s6(e) and (f) matters of national importance.

293. The Panel accept Ms Easton's recommendation to add reference to the EIT chapters as shown in the Right of Rely.

Hearing Panel's Recommendation

294. For the reasons outlined above, and subject to our considerations of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in footnotes below are accepted or accepted in part, and recommends the following changes to the **ASW Overview**:

Overview

On the West Coast/Te Tai Poutini a range of activities occur on the surface of rivers, streams, lagoons and lakes. These include activities that have a functional need to locate on water surfaces such as jetties and piers, recreation activities like fishing and boating and cultural activities undertaken by Poutini Ngai Tahu. **Activities on the surface of water can provide benefits and contribute to the wellbeing of people and communities.**[93]

The provisions in this chapter manage the effects of activities on the surface of water. Many of the activities that occur on the surface of water have few effects (e.g. occasional recreational boating or sailing). Other more permanent activities such as structures have potential to generate adverse effects which could compromise important water values (such as the natural character, ecological, cultural, amenity and recreational values of waterbodies).

Other Relevant Te Tai Poutini Plan provisions.

- Natural Character and the Margins of Waterbodies- Many activities on the surface of water may also involve activities in the riparian margin if the adjacent riverbank or lakeside.
- Provisions for managing activities next to waterbodies are found in the Natural Character and the Margins of Waterbodies Chapter.
- Sites and Areas of Significance to Māori. – Many rivers and lakes have a high degree of significance to Poutini Ngai Tahu and are identified in Schedule Three Sites and Areas of Significance to Māori, where rivers or lakes are included within Schedule three the Sites of Significance to Māori provisions also apply.
- **Energy, Infrastructure and Transport - The Energy, Infrastructure and Transport Chapter contains policies that are also relevant and should be assessed in relation to Energy, Infrastructure or Transport Activities that trigger resource consent under the Activities on the Surface of Water Rules.**[94]

Other relevant regulations

The responsibility for managing the effects of activities on the bed of waterbodies lies with the West Coast Regional Council and are managed through the West Coast Regional Land and Water Plan.

3.2 ASW Objectives

Submissions and Further Submission.

295. Twelve submission points and one further submission point relating to the **Objective ASW-01** were summarised in a table on pages 81-82 of the 42A Report. Seven submission points sought

[93] Westpower Limited (S547.394 and S542.395)
[94] Westpower Limited (S547.396)

to retain the Objective as notified and five submission points sought amendments, with one further submission point opposing the request to delete references to SASM.

Section 42A Report

296. The s42A Report supported the amendments sought by the Director General (S602.129) to add '*landscape, natural feature*' to include to the landscape and natural features values of the district's waterbodies.

297. The s42A Report did not support amendments sought by Jet boating NZ to add '*more than minor adverse effects*'; or addition of a new objective as sought be Westpower (S547.397) and William Mc Laughlin (S567.340) given the current objective expressed the direction sought by the TTPP Committee and community during the plan development phase. It agreed with the further submission from Poutini Ngāi Tahu (FS41.054) that the benefit of activities and structures on surface water are considered in any consent process.

Hearing and Submitter Evidence

298. Mr Kennedy, for Westpower, sought to include a new objective to recognise and provide for the benefits of activities on the surface of water, with a focus on regionally significant infrastructure (**RSI**) activities that have a need to locate on the surface of water given this is acknowledged in the Overview section. He considered this was relevant given the potential benefits to the community need to be acknowledged in the Plan. Given the rejection of a new objective, he suggested the following amendment:

> *ASW-O1 – The ecological …. and lagoons are;*
> *a. Protected from the adverse effects of activities and structures on the surface of water, or*
> *b.* ***In the case of RSI activities and structures with an operational or functional need to locate on the surface of water adverse effects are managed.***

299. Mr Kennedy suggested with this amendment to the objective, the new objective requested (S547.397) would be more appropriately expressed as a new policy as follows:

> ***ASW-PX – The benefits of RSI activities and structures which have an operational or functional need to locate on the surface of water are recognised and provided for.***

300. Mr Malcolm Smith, on behalf of Jet Boating NZ, sought consideration in the objective to recognise that minor and less than minor adverse effects may be acceptable in some circumstances.

Reporting Officer Reply Evidence

301. Ms Easton made no changes to her recommendation on Objective ASW-01 from Appendix 1 of the s42A Report in her Right of Reply.

Hearing Panel's Evaluation

302. The Panel accepts Ms Easton's recommended amendments to Objective ASW-01 and accepts the Director General's submission point (S602.129); and recommends the changes to the

Objective as shown in the Right of Reply. However, the Panel considers the addition should be '*natural landscape and features*' to use language consistent with RMA s6(a).

303. The Panel has considered the need for a new objective or second limb to ASW-01 to recognise and provide for the benefits of activities on the surface of water, as requested by Westpower. The Panel agrees with Ms Easton that the benefits of any proposed activities would be considered in a consent process.

304. The Panel rejects the requested wording for a new objective (Westpower S547.397 and William McLaughlin S567.340) because there is no statutory direction to '*recognise and provide for*' the benefits of activities on the surface of water; and accepts Poutini Ngāi Tahu's further submission in opposition (FS41.054).

305. The Panel has also considered the alternative relief sought by Mr Kennedy and his change in focus to the operation or functional need for RSI to locate on the surface of water. The Panel rejects this alternative relief because it goes beyond the scope of the new objective sought in the original submission (S547.397).

306. The Panel also rejects Westpower's submission point (S547.398) to reword the Objective and considers adding '*are appropriately managed*' increases uncertainty.

Hearing Panel's Recommendation

307. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in footnotes below are accepted or accepted in part, and recommends the following amendments to **Objective ASW-O1**:

ASW-O1
The ecological, recreational, natural character, **natural landscape and features,**[95] amenity and Poutini Ngāi Tahu values of the District's rivers, lakes and lagoons are protected from the adverse effects of activities and structures on the surface of water.

3.3 ASW Policies

Submissions and Further Submissions

308. A total of sixteen submission points and eight further submission point were received relating to the policies as a whole and individual policies were summarised in a Table on pages 83-85.

309. Six submission points and one further submission point related to the **policies as a whole**. Four submission points sought to retain the policies as notified and two submission points sought additional wording to the policies and one further submission point opposed the alternative wording sought.

[95] Director General of Conservation S602.129

310. One submission point was received in relation to **Policy ASW-P1** sought to retain the policy as notified.

311. Five submission points and two further submission points were received relating to **Policy ASW-P2**. Three submission points sought to retain the policy as notified and two submission points sought amendments. Two further submission points opposed these amendments.

312. Four submission points and five further submission points were received relating to **Policy ASW-P3**. Two submission points sought to retain the policy as notified, and two submission points sought amendments. Four further submission points supported amendments, and one further submission opposed an amendment sought.

Section 42A Report

313. The s42A Report did not support submissions seeking a new policy specifically providing for energy and Infrastructure on the surface of water, including critical infrastructure, due to technical, locational, functional or operational constraints or requirements (Chris J Coll Surveying Limited S566.275 and Westpower S547.399). It also did not support giving a blanket policy support for infrastructure without consideration of the values or effects to give effect to Part 2 of the RMA.

314. In relation to **Policy ASW-P1**, the s42A Report acknowledged the support for the policy from Te Mana Ora. It recommended no changes to Policy ASW-P1 as notified.

315. In relation to **Policy ASW-P2**, the s42A Report acknowledged the support from Jet Boating New Zealand, Poutini Ngāi Tahu, and Te Mana Ora. for ASW-P2.

316. The s42A Report did not support the submission point from the Lake Māhingapua Aquatic Club in relation to ASW-P2 to exclude the Club's motorised watercraft use of Lake Māhingapua where it conflicts with Poutini Ngāi Tahu values. She highlighted the RMA s6 requirement to recognise and provide for the relationship of Māori and their culture and traditions within their ancestral lands, water sites waahi tapu and other taonga as a matter of national importance. She noted that specific waterbodies, including Lake Māhinapua, are identified as SASM and where access by motorboat is considered inappropriate by Poutini Ngāi Tahu.

317. The s42A Report did not support the amendment sought by Forest & Bird (S560.525) to delete the word '*significantly*' from Policy ASW-P2 given the policy recognises that some use of motorised watercraft is used for biosecurity, health and safety and monitoring services. The Panel considers the preservation of natural character and the protection of the values in ASW-01 requires the avoidance of more than minor adverse effects. As worded, the Policy enables adverse effects up to a level where it does not significantly impacting these values. The Panel considers the Policy should only enable activities that have no more than minor effects to be consistent with the RMA s6 and the RPS (Chapter 7A Policy 4).

318. In relation to **ASW-P3**, the s42A Report acknowledged the support from Poutini Ngāi Tahu and Te Mana Ora. It supported the four further submissions indicating that the plan provisions do

not explicitly provide for commercial port activities for the Greymouth and Buller Ports. It noted that the TTPP Committee were undertaking consultation with the community over a draft variation to the Plan to specifically address this concern.

319. Ms Easton did not support the submission from Forest & Bird to delete the word '*significantly*' from ASW-P3 as per the reasons outlined above in relation to ASW-P2..

320. Ms Easton did not support the submission from Westpower Limited seeking to alter the first paragraph of ASW-P3 to refer to (avoids, remedies or mitigates) as this would change the direction of the policy to be much more enabling of commercial activities and structures.

Hearing and Submitter Evidence

321. Mr Kennedy on behalf of Westpower Limited sought the addition of a new policy to provide for matters that are proposed to be regulated through the Rules for which there are no relevant objectives or policies. He recommended the following:

> *ASW-PX Provide for energy and infrastructure activities including RSI and structures which have a functional need or operational need to occur on the surface of water where adverse effects are avoided, remedied or mitigated.*

322. Mr Kennedy noted that if there is an intent to regulate activities which have a need to locate on the surface of water they should be provided with a relevant policy.

323. Mr Malcolm Smith representing Jet Boating New Zealand further reiterated their support for ASW-P2 as notified.

324. Ms Pull on behalf of Poutini Ngāi Tahu further reiterated their support for ASW-P3 as notified.

Reporting Officer Reply Evidence

325. There was no additional comment in relation to the policies from the Ms Easton.

Hearing Panel's Evaluation

326. The Panel accepts the amendment sought by Forest & Bird (S560.525) to delete the word '*significantly*' from Policy ASW-P2. We acknowledge that the intent of the policy is to provide for non-commercial use of motorised watercraft for biosecurity, health and safety and monitoring services. However, we consider that deleting '*significant*' without qualification would require the protection from all adverse effects.

327. The Panel considers the preservation of natural character and the protection of the values in ASW-01 would not be achieved by '*not impact significantly*' in relation to natural character, ecosystems, biodiversity, and Poutini Ngāi Tahu values. As worded, the Policy would enable adverse effects up to a level less than 'significantly' impacting these values. The Panel considers this is contrary to the direction of RMA s6 and the RPS (Chapter 7A Policy 4).

328. RPS Chapter 7A Policy 4 directs '*Allow activities which have no more than minor adverse effects on natural character.*' It is clear that the policy intent is to have permitted activity status for activities that have no more than minor effects.

329. Overall, the Panel finds preservation and protection national directives are not supported by enabling activities with less than significant (i.e. '*not impact significantly*') and can only be given effect to by enabling activities with no more than minor effects. The Panel considers this is consistent with the permitted activity rule framework; and where adverse effects are more than minor, the rule framework enables the assessment of effects through the resource consent process.

330. The Panel notes that Variation 1 – Activities on the Surface of Water to the Plan inserts a new policy into the ASW Chapter enabling the use of ports. The evaluation of this is addressed in the recommendation report for Variation 1. The recommendation to include ASW-P4 is included below.

Hearing Panel's Recommendation

331. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in footnotes below are accepted or accepted in part, and recommends the following changes to the **ASW Policies**:

Activities on the Surface of Water Policies
ASW - P1
Enable the non-commercial use of non-motorised watercraft on rivers, lakes and lagoons.
ASW - P2
Enable the non-commercial use of motorised watercraft on rivers, lakes and lagoons on the West Coast where this does not **have more than minor adverse effects**~~impact significantly~~[96] on natural character, ecosystems and biodiversity values, Poutini Ngāi Tahu values, public access, amenity or disruption of natural quiet.
ASW - P3
Provide for commercial activities and structures on the surface of West Coast/Te Tai o Poutini rivers, lakes and lagoons provided that the activity does not create: a. Adverse effects on: i. Significant natural heritage values including identified scheduled sites; ii. Cultural and spiritual values including sites and areas of significance to Māori; iii. Poutini Ngāi Tahu values and in particular as relate to culturally significant rivers and lakes; b. ~~Significant~~**More than minor**[97] adverse effects on: i. Amenity values; ii. Ecological values;

[96] Royal Forest and Bird Protection Society of New Zealand Inc (S560.525)
[97] Royal Forest and Bird Protection Society of New Zealand Inc (S560.525)

iii. Natural character;
iv. Other recreational uses; and
c. Cumulative adverse effects with any other structures or activities on the surface of waterbodies.

ASW – P4

Enable the use of the Port of Greymouth and Westport Harbour Ports and Westport Harbour Ports and their use of the Māwheranui/Grey and Kawatiri/Buller Rivers for port activities and commercial activities associated with the ports.[98]

3.4 ASW Rules

Submissions and Further Submissions.

332. Eight submission points and four further submission point relating to the **ASW Rules as a whole** were summarised on page 86-87 of the s42A Report. Six submission points sought to retain the rules as notified and two submission points sought amendments. Four further submission points opposed the amendments sought.

333. No submissions were received on **Rule ASW-R1**.

334. Eight submission points and five further submission points relating to **Rule ASW-R2** were summarised on page 87-89 of the s42A Report. Eight submissions sought amendments to the rule; and four further submissions opposed the amendments requested and one further submission supported in part an amendment.

335. One submission seeking an amendment to the heading of **Rule ASW-R3** was summarised on page 89 of the s42A Report.

336. Five submission points and three further submission points relating to **Rule ASW-R4** were summarised on pages 89-90 of the s42A Report. Five submission points sought amendments to the rule and two further submission points opposed the amendments requested and one further submission point supported in part an amendment requested.

337. Three submission points and two further submission points relating to **Rule ASW-R5** were summarised on pages 90-91 of the s42A Report. One submission point sought to retain the rule as notified and two submission points sought amendments to the rule. One further submission point supported in part an amendment and one further submission opposed an amendment.

338. Five submission points and six further submission points relating to **Rule ASW-R6** were summarised on pages 91-92 of the s42A Report. Five submission points sought amendments to the rule and one further submission point supported an amendment. Four further submission points opposed an amendment requested and one further submission point was neutral.

[98] New rule inserted by for Variation 1 – Activities on the Surface of Water of the TTPP. See the Recommendation Report on Variation 1

339. Three submission points and two further submission points relating to **Rule ASW-R7** were summarised on page 92 of the s42A Report. Three submission points sought amendments to the rule and two further submission points opposed the amendments sought.

340. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

Section 42A Report

341. In relation to **Rule ASW-R2**, the s42 Report considered that including reference to the lakes and waterbodies currently included in the Buller District Plan may be appropriate given these waterbodies have a high state of naturalness and ecological values, and are located within areas of high natural character or outstanding natural landscapes. However, it invited the submitters requesting these changes to provide more information at the hearing.

342. The s42A Report did not support the deletion of the 'Makaawhio River and Kaimata/New River' from the rule, as requested by Jet Boating New Zealand (S161.003), given the low loss of recreational amenity compared to a high degree of cultural benefit by including these rivers in the rule.

343. The s42A Report supported in part an amendment to the Rule to include motorised craft on Lake Māhinapua for the setting of buoys and the direction of regattas and club sailing. It considered the best approach was to provide a specific exemption to the rule for the regattas of the Lake Māhinapua Aquatic Club rather than a general exemption for motorised craft. It noted a further submission by Poutini Ngāi Tahu opposed this request, and encouraged dialogue between the two submitters to reach agreement. It suggested the best approach may be a specific number of days that such an activity can occur and suggested the following wording:

> *'Use of Lake Māhinapua for the yachting regattas and club sailing associated with the Lake Māhinapua Aquatic Club where the craft are propelled by a motor but not exceeding a speed of 5 knots.'*

344. The s42A Report supported a new clause, as sought by Poutini Ngāi Tahu (S620.196), to include 'Mātauranga Māori Monitoring' because this better enabled them to undertake their kaitiaki role.

345. The s42A Report did not support including suction dredging in the rule (Mineral West Coast (S569.031) given the potential to have significant effects on natural character and cultural values in rivers and lakes that are at particular risk of adverse effects.

346. The s42A Report supported Te Tumu Paeroa's request (S440.038) to add a new clause, as follows:

> ***'Access to landlocked parcels where primary and physical access is only achieved through crossing the waterway'***

347. The s42A Report did not consider restricting this to just the landowner, as sought in further submissions by Poutini Ngāi Tahu (FS41.058) would reasonable.

348. In relation to **Rule ASW-R3**, the s42A Report supported adding 'and waterways' to the heading, as requested by Westpower (S547.403). However, it recommended '*and artificial waterways*' in the interests of clarity.

349. In relation to **Rule ASW-R4**, the s42A Report supported adding '*These are temporary Mai Mai installed for the purposes of lawful gamebird hunting',* as requested by Fish and Game (S302.006); but also recommended adding a timeframe as requested by the Grey District Council (SFS1.081) *'provided these are removed within 2 weeks of the end of the game season*'. It noted the same approach is recommended for Rule NC-R2.

350. The s42A Report supported an amendment to make it clear that whitebait stands should also be '*temporary*' (Poutini Ngāi Tahu S620.197) and noted that this was a drafting error. It also supported the request to move the reference to written approval from Poutini Ngāi Tahu to an Advice Note.

351. The s42A Report supported including '*the laying of temporary marker buoys by the Lake Māhinapua Aquatic Club Inc. on Lake Māhinapua during the sailing season of October to April*' (Lake Māhinapua Aquatic Club S332.002). It noted this would be consistent with section 3.4.7 of the Lake Māhinapua Management Plan.

352. The s42A Report did not support the deletion of '*temporary swimming platforms installed for a single swimming season'* (Director General S602.131) and invited the submitter to provide more information at the hearing.

353. The s42A Report did not support Westpower's requests (S547.504 and S547.508) to add two new permitted activity rules because it would duplicate the regulation of activities already controlled by the WCRC. It noted the rule provides for a very limited range of structures as permitted activities, given the WCRC regulates activities in the beds of rivers to address different matters in relation to their regional function.

354. The s42A Report supported improving clarity for existing energy activities and infrastructure structures given the different approach to existing use rights under Section 10A of the RMA than occurs for existing structures and activities on land. It considered it is appropriate that the rule specifically provides for existing lawfully established energy and infrastructure structures.

355. In relation to **Rule ASW-R5**, the s42A Report supported the request to add a new matter of control '*Management of effects on ecological, biodiversity and conservation values*' (Director General S602.132). It noted the further submission (BDC FS149.127) supported this addition but did not support making temporary swimming platforms subject to the rule. It invited the submitter to provide more information at the hearing on their reasoning why they consider

temporary swimming platforms need consent (Director General S602.134), and why they consider that the activity status should be discretionary through the addition of a new rule.

356. In relation to **Rule ASW-R6**, the s42A Report did not support the submissions (Buller Conservation Group S552.125 and Frida Inta S553.125) seeking to extend the list of waterbodies in relation to those where commercial activities are not acceptable because no information was provided regarding which waterbodies such an extension should apply to or why.

357. The s42A Report noted the further submission (West Coast Bulk Logistics Limited FS152.003) seeking a new rule to allow for vessel activities on the surface of rivers associated with Port Operations. It noted this would be covered in Variation 1 to the Plan.

358. The s42A Report supported moving the reference to '*Written Approval form the Poutini Ngāi Tahu Rūnanga*' from the rule to an Advice Note (Poutini Ngāi Tahu S620.199).

359. The s42A Report did not consider the amendment to specifically exclude suction dredging (Tiga Minerals and Metals Limited (S493.068) was necessary given this activity would fall under the definition of 'Industrial Activity', not 'Commercial Activity'.

360. The S42A Report supported inclusion of the following additional matter of discretion: 'Effects on Ecological, biodiversity and conservation values' (Director General S602.133) and considered it was appropriate these matters are considered in any assessment.

361. In relation to **Rule ASW-R7**, the s42AReport supported the amendment sought by Poutini Ngāi Tahu for the reference to limited notification be to Poutini Ngāi Tahu, however, it noted that limited notification clauses are no longer lawful. She proposed an amendment to the clause as follows:

> *When making notification decisions in relation to this rule, the council will be informed by advice from Poutini Ngāi Tahu and should the application be notified it will be served on the relevant Poutini Ngāi Tahu Rūnanga.*

362. The s42A Report did not support the amendment by Tiga Minerals and Metals Limited to exclude suction dredging activities because suction dredging has the potential to have significant effects on natural character and cultural values in rivers and lakes, which is appropriately assessed through a resource consent process.

363. The s42A Report did not consider the amendments to the rule proposed by Forest & Bird to be an improvement to the clarity of the rule but supported the submission in part given a minor amendment to the rule was recommended.

Hearing and Submitter Evidence/Statements

364. Ms Inta, for herself Buller Conservation Group, sought inclusion of the list of sites currently identified in the Buller District Plan that restrict motorised craft to be added to the list in the TTPP. She highlighted the s42A Report agreed that these such waterbodies are highly natural

with high ecological values. She suggested an addition to the ruling stating '*Motorised craft are only allowed on lakes accessible by formed road and exclude the lakes listed in the current Buller Plan'*.

365. Ms Inta requested further restrictions to limit motorised craft to 1/3 of the length of the river and to restrict such craft to the lower reaches of rivers. She also proposed the following additional wording to ASW-R4:

> *(1) These are temporary whitebait stands installed in accordance with West Coast whitebait Fishing regulations and are removed within 2 weeks of the end of the whitebait season*
> *(2) These are temporary mai mai installed for the purposes of lawful gamebird hunting provided these are removed within 2 weeks of the end of the game bird season.*

366. Ms Inta also sought to include the list of restricted waterbodies in the current Buller District Plan to be included in ASW-R5.

367. Mr Kennedy, for Westpower, sought to add '*The plan currently regulates watercraft, structures and commercial activities*' to the note regarding '*Activities on the surface of Water rules'*. He considered this would simplify interpretation and application of the rules for Plan users.

368. Mr Kennedy noted concern regarding the s42A Report comment '*If there are activities that should be identified as non-complying, I prefer that a specific rule is included and invite the Department of Conservation to provide information on this at the hearing'* and the implications of this given there was little information and it would be unclear how other submitters on the rules could provide further input. He considered that such a process would normally occur through a further submission process.

369. Ms Young, for the Director General, provided comment on the request to include all swimming platforms in Rule ASW-R5 and indicated she was not aware of any instances where temporary swimming platforms had caused concern, as verified by checking with local DOC staff. She agreed s42A Report recommendation that temporary swimming platforms should be under Rule ASW-R4 and permanent swimming platforms should be considered under Rule ASW-R5. She also agreed that a non-complying activity catch all rule is not appropriate for swimming platforms and agreed permanent swimming platforms should remain a controlled activity.

370. Ms Pull, for Poutini Ngāi Tahu, addressed their further submission (FS41.058) on Te Tumu Paeroa's submission (S440.038) on ASW-R2 for the use of waterbodies to access landlocked parcels of land. She noted support for addressing past errors such as landlocked parcels preventing the use and development of Māori land. She highlighted the two alternatives outlined in the further submission – enabling access on a case by case basis or limiting access to the landowner only. Given the s42A Report recommendation, she recommended limiting the rule to Māori Land to minimise potential effects and replacement of the terms used as follows:

> *Access to **Māori Land that is** a landlocked ~~parcels~~ **site** where primary and physical access is only achieved through crossing the ~~waterway~~ **waterbody***

371. Ms Pull supported the s42A Report recommendation for Rules ASW- R2 and ASW-R4 but sought the following amendments to Rule ASW-R4(4) and to the Advice Note on ASW-R6:

> *Written approval is **recommended** from the relevant Poutini Ngāi Tahu Rūnanga-Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio. **In relation to** Lake Māhinapua, written approval from Te Rūnanga o Ngāi Tahu **in addition** to Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio is recommended.*

372. After the hearing, Ms Pull provided a supplementary statement of evidence regarding use of Kaimata/New River for jet boating. She advised the cultural experts, Mr Paul Madgwick and Mr Francois Tumahai, were comfortable with the approach identified by Jet Boating New Zealand to use an alternative entry point for jet boating on Kaimata/New River above the State Highway bridge; and that Poutini Ngāi Tahu have no further opposition under further submission FS41.051 on S161.003 by Jet Boating New Zealand, in relation to Rule ASW-R2 and Kaimata/New River. Ms Pull advised that opposition to the removal of Makaawhio River from Rule ASW-R2 remained.

373. Mr Smith, on behalf of Jet Boating NZ, noted they had sought the exclusion of the Makaawhio River (Jacobs River) and the Kaimata/New River from Rule ASW-R2 but that after further consideration and looking at the reality of difficult access around the lower reaches of the Makaawhio River, they now accepted the proposed restriction on this river. In relation to the Kaimata/New River, Mr Smith noted the river afforded high recreational jet boating values when conditions are suitable, and they wanted to retain the use of the river. He noted they had given consideration to using another access points to the river, rather than using the lagoon, and had attempted to consult with Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu but that no response had been received. Mr Smith noted they were keen to pursue an outcome where the river can be shared by users.

374. After the hearing, Jet Boating NZ provided a further statement of evidence supporting the supplementary evidence of Ms Pull and advised of agreement with Poutini Ngāi Tahu that recreational jet boating activities on Kaimata/New River, above the State Highway bridge, will not have more than minor effects.

375. Ms Helen Brosnan, for the West Coast Fish and Game Council, sought a minor amendment to the drafting of Rule ASW-R2(1)(b) and requested that '*and*' in the middle line be replaced with '*or*', so it cannot be read as requiring any motorised watercraft use on the listed rivers to be for both sportfish and gamebird management at the same time. She also indicated that reference to '*Fish and Game New Zealand'* should be changed to *'West Coast Fish and Game Council'* as they are a separate legal identity. In conclusion, she supported the inclusion of a permitted activity rule for temporary mai mai and suggested a suitable maximum size, if the Panel considered it appropriate.

376. Mr Dean Kelly, for West Coast Fish and Game Council, provided a statement of evidence outlining the reasons for the use and role of mai mai for game bird hunting.

377. Mr Dean Van Mierlo presented legal submission on behalf of West Coast Fish and Game Council. He clarified the land status surrounding Lake Māhinapua and indicated support for the s42A Report recommendation regarding to mai mai structures.

378. Mr Rob Daniel, for the Lake Māhinapua Aquatic Club, outlined the Club's establishment in 1943 and its activities and use of Lake Māhinapua for sailing regattas. He noted the Club sought to continue 80+ years of sailing without resource consents or approval from Poutini Ngāi Tahu. He requested all activities be permitted, including recognition of the existing eight permanent marker buoys and use of motorised watercraft travelling more than 5 knots for health and safety during regattas.

Reporting Officer Reply Evidence

379. In her Right of Reply, Ms Easton recommended that Rule ASW-R4 should refer to the existing eight permanent marker buoys used by the Lake Māhinapua Aquatic Club given these had no existing use rights. She also proposed an amendment to ASW-R2 to allow boats used by the Lake Māhinapua Aquatic Club to exceed 5 knots of speed for search and rescue activities, as outline by Mr Daniel at the hearing.

380. In response to the questions from the Panel relating to defining whitebaiting as a 'Commercial Activity', Ms Easton recommended adding an Advice Note stating that Rule ASW-R6 does not apply to whitebaiting.

381. Ms Easton recommended the following further amendments highlighted in yellow in Appendix-Updated Appendix 1 of the Right of Reply:

> ***ASW -R2*** *Use of Motorised Watercraft for Non-commercial Use on the Surface of Rivers Lagoons and Lakes.*
>
> *Activity Status Permitted*
>
> *Where;*
>
> *1. This does not occur on the surface of Lake Mahinapua or Mahinapua Creek/Tuwharewhare, Waitangroto River, Makawhio river, Arahura River, Kaimata/New River, Makatata Stream or Saltwater Lagoon(at Paroa) except*
> *a As provided for in an Iwi/Papatipu Runanga Management Plan for these awa, roto and hapua; or*
> *b Where the activity is for:*
> *i Matauranga Maori Monitoring;*
> *ii Scientific investigations or monitoring;*
> *iii Law enforcement;*
> *iv Search and Rescue work;*
> *v Conservation work undertaken by the Department of Conservation in respect of their duties under the Conservation Act 1987, Wildlife Act 1953 or Fisheries Act 1983;*

vi The control and management of sports fish (as defined in the Conservation Act 1987) and game (as defined in the first schedule of the Wildlife Act 1953) by fish and Game New Zealand;

vii Biosecurity work carried out by the West coast Regional Council or Fish and Game New Zealand;

viii Access to landlocked parcels where primary and physical access is only achieved through crossing the waterbody; or

*ix Use of Lake Mahinapua for the yachting regattas and club sailing associated with the Lake Mahinapua Aquatic Club during the sailing season of October to April where the craft are propelled by a motor but not exceeding a speed of 5 knots**, except in an emergency response.***

ASW-R4 *Installation of Structures on the Surface of Natural Waterbodies*

Activity Status Permitted

Where:

a. These are temporary whitebait stands installed in accordance with the West Coast Whitebait Fishing Regulations

b. These are temporary maim ai installed for the purposes of lawful gamebird hunting provided these are removed within two weeks of the end of the game bird season;

c. These are temporary swimming platforms installed for a single swimming season; or

d. These are structure installed by Poutini Ngai tahu that are identified in an Iwi/Papatipu Runanga Management Plan for Arahura River, Mkaawhio River, Waitangiroto River, Mahinapua Creek/Tuwharewhare, Makatata Stream or Lake Mahinapua ~~and have written approval of the relevant Poutini Ngai Tahu Runanga Te Runanga o Ngati Waewae or Te Runanga O makaawhio~~

*e. This is ~~the laying of temporary~~ marker buoys **used** by the Lake Mahinapua Aquatic Club Inc on Lake Mahinapua **~~during sailing season October to April~~** or*

f. This is the operation, maintenance and repair of existing structures where this is of the same or similar scale and intensity as of 14 July 2022.

Advice Note:

For the avoidance of doubt this rule does not apply to whitebaiting activities on the surface of water.

Hearing Panel's Evaluation

382. The Panel accepts Ms Easton's recommendation to retain **Rule ASW-R1**, as notified.

383. In relation to **Rule ASW-R2**, the Panel notes that Ms Easton's recommendations do not reflect the agreement between Jet Boating NZ and Poutini Ngāi Tahu to delete Kaimata/New River, above the State Highway Bridge from Rule ASW-R2 and the consequential amendment to Rule ASW-R6. The Panel accepts the restriction on motorised watercraft use should only apply to below the State Highway bridge in the Saltwater Lagoon, which is identified as a Site and Area

of Significance to Māori. The Panel recommends the reference to Kaimata/New River is deleted from the Rule ASW-R2 and Rule ASW-R6.

384. The Panel accept the evidence of the West Coast Fish and Game Council that it is a separate legal entity to Fish and Game New Zealand and that the references to the Fish and Game New Zealand in Rule ASW-R2(1)(v) and (vi) should be corrected. The Panel notes there is no specific submission point from West Coast Fish and Game Council seeking this relief but accept this is a minor correction.

385. The Panel agrees with Ms Easton's recommendation to add '*Mātauranga Māori monitoring*' and accept Poutini Ngāi Tahu's submission point (S620.196).

386. The Panel agrees with Ms Easton's recommendation to add '*Access to landlocked parcels where primary and physical access is only achieved through crossing the waterbody'* and to accept Te Tumu Paeroa' submission point (S440.038). The Panel does not agree this should be restricted to Māori Land only or to landowners only, as recommended by Ms Pull, for Poutini Ngāi Tahu. The Panel accepts Ms Easton's recommendation to use the terms '*parcels'* and '*waterbody*'.

387. The Panel agrees with Mr Easton's recommendation to add '*Use of Lake Māhinapua for the yachting regattas and club sailing associated with the Lake Māhinapua Aquatic Club Incorporated during the sailing season of October to April where the craft are propelled by a motor but not exceeding a speed of 5 knots except in an emergency response'* (Neville Higgs S329.001). However, the Panel considers '*craft*' should be replaced with '*watercraft*' given the inclusion of a new definition. The Panel is satisfied this addresses the concerns raised at the hearing by Mr Daniel.

388. The Panel notes there is no information from the Buller District Council regarding Ms Inta and Buller Conservation Group's requests to add the lakes included in the Buller District Plan to ASW-R2. We do not consider this is appropriate without further analysis.

389. The Panel accepts Ms Easton's recommendation to amend **Rule ASW-R3** to add '*and Artificial Watercourses'* (Westpower S547.403)

390. In relation to **Rule ASW-R4**, the Panel accepts Ms Easton's recommendations to add '*temporary*' to clause (1) (Poutini Ngāi Tahi SS620.197) and a new clause *'These are temporary mai mai installed for the purposes of lawful gamebird hunting'* (West Coast Fish and Game Council S302.006).

391. The Panel notes Ms Inta's request at the hearing for use of the same rule wording for the removal of temporary whitebait stands and for temporary mai mai, and her view that these structures should be removed after the season ends. Although the Panel notes Ms Inta did not make a specific submission point on ASW-R4, we agree that consistency is important in relation to enabling temporary seasonal activities and the clauses should be similar for temporary mai mai and whitebait stands. The Panel considers adding a requirement to

remove these structures two weeks after the season ends addresses the submission point (S620.197) seeking to ensure these are temporary.

392. The Panel notes Ms Easton's updates to Rule ASW-R4 and ASW-R5 did not include the amendments sought by Ms Pull in evidence. The Panel has considered the wording proposed by Ms Pull for a new advice note (4) stating that written approval from the relevant rūnanga is recommended given the deletion of written approval from clause (4). We consider it is appropriate for the advice note to state that consultation with the relevant rūnanga is recommended given written approval cannot be required for a permitted activity.

393. The Panel accepts Ms Easton's recommendation to add new clause (5) addresses the concerns raised by the Lake Māhinapua Aquatic Club Incorporated (S332.002) to provide for the existing maker buoys on the surface of Lake Māhinapua and agree this does not need to be limited to a specific period. However, the Panel recommends replacing '*This is marker buoys'* with '*These are marker buoys*' to correct the grammar.

394. The Panel accepts Ms Easton's recommendation to include a new clause '*This is the operation, maintenance and repair of existing structures where this is of the same or similar scale and intensity as of 14 July 2022*' to address Westpower's request (S547.0508) for a new permitted activity. However, we have simplified the wording, as addressed above in relation to the NC rules. We consider a new permitted activity for structures on the bed would duplicate Regional Council functions.

395. The Panel notes Ms Young's agreement that temporary swimming platforms should not be deleted from ASW-R4 (Director General S602.131) and permanent swimming platforms should be under Rule ASW-R5.

396. New **Rule ASW-4A**, as inserted by Variation 1 – Activities on Surface Water to the TTPP is shown in the recommendations below. This is addressed in the Recommendation Report on TTPP Variation 1.

397. In relation to **Rule ASW-R5**, the Panel agrees with Ms Easton's recommendation to add '*Management of effects on ecological, biodiversity and conservation values'* (Director General of Conservation S602.132); and to add an Advice Note to ASW-R6 giving clarity to whitebaiting being exempt from this Rule.

398. The Panel notes Ms Young's evidence for the Director General confirmed agreement that permanent swimming platforms should be considered under Rule ASW-R5 as controlled activities.

399. In relation to **Rule ASW-R7**, the Panel accepts Ms Easton's recommended changes to make the heading of the rule clearer and to reflect wording requested by Poutini Ngāi Tahu.

400. The Panel accepts Ms Easton's recommendation to reject the request from TiGa Minerals and Metals Limited (S493.069) to not include suction dredges as a permitted activity given the

potential for significant adverse environmental effects, in the absence of parameters. However, the Panel notes there is a significant gap in the rule framework in relation to commercial activities on waterbodies not listed in Rule ASW-R6 (which are the identified sensitive waterbodies) with the default activity status being discretionary for those commercial activities.

Hearing Panel's Recommendations

401. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in footnotes below are accepted or accepted in part, recommends that Rule ASW-R1 is retained as notified, the addition of new Rule ASW – R4A and the following changes to Rule ASW-R2, Rule ASW-R3, Rule ASW-R4, Rule ASW-R5, Rule ASW-R6 and Rule ASW-R7, as follows:

Activities on the Surface of Water	
Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.	
Permitted Activities	
ASW-R1	**Use of Non-motorised Watercraft for Non-Commercial Use on the Surface of Rivers, Lagoons and Lakes**
Activity Status Permitted Advice Note: Use of non-motorised watercraft for temporary events on the surface of waterbodies within Sites and Areas of Significance to Māori are also subject to Rule SASM-R5 Activity status where compliance not achieved: N/A	
ASW-R2	**Use of Motorised Watercraft for Non-Commercial Use on the Surface of Rivers, Lagoons and Lakes.**
Activity Status Permitted. Where: 1. This does not occur on the surface of Lake Māhinapua or Māhinapua Creek/Tuwharewhare, Waitangiroto River, Makaawhio River, Arahura River, Kaimata/New River **below the State Highway bridge**,[99] Makatata Stream or Saltwater Lagoon (at Paroa) except: a. As provided for in an Iwi/Papatipu Runanga Management Plan for these awa, roto and hāpua; or b. Where the activity is for: i **Mātauranga Māori monitoring**; [100] ii Scientific investigations or monitoring;

[107] West Coast Fish and Game Council S302.006
[108] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.197

5. **These are marker buoys used by the Lake Māhinapua Aquatic Club Incorporated on Lake Māhinapua; or**[109]
6. **This is the operation, maintenance and repair of existing lawfully established structures as of 14 July 2022.** [110]

Advice Note**s**:

1. Whitebait stands are primarily regulated by the West Coast Regional Council through the West Coast Regional Land and Water Plan.
2. Where structures are proposed on the surface of waterbodies check the Natural Character and the Margins of Waterbodies provisions to determine whether consent is required for the landward portion of the structure located in any riparian margin.
3. Where structures are proposed on the surface of waterbodies within Sites and Areas of Significance to Māori these are also subject to Rule SASM - R6 in the Sites of Significance to Māori Chapter.
4. **Consultation with the relevant Poutini Ngāi Tahu rūnanga - Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio is recommended. In relation to Lake Māhinapua consultation with Te Rūnanga o Ngāi Tahu in addition to Te Rūnanga o Ngāti Waewae and Te Rūnanga o Makaawhio is recommended.** [111]
5. **For the avoidance of doubt this rule does not apply to whitebaiting activities on the surface of water.** [112]

Activity status where compliance not achieved: Controlled where standard ~~2~~**3** is not complied with. Discretionary where standards 1, **2, 4, 5** and ~~3~~**6** are not complied with.[113]

ASW – R4A Use of Watercraft for Commercial Activities and Port Activities on the Surface of Water[114]

Activity Status: Permitted

Where: This is the use of the surface of water for commercial activities on water and other Port Activities

1. **Associated with Port of Greymouth and harbour, and seaward of the State Highway 6 Bridge on the Māwheranui/Grey River, and including within the Erua Moana Lagoon; or**
2. **Associated with Westport Harbour Port and harbour, and seaward of the State Highway 67 Bridge on the Kawatiri/Buller River.**

Activity status where compliance not achieved: Restricted Discretionary.

Controlled Activities

ASW-R5 Permanent Swimming Platforms on the Surface of Natural Waterbodies

Activity Status Controlled

[109] Lake Māhinapua Aquatic Club Incorporated S332.002
[110] Westpower S547.0508
[111] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.197
[112] RMA First Schedule clause 16(2) clarification
[113] Consequential amendment as a result of changes to the rule.
[114] New rule added by Variation 1 to the TTPP – Activities on the Surface of Water. See Variation 1 Recommendation Report.

1 Where this does not occur in the Arahura River, Makaawhio River, Makatata Stream or Lake Māhinapua.

Matters of control are:

a. Size, design and location of structure
b. Water safety measures.
c. Compliance with any Iwi/Papatipu Runanga Management plan or where this does not exist advice from the relevant Poutini Ngāi Tahu Rūnanga- Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio; ~~and~~
d. Management of effects on natural character of the waterbody and its margins; **and**
e. Management of effects on ecological, biodiversity and conservation values.[115]

Activity status where compliance not achieved: Discretionary

Restricted Discretionary Activities

ASW-R6 Commercial Activities on the Surface of Rivers, Lagoons and Lakes and not associated with Westport Harbour Port and Port of Greymouth

Activity Status Restricted Discretionary

Where:

~~1.~~ Any commercial activity on the Makaawhio River, Arahura River, Lake Māhinapua, Māhinapua Creek/Tumwharewhare, Makatata Stream, Saltwater Lagoon (at Paroa), Waitangiroto River or Kaimata New River is in accordance with an Iwi-Papatipu Runanga Management plan ~~and has approval of the relevant Poutini Ngai Tahu Runanga Te Runanga o Ngati Waewae or Te Runanga o Makaawhio.~~ [116]

Discretion is restricted to:

a. Effects on public access and recreational use of the waterbody;
b. Effects on landscape, natural features or natural character of the waterbody and its margins;
c. Effects on the amenity values or any adjacent residential activities;
d. Effects on significant natural or historic heritage values including effects on scheduled sits or areas;
e. Effects on ecological, biodiversity and conservation values; [117]
f. Effects on noise of the natural character, ecological and amenity values; and
g. Effects on Poutini Ngāi Tahu cultural values including access to mahinga kai and scheduled sites and areas.

Advice Note**s**:

1. Where activities are proposed on the surface of waterbodies within Sites and Areas of Significance to Māori these **are**[118] also subject to rules in the Sites and Areas of Significance to Māori Chapter.

APPENDIX 1 RECOMMENDATIONS

Definitions

RIPARIAN MARGIN

means all land within:

e. 10m of any wetland **that is located in the coastal marine area**;
f. 20m of any lake; and
g. 10m of any ~~stream or~~ river with an average bed width greater than 3m; **and**
h. **3m of any river with an average bed width greater than 1m and less than 3m**.

As measured from the point of annual fullest flow for a river or annual fullest water level for a lake or mean high water springs for a coastal wetland.

Advice Note: Activities within 10m of a natural inland wetland are regulated under the NESF and administered by the West Coast Regional Council.

WATERCRAFT

means a boat or other vessel that travels on water. This excludes fixed structures on water and use for residential activities.

In relation to the Activities on the Surface of water provisions motorised watercraft means a watercraft that is operated or propelled by a motor.

BANK

means the land on either side of a river which confines the natural flow of the water whether the normal flow, or flood flows.

FULLEST FLOW

means the maximum amount of flow or highest water level that can occur without the river water overtopping the banks and beginning to flow over the flood plain.

Natural Character and the Margins of Waterbodies Chapter

OVERVIEW

Waterbodies and their margins are an important part of the West Coast/Te Tai Poutini. Waterbodies are connected (**~~K~~k**i uta ki tai**,** from the mountains to the sea) and have important values, including for biodiversity, cultural**, recreational** or historical reasons.

Under section 31 of the RMA district councils are responsible for the management of activities on land, including the margins of waterbodies. **Natural Character and the margins of waterbodies require protection as a matter of national importance under Section 6(a) of the RMA. Te Tai o Poutini Plan also manages activities on the surface of waterbodies**.

The West Coast Regional Council has responsibility for the management of wetlands, lakes and rivers**,** including land uses in the beds of rivers. This section of Te Tai o Poutini Plan focuses on the natural

character of the margins of wetlands, lakes and rivers**,** thereby avoiding duplication with Regional Council functions.

The three district council**s** work with the West Coast Regional Council and Poutini Ngāi Tahu to ensure waterbodies are managed in an integrated way.

Poutini Ngāi Tahu have a special relationship with the mauri of waterbodies and ancestral, cultural spiritual or historical associations with waterbodies. Many waterbodies in the West Coast/TeTai o Poutini are identified as statutory acknowledgement area**s** and there are also nohoanga entitlements in place in some locations. These waterbodies contain~~er~~ associated ~~kainga~~**kāinga**, ~~pa~~ **pā,** important sites for the gathering of kai, **t**~~T~~auranga ika and specialised zones for various activities of high cultural value**,** such as cleansing, iriiringa, food preparation and bathing, which continue to be vital to the wellbeing, livelihood and lifestyle of Poutini Ngāi Tahu.

Rivers, streams, lakes and wetlands have important ecological, natural character**, recreational** and hydrological values**.** ~~t~~**T**hey provide important habitat for native plants, fish, birds, lizards, frogs, insects and aquatic and terrestrial macroinvertebrate aquatic life **and opportunities for access to and along waterways.**

Some waterbodies (both natural and artificial) also form an important resource for the generation of hydroelectricity, which contributes to the wellbeing of people and communities.

The National Policy Statement for Freshwater Management 2020 (NPSFM) guides decision-making regarding the freshwater resources of New Zealand/Aotearoa. In particular**,** the councils must have regard to its objectives and policies in consent decision-making.

The Resource Management (National Environmental Standard for Freshwater) Regulations 2020 (NESF) has specific rules which relate to freshwater, in particular in relation to activities in the margins of freshwater wetlands. **These rules relate to the regional functions of the West Coast Regional Council and are administered by that organisation. The provisions in Te Tai o Poutini Plan have been developed considering the NESF and what additional provisions are required to fulfil the statutory functions of the district councils in relation to natural character of waterbodies. The Tai o Poutini Plan provisions in relation to riparian margins of wetlands only relate to wetlands in the coastal marine area to avoid duplication with the NESF**.

~~Plantation~~ **Commercial** Forestry

~~Plantation~~**Commercial** forestry is principally regulated by the Resource Management (National Environmental Standard for ~~Plantation~~**Commercial** Forestry) Amendment Regulations 2023 (NES-~~P~~**C**F). However the NES-~~P~~**C**F allows that district plans can be more stringent where this gives effect to an objective in the National Policy Statement for Freshwater Management. Where provisions within this chapter over-rule the requirements of the NES-~~P~~**C**F an advice note to that effect is included within the rule.

Other relevant Te Tai o Poutini Plan provisions.

It is important to note that in addition to the zone chapters a number of District **w**~~W~~ide and Overlay chapters also contain provisions that may be relevant for waterbodies, including:

- Public Access - The Public Access Chapter contains provisions relating to the provision and maintenance of public access to waterbodies.
- Subdivision - The Subdivision Chapter contains provisions which manage subdivision and specific standards in relation to the provision of esplanade reserves and strips, in particular SUB- S9
- Activities on the Surface of water – The Activities on the Surface of Water Chapter contains provisions that mange activities that occur on the surface of water.
- Coastal Environment – The Coastal environment Chapter contains provisions that manage the natural character of the coastal environment.
- Earthworks - The Earthworks Chapter includes provisions around earthworks management. **These relate to requirements for earthworks within zones and include general standards for earthworks. These rules apply in addition to rules on earthworks within the Natural Character of Waterbodies Chapter.**
- **Ecosystems and Indigenous Biodiversity – The Ecosystems and Indigenous Biodiversity Chapter contains provisions around vegetation clearance, including in the margins of waterbodies.**
- **Energy, Infrastructure and Transport - The Energy, Infrastructure and Transport Chapter contains policies that are also relevant and should be assessed in relation to energy infrastructure or transport activities that trigger resource consent under Natural Character of Waterbodies Rules.**

Also ~~**view**~~ the Strategic Objectives and Policies

Advice Note:
Other Relevant Government Bodies
Aside from regional and local government there are other key agencies and government groups involved in the integrated management of waterbodies. These include:

- **Department of Conservation;**
- **West Coast Fish and Game Council**
- **NZ Landcare Trust;**
- **Catchment care and other restoration groups; and**
- **Herenga ā Nuku Aotearoa, the Outdoor Access Commission.**

Natural Character and the Margins of Waterbodies Objectives

NC - 01

To preserve the natural character of lakes, rivers and wetlands and their margins ~~while providing for~~ **and the protection of them from in**appropriate subdivision, use and development ~~where adverse effects can be avoided or mitigated~~.

NC – 02

To recognise and provide for the relationship of Poutini Ngāi Tahu and their traditions, values and interests associated with the natural character of lakes, rivers and wetlands and their margins. notified.

NC – 03

To provide for activities which have a functional need to locate in the margins of lakes, rivers and wetlands ~~in such a way that the impacts~~ **while ensuring adverse effects** on natural character are minimised.

NC-P1

Avoid, remedy or mitigate adverse effects on the natural character of the riparian margins of lakes, rivers and wetlands by ensuring that subdivision, **development** and land use maintains the elements, patterns and processes that contribute to their natural character.

NC-P2

Provide for ~~indigenous vegetation removal and~~ earthworks within riparian margins of lakes, rivers and wetlands where ~~significant~~ adverse effects on natural character are ~~minimised as far as practicable~~ **avoided, remedied or mitigated** and:

a. It is for the purpose of natural hazard mitigation; or

b. It is for the maintenance, repair, upgrade and extension of network utilities, and **regionally significant** infrastructure including the national grid; or

c It is for the establishment, operation, maintenance or upgrading of renewable electricity generation **actvities**~~structures~~ or **regionally significant** infrastructure where this has a functional or operational need to be located in a riparian margin; or

d It is for Poutini Ngāi Tahu ~~cultural~~ ~~**purposes**~~**Activities or Māori Purpose Activities in accordance with an Iwi/Papatipu Rūnanga Management Plan;** or

e It is for the repair and maintenance of legally established structures; or

f. The activity has a functional ~~or operational~~ need to be located adjoining a waterbody.

NC-P3

Provide for **new** buildings and structures **and the upgrading of existing buildings and structures** within riparian margins of lakes, rivers and wetlands where these:

a. Have a functional need for their location; and

b. They are of a form and scale that will not adversely ~~effect~~ **affect** the natural character of the riparian ~~area~~**margin**.

NC-P4

Encourage the restoration and enhancement of the natural character of the riparian margins of lakes, rivers and wetlands **including pest plant and pest animal control.**

Advice Note:

The objective and policy in the Public Access Chapter should also be considered when assessing resource consents in relation to activities in the margins of waterbodies.

~~**NC-P5**~~

~~Reduction in public access to waterbodies can be considered when natural hazard mitigation works are required to protect communities from a significant natural hazard threat. When assessing proposals for natural hazard structures, effects on public access should be considered and ways to minimise them found, including:~~

~~c. Provision of alternate certain and enduring access; and~~

~~d. Provision of public amenity or opportunity for environmental benefit along the structure, provided that the physical integrity of the~~ structure ~~is maintained.~~

Natural Character and the Margins of Waterbodies Rules

Note: There may be a number of plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this chapter as well as rules in other chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of these identified rules. Details of the steps Plan users should take to determine the status of an activity are provided for in General Approach.

Permitted Activities

NC - R1 ~~**Indigenous Vegetation Clearance and**~~ **Earthworks within the Riparian Margin of a River, Lake or Wetland**

Activity status Permitted

1. Where this is outside of any Significant Natural Area identified in Schedule Four and for:

a. Fence lines; or
b. Maintenance, operation, minor upgrade and repair of network utilities ~~critical~~ **regionally significant** infrastructure or renewable electricity generation activities; **or**
c. **New network utilities and regionally significant infrastructure where these are underground and located within a formed legal road or attached to an existing bridge; or**
d. Connections to wastewater, stormwater and reticulated network utility systems **and underground energy and infrastructure connections**; or
e. Installation of an environmental monitoring and extreme weather event monitoring facility; or
f. Maintenance and repair of lawfully established structures; or
g. The construction of parks facilities, parks furniture or public access points within an Open Space and Recreation Zone; or
h. The establishment of a river crossing point up to 3m wide; or
i. Poutini Ngāi Tahu Activities; or
j. Activities on Māori Purpose Zoned Land **or a site of significance to Māori in Schedule Three** and **is** undertaken in accordance with an Iwi/Papatipu Rūnanga Management Plan; or
k. **Maintenance and repair of lawfully established natural hazard mitigation structures; or**

l. **New** ~~N~~natural hazard mitigation ~~actvities~~ **structures and upgrading of existing natural hazard mitigation structures** undertaken by a statutory agency or ~~their nominated~~ **authorised** contractor **acting on its behalf; or**
m. **Clearance of pest plants and pest animals for biosecurity purposes; or**
n. **Arable, horticultural or pastoral farming use where this activity is lawfully established at 14 July 2022**; **and**

~~2. The amount of indigenous vegetation clearance is not greater than 20m^2 per 200m length of Riparian Margin;~~
3. The amount of earthworks is not greater than **25**~~20~~m^3 per 200m length of Riparian Margin; **and**
4. All earthworks stockpiles are located outside of the riparian margin of the waterbody**.**~~; and~~
5. ~~Unless carried out by a statutory agency or their nominated contractor responsible for natural hazard mitigation, the clearance and earthworks are not located within areas used and identified for natural hazard mitigation structures~~.

Advice Notes:

1. Rules in other Overlay Chapters particularly Historic Heritage, Sites and Areas of Significance to Māori, Natural Hazards and Natural Features and Landscapes may also apply in these locations.
2. **Also refer to Rules in the Energy, Infrastructure and Transport Chapters for activities in relation to those matters.**
3. Activities within the margins of waterbodies and wetlands are also the subject of regulation under the NES Freshwater, NPS Freshwater **Management** and the West Coast Regional Land and Water Plan.
4. This Rule also applies to ~~plantation~~ **commercial** forestry activities, where this provision is more stringent than the NES-**C**~~P~~F.

Activity status where compliance not achieved: Discretionary

NC - R2 Buildings and Structures within the Riparian Margin of a River, Lake or Wetland

Activity Status Permitted

Where the buildings and structures **have a functional need to locate in the riparian margin and** are:

a. Network utilities **and regionally significant infrastructure; or**
b. Temporary whitebait stands **and temporary mai mai for game bird hunting provided these are removed within two weeks of the end of the season**; **or**
c. Environmental monitoring facilities**; or**
d. Parks facilities and parks furniture within an Open Space and Recreation Zone**; or**
e. Natural Hazard mitigation structures constructed by a statutory agency or **authorised** ~~nominated~~ contractor **acting on its behalf**; or
f. Renewable energy generation **activities**~~facilities where these have a functional need to locate within the riparian margin~~; or
g. Stormwater discharge structures and water supply intake structures constructed in accordance with NZS 4404 Code of Practice for Land Development and Subdivision Infrastructure**; or**

h. Temporary bridges constructed as part of a temporary military training activity; or
i. Pump sheds, less than 5m^2.

Advice Notes:
1. Rules in other Overlay Chapters particularly Historic Heritage, Sites of Significance to Māori, Natural Hazards and Natural Features and Landscapes may apply in these locations.
2. **Activities within the margins of waterbodies and wetlands are also the subject of regulation under the NES Freshwater, NPS Freshwater Management and the West Coast Regional Land and Water Plan.**

Activity status where compliance not achieved: Discretionary

~~**NC-R3 New Natural Hazards Mitigation Structures**~~

~~Activity Status Permitted~~

~~Where:~~
~~1. These are constructed by a Statutory Agency or their authorised contractor~~

~~Activity status where compliance not achieved: Discretionary~~

Restricted Discretionary Activities

NC-R~~3~~3 Natural Hazard Mitigation Structures within the Riparian Margin of a River, Lake or Wetland not meeting Permitted Activity Rules

Activity Status: **Restricted** Discretionary

Discretion is restricted to:
a. Design and location of the structure;
b. Visual impact of the structure; and
c. Methods to avoid, remedy or mitigate adverse effects on natural character or public access.

Activity status where compliance not achieved: N/A

Discretionary Activities

NC-R~~3~~4 ~~Indigenous Vegetation Clearance and~~ Earthworks within the Riparian Margin of a River, Lake or Wetland not meeting Permitted Activity Rules

Activity Status: Discretionary

Advice Note**s**:

1. This rule also applies to ~~plantation~~ **commercial** forestry activities, where this provision is more stringent than the NES-**C**~~P~~F.
2. The NES-Freshwater has extensive regulation around works that can be undertaken in or near any natural **inland** wetland. These rules are administered by the West Coast Regional Council and are not repeated in this Plan.

Activity status where compliance not achieved: N/A

NC R45 Buildings and Structures within Riparian Margin of a River, Lake or Wetland not meeting Permitted Activity Rules

Activity Status: Discretionary

~~**NC R5 Natural Hazard Mitigation Structures not meeting Permitted Activity Standards**~~

~~Activity Status: Discretionary~~

~~Activity status where compliance not achieved: N/A~~

Public Access Chapter– Te Āheinga Tūmatanui

~~**NC P5**~~**PA-P1**

Reduction in public access to waterbodies can be considered when natural hazard mitigation works are required to protect communities from a significant natural hazard threat or when required for public safety due to the operational requirements of regionally significant infrastructure. When assessing proposals ~~for natural hazard structures~~, effects on public access should be considered and ways to minimise them found, including:

a. Provision of alternate certain and enduring access; and

b. Provision of public amenity or opportunity for environmental benefit along the structure, provided that the physical integrity of the structure is maintained.

Activities on the Surface of Water Chapter

Overview

On the West Coast/Te Tai Poutini a range of activities occur on the surface of rivers, streams, lagoons and lakes. These include activities that have a functional need to locate on water surfaces such as jetties and piers, recreation activities like fishing and boating and cultural activities undertaken by Poutini Ngai Tahu. **Activities on the surface of water can provide benefits and contribute to the wellbeing of people and communities.**

The provisions in this chapter manage the effects of activities on the surface of water. Many of the activities that occur on the surface of water have few effects (e.g. occasional recreational boating or sailing). Other more permanent activities such as structures have potential to generate adverse effects which could compromise important water values (such as the natural character, ecological, cultural, amenity and recreational values of waterbodies).

Other Relevant Te Tai Poutini Plan provisions.

- Natural Character and the Margins of Waterbodies- Many activities on the surface of water may also involve activities in the riparian margin if the adjacent riverbank or lakeside.
- Provisions for managing activities next to waterbodies are found in the Natural Character and the Margins of Waterbodies Chapter.
- Sites and Areas of Significance to Māori. – Many rivers and lakes have a high degree of significance to Poutini Ngai Tahu and are identified in Schedule Three Sites and Areas of Significance to Māori, where rivers or lakes are included within Schedule three the Sites of Significance to Māori provisions also apply.
- **Energy, Infrastructure and Transport - The Energy, Infrastructure and Transport Chapter contains policies that are also relevant and should be assessed in relation to Energy, Infrastructure or Transport Activities that trigger resource consent under the Activities on the Surface of Water Rules.**

Other relevant regulations

The responsibility for managing the effects of activities on the bed of waterbodies lies with the West Coast Regional Council and are managed through the West Coast Regional Land and Water Plan.

ASW-O1

The ecological, recreational, natural character, **natural landscape and features,** amenity and Poutini Ngāi Tahu values of the District's rivers, lakes and lagoons are protected from the adverse effects of activities and structures on the surface of water.

Activities on the Surface of Water Policies

ASW - P1

Enable the non-commercial use of non-motorised watercraft on rivers, lakes and lagoons.

ASW - P2

Enable the non-commercial use of motorised watercraft on rivers, lakes and lagoons on the West Coast where this does not **have more than minor adverse effects**~~impact significantly~~ on natural character, ecosystems and biodiversity values, Poutini Ngāi Tahu values, public access, amenity or disruption of natural quiet.

ASW - P3

Provide for commercial activities and structures on the surface of West Coast/Te Tai o Poutini rivers, lakes and lagoons provided that the activity does not create:

a. Adverse effects on:
i. Significant natural heritage values including identified scheduled sites;
ii. Cultural and spiritual values including sites and areas of significance to Māori;
iii. Poutini Ngāi Tahu values and in particular as relate to culturally significant rivers and lakes;
b. ~~Significant~~**More than minor** adverse effects on:
i. Amenity values;
ii. Ecological values;
iii. Natural character;
iv. Other recreational uses; and
c. Cumulative adverse effects with any other structures or activities on the surface of waterbodies.

ASW – P4

Enable the use of the Port of Greymouth and Westport Harbour Ports and Westport Harbour Ports and their use of the Māwheranui/Grey and Kawatiri/Buller Rivers for port activities and commercial activities associated with the ports.

Activities on the Surface of Water

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.

Permitted Activities

ASW-R1 Use of Non-motorised Watercraft for Non-Commercial Use on the Surface of Rivers, Lagoons and Lakes

Activity Status Permitted

Advice Note: Use of non-motorised watercraft for temporary events on the surface of waterbodies within Sites and Areas of Significance to Māori are also subject to Rule SASM-R5

Activity status where compliance not achieved: N/A

ASW-R2 Use of Motorised Watercraft for Non-Commercial Use on the Surface of Rivers, Lagoons and Lakes.

Activity Status Permitted.

Where:

1. This does not occur on the surface of Lake Māhinapua or Māhinapua Creek/Tuwharewhare, Waitangiroto River, Makaawhio River, Arahura River, Kaimata/New River **below the State Highway bridge**, Makatata Stream or Saltwater Lagoon (at Paroa) except:

a. As provided for in an Iwi/Papatipu Runanga Management Plan for these awa, roto and hāpua; or
b. Where the activity is for:
i **Mātauranga Māori monitoring**;
ii Scientific investigations or monitoring;
iii Law enforcement;
Iv Search and rescue work;
v Conservation work undertaken by the Department of Conservation in respect of their duties under the Conservation Act 1987, Wildlife Act 1953 or Fisheries Act 1983;
vi The control and management of sports fish (as defined in the Conservation Act 1987) **or**~~and~~ game (as defined in the first schedule of the Wildlife Act 1953) by **West Coast** Fish and Game **Council** ~~New Zealand~~; ~~or~~
vii Biosecurity work carried out by West Coast Regional Council or **West Coast** Fish and Game **Council** ~~New Zealand~~;
viii **Access to landlocked parcels where primary and physical access is only achieved through crossing the waterbody; or**
ix **Use of Lake Māhinapua for the yachting regattas and club sailing associated with the Lake Māhinapua Aquatic Club Incorporated during the sailing season of October to April where the watercraft are propelled by a motor but not exceeding a speed of 5 knots except in an emergency response.**

Activity status where compliance not achieved: Discretionary

ASW-R3	**Installation of Structures on the Surface of Artificial Lakes and Ponds and Artificial Watercourses**

Activity Status Permitted.

Activity status where compliance not achieved: N/A

ASW-R4	**Installation of Structures on the Surface of Natural Waterbodies**

Activity Status Permitted
Where:
1. These are **temporary** whitebait stands installed in accordance with the West Coast Whitebait Fishing Regulations **and are removed within two weeks of the end of the whitebait season; or**
2. **These are temporary mai mai installed for the purposes of lawful gamebird hunting provided these are removed within two weeks of the end of the game bird season; or**
3. These are temporary swimming platforms installed for a single swimming season; or
4. These are structures installed by Poutini Ngāi Tahu that are identified in an Iwi/Papatipu Runanga Management Plan for Arahura River, Makaawhio River, Waitangiroto River, Māhinapua Creek/Tuwharewhare, Makatata stream or Lake Māhinapua; ~~and have written approval of the relevant Poutini Ngai Tahu Runanga Te Runanga o Ngati WaeWae or Te Runanga o Makaawhio;~~ **or**
5. **These are marker buoys used by the Lake Māhinapua Aquatic Club Incorporated on Lake Māhinapua; or**
6. **This is the operation, maintenance and repair of existing lawfully established structures as of 14 July 2022.**

Advice Note**s**:

6. Whitebait stands are primarily regulated by the West Coast Regional Council through the West Coast Regional Land and Water Plan.
7. Where structures are proposed on the surface of waterbodies check the Natural Character and the Margins of Waterbodies provisions to determine whether consent is required for the landward portion of the structure located in any riparian margin.
8. Where structures are proposed on the surface of waterbodies within Sites and Areas of Significance to Māori these are also subject to Rule SASM - R6 in the Sites of Significance to Māori Chapter.
9. **Consultation with the relevant Poutini Ngāi Tahu rūnanga - Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio is recommended. In relation to Lake Māhinapua consultation with Te Rūnanga o Ngāi Tahu in addition to Te Rūnanga o Ngāti Waewae and Te Rūnanga o Makaawhio is recommended.**
10. **For the avoidance of doubt this rule does not apply to whitebaiting activities on the surface of water.**

Activity status where compliance not achieved: Controlled where standard ~~2~~**3** is not complied with. Discretionary where standards 1, **2, 4, 5** and ~~3~~**6** are not complied with.

ASW – R4A Use of Watercraft for Commercial Activities and Port Activities on the Surface of Water

Activity Status: Permitted

Where: This is the use of the surface of water for commercial activities on water and other Port Activities

1. **Associated with Port of Greymouth and harbour, and seaward of the State Highway 6 Bridge on the Māwheranui/Grey River, and including within the Erua Moana Lagoon; or**
2. **Associated with Westport Harbour Port and harbour, and seaward of the State Highway 67 Bridge on the Kawatiri/Buller River.**

Activity status where compliance not achieved: Restricted Discretionary.

Controlled Activities

ASW-R5 Permanent Swimming Platforms on the Surface of Natural Waterbodies

Activity Status Controlled

1 Where this does not occur in the Arahura River, Makaawhio River, Makatata Stream or Lake Māhinapua.

Matters of control are:

a. Size, design and location of structure
b. Water safety measures.

c. Compliance with any Iwi/Papatipu Runanga Management plan or where this does not exist advice from the relevant Poutini Ngāi Tahu Rūnanga- Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio; ~~and~~
d. Management of effects on natural character of the waterbody and its margins; **and**
e. Management of effects on ecological, biodiversity and conservation values.

Activity status where compliance not achieved: Discretionary

Restricted Discretionary Activities

ASW-R6 Commercial Activities on the Surface of Rivers, Lagoons and Lakes and not associated with Westport Harbour Port and Port of Greymouth

Activity Status Restricted Discretionary

Where:

~~1.~~ Any commercial activity on the Makaawhio River, Arahura River, Lake Māhinapua, Māhinapua Creek/Tumwharewhare, Makatata Stream, Saltwater Lagoon (at Paroa), Waitangiroto River or Kaimata New River is in accordance with an Iwi-Papatipu Runanga Management plan ~~and has approval of the relevant Poutini Ngai Tahu Runanga Te Runanga o Ngati Waewae or Te Runanga o Makaawhio.~~

Discretion is restricted to:

a. Effects on public access and recreational use of the waterbody;
b. Effects on landscape, natural features or natural character of the waterbody and its margins;
c. Effects on the amenity values or any adjacent residential activities;
d. Effects on significant natural or historic heritage values including effects on scheduled sits or areas;
e. Effects on ecological, biodiversity and conservation values;
f. Effects on noise of the natural character, ecological and amenity values; and
g. Effects on Poutini Ngāi Tahu cultural values including access to mahinga kai and scheduled sites and areas.

Advice Note**s**:

1. Where activities are proposed on the surface of waterbodies within Sites and Areas of Significance to Māori these **are** also subject to rules in the Sites and Areas of Significance to Māori Chapter.
2. **Written approval is recommended from the relevant Poutini Ngāi Tahu rūnanga - Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio. In relation to Lake Māhinapua, written approval from Te Rūnanga o Ngāi Tahu in addition to Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio is recommended**.

Discretionary Activities

ASW – R7 Use of Motorised Watercraft for Non - Commercial Use, Commercial Activities, and Structures on the Surface of Water not ~~meeting Permitted, Controlled or Restricted Discretionary Activity~~ provided for in another rule~~Rules~~

Activity Status Discretionary

Notification: ~~Any activity not provided for in an Iwi/Papatipu Rūnanga Management Plan for Makaawhio River, Arahura River, Lake Māhinapua, Māhinapua Creek/Tuwharewhare, Waitangiroto River, Makatata Stream Saltwater Lagoon (at Paroa) or Kaimata/New River always be limited notified to the relevant Poutini Ngāi Tahu rūnanga and may be publicly notified.~~ **When making notification decisions in relation to this rule, the Council will be informed by advice from Poutini Ngāi Tahu and should the application be notified, it will be served on the relevant Poutini Ngāi Tahu rūnanga.**

Activity status where compliance not achieved: N/A

Amendments to Planning Maps

Amend the zoning maps so that waterbodies are identified as General Rural Zone.

APPENDICES

Appendix 1 – Recommendations

Appendix 2 – Amendments to Schedule Five

Appendix 3 - Amendments to Outstanding Natural Landscapes

PART A – INTRODUCTORY MATTERS

1. PRELIMINARY MATTERS

1.1. Introduction

1. Matters to do with our appointment and other preliminary matters applicable to all Hearing Panel's recommendations on the Proposed Te Tai o Poutini Plan (**pTTPP** or 'the Plan') are recorded and addressed in Recommendation Report 1.

2. This Recommendation Report relates to the Natural Features and Landscapes - Ngā Āhua me ngā Horanuku Aotūroa (**NFL**) chapter of the pTTPP; and contains the Hearing Panel's evaluations and recommendations to the TTPP Committee on the submissions and further submissions received on this section in Part 2, Schedules 5 and 6 in Part 4 and the planning maps locating these landscapes and features of the Plan.

3. The Section 32 Report[1] provided an evaluation of the options for the management of Outstanding Natural Features and Landscapes through the combined Plan, including the regulatory framework, key resource management issues, the evidence base (research and basis for identifying Outstanding Natural Landscapes and Features (**ONFL** or **ONL** and **ONF**), consultation, information and analysis undertaken) and evaluation of the options.

4. The Section 42A Officer's Report[2] ('s42A Report'), authored by Ms Lois Easton, a planner with Kererū Consultants acting as the Reporting Officer, was circulated prior to the hearing. The s42A Report provided an analysis of submissions and further submissions received; and made recommendations on changes to the notified plan provisions (the changes were included in Appendix 1 and the recommendation on all submissions as to either accepted, accepted in part or rejected in Appendix 2).

5. Ms Easton subsequently provided an Addendum s42A Report[3], which responded to a Landscape Report[4] prepared by Ms Bridget Gilbert, who had reviewed the ONL originally identified in the West Coast districts by Mr Stephen Brown of Brown NZ Ltd and provided expert landscape comment in response to specific ONL related submissions on the pTTPP. As a result, the Addendum Report recommended a number of amendments to ONL boundaries. Ms Gilbert was available to us to answer questions on her report during the hearing.

6. The s42A Report assessed a total of 532 submissions points and 491 further submissions points on the Natural Features and Landscapes topic overall i.e. including Schedules 5 and 6 and the planning maps.

7. The matters raised by submitters were grouped in the s42A Report in relation to each of the following key issues for each of the chapter:

    - General/Whole Chapter;
    - Overview;
    - Objective;

[1] Te Tai o Poutini Plan – Section 32 Evaluation Report Five Natural Environment Values – Ngā Uara Taiao Aotūroa Ecosystems and Biodiversity -Ngā Pūnaha Rauropi me te Kanorau Koiora Natural Features and Landscapes - Ngā Āhua me ngā Horanuku Aotūroa Coastal Environment – Te Taiao o te Takutai Natural Character and Water

[2] Te Tai o Poutini Plan Section 42A Officer's Report Natural Features and Landscapes - Ngā Āhua me ngā Horanuku Aotūroa

[3] Addendum to Natural Features and Landscapes s42A Report, Response to Landscape Review Report from Bridget Gilbert, 31 January 2024

[4] Te Tai o Poutini Plan Landscape Report prepared for the West Coast Regional Council January 2024

- Policies;
- Rules;
- Subdivision within Outstanding Natural Landscapes; and
- Schedules Five and Six and the associated Planning Maps

8. This Recommendation Report follows this same structure of the s42A Report and provides a brief summary of the issues raised in submissions and further submissions, the s42A Report analysis and recommendations, submitter evidence and the Reporting Officer's reply evidence, before providing our evaluation and recommendation.

9. This Recommendation Report should be read in conjunction with the s42A Report and the tracked change version of the notified Plan provisions (attached as Appendix 1 to this Report). The tracked change version of the TTPP provisions forms an integral part of the decision and records all recommended amendments (additions and deletions) to the notified TTPP provisions made by the Panel. The tracked change version of the TTPP shows the Panel's recommended changes to the notified provisions in **bold and underlining** indicating additions and ~~strikethrough~~ indicating deletions. If there is any discrepancy between this Recommendation Report and the tracked change version of the Plan, the tracked change version of the Plan shown in Appendix 1 of this Report must prevail.

10. This Recommendation Report contains the reasons for the Panel's recommendations. These comprise either adoption of the reasoning and recommendations of the original section 42A Reports or the Reporting Officer's reply evidence (Councils' right of reply post hearing adjournment), or a specific reasoning by the Panel.

11. Where the Panel recommends the TTPP provisions should remain as notified, it is because:

    (a) The Panel has adopted the reasoning and recommendation of the s42A Report or addendum to retain the provision as notified; or

    (b) The Panel has adopted the reasoning and recommendation to retain the provision as notified as recommended in the Reporting Officer's reply evidence; or

    (c) The Panel has recommended to retain the provision as notified for reasons set out in this Recommendation Report.

12. Where there is a recommended change to a notified provision of the TTPP, it is because:

    (a) The Panel has recommended amendment to a provision for reasons set out in this Recommendation Report in response to a submission point, which the s42A Report did not recommend; or

    (b) The Panel adopted the reasoning and recommendation of the s42A Report to change the provision to that recommended in the original s42A Report; or

    (c) The Panel has adopted the reasoning and recommendation to that recommended in the Reporting Officer's reply evidence; or

    (d) A consequential change has been necessary following on from a decision in either (a), (b) or (c).

13. Where there may be a different recommendation between the s42A Report and the Reporting Officer's addendum or reply evidence (i.e., the recommendation by the Reporting Officer has changed as a result of hearing the evidence of submitters), unless the Panel decision specifically adopts the original s42A Report's reasoning and recommendations, the reasoning and recommendations in the (later) reply to evidence has been adopted and it must be taken to prevail.

14. If there are circumstances where the Panel consider that alternative relief is more appropriate than that requested in submissions and further submissions to give effect to the RMA, NZCPS, national policy statements and/or RPS, but are still within the scope of the relief sought, the relevant recommendation clearly sets out the nature of the change and the reason for the change. This is recorded in this Recommendation Report.

15. If any changes are recommended to the provisions (since the Section 32A Report was completed) a further evaluation if required pursuant to section 32AA of the RMA has been undertaken. Any such circumstances are referred to in this Recommendation Report in sufficient detail to demonstrate a further evaluation was undertaken.

16. Clause 16(2) of the First Schedule of the RMA enables the Panel to recommend amendments to alter information, where such an alteration is of minor effect, or may correct any minor errors. In the Panel's recommendations below each section considered in Part C of this Report and in the tracked change version of the notified Plan provisions (Appendix 1 of this Report) records any minor amendments.

1.2. Terminology in this Report

17. Throughout this Report, the following abbreviations will be used:

Bathurst	Bathurst Resources Limited and BT Mining Limited
BCZ	Buller Coalfield Zone
BDC	Buller District Council
CE	Coastal Environment
Councils	Buller District Council, Grey District Council, and Westland District Council
Director General	Director General of Conservation
DOC	Department of Conservation
ECO	Ecosystems and Indigenous Biodiversity
EIT	Energy, Infrastructure and Transport
Forest & Bird	Royal Forest & Bird Protection Society of NZ
GDC	Grey District Council

Hort NZ	Horticulture New Zealand
KiwiRail	KiwiRail Holdings Limited
Manawa	Manawa Energy Limited
MINZ	Mineral Extraction Zone
NES-CF	National Environmental Standards for Commercial Forestry 2023
NFL	Natural Features and Landscapes
NPSIB	National Policy Statement for Indigenous Biodiversity 2023
NPSFM	National Policy Statement for Freshwater Management 2020
NESF	National Environmental Standard for Freshwater
NESCS	Resource Management (National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health) Regulations 2011
NESCF	National Environmental Standard for Commercial Forestry
NFL	Natural Features and Landscapes
NZCPS	New Zealand Coastal Policy Statement 2010
ONF	Outstanding Natural Feature
ONFL	Outstanding Natural Features and Landscapes
ONL	Outstanding Natural Landscape
Poutini Ngāi Tahu	Te Rūnanga o Ngāi Tahu, Te Runanga o Ngāti Waewae, Te Rūnanga o Makaawhio
pTTPP	Proposed Te Tai Poutini Plan
Planning standards	National Planning Standards
RMA or the Act	Resource Management Act 1991
RPS	West Coast Regional Policy Statement

RSI	Regionally Significant Infrastructure
SNA	Significant Natural Area
SASM	Sites and Areas of Significance to Māori
Te Tumu Paeroa	The Office if the Māori Trustee
Transpower	Transpower New Zealand Limited
NZTA Waka Kotahi	NZ Transport Agency Waka Kotahi
WCRC	West Coast Regional Council
WDC	Westland District Council

1.3. Hearing Arrangements

18. The hearing was held in two parts. The first was at the RSA Hokitika, 22 Sewell Street, Hokitika on the 4 and 5 of March 2024. The second part was at the NBS Theatre, 105 Palmerston Street, Westport on the 19 March 2024. A number of submitters appeared by internet connection.

19. At the hearing, Ms Easton tabled a Planning Summary Statement to her s42A Report and an Addendum Report.

20. We received a legal opinion from Wynn Williams dated 20 June 2024 which addressed the scope of Forest & Bird's further submission (FS 34) on the Te Tai o Poutini Plan Committee's submission (S171.001) as to whether it provided scope for the Panel to make changes to the pTTPP to increase the mapped ONL areas. The advice from Wynn Williams considers the TTPP Committee submission[5] only provides scope to decrease the extent of ONL areas.

21. We received a written Right of Reply from Ms Easton on 8 January 2025, which included reply evidence from Ms Gilbert.

1.4. Appearances

22. The following submitters appeared at the hearing:

Section 42A Reporting Officer – Ms Lois Easton, Principal Consultant with Kererū Consultants Limited

Section 42A Technical Advisor – Ms Bridget Gilbert, Landscape Architect

Mr Murray Stewart for himself

Mr Vance Boyd for himself

Mitchells 2021 Limited - Mr Paul Lynch

[5] Te Tai o Poutini Plan Committee (S171.001)

Totally Tourism Limited and Skyline Enterprises Limited - Mr Sean Dent**,** Planner

Bathurst Resources Limited and BT Mining Limited
- Mr Joshua Leckie, Legal Counsel
- Ms Claire Hunter, Planner

Te Tumu Paeroa - The Office of the Māori Trustee - Ms Ngahuia Huirama, Ms Vanesa Griffiths and Ms Hannah McKinlay

Westpower Limited
- Mr Roger Griffiths, General Manager – Generation and Technology for Westpower
- Ms Sylvie Saskova, Technical Administrator, for Westpower
- Mr Martin Kennedy, Planner

Director General of Conservation ('Director General')
- Mr Matt Pemberton, Legal Counsel
- Ms Amy Young, Planner and

Mr Neil Mouat for himself

Karamea Lime Company Ltd
- Mr Geoff Volckman, Director
- Mr Leicester Murray, Landscape Architect

Mr Dean van Mierlo for himself

Ms Frida Inta for herself and on behalf of the **Buller Conservation Group**

Mr Hadley Mills for himself

Manawa Energy Limited
- Ms Stephanie Styles, Planner
- Mr James Bentley, Landscape Architect

1.5. Overview of submitter evidence and statements received

23. For those appearing at the hearing legal submissions were received from Mr Joshua Leckie for Bathurst (dated 26 February 2024) and Mr Matt Pemberton for the Director General (dated 26 February 2024).

24. For those appearing at the hearing the following evidence and/or statements were received:

(a) Ms Claire Hunter, planner for Bathurst (dated 12 February 2024);

(b) Ms Amy Young, planner for DOC (dated 12 February 2024);

(c) Ms Stephanie Styles, planner for Manawa (date 12 February 2024);

(d) Mr James Bentley, landscape architect for Manawa (date 12 February 2024);

(e) Mr Sean Dent, planner for Skyline Enterprises Limited and Totally Tourism Limited (date 12 February 2024);

(f) Mr Martin Kennedy, planner for Westpower Limited (dated 12 February 2024);

(g) Mr Leicester Murray, landscape architect for Karamea Lime Co Ltd (dated 12 February 2024);

(h) Ms Ngahuia Huirama, Ms Vanesa Griffiths and Ms Hannah McKinlay for Te Tumu Paeroa - The Office of the Māori Trustee;

(i) Mr Murray Stewart (received 4 March 2024) on behalf of himself;

(j) Mr Paul Lynch (dated 23 February 2024) on behalf of Mitchells 2021 Ltd;

(k) Mr Dean van Mierlo (dated 18 March 2024) on behalf of himself;

(l) Mr Geoff Volckman, Director (dated 11 March 2024) on behalf of Karamea Lime Co Ltd;

(m) Mr Hadley Mills (dated 19 March 2024) on behalf of himself; and

(n) Ms Frida Inta (dated 19 March 2024) on behalf of Buller Conservation Group and herself.

25. Following the receipt of the s42A Report and the Addendum to the s42A Report:

(a) Transpower advised[6] it did not intend to appear at the hearing and that the substance of the relief it had sought had been accepted by the Reporting Officer. Transpower identified two exceptions relating to NFL-P5 and NFL-R6 where it sought further amendments.

(b) Horticulture New Zealand (Hort NZ) did not attend the hearing and provided an industry statement by Ms Emily Levenson, Environmental Policy Advisor (dated 2 February 2024). Ms Levenson said Hort NZ continued to seek an amendment to NFL-R1 to provide for rural production activities to support NFL-P1, which provides for lawfully established horticultural activities in areas of ONFL.

(c) KiwiRail provided a letter[7] that confirmed it would not be filing evidence or attending the hearing. The letter indicated that KiwiRail continued to seek amendments to NFL-P1, NFL-P3 and NFL-R1, but accepted the Reporting Officer's recommendations in relation to NFL–P2, NFL–P5 and NFL–R6.

(d) Terra Firma Mining Limited (Terra Firma) provided a letter[8] confirming it would not be filing evidence and did not wish to be heard at the hearing. The letter provided responses to the Reporting Officer's recommendations on Terra Firma's submission points which were essentially in support of the changes proposed.

(e) Chris Horne, Planner on behalf of Chorus, Spark, One NZ and Forty South advised[9] that the Companies wished to record their support for the s42A recommendations in relation to all of their submissions on this topic and confirmed they would not be filing any evidence. Mr Horne noted that in terms of NFL-R8 the Reporting Officer agreed with the submission (in paragraph 274 of the s42A Report) but that the recommended change had not flowed through to paragraph 280 and Appendix 1 of the s42A Report, which he assumed was a typographical error.

[6] Letter from Rebecca Eng, Technical Lead – Policy, Transpower New Zealand Limited dated 8 February 2024.
[7] Letter from Sheena McGuire, Senior RMA Advisor, KiwiRail dated 7 February 2024
[8] Letter from Lucy Smith, Managing Director dated 19 February 2024
[9] Letter from Chris Horne, Consultant Planner dated 23 January 2024

(f) WCRC provided a letter[10] indicated that they did not wish to appear at the hearing but noted it had provided written evidence that addressed the mapping of ONL54 in relation to a Council-managed quarry and various provisions which would relate to it. WCRC sought changes to NFL-R2(2) and (2)(a) and ECO-R1 (5)(i) to address their concerns. The evidence noted that the Council still intends to relodge a Notice of Requirement seeking that designation for its assets, including quarries, be added to the pTTPP. However, it stated that if the changes sought in WCRC's submission and written evidence relating to its assets were within scope and were accepted by the Hearing Panel, the Council may not need to seek the designation.

(g) Legal Counsel for Russell Robinson and Brunner Builders Limited, Ms Kelsey Barry, filed a memorandum (dated 12 February 2024) along with a statement of evidence by Russell Robinson (dated 12 February 2024). The memorandum sought leave to present the brief in the Settlement Zone Hearing, alongside other technical evidence for the site-specific zoning.

Note: Leave was granted

26. Following the hearing the subsequent information was received as follows:

(a) Additional mapping material from Mr Mouat (dated 16 May 2024);

(b) A supplementary statement of planning evidence from Ms Styles for Manawa (dated 27 March 2024);

(c) A response on behalf of the Director General (dated 21 March 2024) from Mr Pemberton to questions from the Panel;

(d) A joint statement of position and recommendations to the Hearing Panel from Poutini Ngāi Tahu and Te Tumu Paeroa – the Office of the Māori Trust (dated 14 August 2024); and

(e) Formal withdrawal of submission point S440.031 by Te Tumu Paeroa[11] in relation to NFL-P7.

27. Following the hearing, the Panel issued a Minute (Minute 21) identifying ONL where we considered specific review, over and above the general review and refinement of all ONL boundaries discussed at the hearing, was necessary. We noted that in considering the identified ONL areas, boundaries could not be extended beyond what was notified, unless this was sought in submissions, but that ONL could be reduced from that notified.

1.6. Right of Reply

28. Ms Easton provided a written Right of Reply (dated 30 December 2024) it included an updated Appendix 1 showing tracked changes to the notified provisions (Appendix 1), a response to the ONL review by Ms Gilbert and the memorandum from Ms Alice Balme, Wynn Williams to the TTPP Committee regarding matters scope (dated 20 June 2024).

1.7. Procedural Steps and Issues

[10] Letter from Selva Selvarajah, Acting Planning Manager for West Coast Regional Council dated 2 February 2024.
[11] Letter dated 22 August 2022 to Hearing Panel from Ngahuia Huirama on behalf of Te Tumu Paeroa – the Office of the Māori Trustee

29. One procedural matter arose at this hearing, whereby Commissioner Chrystal stepped aside from hearing the submission by Mr Paul Lynch for Mitchells 2021 Limited due to a potential conflict of interest. The Panel records Commissioner Chrystal has taken no part in any recommendations on submissions from Mitchells 2021 Limited.

1.8. Site Visits

30. As part of this hearing, we undertook a number of site visits informed by responses received to Minute 21 (dated 11 April 2024) and matters raised in submissions.

PART B - STATUTORY REQUIREMENTS AND DOCUMENTS

31. Natural Features and Landscapes one of four chapters within the Natural Environment Values – Ngā Uara Taiao Aotūroa section of seven sections located in Part 2 – District-Wide Matters – Te Wāhanga 2 – Ngā Kaupapa ā-Rohe Whānui.

32. The Section 32 Report outlined the relevant statutory considerations applicable to natural features and landscapes; and the relationships between the sections of the RMA and higher order documents.

