181. Ms Easton recommended accepting the Director General's submission (S602.189), reasoning inserting "*and restore*" to the policy is consistent with the Conservation Act and Reserves Act. The Panel note this recommendation was picked up in the Right of Reply.

182. Ms Easton recommended rejecting the submissions from Forest & Bird (S560.348 and S560.0545). Firstly, she did not support replacing "*enable*" with "*consider providing for*" as it did not align with the policy's intent to support Permitted Activities within NOSZ (enable) as "*consider providing for*" implies resource consents are required. Secondly, she emphasised OSRZ - O2 (now OSRZ – O1) sets out the purposes of the Natural Open Space Zone.

OSRZ – P20

183. Ms Easton recommended rejecting Forest & Bird's submissions (S560.349, S560.0546) to delete this policy, reasoning that the provision for ancillary buildings and structures (i.e., toilet blocks, bird hides or shelters) appropriate for the few Permitted Activities in the NOSZ.

184. She recommended:

(a) accepting the submission from the Director General (S602.190 and S602.204), considering that amending this policy by specifically referring to not adversely affecting indigenous biodiversity values of the site better reflects the intention of the NOSZ.

(b) accepting in part the submission from Forest & Bird (S560.0546), although she preferred the wording proposed by the Director General detailed above.

185. Consequently, Ms Easton recommended the following amendment to subclause (b) of the policy:

Within the NOSZ - Natural Open Space Zone provide for small-scale buildings and structures that:

…

(b) Do not adversely affect the conservation **and indigenous biodiversity** values of the site; and

…

Hearing and Submitter Evidence

186. In her planning evidence, Ms Styles acknowledged Ms Easton's recommendation to accept in part Manawa's amendment to OSRZ – P9 as it addresses their concerns. She also acknowledged Ms Easton's reasoning for recommending rejection of Manawa's amendment to OSRZ – P13. She highlighted it not being necessary to recognise RSI in this policy because it is already included in OSRZ – P9

187. Regarding Ms Easton's recommendation to reject Manawa's amendment to OSRZ – P2, Ms Styles indicated that while Manawa's submission point on OSRZ – P2 was framed to recognise RSI, their concern related to existing REG activities in the OSRZ opposed to all types of RSI. Consequently, she recommended inserting REG activities in the policy as this would be within the scope of Manawa's submission, would address the general concerns outlined in her evidence, and would also be consistent with Ms Easton's acceptance and acknowledgement of REG in OSRZ.

188. Ms Styles indicated that Ms Easton did not address inserting the phrase '*functional and operational need for such a location*' into the policy. She considered this amendment was consistent with the NPS-REG (policies C1 and E2), the NPS-IB (relevant provisions), and the WCRPS (particularly section 6). Consequently, she suggested recognising the existing REG activities and their functional and operational need to locate within the OSRZ appropriate to be included in the policy.

189. Ms Styles suggested the following amendments to OSRZ – P2:

OSRZ - P2

Open space may accommodate recreational, cultural, natural, heritage, access and amenity values and functions**, renewable electricity generation activities,** and ancillary activities to support these, where this fits with the purpose of the open space and its classification under any relevant Act **or where an activity has a functional or operational need for such a location**.

190. Regarding Ms Easton's recommendation to reject Manawa's amendment to OSRZ – P3, Ms Styles indicated that the policy wording did not recognise the existing uses and activities within OSRZ. Additionally, she did not consider the term '*should*' provided the level of assurance required by Manawa to undertake their activities, and she anticipated that this could be used to direct unreasonable expectations of outcomes for Manawa in the future. Consequently, Ms Styles suggested inserting the phrase '*where practicable*' into the policy recognising: (1) there are other matters which require consideration in the siting and design of buildings within OSRZ; and (2) not all activities in the zone are open space in nature nor is it necessary or appropriate to require the same character for all such buildings.

191. In her statement, Ms Smith for Terra Firma agreed with Ms Easton's recommendation to include mineral exploration and prospecting in OSRZ - P9, although suggested this was disingenuous if the importance of generic mineral extraction is not clearly articulated at the overview and objective level. Consequently, Ms Smith suggested OSRZ – P9 (f) should not include the qualifier "*limited in their location*" because it is not effects-based and fails to account for compliance with OSZ rules. She argued the removal of the qualifier would not equate to promoting mineral extraction as a widespread use of OSZ lands given the high

percentage of land held in the conservation estate, and the time, financial, consenting, and access challenges associated with mineral exploration, prospecting and mining. Consequently, Ms Smith held contrary views to Ms Easton's reasoning for rejecting submissions on the policy.

192. Ms Smith emphasised companies mining conservation lands typically contribute significant funds for pest management and environmental initiatives to offset mining effects, helping meet biodiversity goals and extending DoC programme effectiveness.

193. Ms Hunter for Bathurst Group disagreed with Ms Easton's reasoning to reject Minerals West Coast's submission (S569.040) on OSRZ – P9 (f). Instead, she supported the submission because acknowledging mineral resources' locational limitations and operational requirements is important and consistent with the WCRPS. She argued the RMA's sustainable management purpose is not replaced by the Reserves or Conservation Acts. She emphasised mining activities face unique planning challenges compared to other activities with functional needs - while farmers can fence off sensitive areas without making operations uneconomical, similar protective measures could prevent mineral extraction entirely, causing significant economic losses.

194. Mr Deavoll indicated the Director General sought amendment to OSRZ – P14, not deletion. He indicated recommended amendments to the policy as covered by the MINZ chapter aligns with the Director General's submission.

195. Mr Deavoll supported Ms Easton's recommendation to accept the Director General's amendments to several OSRZ policies, which broadly aimed to retain open space values and manage effects on indigenous biodiversity often associated with these areas.

196. In her evidence on behalf of Ngāi Tahu, Ms Pull raised concern with Ms Easton's recommended new OSZR policy (relating to conservation stewardship land) because the tenet "*will undertake a plan change to ensure that the plan zone identification is appropriate for the reclassified land parcel*" reads like a method. However, she suggested there were no OSRZ objectives and policies to consider this method. She noted the Historic Heritage s42A Report recommended a method for the TTPP Panel to consider additional heritage items through a plan change. Consequently, Ms Pull suggested amending the recommended new OSZR policy as illustrated below to provide for appropriate zoning and use of conservation stewardship land that has been re-classified:

> **Policy OSRZ – PXX When conservation stewardship land is reclassified, *provide for the different functions, values and purpose of the reclassification in partnership with Poutini Ngāi Tahu and key stakeholders.*** ~~*the Te Tai o Poutini Plan Committee, after working with Te Papa Atawhai/the Department of Conservation and Poutini Ngāi Tahu, will undertake a plan change to ensure that the plan zone identification is appropriate for the reclassified land parcel.*~~

197. Additionally, Ms Pull recommended amending the OSRZ overview by outlining the method for the stewardship land plan change process by inserting the following text:

> **Method: The Te Tai o Poutini Plan Committee will consider undertaking a plan change in relation to reclassification of stewardship land as part of their regular monitoring of Plan implementation. The TTPP Committee, will work with Te Papa Atawhai/the Department of Conservation and Poutini Ngāi Tahu, to assess whether there is sufficient benefit of re-zoning and if so, initiate a Plan Change.**

198. Ms Pull considered OSRZ-P2 and OSRZ-P6 recognise the NTCSA and its RMA interaction by referencing cultural values and functions, and site classification under relevant Acts including SASMs.

199. In her summary of planning evidence on behalf of Ngāi Tahu, Ms Pull generally supported Ms Easton's recommendations on their submissions and further submissions.

200. In the statement for herself and on behalf of BCG, Ms Inta commented on OSRZ – P9 and OSRZ – P14. (The Panel note that neither Ms Inta nor BCG submitted or further submitted on OSRZ – P9.) She queried the purpose of OSRZ – P9, suggesting the policy should refer to "*activities*" instead, and noting it is not focused on special-purpose reserves. Consequently, she suggested the policy was flawed and could be misinterpreted.

201. Ms Inta indicated her and BCG's submission on OSRZ – P14 (S553.163 and S552.163 respectively) relating to inserting reference to the adverse effects hierarchy were not addressed in the s42A Report, which the Panel acknowledges. She suggested that clause a and b of the policy addressed the same issue, albeit expressed differently. Consequently, she considered OSRZ – P14 (a) could be amended as illustrated below:

OSRZ - P14

Provide for mineral extraction activities within the OSZ - Open Space Zone where:

(a) Impacts on open space and recreation values of the site are minimised**, with any residual adverse effects following the adverse effects hierarchy;**

…

Reporting Officer Reply Evidence

202. Ms Easton supported the suggested amendments to the recommended new OSZR policy (relating to conservation stewardship land), as well as outlining the plan change method in the OSRZ overview, put forward by Ms Pull and Poutini Ngāi Tahu. She noted the method amendment would be a useful inclusion in the pTTPP.

203. Ms Easton clarified submissions on OSZ – P14 were addressed in the MINZ s42A Report, not the OSRZ s42A Report. Consequently, she did not recommend any amendments to that policy, instead referring submitters and the TTPP Panel to the MINZ topic.

204. Ms Easton supported including reference to generic OSMPs in OSRZ objectives, particularly because it does not reference a specific incorporated document. She cited similar approaches in Tauranga, Hamilton, Waikato, New Plymouth, Auckland, and Porirua Plans.

205. Ms Easton clarified OSMP is defined as a Reserve Management Plan or Conservation Management Plan or National Park Management Plan or Iwi/Papatipu Rūnanga Management Plan or other Management Plan prepared in accordance with the Reserves Act 1977 or the Conservation Act 1987. She listed seven management plans that met this definition, with these plans developed by the Councils, the DoC, or the open space landowner. Consequently, she suggested including a OSMP schedule (including links to those OSMP) would have limited utility for pTTPP readers.

206. Ms Easton emphasised the stewardship land is important to consider within the pTTPP but indicated there is no scope to consider the likely process of identifying and reclassifying

stewardship land and the future activities that might occur on it more widely. Consequently, she supported Ms Pull's suggested policy and method amendments. Consequently, she recommended amending the new OSRZ Policy and inserting a new OSRZ Method, as illustrated below:

New Policy OSRZ – PXXX

When conservation stewardship land is reclassified, provide for the different functions, values and purpose of the reclassification in partnership with Poutini Ngāi Tahu and key stakeholders. ~~the Te Tai o Poutini Plan Committee, after working with Te Papa Atawhai/the Department of Conservation and Poutini Ngāi Tahu, will undertake a plan change to ensure that the plan zone identification is appropriate for the reclassified land parcel.~~

New Method OSRZ – M1

The Te Tai o Poutini Plan Committee will consider undertaking a plan change in relation to reclassification of stewardship land as part of their regular monitoring of Plan implementation. The TTPP Committee, will work with Te Papa Atawhai/the Department of Conservation and Poutini Ngāi Tahu, to assess whether there is sufficient benefit of re-zoning and if so, initiate a Plan Change.

207. Ms Easton partially agreed with Ms. Styles' evidence on OSRZ - P2 but preferred referencing "*electricity transmission, distribution and renewable electricity generation*" based on the WCRPS. She considered this within the scope of Manawa's submission seeking "*regionally significant infrastructure*" reference. She recommended amending the policy accordingly. However, Ms Easton maintained that functional and operational need should not be included in OSRZ - P2.

OSRZ – P2

Open space may accommodate recreational, cultural, natural, heritage, access and amenity values and functions and ancillary activities to support these, **including electricity transmission, distribution and renewable electricity generation** where this fits with the purpose of the open space and its classification under any relevant Act.

208. Regarding Manawa's evidence for inserting "*where practicable*" into OSRZ – P3, Ms Easton now supported this amendment given the term is used in OSRZ - P16 and other Zones policies, as well as Ms Styles evidence. Consequently, Ms Easton recommended amending the policy as illustrated below:

OSRZ - P3

Buildings and structures should be designed and sited to be compatible with the function and predominant purpose of the open space and **where practicable** fit within the character and amenity of the surrounding area.

209. Regarding whether OSRZ – P4 should refer to commercial or retail activities, Ms Easton agreed retail activities should be included in this policy, linking with the three zones rules, but not commercial activities. She indicated in Forest & Bird's submission point (S560.337) there may be some scope to address this matter.

210. Regarding submission points on various OSRZ policies referred to in the s42A Report, but not carried through into recommended amendments, Ms Easton advised the following.

(a) The recommended amendments to OSRZ – P9 were omitted in error from the s42A report, albeit shown in her Appendix 1. She clarified the following amendments are recommended to the policy:

OSRZ - P9

Provide for ~~the~~ a range of purposes where compatible with the open space values including:

a. The ongoing operation and appropriate management of cemeteries;

b. Camping and other visitor accommodation opportunities at rivers, lakes and coastal areas ~~where this is compatible with the values of the open space~~;

c. Gravel and shingle extraction for roading networks and other local purposes;

d. Quarries for rock;

e. Pastoral farming including grazing as a management tool;

f. Mineral **prospecting, exploration and** extraction of resources where these **resources** are limited in their location; ~~and~~

g. Water supply and drainage networks where this supports local community needs**; and**

h. **Establishment and operation of renewable electricity generation.**

(b) Paragraph 140 of the s42A Report refers to the Director General's submitted amendment to OSRZ – P19 (S602.189). However, Ms Easton's recommendations on this submission were omitted from the s42A Report and her Appendix 1 in error. She recommends the following amendment to the policy in response to the Director General's submission:

OSRZ - P19

Within the NOSZ - Natural Open Space Zone enable activities and facilities that:

a. Are consistent with the intended purpose, character and qualities of the Natural open space zone; and

b. Protect, maintain and, where possible, enhance **and restore** indigenous biodiversity including taonga species, natural values and ecological linkages; and

c. Contribute to the health and wellbeing of the community.

211. Ms Easton agreed with Ms Inta on OSRZ – P9, considering that to provide for a range of "activities" was more appropriate phraseology than a range of "purposes".

Hearing Panel's Evaluation

212. The Panel has considered the submissions, and the various amendments proposed to the Open Space polices.

213. The Panel agrees with the recommended new OSRZ policy (relating to conservation stewardship land), as well as the plan change method in the OSRZ overview, which was put

forward by Ms Pull is appropriate and we recommended it be accepted. We noted that the new policy results in a renumbering from OSRZ-P11 onwards.

214. The Panel agrees with Ms Easton that no amendments are required to policies OSRZ-P1 and OSRZ-P4. We support the reasoning set out in her s24A Report in rejecting the submissions seeking amendment to these provisions. The Panel also notes that there were no submissions on OSRZ-P6, OSRZ-P8, OSRZ-P14, OSRZ-P15, OSRZ-P16 and OSRZ-P17 seeking amendments or deletion and we therefore recommend these also be retained as notified.

215. In terms of OSRZ-P2, the Panel have considered Ms Styles concerns regarding renewable electricity generation and we agree that it should be included within the policy to recognise existing situations within the OSRZ. We also accept Ms Easton's addition of '*electricity transmission, distribution*' (also within the zone) alongside renewable electricity generation and we consider all three of these activities are within the scope of the original Manawa submission which sought RSI be included in the policy. For clarity we agree that RSI itself would have been inappropriate.

216. Turning to the issue of '*functional or operational need*' which Ms Styles also sought to be included in OSRZ-P2, the Panel have given this some consideration, however we agree with Ms Easton that electricity transmission, distribution and renewal electricity generation, while they maybe in the zone, are not the purpose of the zone, and we consider including such wording would be sending the wrong signal in that regard.

217. The Panel agree with Ms Styles that the addition of the words '*where practicable*' into OSRZ-P3 would provide recognition that there are other matters which require consideration in the siting and design of buildings within Open Space zones, and we note Ms Easton supported this in her right of reply.

218. The Panel agrees with Ms Easton's reasoning to amend OSRZ-P5 and OSRZ-P7 based on Forest and Bird submissions and OSRZ-P10 based on a Te Mana Ora submission and we recommend these be included.

219. In terms of OSRZ-P9, the Panel have considered each of the respective amendments sought. We agree with the inclusion of "*and other visitor accommodation*", alongside '*camping*' as this would cover huts which are located across many areas of OSRZ. We also accept the inclusion of a clause associated with the establishment and operation of renewable electricity generation is appropriate, rather than RSI, as a signal to support for renewable energy in the OSRZ, noting that consent would still be required under the Energy Chapter.

220. The Panel agrees with the insertion of '*mineral exploration and prospecting*' into OSRZ noting that these activities are a necessary pre-curser to mineral extraction which is already in the policy. We accept Ms Easton reasoning that the inclusion of '*functional or operational need to locate there*' to replace '*where these are limited in their location*' is not appropriate noting that there are other Acts governing open space land and they do not place a high weight on the value of mineral extraction, and instead they are very clear on the primary purposes of these lands as open space.

221. The Panel has considered the Forest and Bird submission to amend the beginning of the policy to refer to protecting natural values. We acknowledge Ms Easton's comment that this would be consistent with the Reserves and Conservation Acts under which open space land is administered, and we recommend this part of the amendment be included. We agree that

'*outside of the NOSZ*' and '*consider providing for*', which were part of the package of amendments Forest and Bird sought are not appropriate.

222. The Panel do not agree with the amendment to delete the word '*purposes*' and replace it with '*Activities*'. This appears to stem from a statement from Ms Inta who was not a submitter on this provision, and we do not consider there is scope available for this.

223. The Panel agrees with Ms Easton's reasoning to amend OSRZ-P11 and OSRZ-P12 (as notified) based on submissions by the Director General and The Findlays and we recommend these be included.

224. The Panel agrees with the amendment to OSRZ-P13 sought by the Director General to refer to adverse effects on open space values being appropriately managed and we note that this would go some way to addressing the submissions of Te Mana Ora and Forest and Bird. We note that 'adverse' was left out of Ms Easton's amendment, however we consider it is important that it be included as a qualifier. We agree with Ms Easton's reasoning not to replace 'provide for' with 'allow' as sought by the Director General. We also agree with her reasoning in relation to rejecting the Manawa submission on including renewable energy and note that Ms Styles considers such relief is not necessary if it is included in OSRZ-P9, which it has been.