33. The section 42A Report highlighted the relevant section 6, 7 and 8 of the RMA, the New Zealand Coastal Policy Statement 2010 (NZCPS), National Policy Statement for Indigenous Biodiversity 2023 (**NPS-IB**), National Policy Statement for Renewable Electricity Generation 2011 (**NPS-REG**), Resource Management (National Environmental Standards for Electricity Transmission Activities) Regulations 2009 (**NESETA**), Resource Management (National Environmental Standards for Commercial Forestry) Amendment Regulations 2023 (**NES-CF**), and the National Planning Standards.

34. The Panel accepts the NPS-IB does not apply to the development, maintenance to the upgrade of renewable electricity generation assets and activities, and electricity transmission network assets and activities.

35. The Panel notes the NES-CF replaced the Resource Management (National Environmental Standards for Plantation Forestry) Regulations 2017 (**NES-PF**). The s42A Report highlights the NES-CF species the activity status for new plantation forestry within a Significant Natural Area (**SNA**) and Outstanding Natural Feature or Landscape (**ONFL**) must be a restricted discretionary activity. However, it does enable a district plan to have more stringent rules to give effect to the National Policy Statement for Freshwater Management (**NPS-FM**) and Policies 11, 13, 15 and 22 of the New Zealand Coastal Policy Statement (**NZCPS**).

36. Clause 10 of the First Schedule states that it is not necessary to provide decisions on individual submissions. Recommendation of the Panel are made within the scope of requested relief, either individual submissions or groups of submissions making similar requests, as specified in reasons for recommendation.

37. The National Planning Standards mandatory direction 7.21 requires provisions relating to natural features and landscapes be the Natural Feature and Landscape chapter of the Plan. We are satisfied the Plan structure is consistent with this national direction.

38. The Panel accepts the advice of Wynn Williams that the relief sought by Forest & Bird in further submission (F34) to extend ONL boundaries is outside the scope of the submission from the TTPP Committee to amend the boundaries of ONL to a lesser extent than the Brown mapping (2022).

PART C – SUBMISSIONS, EVIDENCE, EVALUATION AND RECCOMENDATIONS

2. NATURAL FEATURES AND LANDSCAPES

2.1. NFL General/Whole Chapter

Submissions and Further Submissions

39. Twenty-five submission points and 15 further submission points relating to general matters or the whole NFL chapter were summarised in a Table on pages 15-19 of the s42A Report. Seven submission points supported the provisions; one was neutral and seventeen sought amendments.

40. The Panel has considered the relevant submissions and further submissions received and adopts the summaries of each within the s42A Report.

41. In addition to these specific submission and further submission points, the Panel has considered the implications of making Plan wide changes for consistency to replace the use of 'critical infrastructure' with 'regionally significant infrastructure' within the context of the NFL Chapter.

Section 42A Report

42. The s42A Report did not support removing references to sites and areas of significance to Māori (**SASM**) given this gives effect to RMA section 6 matters of national importance.

43. In response to the submission points by Skyline Enterprises Limited to enable the development of a proposed aerial cableway, the s42A Report considered no amendment were required. It concluded such a development would require resource consent as a discretionary activity and that this was appropriate.

44. The s42A Report considered the relationship between the Energy Chapter and the NFL Chapter were clear given the statements in the overview section of those chapters. It noted these clearly state that the overlay provisions apply to energy activities, transport activities and infrastructure activities. It highlighted the national grid infrastructure did not traverse through identified ONL and had its own designation. It stated no opposition to providing a specific policy for the national grid in the NFL Chapter, subject to consideration of appropriate wording.

45. The s42A Report supported amendments to recognise the importance of energy activities and to provide for maintenance and enhancement of the generation and supply of renewable energy, including new activities.

46. The s42A Report agreed there needs to be a consistent approach across the overlays in the Plan but noted there are points of difference too.

47. In responding to submission points relating to the methodology, approach and overall extent of the ONL overlay, the s42A Report outlined the background to development of the overlay. It noted the joint 2013 landscape and natural character assessment undertaken by Stephen Brown for the Councils, the ONL and ONC maps within the coastal environment produced by WCRC in 2016 and the subsequent digitization process of the maps by the WCRC GIS planning team. It noted problems with the accuracy of the ONL boundaries due to differences in the scale of the original maps and the online maps; and modification in the intervening period of

the environment to the extent it was no longer 'outstanding'. It confirmed that a full review of the entire map set was not able to be completed until after the TTPP was notified but that the changes sought as the result of this were in the TTPP Committee's submission.

48. The s42A Report concluded the process and criteria used to assess ONL on the West Coast was consistent with the draft Te Tangi a Te Manu: Aotearoa New Zealand Landscape Assessment Guide. It noted the reassessment by the TTPP Committee and the recent review of the mapping by Ms Bridget Gilbert and concluded the methodology used was appropriate. It supported a more detailed description of the landscape values of each ONL with information available in the Brown Reports.

49. The Landscape Report concluded the updated ONL mapping (January 2024) and notified ONL Schedules were broadly in accordance with landscape assessment best practice and were generally sound. It recommended the following amendments to the notified ONL mapping and Schedules:

    (a) Include reference to SASM that coincide with ONL areas in the relevant ONL Schedule;

    (b) Incorporate any available detailed evidence on tangata whenua values on any relevant ONL Schedule;

    (c) Include clear guidance (perhaps in the preamble) that explains the reasonably high level nature of the Schedules, that the landscape values identified relate to the ONL as a whole (rather than specific sites) and other landscape values may be identified as part of an application specific landscape assessment;

    (d) Careful review by a landscape/GIS expert to ensure sizeable pastoral areas, sizeable plantation forestry areas and landscape dominated by built development are excluded from ONL areas;

    (e) ONL boundaries are 'clipped' to obvious landform and/or contiguous native vegetation cover edges in the immediate vicinity of the ONL;

    (f) Extend mapping of the southern end of ONL 5 to align with the district boundary; and

    (g) Refinement of a number of ONL boundaries in response to submissions.

50. In response to questions, Ms Gilbert considered that to be consistent with Te Tangi a Te Manu a thorough and transparent assessment of landscape values was required. She noted the Chapter would benefit from a preface statement that the assessment undertaken was quite high level and that a site-specific assessment could identify additional values. She considered the assessments undertaken were a good starting point for a further review and that landscape values could be added to the ONL Schedule.

51. The s42A Report did not support removing the overlays and disagreed that the Conservation Act provided for the protection of RMA section 6 matters of national importance. It considered land tenure was not relevant to assessing landscape values and noted land adjacent to public conservation land may form a key part of the wider landscape values. Similarly, it did not support excluding existing lawfully established activity.

52. The s42A Report noted the TTPP Committee's submission sought to excluded Treaty Settlement redress lands and original land still in the ownership of Poutini Ngāi Tahu from the ONL overlay to give effect to both section 6(b) and (e).

53. The s42A Report noted the Poutini Ngāi Tau submission sought further work to review the ONL and ONF sites against the SASM. It noted the consideration of the cultural significance was part of the Brown assessment but that no specific consultation was undertaken with Poutini Ngāi Tahu to inform the assessment. It acknowledged this was a gap and that engagement had occurred with Poutini Ngāi Tahu about how to provide for this within the ONFL schedule. In addition, an analysis of the overlap between ONL and SASM had been undertaken, and it was recommended that reference to the presence of SASM be added to the description of the relevant ONL in Schedule Five of the Plan.

54. The s42A Report recommended the notified ONL mapping be replaced with the September 2022 ONL maps by Brown Limited (as included with the TTPP Committee submission), where these cover an area less than proposed maps.

55. Ms Easton supported amending references to '*critical infrastructure*' to '*regionally significant infrastructure*' on the basis the new term is consistent with the West Coast Regional Policy statement (**RPS**). She acknowledged this matter related to other topic hearings and that any decision in terms of the NFL provisions would need to align with the decisions made on other topics.

Hearing and Submitter Evidence/Statements

56. Mr Sean Dent, for Skyline Enterprises Ltd, provided background to a proposed aerial cableway in Franz Josef Valley and indicated an intention to address the specific provisions for the NFL Chapter in the rezoning hearing in Franz Josef. Mr Dent provided comments on the s42A Report and considered the author should not put weight on the processing and outcome of the Department of Conservation's (**DOC**) draft Management Plan to provide for an Amenities Area for the proposal. He sought a provision of an Amenities Area through the Plan's zoning to enable the development, subject to the Department of Conservation's process under the Conservation Act and the National Parks Act.

57. Skyline Enterprises Ltd also presented evidence to the Panel at the Franz Josef Special Purpose and Settlement Zones hearing held in Franz Josef on 8 October 2024. The Panel's recommendations in relation to Skyline Enterprises Ltd submissions requesting a special zone are addressed in the Recommendation Report for the Special Purpose Zones.

58. Ms Stephaine Styles, for Manawa Energy Limited ('Manawa'), outlined their various Schemes (Kumara, McKays Kaniere, Wahapo and Arnold) locations in relation to identified ONL. She raised concerns regarding the robustness of the assessments undertaken and the age of the information. She noted Manawa sought a review of the methodology behind the mapping and schedules, and inclusion of the values of the ONFL areas. She considered there was a lack of recognition of existing activities and modifications within each ONFL to enable changes from the effects of activities to be judged. She noted the policy required effects on values to be managed and to do this the values need to be described in the Schedules.

59. Ms Styles highlighted the requirement to give effect to the RMA and NPS-REG. She considered changes to provisions to '*maintain and enhance*' rather than '*avoiding adverse effects*' were inconsistent with RMA s6(b) and applied a different test to '*protection*'. She considered the criteria and methodology for the identification and assessment of ONFL needed to be included within the Plan, as set out in the s32 Report; and that the policies should provide a clear hierarchy setting out what activities are enabled, provided for, managed and avoided.

60. Mr James Bentley provided expert evidence on the ONL overlays of relevance to the renewable electricity generation operations of Manawa. Mr Bentley noted that the overall landscape methodology used had not been undertaken according to best practice and was 'high level', resulting in errors. He acknowledged that Mr Brown had used best practice at the time but considered it needed reviewing in line with Te Tangi a te Manu guidelines. He was concerned that only part of the West Coast Landscape had been assessed, and that landscape characterisation had not been done.

61. Mr Bentley noted the ONF were identified on a geological and geomorphological basis, rather than a landscape basis. He stated the identification of ONL appeared to be primarily a '*land use mapping exercise*' and not an assessment of attributes of landscape such as geomorphological or perceptual. He considered the mapping technique had led to '*cut outs*' and '*carve outs*' that do not respond to landscape such as excluding private land. He considered this required a '*finer grade review*' and more detail in the Schedules on the values and existing modifications within ONL. He was concerned the assessment commentary suggested boundaries had been realigned to exclude private land, when landownership is not the question. He considered title boundaries are secondary considerations to landscape values.

62. Mr Bentley highlighted the importance of recognising Manawa's existing activities within the descriptions of ONFL areas. He agreed with Ms Gilbert that despite the age of the original Brown assessments, the fundamentals of identifying relevant landscape attributes for that work were prepared using best practice. He also agreed with Ms Gilbert that further work was needed to look at identified ONFL and SASM given there was little tāngata whenua involvement in the landscape study.

63. In response to questions, Mr Bentley confirmed he did not support withdrawing the ONL overlay and considered the matters raised could be addressed. He acknowledged that mapping errors had occurred when the notified Brown printed maps were digitised. He considered a finer review was required to ensure the ONL line work is correct. He confirmed he had not seen the updated digitised mapping (January 2024). He supported adding a preamble, further work to identify existing modification within ONL and adding more detail into the Schedule's description for each ONL, as well as references to SASM and infrastructure.

64. Mr Leckie's legal submissions for Bathurst highlighted the need to review the accuracy of the notified mapping and the GIS shape files to address uncertainty. He considered there was no justification for including parts of the BCZ, which recognises and provides for mineral extraction activities, within an ONL.

65. Ms Whitney's evidence for Transpower confirmed it no longer sought the relocation of all earthwork provisions to the EW Chapter based on the National Grid specific Rule EW-R7.[12]

66. Mr Kennedy, for Westpower, noted the s42A Report had not proposed any amendments to address the recommendations of Ms Gilbert with regards to a preamble and review of the updated ONL mapping.

67. Mr Hadley Mills spoke to his submission and provided a copy of his speaking notes addressing ONL areas and the need for a permitted activity rule for multi-use tracks. He highlighted the ONL areas were 78% of the entire region and 7% of New Zealand's land area. He considered the Brown Reports did not provide enough evidence to support the ONL classification over

[12] The Panel notes that its recommendation in relation to Rule EW-R7 is to delete this rule as notified and replace it with new Rule EW-RX, in relation to the National Grid.

such large areas and need ground truthing. He noted the ONL boundaries appeared to have been derived from a map layer following an inaccurate and unchecked vegetation layer. He considered only a small proportion of land identified in the Brown Reports had been ground truthed.

68. Mr Mills highlighted the meaning of 'Outstanding' in Te Tangi a Te Manu: Aotearoa New Zealand Landscape Assessment Guidelines. He suggested the approach taken to the assessment was judging 'excellence' within a national or international context and that this was inconsistent with the guidance to assess outstanding within the West Coast context. He considered that 78% of land could not stand out because effectively the whole region is of this landscape typology. He said it was not obvious that forest clad mountains were outstanding when there is no place you cannot see them. He noted the very high proportion of ONL areas in the Queenstown-Lakes District and the problems for that district.

69. Mr Mills considered that because the majority of the ONL layer was within the DOC estate the values were already protected under the Conservation Act. He considered the ONL layer would duplicate this protection and add unreasonable cost to future applicants who already must do a full assessment of effects under the Conservation Act.

Reporting Officer Reply Evidence

70. In the Addendum s42A Report, Ms Easton supported the recommendations in Ms Gilbert's Landscape Report as follows:

For the reasons set out earlier, I recommend the following amendments to the notified ONL Mapping and Schedules:

a) Reference to the SASMs that coincide with ONLs are included in the relevant ONL Schedule.

b) Any more detailed evidence with respect to tāngata whenua values for ONL areas provided by submitters during the hearing process is incorporated in the relevant ONL Schedule text.

c) Clear guidance is included in the TTPP (perhaps by way of a Preamble to TTPP Part 4: Schedule Five: Outstanding Natural Landscapes), that explains:

i. the reasonably high-level nature of the ONL Schedules;

ii. that the landscape values identified relate to the ONL as a whole, rather than specific sites; and

iii. that other landscape values may be identified as part of an application-specific landscape assessment, including landscape modifications that are an accepted part of the landscape (e.g. infrastructure, buildings) and more negative landscape attributes (e.g. pests).

d) The updated ONL mapping (January 2024) is carefully reviewed by a landscape/GIS expert to ensure:

i. The following areas are excluded from the mapped ONLs:

- *Sizeable pastoral areas.*
- *Sizeable plantation forestry areas, particularly on the edges of ONLs.*

- *Areas where the arrangement, scale, and/or prominence of built development exerts a dominant influence on landscape character.*

ii. *ONL linework is 'clipped' to obvious landform and or contiguous native vegetation cover edges in the immediate vicinity of the mapped ONL.*

iii. *The mapping of the southern end of ONL 5 is amended to extend to the district boundary.*

e) *In response to location specific ONL submissions, the following mapping amendments are recommended:*

i. *Minor refinement of the ONL 14 mapping in the vicinity Donovan Drive, Franz Joseph is recommended to follow a 'landscape' rather than a zone boundary. (S449 Totally Tourism Limited.)*

ii. *Minor refinement of the ONL 31 mapping to exclude the patterning of dwellings throughout the lower slopes on Darkies Terrace and include the elevated and contiguous bush area that sits above the dwellings. (S506 Claire and John West and others.)*

iii. *Minor refinement of the ONL 29 mapping to exclude grazing land. (S515 Russell Robinson.)*

iv. *Minor refinement of the ONL 26 mapping to exclude grazing land and plantation forestry areas around the edges of the ONL. (S599 WMS Group (HQ) Limited and WMS Land Co. Limited.)*

v. *Refinement of the updated ONL mapping (January 2024) so that areas of pine plantation on the following properties are excluded from the ONL mapping:*

- *Site between Waitaha River and Poerua River that coincides with ONL 17*
- *Lot 1 Deposited Plan 3135 (near The Forks) ONL15*
- *Site between Lake Hochstetter and Lake Haupiri ONL32 (S620.158 Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio.)*

71. In the Right of Reply, Ms Easton recommended replacing 'renewable energy generation' with 'renewable electricity generation' for consistency throughout the Plan.

72. In the response to Westpower's evidence in relation to Rule NFL-R5 and Manawa's evidence in relation to Rule NFL-R6, Ms Easton recommended adding the following new definition for 'Minor Upgrade':

> ***Minor upgrade*** *means increasing the carrying capacity, efficiency, security, or safety of a network utility, or renewable electricity generation activity where the effects of the activity are the same or similar in character, intensity and scale as the existing structure or activity. This includes increasing generation, transmission or distribution capacity and includes replacing support structures within the footprint of existing lawfully established activities.*

73. Ms Easton confirmed she had discussed the recommended definition with Ms Styles and Mr Kennedy to get their input. She also noted that the definition would be very useful in the ECO Chapter and potentially other chapters.

Hearing Panel's Evaluation

74. The Panel agrees with Ms Easton that is not appropriate to remove references to overlays or to remove all references to Sites and Areas of Significance to Māori (**SASM**) in the NFL Chapter.

75. The Panel notes that Te Tangi a Te Manu: Aotearoa New Zealand Landscape Assessment Guide is no longer in a draft form and has been adopted by the Tuia Pita Ora New Zealand Institute of Landscape Architects. The guidelines outline professional best practice and promote both Te Ao Māori and Te Ao Pākeha perspectives, connections between perspectives and flexibility for practice to continue evolving.

76. The Panel accepts the evidence of Ms Gilbert that the identified ONL and ONF have been assessed and reviewed using methodologies that are consistent with the best practice guidance. Ms Gilbert has recommended changes to the preface of the Schedule to acknowledge this was undertaken at a relatively 'high level' and to add description regarding the landscape values considered and that of existing activities. Mr Bentley agreed with Ms Gilbert and her suggested addition of a preamble to Schedule Five.

77. Te Tangi a te Manu states:

> ***Meaning of 'outstanding'***
>
> *'Outstanding' encapsulates both quality and relativity: "conspicuous, eminent, especially because of excellence" and "remarkable in". It is a matter of reasoned judgement. An ONF or ONL will often be obvious. The value of a professional assessment in such circumstances is therefore to explain the reasons (justification) that an ONF or ONL is outstanding and describe the values (and the attributes on which the values depend).*
>
> *While 'outstanding' is a high threshold, it does not mean 'the best' or 'uniquely superior'. ONF/ONLs are not regulated by quota. A district may comprise a high proportion of natural landscapes of such quality as to be ONLs (for instance Queenstown-Lakes). Conversely, it does not mean 'the best of a poor choice': A district may contain few or no ONF/ONLs.*
>
> *A natural feature or landscape might be considered outstanding for many different reasons – it may have outstanding values that derive from its physical and/or perceptual and/or associative dimensions (although often the values arise from the interplay between all three dimensions). It is important that such values (and the attributes that embody the values) are identified precisely because they are what is to be protected.*
>
> *An ONF or ONL is considered outstanding in the context of a region or district. ONFs and ONLs do not have to be outstanding in a national context. (Rather, it is a matter of national importance to protect such regional or district ONFs and ONLs).*

78. The Panel accept the assessments undertaken by Mr Brown and the reviews by Ms Gilbert are consistent with this this approach and meaning of 'outstanding'. The assessment process undertaken looked at the natural landscape and features values within both a district and regional context and identified those areas that meet the outstanding threshold. It did not incorrectly identify only the best or highest value areas or have regard to quota. Te Tangi a te Manu specifically anticipates that some districts may have a high proportion of natural landscapes, and some may have few or none. The West Coast districts and the region has a high proportion of outstanding natural landscapes and features. This fact does not negate the requirement to protect outstanding natural areas as matters of national importance.

79. The Panel agree with Mr Mills that taking an assessment of outstanding within a national or international context only is not appropriate considering the guidance of Te Tangi a te Manu but consider the wording of the meaning is deliberate. It requires an assessment of

'outstanding' in the context of a region or district but clarifies ONL do not have to be outstanding nationally. In this case the assessment was undertaken in the context of the region and while deemed to be 'outstanding' within this context, it is fair to say that many of the natural landscape values could be 'reasonably judged' to be outstanding both nationally and internationally, even if this is not required to warrant protection. The mere fact that most people living on the West Coast are surrounded by views of outstanding natural landscape and features does not diminish the significant natural values or the importance of protecting these as a matter of national importance.

80. The Panel finds the approach to the assessment in terms of identifying 'outstanding' landscapes and features was consistent with best practise guidelines. The further assessments and reviews undertaken have corrected mapping errors from the digital transfer process and the planning process has enabled further reviews and corrections to be made.

81. The Panel accept that many identified ONL meet the criteria with existing activities and infrastructure occurring within the boundaries of the area. This can be due to the sheer nature and scale of the ONL and its sensitivity to change or the nature and scale of the activities and adverse effects. The Panel consider the further detail included in the Schedules assists with acknowledging the activities and infrastructure that currently coexist with the ONL values identified. The Panel finds the NFL provisions sufficiently provide for these while giving effect to RMA section 6(b).

82. The Panel has considered the changes to the ONL boundaries sought by the TTPP Committee to reflect the further map review undertaken. The Panel agrees that where this can be achieved within the scope of the ONL boundaries, as notified (i.e. there is no increase in the extent of area include within the identified ONL), this should be considered. The Panel relies on the expert evidence of Ms Gilbert in this regard given she has reviewed all areas subject to submissions.

83. The Panel does not agree with Mr Mills that the Conservation Act provides for RMA section 6(b) protection. Landscape values are not affected by land tenure. The protection of outstanding landscapes values is not a matter to be achieved under the Conservation Act. There is no duplication of statutory requirements.

84. The Panel agrees with Ms Easton that Skyline Enterprises Limited's proposed aerial cableway at Franz Josef needs to be considered through a resource consent process. No changes to the NFL Chapter are required to enable this to occur. The Panel is satisfied that a consent pathway is provided for in the Plan for such use and development proposals within ONL areas.[13]

85. The Panel consider there is sufficient clarity regarding the relationship between the Energy Chapter and the NFL Chapter. We are satisfied the NFL Chapter recognises the importance of energy activities and infrastructure by the additions to the description of values in Schedules Five and Six and by recording the existence of energy infrastructure within identified ONL areas.

86. The Panel agrees with the Buller District Council that there is a need for a consistent approach to the ONL and SNA overlays given their close correlation and the need to provide for critical infrastructure, lawfully established activities and hazard mitigation.

87. In general, the Panel accepts amending '*critical infrastructure*' to '*regionally significant infrastructure*' and this is considered on a case by case within the context of each provision

[13] This matter is addressed further in the Panel's Special Purpose Zone Recommendation Report

where it is used below. Similarly, the Panel accepts replacing 'renewable energy generation' with 'renewable electricity generation' for consistency throughout the Plan.

88. The Panel finds there is no justification to delete the ONL overlay and policy framework; and consider this would not give effect to Part 2 of the RMA or the objectives and policies of the RPS. The Panel notes the evidence of the ongoing loss of outstanding natural landscape values that has occurred since the first assessment was undertaken by Mr Brown, primarily from cumulative effects of development. This underscores the critical importance of protecting these identified outstanding natural values through the overlays and schedules and the NFL provisions. The Councils have invested significant time and resources into this approach to meet the statutory requirements.

89. The Panel notes Ms Styles' evidence in relation to the requirement to give effect to the RMA and NPS-REG and her request to change the provisions to '*maintain and enhance'* rather than '*avoiding adverse effects'*. The Panel considers this in relation to the specific NFL provisions below.

90. The Panel accepts Ms Easton's recommendation to include a new definition for '*minor upgrades*' to assist with enabling renewable electricity generation activities and network utility infrastructure within ONFL under rule NFL-R5 and associated earthworks within ONFL under rule NFL-R6. The Panel considers this gives effect to the RPS, NPS-REG and NESETA.

91. The Panel notes that the issue of the preamble is addressed under the Schedule 5 heading later in this recommendation.

Hearing Panel's Recommendation

92. No specific changes to the provisions are required in relation to issues raised in submissions and further submission made on general matters or the whole NFL Chapter, other than addressed in relation to Schedule 5 later in the recommendation.

93. The Panel accepts Ms Easton's recommendation to replace '*renewable energy generation*' with '*renewable electricity generation'* for consistency throughout the Plan. This is a consequential amendment to the submission by Manawa (S438.035) to use the language of the NPS-REG.

94. The Panel recommends inserting the following definition in the Plan:

> **Minor upgrade means increasing the carrying capacity, efficiency, security, or safety of a network utility, or renewable electricity generation activity where the effects of the activity are the same or similar in character, intensity and scale as the existing structure or activity. This includes increasing generation, transmission or distribution capacity and includes replacing support structures within the footprint of existing lawfully established activities.**[14]

95. The Panel's recommended changes to the NFL Overview wording are set out in the below section and in Appendix 1 of the Right of Reply.

2.2. NFL Overview

Submissions and Further Submissions

[14] Consequential amendment to Westpower Limited (S547.295) and Manawa Energy (S438.096)

96. Fourteen submissions points and five further submission point relating to the Overview were summarised in a Table on pages 26-27 of the s42A Report. All submission points sought amendments to include additional wording in the Overview, except one submission which supported the wording be retained as notified.

97. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

Section 42A Report

98. The s42A Report did not support any specific reference to '*mature indigenous trees'* given this was only one aspect of the criteria; or specific reference to RMA sections 5(b) and 7(d) or '*ecosystem services'*. It concluded this was unnecessary given the ECO Chapter.

99. The s42A Report did not support adding reference to '*natural character'* give the NFL Chapter addressed RMA section 6(a) matters. However, it acknowledged natural character is a matter than can contribute to making a landscape outstanding.

100. The s42A Report supported Poutini Ngāi Tahu's submission to include an additional paragraph outlining the values to be protected through the ONL and ONF provisions. It supported some additional text to address Westpower's submission point, but not the full detail sought.

101. The s42A Report supported reference in the NFL Chapter to the Strategic Objectives but noted this would need to be developed in light of the decisions on the Strategic Objectives.

102. The s42A Report supported Transpower's submission (S299.082) on the NFL policies as a whole, to move the statement '*also where relevant refer to policies in the Energy, Infrastructure and Transports Chapters'* to the Overview section, indicating that this was consistent with how other relevant matters are referred to within the pTTPP.

103. The s42A Report (page 76) recommended the following amendments:

> ***Overview***
>
> *…The Outstanding Natural Features and Outstanding Natural Landscapes identification applies to areas which have been assessed and identified as having high levels of scientific, biophysical, sensory or associative landscape values, which makes them outstanding. In almost all instances these areas are also bush covered and provide habitat for native fauna. These areas may also include critical infrastructure, renewable electricity generation activities, and other elements of the built environment and have varying degrees of modification.* ***Given the topography and extent of outstanding natural features and landscapes on the West Coast, practical management solutions are required to ensure maintenance and enhancement of the supply of renewable energy to, and between, communities for the benefit of those communities and the wider environment from the use and development of renewable energy.***
>
> *The process supporting the identification of the Outstanding Natural Landscape overlay and the associated values is described in the West Coast Landscape and Natural Character Reports produced in 2013, 2021 and 2022.*
>
> ***Outstanding natural landscapes (ONLs) have been identified as having the following values:***
>
> - ***Biophysical values – including the landforms, vegetation type, presence of waterbodies and the sea, evidence of natural processes and land uses within the landscape***

- ***Perceptual/ Aesthetic values – including composition and structure, vividness, expressiveness and legibility, dynamic and transient values, the presence of landmarks and key views, coherence, and unity***
- ***Associative values – naturalness and endemic value (distinctive NZ/West Coast sense of place), including Poutini Ngāi Tahu values and associations, and historical/ heritage associations.***

….
Other relevant Te Tai o Poutini Plan provisions ….

- ***Also where relevant refer to policies in the Energy, Infrastructure and Transport Chapters***

- ***Strategic Objectives – The Strategic Objectives are particularly relevant when assessing matters under the Natural Features and Landscape Chapter. The Natural Environment, Poutini Ngāi Tahu, Tourism, Mineral Extraction, and Connections and Resilience Strategic Objectives are particularly relevant.***

…

Hearing and Submitter Evidence/Statements

104. Mr Kennedy, for Westpower, highlighted the need to ensure the overview was consistent with all other chapters to guide Plan users.

Reporting Officer Reply Evidence

105. No further amendments to the Overview were recommended in Ms Easton's Right of Reply.

Hearing Panel's Evaluation

106. The Panel accepts Ms Easton's recommended amendments to the Overview provide important clarifications for Plan users.

107. The Panel accepts the additional paragraph requested by Poutini Ngāi Tahu provides clarity regarding the landscape values assessed in identifying ONL.

108. The Panel considers reference to '*natural character'* is appropriate in relation to the coastal environment and should not be included in the NFL Chapter.

109. The Panel agrees with Ms Easton that additional words sought by Westpower are too detailed and accept that the recommended amendments sufficiently address energy activities and infrastructure.

110. The Panel notes Appendix 1 of the s42A Report includes an additional bullet point that was not identified in paragraph 81 of her recommendations but is addressed in her recommendation on the policies as a whole, in response to Transpower (S299.08). The Panel considers this additional sentence clarifies that the policies in the Energy, Infrastructure and Transport Chapters may be relevant. However, we consider the additional sentience should follow the wording sequence '*Energy, Infrastructure, Transport – objectives, policies and rules.'*

111. The Panel considers it is appropriate to replace the outdated reference to the NES-PF, which has now been replaced with the NES-CF. Schedule 1 Part 2(1) of the NPS-CF requires that every reference in any document to the NES-PF must be read as a reference to the NES-CF.

Hearing Panel's Recommendation

112. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submissions identified in the footnotes below are accepted or accepted in part, and recommend changes are made to the NFL – Ngā Āhua me ngā Horanuku Aotūroa Overview as follows:

Overview

The Natural Features and Landscapes chapter contains provisions that relate to the Outstanding Natural Features and Outstanding Natural Landscapes which are identified as overlays on the Planning Maps and described in Schedule Five and Schedule Six. The identification of these areas is in response to section 6(b) of the RMA, which requires outstanding natural features and landscapes to be protected from inappropriate subdivision, use and development.

The Outstanding Natural Features and Outstanding Natural Landscapes identification applies to areas which have been assessed and identified as having high levels of scientific, biophysical, sensory or associative landscape values, which makes them outstanding. In almost all instances these areas are also bush covered and provide habitat for native fauna. These areas may also include ~~critical~~ **regionally significant**[15] infrastructure, renewable electricity generation activities, and other elements of the built environment and have varying degrees of modification. **Given the topography and extent of outstanding natural features and landscapes on the West Coast, practical management solutions are required to ensure maintenance and enhancement of the supply of renewable energy to, and between, communities for the benefit of those communities and the wider environment from the use and development of renewable energy.**[16]

The process supporting the identification of the Outstanding Natural Landscape overlay and the associated values is described in the West Coast Landscape and Natural Character Reports produced in 2013, 2021 and 2022.

The West Coast/Te Tai o Poutini Outstanding Natural Landscapes are identified in Schedule Five and Outstanding Natural Features are identified in Schedule Six.

The rules in this chapter relate to earthworks, buildings, structures, plantation forestry and Māori Purpose Activities in Outstanding Natural Landscapes and Outstanding Natural Features. Where Outstanding Natural Landscapes and Outstanding Natural Features are located in the Coastal Environment, the Objectives, Policies and Rules of the Coastal Environment Chapter apply.

Outstanding natural landscapes (ONL) have been identified as having the following values:

- **Biophysical values – including the landforms, vegetation type, presence of waterbodies and the sea, evidence of natural processes and land uses within the landscape**
- **Perceptual/ Aesthetic values – including composition and structure, vividness, expressiveness and legibility, dynamic and transient values, the presence of landmarks and key views, coherence, and unity**
- **Associative values – naturalness and endemic value (distinctive NZ/West Coast sense of place), including Poutini Ngāi Tahu values and associations, and historical/ heritage associations.** [17]

[15] Consequential Plan wide amendment, as a result of the Panel's Energy, Infrastructures and Transport Recommendation Report.
[16] Westpower Limited S547.277 and S547.0507
[17] Te Rūnanga O Ngāti Waewae, Te Rūnanga O Makaawhio and Te Rūnanga O Ngāi Tahu S620.159

Plantation Forestry

Plantation forestry is principally regulated by the Resource Management (National Environmental Standard for **Commercial**~~Plantation~~ Forestry) **Amendment** Regulations **2017** (NES-**C**~~P~~PF)[18]. However the NES-**C**~~P~~PF[19] allows that district plans can be more stringent to protect ONLs, and ONFs and their values. Where provisions within this chapter over-rule the requirements of the NES - **C**~~P~~PF[20] an advice note to that effect is included within the Rule.

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the zone chapters, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for certain activities within outstanding natural features and landscapes, including:

- **Ecosystems and Indigenous Biodiversity** - the Ecosystems and Indigenous Biodiversity Chapter contains objectives, policies and rules relating to native vegetation clearance including that within outstanding natural features and landscapes.
- **Natural Character and Activities Adjacent to Waterbodies -** the Natural Character and Margins of Waterbodies **Chapter**[21] contains the objectives, policies and rules relating to activities adjacent to waterbodies.
- **Coastal Environment -** the Coastal Environment Chapter contains the objectives, policies and rules for activities within the coastal environment overlay - including buildings and structures and earthworks.
- **Activities on the Surface of Water** - objectives, policies and rules for activities undertaken on the surface of a lake or river (including jetties, pontoons, fish farms and boating activities), are found in the Activities on the Surface of Water Chapter.
- **Energy, Infrastructure and Transport Chapters – objectives policies and rules.** [22]
- **Strategic Objectives – The Strategic Objectives are particularly relevant when assessing matters under the Natural Features and Landscape Chapter. The Natural Environment, Poutini Ngāi Tahu, Tourism, Mineral Extraction, and Climate Change and Resilience Strategic Objectives are particularly relevant.** [23]

2.3. NFL Objective

Submissions and Further Submissions

113. Twelve submissions points and one further submission point relating to NFL-O1 were summarised in a Table on pages 29-30 of the s42A Report. Six submission points supported the wording as notified, one submission point requested it be deleted, one submission point supported in part and four submission points sought amendments to the wording.

114. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

[18] First Schedule Clause 16(2) amendment to reflect the enactment of the Resource Management (National Environmental Standard for Commercial Forestry) Regulations 2017, which replaces the NES-PF.
[19] First Schedule Clause 16(2) amendment to reflect the enactment of the Resource Management (National Environmental Standard for Commercial Forestry) Regulations 2017, which replaces the NES-PF.
[20] First Schedule Clause 16(2) amendment to reflect the enactment of the Resource Management (National Environmental Standard for Commercial Forestry) Regulations 2017, which replaces the NES-PF.
[21] First Schedule Clause 16(2) correction
[22] Transpower New Zealand Limited S299.082
[23] Westpower Limited S547.279 and S547.0507

Section 42A Report

115. The s42A Report supported Poutini Ngāi Tahu's submission to retain the objective subject to including mana whenua values in Schedules Five and Six of the Plan.

116. The s42A Report did not support deleting NFL-O1 because it is consistent with the clear direction of Chapter 7B – Natural Features and Landscapes (**7B**), Objective 2 of the RPS.

117. The s42A Report supported a combination of the wording sought by the Director General and Manawa to make it more explicit that ONL and ONF must be protected from inappropriate development. However, it did not support replacing '*provide for*' with *'allowing'* given '*providing for'* signals a resource consent may be required.

118. The s42A Report did not support Westpower's submission to delete the objective and replace it with two objectives, considering that it is not necessary or appropriate that the Plan objectives are identical to the RPS.

119. The s42A Report recommended the following amendments:

> ***NFL – O1*** ~~*To protect*~~ *T~~t~~he values of outstanding natural landscapes and outstanding natural features on the West Coast/Te Tai o Poutini* ***are protected from inappropriate subdivision, use and development,*** *while providing for subdivision, use and development where the values that make the landscape or feature outstanding can be maintained or enhanced.*

Hearing and Submitter Evidence/Statements

120. Ms Styles, for Manawa, sought to remove the unreasonable expectation of '*maintained and enhanced*' and to simplify the wording of NFL-O1 as follows:

> ~~*To protect t*~~***T****he values of outstanding natural landscapes and outstanding natural features on the West Coast/Te Tai o Poutini* ***are protected from inappropriate subdivision, use and development*** ~~*while providing for subdivision, use and development where the values that make the landscape or feature outstanding can be maintained or enhanced.*~~

121. Ms Young for the Director General considered the wording recommended in the s42A Report was more consistent with the wording of RPS Chapter 7B Objectives 1 and 2.

122. Mr Kennedy, for Westpower, sought replacement of NFL-O1 with the following two objectives to reflect the wording of the objectives of the RPS (Chapter 7B, Objectives 1 and 2):

> 1. *Protect the region's outstanding natural features and outstanding natural landscapes from inappropriate subdivision, use and development; and*
>
> 2. *Provide for appropriate subdivision, use and development on, in, or adjacent to outstanding natural features and outstanding natural landscapes to enable people and communities to maintain or enhance social, economic and cultural wellbeing*

123. Ms Inta for herself and Buller Conservation Group sought to replace '*avoided and mitigated*' with reference to '*follow the adverse effects hierarchy*'. However, in response to questions, she acknowledged that offsetting and compensation would not be appropriate in all cases.

Reporting Officer Reply Evidence

124. Having considered the evidence of Ms Styles, Ms Easton agreed with deleting '*or enhanced*' from NFL-O1. However, she disagreed with Ms Styles that 'maintaining the values' does not give effects to RMA s6 and provides an additional hurdle beyond the RMA s6 requirements. She considered maintaining the values was effectively a way in which the overall s6 direction is achieved and was consistent with RPS Chapter 7B Policies 1, 2 and 3.

125. Ms Easton recommended the following changes to NFL-O1:

> ***NFL – O1*** ~~*To protect*~~ *T~~t~~he values of outstanding natural landscapes and outstanding natural features on the West Coast/Te Tai o Poutini* ***are protected from inappropriate subdivision, use and development,*** *while providing for subdivision, use and development where the values that make the landscape or feature outstanding can be maintained* ~~*or enhanced*~~.

Hearing Panel's Evaluation

126. The Panel accepts the reasoning set out in the s42A Report and agree that the definition of RMA '*environment*' is broad and includes natural and physical resources. The Panel agrees the changes recommended are appropriate and are consistent with the wording of the RMA.

127. The Panel notes RMA s6(b) requires the protection of outstanding natural feature and landscapes from inappropriate development. RPS Chapter 7B Objective 1 is consistent with the wording of RMA s6(b). It is RPS Chapter 7B Policy 2 that changes the focus to the protection of '*the values which together contribute to a natural feature or landscape being outstanding*'.

128. The Panel considers Mr Kennedy's requested replacement of NFL-O1 with two objectives simply repeats the RPS objective wording.

129. The Panel considers Ms Styles' requested wording simplifies the objective wording to require the protection of the values of outstanding natural landscapes and features from inappropriate subdivision, use and development. The Panel is satisfied the NFL policies provide guidance for assessing 'appropriate' activities and the rule framework provides for activities within limits and standards. The Panel consider this gives effect to RPS Chapter 7B Objective 2 to provide for appropriate subdivision, use and development. The Panel notes this Objective to '*provide for*' is worded as a policy and the Panel has relied on the NFL policies to give effect to Objective 2.

130. The Panel also notes the rule framework only addresses activities within ONFL. The Panel is concerned there is also potential for significant adverse effects on ONFL values from inappropriate activities located adjacent to ONFL areas. The Panel considers Ms Styles' wording of OFL-O1 would enable any assessment of fully discretionary activities and non-complying activities adjacent to ONFL to have regard to objective NFL-O1 and any relevant policies.

Hearing Panel's Recommendation

131. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the submissions identified in the footnotes below are accepted or accepted in part, and recommend changes are made to the Natural Feature and Landscape Objective as follows:

NFL – O1	~~To protect~~ T~~t~~he values of outstanding natural landscapes and outstanding natural features on the West Coast/Te Tai o Poutini **are protected from inappropriate subdivision, use and development.** ~~while providing for subdivision, use and development where the values that make the landscape or feature outstanding can be maintained or enhanced~~.[24]

2.4. NFL Policies

Submissions and Further Submissions

132. Six submissions points and nine further submission point relating to the **policies as a whole** were summarised in a Table on pages 31-32 of the s42A Report. Two submission points supported retention of the policy as notified, one sought to move words into the Overview and three submissions requested wording amendments.

133. Thirty submission points and 74 further submission points relating to **NFL-P1** were summarised in a Table on pages 34-39 of the s42A Report. Eight submissions supported the policy as notified, two sought to delete the policy and 20 submissions sought amendments. Nearly all the further submission points supported submission points seeking addition of a new clause 'Activities with a functional or operational need to locate in these areas.

134. Eighteen submission points and three further submission points relating to **NFL-P2** were summarised in a Table on pages 44-46 of the s42A Report. Eleven submission points supported the policy as notified and seven submission points sought the amendments to the wording.

135. Twenty-six submission points and 71 further submission points relating to **NFL-P3** were summarised in a Table on pages 47-51 of the s42A Report. Sixteen submission points supported retention of the policy as notified and ten submission points sought wording amendments. Seventy further submissions supported submission points to include 'minerals extraction, exploration and prospecting'.

136. Twelve submission points relating to **NFL-P4** were summarised in a Table on pages 52-54 of the s42A Report. Six submission points supported the policy as notified, one sought clarification of the term 'minimise' and five submission points sought the amendments to the wording.

137. Twenty-seven submission points and seven further submission points relating to **NFL-P5** were summarised in a Table on pages 55-58 of the s42A Report. Eight submission points supported the policy as notified and 19 submission points sought the amendments to the wording.

138. Eight submissions points relating to **NFL-P6** were summarised in a Table on pages 61-62 of the s42A Report. Five submissions points supported the policy as notified and three submission points sought the amendments to the wording.

139. Eight submissions points and three further submission points relating to **NFL-P7** were summarised in a Table on pages 63-64 of the s42A Report. Eleven submissions points supported the policy as notified and seven submission points sought the amendments to the wording.

[24] Manawa Energy Limited S438.085

140. The Panel has considered the relevant submissions and further submissions and adopts the summaries in the s42A Report.

Section 42A Report

141. In relation to the **policies as a whole**, the s42A Report did not support Manawa's request for a substantial revision of the policies to include the criteria and methodology for identification of ONFL in the policies and a new policy. It considered this was not necessary given the criteria and methodology were outlined in the s32 Report and the entire West Coast had been assessed. It stated that 'It is not anticipated that further ONFL will be identified' (para, 93, pg.33).

142. The s42A Report did not support Manawa's request to replace '*minimise*' with '*manage*' given the difference in meaning and highlighted the RPS widely used '*minimise*'. In response to questions, Ms Easton agreed this depended on the context and also the final recommended wording of the Strategic Objectives.

143. The s42A Report supported the inclusion of additional information characterising the landscapes and describing their values in the Schedules. However, it did not support including information on existing activities and modifications, as this information would inevitably become out of date. It supported modifications to the mapping to improve accuracy through updated mapping.

144. The s42A Report did not support adding policy direction, explanation or definitions for 'non-biodiversity offsetting or compensation', as requested by Forest & Bird.

145. In relation to the **NFL-P1**, the s42A Report did not support Ms Inta and the Buller Conservation Group's request to delete the policy considering there were a range of activities that could be undertaken in NFL without significantly adversely affecting their values. However, in response to questions, Ms Easton agreed that to protect outstanding values the threshold for adverse effects would need to be '*no more than minor*' rather than no '*significant*' adverse effects.

146. The s42A Report supported replacing the words '*do not adversely affect*' with '*maintain*', as requested by Chorus NZ Ltd, Spark NZ Trading Ltd and Vodaphone NZ Ltd, given this was clearer; but did not support replacing the wording '*where they do not adversely affect the values that contribute to a natural feature or landscape being outstanding and are for*' with '*which have no more than minor adverse effects*', sought by GDC because it considered this changes the intent from the values. It noted the Manawa submission seeking to add '*do not significantly adversely affect*' is addressed by replacing this with 'maintain'.

147. The s42A Report partly supported the wording changes sought by Westpower to include the word 'together'; but did not support replacing '*provide for*' with '*allow*' or rewording to require adverse effects on values being avoided, remedied or mitigated. In response to questions regarding adding 't*ogether*', Ms Gilbert agreed it was important to consider values individually and as well as collectively. Ms Easton agreed that '*individually and collectively*' would be clearer than '*together*'.

148. The s42A Report did not support amendments to NFL-P1 to allow for residential activities, as requested by five individual submitters; and considered this required careful design and implementation through the resource consent process to avoid, remedy and mitigate significant cumulative adverse effects on ONL and ONF. However, it agreed the wording could be clearer with regard to providing for existing residential activities. In response to questions

about the appropriate threshold of adverse cumulative effects to protect outstanding values, Ms Easton considered the threshold of '*no more than minor*' normally related to the coastal environment.

149. The s42A Report did not support including '*mineral extraction, mineral exploration and anticipated activities in the BCZ and MINZ*', as requested by Bathurst Resources, given the recommended definition for 'lawfully established' provides for mineral extraction activities permitted through a Coal Mining License issued under the Coal Mines Act. It did not support expanding the policy but recommend replacing '*existing*' with '*lawfully established*' and adding '*mineral extraction activities'*

150. The s42A Report did not support the request by Birchfield Coal Mines Limited, Birchfield Ross Mining Limited, TiGa Minerals and Metals Limited and WMS Group Limited to include a new clause (j) '*Activities with a functional or operational need to locate within these areas, including mineral extraction, exploration and prospecting'* in NFL-P1. It considered the environmental effects of new activities in ONFL need to be assessed via a resource consent process. While it acknowledged minerals are fixed in location, it concluded there was no policy direction to support providing for mineral activities within ONFL as permitted activities.

151. The s42A Report supported Manawa's request to replace '*energy*' with '*renewable <u>electricity</u> generation*'; but did not support use of '*energy activities*' given all activities are captured by the term '*network utility operation*' and regionally significant infrastructure (**RSI**), except for small scale generation.

152. The s42A Report supported the Director General's request to delete clause NFL-P1(g). In relation to the Director General's request to delete clause (d) relating to natural hazard mitigation activities, it highlighted the need to be consistent with the Natural Hazards Chapter which differentiated between structures constructed by a statutory agency and those constructed by private individuals. It recommended amendments to clause (d) to add '*maintenance and repair'* of hazard mitigation '*<u>structures</u>*'; and a new clause (e) for the upgrade of hazard mitigation structures where this is undertaken by a statutory agency or their nominated contractor. It considered new infrastructure and renewable energy generation activities should be excluded from the policy because it was hard to argue that such activity would have more than minor adverse effects.

153. The s42A Report supported Ngāi Tahu's submission to replace '*uses*' with '*activities*' in NFL-P1(h) given this is a defined term. It did not support adding '*and Māori Landowner*' to clause (h), as requested by Te Tumu Paeroa, given the direct link to the permitted activity rule in relation to '*Poutini Ngāi Tahu activities*' and this terms definition. It noted it would be inappropriate to put the Councils in a position of needing to investigate the whakapapa of individual Māori landowners.

154. The s42A Report highlighted the RMA section 6 directives, NPS-REG, NPS-ET, Policies 2 and 3 of the RSI Chapter of the RPS, and Policy 4 of the Natural Features and Landscapes Chapter of the RPS. It noted these provisions required an understanding of the scale, placement and parameters of new infrastructure to ensure there would be no more than minor adverse effects on ONL and ONF.

155. The s42A Report did not support Westpower's request to include reference to '*energy activities and critical infrastructure'*, it recommended adding '*regionally significant infrastructure'* to address this and for consistency across the Plan.

156. In relation to **NFL-P2**, the s42A Report supported replacing '*possible*' with '*practicable*', as requested by Manawa; and including '*otherwise minimised'* and '*or compensated in accordance with the effects management hierarchy'* at the end, as sought by the Director General.

157. The s42A Report did not support deleting '*offset*', as sought by the Director General, on the basis that both offset and compensation were appropriate in the context. In response to questions regarding whether it is appropriate to use offsetting and compensation to protect outstanding NFL values and the higher order policy direction, Ms Easton requested time to consider this in her Right of Reply.

158. The s42A Report did not support deletion of 'significant' in front of adverse effects, as sought by the Director General, given the direction of the RPS that appropriate activities have *'no more than minor adverse effects'.* However, in response to questions, Ms Easton agreed that avoiding significant adverse effects was not the correct threshold to apply to protect outstanding NFL values.

159. The s42A Report did not support including '*Where possible take precautionary approach'*, as sought by Te Mana Ora, given the adverse effects of earthworks and structures on landscape values were reasonably certain and understood. It did not support including 'together', as requested by Westpower to be consistent with the RPS, given the context where significant effects on one value could be considered acceptable.

160. In relation to **NFL-P3**, the s42A Report noted that the purpose was to recognise existing activities and land uses using examples, but that this was not intended to be an exhaustive list. It supported including '*land uses'* and '*other activities'* to capture the matters raised in submissions, including energy activities and critical infrastructure as sought by Westpower.

161. The s42A Report supported replacing '*not adversely affected*' with '*maintain and enhanced'*, as requested by Terra Firma Mining Limited, given it better reflected the RPS direction. It also supported replacing '*provide for'* with '*allow*', as sought by the Director General, again because it better reflected the directives in the higher order documents.

162. The s42A Report supported improving the sentence structure of the policy to provide more clarity, as requested by Waka Kotahi.

163. Transpower requested clarification NFL-P3 did not apply to the National Grid.

164. In relation to **NFL-P4**, the s42A Report supported replacing 'minimise' with 'avoid, remedy or mitigate', as requested by Westpower, given the context used. It also considered its replacement with 'manage', as requested by Manawa, but concluded the term 'avoid, remedy or mitigate' was clearer.

165. The s42A Report supported the addition of a new clause - '*Landscaping buildings and structures with appropriate vegetation to soften outlines*', as requested by the Buller Conservation Group and Ms Inta, as a useful and practicable mitigation measure for structures.

166. The s42A Report also supported the addition of a new clause - '*Limiting landform modification through earthworks'*, as requested by the Director General, given this could have significant adverse effects on ONFL.

167. In response to submissions from Manawa and Westpower, the s42A Report supported adding a sentence applying to all clauses - '*where these mitigation measures are practicable'*. It did not support adding new clauses to exempt energy activities and infrastructure providers, but recognised infrastructure may need to locate in ONFL, particularly in South Westland and around the Paparoa Ranges. It did not support replacing '*limiting*' with '*reducing*' in NFL-P4(c), as requested by Transpower given the rules framework limits height.

168. In relation to **NFL-P5**, the s42A Report supported the submissions of Forest & Bird and Terra Firma Mining Limited to replace the beginning of the policy and to refocus it. It recommended amendments as follows:

> ~~*Minimise adverse effects on outstanding natural landscapes and outstanding natural features by considering the following matters when assessing proposals for land use or subdivision:*~~
>
> ~~***When assessing whether a proposal for land use or subdivision is appropriate, in addition to the above policies, consider the following matters:***~~

169. The s42A Report supported the addition of '*nature*', 'and '*extent*' and '*feature*' to NFL-P5(a); and the addition of '*short term*' to NFL-P5(d), as requested by the Director General.

170. The s42A Report supported the addition of a new clause – 'The extent to which an activity or structure is lawfully established', as requested by Bathurst; and a new clause - 'The management of effects on natural character, amenity, recreation, historical and biodiversity values', as requested by the Director General.

171. The s42A Report did not support adding a new clause requiring an assessment of alternatives or reference to the effects management hierarchy, as requested by the Director General. It stated an assessment of alternatives is only required where there are significant adverse effects on ONFL and that advice notes were recommended for rule NFL-R11 and NFL-12 to reference Schedule 4 of the RMA.

172. The s42A Report rejected a similar submission from Te Tumu Paeroa requesting additional wording to NFL-P5(e) requiring the consideration of the adverse effect of all practicable alternatives.

173. The s42A Report supported the addition of '*and Māori landowners'*, as requested by Te Tumu Paeroa, but considered there was a difference between Māori landowners and Poutini Ngāi Tahu. It noted Māori landowners can whakapapa to Poutini Ngāi Tahu, while not being registered with the iwi, and may have been in continuous ownership of their land since before Te Tiriti was signed. It considered this was appropriate where the relationship whakapapa was in place and recommended adding '*or Māori landowners who whakapapa to Poutini Ngāi Tahu'* to address the further submission by Ngai Tahu opposing Te Tumu Paeroa's submission.

174. The s42A Report did not support rewriting NFL-P5 to reflect the wording of the RPS, as requested by Westpower, given it assists with practical detail of matters to be considered. It also did not support adding '*constraints or requirements'* to clause (e) given the use of '*functional need and operation need'* elsewhere in the Plan. It supported deletion of (j)(i)-(iii) to remove duplication with NFL-P4.

175. In response to questions, Ms Easton noted new clause NFL-P5(k) may not be required depending on the definition of '*lawfully established activity'*. She also agreed adding '*proposed*' would make it clearer.

176. In relation to **NFL-P6**, the s42A Report supported Ngāi Tahu's submission in part to amend the policy to include reference to the Iwi/Papatipu Rūnanga Management Plan. It considered this would help achieve Part 2 of the RMA. It noted the NPS-IB has specific provision for 'specified Māori Land' and considered the approach to SNA and ONL should parallel each other. It suggested that Māori Purpose Zone land in the Plan also be identified as '*specified Māori Land*' in terms of the NPS-IB.

177. The s42A Report did not support amending the policy to be subject to policies NFL-P1 to NFL-P5 given RMA section 6 matters of national importance must be balanced and none have more weight than any others. It considered the policies and rules of the NFL chapter balanced RMA section 6(b) and (e) requirements in accordance with Treaty principles.

178. In relation to **NFL-P7**, the s42A Report recommended adding '*or Māori landowners who whakapapa to Poutini Ngāi Tahu*' to address the request of Te Tumu Paeroa and the opposing further submission by Ngāi Tahu. Again, the s42A Report did not support amending the policy to be subject to policies NFL-P1 to NFL-P5 to balance RMA section 6 matters.

Hearing and Submitter Evidence/Statements

179. Mr Pemberton, counsel for the Director General, highlighted RPS Policy 4 which allows activities that have no more than minor adverse effects in ONFL areas. He considered NFL-P3 and NFL-P4 appeared to reflect this but NFL-P2 was inconsistent with the '*no more than minor*' threshold.

180. Ms Young, for the Director General, confirmed support for the s42A Report recommendations in relation to policies.

181. Following the hearing, Mr Pemberton provided a further written response to questions regarding the effects management hierarchy, including national direction and court decisions. He noted the effects management hierarchy is used in the NPS-FM and NPS-IB, which do not relate to natural landscapes and features. He acknowledged difficulty in offsetting and compensation in relation to effects on natural landscape and features, and concluded '*avoid, remedy or mitigate'* was appropriate to ensure effects were 'no more than minor' in line with Policy 4 of the RPS.

182. Mr Leckie, for Bathurst, highlighted the need to ensure the treatment of lawfully established activities was consistent throughout the Plan. He submitted special purpose zones, such as the MINZ and BCZ, needed careful consideration in terms of the interplay between the purpose of the zones with matters relating to landscape and biodiversity values. He noted opposition to removing '*significant*' from NFL-P2 given this would require the avoidance of all adverse effects as a priority and the RMA is not a no effects statute.

183. Ms Hunter, for Bathurst, supported the recommended amendment to NFL-P1 but questioned the need for the second '*lawfully established'*. In response to questions, she agreed that deleting the second reference changed the intent but considered it wasn't necessary.

184. In relation NFL-P5, Ms Hunter stated that in assessing landscape values consideration should be given to existing modifications of the environment (including those which may be able to be developed either through consents or other existing approvals such as Coal Mining Licenses). However, in response to questions, she agreed unlawful modifications would not be part of the '*existing environment'*. She highlighted the importance of a consenting pathway for activities that can demonstrate functional or operational need to locate within ONL areas.

185. Mr Kennedy, for Westpower, noted that NFL-P1 was wider by using '*provide for'* than Policy 4 of the RPS which uses *'allow'*. He emphasised the importance of providing a consenting pathway for new infrastructure within ONFL areas. He noted a policy was required that recognises the need to provide for RSI in certain circumstances. He considered NFL-P1, NFL-P2, NFL-P3 and NFL-P4 should be reworded as follows:

> ***NFL-P1***
>
> *Provide for activities within outstanding natural landscapes described in Schedule Five and outstanding natural features described in Schedule Six ~~where they do not adversely affect maintain~~ **adverse effects on** the values that together contribute to a natural feature or landscape being outstanding **are avoided, remedied or mitigated**, for:*
>
> *a. – g.*
>
> *h. **New regionally significant infrastructure where there is a functional or operational need to locate in these areas**.*
>
> *Items h. and i. to become i. and j.*
>
> ***NFL-P2***
>
> *Where practicable, avoid significant adverse effects on the values that **together** contribute to ... cannot be avoided, ensure that the adverse effects are **otherwise remedied or mitigated, including any proposed offsetting or compensation**.*
>
> ***NFL-P3***
>
> *Recognise that there are settlements, farms, land uses, ~~and~~ infrastructure **(including RSI)** and other activities located within outstanding natural ~~landscapes~~ **features or** outstanding natural landscapes ~~features~~ and ~~provide for~~ **allow** new activities and existing uses in these areas where **adverse effects on** the values that **together** contribute to the outstanding natural landscape or feature are ~~not adversely affected maintained or enhanced~~ **no more than minor**.*
>
> ***NFL-P4***
>
> *Require that new building **and** structures within outstanding natural features or landscapes ~~minimise~~ **avoid, remedy or mitigate** any adverse visual effects **including** by:*
>
> *a. … d.*
>
> *where these mitigation measures are practicable **and taking into account the function and operational needs of RSI.***

186. Ms Styles, for Manawa, requested the addition of '*existing*' in NFL-P1(e) and (f) to provide further clarity. Ms Styles considered replacing '*do not adversely affect'* with '*maintain and enhance*' was inconsistent with RMA section 6(b) and recommended it be retained as notified. She supported the reframing of NFL-P5

187. In supplementary evidence, Ms Styles recommended inclusion of a new policy as follows:

> ***NFL PX***
>
> *Ensure that the landscapes of the West Coast Region are recognised by:*

a. assessing the values and characteristics of the landscapes according to the following criteria:

i. biophysical (abiotic, biotic);

ii. sensory (legibility, naturalness, vividness, coherence, aesthetic, transient values); and iii. associative (shared and recognised values, mana whenua values, historic heritage associations); and

b. identifying and mapping those areas that are Outstanding Natural Features and Outstanding Natural Landscapes, based on their values and characteristics; and

c. describing the values and characteristics of each Outstanding Natural Feature or Outstanding Natural Landscape within Schedules Five and Six.

188. In her supplementary evidence, Ms Styles also recommended the following amendments to address Manawa's submission points:

NFL - P1

Provide for activities within outstanding natural landscapes described in Schedule Five and outstanding natural features described in Schedule Six where they ~~do not adversely affect~~ protect the values that together contribute to a natural feature or landscape being outstanding and are for:

a. Existing land uses and lawfully established activities including ~~existing~~ lawfully established residential activities, regionally significant infrastructure, network utilities, renewable ~~energy~~ electricity generation activities, mineral extraction, agricultural, horticultural and pastoral activities;

b. Conservation activities;

c. Recreational activities;

d. Maintenance and repair of ~~N~~natural hazard mitigation ~~activities~~ structures;

e. Upgrading of natural hazard mitigation structures where this is undertaken by a statutory agency or their nominated contractor

~~e~~. f. Operation, maintenance and upgrade of existing renewable electricity generation facilities;

~~f~~. g. Operation, maintenance and upgrading of network infrastructure~~;~~, and regionally significant infrastructure;

g. ~~Upgrading and/or~~ Establishment of new regionally significant infrastructure and renewable electricity generation facilities where there is a functional need for them to be located in these areas;

h. Poutini Ngāi Tahu ~~uses~~ activities; or

i. The alteration, maintenance or removal of existing buildings or structures.

NFL - P2

Where ~~possible~~ practicable, avoid significant adverse effects on the values that contribute to outstanding natural landscapes described in Schedule Five and outstanding natural

> *features described in Schedule Six. Where significant adverse effects cannot practicably be avoided, ensure that the adverse effects are otherwise minimised, remedied, mitigated ~~or offset~~ or compensated as appropriate ~~in accordance with the effects management hierarchy~~.*
>
> ***NFL - P3***
>
> *Recognise that there are settlements, farms, land uses, ~~and~~ infrastructure and other activities located within outstanding natural ~~landscapes~~ features or outstanding natural landscapes ~~features~~ and ~~provide for~~ allow new activities and existing uses in these areas where the values that contribute to the outstanding natural landscape or feature are not adversely affected ~~maintained or enhanced~~.*

189. In relation to NFL-P4, Ms Styles recommended replacing '*Limiting*' with '*Reducing*' in clause (d).

190. Transpower advised it supported the replacement of '*minimise*' in NFLF-P4 and accepted the recommended changes based on ENG-P8. It continued to seek the addition of '*within outstanding features or landscapes*' in NFL-P5; and '*An energy activity undertaken*' at the beginning of NFL-R6(b).

191. Ms Inta, on behalf of herself and the Buller Conservation Group, requested that '*minerals extraction'* not be added to NFL-P1(a) given this would not protect ONFL from inappropriate activities; and clauses (f) and (g). In relation to NFL-P2, she considered the amendments recommended were not consistent with their submissions and noted Policy 4 of the RPS directed allowing activities that have '*no more than minor'* adverse effects not the avoidance of significant adverse effects, which was a much higher threshold. She suggested replacing '*The management of*' with '*Adverse*' at the beginning of NFL-P5(l).

192. Ms Leveson for Horticulture New Zealand ('Hort NZ') noted support for the recommended s42A Report amendments to NFL-P1 and NFL-P3.

193. At the hearing, Te Tumu Paeroa acknowledged the Māori Trustee's submission points relating to NFL-P1, NFL-P5 and NFL-P7 could have been expressed more clearly. The Trustee requested provision for the traditional activities of owners of Māori freehold land and considered this submission point provided scope for changes sought to the policies and rules. The Trustee disagreed with Ms Easton's recommended additional wording in NFL-P5 and NFL-P7 and remained of the view that this should be '*or owners of Māori lan*d'.

194. Following the hearing, the Panel received a joint statement provided by Ngāi Tahu and Te Tumu Paeroa[25] advising of their agreement to add a new clause – '*Use and development of Māori Land*' in NFL-P1 instead of adding '*and Māori Landowner*' to clause (h). However, subsequent to this, Te Tumu Paeroa withdrew S440.031 seeking the addition of Māori Landowners to NFL – P7.

195. KiwiRail sought to retain '*do not adversely affect'* in NFL-P1 and NFL-P3, as it considered '*maintain*' implied there would be no adverse effects.

Reporting Officer Reply Evidence

[25] A joint statement of position and recommendations to the Hearing Panel from Ngāi Tahu and Te Tumu Paeroa – the Office of the Māori Trust (dated 14 August 2024)

196. In response to Ms Styles and the expert evidence of Ms Gilbert and Mr Bentley, Ms Easton agreed it would be helpful to add a new policy outlining the criteria for identifying ONL. She noted it was likely that further mapping amendments would be likely to address areas identified as outstanding but are outside the scope of what was notified. She considered a new policy would support both further analysis at the resource consent stage and the future identification of additional ONL areas to be included through a plan change process. She recommended the following new policy be included as the first policy in the chapter:

> ***NFL- PXXX***
>
> *To identify Outstanding Natural Landscapes on the West Coast/Te Tai o Poutini by:*
>
> *a. Assessing the values and characteristics of the landscapes according to the following factors:*
>
> *i. Physical characteristics and values;*
>
> *ii. Perceptual characteristics and values;*
>
> *iii. Associative characteristics and values*
>
> *b. Including these on the planning maps as Outstanding Natural Landscapes; and*
>
> *c. Describing the characteristics and values of each Outstanding Natural Landscape within Schedule Five.*

197. Also, in response to the evidence of Ms Styles and the direction of the NPS-REG, Ms Easton agreed there should be provision for new renewable electricity generation in NFL-P1. She recommended amendments to clause (h) to achieve this.

198. In relation to the evidence from KiwiRail, Ms Easton did not support retaining 'do not adversely affect' given the words have an 'avoid' connotation. She considered the intent of the NFL-P1 was clearer with replacing '*do not adversely affect'* with '*maintain*'. She also agreed that there should be consistency in the wording between NFL-P1 and NFL-P3; and recommended '*or enhanced*' be deleted from NFL-P3.

199. In response to questions from the Panel, Ms Easton considered whether there was scope in the submissions to use '*protect*' instead of '*maintain*' in NFL-P1 and NFL-P3. She concluded there was no scope to make this amendment. The Panel also asked whether there should be consistency of wording between these two policies and Ms Easton agreed that there should be consistency and preferred the term '*maintain'* without reference to '*enhance*'.

200. Ms Easton acknowledged the supplementary legal submissions on behalf of the Director General and the practical difficulties in applying the offsetting and compensation components of the effects hierarchy to natural landscapes and natural features. For this reason, she recommended including '*or where appropriate offset or compensated'* and confirmed she no longer recommended adding reference to the effects hierarchy in NFL-P2.

201. In considering whether the wording recommended in NFL-P2 is consistent with the 'no more than minor' threshold in RPS Policy 7B4, Ms Easton noted this related to activities that are '*allowed*' in ONFL. She considered NFL-P2 related to activities that may have '*significant adverse effects*' that would be subject to the resource consent process and the policy would be used as part of that assessment.

202. Ms Easton responded to the Panel's questions regarding use of '*soften outlines'* in NFL-P4(e) and recommended '*landscaping buildings and structures to reduce visual effects'* was more appropriate to capture screening of buildings or filtering of views.

203. Ms Easton confirmed she had revisited her recommendations based on Te Tumu Paeroa's withdrawal of their submission point relating to NFL-P7. She noted she no longer recommended adding '*or Māori Landowners who whakapapa to Poutini Ngāi Tahu'* to clause (f) to address the withdrawn submission point.

204. Ms Easton confirmed her recommended amendments to the NFL policies in Appendix 1 of the Right of Reply as follows:

NFL – P1 *Provide for activities within outstanding natural landscapes described in Schedule Five and outstanding natural features described in Schedule Six where they ~~do not adversely affect~~ **maintain** the values that **together** contribute to a natural feature or landscape being outstanding and are for:*

*a. Existing land uses and lawfully established activities including ~~existing~~ **lawfully established residential activities, regionally significant infrastructure,** network utilities, **renewable** energy **generation** activities, **mineral extraction**, agricultural, horticultural and pastoral activities;*

b. Conservation activities;

c. Recreational activities;

*d. **Maintenance and repair of** ~~N~~natural hazard mitigation ~~activities~~ **structures**;*

*e. **Upgrade of natural hazard mitigation structures where this is undertaken by a statutory agency or their nominated contractor;***

~~e.~~ f. Operation, maintenance and upgrade of renewable electricity generation facilities;

*~~f.~~ g. Operation, maintenance and upgrade of network infrastructure **and regionally significant infrastructure**;*

*h. ~~Upgrading and/or n~~**N**ew ~~infrastructure and~~ renewable electricity generation **activities** ~~facilities~~ where there is a functional need for **them** ~~it~~ to be located in these areas~~;~~*

*i. Poutini Ngāi Tahu ~~uses~~ **activities**; or*

j. The alteration, maintenance or removal of existing buildings or structures.

NFL – P2 *Where ~~possible~~ **practicable**, avoid significant adverse effects on the values that contribute to outstanding natural landscapes described in Schedule Five and outstanding natural features described in Schedule Six. Where significant adverse effects cannot be avoided, ensure that the adverse effects are **otherwise minimised**, remedied, mitigated ~~or~~ offset **or were appropriate compensated.***

NFL – P3 *Recognise that there are settlements, farms, **land uses,** ~~and~~ infrastructure **and other activities** located within outstanding natural ~~landscapes~~ **features** or outstanding natural **landscapes** ~~features~~ and ~~provide for~~ **allow** new activities and existing uses in these areas where the values that contribute to the*

*outstanding natural landscape or feature are ~~not adversely affected~~ **maintained**.*

NFL – P4 *Require that new buildings, and structures within outstanding natural features or landscapes ~~minimise~~ **avoid, remedy or mitigate** any adverse visual effects **including** by:*

a. Ensuring the scale, design and materials of the building and/or structure are appropriate in the location;

b. Using naturally occurring building platforms, materials and colour that blends into the landscape;

*c. **Limiting landform modification through earthworks**; ~~and~~*

d. Limiting the prominence or visibility of buildings and structures including by integrating it into the outstanding natural feature or landscape; and

*e. **Landscaping buildings and structures with appropriate vegetation to** ~~soften outlines~~ **reduce visual effects where these mitigation measures are practicable.***

NFL – P5 ~~*Minimise adverse effects on outstanding natural landscapes and outstanding natural features by considering the following matters when assessing proposals for land use or subdivision:*~~

When assessing whether a proposal for land use or subdivision is appropriate, in addition to the above policies, consider the following matters:

*a. The **nature**, scale **and extent** of modification to the landscape;*

b. Whether the proposal is located within a part of the outstanding natural feature or outstanding natural landscape that has capacity to absorb change;

c. Whether the proposal can be visually integrated into the landscape and whether it would break the skyline or ridgelines;

*d. The temporary, **short term** or permanent nature of any adverse effects;*

e. The functional, technical, operational or locational need of any activity to be sited in the particular location;

f. Any historical, spiritual or cultural association held by Poutini Ngāi Tahu;

g. Any positive effects the development has on the identified characteristics and qualities;

h. Any positive effects at a national, regional and local level;

i. Any relevant public safety considerations; and

j. The measures proposed to mitigate the effects on the values and characteristics~~, including:~~

~~i. The location, design and scale of any buildings or structures, or earthworks;~~

~~*ii. The intensity of any activity; and*~~

~~*iii. The finish of any buildings or structures, including materials, reflectivity and colour; and landscaping and fencing;*~~

k. The extent to which an activity or structure is lawfully established; and

l. The management of effects on natural character, amenity, recreation, historical and biodiversity values.

NFL – P6 *Enable the use of Māori Purpose Zoned land in outstanding natural landscapes and on outstanding natural features* ***by identifying this as specified Māori land*** *where land use and subdivision is consistent with tikanga and mātauranga Māori* ~~*and minimises adverse effects on the outstanding values of the landscape or feature*~~ ***as outlined within an Iwi/Papatipu Rūnanga Management Plan.***

NFL – P7 *Consider the incorporation of mātauranga Māori principles into the design, development and/or operation of activities in outstanding natural features and landscapes with cultural, spiritual and/or historic values, interests or associations of importance to Poutini Ngāi Tahu and opportunities for Poutini Ngāi Tahu* ***and Māori landowners who whakapapa to Poutini Ngāi Tahu*** *to exercise their customary responsibilities as mana whenua and kaitiaki in respect of the feature or landscape.*

~~*Also where relevant refer to policies in the Energy, Infrastructure and Transport Chapters.*~~

Hearing Panel's Evaluation

205. The Panel accepts Ms Easton's recommendation to add a new policy guiding the identification of ONL areas. The Panel acknowledges the evidence of Ms Gilbert in relation to areas meeting the criteria for ONL that were not included in the notified Plan. The Panel agrees these areas should be included as part of a future plan change process and the new recommended policy is appropriate to guide this process.

206. In relation to **NFL-P1**, the Panel considers the intent is to provide for activities that do not adversely affect the values that contribute to the ONL or ONF being outstanding. To give effect to RMA section 6(b) and the RPS provisions, these outstanding natural features and landscapes must be protected from inappropriate subdivision, use and development. Ms Easton's view is that replacing '*not adversely affect*' with '*maintain*' better reflects the '*no more than minor*' direction of the RPS. Whereas, Ms Styles considered maintenance and enhancement is not supported by the higher order documents. The Panel considers the word '*maintain*' is required in the absence of the word '*protect*' and the direction of the higher order statutory documents. The Panel considers this is more enabling than '*not adversely affect*'

207. The Panel notes the wording in Appendix 1 for NFL-P1 does not reflect the wording recommended in Ms Easton's Right of Reply which recommended adding '*that individually and together*'. This recommendation responds to questions from the Panel to Ms Easton, Ms Gilbert, Mr Bentley and Mr Leckie regarding the requested addition of 'together' from Mr Kennedy on behalf of Westpower. While the Panel agrees that adding both '*individually and together*' is desirable, it is mindful that this is not what was requested by Westpower in submissions. The Panel therefore considers not adding '*together*' is appropriate in the

absence of scope to add both '*individually and together*'. The Panel considers maintenance of the values generally encompasses both.

208. The Panel agrees with Ms Easton that the recommended amendments to NFL-P1 to give effect to the direction of the NPS-REG are appropriate. The Panel also agrees with Ms Styles that it is appropriate to add '*existing*' to clauses (f) and (g). However, the Panel considers this should be '*existing lawfully established*' and that for consistency this same phasing should also apply to clauses (d), (e) and (i). The Panel also considers the wording of clause (a) can be improved by deleting 'lawfully established' in front of 'residential' given it is superfluous.

209. The Panel agrees with Ms Easton's recommendation to add a new clause to NFL-P1(e) to include '*Upgrade of natural hazard mitigation structures where this is undertaken by a statutory agency or their nominated contractor'* but also consider this should be '*or authorised contractor acting on its behalf'* at the end to make it clear the statutory agency is in control of the works. This wording is consistent with the Panel's recommended wording Plan wide.

210. Ms Easton's Right of Reply did not further discuss the Poutini Ngāi Tahu and Te Tumu Paeroa memorandum of 14 August 2024 with agreed changes to Policy NFL-P1. The memorandum recommended addition of new clause (j) *Use and development of Māori land'* which the Panel agrees is appropriate given the interaction of outstanding natural landscapes with Māori land.

211. In relation to **NFL-P2**, the Panel disagrees with Ms Easton that use of '*otherwise minimised, remedied, mitigated or where appropriate offset or compensated*' gives effect to the RMA s6 and RPS Chapter 7B Objective 71 direction to '*protect*' outstanding natural features and values from inappropriate use and development. The Panel also disagrees that the '*more than minor*' threshold only relates to allowing activities, as jurisprudence directs that the protection of significant (outstanding) environmental values requires the avoidance of more than minor effects.

212. The Panel questioned Mr Pemberton and Ms Young in relation to the appropriate threshold of acceptable adverse effects to protect outstanding natural features and landscapes, and both agreed this would be '*no more than minor*' adverse effects.

213. The Panel considers it is appropriate to delete '*significant*' to give effect to RMA section 6(b) and the RPS Chapter 7B Objective 1 that require the protection of outstanding natural features and landscapes. Outstanding natural features and landscapes values are finite and are irreplaceable and therefore it is not necessarily appropriate to offset or compensate for any loss of values. There is no higher order direction enabling offsetting or compensation to achieve the protection of outstanding natural feature and landscapes at a policy level. To enable such 'trade offs' of outstanding areas would result in an overall reduction in values and adverse cumulative effects. The Panel considers it is appropriate to direct that where adverse effects on outstanding NFL values cannot be avoided, these must be remedied and mitigated to be no more than minor to ensure these values are protected as matters of national importance.

214. The Panel therefore accept the submission points of Forest & Bird, the Buller Conservation Group and Ms Inta that '*significant*' should be deleted from NFL-P2 to give effect to RMA s6 and RPS. However, this does recognise that minor adverse effects may be appropriate where the outstanding natural features and landscapes can be protected. The Panel considers this should be recognised in the policy by including the '*no more than minor*' threshold as a consequential amendment to deleting '*significant*'.

215. In relation to **NFL-P3**, the Panel agrees it is unnecessary to include specific reference to '*minerals extraction, exploration and prospecting'* or '*rural production activities'* given the recommended inclusion of '*land uses*' and '*other activities'*. However, the Panel consider the word '*other*' is superfluous. The Panel finds changing the order of '*landscape*' and 'feature' as recommended is also unnecessary and does not improve clarity. The Panel acknowledges the RPS uses '*together*' in reference to values but accept the opinion of the two experts questioned that effects on individual values are also important to consider as well as effects on the collective values. The Panel consider it is not necessary to add '*together'* as any assessment on the '*values*' would include both individually and collectively.

216. The Panel's consideration of the replacement of '*not adversely affected*' with '*maintained*' in relation to NFL-P1 also applies to NFL-P3. This is addressed above.

217. In relation to Transpower's request for clarification as to whether NFL-P3 applies to the National Grid, the Panel consider it does. However, the Panel considers any concerns regarding providing for the National Grid are addressed by amendments to rule NFL-R5 to clarify that additions and alteration to building and structures and minor upgrades, including Network Utility Infrastructure, are provide for; and any new activities or infrastructure have a discretionary activity pathway. The Panel also note that NFL-P3 would need to be read in conjunction with NFL-P5 which consideration of functional and operational needs amongst other matters.

218. In relation to **NFL-P4**, the Panel agrees with Ms Easton that use of '*avoid, remedy or mitigate'* is appropriate given the context used. The Panel accepts the recommended addition of a new clause '*and limits landform modification through earthworks*' (as requested by the Director General S602.090) but considers this should be '*and <u>minimises</u> landform modification <u>from</u> earthworks*' to be clearer and to use consistent wording with the other clauses. The Panel considers replacing '*soften outlines*' (requested by Ms Inta) with 'reduce visual effects' in the wording of new clause (e) would be clearer and was supported by Ms Gilbert in response to Panel questions at the hearing.

219. The Panel agree that '*limiting*' is appropriate given the rules limit structure height. However, the Panel consider use of '*limiting*' in the context of clauses (c) and (d) is unclear and should be replaced with '*minimising*' rather than '*reducing*' as sought by Manawa. The Panel notes that inclusion of a new definition for '*minimise*' was recommended in Appendix 1 of the s42A Report for the Introduction and General Provisions Hearing; and consider the use of *minimising* is therefore more appropriate and that this definition[26] avoids the need to add the qualifier '*where these mitigation measures are practicable*', as requested by Manawa (S438.090) and Westpower (S547.288).

220. The Panel accepts Ms Easton's recommended amendments in relation to **NFL-P5** to reframe the policy as requested by Forest & Bird (S250.231) and Terra Firma Mining Limited (S537.016). However, the Panel considers the words '*in addition to the above policies'* is superfluous given any assessment must consider all relevant policies.

221. The Panel rejects the amendment sought by Transpower (S299.081) in its tabled statement (dated 8 February 2024) to insert '*within outstanding natural features or natural landscapes*' for clarity, as this policy may be relevant when assessing land use or subdivision activities adjacent to ONFL areas.

[26] Recommended definition - **Minimise** means to reduce to the smallest amount reasonably practicable.

222. The Panel accepts the Director General's submission point (S602.091) in relation to providing an assessment of alternatives. The Panel considers this requirement would assist an assessment under clause (e) of '*The functional, technical, operational or locational need of any activity to be sited in the particular location*'. The Panel therefore recommends adding '*including an assessment of alternative sites*' at the end of clause (e).

223. The Panel notes Appendix 1 of the Right of Reply did not include '*or features*' on the end of clause (a), as requested by the Director General. This appears to be an omission given the statement in paragraph 169 of the s42A Report that this addition was supported to correct an error. The Panel accepts the Director General's submission point and agrees with the s42A Report that '*features*' should be added to clause (a).

224. The Panel considers Ms Easton's recommendation to add a new clause NFL-P5(k) '*The extent to which an activity or structure is lawfully established'* to address the submission point of Bathurst (S491.022) is unnecessary. Any assessment of the effects of a proposal on the 'existing environment' requires consideration of the presence of existing lawfully established activities, including existing land use activities, existing authorisations and land use zoning, as highlighted by Ms Young for the Director General. The Panel also notes clause (a) (as amended by the Panel) would require consideration of the nature, scale and extent of modification of the of existing environment. For these reasons, the Panel is unconvinced the addition of new clause (k) is required.

225. The Panel accepts Ms Easton's recommendation to add a new clause NFL-P5(l) (now new clause (k)) to address the submission points of the Director General, and Ms Inta and the Buller Conservation Group.

226. The Panel also accepts Ms Easton's recommendation to delete '*Also where relevant refer to the policies in the Energy, Infrastructure and Transport Chapters*' after NFL-P7 given this is an error and it is unnecessary.

227. Ms Easton's Right of Reply did not further discuss the Poutini Ngāi Tahu and Te Tumu Paeroa memorandum of 14 August 2024 with agreed changes to Policy NFL-P5. The memorandum recommended addition of new clause (k) '*any effects on values or attributes of Māori land'*. The Panel is unsure what '*or attributes'* might refer and recommends instead adding the words '*any effects on values of Māori land'*.

228. In relation to **NFL-P6**, the Panel accepts Ms Easton's recommended amendments to partly accept the submission point of Poutini Ngāi Tahu. The Panel accepts the recommendation to add 'as outlined within an Iwi/Papatipu Rūnanga Management Plan' but consider this should be '*including as outlined'*. The Panel also accept the submission point to delete reference to minimising adverse effects. The Panel considers there is no scope to add '*specified Māori land*' within the Poutini Ngāi Tahu submission.

229. In relation to **NFL-P7**, the Panel notes that following the hearing and further discussions with Poutini Ngāi Tahu, Te Tumu Paeroa withdrew submission point S440.031 on NFL-P7[27]. The Panel considers Ms Easton's recommended amendment shown in Appendix 1 of the Right of Reply responds to this submission and therefore is no longer within scope given the withdrawal of the submission. However, the Panel notes that Appendix 1 of the Right of Reply deletes '*Also where relevant refer to policies in the Energy, Infrastructure and Transport*

[27] Letter dated 22 August 2024 to Hearing Panel from Ngahuia Huirama on behalf of Te Tumu Paeroa – the Office of the Māori Trustee

Chapter' from below the policies and adds it to the Overview. The Panel accept this recommended change, which is addressed above in relation to the Overview.

Hearing Panel's Recommendations

230. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submissions identified in the footnotes below are accepted or accepted in part, and recommend that changes are made to the Natural Landscape and Features policies as follows (noting that the policies have been renumbered as a result of a new NFL-P1):

NFL- P1

To identify Outstanding Natural Landscapes on the West Coast/Te Tai o Poutini by:

a. Assessing the values and characteristics of the landscapes according to the following factors:

i. Physical characteristics and values;

ii. Perceptual characteristics and values;

iii. Associative characteristics and values

b. Including these on the planning maps as Outstanding Natural Landscapes; and

c. Describing the characteristics and values of each Outstanding Natural Landscape within Schedule Five.

NFL – P2

Provide for activities within outstanding natural landscapes described in Schedule Five and outstanding natural features described in Schedule Six where they ~~do not adversely affect~~ **maintain**[28] the values that contribute to a natural feature or landscape being outstanding and are for:

a. Existing land uses and lawfully established activities including ~~existing~~ **residential activities,**[29] **regionally significant infrastructure,**[30] network utilities, ~~energy~~ **renewable electricity generation**[31] activities, **mineral extraction**,[32] agricultural, horticultural and pastoral activities;

b. Conservation activities;

c. Recreational activities;

l. Any effects on values of Māori land.[67]

NFL – P7

Enable the use of Māori Purpose Zoned land in outstanding natural landscapes and on outstanding natural features where land use and subdivision **are** ~~is~~[68] consistent with tikanga and mātauranga Māori ~~and minimises adverse effects on the outstanding values of the landscape or feature~~ **as outlined within an Iwi/Papatipu Rūnanga Management Plan.** [69]

NFL – P8

Consider the incorporation of mātauranga Māori principles into the design, development and/or operation of activities in outstanding natural features and landscapes with cultural, spiritual and/or historic values, interests or associations of importance to Poutini Ngāi Tahu and opportunities for Poutini Ngāi Tahu and to exercise their customary responsibilities as mana whenua and kaitiaki in respect of the feature or landscape.

~~Also where relevant refer to policies in the Energy, Infrastructure and Transport Chapters.~~

2.5. NFL Rules

Submissions and Further Submissions

231. The s42A Report grouped the NFL rules into those relating to:

[63] Clause 16(2) First Schedule of the RMA
[64] Westpower Limited S547.292
[65] Buller Conservation Group S552.083 and Frida Inta S553.083
[66] Director General of Conservation S602.091
[67] Te Tumu Paeroa – the Office of the Māori Trustee S440.030 and Te Rūnanga o Ngāi Tau, Te Rūnanga of Ngāti Waewae and Te Rūnanga o Makaawhio FS41.453
[68] Clause 16(2) First Schedule of the RMA
[69] Te Rūnanga o Ngāi Tau, Te Rūnanga of Ngāti Waewae and Te Rūnanga o Makaawhio S620.163

- natural hazard mitigation;
- residential activities;
- other permitted activities;
- activities requiring resource consent; and
- subdivision within ONL.

232. In relation to **hazard mitigation**, a Table on pages 64-67 of the s42A Report summarised 18 submission points and five further submission points on rule **NFL-R3;** and eight submission points on **NFL-R9**. Three submission points supported NFL-R3 as notified, 14 sought amendments and one requested it be deleted. Six submission points requested amendments to NFL-R9 and two requested it be deleted.

233. In relation to **residential activities**, a Table on pages 70-74 of the s42A Report summarised nine submission points relating to rule **NFL-R1;** 13 submission points relating to **NFL-R5**, 14 submission points relating to **NFL-R6;** and 16 submission points relating to **NLF-R8.** All submission points sought amendments.

234. In relation to **other permitted activities**, a Table on pages 76-86 summarised 11 submission points and one further submission point relating to rule **NFL-R1;** six submission points relating to **NFL-R2**, nine submission points relating to **NFL-R4;** five submission points and one further submission point relating to **NLF-R5**; 18 submission points and 75 further submission point relating to **NLF-R6**; nine submission points relating to **NFL-R7**; and 12 submission points and four further submission point relating to **NFL-R8.**

235. In relation to **activities requiring resource consent**, a Table on pages 94-100 summarised 23 submission points and five further submission points across multiple rules; 15 submission points and two further submission points point relating to rule **NFL-R10;** two submission points relating to **NFL-R11**, seven submission points relating to **NFL-R12;** two submission points relating to **NLF-R13**; 10 submission points **NLF-14**; and 14 submission points relating to **NFL-R15.**

236. In relation to **subdivision with ONL**, a Table on pages 106-108 summarised 16 submission points and three further submission points.

237. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

Section 42A Report

238. The s42A Report highlighted submissions that sought a consistent approach in the rule framework for activities within SNA and ONL. It supported this but noted some differences in the statutory documents to give effect to.

239. The s42A Report considered the submissions to the natural hazard mitigation activity rules for **NFL-R3** and **NFL-R9** together given the latter rule is the default to the former rule. It did not support submissions that sought more enabling rules within ONFL areas. It also noted the opposition to the permitted and controlled activity rules for natural hazard mitigation activities within ONFL areas and recommended to change this to restricted discretionary status. It considered '*natural hazard mitigation activities'* was too wide and recommended

'*natural hazard mitigation structures*' only be permitted. It considered who constructed the structure was a relevant matter because a statutory agency would look at the wider hazard and have a higher degree of oversight, design and awareness of unintentional environmental effects. It recommended permitting the maintenance and repair of lawfully established natural hazard mitigation structures; and the upgrading of lawfully established natural hazard structures by a statutory agency. It recommended new natural hazard mitigation structures and upgrading lawfully established structures within ONFL areas should require resource consent as a restricted discretionary activity under NFL-R9.

240. The s42A Report recommended changes to NFL-R3 to permit the repair and maintenance of lawfully established structures; and the upgrade of hazard mitigation structures undertaken by a statutory agency or their nominated contractor.

241. In relation to NFL-R9, the s42A Report recommended changes to make hazard mitigation structures that do not meet NFL-R3 a restricted discretionary activity. It noted the submission points made by Manawa may warrant a separate rule for temporary energy activities. It supported the addition of the following three new clauses in response to submissions –

- *Identifying and avoiding adverse effects on Poutini Ngāi Tahu values;*
- *Managing adverse effects on historical, cultural and biodiversity values; and*
- *Amenity and visual effects*

242. The s42A Report considered the submissions to rules **NFL-R1**, **NFL-R5**, **NFL-R6** and **NLF-R8** relating to residential activities within ONFL together. Overall, it did not support any changes to make the rules more enabling or to amend the limits, given the requirement to protect ONFL values. It did not support providing for residential development within ONFL as a permitted activity, due to the potential to create cumulative effects. It considered the 5m height limit for new buildings was appropriate given it provided for a single storey building and anything higher than this would need careful design and implementation to avoid cumulative effects on outstanding values. It also noted the ability to refuse consent was important within ONFL areas. Similarly, it concluded the 1m cut height and 500m^3 volume for earthworks within ONFL were appropriate to avoid significant adverse effects. It did not support removing reference to the '*coastal environment*' given the structure of the Plan and the requirements of the National Planning Standards. It noted the NFL Overview stated that where buildings and structures located within ONFL areas were in the coastal environment, the Coastal Environment Chapter provisions applied. However, to make this clearer to Plan users, it recommended including the following Advice Note in NFL-R8:

> *Where buildings and structures are located in the Coastal Environment, the provisions in the Coastal Environment Chapter apply.*

243. The s42A Report considered the submission points relating to rules **NFL-R1, NFL-R2, NFL-R4, NFL-R5, NFL-R6, NFL-R7** and **NFL-R8** relating to other permitted activities together**.**

244. In relation to **NFL-R1,** it recommended deleting '*railway*' from NFL-R1 and replacing '*critica*l' with '*regionally significant*' to be consistent with the wider Plan. It did not support creating a hierarchy between the provisions in the ECO and CE Chapters given all matters of national importance must be provided for. It did not support including '*minor upgrading*' given this was not defined but '*upgrading*' was defined but recommended NFL-R5 be amended to allow for the upgrading of buildings and structures associated with energy activities and infrastructure. It did not support the addition of '*energy activities'* given these were included

in definitions of '*infrastructure', 'network utilities'* and '*regionally significant infrastructure'*. It also did not support adding '*rural production activities*' given this was undefined and the term was very wide. It supported removing reference to '*vegetation clearance*' given this is addressed in the ECO Chapter.

245. In response to questions regarding the 5m height limit in NFL-R1, Ms Easton noted that the Buller District Council's plan provisions had been quite restrictive and that some consider 5m is too high to avoid cumulative effects on outstanding values.

246. In relation to **NFL-R2**, the s42A Report highlighted that the rule was deliberately restrictive to minimise cumulative effects and therefore it did not support changes to be more enabling. It did not support recognising the proposed aerial cableway sought by Skyline Enterprises Ltd as a permitted activity and considered such a development should be appropriately considered as a discretionary activity under NFL-R15.

247. In relation to **NFL-R4**, the s42A Report did not support making the rule more enabling without further information from submitters. No changes were recommended.

248. In relation to **NFL-R5**, the s42A Report supported amendments to clarify it applied to 'Energy Activities and Infrastructure' and that the 5m height limit applied to the addition or alteration. It did not support Manawa's request to enable 30% increases in height given this would allow a 9m high structure to be increase to 12m as a permitted activity.

It recommended the addition two new clauses to limit the scale of any additions or alterations and to require compliance with the permitted activity standards in Rule INF-R7 and Rule ENG-R4, as follows:

- *The maximum area of any addition is no greater than 50m^2, or 10% of the total floor area, whichever is the greater; and*

- *Any upgrades to infrastructure are undertaken by a network utility operator in accordance with the relevant Permitted Activity standards in Infrastructure Rule – INF – R7 and Energy Rule ENG – R4.*

249. In relation to **NFL-R6**, the s42A Report recommended several deletions in response to submission points. It did not support changes to further permit the development, use and maintenance of multi-use recreation trails given conservation activities are permitted and NFL-R6 provides for 500m^3 of earthworks in any 12-month period. It noted the ECO chapter rules specifically provide for vegetation clearance for track formation; and that no land use consents are required for such work undertaken by DOC if it is consistent with the Conservation Management Strategy and Park Management Plans, regardless of the scale of the activity. It did not support adding '*or 4ha whichever is the larger'* to clause (3)(b) because only a 'handful' of properties in Iveagh Bay at Lake Brunner were affected and this did not justify making the plan more complex. It did not support amendments to NFL-R6 to permit energy activities, transport infrastructure undertaken by statutory agencies, or mineral extraction given the potential for adverse effects on ONFL values. It did not consider reference to the need to comply with the ECO chapter rules for vegetation clearance was necessary.

250. The s42A Report did not address the Director General submission point S602.094 to change NFL-R6 default from a controlled activity to a restricted discretionary activity. However, the Panel consider this submission point below.

251. In relation to **NFL-R7**, the s42A Report recommended an amendment to include '*Poutini Ngāi Tahu Activities*' to correct a drafting error. It did not consider adding a new clause '*subject to rules in the ECO chapter and rules and policies in NFL'* was necessary given the compliance with the ECO provisions is a requirement of the Plan and as a permitted activity an assessment of the NFL policies was not required.

252. In relation to **NFL-R8**, the s42A Report recommended amendments to delete the word '*stock*' from clause (2) and to add '*and for energy network utilities Rule ENG-R4*' to clause (4) but did not support widening this to include '*energy activities*'. It supported adding '*single*' and '*per allotment*' to clause (5) and a new subclause (b) '*The gross floor area of any building does not exceed 100m*^{2}'. It recommended adding '*and mahinga kai activities'* to clause (6); and a new clause to include '*A bridge constructed for Temporary Military Training Activity'*.

253. The s42A Report did not support deleting the provision for new network utility structures within ONFL in rule NFL-R8 given the direction of the NPSET and the RPS. Similar to NFL-R7, it did not consider cross referencing to the ECO rules was necessary. It also did not consider a standard for parks facilities and park furniture within ONFL was necessary given areas managed by DOC were not subject to the Plan provisions.

254. In response to questions regarding the changes supported to NFL-R8(4) in paragraph 274 of the s42A Report, Ms Easton agreed to adding the words addressing height and area limits, as requested by Chorus NZ Ltd, Spark NZ Trading Ltd and Vodafone NZ Ltd (S663.049). She acknowledged these had been inadvertently omitted from the recommendation and Appendix 1.

255. The s42A Report considered the submission points relating to rules **NFL-R10, NFL-R11, NFL-R12, NFL-R13, NFL-R14,** and **NFL-R15** relating to activities requiring resource consent together. It supported adding the following three new clauses to all controlled and restricted NFL rules:

- *Adverse effects on historical, cultural and biodiversity values;*
- *Amenity and visual effects; and*
- *Identifying and avoiding impacts on Poutini Ngāi Tahu values.*

256. The s42A Report did not support a new restricted discretionary activity rule for mineral extraction and noted this would be subject to rules NFL-R14 and NFL-R15. It considered the strategic direction to support minerals extraction does not outweigh RMA section 6. It concluded a discretionary activity status for mineral extraction was appropriate to address uncertainty as to adverse effects and to give a high degree of oversight the ONFL status warrants. It also did not support downgrading discretionary activity rules to restricted discretionary for these reasons. It did not support adding a new clause '*subject to rules in the ECO chapter and rules and policies in NFL*'.

257. In relation to **NFL-R10**, the s42A Report recommended adding '*Upgrade, Maintenance, Operation and Repair*' to clause (1)(d) and replacing '*facility*' with '*activity*'. It recommended replacing '*critical*' with '*regionally significant*' and deleting clause (2). It recommended the same new clauses as matters of discretion, as recommended above in relation to NFL-R9. It supported changing the rule activity status from a controlled activity to restricted discretionary to be consistent with the approach taken in the Natural Character of Waterbodies and other ONFL rules.

258. The s42A Report considered that it was appropriate to have a new restricted discretionary activity rule for earthworks associated with mineral extraction within MINZ and BCZ special zones that overlap with ONL. It noted the areas of overlap with ONL related to:

- Dunganville Mineral Extraction Zone;
- Buller Coalfield Zone: Denniston Plateau – Escarpment Mine and Te Kuha Mine;
- Reefton Mineral Extraction Zone;
- Inangahua Mineral Extraction Zone; and
- Paparoa Range – Paparoa Coalfield Mineral Extraction Zone.

259. The s42A Report recommend the following wording for the new rule:

> ***NFL 10A*** *Mineral Extraction in the Buller Coalfield Zone and Mineral Extraction Zone within an Outstanding Natural Landscape described in Schedule 5.*
>
> *Activity Status Restricted Discretionary*
>
> *Where:*
>
> *1. These are on land within the Buller Coalfield Zone or a Mineral Extraction Zone; and*
>
> *2. This includes earthworks and buildings associated with the activity. Discretion is restricted to:*
>
> *a. Any requirements for landscape evaluation;*
>
> *b. Managing adverse effects on historical, cultural, and biodiversity values;*
>
> *c. Amenity and visual effects;*
>
> *d. Managing effects on public access and natural character;*
>
> *e. Effects on the values that make the feature Outstanding;*
>
> *f. Identifying and avoiding adverse effects on Poutini Ngāi Tahu values;*
>
> *g. Extent and design of earthworks; and*
>
> *h. Landscape measures.*
>
> *Activity status where compliance not achieved: Discretionary*

260. In relation to **NFL-R11**, the s42A Report recommended including 'Poutini Ngāi Tahu Activities' to correct the same drafting error identified in NFL-R7.

261. In relation to **NFL-R12**, the s42A Report recommended including the three new matters of discretion recommend above in relation to NFL-R9 and NFL-R10, and three new additional matters, as follows:

- *Any functional or operational needs that relate to the proposal and its location;*
- *Any matters of public safety; and*

- *Any positive effects at a local, regional or national level.*

262. The s42A Report did not support changing the activity status from restricted discretionary to discretionary given the degree of restriction proposed and the direction of the RMA and RPS. It considered that providing there were clear and appropriate matters of discretion, there were a range of appropriate activities that could be located within ONFL without degrading the values. It noted that given the large extent of ONFL, it was important to provide a consent pathway for activities that have a functional and operational need to occur in these areas and for appropriately designed and located residential activities.

263. The s42A Report noted Manawa sought the deletion of 'landscape measures', as a matter of discretion, due to overlaps with other matters of discretion. However, it did not support this as it could include planting or requirements on the colour and reflectivity of materials.

264. In relation to **NFL-R13**, the s42A Report recommended the activity status be changed from discretionary to non-complying due to the potential for plantation forestry to have very significant adverse effects on ONFL values.

265. In relation to **NFL-R14**, the s42A Report recommended a consequential change to delete 'controlled' given the amendments to change the two controlled activity rules to restricted discretionary.

266. In relation to **NFL-R15**, the s42A Report did not recommended any changes, except a consequential change to add 'mineral extraction' from the recommendation to include a new rule for mineral extraction in the MINZ and BCZ zones.

267. The s42A Report also considered the relevant submission points on subdivision within ONL in relation to Rule **SUB-R11**. It supported the addition of three new clauses as follows:

- *Matters outlined in Policies NFL P1 – NFL -P9 as relevant;*
- *Measures to address any natural hazards or geotechnical constraints; and*
- *Management of potential reverse sensitivity effects on existing land uses, including network utilities and regionally significant infrastructure, rural activities or significant hazardous facilities*

268. The s42A Report did not support replacing SUB-R11(b) with a 15mx15m building platform; or deleting '*and the need for access to be provided to any esplanade reserve or strip created*' from SUB-R11(f) given no reasons were provided for the requested changes sought by submitters.

269. The s42A Report did not support changing the activity status of SUB-R11 to a discretionary activity, given the high degree of management of activities provided by the overlays which restrict activities within these areas, ONFL, SNA and the coastal environment. It outlined the approach taken in other districts was predominantly as a discretionary activity but noted that most Councils do not have the number and extent of ONL identified on the West Coast. It considered Tasman was the most similar and that it is restricted discretionary or discretionary depending on the rural zone type.

Hearing and Submitter Evidence/Statements

270. Transpower advised it continued to seek the replacement of clause NFL-R6(2)(b) with *'An energy activity undertaken'*.

271. Ms Young, for the Director General, confirmed support for the s42A Report recommendations in relation to the rules, except for the 500m^3 volumetric limit for earthworks in NFL-R6(3)(b) which she sought be reduced to 200m^3 due to potential disturbance of high geodiversity. In relation to NFL-R8, she highlighted that the wording of RPS Policy 3 indicates regionally and nationally significant electricity transmission, distribution and renewable electricity generation infrastructure will require a resource consent and would not be permitted activities.

272. In relation to SUB-R11, Ms Young accepted the s42A Report recommendation to retain a restricted activity status based on the inclusion of a new matter of discretion – 'Matters outlined in Policies NFL P1 – NFL P9 as relevant'. She said "*Provided the matters of restriction do allow for an assessment against the policies of the Plan, that a Restricted Discretionary Activity is appropriate.*"

273. Mr Leckie, for Bathurst, highlighted the need to not intentionally undermine the anticipated mineral extraction activities within the MINZ and BCZ where earthworks are permitted.

274. Ms Hunter, for Bathurst, agreed with the s42A Report recommendation that new mineral extraction activities within ONL should be a restricted discretionary activity under new rule NFL-10A. However, she highlighted the need to review these overlaps to ensure these special purpose zones were free of any ONL encumbrance. She noted the matters of discretion appeared to cover broader matters than landscape and visual amenity and considered 'landscape measure' was unclear. She recommended redrafting the list as follows:

- *The effects on landscape and visual amenity values, and view of the activity particularly from public roads and areas; and*
- *Mitigation and remediation measures.*

275. Ms Styles noted that Manawa is not a statutory agency and that NFL-R3 and NFL-R9 were therefore unreasonably restrictive given other parties establish, operate and maintain hazard mitigation structures to provide for RSI and protect infrastructure from natural hazards. To resolve this, she requested the following amendments to NFL-R3:

> ***NFL - R3***
>
> *Repair and Maintenance, and Upgrading of Natural hazard mitigation ~~activities~~ structures including earthworks in an Outstanding Natural Landscape described in Schedule Five*
>
> *Activity Status Permitted*
>
> *Where:*
>
> 1. *The natural hazard mitigation structure has been lawfully established and is to protect regionally significant infrastructure ~~activities are to protect critical infrastructure~~;*
> 2. *Any upgrading of natural hazard mitigation ~~activities~~ structures is ~~are~~ undertaken by a statutory agency or their nominated contractor or the owner of the regionally significant infrastructure where there is no change to more than 10% to the overall dimensions, orientation or outline of the structure as of 14 July 2022; and*

3. *The work does not involve modification of an Outstanding Natural Feature described in Schedule Six.*

Activity status where compliance not achieved: Controlled

276. Ms Styles supported the controlled activity status for rule NFL-R10 and deletion of 'landscape measures' as a matter of discretion in NFL-R12, unless the meaning was clarified.

277. In her supplementary evidence for Manawa, Ms Styles recommended inclusion of the following to NFL-R1:

Where:

1. Earthworks, structures and vegetation clearance associated with renewable electricity generation activities are permitted under the Energy and Ecosystems and Biodiversity chapters.

278. In relation to NFL-R5 and NFL-R6, Ms Styles recommended the following amendments:

NFL - R5

Additions or alterations to buildings and structures including upgrades to ~~Energy~~ Renewable Electricity Generation Activities, Electricity Generation Activities and Regionally Significant Infrastructure within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six

Activity Status Permitted

1. *The maximum height of any addition or alteration to buildings and structures above ground level is 5m or a 10% increase above the existing building / structure height, whichever is the greater; and*

2. *The maximum area of any addition is no greater than 50m^2, or 10% of the total floor area, whichever is the greater; and*

3. *Any upgrades ~~to infrastructure are undertaken by a network utility operator~~ are in accordance with the relevant Permitted Activity standards in Infrastructure Rule – INF – R7 and Energy Rule ENG – R4.*

Advice Note: Where activities are located in the Coastal Environment, the provisions in the Coastal Environment Chapter apply. Activity status where compliance not achieved: Restricted Discretionary

NFL - R6

Earthworks within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six

Activity Status Permitted

Where:

1. All performance standards for Earthworks Rule EW - R1 are complied with; and

2. This is ancillary to:

a. An infrastructure activity undertaken by a network utility operator ~~in accordance with the Permitted Activity standards in Infrastructure Rule INF - R7~~; or

b. An Electricity Transmission or Distribution Activity, or Renewable Electricity Generation Activity, in accordance with the Permitted Activity standards in Energy Rule ENG - R4; or

3. For other earthworks (other than those provided for in clause 1 and 2 above), the following standards are complied with:

a. The cut height or fill depth does not exceed one metre vertically; and

b. No more than 500m3 of earthworks are undertaken/12 month period/site.; and

c. ~~The earthworks are undertaken outside of the Coastal Environment.~~

279. Mr Bentley noted that the meaning of 'landscape measures' as a matter of discretion was ambiguous and that it needed to be either deleted or clarified.

280. Ms Leveson for Hort NZ sought amendments to insert 'rural production activities' to NFL-R1 to ensure that horticulture activities were provided for. She considered NFL-R1 was a fitting place to provide for horticultural activities enabled under NFL-P1. She supported the s42A Report recommended amendments to NFL-R8 but considered it was unclear whether the rule provided for activities that do not occur within a building.

281. Mr Kennedy, for Westpower, highlighted their support for a controlled activity status for NFL-R9 and considered the recommended change to restricted discretionary for any RSI as they related to Westpower activities required resolution. He requested the addition of a new matter of discretion - 'The operational and functional needs of infrastructure, including regionally significant infrastructure.'

282. In relation to NFL-R5, Mr Kennedy supported the recommended amendments to link any upgrades to infrastructure undertaken by a network utility operator to rules INF-R7 and ENG-R4 to avoid the 5m height limit in clause (1).

283. In relation to NFL-R10, Mr Kennedy supported retention of a controlled activity status for the maintenance, operation and upgrading of existing network infrastructure. He noted NFL-R10 was not intended to apply to the installation of network infrastructure (given recommended NFL-R6(2)(a)) and NFL-R12 applied to all other network infrastructure activities. He considered these rules needed to be rationalised on this basis; and that the matters of discretion should be the same for both rules if the restricted discretionary status is recommended.

284. KiwiRail supported deleting 'railway' in NFL-R1 on the basis that the recommended definition of 'Regionally Significant Infrastructure' includes 'rail network'.

285. Ms Inta for herself and the Buller Conservation Group requested the inclusion of 'per title or 4ha, whichever is the larger' in NFL-R6; and considered NFL-R12(k) making 'positive effects' a matter of discretion was a nonsensical inclusion.

286. Mr Mills requested a series of permitted activity rules to allow for future bush clearing, earthworks, waterway culverts, bridge building and any activities associated with the development, use and maintenance of multi-use recreation trails. He considered these rules should cut across all overlays except for wetland layers.

Reporting Officer Reply Evidence

287. Ms Easton highlighted the intention of the Plan is that where ONL and ONF are located in the Coastal Environment, the provisions of the Coastal Environment Chapter apply, as outlined in the Overview and the provision of advice notes. She recommended the addition of an advice note to rule NFL-R8 based on the advice notes included for NFL-R5 and NFL-R6 but with the following consistent wording:

> *Where activities are located in the Coastal Environment, the provisions **are located** in the Coastal Environment Chapter **and this rule does not** apply.*

288. Ms Easton highlighted the withdrawal of Te Tumu Paeroa's three submission points relating to the NFL policies removed any scope for requested amendments to the rules, as no submission were made on the NFL rules.

289. Ms Easton highlighted the recommended definition for 'minor upgrade' and considered this enabled providing for minor upgrade of renewable energy generation activities and network utility infrastructure (as defined in the Plan) as a permitted activity under Rule NFL-R5. She considered this avoided the need to cross reference to the Energy and Infrastructure Chapters.

290. In response to Ms Styles' evidence in relation to NFL-R6, Ms Easton noted that the recommended deletion of clause (b) because electricity generators do not meet the definition of 'network utility operator'. She remained of the view it was not appropriate to add 'ancillary earthworks and vegetation clearance' associated with additions/alterations to structures and buildings permitted in Rule NFL-R5. However, on reflection she agreed that ancillary earthworks associated with additions/alternations to buildings and structures should be provided for in Rule NFL-R6 by replacing clause (b) with the following:

> ***Additions or alterations to a building or structure, including minor upgrades of renewable electricity generation and network utility infrastructure provided for in Rule NFL – R5.***

291. Ms Easton confirmed her recommended further amendments to the Rules NFL-R5 and NFL-R6 shown in yellow highlight in Appendix 1 of the Right of Reply, as follows:

NFL – R5 *Additions or alterations to buildings and structures **including minor upgrades to** ~~Energy~~ **Renewable Electricity Generation Activities and Network Utility Infrastructure** within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six*

Activity Status Permitted

1. ***This is a minor upgrade of infrastructure undertaken by a Network Utility Operator or of a Renewable Electricity Generation Activity; or***

2. For all other activities:

i. *The maximum height of **any addition or alteration** to buildings and structures above ground level is 5m; and*

ii. The maximum area of any addition is no greater than 50m², or 10% of the total floor area, whichever is the greater. ~~*; and*~~

~~*3. Any upgrades to infrastructure are undertaken by a network utility operator in accordance with the relevant Permitted Activity standards in Infrastructure Rule – INF – R7 and Energy Rule ENG – R4.*~~

Advice Note: Where activities are located in the Coastal Environment, the provisions in the Coastal Environment Chapter apply.

Activity status where compliance not achieved: Restricted Discretionary

NFL – R6 *Earthworks within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six*

Activity Status Permitted

Where:

1. *All performance standards for Earthworks Rule EW - R1 are complied with; and*

2. *This is ancillary to:*

   a. *An infrastructure activity undertaken by a network utility operator* ~~*in accordance with the Permitted Activity standards in Infrastructure Rule INF - R7;*~~ *or*

   b. ~~*An energy activity undertaken by a network work utility operator in accordance with the Permitted Activity standards in Energy Rule ENG - R4;*~~ ***Additions or alterations to a building or structure, including minor upgrades of renewable electricity generation and network utility infrastructure provided for in Rule NFL – R5.***

3. *For other earthworks, the following standards are complied with:*

   a. *The cut height or fill depth does not exceed one metre vertically;* ***and***

   b. *No more than 500m^3 of earthworks are undertaken/12 month period/site.; and*

   ~~*c. The earthworks are undertaken outside of the Coastal Environment.*~~

Advice Note:

~~*1. Earthworks associated with natural hazard mitigation activities are subject to Rule NFL - R340.*~~

2. *This rule also applies to plantation forestry activities, where this provision is more stringent than the NES - CF.*

3. *Where activities are located in the Coastal Environment, the provisions* ***are located*** *in the Coastal Environment Chapter* ***and this rule does not apply****.*

Activity status where compliance not achieved: Controlled

Refer to the Coastal Environment Rules for Earthworks in the Outstanding Coastal Environment

Hearing Panel's Evaluation

292. The Panel notes the s42A Report concludes the limits in rules NFL-R1, NFL-R5, NFL-R6 and NLF-R8, relating to activities within ONFL are sufficient to avoid significant adverse effects. The

Panel considers this is not consistent with the direction of the RMA s6 or the provisions of the RPS which require the protection of ONFL from inappropriate use and development. As discussed above, the Panel accepts that protection requires the avoidance of more than minor adverse effects. The Panel has kept this threshold of effects in mind in making its recommendations on the rules.

293. The Panel has carefully considered the submissions seeking more enabling rules and those seeking more restrictive rules and is satisfied the rules strike a balance between protecting outstanding ONFL and enabling appropriate use, development and subdivision. The Panel accepts the limits and standards recommended by Ms Easton are appropriate to avoid adverse cumulative effects.

294. The Panel rejects the submission point of Mr Mills requesting permitted activity rules to allow for future bush clearing, earthworks, waterway culverts, bridge building and any activities associated with the development, use and maintenance of multi-use recreation trails, which would cut across all overlays except for wetland layers. The Panel is satisfied the rules appropriately provide for activities that have minor adverse effects on ONFL.

295. In relation to **NFL-R1**, the Panel accepts Ms Easton's recommendation to retain the rule as notified, except for deleting '*railway*' replacing '*critica*l' with '*regionally significant*' to be consistent with the wider Plan.

296. In relation to **NFL-R2**, the Panel agree with Ms Easton that permitted conservation activities is intended to be restrictive to minimise cumulative adverse effects on outstanding values. The Panel agrees that any proposed aerial cable should not be provided for as a permitted activity under NFL-R2.

297. In relation to **NFL-R3** and **NFL-R9**, the Panel agree that a consistent approach in the rule framework for activities within SNA and ONL is desirable. The Panel also agree with Ms Easton that '*natural hazard mitigation activities*' is too wide in NFL-R3 and accept the recommendation this should be limited to '*natural hazard mitigation <u>structures'</u>*. The Panel recommends this change is also made in Advice Notes (1) and (2) and in NFL-R9, which were not shown in Appendix 1 of the Right of Reply.

298. In relation to **NFL-R3**, the Panel agrees with Ms Easton that the entity that constructs the natural hazard mitigation structure is a relevant matter; and accept a statutory agency would need take a wider assessment to hazard mitigation than an individual property would, with clear responsibility for controlling the design, construction and maintenance of the structure. The Panel accepts the recommended changes to the rule to permit the maintenance and repair of lawfully established natural hazard mitigation structures only; and the upgrading of lawfully established natural hazard structures by a statutory agency or their nominated contractor. The Panel considers it appropriate to include 'or authorised contractor acting on its behalf' as a consequential amendment to be consistent Plan wide.

299. The Panel has considered Ms Styles' request to add '*or the owner of the regionally significant infrastructure'* to NFL-R3 in recognition that Manawa is not a statutory agency but agree with Ms Easton that this is too broad. The Panel notes that Manawa's activities would be enabled by rule NFL-R5, which permits additions or alterations to buildings and structures, including minor upgrades to renewable electricity generation activities and network utility infrastructure within ONFL. The Panel considers this is appropriate.

300. The Panel agrees with Ms Easton that new natural hazard mitigation structures and upgrades to structures within ONFL areas not meeting NFL-R3 should require resource consent as a restricted discretionary activity. The Panel consider it is critical that the consent authority retains the ability to refuse consent to ensure ONFL values are protected.

301. In relation to **NFL-R9**, the Panel considers the wording '*will not destroy*' is not consistent with RMA section 6 and the RPS. This wording suggests significant adverse effects may be acceptable if the values that make it outstanding are not destroyed. This does not give effect to the RMA or RPS, which require the protection of outstanding NFL. The Panel recommends this is reworded to require protection of the outstanding values.

302. The Panel considers the wording of NFL-R9 should clarify that it relates to '*structures*' undertaken '*in Outstanding Natural Landscapes identified in Schedule Five and Outstanding Natural Features identified in Schedule Six'*, as the default to NFL-R3. The Panel considers NFL-R9(h) '*landscape measures'* is unclear and should be corrected to '*measures to mitigate landscape effects'*. The Panel recommends changes to NFL-R9 address these matters.

303. The Panel accepts Ms Easton's recommended changes to **NFL-R5** and **NFL-R6** (in Appendix 1 of her Right of Reply) to permit additions or alterations to buildings and structures, including minor upgrades to renewable electricity generation activities and network utility infrastructure within ONFL; and earthworks associated with these activities. However, the Panel considers the wording of NFL-R5(2)(i) is unclear and recommends this is reworded as follows:

> *The maximum height of* *any addition or alteration* ~~*to buildings and structures*~~ ***is 5m*** *above ground level* ~~*is 5m*~~***; and***

304. In relation **NFL-R6**, the Panel agrees with Ms Inta and the Buller Conservation Group that NFL-R6(3)(b) is improved by adding '*or 4ha, whichever is the greater'* and do not consider this makes the rule any more complex.

305. The Director General submitted that where the activity status of Rule NFL-R6 is not complied with, the default activity status should be restricted discretionary and not controlled. The Panel agrees and considers it is appropriate that the consent authority has the ability to refuse consent for earthworks within an ONL or ONF area to protect these outstanding values as matters of national importance under RMA s6.

306. The Panel notes that in paragraph 166 of the s42A Report, Ms Easton's recommends adding an Advice Note to NFL-R11 and RFL-R12 in response to the Director General's submission point (S602.091) in relation to the requirement to assess alternatives where there are significant adverse effects on an RMA s6 matter of national importance. However, this was not reflected in Appendix 1 of the s42A Report or Appendix 1 of the Right of Reply. The Panel consider adding advice notes is not necessary. The Panel notes the addition to NFL-P5(e) requires the consideration of alternative sites and consider this is sufficient.

307. The Panel agree with the recommendation to add new Rule NFL-10A and consider this addresses the concerns raised in relation to mining activities within the BCZ and MINZ zones.

308. The Panel notes Manawa sought the deletion of '*landscape measures'* from NFL-R12(h). The Panel accepts Ms Easton's view that the intent is to control measures to mitigate landscape effects such as planting, screening and the colour and reflectivity of materials. The Panel agrees and considers this is addressed by rewording *'Landscape measures'* to read '*Measures to mitigate landscape effects*'. The Panel tested this wording with Ms Gilbert at the hearing,

and she agreed that 'landscape measures' was unclear and supported the suggested wording. The Panel considers this change should be made to all references in the NFL rules to '*landscape measures*' to clarify what this means without changing the intent.

309. The Panel is not convinced that adding a new clause NFL-R12(k) making '*positive effects*' a matter of discretion is necessary given it is a consideration under RMA s104.

310. The Panel acknowledge the view of Ms Young who now considers that the subdivision of land with an ONL or ONF under SUB-R11 can be addressed as a restricted discretionary activity with the amendments to the matters of discretion now proposed. The Panel considers there are sufficient matters of discretion to assess the potential environmental effects of activities on identified outstanding values and attributes, and we recommend these addition matters now be included.

311. Overall, the Panel accepts Ms Easton's recommended changes in Appendix 1 of the Right of Reply, subject to the minor amendments outlined above.

Hearing Panel's Recommendation

312. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submissions identified in the footer below are accepted or accepted in part and that changes are made to the Natural Features and Landscapes Rules and Rule SUB11 as follows:

Natural Feature and Landscapes Rules	
Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.	
Permitted Activities	
NFL -R1	**Maintenance, operation and repair of lawfully established buildings, structures, network utilities, renewable electricity generation activities, fence lines, drains, roads, ~~railway, critical~~ regionally significant[70] infrastructure and tracks within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six**
Activity Status Permitted	
Advice Note: 1. Any indigenous vegetation clearance associated with maintenance and repair is subject to the provisions in the Ecosystems and Biodiversity Chapter. 2. Where activities are located in the Coastal Environment, the provisions in the Coastal Environment Chapter apply.	

[70] Manawa Energy Limited S438.092 and West Coast Regional Council S488.009

3. Where activities are located in a Historic Heritage, Notable Tree or Sites and Areas of Significance to Māori Overlay Chapter area, these provisions apply.

Activity Status where compliance not achieved: Refer to other relevant Overlay Chapter where these activities occur in multiple overlays.

NFL -R2	**Conservation Activities within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six**

Activity Status Permitted

Advice Note:

Any indigenous vegetation clearance associated with Conservation Activities is subject to the provisions in the Ecosystems and Biodiversity Chapter

Activity Status where compliance not achieved: N/A

NFL– R3	**<u>Repair, maintenance and upgrading of</u>[71] ~~N~~<u>n</u>atural hazard mitigation <u>structures</u>~~activities~~[72] including earthworks in an Outstanding Natural Landscape described in Schedule Five**

Activity Status Permitted

Where:

1. The natural hazard mitigation **<u>structure has been lawfully established</u>**~~activities are to protect critical infrastructure~~; [73]

2. ~~The~~ **<u>Any upgrading of</u>**[74] natural hazard mitigation ~~activities~~ **<u>structures</u>**[75] are undertaken by a statutory agency or ~~their nominated~~ **<u>authorised</u>**[76] contractor **<u>acting on its behalf</u>**[77]**<u>, where there is no change to more than 10% to the overall dimensions, orientation or outline of the structures as of 14 July 2022</u>**; [78] and

3. The work does not involve modification of an Outstanding Natural Feature described in Schedule Six.

Advice Notes:

1. Any indigenous vegetation clearance associated with natural hazard mitigation ~~activities~~ **<u>structure</u>**[79] is subject to the provisions in the Ecosystems and Biodiversity Chapter

2. For any natural hazard mitigation ~~activity~~ **<u>structure</u>**[80] within Outstanding Natural Landscapes in the coastal environment, refer to the Coastal Environment Chapter.

3. Where activities are located in a Historic Heritage, Notable Tree or Sites and Areas of Significance to Māori Overlay Chapter area, these provisions apply.

[71] Forest and Bird S560.233 and the Director General of Conservation S602.092

[80] Director General of Conservation S602.087 consequential amendment

Activity Status where compliance not achieved: Controlled

NFL – R4	**Demolition and Removal of a Structure within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six**

Activity Status Permitted

Advice Note: Where structures are identified as Historic Heritage Items in Schedule One, then the Historic Heritage Rules apply.

Activity Status where compliance not achieved: N/A

NFL -R5	**Additions or alterations to buildings and structures, <u>including minor upgrades to</u> ~~Energy~~ <u>Renewable Electricity Generation Activities and Network Utility Infrastructure,</u>[81] within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six**

Activity Status Permitted

Where:

1. **<u>This is minor upgrade of infrastructure undertaken by a Network Utility Operator or Renewable Electricity Generation Activity; or</u>**[82]
2. For all other activities:

<u>a.</u> The maximum height of **<u>any addition or alteration</u>**[83] ~~buildings and structures~~ **<u>is 5m</u>** above ground level ~~is 5m~~**; <u>and</u>**[84]

<u>b.</u> **<u>The maximum area of any addition is no greater than 50m², or 10% of the total floor area, whichever is the greater.</u>**[85]

Advice Note<u>s</u>:

~~1.~~ Where activities are located in the Coastal Environment, the provisions in the Coastal Environment Chapter apply **<u>and this rule does not apply</u>**.[86]

Activity Status where compliance not achieved: Restricted Discretionary

NFL – R6	**Earthworks within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six**

Activity Status Permitted

Where:

1. All performance standards for Earthworks Rule EW - R1 are complied with; and
2. This is ancillary to:

[81] Manawa Energy Limited S438.092 and Westpower S547.293
[82] Consequential amendment Manawa Energy Limited S438.092 and Westpower S547.293

SUB – R11	**Subdivision to create allotment(s) of land within the Outstanding Natural Landscape identified in Schedule Five or Outstanding Natural Feature identified in Schedule Six**

Activity Status Restricted Discretionary

Where:

1. The site is outside of the Coastal Environment;
2. The area has not been identified as an Area of Significant Biodiversity subject to Rules SUB – R8, SUB – R9 or SUB – R14
3. The area is not a Significant Natural Area identified in Schedule Four; and
4. All Subdivision Standards are complied with.

Discretion is restricted to:

a. **Matters outlined in Policies NFL P1 – NFL -P9 as relevant;**[147]

b. Ensuring that landscape or natural feature values within the overlay for which the area or feature is scheduled are maintained;

c. The size, design, shape, location and layout of allotments;

d. The provision of infrastructure and services for **transport,**[148] drinking water, wastewater and stormwater, telecommunications and energy;

e. The adequacy of water supply for firefighting;

f. **Measures to address any natural hazards or geotechnical considerations;**[149]

g. **Management of potential reverse sensitivity effects on existing land uses, including network utilities and regionally significant infrastructure, rural activities or significant hazardous facilities;**[150]

h. The requirement for financial contributions as outlined in Rules FC – R1 to FC – R12; and

i. The provision of esplanade reserves or strips, and the need for access to be provided to any esplanade reserve or strip created.

Advice Note: This rule does not apply to subdivisions to create allotments for network utilities, access or reserves which are subject to Rule SUB - R4.

SUB – R16	**Subdivision of Land within the Coastal Environment subject to an Outstanding Natural Landscape, Outstanding Natural Feature or High Coastal Natural Character Overlay**

Activity Status Discretionary

Where:

[147] Director General of Conservation S602.126
[148] Grey District Council (S608.641)
[149] Buller District Council (S608.641)
[150] Westpower Limited (S547.381)

1. No new allotments are proposed within Outstanding Coastal Natural Character areas as identified in Schedule Eight.

Activity status where compliance not achieved: Non-complying

2.6. Recommendation on Schedule Five: Outstanding Natural Landscapes - Te Rārangi Tuarima: Ngā Whenua Aotūroa Puru Rourou

Submissions and Further Submissions

313. The s42A Report summarised nine submission points supporting Schedule Five which sought it be retained as notified.

314. One submission from the TTPP Committee sought amendments to reflect the updated boundaries of the ONL from the landscape assessment review, where these cover a lesser area of land than the notified mapping (Brown Ltd September 2022 mapping). Two further submissions supported or supported this in part.

315. One submission from the BDC sought careful consideration of the individual submissions regarding land use implications and the accuracy of boundaries.

316. Six submission point sought to continue to have land excluded from an ONL. One submission point was supported by two further submissions.

317. One submission point sought new ONL area for the Denniston Plateau.

318. Three submission points sought to include 'The Pyramids' feature at Karamea in an ONL. Sixty-nine further submissions opposed the three submissions points requesting a new ONL to include 'The Pyramids'.

319. Submission points relating to specific ONL boundary adjustments are addressed in the section below.

Section 42A Report

320. The s42A Report supported using the most up to date and accurate boundaries for identified ONL.

321. The s42A Report noted the Koiterangi Lime Company's quarry is adjacent to ONL 23 but confirmed it remains outside the ONL boundaries.

322. The s42A Report did not consider the Denniston Plateau met the criteria to be identified as an ONL and rejected the submission to include it as an ONL. The Landscape Report confirmed Ms Gilbert had visited the area and considered the map of Environment Court's view on outstanding natural landscape on Denniston Plateau (as provide at the hearing by Bathurst) to inform her assessment of the landscape values of the Denniston Plateau. She considered the updated digitised mapping (January 2024) was correct given the level of modification across the Plateau meant it failed to meet the 'naturalness test'. She considered there was no need to remove any overlap of the ONL with the BCZ and noted there were other overlaps between ONL and MINZ areas.

323. The s42A Report noted the proposed lime quarry expansion at Fenian Road, Karamea is 'quarry reserve' that is outside but adjacent to Kahurangi National Park. It highlighted the area

of land known as 'The Pyramids' did not meet the criteria to be identified as an ONL. It noted Ms Gilbert would be asked to confirm this view.

324. Ms Gilbert's Landscape Report confirmed she had reviewed the updated digitised mapping (January 2024) and visited the area. She considered the general extent and configuration of ONL 1 in the vicinity to be correct - capturing the elevated undeveloped land with contiguous bush cover and excluding the elevated landform where quarrying activities are prominent and dominant. She recommended no change to the updated digitised mapping (January 2024).

325. The Addendum to the s42A Report acknowledged the poor quality of the updated Brown Ltd maps in the s42A Report. It noted that this mapping had now been digitised into the Council's Geographic Information System (GIS) mapping and updated maps for the relevant parts of the ONL discussed in Section 11 of the s42A Report were now provided.

Hearing and Submitter Evidence

326. Mr Leckie, for Bathurst, highlighted the overlap between the BCZ and ONL 41 and considered there was no clear justification in the landscape studies as to why a portion of the BCZ has been identified within the ONL and that there was inconsistency between the notified TTPP maps and the GIS shapefiles. He noted a previous Environment Court decision[151] had confirmed the Denniston Plateau did not qualify as an ONL.

327. Mr Geoff Volckman, a director of Karamea Lime Co Ltd (**KLC**), present a statement of evidence outlining background to the Fenian Road quarry site and the importance of the quarry to the community. He sought more permissive framework for mineral extraction and farming operations. He highlighted the importance of the small KLC operated lime quarry at Fenian Road, Karamea to the Buller area. He noted the TTPP Committee had recognised the mapping error in only partially zoning the quarry land in the MINZ. He noted 70 submitters opposed a new ONL overlay over the quarry area.

328. Mr Leicester Murray, a landscape architect for KLC, considered the quarry area should not be included within the coastal environment overlay and did not meet the criteria to be included as an ONL. He assessed the site with reference to Te Tangi a Te Manu and agreed with Ms Gilbert that the land should not be categorised as an ONL. He considered the quarry area should remain outside any the ONL overlay.

Evidence in Reply

329. In Reply, Ms Easton advised that Ms Gilbert had worked with the Council GIS consultant to refine the mapping of ONL. She confirmed that any of Ms Gilbert's recommendations to increase any ONL areas were largely restricted to public conservation land; and that in most cases Ms Gilbert's review had reduced the ONL areas that affect private land.

330. Ms Easton identifies four areas where Ms Gilbert recommends extension of the ONL area across private land, as follows:

    (a) ONL 29 at Whataroa where there is a wetland and low likelihood of development due to restrictions around wetland modification;

[151] *West Coast Environmental Network Inc. v Royal Forest and Bird Society of New Zealand Incorporated* [2013] NZEnvC 047.

(b) ONL 27 at Inchbonnie where the area is river flats and there is a low likelihood of development, except for modification for improved farming (e.g. vegetation clearance and humping and hollowing);

(c) ONL 52 at Kongahu/Karamea where the area has been subdivided into lifestyle/bush lots, but the houses have not yet been built (13 lots affected); and

(d) ONL 54 at Little Wanganui where the area is river flats and there is a low likelihood of development, except for modification for improved farming (e.g. vegetation clearance and humping and hollowing).

331. Ms Easton referred to the legal advice from Wynn Williams and considered there was limited scope to expand ONL boundaries. However, she highlighted the submission of Brian Anderson (S576.007) which seeks to amend the boundaries to objectively identify areas with particular values provides some scope for increasing ONLs; as well as the submission point of Manawa Energy (S438.142) to '*Review and amend the entire landscape study methodology and outputs to follow best practice and to include the necessary assessment against national guidance including review of all of the ONFL mapping to improve accuracy and appropriate identification of areas*.'

332. Ms Easton confirmed Ms Gilbert had reviewed the ONL boundary in relation to the Denniston Plateau and agrees there is an overlap of the Buller Coalfield Zone and the ONL area. Ms Easton did not recommend the removal of the ONL from the Buller Coalfield Zone on the basis of Ms Gilbert's review.

333. Ms Easton noted she had approached all three electricity distribution companies about providing GIS data to enable a non-statutory information layer to be built to acknowledge existing modifications to the environment when the ONL assessment was undertaken. She considered this could be done outside of the plan process when all the relevant information can be provided.

334. In reply evidence, Ms Gilbert confirmed she had reviewed the ONL mapping to exclude:

(a) sizeable pastoral areas;

(b) sizeable plantation forestry areas, particularly on the edges of the ONLs; and

(c) areas where the arrangement scale, and/or prominence of built development exerts a dominant influence on landscape character.

335. Ms Gilbert noted the review exercise had also included 'clipping the ONL linework' to obvious landform and or contiguous native vegetation cover edges in the immediate vicinity of the mapped ONL and amended the southern end of ONL 5 to extend it to the district boundary.

Hearing Panel's Evaluation

336. The Panel accepts Ms Easton's recommended wording for a new 'Preamble' section, which stemmed from the discussion in the NFL General/Whole Chapter section above, to be added at the beginning of Schedule Five, as shown in Appendix 1 of the Right of Reply. The Panel is satisfied this wording goes some way towards addressing the Manawa submission and we note was supported by Mr Bentley and that it is consistent with the evidence of Ms Gilbert in relation to acknowledging the assessments undertaken are 'high-level' and that ONL include modifications existing at the time the assessment was undertaken.

337. The Panel also accepts the addition of wording to the '*Site Type and Values'* column of Schedule Five to include reference to any identified SASM in ONL, where relevant as detailed in Appendix 1.

338. The Panel accepts there has now, post notification, been careful consideration and review of the ONL boundaries. However, where these would extend the ONL and affect private land, the Panel considers the ONL boundary should be retained as notified for reasons of natural justice as any extension might otherwise have been opposed in submission. In the Panel's view, any such changes would need to be part of a subsequent plan change process.

339. The Panel acknowledges that there may be some, albeit limited scope, to extend ONL boundaries where these affect public land administered by DOC. However, the Panel considers there is difficultly in including only further DOC land in ONL because this would create a series of anomalies (for example private land inside an ONL which might otherwise have been part of the ONL) and/or hard edges, which are then not reflective of the ONL values.

340. Given the above circumstances, the Panel considers retaining the notified ONL boundaries, except where they are reduced via submissions or refinement through the review, is the most appropriate course of action at this stage for reasons of natural justice and plan integrity. To introduce the amendments to ONL boundaries, as proposed by Ms Gilbert to increase the extent of ONL, would in our view require a Schedule 1 of the RMA plan change process.

341. The Panel accepts the evidence of Ms Gilbert that the area known as 'The Pyramids' in Karamea does not meet the criteria to be identified as an ONL. The Panel agrees with Ms Easton's recommendation to not include this area in an ONL and has rejected the relevant submissions[152].

342. The Panel accepts there is no evidence to support creating a new ONL on the Denniston Plateau and has rejected that submission[153]. The Panel also accepts that there are overlaps between the ONL and BCZ, and that this reflects the existing landscape values and the evidence of Ms Gilbert. The Panel considers the appropriateness of the BCZ boundaries in recommendation report on Mineral Extraction.

343. Submissions on individual ONL or ONF boundary adjustments are considered below.

Recommendation

344. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the submission identified in the footer below be accepted in part and that changes are made to the **Natural Features and Landscapes – Schedule 5** as follows:

> **Preamble**
>
> **Schedule Five identifies and describes 55 Outstanding Natural Landscapes (ONLs). The ONL Schedules are a tool to assist with the identification of the landscape values that are to be protected within an area. They contain both factual information and evaluative content and are to inform plan development and plan implementation processes and assist technical landscape assessment. The ONL Schedules are based on the scale of the relevant ONL and form a relatively 'high-level' summary of the more natural landscape values of the area. This means that the landscape values identified in an ONL Schedule may not apply to a site within**

[152] Fernando Tarango S342.001, Laurence Rueter S381.001, Lanah Hake Tarango S337.002
[153] Karen Lippiatt S439.008

the ONL. The ONL Schedules do not address established modifications that form part of the landscape to which they apply, such as infrastructure, rural buildings, farmhouses, roads, pastoral land use and production forestry. It is acknowledged that this existing modification is of a scale, character and/or location such that the area still qualifies as ONL. Given the scale of the landscape assessment underpinning the ONL schedules and the high-level nature of the schedules themselves, a finer grain proposal-specific assessment of landscape values will typically be required for plan development or plan implementation purposes (including plan changes or resource consent applications). Through any proposal-specific landscape assessment, landscape modifications and/or additional landscape values may be identified that are not recorded in the ONL Schedules.[154]

Add to the 'Site Type and Values' column of Schedule Five reference to identified SASM in ONL's 1, 2, 3, 4, 10, 11, 12, 13, 14, 15, 16, 19, 20, 21, 26, 27, 29, 31, 32, 39, 41, 43, 44, 46 and 55 as detailed in Appendix 2 to this recommendation.

2.7. Recommendation on Schedule Six: Outstanding Natural Feature - Te Rārangi Tuaono: Ngā Ahuatanga Aotūroa Puru Rourou

345. The s42A Report summarised four submission points supporting the ONF boundaries and sought the ONF be retained as notified.

346. Four submission points sought identified properties remain excluded from ONF generally; one submission point sought the exclusion of land within the Punakaiki Village.

347. The Panel notes the identified properties and land within the Punakaiki Village remain outside any ONF.

348. The Panel recommends the Schedule Six is retained as notified.

2.8. Recommendation on specific ONL and ONF boundary adjustments

ONL 4

349. Five submission points relating to ONL 4 sought adjustments to the boundary to remove properties in the settlement at Hannahs Clearing. One of the submission points sought to include a spatial description of the ONL within the schedule. One further submission supported the removal of the ONL from the southern end of Hannahs Clearing.

350. The s42A Report noted these submission points would be addressed after Ms Gilbert's further review.

351. In the Addendum to the s42A Report, Ms Easton supported the submission points of Ms Raylene Black (S420.001 and S420.002) and Mr Vance and Mrs Carol Boyd (S447.008 and S447.009); and recommended the updated digitised maps (January 2024) to exclude this area from the ONL, as recommended by Ms Gilbert in her Landscape Report.

352. The Panel is satisfied that the updated ONL boundaries recommended by Ms Gilbert address the requests of submitters and align with the natural character mapping. The Panel agrees Ms

[154] Manawa Energy Limited S438.83

Easton's recommendation to amend the boundaries of ONL 4, as shown in the updated digitised mapping (January 2024) and accepts the relevant submissions[155].

ONL 10

353. One submission point relating to ONL 10 sought adjustments to the boundary to remove Section 8, Weld at Bruce Bay.

354. The s42A Report recommended rejecting this submission because the whole property is within the ONL area, as well as within the Outstanding Coastal Natural Character overlay, and that there is no current development on this part of the coastline.

355. The Addendum to the s42A Report provided an updated map of ONL 10 and recommended amending the boundaries to reflect the updated digitised maps (January 2024).

356. The Landscape Report confirmed Ms Gilbert's review of the updated digitised mapping (January 2024) at Bruce Bay. She considered the ONL boundaries were correct – capturing the contiguous bush-clad land and the undeveloped river flats. She did not support excluding the submitter's land given its similarity to surrounding land and the very limited extent of development that is anticipated because of the zoning and lot arrangements.

357. The Panel is satisfied the ONL boundary across the submitter's land is appropriate and have rejected the submission.[156] However, while we acknowledge the recommended update by Ms Gilbert may well be appropriate given the outstanding natural landscape values and the absence of development along this part of the coastline the property concerned is private property, as are some others in the vicinity, and in line with our previous expressed concerns in this regard, we do not recommend the seaward extension of the ONL boundary.

ONL 14 and ONF 16

358. Two submission points relating to ONL 14 sought adjustments to the boundary. One from Totally Tourism Limited to remove Lot 33 Deposited Plan 409401 at Donavan Drive, Franz Josef; and one from Skyline Enterprises Ltd opposing ONF 16 to enable development of a proposed aerial cableway.

359. The s42A Report supported the Totally Tourism Limited submission in part by recommending adjustments to the boundary so that slightly less of the property was affected. However, it noted Ms Gilbert had been asked to review the ONL boundaries.

360. The s42 Report rejected the submission from Skyline Enterprises Ltd given the location of the proposed aerial cableway is within the ONL area, as notified and the updated digitised mapping (January 2024).

361. In her Landscape Report, Ms Gilbert confirmed she had reviewed the extent and configuration of ONL 14 and ONF 16. She noted that her assessment had appropriately taken into account the existing environment 'as it is' and not as it may be as a result of future development that may or may not occur. She recommended minor changes to the updated digitised mapping

[155] Vance & Carol Boyd S447.008 and S447.009, Raylene Black S305.002
[156] A & S Marshal S542.001

(January 2024) in the vicinity of Donovan Drive to align the ONL boundary to the landform, vegetation and unmodified land, and to the Settlement Zone boundary.

362. Mr Dent, for Totally Tourism Limited, sought to ensure the extent of ONL 14 at the Franz Alpine Resort did not 'afflict' the permitted residential and commercial activities. He confirmed the updated map in his Figure 3 showing the refined GIS mapping would resolve the submitter's concerns but that there was insufficient information from Ms Gilbert to comment on her recommendation following her review of the ONL boundaries.

363. In Reply, Ms Gilbert confirmed her recommendation to make minor refinements to the ONL 14 mapping in the vicinity Donovan Drive to follow a '*landscape*' rather than a zone boundary.

364. The Panel accept the evidence of Ms Gilbert that ONL boundaries should follow the landscape and not zone boundaries. The Panel consider the recommended ONL 14 boundaries will not prevent residential and commercial activities within those zones.

365. The Panel do not consider any amendments to the ONL or ONF boundaries are appropriate to recognise future development proposals and accept Ms Easton's recommendation to reject Skyline Enterprises Ltd submission point[157].

366. The Panel is satisfied that the updated ONL boundaries recommended by Ms Gilbert are appropriate given the outstanding natural landscape values of the existing environment. The Panel accepts Ms Easton's recommendation to amend the boundaries of ONL 14, as shown in the updated digitised maps (January 2024) except where it increases in extent.

367. The Panel accepts Ms Easton's recommendation to reject the Skyline Enterprises Ltd submission opposing ONF 16 and recommends retaining ONF 16 as shown in the updated digitised maps (January 2024).

ONL 15

368. Ngāi Tahu sought the removal of specific areas used for plantation forestry from ONL 15.

369. Manawa requested review of the landscape methodology and the accuracy of the boundary of ONL 15 to better follow landform or landcover.

370. In the Addendum to the s42A Report, Ms Easton supported in part submission points of Ngāi Tahu (S620.015) and recommended the ONL mapping be amended to remove plantation forestry areas, with the revised ONL boundary configured to follow a legible landform and/or contiguous bush boundaries, as recommended by Ms Gilbert in her Landscape Report.

371. The Landscape Report confirmed Ms Gilberts review of the notified mapping of ONL 15. She considered the updated digitised mapping (January 2024) to be correct but acknowledged this assessment was based on a desktop review, without detailed field work. Ms Gilbert invited Manawa to provide further detail on any refinements to be reviewed in the hearing.

372. In relation to the submission from Ngāi Tahu, Ms Gilbert recommended amendments to the updated digitised mapping (January 2024) to exclude pine plantations near 'The Forks' that coincide with ONL 15.

[157] Skyline Enterprises Limited S250.008, S250.010

373. Mr Bentley's evidence for Manawa noted the ONL boundary has shifted slightly in the updated mapping (January 2024). He broadly agreed that the Manawa scheme on this location should be within the ONL but considered there should be reference to the existing infrastructure in the ONL description. No further information was received from Manawa after the hearing.

374. In response, Ms Easton didn't agree it was necessary to detail all the existing modifications in the ONL descriptions.

375. In Reply, Ms Gilbert confirmed her recommendation to make minor refinement of the boundaries of ONL 15 to exclude substantial areas of pine plantation.

376. The Panel agrees with Ms Easton's recommendation to amend the boundaries of ONL 15, as shown in updated digitised mapping (January 2024) except where it increases in extent and accepts in part the relevant submissions.[158]

ONL 16

377. Manawa requested review of the landscape methodology and the accuracy of the boundary of ONL 16 to better follow landform or landcover.

378. The Landscape Report confirmed Ms Gilbert's review of the notified mapping of ONL 16. She considered the updated digitised mapping (January 2024) to be correct but acknowledged this assessment was based on a desktop review, without detailed field work. Ms Gilbert invited Manawa to provide further detail on any refinements to be reviewed in the hearing.

379. Similar to ONL 15, Mr Bentley considered there should be reference to Manawa's existing infrastructure in the ONL description.

380. In response, Ms Easton didn't agree it was necessary to detail all the existing modifications in the ONL descriptions.

381. The Panel accepts Ms Easton's recommendation to amend the boundaries of ONL 16, as shown in updated digitised mapping (January 2024) except where it increases coverage.

ONL 17

382. Ngāi Tahu sought the removal of specific areas used for plantation forestry from ONL 17.

383. In the Addendum to the s42A Report, Ms Easton supported in part the submission points of Ngāi Tahu (S620.015) and recommended the ONL mapping be amended to remove plantation forestry areas, with the revised ONL boundary configured to follow a legible landform and/or contiguous bush boundaries, as recommended by Ms Gilbert in her Landscape Report.

384. The Landscape Report confirmed Ms Gilbert's review the notified mapping of ONL 17. She recommended amendments to the updated digitised mapping (January 2024) to exclude pine plantations between the Waitaha River and the Poerua River that coincide with ONL 17.

385. In Reply, Ms Gilbert confirmed her recommended minor refinement of the boundaries of ONL 17 to exclude substantial areas of pine plantation.

[158] Manawa S438.142, Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.158

386. The Panel agrees with Ms Easton's recommendation to accept the submission[159] and amend the boundaries of ONL 17, as shown in updated digitised mapping (January 2024) except where it increases coverage.

ONL 20

387. One submission point sought adjustments to the boundaries of ONL 20 to reflect the on the ground landscape values at Ross.

388. The s42A Report supported the submission and noted the updated Brown Ltd maps of the Ross area substantially altered the extent of the ONL.

389. The Landscape Report confirmed Ms Gilbert's review of the updated digitised mapping (January 2024) of ONL 20. She considered the general extent and configuration aligned with the landform and/or bush edges to be correct in the vicinity of Ross and no further changes were required. She considered the ONL aligned with the landform and/or bush edges; and the areas of modification (limestone quarry and disused mine) included do not influence the impression of the ONL from Ross or dominate the landscape character of the ONL.

390. The Panel agrees with Ms Easton's recommendation accept the submission and to amend the boundaries of ONL 20, as shown the updated digitised mapping (January 2024) except where it increases coverage and accepts in part the relevant submission[160].

ONL 22

391. Ngāi Tahu sought the removal of specific areas used for plantation forestry from ONL 22.

392. One submission point sought adjustments to the boundaries of ONL 22 to remove paddocks and reflect the bush.

393. In the Addendum to the s42A Report, Ms Easton supported in part submission points of Ngāi Tahu (S620.015) and recommended the ONL mapping be amended to remove plantation forestry areas, with the revised ONL boundary configured to follow a legible landform and/or contiguous bush boundaries, as recommended by Ms Gilbert in her Landscape Report. Ms Easton noted the exception to this is Lot 1 DP 3156 (between Hokitika and Ross) which appears to be in contiguous bush cover.

394. The Landscape Report confirmed Ms Gilbert's review of the updated digitised mapping (January 2024) of ONL 22. In relation to the submission from Ngāi Tahu, Ms Gilbert did not recommended amendments to the updated digitised mapping (January 2024) given Lot 1 3156 (between Hokitika and Ross) appeared to be in contiguous bush cover. She considered the updated mapping to be correct in this location.

395. The Panel agrees with Ms Easton's recommendation accept both submissions[161] and to amend the boundaries of ONL 22, as shown the updated digitised mapping (January 2024) except where it increases coverage.

ONL 25

[159] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.158
[160] Lynley Hargreaves S481.022
[161] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.158, Chris Boxall S24.001

396. Manawa requested review of the landscape methodology and the accuracy of the boundary of ONL 25 to better follow landform or landcover.

397. Two submission points sought adjustments to the boundaries of ONL 25 to remove the ONL from Lot 2 DP 324352 at Lake Kaniere Road and Lots 1 and 2 DP 55403 at Hans Bay Road.

398. The s42A Report noted there had been significant modification to the mapping around the Blue Bottle Terrace Area and some modifications at Lake Kaniere. It confirmed the updated Brown Ltd maps do not include Lot 2 DP32352.

399. The Landscape Report noted Ms Gilbert had reviewed the updated digitised mapping (January 2024) and confirmed Lot 2 DP 324352 was excluded from the ONL; and that the general extent and configuration of the boundaries around 31 Hans Bay Road is correct – capturing elevated and bush clad land, including on the site. She recommended no changes to the boundaries of ONL 25 shown in updated digitised mapping (January 2024).

400. In relation to the submission from Manawa, Ms Gilbert also considered the updated digitised mapping (January 2024) to be correct but acknowledged this assessment was based on a desktop review, without detailed field work. Ms Gilbert invited Manawa to provide further detail on any refinements to be reviewed in the hearing.

401. Mr Bentley's evidence for Manawa noted the ONL boundary in the updated mapping (January 2024) included aspects of Manawa's McKays and Kaniere power schemes, including the lake, canals and part of the penstocks. He supported the Brown corrections around Kennedy Creek and Ms Gilbert's amendments around the Blue Bottle Terrace area. He considered there should be reference to the existing infrastructure in the in the ONL description.

402. Again, in response, Ms Easton didn't agree it was necessary to detail all the existing modifications in the ONL descriptions.

403. The Panel accepts Ms Easton's recommendation to amend the boundaries of ONL 25, as shown in updated digitised mapping (January 2024) except where it increases coverage and accepts in part the relevant submissions.[162]

ONL 26

404. On submission point from WMS Group sought the removal of Lot 1 DP 3854 from ONL 26 to reflect consent decisions.

405. In the Addendum to the s42A Report, Ms Easton supported in part the submission point of WMS Group (S599.062) and recommended a minor refinement of the ONL 26 boundary to exclude grazing land and plantation forestry areas around the edges of the ONL.

406. The Landscape Report confirmed Ms Gilbert had considered the updated digitised mapping (January 2024) of ONL 26 to be correct in the vicinity of Lake Mahingapua, with minor refinement near Ruatapu Road to exclude grazing land.

407. In Reply, Ms Gilbert recommended minor refinement of the boundaries of ONL 26 to exclude grazing land and plantation forestry areas around the edges of the ONL.

[162] Manawa S438.142, Stuart Marshall and Susan Gooch S433.001, Paul & Barbara Dunn, Helen & Steve Boon, Ian & Lynley Preston, Jane & Mike Rogers S556.002

408. The Panel accepts Ms Easton's recommendation to amend the boundaries of ONL 26, as shown in the updated digitised mapping (January 2024) except where it increases coverage and accepts in part the submission[163].

ONL 27 and 28

409. Manawa requested review of the landscape methodology and the accuracy of the boundary of ONL 27 to better follow landform or landcover.

410. Mr Murray Stewart sought to remove property in the Hohonu area at 746 Taramakau Settlement Road from ONL 27 and ONL 28.

411. Mr Stewart spoke to his submission at the hearing raising concern that the boundaries of ONL 27 and ONL 28 include areas of regenerating indigenous bush and gorse. He was concerned the ONL appeared to be used as a *de facto* SNA and would hinder the development and maintenance of farmland and infrastructure, including the access to rock for river protection works. He requested all private land be excluded from the ONL.

412. The Landscape Report by Ms Gilbert had noted that no ONL overlay applied to Mr Stewart's property. She recommended no change to the updated digitised mapping (January 2024). The Panel noted however that Mr Stewart presentation at the hearing had referred to land on the southern side of State Highway 73 which we noted was in Mr Stewart's ownership and was impacted by ONL 27. He also owned land impact by ONL 28 above the Taramakau Settlement Road.

413. As a result of the Panel's Minute 21, Ms Gilbert's 4 April 2025 response indicated that the mapping of ONL 27 has been amended to exclude the small-scale quarries on the edge of the area located on southern side of SH73. She confirmed that no other changes are recommended to the mapping of ONL 27 in this location as it would appear from the aerial photography of the area that any river protection works are of a scale that they do not form a dominant or prominent element that shapes landscape values. She also noted that the Schedule 5 Preamble recommended by Ms Easton, acknowledges that the Schedules do not address modifications, such as infrastructure, and that such existing modifications are of a scale, character and/or location that the area still qualifies as outstanding.

414. The Landscape Report confirmed Ms Gilbert's review the notified mapping of ONL 27 and ONL 28. She considered the updated digitised mapping (January 2024) to be correct but acknowledged this assessment was based on a desktop review, without detailed field work. Ms Gilbert invited Manawa to provide further detail on any refinements to be reviewed in the hearing. However, no further detail was provided after the hearing.

415. Mr Bentley's evidence for Manawa noted the ONL boundary in the updated mapping had shifted to include the Taramakau River; and to remove part of the Kapitia Reservoir. He supported these amendments but considered further refinement was necessary to the north of the reservoir. He considered there should be reference to the Manawa's existing infrastructure (Dillman, Duffers and Kumara Power Scheme) in the in the ONL description.

416. The Panel notes that the boundary of ONL 27 has been principally reduced from the notified version in the areas of concern to Manawa and Mr Stewart. However, there has been an increase in extent to include the Taramakau River, as noted by Mr Bentley. This increase, while principally incorporating Crown land in the form of the riverbed, includes some additional

[163] WMS Group (HQ) Limited and WMS Land Co. Limited S599.062

private property, and in line with our previous expressed concerns in this regard, we do not recommend this extension of the ONL boundary.

417. The Panel recommends that the boundaries of ONL 27 and ONL 28 are amended only where they reduce the notified boundaries and accepts in part the relevant submissions.[164]

ONL 29

418. Mitchells 2021 Ltd sought to remove their proposed subdivision area from ONL 29.

419. Mr Paul Lynch presented a statement at the hearing on behalf of Mitchells 2021 Ltd (dated 23 February 2024) in relation to the boundaries of ONL 29 and its request to exclude areas it intends to subdivide. He noted ONL 29 was now larger than notified and affected the lower-lying proposed subdivision area. He estimated an additional 21ha were now included in the ONL boundaries. He considered the ONL boundary should follow the toe of the mountain range behind, removing 34ha from the ONL (as shown in his Appendix 1).

420. Mr David Ellerm sought to amend the ONL 29 boundary at Iveagh Bay.

421. Russell Robinson sought to amend the ONL 29 boundary at Moana to more accurately reflect the forest vegetation associated with the reserve and Arnold River environment.

422. In the Addendum to the s42A Report, Ms Easton supported in part the submission point of Russell Robinson (S515.002) and recommended the ONL mapping be amended to exclude grazing land, as recommended by Ms Gilbert in her Landscape Report.

423. The Landscape Report confirmed Ms Gilbert's review of the updated digitised mapping (January 2024) of ONL 29. She considered the general extent and configuration to be correct, as it aligned with the landform and/or bush edges. She recommended no change to the updated digitised mapping (January 2024).

424. In relation to Mitchells 2021 Ltd submission, Ms Gilbert noted that her assessment had appropriately taken into account the existing environment 'as it is' and not as it may be as a result of future development that may or may not occur. She recommended no change to the updated digitised mapping (January 2024). Further, as a result of the Panel's Minute 21, Ms Gilbert's 4 April 2025 response indicated that no change to the mapping of ONL 29 near Mitchells is supported from a landscape perspective.

425. In relation to Mr Ellerm's submission, Ms Gilbert considered the updated digitised mapping (January 2024) to be correct in the vicinity of Iveagh Bay.

426. In Reply, Ms Gilbert confirmed that she recommended no changes to the updated digitised mapping (January 2024) of ONL 29, other than minor refinement of the boundaries to exclude grazing land in the vicinity of the reserve and Arnold River area.

427. The Panel accepts Ms Easton's recommendation to amend the boundaries of ONL 29, as shown in the Addendum to the s42A Report except where it increases coverage and accepts in part the relevant submissions.[165]

ONL 31

[164] Manawa S438.142, Murray Stewart S217.003
[165] Mitchells 2021 Limited S448.003, David Ellerm S581.028, Russell Robinson S515.002

428. Thirteen submission points sought adjustment to the boundaries of ONL 31 to remove private properties to the boundary with the Rapahoe Scenic Range Reserve.

429. The Addendum to the s42A Report noted the Landscape Report advised that the updated digitised mapping (January 2024) of ONL 31 had amended the notified mapping. The Landscape Report recommended minor refinement to exclude the patterning of dwellings throughout the lower slopes across the western side of the Rapahoe Range and include the elevated and contiguous bush area that sits above the dwellings. On this basis, Ms Easton supported in part submission points of Claire & John West (S506.001 and S506.023), Lauren Nyhan Anthony Phillips (S533.001, S533.023), Russell and Joanne Smith (S477.001, S477.023), Tim Macfarlane (S482.001, S482.023, S482.023), Stewart & Catherine Nimmo (S559.001, S559.023), Tim and Phaedra Robins (S579.001, S579.004) and Joel and Jennifer Watkins (S565.002).

430. In Reply, having heard the evidence in support of submissions, Ms Gilbert confirmed her recommended minor refinements of the ONL 31 mapping, as addressed in her Landscape Report. She indicated in response to the Panel's Minute 21 that ONL 31 had been amended to remove large scale production forestry areas.

431. The Panel is satisfied that the areas of contiguous indigenous vegetation above the dwellings in the Port Elizabeth Heights subdivision meets the criteria to be included within ONL 31. The Panel accepts that this may differ from the boundary of the Rapahoe Scenic Reserve.

432. The Panel agrees with Ms Easton's recommendation to accept the submissions[166] in part and amend the boundaries of ONL 31, as shown in updated digitised mapping (January 2024) except where it increases coverage.

ONL 32

433. Ngāi Tahu sought the removal of specific areas used for plantation forestry from ONL 32.

434. In the Addendum to the s42A Report, Ms Easton supported in part submission points of Ngāi Tahu (S620.158) and recommended the ONL mapping be amended to remove plantation forestry areas, with the revised ONL boundary configured to follow a legible landform and/or contiguous bush boundaries, as recommended by Ms Gilbert in her Landscape Report.

435. In Reply, Ms Gilbert recommended further minor refinement of the boundaries of ONL 32 to exclude substantial areas of pine plantation.

436. The Panel agrees with Ms Easton's recommendation to accept the submission in part[167] and amend the boundaries of ONL 32, as shown in updated digitised mapping (January 2024) except where it increases coverage.

ONL 33

437. Ngāi Tahu sought the removal of specific areas used for plantation forestry from ONL 33.

438. In the Addendum to the s42A Report, Ms Easton supported in part submission points of Ngāi Tahu (S620.158) and recommended the ONL mapping be amended to remove plantation

[166] Claire & John West S506.001 & S506.023, Lauren Nyhan Anthony Phillips S533.001 & S533.023, Russell and Joanne Smith S477.001 & S477.023, Tim Macfarlane S482.001 & S482.023, Stewart & Catherine Nimmo S559.001 & S559.023, Tim and Phaedra Robins S579.001 & S579.004, Joel and Jennifer Watkins S565.002

[167] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.158

forestry areas, with the revised ONL boundary configured to follow a legible landform and/or contiguous bush boundaries, as recommended by Ms Gilbert in her Landscape Report.

439. The Panel agrees with Ms Easton's recommendation to accept the submission in part[168] and amend the boundaries of ONL 33, as shown in updated digitised mapping (January 2024) except where it increases coverage.

ONL 41

440. New Zealand Carbon Coal & Carbon Limited sought adjustments to the boundary of ONL 41 to exclude mining areas.

441. The Landscape Report confirmed Ms Gilbert's review of the updated digitised mapping (January 2024) of ONL 41. She considered the general extent and configuration aligned with the landform and/or bush edges was correct in the vicinity of the Paparoa Coalfield and no changes were required to excluded active mining areas.

442. As a result of the Panel's Minute 21, Ms Gilbert's 4 April 2025 response indicated that the overlap of ONL 41 with the Buller Coalfield Zone is supported from a landscape perspective, as there is nothing in the overlap area that sets it apart from the balance of the ONL.

443. The Panel agrees with Ms Easton's recommendation to accept the submission in part[169] and amend the boundaries of ONL 41, as shown in updated digitised mapping (January 2024) except where it increases coverage.

ONL 43 and ONL 49

444. Terra Firma Mining Limited sought adjustments to ONL 43 and ONL 49 to remove the green line or clarify what feature it indicates.

445. The s42A Report noted that the green lines indicated the boundaries between landscape units. It accepted the submission and considered an amendment to the map key was necessary to clarify this.

446. The Panel agrees with Ms Easton's recommendation to accept the submission[170] and amend the map key to identify the boundary line between landscape units.

ONL 44

447. Seven submission points sought adjustments to the ONL 44 boundaries to remove parts of properties, correct inaccuracies, revisit the north boundary and extend the ONL, and retain the Te Miko area within the ONL.

448. The tabled statement by Mr Dean van Mierlo (dated 18 March 2024) addressed his submission point requesting the amendment of the boundaries for ONL 44 to remove the eastern/upper part of Lot 2 DP 307444, Blk V Brighton SD. Mr van Mierlo noted the Addendum to the s42A Report appeared to recommend a substantially larger ONL area than was originally notified and considered there was no scope for this movement of the ONL boundary through the submission of the TTPP Committee.

[168] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.158
[169] New Zealand Coal & Carbon Limited S472.003
[170] Terra Firma Mining Limited S537.033

449. Mr Neil Mouat spoke to his submission at the hearing emphasising the extremely limited land available for development at Punakaiki given the multiple Plan overlays and physical constraints. He highlighted the need for a development strategy to ensure areas are available for development to support and complement the existing tourist infrastructure.

450. In the Addendum to the s42A Report, Ms Easton supported in part the submission point of Mr John Baltrop (S572.001) and recommended the ONL mapping be amended to remove a stand of pine trees on the submitter's land. She noted the general extent and configuration of ONL 44 in the vicinity of Pahautane, including on the submitter's land, is correct, as recommended by Ms Gilbert in her Landscape Report.

451. The Landscape Report confirmed Ms Gilbert's review of the updated digitised mapping (January 2024) of ONL 44 and her field work in the area. She considered the general extent and configuration to be correct as it aligned with the landform and/or bush edges. She noted that the mapping excluded parts of the local area where dwellings and other modification are a dominant landscape element.

452. In relation to Mr van Mierlo's submission (S570.004), Ms Gilbert noted that the ONL appropriately included the elevated and contiguous bush clad land on his property. She recommended no changes to the updated mapping were required.

453. In relation to 'Mr Baltrop and others' submissions, Ms Gilbert noted the updated digitised mapping (January 2024) had been amended to exclude the stand of pine trees on the submitter's land. She recommended no changes to the updated mapping were required.

454. In relation to Ms Jenkin's submission (S575.001), Ms Gilbert noted that the ONL appropriately included the elevated and contiguous bush clad land on her property. She recommended no changes to the updated mapping were required.

455. In relation to Mr Mouat (S535.081), Ms Gilbert considered the ONL appropriately included the elevated and contiguous bush areas on his property. She recommended no changes to the updated mapping were required.

456. As a result of the Panel's Minute 21, Ms Gilbert's 4 April 2025 response indicated that the mapping of ONL 44, 45 and 46 had been reduced (and extended in places), in the vicinity of Fox River, near Pahautane in the October 2024 mapping version, so that it better aligns with the extent of mature contiguous bush cover.

457. The Panel accepts the recommendations of Ms Gilbert and agrees with Ms Easton's recommendation to amend the boundaries of ONL 44, as shown in updated digitised mapping (January 2024) except where it increases coverage. As a result, the various submissions are accepted in part[171].

ONL 45 and ONL 46

458. One submission sought to not schedule land within the Punakaiki Village.

[171] Neil Mouat S535.081, Suzanne Hills S443.030, Amanda Jenkins S575.001, Dean Van Mierlo S570.004, Teresa Wyndham-Smith S312.009, Fiona McDonald S561.001, Jon Barltrop S572.001

459. The Landscape Report confirmed Ms Gilbert's review of the updated digitised mapping (January 2024) of ONL 46. She considered the general extent and configuration aligned with the landform and/or bush edges to be correct and no changes were required.

460. The Panel agrees with Ms Easton's recommendation to accept the submission[172] given the settlement area at Punakaiki is not included in any ONL.

ONL 54

461. The WCRC sought the removal of a small area (Section 27, Block XV, Oparara SD) of private land within the MINZ on the western boundary of ONL 54. WCRC are concerned the ONL may make it difficult in the future to undertake quarry activities as part of the MINZ for the WCRC's hazard mitigation activities. In its tabled statement, the WCRC noted the area contained suitable lag deposit (quarry rock) from an old debris slip but advised that the landowner had recently confirmed they were happy for the ONL to remain over the south-east corner of their property. The WCRC advised it intends to 'relodge a Notice of Requirement' seeking those designations for its assets, including quarries, be added to the pTTPP.

462. The WCRC also raised concerns with Rule MINZ-R2 and Rule ECO-R1 in relation to operating a quarry in the MINZ, however, this is addressed in the Mineral Extraction and Ecosystems and Indigenous Biodiversity Recommendation Reports.

463. The s42A Report noted the updated ONL showed the area within the ONL.

464. The Landscape Report confirmed Ms Gilbert's review of the updated digitised mapping (January 2024) of ONL 54. She considered the general extent and configuration to be correct in the vicinity Section 27, Block XV, Oparara SD and aligned with the landform and/or bush edges. No changes were recommended to the updated mapping (January 2024). She reconfirmed that position again in her response to the Panel's Minute 21, noting there was nothing in the overlap that sets it apart from the balance of the ONL.

465. The Panel accepts the recommendations of Ms Gilbert and agrees with Ms Easton's recommendation to amend the boundaries of ONL 54, as shown in updated digitised mapping (January 2024) except where it increases coverage and accepts in part the submissions[173] give there is some reduction in the ONL.

APPENDIX 1 - RECOMMENDATIONS

Definitions

Minor upgrade	**means increasing the carrying capacity, efficiency, security, or safety of a network utility, or renewable electricity generation activity where the effects of the activity are the same or similar in character, intensity and scale as the existing structure or activity. This includes increasing generation, transmission or distribution capacity and includes replacing support structures within the footprint of existing lawfully established activities**

Landscape and Natural Features Chapter

Overview

The Natural Features and Landscapes chapter contains provisions that relate to the Outstanding Natural Features and Outstanding Natural Landscapes which are identified as overlays on the Planning Maps and described in Schedule Five and Schedule Six. The identification of these areas is in response to section 6(b) of the RMA, which requires outstanding natural features and landscapes to be protected from inappropriate subdivision, use and development.

The Outstanding Natural Features and Outstanding Natural Landscapes identification applies to areas which have been assessed and identified as having high levels of scientific, biophysical, sensory or associative landscape values, which makes them outstanding. In almost all instances these areas are also bush covered and provide habitat for native fauna. These areas may also include ~~critical~~ **regionally significant** infrastructure, renewable electricity generation activities, and other elements of the built environment and have varying degrees of modification. **Given the topography and extent of outstanding natural features and landscapes on the West Coast, practical management solutions are required to ensure maintenance and enhancement of the supply of renewable energy to, and between, communities for the benefit of those communities and the wider environment from the use and development of renewable energy.**

The process supporting the identification of the Outstanding Natural Landscape overlay and the associated values is described in the West Coast Landscape and Natural Character Reports produced in 2013, 2021 and 2022.

The West Coast/Te Tai o Poutini Outstanding Natural Landscapes are identified in Schedule Five and Outstanding Natural Features are identified in Schedule Six

The rules in this chapter relate to earthworks, buildings, structures, plantation forestry and Māori Purpose Activities in Outstanding Natural Landscapes and Outstanding Natural Features. Where Outstanding Natural Landscapes and Outstanding Natural Features are located in the Coastal Environment, the Objectives, Policies and Rules of the Coastal Environment Chapter apply.

Outstanding natural landscapes (ONL) have been identified as having the following values:

- **Biophysical values – including the landforms, vegetation type, presence of waterbodies and the sea, evidence of natural processes and land uses within the landscape**
- **Perceptual/ Aesthetic values – including composition and structure, vividness, expressiveness and legibility, dynamic and transient values, the presence of landmarks and key views, coherence, and unity**
- **Associative values – naturalness and endemic value (distinctive NZ/West Coast sense of place), including Poutini Ngāi Tahu values and associations, and historical/ heritage associations.**

Plantation Forestry

Plantation forestry is principally regulated by the Resource Management (National Environmental Standard for **Commercial**~~Plantation~~ Forestry) **Amendment** Regulations **2017** (NES-**C**~~P~~F). However the NES -**C**~~P~~F allows that district plans can be more stringent to protect ONLs, and ONFs and their values. Where provisions within this chapter over-rule the requirements of the NES - **C**~~P~~F an advice note to that effect is included within the Rule.

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the zone chapters, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for certain activities within outstanding natural features and landscapes, including:

- **Ecosystems and Indigenous Biodiversity** – the Ecosystems and Indigenous Biodiversity contains objectives, policies and rules relating to native vegetation clearance including that within outstanding natural features and landscapes.
- **Natural Character and Activities Adjacent to Waterbodies –** the Natural Character and Margins of Waterbodies **Chapter** contains the objectives, policies and rules relating to activities adjacent to waterbodies.
- **Coastal Environment –** the Coastal Environment Chapter contains the objectives, policies and rules for activities within the coastal environment overlay - including buildings and structures and earthworks
- **Activities on the Surface of Water** - objectives, policies and rules for activities undertaken on the surface of a lake or river (including jetties, pontoons, fish farms and boating activities), are found in the Activities on the Surface of Water Chapter.
- **Energy, Infrastructure and Transport Chapters – objectives policies and rules.**
- **Strategic Objectives – The Strategic Objectives are particularly relevant when assessing matters under the Natural Features and Landscape Chapter. The Natural Environment, Poutini Ngāi Tahu, Tourism, Mineral Extraction, and Climate Change and Resilience Strategic Objectives are particularly relevant.**

NFL – O1 ~~To protect~~ T~~t~~he values of outstanding natural landscapes and outstanding natural features on the West Coast/Te Tai o Poutini **are protected from inappropriate subdivision, use and development.** ~~while providing for subdivision, use and development where the values that make the landscape or feature outstanding can be maintained or enhanced~~.

NFL- P1

To identify Outstanding Natural Landscapes on the West Coast/Te Tai o Poutini by:

a. Assessing the values and characteristics of the landscapes according to the following factors:

i. Physical characteristics and values;

ii. Perceptual characteristics and values;

iii. Associative characteristics and values

b. Including these on the planning maps as Outstanding Natural Landscapes; and

c. Describing the characteristics and values of each Outstanding Natural Landscape within Schedule Five.

NFL – P2

Provide for activities within outstanding natural landscapes described in Schedule Five and outstanding natural features described in Schedule Six where they ~~do not adversely affect~~ **maintain** the values that contribute to a natural feature or landscape being outstanding and are for:

a. Existing land uses and lawfully established activities including ~~existing~~ **residential activities, regionally significant infrastructure,** network utilities, ~~energy~~ **renewable electricity generation** activities, **mineral extraction**, agricultural, horticultural and pastoral activities;

b. Conservation activities;

c. Recreational activities;

d. **Maintenance and repair of existing lawfully established** ~~N~~**n**atural hazard mitigation ~~activities~~ **structures**;

e. Upgrading of existing lawfully established natural hazard mitigation structures where this is undertaken by a statutory agency or authorised contractor acting on its behalf;

~~e.~~**f.** Operation, maintenance and upgrade of **existing lawfully established** renewable electricity generation facilities;

~~f.~~**g.** Operation, maintenance and upgrade of **existing lawfully established** network infrastructure **and regionally significant infrastructure**;

~~g.~~**h.** ~~Upgrading and/or n~~ **N**ew ~~infrastructure and~~ renewable electricity generation **activities** ~~facilities~~ where there is a functional need ~~for it~~ to be located in these areas;

~~h.~~**i.** Poutini Ngāi Tahu ~~uses~~ **activities**; ~~or~~

~~i.~~**j.** The alteration, maintenance or removal of existing **lawfully established** buildings or structures; **and**

k. Use and development of Māori land.

NLF – P3

~~Where possible a~~ **A**void ~~significant~~ adverse effects on the values that contribute to outstanding natural landscapes described in Schedule Five and outstanding natural features described in Schedule Six. Where ~~significant~~ adverse effects cannot be avoided, ensure that the adverse effects are remedied~~,~~ **and** mitigated ~~or offset~~ **to be no more than minor**.

NFL – P4

Recognise that there are settlements, farms, **land uses,** and infrastructure **and activities** located within outstanding natural landscapes or outstanding natural features ~~and~~ **by** provide~~ing~~ for new activities and **allowing** existing uses in these areas where the values that

contribute to the outstanding natural landscape or feature are **maintained** ~~not adversely affected~~.

NFL – P5

Require that new buildings, and structures within outstanding natural features or landscapes ~~minimise~~ **avoid, remedy or mitigate** any adverse visual effects **including** by**:**

a. Ensuring the scale, design and materials of the building and/or structure are appropriate in the location;

b. Using naturally occurring building platforms, materials and colour that blends into the landscape;

c. Minimising landform modification from earthworks; ~~and~~

~~c.~~**d.** ~~Limiting~~ **Minimising** the prominence or visibility of buildings and structures including by integrating it into the outstanding natural feature or landscape; **and**

e. Landscaping buildings and structures with appropriate vegetation to reduce visual effects.

NFL – P6

~~Minimise adverse effects on outstanding natural landscapes and outstanding natural features by considering the following matters when assessing proposals for land use or subdivision:~~

When assessing whether a proposal for land use or subdivision is appropriate, consider following matters:

a. The **nature,** scale **and extent** of modification to the landscape **or feature**;

b. Whether the proposal is located within a part of the outstanding natural feature or outstanding natural landscape that has capacity to absorb change;

c. Whether the proposal can be visually integrated into the landscape and whether it would break the skyline or ridgelines;

d. The temporary, **short term** or permanent nature of any adverse effects;

e. The functional, technical, operational or locational need of any activity to be sited in the particular location, **including an assessment of alternative sites**;

f. Any historical, spiritual or cultural association held by Poutini Ngāi Tahu;

g. Any positive effects the development has on the identified characteristics and qualities;

h. Any positive effects at a national, regional and local level;

i. Any relevant public safety considerations; ~~and~~

j. The measures proposed to mitigate the effects on the values and characteristics;

~~i. The location, design and scale of any buildings or structures, or earthworks;~~

~~ii. The intensity of any activity; and~~

~~iii. The finish of any buildings or structures, including materials, reflectivity and colour; and landscaping and fencing;~~

k. The management of effects on natural character, amenity, recreation, historical and biodiversity values; and

l. Any effects on values of Māori land.