225. The Panel agrees with Ms Easton's reasoning to amend OSRZ-P18, OSRZ-P19 and OSRZ-P20 (as notified) based on submissions by the Director General and we recommend these be included. We note that the amendment to OSRZ-P20 addresses Forest and Birds concerns to some extent, however we agree that the remainder of their submission on OSRZ-P19 and OSRZ-P20 should be rejected.

226. The Panel agree with the recommended amendments numbering the policies from OSRZ -P11 to OSRZ-P21 as a consequence of the new Policy OSRZ-P11.

227. In relation to the remainder of the submissions on the OSRZ policies the Panel agree that these be rejected on the basis of the conclusions reached by Ms Easton.

Hearing Panel Recommendation

228. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommends the following changes to the **OSRZ policies**:

OSRZ - Open Space and Recreation Zones Policies	
OSRZ - P1	Open space should be developed and used in accordance with any relevant operative Reserves Act or Conservation Act Management Plan.
OSRZ - P2	Open space may accommodate recreational, cultural, natural, heritage, access and amenity values and functions and ancillary activities to support these, **including electricity transmission, distribution and renewable electricity generation,** [49] where this fits with the purpose of the open space and its classification under any relevant Act.

[49] Manawa Energy (S438.130)

OSRZ - P3	Buildings and structures should be designed and sited to be compatible with the function and predominant purpose of the open space and**, where practicable,** [50] fit within the character and amenity of the surrounding area.
OSRZ - P4	Commercial and Residential activities may be appropriate on some open spaces where this is either identified in a Reserves Act or Conservation Act Management Plan, or where it has a link with the open space and recreation resource.
OSRZ - P5	Provide for commercial recreation activities that maintain the quality of the open space and recreation experience of people using the open space, **while also protecting natural values. Have** having[51] particular regard to the scale, intensity and cumulative effects of commercial recreation activities.
OSRZ - P6	Recognise that many open spaces have sites and areas of significance to Poutini Ngāi Tahu, and ensure that these are managed in collaboration with iwi and hapū.
OSRZ - P7	Promote the p**P**rotection and enhancement of **the**[52] existing natural environment values having regard to the relevant OSRZ - Open Space and Recreation Zone and the opportunities for enhancement of these on the site.
OSRZ - P8	Provide for indoor and outdoor organised sports, active recreation, recreation facilities, community activities, educational facilities, accessory activities and associated buildings and structures having regard to the relevant OZRZ - Open Space and Recreation Zone.
OSRZ - P9	**Provided that natural values can be protected,**[53] P**p**rovide for the **a**[54] range of purposes where compatible with the open space values including: a. The ongoing operation and appropriate management of cemeteries; b. Camping **and other visitor accommodation**[55] opportunities at rivers, lakes and coastal areas where this is compatible with the values of the open space;[56] c. Gravel and shingle extraction for roading networks and other local purposes; d. Quarries for rock; e. Pastoral farming including grazing as a management tool; f. Mineral **prospecting, exploration and** extraction of resources where these **resources**[57] are limited in their location and[58]

[50] Manawa Energy (S438.131)
[51] Forest & Bird (S560.338)
[52] Forest & Bird (S560.339)
[53] Forest & Bird (S560.340)
[54] Clause 16(2) of Schedule 1 RMA
[55] Paparoa Track Services Ltd, Craig and Sue Findlay, Tim Findlay, Punakaiki Beach Camp Ltd (S605.014)
[56] Consequential amendment from Forest & Bird (S560.340)
[57] WMS (S599.100), BCML (S601.078), BRML (S604.069), PML (S606.055), and Whyte Gold Limited (S607.053)
[58] Consequential change from Manawa Energy (S438.132)

	g. Water supply and drainage networks where this supports local community needs**; and**[59] **h. Establishment and operation of renewable electricity generation**.[60]
OSRZ - P10	Subdivision and new development should provide for the open space needs generated by the development either through direct provision of land and works, or through a financial contribution. This includes: a. Additional neighbourhood parks including waterfront areas, walkways**,** ~~and~~ cycleways **and accessible quality playgrounds**[61] needed as a result of additional household and visitor accommodation growth; b. Additional recreation areas to enhance recreational opportunities and the visual amenity of the built environment; and c. Development of existing land set aside for neighbourhood parks and recreation areas.
OSRZ - P11	**When conservation stewardship land is reclassified, provide for the different functions, values and purpose of the reclassification in partnership with Poutini Ngāi Tahu and key stakeholders.**[62]
Open Space Zone	
OSRZ - P1~~1~~2	The OSZ - Open Space Zone primarily provides for passive and active recreation activities, **natural, cultural and biodiversity values,**[63] community facilities, ~~campgrounds~~ **camping grounds**[64] and cemeteries**,**[65] and limited associated facilities and structures.
OSRZ - P1~~2~~3	Enable activities and facilities within the OSZ - Open Space Zone that: a. Are consistent with the intended purpose, character and qualities of the OSZ – Open Space Zone; ~~and;~~[66] b. Contribute to the overall health and wellbeing of the community; and c. Minimise adverse effects on the character, **natural environment,**[67] and amenity values of the surrounding area.
OSRZ - P1~~3~~4	Provide for activities that are ancillary to the functions of the OSZ - Open Space Zone **where the adverse effects on open space values can be appropriately managed** [68]including: (a) Retail activities;

[59] Consequential change from Manawa Energy (S438.132)
[60] Manawa Energy (S438.132)
[61] Te Mana Ora (S190.606)
[62] Ngāi Tahu (S620.007)
[63] Director General (S602.184)
[64] Paparoa Track Services Ltd, Craig and Sue Findlay, Tim Findlay, Punakaiki Beach Camp Ltd (S605.015)
[65] Clause 16(2) of Schedule 1 RMA
[66] Clause 16(2) of Schedule 1 RMA
[67] Director General (S602.184)
[68] Director General (S602.186 and S602.200)

	(b) Residential activities, including for ~~for~~ [69]caretaker purposes; and (c) Agricultural, horticultural or pastoral activities.
OSRZ - P14<u>5</u>	Provide for mineral extraction activities within the OSZ - Open Space Zone where: a. Impacts on open space and recreation values of the site are minimised; b. This is provided for within any Open Space Management Plan for the area; c. Adverse effects on open space and recreation values and the environment are avoid, mitigated, remedied, offset or compensated; d. Sites are rehabilitated at the end of the mineral extraction activity to enable the land to be used for an appropriate activity.
Sport and Active Recreation Zone	
OSRZ - P15<u>6</u>	The SARZ - Sport and Active Recreation Zone primarily provides for active, organised and informal recreation, sports and community activities.
OSRZ - <u></u>P16<u>7</u>	With the SARZ - Sport and Active Recreation Zone enable activities and facilities that: a. May generate temporary adverse effects such as increased levels of noise and traffic; and b. Maintain a sense of openness within the zone; and c. Retain existing planting and mature trees, where practicable; and d. Contribute to the health and wellbeing of the community; and e. Do not adversely affect character and qualities of the surrounding area and adjoining sites.
OSRZ - P17<u>8</u>	Within the SARZ - Sport and Active Recreation Zone enable buildings and structures, where these: a. Are for the use of a recreation activity or a conservation activity or ancillary activity to these; b. Are compatible with the purpose, character and qualities of the zone; and c. Avoid or mitigate adverse effects on character and qualities of the surrounding area.
Natural Open Space Zone	
OSRZ - P18<u>9</u>	**<u>Require</u>** ~~A~~ **<u>a</u>** low level of development and built form ~~is anticipated~~ within ~~this~~ **<u>the</u>** NOSZ – Natural Open Space Zone to retain the natural, cultural and biodiversity values within ~~the~~[70] natural open space areas.

[69] Director General (S602.186 and S602.200)
[70] Director General (S602.188 and S602.202)

OSRZ - P~~19~~20	Within the NOSZ - Natural Open Space Zone enable activities and facilities that: a. Are consistent with the intended purpose, character and qualities of the Natural open space zone; and b. Protect, maintain and, where possible, enhance **and restore**[71] indigenous biodiversity including taonga species, natural values and ecological linkages; and c. Contribute to the health and wellbeing of the community.
OSRZ - P~~20~~1	Within the NOSZ - Natural Open Space Zone provide for small-scale buildings and structures that: (a) Are ancillary to a permitted activity; ~~and~~[72] (b) Do not adversely affect the conservation **and indigenous biodiversity**[73] values of the site;~~ and~~[74] (c) Are of a scale, form, location and design that is compatible with the purpose, character and qualities of the zone; and (d) Do not adversely affect the character and qualities of the surrounding area.

OSRZ - Open Space and Recreation Zones Methods	
OSRZ – M1	**The Te Tai o Poutini Plan Committee will consider undertaking a plan change in relation to reclassification of stewardship land as part of their regular monitoring of Plan implementation. The TTPP Committee will work with Te Papa Atawhai/the Department of Conservation and Poutini Ngāi Tahu, to assess whether there is sufficient benefit of re-zoning and if so, initiate a Plan Change.**[75]

7. NATURAL OPEN SPACE ZONE CHAPTER

Submissions and Further Submissions

229. Four submission points[76] received on the **NOSZ Chapter** as a whole were summarised in a Table on page 44 of the s42A Report. Two submission points were neutral on the policy, one submission point opposed the policy, and the fourth submission point sought amendment to the policy.

[71] Director General (S602.189)
[72] Clause 16(2) of Schedule 1 RMA
[73] Forest and Bird (S560.0546)
[74] Clause 16(2) of Schedule 1 RMA
[75] Ngāi Tahu (S620.007)
[76] SEL (S250.002), Forest & Bird (S560.350), and Director General (S602.196 and S602.210).

230. Seven submission points and seven further submission points[77] received on the **NOSZ overview** were summarised in a Table on pages 44 to 45 of the s42A Report. One submission point supported in part the overview, seeking amendments. The other six submission points sought amendment of the overview. All further submission points opposed Forest & Bird's submission.

231. Five submission points and one further submission point[78] on **NOSZ – R1** were summarised in a Table on page 46 of the s42A Report. One submission point supported the rule as notified, while another submission point supported in part the rule with that submission supported by the further submission. One submission point opposed the rule as notified, with another two submission points opposing in part the rule.

232. Three submission points[79] on **NOSZ – R2** were summarised in a Table on pages 46 to 47 of the s42A Report. Two submission points supported the rule as notified, with the third submission point seeking an amendment.

233. Three submission points and one further submission point[80] on **NOSZ – R3** were summarised in a Table on page 47 of the s42A Report. Two submission points supported the rule as notified. One submission point sought an amendment to the rule, with that opposed by the further submission.

234. Five submission points and one further submission point[81] on **NOSZ – R4** were summarised in a Table on pages 47 to 48 of the s42A Report. One submission point supported the rule as notified. Two submission points opposed the rule as notified, one of which was opposed by the further submission. Two submission points sought an amendment to the rule.

235. Three submission points[82] on **NOSZ – R5** were summarised in a Table on pages 48 to 49 of the s42A Report. One submission point supported the rule as notified, while another opposed the rule as notified. The third submission point sought an amendment to the rule.

236. Three submission points[83] on **NOSZ – R6** were summarised in a Table on page 49 of the s42A Report. On submission point supported the rule as notified, while another opposed the rule as notified. The third submission point sought an amendment to the rule.

237. One submission point[84] on **NOSZ – R7** was summarised in a Table on pages 49 to 50, which supported the rule as notified.

238. Three submission points[85] on **NOSZ – R8** were summarised in a Table on page 50, which supported the rule as notified.

[77] Forest & Bird (S560.351, S560.0548, and S560.0549), Ngāi Tahu (S620.214), BCG (S552.164), Ms Katherine Gilbert (S473.013), QLDC (S523.002), TiGa (FS104.061), Terra Firma (FS108.006), BRML (FS150.047), PML (FS215.036), Bathurst Group (FS89.057), WMS (FS231.058), and BCML (FS232.054)

[78] Te Mana Ora (S190.618), Waka Kotahi (S450.195), BDC (S538.385), GDC (S608.688 and FS1.433), and Forest & Bird (S560.352)

[79] Te Mana Ora (S190.619), MoE (S456.024), and Forest & Bird (S560.353)

[80] Ngāi Tahu (S620.215 and FS41.139), Te Mana Ora (S190.620), and Forest & Bird (S560.354)

[81] Te Mana Ora (S190.621), BDC (S538.386), Director General (S602.193 and S602.207), Ngāi Tahu (FS41.140), Forest & Bird (S560.355), and NZMCA (S490.008)

[82] Te Mana Ora (S190.622), Director General (S602.194 and S602.208), and Forest & Bird (S560.356)

[83] Te Mana Ora (S190.623), Director General (S602.195 and S602.209), and Forest & Bird S560.357)

[84] Te Mana Ora (S190.624)

[85] Te Mana Ora (S190.625), Waka Kotahi (S450.196), and GDC (S608.689)

239. Two submission points[86] on **NOSZ – R9** were summarised in a Table on page 50, one supported the rule as notified, while the other supported in part the rule.

240. Eight submission points and one further submission point[87] on **NOSZ – R10** to **NOSZ – R17** were summarised in a Table on pages 50 to 51. Seven submission points supported the rules as notified. One submission point sought an amendment to the rules, which was opposed by the further submission.

241. We adopt the summary of these submissions detailed in the s42A Report, and we have considered all of the relevant submissions.

Section 42A Report

NOSZ Chapter as a whole

242. Ms Easton recommended rejecting submissions from:

(a) SEL (S250.002), reasoning that if the proposed aerial cableway in the Franz Josef Glacier/Ka Roimata o Hinehukatere Valley is to be accommodated in the pTTPP then that would be best achieved by rezoning the area Open Space Zone. In which case, most aspects of the aerial cableway would be a Permitted or Restricted Discretionary Activity under the OSZ provisions.

(b) Forest & Bird (S560.350), reasoning it inappropriate for the same reasons as detailed in [152] below.

NOSZ Overview

243. Ms Easton recommended rejecting Forest & Bird's submission (S560.0549), reasoning that mineral extraction is not an anticipated activity in NOSZ so it is not necessary to refer to it in the overview section, as you would not for other unanticipated activities. She emphasised that mineral extraction within NOSZ has been considered within the s42A Report for the MIN chapter.

244. Ms Easton recommended accepting BCG's submission (S552.164), reasoning the zoning of LINZ-owned land (e.g., rivers and estuaries) should not be driven by ownership.

245. Ms Easton recommended accepting submissions from:

(a) Forest & Bird (S560.351) and Ngāi Tahu (S620.214), reasoning that referring to relevant District Wide chapters within the overview will correct a drafting error. She also supports the overview referring to the ECO and NFL chapters as they are likely particularly relevant to NOSZ. This also links to Forest & Bird's submission on the OSRZ overview (S560.0553) discussed in [62].

(b) Ms Gilbert (S473.013), reasoning that it is unclear which public conservation land are included within NOSZ and for what purpose. Consequently, Ms Easton recommended the following amendment to the NOSZ overview section.

> "The purpose of the NOZ - Natural Open Space Zone is to recognise and provide for open spaces that contain high natural, ecological and landscape values. The zone also

[86] Te Mana Ora (S190.626) and MoE (S456.025)
[87] Te Mana Ora (S190.627 to S190.632 and S190.634), Forest & Bird (S560.018), and Terra Firma (FS108.007)

applies to a variety of parks and reserves, coastal and riverside esplanade reserves, scenic reserves, local purpose reserves and recreation reserves. This zone also applies to large areas of public conservation land – **specifically gazetted** national parks **and** scientific reserves, **as well as areas classified within the Department of Conservation reserve classification system as** wilderness areas, specially protected areas and ~~important~~ ecological areas."

(c) QLDC (S523.002), supporting amending the overview section to clarify that NOSZ land often adjoins other territorial authority boundaries not managed by the pTTPP, so care needs to be applied regarding any potential cross boundary resource management issues.

(d) Forest & Bird (S560.0548), reasoning the amendments are a requirement of the Reserves Act and Conservation Act.

246. Ms Easton recommended the following amendments to NOSZ overview:

Overview

…

This zone also applies to large areas of public conservation land – **specifically gazetted** national parks **and** scientific reserves, **as well as areas classified within the Department of Conservation reserve classification system as** ~~wilderness areas~~, **Wildlife Management Areas and** ~~s~~**S**pecially ~~p~~**P**rotected ~~a~~**A**reas ~~and important ecological areas~~.

…

Activities and uses on publicly owned land are required to obtain permission (such as a lease or a licence) from the relevant administering authority. This is in addition to any requirements under Te Tai o Poutini Plan and the RMA. All activities will also **need to be consistent with** ~~have regard to~~ any relevant reserve management plans, national park management plans or national legislation (Reserves Act 1977 or Conservation Act 1987).

Other Relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the zone chapters, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for certain activities within the Natural Open Space Zones.

- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters - there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Natural Open Space Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.**

- **Natural Hazards - natural hazards are widespread on the coast and in some locations natural hazard overlays may affect areas in the Natural Open Space Zone. Information on natural hazard overlays and provisions can be found in the natural hazards chapter.**

- **Ecosystems and Biodiversity – As areas of high ecological value, the provisions of the Ecosystems and Biodiversity chapter are particularly relevant to the Natural Open Space Zone. The Ecosystems and Biodiversity chapter contains the provisions around the management of indigenous vegetation.**

- **Natural Features and Landscape -many areas of outstanding natural features or outstanding natural landscape will be located within the Open Space Zone. The Natural Features and Landscape chapter contains the provisions for building and earthworks within areas of outstanding natural features and outstanding natural landscapes.**

- **Natural Character and the Margins of Waterbodies -in some locations areas of Natural Open Space Zone may extend into the riparian margins of waterbodies. The Natural Character and the Margins of Waterbodies chapter contains provisions on how these areas must be managed.**

- **Coastal Environment - where activities occur within the coastal environment, including areas of high or outstanding coastal natural character, the Coastal Environment chapter contains provisions for activities within these areas.**

- **General District Wide Matters - provisions in relation to noise, light and signs in particular may be relevant to activities in the Natural Open Space Zone.**

Adjacent Local Authority Administration

Lands within the Natural Open Space Zone adjoin a number of other territorial authority boundaries not managed by Te Tai o Poutini Plan. Plan users need to apply care in regard to any potential cross boundary resource management issues and check the relevant District Plans of adjacent Territorial Authorities when considering activities on the edges of the Te Tai o Poutini Plan planning area.