NFL – P7

Enable the use of Māori Purpose Zoned land in outstanding natural landscapes and on outstanding natural features where land use and subdivision **are** ~~is~~ consistent with tikanga and mātauranga Māori ~~and minimises adverse effects on the outstanding values of the landscape or feature~~ **as outlined within an Iwi/Papatipu Rūnanga Management Plan.**

NFL – P8

Consider the incorporation of mātauranga Māori principles into the design, development and/or operation of activities in outstanding natural features and landscapes with cultural, spiritual and/or historic values, interests or associations of importance to Poutini Ngāi Tahu and opportunities for Poutini Ngāi Tahu and to exercise their customary responsibilities as mana whenua and kaitiaki in respect of the feature or landscape.

~~Also where relevant refer to policies in the Energy, Infrastructure and Transport Chapters.~~

Natural Feature and Landscapes Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.

Permitted Activities

NFL -R1	**Maintenance, operation and repair of lawfully established buildings, structures, network utilities, renewable electricity generation activities, fence lines, drains, roads, ~~railway, critical~~ regionally significant infrastructure and tracks within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Siz**

Activity Status Permitted

Advice Note:

1. Any indigenous vegetation clearance associated with maintenance and repair is subject to the provisions in the Ecosystems and Biodiversity Chapter

2. Where activities are located in the Coastal Environment, the provisions in the Coastal Environment Chapter apply.
3. Where activities are located in a Historic Heritage,Notable Tree or Sites and Areas of Significance to Māori Overlay Chapter area, these provisions apply.

Activity Status where compliance not achieved: Refer to other relevant Overlay Chapter where these activities occur in multiple overlays.

NFL -R2	**Conservation Activities within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six**

Activity Status Permitted

Advice Note:

Any indigenous vegetation clearance associated with Conservation Activities is subject to the provisions in the Ecosystems and Biodiversity

Activity Status where compliance not achieved: N/A

NFL– R3	**Repair, maintenance and upgrading of ~~N~~natural hazard mitigation structures~~activities~~ including earthworks in an Outstanding Natural Landscape described in** Schedule Five

Activity Status Permitted

Where:

1. The natural hazard mitigation **structure has been lawfully established**~~activities are to protect critical infrastructure~~;
2. ~~The~~ **Any upgrading of** natural hazard mitigation ~~activities~~ **structures** are undertaken by a statutory agency or ~~their nominated~~ **authorised** contractor **acting on its behalf, where there is no change to more than 10% to the overall dimensions, orientation or outline of the structures as of 14 July 2022**; and
3. The work does not involve modification of an Outstanding Natural Feature described in Schedule Six.

Advice Notes:

1. Any indigenous vegetation clearance associated with natural hazard mitigation ~~activities~~ **structure** is subject to the provisions in the Ecosystems and Biodiversity Chapter
2. For any natural hazard mitigation ~~activity~~ **structure** within Outstanding Natural Landscapes in the coastal environment, refer to the Coastal Environment Chapter.
3. Where activities are located in a Historic Heritage, Notable Tree or Sites and Areas of Significance to Māori Overlay Chapter area, these provisions apply.

Activity Status where compliance not achieved: Controlled

NFL – R4	**Demolition and Removal of a Structure within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six**

Activity Status Permitted

Advice Note: Where structures are identified as Historic Heritage Items in Schedule One, then the Historic Heritage Rules apply.

Activity Status where compliance not achieved: N/A

NFL -R5	**Additions or alterations to buildings and structures, including minor upgrades to ~~Energy~~ Renewable Electricity Generation Activities and Network Utility Infrastructure within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six**

Activity Status Permitted

Where:

1. **This is minor upgrade of infrastructure undertaken by a Network Utility Operator or Renewable Electricity Generation Activity; or**
2. For all other activities:

a. The maximum height of **any addition or alteration** ~~buildings and structures~~ **is 5m** above ground level ~~is 5m~~**; and**

b. The maximum area of any addition is no greater than 50m^2, or 10% of the total floor area, whichever is the greater.

Advice Notes:

~~1.~~ Where activities are located in the Coastal Environment, the provisions in the Coastal Environment Chapter apply **and this rule does not apply**.

Activity Status where compliance not achieved: Restricted Discretionary

NFL – R6	**Earthworks within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six**

Activity Status Permitted

Where:

1. All performance standards for Earthworks Rule EW - R1 are complied with; and
2. This is ancillary to:

a. An infrastructure activity undertaken by a network utility operator ~~in accordance with the Permitted Activity standards in Infrastructure Rule INF - R7; or~~

b. ~~An energy activity undertaken by a network work utility operator in accordance with the Permitted Activity standards in Energy Rule ENG – R4;~~ **Additions or alterations to a building or structure, including minor upgrades of renewable electricity generation and network utility infrastructure provided for in Rule NFL – R5.**

3. For other earthworks, the following standards are complied with:

a. The cut height or fill depth does not exceed one metre vertically; **and**

b. No more than 500m^3 of earthworks are undertaken~~/~~ **per** 12 month period~~/~~ **per** site **or per 4 hectares, whichever is the greater.**~~; and~~

c. ~~The earthworks are undertaken outside of the Coastal Environment.~~ **Advice Notes:**

~~4. Earthworks associated with natural hazard mitigation activities are subject to Rule NFL - R3.~~

~~5.~~ **1.** This rule also applies to plantation forestry activities, where this provision is more stringent than the NES - **C**~~P~~F.

~~6.~~ **2.** Where activities are located in the Coastal Environment, the provisions **are located** in the Coastal Environment Chapter apply **and this rule does not apply**.

Activity Status where compliance not achieved: ~~Controlled~~**Restricted Discretionary**

Refer to relevant Coastal Environment Rules for Earthworks in the Outstanding Coastal Environment.

NFL – R7	**Poutini Ngāi Tahu Activities or Māori Purpose Activities within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six**

Activity Status Permitted

Where:

1. These are:

a. Poutini Ngāi Tahu activities, including cultural harvest of vegetation, mahinga kai, Pounamu, Aotea stone or rock; or

b. Māori Purpose Activities in the Māori Purpose Zone undertaken in accordance with an Iwi/Papatipu Rūnanga Management Plan; and

2. All Permitted Activity standards in Rule EW - R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

NFL – R8	**Erection of a building or structure not otherwise provided for as a Permitted Activity within an Outstanding Natural Landscape described in Schedule Five**

Activity Status Permitted

Where the structure is:

1. A fence; or

2. Associated with ~~stock~~ water reticulation including tanks, pipes and water troughs; or

3. For parks facilities or parks furniture in any Open Space Zone; or

4. For a network utility (including customer connections) in accordance with the Permitted Activity standards for Infrastructure in Rule INF - R7 **and for energy network utilities Rule ENG-R4, underground lines or small network utility structures not exceeding 3m in height and 5m^2 in area**; or

5. For a **single** small-scale renewable electricity generation activity **per allotment, where:** ~~with a maximum height above ground level of 5m~~

a. **The maximum height is 5m above ground level; and**

b. The gross floor area of any building does not exceed 100m^2; or

6. For agricultural, pastoral and horticultural activities and **mahinga kai activities** or any accessory building where:

a. The maximum height is 3m above ground level; and

b. The gross floor area of any building does not exceed 100m^2**; o**r

7. **A bridge constructed as part of a Temporary Training Activity.**

Advice Note:

1. Where buildings and structures are located in the Coastal Environment, the provisions located in the Coastal Environment Chapter apply and this rule does not apply.

Activity status where compliance not achieved: Restricted Discretionary

Controlled Activities

NFL – R9	**Natural Hazard Mitigation ~~Activities~~ Structures in an Outstanding Natural Landscape described in Schedue Five or Outstanding Natural Feature in Schedule Six, including Earthworks not meeting Rule NFL - R3**

Activity Status ~~Controlled~~ Restricted Discretionary

Where:

~~1. These are to protect Critical Infrastructure; and~~

2. ~~These will not destroy~~**A**any **Outstanding Natural Landscape identified in Schedule Five or** Outstanding Natural Feature identified in Schedule Six **and** ~~or~~ the values which make it Outstanding **are protected**.

~~Matters of control~~Discretion is restricted to:

a. Any requirements for landscape evaluation;

b. Managing adverse effects on historical, cultural and biodiversity values;

c. Amenity and visual effects;

d. Managing effects on public access and natural character;

e. Effects on the values that make the feature Outstanding;

f. Identifying and avoiding adverse effects on Poutini Ngāi Tahu values;

g. Extent and design of earthworks; and

h. **Measures to mitigate** ~~L~~landscape ~~measures~~ **effects**.

Notification: Applications which will substantially modify an Outstanding Natural Feature will be notified to the Geosciences Society and may be publicly notified.

Activity status where compliance not achieved: Discretionary

NFL – R10	**Earthworks within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six not meeting Rule NFL - R6**

Activity Status ~~Controlled~~ Restricted Discretionary

Where:

1. These are for:

a. Walking/cycling tracks; **or**

b. Roads, farm tracks or fences; **or**

c. Installation of network utility infrastructure; or

d. Installation, **upgrade, maintenance, operation and repair** of a renewable electricity generation ~~facility~~ **activity**; ~~or~~

e. Establishment of a building platform and access to a building site in an approved subdivision or for a residential building where there is no existing residential building on the property; **or**

f. Protection of ~~critical~~ **regionally significant** infrastructure from natural hazards~~;~~**.** ~~and~~

~~2. Earthworks are the minimum required to undertake the activity.~~

Discretion is restricted to:

a. Any requirements for landscape evaluation;

b. Managing adverse effects on historical, cultural, and biodiversity values;

c. Amenity and visual effects;

d. Managing effects on public access and natural character;

e. Effects on the values that make the feature Outstanding;

f. Identifying and avoiding adverse effects on Poutini Ngāi Tahu values;

g. Extent and design of earthworks; and

h. **Mitigation measures for** ~~L~~landscape **effects** ~~measures~~.

Advice Note:

1. **Within the Coastal Environment,** ~~For~~ **Rule NFL-R10** **E**~~e~~arthworks within Outstanding Natural Features and Landscapes **does not apply.** ~~in the Coastal Environment~~ **R**~~r~~efer to the Coastal Environment Rules.

2. This rule also applies to plantation forestry activities, where this provision is more stringent than the NES - ~~P~~**C**F.

Activity status where compliance not achieved: Discretionary

Restricted Discretionary Activities

NFL – R10A	**Mineral Extraction in the Buller Coalfield Zone and Mineral Extraction Zone within an Outstanding Natural Landscape described in Schedule Five.**

Activity Status Restricted Discretionary

Where:

1. **These are on land within the Buller Coalfield Zone or a Mineral Extraction Zone; and**
2. **This includes earthworks and buildings associated with the activity.**

Discretion is restricted to:

a. **Any requirements for landscape evaluation;**
b. **Managing adverse effects on historical, cultural, and biodiversity values;**
c. **Amenity and visual effects;**
d. **Managing effects on public access and natural character;**
e. **Effects on the values that make the feature or landscape Outstanding;**
f. **Identifying and avoiding adverse effects on Poutini Ngāi Tahu values;**
g. **Extent and design of earthworks; and**
h. **Mitigation measures for landscape effects.**

Activity status where compliance not achieved: Discretionary

NFL – R11	**Poutini Ngāi Tahu Activities or Māori Purpose Activities within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six not meeting Rule NFL - R7**

Activity Status Restricted Discretionary

Where:

1. These are on land within a Māori Purpose Zone; and
2. This includes earthworks and buildings associated with the activity.

Discretion is restricted to:

a. Any requirements for landscape evaluation;

b. Managing adverse effects on historical, cultural, and biodiversity values;

c. Amenity and visual effects;

d. Managing effects on public access and natural character;

e. Effects on the values that make the feature Outstanding;

f. Identifying and avoiding adverse effects on Poutini Ngāi Tahu values;

g. Extent and design of earthworks; and

h. **Mitigation measures for** ~~L~~landscape **effects** ~~measures~~.

Activity status where compliance not achieved: Discretionary

NFL – R12	**Buildings or Structures and associated Earthworks within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six not meeting Permitted Activity rules.**

Activity Status Restricted Discretionary

Where:

1. This is an addition to an existing building or a building accessory to an existing building; or
2. The building is identified on an approved subdivision plan for the site or for a residential building where there is no existing residential building on the property; or
3. This is required for:

a. A network utility;

b. A renewable electricity generation activity;

c. An agricultural pastoral or horticultural activity;

d. A conservation activity; or

e. A recreational activity in an Open Space Zone.

Discretion is restricted to:

a. Any requirements for landscape evaluation;

b. Managing adverse effects on historical, cultural, and biodiversity values;

c. Amenity and visual effects;

d. Managing effects on public access and natural character;

e. Effects on the values that make the feature Outstanding;

f. Identifying and avoiding adverse effects on Poutini Ngāi Tahu values;

g. Extent and design of earthworks; ~~and~~

h. **Mitigation measures for** ~~L~~**l**andscape **effects** ~~measures~~;

i. Any functional or operational needs that relate to the proposal and its location; and

j. Any matters of public safety.[174]

Activity status where compliance not achieved: Discretionary

Discretionary Activities

NFL – R13	**Afforestation with Plantation Forestry within an Outstanding Natural Landscape or Outstanding Natural Feature**

Activity Status ~~Discretionary~~Non-complying

[174] Manawa Energy Limited S438.100

Activity status where compliance not achieved: N/A

NFL – R14	**Buildings and Structures within Outstanding Natural Landscapes and Outstanding Natural Features not meeting Permitted, ~~Controlled~~ or Restricted Discretionary rules**

Activity Status Discretionary

Activity status where compliance not achieved: N/A

NFL – R15	**Earthworks, Mineral Extraction and Natural Hazard Mitigation Activities within Outstanding Natural Landscapes and Outstanding Natural Features not meeting Permitted or Restricted Discretionary Rules**

Activity Status Discretionary

Notification:

1. Applications to destroy any Outstanding Natural Feature or the Values which make it Outstanding will always be Notified to the Geosciences Society of New Zealand and may be publicly notified.
2. This rule also applies to plantation forestry activities, where this provision is more stringent than the NES - C~~P~~F.

Activity status where compliance not achieved: N/A

NFL – R16	**Poutini Ngāi Tahu and Māori Purpose Activities within an Outstanding Natural Landscape described in Schedule Five or Outstanding Natural Feature described in Schedule Six not meeting Rule NFL - R11.**

Activity Status Discretionary

Activity status where compliance not achieved: N/A

Subdivision Rules

SUB – R11	**Subdivision to create allotment(s) of land within the Outstanding Natural Landscape identified in Schedule Five or Outstanding Natural Feature identified in Schedule Six**

Activity Status Restricted Discretionary

Where:

1. The site is outside of the Coastal Environment;
2. The area has not been identified as an Area of Significant Biodiversity subject to Rules SUB – R8, SUB – R9 or SUB – R14
3. The area is not a Significant Natural Area identified in Schedule Four; and
4. All Subdivision Standards are complied with.

Discretion is restricted to:

a. **Matters outlined in Policies NFL P1 – NFL -P9 as relevant;**

b. Ensuring that landscape or natural feature values within the overlay for which the area or feature is scheduled are maintained;

c. The size, design, shape, location and layout of allotments;

d. The provision of infrastructure and services for **transport,** drinking water, wastewater and stormwater, telecommunications and energy;

e. The adequacy of water supply for firefighting;

f. **Measures to address any natural hazards or geotechnical considerations;**

g. **Management of potential reverse sensitivity effects on existing land uses, including network utilities and regionally significant infrastructure, rural activities or significant hazardous facilities;**

h. The requirement for financial contributions as outlined in Rules FC – R1 to FC – R12; and

i. The provision of esplanade reserves or strips, and the need for access to be provided to any esplanade reserve or strip created.

Advice Note: This rule does not apply to subdivisions to create allotments for network utilities, access or reserves which are subject to Rule SUB - R4.

SUB – R16	**Subdivision of Land within the Coastal Environment subject to an Outstanding Natural Landscape, Outstanding Natural Feature or High Coastal Natural Character Overlay**

Activity Status Discretionary

Where:

1. No new allotments are proposed within Outstanding Coastal Natural Character areas as identified in Schedule Eight.

Activity status where compliance not achieved: Non-complying

APPENDIX 2 – AMENDMENTS TO SCHEDULE 5

Preamble

Schedule Five identifies and describes 55 Outstanding Natural Landscapes (ONLs). The ONL Schedules are a tool to assist with the identification of the landscape values that are to be protected within an area. They contain both factual information and evaluative content and are to inform plan development and plan implementation processes and assist technical landscape assessment. The ONL Schedules are based on the scale of the relevant ONL and form a relatively 'high-level' summary of the more natural landscape values of the area. This means that the landscape values identified in an ONL Schedule may not apply to a site within the ONL. The ONL Schedules do not address established modifications that form part of the landscape to which they apply, such as infrastructure, rural buildings, farmhouses, roads, pastoral land use and production forestry. It is acknowledged that this existing modification is of a scale, character and/or location such that the area still qualifies as ONL. Given the scale of the landscape assessment underpinning the ONL schedules and the high-level nature of the schedules themselves, a finer grain proposal-specific assessment of landscape values will typically be required for plan development or plan implementation purposes (including plan changes or resource consent applications). Through any proposal-specific landscape assessment, landscape modifications and/or additional landscape values may be identified that are not recorded in the ONL Schedules.

Unique Identifier	Site Identifier	Site Type and Values
ONL1	Malcolm, McKenzie, & Hope Blue River Ranges	Series of remote low elevation ranges and valleys that are heavily dissected with high relief. Contains a sequence of steep coastal slopes, cliffs and headlands (Awarua Point) with a series of rocky shoals, outcrops, and broad beaches. • Unmodified and continuous mature coastal and lowland forest together with the dramatic terrain imparts a strong sense of naturalness. • Dramatic interaction of the landscape with Te Tai-o-Rēhua/ the Tasman Sea with its continuous vegetation cover providing a consistent patterning to this exposed landscape. • Extremely limited modification / human activities. • The highly distinctive and glacial shorn profile of Awarua Point is a key landmark within this Landscape • Important cultural landscape for Poutini Ngāi Tahu including SASM 214 Huruhuru Manu/Spoon River traditional nohoanga, mahinga kai and SASM 215 Hautai kāīnga, mahinga kai Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL1.
ONL2	Bonar Knob & Katake/Cascade Point	Remote series of elevated plateaux, glacial shorn slopes, broad alluvial valleys, and deeply incised river gorges together with coastal cliffs and bluffs, and craggy headlands.

		• Unmodified and continuous mature coastal, lowland, and swamp forest giving way to alpine scrub and tussock on the plateaux, together with the dramatic terrain imparts a strong sense of naturalness. • Evidence of erosion, stream / river downcutting and entrenchment, tidal variation and coastal exposure as well as formative glacial processes. • The coastal exposure and orientation of the landscape creates a dramatic and expressive environment that abuts Te Tai-o-Rēhua/ the Tasman Sea. • The highly distinctive and glacial shorn profile of Katake/Cascade Point & Plateau is a key landmark within this landscape • Important cultural landscape for Poutini Ngāi Tahu including SASM 212 Cascade River kāīnga Mahinga kai, Traditional nohoanga, SASM 211 Cascade River Nohoanga, mahinga kai and SASM 213 Barn Bay kāīnga, urupā Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL2.
ONL3	Jackson Head & Stafford Ranges	Prominent craggy headland backed by a series of low elevation ranges and valleys that are heavily dissected. • The coastal outlook, exposure and orientation of the landscape creates a dramatic and expressive environment that abuts Te Tai-o-Rēhua/ the Tasman Sea • Interplay of coastal landforms and vegetation – regenerating scrubland on exposed slopes reinforce areas of coastal erosion, river and stream entrenchment. • Amalgam of very steep ranges, highly exposed headlands and unmodified windswept forest give the landscape a rawness and pronounced sense of naturalness. • The dramatic projection of Jackson Head out into Te Tai-o-Rēhua/ the Tasman Sea and the tranquil enclosed waters of Lake Ellery are key landmarks with this landscape • Important cultural landscape for Poutini Ngāi Tahu including SASM 209 No. 1 Arawata Native Reserve - West Reserve Block Māori Reserve Jackson Head also scheduled in Proposed Regional Coastal Plan as ONL3.
ONL4	Ōkahu/Jackson Bay	Vast and remote windswept stony beach immediately flanked by coastal forest that extends into an expansive plain. Includes several forest clad hill formations which rise dramatically from the plains. • Highly expressive of the landscapes formative and ongoing natural processes – post glacial alluvial plain, interplay of river mouths and Te Tai-o-Rēhua/ the Tasman Sea. Vegetation patterns reinforce the exposure to Te Tai-o-Rēhua/ the Tasman Sea and the expansive planar landform. • Pristine lowland and swamp forest predominates with wetland areas surrounding the numerous waterbodies within this landscape. • Strongly defined by enclosing mountain ranges.

		• Key landmarks within this landscape are the forest clad hills of Mt Mclean and Mosquito Hill rising dramatically from the plains, the Arawhata, Waiatoto, Okuru, and Haast Rivers, and the vast stony beach of Jackson Bay • Important cultural landscape for Poutini Ngāi Tahu and area of habitation for Ngāti Māhaki including eleven sites of significance to Māori - SASM 189 Waita River Nohoanga, SASM 190 Waita River kāinga, urupā, mahinga kai, SASM 191 Tawharekiri Lake (Māori Lakes) mahinga kai, SASM 192 Awarua Māori Reserve, SASM 196 Ōkuru River Nohoanga, SASM 197 Ōkuru Nohoanga, kāinga, urupā, mahinga kai, SASM 198 Ōkuru Mātaitai Reserve mahinga kai, SASM 199 Mussel Point wāhi tapu, SASM 202 Waiatoto Lagoon, North Bank Nohoanga, mahinga kai, SASM 204 Waiatoto Lagoon, South Bank Nohoanga, mahinga kai and SASM 205 No. 2 Waiatoto Native Reserve Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL4.
ONL5	Olivine & Haast Ranges	Broad alluvial valleys flanked by prominent high altitude mountain ranges. • Assemblage of predominately north-south running ridges, peaks, and mountaintops of similar attitudes, vegetative cover and appearance. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • Extremely limited modification / human activities. • Landmarks – Olivine Range, Haast Range, and the Arawhata River.
ONL6	Tititea/Mt Aspiring & Hinemakawe/Mt Castor	Wild, remote, and dramatic sequence of mountain ranges, peaks, glaciers, lakes, and strongly defined valley systems. • Combination of glacial sculpted terrain, etched ridgelines, rocky outcrops, expansive permanent ice flows, glacial lakes, vegetation sequences giving way to raw and exposed peaks and ridges are highly natural. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. Evidence of erosion revealing underlying geology and glacial erosion are highly expressive of the landscapes formative and ongoing natural processes. • Landmarks – Tititea/Mt Aspiring, Upper and Lower Volta Glaciers, Hinemakawe/Mt Castor and Mt Pollux.
ONL7	Selborne, Browning, Mark, & Bealey Ranges	• Extensive landscape consisting of strongly defined valley systems flanked by high altitude mountain • ranges.

		• Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • Assemblage of ridges, peaks, and mountaintops of similar attitudes, vegetative cover and appearance. • Extremely limited modification / human activities. • Combination of glacial sculpted terrain, etched ridgelines, rocky outcrops, permanent ice flows, vegetation sequences giving way to raw and exposed peaks and ridges are highly natural.
ONL8	Awarua/Haast River	Very extensive braided river channel and gravel beds flanked by high altitude mountain ranges. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • Dramatically eroded landforms clearly express the Haast Rivers power and varying flow. Broken vegetation and expansive depositional landforms reinforce these qualities. • Very high relief, steep to very steep mountain ranges that dramatically enclose the river valley. • Exposed upper peaks and rocky outcrops are apparent on the Bealey Range. • Awarua/Haast River is a key landmark within this landscape.
ONL9	Landsborough River Valley & Mt Hooker	Wild, remote, and dramatic sequence of mountain ranges, peaks, glaciers, and valley systems. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • Combination of glacial sculpted terrain, etched ridgelines, rocky outcrops, expansive permanent ice flows, glacial lakes, vegetation sequences giving way to raw and exposed peaks and ridges imbue a strong sense of naturalness. • Assemblage of ridges, peaks, and mountaintops of similar orientation, attitudes, vegetative cover and appearance.
ONL10	Bald, Moeraki and Paringa Hills	Series of steep craggy headlands backed by forest clad foothills and valleys that are heavily dissected and contain two prominent lake basins: Lake Moeraki and Tāwhirirāupo/Lake Paringa. • Dramatic interaction of the landscape with Te Tai-o-Rēhua/ the Tasman Sea with its continuous mature coastal and lowland forest vegetation cover providing a consistent patterning to this exposed landscape.

		• Combination of glacial sculpted terrain with continuous vegetation cover, high relief, and the tranquility of the lakes opening up views up and down the valley basins reinforce the natural qualities of this landscape. • Assemblage of ridges, peaks, and mountaintops of similar orientation, altitude, vegetative cover and appearance. • Lake Moeraki, Tāwhirirāupo/Lake Paringa, and Heretaniwha Point are key landmarks with this unit. • Knights Point lookout provides dramatic elevated views of the coastline • Important cultural landscape for Poutini Ngāi Tahu and area of habitation for Ngāti Māhaki including SASM 180 No. 3 Paringa Native Reserve, SASM 184 Lake Pāringa, Statutory Acknowledgement, Mahinga kai, SASM 185 Lake Moeraki Reserve, Māori Reserve, Mahinga kai, SASM 186 Whakapoai Māori Reserve and SASM 187 Arnott Point Traditional nohoanga, Cave, Battle site, wāhi tapu Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL10.
ONL11	Mahitahi/ Bruce Bay to Cook Bluff	Remote and isolated coastline comprising broad sandy beaches, coastal cliffs, bluffs, and craggy headlands backed by expansive low lying swampland, glacial shorn hills, and braided river mouths. • Varied amalgam of raw and exposed landforms, windswept vegetation and isolated beach fronts impart a strong sense of naturalness. • Dramatic interaction of the landscape with Te Tai-o-Rēhua/ the Tasman Sea – sheer cliffs at Mahitahi, Makaawhio/Jacobs, Karangarua, and Cook Bluff plunge dramatically into the sea – Weheka/Cook & Karangarua River mouths are highly expressive of the landscapes natural processes. • High coastal exposure and orientation towards Te Tai-o-Rēhua/ the Tasman Sea. • Vast unmodified sequences of native forest enclosed by glacial shorn hills reinforce the natural qualities of this landscape. Mature wind swept rimu forest on Sandy Beach • Mahitahi/Bruce Bay was the landing place of Polynesian explorer Maui • Important cultural landscape for Poutini Ngāi Tahu and area of habitation for Ngāti Māhaki with ten sites of significance to Māori including SASM 144 Karangarua Lagoon Statutory Acknowledgement, Mahinga kai, SASM 146 Puketahi - The Sugar Loaf, SASM 147 Karangarua River Nohoanga, Mahinga kai , SASM 151 Bruce Bay/Manakaiaua Māori Reserve, SASM 156 Te Puku o te Wairapa sacred maunga, Ancestors embedded in the landscape, SASM 157 No. 10 Makāwhio Native Reserve Māori Reserve, Pā site, Urupā, SASM 158 No. 8 Makāwhio and No. 9 Makāwhio Māori Reserve, Pā site, Urupā, Mahinga kai, SASM 159 Tikitiki o Rehua sacred maunga, Ancestors embedded in the landscape, SASM 172 Pāpākeri Creek Mahinga kai, SASM 183 Makāwhio River Catchment (Jacobs River) Ancestors embedded in the landscape, Wāhi taonga, wāhi tapu, Mahinga kai Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL11.
ONL12	Mahitahi, Makaawhio/Jacobs River, and Karangarua foothills	Sequence of north-west facing mountain ranges that front on to an expansive swamp and farming plain.

		• Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • Combination of etched ridgelines, rocky outcrops, expansive permanent ice flows, glacial lakes, vegetation sequences giving way to raw and exposed peaks and ridges reinforce the natural qualities of this landscape. • Important cultural landscape for Poutini Ngāi Tahu including the awa of Ngāti Māhaki – the Makaawhio River – SASM 166 and SASM 183. Poutini Ngāi Tahu have a statutory acknowledgement on the river, and the catchment is significant for ancestors embedded in the landscape, Wāhi taonga,Wāhi tapu and Mahinga kai Assemblage of ridges, peaks, and mountaintops of similar orientation, attitudes, vegetative cover and appearance.
ONL13	Strachan & Bannock Brae Ranges	Wild, remote, and dramatic sequence of mountain ranges, peaks, glaciers, and valley systems. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • Combination of etched ridgelines, rocky outcrops, expansive permanent ice flows, glacial lakes, expansive braided rivers (Ōtoko, Mahitahi, and Makaawhio Rivers) vegetation sequences giving way to raw and exposed peaks and ridges are highly natural. • Assemblage of ridges, peaks, and mountaintops of similar orientation, attitudes, vegetative cover and appearance. • Important cultural landscape for Poutini Ngāi Tahu including the awa of Ngāti Māhaki – the Makaawhio River – SASM 166 and SASM 183. Poutini Ngāi Tahu have a statutory acknowledgement on the river, and the catchment is significant for ancestors embedded in the landscape, Wāhi taonga,Wāhi tapu and Mahinga kai
ONL14	Aoraki / Mt Cook	Extensive landscape consisting of dramatic mountain ranges that extend westward from the main divide, high altitude peaks, glaciers, permanent snowfields, and incised valley systems. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief – particularly where horizontal vegetation patterns including seral beech forest and scrub mark glacial retreat. • Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. Dramatic etched bluffs are highly expressive of formative glacial processes.

		• Combination of etched ridgelines, rocky outcrops, expansive permanent ice flows, glacial lakes, vegetation sequences giving way to raw and exposed peaks and ridges are highly natural. • Te Moenga-o-Tuawe/ Fox Glacier & Ngā Roimata-a-Hinehukatere/Franz Josef Glacier, Douglas Neve, Mt Tasman, Sefton, Elie De Beaumont, Hicks, & Aoraki are key / representative landmarks within this landscape. • Important cultural landscape for Poutini Ngāi Tahu including SASM 177 Copland Track, Ara tāwhito, SASM 145 Kā Roimata-a-Hinehukatere / Franz Josef Glacier, and SASM 148 Te Moeka-o-Tuawe / Fox Glacier are for Poutini Ngāi Tahu ancestors embedded in the landscape.
ONL15	Koihaihai/ Gillespies Point to Te Kohumarua Bluff	Series of steep craggy headlands and isolated sandy beaches backed by glacial shorn foothills covered in native forest which contain a number of lake and swamp basins. • Dramatic interaction of the landscape with Te Tai-o-Rēhua/ the Tasman Sea with its sheer cliffs and scarps, continuous coastal and lowland forest cover providing a consistent patterning to this exposed landscape. • Combination of glacial sculpted terrain with continuous vegetation cover, moderate relief, and the tranquility of the lakes opening up views up and down the valley basins reinforce the natural qualities of this landscape. • Unmodified vegetation sequences from dunefields to mature coastal forest. • Māpouriki/Lake Mapourika, Wahapo, Matheson, Three & Five Mile Lagoons, and Ōmoeroa Range are key landmarks within this unit • Important cultural landscape for Poutini Ngāi Tahu including SASM 136 No. 15 Omoeroa Native Reserve Māori Reserve, Traditional nohoanga, SASM 137 No. 17 Waiahope Native Reserve Māori Reserve, Traditional nohoanga, SASM 138 No. 16 Waikohai Native Reserve Māori Reserve, Traditional nohoanga, kainga, SASM 139 Gillespies Beach Māori Reserve, kainga, SASM 140 Lake Matheson Mahinga kai Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL15.
ONL16	Ōkārito Lagoon to Mt Bird	Vast and remote lagoon systems enclosed by extensive beaches and dune fields and flanked by mature low lying coastal forest which extends inland to Mt Bird across a broad gentle inclined glacial terrace. • Unmodified sequences of dunefield and wetland vegetation through to mature coastal forest. • Highly dynamic and dramatic interaction / relationship between the Ōkārito River mouth, associated sand bars and the open waters of the Tasman Sea. • Enclosure of the lagoon is expressive of formative coastal processes. • Combination of the enclosing terrain, continuous and vast expanse of vegetation cover, the tranquility of the Lagoons expansive open waters opening up views up and down the coast reinforce the natural qualities of this landscape. • Ōkārito is a key landmark within this landscape.

		• Important cultural landscape for Poutini Ngāi Tahu including SASM 128 Whataroa Native Reserves Sec 22, SASM 129 Waitangiroto Nature Reserve Former Māori Reserve, Mahinga kai, SASM 130 Whataroa Native Reserves Secs 21 wāhi tapu, SASM 131 Ōkārito Lagoon, Statutory Acknowledgement, Mahinga kai, Mātaitai, Ancestors embedded in the landscape, SASM 132 Ōkārito Mātaitai Reserve, mahinga kai, SASM 133 No.19 Ōkarito Native Reserve, kainga, SASM 134 Ōkārito River/Lagoon Nohoanga, mahinga kai, SASM 135 Ōkārito (No. 18 Koamaru Native Reserve) wāhi tapu
ONL17	Lower Waitangitāhuna/Waitangitaona, Whataroa, Pouerua-tāhuna/Poerua, and Whakanui/Wanganui Rivers	Expansive braided river channels flanked by a series of steep and dramatic river escarpments covered in indigenous forest. • Highly dynamic and dramatic interaction / relationship between the river mouths, associated sand bars and the open waters of the Tasman Sea. • Assemblage of river escarpments of similar orientation, altitude, vegetative cover and appearance – the dramatic profile of the escarpment features accentuate this landscapes endemic character. • Unmodified sequences of dunefield and wetland vegetation through to mature coastal and low land native forest. • Dynamic natural processes associated with the meandering braids and gravel beds, grading of aggregate sizes, downcutting, river terracing, flood events and inundation • Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL17.
ONL18	Mt Elie De Beaumont – Mt Whitcome	Extensive landscape consisting of dramatic mountain ranges that extend westward from the main divide, high altitude peaks, glaciers, permanent snowfields, and incised valley systems. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief – particularly where horizontal vegetation patterns including seral beech forest and scrub mark glacial retreat. • Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. Dramatic etched bluffs are highly expressive of formative glacial processes. • Combination of etched ridgelines, rocky outcrops, expansive permanent ice flows, glacial lakes, vegetation sequences giving way to raw and exposed peaks and ridges are highly natural. • The Garden of Eden Ice Plateau, Garden of Allah, Mt Elie De Beaumont, Whitcome, Mannering, Moffat, and Newton Peak are key / representative landmarks within this landscape
ONL19	Pouerua hāpua/Saltwater Lagoon	Vast and remote lagoon system enclosed by extensive beaches, dune fields and flanked by mature low lying coastal forest which extends inland across a broad elevated terrace. • Unmodified sequences of dunefield and wetland vegetation through to mature coastal forest.

		• Highly dynamic and dramatic interaction / relationship between the Lagoon mouth, associated sand bars and the open waters of the Tasman Sea. • Enclosure of the lagoon is expressive of formative coastal processes. • Combination of the enclosing terrain, continuous and vast expanse of vegetation cover, the tranquility of the Lagoons expansive open waters and islands reinforce the natural qualities of this landscape. • Pouerua hāpua/ Saltwater Lagoon is a key landmark within this landscape • Important cultural landscape for Poutini Ngāi Tahu including SASM 125 Lake Matahi/Lake Ianthe mahinga kai Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL19.
ONL20	Wakanui/Wanganui Bluff to Waitaha River	Isolated sandy beaches backed by a series of bluffs / cliffs, forest covered slopes, and swampland. • Dramatic interaction of the landscape with Te Tai-o-Rēhua/ the Tasman Seawith its sheer cliffs and scarps, continuous coastal and lowland forest cover providing a consistent patterning to this exposed landscape. • Varied amalgam of raw and exposed coastal landforms, strong elevated relief, windswept vegetation which impart a strong sense of naturalness. • Combination of bluffs and scarps, continuous vegetation cover, saltwater lagoons, dune fields, and wetlands and the tranquility of the extensive swampland reinforce the natural qualities of this landscape. • Unmodified vegetation sequences from dunefields and wetland vegetation through to mature coastal and low land native forest. • Important cultural landscape for Poutini Ngāi Tahu including SASM 162 Heretaniwha wāhi tapu, SASM 167 Mahitahi Mussel & Pipi Bed mahinga kai, SASM 168 No. 4 Heretaniwha Native Reserve wāhi tapu, SASM 169 No. 5 Mahitahi Native Reserve, kainga, SASM 170 Porangirangi to Mahitahi kāinga, SASM 171 Mahitahi River Nohoanga, SASM 181 Paringa River Reserve - Rural Section 727A, Māori Reserve and SASM 182 Paringa River Reserve - Lot 1 DP 3785, Māori Reserve Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL20.
ONL21	Matahi/ Lake Ianthe	Enclosed lake basin that is strongly defined by steep slopes covered in mature indigenous forest. • Very extensive and homogenous mature forest around the entire lake fringe that directly interacts with the open waters of the Lake. Intact sequences of wetland and swamp species through to canopy native forest. • Intact sequences of wetland and swamp species through to canopy native forest. • High transient values associated with evident bird life on the lake and surrounding indigenous forest. • The tranquility of the lake, vast unmodified sequences of native forest amplify the natural qualities of this landscape.

		• Due to its intimate scale and enclosure this landscape as a whole is a landmark. • Important cultural landscape for Poutini Ngāi Tahu including SASM 125 Lake Matahi/Lake Ianthe mahinga kai
ONL22	Bonar, Rangitoto & Bald Hill Ranges	Assemblage of heavily dissected ranges, foothills, and valley systems with broad rounded peaks whose underlying geology set them apart visually from the high altitude ranges to the east. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • Assemblage of ridges, peaks, and mountaintops of similar orientation, altitudes, vegetative cover and appearance. Contiguous mountain range and foothills. Mature beech forest giving way to alpine vegetation at higher attitudes. • The Hokitika Gorge is a well known landmark within this landscape.
ONL23	Mt Camelback & Kokiraki/ The Doughboy	Two distinct forest clad hill formations that rise dramatically from the flat pastoral landscape which surrounds them. • Interplay / contrast of mature indigenous forest and surrounding pasture reinforces the dramatic topography and pronounced relief. • Striking and highly distinctive landforms that remain visually separate from nearby mountain ranges. • Homogenous mature forest cover. • Mt Camelback and Kokiraki/The Doughboy are themselves landmarks within the wider landscape.
ONL24	Kea Pass – Arthurs Pass – Amuri Pass	Extensive landscape consisting of dramatic mountain ranges along the main divide, high altitude peaks, glaciers, and incised valley systems. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. • Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. Erosion, scree slopes and depositional landforms clearly express the erosive nature of the mountain landscape and uplifted landforms. • Combination of etched ridgelines, rocky outcrops, expansive permanent ice flows, glacial lakes, vegetation sequences giving way to raw and exposed peaks and ridges are highly natural. • Lake Christabel, Whakarewa/Lake Browning, & Kāurupātaka/Lake Kaurapataka as well as the numerous peaks along the main divide are key / representative landmarks within this landscape. • Nōti Taramakau (Harper Pass) was a significant Māori trail across the alps.
ONL25	Lake Kaniere	Elongated lake basin dramatically enclosed by an assemblage of broad ranges and hills whose underlying granite geology set them apart visually from the high altitude schist ranges to the east.

		• Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • Very extensive and homogenous mature forest around the entire lake fringe that directly interacts with the open waters of the Lake. Intact sequences of wetland and swamp species through to canopy native forest. • Lake Kaniere, Mt Upright, & Turiwhati/Turiwhate are key / representative landmarks within this landscape. • Association with Ngāi Tahu – pounamu source and route to east coast.
ONL26	Lake Mahinapua	Low lying lake basin that is strongly defined by surrounding mature indigenous forest. • Very extensive and homogenous mature swamp forest around the entire lake fringe that directly interacts with the open waters of the Lake. Intact sequences of wetland and swamp species through to canopy native forest. • High transient values associated with evident bird life on the lake and surrounding indigenous forest. • The tranquility of the lake, unmodified sequences of native forest amplify the natural qualities of this landscape. • Due to its intimate scale this landscape as a whole is a landmark. • Important cultural landscape for Poutini Ngāi Tahu including SASM 111 Lake Māhinapua wāhi tapu
ONL27	Lower Taramakau River & Kawhaka Forest	Extensive braided river channel and gravel beds flanked by steep escarpments covered in mature native forest that extends across an elevated plateau housing a number reservoirs. • Dramatically eroded landforms clearly express the rivers power and varying flow. Broken vegetation and expansive depositional landforms reinforce these qualities. • Very extensive and homogenous swamp forest. Vegetation directly interacts with the river beds and the open waters of the reservoirs. • High transient values associated with evident bird life on the reservoirs and surrounding indigenous forest. • The Kapitea and Kumara Reservoirs are key landmarks within this unit. • Important cultural landscape for Poutini Ngāi Tahu including SASM 104 Kawhaka Creek Catchment Pounamu legends, Ancestors embedded in the landscape
ONL28	Taramakau & Ōtira River Valleys	Very broad river valley consisting of extensive braided river channels and gravel beds that are dramatically enclosed by mountain ranges and high altitude peaks. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief.

		• Very extensive and homogenous swamp forest. Vegetation directly interacts with the river beds and the open waters of the reservoirs • Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. Erosion, scree slopes and depositional landforms clearly express the erosive nature of the mountain landscape and uplifted landforms. • Coherent rhythm and orientation of landforms. • Views from SH73.
ONL29	Kōtukuwhakaoka/Lake Brunner – Ōhonu/Hohonu Range & Tekimoka/Mt Te Kinga	Extensive fluvio-glacial lake basin strongly contained by the broad landforms of the Hohonu Range and Mt Te Kinga to the south. • Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. Erosion, scree slopes and depositional landforms clearly express the erosive nature of the mountain landscape and uplifted landforms. • Dramatically eroded landforms clearly express the rivers power and varying flow. Broken vegetation and expansive depositional landforms reinforce these qualities. • Homogenous and extensive wetland and swamp forest around the lake fringes. Vegetation directly interacts the open waters of the lake. High transient values • Kōtukuwhakaoka/Lake Brunner is a key landmark within this unit. • Important cultural landscape for Poutini Ngāi Tahu including SASM 67 (part) Kōtukuwhakaoko/Arnold River mahinga kai, SASM 79 Cashmere Bay, Te Kinga Pā site, SASM 82 Kōtukuwhakaoko/Lake Brunner (Moana) Statutory Acknowledgement, Mahinga kai, SASM 81 Takataka Islands Pā site, SASM 84 Knoll Point Pā site, SASM 85 Ta Kinga, Kōtukiwhakaoko urupā, SASM 86 Ōrangipuku Creek Mouth Tauranga waka
ONL31	Rapahoe Range	Highly prominent and distinctive cuesta type formation comprising a sequence of coastal bluffs and escarpments with rocky shoals and bays closer to Point Elizabeth. • Dramatic assemblage of ridges of similar orientation, attitudes, vegetative cover and appearance. Distinctive limestone cuesta formation. • Interplay of coastal landforms and vegetation – regenerating scrubland on exposed slopes reinforce areas of coastal erosion, river and stream entrenchment. • Striking interface with the Tasman Sea. Sheer cliffs and scarps at Point Elizabeth which plunge dramatically into the sea. • The coastal outlook, exposure and orientation of the landscape creates a dramatic and expressive environment that abuts the Tasman Sea. • Given the ranges elevated profile above the surrounding terrain and its proximity to Greymouth this unit as a whole is a landmark.

		• Important cultural landscape for Poutini Ngāi Tahu including SASM 46 Point Elizabeth Tohu whenua, Wāhi taonga Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL31.
ONL32	Haupiri fluvio-glacial lakes	Sequence of enclosed fluvio-glacial lake basins flanked by moderate to steep glacial shorn terrain covered in native forest. • Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. Erosion, scree slopes and depositional landforms clearly express the erosive nature of the mountain landscape and uplifted landforms. • Dramatically eroded landforms clearly express the rivers power and varying flow. Broken vegetation and expansive depositional landforms reinforce these qualities. • Homogenous and extensive wetland and swamp forest around the lake fringes. Vegetation directly interacts the open waters of the lake. High transient values associate with prolific bird life • Lake Hochstetter, Ahaura, Haupiri, Kangaroo & Lady Lake, and the Ahaura River are a key landmarks within this unit. • Important cultural landscape for Poutini Ngāi Tahu including SASM 74 Lake Haupiri Nohoanga, mahinga kai, SASM 78 Lady Lake Nohoanga, mahinga kai
ONL33	Victoria Range west	Steep to very steep mountain range with high relief and dissected by deeply incised valleys. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. • Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. Erosion, scree slopes and depositional landforms clearly express the erosive nature of the mountain landscape and uplifted landforms. • A mountain range sequence of deeply etched ridgelines or similar heights, displaying rock formations in upper elevations and alpine vegetation patterns. • Mt Puttick, Haast, Hunter, & Beckham are key / representative landmarks within this landscape – as seen from SH7 approaching springs junction.
ONL34	Upper Māwhera/Grey Valley	Series of steep ranges and peaks that enclose Te Māwherataka-o-kā-kuha-o-Tū-te-rakiwhanoa/Upper Grey River. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. • Exposed upper slopes revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. Erosion, scree slopes and depositional landforms clearly express the erosive nature of the mountain landscape and uplifted landforms.

		• Pristine beech forest, unmodified and dramatic landforms combine with the natural vegetation sequence to impart a strong sense of naturalness. • Pockets of farmland, buildings / dwellings, and modification have been excluded from this unit.
ONL35	Lewis Pass – Freyberg Range	Steep to very steep mountain ranges with deeply incised valleys and heavily etched and exposed rock formations. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. • Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • Freyberg Range, continuous vegetation cover, elevation and alpine wetland / lake assemblage create a very cohesive landscape. • Pristine beech forest, unmodified and dramatic landforms, scree slopes and rock formations combined with the natural vegetation sequences reinforce the natural qualities of this alpine landscape. • Lake Daniells and Mt Freyburg (as seen from SH7) are key landmarks within this landscape.
ONL36	Maruia River Valley east	Steep to very steep hill country and escarpments flanking the eastern side of the Maruia Valley and denotes the confluence of the Maruia and Alfred Rivers. • Erosion, scree slopes and depositional landforms clearly express the erosive nature of the mountain landscape and uplifted landforms. • Mature beech forest, steep landforms and lack of development create a strong sense of naturalness. • Consistent orientation, elevation and appearance of landforms flanking the eastern margins of the Maruia Valley. • Baldy is a key landmark within this landscape.
ONL37	Victoria Range east	Very steep, etched ridgelines with high relief and exposed rock formations and deeply incised valleys. Depositional landforms, outwash fans and river terracing. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. • Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • Contiguous mountain range and foothills. • Extensive beech forest, devoid of development and unmodified / pristine landforms impart a strong sense of naturalness. • Continuous beech forest giving way to alpine tundra at higher elevations.
ONL38	Reefton Saddle	Distinctive sequence of steep dissected hillcountry that sits between the Paparoa and Victoria Ranges.

		• Homogenous mature lowland forest cover. • Cohesive assemblage of ridges, peaks, and mountaintops of similar orientation, attitudes, vegetative cover and appearance. Contiguous unmodified landforms, pristine forest cover, moderate relief, incised river channels, and • vegetation patterns reinforce the natural qualities of the landscape. • Views of dramatic cliff / bluffs and steep slopes along the Inangahua River from SH69.
ONL39	Te Paparoa/Paparoa Range foothills	Assemblage of steep to very steep ridges and peaks, with deeply incised valleys that flank the Inangahua Valley. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. • Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • Pristine beech forest, unmodified and dramatic landforms, exposed ridge tops with the natural vegetation sequences reinforce the natural qualities of this alpine landscape. • Abuts areas of regenerating native scrub, farmland and exotic forestry in the Inangahua Valley. • Important cultural landscape for Poutini Ngāi Tahu including SASM 23 No. 45 Watarakau Native Reserve, Māori Reserve, Mahinga kai and SASM 25 Tiroroa Pā site
ONL40	Otututu River	Expansive broad outwash plain characterised by multiple channels, and exposed gravel beds flanked by numerous cliffs and terraces that extend down from Te Paparoa/ Paparoa Range toward the Māwhera/Grey River Valley. • Dramatically eroded landforms clearly express the rivers power and varying flow. Broken vegetation and a series of outwash fans from its tributaries reinforce these qualities. Highly expressive outwash plain and river escarpment. • Evidence of erosion revealing underlying geology, rockfall, stream downcutting and flooding. • The River contains a range of aggregate sizes and weathered boulders that are constantly sifted and graded by the varying flows. • Pristine beech forest, unmodified and dramatic landforms, exposed river terraces / cliffs with the natural vegetation sequences reinforce the natural qualities of this landscape. • Evidence of erosion – vegetation patterns accentuate the landscapes natural processes.
ONL41	Te Paparoa/Paparoa Range east & Mt William Range	Steep mountain range moderately dissected by descending foothills and lowland terraces with exposed rocky peaks and outcrops along the ridgetops. • Interplay of mature indigenous forest and vegetative sequence from lowland forest through to alpine communities reinforcing topography and pronounced relief.

		• Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative processes. • Assemblage of ridgelines, peaks and mountaintops of similar orientation, elevation and vegetation cover and appearance. • Continuous beech forest giving way to alpine tundra at higher elevations. • Mt Rochfort, Buckland peaks, and the lower Buller Gorge are landmarks within this landscape. • Important cultural landscape for Poutini Ngāi Tahu including SASM 47 Māwheranui Native Reserve and SASM 48 Brunner wāhi taonga
ONL42	Te Paparoa/Paparoa Range west (high elevation)	Steep mountain range running north to south with exposed rocky peaks and outcrops. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. • Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • A sequence of ridgelines of similar orientation, elevation and vegetation cover, punctuated by exposed ridgetops and tussock lands. • The pristine beech forest, unmodified mountain range with its high relief, exposed and rugged ridge tops creates a strong sense of naturalness. • The peaks and ridge sequence of Te Paparoa/ Paparoa Range as a whole is a landmark – views from SH6 between Westport and Charleston.
ONL43	Nine, Fourteen, and Seventeen Mile Bluffs	Sequence of coastal bluffs and escarpments interspersed by rocky shoals and sandy bays. • Dramatic interaction of the landscape with the Tasman Sea with its sheer cliffs and scarps, continuous coastal and lowland forest cover providing a consistent patterning to this exposed landscape. • Varied amalgam of raw and exposed coastal landforms, strong elevated relief, windswept vegetation which impart a strong sense of naturalness. • Patterning of mature wind swept coastal forest and scrub across the bluffs and slopes reinforces the topography and exposure. • Striking interface with the Tasman Sea - sheer cliffs plunge dramatically into the sea. • Nine, Fourteen, and Seventeen Mile Bluffs are key landmarks within this landscape – emphasised by key views obtained along SH6. • Important cultural landscape for Poutini Ngāi Tahu including SASM 35 Maukurunui (17 Mile Bluff) Tohu whenua, SASM 37 Kararoa Māori Reserve 35 Māori Reserve, Cultivations, SASM 38 Kararoa wāhi tapu, SASM 41 Kotorepi (Nine Mile) wāhi tapu, SASM 44 Rapahoe to Nine Mile Ancestors embedded in the landscape, SASM 45 Rapahoe Māori ReserveArea below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL43.

ONL44	Te Paparoa/Paparoa Range west (low elevation)	Sequence of coastal foothills comprising exposed limestone outcrops and deeply incised river gorges and valleys. • Mature native lowland forest predominates. With wetland areas of flax and native shrublands. • Evidence of erosion, stream / river down cutting and entrenchment, and coastal exposure. • The pristine lowland forest, unmodified terrain with moderate relief, rugged gorges and valleys creates a strong sense of naturalness. • The dramatic limestone gorges of the Waitakere/Nile, Tiropahi/Four Mile, Pororari and the Potikōhua/Fox Rivers as well as Punungairo/Bullock Creek are key landmarks within this landscape. • Important cultural landscape for Poutini Ngāi Tahu including SASM 26 Tiropahi wāhi tapu SASM 27 Fox River Kāinga Cultivations, Mahinga kai, Ara tāwhito, SASM28 Te Ana Matuku, Traditional nohoanga, Cave, SASM 34 Pahautane Beach, Wāhi taonga, Ara tāwhito
ONL45	Ōkoriko/Razorback, Dolomite, and Perpendicular Point	Sequence of distinct rock formations including Dolomite Point Pancake Rock and Ōkoriko/Razorback Point as well as adjoining cliff faces. • Varied amalgam of raw and exposed landforms, rock stratification, blowholes, sheer cliffs, caves, and windswept vegetation impart a strong sense of naturalness. • Striking interface with the Tasman Sea. Sheer cliffs plunge dramatically into the sea. • Patterning of wind swept coastal forest and scrub across the rock formations along with pockets of lowland forest and stands of nikau reinforce the landscapes topography and exposure. • Dramatic wave action, evident coastal erosion, and seasonal changes to atmospheric conditions are highly expressive and natural processes. • This landscape as a whole is a landmark. Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL45.
ONL46	Kaipakati Point to Needle Point	Sequence of coastal bluffs, escarpments, craggy headlands & points with a rocky and stony shoreline interspersed by rock shoals, outcrops, and islands. • Dramatic interaction of the landscape with Te Tai-o-Rēhua/ the Tasman Sea with its steep escarpments and continuous coastal forest cover providing a consistent patterning to this exposed landscape. • Sheer Cliffs and steep slopes plunge dramatically into Te Tai-o-Rēhua/ the Tasman Sea. • Patterning of wind swept coastal forest, stands of nikau and scrub across coastal slopes reinforce the landscapes topography and exposure. • Dramatic wave action, evident coastal erosion, and seasonal changes to atmospheric conditions are highly expressive and natural processes. • Seal Island, Potikōhua/Fox, Tiropahi/Four Mile River mouths are key landmarks within this landscape • Important cultural landscape for Poutini Ngāi Tahu including SASM 30 Te Miko Ara tāwhito, SASM 31 Punakaiki Kāinga, Cave, Mahinga kai, Ara tāwhito and SASM 32 Punakaiki River Nohoanga

		Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL46.
ONL47	Charleston coastline	Assemblage of craggy headlands & points with rock shoals, and outcrops that enclosed several sandy bays and the Waitakere/Nile River mouth. • Highly expressive of the interplay between the Waitakere/Nile River and the Tasman Sea. The tidal rhythm of Te Tai-o-Rēhua/ the Tasman Sea provides a counterpoint to the rivers natural variations of flow, clarity and flood cycles. • Patterning of wind swept native coastal forest and scrub across the coastal slopes and headlands reinforce the landscapes topography and exposure. • Dramatic wave action, evident coastal erosion, and seasonal changes to atmospheric conditions are highly expressive and natural processes. • The amalgam of rawness of the landforms, vegetation and the prominence of the headlands provide a strong sense of naturalness despite the presence of nearby dwelling and development. • The Waitakere/Nile River mouth and the headland between Constant & Joyce Bay are key landmarks within this landscape. Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL47
ONL48	Brunner & Lyell Ranges	• Assemblage of steep to very steep ranges and peaks with deeply incised valleys that flank the Inangahua and Kawatiri/Buller River Valleys. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. • Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • Sequence of ridgelines of similar orientation, elevation and vegetation cover, punctuated by exposed ridge tops and tussock lands. • The Upper Buller Gorge is a landmark with this landscape unit. • Forms the backdrop to the Inangahua River Valley.
ONL49	Orikākā River Valley	A deeply incised river valley flanked by broad terraces and plateau which are hemmed in by the Mt William Range and Lyell Range. • Homogenous cover of mature lowland forest. • Dramatically eroded landforms clearly express the rivers power and varying flow. Broken vegetation and expansive depositional landforms reinforce these qualities. • Evidence of erosion revealing underlying geology, rockfall, stream downcutting and flooding. • The River contains a range of aggregate sizes and weathered boulders that are constantly sifted and graded by the varying flows.

		• Distinctive assemblage of ridges and valleys of similar orientation, elevation and vegetation cover and appearance that contrasts with the higher Mt William and Lyell Ranges.
ONL50	Denniston – Waimangaroa	A well-defined valley system enclosed by steep to very steep ridges that descend from the Denniston Plateau along the coast. • Contiguous mixed podocarp / beech forest giving way to shrublands and grasslands on exposed faces. • Clearly expressed river valley and coastal ranges reinforce by the succession of lowland through to alpine vegetation cover and exposed upper elevations. • The landscape strongly defined by its dramatically uplifted landforms and coastal orientation / outlook. The vegetation patterns, exposed bluffs and outcrops reinforce the landscapes topography and exposure. • Mt Frederick, the Waimangaroa River and the dramatic bluffs that form the headwall of the Valley.
ONL51	Ngākawau River Valley	A steep to very steep sided valley and deeply etched chasm like gorge system with a narrow river channel which passes through a series of very broad rolling foothills set between the Glasgow Range to the east and Radcliff Ridge to the west. • Extensive coverage of mixed podocarp / beech forest. • A strong sense of naturalness is primarily derived from the dramatic and incised profile of the gorge and the coverage of mature native vegetation. • Dramatically eroded landforms clearly express the rivers power and varying flow. Broken vegetation and expansive depositional landforms reinforce these qualities. • Evidence of erosion revealing underlying geology, rockfall, stream downcutting and flooding. • The Ngākawau Gorge and the Radcliffe Ridge are key landmarks with this landscape.
ONL52	Tasman Mountains	A diverse landscape comprising steep peaks, ridges, and ranges opening out to rolling basins, plateau and river valleys. • Wild remote and dramatic sequence of mountain ranges, often deeply etched and displaying sculpted rock formation in the upper elevations. • Interplay of mature indigenous forest and vegetative sequence from lowland forest through to scrub, tussockland, pakihi and rockland vegetation reinforcing topography and pronounced relief. • Exposed peaks and ridgetops revealing underlying geology, and numerous glacial tarns are highly expressive of the landscapes formative and ongoing natural processes. • Mt Kendall, Domett, Luna and Aorere Peak - Gunnar, Gouland, Mackay Downs and Thousand Acres Plateau, the Whakapoāi/Heaphy, Kakara Taramea/Karamea, and Mōkihinui Rivers are key / representative landmarks with this landscape.

ONL53	Kongahu Point	Sequence of bluffs and steep coastal slopes backed by rugged hill country and a series of broad basins. Successional vegetation and regeneration of native forest gives way to scrubland and windswept vegetation along exposed ridgetops and coastal faces – patterning of vegetation and across the bluffs and slopes reinforces the topography and exposure. • Amalgam of raw and exposed coastal landforms, strong elevated relief, windswept vegetation which impart a strong sense of naturalness. • Well defined basins enclosed by a series of steep ranges and bluffs. • Continuous mature native forest comprising stands of matai and northern rata. • Lake Hanlon, Karamea Bluff, Kongahu Point and the Radiant Range are key / representative landmarks with this landscape. • Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL53.
ONL54	Fenian, Stormy & Radiant Ranges	Assemblage of north-east to south-west orientated ranges and dissected hillcountry and stream corridors with extensive native forest that contrast with the low lying pastoral farmland. • Interplay of mature indigenous forest and vegetative sequence from lowland beech forest through to alpine scrub communities reinforcing topography and pronounced relief. • Exposed peaks and ridgetops revealing underlying geology are highly expressive of the landscapes formative and ongoing natural processes. • Coastal derived landforms with indigenous vegetation patterns and pasture reinforcing the dramatic topography. Sequence of ridgelines of similar orientation, elevation and vegetation cover, punctuated by exposed ridge tops and tussock lands. • Predominately mature native coastal forest cover. • The Radiant Range, Stormy Ridge, Kakara Taramea/ Karamea River, and the Ōparara limestone arches are key / representative landmarks within this landscape.
ONL55	Kohaihai Bluff to Kahurangi Point	Sequence of coastal ranges, cliffs and headlands with strong elevated relief and a series of rocky shoal, outcrops, islets, bluffs, broad beaches, dunefields and lagoons along its shoreline. • Continuous mature coastal forest with a distinctive abundance of nikau groves and rata. • Unmodified coastal landforms – Interplay of indigenous forest with regenerating shrublands and exposed slopes reinforce areas of coastal erosion, river and stream entrenchment, and exposure to Te Tai-o-Rēhua/ the Tasman Sea. • The dramatic interaction of the landscape with Te Tai-o-Rēhua/ the Tasman Sea and its continuous vegetation cover provide a consistent patterning to this exposed landscape. • Kaurangi Point, Heaphy Bluff, Whakapoāi/Heaphy River, Kohaihai Bluff and Wekakura Point are key / representative landmarks within this landscape. • Important cultural landscape for Poutini Ngāi Tahu including SASM1 Kahurangi Point wāhi tohu, SASM 2 Whakapoai / Heaphy Māori reserve, SASM 3 Whakapoai Native Reserve 7B Māori reserve

		and SASM 216 Ōtukoro Historic Reserve / Ōtukoro Iti, Kahurangi - Statutory Acknowledgement, Ancestors embedded in the landscape, Wāhi taonga, Wāhi tapu, Mahinga kai • Area below mean high water springs also scheduled in Proposed Regional Coastal Plan as ONL55.

APPENDIX 3 – AMENDMENTS TO OUTSTANDING NATURAL LANDSCPES

TAI POUTINI PLAN COMMITTEE

Hearing of Submissions on the Proposed Te Tai O Poutini Plan

Recommendation Report of Hearing Panel

Recommendation Report

Noise - Ngā Oro

Hearing Dates: 5 September 2024

HEARING PANEL

Sharon McGarry (Chair)

Maria Bartlett

Anton Becker

CONTENTS

PART A – INTRODUCTORY MATTERS 3

1. Preliminary Matters 3
1.1. Introduction 3
1.2. Terminology in this Report 5
1.3. Hearing Arrangements 6
1.4. Appearances 6
1.5. Overview of submitter evidence received 7
1.6. Overview of information exchanged following the hearing 8
1.7. Procedural Steps and Issues 10
1.8. Site Visits 10

PART B - STATUTORY REQUIREMENTS AND DOCUMENTS 10

PART C – SUBMISSIONS, EVIDENCE, EVALUATION AND RECOMMENDATIONS 11

2. Noise 11
2.1. NOISE General/Whole Chapter 11
2.2. Noise Definitions 12
2.3. Noise Overview 14
2.4. Noise Objectives 17
2.5. Noise Policies 21
2.6. Noise – Rules 27

APPENDICES

Appendix 1 – Recommendations

PART A – INTRODUCTORY MATTERS

1. PRELIMINARY MATTERS

1.1. Introduction

1. Matters to do with our appointment and other preliminary matters applicable to all Hearing Panel's recommendations on the Proposed Te Tai o Poutini Plan (**pTTPP** or 'the Plan') are recorded and addressed in Recommendation Report 1.

2. This Recommendation Report relates to the Noise - Ngā Oro Chapter, which is contained in the General District-Wide Matters - Ngā Kaupapa ā-Rohe Whānui section of the pTTPP. The Report contains the Hearing Panel's evaluations and recommendations to the TTPP Committee on the submissions and further submissions received on the Noise Chapter.

3. The Section 32 Report[1] on Noise provided an evaluation of the options for the management of noise (which includes vibration) effects through the Plan, including the regulatory framework, key resource management issues, the evidence base (research, consultation, information and analysis undertaken) and evaluation of the options. The report notes that the general approach to the management of noise in the operative District Plans is maintained in the pTTPP but updated to ensure greater clarity and consistency with relevant New Zealand Standards and the National Planning Standards.

4. The Section 42A Officer's Report - Noise ('s42A Report'), authored by Ms Ruth Evans, planner with Barker & Associates acting as the Reporting Officer, was circulated prior to the hearing. Ms Evans relied on expert advice from Mr Stephen Peakall, Acoustic Consultant, Marshall Day Acoustics. The s42A Report provided an analysis of submissions and further submissions received; and made recommendations on changes to the notified plan provisions (the changes were included in Appendix 1 and the recommendation on all submissions as to either accepted, accepted in part or rejected in Appendix 2).

5. Ms Evans subsequently provided an Addendum s42A Report Noise which responded to key matters raised by submitters in evidence filed before the hearing. She also provided further Addendum #2 Report detailing further amendments to the Noise Chapter, and a revised Appendix 1 and Appendix 2.

6. The s42A Report assessed a total of 316 submission points and 135 further submission points across the chapter. It provided summaries of all the submissions and further submissions received and the relief sought; an analysis of the proposed changes to provisions; and recommendations on changes to the plan provisions (see Appendix 1 of s42A Report).

7. The matters raised by submitters were grouped in the s42A Report in relation to each of the following key issues for each of the three chapters:

    1. General;

    2. Definitions;

    3. Overview;

[1] Te Tai o Poutini Plan – Section 32 Evaluation Report Seven General District Wide Matters – Ngā Kaupapa ā-Rohe Whanui Noise - Ngā Oro Light - Ngā Rama Signs - Ngā Tohu Earthworks - Te Huke Whenua Temporary Activities - Ngā Mahi Taupua.

4. Objectives;

5. Policies; and

6. Rules.

8. A s32AA Evaluation for the changes in each chapter was provided at the end of the s42A Report.

9. This Recommendation Report follows this same structure of the s42A Report for each chapter and provides a summary of the issues raised in submissions and further submissions, the acoustic expert report, the s42A Report and addendum analysis and recommendations, submitter evidence and statements, joint witness statements and the Reporting Officer's reply evidence, before providing our evaluation and recommendation.

10. This Recommendation Report should be read in conjunction with the s42A Report and the tracked change version of the notified Plan provisions (attached as Appendix 1 to this Report). The tracked change version of the TTPP provisions forms an integral part of the recommendations and records all recommended amendments (additions and deletions) to the notified TTPP provisions made by the Panel. The tracked change version of the TTPP shows the Panel's recommended changes to the notified provisions in **bold and underlining** indicating additions and ~~strikethrough~~ indicating deletions. If there is any discrepancy between this Recommendation Report and the tracked change version of the Plan, the tracked change version of the Plan shown in Appendix 1 of this Report must prevail.

11. This Recommendation Report contains the reasons for the Panel's recommendations. These comprise either adoption of the reasoning and recommendations of the original section 42A Reports or the Reporting Officer's reply evidence or a specific reasoning by the Panel.

12. Where the Panel recommends the TTPP provisions should remain as notified, it is because:

(a) The Panel has adopted the reasoning and recommendation of the s42A Report or Addendum to retain the provision as notified; or

(b) The Panel has adopted the reasoning and recommendation to retain the provision as notified as recommended in the Reporting Officer's reply evidence; or

(c) The Panel has recommended to retain the provision as notified for reasons set out in this Recommendation Report.

13. Where there is a recommended change to a notified provision of the TTPP, it is because:

(a) The Panel has recommended amendment to a provision for reasons set out in this Recommendation Report in response to a submission point, which the s42A Report did not recommend; or

(b) The Panel adopted the reasoning and recommendation of the s42A Report or Addendum to change the provision to that recommended in the original s42A Report; or

(c) The Panel has adopted the reasoning and recommendation to that recommended in the Reporting Officer's reply evidence; or

(d) A consequential change has been necessary following on from a decision in either (a), (b) or (c).

14. Where there may be a different recommendation between the s42A Report and the Reporting Officer's Addendum or reply evidence (i.e., the recommendation by the Reporting Officer has changed as a result of hearing the evidence of submitters), unless the Panel decision specifically adopts the original s42A Report's reasoning and recommendations, the reasoning and recommendations in the (later) reply evidence has been adopted and it must be taken to prevail.

15. If there are circumstances where the Panel consider that alternative relief is more appropriate than that requested in submissions and further submissions to give effect to the RMA, NZCPS, national policy statements and/or RPS, but are still within the scope of the relief sought, the relevant recommendation clearly sets out the nature of the change and the reason for the change. This is recorded in this Recommendation Report.

16. If any changes are recommended to the provisions (since the Section 32A Report was completed) a further evaluation if required pursuant to section 32AA of the RMA has been undertaken. Any such circumstances are referred to in this Recommendation Report in sufficient detail to demonstrate a further evaluation was undertaken.

17. Clause 16(2) of the First Schedule of the RMA enables the Panel to recommend amendments to alter information, where such an alteration is of minor effect, or may correct any minor errors. In the Panel's recommendations below each section considered in Part C of this Report and in the tracked change version of the notified Plan provisions (Appendix 1 of this Report) records any minor amendments.

1.2. Terminology in this Report

18. Throughout this Report, the following abbreviations will be used:

BDC	Buller District Council
Councils	Buller District Council, Grey District Council, and Westland District Council
Director General	Director General of Conservation
DOC	Department of Conservation
Federated Farmers	Federated Farmers of New Zealand
Fish & Game	West Coast Fish and Game Council
Foodstuffs	Foodstuffs (South Island) Properties Limited and Foodstuffs South Island Limited
Forest & Bird	Royal Forest & Bird Protection Society of NZ Inc
JBNZ	Jet Boating New Zealand
Kiwirail	Kiwirail Holding Limited

Manawa	Manawa Energy Limited
NPHS or Te Mana Ora	National Public Health Service
NZAAA	New Zealand Agricultural Aviation Association
NZDF	New Zealand Defence Force
NZHA	New Zealand Helicopter Association
NZTA Waka Kotahi	NZ Transport Agency Waka Kotahi
Planning Standards	National Planning Standards 2019
Poutini Ngāi Tahu	Te Rūnanga o Ngāi Tahu, Te Runanga o Ngāti Waewae, Te Rūnanga o Makaawhio
pTTPP or the Plan	Proposed Te Tai Poutini Plan
RMA or the Act	Resource Management Act 1991
RPS	West Coast Regional Policy Statement
SASM	Sites and Areas of Significance to Māori
SFF or Silver Fern Farms	Silver Fern Farms Limited
Terra Firma	Terra Firma Mining Limited
TTTPP or TTPP Committee	Te Tai o Poutini Plan Committee
WCRC	West Coast Regional Council
WDC	Westland District Council
Westpower	Westpower Limited
WMS Group *et. al*.	WMS Group (HQ) Limited and WMS Land Co. Limited, West Coast Bulk Logistics, and TiGa Minerals and Metals Limited

1.3. Hearing Arrangements

19. The hearing was held at the West Coast Regional Council Building on 5 September 2024. Some submitters appeared remotely by internet connection.

1.4. Appearances

20. The following submitters appeared at the hearing:

New Zealand Agricultural Aviation Association (NZAAA) – Mr Tony Michelle, Chief Executive Officer

New Zealand Helicopter Association (NZHA) – Mr Richard Milner, Chief Executive Officer

WMS Group (HQ) Limited and WMS Land Co. Limited, West Coast Bulk Logistics, and TiGa Minerals and Metals Limited (WMS Group *et. al*.)

- Ms Alex Booker, Counsel
- Mr Rhys Hegley, Acoustian

Silver Fern Farms Limited (SFF) – Mr Steve Tuck, Planner

Mr Bert Hofmans – for himself

Westport Pistol Club, Chris Hartigan and Westport Rifle Club Incorporated - Ms Katherine McKenzie, Planner

The National Public Health Service (NPHS) - Dr Stephen Chiles, Acoustian

KiwiRail Holdings Limited (KiwiRail)

- Ms Kirsten Gunnel, Counsel
- Ms Michelle Grinlinton-Hancock, Manager RMA Team
- Ms Catherine Heppelthwaite, Planner
- Dr Stephen Chiles, Acoustian

New Zealand Trasport Agency Waka Kotahi (NZTA Waka Kotahi)

- Mr Stuart Pearson, Senior Planner with NZTA Waka Kotahi
- Dr Stephen Chiles, Acoustian

Westpower Limited - Mr Martin Kennedy, Planner

Ms Frida Inta for herself and on behalf of the **Buller Conservation Group**

Mr Martin Kennedy – for himself and Mrs Lisa Kennedy

1.5. Overview of submitter evidence received

21. For those appearing at the hearing legal submissions were received from Ms K. l. Gunnell for KiwiRail Holdings Limited (dated 20 August 2024).

22. For those appearing at the hearing the following evidence and/or statements were received:

    (a) Ms Katherine McKenzie, Planner for Westport Pistol Club (dated 6 August 2024);

    (b) Mr Chris Hartigan, Westport Rifle Club Incorporated (dated 6 August 2024);

    (c) Dr Stephen Chiles, Acoustician for KiwiRail (Dated 6 August 2024);

    (d) Ms Catherine Heppelthwaite, Planner for KiwiRail (dated 6 August 2024);

(e) Ms Michelle Grinlinton-Hancock, Manager RMA Team for KiwiRail, on behalf of KiwiRail (dated 6 August 2024);

(f) Mr Stuart Pearson, Planner for NZTA Waka Kotahi (dated 6 August 2024);

(g) Dr Stephen Chiles, Acoustician for NZTA Waka Kotahi (dated 6 August 2024);

(h) Dr Stephen Chiles, Acoustician for NPHS (dated 5 August 2024).;

(i) Mr Martin Kennedy, Planner for Westpower Limited (dated 6 August 2024); and

(j) Ms Frida Inta, for herself and Buller Conservation Group (dated 5 September 2024).

23. The following evidence was tabled without hearing appearances:

(a) West Coast Regional Council (WCRC) - Mr Max Dickens, Manager Policy for WCRC (dated 9 August 2024);

(b) Ms Rachael Pull, Senior Environmental Advisor - Planning for Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu (Poutini Ngāi Tahu) – Hearing Statement to be tabled (dated 6 August 2024);

(c) Mr Tony Michelle, Executive Officer for NZAAA - submission statement (dated 20 August 2024) and supplementary statement (dated 5 September 2024);

(d) Mr Rhys Hegley, Acoustic Consultant for WMS Group *et. al.* - statement of evidence (dated 6 August 2024);

(e) Mr Steve Tuck, Planner for Silver Fern Farms - statement of evidence (dated 6 August 2024), and summary of evidence (dated 4 September 2024);

(f) Ms Lucy Smith, Director for Terra Firma Mining Limited – letter (dated 5 August 2024);

(g) Mr Bert Hofmans - statement (dated 4 September 2024);

(h) Mr Richard Milner, NZHA – statement (dated 3 September 2024); and

(i) Ms Rebecca Davies, New Zealand Defence Force – letter (dated 3 September 2024).

1.6. Overview of information exchanged following the hearing

24. Following the hearing, the subsequent further information and correspondence was received as follows:

(a) Dr Chiles and Ms Heppelthwaite - supplementary statement on behalf of KiwiRail in relation to suggested matters for caucusing (dated 5 September 2024) and designation maps (dated 10 December 2024);

(b) NZTA Waka Kotahi - supplementary statement (dated 5 September 2024) proposing topics for inclusion in the noise caucusing;

(c) NPHS - supplementary statement (dated 5 September 2024) proposing topics for inclusion in the noise caucusing; and

(d) Mr Hegley - proposed agenda for noise caucusing (dated 5 September 2024).

25. Following expert caucusing, two joint witness statements (**JWS**) were provided as follows:

(a) A JWS was prepared by Ms Lois Easton for TTPP, Ms Ruth Evans for TTPP, Mr Craig Barr for BDC, and Ms Kate McKenzie for Westport Pistol Club, Mr Chris Hartigan for Westport Rifle Club Incorporated. The JWS records the matters agreed by the relevant experts (**JWS #1**).

(b) A JWS was prepared by Mr Stephen Peakall for TTPP, Mr Rhys Hegley for WMS Group *et. al.,* and Dr Stephen Chiles for NPHS, NZTA Waka Kotahi and KiwiRail. The JWS records issues that were not fully resolved in the hearing, and the matters of agreement and disagreement by relevant experts (**JWS #2**).

26. In response to the submission points and JWS, a Right of Reply was provided by the following parties:

(a) Ms Evans provided a written Right of Reply (dated 24 September 2024) that included a response to JWS #1 and submission points associated with the Westport Rifle Range. A final recommendations table was included within the overall Right of Reply in updated Appendix 1.

(b) A joint Right of Reply (dated 17 October 2024) was provided by Ms Evans, Ms Belgrave and Ms Easton (Reporting Officers), in response to the Silver Fern Farms submissions.

27. The Panel issued a Minute 59 providing submitters who made submission points on the relevant points covered in Addendum #2, the opportunity to comment.

28. The subsequent information was received in response to Minute 59, as follows:

(a) Ms Heppelthwaite, for KiwiRail (dated 14 February 2025);

(b) Jet Boating NZ (dated 6 February 2025);

(c) Ms Pull, for Poutini Ngāi Tahu (dated 12 February 2025);

(d) Mr Michelle, of the NZAAA (dated 14 February 2025); and

(e) Mr and Mrs Kennedy (dated 14 February 2025).

29. A further Right of Reply was provided by the following parties:

(a) Ms Evans provided a Right of Reply (dated 28 February 2025) to respond to questions raised by submitters during the hearing, outstanding matters in response to submissions, evidence presented at the hearing, and submitter responses to Minute 59. It noted that the recommended amendments to provisions set out in the updated Appendix 1 were more appropriate than the notified version of the pTTPP and included a s32AA evaluation.

(b) Mr Stephen Peakall on behalf of the TTPP (dated 28 February 2025) provided a Right of Reply in response to submitter evidence and Minute 59, including confirmation of support for the changes to the noise provisions recommended by Ms Evans in updated Appendix 1.

1.7. Procedural Steps and Issues

30. No procedural matters were raised at the hearing.

1.8. Site Visits

31. No specific site visits relating to the Noise Chapter were undertaken. However, the Panel undertook extensive region wide site visits including, but not limited to, Karamea Aerodrome, Haast Airfield, the Alma Road area, the Westport Rifle Range and Silver Ferns Farms meat processing facility at Hokitika.

PART B - STATUTORY REQUIREMENTS AND DOCUMENTS

32. General District-Wide Matters - Ngā Kaupapa ā-Rohe Whānui is one section of seven sections located in Part 2 – District-Wide Matters – Te Wāhanga 2 – Ngā Kaupapa ā-Rohe Whānui of the Plan. This section has objectives, policies and rules for general matters which apply across the districts. The Noise Chapter is one of seven chapters in the General District-Wide section of the Plan.

33. The Section 32 Report outlined the relevant statutory considerations applicable to Noise; and the relationships between the sections of the RMA and higher order documents.

34. The section 42A Report highlighted the relevant sections 6, 7 and 8 of the RMA, and provisions in the NZCPS, RPS, iwi management plans and mana whakahono ā rohe, the NPSET, NPSREG, NESTF, NESET, and Planning Standards.

35. The purpose of Strategic Direction in Part 2, in combination with objectives within the relevant topic sections and chapters, is to ensure that they provide a coherent overarching strategic direction and state the outcomes intended for the West Coast districts.

36. With these strategic directions in place, the articulation of location specific and activity specific objectives and policies are in other chapters of the pTTPP, which are to be read alongside the strategic objectives.

37. Clause 4 of the First Schedule sets out the requirements to be inserted prior to notification of proposed district plans.

38. Clause 10 of the First Schedule states that providing decisions on individual submissions is unnecessary. The Panel's recommendations are made within the scope of requested relief, either individual submissions or groups of submissions making similar requests, as specified in the reasons for recommendation.

39. The Planning Standards mandatory direction 7.33 require provisions relating to noise activities to be located in the chapters within the General District-Wide Matters section of the Plan. We are satisfied the Plan structure is consistent with this national direction.

40. The Planning Standards standard 15 requires that any plan rule to manage noise emissions must be in accordance with the mandatory noise methods and symbols in the New Zealand Standards. The Panel are satisfied that recommendations for the Plan provisions meets this requirement.

PART C – SUBMISSIONS, EVIDENCE, EVALUATION AND RECOMMENDATIONS

2. NOISE

2.1. NOISE General/Whole Chapter

Submissions and Further Submission

41. Seven submission points and one further submission point relating to general matters or the whole Noise Chapter were summarised in a Table on pages 12-13 of the s42A Report. The Panel has considered the submissions and further submissions received and adopts the summaries in the s42A Report.

Section 42A Report and Addendum Reports

42. Ms Evans acknowledged the general support from Westland District Council (**WDC**) (S181.030) to retain the Noise Chapter as notified. However, she noted her recommended amendments in response to other submissions in subsequent sections.

43. In response to Christine Robertson's (S99.001) request for the Greymouth runway to be excluded from the proposed noise zone extension, Ms Evans rejected this submission because she considered the proposal gives effect to New Zealand Standards NZS 6805. She accepted GDC's further submission (FS1.020) opposing this submission point.

44. A submission point from Dean Trott (S330.002) sought amendments for acoustic insulation requirements for development beside the Westport Rifle Range. Ms Evans addressed this point in relation to NOISE-R3.

45. Silver Fern Farms Limited (**SFF**) (441.034) sought a zone change for the land adjacent to its Hokitika facility (considered in the Residential Zone Chapter hearing), and amendments to the chapter Overview to reference potential reverse sensitivity effects for meat processing plants. Ms Evans did not support the inclusion of meat processing plants in the Overview because the identified list included significant services, infrastructure and facilities. She considered it was inappropriate and unnecessary to include particular industrial activity within the list.

46. KiwiRail (S442.088) sought amendments to the provisions to include noise, vibration and mechanical ventilation standards (provided as Appendix A). Ms Evans accepted this submission in part, and recommended amendments to Rule NOISE-R3 based on Mr Peakall's expert opinion, which is addressed below.

47. Forest and Bird (S560.332) sought amendments to ensure that indigenous biodiversity was protected from adverse effects from noise. Ms Evans rejected this submission due to insufficient information and evidence, but invited the submitter to submit drafting via evidence.

48. Except for addressing KiwiRail (S442.088), Ms Evans recommended no amendments in response to submissions on General/Whole Chapter matters.

Hearing and Submitter Evidence/Statements

49. Dr Stephen Chiles provided evidence on behalf of Te Mana Ora (Community and Public Health) of the National Public Health Service/Te Whatu Ora (**Te Mana Ora**) addressing the rule structure based in the zones where noise is received, as proposed by Ms Evans. He considered

the recommended rule framework was a substantial improvement compared to the notified version and confirmed it had addressed most of the significant issues identified. He considered the outstanding matters were narrow and few.

50. Ms Rachael Pull provided a letter on behalf of Poutini Ngāi Tahu providing a high-level summary of their position on the s42A Report recommendations in Appendix A. It supported Ms Evan's recommendation to not include meat processing plants in the list identified in the Overview text.

51. Mr Martin Kennedy spoke at the hearing on behalf of himself and Mrs Lisa Kennedy. He noted their further submission (FS221.004) in relation to the KiwiRail submission point (S442.088) had been incorrectly summarised. He clarified their further submission opposed KiwiRail's request for a 100m setback from the railway line and considered this had 'crept' from 40m to 60m. He questioned whether this was even an issue in relation to the Hokitika line. He considered no information had been provided to justify the need for 100m and noted this would increase the cost when upgrading their house. Mr Kennedy preferred use of a '*Noise and Vibration Alert'* (NVA) layer in the Plan.

52. KiwiRail's evidence in relation to submission point (S442.088) is addressed in relation to the rules below.

Responses and Reporting Officer Reply Evidence

53. No further amendments in response to submission points on the General/Whole Chapter were recommended in Ms Evans' Right of Reply.

Hearing Panel's Evaluation

54. The Panel notes Mr Kennedy's further submission (FS221.004) was not included in the s42A Report and will consider this in relation to the KiwiRail submission point in relation to NOISE-R3 below.

55. The Panel agree with Ms Evans reasoning and recommendation to make no changes in response to the submission received on the General/Whole Chapter.

Hearing Panel's Recommendation

56. No changes to the provisions are required in relation to issues raised in submissions and further submission made on general matters or the whole chapter.

2.2. Noise Definitions

Submissions and Further Submissions

57. Five submissions points relating to definitions were summarised in a Table on page 14 of the s42A Report. The Panel adopts the summaries in the s42A Report and has considered the relevant submissions.

Section 42A Report and Addendum Reports

58. Ms Evans noted the support from two submitters[2] for the definition of *'notional boundary*.'

59. KiwiRail (S442.008) requested a new definition be included for a '*noise sensitivity activity*' as follows:

> *any lawfully established: residential activity, including activity in visitor accommodation or retirement accommodation, including boarding houses, residential visitor accommodation and papakāinga; educational activity; health care activity, including hospitals; congregation within any place of worship; and activity at a marae.*

60. Mr Peakall considered that a new definition for '*noise sensitive activity'* was not required, given that the existing rule framework and definitions already include all relevant sensitive activities that were 'noise sensitive.'

61. Ms Evans agreed reference to '*noise sensitive activity*' was confusing. She recommended deleting '*noise*' so that all references were to '*sensitive activity/activities*.' She noted '*noise sensitive activities'* were not defined in the Planning Standards. In the Addendum Report, Ms Evans noted that she agreed with KiwiRail's submission, that recreational and sporting activities should not be subject to the same requirements as other *'sensitive activities*.'

62. Federated Farmers (S524.103) requested a definition for '*audible bird scaring devices*,' as follows:

> *Gas guns and avian distress alarms used for the purposes of disturbing or scaring birds.*

63. Ms Evans accepted this submission in part but recommended adding Mr Peakall's proposed definition as follows:

> *Gas, gun, avian distress alarm or other such device used for the purposes of scaring birds.*

Hearing and Submitter Evidence/Statements

64. The letter from Poutini Ngāi Tahu noted support for Ms Evans' recommendation to amend references from '*noise sensitive activity'* to '*sensitive activity*.'

Reporting Officer Reply Evidence (including JWS)

65. JWS #1 records the planners[3] agreement that the definition for '*sensitive activity'* included sport and recreation activities. It was agreed that sport and recreation activities were not required to be subject to any rules for sensitive activities within the proposed Rifle Range Noise Overlay.

66. There were no further amendments to the Definitions recommended in Ms Evan's Right of Reply.

Hearing Panel's Evaluation

67. The Panel agrees with Ms Evans recommended deletion of the word '*Noise'* from references to '*Noise Sensitive Activities'* and use '*Sensitive Activities*' as defined in the Plan as notified.

[2] Horticulture New Zealand (S442.009) and Federated Farmers of New Zealand (S524.015)
[3] Ms Easton for WCRC, Ms Evans as the reporting planner, Mr Barr for the Buller District Council, and Ms McKenzie for the Westport Pistol Club, Chris Hartigan and the Westport Rifle Club Incorporated.

We note Mr Peakall's view that this covers sensitive activities in relation to noise; and accept this will avoid confusion.

68. The Panel agree that any rules for sensitive activities within the proposed Rifle Range Noise Overlay should not apply to the Rifle Range itself. However, we note that the notified definition for '*Sensitive Activity*' does not include sports and recreation as suggested in the JWS #1.

69. The Panel accepts Ms Evans' recommendation to add Mr Peakall's proposed definition for '*Audible Bird Scaring Device'* in response to Federated Farmers (S524.103).

70. In Relation to the remainder of the submission points on definitions, the Panel agree that these be rejected on the basis of the conclusions reached by Ms Evans.

Hearing Panel's Recommendation

71. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends the submission point identified in the footnote below is accepted, and recommend the following new term for '*Audible Bird Scaring Device'* is added to the **Definitions**:

AUDIBLE BIRD SCARING DEVICE
means gas gun, avian distress alarm or other such device used for the purpose of scaring birds.[4]

2.3. Noise Overview

Submissions and Further Submission

72. Five submissions points and one further submission point relating to the Overview were summarised in a Table on page 15-16 of the s42A Report. The Panel adopts the summaries in the s42A Report and has considered the submissions and further submission.

Section 42A Report and Addendum Reports

73. Ms Evans did not support the request by the NPHS (S190.527) to add new text to the Overview referencing New Zealand Standards for measuring and assessing noise because she considered this should be included in the rules which have legal weight.

74. Westport Pistol Club (S336.008) and the Westport Rifle Club Incorporated (S557.007) requested adding '*rifle range'* to the list of potentially affected activities, which was opposed by Poutini Ngai Tahu (FS41.101). Ms Evans did not support this inclusion because she considered it did not fit with the intent of the paragraph.

75. Buller Conservation Group (S552.153) and Frida Inta (S553.153) requested adding new text as follows:

> *Sensitivity can also arise when noisy industry sets up near existing peace-requiring activities such as a church or library.*

[4] Federated Farmers of New Zealand S524.103

76. Ms Evans partly supported these submission points and recommended amendments to include a more general reference to maintaining appropriate noise levels in zones where a higher amenity noise environment was anticipated.

77. The s42A Report recommended amending the Overview text as follows:

> *The generation of noise is often a necessary part of many activities undertaken on the West Coast/Te Tai o Poutini. While it is important that such activities are able to operate, noise can result in potential adverse effects on people's health and wellbeing, and their enjoyment of the environment. Adverse effects associated with noise can vary depending on a number of factors, including frequency, timing, duration and characteristics of the noise, the distance between the source and receiver, and any reduction measures. The background sound level can influence the acceptability or annoyance of noise, and this can also vary throughout the West Coast/Te Tai o Poutini.*
>
> *Where ~~noise~~ sensitive activities are established near existing noise-generating activities, or areas where higher noise levels are to be expected, reverse sensitivity effects can arise, potentially resulting in the existing noise-generating activities being constrained, in terms of their ongoing operation or expansion. This is a particular concern for important services and community facilities, including Airports and Heliports, Sports Grounds and Stadiums, the State Highway, Railway Corridors and the Ports, which could be constrained if reverse sensitivity effects arise.*
>
> *This Chapter controls the nature and timing of noise-generating activities, **including maintaining appropriate noise levels within zones where a different noise environment is anticipated to minimise potential adverse effects**, and manages new sensitive activities where these are located close to established noise-generating activities or zones which have or are expected to have elevated noise levels.*
>
> *The provisions in this chapter apply to all other chapters within this Plan, unless otherwise specified.*

78. Appendix 1 of the Addendum s42A Report amended this recommendation to replace '*minimise*' with '*manage'* in the third paragraph.

Hearing and Submitter Evidence/Statements

79. Ms Inta presented a statement at the hearing on behalf of herself and the Buller Conservation Group. She considered the recommended addition was unnecessary and did not meet the relief sought which was to protect sensitive places from noise. She noted the word '*maintain*' was inappropriate in the amended third paragraph and considered the paragraph should use plural terms due to reference to multiple zones. Ms Inta also opposed the removal of the word '*minimise*' and its replacement with '*manage*' as recommended in the Addendum Report. She recommended alternative wording as follows:

> *including ~~maintaining~~ **controlling (or managing)** ~~appropriate~~ **noise levels within zones where** ~~a~~ **differing**~~ent~~ noise environment**s** ~~is~~ **are** anticipated **in order** to minimise potential adverse effects.*

80. Mr Kennedy provided planning evidence for Westpower addressing the s42A Report recommendations in relation to further submissions (FS222.035 and FS222.0146) opposing the submission points from Buller Conservation Group (S552.153) and Frida Inta (S553.153). He noted that while the furthers submission points on the Overview had been accepted, he recommended simplified wording as follows:

> *... including maintaining appropriate noise levels within zones ~~where a different noise environment is anticipated to minimise potential adverse effects, …~~*

Reporting Officer Reply Evidence

81. Ms Evans recommended a further minor amendment to simplify the Overview text in relation to maintaining appropriate noise levels to manage potential adverse effects. She also acknowledged Ms Inta's preference for '*minimise*' rather than '*manage*' potential adverse effects. However, Ms Evans noted that her understanding of *'minimise'* was to reduce to the lowest possible extent, which may not always be necessary or practical. She considered *'manage'* included the option to minimise, as well as avoiding and mitigating.

82. Appendix 1 of the Right of Reply recommended further amendments as follows:

> *This Chapter controls the nature and timing of noise-generating activities, **including maintaining appropriate noise levels ~~within zones where a different noise environment is anticipated~~ to ~~minimise~~ manage potential adverse effects,** and manages new sensitive activities where these are located close to established noise-generating activities or zones which have or are expected to have elevated noise levels.*

Hearing Panel's Evaluation

83. The Panel agree with Ms Evans recommendation to delete '*noise'* and use '*sensitive activity*'.

84. The Panel notes the two further submission points by Westpower were not included in the summary table in the s42A Report. We record we have had regard to these.

85. In considering views of Ms Inta and Mr Kennedy, the Panel agrees with Ms Inta that the recommended changes do not meet the intent of the submission points, which is to maintain the existing amenity enjoyed by existing activities, such as churches or libraries. We recommend adding *'including maintaining the amenity of existing sensitive activities by managing noise levels'*. This is consistent with the RMA requirement to maintain amenity values for existing sensitive activities by managing noise effects of new activities; and complements the second half of the sentence which references potential reverse sensitivity effects of new sensitive activities. We note the Plan definition for *'Sensitive Activities'* includes churches and libraries. We agree with Ms Easton that '*manage*' is appropriate at an objective level and includes avoid, remedy and mitigate, as well as minimise.

86. The Panel agree with Ms Easton's recommendation to not add reference to the Rifle Range in the Overview given those activities listed are regionally significant infrastructure.

Hearing Panel's Recommendation

87. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends the submission points identified in the footnotes below are accepted or accepted in part, and recommend the following changes to the **Noise – Ngā Oro Overview**:

Overview

The generation of noise is often a necessary part of many activities undertaken on the West Coast/Te Tai o Poutini. While it is important that such activities are able to operate, noise can result in potential adverse effects on people's health and wellbeing, and their enjoyment of the environment. Adverse effects associated with noise can vary depending on a number of factors,

including frequency, timing, duration and characteristics of the noise, the distance between the source and receiver, and any reduction measures. The background sound level can influence the acceptability or annoyance of noise, and this can also vary throughout the West Coast/Te Tai o Poutini.

Where ~~noise~~[5] sensitive activities are established near existing noise-generating activities, or areas where higher noise levels are to be expected, reverse sensitivity effects can arise, potentially resulting in the existing noise-generating activities being constrained, in terms of their ongoing operation or expansion. This is a particular concern for important services and community facilities, including Airports**, Airfields, Aerodromes,**[6] and Heliports, Sports Grounds and Stadiums, the State Highway, Railway Corridors and the Ports, which could be constrained if reverse sensitivity effects arise.

This Chapter controls the nature and timing of noise-generating activities, **including maintaining the amenity of existing sensitive activities by managing noise levels,**[7] and manages new sensitive activities where these are located close to established noise-generating activities or zones which have or are expected to have elevated noise levels. The provisions in this chapter apply to all other chapters within this Plan, unless otherwise specified.

2.4. Noise Objectives

Submissions and Further Submissions

88. Eight submission points relating to the Noise Objectives (General) were summarised in a Table on page 17 of the s42A Report. All submissions sought to retain the provisions as notified.

89. Twelve submission points and six further submission points relating to **NOISE-O1** were summarised in a Table on page 18-19 of the s42A Report. Nine submissions supported the objective as notified and three sought amendments. Two further submissions supported amendments and four opposed one of the amendments.

90. Seventeen submission points and three further submission points relating to **NOISE-O2** were summarised in a Table on pages 19-20 of the s42A Report. Eleven submissions supported the objective as notified and five sought amendments. Three further submissions supported or supported in part amendments.

91. Six submission points and three further submission points relating to **NOISE-O3** were summarised in a Table on page 22 of the s42A Report. Five submissions supported the objective as notified and one sought an amendment. Three further submissions opposed the amendment.

92. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

Section 42A Report and Addendum Reports

NOISE Objectives (General)

[5] Silver Fern Farms Limited S441.006, KiwiRail S442.008
[6] RMA First Schedule Clause 16(2) plan-wide consistency from Special Purpose Zone Chapter Recommendation Report
[7] Buller Conservation Group S552.153 and Frida Inta S553.153.

93. Ms Evans acknowledged the support from all submitters[8] that sought to retain the objectives as notified. However, she noted her recommended amendments to the objectives in response to other submissions. In making her recommendations she relied on the expert expertise of Mr Peakall.

NOISE – O1

94. Ms Evans acknowledged the support from the submitters[9] that sought to retain the objective as notified. However, she noted her recommended amendments in response to other submissions.

95. Buller Conservation Group (S552.154), opposed by three further submissions (FS222.036, FS30.27 and FS55.42) and Frida Inta (S553.154), opposed by a further submission (FS222.0147), requested amendments to include *'impact on noise sensitive activities*.' Ms Evans did not support this because she considered it did not provide more clarity and was addressed in the rule through noise limits for the receiving zone.

96. Te Mana Ora (S190.528), supported by a further submission (FS30.25), supported the objective in part but sought to include the term '*unreasonably*.' Mr Peakall agreed with the inclusion of the term '*unreasonably*' within NOISE-O1. Ms Evans recommended addition of this term as follows:

> *The benefits of noise generating activities are provided for in a way that is compatible with the role, function and character of each zone and did not* ***unreasonably*** *compromise community health, safety and wellbeing.*

NOISE - O2

97. Ms Evans acknowledged the support from submitters[10] that sought to retain the objective as notified. However, she noted her recommended amendments in response to other submissions.

98. Manawa Energy (S438.124), supported in part by further submission from Westpower (FS222.0196), sought an amendment to replace '*community infrastructure'* with *'regionally significant infrastructure*'. Ms Evans supported this in part but considered the word '*community*' should be deleted to simply refer to '*infrastructure*.' She considered using *'regionally significant infrastructure*' would unnecessarily narrow the objective and would create inconsistency with RMA s7(b).

99. Horticulture New Zealand (S486.055), supported in part by a further submission (FS31.009) and Federated Farmers (S519.024), supported by a further submission (FS30.28), sought similar amendments to replace '*existing and permitted future'* with '*lawfully established'*, and '*existing and permitted future noise generating activities'* with *'lawfully established activities that generate noise*', respectively. Federated Farmers also sought to include a definition for

[8] Buller District Council (S538.329), Chris & Jan Coll (S566.319), Geoff Volckman (S563.089), Catherine Smart-Simpson (S564.101), Chris J Coll Surveying Limited (S566.319), Laura Coll McLaughlin (S474.319) and William McLaughlin (S567.380), Koiterangi Lime Co Ltd (S577.081)

[9] New Zealand Agricultural Aviation Association (S166.019, S166.020), Balance Agri-Nutrients (S345.001), Silver Fern Farms Limited (S441.035), Horticulture New Zealand (S486.055), West Coast Regional Council (S488.030) and (FS30.26), New Zealand Defence Force (S519.023)

[10] New Zealand Agricultural Aviation Association (S166.021), Te Mana Ora (190.529), Balance Agri-Nutrients (S345.002), Silver Fern Farms Limited (S441.036), KiwiRail Holdings (S442.084), Waka Kotahi NZTA (S450.164), Foodstuffs (South Island) Properties Limited and Foodstuffs South Island Limited (S464.048), New Zealand Defence Force (S519.024), Terra Firma Mining Limited (S537.017), Fire and Emergency New Zealand (S573.014), Grey District Council (S608.673), Karamea Lime Company (S614.129), Peter Langford (S615.129)

'noise sensitive activities'. Ms Evans supported these submissions in part and recommended replacing '*existing and permitted future'* with '*lawfully established*.'

100. Buller Conservation Group (S552.155) requested rewording of the objective. Ms Evans noted that the intent of the submission was unclear and invited the submitter to provide further clarification.

101. Mr Peakall considered NOISE-O2 should be retained.

102. The s42A Report recommended that NOISE-O2 be amended as follows:

> *The function and operation of ~~existing and permitted future~~ **lawfully established** noise generating activities and ~~community~~ infrastructure are not compromised by adverse effects, including reverse sensitivity effects, from ~~noise~~ sensitive activities.*

NOISE – O3

103. Ms Evans acknowledged the support from submitters[11] that sought to retain the objective as notified. However, she noted her recommended amendments in response to other submissions.

104. SFF (S441.037) supported NOISE-O3 in part but sought amendment to include *'that are inconsistent with the role and character of the zone*.' Ms Evans did not support this because she considered it would limit the scope and would not provide appropriate recognition of cross boundary effects.

Hearing and Submitter Evidence/Statements

105. Mr Kennedy, for Westpower, considered reference to '*regionally significant infrastructure'* should be included in NOISE-O2 to ensure all relevant infrastructure was captured.

106. Mr Stuart Pearson provided planning evidence on behalf of NZTA Waka Kotahi. He confirmed support for NOISE-O2 and NOISE-O3.

107. Ms Inta, for the Buller Conservation Group, requested amendments to NOISE-O3 or a new objective to reflect her requested amendments to the Overview section, as follows:

> *O3: The health and wellbeing of people, noise-sensitive places, and communities are protected from significant levels of noise,*
> ***OR***
> *OX: Noise levels are controlled around particular sensitive places such as libraries, churches and hospitals.*

108. The letter from Terra Firma supported Ms Evans recommendations NOISE-O2.

Reporting Officer Reply Evidence

109. In relation to NOISE-O1, Ms Evans reconsidered her recommended addition of '*unreasonably compromising*' in light of the discussion at the hearing. She agreed this term was subjective and could increase uncertainty. She considered the objective could be reframed to be worded

[11] Te Mana Ora (S190.530), Silver Fern Farms Limited (S441.037), Waka Kotahi NZTA (S450.165), Celine Stokowski and Anthony Thrupp (S522.004), Karamea Lime Company (S614.130)

in the positive and to remove '*unreasonably compromising*', while meeting the relief sought by Te Mana Ora to not provide absolute protection.

110. In relation to NOISE-O2, Ms Evans considered the key reference in the objective was '*lawfully established*', whether it was community infrastructure, community facilities, infrastructure, regionally significant infrastructure or a lawfully established activity. She noted there was no scope to delete the reference to '*infrastructure*', noting that referring only to '*infrastructure*' narrowed the objective and could indicate it did not need to be lawfully established. Ms Evans noted Manawa only sought '*community*' be deleted, so she recommends '*and*' be replaced with '*including*.' However, Ms Evans noted that if the Hearings Panel considered there was scope to remove references to '*infrastructure*' she would support this, so the objective simply refers to an activity being '*lawfully established*.'

111. In relation to NOISE-O3, Ms Evans recommended a minor amendment to include specific references to *'including sensitive activities'*, in response to Ms Inta's preference to protect quiet spaces.

112. Appendix 1 of the Right of Reply recommended amendments as follows:

> ***NOISE – O1***
>
> *The benefits of noise generating activities are provided for in a way that is compatible with the role, function and character of each zone* ***and does not result in unreasonable noise that may*** *compromise community health, safety and wellbeing.*
>
> ***NOISE – O2***
>
> *The function and operation of ~~existing and permitted future~~* ***lawfully established*** *noise generating activities****, including*** *~~and community~~ infrastructure****,*** *are not compromised by adverse effects, including reverse sensitivity effects, from ~~noise~~ sensitive activities.*
>
> ***NOISE – O3***
>
> *The health and wellbeing of people and communities****, including sensitive activities****, are protected from significant levels of noise.*

Hearing Panel's Evaluation

113. In relation to **NOISE-O1**, the Panel accepts Ms Evans reasoning and recommended amendments. We agree this gives relief to the submission point from Te Mana Ora that sought to qualify the wording of the objective so that it was not seeking to provide absolute protection, which is not practical to achieve.

114. In relation to **NOISE-O1**, the Panel accepts the recommended amendments proposed by Ms Evans and consider use of '*lawfully established'* is consistent with our recommended approach Plan-wide. We note the Plan definition for '*sensitive activity*' includes the matters sought by Hort NZ. We do not consider a new objective is required, as sought by Ms Inta.

115. The Panel notes the original submission point from Manawa (and the related further submission from Westpower) sought to replace '*community infrastructure'* with *'regionally significant infrastructure*', not specifically to delete community. We consider this is not appropriate as it would narrow the scope of the objective from including community infrastructure that is not included in the definition for *'regionally significant infrastructure*'.

The Panel has considered deletion of *'infrastructure',* as mentioned by Ms Evans in Reply, but consider there is insufficient scope available to enable the change.

116. The Panel considers the intent of the objective is to ensure that the function and operation of lawfully established activities and infrastructure generally is not compromised by adverse effects, including reverse sensitivity effects from sensitive activities. Based on the Plan definition for *'infrastructure'*, '*community facilities'* and *'regionally significant infrastructure*', the Panel consider it is appropriate to include all three terms. We consider this meets the relief sought by the submitter and further submitter, while not losing the intent of the objective to include community infrastructure that would not be captured by reference to infrastructure only.

117. The Panel accept Ms Evans' recommended amendment to NOISE-03 in response to Ms Inta's request to protect quiet spaces. While we note Mr Inta and the Buller Conservation Group did not specifically make a submission in relation to NOISE-O3, we consider this is a consequential amendment to the relief sought in the Overview and in relation to NOISE-01.

Hearing Panel's Recommendation

118. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends the submission points identified in the footnotes below are accepted or accepted in part, and recommend the following changes to the **Noise - Ngā Oro Objectives**:

NOISE – O1	The benefits of noise generating activities are provided for in a way that is compatible with the role, function and character of each zone and does not **result in unreasonable noise that may**[12] compromise community health, safety and wellbeing.
NOISE-O2	The function and operation of ~~existing and permitted future~~ **lawfully established**[13] noise generating activities**,** ~~and~~ community **facilities,**[14] **and** infrastructure, **including regionally significant infrastructure**[15] are not compromised by adverse effects, including reverse sensitivity effects, from ~~noise~~ sensitive[16] activities.
NOISE – O3	The health and wellbeing of people and communities, **including sensitive activities,**[17] are protected from significant levels of noise.

2.5. Noise Policies

Submissions and Further Submissions

119. One submission point sought to retain the policies in general as notified.

120. Twenty-one submission points and three further submissions relating to **NOISE-P1** were summarised in a Table on pages 23-24 of the s42A Report. Seventeen submission points

[12] Te Mana Ora (Community and Public Health) of the NPHS/ Te Whatu Ora (Te Whatu Ora) S190.528
[13] Horticulture New Zealand S486.056, Federated Farmers of New Zealand S524.100
[14] Consequential amendment Manawa Energy Limited S438.124
[15] Manawa Energy Limited S438.124
[16] Silver Fern Farms Limited S441.006, KiwiRail S442.008
[17] Consequential amendment Frida Inta S553.153, S553.154 and Buller Conservation Group S552.153, S552.154

supported the policy as notified and four submission points sought amendments. One further submission point opposed an amendment and two supported two of the amendments.

121. Sixteen submission points and two further submission points relating to **NOISE-P2** were summarised in a Table on pages 25-26 of the s42A Report. Thirteen submission points supported the policy as notified and three sought amendments. Two further submission points supported two of the amendments.

122. Two submission points sought to retain **NOISE-P3** as notified.

123. Twenty submission points and three further submission points relating to **NOISE-P4** were summarised in a Table on pages 28-29 of the S42A Report. Fourteen submission points supported the policy as notified and six sought amendments. Two further submissions opposed one amendment and one supported retaining the policy as notified.

124. The Panel has considered all of the relevant submissions and adopts the summaries in the s42A Report.

Section 42A Report and Addendum Reports

Policies (General)

125. Ms Evans acknowledged the support from BDC (S538.330) that sought to retain the policies as notified. However, she acknowledged her recommended amendments in response to other submissions on specific policies. She recommended no changes to the policies based on these submissions.

NOISE - P1

126. Ms Evans acknowledged the support of the submitters[18] that sought to retain the policy as notified. However, she acknowledged her recommended amendments in response to other submissions.

127. Ms Evans agreed with the change proposed by Manawa Energy (S438.125) to replace '*critica*l' with *'regionally significant*'.

128. SFF (S441.038) sought a minor amendment to consider potential reverse sensitivity effects on new sensitive activities adjacent to higher noise environments. Ms Evans did not support this because she considered it was unnecessary given NOISE-P2.

129. Ms Evans did not support the request from Westpower (S547.485) to add a new clause '*the technical, locational, functional or operational constraints and/or requirements of the activity*.' because of her recommendation to include similar text in NOISE-P4. Westpower (S547.486) also sought a new clause '*benefits from the work being undertaken and energy activities and infrastructure developed*' which was not supported by Ms Evans because she considered recommended amendments to clause (c) addressed this matter.

[18] New Zealand Agricultural Aviation Association (S166.022), Te Mana Ora (190.531), Ballance Agri-Nutrients (S345.003), KiwiRail Holdings (S442.085), Waka Kotahi NZTA (S450.166),West Coast Regional Council (S488.031), Terra Firma Mining Limited (S537.018), Chris & Jan Coll (S566.320), Geoff Volckman (S563.090), Catherine Smart-Simpson (S564.102), Chris J Coll Surveying Limited (S566.320), Laura Coll McLaughlin (S474.320) and William McLaughlin (S567.381), Koiterangi Lime Co Ltd (S577.082),Grey District Council (S608.674), Karamea Lime Company (S614.131), Peter Langford (S615.131)

NOISE – P2

130. Ms Evans acknowledged the support from submitters[19] that sought to retain the policy as notified. However, she acknowledged her recommended amendments in response to other submissions.

131. Ms Evans supported the amendments sought by SFF (S441.039) to include '*and new noise sensitive activities adjacent to higher noise environments*.'

132. Hort NZ (S486.057), Federated Farmers (S524.101) sought an amendment to include the General Rural Zone as a higher noise environment. Ms Evans noted this was not supported by Mr Peakall in his technical evaluation and she recommend rejecting this change.

133. The s42A Report recommended amending NOISE-P2 as follows:

> *Require sensitive activities sited in higher noise environments **and new sensitive activities adjacent to higher noise environments** to be located and designed so as to minimise adverse effects on the amenity values, public health and wellbeing and the safety of occupants and minimise sleep disturbance from noise, while taking into account….*

134. In the Addendum Report Ms Evans responded to the submission from Dean Trott, Westport Pistol Club, Chris Hartigan, and the Westport Rifle Club Incorporated by recommending further amendments to NOISE-P2 as follows:

> *For the purpose of NOISE - P2 higher noise environments include:*
> 1. *CMUZ - Commercial and mixed-use zones;*
> 2. *INZ - Industrial zones, PORTZ - Port Zone, AIRPZ - Airport Zone, STADZ - Stadium Zone, BCZ - Buller Coalfield Zone, MINZ - Mineral Extraction Zone and HOSPZ - Hospital Zone; ~~and~~*
> 3. *Locations in close proximity to a State Highway and the Railway Corridor**;***
> 4. ***The Westport Rifle Range Noise Overlay***

135. The Addendum Report #2 responded to the evidence of Mr Tuck for Silver Fern Farms (**SFF**), Ms Evans acknowledged that the phrase '*new sensitive activities adjacent to higher noise environments*' is not efficient as it is not spatially defined. She suggested that the most efficient and effective method to manage effects is via zoning. Thus, Ms Evans recommended that the phrase is removed from NOISE-P2.

NOISE – P3

136. Ms Evans acknowledged the support from submitters[20] that sought to retain the policy and recommended it was retained as notified.

NOISE – P4

[19] Te Mana Ora (190.532), KiwiRail Holdings (S442.086), Waka Kotahi NZTA (S450.167), Terra Firma Mining Limited (S537.019), Chris & Jan Coll (S566.321), Geoff Volckman (S563.091), Catherine Smart-Simpson (S564.103), Chris J Coll Surveying Limited (S566.321), Laura Coll McLaughlin (S474.321) and William McLaughlin (S567.382), Koiterangi Lime Co Ltd (S577.083), Karamea Lime Company (S614.132), Peter Langford (S615.132)

[20] Te Mana Ora (Community and Public Health) of the NPHS/ Te Whatu Ora (Te Whatu Ora) (S190.533), Grey District Council (S608.675)

137. Ms Evans acknowledged the support from submitters[21] that sought to retain the policy as notified. However, she acknowledged her recommended amendments in response to other submissions on specific policies.

138. Te Mana Ora (190.534) sought to include '*constraining noise generating activities in terms of*', which was not supported by Ms Evans because she considered this was too restrictive.

139. Ms Evans did not support Hort NZ (S486.058) and Federated Farmers (S524.104) requests to replace '*protect*' with '*provide for*' because she considered this would fail to give effect to NOISE-O3.

140. Ms Evans supported the Westpower (S547.487) request to replace *'minimise any conflict with adjacent*' with '*avoid, remedy or mitigate adverse effects'* in clause (e). She supported in part the request (S547.488) to include '*The technical, locational, functional or operational constraints and/or requirements of the activity*' but recommended this should be focused on '*functional need and operational need*' as these terms were defined in the Plan using the Planning Standards definitions. However, Ms Evans rejected the Westpower (S547.489) request to include a new clause '*benefits from the work being undertaken and energy activities and infrastructure developed*' because she considered this matter was covered in other chapters.

141. SFF (S441.040) sought to include '*within the zone*' in clause (e) to recognise the difference between zones. Ms Evans did not support this amendment because she considered it did not give effect to objectives NOISE-O1 and O3.

142. In her Addendum, Ms Evans corrected an error within the recommended amendments in the s42A Report in relation to Westpower's submission. Revised Appendix 1 of the Addendum recommended amending NOISE-P4 as follows:

> *Ensure noise effects generated by an activity are of a type, scale and level that are appropriate for the predominant role, function and character of the receiving environment and protect the health and wellbeing of people and communities by having regard to:*
>
> *a. Maximum noise limits to reflect the character and amenity of each zone;*
> *b. Type, scale and location of the activity in relation to any ~~noise~~ sensitive activities;*
> *c. Hours of operation and duration of activity;*
> *d. The temporary or permanent nature of any adverse effects; ~~and~~*
> *e. The ability to internalise and/or **avoid, remedy or mitigate** ~~minimise any conflict with adjacent activities~~**; and***
> *f. **The functional need and/or operational need of the activity.***

Hearing and Submitter Evidence/Statements

143. Mr Pearson, for NZTA Waka Kotahi, confirmed support for policies NOISE-P1, NOISE-P2 and NOISE-P4.

[21] Ballance Agri-Nutrients (S345.004), Waka Kotahi NZTA (S450.168), West Coast Regional Council (S488.032), Chris & Jan Coll (S566.322), Geoff Volckman (S563.092), Catherine Smart-Simpson (S564.104), Chris J Coll Surveying Limited (S566.322), Laura Coll McLaughlin (S474.322) and William McLaughlin (S567.383), Koiterangi Lime Co Ltd (S577.084), Karamea Lime Company (S614.133), Peter Langford (S615.133)

144. Mr Kennedy, for Westpower, noted that while his submission on NOISE-P1 was rejected, he agreed with the outcome in the s42A Report, provided the amendments were made as set out in Appendix 1.

145. Mr Kennedy agreed with the proposed amendments to NOISE-P4 in the s42A Report but requested that clause (e) was amended as set out in the submission, as follows:

> *e. The ability to internalise and/or avoid, remedy or mitigate adverse effects.*

146. Despite not making a submission, Ms Inta requested that NOISE-P4(b) retain '*noise*' and was amended as follows:

> *b. Type, scale and location of the activity in relation to any noise-sensitive activities and places;*

147. The letter from Terra Firma confirmed support for Ms Evans' recommendations on their submissions in relation to NOISE-P1 and NOISE-P2.

Reporting Officer Reply Evidence

148. JWS #1 records that the planners agreed that a new clause should be added to NOISE-P2 '*The Westport Rifle Range Noise Overlay'* to manage potential reverse sensitivity effects.

149. The Joint Right of Reply noted that Ms Evans had specifically considered the matters from technical expert noise caucusing. Ms Evans noted that the s42A amendment in response to the SFF submission point S441.039 was being reconsidered and may be deleted.

150. In relation to NOISE-P1, Ms Evans considered that '*receiving environment*,' rather than '*surrounding environment'* was a more appropriate term in NOISE-P1(e), given that the noise provisions focus on managing noise effects where they were received. She recommended this change be made throughout the chapter for consistency. She noted this term was only used in NOISE-R12(f) and recommend it be replaced, along with a minor correction to replace '*on*' with '*of*.'

151. In Reply, Ms Evans did not make any comments in relation to policies NOISE-P2 or NOISE-P3.

152. In relation to NOISE-P4, Ms Evans noted that she amended the reference to '*functional need and/or operational need*', in the version prepared for expert conferencing purposes, to remove the '*and*' to ensure consistency with other topics.

Hearing Panel's Evaluation

NOISE – P1

153. The Panel agree with Ms Evans recommended amendments to NOISE-P1 to replace '*critica*l *infrastructure*' with *'regionally significant infrastructure*'. Use of this term is recommended Plan-wide for consistency and the Panel accepts this amendment throughout the chapter without further discussion.

NOISE – P2

154. The Panel appreciates Ms Evans consideration of replacing '*surrounding environment*' with '*receiving environment*' in clause (e), in response to a Panel question. We also tested this at

the hearing with Mr Peakall, suggested retaining '*surrounding environment*' because it captured the overall environment. On reflection, the Panel agree with Mr Peakall and further note there is no scope for this amendment given the high level of support in submissions.

155. The Panel agrees with Ms Evans recommended addition of a new clause NOISE-P2(d) to include the "*Westport Rifle Range Overlay*" in the higher noise environments listed. We note this reflects the agreement recorded in JWS #1. We agree that this is appropriate to support land zone changes around the existing club and to manage potential reverse sensitivity.

156. The Panel amend the policy to refer to '*rail corridor'* for consistency across the Plan.

NOISE – P3

157. The Panel accepts Ms Evans recommendation to retain NOISE-P3 as notified.

NOISE – P4

158. The Panel accepts Ms Evans recommended amendments to NOISE-P4 as shown in Appendix 1 of the Right of Reply. We agree that the TTPP definitions (using the Planning Standards definitions) for '*Functional Need'* and '*Operational Need*' include reference to the matters sought by Westpower (S547.488). We also agree this should be *'or'* in the context of the policy.

159. The Panel agree that '*protect*' is the correct wording in this context and links to NOISE-O3. We have not had regard to Ms Inta's comments given she had no submission points on this policy.

Hearing Panel's Recommendation

160. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends the submission points identified in the footnotes below are accepted or accepted in part, and recommend the following changes to the **Noise – Ngā Oro Policies**:

NOISE – P1	Enable the generation of noise ~~when it is~~[22] of a type, character, scale and level that is appropriate to the zone, having regard to: a. The purpose, character and qualities of the zone that the activity is located in; b. The nature, frequency and duration of the noise generating activity; c. Whether the noise generating activity is ~~critical~~ **regionally significant**[23] infrastructure; d. Methods of mitigation; and e. The sensitivity of the surrounding environment.
NOISE – P2	Require sensitive activities sited in higher noise environments to be located and designed ~~so as~~[24] to minimise adverse effects on the amenity values, public health and wellbeing and the safety of occupants and minimise sleep disturbance from noise, while taking into account: a. The type of noise generating activity; and b. Other noise sources in the area; and

[22] RMA Schedule 1, clause 16(2)
[23] Manawa Energy Limited S438.125
[24] RMA Schedule 1, clause 16(2)

	c. The nature and occupancy of the ~~noise~~[25] sensitive activity; and d. Mitigation measures, including acoustic insulation, screening and topography. For the purpose of NOISE - P2 higher noise environments include: a. CMUZ - Commercial and mixed-use zones; b. INZ - Industrial zones, PORTZ - Port Zone, AIRPZ - Airport Zone, STADZ - Stadium Zone, BCZ - Buller Coalfield Zone, MINZ - Mineral Extraction Zone and HOSPZ - Hospital Zone; ~~and~~ [26] c. Locations in close proximity to a State Highway and the Rail~~way~~[27] Corridor; **and** **d. The Westport Rifle Range Noise Overlay.**[28]
NOISE – P3	Within the Airport Noise Contour Boundary overlay avoid sensitive activities, unless noise mitigation measures are implemented that avoid sleep disturbance and minimise other adverse effects on the amenity values of occupants.
NOISE-P4	Ensure noise effects generated by an activity are of a type, scale and level that are appropriate for the predominant role, function and character of the receiving environment and protect the health and wellbeing of people and communities by having regard to: a. Maximum noise limits to reflect the character and amenity of each zone; b. Type, scale and location of the activity in relation to any ~~noise~~[29] sensitive activities; c. Hours of operation and duration of activity; d. The temporary or permanent nature of any adverse effects; ~~and~~[30] e. The ability to internalise and/or **avoid, remedy or mitigate adverse effects** ~~minimise any conflict with adjacent activities~~; **and**[31] f. **The functional need or operational need of the activity**.[32]

2.6. Noise – Rules

Submissions and Further Submissions

161. One submission point opposing the Noise rules in general was summarised in a Table on page 30 of the s42A Report.

162. Ten submission points and seven further submission points relating to **NOISE-R1** were summarised in a Table on pages 31-32 of the s42A Report. Eight submission points supported the rule as notified and two sought amendments. Two further submission points support one amendment and five opposed or opposed in part the other amendment.

[25] Silver Fern Farms Limited S441.006, KiwiRail S442.008
[26] RMA Schedule 1, clause 16(2)
[27] RMA Schedule 1, clause 16(2)
[28] Dean Trott S330.002, Westport Pistol Club S336.016, Chris Hartigan S338.002, Westport Rifle Club Incorporated S457.009
[29] Silver Fern Farms Limited S441.006, KiwiRail S442.008
[30] RMA Schedule 1, clause 16(2)
[31] Westpower Limited S547.487
[32] Westpower Limited S547.488

163. Twenty-seven submission points and 17 further submission points relating to **NOISE-R2** were summarised in a Table on page 33-37 of the s42A Report. Sixteen submission points supported the rule as notified and eleven sought amendments. Thirteen further submissions supported some amendments and four opposed some amendments.

164. Thirty-five submission points and 35 further submission points relating to **NOISE-R3** were summarised in a Table on pages 41-47 of the s42A Report. One submission point supported the rule as notified, 26 sought amendments and eight sought it be deleted entirely or in part. Eleven further submissions supported some amendments and 24 submissions opposed, and 11 sought amendments.

165. Five submission points and four further submission points relating to **NOISE-R4** were summarised in a Table on pages 72-73 of the s42A Report. Four submission points supported the rule as notified. Three submission points sought amendments, and two opposed.

166. Twenty-eight submission points relating to **NOISE-R5** were summarised in a Table on pages 58-59 of the s42A Report. All submission points sought amendments. Four further submissions opposed amendments and three supported amendments.

167. Twenty-eight submission points and nineteen further submission points relating to **NOISE-R6** were summarised in a Table on pages 61-65 of the s42A Report. Five submission points supported the rule as notified and 23 sought amendments. Fourteen further submission points opposed amendments and five supported amendments.

168. Two submission points and two further submission points relating to **NOISE-R7** were summarised in a Table on pages 67 of the s42A Report. Two submission points supported the rule as notified. The two further submission points supported amendments.

169. Six submission points and seven further submission points relating to **NOISE-R8** were summarised in a Table on pages 68-69 of the s42A Report. One submission point supported the rule as notified and five sought amendments. Four further submission points opposed amendments and three supported amendments.

170. Three submission points and three further submission points relating to **NOISE-R9** were summarised in a Table on page 70 of the s42A Report. Two submission points supported the rule as notified. Three further submission points opposed amendments.

171. Four submission points and one further submission point relating to **NOISE-R10** were summarised in a Table on page 71 of the s42A Report. Three submission points supported the rule as notified and one sought amendment. One further submission opposed an amendment.

172. Thirty-one submission points and eight further submission points relating to **NOISE-R11** were summarised in a Table on pages 73-75 of the s42A Report. Four submission points supported the rule as notified and 27 sought amendments. All eight further submissions opposed amendments.

173. Eleven submission points and five further submission points relating to **NOISE-R12** were summarised in a Table on pages 76-77 of the s42A Report. Five submission points supported the rule as notified and six submission points sought amendments. All five further submission points opposed amendments.

174. Six submission points and three further submission points relating to **NOISE-R13** were summarised in a Table on page 78 of the s42A Report. Two submission points supported the

rule as notified and five sought to delete the rule. Two further submission points opposed deleting the rule and one supported it.

175. The Panel adopts these summaries and has considered the submissions and further submissions.

Section 42A Report and Addendum Report

Rules (General)

176. The majority of Mr Peakall's expert evidence was accepted and implemented by Ms Evans in the recommendations in the s42A Report and addendum Reports. However, the Panel notes there were a few points that were not been covered by Ms Evans which are also summarised below in relation to the relevant rule.

177. Ms Evans did not agree with the submission point from Michael Hill (S70.019) that sought to revert back to the Grey District Plan rules. She considered the recommended rules reflected the relevant New Zealand Standards and Planning Standards and were supported by independent expert Mr Peakall.

NOISE - R1 Permitted Activities - General Standards

178. Ms Evans acknowledged the support from submitters[33] that sought to retain the rule as notified. However, she noted her recommended amendments in response to other submission points.

179. In relation to the submission point by NZAAA (S166.023), Ms Evans did not support the addition of '*unless otherwise exempted in NOISE-R2'* because she considered compliance with the standards was still appropriate to manage effects of permitted activities.

180. Ms Evans supported Te Mana Ora's (S190.535) request to remove reference to '*section 7.7*' and replace it with '*as assessed*' in NOISE-R1(4) because this aligned with the Planning Standards and Mr Peakall's expert advice. However, she did not support the deletion of clause (1) based on Mr Peakall's advice and considered it was more efficient for all standards to be within the one rule.

181. Ms Evans recommended minor amendments, as suggested by Mr Peakall for improved clarity and to reference, and better align with, the relevant New Zealand Standards.

182. In Addendum Report, in response to the pre-circulated evidence of Dr Chiles for Te Mana Ora, Mr Peakall agreed that clause (3) should be deleted due to the lack of definition for '*mobile noise sources'*. Ms Evans agreed that the term '*mobile noise sources'* was not defined and that there was potential for uncertainty around how the exemption would be applied in NOISE-R1. She therefore supported the deletion of clause (3).

183. Appendix 1 of the Right of Reply recommended amendment to NOISE-R1 as follows:

All activities must comply with the following relevant standards.

Activity status where compliance not achieved: Restricted Discretionary

[33] Waka Kotahi NZTA (S450.169), New Zealand Defence Force (S519.025), Buller District Council (S538.331), Chris & Jan Coll (S566.323), Chris J Coll Surveying Limited (S566.323), Laura Coll McLaughlin (S474.323) and William McLaughlin (S567.384),Grey District Council (S608.66)

1. *Noise levels arising from activities must be measured and assessed in accordance with the New Zealand Standard NZS 6801:2008 Acoustics - Measurement of environmental sound and the New Zealand Standard NZS 6802:2008 Acoustics - Environmental noise except where more specific requirements apply.*
2. *The noise from any construction work activity must be measured and assessed in accordance with the requirements of New Zealand Standard NZS6803:1999 Acoustics – Construction noise. Construction work is defined in New Zealand Standard NZS 6803:1999 Acoustics – Construction noise.*
3. ~~*Noise from mobile noise sources shall comply with the noise limits set out in Tables 2 and 3 of NZS 6803:1999 Acoustics - Construction Noise, with reference to "construction noise" taken to refer to "mobile noise sources.*~~

X. Noise from aerodromes, airfields or airports not subject to noise rule R10 shall be measured and assessed in accordance with New Zealand Standard NZS 6805:1992 Airport Noise Management and Land Use Planning.

XX. Noise from New or Altered Roads shall be measured and assessed in accordance with New Zealand Standard NZS 6806:2010 Acoustics - Road-traffic noise - New and altered roads.

4. *Noise from wind turbines shall be measured* ***and assessed*** *in accordance with* ~~*section 7.7 of*~~ *NZS 6808: 2010 Acoustics Wind Farm Noise;*
5. *Noise from Helicopter Landing areas shall be* ~~*managed*~~ ***measured and assessed*** *in accordance with* ~~*and comply with*~~ *the noise standards and limits of NZS 6807: 1994 Noise Management and Land Use Planning for Helicopter Landing Area.*

XXX. Noise from port activities shall be managed in accordance with and comply with the noise standards and limits, control boundaries and methods of measurement as outlined in NZS 6809: 1999 Acoustics Port Noise Management and Land Use Planning.

NOISE-R2: Permitted Activity – Emissions of Noise in all Zones

184. Ms Evans acknowledged the support from submitters[34] that sought to retain the rule as notified. The acknowledgement is subject to recommended amendments that arise from other submission points.

185. In response to the submission point made by NZAAA (S166.024) and the Director General (S602.180) to make additions to NOISE-R2(12), Ms Evans supported the amendment in part. She agreed to include some of the additions sought, including adding '*take offs*' and '*conservation activities*' but did not support the inclusion of specific subsets of activities because she considered there was sufficient clarity.

186. Te Mana Ora (S190.536) sought to amend clauses (1), (10), (12), (13), (16) and (17), which Ms Evans supported in part. She supported deleting '*e.g. spraying, harvesting, etc'* in clause (1) because these were not typical residential activities, as well as other further amendments. She supported deleting clause (10) because of the lack of clarity. Ms Evans did not support deleting clauses (12) and (13) on the basis that the effects from activities were temporary or infrequent because aircraft landings were managed by NZ Standards. Based on the advice of Mr Peakall, she recommended a minor amendment to clause (12) to replace '*infrequent*' with a set number of days per year. She also supported the changes sought clauses (16) and (17), on the basis that Mr Peakall supported this from a technical perspective.

[34] Waka Kotahi NZTA (S450.170), Jetboating New Zealand (S161.004 and S116.005), Ballance Agri-Nutrients (S345.005), KiwiRail Holdings (S442.087), Westport Rifle Club Incorporated (S547.008), New Zealand Defence Force (S519.026 and S519.027), Buller District Council (S538.332), Chris & Jan Coll (S566.324), Chris J Coll Surveying Limited (S566.324), Laura Coll McLaughlin (S474.324) and William McLaughlin (S567.385), Grey District Council (S608.677)

187. Westport Pistol Club (S336.009) sought that noise under clause R2(14) is permitted at any time of day. Ms Evans supported this in part and suggested including reference to daytime hours.

188. Foodstuffs (S464.049) sought to delete '*residential*' and add '*expected for that zone'* in Rule NOISE-R2(7). Ms Evans partially supported this but rather recommended adding '*provided for as a permitted activity for that zone*'.

189. Horticulture NZ (S486.059) sought to amend NOISE-R2(11) by replacing *'agricultural, horticulture and pastoral farming activities*' with *'rural production activities*'. Similar relief was sought by Federated Farmers (S524.103). Ms Evans noted that as the terms currently included were defined and preferred that the definition was retained but recommended reordering the words and deleting '*farming*'. She also recommended minor amendments to delete the words '*limited*,' '*seasonal*,' and *'intermittent*' to remove uncertainty.

190. WCRC (S488.033) sought to amend NOISE-R2 to clearly cover aerial biosecurity and biodiversity activities. Ms Evans partially supported this and recommended amendments to provide for conservation activities.

191. WMS Group (S599.094) sought the deletion of '*as part of or compatible with a normal residential activity*' from NOISE-R2(7). Ms Evans supported this but recommended alternate wording by referencing permitted activities.

192. Manawa Energy (S438.126) and Chris Hartigan (S438.126) sought the replacement of '*lifeline utilities*' with '*providers of regionally significant infrastructure*' in NOISE-R2(5). Ms Evans did not support this because '*lifeline utilities*' were defined in legislation, however, she supported adding '*regionally significant infrastructure'*.

193. In the Addendum Report, Mr Peakall disagreed with Dr Chiles' evidence in regard to NOISE-R2(12), as he considered that the existing rules were appropriate and acceptable. Regarding Dr Chiles' request to remove the exemption for non-commercial watercraft, Mr Peakall noted the removal of the exemption would be too onerous for intermittent, recreational users.

194. The Addendum Report also responded to the statement from WCRC requesting to amend NOISE-R2 to clearly cover aerial biosecurity and biodiversity activities. Ms Evans agreed with Mr Peakall's response to this evidence, and supported the inclusion of '*per site'* within NOISE-R2(12).

195. Ms Evans supported technical recommendations from Mr Peakall and also recommended minor additional changes for clarity. Appendix 1 of the Addendum Report showed recommended amendments to **NOISE-R2** as follows:

> *Activity Status Permitted*
>
> *Where the following activities are exempted from meeting Zone noise standards:*
>
> 1. ~~*Intermittent residential activities,*~~ ~~*u*~~***Use*** *of lawn mowers, vehicles, machinery or equipment operated and maintained in accordance with the manufacture's specifications* ***and associated with the use of a site for a residential activity*** ~~*used on an intermittent basis (e.g. spraying, harvesting, etc);*~~
>
> 2. *Any warning device or siren used by emergency services for emergency purposes (and routine testing and maintenance of these);*

3. *Activities at emergency service facilities associated with emergency response and emergency response training;*

4. *Helicopters used for an emergency and as an air ambulance;*

5. *The use of generators and mobile equipment (including vehicles) for emergency purposes, including testing and maintenance not exceeding 2 weeks in duration, where they are operated by emergency services, ~~or~~ lifeline utilities **or Regionally Significant Infrastructure;***

6. *People noise at recreational activities, such as sporting events or the noise from children at school ~~or daycare facilities~~ or in residential dwellings. This did not include any amplified noise;*

7. *Vehicles being driven on a road (within the meaning of Section 2(1) of the Transport Act 1998), or within a site as part of or compatible with an ~~normal residential~~ activity **provided for as a permitted activity in that zone;***

8. *Trains **operating** on rail lines (public or private) and crossing bells within road reserve, including at railway yards, railway sidings or stations. However, this exemption did not apply to the testing (when stationary), maintenance, loading or unloading of trains;*

9. *Road construction work where management controls are in place to mitigate the emission of noise;*

10. ~~*Any residential activity on the same site as a noise source being assessed;*~~

11. *Agricultur**al**~~e~~, **pastoral and** horticultur**al**~~e~~ ~~and pastoral farming~~ activities undertaken ~~for a limited duration, including using agricultural vehicles, machinery, aircraft or equipment used on a seasonal or intermittent basis~~ in the General Rural and Rural Lifestyle zones;*

12. *~~Infrequent a~~**A**ircraft **take off and** landing ~~for~~ **associated with** rural production **activities and conservation activities** ~~purposes on an intermittent basis~~ **for no more than 30 days in any 12 month period per site** ~~including aerial topdressing and helicopter movements;~~*

13. *Non-commercial motorised watercraft operating on the surface of waterbodies;*

14. *Rifle ranges located within the Rifle Range Protection Area **during the hours of 7am to 10pm;***

15. ~~*Impulsive sounds (such as hammering and bangs) and dog barking noise which are poorly assessed by reference to NZS 6802:2008 Acoustics Environmental Noise;*~~

16. *The noise is emitted from an audible bird scaring device between the hours of half an hour before sunrise and until half an hour after sunset, not used at a frequency of more than 12 events per hour**, and generating less than 65 dB LAE for each event; and***

17. *The noise is from a Temporary Activity where the temporary activity occurs between 7:00am and 10:00pm **and no more than 12 days per calendar year** ~~– only~~, and if operating outside of these hours complies with the underlying noise standards of the zone. **This did not include any amplified noise.***

Activity status were compliance not achieved:** ~~Restricted Discretionary~~ **N/A

NOISE - R3 Acoustic Insulation Requirements for New Buildings for Use by a Sensitive Activity

196. Ms Evans acknowledged the support from Te Mana Ora (S190.537) to retain the rule as notified. However, she noted her recommended amendments in response to other submission points.

197. KiwiRail (S442.088), which was summarised in relation to the whole chapter above, sought amendments to include noise, vibration and mechanical ventilation standards provided in Appendix A provided.

198. Five submitters[35] sought deletion of NOISE-R3, including BDC who considered that the rule was not necessary given the low traffic environment. These submission points were all opposed in further submissions from KiwiRail. Two submitters[36] sought to delete the rule or clause (f), or add an exemption for property owners that accept noise mitigation where this is registered on the title in the form of a consent notice.

199. Poutini Ngāi Tahu (S620.211) requested engagement of an acoustic expert to assess the generated noise, vehicle speeds and times it is generated on the state highway and rail networks; and a reassessment of the rules on the basis of protecting human health. Ms Evans considered the assessment of Mr Peakall had partly addressed this and she noted the acoustic insulation rules were similar to other recent district plans.

200. In response to these submission points, Ms Evans supported retaining NOISE-R3 subject to recommended amendments, based on the evidence of Mr Peakall. She considered the rule would give effect to the NOISE objectives by ensuring appropriate internal noise levels can be achieved for sensitive activities close to noise generating activities.

201. Jakie Mathers and Bart Gillman (S228.006) sought that acoustic insulation is only required for new builds if specific information was freely provided. They also sought alternative relief through a 'no complaints' covenant approach to new builds (S228.007). Ms Evans rejected this approach due to the implementation and monitoring costs; and considered it would not achieve NOISE-O3 because it would not provide for appropriate internal amenity outcomes. The submitter (S228.005) also sought that no vibration standard be applied to stand alone residential dwellings. Ms Evans did not support this based on the technical advice from Mr Peakall.

202. NZTA Waka Kotahi (S450.171) sought amendments based on the current rule structure, and Ms Evans agreed that minor formatting changes were required to improve clarity. NZTA Waka Kotahi also sought amendments to apply vibration requirements to buildings 20m from a state highway, which was supported by Ms Evans based on Mr Peakall's technical advice. NZTA Waka Kotahi also sought to include state highway noise contours as an overlay, to replace the buffer approach. This was supported by Mr Peakall as an effective approach. Ms Evans considered that a high noise overlay could improve the efficiency of the rule requirements in relation to the state highways, and invited the submitter to provide detailed evidence and planning analysis. Ms Evans suggested amendments, if the overlay was supplied and the approach was supportable, as follows:

> *1. The building will be used by a sensitive activity and is located within:*
> *~~a. a. 80m of the edge of the carriageway of a State Highway with a speed limit of 70kph or greater; or~~*
> *~~b. 40m of the edge of the carriageway of a State Highway with a speed limit of less than 70kph; where~~*

[35] Buller District Council (S538.333), Chris & Jan Coll (S566.325), Chris J Coll Surveying Limited (S566.325), Laura Coll McLaughlin (S474.325) and William McLaughlin (S567.386), Jacobus Wiskerke (S95.004)
[36] Bert Hofmans (S504.012) and Lindy Millar (S505.012)

The High Noise Overlay shown on the planning maps:

203. Gina Hogarth (S304.002) and Misato Nomura (S151.002) sought to provide for permitted mitigation measures (e.g. bunding) as an alternative option. Gina Hogarth sought further consideration of the low traffic volumes in Buller. Mr Peakall suggested an appendix could be added to the pTTPP outlining examples of acceptable design solutions to achieve the requirements of the rule. He considered this would provide more certainty to plan users and reduce costs compared to requiring acoustic certification. Ms Evans noted the rule did not preclude use of noise mitigation designs (such as bunds and fences) given it only set the internal noise levels to be achieved. She considered use of an appendix would address some of the submissions points and was an acceptable solution that could improve certainty and potentially reduce costs.

204. Deb Langridge (S252.006) sought that buildings producing noise should be adequately insulated. Ms Evans rejected this submission because the emission of noise was managed under other NOISE rules.

205. Margeret Montgomery (S442.080) sought that setback requirements were reduced. Without further evidence or justification, Ms Evans rejected this submission and considered the amendments recommended by Mr Peakall may address the submitter's concerns.

206. Four submitters[37] sought similar amendments, with some requesting that acoustic insulation be required for residential buildings within 250m of the Rifle Range Protection Area, and others requesting that acoustic insultation requirements should be applied to all sensitive activities. Ms Evans accepted these submissions in part, however, rather than a 250m buffer as requested, she recommended the inclusion of noise contours in accordance with Mr Peakall's evidence.

207. In response to submission points[38] that sought to include acoustic insulation requirements for new buildings containing sensitive activities built in the proposed Alma Road development, within 100m of the consented quarry, Ms Evans noted that Ms Easton had informed her that the land around the quarry was likely to be zoned GRUZ, so the insulation is not required. Mr Peakall considered acoustic insultation provisions within 100m of quarry operations were unnecessary because quarry activities were subject to noise rules in the Plan.

208. Ms Evans did not support the request by SFF (S441.041) to include a new clause requiring acoustic insulation for new and altered buildings adjacent to an industrial site because she considered potential reverse sensitivity effects were better managed through appropriate zoning and zone provisions.

209. The s42A Report noted that Ms Easton had recommended that Haast Airfield be added to the Airport Zone and the 55dBA contour be included on the planning maps as part of the Special Purpose Zone Chapter hearing. Ms Evans noted this required a consequential amendment to clause (d) and NOISE-R10.

210. The Addendum Report responded to evidence circulated before the hearing. In response to Dr Chiles' evidence for Te Mana Ora and his request to include reference to the ventilation requirements in the proposed appendix, Mr Peakall agreed. However, he did not agree with

[37] Westport Pistol Club (S336.016), Westport Rifle Club (S457.009), Dean Trott (S330.002), Chris Hartigan (S338.002)
[38] Avery Brothers (S609.061 and S609.069), Bradshaw Farms (S511.069), Leonie Avery (S507.069), Jared Avery (S508.069), Kyle Avery (S509.069), Paul Avery (S512.069), Brett Avery (S513.069)

Dr Chiles that the ventilation rule should be retained as notified because he considered the notified rule contained overly excessive controls.

211. In response to the evidence of Mr Tuck for SFF, Mr Peakall considered the proposed rules in relation to the General Rural Zone (**GRUZ**) and new NOISE-RX were appropriate to provide adequate protection to noise sensitive receivers in the vicinity of the Hokitika site. Mr Peakall considered the daytime noise level sought by Mr Tuck, of 60 dB_{LAeq}, was excessive. He noted that the proposed upper daytime limit for a noise sensitive activity of 55 dB_{LAeq} was appropriate.

212. In response to Ms McKenzie's evidence for the Westport Pistol Club (and others), Mr Peakall considered these concerns had been addressed through the implementation of a refined rifle range noise contour overlay and slight refinements to the wording of NOISE-R3. Ms Evans also supported the inclusion of a rule for sensitive activities within the 60dB contour as requested.

213. In response to Dr Chiles' evidence for NZTA Waka Kotahi, Mr Peakall agreed that the text in NOISE-R3 should be updated to include alterations to existing buildings containing sensitive activities. Mr Peakall agreed with the suggestion of NZTA Waka Kotahi to include a Road Noise Overlay in NOISE-R3 but considered that either a setback or overlay approach was generally acceptable to ensure adequate insulation of noise sensitive activities from road traffic noise. Ms Evans accepted this approach in principle.

214. Ms Evans supported the evidence of Mr Peakall and recommended inclusion of shapefiles provided by Mr Pearson within the planning maps to create a Road Noise Overlay for state highways. To achieve this, she recommended deleting clauses (a) and (b) and replacing it with reference to the '*Road Noise Overlay shown in the planning maps*'. She also supported deleting clause (b)(ii) based on the inclusion of the Road Noise Overlay.

215. Ms Evans also supported the NZTA Waka Kotahi submission requesting the necessity to specify that ventilation was to be provided in accordance with NOISE-R3(1)(f), which was also supported by Mr Peakall. She considered this provided a helpful cross-reference and would assist with the accuracy and effectiveness of Appendix 1.

216. In the Addendum Report, Ms Evans noted that she had scheduled pre-hearing discussions with KiwiRail. Overall, she agreed with the experts for KiwiRail and Mr Peakall and supported the setbacks provided by KiwiRail, and inclusion of a provision that allows for line of sight screening. Ms Evans also agreed with Mr Peakall's advice and supported KiwiRail's submission to apply acoustic insulation requirements to '*new or altered*' habitable rooms being applied throughout NOISE-R3.

217. In response to Dr Chiles' evidence for KiwiRail, Mr Peakall noted that similar points had been raised in the NZTA Waka Kotahi evidence regarding the ventilation rule, which Mr Peakall has addressed. Mr Peakall noted that he now agreed with Dr Chiles position that a 100m setback for noise and 60m setback for vibration was needed for railway noise and vibration, and now agreed these were the appropriate setbacks. Mr Peakall maintained his position that a single design control for all sensitive activities was appropriate.

218. Mr Peakall also identified several technical refinements and corrections, which Ms Evans was supportive of on the basis they will improve accuracy, clarity and potentially address cost concerns.

219. Appendix 1 of the Addendum Report recommended amending NOISE-R3 and adding new Appendix X, as follows:

Acoustic Insulation Requirements for New or Altered Buildings for Use by a Sensitive Activity

Activity Status Permitted

Where:

The building will be used by a sensitive activity and is located within ***the Road Noise Overlay shown on the planning maps****:*

~~*a. 80m of the edge of the carriageway of a State Highway with a speed limit of 70kph or greater; or*~~

~~***b.*** *40m of the edge of the carriageway of a State Highway with a speed limit of less than 70kph;*~~ *where****:***

i. *Any habitable room used for a sensitive activity* ***and/or space used for sleeping*** *must be designed and constructed to achieve a* ~~*minimum*~~ ***maximum*** *internal noise* ~~*limit*~~ ***level*** *of 40dB$_{LAeq}$ (24h); and*

ii. ~~*Compliance with i. above must be achieved based on an existing noise level with 3 decibel addition adjacent to State Highways allowing for future traffic increase; and*~~

iii. *Any* ***new or altered habitable room and/or space used for sleeping*** ~~*building*~~ ***within 20m of the edge of the carriageway*** *must be designed, constructed and maintained to achieve vibration limits not exceeding 0.3mm/s (Class C criterion Maximum Weighted Velocity, Vw,95);*

c. ~~*4*~~***10****0m of the edge of the tracks of a railway line where*~~***:***~~

~~*i. A*~~***a****ny* ***new or altered*** *habitable room used for a sensitive activity* ***and/or spaced used for sleeping:***

i. *must be designed and constructed to achieve a maximum internal noise* ~~*limit*~~ ***level*** *of 35 dB$_{LAeq}$ (1h);*~~

~~*ii. Compliance with i. above must be achieved based on an assumption of 70 dB$_{LAeq}$ (1h) at a distance of 12m from the railway track and shall be deemed to reduce at a rate of 3 dB per doubling of distance up to 40m;*~~ ***or***

~~*iii.*~~ ***is at least 50 metres from any railway network, and is designed so that a noise barrier completely blocks line-of-sight from all parts of doors and windows to all points 3.8 metres above railway tracks***

cx. 60m of the edge of the tracks of a railway line where any new or altered habitable room and/or space used for sleeping

~~*iv. Any building must be designed, constructed and maintained to achieve vibration limits not exceeding 0.3mm/s (Class C criterion Maximum Weighted Velocity, Vw,95);*~~

d. *The 50 dB*~~***A*** *Noise Contour boundary of Franz Josef Heliport or the 55 dB****A*** *Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome or* ***Haast Airfield****; where:*

i. *Any* ***new or altered*** *habitable room* ***and/or space used for sleeping*** *must be designed and constructed to achieve a* ~~*minimum*~~ ***maximum*** *indoor design noise level of 40 dB Ldn;*

e. *Any CMUZ - Commercial and Mixed Use Zone, INZ - Industrial Zone or AIRPZ - Airport Zone, PORTZ - Port Zone, STADZ - Stadium Zone, HOSZ - Hospital Zone, BCZ - Buller Coalfield Zone or MINZ - Mineral Extraction Zone; where*

i. *The building is designed and constructed to ensure that the following indoor design noise levels are not exceeded:*

a. ***40~~35~~*** *dB_{LAeq} inside* ***any habitable room*** ***~~bedrooms~~****;*

b. ***35~~40~~*** *dB_{LAeq} inside* ***~~any other habitable room, except for~~*** *bedrooms* ***between 10pm and 7am****; and*

ex. ~~The Rifle Range Protection Area~~ Between the 55 dB_{LAFmax} and 60 dB_{LAFmax} contours of the Westport Rifle Range Noise overlay shown on the planning maps:

i. Any habitable room used for a sensitive activity and/or space used for sleeping must be designed and constructed to achieve a maximum internal noise level of 35 dB_{LAFmax} from outdoor noise associated with lawfully established activities at the Westport Rifle Range; and

ii. outdoor living area not less than 30m^2 must be screened from the Rifle Range to achieve an outdoor noise level not exceeding 50 dB_{LAFmax}.

f. Where windows need to be closed to achieve the internal noise levels specified in a. to ***~~e~~ex****. above an alternative ventilation system shall be provided which achieves the following requirements:*

i. Satisfies clause G4 of the New Zealand Building Code;

ii. Is adjustable by the occupant to control the ventilation rate in increments up to a high air flow setting that provides at least 6 air changes per hour; and

iii. Provides relief for equivalent volumes of spill air; and

iv. Provides cooling and heating that is controllable by the occupant and can maintain the inside temperature between 18oC and 25oC; and

v. Does not generate more than 35 dB_{LAeq}(30s) when measured ***at least*** *1m away from any grille or diffuser.*

Advice Note:

1. *Compliance with Rule NOISE - R3 will be achieved if, prior to the construction of any building containing a* ***new or altered*** *habitable room* ***and/or space used for sleeping****, an acoustic design certificate from a suitably qualified acoustic engineer is provided to the relevant district council stating that the design will achieve compliance with the relevant standard. The building shall be designed, constructed and maintained in accordance with the design certificate; or.*

2. For Rule R3 1 a i) or Rule R3 1 c i) compliance will be achieved if the construction conforms to the acceptable solutions listed in NOISE-APP1-Acceptable constructions requirement, Part A and meets the ventilation requirements of Rule R3.1.f; or

3. *For Rule R3 1 a iii) or Rule R3 1 c iii) compliance will be achieved if the construction conforms to the acceptable solutions listed in NOISE-APP1-Acceptable constructions requirement, Part B* ***and meets the ventilation requirements of Rule R3.1.f*** *.*

It is recommended that a new appendix be added as follows:

Appendix X – Acceptable Construction Design for Acoustic Insulation Requirements for New Buildings for Use by a Sensitive Activity Subject to Noise R39

Part A: Approved construction requirements for compliance with Noise-R3 1 a i) and Noise-R3 1 c i)

Applicability	

	Construction requirements detailed in this appendix are only applicable where: ***1. The building containing the sensitive activity is located with the State Highway Noise Control Boundary Overlay shown on the planning maps or is within 60m of an Existing Rail Corridor,*** ***2. The building is a single level construction,*** ***3. The floor of the building is a reinforced concrete slab,*** ***4. No habitable room of the building is located less than 4.5 metres from the road boundary,*** ***5. The total area of glazing in any habitable room is no greater than 20% of the total area of external walls of that room.*** ***6. The roof of the building is a standard timber truss design, with a pitch of not less than 15 degrees. Ventilation of the roof space must only be via casual ventilation typical of the jointing, capping and guttering detail used in normal construction.*** ***In all other situations, a design report from a suitably qualified acoustics specialist is required.***
Construction Options	
Exterior Walls Option 1	***Exterior cladding of Aerated Concrete or similar, with a surface mass not less than 27 kg/m^2.*** • ***Timber framing of not less than 90 mm, with studs at 600 mm centres. A ventilated cavity is not required under this option but is permissible, with or without a rigid air barrier,*** • ***Fibrous insulation of minimum R2.6. This includes fibreglass, polyester and wool, but did not include polystyrene or other foam sheet insulation products,*** • ***1 layer of 10 mm thick Standard Gib board or alternative gypsum board having a surface mass not less than 6 kg/m2***
Exterior Walls Option 2	***Exterior cladding of Profiled sheet metal not less than 0.45 mm thick.*** • ***20 mm thick battens forming a ventilated cavity,*** • ***Rigid air barrier consisting of Plywood not less than 9 mm thick or Fibre Cement not less than 4 mm thick, or alternative sheet product having a surface mass not less than 5 kg/m^2.*** • ***Timber framing of not less than 90 mm, with studs at 600 mm centres,*** • ***Fibrous insulation of minimum R2.6. This includes fibreglass, polyester and wool, but did not include polystyrene or other foam sheet insulation products,*** • ***1 layer of 10 mm thick Standard Gib board or alternative gypsum board, having a surface mass not less than 6 kg/m^2,***
Applicability	

Exterior Walls Option 3	***Exterior cladding of Fibre Cement weatherboards, with a surface mass not less than 18 kg/m2 (Hardies Linea or equivalent)*** • ***20 mm thick battens forming a ventilated cavity,*** • ***Rigid air barrier consisting of Plywood not less than 7 mm thick or Fibre Cement not less than 4 mm thick, or alternative sheet product having a surface mass not less than 3.8 kg/m2.*** • ***Timber framing of not less than 90 mm, with studs at 600 mm centres,*** • ***Fibrous insulation of minimum R2.6. This includes fibreglass, polyester and wool, but did not include polystyrene or other foam sheet insulation products,*** • ***1 layer of 10 mm thick Standard Gib board or alternative gypsum board, having a surface mass not less than 6 kg/m^2,***
Glazing and Exterior doors - All options	• ***Windows to consist of double glazing consisting of a minimum of 2 layers of 4 mm thick glass separated by a 12 mm airgap, with airtight seals,*** • ***External doors to be either double glazed to the same standard as windows, or be a solid timber construction with a surface mass not less than 24 kg/m^2 and incorporating full perimeter seals.***
Roof – All Options	• ***Profiles metal roofing not less than 0.45 mm thick profiled steel or tiles,*** • ***Fibrous insulation of minimum R6. This includes fibreglass, polyester and wool, but did not include polystyrene or other foam sheet insulation products,*** • ***2 layers of 10 mm Standard Gib board or alternative gypsum board, with each layer having a surface mass not less than 6 kg/m^2.***

Part B: Approved construction requirements for compliance with Noise-R3 1 a iii) and Noise-R3 1 c iii)

Any new buildings or alterations to existing buildings containing a sensitive activity, closer than 60 metres to the boundary of an Existing Rail Corridor and is a single storey framed building with:

a. a constant level floor slab on a full-surface vibration isolation bearing with natural frequency not exceeding 10 Hz, installed in accordance with the supplier's instructions and recommendations: and

b. vibration isolation separating the sides of the floor slab from the ground; and

c. no rigid connections between the building and the ground In all other situations, a design report from a suitably qualified specialist is required demonstrating Compliance with Rule R3 1 c iii).

NOISE - R4 Emission of Noise for Temporary Military Training Activities

220. Ms Evans acknowledged the support from NZDF (S519.028) and BDC (S538.334) to retain the rule as notified. However, she noted her recommended amendments that arise from other submission points.

221. Te Mana Ora (S190.538) sought the replacement of '*C*' with '*LCpeak*.' Ms Evans supported this because Mr Peakall confirmed '*LCpeak*' was the correct reference.

222. Ms Evans supported the correction of a typographical error to change 1.250m to 1.250km in response to the Westport Rifle Club (457.010) and the Westport Pistol Club (S336.011).

NOISE - R5 to NOISE – R8 and NOISE-R11

223. Ms Evans included an additional 'introduction' section outlining the proposed changes to the rules listed above. She noted that these rules effectively managed the same issue of noise limits but in different zones and considered these as a whole – setting out general issues with the rules and a recommended approach across the district.

224. Ms Evans noted the differences in the rule headings such as the use of '*generated*' and providing limits for where the noise was '*received*' had caused confusion for some submitters. She also noted there was a range of different hours for day/night time noise limits in different zones. She also noted the provisions were inconsistent in relation to noise limits at the receiving site - depending on where the noise was generated.

225. Ms Evans noted that submissions varied in support and opposition but she considered that there was opportunity to improve clarity by consolidating and simplifying the approach, and to better achieve the NOISE objectives. To address this, she supported Mr Peakall's recommendation that rules NOISE-R5 to NOISE-R8 and R11 were replaced by one overall general noise rule based his rule table for different zones (new Rule NOISE-RX). Ms Evans considered this would simplify and streamline the rules.

226. In the Addendum Report, Mr Peakall accepted the proposals put forward by Dr Chiles for Te Mana Ora with respect to some NOISE-RX drafting issues. Mr Peakall disagreed with Dr Chiles' suggestion to remove the exemption for unplanned engine testing, as he noted this was necessary for an airport and testing was infrequent. He considered a definition for '*aircraft operation*', as proposed by Dr Chiles, was unnecessary. He also considered providing for different noise limits in the evening period was not needed and noted that conversely, several submitters had sought more relaxed noise limits.

227. In response to the evidence of Mr Hegley for WMS Group *et. al.*, Mr Peakall suggested a balance was required between protecting sensitive activities and allowing noise generating activities to occur. He therefore disagreed with Mr Hegley's request for more relaxed weekend and night-time limits. He noted the drafting error in NOISE-RX picked up by Mr Hegley had already been addressed in response to Dr Chiles' evidence. Mr Peakall did not consider the fundamental intent of the Mineral Extraction Zone noise rules had fundamentally been altered in new Rule NOISE-RX, as suggested by Mr Hegley.

228. Ms Evans acknowledged the concerns raised in three submission points and two further submission points, that there may be potential for constraint on extractive industries due to the new Rule NOISE-RX focus on protection of amenity. She noted she would liaise with the s42A Report author for the Mineral Extraction Chapter hearing and update this matter at the hearing.

229. Ms Evans agreed that the current wording in relation to '*notional boundary'* was unclear and supported addressing this in the recommended wording for new Rule NOISE-RX. She also supported Te Mana Ora's request to refer to the *'maximum noise level*', which was supported by Mr Peakall, and considered this would improve clarity.

230. Appendix 1 of the Addendum Report showed NOISE-R5 to NOISE-R8 and NOISE-R11 deleted and recommended adding new Rule NOISE-RX as follows:

NOISE-RX

Activity Status Permitted

Activity status where compliance not achieved: Restricted Discretionary

Where:

1. Noise from any activity shall not exceed the following noise limits at any point at or within the boundary of any site within any of the following zones:

Zone	***Maximum Noise Limit***		
	Daytime (Monday–Friday) 7:00am-10:00pm	***Saturday, Sundays and Public Holidays 7:00 am –10:00pm***	***Night-time 10:00pm-7:00am***
RESZ Residential Zone ***SETZ Settlement Zone*** ***GRUZ General Rural Zone*** ***RLZ Rural Lifestyle Zone*** ***MPZ Māori Purpose Zone*** ***HOSZ Hospital Zone*** ***OSZ Open Space Zone*** ***NOSZ Natural Open Space Zone*** ***SVZ Scenic Visitor Zone*** ***FUZ Future Urban Zone***	***55 dB L_{Aeq}***	***50 dB L_{Aeq}***	***45 dB L_{Aeq}*** ***70 dB L_{AFmax}***

2. Noise from any activity shall not exceed the following noise limits at any point at the notional boundary of any site within any of the following zones:

Zone	***Maximum Noise Limit***		
	Daytime (Monday–Friday) 7:00am-10:00pm	***Saturday, Sundays and Public Holidays 7:00 am –10:00pm***	***Night-time 10:00pm-7:00am***

GRUZ General Rural Zone ***RLZ Rural Lifestyle Zone***	***55 dB L_{Aeq}***	***50 dB L_{Aeq}***	***45 dB L_{Aeq}*** ***70 dB L_{AFmax}***

3. The maximum noise from any activity shall not exceed the following noise limits at any point at or within the boundary of any site within any following zones:

Zone	***Maximum Noise Limit***		
	Daytime ***(Monday–Friday)*** ***7:00am-10:00pm***	***Saturday, Sundays and Public Holidays 7:00 am –10:00pm***	***Night-time 10:00pm-7:00am***
SARZ Sport and Recreation Zone ~~***PORTZ Port Zone***~~ ***AIRPZ Airport Zone*** ***CMUZ Commercial and Mixed Use Zones*** ***STADZ Stadium Zone*** ***LIZ Light Industrial Zone***	***60 dB L_{Aeq}***	***55 dB L_{Aeq}***	***50 dB L_{Aeq}*** ***75 dB L_{AFmax}***
GIZ General Industrial Zone ***PORTZ Port Zone*** ~~***BCZ Buller Coalfield Zone***~~ ~~***MINZ Mineral Extraction Zone***~~	***65 dB L_{Aeq}***	***65 dB L_{Aeq}***	***65 dB L_{Aeq}***

4. Noise from any activity shall not exceed the following noise limits at any point at the notional boundary of any sensitive activity within any of the following zones:

Zone	***Maximum Noise Limit***		
	Daytime ***(Monday–Friday)*** ***7:00am-10:00pm***	***Saturday, Sundays and Public Holidays 7:00 am –10:00pm***	***Night-time 10:00pm-7:00am***

~~***SARZ Sport and Recreation Zone***~~ ~~***AIRPZ Airport Zone***~~ ~~***CMUZ Commercial and Mixed Use Zones***~~ ~~***STADZ Stadium Zone***~~ ~~***LIZ Light Industrial Zone***~~ ~~***GIZ General Industrial Zone***~~ ~~***PORTZ Port Zone***~~ ***BCZ Buller Coalfield Zone*** ***MINZ Mineral Extraction Zone***	***55 dB L_{Aeq}***	***55 dB L_{Aeq}***	***45 dB L_{Aeq}*** ***75 dB L_{AFmax}***

NOISE - R5 Emission of Noise in the RESZ - Residential Zones, SETZ - Settlement Zone and NOSZ - Natural Open Space Zone

231. Te Mana Ora (S190.540) sought to restructure all zone limits to relate to the site receiving noise, the reformatting of day/time definitions to follow NZS 6802:2008, and if not restricted, replacement of '*another site in the RESZ, SETZ and NOSZ*' with '*within the notional boundary of any sensitive activity within any site receiving noise*.' Ms Evans recommended this submission point was accepted based on the advice of Mr Peakall that the noise limits had been restructured and simplified in new Rule NOISE-RX.

232. In response to a request from Scott Freeman (S383.002) to include the rural-lifestyle zone in NOISE-R5, Ms Evans supported Mr Peakall's advice that this point be rejected because the rural lifestyle zone was recommended to be included in a lower noise environment.

233. In response to submission points[39] which sought to amend timeframes to be more enabling, Ms Evans noted that the submission points were accepted in part because the proposed simplified approach had resulted in an extension of daytime hours.

234. Nineteen submission points[40] sought to better enable quarrying operations, either by mitigating reverse sensitivity effects, excluding consented quarrying activities, enabling quarry operations or deleting NOISE-R5. Ms Evans did not support these requests on the basis that the limits applied depended on the receiving environment. She noted Mr Peakall considered the recommended limits were the minimum standards he supported to protect peoples' health, safety and wellbeing.

235. In response to BDC's (S538.335) request to replace '*another*' with '*any other*,' and extend the noise timeframes to 10:00pm, Ms Evans accepted this submission. This was on the basis that Mr Peakall has recommended the daytime limit was extended to 10:00pm and clarification that noise limits apply in the receiving environment.

236. Two submission points (S353.003 and S462.033) sought that permitted activities were restricted to 45 dB L_{Aeq} or that noise limits of 45 dB L_{Aeq} were not exceeded at residential properties. Ms Evans rejected these submissions on the basis of Mr Peakall's technical advice,

[39] Chris & Jan Coll (S566.326), Chris J Coll Surveying Limited (S566.326), Laura Coll McLaughlin (S474.326) and William McLaughlin (S567.387)
[40] Avery Brothers (S609.062 and S609.070), Bradshaw Farms (S511.070), Leonie Avery (S507.070), Jared Avery (S508.070), Kyle Avery (S509.070), Paul Avery (S512.070), Brett Avery (S513.070), Geoff Volckman (S563.093 and S563.094), Catherine Smart Simpson (S564.105, S564.108 and S564.109), Karamea Lime Company (S614.134 and S614.135), Peter Langford (S615.134 and S615.135) Koiterangi Lime Co. Ltd (S577.085 and S577.088)

which considered a balance was required between the ability to generate noise and protection from unreasonable noise.

237. Ms Evans recommended that NOISE-R5 was deleted and replaced with new Rule NOISE-RX.

NOISE-R6 Emission of Noise in the GRUZ - General Rural Zone, RLZ - Rural Lifestyle Zone, MPZ - Māori Purpose Zone, FUZ - Future Urban Zone, SARZ - Sport and Recreation Zone and OSZ - Open Space Zone

238. Three submission points[41] sought lower noise limits and/or shorter daytime hours, and one submission point also sought that noise be measured from property boundaries rather than notional boundaries. Ms Evans did not support lower noise limits or shorter day time hours based on Mr Peakall's advice that balance was required between the ability to generate noise and the overall protection from unreasonable noise. However, she recommended the approach of measuring noise from the property boundary for all zones except General Rural and Rural Lifestyle, so that part of the submissions was accepted.

239. Te Mana Ora (S190.542) sought to restructure of all zone noise limits to relate to sites receiving noise. Ms Evans accepted this submission and noted new Rule NOISE-RX adopted this approach, as advised by Mr Peakall.

240. Scott Freeman (S383.001) sought that noise in the rural lifestyle zone be measured at any point in the site (as per the residential and settlement zones) rather than the notional boundary. Ms Evans rejected this submission based on Mr Peakall's recommendation that these zones enable rural activities and should be treated in the same manner with respect to the noise receiving environment.

241. Six submission points[42] sought to have the Monday-Friday daytime limits applied across the weekend and public holidays in the GRUZ to allow the same limits all week. Ms Evans relied on Mr Peakall's expert opinion that lower limit in weekends and public holidays in the General Rural Zone was appropriate to allow for some respite. Mr Peakall advised that the noise limits he supported were a minimum for protection. Ms Evans accepted this advice and considered the surrounding environment was more sensitive in weekend hours. On this basis, she rejected these submission points.

242. Hort NZ (S486.087) sought that the noise rules did not curtail rural productivity, provided noise standards of at least 55 dB L_{Aeq} to enable a '*normal rural environment',* and include an exemption for rural production activities, such as frost fans. Ms Evans noted that NOISE-R2 provided such an exemption. She noted Mr Peakall has recommended a daytime limit of 55 dB L_{Aeq} and therefore considered the relief sought was generally met.

243. One submission point (S522.006) opposed NOISE-R6 and sought to retain the noise limits in the operative Westland District Plan. Ms Evans did not support this submission because she considered the recommended provisions reflected the Planning Standard requirements and zoning, ensured consistency, and were supported by technical analysis.

244. BDC (S538.336) sought the deletion of '*at any point*' and '*receiving noise*' and sought the addition of '*other*.' Ms Evans considers the new Rule NOISE-RX met the intent of this relief sought.

[41] Deb Langridge (S252.004), Sharon Langridge (S388.006)
[42] Rocky Mining Limited (S474.050), TiGa Minerals and Metals Limited (S493.088), WMS Group (S599.095), Birchfield Coal Mines Ltd (601.074), Papahaua Resources Ltd (S500.034), Horticulture NZ (S486.060)

245. Four submission points[43] sought timeframes to be more enabling of noise generating activities. Ms Evans noted that the timeframes were recommended to be simplified, and in some cases, this had extended daytime hours. She therefore accepted these submission points in part.

246. Ten submission points[44] sought to better enable quarrying operations, either by mitigating reverse sensitivity effects, enabling quarry operations or deleting time restrictions. Ms Evans noted that the rules applied limits depending on the receiving environment. She considered the submitters had not provided evidence to confirm risks from noise, or specific drafting. For these reasons, and based on Mr Peakall's advice, the submissions were not supported.

247. Ms Evans recommended that NOISE-R6 be deleted and replaced with new Rule NOISE-RX.

NOISE - R7 Emission of Noise in all CMUZ - Commercial and Mixed Use Zones, HOSZ - Hospital Zone, STADZ - Stadium Zone and SETZ - PREC2 - Settlement Zone - Settlement Centre Precinct

248. Te Mana Ora (S190.542) sought to restructure all zone noise limits to relate to sites receiving noise. Ms Evans accepted this submission and noted new Rule NOISE-RX adopted this approach.

249. BDC (S538.337) sought the replacement of '*at*' with '*within*', the addition of *'other'*, and the deletion of '*receiving noise*.' While this rule was proposed to be deleted, Ms Evans considered new Rule NOISE-RX clarified these terms and therefore this submission point was accepted in part.

250. Ms Evans recommended that NOISE-R7 was deleted and replaced with new Rule NOISE-RX.

NOISE - R8 Emission of Noise within the GIZ - General Industrial and LIZ - Light Industrial Zone

251. Ms Evans noted the support from KiwiRail (S442.007) for NOISE-R8 as notified and the request (S442.008) to add a definition for *'noise sensitive activity'*, which was addressed above.

252. Te Mana Ora (S190.543) sought to restructure all zone noise limits to relate to sites receiving noise. Ms Evans accepted this submission and noted new Rule NOISE-RX adopted this approach.

253. In response to the request from Sharon Langridge (S388.007) that sought that notional boundary be replaced with property boundary, Ms Evans noted that this was reflected in new Rule NOISE-RX and therefore this submission point was accepted.

254. SFF (S441.042) sought to include a commensurate permitted noise level to that specified in Table 5.1 in the Westland District Plan is provided. Mr Peakall noted that this operative rule used an outdated metric and therefore this submission point was not supported by Ms Evans.

255. BDC (S538.338) sought the replacement of '*at*' with '*within*', the addition of '*other*', and the deletion of '*receiving noise*.' While this rule was proposed to be deleted, Ms Evans considered new Rule NOISE-RX clarified these terms and therefore this submission point was accepted in part.

[43] Chris & Jan Coll (S566.327), Chris J Coll Surveying Limited (S566.327), Laura Coll McLaughlin (S474.388) and William McLaughlin (S567.388)
[44] Geoff Volckman (S563.095), Catherine Smart Simpson (S564.106 and S564.110), WMS Group (S599.095), Karamea Lime Company (S614.136 and S614.138), Peter Langford (S615.136 and S615.138) Koiterangi Lime Co. Ltd (S577.086 and S577.089)

256. Ms Evans recommended that NOISE-R8 was deleted and replaced with new Rule NOISE-RX.

NOISE - R9 Emission of Noise within the PORTZ - Port Zone

257. Ms Evans acknowledged the support from BDC (S538.339) and WMS Group (S599.096) that sought to retain the rule as notified. However, she noted her recommended amendments in response to other submission points.

258. Ms Evans accepted the request from Te Mana Ora (S190.544) to add a new clause to require use of a Port Noise Management Plan to implement NZS 6809 because this was supported by Mr Peakall. Ms Evans recommended minor amendment to replacing '*updated*' with '*reviewed*'. She also recommended adding '*from Port Activities'* to the heading and '*port*' to clause (1) as a consequential amendment to adding new Rule NOISE-RX for clarity.

259. Appendix 1 of the Addendum Report recommended amending NOISE-R9 as follows:

> ***NOISE-R9*** *Emission of Noise* ***from Port Activities*** *within the PORTZ - Port Zone*
>
> *Activity Status Permitted*
>
> *Where:*
>
> *1. The maximum noise generated from* ***port*** *activities is in accordance with the limits, control boundaries and methods of measurement as outlined in NZS 6809: 1999 Acoustics Port Noise Management and Land Use Planning.*
>
> ***2. All activities are conducted in accordance with a Port Noise Management Plan that is reviewed annually, sets out the details of how NZS 6809 is being implemented, and is publicly available on the port operator's website.***

NOISE - R10 Emission of Noise within the AIRPZ - Airport Zone

260. Ms Evans acknowledged the support from submitters[45] that sought to retain the rule as notified. However, she noted her recommended amendments in response to other submission points.

261. Ms Evans accepted in part the requests from Te Mana Ora (S190.544) to include further limiting maximum noise limits associated with aircraft engine testing, for noise emissions to be measured from the notional boundary of any sensitive activity, for LAeq measurements to be amended to 15 minutes (rather than hours), inclusion of other airports/Aerodromes, and the inclusion of a new clause requiring use of a Noise Management Plan to implement NZS 6805 or NZS 6807. However, she recommended replacing '*updated*' with '*reviewed*', similar to the port noise amendment above.

262. Mr Peakall noted that for areas inside the noise boundaries in the Rural Zone, he would normally recommend prohibition of new residential activities. However, this suggestion was not reflected by Ms Evans in the noise s42A Report.

263. Appendix 1 of the Addendum Report showed recommended amendments to NOISE-R9 as follows:

> ***NOISE-R10*** *Emission of Noise within the AIRPZ – Airport Zone*
>
> *Activity Status Permitted*

[45] Totally Tourism Limited (S449.006), New Zealand Defence Forse (S519.029), Buller District Council (S538.340)

Where:

1. *Noise from aircraft operations at Hokitika and Westport Airports and Greymouth**, Haast** and Karamea Aerodromes must be measured and assessed in accordance with NZS 6805: 1992 Airport Noise Management and Land Use Planning;*
2. *Noise from helicopter operations at Franz Josef Heliport must be measured and assessed in accordance with NZS 6807: 1994 Noise Management and Land Use Planning for Helicopter Landing Areas;*

2X. Noise from essential unplanned engine testing for scheduled passenger services is exempt from NOISE-R10.1 above.

2Y. Noise from all other engine testing shall comply with the noise limits set out in NOISE-RX.