NOSZ – R1 to NOSZ – R6

247. The support from Te Mana Ora (S190.618, S190.619, S190.620, S190.621, S190.622, S190.623), MoE (S456.024), and Ngāi Tahu (S620.215) was noted by Ms Easton.

248. Ms Easton recommended rejecting submissions from:

(a) Waka Kotahi (S450.195), reasoning redrafting Part Three of the pTTPP to separate out Performance Standards would not improve usability, and is not a requirement of the Planning Standards, nor a necessity. The Councils advised Ms Easton their preference for the way the pTTPP is currently drafted due to consistency and user familiarity with the operative District Plans;

(b) GDC (S608.688) for the same reasons as noted in [(a)] above;

(c) NZMCA (S490.008), reasoning that camping activities could have significant adverse effects on the high natural values of NOSZ lands, so a resource consent process is required to ensure that these effects are effectively managed before a resource consent is granted; and

(d) Forest & Bird (S560.352 to S560.354), reasoning requiring resource consent for a Discretionary Activity to establish basic structures in parks, including structures which support activities necessary to support park function, would be a duplication of regulation when the National Parks Act and Reserves Act have their own processes.

249. Ms Easton recommended accepting submissions from:

(a) BDC's submission (S538.385), reasoning an Advice Note being appropriate for referring to the neighbour written approval process as the RMA Deemed Permitted process takes precedent over NOSZ – R1.

(b) The Director General (S602.193, S602.207, S602.194, S602.208, S602.195, S602.209), reasoning a Restricted Discretionary Activity status would provide an appropriate level of oversight for temporary camping grounds, residential activities, or retail activities in the NOSZ.

(c) Ngāi Tahu (FS41.140), reasoning nohoanga entitlements as part of Poutini Ngāi Tahu Activities should be provided for as a Permitted Activity in the NOSZ (i.e., not require resource consent) because these entitlements are guaranteed to Ngāi Tahu as part of Ngāi Tahu Claims Settlement Act. Consequently, Ms Easton recommended an Advice Note to that effect be included in NOSZ – R4.

250. Ms Easton recommended accepting in part submissions from:

(a) BDC (S538.386), reasoning temporary camping grounds have effects different to other recreational activities, so these activities were intentionally separated through NOSZ – R3 and Rule NOSZ – R4. Ms Easton indicated that BDC's concern relating to notification of the permitted activity to the Council is addressed through her recommendations above.

(b) Forest & Bird (S560.355 to S560.357), reasoning a resource consent process for temporary camping grounds, residential activities, or retail activities in the NOSZ appropriate as these activities would not in all circumstances align with the functions and values of NOSZ lands. However, Ms Easton did not support a Discretionary Activity applying to these activities, reasoning this status was not necessary to protect the values of these natural open spaces. She emphasised preferring the approach detailed above.

251. Consequently, Ms Easton recommended the following amendments to the NOSZ rules:

NOSZ - R1 Park Facilities and Park Furniture

Activity Status Permitted

Where:

….

5. No building shall project beyond a building envelope defined by a recession plane as outlined in Appendix Two to commence 2.5m above any RESZ - Residential Zone or SETZ - Settlement Zone ~~boundary except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~.

…

Advice Note: <u>Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.</u>

NOSZ - R4 Temporary Camping Grounds

Activity Status ~~Permitted~~ <u>Restricted Discretionary</u>

Where:

~~1. Written notification to the Council of the activity is provided at least 10 working days prior to the activity commencing; and~~

~~2.~~ **1.** Camping activity is restricted to 10 days per calendar year.

Discretion is Restricted to:

a. Design, position and location of any buildings or structures;

b. Landscape treatment;

c. Vehicle access and parking design and location; and

d. Management of effects on natural character, landscape, historical values, Poutini Ngāi Tahu values and biodiversity values.

Advice Note:

…

~~3.~~ This rule does not apply to nohoanga entitlements granted to Poutini Ngāi Tahu as part of the Ngāi Tahu Treaty Settlement Act. Nohoanga entitlements are regulated under Rule NOSZ – R3 as part of Poutini Ngāi Tahu Activities.

Activity status where compliance not achieved: ~~N/A~~Discretionary

NOSZ - R5 Residential Activities

Activity Status ~~Permitted~~ Restricted Discretionary

Where:

1. This is ancillary to a conservation activity or recreation activity;
2. The activity has a functional or operational need to locate in a NOSZ - Natural Open Space Zone; and
3. All performance standards for Rule NOSZ - R1 are complied with.

Discretion is Restricted to:

a. Design, position and location of any buildings or structures;

b. Landscape treatment;

c. Vehicle access and parking design and location; and

d. Management of effects on natural character, landscape, historical values, Poutini Ngāi Tahu values and biodiversity values.

Activity status where compliance not achieved: Discretionary

NOSZ - R6 Retail Activities

Activity Status ~~Permitted~~ Restricted Discretionary

Where:

1. This is ancillary to a recreation activity or a conservation activity; and
2. Performance Standards for Rule NOSZ - R1 are complied with.

Discretion is Restricted to:

a. **Design, position and location of any buildings or structures;**

b. **Landscape treatment;**

c. **Vehicle access and parking design and location; and**

d. **Management of effects on natural character, landscape, historical values, Poutini Ngāi Tahu values and biodiversity values.**

Activity status where compliance not achieved: Discretionary

NOSZ – R7 to NOSZ – R17

6. The support from Te Mana Ora (S190.624, S190.625, S190.626, S190.627, S190.628, S190.629, S190.630, S190.631, S190.632), Waka Kotahi (S450.196) and GDC (S608.689) was noted by Ms Easton.

7. Ms Easton recommended rejecting Forest & Bird's submission (S560.018) because it relates to the MINZ chapter and has been miscoded to the OSRZ chapter.

8. Ms Easton recommended accepting the submission from MoE (S456.025), reasoning replacing "Educational" with "Educational Facilities" in NOSZ – R9 will correct a drafting error. However, the Panel notes this was omitted in the amendment.

9. Ms Easton recommended amendments to NOSZ – R7 to NOSZ – R9 in Appendix 1 of the s42A Report is shown in italics below:

NOSZ - R7 Community Facilities

Activity Status Restricted Discretionary

Discretion is restricted to:

…

d. Management of effects on natural character, landscape, historical ***values, Poutini Ngāi Tahu*** values and biodiversity values …

NOSZ - R8

Vehicle Access and Carparking areas

Activity Status Restricted Discretionary

…

Discretion is restricted to:

…

e. Management of effects on natural character, landscape, historical ***values, Poutini Ngāi Tahu*** values and biodiversity values …

NOSZ - R9

Recreational Activities, Conservation Activities, Educational Facilities and Research Facilities, Poutini Ngāi Tahu Activities, Parks Facilities and Parks Furniture not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Discretion is restricted to:

…

d. Management of effects on natural character, landscape, historical ***values, Poutini Ngāi Tahu*** values and biodiversity values …

Submitter Correspondence

KiwiRail Holdings Limited

10. In her correspondence on behalf of KiwiRail, Ms Grinlinton-Hancock highlighted KiwiRail submitted on the Introduction and General Provisions of the pTTPP addressing the need for safety setbacks from the rail corridor. She indicated none of KiwiRail's submission points were allocated to the OSRZ chapter, nor is there specific discussion of KiwiRail's relief in Ms Easton's s42A Report. Nevertheless, she suggested the relief sought by KiwiRail is relevant to the OSRZ topic.

11. Consequently, Ms Grinlinton-Hancock indicated KiwiRail request amendments to Ms Easton's recommended NOSZ-R1, NOSZ-R7, and NOSZ-R9 as shown below in italics. The reason for these amendments is to appropriately manage the health and safety of communities and ensure the ongoing operation of KiwiRail's network as nationally and regionally significant infrastructure. The KiwiRail amendments are shown below:

NOSZ - R1 Park Facilities and Park Furniture

Activity Status Permitted

Where:

…

4. Buildings ***or structures*** are setback a minimum 4.5m from road ***and rail designation*** *boundar~~y~~****ies***; and

…

NOSZ-R7 Community Facilities

Activity Status Restricted Discretionary

Discretion is restricted to:

…

e. The safe and efficient operation of the rail network.

…

NOSZ-R9 Recreational Activities, Conservation Activities, Educational Facilities and Research Facilities, Poutini Ngāi Tahu Activities, Parks Facilities and Parks Furniture not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Discretion is restricted to:

…

f. <u>The safe and efficient operation of the rail network.</u>

<u>Hearing and Submitter Evidence</u>

12. Ms Smith for Terra Firma concurred with Ms Easton's rejection of Forest & Bird's submission (S560.0549) to prohibit new mining on conservation land and not referring to mineral extraction in the NOSZ overview. However, she suggested that mineral extraction should be referred to in the OSZ overview because it is anticipated in this zone.

13. Ms Hunter for Bathurst Group supported Ms Easton's recommendation on Forest & Bird's submission (S560.0549).

14. Mr Deavoll supported Ms Easton's recommendation to amend NOSZ-R4 to NOSZ-R6, reasoning that residential activities, temporary camping grounds, and retail activities in natural open space settings require resource consent scrutiny rather than relying on the scale limitations in NOSZ – R1. He also noted DoC's development and operational activities are often exempt from these rules under RMA section 4(3). Consequently, this change would only generate resource consent applications from third parties proposing such activities in the NOSZ.

15. On behalf of Ngāi Tahu, Ms Pull suggested the NOSZ Overview be amended as shown below to improve consistency and clarity relating to the EIT chapter:

Overview

…

Other relevant Te Tai o Poutini Plan provisions

…

- **<u>Energy, Infrastructure and Transport - The Energy, Infrastructure and Transport chapters contains rules in relation to energy, infrastructure or transport activities. The objectives and policies of this zone will be considered for any energy, infrastructure or transport activity that trigger resource consent.</u>**

16. Ms Pull supported Ms Easton's recommended amendment to NOSZ-R4 inserting an advice note stipulating the rule does not apply to Nohoanga Entitlements. However, she highlighted this recommendation has not been applied to other zones. Consequently, she suggested amending the definition for the terms "camping ground", "freedom camping", and "seasonal camping" by clarifying Nohoanga Entitlements are excluded from these definitions per her evidence for Introduction/ General Provisions Chapter and Ms Philippa Lynch's evidence on behalf of Ngāi Tahu for District Wide provisions and amending NOSZ-R12 to include camping ground activities not meeting restricted discretionary standards.

17. The Panel note that Ngāi Tahu did not submit or further submit on NOSZ-R12, although they did further submit on NOSZ-R4. In her planning evidence, Ms Pull highlighted that Ms Easton's recommended change to the activity status for NOSZ-R4 requires a consequential amendment to NOSZ-R12 so that it includes reference to "Camping Grounds and Temporary Camping

Grounds not meeting Permitted Activity Standards **and Camping Grounds not meeting restricted discretionary standards**.

18. Ms Pull supported the inclusion of Poutini Ngāi Tahu values in the matter of discretion for Restricted Discretionary Activities in the NOSZ to clarify that effects of a development or activity can be assessed from a cultural lens.

19. Lastly, Ms Pull indicated the terms "landscape measures" and "landscape treatment" in NOSZ-R4 to NOSZ-9 are unclear as found during the EIT hearing. Consequently, to improve clarity and consistency with the EIT she suggested amending the matter referencing "landscape measures" or "landscape treatment" in these rules with:

The effects of the proposal on the amenity, character and landscape values of the Zone.

20. Ms Inta suggested that paragraph 156 of Ms Easton's s42A Report (which relates to QLDC's submission on the NOSZ Overview) should be deleted. She did not understand this suggestion as Ms Easton's recommendations to the NOSZ Overview do not appear to repeat "Adjacent Local Authority Administration" concerns.

21. In response to Ms Easton's rejection of S552.164, Ms Inta suggested Ms Easton failed to recognise that LINZ lands are public lands, including many waterway and terrestrial environments much of which contains high natural, ecological, and landscape values. Consequently, Ms Inta indicated that these lands warrant at least a mention in the NOSZ Overview and would be easily mapped in GIS, similar to small DoC land parcels.

Reporting Officer Reply Evidence

22. Ms Easton indicated she did not support a 4.5m setback from the railway corridor for buildings in NOSZ as sought by KiwiRail and detailed by Ms Grinlinton-Hancock. She noted that a setback for buildings against the Natural Open Space Zone in the Buller Gorge was unnecessary as this entire location is only accessible from the rail corridor and the likelihood of any building is therefore negligible.

23. Ms Easton supported Ms Pull's suggested amendments to the NOSZ Overview relating to the EIT chapter being added to the '*other relevant Te Tai o Poutini Plan provisions*' section, considering this better represents the situation in relation to these activities.

24. Ms Easton clarified submissions on NOSZ – R16 were addressed in the MINZ s42A Report, not the OSRZ s42A Report. Consequently, she did not recommend any amendments to that rule, instead referring submitters and the TTPP Panel to the MINZ topic.

25. Further in her right of reply, Ms Easton:

(a) clarified the only rail corridor in the NOSZ was at Buller Gorge. She indicated this NOSZ area is only accessible from the rail corridor because the gorge separates it from the state highway. In their October 2024 right of reply, Ms Easton and Ms Belgrave agreed a 4.5m rail corridor setback is not necessary in the NOSZ because it is entirely vegetated and largely inaccessible in locations adjacent to the Reefton – Westport branch line. Therefore, they do not recommend amendments to NOSZ – R1 in relation to building setback.

(b) highlighted the s42A report Introduction and General Provisions proposed the term "camping grounds" be defined as:

means any area of land used, or designed or intended to be used, for rent, hire, donation, or otherwise for reward, for the purposes of placing or erecting on the land temporary living places for occupation by two or more facilities or parties (whether consisting of one or more persons) living independently of each other, whether or not such facilities or parties enjoy the use in common of entrances, water supplies, cookhouse, sanitary fixtures or other premises and equipment, and includes the use of permanent buildings for sleeping in such as cabins and motel accommodation ancillary to the camping ground.

(c) considered nohoanga were not captured by the "camping grounds" definition as they are not used for rent, hire, or reward. However, if fees or koha are paid / gifted for use, then nohoanga would be captured by this definition. Consequently, she indicated an exemption may be required. Therefore, she suggested clarifying this in the "camping grounds" definition by inserting "*For the avoidance of doubt nohoanga established under the Ngāi Tahu Claims Settlement Act should not be considered as camping grounds*" to the definition.

(d) did not consider there was scope in Ngāi Tahu's submissions to change OSRZ rules as sought by Ms Pull relating to "landscape measures".

(e) implied there was no scope in Ngāi Tahu's submissions to amend the NOSZ Overview by referring to the EIT chapter because they only made this submission on the EIT Chapter with no similar submission made on the OSRZ.

(f) considered combining several NOSZ Non-Complying Activity rules as a Clause 16 amendment. However, she did not believe a catch-all "*any activity not provided for in another rule*" Non-Complying Activity rule would satisfy Clause 16, as activities not listed in the pTTPP are currently Permitted but would become non-complying under the catch-all rule.

Hearing Panel's Evaluation

Definition of Camping Grounds

26. The Panel agree with Ms Easton addition to the end of the definition of camping grounds to clarify that nohoanga established under the Ngāi Tahu Claims Settlement Act should not be considered as camping grounds.

Overview

27. The Panel has considered the various submissions on the Natural Open Space Zone Overview, and we agree the reasoning and amendments proposed by Ms Easton and recommend they be included.

Whole of Chapter

28. The Panel agrees with Ms Easton's conclusions in relation to the Skyline Enterprises Limited's submission on providing for an Aerial Cableway in the Franz Josef Glacier/Ka Roimata o Hinehukatere Valley and we note that this matter has been addressed in more detail in the Special Purpose Zone recommendation.

29. The Panel does not support Forest and Birds submission to amend to purpose of the zone be amended to state that it includes all public conservation land. We agree with Ms Easton that

there is public conservation land where a Natural Open Space Zone identification is inappropriate.

Rules

30. In terms of NOSZ-R1, the Panel agree with the amendment proposed by Ms Easton and her reasoning to remove written approval from the rule and provide for it within an Advice Note.

31. The Panel agrees that rules NOSZ-R2 and NOSZ-R3 should remain unamended and not require the relevant activities to seeks consent as discretionary activities as sought by Forest and Bird. The activities concerned are appropriate to the NOSZ and are limited by NOSZ-R1 and we accept Ms Easton's reasoning in that regard and note that our conclusion also relates to the same Forest and Bird submission on NOSZ-R1.

32. Conversely, the Panel agree with Forest and Bird and Ms Easton that temporary camping grounds, retail activities and residential activities are not activities that would in all circumstances align with the functions and values of the NOSZ, and that a resource consent process is appropriate for these activities. We accept Ms Easton's contention that discretionary activity status is not necessary to protect the values of these natural open spaces and that a restricted discretionary activity status with targeted matters of discretion, as sought by the Director General, is a more appropriate response. We therefore recommend that rules NOSZ-R4, NOSZ-R5 and NOSZ-R6 be deleted as permitted activities and replaced as restricted discretionary activities.

33. The Panel notes at this point that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to '*landscape measures*' and '*landscape treatment*' have been removed from the matters of discretion and replaced with '*measures to mitigate landscape effects*'.

34. Regarding rules NOSZ–R7, NOSZ-R8 and NOSZ–R9, the Panel accepts the consequential amendments resulting from from Ngāi Tahu's submission (S620.015) on the Introduction and General Provisions. We also acknowledge the correction of the heading to Education Facilities in rule NOSZ-R9.