~~***3. The maximum noise levels from aircraft engine testing at any point within the boundary of a site within a RESZ - Residential Zone, MPZ - Māori Purpose Zone or RURZ - Rural Zone shall not exceed: a. on any day 7.00am to 10.00pm exceed 55 dB LAeq (15 hour) b. on any day 10.00pm to 7.00am not exceed 45 dB LAeq (9 hours) and 75 dB LAmax; and***~~

4. *The maximum noise generated from aircraft operations at Hokitika **and Westport** Airport**s and Greymouth, Haast Airfield and Karamea Aerodrome** over any 90 continuous days shall not exceed:*
   a. *55 dB_{Ldn} at or beyond the noise contour boundary shown on the planning maps; and*
5. *The maximum noise generated from helicopter operations at Franz Josef Heliport over any 7 continuous days, shall not exceed:*
   a. *50 dB_{Ldn} at or beyond the noise contour boundary shown on the planning maps; and*
6. *Standards 4 and 5 above do not apply to:*
   a. *Aircraft landing or taking off in an emergency; and*
   b. *Emergency flights required to rescue persons from life threatening situations or to transport patients, human organs or medical personnel in medical emergency situations; and*
   c. *Aircraft undertaking firefighting duties; and*
   d. *Military aircraft movements; and*
   e. *Aircraft using the Hokitika Airport in preparation for and participation in air shows.*

~~*7. In order to audit compliance with this rule, noise level monitoring must be carried out for a minimum of three months every five years with the resulting report forwarded to the Council within one month of that monitoring being completed.*~~

7. All activities are conducted in accordance with a Noise Management Plan that is reviewed annually, sets out details of how NZS 6805 or NZS 6807 is being implemented, and is publicly available on the facility operator's website.

NOISE - R11 Emission of Noise within the BCZ - Buller Coalfield Zone and MEZ - Mineral Extraction Zone

264. Ms Evans acknowledged the support from submitters[46] that sought to retain the rule as notified.

265. Te Mana Ora (S190.546) sought the restructure of all zone noise limits to relate to sites receiving noise. Ms Evans accepted this submission and noted new Rule NOISE-RX adopted this approach.

266. One submission point (S252.003) sought lower noise limits, shorter daytime hours, and that noise be recorded from the property boundary rather than the notional boundary. Another

[46] TiGa Minerals and Metals Limited (S493.089), WMS Group (S599.097), Birchfield Coal Mines Ltd (601.075)

submission point (S388.005) also sought that noise be measured from the property boundary rather than the notional boundary. Ms Evans supported these in part because new Rule NOISE-RX referred to the boundary (rather than notional boundary) and only included the notional boundary measurement for two rural zones. She noted Mr Peakall's evidence that rural zones were noisier in nature and that a higher noise limit was appropriate.

267. In response to the several amendments requested by BDC (S538.341) to clarify that the noise limits apply at another site's notional boundary and not from the dwelling/activity/same site as the noise is being generated, Ms Evans considered recommended new Rule NOISE-RX address these points. She therefore accepted the submission point.

268. Four submission points[47] sought timeframes to be more enabling of noise generating activities. Ms Evans noted that the timeframes were recommended to be simplified, and in some cases, this had extended daytime hours. She therefore recommended the submission points were accepted in part.

269. In response to submission points[48] that sought the amendment of an error, Ms Evans noted that the typographical error was corrected in new Rule NOISE-RX.

270. Fourteen submission points[49] sought to better enable quarrying operations, either by mitigating reverse sensitivity effects, enabling quarry operations or deleting time restrictions. Ms Evans noted that the rules applied limits that depended on the receiving environment. She considered the submitters had not provided evidence to confirm risks from noise, or specific drafting. For these reasons, and based on Mr Peakall's advice, the submissions were not supported.

271. Ms Evans recommended that NOISE-R6 was deleted and replaced with new Rule NOISE-RX.

NOISE-R12 Emission of Noise not meeting Permitted Activity Standards

272. Ms Evans acknowledged the submitters[50] that supported the rule as notified.

273. In response to Margaret Montgomery's (S446.081) request to clarity how noise effects on wildlife and habitat would be assessed, Ms Evans noted that the noise provisions did not provide for this assessment. However, she invited the submitter to provide further evidence on this matter at the hearing.

274. Ms Evans accepted the three submission points[51] that sought to delete clause (g) because it was a duplication of another matter of discretion.

275. Ms Evans also accepted the submission point from Westpower (S547.490) to add a new clause but considered this should use '*functional nee*d' and '*operational need',* which were defined in the Plan and encompassed the matters suggested.

[47] Chris & Jan Coll (S566.328), Chris J Coll Surveying Limited (S566.328), Laura Coll McLaughlin (S474.328) and William McLaughlin (S567.389)
[48] Geoff Volckman (S563.099), Catherine Smart Simpson (S564.112), Karamea Lime Company (S614.140), Peter Langford (S615.140) Koiterangi Lime Co. Ltd (S577.091), Chris & Jan Coll (S566.330), Chris J Coll Surveying Limited (S566.330), Laura Coll McLaughlin (S474.330) and William McLaughlin (S567.390)
[49] Geoff Volckman (S563.097 and S563.098), Catherine Smart Simpson (S564.111 and S564.107), Karamea Lime Company (S614.137 and S614.139), Peter Langford (S615.137 and S615.139) Koiterangi Lime Co. Ltd (S577.087 and S577.090), Chris & Jan Coll (S566.328), Chris J Coll Surveying Limited (S566.328), Laura Coll McLaughlin (S474.328) and William McLaughlin (S567.389)
[50] Te Mana Ora (S190.547), Chris & Jan Coll (S566.331), Chris J Coll Surveying Limited (S566.331), Laura Coll McLaughlin (S474.331) and William McLaughlin (S567.391)
[51] Waka Kotahi NZTA (S450.172), Frida Inta (S553.156), Buller Conservation Group (S552.156)

276. Appendix 1 of the Addendum Report showed recommended amendments to NOISE-R12 as follows:

NOISE-R12 Emission of Noise not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Activity status where compliance not achieved: N/A

Discretion is restricted to:

a. Effects on the health and wellbeing of people;
b. Ambient noise levels and any special character noise from any existing activities, the nature and character of any changes to the sound received at any receiving site and the degree to which such sounds are compatible with the surrounding activities;
c. The level, hours of operation, duration and nature of the noise;
d. The primary purpose and the frequency of use of the activity;
e. Proximity and nature of nearby activities and the adverse effects they may experience from the noise;
f. Effects on character and amenity values on the surrounding environment; and
g. ~~Effects on the health and wellbeing of people;~~
h. Effects on wildlife and habitat values;
i. The temporary or permanent nature of any adverse effects;
j. Any noise reduction measures;.
*k. **The functional need and/or operational need of the activity.***

NOISE-R13 New Buildings for Use by a Sensitive Activity and Additions to Existing Buildings for Use by a Sensitive Activity not meeting Acoustic Insulation Requirements of Rule NOISE - R3

277. Ms Evans acknowledged Te Mana Ora (S190.548) supported the rule as notified.

278. In response to five submission points that sought the deletion of NOISE-R13, Ms Evans considered the rule was required to establish a rule cascade from NOISE-R3. She therefore recommended it was retained as notified.

279. In the Addendum Report, in response to the evidence of Ms McKenzie (on behalf of the Westport Pistol Club, Chris Hartigan and the Westport Rifle Club), Ms Evans supported the inclusion of a rule for sensitive activities within the 60dB contour as a consequential amendment to adding the Rifle Range Noise Contour. She noted this was supported by Mr Peakall.

280. Appendix 1 of the Addendum Report showed recommended new rule NOISE-R13A as follows:

NOISE-13A New Buildings for Use by a Sensitive Activity and Additions to Existing Buildings for Use by a Sensitive Activity within the 60 dB L_{AFmax} contour of the Westport Rifle Range Noise Overlay

Activity Status Restricted Discretionary

Discretion is restricted to:

a. The provision of a report from an acoustic specialist which provides evidence that the level of acoustic insulation is appropriate to ensure the amenity of present and future residents of the site; and

b. <u>The impact of any sensitive activity that did not provide the required acoustic insulation on the ability of lawfully established activities at the Westport Rifle Range to operate without undue constraint.</u>

<u>Hearing and Submitter Evidence/Statements</u>

NOISE-R1 General Standards

281. Dr Chiles, for Te Mana Ora, noted that the references in NOISE-R1 did not explicitly recognise the fundamental difference between general environmental noise standards and other standards that might operate alone. He also noted that there was a significant anomaly in NOISE-R1(3) with the inclusion of *'mobile noise sources*,' which set limits at a source rather than as measurement and assessment standards as in other parts of NOISE-R1. He considered this represented a loophole and recommended all reference to this term should be removed.

282. Mr Richard Milner provided a statement on behalf of the New Zealand Helicopter Association (**NZHA**). He requested clarification that a helicopter landing area referred to in NOISE-R1(5) included a permanent base for operations and not sites where helicopters take off or land in temporary or infrequent activity. He also requested that Council gives relief to operators with documented noise abatement training. His key concern was on ensuring the rules were not too restrictive and have unintended consequences on the wide range of uses of commercial helicopter aviation, including disaster relief.

NOISE-R2: Emissions of Noise in All Zones

283. Mr Tony Michelle provided a statement and supplementary statement for NZAAA. Mr Michelle did not support Mr Peakall's recommendation to delete the word *'infrequent'* from NOISE-R2(12). He considered terms such as '*frequent*' were appropriate given the term *'intermittent'* was used in the NZ Standards. He did not support Mr Peakall's amendment to NOISE-R2(12) to include '*for no more than 30 days in a 12 month period'* because he considered the measure of a day was imprecise. He noted the s42A Report recommended including '*intermittent*' in definition of '*agricultural aviation activities*' in the Rural Zone Chapter. Mr Michelle proposed revised wording for NOISE-R2(12) as follows:

12. 'Infrequent aircraft take-off and landing associated with rural production activities and conservation activities purposes on an intermittent basis.'

284. The WCRC statement proposed revised wording for NOISE-R2(12) as follows:

*12. ~~Infrequent a~~Aircraft **<u>take off and</u>** landing **~~for~~** **<u>associated with</u>** rural production **<u>activities and conservation activities</u>** ~~purposes on an intermittent basis~~ **<u>for no more than 30 days in any 12 month period</u>**, including ~~aerial topdressing and~~ helicopter movements;*

285. The statement from WCRC supported the recommended changes to NOISE-R2(12), on the basis that the definition for *'conservation activities'* includes '*pest control and the intermittent use of aircraft for conservation purposes'.* The WCRC did not support the addition *'for no more than 30 days in any 12 month period*' because this may not suitably provide for aerial operations.

286. Dr Chiles, for Te Mana Ora, recommended that NOISE-R2(12) was deleted to adequately manage noise effects from aircraft. He has also recommended the exemption in NOISE-R2(13) be deleted, or if not, all affected aircraft be subject to a noise limit of ~67 dB L_{ASmax}, measured at 25 metres in accordance with ISO 2922 or ISO 14509-1.

287. Ms Inta, on behalf of the Buller Conservation Group and herself, noted a misspelling of '*manufacturers*' in NOISE-R2. She requested that the word '*intermittent*' be retained in the rule to ensure the ability to complain about continuous noisy activities was not reduced. She has also requested that noisy daycare centres should be exempt from the noise rules because she considered there should be tolerance for these.

NOISE-R3 Acoustic Insulation Requirements for New Buildings for Use by a Sensitive Activity

288. The evidence for KiwiRail from Ms Heppelthwaite, Ms Grinlinton-Hancock and Dr Chiles supported the request for a 100-metre noise control boundary for all rail lines. Ms Heppelthwaite also sought the following (supported by Ms Grinlinton-Hancock):

> *a. a 100 metre Noise and Vibration Alert Overlay (NVA) for the Hokitika and Rapahoe lines; and*
> *b. retention of the (notified/S42A recommended) 60 metre vibration control for all other rail lines.*

289. Ms Heppelthwaite noted that the NVA would be used as an information tool to inform landowners to be aware of and mitigate effects if they choose to. Ms Heppelthwaite and Dr Chiles considered sensitive activities should not all be required to achieve 35dB$_{LAeq}$ (1hr). Dr Chiles also noted that ventilation requirements should be specified in the new NOISE-APP1.

290. Ms Heppelthwaite provided an alternative table that estimated variable maximum noise levels for individual activities. She suggested that the inclusion of '*habitable room'* unduly confined the application of NOISE-R(1)(c) and noted the request for *'or alteration to an existing building*' had been overlooked in the s42A Report.

291. Ms Heppelthwaite and Dr Chiles noted an alternative compliance pathway was also provided in the KiwiRail submission by adding a new advice note as follows:

> *For Rule R3(1)(c)(i) compliance will be achieved if is at least 50 metres from any railway network, and is designed so that a noise barrier completely blocks line-of-sight from all parts of doors and windows to all points 3.8 metres above railway tracks.*

292. Ms Heppelthwaite proposed other minor wording changes, including removing the words '*at least*' from NOISE-R3(1)(f)(v) to improve certainty; including the word '*maintained*' in NOISE-R3(1)(c) to provide for enduring effects; and replacing '*rail corridor'* with '*rail designation boundary*' to improve certainty. She noted that the definition of '*sensitive activity'* included '*community facility*', which included recreation/sporting activities. KiwiRail noted that unless changes were made to clarify which community facilities NOISE-R3 applied to, a separate definition of '*noise sensitive activities'* was preferred.

293. Ms Arthur-Young and Ms Gunnel, Counsel for KiwiRail, submitted the relief sought by KiwiRail was the most appropriate to achieve the sustainable management purpose of the RMA, protect health and amenity of residents close to the rail corridor, and ensure the nationally significant rail corridor could continue to operate safely and efficiently. They noted that because KiwiRail could not fully internalise all noise and vibration effects, the rail network must be protected from reverse sensitivity effects. They also noted that KiwiRail's relief had been developed and refined through multiple planning processes and has been accepted by the Environment Court.

294. In the post-hearing submitter correspondence, KiwiRail provided a variety of proposed maps, which included noise and vibration overlays adjacent to railway lines.

295. Mr Steve Tuck provided planning evidence for SFF in relation to the submission points on the Hokitika processing site and potential reverse sensitivity effects from dwelling adjacent to the site. He suggested the following further amendments to NOISE-R3:

> *1. The building will be used by a sensitive activity and is located within:*
> *[sub-clauses (a) to (f) are not shown here]*
> ***(g) the following properties or their successors in title:***
> ***Lot 1 DP 1110 Blk XIII Waimea SD;***
> ***Lot 1 DP 1507 BLK XIII Waimea SD;***
> ***Lot 5 DP 1819 Blk XIII Waimea SD;***
> ***Lot 4 DP 1818 Blk XIII Waimea SD;***
> ***Lot 3 DP 1818 Blk XIII Waimea SD;***
> ***Lot 2 DP 1818 Blk XIII Waimea SD;***
> ***Lot 2 DP 2378 Blk XIII Waimea SD;***
> ***Lots 1 2 DP 1603 BLK XIII Waimea SD;***
> ***Lot 1 DP 2378 Blk XIII Waimea SD;***
> ***PT Lot 1 DP 1365 Blk XIII Waimea SD;***
> ***Lot 1 DP 577157;***
> ***Lot 2 DP 577157;***
> ***i. The building is designed and constructed to ensure that the following indoor design noise levels are not exceeded:***
> ***A. 40dB$_{LAeq}$ inside any habitable room;***
> ***B. 35dB$_{LAeq}$ inside bedrooms between 10pm and 7am.***

296. Mr Tuck noted that these properties were identified using Westland District Council's GIS mapping service as being close to the Hokitika processing site, and the proposed inclusion was necessary to implement the direction stated in NOISE-P2.

297. Ms Katherine Mckenzie provided planning evidence on behalf of the Westport Pistol Club, Chris Hartigan, and the Westport Rifle Club. She suggested a set of noise contours should be produced for the entire area surrounding the Westport Rifle Range to address the submitters' concerns. She requested that amendments to NOISE-R3 requiring new activities within the 55 dB L_{AFmax} contour to achieve 35 dB L_{AFmax} in habitable and sleeping areas, and 50 dB L_{AFmax} in an outdoor screened living space. She noted the submitters supported the inclusion of specific acoustic design options as a pathway for compliance with NOISE-R3.

298. Mr Pearson, for NZTA Waka Kotahi, recommended deleting clauses (1)(a) and (1)(b) and adding reference to '*The State Highway Noise Corridor Overlay shown on the planning maps'.* Mr Pearson and Dr Chiles recommended retaining NOISE-R(1)(b)(ii) should be retained and considered new NOISE-APP1 should require compliance with ventilation standards in accordance with NOISE-R3(1)(f). They also agreed that NOISE-R3(1)(f)(v) should be retained as notified, which required the removal of the recommended wording '*at least*'.

299. Ms Pull's letter on behalf of Poutini Ngāi Tahu requested the provision of maps of the high noise overlay be circulated to submitters and opportunity given to provide additional evidence. She noted NOISE-R3 applied to '*new buildings*' only and therefore considered it should not apply to nohoanga entitlements, which were usually used with vehicles or tents.

300. Mr Bert Hofmans presented a statement at the hearing supporting his request to remove the Karamea Aerodrome Noise Contour Overlay from his property. He has also requested removal of the reference to '*Karamea Aerodrome*' from Rule 3(1)(d); and deletion of Rule 3(1)(f) or the addition of '*except where the property owner accepts a form or level of acoustic treatment that results in a different internal design sound level and accepts that this is registered on the certificate of title in the form of a consent notice.'* He considered there had been little

consideration of the impact on property owners and limited justification or s32 analysis for the imposition of the rules, with limited consideration of alternatives. Mr Hofmans was concerned about the expense of building within the noise contours overlay and the onerous nature of the new rules. He has asked the Commissioners to consider the cost implications, the proportionality of the rules to the issues, and he included a list of questions to ask when formulating the decision.

NOISE - R4 - Emission of Noise for Temporary Military Training Activities

301. The letter from the NZDF sought that the setback distance in NOISE-R4(b)(ii) referred to distance in metres to reduce any potential interpretation issues.

NOISE - R5 to NOISE - R8 and NOISE - R11

302. Mr Kennedy, for Westpower, noted a discrepancy between the suggested new Rule NOISE-RX and that in Appendix 1 of the s42A Report and noted a misallocated further submission point. He noted that he understood the new rule has been developed by an acoustic expert taking into account the submissions.

New Rule NOISE-RX

303. Mr Rhys Hegley provided evidence on behalf of WMS Group *et. al*. in relation to the noise limits in the GRUZ in NOISE-R6 (now to be included in NOISE-RX) He considered the upper limits should also be applied in daytime in weekends and public holidays, due to the working components of a rural zone. He considered this proposed change will better match the objectives of the Plan. He considered that in the GRUZ a 55 dB L_{Aeq} limit was appropriate from 7am – 10pm every day of the week, and 45 dB L_{Aeq} and 75 dB L_{AFmax} from 10pm – 7am. He considered this would provide for working activities within the rural zone, while also providing for residential amenity. He noted this aligned with NZS 6802.

304. Mr Hegley also suggested rewording NOISE-RX(2) because he considered the current wording meant the rule could not apply to a zone. He proposed the following re-wording:

> *2. The maximum noise from any activity shall not exceed the following noise limits at any point ~~at the~~ **within a** notional boundary **within** of any of the following zones:*

305. Mr Hegley also suggested that new Rule NOISE-RX(3) should be reviewed to ensure it was consistent with the intent of the Plan, in relation to activities in the port and mineral extraction zone.

306. Ms Alex Booker, Counsel for WMS Group *et. al*., submitted that an efficiency and effectiveness assessment for new Rule NOISE-RX, in the context of the Plan objectives and policies, had not been undertaken. She suggested that the s32AA analysis was inadequate given the fundamental changes proposed and considered there had been no assessment of how Rule NOISE-RX would achieve the objectives and policies. She reiterated Mr Hegley's evidence that NOISE-RX placed 'too much' weight on residential amenity in productive and heavy working zones. She stated the submitters sought that the notified version of the noise rules, with the weekend/public holiday hours amended to 7am – 10pm, as the most appropriate for the nature of the MINZ, PORTZ and GRUZ.

307. Dr Chiles, for Te Mana Ora, agreed that the consolidation of rules was beneficial, however, he noted that in the process some provisions had become more lenient. He suggested a separate 'evening' shoulder period should be added between 7pm – 10pm, with a 5 dB step noise

reduction in residential and rural zones. He noted in the GRUZ, recommended noise limits were less stringent 7pm to 10pm on weekends and public holidays and this was not requested by Te Mana Ora.

308. Dr Chiles pointed out drafting issues with new Rule NOISE-RX as follows:

(a) The terms '*maximum noise*' and '*maximum noise limit*' should be rephrased to avoid confusion with '*maximum noise level*';

(b) Adding the phrase '*at any point within the notional boundary of any activity in any of the following zones'* or '*at any point within any notional boundary in any of the following zones*' rather than '*at any point at the notional boundary of any of the following zones*';

(c) Rewording so that noise limits apply *'at any point within*' zones and by stating '*at any point within any site within*.'

309. Ms Inta, on behalf of the Buller Conservation Group and herself, requested that roads which border a residential/settlement zone should adopt that zone's noise rules.

NOISE-R10 Emission of Noise within the AIRPZ - Airport Zone

310. Dr Chiles, for Te Mana Ora, considered that NOISE-R10(2X) proposed by Ms Evans was inappropriate because it did not manage noise effects and requested it be removed. He also reiterated the submission point that sought to clarify that aircraft operations must be assessed, including when taxiing and pre and post flight engine running.

New Rule 13A - sensitive activities within the 60 dB$_{LAFmax}$ contour

311. Ms McKenzie, on behalf of the Westport Pistol Club, Chris Hartigan and the Westport Rifle Club, recommended a new restricted discretionary activity rule for sensitive activities within the 60 dB L_{AFmax} contour. She considered this rule would ensure an assessment of appropriateness was carried out for the protection of amenity.

Joint Witness Statements (JWS)

312. JWS #1 records the planners agreed that the Rifle Range Noise Overlay references and provisions in NOISE-R3 and NOISE-R13A were appropriate in respect of managing potential reverse sensitivity effects. The planners agreed that the Westport Rifle Range Noise Overlay should include both the 55 dB L_{AFmax} contour and the 60 dB L_{AFmax} contour. It was noted that further minor edits to tidy up numbering with NOISE-R3 may also be required.

313. The planners also noted that references to habitable rooms and/or spaces used for sleeping in NOISE-R3 were being further considered in the Right of Reply. They would consider whether this reference should also include other spaces that may require acoustic insultation.

314. JWS #2 records that Mr Peakall and Mr Hegley agree that 55 dB L_{Aeq} daytime and 45 dB L_{Aeq} / 75 dB L_{AFmax} night time standards for the rural zone were appropriate as a starting point, given the 'mixed-use' nature of rural zones and the applicable objectives and policies. However, Mr Peakall considered that a lower level on weekends should be considered to provide some respite.

315. JWS #2 also outlined that Mr Peakall and Mr Hegley agreed there was merit in considering different noise rules for different rural zones. They requested clarity from the planners around

the intended use of the Rural Lifestyle Zone and they suggested that the rules should be implicitly linked to the intent of the zone. Mr Peakall and Mr Hegley also agreed that the refined Port Zone noise rule in new Rule NOISE-RX was appropriate, and the deletion of BCZ and MINZ from Rule NOISE-RX was appropriate.

316. JWS #2 also records that the experts all agreed that Rule NOISE-RX(4) should be deleted to ensure reverse sensitivity effects were avoided.

317. JWS#2 records Mr Peakall and Dr Chiles agreed that numerical noise limits were not the best form of control of aircraft noise associated with rural production and conservation activities. They agreed that on balance a 250m setback was appropriate, assuming the flight paths were away from houses.

318. In relation to noise limits in evening periods, the JWS #2 records Mr Peakall and Dr Chiles were in general agreement that the structure of NOISE-RX and most noise limits were appropriate. However, they disagreed on the noise limit in the weekday evening period between 7pm to 10pm, in relation to Rule NOISE-RX(1) and (2). Mr Peakall considered the noise limits were appropriate, whereas Dr Chiles considered that a lower limit of 50 dB L_{Aeq} should apply between 7pm and 10pm on weekdays.

319. In relation to NOISE-R10(2X), the JWS #2 records Mr Peakall and Dr Chiles agreed that rare, essential unplanned engine testing could be exempted from noise control, however they agreed that this should only apply during daytime hours. Dr Chiles suggested the exemption should only apply to a limited range of more significant '*scheduled passenger services*.' Mr Peakall suggested a definition for '*scheduled passenger services*' and Dr Chiles agreed with this definition. They suggested the following wording, which included clarification and amalgamation of NOISE-2X and 2Y:

> *2X/2Y. Noise from aircraft engine testing is exempt from NOISE-R10.1 above, and:*
> *a) Is not subject to a noise limit if it is essential unplanned testing occurring between 07:00am and 10:00pm, for regular scheduled passenger services to and from other regions with fixed wing aircraft with at least 8 passenger seats; and*
> *b) For all other cases shall comply with the noise limits set out in NOISE-RX.*

320. In relation to Rule NOISE-R3, JWS #2 records Mr Peakall and Dr Chiles generally agreed about the intent, methods and how the rule should work. They both suggested that NOISE-R3(1) should allow for some uncertainty, and appropriate allowance should be made for this uncertainty and some future growth. They have suggested the following wording be included in the rule, in place of the deleted NOISE-R3(1)(b)(ii):

> *Compliance with (xxx) above must be achieved based on existing measured or predicted external road-traffic noise levels with the addition of 3 dB.*

321. Mr Peakall and Dr Chiles also agreed that the location at which noise compliance measurement occurs needed to be defined and suggested amendments as follows:

> *v. Does not generate more than 35 dB_{LAeq} (30s) when measured **at any point where a person associated with a sensitive activity could be located, and no less than** 1m away from any grille or diffuser.*

322. JWS #2 records Mr Peakall and Dr Chiles agreed with KiwiRail that a Rail Noise Overlay was acceptable in principle; and that the noise rules should refer to the track when defining the

noise source level assumptions. They also agreed that an 'Alert Overlay' was appropriate for the Hokitika railway line given the likelihood of minimal traffic in the future.

Addendum Report #2

323. In Addendum Report #2, Ms Evans responded to the overlay map supplied by KiwiRail and noted it covered a larger area of land than that required by the notified provisions because it was measured from the designation boundary rather than the edge of the tracks. She considered this could affect additional properties where the level of noise would not necessitate mitigation. She also noted that the proposed overlay did not take into account topography. As such, she recommended that the overlay map supplied was not used in its current form but considered this could be revisited following feedback from KiwiRail or other submitters. Ms Evans noted that she would provide a recommendation on the need for an Alert overlay for the Hokitika line in her Right of Reply.

324. Ms Evans noted that she continued to prefer Mr Peakall's advice in relation to noise limits in the GRUZ in new Rule NOISE-RX, as a balance between allowing for noise generating activity and protecting sensitive activities as required. She acknowledged the cost/benefit balance of providing for noise generating activities but limiting these during weekend hours, in proximity to sensitive activities, and potential costs of compliance, monitoring and/or resource consents. She also acknowledged the potential cost of lost productivity. However, she noted that the weekend and public holiday respite period was fair given that residential activities were enabled in the GRUZ.

325. Ms Evans agreed that NOISE-RX(4) could be deleted, as recommended in JWS #2 because it effectively protected any existing or new sensitive activity in high noise environments. She noted that sensitive activities in these zones would be subject to the acoustic insulation requirements in NOISE-R3. However, she noted that if clause (4) was deleted, there would be no zone based limit in the MINZ or BCZ. Ms Evans noted that a noise limit was not necessary in the BCZ as the zone is limited to the actual mine, however, a noise limit measured at the notional boundary (similar to notified NOISE-R11) was appropriate for the MINZ given the existence of residential dwellings in this zone. She noted that a recommendation on the application to new sensitive activities would be made in the Right of Reply.

326. Ms Evans confirmed her recommendation on whether a lower limit should be imposed in evening hours (7pm-10pm) remained unchanged from the s42A Report

Response to Minute 59

327. Minute 59 provided submitters an opportunity to response to Addendum Report #2, which was provided after the adjournment of the hearing and expert conferencing.

328. Ms Pull, for Poutini Ngāi Tahu supported the position of NZTA Waka Kotahi regarding the noise contour taking into account topography. However, she sought clarification that the roading corridor overlay was based on specific traffic volumes in the area because some parts of the State Highway would not receive sufficient traffic volumes to justify the additional burden on private property. She noted that other district plans recognised varying traffic volumes.

329. In response to the overlay maps provided by KiwiRail, Ms Pull noted she had not seen the data which justified an 100m setback and considered this should be reduced where rail activities were less regular. She suggested the overlay should not apply to all rail lines and should only apply to lines managed by requiring authorities/network utilities. She agreed with Ms Evans

that the setback should be measured from the railway line and not the corridor boundary. She noted there was a nohoanga entitlement at Moana/Lake Brunner, approximately 40m from a railway line, and it was unclear if using this settlement right would breach the noise sensitive activity rules.

330. Ms Pull also noted that the Hokitika Rail Corridor Overlay would impact Māori Purpose Zone land at Arahura and potentially a nohoanga entitlement at Taramakau River. She was concerned an alert overlay may impact these sites and considered there was insufficient information to warrant an alert overly for the Hokitika line. She asked that if the Panel found the information provided by KiwiRail was sufficient, or if they choose a precautionary approach, that the overlay not impact more land than the roading corridor overlay.

331. Mr Michelle, for NZAAA, considered numerical noise limits suggested by Mr Peakall and Dr Chiles were not the best form of control for restrictions on aircraft associated with rural production and conservation activities. He suggested that there was no scientific or technical justification for the addition and agreed with Mr Peakall's suggestion that an additional setback distance was not entirely necessary. Mr Michelle considered any setback addition from a sensitive activity was unjustified and was not raised in the s32A Report. He noted the further setbacks were not sought by submissions and considered they did not meet policy objectives in the Rural Zone. He supported the advice note exempting activities on land managed under the Conservation Act 1987. He requested the clause (12) be worded as follows:

> *12. Infrequent aircraft take-off and landing associated with rural production activities and conservation activities purposes on an intermittent basis.*

332. Mr and Ms Kennedy noted that there was no plan showing the proposed road noise overlay and that if this impacted their property, they would be opposed. They agreed that a rule was not appropriate in relation to the Hokitika line and considered an alert overlay should not be applied because it may have unintended impacts through misinterpretation. They also reiterated that any setback should be measured from the edge of the tracks. Mr and Ms Kennedy noted fairness and natural justice concerns arising from the KiwiRail submission being summarised as a general submission and considered potentially impacted parties may have missed the relief sought in relation to NOISE-R3.

333. Ms Arthur-Young and Ms Gunnel, for KiwiRail, considered the noise overlay should be measured from the rail designation boundary and not the railway tracks, from a 'good planning' perspective as outlined in attached supplementary evidence from Ms Heppelthwaite. They noted that the tracks may move within the designation and considered the overlay needed to provide for the use of the designation over the life of the Plan. They also noted that the mapping provided by KiwiRail represented the land most affected by railway sound and vibration, which required the application of noise and vibration controls.

334. Ms Arthur-Young and Ms Gunnel corrected the Council Officers statement that KiwiRail's overlays and setbacks did not account for topography and confirmed the proposed KiwiRail provisions had taken into account topography and building screening effects. Ms Heppelthwaite noted that mapping provided by KiwiRail had an evidential basis, and was pragmatic and effective. They considered the proposed 100m setback was appropriate and would not extend to unaffected properties. Ms Arthur-Young and Ms Gunnel noted that additional volumes were anticipated on the Rapahoe line within the next two years.

335. KiwiRail provided their preferred wording for NOISE-R3 as follows:

NOISE - R3
Acoustic Insulation Requirements for New or Altered Buildings for Use by a Sensitive Activity
Activity Status Permitted
Where:

1. *The building will be used by a sensitive activity and is located within the Road Noise Overlay shown on the planning maps where: […]*
2. ~~*100m of the edge of the tracks of a railway line where any new or altered habitable room used for a sensitive activity and/or spaced used for sleeping:*~~ ***The building will be used by a sensitive activity and is located within the Rail Noise Overlay shown on the planning maps and:***
   a. ***it is*** ~~***must be***~~ *designed, constructed and maintained to achieve a maximum internal noise level of 35 dB_{LAeq} (1h). Compliance must be achieved based on an assumption of 70 dB_{LAeq} (1h) at a distance of 12m from the railway track and shall be deemed to reduce at a rate of 3 dB per doubling of distance up to 40m, or*
   b. *it is at least 50 metres from any railway network, and is designed so that a noise barrier completely blocks line-of-sight from all parts of doors and windows to all points 3.8 metres above railway tracks*
3. ***The building will be used by a sensitive activity and is located within the Rail Vibration Overlay shown on the planning maps and*** ~~*60m of the edge of the tracks of a railway line where*~~ *any new or altered habitable room and/or space used for sleeping must be designed, constructed and maintained to achieve vibration limits not exceeding 0.3mm/s (Class C criterion Maximum Weighted Velocity, Vw,95);*
4. *The 50 dBA Noise Contour boundary of Franz Josef Heliport or the 55 dB […]*

336. Jet Boating New Zealand supported the recommendations in Addendum Report #2 to retain clause (13) and amend clause (17) relating to noise from temporary activities.

Reporting Officer Reply Evidence

337. The Joint Right of Reply from Ms Belgrave, Ms Evans and Ms Easton, Ms Evans specifically considered the matters from technical expert caucusing. In relation to matters raised by Silver Fern Farms, Ms Evans considered that no specific or additional noise provisions were necessary to manage noise effects adjacent to the Hokitika processing site.

NOISE-R1

338. In relation to NOISE-R1(12), Mr Peakall considered it was inappropriate to remove limits on the number of aircraft take off and landings associated with rural production and conservation activities because this would effectively allow unrestricted aviation activity. He considered limiting the number of days made it easier for affected parties to understand if the exemption was being adhere to. He considered the removal of number of days or setback distances would result in an unregulated agricultural aviation industry, and some controls are appropriate. He acknowledged that while operators preferred the use of *'infrequent'* or *'intermittent'*, Ms Evans considered these terms were not quantifiable and were therefore not suitable for an exemption.

339. Mr Peakall acknowledged that some of the relief sought was warranted to address submissions. He noted that the exemption was enabling of agricultural aviation and was consistent with the objectives and policies. Mr Peakall considered a setback distance was not entirely necessary if there was a day limit but considered enforcing a restricted number of hours, as sought by the NZAAA, was more difficult to enforce than the number of days. Mr Peakall also considered the inclusion of the words '*per site'* was appropriate to help to clarify

the assessment location. In taking into account the evidence from submitters, Mr Peakall suggested the following NOISE-R2(12) exemption:

> *Aircraft take off and landing, including helicopter movements, associated with rural production activities and conservation activities, at least 250 metres from any sensitive activity ~~and~~ **or** for no more than 30 days in any 12 month period per site.*

340. Ms Evans relied on the expert evidence of Mr Peakall and Dr Chiles as set out in JWS #2, that a 250m setback from sensitive activities should be included in the rule. She also recommended that an advice note be included to clarify that this clause did not apply to the conservation estate, as suggested Mr Michelle for NZAAA. Ms Evans recommended that NOISE-R2(12) was amended from the s42A Report recommendation as follows:

> *Aircraft take off and landing, including helicopter movements, **associated with** rural production activities and conservation activities **at least 250 metres from any sensitive activity and** for no more than 30 days in any 12 month period per site; Advice note: NOISE-R2.12 did not apply to land held or managed under the Conservation Act 1987.*

341. In response to Mr and Ms Kennedy's response to Minute 59, Mr Peakall noted that the recommended Road Noise Overlay did not cover their property, so he considered their concerns should be alleviated. Mr Peakall also noted that the Hokitika Rail Corridor overlay, if adopted, would be for information purposes only. He also noted that if the rules reverted back to use of a setback, specific exclusion of the Hokitika line should be made.

342. In response to the KiwiRail legal counsel's submission, Mr Peakall reiterated that either the setback distance or the overlay can be used. However, he noted there was some residual uncertainty around the mapping of the overlay and therefore he preferred use of the setback distance rules. He also addressed KiwiRail's concern that if the rule or overlay was measured from the track edge, it would be done so in relevance to the current location. Mr Peakall noted that he understood that the rule would apply to the track location as they exist at the time of any consenting process.

343. Mr Peakall also corrected an error made in the interpretation of his memo by KiwiRail. He confirmed that the *overlay* did not account for screening effects of topography, not the *provisions* themselves. He noted that there was a pathway in the provisions for topography to be taken in to account, but the map did not include this effect. Mr Peakall disagreed that modelling rail noise was more time consuming and costly than mapping distance.

344. Mr Peakall noted the Poutini Ngāi Tahu concerns around the road noise overlay should be satisfied, as the overlay and memo from Dr Chiles took into account local conditions, including topography and traffic flows. Mr Peakall noted he shared the concerns of Poutini Ngāi Tahu around consideration of topography, rail movements and extent of the overlay, and considered these had not been fully addressed by KiwiRail. He noted that he would favour the setback distances in the rules in the absence of specific information, however either option would satisfactorily manage noise effects from rail.

345. In response to Bert Hofmans, Mr Peakall noted that by mapping the Karamea Aerodrome as an Airport Zone, there was protection of the ability to operate and protection of residents from potential aircraft noise. He considered this approach was intentionally consistent with others in the district and adopted the guidance and recommendations contained in NZS 6805. He noted that the number of landings occurring was immaterial because the noise boundaries protect sensitive activities from both current and future aerodrome use. He also noted that the rules only provided for the requirement of a ventilation system and in locations pointed

out by Mr Hofmans and that standard construction required by the Building Code would be satisfactory.

346. In response to Ms Inta's concern about removing '*daycare facilities*', Mr Peakall did not consider daycare facilities should be exempt from the noise rules as they were a commercial activity that often established in areas proximate to sensitive activities. He considered mitigation could be readily implemented if required.

347. In relation to a query around NOISE-R9 and R10, Mr Peakall generally agreed with the requirement that ports, airports and heliports subject to these rules should be required to prepare Noise Management Plans (NMP). He supported implementation of NMP for ports and airports, and noted that an advice note to each rule was a possible way to address this, rather than enshrining the reporting requirements in the rules for each NMP. Mr Peakall suggested that an NMP should be set out in enough detail to ensure compliance with the rules.

348. Mr Peakall provided technical clarity on the acoustic insulation requirements in NOISE-R3. He noted the rule required a new or altered sensitive activity to meet internal noise levels depending on the noise source. He noted the rule also allowed compliance to be achieved if the construction meets the requirements in new NOISE-APP1. Mr Peakall confirmed that new NOISE-APP1 could apply to all activities covered by the rule. However, he noted it could not be used in terms of the external noise level requirement of R3(6)(ii), so did not apply in that case.

Reporting Officer Reply Evidence

349. In relation to **NOISE-R1**, Ms Evans recommended removal of reference to the phrase '*and comply with*' to reflect how the NZ Standard is used in practice. She noted that this is consistent with wording in other clauses in NOISE-R1.

350. In relation to **NOISE-R2**, Ms Evans recommended removal of '*associated with*' in clause (1), as discussed at the hearing. She considered this amendment addressed the ambiguity associated with *'intermittent*' but provided for residential use of a site.

351. In relation to NOISE-R2(12), Ms Evans noted that she and Mr Peakall had reflected on the wording of the clause and continued to have concerns with the terms *'infrequent*' and *'intermittent'* because they were not certain. To allow partial relief to the request from NZAAA, Ms Evans recommended that either a setback *or* the recommended restrictions on the number of aircraft and helicopter movements per year was appropriate to enable aircraft or helicopter movements, while still affording some protection to sensitive activities. Ms Evans recommended an advice note clarifying that NOISE-R2(12) did not apply to conservation estate land, in accordance with the RMA.

352. Ms Evans also noted that the Panel asked if '*any 12 month period*' should refer to a calendar year. Ms Evans noted, on the advice of Mr Peakall, that '*any*' indicated this could be assessed as a rolling 12-month average rather than a calendar year. She noted a calendar year could result in 60 days in a row of aircraft activity, which was inappropriate in proximity to sensitive activities.

353. In relation to NOISE-R2(16), the Panel noted that this clause needed to include where the measurement should be taken from. Ms Evans confirmed she had discussed this with Mr Peakall, who advised had it should be from any point at or within the boundary of any site within the Residential, Settlement, Māori Purpose, Hospital, Open Space, Natural Open Space,

Scenic Visitor or Future Urban zones; and at the notional boundary of a site in the General Rural or Rural Lifestyle zones.

354. In relation to **NOISE-R3**, Ms Evans provided a separate Right of Reply associated with submission points relevant to the Westport Rifle Range. She considered the mapping and provisions in the JWS #1 were appropriate and recommended that the planning maps, and Noise and Subdivision chapters should be amended accordingly. She noted that further minor edits may be recommended, but the substance and intent was not likely to change, and final recommendations were to be included in her final Right of Reply, outlined below

355. In her overall Right of Reply, Ms Evans noted the provisions had been renumbered so there was one clause for each issue covered by the rule. In relation to NOISE-R3(1)(ii), she noted that Mr Peakall had originally recommended deleting this clause but that she now recommended that it was retained and modified based on expert conferencing.

356. In relation to NOISE-R3(2), Ms Evans highlighted Mr Peakall had provided evidence on the KiwiRail response in his reply evidence at paragraphs 24-38. She confirmed that it continued to be her preference that measurement would be taken from the railway track. She also noted that clause 3(ii) took into account noise barriers (as noted in paragraph 13 of KiwiRail's response). Ms Evans recommended that the Hokitika line be exempt from NOISE-R3 due to its very low train movements, but that the Rapahoe line should be included as train movements were expected to increase.

357. In relation to acoustic insulation requirements, Ms Evans noted that acoustic insulation requirements only applied to habitable rooms and spaces used for sleeping, and therefore the inclusion of sporting and recreational activities in the definition of '*sensitive activity*' was not an issue in NOISE-R3.

358. In response to Mr Hofmans' evidence, Ms Evans relied on and accepted Mr Peakall's expert advice that insulation requirements only applied to properties in proximity to the Karamea Aerodrome. She noted that resource consent applications to breach NOISE-R3(4) would be assessed on a case-by-case basis.

359. In relation to NOISE-R3(7)(v), Ms Evans recommended the amended wording as agreed by the noise experts and confirmed this had been included in the revised provisions.

360. Ms Evans recommended updating the rule references in NOISE-R3 and associated cross-references in the advice note and NOISE-APP1-Acceptable constructions requirement, to reflect the amended numbering of the clauses.

361. In relation to **NOISE-R4**, Ms Evans agreed with the NZDF submission requesting that the setback distances in NOISE-R4(1)(b)(ii) be amended to refer to distance in metres and noted this amendment was made in Addendum Report #2.

362. In relation to **NOISE-RX**, Ms Evans considered there was scope to amend the approach from the notified rules to manage noise where it was received and not where it was generated. She also noted wide scope from other submitters ranging from amendments for less restrictive noise limits to more restrictive, as well as changes to the hours.

363. Ms Evans also responded to the Hearings Panel query around comparing the GIZ noise limits to other district plans and noted that her consideration in the Addendum Report #2 relating to lawfully established activities was considered unnecessary.

364. In response to the Panel questions relating to **NOISE-R9(2)**, Mr Peakall and Ms Evans confirmed that an advice note regarding a Port Noise Management Plan was more appropriate.

365. Mr Peakall and Ms Evans also considered that an advice note was also more appropriate in relation to a noise management plan in the Airport Zone under **NOISE-10**. Ms Evans also recommended consolidating new clauses 2X and 2Y (relating to engine testing) to align with the JWS #2 wording agreed by Mr Peakall and Dr Chiles. Ms Evans considered there was scope to make this amendment.

Hearing Panel's Evaluation

NOISE-R1

366. The Panel accepts Ms Evans' recommended amendments to NOISE-R1, as shown in Appendix 1 of the Right of Reply. We note the agreement between Mr Peakall and Dr Chiles that NOISE-R1 (3) should be deleted due to the lack of a definition for '*Mobile Noise Sources'* and the risk that this exemption could be used as a loophole.

367. The Panel agrees with Ms Evans' recommended replacement of '*section 7.7 of* ' in NOISE-R1(4) with '*as assessed*' and note this was supported Mr Peakall to align with New Zealand Standards. We note the requirements provided for the measurement of wind farm noise but did not include how such noise should be assessed and agree that this should be addressed by referring to the standard in full.

368. The Panel agrees with Ms Evans' recommended amendment to NOISE-R1(5) to replace '*managed*' with '*measured and assessed'* to give greater clarity and better alignment with standards.

369. The Panel agrees with Ms Evans' recommendation to add new clauses to include the relevant standards for noise from aerodromes, airfields or airports; noise from new or altered roads; and noise from port activities. We accept Mr Peakall's view that NOISE-R1 is the best location to set out all the applicable standards for noise and consider this gives greater clarity to plan users, as well as addressing the relief sought by Te Mana Ora.

370. In relation to the remainder of the submissions on NOISE-R1, the Panel agree that these be rejected on the basis of the conclusions reached by Ms Evans

NOISE-R2

371. The Panel accepts Ms Evans' recommended amendments to NOISE-R2, as shown in Appendix 1 of the Right of Reply.

372. The Panel agree the recommended amendment to NOISE-R2(1) provides clarity on what noise is generally expected with a residential activity. The Panel notes Ms Evans' comments in the s42A Report that spraying and harvesting are highly unlikely to be associated with a residential activity on a large scale. We agree.

373. The Panel agree with Ms Evans' recommended amendment to NOISE-R2(5) to add '*or regionally significant infrastructure'* to NOISE-R2(5), as sought by Manawa. The Panel notes that Manawa sought to delete *'lifeline utilities'* and add '*regionally significant infrastructure'* but that Ms Evans did not agree with this because '*Lifeline Utilities'* are defined by Schedule 1

of the Civil defence Emergency Act 2002 and include a different range of infrastructure services to those defined as '*Regionally Significant Infrastructure'*.

374. The Panel agree with Ms Evans' recommended amendment to delete '*or daycare facilities'* from NOISE-R2 (6) based on Mr Peakall's opinion a concentration of child noise from a daycare facility should be subject to controls like any other commercial activity, particularly given these are normally located in residential areas. We agree that Te Mana Ora's submission provides wide scope for this amendment to protect amenity.

375. The Panel agree with Ms Evans' recommended amendment to NOISE-R2(7) because the standard as notified only provided for vehicle noise associated with residential activities and vehicle noise from activities in all zones was not enabled. We consider the additional wording '*permitted activity'* gives greater clarity.

376. The Panel agrees with Ms Evans' recommended deletion of NOISE-R2(10) because the intent of the exception is unclear.

377. The Panel notes that Mr Peakall's recommended changes to NOISE-R2(11) to remove the reference to '*aircraft*' and to deletion of NOISE-R2(15), which had been omitted in the Appendix 1 of Addendum Report, are now included in Appendix 1 of the Right of Reply.

378. The Panel agrees with Ms Evans' recommended amendment to NOISE-R2(11) to use the defined terms '*agricultural, pastoral, and horticultural activities*' and to remove '*farming*' to provide better alignment with the definition. We consider this is more appropriate than using '*rural production activities*' in the context of the rule. We also agree with the recommended minor adjustment of the words to give greater clarity to the standard.

379. The Panel agrees with Ms Evans' recommended amendments to NOISE-R2(12) based on the advice of Mr Peakall that the notified wording did not define the number of days that such activity could occur and the use of *'infrequent*' would be open to interpretation issues. We agree and consider that a maximum of 30 days in any 12-month period is reasonable and enforceable based on logbooks required for aircraft operation. We note Dr Chiles and Mr Peakall agreed in the JWS that a setback of 250m should be included in the standard, although we acknowledge Mr Peakall later qualified this by saying it may not be necessary if there was a maximum day limit. We agree that the setback requirement and the maximum day limit are appropriate given this is now recommended to be worded as '*or*'. We consider a setback or limit on the days of operation is not appropriate when operating on public conservation land. We agree with the recommended inclusion of a new advice note to clarify that land held or managed under the Conservation Act 1987 is exempt from this clause (12).

380. The Panel acknowledges Mr Michelle's view that if a day limit was applied then an hour limit would also be needed and that this should be based on a calendar year. We do not consider it is necessary to have an hour limit and note that limiting the number of days is easier for people to understand. We acknowledge that enforcement of this limit is likely to be by complaint only and consider it is easy for someone concerned to record days that an operation occurs. We consider a 12-month rolling average is appropriate to avoid an operation occurring in the same location over January and December.

381. The Panel notes Mr Michelle suggested that no submitter had asked for a day limit or a setback and therefore questioned the scope to make these amendments. We consider the request from Te Mana Ora (S190.536) to delete this clause provides broad scope to add limits. We acknowledge the agreement reached between Mr Peakall and Dr Chiles regarding the need

for a day limit *or* a 250m setback from a sensitive activity, outside of the conservation estate land. We agree and consider the wording of the exemption is reasonable for protecting human health, while enabling such activity as permitted activity standards, while enabling rural production activities and conservation activities (including biosecurity activities).

382. The Panel also acknowledge Mr Milner's view that there could be different standards for different zones. We consider the exemption for public conservation land is appropriate but do not consider it is necessary to have different standards for different zones.

383. The Panel agrees with Ms Evans' recommended amendment to NOISE-R2(14) to include the permitted daylight hours for exemption for rifle ranges, as recommended by Mr Peakall. No additional evidence was provided by the Westport Rifle Club or the Westport Pistol Club regarding the recommended restrictions during night time hours, so we consider this is appropriate.

384. The Panel agrees with Ms Evans' recommended amendment to delete NOISE-R2(15) based on the advice of Mr Peakall that activities such as dog kennels and certain industrial activities that involve impulsive sound can have significant noise effects and need to be suitably assessed and these should not be excluded. While not specifically requested, we agree that Te Mana Ora's submission provides wide scope for this amendment to protect amenity.

385. The Panel agree with Ms Evans' recommended amendments to NOISE-R2(16), in response to Te Mana Ora (S190.536) and agreed with by Mr Peakall that audible bird scaring devices should be controlled by way of a numerical limit based on the frequency of operation, measured from in the relevant zones.

386. The Panel agrees with Ms Evans' recommended amendments to NOISE-R2(17) based on Mr Peakall's evidence.

387. The Panel agrees that activity status where compliance is not achieved should be changed from '*Restrict Discretionary*' to '*N/A*' and that this corrects a drafting error.

388. In relation to the remainder of the submissions on NOISE-R2, the Panel agrees that these are rejected on the basis of the conclusions reached by Ms Evans.

NOISE-R3

389. The Panel accepts Ms Evans' recommended amendments to NOISE-R3 and her recommendation to add new NOISE-APP1 to the Plan, as shown in Appendix 1 of the Right of Reply. Overall, we are satisfied that the recommendations are a result of the expert assessment of the rule by Mr Peakall to ensure the protection of human health, as sought by Poutini Ngai Tahu (S620.211). The amendments also respond to the submission points of Waka Kotahi NZTA (S450.171) relating to noise and vibration from state highways; and KiwiRail (S442.088) to include standards for noise, vibration and mechanical ventilation. We note that there was a high level of agreement between Mr Peakall and Dr Chiles regarding appropriate standards to protect human health from adverse noise effects.

390. The Panel agrees with Ms Evans' recommended amendments to refer to the *Road Noise Overlay* in NOISE -R3(1) and delete the references to distance that were notified in clauses (a) and (b) of this standard, which was supported by Mr Peakall and Dr Chiles. Dr Chiles confirmed that overlays are also used in several other districts where NZTA Waka Kotahi had used national noise modelling to better define areas around highways where there are buildings that are likely to require treatment to manage noise effects. The Panel are supportive of this

approach as an overlay will give a more accurate reflection of the likely noise exposure for state highways in the district. We note Ms Evans provided a s32AA evaluation for use of the Road Noise Overlay and concluded this was a more efficient and effective approach than using a setback. We agree.

391. The Panel accept Ms Evans' recommendation for a 100m setback from the railway track rather than using the KiwiRail Rail Noise overlay mapping, which measures 100m from the designation boundary. We agree with Ms Evans that the overlay mapping includes a larger area than measuring a 100m setback from the tracks. We acknowledge Mr Peakall's view that there is no significant or material difference between using the setback rule or creating an overlay in terms of providing a trigger for requiring mitigation; and that both will result in satisfactory noise and vibration outcomes. However, the overlay proposed by KiwiRail affects a larger area of land, which we consider is not within the scope of the Plan as notified.

392. In terms of allowing for the railway track to move within the designation, as sought by KiwiRail, we consider the setback from the tracks addresses this issue, as it will be assessed from where the tracks are located at the time an activity is proposed. We agree with Ms Evans that the location of the track is where the effect occurs and that it is appropriate to measure the setback from the where the effect is generated.

393. The Panel accept Ms Evans' recommendation to exclude the Hokitika railway line from the rules in recognition of the low traffic volume on this line. We agree with the recommendation of Mr Peakall and Dr Chiles that an Alert Layer would be appropriate in case of increased volumes.

394. The Panel acknowledges Mr Kennedy's concern that the 100m setback has increased from 40m to 60m and that it now potentially affects more properties. However, we consider this requested increase is within the scope of the relief sought by KiwiRail and is well supported by expert evidence to protect human health and wellbeing. We note the KiwiRail submission sought to measure the setback from the 'rail corridor' and therefore indicated a large increase was sought from the setback requirement as notified. We consider the refinements to the rule make it clear that noise mitigation will only be required for new buildings and alterations used for a sensitive activity and/or space used for sleeping. While we acknowledge there will be cost associated with installing acoustic insulation and compliance costs for the Councils, we consider this is necessary to give effect to NOISE-O3.

395. The Panel also acknowledges the concerns of Mr Hofmans regarding the restricting effect of the Karamea Aerodrome Noise Overlay (as well as other overlays relating to natural hazards and the coastal environment) on his aspirations for their property. However, we accept the expert evidence of Mr Peakall that the noise overlay is appropriate to protect human health and to protect operation of the aerodrome from reverse sensitivity effects from new sensitive activities in close proximity. We accept Mr Peakall's view that the level of use is immaterial given the level of activity that can occur as of right and that the rules seek to protect all nearby noise sensitive receivers. Mr Peakall noted that the noise levels at potential building sites identified by Mr Hofmans would be '*relatively low*' and no additional acoustic treatment on top of standard construction under the Building Code. We are satisfied that the use of noise contours represents an effective and efficient approach to managing adverse effects that is used throughout New Zealand. Similar to the railway line setback, we acknowledge there will be cost associated with installing ventilation installation for new buildings or alterations and compliance costs for the Council, we consider this is necessary to give effect to NOISE-O3. We agree with Ms Evans regarding the flexibility Mr Hofmans seeks in terms of alternative approaches.

396. The Panel also acknowledges the concern of Poutini Ngāi Tahu to minimise any impacts on Poutini Ngāi and Māori Purpose Zone land. However, we note their support for the rules to be based on expert assessment to protect human health. We consider the revised rule reflects this approach.

397. The Panel agrees with Ms Evans' recommended amendments to improve clarity and consistency of wording, such as including '*and or space used for sleeping'* to provide more clarity on the definition of a '*habitable room'*; and the replacement of *'minimum'* with '*maximum*'. We consider the addition of '*and maintained*' will ensure that the building always remains compliant with the required standard. The Panel notes that Mr Peakall and Dr Chiles supported the proposed 20m distance for vibration limits for new or altered habitable rooms and/or spaces used for sleeping.

398. The Panel agree with Ms Evans, recommended amendment to include the Haast Airfield in NOISE-R3(4) as consequential amendment from Special Purpose Zone Chapter Recommendation Report. The Panel agrees with all other recommended amendments to NOISE-R3(4) and NOISE-R3(5) for consistency with the recommended changes to other standards in NOISE-R3, as agreed to by Mr Peakall and Dr Chiles.

399. The Panel agrees with Ms Evans' recommended amendments to the provisions for NOISE-R3(6) and note agreement between the parties that these, in combination with new Rule NOISE-R13A and the Westport Rifle Range Noise Overlay, are appropriate to manage potential reverse sensitivity effects from new sensitive activities in the surrounding area.

400. The Panel agrees with Ms Evans' recommended amendments to NOISE-R3(7) to improve clarity and consistency with the wording used in other relevant standards.

401. The Panel agrees with Ms Evans' recommended consequential amendments to the advice note and to reflect the addition of new NOISE-APP1 – Acceptable Construction Design for Acoustic Insulation Requirements for New Buildings for Use by a Sensitive Activity Subject to Noise R3. We consider these will assist plan users to understand the rule and to determine acceptable solutions to meet the permitted activity standards.

402. In relation to the submission point from SFF (S441.0041), the Panel agree with Ms Evans that no amendment to the rule is required because any reverse sensitivity effects are best addressed through appropriate zoning and the zone provisions. We agree with Mr Peakall that noise can be controlled at the boundary of the site, if necessary, through methods such as building design and screening. We note Mr Tuck confirmed that SFF can comply with the noise limits at the boundary, but was concerned this may not prevent complaints from new dwellings on the adjacent land. We do not consider the potential for complaints justifies the amendment to the rule sought.

403. In relation to the remainder of the other submissions on NOISE-R3, the Panel agree that these are rejected for the reasons outlined by Ms Evans.

NOISE-R4

404. The Panel agrees with Ms Evans' recommended amendments to NOISE-R4, as shown in Appendix 1 of the Right of Reply, to correct errors.

405. In relation to the remainder of the other submissions no NOISE-R4, the Panel agree that these are rejected for the reasons outlined by Ms Evans

NOISE-R5, NOISE-R6, NOISE-R7, NOISE-R8 and NOISE-R11.

406. The Panel agrees with Ms Evans' recommendation to delete rules NOISE-R5, NOISE-R6, NOISE-R7, NOISE-R8 and replace them with new Rule NOISE-RX. We note the high level of agreement between the experts in relation to the wording of the new rule. We accept that this is a substantial improvement on the notified rules by simplifying the rule framework and providing improved certainty and consistency. We accept that managing noise effects at the point where noise is received is appropriate and is consistent with the approach taken in other district plans around New Zealand.

407. The Panel accepts Mr Peakall's opinion that the recommended noise limits in new Rule NOISE-RX are appropriate for the level of amenity expected in the relevant zone and that these represent the minimum levels for protecting human health, while providing for noise generating activities. Dr Chiles agrees with this.

408. Mr Peakall, Dr Chiles and Mr Hegley agree that for rural zones the standard criteria of 55 dB L_{Aeq} during the daytime and 45 dB L_{Aeq} /75 dB L_{AFmax} at night time are at the upper limit of what NZS 6802 identifies as appropriate for residential amenity. Mr Peakall and Dr Chiles agree that it is appropriate to have some respite in weekends and public holidays from noise given the recommended limits are at the upper limit of acceptability to protect human health and wellbeing. Mr Peakall and Dr Chiles therefore agree that a lower noise limit of 50 dB L_{Aeq} should apply during the daytime on weekends and public holidays in the GRUZ. The only point of difference between Mr Peakall and Dr Chiles, is that Dr Chiles considers that a lower limit of 50 dB L_{Aeq} should also apply in the evening period between 7pm and 10pm to protect public health. Dr Chiles highlighted the recommended limits were more lenient than the notified rule because the notified rule had a lower limit of 45 dB L_{Aeq} from 8pm to 8am weekends and public holiday.

409. In contrast to this, Mr Hegley considered the recommended limit was more restrictive than the notified rule because the noise limit was 55 dB L_{Aeq} on weekends and public holidays from 8am to 8pm, not 50 dB L_{Aeq} on weekends and public holidays from 7am – 10pm. He suggested this would 'shift the balance' from a mixed zone to a residential zone with a working component.

410. The Panel has considered Ms Booker's concern that the GRUZ noise limits had reduced in both the noise level and hours in new Rule NOISE-RX.

411. The Panel relies on the agreement between Mr Peakall and Dr Chiles that the recommended noise limits for the GRUZ are appropriate and balance the mixed use of the zone. We agree that there should be lower permitted noise levels on weekends and public holidays in recognition that the noise limit of 55 dB L_{Aeq} is at the upper limit for residential amenity. We consider this change has been balanced by Mr Peakall and Ms Evans through allowing a higher noise limit of 50 dB L_{Aeq} on weekends and public holidays from 7am – 10pm. However, the preference of the Panel is to apply the same 50 dB L_{Aeq} in the evening period from 7pm – 10pm on weekdays, as recommended by Dr Chiles, to provide appropriate respite.

412. The Panel acknowledges the recommended noise limits in the GRUZ do not apply to a wide range of rural production activities because these are exempt. We agree with Ms Evans that this in conjunction with the reasonably high noise limits from 7am to 7pm on week days and strikes an appropriate balance for mixed use of the zone by protecting human health and providing for many anticipated noise generating activities as permitted activities. We consider

that any activities outside of those provided for, including mineral extraction activities, should be assessed through a consent process.

413. The Panel has also carefully considered the noise limits recommended for the MINZ and BCZ. We note that the noise limits for the MINZ have not changed from what was notified and accept these are appropriate based on the expert evidence. We note that the recommended noise limit for the BCZ has changed from being the same as those notified for the MINZ to a recommendation that no limits apply. We accept this is appropriate given the BCZ boundaries reflect existing mineral extraction activities.

414. The Panel has considered all of the recommended noise limits for the various zones and accept the expert evidence of Mr Peakall that these are appropriate, and the view of Ms Evans that they support the outcomes sought for those zones.

415. The Panel recommends new Rule NOISE-RX is renumbered as NOISE-R5.

416. In relation to the remainder of the other submissions on NOISE-R5, NOISE-R6, NOISE-R7, NOISE-R8 and NOISE-R11, the Panel agree that these are rejected for the reasons outlined by Ms Evans.

NOISE-R9

417. The Panel agrees with Ms Evans' reasoning and recommended amendments to NOISE-R9, as shown in Appendix 1 of the Right of Reply.

418. In response to Panel questions, Ms Evans reconsidered her recommendation in the s42A Report to include a new clause (2) requiring activities to be conducted in accordance with a Port Noise Management Plan. She advised that after further discussions with Mr Peakall, she recommended that noise management plans required by the Port Noise Standard (NZ6809:1999 Acoustic Port Noise Management and Land Use Planning) should be included as advice note rather than part of the rule. We agree this is appropriate.

419. The Panel recommends NOISE-R9 is renumbered as NOISE-R6.

420. In relation to the remainder of the other submissions on NOISE-R9 the Panel agree that these be rejected on the basis of the conclusions reached by Ms Evans.

NOISE-R10

421. The Panel agrees with Ms Evans' reasoning and recommended amendments to NOISE-R10, as shown in Appendix 1 of the Right of Reply.

422. The Panel agrees with the Ms Evans' recommended amendment to include reference to a Noise Management Plan as an Advice Note not as a rule as initially recommended in the 42A Report. We note that Mr Peakall, in his Reply evidence, advised that not all airports are required to prepare noise management plans and he considered it was not necessary to have this as a rule to control noise emissions. On this basis, the Panel consider it more appropriate as an advice note.

423. The Panel notes the agreement reached between Mr Peakall and Dr Chiles to add a new clause (3). We consider it is appropriate to exempt larger passenger aircraft to undertake essential unplanned testing during the daytime. We consider small aircraft for scheduled passenger

services will be able to comply with the noise limits. The Panel include an advice note to assist interpretation of the rule.

424. The Panel recommends NOISE-R10 is renumbered as NOISE-R7.

425. In relation to the remainder of the other submissions on NOISE-R10, the Panel agree that these are rejected on the basis of the conclusions reached by Ms Evans.

NOISE-R12

426. The Panel agrees with Ms Evans' reasoning and recommended amendments to NOISE-R12, as shown in Appendix 1 of the Right of Reply.

427. The Panel agrees with Ms Evans' recommended amendments to NOISE-R12, The Panel notes the deletion of NOISE-R12 (g) is a correction as this is a repeat of clause (a), and the Panel considers that the additional clause *(k) The functional need and/or operational need of the activity* as recommended in the 42A report will provide direction to plan users to consider the requirements of the activity with respect to potential noise effects and mitigation. The Panel notes the recommended additional clause (k) will now change to (j) as a consequence of the recommended deletion of clause (g).

428. The Panel recommends NOISE-R12 is renumbered as NOISE-R8.

429. In relation to the remainder of the other submissions on NOISE-R12 the Panel agree that these are rejected on the basis of the conclusions reached by Ms Evans.

NOISE-R13

430. The Panel accepts Ms Evans' recommendation to retain this rule as the default for Rule NOISE-R3, as shown in Appendix 1 of the Right of Reply.

431. The Panel recommends new NOISE-R13 is renumbered as NOISE-R9.

NOISE-R13A

432. The Panel agrees with Ms Evans' recommendation to add a new rule as a consequential amendment to adding the noise contours to address the submission points in relation to protecting the existing lawfully established activities undertaken at the Westport Rifle Range. We note this reflects the agreement recorded in JWS #1.

433. The Panel recommends new NOISE-R13A is renumbered as NOISE-R10.

NOISE-APP1 - Acceptable Construction Design for Acoustic Insulation Requirements for New Buildings for Use by a Sensitive Activity Subject to NOISE-R3.

434. The Panel agrees with Ms Evans recommended amendment to include a new NOISE-APP1 providing guidance on acceptable construction design for acoustic insulation requirements for new buildings for use by a sensitive activity as required by NOISE-R3. We agree this provides improved certainty and clarity to Plan users as to how these standards can be achieved.

Hearing Panel's Recommendation

435. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends the submission points identified in the footnotes below are accepted or accepted in part, and recommend amendments to the **Noise – Ngā Oro Rules** and to add new **NOISE-APP1** as follows:

Noise Rules

Permitted Activities

NOISE - R1 General Standards

All activities must comply with the following relevant standards.

1. Noise levels arising from activities must be measured and assessed in accordance with the New Zealand Standard NZS 6801:2008 Acoustics - Measurement of environmental sound and the New Zealand Standard NZS 6802:2008 Acoustics - Environmental noise,[52] except where more specific requirements apply.

2. The noise from any construction work activity must be measured and assessed in accordance with the requirements of New Zealand Standard NZS6803:1999 Acoustics – Construction noise. Construction work is defined in New Zealand Standard NZS 6803:1999 Acoustics – Construction noise.

~~3. Noise from mobile noise sources shall comply with the noise limits set out in Tables 2 and 3 of NZS 6803:1999 Acoustics - Construction Noise, with reference to "construction noise" taken to refer to "mobile noise sources";~~ [53]

3. Noise from aerodromes, airfields or airports not subject to NOISE-R10 must be measured and assessed in accordance with New Zealand Standard NZS 6805:1992 Airport Noise Management and Land Use Planning.[54]

4. Noise from new or altered roads must be measured and assessed in accordance with New Zealand Standard NZS 6806:2010 Acoustics - Road-traffic noise - New and altered roads.[55]

~~4.~~**5.** Noise from wind turbines ~~shall~~ **must**[56] be measured **and assessed**[57] in accordance with ~~section 7.7 of~~[58] NZS 6808: 2010 Acoustics Wind Farm Noise;

~~5.~~**6.** Noise from Helicopter Landing areas ~~shall~~ **must**[59] be ~~managed~~ **measured and assessed**[60] in accordance with,[61] and comply with the noise standards and limits of,[62] NZS 6807: 1994 Noise Management and Land Use Planning for Helicopter Landing Area.

[52] RMA Schedule 1, clause 16(2)

[62] RMA Schedule 1, clause 16(2)

7. Noise from port activities must be managed in accordance with the noise standards and limits, control boundaries and methods of measurement as outlined in NZS 6809: 1999 Acoustics Port Noise Management and Land Use Planning.[63]

Activity status where compliance not achieved: Restricted Discretionary

NOISE-R2 Emissions of Noise in All Zones

Activity Status Permitted

Where the following activities are exempted from meeting Zone noise standards:

1. ~~Intermittent residential activities~~**Noise associated with use of the site for residential activity, including**[64] use of lawn mowers, vehicles, machinery or equipment operated and maintained in accordance with the manufacture**r'**s[65] specifications ~~and associated with the use of a site for a residential activity~~[66] ~~used on an intermittent basis (e.g. spraying, harvesting, etc);~~[67]
2. Any warning device or siren used by emergency services for emergency purposes (and routine testing and maintenance of these);
3. Activities at emergency service facilities associated with emergency response and emergency response training;
4. Helicopters used for an emergency and as an air ambulance;
5. The use of generators and mobile equipment (including vehicles) for emergency purposes, including testing and maintenance not exceeding ~~2~~**two**[68] weeks in duration, where they are operated by emergency services, or lifeline utilities **or regionally significant infrastructure**;[69]
6. People noise at recreational activities, such as sporting events or the noise from children at school ~~or daycare facilities~~[70] or in residential dwellings. This ~~did~~ **does**[71] not include any amplified noise;
7. Vehicles being driven on a road (within the meaning of Section 2(1) of the Transport Act 1998), or within a site as part of or compatible with a**n** ~~normal residential~~ activity **provided for as a permitted activity in that zone;**[72]
8. Trains **operating**[73] on rail lines (public or private) and crossing bells within road reserve, including at railway yards, railway sidings or stations. However, this exemption ~~did~~ **does**[74] not apply to the testing (when stationary), maintenance, loading or unloading of trains;
9. Road construction work where management controls are in place to mitigate the emission of noise;
10. ~~Any residential activity on the same site as a noise source being assessed;~~[75]

v. Does not generate more than 35 dB $L_{A\,eq\,(30s)}$ **(30s)**[120] when measured **at any point where a person associated with a sensitive activity could be located, and no less than** ~~at least~~[121] 1m away from any grille or diffuser.

Advice Note:

1. Compliance with Rule NOISE - R3 will be achieved if, prior to the construction of any building containing a **new or altered**[122] habitable room **and/or space used for sleeping,**[123] an acoustic design certificate from a suitably qualified acoustic engineer is provided to the relevant district council stating that the design will achieve compliance with the relevant standard. The building shall be designed, constructed and maintained in accordance with the design certificate; or.

2. For NOISE-R3.1, NOISE-R3.2, NOISE-R3.4, NOISE-R3.5 and NOISE-R3.6.a, compliance will be achieved if the construction conforms to the acceptable solutions listed in NOISE-APP1 - Acceptable constructions requirement, Part A and meets the ventilation requirements of NOISE-R3.7.[124]

3. For NOISE-R3.3, compliance will be achieved if the construction conforms to the acceptable solutions listed in NOISE-APP1 - Acceptable constructions requirement, Part B and meets the ventilation requirements of NOISE-R3.7. [125]

Activity status where compliance not achieved: Restricted Discretionary

NOISE-R4 Emission of Noise for Temporary Military Training Activities

Activity Status Permitted

Where the following noise standards are complied with:

1. Weapons firing and/or the use of explosives:
   a. Notice is provided to the Council at least ~~5~~**five**[126] working days prior to the commencement of the activity;
   b. The activity complies with the following minimum separation distances to the notional boundary of any building housing a sensitive activity:
      i. 7am to 7pm: 500m;
      ii. 7pm to 7am: 1~~.~~250m[127]
   c. Where the minimum separation distances specified above cannot be met, the activity shall comply with the following peak sound pressure level when measured at the notional boundary of any building housing a sensitive activity:
      i. 7am to 7pm: 95 dB ~~C~~L_{Cpeak}; [128]
      b. 7pm to 7am: 85 dB ~~C~~L_{Cpeak}. [129]

~~c. 10:00pm to 7:00am all days - 75 dB $_{LAFmax}$~~

~~**Activity status where compliance not achieved:** Restricted Discretionary~~

NOISE – R~~9~~6	**Emission of Noise within the PORTZ - Port Zone**

Activity Status Permitted

Where:

1. The maximum noise generated from activities is in accordance with the limits, control boundaries and methods of measurement as outlined in NZS 6809: 1999 Acoustics Port Noise Management and Land Use Planning.

Activity Status if compliance not achieved: Restricted Discretionary

Advice Note:

[136] Te Mana Ora (Community and Public Health) of the NPHS/ Te Whatu Ora S190.540 and others
[137] Te Mana Ora (Community and Public Health) of the NPHS/ Te Whatu Ora S190.540 and others

A Port Noise Management Plan is recommended by NZS 6809 that sets out the details of how NZS: 6809 is being implemented. [138]

NOISE - R~~10~~7 Emission of Noise within the AIRPZ - Airport Zone

Activity Status Permitted

Where:

1. Noise from aircraft operations at Hokitika and Westport Airports**, Haast Airfield**[139] and Greymouth and Karamea Aerodromes must be measured and assessed in accordance with NZS 6805: 1992 Airport Noise Management and Land Use Planning;
2. Noise from helicopter operations at Franz Josef Heliport must be measured and assessed in accordance with NZS 6807: 1994 Noise Management and Land Use Planning for Helicopter Landing Areas;

3. Noise from aircraft engine testing is exempt from NOISE-R7.1 above, and:

(a) is not subject to a noise limit if it is essential unplanned testing occurring between 7:00am and 10:00pm, for regular scheduled passenger services to and from other regions with fixed wing aircraft with at least eight passenger seats; and

(b) for all other cases must comply with the noise limits set out in NOISE-R5; [140]

~~3. The maximum noise levels from aircraft engine testing at any point within the boundary of a site within a RESZ - Residential Zone, MPZ - Māori Purpose Zone or RURZ - Rural Zone shall not exceed:~~

~~a. on any day 7.00am to 10.00pm exceed 55 dB $_{LAeq\ (15\ hour)}$~~

~~**b.** on any day 10.00pm to 7.00am not exceed 45 dB $_{LAeq\ (9\ hours)}$ and 75 dB $_{LAmax}$; and~~[141]

4. The maximum noise generated from aircraft operations at Hokitika **and Westport Airports, Haast Airfield**[142] **and Greymouth and Karamea Aerodrome**[143] over any 90 continuous days shall not exceed:

a. 55 dB $\mathbf{L}_{~~Ldn~~}$[144] at or beyond the noise contour boundary shown on the planning maps; and

5. The maximum noise generated from helicopter operations at Franz Josef Heliport over any ~~7~~**seven**[145] continuous days, shall not exceed:

a. 50 dB $\mathbf{L}_{~~Ldn~~}$[146] at or beyond the noise contour boundary shown on the planning maps; and

6. Standards 4 and 5 above do not apply to:

a. Aircraft landing or taking off in an emergency; and

b. Emergency flights required to rescue persons from life threatening situations or to transport patients, human organs or medical personnel in medical emergency situations; and

[138] Te Mana Ora (Community and Public Health) of the NPHS/ Te Whatu Ora S190.544
[139] Consequential to recommendation to include Haast Airfield in the Airport Zone
[140] Te Mana Ora (Community and Public Health) of the NPHS/ Te Whatu Ora S190.545 and consequential amendment to delete clause 3 of NOISE-R10 and adding new NOISE-RX (renumbered NOISE-R5)
[141] Te Mana Ora (Community and Public Health) of the NPHS/ Te Whatu Ora S190.540 and others
[142] Consequential to recommendation to include Haast Airfield in the Airport Zone
[143] Te Mana Ora (Community and Public Health) of the NPHS/ Te Whatu Ora S190.545
[144] RMA Schedule 1, clause 16(2)
[145] RMA Schedule 1, clause 16(2)
[146] RMA Schedule 1, clause 16(2)

c. Aircraft undertaking firefighting duties; and

d. Military aircraft movements; and

e. Aircraft using the Hokitika Airport in preparation for and participation in air shows.

~~7. In order to audit compliance with this rule, noise level monitoring must be carried out for a minimum of three months every five years with the resulting report forwarded to the Council within one month of that monitoring being completed.~~[147]

Advice Notes:

1. A Noise Management Plan may be prepared that sets out details of how NZS 6805 or NZS 6807 is being implemented. [148]

2. Fixed wing aircraft with less than eight passenger seats are unlikely to exceed noise limits when undertaking aircraft engine testing so are exempt from the restriction in hours in clause 3(a) that apply to fixed wing aircraft with at least eight passenger seats.

Activity Status if compliance not achieved: Restricted Discretionary

~~NOISE – R11~~ **~~Emission of Noise within the BCZ - Buller Coalfield Zone and MEZ - Mineral Extraction Zone~~**[149]

~~Activity Status Permitted~~

~~Where:~~

~~1. The maximum noise generated from activities did not exceed the following limits at Amax any point within the notional boundary of any sensitive activity within any site receiving noise:~~

~~1. 7:00am to 10:00pm Monday to Friday and 7:00am to 10:00pm weekends and public holidays: 55 dB $L_{Aeq\ (15\ min)}$~~

~~2. 10:00pm to 7:00am Monday to Friday and 10:00pm to 7:00am weekends and public holidays: 45 dB $L_{Aeq\ (15\ min)}$~~

~~3. 10:00pm to 7:00am all days - 75 dB L_{AFmax}~~

~~Activity status where compliance not achieved:~~ ~~Restricted Discretionary~~

NOISE–R~~12~~8 Emission of Noise not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Discretion is restricted to:

a. Effects on the health and wellbeing of people;

b. Ambient noise levels and any special character noise from any existing activities, the nature and character of any changes to the sound received at any receiving site,[150] and the degree to which such sounds are compatible with the surrounding activities;

c. The level, hours of operation, duration and nature of the noise;

d. The primary purpose and the frequency of use of the activity;

e. Proximity and nature of nearby activities and the adverse effects they may experience from the noise;

[147] Te Mana Ora (Community and Public Health) of the NPHS/ Te Whatu Ora S190.540 and others
[148] Te Mana Ora (Community and Public Health) of the NPHS/ Te Whatu Ora S190.545
[149] Te Mana Ora (Community and Public Health) of the NPHS/ Te Whatu Ora S190.540 and others
[150] RMA Schedule 1, clause 16(2)

f. Effects on character and amenity values of the surrounding environment; and

~~**g. Effects on the health and wellbeing of people;**~~[151]

h. Effects on wildlife and habitat values;

i. The temporary or permanent nature of any adverse effects;

j. Any noise reduction measures**~~;~~ and**

k. The functional need or operational need of the activity.[152]

Activity status where compliance not achieved: N/A

NOISE-R~~13~~9	**New Buildings for Use by a Sensitive Activity and Additions to Existing Buildings for Use by a Sensitive Activity not meeting Acoustic Insulation Requirements of Rule NOISE - R3**

Activity Status Restricted Discretionary

Where:

Discretion is restricted to:

a. The provision of a report from an acoustic specialist which provides evidence that the level of acoustic insulation is appropriate to ensure the amenity of present and future residents of the site; and

b. The impact of any sensitive activity that ~~did~~ **does**[153] not provide the required acoustic insulation on the ability of existing or future permitted ~~business~~[154] activities to operate or establish without undue constraint.

Activity status where compliance not achieved: N/A

NOISE–R10	**Buildings for Use by a Sensitive Activity and Additions to Existing Buildings for Use by a Sensitive Activity within the 60 dB L_{AFmax} contour of the Westport Rifle Range Noise Overlay**

Activity Status: Restricted Discretionary

Discretion is restricted to:

a. The provision of a report from an acoustic specialist which provides evidence that the level of noise mitigation is appropriate to ensure the amenity of present and future residents of the site; and

b. The impact of any sensitive activity that did not provide the required noise mitigation on the ability of lawfully established activities at the Westport Rifle Range to operate without undue constraint.

Activity status where compliance not achieved: N/A[155]

NOISE-APP1	**Acceptable Construction Design for Acoustic Insulation Requirements for New Buildings for Use by a Sensitive Activity Subject to Noise - R3**[156]

[154] In response to submitter evidence
[155] Dean Trott S330.002, Westport Pistol Club S336.016, Chris Hartigan S338.002, Westport Rifle Club Incorporated S457.009
[156] KiwiRail Holdings Limited S442.088, Gina Hogarth S304.002, Misato Nomura S151.002, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.211

Part A: Approved construction requirements for compliance with NOISE-R3.1, NOISE-R3.2, NOISE-R3.4. NOISE-R3.5, NOISE-R3.6.a.

Applicability	
	Construction requirements detailed in this Appendix are only applicable where: **1. The building is a single level construction;** **2. The floor of the building is a reinforced concrete slab;** **3. No habitable room of the building is located less than 4.5 metres from the State Highway road boundary or railway track edge;** **4. The total area of glazing in any habitable room is no greater than 20% of the total area of external walls of that room; and** **5. The roof of the building is a standard timber truss design, with a pitch of not less than 15 degrees. Ventilation of the roof space must only be via casual ventilation typical of the jointing, capping and guttering detail used in normal construction.** **In all other situations, a design report from a suitably qualified acoustics specialist is required.**
Construction Options	
Exterior Walls Option 1	**Exterior cladding of aerated concrete or similar, with a surface mass not less than 27 kg/m^2.** • **Timber framing of not less than 90 mm, with studs at 600 mm centres. A ventilated cavity is not required under this option but is permissible, with or without a rigid air barrier.** • **Fibrous insulation of minimum R2.6. This includes fibreglass, polyester and wool, but does not include polystyrene or other foam sheet insulation products.** • **One layer of 10 mm thick Standard Gib board or alternative gypsum board having a surface mass not less than 6 kg/m^2.**
Exterior Walls Option 2	**Exterior cladding of profiled sheet metal not less than 0.45 mm thick.** • **20 mm thick battens forming a ventilated cavity,** • **Rigid air barrier consisting of Plywood not less than 9 mm thick or Fibre Cement not less than 4 mm thick, or alternative sheet product having a surface mass not less than 5 kg/m^2.** • **Timber framing of not less than 90 mm, with studs at 600 mm centres,** • **Fibrous insulation of minimum R2.6. This includes fibreglass, polyester and wool, but does not include polystyrene or other foam sheet insulation products,** • **One layer of 10 mm thick Standard Gib board or alternative gypsum board, having a surface mass not less than 6 kg/m^2,**
Exterior Walls Option 3	**Exterior cladding of Fibre Cement weatherboards, with a surface mass not less than 18 kg/m2 (Hardies Linea or equivalent).** • **20 mm thick battens forming a ventilated cavity.**

	• **Rigid air barrier consisting of Plywood not less than 7 mm thick or Fibre Cement not less than 4 mm thick, or alternative sheet product having a surface mass not less than 3.8 kg/m2.** • **Timber framing of not less than 90 mm, with studs at 600 mm centres.** • **Fibrous insulation of minimum R2.6. This includes fibreglass, polyester and wool, but does not include polystyrene or other foam sheet insulation products.** • **One layer of 10 mm thick Standard Gib board or alternative gypsum board, having a surface mass not less than 6 kg/m^2,**
Glazing and Exterior doors - All options	• **Windows to consist of double glazing consisting of a minimum of two layers of 4 mm thick glass separated by a 12 mm air gap, with airtight seals.** • **External doors to be either double glazed to the same standard as windows or a solid timber construction with a surface mass not less than 24 kg/m^2 and incorporating full perimeter seals.**
Roof – All Options	• **Profiles metal roofing not less than 0.45 mm thick profiled steel or tiles.** • **Fibrous insulation of minimum R6. This includes fibreglass, polyester and wool, but does not include polystyrene or other foam sheet insulation products,** • **Two layers of 10 mm Standard Gib board or alternative gypsum board, with each layer having a surface mass not less than 6 kg/m^2.**

Part B: Approved construction requirements for compliance with NOISE-R3.3

Any new buildings or alterations to existing buildings containing a sensitive activity, closer than 60 metres to the boundary of an existing railway track and is a single storey framed building with:

a. A constant level floor slab on a full-surface vibration isolation bearing with natural frequency not exceeding 10 Hz, installed in accordance with the supplier's instructions and recommendations; and

b. Vibration isolation separating the sides of the floor slab from the ground; and

c. No rigid connections between the building and the ground.

In all other situations, a design report from a suitably qualified acoustic specialist is required demonstrating compliance with NOISE-R3.3.

New buildings and alterations must meet the ventilation requirements of NOISE-R3.7.

APPENDIX 1 – RECOMMENDATIONS ON PLAN PROVISION

Definitions

AUDIBLE BIRD SCARING DEVICE
means gas gun, avian distress alarm or other such device used for the purpose of scaring birds.

Noise Chapter

Overview

The generation of noise is often a necessary part of many activities undertaken on the West Coast/Te Tai o Poutini. While it is important that such activities are able to operate, noise can result in potential adverse effects on people's health and wellbeing, and their enjoyment of the environment. Adverse effects associated with noise can vary depending on a number of factors, including frequency, timing, duration and characteristics of the noise, the distance between the source and receiver, and any reduction measures. The background sound level can influence the acceptability or annoyance of noise, and this can also vary throughout the West Coast/Te Tai o Poutini.

Where ~~noise~~ sensitive activities are established near existing noise-generating activities, or areas where higher noise levels are to be expected, reverse sensitivity effects can arise, potentially resulting in the existing noise-generating activities being constrained, in terms of their ongoing operation or expansion. This is a particular concern for important services and community facilities, including Airports**, Airfields, Aerodromes,** and Heliports, Sports Grounds and Stadiums, the State Highway, Railway Corridors and the Ports, which could be constrained if reverse sensitivity effects arise.

This Chapter controls the nature and timing of noise-generating activities, **including maintaining the amenity of existing sensitive activities by managing noise levels,** and manages new sensitive activities where these are located close to established noise-generating activities or zones which have or are expected to have elevated noise levels. The provisions in this chapter apply to all other chapters within this Plan, unless otherwise specified.

NOISE – O1	The benefits of noise generating activities are provided for in a way that is compatible with the role, function and character of each zone and does not **result in unreasonable noise that may** compromise community health, safety and wellbeing.
NOISE-O2	The function and operation of ~~existing and permitted future~~ **lawfully established** noise generating activities**,** ~~and~~ community **facilities, and** infrastructure, **including regionally significant infrastructure** are not compromised by adverse effects, including reverse sensitivity effects, from ~~noise~~ sensitive activities.
NOISE – O3	The health and wellbeing of people and communities, **including sensitive activities,** are protected from significant levels of noise.