35. The Panel note that the remaining rules NOSZ-R10 to NOSZ-R17 are either supported or not submitted on apart from a Forest and Bird submission on NOSZ-R16 which is addressed in the Mineral Extraction recommendation. We note that we asked Ms Easton whether it would be possible to combine several of the non-complying activity rules as one catch all rule as a Clause 16 amendment. She did not consider that the creation of an "*any activity not provided for in another rule*" type catch all rule would meet the Clause 16 test. We acknowledge that NORZ-R17 is already a catch all rule, however we agree with submitters that such rules are better placed as discretionary, otherwise they are unnecessarily limiting in our view and could have unforeseen consequences. We note that such an amendment is proposed plan wide in relation to various submitters. In this case we rely on the submission of William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335) and Vance and Carol Boyd (S447.003) to provide the scope.

36. In relation to the remainder of the submissions on the NOSZ rules the Panel agree that these be rejected on the basis of the conclusions reached by Ms Easton.

Hearing Panel Recommendation

37. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommends the following changes to the definition of "**Camping Grounds**" and the **NOSZ Overview and Rules**:

Definitions - Ngā Tautuhinga	
Term	**Definition**
CAMPING GROUNDS	~~has the same meaning as the Camping Grounds Regulations 1985 (as set out below)~~ means any area of land used, or designed or intended to be used, for rent, hire, donation, or otherwise for reward, for the purposes of placing or erecting on the land temporary living places for occupation by two or more families or parties (whether consisting of one or more persons) living independently of each other, whether or not such facilities or parties enjoy the use in common of entrances, water supplies, cookhouse, sanitary fixtures or other premises and equipment, **and includes the use of permanent buildings for sleeping in such as cabins and motel accommodation ancillary to the camping ground.** **For the avoidance of doubt nohoanga established under the Ngāi Tahu Claims Settlement Act should not be considered as camping grounds.**[88]

NOSZ	**Natural Open Space Zone - Te Takiwā Pōaha Aotūroa**
Overview The purpose of the NOZ - Natural Open Space Zone is to recognise and provide for open spaces that contain high natural, ecological and landscape values. The zone also applies to a variety of parks and reserves, coastal and riverside esplanade reserves, scenic reserves, local purpose reserves and recreation reserves. This zone also applies to large areas of public conservation land – **specifically gazetted** national parks **and** scientific reserves, **as well as areas classified within the Department of Conservation reserve classification system as** ~~wilderness areas,~~ **Wildlife Management Areas and** ~~s~~**S**pecially ~~p~~**P**rotected ~~a~~**A**reas ~~and important ecological areas~~[89]. Natural Open Space has a high degree of biodiversity requiring recognition, protection, maintenance and/or enhancement. These are spaces that the community value and areas where people can relax and enjoy recreation and leisure activities such as walking and cycling, fishing, picnicking, and boating. Some of these spaces are used for cultural and customary activities, such as gathering mahinga kai, and are rich in historic heritage and cultural heritage values.	

[88] Ngai Tahu (FS41.140)
[89] Ms Katherine Gilbert (S473.013)

A low level of development and built form is anticipated within this zone to retain the natural/ biodiversity values within the natural open space areas.

Activities and uses on publicly owned land are required to obtain permission (such as a lease or a licence) from the relevant administering authority. This is in addition to any requirements under Te Tai o Poutini Plan and the RMA. All activities will also **need to be consistent with** ~~have regard to~~[90] any relevant reserve management plans, national park management plans or national legislation (Reserves Act 1977 or Conservation Act 1987).

Other Relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the zone chapters, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for certain activities within the Natural Open Space Zones.

- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters - there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Natural Open Space Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.**

- **Natural Hazards - natural hazards are widespread on the coast and in some locations natural hazard overlays may affect areas in the Natural Open Space Zone. Information on natural hazard overlays and provisions can be found in the natural hazards chapter.**

- **Ecosystems and Biodiversity – As areas of high ecological value, the provisions of the Ecosystems and Biodiversity chapter are particularly relevant to the Natural Open Space Zone. The Ecosystems and Biodiversity chapter contains the provisions around the management of indigenous vegetation.**

- **Natural Features and Landscape -many areas of outstanding natural features or outstanding natural landscape will be located within the Natural Open Space Zone. The Natural Features and Landscape chapter contains the provisions for building and earthworks within areas of outstanding natural features and outstanding natural landscapes.**

- **Natural Character and the Margins of Waterbodies -in some locations areas of Natural Open Space Zone may extend into the riparian margins of waterbodies. The Natural Character and the Margins of Waterbodies chapter contains provisions on how these areas must be managed.**

- **Coastal Environment - where activities occur within the coastal environment, including areas of high or outstanding coastal natural character, the Coastal Environment chapter contains provisions for activities within these areas.**

- **General District Wide Matters - provisions in relation to noise, light and signs in particular may be relevant to activities in the Natural Open Space Zone.**[91]

Adjacent Local Authority Administration

[90] Forest & Bird (S560.0548)
[91] Forest & Bird (S560.0553 and S560.351) and Ngāi Tahu (S620.214)

Lands within the Natural Open Space Zone adjoin a number of other territorial authority boundaries not managed by Te Tai o Poutini Plan. Plan users need to apply care in regard to any potential cross boundary resource management issues and check the relevant District Plans of adjacent Territorial Authorities when considering activities on the edges of the Te Tai o Poutini Plan planning area.[92]
NOSZ - Natural Open Space Zone Rules
Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.
Permitted Activities

NOSZ - R1	**Park Facilities and Park Furniture**
Activity Status Permitted Where: 1. The maximum building height above ground level is 5m; 2. Masts, poles, aerials and pou whenua must not exceed 7m in height; 3. The maximum gross floor area is 100m^2; 4. Buildings are setback a minimum 4.5m from road boundaries; and No building shall project beyond a building envelope defined by a recession plane as outlined in Appendix Two to commence 2.5m above any RESZ - Residential Zone or SETZ - Settlement Zone boundary ~~except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~[93]. This standard does not apply to: i. Road boundaries; ii. Buildings on adjoining sites that have a common wall along the boundary; iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard; iv. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not	**Activity status where compliance not achieved:** Restricted Discretionary

[92] QLDC (S523.002)
[93] BDC (S538.385)

exceed the recession plane by more than 3m vertically; and v. Solar panels and solar water heaters provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically. **Advice Note:** 1. **Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.**[94]	
NOSZ – R2	**Educational Facilities and Research Facilities Ancillary to a Conservation Activity or a Recreation Activity**
Activity Status Permitted Where: 1. All performance standards for Rule NOSZ - R1 are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
NOSZ – R3	**Conservation Activities, Recreation Activities and Poutini Ngāi Tahu Activities**
Activity Status Permitted **Where:** **1.** All performance standards for Rule NOSZ - R1 are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
~~**NOSZ – R4**~~	~~**Temporary Camping Grounds**~~
~~**Activity Status Permitted**~~ ~~Where:~~ ~~1. Written notification to the Council of the activity is provided at least 10 working days prior to the activity commencing; and~~ ~~2. Camping activity is restricted to 10 days per calendar year.~~ ~~**Advice Note:**~~ ~~1. Temporary Camping Grounds may also be required to comply with the Camping Ground Regulations 1985 administered by the relevant District Council.~~ ~~2. Where activities are located in Overlay Chapter Areas the relevant provisions also apply.~~	~~**Activity status where compliance not achieved:** N/A~~[95]

[94] BDC (S538.385)
[95] Forest & Bird (S560.355) and Director General (S602.193)

~~**NOSZ – R5**~~	~~**Residential Activities**~~	
~~**Activity Status Permitted**~~ ~~Where:~~ ~~1. This is ancillary to a conservation activity or recreation activity;~~ ~~2. The activity has a functional or operational need to locate in a NOSZ - Natural Open Space Zone; and~~ ~~**3.** All performance standards for Rule NOSZ - R1 are complied with.~~		~~**Activity status where compliance not achieved:** Discretionary~~[96]
~~**NOSZ – R6**~~	~~**Retail Activities**~~	
~~**Activity Status Permitted**~~ ~~Where:~~ ~~1. This is ancillary to a recreation activity or a conservation activity; and~~ ~~2. Performance Standards for Rule NOSZ - R1 are complied with.~~		~~**Activity status where compliance not achieved:** Discretionary~~[97]
Restricted Discretionary Activities		
NOSZ – R4	**Temporary Camping Grounds**	
Activity Status Restricted Discretionary **Where:** **1. Camping activity is restricted to 10 days per calendar year.** **Discretion is Restricted to:** **a. Design, position and location of any buildings or structures;** **b. Measures to mitigate landscape effects;**[98] **c. Vehicle access and parking design and location; and** **d. Management of effects on natural character, landscape, historical values, Poutini Ngāi Tahu values,**[99] **and biodiversity values.** **Advice Note:** **1. Temporary Camping Grounds may also be required to comply with the Camping Ground Regulations 1985 administered by the relevant District Council.**		**Activity status where compliance not achieved: Discretionary**[100]

[96] Forest and Bird (S560.356) and Director General (S602.207)

[99] Ngāi Tahu (S620.015)
[100] Forest & Bird (S560.355) and Director General (S602.193)

2. Where activities are located in Overlay Chapter Areas the relevant provisions also apply. **3. This rule does not apply to nohoanga entitlements granted to Poutini Ngāi Tahu as part of the Ngāi Tahu Treaty Settlement Act. Nohoanga entitlements are regulated under Rule NOSZ – R3 as part of Poutini Ngāi Tahu Activities.**	
NOSZ - R5	**Residential Activities**
Activity Status Restricted Discretionary **Where:** **1. This is ancillary to a conservation activity or recreation activity;** **2. The activity has a functional or operational need to locate in a NOSZ - Natural Open Space Zone; and** **3. All performance standards for Rule NOSZ - R1 are complied with.** **Discretion is Restricted to:** **a. Design, position and location of any buildings or structures;** **b. Measures to mitigate landscape effects;**[101] **c. Vehicle access and parking design and location; and** **d. Management of effects on natural character, landscape, historical values, Poutini Ngāi Tahu values,**[102] **and biodiversity values.**	**Activity status where compliance not achieved: Discretionary**[103]
NOSZ - R6	**Retail Activities**
Activity Status Restricted Discretionary **Where:** **1. This is ancillary to a conservation activity or a recreation activity; and** **2. All performance Standards for Rule NOSZ - R1 are complied with.** **Discretion is Restricted to:** **a. Design, position and location of any buildings or structures;** **b. Measures to mitigate landscape effects;**[104] **c. Vehicle access and parking design and location; and**	**Activity status where compliance not achieved: Discretionary**[106]

8. OPEN SPACE ZONE CHAPTER

Submissions and Further Submissions

38. 10 submission points and one further submission point[116] received on the **OSZ Chapter as a whole** were summarised in a Table on pages 57 to 58 of the s42A Report. Nine submission points sought to amend OSZ provisions, with GDC's submission opposed by Ngāi Tahu. The tenth submission point was neutral.

39. Seven submission points and one further submission point[117] received on the **OSZ Overview** were summarised in a Table on pages 58 to 59 of the s42A Report. Six submission points sought an amendment to the overview section. One submission point supported in part the overview section, seeking an amendment, with this being opposed by the further submission.

40. Two submission points[118] received on multiple **OSZ Rules** were summarised in a Table on page 59 of the s42A Report. One submission point opposed specific rules as notified, while the other submission supported the rules as notified.

41. Six submission points[119] received on **OSZ – R1** were summarised in a Table on pages 59 to 61 of the s42A Report. One submission point supported the rule as notified, while three submission points supported in part the rule with amendments sought. One submission point

[115] William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335) and Vance and Carol Boyd (S447.003)
[116] Ms Laura Coll McLaughlin (S574.338, S574.339 and S574.341), Mr William McLaughlin (S567.398 to S567.400), Mr Chris & Ms Jan Coll (S558.339), Chris J Coll Surveying Limited (S566.339), GDC (S608.095), Ngāi Tahu (FS41.026), and Director General (S602.219)
[117] Forest & Bird (S560.360, S560.0589, and S560.0590), WMS (S599.102), Director General (S602.00240), QLDC (S523.003), Manawa Energy (S438.135), and Ngāi Tahu (FS41.144)
[118] Mr Murray Stewart (S217.001) and RNZ (S476.034)
[119] Te Mana Ora (S190.636), the Findlays (S605.016), Waka Kotahi (S450.197), GDC (S608.690), BDC (S538.387), and RNZ (S476.033)

opposed the rule as notified, while one submission point opposed in part the rule with amendments sought.

42. Two submission points[120] received on **OSZ – R2** were summarised in a Table on page 61 of the s42A Report, both supported the rule as notified.

43. Two submission points[121] received on **OSZ – R3** were summarised in a Table on pages 61 and 62 of the s42A Report. The rule as notified was supported by one submission point but opposed by the other.

44. Three submission points[122] received on **OSZ – R4** were summarised in a Table on page 62 of the s42A Report. The rule as notified was supported by one submission point but opposed by the other two submission points.

45. Three submission points[123] received on **OSZ – R5** were summarised in a Table on page 62 of the s42A Report. The rule as notified was supported by two submission points but opposed by the third submission point.

46. Two submission points[124] received on **OSZ – R6** were summarised in a Table on page 62 of the s42A Report. One submission point supported the rule as notified, while the second sought an amendment to the rule.

47. One submission point[125] received on **OSZ – R7** was summarised in a Table on pages 62 and 63 of the s42A Report, which supported the rule as notified.

48. One submission point[126] received on **OSZ – R8** was summarised in a Table on page 63 of the s42A Report, which supported the rule as notified.

49. Three submission points[127] received on **OSZ – R9** were summarised in a Table on page 63 of the s42A Report. Two submission points supported the rule as notified, while the third submission point opposed in part the rule.

50. Two submission points[128] received on **OSZ – R10** were summarised in a Table on page 63 of the s42A Report. One submission point supported the rule as notified, while the other opposed in part the rule.

51. One submission point[129] received on **OSZ – R11** was summarised in a Table on page 63 of the s42A Report, which supported the rule as notified.

52. Four submission points and one further submission point[130] received on **OSZ – R12** were summarised in a Table on pages 63 and 64 of the s42A Report. Three submission points sought an amendment to the rule, with the Director General's submission opposed by the further submission. The fourth submission point opposed the rule as notified.

[120] Ngāi Tahu (S620.216) and Te Mana Ora (S190.637)
[121] Te Mana Ora (S190.638) and the Findlays (S605.017)
[122] Te Mana Ora (S190.639), the Findlays (S605.018), and BDC (S538.388)
[123] Te Mana Ora (S190.640), MoE (S456.026), the Findlays (S605.019)
[124] Te Mana Ora (S190.641) and NZMCA (S490.009)
[125] Te Mana Ora (S190.642)
[126] Te Mana Ora (S190.643)
[127] Te Mana Ora (S190.644), the Findlays (S605.020), and Waka Kotahi (S450.198)
[128] Te Mana Ora (S190.645) and GDC (S608.691)
[129] Te Mana Ora (S190.646)
[130] Te Mana Ora (S190.647), Director General (S602.199 and S602.213), GDC (FS1.374), and Forest & Bird (S560.364 and S560.0601)

53. Three submission points[131] received on **OSZ – R13** were summarised in a Table on pages 64 and 65 of the s42A Report. Two submission points supported the rule as notified, while the third sought an amendment.

54. Two submission points[132] received on **OSZ – R14** were summarised in a Table on page 65 of the s42A Report, both supported the rule as notified.

55. Two submission points[133] received on **OSZ – R15** were summarised in a Table on page 65 of the s42A Report. One submission point supported the rule as notified, while the other sought an amendment.

56. One submission point[134] received on **OSZ – R16** was summarised in a Table on page 65 of the s42A Report, which supported the rule as notified.

57. One submission point[135] received on **OSZ – R17** was summarised in a Table on page 65 of the s42A Report, which supported the rule as notified.

58. One submission point[136] received on **OSZ – R18** was summarised in a Table on pages 65 and 66 of the s42A Report, which supported the rule as notified.

59. One submission point[137] received on **OSZ – R20** was summarised in a Table on page 66 of the s42A Report, which supported the rule as notified.

60. Two submission points[138] received on **OSZ – R21** were summarised in a Table on page 66 of the s42A Report. The rule as notified was supported by one submission but opposed by the other.

61. One submission point[139] received on **OSZ – R23** was summarised in a Table on page 66 of the s42A Report, which supported the rule as notified.

62. One submission point[140] received on **OSZ – R24** was summarised in a Table on page 66 of the s42A Report, which supported the rule as notified.

63. Two submission points[141] received on **OSZ – R25** were summarised in a Table on page 66 of the s42A Report. The rule as notified was supported by one submission but opposed by the other with an amendment sought.

64. One submission point and one further submission point were summarised in a Table on page 67 of the s42A Report for **OSZ – R26**. However, the further submission point is an error (i.e., template content) so the correct count is one submission point[142] received on **OSZ – R26**. The submission point supported the rule as notified.

[131] Te Mana Ora (S190.648), Waka Kotahi (S450.199), and Director General (S602.214)
[132] Te Mana Ora (S190.649) and MoE (S456.027)

[142] Te Mana Ora (S190.661)

65. We adopt the summary of these submissions detailed in the s42A Report, and we have considered all of the relevant submissions.

Section 42A Report

OSZ Whole Chapter

66. Ms Easton recommended rejecting the submissions from:

(a) Ms Coll McLaughlin (S574.338, S574.339, and S574.341), Mr McLaughlin (S567.398 to S567.400), Mr & Ms Coll (S558.339), and Chris J Coll Surveying Limited (S566.339), Reasoning a change of use or activity can mean that existing non-compliance actually aggravates adverse effects particularly in relation to amenity Issues

(b) GDC (S608.095) as she was unsupportive of removing all references to "Site or Area of Significance to Māori" in the OSZ Chapter. She emphasised that the substantive issues around the merits of Sites and Areas of Significance to Māori are addressed in the s42A report for that topic.

OSZ Overview

67. Ms Easton recommended accepting the submissions from:

(a) Forest & Bird (S560.360) supporting the relevant chapters being listed in the overview section, and the addition of the ECO, NFL, and CE chapters as they were omitted in error. Consequently, she recommended the OSZ overview be amended similarly to the NOSZ overview. This also links to Forest & Bird's submission on the OSRZ overview (S560.0553).

(b) Forest and Bird (S560.0589) sought to amend the Overview to specify Historic Reserves land fall within the zone

(c) WMS (S599.102), regarding inserting a missing "are" which corrects a typographic error;

(d) Forest & Bird (S560.0590), reasoning that the amendments sought are a requirement of the National Parks Act;

(e) The Director General (S602.00240), reasoning that '*concession*' is commonly used for managing activities on public conservation land;

(f) QLDC (S523.003) seeking to amend the overview section to clarify that OSZ land often adjoins other territorial authority boundaries not managed by the pTTPP, so care needs to be applied regarding any potential cross boundary resource management issues; and

(g) Manawa (S438.135), reasoning the amendment sought would be helpful to pTTPP users and it reflects how the pTTPP works, but she recommended widening the advice by explaining the relationship with the Energy, Infrastructure and Transport Chapters.

68. Consequently, Ms Easton recommended the following amendments to the OSZ overview:

Overview

…

The zone includes civic spaces, land with community facilities, cemeteries, campgrounds and nohoanga sites. Historic reserves and large areas of public conservation land fall within this zone. Grazing is sometimes undertaken within these areas for land management purposes. This zone includes areas that may also be used for a range of local purpose uses - for example municipal buildings, water supply, gravel reserves, quarries, campgrounds and cemeteries. In some cases they **are** also the locations for quarrying and mineral extraction before the land is remediated for other open space uses.

These public open spaces are generally more open, with less built features and contribute to an attractive living environment for people on the West Coast/Te Tai o Poutini. They can also have important natural, cultural and historic heritage values.

Activities and uses on publicly owned land are required to obtain permission (such as a lease**,** ~~or a~~ licence **or concession**) from the relevant administering authority. This is in addition to any requirements under Te Tai o Poutini Plan and the RMA. All activities will also **need to be consistent with** ~~have regard to~~ any relevant reserve management plans and legislation (Reserves Act 1977 or Conservation Act 1987).

Relationship With Energy, Infrastructure and Transport provisions

The ENG Energy chapter contains rules applying to energy activities and renewable electricity generation activities throughout the district, and accordingly the rules in this chapter do not apply to these activities.

Similarly, the INF Infrastructure chapter contains rules applying to specified infrastructure such as telecommunications, wastewater, stormwater and water supply installations, pipelines and meteorological facilities and accordingly the rules in this chapter do not apply to those activities.

The TRN Transport chapter contains the rules around the development of the transport network and the performance standards that apply for construction of these facilities and accordingly the rules in this chapter do not apply to those activities. There are rules in relation to the establishment of carparking and vehicle access within the Open Space Zone however, and this relates to these facilities being developed to support the activities associated with the use of the open space, on the lands within the zone.

Other relevant Te Tai o Poutini Plan provisions

- **Ecosystems and Biodiversity – As areas of high ecological value, the provisions of the Ecosystems and Biodiversity chapter are particularly relevant to the Natural Open Space Zone. The Ecosystems and Biodiversity chapter contains the provisions around the management of indigenous vegetation.**

- **Natural Features and Landscape -many areas of outstanding natural features or outstanding natural landscape will be located within the Open Space Zone. The Natural Features and Landscape chapter contains the provisions for building and earthworks within areas of outstanding natural features and outstanding natural landscapes.**

- **Natural Character and the Margins of Waterbodies** -in some locations areas of Sport and Recreation Zone may extend into the riparian margins of waterbodies. The

Natural Character and the Margins of Waterbodies chapter contains provisions on how these areas must be managed.

- **Coastal Environment - where activities occur within the coastal environment, including areas of high or outstanding coastal natural character, the Coastal Environment chapter contains provisions for activities within these areas…**

Multiple OSZ rules

69. Ms Easton noted the support from RNZ (S476.034) on the proposed rules.

70. Ms Easton recommended rejecting the submission from Murray Stewart (S217.001) to increase the permitted gross floor area to 110m^2 to enable a 9 x 12 three bay shed, reasoning that buildings and structures are to be kept to a minimum size in order to retain the amenity and natural values associated with the open space purpose.

Permitted Activities – Rules OSZ – R1 to OSZ – R12

71. Ms Easton noted the support from Te Mana Ora (S190.636 to S190.646), Ngāi Tahu (S620.216), MoE (S456.026), and NZMCA (S490.009) on specific rules.

72. She recommended rejecting the submissions from:

(a) GDC (S608.690 and S608.691) having discussed the matter further with the planning team at GDC and confirmed they are happy with the current drafting approach and structure of the rules in the Plan.

(b) Waka Kotahi (S450.197) on the basis that the zone chapters have all been developed using the same template and framework, without separate tables of performance standards and this is not a requirement of the national planning standards

(c) The Findlays (S605.019), where she considered that education and research facilities are not normally designated "local purposes" under the Reserves Act so they may not have OSMPs. Ms Easton emphasised that while education and research facilities may be appropriate in the OSZ, they are not generally expected to be a Permitted Activity as they can have significant amenity effects. Consequently, she considered neighbours would expect to have amenity effects assessed before such a facility is approved. Ms Easton's indicated her reasoning is consistent with how education facilities are managed in other zones. She noted the rule framework is drafted to possibly apply a more permissive approach where an OSMP exists because the public consultation process of preparing such a plan would work through these issues;

(d) Te Mana Ora (S190.657), reasoning the effects management hierarchy is not suitable for a Permitted Activity, where no effects assessment is undertaken;

(e) The Findlays (S605.021), reasoning that commercial activities, except if ancillary to recreational and conservation activities, are not consistent with the OSZ purpose;

(f) Forest & Bird (S560.384 and 560.0601), reasoning that not all OSZ land is covered in indigenous vegetation, and agricultural activities can be appropriate in the OSZ. However, Ms Easton considered Forest & Bird's underlying concerns are partly addressed through the recommendations on the Director General's submission detailed below; and

(g) The Findlays (S605.020), reasoning that vehicle access and carparking should only be established where supporting the open space function, opposed to being for general carparking or access to private land for other purposes, hence the reference to an OSMP. Ms Easton highlighted that most OSZ land is unlikely to have an OSMP, and a resource consent process for all parking and vehicle access could be onerous. Consequently, she recommended an amendment to standard 1 of OSZ – R9 requiring the parking and vehicle access to be ancillary to conservation activity, a recreation activity, or a camping ground, similar to Rule OSZ – R7 and OSZ – R8.

73. She recommended accepting the submissions from:

(a) BDC (S538.387) to delete the reference to neighbour's written approval in the wording of the recession plane standard in Rule NOSZ – R1 and that instead an Advice Note be inserted that refers to the Deemed Permitted process as set out in the RMA;

(b) The Findlays (S605.016), reasoning that not linking the '*maximum gross floor area*' requirement to '*per building*' is a drafting error;

(c) The Findlays (S605.017) as she considered it appropriate for local purpose (community facility) reserves and recreation reserves (which often have community facilities) in the OSZ being a Permitted Activity. Ms Easton considered that these activities will generally be located in the OSZ, and therefore community facilities to largely be anticipated in OSZ. Additionally, she emphasised most OSZ lands will not have an OSMP. Lastly, Ms Easton noted that this approach would be consistent with the pTTPP, noting that a community facility in the General Residential Zone is a Permitted Activity, as are community halls in the General Rural, both subject to specific standards;

(d) The Findlays (S605.018) and BDC (S538.388), reasoning that 'clubrooms' permitted by NOSZ – R4 is just a type of community facility and can be covered by OSZ–R3;

(e) The Director General (S602.215 and S602.217), reasoning residential activities would be inconsistent with the OSZ purpose in most circumstances; and

(f) The Director General (S602.214), where she considered that a Controlled Activity may not be appropriate for managing all potential adverse effects of parks facilities and parks furniture not meeting Permitted Activity standards. She emphasised that there is no upper limit on the height or scale of such facilities.

74. She recommended accepting in part the submission from:

(a) RNZ (S476.033), considering a notification clause being an appropriate response for activities listed in OSZ – R13 and OSZ – R14 with a height of 18m or more, as these activities are most likely to be flag poles, sculptures or pou whenua, or tall meteorological or other monitoring equipment. However, she considered it unnecessary to: change the 7m height limit in OSZ – R1; and add a notification clause to the rules managing buildings because it would be very unlikely for a six-storey building (18m) to be developed in the Cape Foulwind Recreation Reserve site or adjacent esplanade reserves; and

(b) The Director General (S602.199 and 602.213), considering that the storage, treatment and disposal of solid and liquid animal waste is not an appropriate Permitted Activity in the OSZ. However, she did not support excluding rural research or farm quarries for two reasons. Firstly, some OSZ land may be local purpose reserves where a quarry purpose is provided for, instead she considered these activities should be allowed in OSZ – R12.

Secondly, rural research could be an appropriate activity. Additionally, Ms Easton was unsupportive of the proposed "*All other rules and standards, including within Overlay Areas are met*" amendment, considering this fairly vague when greater specificity is needed. However, to address the Director General's concerns, she recommended amending OSZ – R12 by inserting a new standard reading "*The activity does not involve indigenous vegetation clearance or new agriculture, horticultural or pastoral activities occurring within areas identified in Schedules 1 – 8*".

75. As noted above Ms Easton recommended amendments to Rule OSZ – R1 to OSZ – R8 (noting OSZ- R4 is to be deleted) and Rules OSZ – R10 and OSZ – R11 (as notified) to refer to the Rifle Range Protection Area.

76. Ms Easton recommended amendments to OSZ – R16 to OSZ – R18 and OSZ – R20 to include Poutini Ngāi Tahu values. This stems from the generic submission by Ngāi Tahu (S620.015) to include as a matter of control or a discretion with all zones chapters effects on Poutini Ngāi Tahu values. Ngāi Tahu content that as currently structured many rules within the zone chapters would not enable the effects on Poutini Ngāi Tahu values to be considered as a matter of control or discretion which could have unintended consequences to Poutini Ngāi Tahu and their relationship with their land, traditions, wai etc.

OSZ - R16 Retail Activities not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Where:

…

Discretion is restricted to:

…

f. Management of effects on natural character, landscape, historical **values, Poutini Ngāi Tahu** values, ecological and biodiversity values …

OSZ - R17 Vehicle Access and Carparking not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Discretion is restricted to:

…

e. Management of effects on natural character, landscape, historical **values, Poutini Ngāi Tahu** values, ecological and biodiversity values …

OSZ - R18 Cemeteries and Urupā not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Discretion is restricted to:

…

a. Management of effects on natural character, landscape, historical **values, Poutini Ngāi Tahu** values and biodiversity values …

OSZ - R20 Agricultural, Horticultural and Pastoral Activities not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

…

Discretion is restricted to:

…

e. Management of effects on natural character, landscape, historical **values, Poutini Ngāi Tahu** values, ecological and biodiversity values …

Submitter Correspondence

77. In her correspondence on behalf of the MoE, Ms Williams indicated the MoE does not oppose Ms Easton's recommended amendments to OSZ-R5 and OSZ-R14, nor the other OSRZ and OSZ provisions.

78. Ms Grinlinton-Hancock indicated KiwiRail requested amendments to Ms Easton's recommended OSZ-R1, OSZ-R13 to OSZ-R16, and OSZ-R20 as shown in italics below. The purpose for these amendments is to appropriately manage the health and safety of communities and ensure the ongoing operation of KiwiRail's network as nationally and regionally significant infrastructure.

OSZ - R1 Park Facilities and Park Furniture

Activity Status Permitted

Where:

…

h. The safe and efficient operation of the rail network.

79. In their memorandum of counsel on behalf of RNZ, Messrs Williams and Pedler emphasised support for Ms Easton's recommendations for OSZ-R13 and OSZ-R14 but indicated preference for a "broad requirement that applies to *all* structures within 1km of the [Cape Foulwind] transmitter".

Hearing and Submitter Evidence

80. In her planning evidence, Ms Styles agreed with Ms Easton's recommended amendments to the OSZ overview in response to Manawa's submission (S438.135). She highlighted the term '*energy activities*' was recommended to be removed from the pTTPP in other hearings and requested the Panel apply a consistent approach for the OSZ provisions.

81. Mr Pemberton raised concern regarding recommended amendments to OSZ-R19 and associated reasoning which the Director General had submitted on seeking discretionary status. He acknowledged that this rule was assessed in the Mineral Extraction hearing (which DoC had not attended) and noted that the reporting officer recommended OSZ-R19 to be discretionary, but no assessment matters were included or any reference to activities not occurring in certain places such as ONLs or SNAs as per the provision as notified. He suggested this rule does not reflect the ecological bottom lines for mining activities stipulated by the WCRPS, nor give effect to the WCRPS. Mr Pemberton highlighted this matter may be addressed in the ECO chapter, and, if so, the Director General will speak to those provisions. The Panel notes that OSZ–R19 and OSZ–R22 are addressed in the Mineral Extraction recommendation.

82. Ms Pull supported the inclusion of Poutini Ngāi Tahu values in the matters of discretion for OSZ-R18 and OSZ-R19 as the activities provided for in these rules could potentially impact Poutini Ngāi Tahu values. However, she suggested Poutini Ngāi Tahu values were an unnecessary consideration for the other OSZ provisions. She reasoned that this was because she was unable to conclude that a feasible activity creating a rule breach beyond the permitted baseline would have a more than minor effect on Poutini Ngāi Tahu values not already protected by the SASM overlay. Consequently, Ms Pull indicated removing 'Poutini Ngāi Tahu values' from rules:

OSZ-R13 Park Facilities and Furniture

OSZ-R14 Recreational activities et al…

OSZ-R15 Residential Activities

OSZ-R16 Retail Activities

OSZ-R17 Vehicle Access and Carparking

OSZ-R20 Agricultural, Horticultural and Pastoral Activities

83. Additionally, Ms Pull suggested amending OSZ-13 to OSZ-20 by replacing '*landscape measures*' in these rules with:

The effects of the proposal on the amenity, character and landscape values of the Zone.

84. Ms Pull suggested SASM be deleted from OSZ-R19 to remove duplication as mineral extraction activities within the Pounamu and Aotea overlay are addressed by the SASM rules. She indicated retaining the advice note in OSZ-R19 but expand to refer the reader to both SASM-R7 and SASM-R11 for mineral extraction activities within the Pounamu and Aotea overlay.

85. Ms Pull highlighted below the amendment Ngāi Tahu sought to OSZ-R19 to include a reference to the accidental discovery protocol was not addressed in the s42A report. However, she indicated retaining the '*historical and cultural heritage requirements*' matter of discretion in the rule will provide additional clarity in how to consider potential effects on these matters. Again, the Panel notes this provision was addressed in the Mineral Extraction recommendation.

OSZ - R19 Mineral Extraction Activities and Mineral Prospecting and Exploration not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Where:

1. The activity does not occur within an Outstanding Natural Landscape, Outstanding Natural Feature, a Historic Heritage site, ~~a Site or Area of Significance to Māori,~~ a Significant Natural Area or an area of High or Outstanding Coastal Natural Character [refer to the relevant Overlay Chapter rules in relation to activities in these areas]

Discretion is restricted to:

…

f. **Poutini Ngāi Tahu values and** Historic ~~and cultural~~ heritage requirements; **including any accidental discovery protocol requirements;**

…

Advice Note: Refer to Rule**s** SASM - R7 **and SASM-R15** in the Sites of Significance to Māori Chapter where mineral extraction is proposed within the Aotea or Pounamu Management Area **or SASM** Overlays.

86. Ms Pull raised concerns with Ms Easton's recommended amendment to the OSZ Overview relating to energy, infrastructure, and transport activities being exempt from OSZ provisions. She highlighted this interpretation is not applied to NOSZ or SARZ, or elsewhere in the pTTPP. Additionally, Ms Pull emphasised the Planning Standards state zone chapters must include cross references to the relevant energy, infrastructure, and transport provisions, but considered this does not exempt energy, infrastructure, and transport activities from OSZ provisions. Consequently, Ms Pull suggested the OSZ Overview be amended as shown below, including removing Ms Easton's recommended amendment relating to the EIT provisions, to improve consistency and clarity.

Overview

…

~~**Relationship With Energy, Infrastructure and Transport provisions**~~

~~The ENG Energy chapter contains rules applying to energy activities and renewable electricity generation activities throughout the district, and accordingly the rules in this chapter do not apply to these activities.~~

~~Similarly, the INF Infrastructure chapter contains rules applying to specified infrastructure such as telecommunications, wastewater, stormwater and water supply installations, pipelines and meteorological facilities and accordingly the rules in this chapter do not apply to those activities.~~

~~The TRN Transport chapter contains the rules around the development of the transport network and the performance standards that apply for construction of these facilities and accordingly the rules in this chapter do not apply to those activities. There are rules in relation to the establishment of carparking and vehicle access within the Open Space Zone however, and this relates to these facilities being developed to support the activities associated with the use of the open space, on the lands within the zone.~~

Other relevant Te Tai o Poutini Plan provisions

…

- **Energy, Infrastructure and Transport - The Energy, Infrastructure and Transport chapters contains rules in relation to energy, infrastructure or transport activities. The objectives and policies of this zone will be considered for any energy, infrastructure or transport activity that trigger resource consent.**

87. In her statement, Ms Inta commented on OSZ – R11. (The Panel note that neither Ms Inta nor BCG submitted or further submitted on this rule.) She suggested a drafting error with "Where" omitted from the start of clause 3. However, the Panel notes the list (i.e., clauses [1] to [5]) start from the term "Where".