NOISE – P1	Enable the generation of noise ~~when it is~~ of a type, character, scale and level that is appropriate to the zone, having regard to: a. The purpose, character and qualities of the zone that the activity is located in;

	b. The nature, frequency and duration of the noise generating activity; c. Whether the noise generating activity is ~~critical~~ **regionally significant** infrastructure; d. Methods of mitigation; and e. The sensitivity of the surrounding environment.
NOISE – P2	Require sensitive activities sited in higher noise environments to be located and designed ~~so as~~ to minimise adverse effects on the amenity values, public health and wellbeing and the safety of occupants and minimise sleep disturbance from noise, while taking into account: a. The type of noise generating activity; and b. Other noise sources in the area; and c. The nature and occupancy of the ~~noise~~ sensitive activity; and d. Mitigation measures, including acoustic insulation, screening and topography. For the purpose of NOISE - P2 higher noise environments include: e. CMUZ - Commercial and mixed-use zones; f. INZ - Industrial zones, PORTZ - Port Zone, AIRPZ - Airport Zone, STADZ - Stadium Zone, BCZ - Buller Coalfield Zone, MINZ - Mineral Extraction Zone and HOSPZ - Hospital Zone; ~~and~~ g. Locations in close proximity to a State Highway and the Rail~~way~~ Corridor; **and** **h. The Westport Rifle Range Noise Overlay.**
NOISE – P3	Within the Airport Noise Contour Boundary overlay avoid sensitive activities, unless noise mitigation measures are implemented that avoid sleep disturbance and minimise other adverse effects on the amenity values of occupants.
NOISE-P4	Ensure noise effects generated by an activity are of a type, scale and level that are appropriate for the predominant role, function and character of the receiving environment and protect the health and wellbeing of people and communities by having regard to: a. Maximum noise limits to reflect the character and amenity of each zone; b. Type, scale and location of the activity in relation to any ~~noise~~ sensitive activities; c. Hours of operation and duration of activity; d. The temporary or permanent nature of any adverse effects; ~~and~~ e. The ability to internalise and/or **avoid, remedy or mitigate adverse effects** ~~minimise any conflict with adjacent activities~~; **and** f. **The functional need or operational need of the activity**.

Noise Rules
Permitted Activities

NOISE - R1 General Standards

All activities must comply with the following relevant standards.

1. Noise levels arising from activities must be measured and assessed in accordance with the New Zealand Standard NZS 6801:2008 Acoustics - Measurement of environmental sound and the New Zealand Standard NZS 6802:2008 Acoustics - Environmental noise**,** except where more specific requirements apply.
2. The noise from any construction work activity must be measured and assessed in accordance with the requirements of New Zealand Standard NZS6803:1999 Acoustics – Construction noise. Construction work is defined in New Zealand Standard NZS 6803:1999 Acoustics – Construction noise.

~~3. Noise from mobile noise sources shall comply with the noise limits set out in Tables 2 and 3 of NZS 6803:1999 Acoustics - Construction Noise, with reference to "construction noise" taken to refer to "mobile noise sources";~~

3. Noise from aerodromes, airfields or airports not subject to NOISE-R10 must be measured and assessed in accordance with New Zealand Standard NZS 6805:1992 Airport Noise Management and Land Use Planning.

4. Noise from new or altered roads must be measured and assessed in accordance with New Zealand Standard NZS 6806:2010 Acoustics - Road-traffic noise - New and altered roads.

~~4.~~**5.** Noise from wind turbines ~~shall~~ **must** be measured **and assessed** in accordance with ~~section 7.7 of~~ NZS 6808: 2010 Acoustics Wind Farm Noise;

~~5.~~**6.** Noise from Helicopter Landing areas ~~shall~~ **must** be ~~managed~~ **measured and assessed** in accordance with**,** and comply with the noise standards and limits of**,** NZS 6807: 1994 Noise Management and Land Use Planning for Helicopter Landing Area.

7. Noise from port activities must be managed in accordance with the noise standards and limits, control boundaries and methods of measurement as outlined in NZS 6809: 1999 Acoustics Port Noise Management and Land Use Planning.

Activity status where compliance not achieved: Restricted Discretionary

NOISE-R2 Emissions of Noise in All Zones

Activity Status Permitted

Where the following activities are exempted from meeting Zone noise standards:

1. ~~Intermittent residential activities~~**Noise associated with use of the site for residential activity, including** use of lawn mowers, vehicles, machinery or equipment operated and maintained in accordance with the manufacture**r'**s specifications ~~and associated with the use of a site for a residential activity used on an intermittent basis (e.g. spraying, harvesting, etc);~~
2. Any warning device or siren used by emergency services for emergency purposes (and routine testing and maintenance of these);
3. Activities at emergency service facilities associated with emergency response and emergency response training;
4. Helicopters used for an emergency and as an air ambulance;
5. The use of generators and mobile equipment (including vehicles) for emergency purposes, including testing and maintenance not exceeding ~~2~~**two** weeks in duration, where they are operated by emergency services, or lifeline utilities **or regionally significant infrastructure**;

6. People noise at recreational activities, such as sporting events or the noise from children at school ~~or daycare facilities~~ or in residential dwellings. This ~~did~~ **does** not include any amplified noise;
7. Vehicles being driven on a road (within the meaning of Section 2(1) of the Transport Act 1998), or within a site as part of or compatible with a**n** ~~normal residential~~ activity **provided for as a permitted activity in that zone;**
8. Trains **operating** on rail lines (public or private) and crossing bells within road reserve, including at railway yards, railway sidings or stations. However, this exemption ~~did~~ **does** not apply to the testing (when stationary), maintenance, loading or unloading of trains;
9. Road construction work where management controls are in place to mitigate the emission of noise;
10. ~~Any residential activity on the same site as a noise source being assessed;~~
11. Agricultur**al**~~e~~, **pastoral and** horticultur**al**~~e~~ ~~and pastoral farming~~ activities undertaken ~~for a limited duration, including using agricultural vehicles, machinery, aircraft or equipment used on a seasonal or intermittent basis~~ in the General Rural **Zone** and Rural Lifestyle **Z**~~z~~one~~s~~;
12. ~~Infrequent a~~**A**ircraft **take off and** landing, **including helicopter movements**, ~~for~~ **associated with** rural production **activities and conservation activities at least 250 metres from any sensitive activity or** ~~and purposes on an intermittent basis~~ **for no more than 30 days in any 12 month period per site.** ~~including aerial topdressing and helicopter movements~~;
13. Non-commercial motorised watercraft operating on the surface of waterbodies;
14. Rifle ranges located within the Rifle Range Protection Area **during the hours of 7am to 10pm**;
15. ~~Impulsive sounds (such as hammering and bangs) and dog barking noise which are poorly assessed by reference to NZS 6802:2008 Acoustics Environmental Noise;~~
16. The noise is emitted from an audible bird scaring device between the hours of half an hour before sunrise and until half an hour after sunset, not used at a frequency of more than 12 events per hour, **and generating less than 65 dB_{LAE} for each event measured at any point at or within the boundary of any site within a Residential Zone, Settlement Zone, Māori Purpose Zone, Hospital Zone, Open Space Zone, Natural Open Space Zone, Scenic Visitor Zone, Future Urban Zone or at the notional boundary of any site in the General Rural Zone or Rural Lifestyle Zone**; and
17. The noise is from a Temporary Activity where the temporary activity occurs between 7:00am and 10:00pm, and **no more than 12 days per calendar year** ~~only~~, and if operating outside of these hours complies with the underlying noise standards of the zone. **This does not include any amplified noise.**

Advice Note:

NOISE - R2.12 does not apply to land held or managed under the Conservation Act 1987.

Activity Status where compliance not achieved: ~~**Restricted Discretionary**~~ **N/A**

NOISE-R3	**Acoustic Insulation Requirements for New or Altered Buildings for Use by a Sensitive Activity**

Activity Status: Permitted

Where:

1. The building will be used by a sensitive activity and is located within **the Road Noise Overlay shown on the planning maps:**

~~a. 80m of the edge of the carriageway of a State Highway with a speed limit of 70kph or greater; or~~

~~**b.** 40m of the edge of the carriageway of a State Highway with a speed limit of less than 70kph;~~ where**:**

~~iv.~~ **a.** Any habitable room ~~used for a sensitive activity~~ **and/or space used for sleeping** must be designed, ~~and~~ constructed **and maintained** to achieve a ~~minimum~~ **maximum** internal noise ~~limit~~ **level** of 40 dB ~~LA~~$L_{A\text{eq }(24h)}$ **(24h)**; and

~~v. Compliance with i. above must be achieved based on an existing noise level with 3 decibel addition adjacent to State Highways allowing for future traffic increase; and~~

b. Compliance with i. above must be achieved based on existing measured or predicted external road-traffic noise levels with the addition of 3 dB; and

~~vi.~~ **c.** Any **new or altered habitable room and/or space used for sleeping** ~~building~~ **within 20 metres of the edge of the carriageway** must be designed, constructed and maintained to achieve vibration limits not exceeding 0.3mm/s (Class C criterion Maximum Weighted Velocity, Vw,95)~~;~~**.**

2. ~~c.~~ 46**10**0m of the edge of the tracks of ~~a~~ **any** railway line **except for the Hokitika line** where**:**

~~i. A~~**a**ny **new or altered** habitable room used for a sensitive activity **and/or space used for sleeping:**

a. ~~must be~~ **Is** designed**,** ~~and~~ constructed **and maintained** to achieve a maximum internal noise ~~limit~~ **level** of 35 dB ~~LA~~$L_{A\text{eq }(1h)}$ **(1h)~~;~~.**

b. Compliance **with i. above** must be achieved based on an assumption of 70 **dB**~~LA~~$L_{A\text{eq }(1h)}$ **(1h)** at a distance of 12m from the railway track and shall be deemed to reduce at a rate of 3 dB per doubling of distance up to 40m~~;~~, **or** ~~ii.~~

c. It is at least 50m from any railway network, and is designed so that a noise barrier completely blocks line-of-sight from all parts of doors and windows to all points 3.8m above railway tracks.

3. ~~c.~~ **60m of the edge of the tracks of any railway line, except for the Hokitika line, where** ~~**iii.** Any building~~ **any new or altered habitable room and/or space used for sleeping** must be designed, constructed and maintained to achieve vibration limits not exceeding 0.3mm/s (Class C criterion Maximum Weighted Velocity, Vw,95);

4. ~~d.~~ The 50 dB~~A~~ Noise Contour boundary of Franz Josef Heliport or the 55 dB~~A~~ Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome **or Haast Airfield**; where:

a. Any **new or altered** habitable room **and/or space used for sleeping** must be designed, ~~and~~ constructed **and maintained** to achieve a ~~minimum~~ **maximum** indoor design noise level of 40 dB L_{dn};

5. ~~e.~~ Any CMUZ - Commercial and Mixed Use Zone, INZ - Industrial Zone or AIRPZ - Airport Zone, PORTZ - Port Zone, STADZ - Stadium Zone, HOSZ - Hospital Zone, BCZ - Buller Coalfield Zone or MINZ - Mineral Extraction Zone; where**:**

a. The building is designed**,** ~~and~~ constructed **and maintained** to ensure that the following indoor design noise levels are not exceeded:

A. **40**~~35~~ dB LA_{Aeq} inside **any new or altered habitable room** ~~bedrooms~~;

B. **35**~~40~~ dB ~~L~~**L**$_{Aeq}$ inside ~~any other habitable room, except for~~ **new or altered** bedrooms **between 10pm and 7am**; and

6. Between the 55 dB L_{AFmax} and 60 dB L_{AFmax} contours of the Westport Rifle Range Noise Overlay shown on the planning maps:

a. Any habitable room used for a sensitive activity and/or space used for sleeping must be designed, constructed and maintained to achieve a maximum internal noise level of 35 dB$_{LAFmax}$ from outdoor noise associated with lawfully established activities at the Westport Rifle Range Protection Area; and

b. An outdoor living areas not less than 30m^2 must be screened from the Westport Rifle Range Protection Area to achieve an outdoor noise level not exceeding 50 dB L_{AFmax}.

7. ~~**f.**~~ Where windows need to be closed to achieve the internal noise levels specified in ~~a. to e.~~ **1-6** above an alternative ventilation system shall be provided which achieves the following requirements:

i. Satisfies clause G4 of the New Zealand Building Code;

ii. Is adjustable by the occupant to control the ventilation rate in increments up to a high air flow setting that provides at least 6 air changes per hour; and

iii. Provides relief for equivalent volumes of spill air; and

iv. Provides cooling and heating that is controllable by the occupant and can maintain the inside temperature between 18~~o~~ºC and 25~~o~~ºC; and

v. Does not generate more than 35 dB $LA_{Aeq\ (30s)}$ **(30s)** when measured **at any point where a person associated with a sensitive activity could be located, and no less than** ~~at least~~ 1m away from any grille or diffuser.

Advice Note:

1. Compliance with Rule NOISE - R3 will be achieved if, prior to the construction of any building containing a **new or altered** habitable room **and/or space used for sleeping,** an acoustic design certificate from a suitably qualified acoustic engineer is provided to the relevant district council stating that the design will achieve compliance with the relevant standard. The building shall be designed, constructed and maintained in accordance with the design certificate; or.

2. **For NOISE-R3.1, NOISE-R3.2, NOISE-R3.4, NOISE-R3.5 and NOISE-R3.6.i, compliance will be achieved if the construction conforms to the acceptable solutions listed in NOISE-APP1 - Acceptable constructions requirement, Part A and meets the ventilation requirements of NOISE-R3.7.**

3. **For NOISE-R3.3, compliance will be achieved if the construction conforms to the acceptable solutions listed in NOISE-APP1 - Acceptable constructions requirement, Part B and meets the ventilation requirements of NOISE-R3.7.**

Activity status where compliance not achieved: Restricted Discretionary

NOISE-R4	**Emission of Noise for Temporary Military Training Activities**

Activity Status Permitted

Where the following noise standards are complied with:

1. Weapons firing and/or the use of explosives:
    a. Notice is provided to the Council at least ~~5~~**five** working days prior to the commencement of the activity;
    b. The activity complies with the following minimum separation distances to the notional boundary of any building housing a sensitive activity:
        iii. 7am to 7pm: 500m;
        iv. 7pm to 7am: 1~~.~~250m
    c. Where the minimum separation distances specified above cannot be met, the activity shall comply with the following peak sound pressure level when measured at the notional boundary of any building housing a sensitive activity:
        i. 7am to 7pm: 95 dB ~~C~~**L**$_{Cpeak}$;
        ii. 7pm to 7am: 85 dB ~~C~~**L**$_{Cpeak}$.
2. Mobile noise sources:
    a. Shall comply with the noise limits set out in Tables 2 and 3 of NZS6803:1999 Acoustics - Construction Noise, with reference to "construction noise" taken to refer to mobile noise sources.
3. Fixed (stationary) noise sources:
    a. Shall comply with the noise limits set out below when measured at the notional boundary of any building housing a sensitive activity:
        i. 7am to 7pm 55 dB L_{Aeq} (15 min)
        ii. 7pm to 10pm 50 dB L_{Aeq} (15 min)
        iii. 10pm to 7am 45 dB ~~L~~$_{Aeq}$ (15 min) and 75 dB L~~A~~**F**$_{AF}$ ~~max~~$_{max}$.

NOISE-R5	**Emission of noise for activities not provided for by NOISE-R2, NOISE-R4, NOISE-R9 and NOISE-R10**

Activity Status Permitted

Where:

1. **Noise from any activity shall not exceed the following noise limits at any point at or within the boundary of any site within any of the following zones:**

Zone	**Maximum Noise Limit**		
	Daytime (Monday–Friday) 7:00am-10:00pm	**Saturday, Sundays and Public Holidays 7:00 am – 10:00pm**	**Night-time 10:00pm-7:00am**

RESZ Residential Zone **SETZ Settlement Zone** **GRUZ General Rural Zone** **RLZ Rural Lifestyle Zone** **MPZ Māori Purpose Zone** **HOSZ Hospital Zone** **OSZ Open Space Zone** **NOSZ Natural Open Space Zone** **SVZ Scenic Visitor Zone** **FUZ Future Urban Zone**	**55 dB L_{Aeq}**	**50 dB L_{Aeq}**	**45 dB L_{Aeq}** **70 dB L_{AFmax}**

2. **Noise from any activity shall not exceed the following noise limits at any point at the notional boundary of any site within any of the following zones:**

Zone	**Maximum Noise Limit**		
	Daytime **(Monday–Friday) 7:00am -7:00pm**	**Monday-Friday 7:00pm – 10:00pm** **Saturday, Sundays and Public Holidays 7:00 am – 10:00pm**	**Night-time 10:00pm-7:00am**
GRUZ General Rural Zone **RLZ Rural Lifestyle Zone**	**55 dB L_{Aeq}**	**50 dB L_{Aeq}**	**45 dB L_{Aeq}** **70 dB L_{AFmax}**

3. **The maximum noise from any activity shall not exceed the following noise limits at any point at or within the boundary any site within any of following zones:**

Zone	**Maximum Noise Limit**		
	Daytime **(Monday–Friday) 7:00am-10:00pm**	**Saturday, Sundays and Public Holidays 7:00 am – 10:00pm**	**Night-time 10:00pm-7:00am**

SARZ Sport and Recreation Zone **AIRPZ Airport Zone** **CMUZ Commercial and Mixed Use Zones** **STADZ Stadium Zone** **LIZ Light Industrial Zone**	**60 dB L_{Aeq}**	**55 dB L_{Aeq}**	**50 dB L_{Aeq}** **75 dB L_{AFmax}**
GIZ General Industrial Zone **PORTZ Port Zone**	**65 dB L_{Aeq}**	**65 dB L_{Aeq}**	**65 dB L_{Aeq}**

4. **Noise from any activity shall not exceed the following noise limits at any point at the notional boundary of any sensitive activity within any of the following zones:**

Zone	**Maximum Noise Limit**		
	Daytime **(Monday–Friday) 7:00am-10:00pm**	**Saturday, Sundays and Public Holidays 7:00 am – 10:00pm**	**Night-time 10:00pm-7:00am**
MINZ Mineral Extraction Zone	**55 dB L_{Aeq}**	**55 dB L_{Aeq}**	**45 dB L_{Aeq}** **75 dB L_{AFmax}**

Activity Status when not achieved: **Restricted Discretionary**

~~**NOISE-R5 Emission of Noise in the RESZ - Residential Zones, SETZ - Settlement Zone and NOSZ - Natural Open Space Zone**~~

~~**Activity Status Permitted**~~

~~Where: 1. Noise generated by any activity shall not exceed the following noise limits at any point within another site in the RESZ - Residential Zones, SETZ - Settlement Zone and NOSZ - Natural Open Space Zone:~~

~~a. 7:00am to 7:00pm Monday to Friday and 8:00am to 5:00pm weekends and public holidays: 55 dB $L_{Aeq (15 min)}$~~

~~b. 7:00pm to 7:00am Monday to Friday and 5:00pm to 8:00am weekends and public holidays: 45 dB $L_{Aeq (15 min)}$~~

~~c. 7:00pm to 7:00am all days - 70 dB L_{AFmax}~~

~~**Activity status where compliance not achieved:** Restricted Discretionary~~

~~**NOISE-R6**~~	~~**Emission of Noise in the GRUZ - General Rural Zone, RLZ - Rural Lifestyle Zone, MPZ - Māori Purpose Zone, FUZ - Future Urban Zone, SARZ - Sport and Recreation Zone and OSZ - Open Space Zone**~~

~~**Activity Status Permitted**~~

~~Where:~~

~~1. Noise generated by any activity shall not exceed the following noise limits at any point within the notional boundary of any sensitive activity within any site receiving noise:~~

~~a. 7:00am to 10:00pm Monday to Friday and 8:00am to 8:00pm weekends and public holidays: 55 dB $L_{Aeq\ (15\ min)}$~~

~~b. 10:00pm to 7:00am Monday to Friday and 8:00pm to 8:00am weekends and public holidays: 45 dB $L_{Aeq\ (15min)}$~~

~~c. 10:00pm to 7:00am all days - 75 dB L_{AFmax}~~

~~Activity status where compliance not achieved: **Restricted Discretionary**~~

~~**NOISE-R7**~~	~~**Emission of Noise in all CMUZ - Commercial and Mixed Use Zones, HOSZ - Hospital Zone, STADZ - Stadium Zone and SETZ - PREC2 - Settlement Zone - Settlement Centre Precinct**~~

~~**Activity Status Permitted**~~

~~Where:~~

~~1. Noise generated by any activity shall not exceed the following noise limits at the notional boundary of any sensitive activity within any site receiving noise:~~

~~a. 6:00am to 11:00pm Monday to Friday and 7:00am to 10:00pm weekends and public holidays: 55 dB $L_{Aeq\ (15\ min)}$~~

~~b. 11:00pm to 6:00am Monday to Friday and 10:00pm to 7:00am weekends and public holidays: 45 dB $L_{Aeq\ (15\ min)}$~~

~~c. 11:00pm to 6:00am all days - 75 dB LAFmax~~

~~**Activity status where compliance not achieved:** Restricted Discretionary~~

~~**NOISE-R8**~~	~~**Emission of Noise within the GIZ - General Industrial and LIZ - Light Industrial Zone**~~

~~**Activity Status Permitted**~~

~~Where:~~

~~1. Noise generated by any activity shall not exceed the following noise limits at the notional boundary of any sensitive activity within any site receiving noise:~~

~~a. 7:00am to 10:00pm Monday to Friday and 7:00am to 10:00pm weekends and public holidays: 60 dB $L_{Aeq\ (15min)}$~~

~~b. 10:00pm to 7:00am Monday to Friday and 10:00pm to 7:00am weekends and public holidays: 45 dB $L_{Aeq\ (15\ min)}$~~

~~c. 10:00pm to 7:00am all days - 75 dB L_{AFmax}~~

~~**Activity status where compliance not achieved:** Restricted Discretionary~~

NOISE – R~~9~~6	**Emission of Noise within the PORTZ - Port Zone**

Activity Status Permitted

Where:

1. The maximum noise generated from activities is in accordance with the limits, control boundaries and methods of measurement as outlined in NZS 6809: 1999 Acoustics Port Noise Management and Land Use Planning.

Activity Status if compliance not achieved: Restricted Discretionary

Advice Note:

A Port Noise Management Plan is recommended by NZS 6809 that sets out the details of how NZS 6809 is being implemented.

NOISE - R~~10~~7 Emission of Noise within the AIRPZ - Airport Zone

Activity Status Permitted

Where:

1. Noise from aircraft operations at Hokitika and Westport Airports**, Haast Airfield** and Greymouth and Karamea Aerodromes must be measured and assessed in accordance with NZS 6805: 1992 Airport Noise Management and Land Use Planning;
2. Noise from helicopter operations at Franz Josef Heliport must be measured and assessed in accordance with NZS 6807: 1994 Noise Management and Land Use Planning for Helicopter Landing Areas;

3. Noise from aircraft engine testing is exempt from NOISE-R7.1 above, and:

(a) is not subject to a noise limit if it is essential unplanned testing occurring between 7:00am and 10:00pm, for regular scheduled passenger services to and from other regions with fixed wing aircraft with at least eight passenger seats; and

(b) for all other cases must comply with the noise limits set out in NOISE-R5;

~~3. The maximum noise levels from aircraft engine testing at any point within the boundary of a site within a RESZ - Residential Zone, MPZ - Māori Purpose Zone or RURZ - Rural Zone shall not exceed:~~

~~a. on any day 7.00am to 10.00pm exceed 55 dB $L_{Aeq\ (15\ hour)}$~~

~~**b.** on any day 10.00pm to 7.00am not exceed 45 dB $L_{Aeq\ (9\ hours)}$ and 75 dB L_{Amax}; and~~

4. The maximum noise generated from aircraft operations at Hokitika **and Westport Airports, Haast Airfield and Greymouth and Karamea Aerodrome** over any 90 continuous days shall not exceed:

a. 55 dB $\mathbf{L}_{\text{~~L~~dn}}$ at or beyond the noise contour boundary shown on the planning maps; and

5. The maximum noise generated from helicopter operations at Franz Josef Heliport over any ~~7~~**seven** continuous days, shall not exceed:

a. 50 dB $\mathbf{L}_{\text{~~L~~dn}}$ at or beyond the noise contour boundary shown on the planning maps; and

6. Standards 4 and 5 above do not apply to:

a. Aircraft landing or taking off in an emergency; and

b. Emergency flights required to rescue persons from life threatening situations or to transport patients, human organs or medical personnel in medical emergency situations; and

c. Aircraft undertaking firefighting duties; and

d. Military aircraft movements; and

e. Aircraft using the Hokitika Airport in preparation for and participation in air shows.

Advice Notes:

1. A Noise Management Plan may be prepared that sets out details of how NZS 6805 or NZS 6807 is being implemented.

2. Fixed wing aircraft with less than eight passenger seats are unlikely to exceed noise limits when undertaking aircraft engine testing so are exempt from the restriction in hours in clause 3(a) that apply to fixed wing aircraft with at least eight passenger seats.

Activity Status if compliance not achieved: Restricted Discretionary

~~**NOISE – R11 Emission of Noise within the BCZ - Buller Coalfield Zone and MEZ - Mineral Extraction Zone**~~

~~**Activity Status Permitted**~~

~~Where:~~

~~1. The maximum noise generated from activities did not exceed the following limits at Amax any point within the notional boundary of any sensitive activity within any site receiving noise:~~

~~2. 7:00am to 10:00pm Monday to Friday and 7:00am to 10:00pm weekends and public holidays: 55 dB $L_{Aeq\ (15\ min)}$~~

~~3. 10:00pm to 7:00am Monday to Friday and 10:00pm to 7:00am weekends and public holidays: 45 dB $L_{Aeq\ (15\ min)}$~~

~~4. 10:00pm to 7:00am all days - 75 dB L_{AFmax}~~

~~**Activity status where compliance not achieved:** Restricted Discretionary~~

NOISE–R~~12~~8 Emission of Noise not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Discretion is restricted to:

1. Effects on the health and wellbeing of people;
2. Ambient noise levels and any special character noise from any existing activities, the nature and character of any changes to the sound received at any receiving site**,** and the degree to which such sounds are compatible with the surrounding activities;
3. The level, hours of operation, duration and nature of the noise;
4. The primary purpose and the frequency of use of the activity;
5. Proximity and nature of nearby activities and the adverse effects they may experience from the noise;
6. Effects on character and amenity values of the surrounding environment; and
7. ~~Effects on the health and wellbeing of people~~**;**
8. Effects on wildlife and habitat values;
9. The temporary or permanent nature of any adverse effects;
10. Any noise reduction measures**;**~~.~~
11. **The functional need or operational need of the activity.**

Activity status where compliance not achieved: N/A

NOISE-R~~13~~9	**New Buildings for Use by a Sensitive Activity and Additions to Existing Buildings for Use by a Sensitive Activity not meeting Acoustic Insulation Requirements of Rule NOISE - R3**

Activity Status Restricted Discretionary

Where:

Discretion is restricted to:

a. The provision of a report from an acoustic specialist which provides evidence that the level of acoustic insulation is appropriate to ensure the amenity of present and future residents of the site; and

b. The impact of any sensitive activity that ~~did~~ **does** not provide the required acoustic insulation on the ability of existing or future permitted ~~business~~ activities to operate or establish without undue constraint.

Activity status where compliance not achieved: N/A

NOISE–R10	**Buildings for Use by a Sensitive Activity and Additions to Existing Buildings for Use by a Sensitive Activity within the 60 dB L_{AFmax} contour of the Westport Rifle Range Noise Overlay**

Activity Status: Restricted Discretionary

Discretion is restricted to:

a. The provision of a report from an acoustic specialist which provides evidence that the level of noise mitigation is appropriate to ensure the amenity of present and future residents of the site; and

b. The impact of any sensitive activity that did not provide the required noise mitigation on the ability of lawfully established activities at the Westport Rifle Range to operate without undue constraint.

Activity status where compliance not achieved: N/A

NOISE-APP1	**Acceptable Construction Design for Acoustic Insulation Requirements for New Buildings for Use by a Sensitive Activity Subject to Noise - R3**

Part A: Approved construction requirements for compliance with NOISE-R3.1, NOISE-R3.2, NOISE-R3.4. NOISE-R3.5, NOISE-R3.6.i.

Applicability	
	Construction requirements detailed in this Appendix are only applicable where: **1. The building is a single level construction;** **2. The floor of the building is a reinforced concrete slab;** **3. No habitable room of the building is located less than 4.5 metres from the State Highway road boundary or railway track edge;** **4. The total area of glazing in any habitable room is no greater than 20% of the total area of external walls of that room; and** **5. The roof of the building is a standard timber truss design, with a pitch of not less than 15 degrees. Ventilation of the roof space must**

	only be via casual ventilation typical of the jointing, capping and guttering detail used in normal construction. **In all other situations, a design report from a suitably qualified acoustics specialist is required.**
Construction Options	
Exterior Walls Option 1	**Exterior cladding of aerated concrete or similar, with a surface mass not less than 27 kg/m^2.** • **Timber framing of not less than 90 mm, with studs at 600 mm centres. A ventilated cavity is not required under this option but is permissible, with or without a rigid air barrier.** • **Fibrous insulation of minimum R2.6. This includes fibreglass, polyester and wool, but does not include polystyrene or other foam sheet insulation products.** • **One layer of 10 mm thick Standard Gib board or alternative gypsum board having a surface mass not less than 6 kg/m^2.**
Exterior Walls Option 2	**Exterior cladding of profiled sheet metal not less than 0.45 mm thick.** • **20 mm thick battens forming a ventilated cavity,** • **Rigid air barrier consisting of Plywood not less than 9 mm thick or Fibre Cement not less than 4 mm thick, or alternative sheet product having a surface mass not less than 5 kg/m^2.** • **Timber framing of not less than 90 mm, with studs at 600 mm centres,** • **Fibrous insulation of minimum R2.6. This includes fibreglass, polyester and wool, but does not include polystyrene or other foam sheet insulation products,** • **One layer of 10 mm thick Standard Gib board or alternative gypsum board, having a surface mass not less than 6 kg/m^2,**
Exterior Walls Option 3	**Exterior cladding of Fibre Cement weatherboards, with a surface mass not less than 18 kg/m2 (Hardies Linea or equivalent).** • **20 mm thick battens forming a ventilated cavity.** • **Rigid air barrier consisting of Plywood not less than 7 mm thick or Fibre Cement not less than 4 mm thick, or alternative sheet product having a surface mass not less than 3.8 kg/m2.** • **Timber framing of not less than 90 mm, with studs at 600 mm centres.** • **Fibrous insulation of minimum R2.6. This includes fibreglass, polyester and wool, but does not include polystyrene or other foam sheet insulation products.** • **One layer of 10 mm thick Standard Gib board or alternative gypsum board, having a surface mass not less than 6 kg/m^2,**

Glazing and Exterior doors - All options	• **Windows to consist of double glazing consisting of a minimum of two layers of 4 mm thick glass separated by a 12 mm air gap, with airtight seals.** • **External doors to be either double glazed to the same standard as windows or a solid timber construction with a surface mass not less than 24 kg/m^2 and incorporating full perimeter seals.**
Roof – All Options	• **Profiles metal roofing not less than 0.45 mm thick profiled steel or tiles.** • **Fibrous insulation of minimum R6. This includes fibreglass, polyester and wool, but does not include polystyrene or other foam sheet insulation products,** • **Two layers of 10 mm Standard Gib board or alternative gypsum board, with each layer having a surface mass not less than 6 kg/m^2.**

Part B: Approved construction requirements for compliance with NOISE-R3.3

Any new buildings or alterations to existing buildings containing a sensitive activity, closer than 60 metres to the boundary of an existing railway track and is a single storey framed building with:

a. A constant level floor slab on a full-surface vibration isolation bearing with natural frequency not exceeding 10 Hz, installed in accordance with the supplier's instructions and recommendations; and

b. Vibration isolation separating the sides of the floor slab from the ground; and

c. No rigid connections between the building and the ground.

In all other situations, a design report from a suitably qualified acoustic specialist is required demonstrating compliance with NOISE-R3.3.

New buildings and alterations must meet the ventilation requirements of NOISE-R3.7.

TAI POUTINI PLAN COMMITTEE

Hearing of Submissions on the Proposed Te Tai O Poutini Plan

Recommendation Report of Hearing Panel

Recommendation Report: Topic 6

Notable Trees - Ngā Rākau Whakamaumahara

Hearing Dates: 6 December 2023

HEARING PANEL

Paul Rogers (Chair)

2.2. Notable Tree Objectives 10
2.3. Notable Tree Policies 12
2.4. Notable Tree Rules 18
2.5. Schedule Two 30

APPENDIX 1 – RECOMMENDATIONS ON PLAN PROVISIONS 33

APPENDICES

Appendix 1 – Recommendations

PART A – INTRODUCTORY MATTERS

1. PRELIMINARY MATTERS

1.1. Introduction

1. Matters to do with my appointment and other preliminary matters applicable to all Hearing Panel's recommendations on the Proposed Te Tai o Poutini Plan (**pTTPP** or 'the Plan') are recorded and addressed in Recommendation Report 1.

2. This Recommendation Report relates to the:

   (a) Notable Trees - Ngā Rākau Whakamaumahara ('**TREE**') chapter of the Historical and Cultural Values section in Part 2 – District-Wide Matters of pTTPP; and

   (b) Schedule Two: Notable Trees - Te Rārangi Tuarua: Ngā Rākau Whamaumahara ('**Schedule Two**') section in Part 4 – Appendices of pTTPP.

3. This Recommendation Report contains my evaluations and recommendations to the TTPP Committee on the submissions and further submissions received on the TREE chapter and Schedule Two.

4. The Section 32 Report[1] on Notable Trees ('s32 Report') provided an evaluation of the options relating to identifying, recognising, and protecting notable trees through the pTTPP, including the regulatory framework, key resource management issues, the evidence base (research, consultation, information and analysis undertaken) and evaluation of the options. The evaluation concluded that, compared to the status quo or no regulations, the pTTPP TREE provisions are the most appropriate option, given that the benefits outweigh the costs. It also found that considerable efficiencies can be gained by adopting the pTTPP TREE provisions.

5. Eighty-one submission points and seventeen further submissions were received on the TREE chapter and Schedule Two.

6. The Section 42A Officer's Report[2] ('s42A Report'), authored by Ms Lois Easton, a principal planner with Kererū Consultants, acting as the Reporting Officer, was circulated prior to the hearing. The s42A Report summarised the submissions and further submissions received, and relief sought. It analysed the submissions on the TREE provisions and Schedule Two, and detailed recommendations (summarised in Appendix 1 of s42A Report). It also indicated whether individual submission points and further submission points were recommended to be accepted/accepted in part/rejected (see Appendix 2 of the s42A Report).

7. The matters raised by submitters and further submitters were grouped in the s42A Report in relation to each of the following key issues:

   (a) TREE chapter as a whole;

   (b) Objectives;

[1] Section 32 Evaluation – Report Four - Historical and Cultural Values - Ngā Uara ā-Ahurea, ā-Hītori Hoki Historic Heritage - Ngā Tuku Ihotanga Notable Trees -Ngā Rākau Whakamaumahara Sites and Areas of Significance to Māori – Ngā Wāhi Tāpua ki te Māori

[2] Section 42A Officer's Report Notable Trees

(c) Policies;

(d) Rules; and

(e) Schedule Two.

8. A s32AA evaluation for all recommended amendments was provided at the end of the s42A Report.

9. After the hearing, Ms Easton provided a Right of Reply ('**Reply**') dated 8 December 2023.

10. This Recommendation Report follows the same structure of the s42A Report and provides a summary of the issues raised in submissions and further submissions, the s42A Report analysis and recommendations, submitter statement or evidence and the Reply, before providing my evaluation and recommendation.

11. This Recommendation Report should be read in conjunction with the s42A Report and the tracked change version of the notified pTTPP provisions (attached as **Appendix 1** to this Report). The tracked change version of the pTTPP provisions forms an integral part of the decision and records all recommended amendments (additions and deletions) to the notified pTTPP provisions made by the Panel. The tracked change version of the pTTPP shows the Panel's recommended changes to the notified provisions in **bold and underlining** indicating additions and ~~strikethrough~~ indicating deletions. If there is any discrepancy between this Recommendation Report and the tracked change version of the pTTPP, the tracked change version of the pTTPP shown in **Appendix 1** of this Report must prevail.

12. This Recommendation Report contains the reasons for my recommendations. These comprise either adoption of the reasoning and recommendations of the original s42A Reports or the Reply, or a specific reasoning.

13. Where I recommend the pTTPP provisions should remain as notified, it is because:

(a) I have adopted the reasoning and recommendation of the s42A Report or the Reply to retain the provision as notified; or

(b) I have recommended to retain the provision as notified for reasons set out in this Recommendation Report.

14. Where there is a recommended change to a notified provision of the pTTPP, it is because:

(a) I have recommended amendment to a provision for reasons set out in this Recommendation Report in response to a submission point, which the s42A Report did not recommend; or

(b) I have adopted the reasoning and recommendation of the s42A Report to change the provision to that recommended in the original s42A Report; or

(c) I have adopted the reasoning and recommendation to that recommended in the Reply; or

(d) A consequential change has been necessary following on from a decision in either (a), (b) or (c).

15. Where there may be a different recommendation between the s42A Report and the Reply (i.e., the Reporting Officer's recommendation has changed as a result of hearing the statement or evidence of submitters), unless the recommendation specifically adopts the original s42A Report's reasoning and recommendations, the reasoning and recommendations in the (later) reply has been adopted and it must be taken to prevail.

16. If there are circumstances where I consider that alternative relief is more appropriate than that requested in submissions and further submissions to give effect to the RMA, NZCPS, NPS and/or RPS, but are still within the scope of the relief sought, the relevant recommendation clearly sets out the nature of the change and the reason for the change. This is recorded in this Recommendation Report.

17. If any changes are recommended to the provisions (since the s32A Report was completed) a further evaluation, if required, has been undertaken pursuant to s32AA of the RMA. Any such circumstances are referred to in this Recommendation Report in sufficient detail to demonstrate a further evaluation was undertaken.

18. Clause 16(2) of Schedule 1 of the RMA enables me to recommend amendments to alter information, where such an alteration is of minor effect, or may correct any minor errors. Any such minor amendments are recorded in the recommendations below each section considered in Part C of this Report and in the tracked change version of the notified Plan provisions (**Appendix 1** of this Report).

1.2. Terminology in this Report

19. Throughout this Report, the following abbreviations will be used:

BCG	Buller Conservation Group
BDC	Buller District Council
Councils	Buller District Council, Grey District Council, and Westland District Council
Forest & Bird	Royal Forest & Bird Protection Society of NZ Inc
GDC	Grey District Council
Ngāi Tahu	Te Rūnanga o Ngāi Tahu, Te Runanga o Ngāti Waewae, Te Rūnanga o Makaawhio
Planning Standards	National Planning Standards
NPS	National Policy Statements
NZCPS	New Zealand Coastal Policy Statement 2010
NDFL	Nikau Deer Farm Limited
RMA or the Act	Resource Management Act 1991
RPS	West Coast Regional Policy Statement

SASM	Sites and Areas of Significance to Māori
Te Mana Ora	Te Mana Ora (Community and Public Health) of Te Whatu Ora (Health New Zealand)
Te Tumu Paeroa	Te Tumu Paeroa – The office of the Māori Trustee
Waka Kotahi	NZ Transport Agency Waka Kotahi
Westpower	Westpower Limited

1.3. Hearing Arrangements

20. The hearing was held via Audio Visual on the 6 December 2023. Some submitters appeared by internet connection.

1.4. Appearances

Section 42A the Reporting Officers

- Ms Lois Easton, Planner with Kererū Consultants

21. The following submitters appeared at the hearing:

Ms Frida Inta for herself and on behalf of the BCG

Mr George and Ms Carly Coates on behalf of NDFL

Westpower Limited

- Mr Martin Kennedy, Planner

1.5. Overview of submitter evidence received

22. Evidence of Manawa Energy (S438) dated 8 November 2023 was circulated prior to and tabled at the hearing.

23. For those appearing at the hearing the following evidence and/or statements were received:

(a) Statement of evidence by Mr Kennedy in association with Westpower (dated 6 November 2023);

(b) Statement of evidence by Ms Easton (undated);

(c) Ms Inta on behalf of BCG and herself (dated 6 December 2023); and

(d) Mr and Ms Coates on behalf of NDFL (undated).

1.6. Right of Reply

24. Ms Easton provided a Reply responding to questions raised at the hearing and proposing further amendments to the TREE chapter (as notified) beyond those recommended in the s42A Report.

1.7. Procedural Steps and Issues

25. No procedural matters were raised at the hearing.

1.8. Site Visits

26. No site visits relating to these chapters were undertaken.

PART B - STATUTORY REQUIREMENTS AND DOCUMENTS

27. The TREE chapter is one of three subsections in the Historical and Cultural Values - Ngā Uara ā-Ahurea, ā-Hītori Hoki section located in Part 2 – District Wide Matters – Te Wāhanga 2 – Ngā Kaupapa ā-Rohe Whānui. The chapter has objectives, policies and rules for undertaking work on a notable tree (including trimming, maintenance, removal in any form, etc.) and work within the root protection area of a notable tree (i.e., gardening, mowing, root pruning, building activities, etc.).

28. The s32 Report outlined the relevant statutory considerations applicable to notable trees, and the relationships between the sections of the RMA and higher order documents. It[3] highlighted matters from sections 6, 7 and 8 of the RMA, NPS, and iwi management plans relevant to the TREE chapter, and implied that the WCRPS was irrelevant. The s42A Report[4] also broadly discussed these considerations.

29. The s32 Report[5] indicated that there are two relevant iwi management plans, i.e., Te Rūnanga o Makaawhio Pounamu Management Plan and Ngāti Waewae Pounamu Management Plan, which both contain information about the overall approach to sustainability and kaitiakitanga of resources and Poutini Ngāi Tahu values. It[6] noted that Poutini Ngāi Tahu cultural resources are generally dealt with in a comprehensive way in the Sites and Areas of Significance to Māori chapter.

30. Clause 10 of Schedule 1 of the RMA states that it is not necessary to provide decisions on individual submissions. Recommendations are made within the scope of requested relief, either individual submissions or groups of submissions making similar requests, as specified in the reasons for recommendation. References to relevant submissions are made in the footers.

31. The Planning Standards mandatory direction 7.16 requires provisions relating to managing trees or groups of trees to be in a Notable Trees chapter in the Historical and Cultural Values section of the pTTPP. This direction also requires a schedule of individual trees and groups of trees, containing descriptions including species information; this schedule may be

[3] Section 32 Evaluation Report Four– Historical and Cultural Values - Ngā Uara ā-Ahurea, ā-Hītori Hoki Historic Heritage - Ngā Tuku Ihotanga Notable Trees -Ngā Rākau Whakamaumahara Sites and Areas of Significance to Māori – Ngā Wāhi Tāpua ki te Māori, sections 6.2.1 to 6.2.6

[4] Section 42A Officer's Report Notable Trees, sections 4.1 to 4.2

[5] Above n 3, section 6.2.6

[6] Above n 5

incorporated as an appendix of the pTTPP. I am satisfied the pTTPP structure is consistent with this national direction.

PART C – SUBMISSIONS, EVIDENCE, EVALUATION AND RECOMMENDATIONS

2. NOTABLE TREES

2.1. Whole Chapter

Submissions and Further Submissions

32. Three submission points relating to the TREE chapter (as a whole) were summarised in a Table on page 6 of the s42A Report. Appendix 2 of the s42A Report records another submission point[7] which had been missed from the s42A Report. Two submissions supported the retention of the TREE chapter as notified, while one submission opposed the whole chapter.

33. I adopt the summary of these submissions detailed in the s42A Report, and I have considered all the relevant submissions.

Section 42A Report

34. Ms Easton acknowledged submissions[8] supporting the retention of the TREE chapter as notified.

35. She recommended rejecting Mr and Ms Coates submission[9] opposing the TREE chapter, noting she does not support its complete deletion. She emphasised that most content reflects existing Schedule Two from the three operative district plans. Where scheduling justification was insufficient (Buller and Westland), she indicated that trees were reassessed using the Standard Tree Evaluation Method (STEM), a method employed by many local authorities to evaluate heritage and notable trees within a district plan context. She highlighted that the Grey District Council already had detailed scheduling records.

36. Ms Easton stated the TREE provisions were informed by best practice and subject to extensive consultation and community engagement. She highlighted community members nominated additional trees, which were assessed using STEM, with any new notable trees added to Schedule Two.

37. She emphasised that a s32 analysis found it appropriate to include the TREE provisions in the pTTPP due to strong community support, alignment with the three operative district plans, and the trees' contribution to the West Coast's amenity and heritage values. She indicated that the TREE provisions do not impose *"unjustifiably high costs on the community or parts of the community".*

38. Ms Easton confirmed all landowners with scheduled notable trees on their property were notified and encouraged to submit on the pTTPP. She mentioned no submissions opposed any notable trees.

Hearing and Submitter Evidence

[7] Te Tumu Paeroa (S440.052)
[8] Forest & Bird (S560.187) and BDC (S538.175)
[9] Mr George and Ms Carly Coates (S415.002)

39. Mr and Ms Coates[10]:

(a) suggested improving the notable tree identification framework by defining terms like "*notable*" and "*rare*" to prevent interpretation issues.

(b) noted STEM involves significant user discretion and should be implemented by qualified, independent professionals.

(c) raised concerns about the lack of a resolution process when Ngāi Tahu, the community, and stakeholders disagree on tree identification.

(d) warned that the current process could be misused to obstruct development.

(e) raised concerns that SASMs create additional regulatory burden, potentially requiring dual permissions - from a council-approved arborist and local iwi, the latter if a notable tree is located within a SASM.

(f) claimed a s32 financial analysis for the TREE chapter has not been completed, failing to address maintenance costs and production losses on private land.

(g) questioned who would bear arborist costs and suggested compensation for private property owners.

(h) argued that the TREE chapter should give landowners the right to refuse or consent to the scheduling of notable trees on private property.

(i) suggested the chapter should include a provision relating to compensating private landowners for any associated costs of a notable tree on private property in exchange for the private landowner consenting/approving a tree being scheduled as notable.

Reporting Officer Reply Evidence

40. In response to my hearing queries, Ms Easton[11] advised the following.

(a) The three Councils would need to individually determine "*who*" pays for arborist work on notable trees through their respective Funding Policy and Long-Term Plans.

(b) The Council would consider the qualifications and experience of the "*Council-approved arboricultural contractor*" when applying the permitted activity TREE rules.

(c) Recommended text for an advice note defining a "*Council-approved arboricultural contractor*". However, for clarity, she did not specifically advise whether an advice note should be included in the permitted activity TREE rules.

Hearing Panel's Evaluation

41. For the reasons detailed by Ms Easton, I agree that retaining the TREE chapter as notified is the most appropriate outcome, especially given that most of the content reflects existing Schedule Two from the three operative district plans. Where scheduling justification was insufficient (Buller and Westland), she indicated that trees were reassessed using the

[10] Mr George and Ms Carly Coates, Notable Trees hearing statement, page 1

[11] Ms Lois Easton, s42A Author Right of Reply Notable Trees, dated 8 December 2023, page 1, points 3, 4, and 9 (a), (b), and (c)

Standard Tree Evaluation Method (STEM), a method employed by many local authorities to evaluate heritage and notable trees within the context of a district plan. She highlighted that the Grey District Council already had detailed scheduling records.

42. I also accept Ms Easton's advice that the TREE provisions were informed by best practice and subject to extensive consultation and community engagement. Additionally, she highlighted that community members nominated additional trees, which were assessed using STEM; any new notable trees were added to Schedule Two.

43. I consider the issues raised by Mr and Mrs Coates are capable of resolution utilising the proposed provisions of the TREE chapter, so I do not recommend withdrawal of the chapter. As well, if the relief sought by this submitter was provided for within the Plan provisions, I think it unlikely that heritage and notable trees would be adequately provided for within the pTTPP.

Recommendation

44. For the reasons outlined above, and subject to my consideration of Part 2 of the RMA, I recommend the **Notable Trees chapter** be retained in the pTTPP.

2.2. Notable Tree Objectives

Submissions and Further Submissions

45. Four submission points relating to the TREE objectives (as a whole) were summarised in a Table on page 7 of the s42A Report. All submissions supported the retention of the TREE objectives as notified.

46. Two submission points and one further submission point relating to **TREE – O1** were summarised in a Table on page 7 of the s42A Report. Appendix 2 of the s42A Report records two further submission points[12] which were omitted from the s42A Report. One submission supported the retention of the objective as notified. The other submission supported in part the objective, seeking an amendment. One further submission opposed Forest & Birds submission on the objective. The two other further submissions supported Te Mana Ora's submission on TREE-01, although one requested the "large old trees at Seaview, Hokitika" be inserted into Schedule Two.

47. A Table on pages 7 and 8 of the s42A Report summarised two submission points supporting **TREE–O2** as notified. However, the s42A Report mistakenly omitted a third submission point[13] that partially supported TREE – O2 while requesting the notable trees referred to in the objective be clearly identified as being of value to Poutini Ngāi Tahu in Schedule Two. Also, Appendix 2 of the s42A Report records a further submission point[14] which has been omitted from the s42A Report. That further submission supported Te Mana Ora's submission on the objective.

48. Four submission points relating to **TREE–O3** were summarised in a Table on page 8 of the s42A Report. One submission supported the retention of the objective as notified. Two submissions

[12] Ms Inger Perkins (FS33.6 and FS33.8)
[13] Te Tumu Paeroa (S440.052)
[14] Ms Inger Perkins (FS33.7)

supported in part the objective, seeking an amendment. Lastly, one submission sought an amendment to the objective by creating a new objective.

49. I adopt the summary of these submissions and further submissions detailed in the s42A Report, and I have considered all the relevant submissions and further submissions.

Section 42A Report

Objectives (General)

50. Ms Easton acknowledged submissions[15] supporting the retention of the TREE objectives as notified.

Objective 1

51. Ms Easton noted the submission[16] supporting the retention of TREE – O1 as notified.

52. Ms Easton recommended rejecting Forest & Bird's[17] submission as she was unsupportive of including "*habitat*" as a value to recognise trees notable for the habitat that they provide. She reasoned that "*habitat*" is not a STEM criterion, and STEM has been used to identify the notable trees. She highlighted that habitat is dealt with separately by the Ecosystems and Biodiversity chapter.

Objective 2

53. Ms Easton acknowledged submissions[18] supporting the retention of TREE – O2 as notified.

Objective 3

54. Ms Easton noted the submission[19] supporting the retention of TREE – O3 as notified.

55. Ms Easton recommended accepting Waka Kotahi and GDC submissions[20] supporting an amendment to explicitly provide for the pruning or trimming of notable trees for safety reasons.

56. Ms Easton recommended rejecting Westpower's submission[21] for a new objective allowing tree trimming, pruning, and removal in relation to energy and critical infrastructure, reasoning that this is better addressed through the Waka Kotahi and GDC submissions noted in [55] above.

Hearing and Submitter Evidence

57. At the hearing, Mr Kennedy[22]:

[15] Mr William McLaughlin (S567.150), Mr Chris and Ms Jan Coll (S558.066), Chris J Coll Surveying (S566.066), and Ms Laura Coll McLaughlin (S574.066)
[16] Te Mana Ora (S190.256)
[17] Forest & Bird (S560.188)
[18] Te Mana Ora (S190.257) and Ngāi Tahu (S620.109)
[19] Te Mana Ora (S190.258)
[20] Waka Kotahi (S450.071) and GDC (S608.597)
[21] Westpower (S547.186)
[22] Mr Martin Kennedy, Notable Trees planning evidence, dated 6 November 2023, section 8.3

(a) disagreed with Ms Easton's recommended rejection of Westpower's proposed objective, arguing her amendments kept provisions too narrowly focused on safety.

(b) noted regionally significant infrastructure may need to locate near notable trees for locational, technical, functional or operational reasons.

(c) emphasised that servicing community needs should be recognised alongside tree protection, which is already acknowledged by making tree removal discretionary activity rather than non-complying.

(d) maintained Westpower's proposed objective is appropriate.

(e) indicated that TREE-O3 could be reworded to address locational, technical, functional or operational matters while limiting the number of objectives.

Reporting Officer Reply Evidence

58. The Reply does not detail any points relevant to the TREE objectives.

Hearing Panel's Evaluation

59. I agree with Ms Easton's recommendations on TREE-01 to reject Forest and Birds submissions for the reasons she provides.

60. I agree with Ms Easton's recommendations on TREE-03 accepting Waka Kotahi and GDC submissions[23] supporting an amendment to explicitly provide for the pruning or trimming of notable trees for safety reasons. I consider this a sensible and practical amendment that also provides some relief to Westpower.

61. I agree with her reasons for rejecting and accepting submissions as detailed within her s42A and Reply reports.

Hearing Panel's Recommendation

62. For the reasons outlined above, and subject to my consideration of Part 2 of the RMA, I recommend the following changes to the **Notable Trees Objectives**:

Notable Tree Objectives	
TREE – O3	To provide for the protection of notable trees while recognising instances where trimming and/or pruning is required **where this**: a. ~~and~~ may improve the health of the tree, or b. **is needed for safety reasons including the safe operation of infrastructure and energy activities; and recognise there may be** instances where removal of the tree is unavoidable due to safety **requirements**.

2.3. Notable Tree Policies

[23] Waka Kotahi (S450.071) and GDC (S608.597)

Submissions and Further Submissions

63. Four submission points relating to the TREE policies (as a whole) were summarised in a Table on page 9 of the s42A Report. Appendix 2 of the s42A Report records three further submission points[24] which have been missed from the s42A Report. All submissions supported the retention of the TREE policies as notified.

64. One submission point relating to **TREE – P1** was summarised in a Table on page 9 of the s42A Report. Appendix 2 of the s42A Report records one further submission point[25] which was omitted from the s42A Report. The submission point supported the retention of the policy as notified, and the further submission point supported Te Mana Ora's submission on the policy.

65. Three submission points and one further submission point relating to **TREE – P2** were summarised in a Table on page 9 of the s42A Report. Appendix 2 of the s42A Report records an additional further submission point[26] which was omitted from the s42A Report. One submission point supported the retention of the policy as notified. Two submission points sought an amendment to the policy. Lastly, one further submission point opposed Forest & Bird's submission on the policy, and the other further submission point supported Te Mana Ora's submission on the policy.

66. A Table on pages 9 and 10 of the s42A Report summarised two submission points supporting **TREE – P3** as notified. The s42A Report mistakenly omitted a third submission point[27] that partially supported TREE – P3 while requesting the notable trees referred to in the policy be clearly identified as being of value to Poutini Ngāi Tahu in Schedule Two.

67. Seven submission points and one further submission point relating to **TREE – P4** were summarised in a Table on page 10 of the s42A Report. Appendix 2 of the s42A Report records an additional submission point[28] and further submission point[29] which were omitted from the s42A Report. Two submission points supported the retention of the policy as notified. One submission point supported the policy while also requesting an amendment to a tenet. Five submission points sought an amendment to the policy. Lastly, the two further submissions opposed Forest & Bird's submissions on the policy.

68. A Table on pages 10 and 11 of the s42A Report summarises six submission points and two further submission points relating to **TREE – P5 but** includes an error. Waka Kotahi's submission[30] related to TREE – P6, not TREE – P5. Also, Appendix 2 of the s42A Report records an additional further submission point[31] which has been omitted from the s42A Report. The correct count is five submission points and three further submissions. Two submission points supported the retention of the policy as notified, while three sought an amendment to the policy. Two further submissions opposed BCG's and Ms Inta's submission on the policy, while the third supported Ms Inta's submission on this policy.

69. Three submission points relating to **TREE – P6** were summarised in a Table on page 11 of the s42A Report. These submissions supported the retention of the policy as notified.

[24] Ms Inger Perkins (FS33.2, FS33.3, and FS33.4)
[25] Ms Inger Perkins (FS33.9)
[26] Ms Inger Perkins (FS33.5)
[27] Te Tumu Paeroa (S440.052)
[28] Forest & Bird (S560.472)
[29] Westpower (FS222.02)
[30] Waka Kotahi (S450.073)
[31] Ms Inger Perkins (FS33.1)

70. Three submission points and two further submission points relating to **new TREE policies** were summarised in a Table on page 11 of the s42A Report. Three submission points sought a new TREE policy, and the two further submissions opposed BCG's and Ms Inta's submitted new TREE policy

71. I have considered all the relevant submissions and further submissions and have adopted the summaries in the s42A Report.

Section 42A Report

Policies (General)

72. Ms Easton acknowledged submissions[32] supporting the retention of the TREE policies as notified.

Policy 1

73. Ms Easton noted the submission[33] supporting the retention of TREE – P1 as notified.

Policy 2

74. Ms Easton noted the submission[34] supporting the retention of TREE – P2 as notified.

75. Ms Easton recommended rejecting both Westpower's and Forest & Bird submissions[35] to amend TREE – P3 as requested.

76. She was unsupportive of Westpower's request for "general" protection of notable trees, and to provide an exception for certain tree trimming, pruning, or removal. She reasoned that the policy aims to protect these trees, with their removal only to be considered in very limited circumstances where no alternative is available. She did, however, acknowledge that pruning and trimming of notable trees may be necessary.

77. She was also unsupportive of Forest & Bird's request to include "habitat" as a value, reasoning that "habitat" is not a STEM criterion, and STEM has been used to identify the notable trees.

Policy 3

78. Ms Easton acknowledged submissions[36] supporting the retention of TREE – P3 as notified.

Policy 4

79. Ms Easton noted the submissions[37] supporting the retention of TREE – P4 as notified.

80. Ms Easton recommended accepting in part Westpower's submission38. She supported adding "*or*" after "*people*;" in point (b) for clarity; including "*operation*" before "*infrastructure*" in point (c) to correct an error; and adding "*energy activities*" before "*infrastructure*" in point (c)

[32] Mr William McLaughlin (S567.151), Mr Chris and Ms Jan Coll (S558.067), Chris J Coll Surveying (S566.067), and Ms Laura Coll McLaughlin (S574.067)
[33] Te Mana Ora (S190.259)
[34] Te Mana Ora (S190.260)
[35] Westpower (S547.188) and Forest & Birds (S560.470)
[36] Ngāi Tahu (S620.110) and Te Mana Ora (S190.261)
[37] Waka Kotahi (S450.072) and Te Mana Ora (S190.262)
[38] Westpower (S547.189 and S547.190)

and (d) for consistency with the wider pTTPP. However, she was unsupportive of inserting "*critical infrastructure*" to (c) and (d), considering it redundant since the term is already covered by the broader "*infrastructure*".

81. Ms Easton recommended rejecting the submissions[39] from GDC, Chorus NZ Ltd, Spark NZ Trading Ltd, and Vodafone NZ Ltd. She was unsupportive of replacing "*operation*" with "*provision*" in point (c), as this would support notable tree trimming or pruning where infrastructure is proposed (rather than just existing infrastructure), substantially weakening the policy's protective intent.

82. In response to Forest & Bird's[40] submission to limit notable tree trimming and maintenance to periods outside of bird breeding and nesting periods, Ms Easton recommended rejecting this submission. She considered this request unreasonable and excessively onerous, as protecting the breeding and nesting periods of all bird species on the West Coast could create extensive timing restrictions for tree trimming and maintenance, especially when the trees were not scheduled specifically for their bird habitat value.

Policy 5

83. Ms Easton noted the submission[41] supporting the retention of TREE – P5 as notified.

84. Ms Easton recommended accepting the submission[42] from Ngāi Tahu supporting the retention of the policy as notified.

85. Ms Easton recommended the submissions[43] from Ms Inta, BCG, and Westpower be rejected.

86. In response to Ms Inta's and BCG's requests to delete point (e) from the policy, Ms Easton was unsupportive, considering an assessment of "whether the tree renders the site incapable of reasonable use" achieves a balance between the reasonable use of land and protecting notable trees. She noted that the policy provides a high benchmark for work within the root protection area with necessary inclusions but is not intended to be used a "loophole".

87. Ms Easton is also unsupportive of Westpower's request to add a new exception to the policy. She considered "*any technical, locational, functional or operational constraints of energy activities, including critical infrastructure*" too broad an exception, and inappropriate as it would support land development / use more than protection. She indicated that since infrastructure works most likely threaten notable trees, such an exemption would undermine the policy's protective purpose and the rationale for scheduling the trees.

Policy 6

88. Ms Easton acknowledged submissions[44] supporting the retention of TREE – P6 as notified.

New TREE policies

[39] GDC (S608.598) and Chorus NZ Ltd, Spark NZ Trading Ltd, Vodafone NZ Ltd (S663.038)
[40] Forest & Bird (S560.471)
[41] Te Mana Ora (S190.263)
[42] Ngāi Tahu (S620.111)
[43] Ms Frida Inta (553.055), BCG (S552.055), and Westpower (S547.191)
[44] Waka Kotahi (S450.073), GDC (S608.599), and Te Mana Ora (S190.264)

89. Ms Easton recommended rejecting the submissions[45] from Ms Inta, BCG, and Westpower.

90. Ms Easton is unsupportive of Ms Inta's and BCG's request for a new TREE policy. She considered it ultra vires and contrary to natural justice to include and protect additional trees as notable trees through the pTTPP process, rather than through a private plan change. She indicated that affected parties should be provided with the opportunity to submit on a request to schedule a tree as a notable tree.

91. Ms Easton is also unsupportive of Westpower's[46] request for a new TREE policy providing for the removal of notable trees in relation to energy activities and critical infrastructure. She considered the proposed policy too broad and inappropriate for the same reasons as detailed in [87] above.

Hearing and Submitter Evidence

92. Despite not making a submission or further submission on the TREE policies, at the hearing Ms Inta[47] objected to Westpower's submission[48] to insert "*energy activities*" into TREE – P4 (c).

93. With regards to Westpower's proposed policy, Mr Kennedy[49]:

    (a) agreed with Ms Easton about protecting notable trees.

    (b) argued that regionally significant infrastructure needs better recognition to balance servicing the community with tree protection.

    (c) noted the rule framework already acknowledges potential conflicts between infrastructure and notable trees.

    (d) explained that Westpower's proposed policy and TREE-P2 amendments were intended to complement their proposed objective and identify constraints that may create conflicts between competing outcomes.

    (e) asserted that locational, technical, functional or operational constraints or requirements of energy activities are inappropriate policy provisions to include in the pTTPP.

94. In response to Ms Easton recommending rejection of Westpower's proposed amendments to TREE – P5, Mr Kennedy[50]:

    (a) argued the amendments would ensure consideration of locational, technical, functional or operational constraints or requirements of energy activities when balancing tree protection with servicing the community.

[45] Ms Frida Inta (S553.055), BCG (S552.055), and Westpower (FS222.016 and FS222.0128)
[46] Westpower (S547.187)
[47] Ms Frida Inta (S553), Notes for Hearing Contaminated Land, Hazardous Substances, Notable Trees, page 3, Notable Trees section
[48] Westpower (S547.190)
[49] Mr Martin Kennedy, Notable Trees planning evidence, dated 6 November 2023, section 8.4
[50] Mr Martin Kennedy, Notable Trees planning evidence, dated 6 November 2023, section 8.5

(b) agreed with Ms Easton that many urban trees often face protection versus servicing conflicts, noting this is already recognised by making tree removal a discretionary activity rather non-complying.

(c) emphasised that TREE – P5 determines when work is "appropriate" rather than providing for protection, making regional significant infrastructure constraints and requirements relevant considerations, especially given the acknowledged potential conflicts.

(d) distinguished TREE – P5 from TREE – P4, which "allows" certain activities.

95. Mr and Ms Coates[51] queried whether Poutini Ngāi Tahu must respect private property rights when applying TREE–P3 by obtaining landowner permission to access private land for tree assessments, and whether they are required to use STEM to identify notable trees.

Reporting Officer Reply Evidence

96. In response to my hearing queries, Ms Easton[52] advised the following.

97. Adding a new notable tree(s) to Schedule Two would require a private plan change following the standard RMA Schedule 1 process.

98. Poutini Ngāi Tahu would need to obtain landowners' permission to access private property to evaluate whether any trees are notable trees, and that a suitably qualified person would use STEM to assess and identify any notable trees.

99. Inserting "*energy activities*" in the TREE provisions is supported for clarity based on Westpower's argument because the Energy chapter is separate from the infrastructure chapter. However, the definition for "*energy activities*" and "*infrastructure*" includes the same activities.

100. It is recommended that "*including critical infrastructure*" in TREE provisions be rejected because the s42A Report for the Energy Infrastructure and Transport chapters recommended changing all "*critical infrastructure*" references to "*regionally significant infrastructure*".

101. As "*regionally significant infrastructure"* is covered by the broader "*infrastructure*" term it is unnecessary to include "*regionally significant infrastructure*" in many locations.

102. Considering the Hearing 1 discussions, it is recommended that, in all instances, only "*functional*" and "*operational*" needs be included in the TREE provisions, as these cover the "*technical*" and "*locational*" matters.

Hearing Panel's Evaluation

103. I accept Ms Easton's recommended amendments to TREE-P4 for the reasons set out within her s42A and Reply reports.

104. I agree with the reasons she provides for rejecting submissions and further submissions on this suite of policies.

[51] Mr George and Ms Carly Coates, Notable Trees hearing statement, page 1

[52] Lois Easton, s42A Author Right of Reply Notable Trees, dated 8 December 2023, pages 1 and 2, points 5, 7, and 9 (a), (b), and (c)

105. I agree with the reasons she gives in support of rejecting submissions that sought new policies.

Hearing Panel's Recommendation

106. For the reasons outlined above, and subject to my consideration of Part 2 of the RMA, I recommend the following changes to the **Notable Tree Policies**:

Notable Tree Policies	
TREE - P4	Allow the trimming and pruning of notable trees and activities in the root protection area where the works: a. Retain or improve the health of the tree; **or** b. Are necessary to prevent a serious threat to property and people; **or** c. Are necessary for the ongoing **operation** of infrastructure **and energy activities**; or d. Are for the maintenance of network utility infrastructure **and energy activities** to enable compliance with relevant safety standards.

2.4. Notable Tree Rules

Submissions and Further Submissions

107. Four submission points relating to the TREE rules (as a whole) were summarised in a Table on page 13 of the s42A Report. All submission points supported the retention of the TREE rules as notified.

108. One submission point relating to **TREE – R1** was summarised in a Table on page 13 of the s42A Report. This submission supported the retention of the rule as notified.

109. Five submission points and one further submission point relating to TREE – R2 were summarised in a Table on page 14 of the s42A Report. Three submission points supported the retention of the rule as notified. Two submission points sought an amendment to the rule. Lastly, the further submission opposed Forest & Bird's requested amendment.

110. Five submission points and one further submission point relating to **TREE – R3** were summarised in a Table on page 14 of the s42A Report. Three submission points supported the retention of the rule as notified. Two submission points sought an amendment to the rule. Lastly, the further submission opposed Forest & Bird's requested amendment.

111. Four submission points relating to **TREE – R4** were summarised in a Table on pages 14 to 15 of the s42A Report. Two submission points supported the retention of the rule as notified, with the other two submission points seeking an amendment to the rule.

112. Five submission points relating to **TREE – R5** were summarised in a Table on page 15 of the s42A Report. One submission point supported the retention of the rule as notified. One submission point supported in part the rule (with an amendment sought). Lastly, three submission points sought an amendment to the rule.

113. Four submission points relating to **TREE – R6** were summarised in a Table on page 15 of the s42A Report. One submission point supported the retention of the rule as notified. Three submission points sought an amendment to the rule.

114. Two submission points relating to **TREE – R7** were summarised in a Table on pages 15 and 16 of the s42A Report. Both submissions supported the retention of the rule as notified.

115. One submission point relating to **TREE – R8** was summarised in a Table on page 16 of the s42A Report. This submission supported the retention of the rule as notified.

116. I adopt the summary of these submissions and further submissions detailed in the s42A Report, and I have considered all the relevant submissions and further submissions.

Section 42A Report

Rules (General)

117. Ms Easton acknowledged submissions[53] supporting the retention of the TREE rules as notified.

TREE - R1: Permitted Activity - Gardening and Mowing in the Root Protection Area of a Notable Tree identified in Schedule Two

118. Ms Easton noted the submission[54] supporting the retention of the TREE – R1 as notified.

TREE - R2: Permitted Activity - Trimming and Maintenance of a Notable Tree identified in Schedule Two

119. Ms Easton acknowledged submissions[55] supporting the retention of TREE – R2 as notified.

120. Ms Easton recommended accepting in part Westpower's submission[56] as she supported including "*energy activities*" in conditions (1)(d), as it would be consistent with other parts of the pTTPP. However, she was unsupportive of including "critical infrastructure", considering it unnecessary as the broader "infrastructure" term already covers it.

121. In response to Forest & Bird's submission[57] to limit notable tree trimming and maintenance to periods out of bird breeding and nesting periods, Ms Easton recommended rejecting this submission for the same reasons as detailed in [82].

122. As detailed in Appendix 2 of the s42A Report, Ms Easton recommended the submissions[58] from Te Mana Ora and GDC to retain TREE – R2 as notified be accepted.

123. The S42A report recommends TREE – R2 be amended as follows:

TREE – R2 Trimming and Maintenance of a Notable Tree identified in Schedule Two

Activity Status Permitted

[53] Mr William McLaughlin (S567.152), Mr Chris and Ms Jan Coll (S558.068), Chris J Coll Surveying (S566.068), Ms Laura Coll McLaughlin (S574.068) and Te Mana Ora (S190.265 to S190.275)
[54] Te Mana Ora (S190.265)
[55] Waka Kotahi (S450.074 and S450.075) and GDC (S608.600 and S608.601)
[56] Westpower (S547.192)
[57] Forest & Bird (S560.472)
[58] Te Mana Ora (S190.266) and GDC (S608.600)

Where:

1. The trimming and/or maintenance is:

    a. Necessary to improve, maintain or monitor tree health; or

    b. To enable the ongoing provision of existing infrastructure **or energy activities**; or

    c. For compliance with relevant electricity hazard regulations; or

    d. To prevent a serious threat to people or property; and

    2. A council approved arboricultural contractor has certified that the works will not compromise the ongoing integrity, viability or values of the notable tree.

TREE - R3: Permitted Activity - Root Pruning within the Root Protection Area of a Notable Tree identified in Schedule Two

124. For the same reasons as detailed in [120] above, Ms Easton recommended accepting in part Westpower's submission[59] as she supported including "*energy activities*" in conditions (1)(d) but was unsupportive of including "critical infrastructure".

125. In response to Forest & Bird's submission[60] to limit root pruning within the root protection area of a notable tree to periods out of bird breeding and nesting periods, Ms Easton recommended rejecting this submission for the same reason as detailed in [82] above.

126. As detailed in Appendix 2 of the s42A Report, Ms Easton recommended the submissions[61] from Te Mana Ora and GDC to retain TREE – R3 as notified be accepted.

127. The S42A report recommends TREE – R3 be amended as follows:

TREE – R3 Root Pruning within the Root Protection Area of a Notable Tree identified in Schedule Two

Activity Status Permitted

Where:

1. The root pruning will not compromise the integrity, ongoing viability and values of the tree; and

2. Any machinery associated with undertaking the root pruning is only operated on top of paved surfaces or with ground protection methods used which avoid compaction of the soil around the root zone of the notable tree; and

3. The pruning is:

    a. Necessary to improve, maintain or monitor tree health; or

[59] Westpower (S547.193)
[60] Forest & Bird (S560.472)
[61] Te Mana Ora (S190.267) and GDC (S608.601)

b. To enable the ongoing provision of existing infrastructure **or energy activities**; or

c. For compliance with the relevant electricity hazard regulations; or

d. To prevent a serious threat to people or property; and

4. A council approved arboricultural contractor has certified that the work will be in accordance with 1 and 2.

TREE - R4: Restricted Discretionary Activities - Building Activities Within the Root Protection Area of a Notable Tree identified in Schedule Two

128. Ms Easton noted the submission[62] supporting the retention of the TREE – R4 as notified.

129. Ms Easton recommended accepting in part Westpower's submission[63] as she supported inserting "practicable" in matter (e), considering it important to assess if alternative options can realistically be implemented. However, she was unsupportive of inserting "technical" and "locational" needs in matter (d), as "functional" and "operational" needs already encompass these considerations, which is consistent with the NZCPS and NPS. Also, she indicated that there are many exceptions throughout the pTTPP for "functional" and "operational" needs.

130. Ms Easton recommended rejecting Westpower's other submission[64] as she is unsupportive of inserting "the benefits to the community of activity occurring" as a new matter of discretion because it lacks specificity of quantity and type of benefits, providing no certain basis for assessment or evaluation.

131. As detailed in Appendix 2 of the s42A Report, Ms Easton recommended the submission[65] from Te Mana Ora to retain TREE – R4 as notified be accepted.

132. For clarity, Appendix 2 of the s42A Report incorrectly records the submission[66] from Chorus NZ Ltd, Spark NZ Trading Ltd, Vodafone NZ Ltd sought at amendment to TREE – R4, where it was on TREE – P4 which is correctly detailed in the Table on page 10 of the s42A Report.

133. The S42A report recommends TREE – R4 be amended as follows:

TREE – R4 Building Activities Within the Root Protection Area of a Notable Tree identified in Schedule Two

Activity Status: Restricted Discretionary

Where:

1. These will not result in the death or serious threat to the life of the tree as certified by a council approved arboricultural contractor.

Discretion is restricted to:

[62] Waka Kotahi (S450.076)
[63] Westpower (S547.194)
[64] Westpower (S547.194 and S547.195)
[65] Te Mana Ora (S190.268)
[66] Chorus NZ Ltd, Spark NZ Trading Ltd, and Vodafone NZ Ltd (S663)

a. The potential impact of the activity on the integrity, ongoing viability, and values of the scheduled notable tree;

b. Effects on amenity values of public places;

c. Effects on identified values of the tree/s; and

d. Whether there is an operational or functional need for the activity to be located within the root protection area; and

e. Whether any **practicable** alternatives are available to avoid the activity occurring in the root protection area.

TREE - R5: Restricted Discretionary Activities - New Underground Network Utilities and Infrastructure Within the Root Protection Area of a Notable Tree identified in Schedule Two

134. Ms Easton recommended accepting in part Westpower's submission[67] as she supported splitting matter (d) into two with revised matter (d) focused on "functional" and "operational" needs and new matter (e) focused on alternatives for avoidance to improve the readability of the rule. She also supported inserting "practicable" in the new matter (e). However, she was unsupportive of inserting "technical" and "locational" needs in revised matter (d). The reasons for these recommendations are the same as those detailed in [129] above.

135. Ms Easton recommended rejecting Westpower's submission[68] as she is unsupportive of inserting "the benefits to the community of activity occurring" as a new matter of discretion for the same reason as detailed in [130] above.

136. Ms Easton recommended accepting Westpower's submission[69] as she supported deleting matter (c) due to a duplication with preceding matter (a).

137. Ms Easton recommended accepting in part Waka Kotahi's submission[70] supporting the deletion of text from matter (d) to remove confusion from new underground network utilities and infrastructure within the root protection area of a notable tree requiring both avoidance and an assessment for avoidance. She indicated that this concern is addressed through the recommendations detailed in [134] above.

138. As detailed in Appendix 2 of the s42A Report, Ms Easton recommended the submission[71] from Te Mana Ora to retain TREE – R5 as notified be accepted.

139. The S42A report recommends TREE – R5 be amended as follows:

TREE – R5 New Underground Network Utilities and Infrastructure Within the Root Protection Area of a Notable Tree identified in Schedule Two

Activity Status: Restricted Discretionary

Where:

[67] Westpower (S547.197)
[68] Westpower (S547.198)
[69] Westpower (S547.196)
[70] Waka Kotahi (S450.077)
[71] Te Mana Ora (S190.269)

1. These will not result in the death or serious threat to the life of the tree as certified by a council approved arboricultural contractor.

Discretion is restricted to:

a. The potential impact of the activity on the integrity, ongoing viability, and values of the scheduled notable tree;

b. Effects on amenity values of public places;

~~c. Effects on identified values of the tree/s; and~~

~~d~~**c.** Whether there is an operational or functional need for the activity to be located within the root protection area; and~~/or~~

d. Whether any **practicable** alternatives are available to avoid the activity occurring in the root protection area.

TREE - R6: Restricted Discretionary Activities - Gardening, Mowing, Trimming, Maintenance and Root Pruning of a Notable Tree identified in Schedule Two not meeting Permitted Activity Standards

140. Ms Easton recommended accepting in part Westpower's submission[72] as she supported splitting matter (d) into two with revised matter (d) focused on "functional" and "operational" needs and new matter (e) focused on alternatives for avoidance. She also supported inserting "practicable" in the new matter (e). However, she is unsupportive of inserting "technical" and "locational" needs in revised matter (d). The reasons for these recommendations are the same as those detailed in [129] and [134] above.

141. Ms Easton recommended rejecting Westpower's submission[73] as she was unsupportive of inserting "the benefits to the community of activity occurring" as a new matter of discretion for the same reasons as detailed in [130] above.

142. Ms Easton recommended accepting Westpower's submission[74] that matter (c) be deleted for the same reasons as detailed in [136] above.

143. As detailed in Appendix 2 of the s42A Report, Ms Easton recommended the submission[75] from Te Mana Ora to retain TREE – R6 as notified be accepted.

144. The S42A report recommends TREE – R6 be amended as follows:

TREE – R6 Gardening, Mowing, Trimming, Maintenance and Root Pruning of a Notable Tree identified in Schedule Two not meeting Permitted Activity standards.

Activity Status: Restricted Discretionary

Where:

[72] Westpower (S547.200)
[73] Westpower (S547.201)
[74] Westpower (S547.199)
[75] Te Mana Ora (S190.270)

1. These will not result in the death or serious threat to the life of the tree as certified by a council approved arboricultural contractor.

Discretion is restricted to:

a. The potential impact of the activity on the integrity, ongoing viability, and values of the scheduled notable tree;

b. Effects on amenity values of public places;

~~c. Effects on identified values of the tree/s; and~~

~~d~~**c.** Whether there is an operational or functional need for the activity to be located within the root protection area; and~~/or~~

d. Whether any **practicable** alternatives are available to avoid the activity occurring in the root protection area.

TREE - R7: Discretionary Activities - Activities Within the Root Protection Area of a Notable Tree identified in Schedule Two not meeting Permitted or Restricted Discretionary Activity standards

145. Ms Easton noted the submission[76] supporting the retention of the TREE – R7 as notified.

146. As detailed in Appendix 2 of the s42A Report, Ms Easton recommended the submission[77] from Te Mana Ora to retain TREE – R7 as notified be accepted.

TREE - R8: Discretionary Activities - Removal, Partial Removal or Destruction of a Notable Tree identified in Schedule Two not meeting Permitted or Restricted Discretionary Activity standards

147. As detailed in Appendix 2 of the s42A Report, Ms Easton recommended the submission[78] from Te Mana Ora to retain TREE – R8 as notified be accepted.

Hearing and Submitter Evidence

148. Despite not making a submission or further submission on the TREE rules, at the hearing Ms Inta[79] objected to Westpower's submission[80] to insert "energy activities" into TREE – R2 (b) and TREE – R3 (b).

149. In response to Ms Easton's recommendation to reject or reject in part Westpower's amendments to TREE – R4, TREE – R5, TREE – R6, Mr Kennedy[81] indicated that the constraints or requirements of energy activities are relevant matters to be included, particularly for linear infrastructure.

150. Mr Kennedy[82]

[76] Westpower (S547.202)
[77] Te Mana Ora (S190.271)
[78] Te Mana Ora (S190.272)
[79] Ms Frida Inta (S553) Notes for Hearing Contaminated Land, Hazardous Substances, Notable Trees, page 3, Notable Trees section
[80] Westpower (S547.192 and S547.193)
[81] Mr Martin Kennedy, Notable Trees planning evidence, dated 6 November 2023, sections 8.6 to 8.8
[82] Mr Martin Kennedy, Notable Trees planning evidence, dated 6 November 2023, section 8.6

(a) disagreed with Ms Easton's recommended rejection of amendments to TREE – R4 regarding community benefits, arguing they relate to regionally significant infrastructure which is recognised as significant for the community.

(b) raised that TREE – R4 (i.e., building activities within the root protection area of a notable tree) is a restricted discretionary activity and does not provide for tree removal (a discretionary activity).

(c) suggested the rule could be reworded to specifically reference benefits of "*energy activities*", "*infrastructure*", and "*regionally significant infrastructure*" if more focus was needed.

151. Mr and Ms Coates[83] asked whether TREE – R8 applies to Poutini Ngāi Tahu, such as when felling a culturally significant tree (i.e., holds cultural value for carving purposes) for carving purposes.

Reporting Officer Reply Evidence

152. In response to my hearing queries, Ms Easton[84] advised the following.

(a) Inserting "*energy activities*" in the TREE rules is supported for clarity because the Energy chapter is separate from the infrastructure chapter. However, the definition for "*energy activities*" and "*infrastructure*" include the same activities.

(b) Reject "*including critical infrastructure*" in TREE rules because other s42A Reports have recommended changing this term to "*regionally significant infrastructure*" for the same reasons as detailed in [100] above.

(c) "*Regionally significant infrastructure*" is covered by the broader "*infrastructure*" term making is unnecessary in many locations.

(d) Considering the Hearing 1 discussions, recommended that in all instances only "*functional*" and "*operational*" needs should be included in the TREE provisions, considering it covers the "*technical*" and "*locational*" matters.

153. In response to Westpower's hearing evidence, Ms Easton[85] indicated she may support adding a new matter of discretion to TREE – R4 specifically for the benefits of regionally significant infrastructure to align with the WCRPS direction, while maintaining her opposition to the broader, less defined "the benefits to the community of the activity occurring" phrase.

Hearing Panel's Evaluation

154. I generally agree with Ms Easton's recommended amendments to the Rules as sought by various submitters in their submissions and further submissions concerning the TREE Chapter.

155. I note that some of the rules include the wording "*council-approved arboricultural contractor*", and an advice note is provided to elaborate on how the council will determine the suitability

[83] Mr George and Ms Carly Coates, Notable Trees hearing statement, page 1
[84] Ms Lois Easton, s42A Author Right of Reply Notable Trees, dated 8 December 2023, page 1, points 3, 4, and 9 (a), (b), and (c)
[85] Ms Lois Easton, s42A Author Right of Reply Notable Trees, dated 8 December 2023, page 2, point 8

of the contractor. In my view, to ensure consistency of plan provisions, the advice note should be included in every rule that provides for wording relating to the arboricultural contractor.

156. I disagree with Ms Easton's Reply on TREE-R4. I consider that a matter of discretion should be focused on avoiding, remediating, or mitigating the adverse effects of an activity or the positive effects or benefits of that same activity, as opposed to being focused on benefits ultimately from an associated activity. Any benefit to the community from regionally significant infrastructure within the root protection area of a notable tree would instead be considered at the RMA Section 104 stage. Consequently, I recommend Westpower's submissions (S547.194, S547.198, and S547.201) should be rejected.

157. I suggest some minor amendments to the heading of TREE-R5 to enable the rule to apply to:

(a) all works associated with network utilities and infrastructure, including any associated buildings / structures not specified in the definitions and maintenance; and

(b) both underground and aboveground works, noting that a Root Protection Area also extends above the ground, particularly for columnar crowns.

158. I consider that clause 16(2) of Schedule 1 of the RMA enables me to make these amendments, as they will improve rule clarity, and capture above-ground network utilities and infrastructure works within the root protection area, noting the root protection area is also above-ground, which would otherwise be a Permitted Activity.

Hearing Panel's Recommendation

159. For the reasons outlined above, and subject to my consideration of Part 2 of the RMA, I recommend the following changes to the **Notable Tree Rules**:

<table>
<tr><th colspan="3">Notable Tree Rules</th></tr>
<tr><td colspan="3">Note: There may be several Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity is provided in General Approach.</td></tr>
<tr><th colspan="3">Permitted Activities</th></tr>
<tr><th>Tree – R2</th><th colspan="2">Trimming and Maintenance of a Notable Tree identified in Schedule Two</th></tr>
<tr><td colspan="2">Activity Status Permitted

Where:

1. The trimming and/or maintenance is:

a. Necessary to improve, maintain or monitor tree health; or

b. To enable the ongoing provision of existing infrastructure <u>or energy activities</u>; or</td><td>Activity status where compliance not achieved: Restricted Discretionary</td></tr>
</table>

c. For compliance with relevant electricity hazard regulations; or d. To prevent a serious threat to people or property; and 2. A council approved arboricultural contractor has certified that the works will not compromise the ongoing integrity, viability or values of the notable tree. **Advice Note: When approving an arboricultural contractor in relation to this rule, the Council will consider the following matters:** **1. Whether the contractor has a New Zealand Certificate of Horticultural Services or equivalent qualification.** 2. **Whether the contractor has significant experience in tree pruning of the type proposed.**	
Tree – R3	**Root Pruning within the Root Protection Area of a Notable Tree identified in Schedule Two**
Activity Status Permitted Where: 1. The root pruning will not compromise the integrity, ongoing viability and values of the tree; and 2. Any machinery associated with undertaking the root pruning is only operated on top of paved surfaces or with ground protection methods use which avoid compaction of the soil around the root zone of the notable tree; and 3. The pruning is: a. Necessary to improve, maintain or monitor tree health; or b. To enable the ongoing provision of existing infrastructure **or energy activities**; or c. For compliance with the relevant electricity hazard regulations; or d. To prevent a serious threat to people or property; and	**Activity status where compliance not achieved:** Restricted Discretionary

4. A council approved arboricultural contractor has certified that the work will be in accordance with 1 and 2. **Advice Note: When approving an arboricultural contractor in relation to this rule, the Council will consider the following matters:** **1. Whether the contractor has a New Zealand Certificate of Horticultural Services or equivalent qualification.** 2. **Whether the contractor has significant experience in tree pruning of the type proposed.**	
Restricted Discretionary Activities	
Tree – R4	**Building Activities Within the Root Protection Area of a Notable Tree identified in Schedule Two**
Activity Status: Restricted Discretionary Where: 1. These will not result in the death or serious threat to the life of the tree as certified by a council approved arboricultural contractor. **Advice Note: When approving an arboricultural contractor in relation to this rule, the Council will consider the following matters:** **1. Whether the contractor has a New Zealand Certificate of Horticultural Services or equivalent qualification.** **2. Whether the contractor has significant experience in tree pruning of the type proposed.** **Discretion is restricted to:** a. The potential impact of the activity on the integrity, ongoing viability, and values of the scheduled notable tree; b. Effects on amenity values of public places; ~~c. Effects on identified values of the tree/s; and~~ c. Whether there is an operational or functional need for the activity to be located within the root protection area; and	**Activity status where compliance not achieved**: Discretionary

d. Whether any **practicable** alternatives are available to avoid the activity occurring in the root protection area.	
Tree – R5	**Works for new and existing ~~Underground~~ Network Utilities and Infrastructure Within the Root Protection Area of a Notable Tree identified in Schedule Two**
Activity Status: Restricted Discretionary Where: 1. These will not result in the death or serious threat to the life of the tree as certified by a council approved arboricultural contractor. **Advice Note: When approving an arboricultural contractor in relation to this rule, the Council will consider the following matters:** **1. Whether the contractor has a New Zealand Certificate of Horticultural Services or equivalent qualification.** **2. Whether the contractor has significant experience in tree pruning of the type proposed.** **Discretion is restricted to:** a. The potential impact of the activity on the integrity, ongoing viability, and values of the scheduled notable tree; b. Effects on amenity values of public places; ~~c. Effects on identified values of the tree/s; and~~ ~~d~~**c**. Whether there is an operational or functional need for the activity to be located within the root protection area; and~~or~~ d. ~~w~~**W**hether any **practicable** alternatives are available to avoid the activity occurring in the root protection area.	**Activity status where compliance not achieved:** Discretionary
Tree – R6	**Gardening, Mowing, Trimming, Maintenance and Root Pruning of a Notable Tree identified in Schedule Two not meeting Permitted Activity standards.**
Activity Status: Restricted Discretionary Where:	**Activity status where compliance not achieved:** Discretionary

1. These will not result in the death or serious threat to the life of the tree as certified by a council approved arboricultural contractor. **Advice Note: When approving an arboricultural contractor in relation to this rule, the Council will consider the following matters:** **1. Whether the contractor has a New Zealand Certificate of Horticultural Services or equivalent qualification.** **2. Whether the contractor has significant experience in tree pruning of the type proposed.** **Discretion is restricted to:** a. The potential impact of the activity on the integrity, ongoing viability, and values of the scheduled notable tree; b. Effects on amenity values of public places; and ~~c. Effects on identified values of the tree/s; and~~ ~~d~~**c**. Whether there is an operational or functional need for the activity to be located within the root protection area; and~~or~~ **d.** ~~w~~**W**hether any **practicable** alternatives are available to avoid the activity occurring in the root protection area.	