88. Ms Inta also suggested the advice note for OSZ – R11 should also refer to the MINZ provisions and she indicated that OSZ–R11 differs to the similar MINZ provisions.

Reporting Officer Reply Evidence

89. Ms Easton clarified submissions on OSZ–R11, OSZ–R19 and OSZ–R22 were addressed in the MINZ s42A Report, not the OSRZ s42A Report. Consequently, she did not recommend any amendments to those rules, instead referring submitters and the TTPP Panel to the MINZ topic.

90. In her right of reply, Ms Easton:

(a) highlighted there are several locations where the rail corridor is in the OSZ i.e., Kumara Junction area, Taramakau River, Gladstone, Greymouth, Taylorville, Ikamatua, Arnold Valley, Moana, Te Kinga, Jacksons, Reefton, Inangahua, Buller Gorge, Westport, Waimangaroa. Consequently, she supported a 4.5m setback for buildings and structures in the OSZ through amendment to OSZ-R1(3)(i).

(b) supported adding '*the safe and efficient operation of the rail corridor*' as an additional matter of discretion to OSZ-R13.

(c) clarified there is scope to change OSZ rules as sought by Ms Pull through Ngāi Tahu's submission (S620.015). Ms Easton supported Ms Pulls' amendments relating to Poutini Ngāi Tahu values, agreeing with her rationale.

(d) did not consider there was scope in the Ngāi Tahu submissions to change OSRZ rules as sought by Ms Pull relating to '*landscape measures*'.

(e) Agreed with QLDC's submission (S523.003) to include an amendment relating to territorial boundaries in the OSZ Overview which was not shown in the original s42A report or Appendix 1 as follows:

> **Land included within the Open Space and Recreation Zones adjoins a number of other territorial authority boundaries not managed by Te Tai o Poutini Plan. When considering activities close to territorial authority boundaries, plan users need to apply care with regard to managing any potential cross boundary resource management issue.**

91. In their October 2024 right of reply, Ms Easton and Ms Belgrave:

(a) agreed the 4.5m rail corridor setback is generally appropriate in the OSZ, being consistent with roading setbacks and recognising the zone's low development expectation and open character.

(b) recommended this setback apply to "buildings" only in the Open Space Zone and Recreation Zones, considering this would mean in a rural zone a stockwater trough could not be placed in the setback if this zone were included.

(c) suggested amending OSZ-R1 and OSZ-R13 from that notified as detailed below:

OSZ - R1 Park Facilities and Park Furniture

Activity Status Permitted

Where:

…

c. Buildings are setback:

i. 4.5m from the road **and railway corridor** boundary; and

ii. 3m from any RESZ - Residential Zone or SETZ - Settlement Zone boundary.

…

OSZ - R13 Park Facilities and Park Furniture not meeting Rule OSZ - R1

Activity Status Controlled

Matters of control are:

…

c. Vehicle access and parking design and location; ~~and~~

d. Management of effects on natural character, landscape, historical and cultural values, ecological and biodiversity values**; and**

e. **the safe and efficient operation of the rail corridor**.

…

Hearing Panel's Evaluation

92. The Panel acknowledge that rules OSZ–R11, OSZ–R19 and OSZ–R22 have been addressed in the MINZ recommendations. The amendments from that recommendation are shown below.

93. The Panel has considered the various changes proposed to the Overview and we agree with amendments now proposed and the reasoning provided by Ms Easton and that of Ms Pull and Ms Styles. While we acknowledge Ms Styles comments regarding Energy Activity, we note that we have recommended in the Energy Chapter retaining the definition of '*Energy Activity*' unamended. We have also included some corrections to the Overview under Clause 16(2) of the RMA.

94. The Panel accept the inclusion of a setback for buildings only from the rail designation in OSZ-R1(3) and we acknowledge the need for associated matters of discretion in the following relevant restricted discretionary rules and consider '*the safe and efficient operation of the rail corridor*' is both appropriate and sufficient as a matter of discretion to address the issue. We agree with the amendment proposed by Ms Easton and her reasoning to remove written approval from the rule and provide for it within an Advice Note. We also accept that not linking the '*maximum gross floor area*' requirement to '*per building*' is a drafting error. In response to the RNZ submission we consider the 7m height limit and notification clauses in OSZ-R13 and OSZ-R14 address their concerns (noting that OSZ-R13 becomes restricted discretionary in our recommendations).

95. The Panel agrees with Ms Easton and the Director General that OSZ-R13 should be amendment from controlled to restricted discretionary. We accept that if Park Facilities and Park Furniture, which includes vehicle, machinery and equipment depots, storage sheds and lighting structures amongst other things, were proposed at a scale and extent that was inappropriate for land and area concerned there should be an ability for that consent to be declined. As Ms Easton noted there is no upper limit on the height or scale of such facilities, and therefore we agree that a controlled activity is not appropriate for managing all potential adverse effects. We note this amendment has a consequential amendment to ORS-R1.

96. In terms of OSZ-R3, the Panel agrees that that community facilities are largely anticipated in this zone and that the majority of open space zoned areas will not have an Open Space Management Plan. We therefore accept that Standard 2 which requires community facilities to be provided for in an Open Space Management Plan or lawfully established in order to be permitted should be deleted.

97. The Panel agrees with Ms Easton that OSZ-R4 relating to Clubrooms can be deleted as they are deemed to be a Community Facility. The Panel notes that as a result of this deletion there is a change to numbering sequence of the notified Rules from OSZ-R4 onwards.

98. The Panel agrees with Ms Easton's amendment to OSZ-R9. We acknowledge that vehicle access and carparking are expected activities associated with, however their purpose needs to be linked to functions and activities associated with the open space rather than providing general carparking, or access (for example) to private land for other purposes. It is for this reason that the reference is made to the Open Space Management Plan. We accept Ms Easton to amend rather than deleting standard 1, to require that access and carparking are ancillary to a conservation activity, a recreation activity, or a camping ground.

99. The Panel has considered the submission in relation to OSZ-R12 by the Director General, to further exclude activities within the definition of Agricultural, Horticultural or Pastoral Activities and requiring standards with overlays to be met, and Forest and Bird seeking for the rule to be a discretionary activity. As we understand it the submitters are concerned about the potential of conversion of park land to farming and horticulture uses. While we consider such conversion of open space at any significant scale to be unlikely, we agree with Ms Easton that the storage, treatment and disposal of solid and liquid animal waste is not an appropriate permitted activity in the open space zone. We also accept that it's appropriate to calve out local purpose reserves where a quarry purpose is enabled and to add a clause that activity does not involve indigenous vegetation clearance or new agriculture, horticultural or pastoral activities occurring within areas identified in Schedules 1 – 8. We consider these amendments address a number of the concerns of the submitters without the need to make the activities discretionary, particularly given some levels of Agricultural, Horticultural or Pastoral Activities may well be appropriate.

100. The Panel accepts the evidence of Ms Pull that it is not necessary to include Poutini Ngāi Tahu values in OSZ-R13, OSZ-R14, OSZ-R15, OSZ-R16, OSZ-R17 and OSRZ-R20 and we note this was supported by Ms Easton. We agree that Poutini Ngāi Tahu values should be included in OSZ-R18 and OSZ-R19 (as notified) given these relate to:

    (i) cemeteries and urupā where the location of human remains is a tikanga issue and the sites are often wāhi tapu. Therefore, consideration of Poutini Ngāi Tahu values is expected, and

    (ii) mineral extraction and mineral prospecting and exploration which are potential large and long-term scale activities, where consideration of Poutini Ngāi Tahu values is reasonable. Notwithstanding this, we note that OSZ-R19 is recommended in the Mineral Extraction recommendation to become fully discretionary.

101. The Panel acknowledge the correction of the heading to 'Education Facilities' in rule OSZ-R14.

102. The Panel agrees with Ms Easton and the Director General that residential activities not being ancillary to a conservation or recreation activity or to provide a caretaker unit for a camping ground under rule ORS-R15 should default to non-complying rather than discretionary. We agree that residential activity, other than for the above purposes, is inappropriate in the OSZ, and would not be consistent with the purposes and functions of the zone.

103. We acknowledge that OSZ-R26 is a catch all rule, however we agree with submitters that such rules are better placed as discretionary, otherwise they are unnecessarily limiting in our view and could have unforeseen consequences. We note that such an amendment is proposed plan wide in relation to various submitters. In this case we rely on the submission of William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335) and Vance and Carol Boyd (S447.003) to provide the scope.

104. The Panel notes that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to '*landscape measures*' and 'landscape treatment' have been removed from the matters of discretion and replaced with '*measures to mitigate landscape effects*'. We consider this addresses the concerns expressed by Ms Pull in relation to '*landscape measures*'.

105. The Panel note that other than reference to the Rifle Range Protection Area in some rules no other amendments are recommended to rules OSZ-R2, OSZ-R5, OSZ-R6, OSZ-R7, OSZ-R8, OSZ-

R10, OSZ-R16, OSZ-R17, OSZ-R18, OSZ-R20, OSZ-R22, OSZ-R23, OSZ-R24, OSZ-R25 and OSZ-R26 as notified.

106. In relation to the remainder of the submissions on the OSZ rules the Panel agree that these be rejected on the basis of the conclusions reached by Ms Easton.

Hearing Panel Recommendation

107. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommends the following changes to the **OSZ Overview and Rules**:

OSZ	Open Space Zone - Te Takiwā Pōaha

Overview

The purpose of the OSZ - Open Space Zone is to provide open spaces that are used predominantly for a range of passive and active leisure and recreational activities, along with limited associated facilities and structures. The West Coast/Te Tai Tai o Poutini open spaces vary in size from small neighbourhood parks to large sized parks where people can enjoy activities such as walking and cycling, skateboarding, swimming, surfing, camping and kicking a ball around. Some of these open spaces are located near waterbodies and the coast, others are in urban neighbourhoods and others form an important part of the district's shared pathway network.

The zone includes civic spaces, land with community facilities, cemeteries, campgrounds and nohoanga sites. Historic reserves and large areas of public conservation land fall within this zone. Grazing is sometimes undertaken within these areas for land management purposes. This zone includes areas that may also be used for a range of local purpose uses - for example municipal buildings, water supply, gravel reserves, quarries, campgrounds and cemeteries. In some cases**,** [143] they **are** [144]also the locations for quarrying and mineral extraction before the land is remediated for other open space uses.

These public open spaces are generally more open, with less built features and contribute to an attractive living environment for people on the West Coast/Te Tai o Poutini. They can also have important natural, cultural and historic heritage values.

Activities and uses on publicly owned land are required to obtain permission (such as a lease**,** ~~or a~~ licence **or concession**[145]) from the relevant administering authority. This is in addition to any requirements under Te Tai o Poutini Plan and the RMA. All activities will also **need to be consistent with** ~~have regard to~~ [146]any relevant reserve management plans and legislation (Reserves Act 1977 or Conservation Act 1987).

Land included within the Open Space and Recreation Zones adjoins a number of other territorial authority boundaries not managed by Te Tai o Poutini Plan. When considering activities close to territorial authority boundaries, plan users need to apply care with regard to managing any potential cross boundary resource management issue.[147]

[143] Clause 16(2) of Schedule 1 RMA
[144] WMS (S599.102)
[145] Director General (S602.00240)
[146] Forest & Bird (S560.0590)
[147] QLDC (S523.003)

Relationship With Energy, Infrastructure and Transport provisions

The ENG Energy chapter contains rules applying to energy activities and renewable electricity generation activities throughout the district, and accordingly the rules in this chapter do not apply to these activities.

Similarly, the INF Infrastructure chapter contains rules applying to specified infrastructure such as telecommunications, wastewater, stormwater and water supply installations, pipelines and meteorological facilities and accordingly the rules in this chapter do not apply to those activities.

The TRN Transport chapter contains the rules around the development of the transport network and the performance standards that apply for construction of these facilities and accordingly the rules in this chapter do not apply to those activities. There are rules in relation to the establishment of carparking and vehicle access within the Open Space Zone however, and this relates to these facilities being developed to support the activities associated with the use of the open space, on the lands within the zone.[148]

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities in the Sport and Recreation Zone including:

- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters** - –[149]there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Sport and Recreation Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.

- **Natural Hazards** - natural hazards are widespread on the coast and in some locations natural hazard overlays may affect areas in the Sport and Recreation Zone. Information on natural hazard overlays and provisions can be found in the natural hazards chapter.

- **Ecosystems and Biodiversity - as areas of high ecological value, the provisions of the Ecosystems and Biodiversity chapter are particularly relevant to the Open Space Zone. The Ecosystems and Biodiversity chapter contains the provisions around the management of indigenous vegetation.**[150]

- **Natural Features and Landscape - many areas of outstanding natural features or outstanding natural landscape will be located within the Open Space Zone. The Natural Features and Landscape chapter contains the provisions for building and earthworks within areas of outstanding natural features and outstanding natural landscapes.**[151]

- **Natural Character and the Margins of Waterbodies** - in[152] some locations areas of ~~Sport and Recreation~~ **Open Space**[153] Zone may extend into the riparian margins of waterbodies. The

[148] Manawa Energy (S438.135)
[149] Clause 16(2) of Schedule 1 RMA
[150] Forest & Bird (S560.360)
[151] Consequential change from Forest & Bird (S560.351)
[152] Clause 16(2) of Schedule 1 RMA
[153] Clause 16(2) of Schedule 1 RMA

Natural Character and the Margins of Waterbodies chapter contains provisions on how these areas must be managed.

- **Coastal Environment - where activities occur within the coastal environment, including areas of high or outstanding coastal natural character, the Coastal Environment chapter contains provisions for activities within these areas.**[154]

- **General District Wide Matters** - provisions in relation to noise, light and signs, in particular may be relevant to activities in the ~~Sport and Recreation~~ **Open Space**[155] Zone.

OSZ - Open Space Zone Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.

Permitted Activities

OSZ - R1	**Park Facilities and Park Furniture**

Activity Status Permitted	**Activity status where compliance not achieved:** ~~Controlled~~ **Restricted Discretionary**[161]
Where: 1. The maximum building height above ground level is 7m; 2. The maximum gross floor area is 100m **per building**[156]; 3. Buildings and are setback: i. 4.5m from the road **and rail designation**[157] boundr**ies**~~ary~~; and ii. 3m from any RESZ - Residential Zone or SETZ - Settlement Zone boundary. 4. External storage is screened by a 1.8m fence or landscaping so that it is not visible from any adjoining residential zone boundary; 5. Fences, walls and retaining walls are a maximum 2m height above ground level; 6. No building shall project beyond a building envelope defined by a recession plane as outlined in Appendix Two to commence 2.5m above any RESZ - Residential Zone or SETZ - Settlement Zone boundary.~~ except where the neighbouring property owner's written approval is provided to the Council~~	

[154] Consequential change from Forest & Bird (S560.351)

OSZ – R~~8~~7	**Residential Activities**
Activity Status Permitted Where: 1. This is ancillary to a recreation activity, a conservation activity or a camping ground, or to provide a caretaker unit for a park facility; ~~and~~ **2.** All performance standards for Rule OSZ - R1 are complied with**; and** **3.** **No residential activities or residential units are located within the Rifle Range Protection Area**.[169]	**Activity status where compliance not achieved:** Restricted Discretionary
OSZ - R~~9~~8	**Vehicle Access and Car Parking Areas**
Activity Status Permitted Where: 1. The vehicle access or carparking is **ancillary to a conservation activity, a recreation activity or a camping ground** ~~established at the time of notification of the Plan or provided for within an Open Space Management Plan for the site~~; [170] and 2. All relevant Transport Standards in Appendix One are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
OSZ – R~~10~~9	**Cemeteries and Urupā**
Activity Status Permitted Where: 1. This is a cemetery or urupā lawfully established at the date of notification of the Plan; and 2. All performance standards for Rule OSZ - R1 are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
OSZ – R10~~1~~	**Mineral Prospecting and Mineral Exploration**
Activity Status Permitted Where: 1. This is authorised under a prospecting or exploration permit from NZPAM; 2. Notice is provided to the relevant District Council Consent Authority 10 working days prior to the works commencing; 3. Areas are to be disturbed, topsoil shall be stripped and stockpiled and then replaced over the area of land disturbed	**Activity status where compliance not achieved:** Restricted Discretionary

[169] Mr William McLaughlin (S567.742 and S567.401), WRCI (S457.018), Mr Chris & Ms Jan Coll (S558.342), Chris J Coll Surveying Limited (S566.342), and Ms Laura Coll McLaughlin (S574.342)
[170] The Findlays (S605.020)

as soon as possible and no later than 3 months after the disturbance has occurred; 4. The site shall be rehabilitated as far as is practicable to its original condition; ~~and~~ 5. All stripped material (including vegetation, soil and debris) is not deposited within any riparian margin of a waterbody and is contained in such a manner that it does not enter any waterbody or cause the destruction of habitat~~.~~**; and** 6. **No Parks Facilities or Parks Furniture are established in the Rifle Range Protection Area except that which is reasonably necessary for the operation of the Rifle Range.**[171] **Advice Note:** 1. Where an activity subject to this rule is located within an Overlay Chapter area then compliance with the relevant Overlay Chapter rules is required. 2. Mineral Prospecting and Mineral Exploration within the Pounamu and Aotea Overlays is subject to Rule SASM - R7. 3. The activity may require a resource consent from the West Coast Regional Council. In particular there are restrictions in relation to earthworks within 100m of a wetland and work which may affect waterbodies.	
OSZ - R11~~2~~	**Agricultural, Horticultural or Pastoral Activities**
Activity Status Permitted Where: 1. All performance standards for Rule OSZ - R1 are complied with; and 2. The activity does not include: a. Intensive indoor primary production; ~~or~~ b. Stock sale yards**;** c. **the storage, treatment and disposal of solid and liquid animal waste; or** d. **farm quarries outside of areas specifically identified as Local Purpose (Quarry) Reserves;** [172] **3. The activity does not involve indigenous vegetation clearance or new agriculture, horticultural or pastoral activities occurring within areas identified in Schedules 1 – 8;**[173]**and**	**Activity status where compliance not achieved:** Restricted Discretionary

[171] Mr William McLaughlin (S567.742 and S567.401), WRCI (S457.018), Mr Chris & Ms Jan Coll (S558.342), Chris J Coll Surveying Limited (S566.342), and Ms Laura Coll McLaughlin (S574.342)
[172] Director General (S602.199 and S602.213)
[173] Director General (S602.199 and S602.213)

4. Within the Rifle Range Protection Area only buildings that are reasonably necessary to carry out Agricultural, Pastoral or Horticultural Activities are established.[174] **Advice Note:** **1.** Refer to Rule SASM - R7 in the Sites of Significance to Māori Chapter where a farm quarry is proposed within the Aotea or Pounamu Overlays.