2.5. Schedule Two

Submissions and Further Submissions

160. 10 submission points relating to Schedule Two were summarised in a Table on pages 17 and 18 of the s42A Report. Appendix 2 of the s42A Report records two further submission points (FS1.052 and FS1.061) which have been missed from the s42A Report.

161. Six submission points supported retaining Schedule Two as notified. Two submission points supported retaining Schedule Two in part. The remaining two submission points sought amendments to Schedule Two. The two further submission points supported Ms Mills' and Ms Langridge's submission in part.

162. I adopt the summary of these submissions and further submissions detailed in the s42A Report, and I have considered all the relevant submissions and further submissions.

Section 42A Report

163. Ms Easton recommended accepting the submission[86] from Te Tumu Paeroa to clearly identify notable trees of value to Poutini Ngāi Tahu in Schedule Two. She reasoned that Schedule Two may fail to clearly articulate that specific trees hold cultural significance to Poutini Ngāi Tahu. Therefore, she recommended amending Schedule Two by replacing "*Cultural*" with "*Poutini Ngāi Tahu Values*" as a value of TREE27, TREE58, and TREE59.

164. Ms Easton recommended rejecting the submission[87] from Ms Langridge to amend Schedule Two to protect specific rata trees in Barrytown, including on Ms Langridge's property. She reasoned that TTPP staff assessed the identified trees using STEM, and none of those trees met the threshold for inclusion in the pTTPP.

165. Lastly, Ms Easton recommended accepting in part the submission[88] from Ms Mills to include specific trees at Coronation Reserve and Dixon Park in Schedule Two. She reasoned that TTPP staff reviewed the existing trees in both locations, and did not consider any additional trees (except for TREE29 to TREE37) should be included in Schedule Two.

Hearing and Submitter Evidence

166. Mr and Ms Coates[89] queried at the hearing:

(a) whether a plan change would be required to add, remove, or alter a notable tree to / from Schedule Two.

(b) if a plan change is required, what the plan change process involved.

167. For clarity, page 2 of Mr and Ms Coates hearing statement copies the Notable Trees section from pages 5 and 6 of the s32 Report, rather than presenting their own views.

Reporting Officer Reply Evidence

168. In response to my hearing query, Ms Easton[90] advised that altering Schedule Two (i.e., changing notable aspects for TREE27, TREE58, and TREE59) or adding new notable trees to the schedule **would** require a private plan change following the standard RMA Schedule 1 process.

Hearing Panel's Evaluation

169. For the reasons set out in Ms Easton's s42A Report and Reply, I agree with her recommendations accepting the submission[91] from Te Tumu Paeroa to clearly identify notable trees of value to Poutini Ngāi Tahu in Schedule Two. In detail she recommended amending Schedule Two by replacing "*Cultural*" with "*Poutini Ngāi Tahu Values*" as a value of TREE27, TREE58, and TREE59.

170. As well, I agree with Ms Easton's recommendations accepting in part the submission[92] from Ms Mills to include specific trees at Coronation Reserve and Dixon Park in Schedule Two

[86] Te Tumu Paeroa (S440.052 and S440.016)
[87] Ms Langridge (S252.005)
[88] Ms Mills (S309.005)
[89] Mr George and Ms Carly Coates, Notable Trees hearing statement, page 1
[90] Ms Lois Easton, s42A Author Right of Reply Notable Trees, dated 8 December 2023, page 1, point 5
[91] Te Tumu Paeroa (S440.052 and S440.016)
[92] Ms Mills (S309.005)

because TTPP staff reviewed the existing trees in both locations, and did not consider that any additional trees (except for TREE29 to TREE37) should be included in Schedule Two.

Hearing Panel's Recommendation

171. For the reasons outlined above, and subject to my consideration of Part 2 of the RMA, I recommend the following changes to the **Schedule Two: Notable Trees - Te Rārangi Tuarua: Ngā Rākau Whamaumahara**:

Schedule Two: Notable Trees **Te Rārangi Tuarua: Ngā Rākau Whamaumahara**

SCHED2 - SCHEDULE OF NOTABLE TREES		
Unique Identifier	**Site Identifier**	**Tree Type and Values**
	Grey District	
TREE27	SH6 (seaward side) Kararoa	Karaka group (Corynocarpus laevigatus) **Poutini Ngāi Tahu Values** ~~Cultural~~
	Westland District	
TREE58	Old pa site, Makaawhio/Jacobs River True left	Grove of Kowhai (Sophora sp.) **Poutini Ngāi Tahu Values** ~~Cultural~~
TREE59	Makaawhio/Jacobs Riverbank True right	Kahikatea (Dacrocarpus dacridioides) **Poutini Ngāi Tahu Values** ~~Cultural~~

Paul Rogers

Hearings Panel - Chair

Date: Monday 23 June 2025

APPENDIX 1 – RECOMMENDATIONS ON PLAN PROVISIONS

Notable Tree Objectives	
TREE – O1	To recognise the botanical, aesthetic, cultural or historic value of notable trees.
TREE – O2	To provide for tino rangatiratanga in relation to management of notable trees of value to Poutini Ngāi Tahu.
TREE – O3	To provide for the protection of notable trees while recognising instances where trimming and/or pruning is required **where this:**[93] a. ~~and~~ [94]may improve the health of the tree, or b. **is needed for safety reasons including the safe operation of infrastructure and energy activities; and recognise there may be** instances where removal of the tree is unavoidable due to safety **requirements**[95].

Notable Tree Policies	
TREE – P1	Identify, assess using the Standard Tree Evaluation Method (STEM) and protect notable trees, in partnership with Poutini Ngāi Tahu and in consultation with the community and key stakeholders.
TREE – P2	Trees identified in Schedule Two with notable botanical, aesthetic, cultural or historic value are protected.
TREE – P3	Enable opportunities for mana whenua to exercise tino rangatiratanga for notable trees of value to Poutini Ngāi Tahu.
TREE – P4	Allow the trimming and pruning of notable trees and activities in the root protection area where the works: a. Retain or improve the health of the tree; **or**[96] b. Are necessary to prevent a serious threat to property and people; **or**[97] c. Are necessary for the ongoing **operation** [98]of infrastructure **and energy activities**[99]; or d. Are for the maintenance of network utility infrastructure **and energy activities** [100]to enable compliance with relevant safety standards.

[93] Clause 16(2) of Schedule 1 RMA
[94] Clause 16(2) of Schedule 1 RMA
[95] Waka Kotahi (S450.071), GDC (S608.597), and Westpower (S547.186)
[96] Westpower (S547.189)
[97] Clause 16(2) of Schedule 1 RMA
[98] Westpower (S547.190), GDC (S608.598) and Chorus NZ Ltd, Spark NZ Trading Ltd, Vodafone NZ Ltd (S663.038)
[99] Westpower (S547.189)
[100] Westpower (S547.189)

TREE – P5	Ensure that any activity within the root protection area of a notable tree is appropriate having regard to: a. The values of the tree and its setting; b. If the tree is identified for cultural values, the outcomes of any discussion with and/or assessment undertaken by Poutini Ngāi Tahu; c. Whether the activity will compromise the tree's health or result in a reduction or loss of its values; d. The impact of the activity on the stature, form or shape, health and vigour, structural integrity and life expectancy of the tree; and e. Whether the tree renders a site incapable of reasonable use.
TREE – P6	The partial or full removal or destruction of an unsafe or structurally unsound notable tree will only be allowed where it has been certified as such by a Council approved arboricultural contractor.

Notable Tree Rules		
Note: There may be several Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity is provided in General Approach.		
Permitted Activities		
Tree – R1	**Gardening and Mowing in the Root Protection Area of a Notable Tree identified in Schedule Two**	
Activity Status Permitted Where: 1. The ground level is not altered; and 2. The protected root zone is not damaged.		**Activity status where compliance not achieved:** Restricted Discretionary
Tree – R2	**Trimming and Maintenance of a Notable Tree identified in Schedule Two**	
Activity Status Permitted Where: 1. The trimming and/or maintenance is: a. Necessary to improve, maintain or monitor tree health; or		**Activity status where compliance not achieved:** Restricted Discretionary

b. To enable the ongoing provision of existing infrastructure **or energy activities**[101]; or c. For compliance with relevant electricity hazard regulations; or d. To prevent a serious threat to people or property; and 2. A council approved arboricultural contractor has certified that the works will not compromise the ongoing integrity, viability or values of the notable tree. **Advice Note: When approving an arboricultural contractor in relation to this rule, the Council will consider the following matters:** **1. Whether the contractor has a New Zealand Certificate of Horticultural Services or equivalent qualification.** 2. **Whether the contractor has significant experience in tree pruning of the type proposed.**[102]	
Tree – R3	**Root Pruning within the Root Protection Area of a Notable Tree identified in Schedule Two**
Activity Status Permitted Where: 1. The root pruning will not compromise the integrity, ongoing viability and values of the tree; and 2. Any machinery associated with undertaking the root pruning is only operated on top of paved surfaces or with ground protection methods use which avoid compaction of the soil around the root zone of the notable tree; and 3. The pruning is: a. Necessary to improve, maintain or monitor tree health; or b. To enable the ongoing provision of existing infrastructure **or energy activities**[103]; or	**Activity status where compliance not achieved:** Restricted Discretionary

[101] Westpower (S547.192)
[102] Clause 16(2) of First Schedule of RMA
[103] Westpower (S547.193)

c. For compliance with the relevant electricity hazard regulations; or d. To prevent a serious threat to people or property; and 4. A council approved arboricultural contractor has certified that the work will be in accordance with 1 and 2. **Advice Note: When approving an arboricultural contractor in relation to this rule, the Council will consider the following matters:** **1. Whether the contractor has a New Zealand Certificate of Horticultural Services or equivalent qualification.** 2. **Whether the contractor has significant experience in tree pruning of the type proposed.**[104]	
Restricted Discretionary Activities	
Tree – R4 | **Building Activities Within the Root Protection Area of a Notable Tree identified in Schedule Two**	
Activity Status: Restricted Discretionary Where: 1. These will not result in the death or serious threat to the life of the tree as certified by a council approved arboricultural contractor. **Advice Note: When approving an arboricultural contractor in relation to this rule, the Council will consider the following matters:** **1. Whether the contractor has a New Zealand Certificate of Horticultural Services or equivalent qualification.** **2. Whether the contractor has significant experience in tree pruning of the type proposed.**[105] **Discretion is restricted to:** a. The potential impact of the activity on the integrity, ongoing viability, and values of the scheduled notable tree;	**Activity status where compliance not achieved**: Discretionary

[104] Clause 16(2) of First Schedule of RMA
[105] Clause 16(2) of First Schedule of RMA

b. Effects on amenity values of public places; ~~c. Effects on identified values of the tree/s; and~~[106] c. Whether there is an operational or functional need for the activity to be located within the root protection area; and d. Whether any **practicable** [107]alternatives are available to avoid the activity occurring in the root protection area.	
Tree – R5	**Works for new and existing ~~Underground~~ [108]Network Utilities and Infrastructure Within the Root Protection Area of a Notable Tree identified in Schedule Two**
Activity Status: Restricted Discretionary Where: 1. These will not result in the death or serious threat to the life of the tree as certified by a council approved arboricultural contractor. **Advice Note: When approving an arboricultural contractor in relation to this rule, the Council will consider the following matters:** **1. Whether the contractor has a New Zealand Certificate of Horticultural Services or equivalent qualification.** **2. Whether the contractor has significant experience in tree pruning of the type proposed.**[109] **Discretion is restricted to:** a. The potential impact of the activity on the integrity, ongoing viability, and values of the scheduled notable tree; b. Effects on amenity values of public places; ~~c. Effects on identified values of the tree/s; and~~[110]	**Activity status where compliance not achieved:** Discretionary

PART A – INTRODUCTORY MATTERS

1. PRELIMINARY MATTERS

1.1. Introduction

1. Matters to do with our appointment and other preliminary matters applicable to all Hearing Panel's recommendations on the Proposed Te Tai o Poutini Plan ('**pTTPP**' or 'the Plan') are recorded and addressed in Recommendation Report 1.

2. This Recommendation Report relates to the Open Space and Recreational Zones ('**OSRZ**'), Natural Open Space Zone ('**NOSZ**'), Open Space Zone ('**OSZ**'), and Sport and Active Recreation Zone ('**SARZ**') chapters of the Zones section in Part 3 – Area-Specific Matters of pTTPP.

3. This Recommendation Report contains our evaluations and recommendations to the TTPP Committee on the submissions and further submissions received on the OSRZ, NOSZ, OSZ, and SARZ chapters.

4. The Section 32 Report[1] on OSRZ ('**s32 Report**') provided an evaluation of the options relating to managing the three Open Space and Recreational Zones through the pTTPP, including the regulatory framework, key resource management issues, the evidence base (research, consultation, information and analysis undertaken) and evaluation of the options. The evaluation concluded that, compared to a modified status quo zoning approach or status quo designation approach, the OSRZ, NOSZ, OSZ, and SARZ provisions represents the most appropriate means of achieving the OSRZ objectives of the pTTPP.

5. Some 338 submission points and 65 further submission points were received in total on the OSRZ, NOSZ, OSZ, and SARZ chapters and relevant definitions.

6. The Section 42A Officer's Report[2] ('**s42A Report**'), authored by Ms. Lois Easton, a principal planner with Kererū Consultants acting as the Reporting Officer, was circulated prior to the hearing. The s42A Report summarised the submissions and further submissions received, and relief sought. It analysed the submissions on the OSRZ, NOSZ, OSZ, and SARZ provisions, and detailed recommendations (summarised in **Appendix 1** of the s42A Report). It also indicated whether individual submission points and further submission points were recommended to be accepted/accepted in part/rejected (see **Appendix 2** of the s42A Report).

7. The matters raised by submitters and further submitters were grouped in the s42A Report in relation to each of the following key issues:

   (a) Definitions.

   (b) Open Space and Recreation Zones topic as a whole.

   (c) Open Space and Recreation Zones overview section and chapter.

   (d) Objectives.

[1] Section 32 Evaluation Report Ten Open Space and Recreation Zones Ngā Mokowā Pōaha me ngā Takiwā Hākinakina and Public Access Te Āheinga Tūmatanui

[2] Section 42A Officer's Report Open Space and Recreation Zones - Ngā Mokowā Pōaha me ngā Takiwā Hākinakina

(e) Policies.

(f) NOSZ chapter.

(g) OSZ chapter.

(h) SARZ chapter; and

(i) Zoning maps.

8. A s32AA evaluation for all recommended amendments was provided at the end of the s42A Report.

9. After the hearing, Ms. Easton provided a Right of Reply ('**Right of Reply**') dated 15 August 2024.

10. This Recommendation Report follows the same structure of the s42A Report and provides a summary of the issues raised in submissions and further submissions, the s42A Report analysis and recommendations, submitter statement or evidence and the Right of Reply, before providing my evaluation and recommendation.

11. This Recommendation Report should be read in conjunction with the s42A Report and the tracked change version of the notified pTTPP provisions (attached as **Appendix 1** to this Report). The tracked change version of the pTTPP provisions forms an integral part of the decision and records all my recommended amendments (additions and deletions) to the notified pTTPP provisions. The tracked change version of the pTTPP shows my recommended changes to the notified provisions in **bold and underlining** indicating additions and ~~strikethrough~~ indicating deletions. If there is any discrepancy between this Recommendation Report and the tracked change version of the pTTPP, the tracked change version of the pTTPP shown in **Appendix 1** of this Report must prevail.

12. This Recommendation Report contains the reasons for our recommendations. These comprise either adoption of the reasoning and recommendations of the original s42A Reports or the Right of Reply, or a specific reasoning.

13. Where we recommend the pTTPP provisions should remain as notified, it is because:

(a) We have adopted the reasoning and recommendation of the s42A Report or the Right of Reply to retain the provision as notified; or

(b) We have recommended to retain the provision as notified for reasons set out in this Recommendation Report.

14. Where there is a recommended change to a notified provision of the pTTPP, it is because:

(a) We have recommended amendment to a provision for reasons set out in this Recommendation Report in response to a submission point, which the s42A Report did not recommend; or

(b) We have adopted the reasoning and recommendation of the s42A Report to change the provision to that recommended in the original s42A Report; or

(c) We have adopted the reasoning and recommendation to that recommended in the Right of Reply; or

(d) A consequential change has been necessary following on from a decision in either (a), (b) or (c).

15. Where there may be a different recommendation between the s42A Report and the Right of Reply (i.e., the Reporting Officer's recommendation has changed as a result of hearing the statement or evidence of submitters), unless the recommendation specifically adopts the original s42A Report's reasoning and recommendations, the reasoning and recommendations in the (later) reply has been adopted and it must be taken to prevail.

16. If there are circumstances where we consider that alternative relief is more appropriate than that requested in submissions and further submissions to give effect to the RMA, NZCPS, NPS and/or RPS, but are still within the scope of the relief sought, the relevant recommendation clearly sets out the nature of the change and the reason for the change. This is recorded in this Recommendation Report.

17. If any changes are recommended to the provisions (since the s32A Report was completed) a further evaluation, if required, has been undertaken pursuant to s32AA of the RMA. Any such circumstances are referred to in this Recommendation Report in sufficient detail to demonstrate a further evaluation was undertaken.

18. Clause 16(2) of Schedule 1 of the RMA enables us to recommend amendments to alter information, where such an alteration is of minor effect, or may correct any minor errors. Any such minor amendments are recorded in the recommendations below each section considered in Part C of this Report and in the tracked change version of the notified Plan provisions (**Appendix 1** of this Report).

1.2. Terminology in this Report

19. Throughout this Report, the following abbreviations will be used:

Bathurst Group	Bathurst Resources Limited and BT Mining Limited
Birchfield Group	Birchfield Ross Mining Limited and Birchfield Coal Mines Ltd
BCG	Buller Conservation Group
BDC	Buller District Council
BDL	Ball Developments Ltd
BCML	Birchfield Coal Mines Ltd
BRML	Birchfield Ross Mining Limited
CMS	Conservation Management Strategy
Councils	Buller District Council, Grey District Council, and Westland District Council
DOC	Department of Conservation
Director General	Director General of Conservation

Forest & Bird	Royal Forest & Bird Protection Society of NZ Inc
GDC	Grey District Council
KiwiRail	KiwiRail Holdings Limited
Manawa	Manawa Energy Limited
MOE	Te Tāhuhu o ta Mātauranga Ministry of Education
NTCSA	Ngāi Tahu Claims Settlement Act 1998
NZMCA	New Zealand Motor Caravan Association
Ngāi Tahu	Te Rūnanga o Ngāi Tahu, Te Runanga o Ngāti Waewae, Te Rūnanga o Makaawhio
NPS-FM	National Policy Statement for Freshwater Management 2020
NPS-IB	National Policy Statement for Indigenous Biodiversity
NPS-REG	National Policy Statement for Renewable Electricity Generation 2011
NZAAA	New Zealand Agricultural Aviation Association
NZCPS	New Zealand Coastal Policy Statement 2010
NZCCL	New Zealand Coal & Carbon Limited
OSMP	Open Space Management Plan
Planning Standards	National Planning Standards
PML	Phoenix Minerals Limited
REG	Renewable Electricity Generation
RMA or the Act	Resource Management Act 1991
RMP	Reserve Management Plan
RNZ	Radio New Zealand Limited
RSI	Regionally Significant Infrastructure
SASM	Site or Area of Significance to Māori
SEL	Skyline Enterprises Limited
Te Mana Ora	Te Mana Ora (Community and Public Health) of Te Whatu Ora (Health New Zealand)
Terra Firma	Terra Firma Mining Ltd
The Dunn, Boon, Preston, and Rogers group	Paul & Barbara Dunn, Helen & Steve Boon, Ian & Lynley Preston, and Jane & Mike Rogers
The Findlays	Paparoa Track Services Ltd, Craig and Sue Findlay, Tim Findlay, Punakaiki Beach Camp Ltd

TiGa	TiGa Minerals and Metals Limited
Waka Kotahi	NZ Transport Agency Waka Kotahi
WCRC	West Coast Regional Council
WCRPS	West Coast Regional Policy Statement
WDC	Westland District Council
Westpower	Westpower Limited
WMS	WMS Group (HQ) Limited and WMS Land Co. Limited
WRCI	Westport Rifle Club Incorporated

1.3. Hearing Arrangements

20. The hearing was held via Audio Visual over 3 and 4 July 2024. Some submitters appeared by internet connection while others joined in person.

1.4. Appearances

21. The following submitters appeared at the hearing:

    (a) Ms Rachael Pull, planner on behalf of Ngāi Tahu (S620 and FS41);

    (b) Ms Christina Sheard and Mr Joshua Leckie legal counsel, Claire Hunter planner and Mr Campbell Robertson on behalf of Bathurst Group (S491 and FS89);

    (c) Ms Nicky Snoyink on behalf of Forest & Bird (S560 and FS34);

    (d) Ms Frida Inta (S553) for herself and on behalf of BCG (S552);

    (e) Mr Andrew Beaumont for himself (S225);

    (f) Messrs Matt Pemberton and Geoff Deavoll on behalf of the Director General (S602 and FS122);

    (g) Mr Martin Kennedy planner on behalf of Westpower (FS222);

    (h) Ms Lucy Smith on behalf of Terra Firma (S537 and FS108); and

1.5. Submitter correspondence

22. In lieu of presenting at the hearing, the TTPP Panel received a letter from:

    (a) KiwiRail on 5 June 2024.

    (b) Chapman Tripp, counsel for RNZ, on 19 June 2024; and

    (c) Ms Daly Williams on behalf of the MoE on 4 July 2024.

1.6. Overview of submitter evidence received

23. Evidence was circulated prior to and tabled at the hearing from:

    (a) Ms Stephanie Styles, on behalf of Manawa (S438) dated 29 May 2024.

24. For those appearing at the hearing the following evidence and/or statements were received:

    (a) Ms Smith, on behalf of Terra Firma (S537 and FS108) dated 5 June 2024;

    (b) Ms Sheard and Mr Leckie, counsel for Bathurst Group (S491 and FS89) dated 19 June 2024;

    (c) Ms Hunter, on behalf of Bathurst Group (S491 and FS89) dated 5 June 2024;

    (d) Mr Pemberton, counsel for the Director General (S602 and FS122);

    (e) Mr Deavoll, on behalf of Director General (S602 and FS122) dated 5 June 2024;

    (f) Mr Kennedy, on behalf of Westpower (FS222) dated 5 June 2024;

    (g) Ms Pull, on behalf of Ngāi Tahu (S620 and FS41) dated 14 June 2024; and

1.7. Right of Reply

25. Ms. Easton provided a Right of Reply responding to questions raised at the hearing and proposing further amendments beyond those recommended in the s42A Report.

1.8. Procedural Steps and Issues

26. No procedural matters were raised at the hearing.

1.9. Site Visits

27. No site visits relating to these chapters were undertaken.

PART B - STATUTORY REQUIREMENTS AND DOCUMENTS

28. Part 3 - Area-Specific Matters - Te Wāhanga 3 - Ngā Take a Ia Rohe of the pTTPP contains a Zones - Ngā Takiwā section. The Zones section contains the subsection Open Space and Recreation Zones - Ngā Mokowā Pōaha me ngā Takiwā Hākinakina. That subsection contains four chapters, being the OSRZ, NOSZ, OSZ, and SARZ chapters. The OSRZ chapter contains objectives and policies for the three open space zones, i.e., NOSZ, OSZ, and SARZ. Whereas the NOSZ, OSZ, and SARZ chapters each contain rules to manage activities within their respective zone, and activity specific standards with the Permitted Activity rules.

29. The s32 Report outlined the relevant statutory considerations for open space and recreation land. That included matters from sections 6, 7 and 8 of the RMA, NPS-FM, Planning Standards, WCRPS, iwi management plans, Reserves Act 1977, Walking Access Act 2008, and Conservation Act 1987, relevant to the OSRZ chapters, and broadly discussed these considerations too[3].

30. The s32 Report[4] indicated that there are three iwi management plans, i.e., Te Rūnanga o Makaawhio Pounamu Management Plan, Ngāti Waewae Pounamu Management Plan, and Lake Māhinapua Management Plan. It[5] noted that while these documents focus on specific issues, they also contain wider information about the overall approach to sustainability and kaitiakitanga of resources, and Poutini Ngāi Tahu values.

31. Clause 10 of Schedule 1 of the RMA states that it is not necessary to provide decisions on individual submissions. Recommendations are made within the scope of requested relief, either individual submissions or groups of submissions making similar requests, as specified in reasons for recommendation. References to relevant submissions are made in the footers.

32. The Planning Standards mandatory direction 5.23 states the NOSZ should either be placed in the Rural Zone or OSRZ chapter of the pTTPP. Mandatory direction 5.20 indicates that the NOSZ, OSZ, and SARZ should sit under the OSRZ chapter of the pTTPP. I am satisfied the pTTPP structure is consistent with these national directions.

33. As background in her summary statement Ms Easton clarified that:

    (a) The Councils do not have any strategic documents or plans for parks and open space to provide context for policy development for the pTTPP. Buller and Grey District Councils owned or managed reserves were subject to Designations, whereas there was no specific management approach for Westland District Council owned or managed reserves;

    (b) Parks or open spaces in the region were generally zoned the same as the surrounding area. In the first instance, it was considered whether the OSZ was appropriate, being the most generic of the three zones. Sportsfields and other active recreation sites were generally zoned SARZ. Outside of the DoC lands, very few sites were zoned NOSZ; and

    (c) The Councils held limited information to make zoning decisions on DoC lands, so DoC lands were largely zoned OSZ, except for National Parks which are zoned NOSZ. It was recognised this approach would mainly impact on concessionaires and third parties rather than DoC activities.

[3] Above n 1, sections 1.2.2 to 1.2.6
[4] Above n 1, section 1.2.5
[5] Above n 4

PART C – SUBMISSIONS, EVIDENCE, EVALUATION AND RECOMMENDATIONS

2. DEFINITIONS

Submissions and Further Submissions

34. Four submission points and one further submission points[6] relating to **Definitions** were summarised in a Table on pages 11 and 12 of the s42A Report. All submission points sought an amendment to the definition of a term, and the further submission point opposed Forest & Birds submission.

35. We adopt the summary of these submissions detailed in the s42A Report, and we have considered all of the relevant submissions.

Section 42A Report

36. Ms Easton recommended rejecting BCG's request (S552.223) to insert the term 'Reserve' and associated definition in the chapter. She reasoned it unnecessary because this term is not used in the OSRZ topic and would require the pTTPP to distinguish reserves for public purpose from road reserves or other types of reserves.

37. Ms Easton recommended rejecting the request from BCG and Ms Inta (S552.225 and S553.212 respectively) to amend the term 'Parks Facilities' to include several elements listed in the 'Parks Furniture' term and subsequently remove those same elements from 'Parks Furniture'. She reasoned that these terms relate to differing scale of facilities, i.e., low impact facilities are 'Parks Furniture' whereas more significant facilities are 'Parks Facilities'.

38. Regarding Forest & Bird's request (S560.072) to amend the Open Space Management Plan (OSMP) definition to limit its considerations to areas and activities outside the NOSZ and overlays and outside areas of significant indigenous biodiversity, Ms Easton recommended accepting in part both the submission. She reasoned that the term should be retained, but not be excluded from specific zones, overlays, or areas because an OSMP is likely to be more specific to the reserve than region-wide provisions.

Hearing and Submitter Evidence

Ms Frida Inta and Buller Conservation Group

39. In the statement for herself and on behalf of BCG, in response to Ms Easton's conclusion detailed in [36], Ms Inta indicated the term "Reserve" is widely used in the pTTPP, she cited various examples. She suggested the Reserves Act covers most reserves, including road reserve, so a further definition for road reserve would not be needed. She mentioned a definition for "Reserve" would be applicable to the zone, Natural Environment Values, and General District-Wide Matters chapters. Consequently, Ms Inta suggested the following "Reserve" term and definition be included in the pTTPP, with this being the same definition included in the Buller District Plan.

Reserve

[6] BCG (S552.223 and S552.225), Ms Frida Inta (S553.212), Forest & Bird (S560.072) and BDC (FS149.067)

Any land set apart for any public purpose, as defined in the Reserves Act 1977. There are different types of reserves administered by the Department of Conservation and the word 'reserves' in this Plan can refer to these reserves.

Reporting Officer Reply Evidence

40. Ms Easton indicated "Reserve" references in the OSRZ chapter relate to the "Reserves Act 1977", she listed other "Reserve" references throughout the pTTPP (i.e., esplanade reserve, Reserves Act, native reserve, Māori reserve, and road reserve). She considered defining "Reserve" unnecessary for the OSRZ topic, reasoning that a generic definition would not aid plan interpretation given there are many reserve types, some of which are established under different Acts.

41. Ms Easton indicated there is scope within the Director General's submission (S602.001) to amend the OSMP definition to insert a reference to the Conservation Management Strategy as illustrated below. She highlighted her support for such an amendment:

*means a Reserve Management Plan or Conservation Management Plan **or Conservation Management Strategy** or National Park Management Plan or Iwi/Papatipu Rūnanga Management Plan or other Management Plan prepared in accordance with the Reserves Act 1977 or the Conservation Act 1987.*

Hearing Panel's Evaluation

42. The Panel agree with Ms Easton's recommendation that no changes to be made to the definitions of "Park facilities" and "Parks Furniture" as there are different scales of facilities included in the definition and Parks Furniture is a low impact facility compared to other Park Facilities which are more significant.

43. The Panel accept Ms Easton's recommendation to amend the definition of OSMP based on the Director General's submission and include Conservation Management Strategy. We consider this is an appropriate amendment.

Hearing Panel Recommendation

44. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted in part, and recommends the following changes to the definition of Open Space Management Plan:

Definitions - Ngā Tautuhinga	
Term	**Definition**
OPEN SPACE MANAGEMENT PLAN	means a Reserve Management Plan or Conservation Management Plan **or Conservation Management Strategy**[7] or National Park Management Plan or Iwi/Papatipu Rūnanga Management Plan or other Management Plan prepared in accordance with the Reserves Act 1977 or the Conservation Act 1987.

[7] Director General of Conservation (S602.001), Forest & Bird (S560.072)

3. OPEN SPACE AND RECREATION ZONES TOPIC AS A WHOLE

Submissions and Further Submissions

45. Seven submission points and five further submission points[8] relating to the **OSRZ** topic as a whole were summarised in a Table on pages 12 and 13 of the s42A Report. One submission point supported the provisions as notified, two submission points were neutral, and the other four submission points sought an amendment. Of the further submissions, three supported or supported in part WCRC's amendment submission point, and one opposed the amendment submission point from GDC and Ms Perkins.

46. We adopt the summary of these submissions detailed in the s42A Report, and we have considered all of the relevant submissions.

Section 42A Report

47. Ms Easton noted the supportive or neutral submissions received on the OSRZ topic and, consequently, recommended their acceptance.

48. She recommended rejecting the submission from GDC (S608.094) to remove all references to SASM from the entire chapter, reasoning their inclusion is appropriate and gives effect to s6 of the RMA. As a result, Ms Easton recommended the further submission from Ngāi Tahu be accepted.

49. Ms Easton recommended rejecting the submission from Ms Inta (S553.227) to rewrite the entire OSRZ chapter, reasoning that the chapter manages activities undertaken on public conservation land by both DoC and other entities. She emphasised that DoC remain landowner and administer of public conservation land, but the Councils also have responsibilities under the RMA.

50. Ms Easton recommended accepting WCRC's requested amendment (S488.029) to insert a Permitted Activity rule in the chapter for aerial helicopter operations associated with biodiversity and biosecurity works. She reasoned that this is already provided for through the permitted 'Conservation Activities' in all three zones. Consequently, Ms Easton recommended that the 'Conservation Activities' term specifically include biosecurity work undertaken by helicopters.

51. Ms Easton recommended accepting in part Ms Perkins requested amendment (S462.037) to provisions relating to cemeteries, reasoning that the term 'Cemeteries' allows for natural burials. However, she emphasised that the Councils will separately manage whether natural burials are appropriate or allowed in specific cemeteries through their individual Cemeteries Bylaw.

Hearing and Submitter Evidence

52. In his legal submission, Mr Pemberton highlighted that most of the Director General's submission points relating to the OSRZ topic have been accepted.

[8] Avery Brothers (S609.098), Director General (S602.191, S602.205, and FS122.034), GDC (S608.094), Ngāi Tahu (FS41.025 and FS41.245), Ms Frida Inta (S553.227), WCRC (S488.029), Mr Tony Michelle (FS30.16), NZHA (FS83.18), and Ms Inger Perkins (S462.037)

53. In her summary of planning evidence on behalf of Ngāi Tahu, Ms Pull generally supported Ms Easton's recommendations on Ngāi Tahu submissions and further submissions.

Hearing Panel's Evaluation

54. The Panel agrees with Ms Easton's recommendations in regard to submissions received on the Chapter as a Whole. We accept that specifically including 'biosecurity work undertaken with helicopters' in the term "Conservation Activities" is appropriate. We note that this has been addressed in the Introduction and General recommendation. We also accept the conclusion that the current definition of cemeteries allows for natural burials and agree that Council's will manage this process through their individual bylaws.

Hearing Panel Recommendation

55. The Panel recommends no amendments to the Plan are made as a result of these submissions but noting that an amendment the definition of "Conservation Activities" has been made in the Introduction and General recommendation.

4. OPEN SPACE AND RECREATION ZONES OVERVIEW SECTION AND CHAPTERS

Submissions and Further Submissions

56. Eight submission points and two further submission points[9] relating to the **OSRZ overview section** were summarised in a Table on pages 14 to 16 of the s42A Report. Four submission points supported the overview section with most requesting retention, and one further submission point supported PML's submission of support. Four submission points requested amending the overview section, noting that Forest & Bird did not specifically state their position, with one further submission point opposing the Director General's amendment.

57. Eight submission points and three further submission points[10] relating to the **OSRZ chapters** were summarised in a Table on pages 15 to 17 of the s42A Report. Seven submission points requested amendments to the chapter, although Forest & Bird's position of support on submission point S560.0553 should have been recorded as 'Amend' instead of 'Support' since they requested an amendment. Lastly, one submission point opposed the chapter, with this submission supported or supported in part by three further submissions.

58. We adopt the summary of these submissions detailed in the s42A Report, and we have considered all of the relevant submissions.

Section 42A Report

59. Ms Easton noted the support on the OSRZ overview section. Consequently, she recommended acceptance in part of their submissions.

60. Ms Easton did not support the Director General's submission (S602.181) to amend the OSRZ overview section, reasoning that there are areas in the OSZ where mineral extraction activities

[9] BRML (S604.068), PML (S606.054), Terra Firma (FS108.001), Whyte Gold Limited (S607.052), WMS (S599.099), Director General (S602.181 and S602.001), Bathurst Group (FS89.028), Forest & Brid (S560.0554, S560.0555, S560.334 and FS34.003), Mr William McLaughlin (S567.742 and S567.401), WRCI (S457.018), Mr Chris and Ms Jan Coll (S558.342), Chris J Coll Surveying Limited (S566.342), Ms Laura Coll McLaughlin (S574.342), WCRC (FS136.027), BDC (FS149.0134)

[10] Mr William McLaughlin (S567.742 and S567.401), Ms Laura Coll McLaughlin (S574.342), Mr Chris and Ms Jan Coll (S558.342), Chris J Coll Surveying Limited (S566.342), WRCI (S457.018), Director General (S602.001), WCRC (FS136.027), BDC (FS149.0134), and Forest & Bird (S560.0553 and FS34.003)

could fit within the OSZ purpose, citing quarrying or gravel pits for local purposes or pounamu or aotea recovery occurring in the OSZ. She recommended accepting the Director General's submission in part as far as amending the overview section as detailed below:

Overview

…

The nature of the West Coast, with its extensive mineral deposits,-**means that minerals are widespread within areas within the Open Space and Recreation Zones.** ~~combined with 84% of the land area being located in public conservation estate[1],~~ **There are a range of circumstances where some mineral extraction may be appropriate, particularly where this supports ongoing access and management of the lands within the zones. There are also some Local Purpose Reserves within the Open Space Zone in particular, where quarrying or gravel extraction may be part of, or the primary local purpose. This** means that provision is also made for mineral extraction within the Open Space Zone …

61. Ms Easton recommended accepting Forest & Bird's amendment (S560.0553) to the OSRZ overview, considering it appropriate for the district wide provisions to be referred to in this overview. However, Ms Easton did not actually make any recommendations on the OSRZ overview, instead incorporated this submission in the NOSZ, OSZ, and SARZ overviews which are discussed in those respective sections.

62. Ms Easton supported the insertion of "ecological" into the NOSZ section of the OSRZ overview as requested by Forest & Bird's (S560.0554). However, this appears to have been omitted in error from her recommendations in the s42A Report.

63. Regarding Forest & Birds other amendment (S560.0554), Ms Easton indicated that if they considered the NOSZ provisions should apply to land they own and manage for conservation purposes, then that may be appropriate. She invited Forest & Bird to advise the Panel of the location of that land. However, Ms Easton was unsupportive of applying any of the open space zones to privately owned land as the zone provisions are focused on development and activities occurring on public owned land, many of which are highly unlikely to occur on privately owned land.

64. Ms Easton recommended accepting in part Forest & Bird's amendments (S560.0555) to the OSZ section of the OSRZ overview, supporting improved clarity of reasoning for mineral extraction provisions. However, she recommended alternative wording to appropriately clarify the rational of those provisions as detailed below:

The nature of the West Coast, with its extensive mineral deposits,-**means that minerals are widespread within areas within the Open Space and Recreation Zones.** ~~combined with 84% of the land area being located in public conservation estate,~~ **There are a range of circumstances where some mineral extraction may be appropriate, particularly where this supports ongoing access and management of the lands within the zones. There are also some Local Purpose Reserves within the Open Space Zone in particular, where quarrying or gravel extraction may be part of, or the primary local purpose. This** means that provision is also made for mineral extraction within the Open Space Zone."

65. Regarding Forest & Bird's submission point (S560.0555), Ms Easton was unsupportive of removing a large area of public conservation land from the OSZ for the same reasons as discussed in below.

66. Ms Easton recommended rejecting Forest & Bird's submission (S560.334) as she was unsupportive of amending DoC's stated obligation in the overview sections, reasoning that the OSRZ provisions do not apply to Energy, Infrastructure, and Transport matters. However, Ms Easton emphasised that DoC's role in administering land under the Conservation Act remains.

67. Ms Easton recommended accepting the submission from Mr McLaughlin (S567.742 and S567.401), WRCI (S457.018), Mr and Ms Coll (S558.342), Chris J Coll Surveying Limited (S566.342), and Ms Coll McLaughlin (S574.342), supporting inserting the rifle range protection area provisions (GRUZ-R2 to GRUZ-R6, GRUZ-R23, and GRUZ-33) in OSZ as they were omitted in error. Consequently, Ms Easton recommended the following.

68. Rule OSZ – R1 and OSZ – R11 be amended to reflect the Rifle Range Protection Area by adding the following clause (The Panel notes the recommendation appears to have been omitted in Appendix 1 of the s42A Report):

    No Parks Facilities or Parks Furniture are established in the Rifle Range Protection Area except that which is reasonably necessary for the operation of the Rifle Range

69. Rule OSZ – R2 be amended by adding the following clause:

    Within the Rifle Range Protection Area, Recreation Activities are restricted to Recreational Firearms Target Shooting.

70. Rule OSZ – R3 be amended by adding the following clause:

    No community facilities are established in the Rifle Range Protection Area except that which are reasonably necessary for the operation of the Rifle Range.

71. Rule OSZ – R4 be amended by adding the following clause:

    No clubrooms are located within the Rifle Range Protection Area except that which are reasonably necessary for the operation of the Rifle Range;

72. Rule OSZ – R5 be amended by adding the following clause:

    No education or research facilities are located within the Rifle Range Protection Area;

73. Rule OSZ – R6 be amended by adding the following clause:

    No camping grounds or accessory buildings are located within the Rifle Range Protection Area;

74. Rule OSZ – R7 be amended by adding the following clause:

    No retail activities are located within the Rifle Range Protection Area;

75. Rule OSZ – R8 be amended by adding the following clause.

    No residential activities or residential units are located within the Rifle Range Protection Area;

76. Rule OSZ – R12 be amended by adding the following clause.

Within the Rifle Range Protection Area only buildings that are reasonably necessary to carry out Agricultural, Pastoral or Horticultural Activities are established;

77. Ms Easton recommended accepting the Director General's submission (S602.001) and further submitters in support, reasoning that the s42A Report was prepared having considered the national park management plans and conservation management strategy for the West Coast.

Hearing and Submitter Evidence

78. In her planning evidence, Ms Styles advised that Manawa made two submission points to amend the **OSRZ overview**, as illustrated below, which were not addressed in the s42A Report. She suggested these amendments, which recognise existing assets, is necessary to set the context of what the OSRZ contain:

Overview

There are a range of open spaces in the West Coast/Te Tai o Poutini districts that are covered by the OSRZ - Open Space and Recreation Zones. The three Councils own reserves and open spaces generally for local community use. There are a number of community organisations that own and operate open spaces such as racecourses and golf clubs. The Department of Conservation administers 84% of the land on the West Coast under the Conservation Act which is also included in the Open Space and Recreation Zones. **A number of renewable electricity generation activities are located within this zone and these activities provide a crucial role in ensuring provision of electricity supply to the West Coast and are recognised as regionally significant assets.**

…

These public open spaces are generally more open, with less built features and contribute to an attractive living environment for people on the West Coast/Te Tai o Poutini. They can also have important natural, cultural and historic heritage values. **Additionally, a number of renewable electricity generation activities are located within this zone and these activities provide a crucial role in ensuring provision of electricity supply to the West Coast and are recognised as regionally significant assets.**

79. In her statement, Ms Smith for Terra Firma indicated acceptance of Ms Easton's recommended amendment to the first sentence of the OSRZ overview. However, she raised concern with Ms Easton's other amendments to the overview, reasoning they disregard mineral extraction other than that undertaken on Council land or for wider community benefit. She said the recommended wording could be interpreted as disregarding new mineral extraction activities unless there is a public benefit, whereas she highlighted the OSZ mineral extraction rules do not differentiate between private or public benefit (i.e., both purposes are subject to the same performance standards). Therefore, she suggested that the overview should clarify that mineral extraction other than for 'public service' might occur in the OSZ.

80. Ms Smith mentioned the reference to 84% of the West Coast land being in conservation estate should be retained, suggesting this underpins the need for a clear policy framework that anticipates mineral extraction activities in the mineral-rich OSZ.

81. She suggested the following amendments to the OSRZ overview, specifically to put less emphasis on the 'public service' types of mineral extraction, which would then be logically supported by OSRZ-O2 (with changes), OSRZ-P9 (with changes) and OSRZ-P14, and OSZ-R11 and OSZ-R19.

Overview

…

The nature of the West Coast, with its extensive mineral deposits, **means that minerals are widespread within areas within the Open Space and Recreation Zones.** ~~combined w~~With 84% of the land area being located in public conservation estate, **there are a range of circumstances where mineral extraction may be appropriate. Examples include but are not limited to activities that support ongoing access and management of the lands within the zones and Local Purpose Reserves where quarrying or gravel extraction may be part of, or the primary local purpose.** This means that provision is also made for mineral extraction within the Open Space Zone.

…

82. In their legal submission, Ms Sheard and Mr Leckie indicated Bathurst Group supported Ms Easton's recommendation on the Director General's submission (S602.181) by retaining reference to "mineral extraction activities" in the OSRZ overview. Ms Hunter concurred with Ms Easton's recommendation.

83. Mr Pemberton raised concern with Ms Easton's response to Forest & Bird's submission (S560.336), particularly that the West Coast CMS (2010-2020) for DoC land had expired. Mr Pemberton indicated the expired CMS has legal effect until its reviewed under Section 17N(1) of the Conservation Act, noting that a new West Coast CMS is being developed. Therefore, he submitted the Panel is required to have regard to this CMS, noting that the WCRPS requires an integrated approach between the RMA and conservation legislation. With respect to how much weight to give to the expired CMS, Mr Pemberton suggested the Panel consider its age.

84. Mr Deavoll agreed with Ms Easton's recommended rejection of the Director General's suggested deletion of the statement relating to mineral extraction within the OSZ from the OSRZ overview section. He considered it appropriate retaining this statement in the overview given OSZ provisions provide for mining activities in the zone. He noted authorised mining activities occur on OSZ lands and indicated it likely, further mining activities will be developed on land within the zone.

85. Ms Inta commented on the OSRZ overview, querying the intent of the statement "*there are a range of circumstances where some mineral extraction may be appropriate, particularly where this supports ongoing access and management of the lands within the zones*." For example, how mineral extraction actually supports the access and management of lands. Ms Inta did not suggest any further amendments to the OSRZ overview. The Panel notes that neither Ms Inta nor BCG specifically submitted on the OSRZ overview.

Reporting Officer Reply Evidence

86. In her right of reply, Ms Easton suggested further amendments to the OSRZ overview as illustrated below to explain the degree of extent and dependence of the objectives, policies and rules on the OSMP:

Overview

…

These Objectives, Policies and Rules apply to all three types of open space, however, the Department of Conservation is exempt under the Resource Management Act from being

required to meet these on land it administers. Concessionaires and other organisations undertaking activities on Department of Conservation administered land are required to work within the Te Tai o Poutini Plan framework.

The lands zoned Open Space and Recreation Zones are also governed by specific legislation such as the Reserves Act, the National Parks Act and the Conservation Act. Many matters that impact on resource management are governed through these Acts, and through the Management Plans that are required by these Act. As a consequence, the Objectives, Policies and Rules provide for a linkage to the Reserve, National Park and other types of Open Space Management Plans that are in place for these areas under their governing legislation. As these Open Space Management Plans must be prepared through a consultative process with affected communities, the aim of the approach of referring to them within Te Tai o Poutini Plan provisions is to reduce the duplication of provisions and regulation of activities within these areas. Where no Open Space Management Plan is in place, a full regulatory pathway is provided for within Te Tai o Poutini Plan.

…

87. Responding to the Panel's questions, Ms Easton agreed with Ms Inta that "quarry or gravel extraction" is more appropriate than "mineral extraction" in the OSRZ overview, as it reflects the types of lands (e.g., gravel reserve or quarry reserve) within OSRZ and maintenance activities like gravel removal or quarrying for access protection.

88. In response to the Panel's query about any other recommendations to the OSRZ overview and Manawa's missing submissions (S438.128 and S438.134), Ms Easton advised the following.

    (a) She supported inserting the phrase "*A number of renewable electricity generation activities are located within this zone and these activities provide a crucial role in ensuring provision of electricity supply to the West Coast and are recognised as regionally significant assets*." into the Overview as sought by Manawa (S438.128). She reasoned this amendment was appropriate.

    (b) She was unsupportive of inserting a similar phrase in the OSZ section of the overview, reasoning the repetition as being unnecessary.

Hearing Panel's Evaluation

89. The Panel agrees with Ms Easton's recommendation to add additional wording as sought by Manawa to the Overview in OSRZ. We consider this additional wording recognises existing renewable energy assets in the zone. We agree with Ms Easton that it is not necessary to repeat this wording under the specific OSZ Overview.

90. The Panel agrees with the Ms Easton's recommended addition of paragraph outlining specific legislation that may apply to the OSRZ such as Reserve Acts, National Parks and Conservation Acts as these govern some resource management matters in these areas. We acknowledge that any areas that are not governed through these Acts or Management Plans have a regulatory pathway through the TTPP. We consider these amendments effectively address the submission of the Director General.

91. Having considered the issue further, the Panel do not agree with the deletion of the term '*mineral extraction*' from the Overview and its replacement this with '*quarrying and gravel extraction*'. We note that there are provisions specifically associated with mineral extraction within the Open Space chapter and making this change to the Overview would be sending the

wrong signal. We also note that the Director General was the only submitter initially seeking the removal of '*Mineral Extraction*' from the Overview and that Mr Deavoll on behalf of the Director General now agrees that it should be retained. In this context we note that neither Ms Inta nor BCG submitted on this issue. Finally, the Panel records that '*quarrying and gravel extraction*' are not specifically defined in the Plan. For the above reasons we recommend Mineral Extraction be retained in the Overview.

92. Notwithstanding the above, the Panel accepts the recommended rewording of the paragraph dealing the minerals, albeit with the wording 'mineral extraction'. With the amendment proposed we do not consider it is necessary to refer to "*84% of the land area being located in public conservation estate".*

93. In terms of the changes proposed in relation to the Rifle Range Protection Area, the Panel accept the amendments proposed, noting that Ms Easton considered them an omission. We have made these amendments in the relevant rules below. We note that as a result of other submissions we have recommended that OSZ – R4 be deleted.

Hearing Panel Recommendation

94. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommends the following changes to the OSRZ Overview:

OSRZ	**Open Space and Recreation Zones - Objectives and Policies - Ngā Mokowā Pōaha me ngā Takiwā Hākinakina - Ngā Whāinga me ngā Kaupapa Here**

Overview

There are a range of open spaces in the West Coast/Te Tai o Poutini districts that are covered by the OSRZ - Open Space and Recreation Zones. The three Councils own reserves and open spaces generally for local community use. There are a number of community organisations that own and operate open spaces such as racecourses and golf clubs. The Department of Conservation administers 84% of the land on the West Coast under the Conservation Act which is also included in the Open Space and Recreation Zones**. A number of renewable electricity generation activities are located within these zones and these activities provide a crucial role in ensuring provision of electricity supply to the West Coast and are recognised as regionally significant assets.**[11]

These Objectives, Policies and Rules apply to all three types of open space, however, the Department of Conservation is exempt under the Resource Management Act from being required to meet these on land it administers. Concessionaires and other organisations undertaking activities on Department of Conservation administered land are required to work within the Te Tai o Poutini Plan framework.

The lands zoned Open Space and Recreation Zones are also governed by specific legislation such as the Reserves Act, the National Parks Act and the Conservation Act. Many matters that impact on resource management are governed through these Acts, and through the Management Plans that are required by these Acts. As a consequence, the Objectives, Policies and Rules provide for a linkage to the Reserve, National Park and other types of Open Space Management Plans that are in place for these areas under their governing legislation. As these Open Space Management Plans must be prepared through a consultative process with affected communities, the aim of the approach of referring to them within Te Tai o Poutini Plan

[11] Manawa Energy (S438.128)

provisions is to reduce the duplication of provisions and regulation of activities within these areas. Where no Open Space Management Plan is in place, a full regulatory pathway is provided for within Te Tai o Poutini Plan.[12]

Land included within the Open Space and Recreation Zones adjoins a number of other territorial authority boundaries not managed by Te Tai o Poutini Plan. When considering activities close to territorial authority boundaries, plan users need to apply care with regard to managing any potential cross boundary resource management issue.[13]

There are three Open Space and Recreation Zones.

The **NOSZ - Natural Open Space Zone** is where the Plan recognises and provides for open spaces that contain high natural and ecological values. The Zone is made up of the most **ecologically**[14] significant open space and reserves where natural values predominate such as National Parks, Nature Reserves, Scientific Reserves, Wilderness Areas and Specially Protected Areas as well as other areas of public conservation land identified with very high natural values.

A low level of development and built form is anticipated within this zone to retain the natural/biodiversity values within natural open space areas.

The **OSZ - Open Space Zone** is open spaces that are used predominantly for a range of passive and active leisure and recreational activities, along with limited associated facilities and structures. A large area of the public conservation lands administered by the Department of Conservation falls within this zone. At a district level the open spaces vary in size from small neighbourhood parks to large parks where people can enjoy activities such as walking and cycling, skateboarding, swimming, surfing, camping and kicking a ball around. Some of these open spaces are located near waterbodies and the coast, others are in towns and settlements and others form an important part of the West Coast walkway and cycleway network. These open spaces include civic spaces, playgrounds, land with community facilities, cemeteries, campgrounds, esplanades, historic reserves and scenic reserves. They also include local purpose reserves that have specifically been set aside for activities such as quarry and gravel reserves, cemeteries, camping grounds and other local purposes such as water supply and drainage.

The nature of the West Coast, with its extensive mineral deposits, **means that minerals are widespread within areas in the Open Space and Recreation Zones.** ~~combined with 84% of the land area being located in public conservation estate,~~ **There are a range of circumstances where some mineral extraction may be appropriate, particularly where this supports ongoing access and management of the lands within the zones. There are also some Local Purpose Reserves within the Open Space Zone in particular, where quarrying or gravel extraction may be part of, or the primary local purpose. This** means that provision is also made for mineral extraction within the Open Space Zone. [15]

The **SARZ - Sport and Active Recreation Zone** is open space areas for a range of sport and recreation activities, including organised sport and recreation for local, districtwide and regional communities. This zone applies in parks, sports grounds and multi-sport facilities. Such areas will normally have associated buildings such as club rooms, changing sheds or toilet facilities.

[12] Director General of Conservation (S602.001)
[13] Consequential change from QLDC (S523.002 and S523.003)
[14] Forest & Bird (S560.0554)
[15] Forest & Bird (S560.0555) Director General of Conservation (S602.181)

Activities and uses on publicly owned land are required to obtain permission (such as a lease or a licence) from the relevant administering authority. This is in addition to any requirements under Te Tai o Poutini Plan and the RMA. All activities will also have regard to any relevant reserve management plans or National Park management plans and legislation (Reserves Act 1977 and the Conservation Act 1987).

5. OBJECTIVES

Submissions and Further Submissions

95. Six submission points[16] relating to the **Objectives** as a whole were summarised in a Table on pages 19 to 20 of the s42A Report. Five submission points supported the objective as a whole as notified, while the seventh was neutral.

96. Seven submission points and six further submission points[17] relating **OSRZ – O1** were summarised in a Table on pages 20 to 21. Three submission points supported the objective as notified, although one[18] sought an amendment. The 'support' submission from Straterra (S536.053) was supported by three further submission points. Two submission points supported in part the objective, both seeking an amendment. One submission point opposed in part the objective, seeking an amendment. One submission point sought an amendment to the objective, which was supported by two further submission points, but opposed by one further submission point.

97. Five submission points and two further submission points[19] relating to **OSRZ – O2** were summarised in a Table on page 21. Four submission points supported the objective as notified. One submission point sought an amendment to the objective, which was supported by one further submission and opposed by the second further submission.

98. The Panel adopt the summary of these submissions detailed in the s42A Report, and we have considered all of the relevant submissions.

Section 42A Report

99. Ms Easton noted the support on the objectives as a whole. Consequently, she recommended acceptance of their submissions, except only accepting in part MoE's submission.

100. She noted the support from BDC (S538.382) and RNZ (S476.027) on OSRZ – O1.

101. Ms Easton recommended accepting in part the Director General's submission (S602.182) on OSRZ – O1. She supported including a reference to the OSMP, considering it useful and may address some of the issues raised by Manawa, with minor modification. However, she was unsupportive of the additional amendment, considering it both a duplication and contradiction.

[16] Mr William McLaughlin (S567.396), Mr Chris & Mr Jan Coll (S558.336), Chris J Coll Surveying Limited (S566.336), Mr Laura Coll McLaughlin (S574.336), MoE (S456.022), and Director General (S602.231)
[17] BDC (S538.382), RNZ (S476.027), Manawa Energy (S438.129), Te Mana Ora (S190.595), NZCCL (S472.024), Straterra (S536.053), TiGa (FS104.064), BRML (FS150.037), PML (FS215.039), Director General (S602.182), WMS (FS231.061), BCML (FS232.057), and Bathurst Group (FS89.029)
[18] Straterra (S536.053)
[19] Te Mana Ora (S190.596), BDL (S453.005), BDC (S538.383), RNZ (S476.028), Bathurst Group (S491.035), Terra Firma (FS108.002), and Director General (FS122.035)

102. She recommended accepting in part Manawa's submission (S438.129). She supported OSRZ – O2 to be listed before OSRZ – O1, supporting the types and uses of open space areas being set out first (OSRZ – O2) before OSRZ – O1 (which manages development and activities). However, she did not support amending OSRZ – O1 as sought by Manawa, indicating that Manawa were concerned about values in relation to their land allegedly zoned Open Space, however such land is not zoned Open Space.

103. Consequently, Ms Easton recommended the following changes to OSRZ – O1 and OSRZ – O2, along with addressing a grammatical error (i.e., deletion of a second 'and' in OSRZ-O1 b.):

> OSRZ – O~~1~~**2** Development and activities should complement and not conflict with the functions and values of the particular open space and the surrounding environment **including those identified in any relevant Open Space Management Plan**. Where appropriate open space accommodates a range of functions.
>
> OSRZ – O~~2~~**1** To recognise the different functions, values and purpose of open space on the West Coast through providing for three Open Space and Recreation Zones:
>
> …

104. Ms Easton recommended rejecting the submission from Te Mana Ora (S190.595) as she was unsupportive of amending OSRZ – O1, reasoning the objective was specifically written to support some unanticipated activities.

105. She recommended rejecting the submission from NZCCL (S472.024) and Straterra (S536.053), reasoning amending OSRZ – O1 as sought inappropriate because it creates significant uncertainty about what unanticipated activities are supported by the objective.

106. She noted the support from Te Mana Ora (S190.596), BDL (S453.005), BDC (S538.383), and RNZ (S476.028) on OSRZ – O2.

107. Ms Easton recommended rejecting the Bathurst Group submission (S491.035) on OSRZ – O2, as she did not support including "mineral extraction" as a value and considered it inappropriate to manage at the objective level, specifically because "mineral extraction" is not a purpose of the OSRZ.

Submitter Correspondence

108. In her correspondence on behalf of the MoE, Ms Williams advised MoE's submissions on OSRZ - O1[20] (S456.022 and S456.023) were not mentioned in Ms Easton's s42A Report. She indicated MoE does not oppose Ms Easton's recommended amendments to OSRZ – O1. Contrary to the s42A Report, Ms Williams clarified the MoE support is for OSRZ – O1 only, and they neither support nor oppose the other OSRZ provisions. The Panel note the MoE's submissions S456.022 and S456.023 have been incorrectly assigned to all OSRZ objectives and policies.

Hearing and Submitter Evidence

109. In her planning evidence, Ms Styles acknowledged the recommendation to accept Manawa's submission point to reorder OSRZ – O1 and OSRZ – O2. However, regarding Ms Easton's rejection of the amendment to OSRZ – O1, Ms Styles advised Manawa were concerned about the zoning which applies to its schemes not to its freehold land. She suggested objectives

[20] The MoE's correspondence incorrectly refers to OSRZ-R1 (instead of OSRZ-O1) in their explaination about supporting OSRZ-O1 opposed to all OSRZ objectives and policies.

should clearly sets out the direction for the use of OSRZ land so that all parties are clear on what is intended. She argued the phrase "*not conflict with the functions and values of the particular open space*" was not sufficiently directive when the pTTPP does not articulate these functions and values. Consequently, Ms Styles indicated there is no certainty in what is intended to be achieved or how existing infrastructure fits into such a context.

110. Ms Styles expressed concern about Ms Easton's recommendation to refer to a third-party document (i.e., an OSMP) in OSRZ – O1. She argued this is inappropriate since the pTTPP does not define an OSMP, providing no clarity on an OSMP's content or purpose. Additionally, she indicated OSMP's may be based on other legislation with priorities differing from the RMA, potentially leading to amendments without considering district plan matters or allowing inappropriate activities. She highlighted referencing undefined external documents is unsuitable and contrary to good plan drafting principles. Consequently, Ms Styles suggested revising OSRZ – O1 to clearly state the intended outcome for OSRZ and remove references to unknown external, non-RMA documents.

111. Ms Smith for Terra Firma agreed with Ms Easton that mineral extraction is not the purpose of the OSRZ, however disagreed with her reasoning for rejecting their submission. She highlighted that OSRZ – P9 suggests limited mineral extraction is possible in OSRZ where compatible with the open space values.

112. Ms Smith indicated the Mineral Extraction Zones and Buller Coalfield Zones are the preferred location for mineral extraction. However, these zones only manage mineral extraction activities once they have been authorised and established (following a Plan Change), rather than yet to be lawfully established. She suggested new mineral extraction opportunities may arise in the OSZ and, if so, would be subject to the relevant OSZ rules. She indicated the conservation status of most OSZ land does not preclude these activities.

113. In light of the above, Ms Smith argued mineral extraction activities are provided for as a legitimate activity in the OSZ and, in turn, one of the "very wide range of values", albeit the activity is not a purpose of the OSZ. Therefore, she suggested mineral extraction activities should be included in OSRZ-O2 (c) and considered the activity compatible with the other listed functions for the OSZ.

114. In their legal submissions, Ms Sheard and Mr Leckie suggested Ms Easton's reasoning for rejecting Bathurst Group's amendment to OSRZ – O2, does not align with the intent of OSRZ – O2. They indicated the objective lists values of the OSZ but does not pick and choose which of those values are to be encouraged over others. They highlighted the fact that pastoral farming was included in OSRZ-02, it was not the purpose of the zone. They submitted that mineral extraction activities have historically occurred in this zone, and there is significant resource remaining, the minerals resources contribute to the underlying values and it is appropriate for OSRZ-02 to reference to them, which would be in line with the recognition in the Overview.

115. They highlighted areas of the Buller Plateau, in which historic mineral extraction activities have occurred, and significant mineral resources are present, have been included in the OSZ. Consequently, they indicated OSRZ – O2 should recognise the complete range of historic and future uses of the Buller Plateau, noting Ms Hunter's evidence summarised below. Therefore, they submitted it is appropriate for OSRZ – O2 to include reference to "mineral extraction" as this would align with the OSRZ overview and the WCRPS and the policy and rules framework.

116. In her planning evidence, Ms Hunter considered inserting "mineral extraction" in OSRZ-O2 (c) was necessary because mining and mineral resources are already present in OSZ with functional and operational needs to continue. She emphasised that the objective references pastoral farming, which was not a primary use of OSZ, so the same logic should be applied to mineral extraction.

117. Ms Hunter noted that subsequent policies OSRZ-P9 and OSRZ-P14 specifically acknowledge that mineral extraction activities are occurring within the Open Space Zone and that rules provide for mineral exploration and prospecting as permitted activities, and extraction in certain circumstances as restricted discretionary activity. She said it was therefore appropriate to have an objective and policy framework to support this. She proposed the following amendment:

OSRZ – O2

To recognise the different functions, values and purpose of open space on the West Coast through providing for three Open Space and Recreation Zones:

…

c. The OSZ – Open Space with a very wide range of values including passive and active recreation, **mineral extraction,** local purposes and pastoral farming.

Reporting Officer Reply Evidence

118. In her right of reply, Ms Easton considered her proposed reference to Open Space Management Plans in existing Objective 1 was appropriate and that it was not referring to a specifically incorporated document.

Hearing Panel's Evaluation

119. The Panel agree with Ms Easton's recommendation to add the reference to Open Space Management Plans in OSRZ-O1. We are satisfied that this is not referring to a specific document that has been incorporated into the Plan.

120. The Panel agree with the reordering of the Objectives based on the reasoning provided by Manawa in their submission. We have also considered Ms Styles concerns with the wording of OSRZ-O1 and we agree that the words "*in particular*" should be removed and the word '*areas*' as this is more directive and clearer. We note however the Manawa did not seek to delete the reference to '*functions and values*' in their submission. We also consider the final sentence of the objective to be appropriate.

121. The Panel accepts the evidence provided by Bathurst Group and recommends the inclusion the words '*mineral extraction*' in OSRZ-0~~2~~1. We agree there is no difference in identifying pastoral farming as a value to identifying mineral extraction as a value given both are already present the zone. We also accept that the policy and rule framework already includes mineral extraction at various levels and it would therefore seem incongruous if it were not included at the objective level.

122. In relation to the remainder of the submissions on the objectives seeking amendments, the Panel agree that these be rejected on the basis of the conclusions reached by Ms Easton.

Hearing Panel Recommendation

123. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommends the following changes to the OSRZ Objectives:

OSRZ - Open Space and Recreation Zones Objectives	
OSRZ – O~~1~~2[21]	Development and activities should complement and not conflict with the functions and values of ~~the particular~~ open space **areas**[22] and the surrounding environment **including those identified in any relevant Open Space Management Plan**[23]. Where appropriate open space accommodates a range of functions.
OSRZ – O~~2~~1[24]	To recognise the different functions, values and purpose of open space on the West Coast through providing for three Open Space and Recreation Zones: a. The NOSZ - Natural Open Space Zone with high natural values and a low level of development and built form; b. The SARZ - Sport and Active Recreation Zone with sport and active recreation values and ~~and~~ [25]associated buildings and facilities; and c. The OSZ - Open Space Zone with a very wide range of values including passive and active recreation, **mineral extraction**[26] local purposes and pastoral farming.

6. POLICIES

Submissions and Further Submissions

124. 11 submission points[27] relating to the **Policies as a whole** were summarised in a Table on pages 23 to 24 of the s42A Report. Seven submission points supported the policy as a whole as notified, with one[28] seeking an amendment. Three submission points sought amendments to the policies. One submission point opposed in part the policies, seeking and amendment to a policy.

125. Four submission points[29] relating to **OSRZ – P1** were summarised in a Table on page 24 of the s42A Report. One submission point supported the policy as notified. Three submission points opposed the policy.

126. Four submission points and one further submission point[30] relating to **OSRZ – P2** were summarised in a Table on pages 24 to 25. Two submission points supported the policy as notified, while another submission point opposed in part the policy, seeking an amendment

[21] Manawa Energy (S438.129)
[22] Manawa Energy (S438.129)
[23] Director General (S602.182)
[24] Manawa Energy (S438.129)
[25] Clause 16(2) of Schedule 1 RMA
[26] Bathurst Group (S491.035)
[27] Mr William McLaughlin (S567.397), Mr Chris & Ms Jan Coll (S558.337), Chris J Coll Surveying Limited (S566.337), Ms Laura Coll McLaughlin (S574.337), BDC (S538.384), MoE (S456.023), Ngāi Tahu (S620.007), NZCCL (S472.027), Straterra (S536.055), and Forest & Bird (S560.335 and S560.0556)
[28] Straterra (S536.055)
[29] Te Mana Ora (S190.597), BDC (S552.162), Ms Frida Inta (S553.162), and the Findlays (S605.013)
[30] Te Mana Ora (S190.598), RNZ (S476.029), Forest & Bird (S560.336), Manawa Energy (S438.130), and Director General (FS122.036)

Lastly, a submission point supported in part the policy, seeking an amendment, which was opposed by the further submission point.

127. Three submission points[31] relating to **OSRZ – P3** were summarised in a Table on pages 25 to 26. One submission point supported the policy as notified, whereas the other two submission points supported in part the policy, both seeking amendments.

128. Two submissions points[32] relating to **OSRZ – P4** were summarised in a Table on page 26. One submission point supported the policy as notified, whereas the other submission point sought amendment.

129. Two submission points[33] relating to **OSRZ – P5** were summarised in a Table on page 26. One submission point supported the policy as notified, whereas the other submission point opposed in part the policy, seeking an amendment.

130. Three submission points and one further submission point[34] relating to **OSRZ – P6** were summarised in a Table on page 26. All submission points supported the policy as notified, with the submission from Ngāi Tahu supported by the further submission.

131. Three submission points and one further submission point[35] relating to **OSRZ – P7** were summarised in a Table on pages 26 to 27. Two submission points supported the policy as notified. The third submission point opposed in part the policy, with that submission being opposed by Bathurst Group.

132. One submission point[36] relating to **OSRZ – P8** was summarised in a Table on page 27. That submission point supported the policy as notified.

133. 15 submission points and eight further submission points[37] relating to **OSRZ – P9** were summarised in a Table on pages 27 to 30. Two submission points supported the policy as notified. Five submission points supported in part the policy, with the submission from Te Mana Ora and Manawa each opposed by a further submission. Eight submission points sought amendment of the policy, with the submission from WMS, BCML, BRML, PML, and Whyte Gold Limited each opposed by a further submission and the submission from Minerals West Coast supported by a further submission.

134. Five submission points[38] relating to **OSRZ – P10** were summarised in a Table on pages 30 to 31. One submission point supported the policy as notified, while one submission point supported in part the policy, seeking an amendment. Three submission points sought an amendment to the policy.

135. Six submission points and one further submission point[39] relating to **OSRZ – P11** were summarised in a Table on pages 31 to 32. Two submission points supported the policy as

[31] RNZ (S476.030), Te Mana Ora (S190.599), and Manawa Energy (S438.131)
[32] Te Mana Ora (S190.600) and Forest & Bird (S560.337)
[33] Te Mana Ora (S190.601) and Forest & Bird (S560.338)
[34] Mr Craig Schwitzer (S96.004), Ngāi Tahu (S620.213), Bathurst Group (FS89.093), and Te Mana Ora (S190.602)
[35] NZAAA (S166.025), Te Mana Ora (S190.603), Forest & Bird (S560.339), and Bathurst Group (FS89.080)
[36] Te Mana Ora (S190.604)
[37] Waka Kotahi (S450.194), GDC (S608.686), NZCCL (S472.025), WMS (S599.100 and FS231.062), Director General (FS122.037 to FS122.042), BCML (S601.078), BRML (S604.069), PML (S606.055), Whyte Gold Limited (S607.053), Minerals West Coast (S569.040), Bathurst Group (FS89.040), Straterra (S536.018), Terra Firma (S537.020), Te Mana Ora (S190.605), the Findlays (S605.014), Forest & Bird (S560.340), and Manawa Energy (S438.132)
[38] Mr Craig Schwitzer (S96.003), Te Mana Ora (S190.606), Director General (S602.183), and Forest & Bird (S560.341 and S560.0547)
[39] Te Mana Ora (S190.607), RNZ (S476.031), the Findlays (S605.015), Director General (S602.184), Forest & Bird (S560.342), and GDC (S608.687)

notified, while two other submission points supported in part the policy. Two submission points sought an amendment to the policy, with the Director General's submission opposed by the further submission.

136. Four submission points[40] relating to **OSRZ – P12** were summarised in a Table on pages 32 to 33. Two submission points supported the policy as notified, while the other two submission points sought an amendment to the policy.

137. Five submission points and one further submission point[41] relating to **OSRZ – P13** were summarised in a Table on pages 33 to 34. One submission point supported the policy as notified, while another submission point supported in part the policy with that being opposed by the further submission. Three submission points sought an amendment to the policy.

138. One submission point[42] relating to **OSRZ – P15** was summarised in a Table on page 34, which supported the policy as notified.

139. One submission point[43] relating to **OSRZ – P16** was summarised in a Table on page 34, which supported the policy as notified.

140. One submission point[44] relating to **OSRZ – P17** was summarised in a Table on page 34, which supported the policy as notified.

141. Three submission points[45] relating to **OSRZ – P18** were summarised in a Table on page 34. Two submission points supported the policy as notified, while the third submission point sought an amendment.

142. Five submission points[46] relating to **OSRZ – P19** were summarised in a Table on page 35. Two submission points supported the policy as notified, while another two submission points both sought an amendment to the policy. The fifth submission point opposed in part the policy.

143. Four submission points and one further submission point[47] relating to **OSRZ – P20** were summarised in a Table on pages 35 to 36. One submission point supported the policy as notified, while another submission point opposed the policy. Two submission points sought an amendment to the policy, with the Director General's submission supported by the further submission.

144. We adopt the summary of these submissions detailed in the s42A Report, and we have considered all of the relevant submissions.

Section 42A Report

Policies (General)

[40] Te Mana Ora (S190.608), RNZ (S476.032), Director General (S602.185), and Forest & Bird (S560.343)
[41] NZAAA (S166.026), Te Mana Ora (S190.609), Director General (S602.200 and FS122.043), Forest & Bird (S560.344), and Manawa Energy (S438.133)
[42] Te Mana Ora (S190.611)
[43] Te Mana Ora (S190.612)
[44] Te Mana Ora (S190.613)
[45] Te Mana Ora (S190.614), Forest & Bird (S560.347), and Director General (S602.188 and S602.202)
[46] NZAAA (S166.027), Te Mana Ora (S190.615), Director General (S602.189 and S602.203), Forest & Bird (S560.348 S560.0545)
[47] Te Mana Ora (S190.616), Forest & Bird (S560.349 and S560.0546), and Director General (S602.190 and S602.204)

145. Ms Easton acknowledged submissions supporting the various OSRZ policies as notified. Consequently, she recommended accepting these submissions.

Policies as a whole

146. Ms Easton recommended accepting the new policy proposed by Ngāi Tahu (S620.007) with modification to the wording. She supported a Plan Change process to ensure that the pTTPP zoning of any reclassified land is appropriate and indicated this process may also identify additional land to be include within National Parks, or other high conservation value areas. However, she recommended wording modifications. One modification is to enable the TTPP Committee (subject to the Councils agreement) to drive the Plan Change process, otherwise it would be a Private Plan Change if pursued by the individual Councils. The other modification links the policy wording to 'zoning' rather than the wider term 'plan provisions'.

147. Therefore, Ms Easton recommended the following new policy be included in pTTPP as follows:

> **OSRZ – PXX When conservation stewardship land is reclassified the Tai o Poutini Plan Committee, after working with Te Papa Atawhai/the Department of Conservation and Poutini Ngāi Tahu, will undertake a plan change to ensure that the plan zone identification is appropriate for the reclassified land parcel.**

148. Ms Easton recommended rejecting the submissions from NZCCL (S472.027) and Straterra (S536.055), reasoning it inappropriate to provide for mineral extraction activities in the NOSZ, and inconsistent with the CMS and National Park Management Plans in place for these areas. Additionally, she indicated that mineral extraction cannot occur in the seven national parks within the NOSZ under the Crown Minerals Act.

149. Ms Easton recommended rejecting Forest & Bird's submissions (S560.335 and S560.0556). She did not support relabelling policies and relocating policies relating to specific zones in the relevant zone chapter as it would create confusion and risk the district wide policies being overlooked.

OSRZ – P1

150. Ms Easton recommended rejecting the submissions from BCG, Ms Inta, the Findlays (S552.162, S553.162, and S605.013 respectively) as she was unsupportive of deleting this policy. She reasoned it is important to recognise that areas zoned OSRZ are not just public conservation land administered by DoC but include Council reserves. Ms Easton noted that the rule framework provides a permissive pathway where activities are in accordance with a relevant operative Act or Management Plan to reduce regulatory burden, while also providing confidence that effects will be appropriately managed through the robust processes required to develop the Management Plans.

OSRZ – P2

151. Ms Easton recommended rejecting Forest & Bird's submission (S560.336), policies to set out the characteristics where possible and/or describe how these are determined for each OSRZ. While supportive of this Ms Easton indicated that there was insufficient information to undertake this level of specificity in policy development.

152. Ms Easton also recommended rejecting Manawa's submission (S438.130), reasoning that RSI and activities are not the purpose of open space or the OSRZ, albeit that such development may obtain resource consent within an OSRZ.

OSRZ – P3

153. Ms Easton recommended rejecting Manawa's submission (S438.131), reasoning that buildings and structures should align with the open space purpose, and the zone's character and amenity. She emphasised that the term "should" provides for circumstances where effects may be minor or less than minor to still be accommodated for within the policy.

154. She also recommended rejecting Te Mana Ora's submission (S190.599), reasoning the amendment sought to be unnecessary as the policy and the relevant rule applies to both new buildings and additions to existing buildings.

OSRZ – P4

155. Ms Easton recommended rejecting Forest & Bird's submission (S560.337), reasoning the policy applies to land outside of the public conservation estate – including all parks and reserves owned and managed by the Councils – with few having RMPs in place. Therefore, Ms Easton indicated the phrase "where it has a link with the open space and recreation resource" remains helpful to the management of these spaces, particularly in the absence of an RMP, as a useful directive to inappropriate activities.

OSRZ – P5

156. Ms Easton recommended supporting Forest & Bird's submission (S560.338) to amend the policy to protect natural values, reasoning it would assist with weighting any assessment on the appropriateness of commercial activities in open space. Additionally, she considered it was appropriate as both the Reserves Act and the Conservation Act place a high weighting on natural values.

157. Consequently, Ms Easton recommended the following amendment to the policy:

> Provide for commercial recreation activities that maintain the quality of the open space and recreation experience of people using the open space, **while also protecting natural values. Have** ~~having~~ particular regard to the scale, intensity and cumulative effects of commercial recreation activities.

OSRZ – P7

158. Ms Easton recommended accepting in part Forest & Bird's submission (S560.339) to amendment the policy, reasoning that the term "promote" is weak in the context of protecting natural values. However, she has recommended alternative wording to improve clarity and consistent with the Reserves Act and Conservation Act.

159. Ms Easton recommended the following amendment to the policy:

> ~~Promote the p~~**P**rotect~~ion~~ and enhance~~ment~~ ~~of~~ **the** existing natural environment values having regard to the relevant OSRZ - Open Space and Recreation Zone and the opportunities for enhancement of these on the site.

OSRZ – P9

160. Ms Easton recommended accepting in part submissions from WMS, BCML, BRML, PML, and Whyte Gold Limited (S599.100, S601.078, S604.069, S606.055, and S607.053 respectively) to

amend the policy. She reasoned inserting a reference to mineral exploration and prospecting is appropriate as these activities are a necessary pre-curser to mineral extraction.

161. Ms Easton did not however support changing "where these are limited in their location" to "*functional or operational need to locate there*". She reasoned the various Acts governing open space land do not place a high weight on the value of mineral extraction, instead they are very clear on the primary purposes of these lands, and "functional and operational needs" are not part of the considerations. She emphasises the intent of the policy (as notified) was to manage instances where necessary resources can only be sourced from land in the OSRZ, or where mineral extraction could be appropriate in special circumstances. However, she noted the pTTPP was not intended to promote the widespread use of OSRZ land for mineral extraction, as that would be inconsistent with the Reserves Act and Conservation Act.

162. Ms Easton recommended rejecting the submissions from:

(a) Minerals West Coast, Straterra, and Terra Firma (S569.040, S536.018, and S537.020 respectively) for the same reasons detailed above; and

(b) Te Mana Ora (S190.605), reasoning inserting the phrase "effects management hierarchy" in the policy would not be consistent with how it is applied within national instruments.

163. In terms of Forest & Bird's submission (S560.340) that seeks this policy be amended to refer to these activities only occurring outside of the NOSZ and "*provided that natural values can be protected*" that the policy "*consider providing*" for a range of purposes, Ms Easton supported inserting the phrase "*provided the natural values can be protected*" into the beginning of the policy, reasoning this being consistent with the Reserves Act and Conservation Act under which these lands are administered. She did not support limiting the stipulated activities to only "*outside of the NOSZ*" as some of these activities already occur and are appropriate in locations in the NOSZ. Further, she was unsupportive of including the wording "*consider providing for*" in the policy. This is because she considered "*provide for*" means these activities may still require a resource consent and recognises that there are locations where these activities are more or less appropriate. The Panel notes that the above amendment did not flow through in Appendix 1.

164. Ms Easton recommended accepting the Findlays submission (S605.014), reasoning hut type accommodation, which would be captured by "and other visitor accommodation", is located and appropriate across many areas of OSRZ.

165. Ms Easton recommended accepting in part Manawa's submission (S438.132), reasoning that REG is appropriate in the OSRZ, and this would be supported by national and regional direction. She indicated that the establishment of such infrastructure would require a Discretionary Activity resource consent under the Energy Chapter, with their being no OSRZ rules, so this amendment is to signal support for REG in the OSRZ. However, Ms Easton emphasised that other RSI, which has a wide definition, in the OSRZ does not appear to achieve similar support through national or regional direction.

166. Consequently, Ms Easton recommended the following amendments to the policy:

Provide for ~~the~~ **a** range of purposes where compatible with the open space values including:

(a) The ongoing operation and appropriate management of cemeteries;

(b) Camping **and other visitor accommodation** opportunities at rivers, lakes and coastal areas ~~where this is compatible with the values of the open space~~;

(c) Gravel and shingle extraction for roading networks and other local purposes;

(d) Quarries for rock;

(e) Pastoral farming including grazing as a management tool;

(f) Mineral **prospecting, exploration and** extraction of resources where these **resources** are limited in their location; ~~and~~

(g) Water supply and drainage networks where this supports local community needs**; and**

(h) **Establishment and operation of renewable electricity generation**.

OSRZ – P10

167. Ms Easton recommended rejecting submission from:

(a) The Director General (S602.183), reasoning that providing "Significant Natural Areas" does not support the open space needs of communities, nor a Council priority for using subdivision and development contributions; and

(b) Forest & Bird (S560.341 and S560.0547), reasoning that subdivision of OSRZ is not the subject of the policy and, instead, is managed by the Subdivision provisions.

168. She recommended accepting the submission from Te Mana Ora (S190.606), reasoning playgrounds are an important part of neighbourhood reserves and, therefore, adding "*accessible, quality playgrounds*" to OSRZ – P10 (a) addresses a notable omission.

169. Consequently, Ms Easton recommended the following amendment to subclause (a) of the policy.

Subdivision and new development should provide for the open space needs generated by the development either through direct provision of land and works, or through a financial contribution. This includes:

(a) Additional neighbourhood parks including waterfront areas, walkways**,** ~~and~~ cycleways **and accessible quality playgrounds** needed as a result of additional household and visitor accommodation growth;

…

OSRZ – P11

170. To address drafting errors of the policy, Ms Easton recommended accepting the submission from:

(a) The Findlays (S605.015), reasoning replacing the undefined term "*campgrounds*" with the defined term "*camping grounds*"; and

(b) The Director General (S602.184), reasoning many of the OSZ land will have "*natural, cultural and biodiversity values*".

171. She recommended accepting in part the submission from:

(a) Forest & Bird (S560.342) as protecting natural values of OSZ land is partly addressed by the Director General's submission discussed in above; and

(b) GDC (S608.687), reasoning that the term "*limited*" in this policy is defined by common language and, therefore, does not require further clarification.

172. Consequently, Ms Easton recommended the following amendment to the policy:

The OSZ - Open Space Zone primarily provides for passive and active recreation activities, **natural, cultural and biodiversity values** community facilities, ~~campgrounds~~ **camping grounds** and cemeteries and limited associated facilities and structures.

OSRZ – P12

173. Ms Easton recommended accepting the Director General's submission (S602.185)[48] on OSRZ – P12 (c), reasoning many of the OSZ land will have natural values.

174. Ms Easton also recommended accepting in part Forest & Bird's submission (S560.343), reasoning Director General's submission discussed above partly addresses protecting natural values of OSZ land.

175. Ms Easton recommended the following amendment to subclause (c) of the policy:

Enable activities and facilities within the OSZ - Open Space Zone that:

…

(c) Minimise adverse effects on the character**, natural environment** and amenity values of the surrounding area.

OSRZ – P13

176. Ms Easton recommended rejecting Manawa's submission (S438.133), reasoning RSI is not the purpose of the OSZ and would not generally meet the "*ancillary to the functions of the zone*" test. Additionally, she indicated the policy supports various Permitted and Restricted Discretionary Activities within OSZ, but the OSZ provisions do not provide for RSI as these activities are generally managed through the Energy, Infrastructure, and Transport chapters.

177. Ms Easton recommended accepting in part the submissions from:

(a) Director General (S602.186 and S602.200) as she generally supported the amendment sought subject to modifications to focus the policy on adverse effects on open space values. Ms Easton was unsupportive of "*allow*" replacing "*provide for*" as these terms should be used to distinguish between supporting Permitted Activities (allow) and where consent may be required (provide for);

(b) Te Mana Ora (S190.609), reasoning the amendment inappropriate for use in zone provisions, but considered the Director General's wording discussed in [(a)] above addressed Te Mana Ora's concern; and

(c) Forest & Bird (S560.344), reasoning the recommended amendments to OSRZ – P13 will articulate the OSZ provides for natural and biodiversity values and where adverse effects on these values can be appropriately managed.

178. Consequently, she recommended the following amendment to the policy:

[48] The s42a report incorrectly refers to S602.184 instead of S602.185 in [129]

Provide for activities that are ancillary to the functions of the OSZ - Open Space Zone **where the effects on open space values can be appropriately managed** including:

…

OSRZ – P18

179. Ms Easton recommended accepting the submissions from the Director General (S602.188, S602.202), supporting low level development and built form in the NOSZ which is mostly in highly natural locations. She also supported minor typographic amendments.

180. Consequently, Ms Easton recommended the following amendments to the policy:

Require ~~A~~ **a** low level of development and built form ~~is anticipated~~ within ~~this~~ **the** NOSZ – Natural Open Space Zone to retain the natural, cultural and biodiversity values within ~~the~~ natural open space areas.

OSRZ – P19