9. SPORT AND ACTIVE RECREATION ZONE CHAPTER

Submissions and Further Submissions

108. Three submission points and one further submission point[200] received on the **SARZ Chapter as a whole** were summarised in a Table on pages 75 to 76 of the s42A Report. All submission points sought to amend the chapter, with the GDC submission opposed by Ngāi Tahu's further submission.

109. Four submission points[201] received on **SARZ – R1** were summarised in a Table on page 76 of the s42A Report. The rule as notified was supported by two submission points and opposed by one submission point. The fourth submission point supported in part the rule.

110. Two submission points[202] received on **SARZ – R2** were summarised in a Table on pages 76 and 77 of the s42A Report. Both submission points supported the rule as notified.

111. Two submission points[203] received on **SARZ – R3** were summarised in a Table on page 77 of the s42A Report. One submission point supported the rule as notified, but the other opposed in part the rule.

112. Two submission points[204] received on **SARZ – R4** were summarised in a Table on page 77 of the s42A Report. The rule as notified was supported by one submission point but opposed by the other submission point.

113. Two submission points[205] received on **SARZ – R5** were summarised in a Table on page 77 of the s42A Report. Both submission points supported the rule as notified.

114. One submission point[206] received on **SARZ – R6** was summarised in a Table on page 77 of the s42A Report, which supported the rule as notified.

115. One submission point[207] received on **SARZ – R7** was summarised in a Table on page 77 of the s42A Report, which supported the rule as notified.

116. Two submission points[208] received on **SARZ – R8** were summarised in a Table on pages 77 and 78 of the s42A Report. Both submission points supported the rule as notified.

[199] William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335) and Vance and Carol Boyd (S447.003)
[200] GDC (S608.097), Ngāi Tahu (FS41.028), Forest & Bird (S560.365), and NZMCA (S490.010)
[201] Te Mana Ora (S190.663), Waka Kotahi (S450.200), BDC (S538.389), GDC (S608.692)
[202] Te Mana Ora (S190.664) and Ngāi Tahu (S620.417)
[203] Te Mana Ora (S190.665) and GDC (S608.693)
[204] Te Mana Ora (S190.666) and BDC (S538.390)
[205] Te Mana Ora (S190.667) and MoE (S456.028)

[207] Te Mana Ora (S190.669)
[208] Te Mana Ora (S190.670) and Waka Kotahi (S450.201)

117. Two submission points[209] received on **SARZ – R9** were summarised in a Table on page 78 of the s42A Report. The rule as notified was supported by one submission point but opposed by the other submission point.

118. Two submission points[210] received on **SARZ – R10** were summarised in a Table on page 78 of the s42A Report. Both submission points supported the rule as notified.

119. Three submission points[211] received on **SARZ – R11** were summarised in a Table on page 78 of the s42A Report. All submission points supported the rule as notified.

120. Two submission points[212] received on **SARZ – R12** were summarised in a Table on page 78 of the s42A Report. Both submission points supported the rule as notified.

121. Two submission points[213] received on **SARZ – R13** were summarised in a Table on pages 78 and 79 of the s42A Report. Both submission points supported the rule as notified.

122. Two submission points[214] received on **SARZ – R14** were summarised in a Table on page 79 of the s42A Report. Both submission points supported the rule as notified.

123. Four submission points[215] received on **SARZ – R15** to **SARZ - R18** were summarised in a Table on page 79 of the s42A Report. Each rule as notified was supported by one submission point.

124. We adopt the summary of these submissions detailed in the s42A Report, and we have considered all of the relevant submissions.

Section 42A Report

SARZ chapter as a whole

125. Ms Easton recommended rejecting the submissions from:

(a) GDC (S608.097), reasoning that the substantive issues around the merits of Sites and Areas of Significance to Māori are addressed in the s42A report for that topic. Consequently, she recommended accepting the further submission from Ngāi Tahu; and

(b) NZMCA (S490.010), reasoning that the SARZ is for the location of major sporting facilities which are not appropriate locations for camping.

126. Ms Easton recommended accepting the submissions from Forest & Bird (560.365), supporting the relevant chapters being listed in the overview section, and the addition of the ECO, NFL, and CE chapters as they were omitted in error. Consequently, she recommended the SARZ Overview be amended similar to the NOSZ overview as detailed below, which links to Forest and Bird's submission on the OSRZ Overview (S560.0553).

[213] Te Mana Ora (S190.675) and Waka Kotahi (S450.205)
[214] Te Mana Ora (S190.676) and Waka Kotahi (S450.206)
[215] Te Mana Ora (S190.677 to S190.680)

Ecosystems and Biodiversity –The provisions of the Ecosystems and Biodiversity chapter may be relevant to the Sports and Active Recreation Zone. The Ecosystems and Biodiversity chapter contains the provisions around the management of indigenous vegetation.

Natural Features and Landscape - The Natural Features and Landscape chapter contains the provisions for building and earthworks within areas of outstanding natural features and outstanding natural landscapes.

Natural Character and the Margins of Waterbodies -in some locations areas of Sport and Recreation Zone may extend into the riparian margins of waterbodies. The Natural Character and Margins of Waterbodies chapter contains provisions on how these areas must be managed.

Coastal Environment - where activities occur within the coastal environment, including areas of high or outstanding coastal natural character, the Coastal Environment chapter contains provisions for activities within these areas.

…

SARZ – R1

127. Ms Easton recommended rejecting the submission from Waka Kotahi (S450.200) on the basis that the zone chapters have all been developed using the same template and framework, without separate tables of performance standards and this is not a requirement of the Planning Standards.

128. Ms Easton recommended rejecting the submission from GDC (S608.692) to provide clarity.

129. Ms Easton recommended accepting BDC's submission (S538.389) to delete of the reference to neighbour's written approval in the wording of the recession plane standard in Rule SARZ – R1 and that instead have an Advice Note that refers to the Deemed Permitted process as set out in the RMA. Consequently, she recommended the following amendments to SARZ – R1.

SARZ - R1 Park Facilities and Park Furniture

Activity Status Permitted

Where:

…

g. No building shall project beyond a building envelope defined by a recession plane as outlined in Appendix Two to commence 2.5m above any RESZ - Residential Zone or SETZ - Settlement Zone boundary ~~except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~. This standard does not apply to:

…

Activity status where compliance not achieved: Controlled

Advice Note: Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.

SARZ – R3

130. Ms Easton recommended rejecting the submission from GDC (S608.693) to provide clarity.

SARZ – R4 and SARZ – R9

131. Ms Easton recommended accepting BDC's submission (S538.390), considering that 'Clubrooms' and 'Grandstands' are both covered by SARZ–R3 (i.e., Community Facilities) so do not require specific rules SARZ–R4 and SARZ–R9 which she considered should be deleted.

SARZ – R11

132. Ms Easton recommended accepting MoE's submission (S456.029), as she considered that referring to '*Educational Facilities*' in the rule corrects a drafting error. She recommended the following amendment to this rule.

SARZ - R11 Recreational Activities, Conservation Activities, Community Facilities, Educational Facilities and Research Activities, Clubrooms, Grandstands and Poutini Ngāi Tahu Activities not meeting Permitted Activity rules

…

Submitter Correspondence

133. Ms Grinlinton-Hancock indicated KiwiRail requested amendments to Ms Easton's recommended SARZ-R1 and SARZ-R10 to SARZ-13 as shown below in italics. The reason for changing the activity status for a non-compliance with SARZ-R1 (4) is to be consistent with the NOSZ and OSZ. The other amendments are to appropriately manage the health and safety of communities and ensure the ongoing operation of KiwiRail's network as nationally and regionally significant infrastructure.

SARZ - R1 Park Facilities and Park Furniture

Activity Status Permitted

Where:

…

4. Buildings ***or structures*** are setback:
    i. 4.5m from the road ***and rail designation*** *boundar* ~~***y***~~***ies***; and

…

Activity status where compliance not achieved: ~~*Controlled*~~ ***Restricted Discretionary***

SARZ - R10 Park Facilities and Park Furniture not meeting Permitted Activity Standards

Activity Status ~~***Controlled***~~ ***Restricted Discretionary***

~~***Matters of control are***~~ ***Discretion is restricted to:***

…

e. The location and design of the building or structure as it relates to the ability to safely use, access and maintain buildings or structures without requiring access on, above or over the rail corridor; and

f. ***The safe and efficient operation of the rail network.***

…

SARZ - R11 Recreational Activities, Conservation Activities, Community Facilities, Educational Facilities and Research Activities~~, Clubrooms, Grandstands~~ and Poutini Ngāi Tahu Activities not meeting Permitted Activity rules

Activity Status Restricted Discretionary

Discretion is restricted to:

…

g. ***The location and design of the building or structure as it relates to the ability to safely use, access and maintain buildings or structures without requiring access on, above or over the rail corridor; and***

h. ***The safe and efficient operation of the rail network.***

…

SARZ - R12 Residential Activities not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Where:

…

Discretion is restricted to:

l. ***The safe and efficient operation of the rail network.***

…

Hearing and Submitter Evidence

134. In her evidence, Ms Pull suggested the SARZ Overview be amended as shown below to improve consistency and clarity relating to the EIT chapter:

Overview

…

Other relevant Te Tai o Poutini Plan provisions

…

- **Energy, Infrastructure and Transport - The Energy, Infrastructure and Transport chapters contains rules in relation to energy, infrastructure or transport activities. The objectives and policies of this zone will be considered for any energy, infrastructure or transport activity that trigger resource consent.**

135. Additionally, Ms Pull suggested amending SARZ-R10 to SARZ-R14 by replacing '*landscape measures*' in these rules with:

The effects of the proposal on the amenity, character and landscape values of the Zone.

136. Ms Pull suggested Poutini Ngāi Tahu values were an unnecessary consideration for the SARZ provisions. She reasoned this was because she was unable to conclude that a feasible activity creating a rule breach beyond the permitted baseline would have a more than minor effect on Poutini Ngāi Tahu values not already protected by the SASM overlay. Consequently, Ms Pull indicated removing 'Poutini Ngāi Tahu values' from rules:

SARZ-R10 Park Facilities and Furniture

SARZ -R11 Recreational activities et al…

SARZ -R12 Residential Activities

SARZ -R13 Retail Activities

SARZ -R14 Vehicle Access and Carparking

Reporting Officer Reply Evidence

137. Ms Easton indicated she supported the KiwiRail position to:

(a) Provide a 4.5m setback from the railway corridor for buildings and structures in the SARZ; and

(b) Provide a Restricted Discretionary Activity for a non-compliance with this railway corridor setback in the SARZ, instead of a Controlled Activity, as this is a consistent approach with the OSZ.

138. In her right of reply, Ms Easton:

(a) noted only one location where the rail corridor adjoins the SARZ at Greymouth, where a building appears built against or within the rail corridor. She supported a 4.5m setback for buildings and structures in the SARZ through amending SARZ-R1 (4)(i).

(b) supported adding '*the safe and efficient operation of the rail corridor*' as an additional matter of control to SARZ-R10.

(c) supported Ms Pulls' amendments relating to Poutini Ngāi Tahu values, agreeing with her rationale. She clarified there is scope to change OSRZ rules as sought by Ms Pull under submission (S620.015).

(d) did not consider there was scope in Ngāi Tahu's submissions to change OSRZ rules as sought by Ms Pull relating to '*landscape measures*'.

139. In their October 2024 right of reply, Ms Easton and Ms Belgrave:

(a) agreed the 4.5m rail corridor setback is generally appropriate in the SARZ, being consistent with roading setbacks and recognising the zone's low development expectation and open character.

(b) recommended this setback apply to "buildings" only, considering it unreasonable to apply to "structures" in certain circumstances. They highlighted there was no consistent approach across other District Plans nor an applicable national setback standard.

(c) suggested amending SARZ-R1 and SARZ-R10 from that notified as detailed below:

SARZ - R1 Park Facilities and Park Furniture

Activity Status Permitted

Where:

…

d. Buildings are setback:

i. 4.5m from the road **and railway corridor** boundary; and

ii. 3m from any Residential Zone or Settlement Zone boundary.

…

SARZ - R10 Park Facilities and Park Furniture not meeting Permitted Activity Standards

Activity Status Controlled

Matters of control are:

…

c. Vehicle access and parking design and location; ~~and~~

d. Management of effects on natural character, landscape, historical and cultural values, ecological and biodiversity values**; and**

e. **the safe and efficient operation of the rail corridor**.

…

Hearing Panel's Evaluation

140. The Panel accept the inclusion of a setback for buildings only from the rail designation in SARZ-R1(4) and we acknowledge the need for associated matters of discretion in the following

relevant restricted discretionary rules and consider '*the safe and efficient operation of the rail corridor*' is both appropriate and sufficient as a matter of discretion to address the issue. We agree with the amendment proposed by Ms Easton and her reasoning to remove written approval from the rule and provide for it within an Advice Note. We note here that there was no submission seeking to link the '*maximum gross floor area*' requirement to '*per building*' as there was for the OSZ, however as Ms Easton considered this was a drafting error in any event, we consider clause 16(2) of the RMA is available to us to correct this situation.

141. The Panel accepts the evidence of Ms Pull that it is not necessary to include Poutini Ngāi Tahu values in SARZ – R10 to SARZ – R14 and we note this was supported by Ms Easton.

142. The Panel agrees with Ms Easton that SARZ-R4 and SARZ-R9 relating to Clubrooms and Grandstands can be deleted as they are deemed to be a Community Facility. The Panel notes that as a result of this deletion there is a change to numbering sequence of the notified Rules from OSZ-R4 onwards.

143. The Panel acknowledge the correction of the heading to 'Education Facilities' in rule SARZ-R11.

144. We acknowledge that SARZ-R18 is a catch all rule, however we agree with submitters that such rules are better placed as discretionary, otherwise they are unnecessarily limiting in our view and could have unforeseen consequences. We note that such an amendment is proposed plan wide in relation to various submitters. In this case we rely on the submission of William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335) and Vance and Carol Boyd (S447.003) to provide the scope.

145. The Panel notes that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to 'landscape measures' and 'landscape treatment' have been removed from the matters of discretion and replaced with '*measures to mitigate landscape effects'*. We consider this addresses the concerns expressed by Ms Pull in relation to '*landscape measures*'.

146. The Panel note that no amendments are recommended to rules SARZ-R2, SARZ-R3, SARZ-R5, SARZ-R6, SARZ-R7, SARZ-R8, OSZ-R15, OSZ-R16 and OSZ-R17 as notified.

147. In relation to the remainder of the submissions on the SARZ rules the Panel agree that these be rejected on the basis of the conclusions reached by Ms Easton.

Hearing Panel Recommendation

148. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommends the following changes to the SARZ Overview and Rules:

SARZ	**Sport and Active Recreation Zone - Te Takiwā Hākinakina**
Overview The purpose of the SARZ - Sport and Active Recreation Zone is to provide open space areas for a range of sport and recreation activities, including organised sport and recreation for local, district-wide and regional communities. This zone applies in parks, sports grounds and multi-sport facilities. Such areas will normally have associated buildings such as club rooms, changing	

sheds or toilet facilities. These spaces are areas where people can also enjoy informal exercise and leisure activities.

Sport and active recreation areas are predominantly characterised by large open space areas with associated buildings and facilities that vary in scale depending on the sport and recreation activities that take place there. It is generally accepted that the level of development in this zone is higher than other OSRZ - Open Space and Recreation Zones and that the sport and recreation activities that are anticipated to take place in this zone can generate noise, light and traffic effects in surrounding neighbourhoods.

Activities and uses on publicly owned land are required to obtain permission (such as a lease or a licence) from the Council as the administering authority. This is in addition to any requirements under Te Tai o Poutini Plan and the RMA. All activities will also have regard to any relevant reserve management plan and legislation (Reserves Act 1977).

Other Relevant Te Tai o Poutini Plan provisions
It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities in the Sport and Recreation Zone including:

- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters** - there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Sport and Recreation Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.

- **Natural Hazards** - natural hazards are widespread on the coast and in some locations natural hazard overlays may affect areas in the Sport and Recreation Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards chapter.

- **Ecosystems and Biodiversity –The provisions of the Ecosystems and Biodiversity chapter may be relevant to the Sports and Active Recreation Zone. The Ecosystems and Biodiversity chapter contains the provisions around the management of indigenous vegetation.** [216]

- **Natural Features and Landscape - The Natural Features and Landscape chapter contains the provisions for building and earthworks within areas of outstanding natural features and outstanding natural landscapes.** [217]

- **Natural Character and the Margins of Waterbodies** -in some locations areas of Sport and Recreation Zone may extend into the riparian margins of waterbodies. The Natural Character and Margins of Waterbodies chapter contains provisions on how these areas must be managed.

- **Coastal Environment - where activities occur within the coastal environment, including areas of high or outstanding coastal natural character, the Coastal Environment chapter contains provisions for activities within these areas.** [218]

[216] Forest & Bird (S560.365)
[217] Consequential change from Forest & Bird (S560.365)
[218] Consequential change from Forest & Bird (S560.365)

- **General District Wide Matters** - provisions in relation to Noise, Light and Signs, in particular may be relevant to activities in the Sport and Recreation Zone.

SARZ - Sport and Active Recreation Zone Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.

Permitted Activities

SARZ - R1	**Park Facilities and Park Furniture**

Activity Status Permitted	**Activity status where compliance not achieved:**
Where: 1. The maximum building height above ground level is 10m; 2. Masts, poles, aerials and pou whenua must not exceed 7m in height; 3. The maximum gross floor area is 200m^2 **per building**;[219] 4. Buildings are setback: i. 4.5m from the road **and rail designation** boundies~~ary~~; [220] and ii. 3m from any Residential Zone or Settlement Zone boundary. 5. External storage is screened by a 1.8m fence or landscaping so that it is not visible from any adjoining residential zone boundary; 6. Fences, walls and retaining walls are a maximum 2m height above ground level; 7. No building shall project beyond a building envelope defined by a recession plane as outlined in Appendix Two to commence 2.5m above any RESZ - Residential Zone or SETZ - Settlement Zone boundary~~ except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~.[221] This standard does not apply to: i. Road boundaries; ii. Buildings on adjoining sites that have a common wall along the boundary;	~~Controlled~~**Restricted Discretionary Activity**[223]

[219] Clause 16(2) of the RMA
[220] KiwiRail (S442.093)
[221] BDC (S538.389)
[223] Consequential change from KiwiRail (S442.093)

iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard; iv. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and v. Solar panels and solar water heaters provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically. **Advice Note:** 1. **Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.** [222]	
SARZ - R2	**Conservation Activities, Recreation Activities and Poutini Ngāi Tahu Activities**
Activity Status Permitted Where: 1. All performance standards for Rule SARZ - R1 are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
SARZ - R3	**Community Facilities**
Activity Status Permitted Where: 1. All performance standards for Rule SARZ - R1 are complied with; 2. The community facility is: i. Provided for within an Open Space Management Plan for the site; or ii. Was lawfully established at the time of notification of the Plan; and 3. Hours of operation are limited to: i. 7am to 10pm Sunday - Thursday; ii. 7am to 12pm midnight Friday and Saturday; except iii. No restriction on hours is in place for up to 12 days per calendar year.; and	**Activity status where compliance not achieved:** Restricted Discretionary

[222] Buller District Council (S538.389)

iv. No restriction on hours is in place where the hall is in use for Civil Defence Emergency Management purposes.	
~~**SARZ – R4**~~	~~**Clubrooms**~~[224]
~~**Activity Status Permitted**~~ ~~Where:~~ ~~1. All performance standards for Rule SARZ - R1 are complied with; and~~ ~~2. The clubrooms:~~ ~~i. Are provided for within an Open Space Management Plan for the site; or~~ ~~ii. Were lawfully established at the time of notification of the Plan; and~~ ~~3. Hours of operation are limited to:~~ ~~i. 7am to 10pm Sunday - Thursday;~~ ~~ii. 7am to 12pm midnight Friday and Saturday; except~~ ~~iii. No restriction on hours is in place for up to 12 days per calendar year.~~	~~**Activity status where compliance not achieved:** Restricted Discretionary~~
SARZ - R~~5~~4	**Educational Facilities and Research Facilities ancillary to Conservation or Recreation Activities**
Activity Status Permitted Where: 1. All performance standards for Rule SARZ - R1 are complied with; and 2. The facility is identified in a relevant Open Space Management Plan for the site.	**Activity status where compliance not achieved:** Restricted Discretionary
SARZ - R~~6~~5	**Retail Activities**
Activity Status Permitted Where: 1. This is ancillary to a recreation activity or a conservation activity; 2. No more than 25% of any building is allocated to the retail activity; 3. Hours of operation are restricted to 7am to 7pm Monday to Sunday and including public holidays; and	**Activity status where compliance not achieved:** Restricted Discretionary

[224] BDC (S538.390)

4. All performance standards for Rule SARZ - R1 are complied with.	
SARZ - R~~7~~6	**Residential Activities**
Activity Status Permitted Where: 1. This is ancillary to a recreation activity or a conservation activity; and 2. All performance standards for Rule SARZ - R1 are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
SARZ - R~~8~~7	**Vehicle Access and Carparking Areas**
Activity Status Permitted Where: 1. The vehicle access or carparking is provided for within an Open Space Management Plan for the site; and 2. All relevant Transport Standards in Appendix One are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
~~**SARZ - R9**~~	~~**Grandstands**~~[225]
~~Activity Status Permitted~~ ~~Where:~~ ~~1. The grandstand is provided for within an Open Space Management Plan for the site; and~~ ~~2. The grandstand is setback:~~ ~~i. 4.5m from the road boundary; and~~ ~~ii. 3m from any Residential Zone or Settlement Zone boundary;~~ ~~3. The grandstand shall not project beyond a building envelope defined by a recession plane as outlined in Appendix Two to commence 2.5m above any RESZ - Residential Zone or SETZ - Settlement Zone boundary.~~	~~**Activity status where compliance not achieved:** Restricted Discretionary~~
~~**Controlled Activities**~~ **Restricted Discretionary Activities**[226]	
SARZ - R~~10~~8	**Park Facilities and Park Furniture not meeting Permitted Activity Standards**
Activity Status Controlled **Matters of control are:** a. Design, position and location of any buildings;	**Activity status where compliance not achieved:** N/A

10. ZONING MAPS

Submissions and Further Submissions

[244] Consequential change from Ngāi Tahu (S620.015)
[245] William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335) and Vance and Carol Boyd (S447.003)
[246] William McLaughlin (S567.395), Chris & Jan Coll (S558.335), Chris J Coll Surveying Limited (S566.335) and Vance and Carol Boyd (S447.003)

149. 17 submission points and 15 further submission points[247] received on the **Zoning of Public Conservation Land** were summarised in a Table on pages 82 to 85 of the s42A Report. The zoning of this land as notified was supported by two submission points, but opposed by four submission points, with the submissions from BCML and Whyte Gold Limited both supported in part by Ngāi Tahu's further submission. 11 submission points sought an amendment to the zoning of this land. The Director General's amendment was opposed, opposed in part, and supported in part by five, one, and one further submission respectively. Forest & Bird's amendment was opposed by five further submissions. WMS's amendment was supported in part by Ngāi Tahu's further submission.

150. 18 submission points and three further submissions[248] received on **Other Zoning Matters and Rezoning Requests** were summarised in a Table on pages 85 to 87 of the s42A Report. 10 submission points sought an amendment to the zoning or rezoning of specific land, with Mr Marshall's amendment supported by GDC's further submission and the TTPP Committee's amendment supported in part by the Dunn, Boon, Preston, and Rogers group. The zoning or rezoning of land as notified was opposed by two submission points and supported by two submission points. The zoning or rezoning of land was opposed in part by one submission point and supported in part by another submission point. Lastly, one submission point on the zoning or rezoning of land was neutral, while another submission point did 'not stated' their position but sought to recognise the importance of Greymouth rural recreation complexes which was supported in part by GDC.

151. The Panel adopt the summary of these submissions detailed in the s42A Report, and we have considered all of the relevant submissions.

Section 42A Report

Zoning of Public Conservation Land

152. Ms Easton recommending rejecting submissions from:

(a) The Director General (S602.206, S602.192, S602.197, S602.211), seeks that all public conservation lands with mapped areas of Outstanding Natural Landscapes, Outstanding Natural Features, Significant Natural Areas, High Coastal Natural Character and Outstanding Coastal Natural Character and are outside areas of urban zoned land be rezoned to be NOSZ, as she considered this would lead to a complex layer of zoning where most legal parcels would be split zoned and would not necessarily result in improved environment outcomes. Ms Easton recommend zoning should follow existing legal title boundaries whenever practicable.

(b) Forest & Bird (S560.359, S560.013), Ms Backes (S444.013), Ms Neale (S262.004), Mr Caygill (S290.003), Mr Moore (S65.016), Ms Gilbert (S473.012), and Ms Hargreaves (S481.021) relating to rezoning all public conservation lands NOSZ, and Ms Inta (S553.2260) relating to the entire DoC estate being one zone. She did not support these

[247] Director General (S602.206, S602.192, S602.197, and S602.211), BDC (FS149.0144, FS149.054, and FS149.073), Terra Firma (FS108.005), Ngāi Tahu (FS41.138, FS41.141 to FS41.143), Westpower (FS222.0108, FS222.0109, and FS222.0326), Bathurst Group (FS89.030, FS89.031, FS89.048, and FS89.081), Forest & Bird (S560.359 and S560.013), Ms Clare Backes (S444.013), Ms Jane Neale (S262.004), Mr John Caygill (S290.003), Mr David Moore (S65.016), Ms Katherine Gilbert (S473.012), Ms Lynley Hargreaves (S481.021), Ms Frida Inta (S553.226), Mr Andrew Beaumont (S225.002), Ms Suzanne Hills (S443.035), Ms Riarnne Klempel (S67.003), WMS (S599.098), BRML (S604.067), PML (S606.053), BCML (S601.076), and Whyte Gold Limited (S607.051)

[248] Ms Frida Inta (S553.160), BCG (S552.160), Mr Grant Marshall (S311.003), GDC (FS1.298), Mr Michael Orchard (S583.006), Mr Caleb Freeman (S20.001), Mr Ronald Rodgers (S115.001), TTPP Committee (S171.021 and S171.025), Dunn, Boon, Preston, and Rodgers Group (S556.001 and FS234.001), Ms Lynda Watson (S47.001), BDC (S538.00655 and S538.494), BDL (S453.004), Ms Riarnne Klempel (S67.002), WRCI (S457.001), Mr Owen Gould (S29.001), Ms Kim Carol & Mr Robert Terry (S55.001), GDC (FS1.016)

requests for the reasons detailed in paragraphs 232-238 of her s42A report and she emphasised that these lands are not homogenous, and there are public conservation lands in urban areas, and where they do not have high natural values.

(c) WMS (S599.098), BRML (S604.067), PML (S606.053), BCML (S601.076) and Whyte Gold Limited (S607.051), reasoning it appropriate for parks and reserves to be zoned OSRZ as directed and expected by the Planning Standards, with the OSRZ having bespoke rules. Whereas she highlighted the General Rural Zone provisions are primarily used for primary production making them inappropriate for most public conservation lands.

(d) Ms Hills (S443.035), reasoning that all land in a district to be zoned with the Planning Standards setting out the available zones.

(e) Ms Klempel (S67.003), reasoning it too laborious for minimal effect, albeit she agrees more of the public conservation lands would be appropriately zoned NOSZ, rather than OSZ.

(f) In addition to the above, Ms Easton emphasised that she does not support any rezoning of public conservation lands at this time, noting that some of these lands are proposed for non-conservation uses as part of the Stewardship Land Review.

Zoning of Hydro Parcels

153. Ms Easton recommended rejecting submissions from:

(a) BCG (S552.160) and Ms Inta (S553.160) for two reasons. Firstly, she was unsupportive of rezoning hydro parcels as NOSZ for the same reasons as those discussed in the Natural Character of Waterbodies s42A report. Ms Easton highlighted that if any hydro parcels required split zone boundaries (i.e., General Rural Zone and OSZ), this would require a GIS exercise. Secondly, she considered the appropriate zoning for LINZ parcels was dependent on the purpose of the lands being administered, their location and quality, and not just their ownership.

(b) Mr Marshall (S311.003), reasoning there is no practical benefit (in terms of pTTPP implementation) to rezone Lake Poerua as it would require GIS analysis to identify the lake area from Mt Te Kinga Scenic Reserve, and split zoning.

154. Ms Easton recommended accepting Mr Orchard's submission (S583.006), reasoning all West Coast Region formal reserves have already been identified within an OSRZ.

Re-zoning requests – Private land incorrectly identified as an OSRZ

155. Ms Easton recommended accepting in part the submissions from Mr Rodgers (S115.001) and the Dunn, Boon, Preston, and Rogers Group (S556.001). She supported the rezoning of 31 Hans Bay Road, Lake Kaniere as General Rural (not Settlement Zone) as sought by the TTPP Committee (S171.025) because this land is currently zoned Rural under the Westland District Plan. Ms Easton considered a Settlement Zone would represent very substantial upzoning, and the land is larger than the entire Settlement Zone area in Hans Bay.

156. Ms Easton recommended accepting submissions from:

(a) Mr Freeman (S20.001), reasoning his property and the adjacent properties should be rezoned General Rural in line with the surrounding properties as they are incorrectly zoned OSZ;

(b) Ms Watson (S47.001), reasoning rezoning the rear of the main property to Settlement would correct an error; and

(c) The TTPP Committee's submission (S171.021) and Ms Tewi's submission (S26.001), reasoning these lands should be rezoned Settlement Zone like the adjacent privately owned lands, and the size of the properties are consistent with the Settlement zone.

Other rezoning requests

157. Ms Easton noted the support from WRCI (S457.001) on the OSZ of the Westport Rifle Club.

158. Ms Easton recommended accepting the submissions from:

(a) BDC (S538.00655), reasoning rezoning the Ngakawau Domain from OSZ to SARZ is more consistent with the purpose of the zones;

(b) BDC (S538.494), reasoning rezoning the specified parks from General Residential Zone to OSZ aligns with the zone's intent. She agreed that a comprehensive review of zoning for designated recreational reserves was needed, and that this review falls under BDC's responsibility;

(c) BDL (S453.004), supporting the OSZ extending around the wastewater ponds at Kaiata Park because areas within 150m of the ponds will be setback from the surrounding residential development.

(d) Ms Klempel (S67.002), supporting the OSZ extending to the Pakiroa Beach frontage as it is public land, and unformed legal road connecting two marginal strips.

159. Consequently, Ms Easton recommended the following sites be rezoned to:

(a) OSZ:

i. Pakiroa Beach Legal Unformed Road;
ii. Orowaiti Esplanade Reserve;
iii. Mill Street Recreation Reserve;
iv. Kilkenny Park;
v. Derby Street Playground;
vi. Waimangaroa Domain; and
vii. Land at Kaiata Park.

(b) SARZ:

i. Ngakawau Domain.

(c) Settlement Zone:

i. 7 Upper Buller Gorge, 5 Inwoods Road Inangahua and adjacent properties; and

ii. Section 1 SO 56009 – 66 Sunny Bight Road, Waiano, Lake Kaniere.

(d) General Rural Zone:

i. LOT 3 DP 374296 BLK VIII WAIHO SD Potters Lane Franz Josef and adjacent properties; and

ii. 31 Hans Bay Road, Lake Kaniere.

160. Ms Easton supported in part submissions from:

(a) Mr Gould (S29.001), reasoning the Hokitika boat ramp sits partly in OSZ and is provided for as a Permitted Activity in that zone. However, she emphasised that maintenance funding is a matter for the WDC.

(b) Ms Carol and Mr Terry (S55.001), reasoning the specified rural recreation complexes are in the SARZ under the pTTPP with a range of Permitted Activities (including the maintenance, upgrading and expansion of recreation facilities at these locations) provided for in this zone.

Hearing and Submitter Evidence

161. Ms Hunter for Bathurst Group agreed with Ms Easton's recommendations not to rezone additional significant public conservation land.

162. Mr Deavoll for the Director General acknowledged Ms Easton's reasoning for rejecting the Director General's submission due to the difficulty in rezoning all conservation.

163. Mr Kennedy generally supported Ms Easton's recommendations to accept Westpower's further submissions opposing Forest & Bird's and the Director General's rezoning requests.

164. Ms Pull for Ngāi Tahu highlighted the ASW and NC Panel queried whether an OSZ would be more appropriate for waterbody areas instead of General Rural Zone. She raised this in case it was discussed at the OSRZ Hearing.

165. Ms Pull supported OSZ applied to any NTCSA sites.

166. Ms Pull generally supported Ms Easton's recommendations on Ngāi Tahu submissions and further submissions.

167. In her statement, Ms Inta simply referred to submissions S553.226, 5536.160, 552.164, and 552.64, but did not comment on her position following Ms Easton's recommendations or associated reasoning.

Reporting Officer Reply Evidence

168. Responding to the Panel's queries about Ms Klempel's rezoning, Ms Easton advised establishing an access across the Pakiroa Beach legal road would trigger a Restricted Discretionary Activity under OSZ–R17 if the strip was rezoned OSZ, thereby creating additional regulatory requirements. However, she indicated this activity would be a Permitted Activity under the Transport Chapter subject to complying with transport standards.

Hearing Panel's Evaluation

169. The Panel do not agree with including the Pakiroa Beach Legal Unformed Road in the Open Space Zone as we consider this would create additional regulatory requirements if access had to be established as indicated by Ms Easton in response to the Panels queries.

170. The Panel agree with all other recommended rezoning amendment recommended by Ms Easton for the reasons detailed in her s42A report.

171. In relation to the remainder of the submissions on rezoning the Panel agree that these be rejected on the basis of the conclusions reached by Ms Easton.

Hearing Panel Recommendation

172. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part and recommends the following changes in zoning on the Planning Maps to the properties detailed in the Table below:

Property	New Zone
Orowaiti Esplanade Reserve	Open Space Zone[249]
Mill Street Recreation Reserve	Open Space Zone[250]
Kilkenny Park	Open Space Zone[251]
Derby Street Playground	Open Space Zone[252]
Waimangaroa Domain	Open Space Zone[253]
Land at Kaiata Park as shown in **Appendix 2**	Open Space Zone[254]
Ngakawau Domain	Sport and Active Recreation Zone[255]
7 Upper Buller Gorge, 5 Inwoods Road Inangahua and adjacent properties as shown in the maps in **Appendix 2**	Settlement Zone[256]
Section 1 SO 56009 – 66 Sunny Bight Road, Waiano, Lake Kaniere	Settlement Zone[257]

[249] Buller District Council (S538.494)
[250] Buller District Council (S538.494)
[251] Buller District Council (S538.494)
[252] Buller District Council (S538.494)
[253] Buller District Council (S538.494)
[254] Ball Developments Ltd (S453.004)
[255] Buller District Council (S538.00655)
[256] Te Tai o Poutini Plan Committee (S171.021), Lorraine Tewi (S26.001)
[257] Lynda Watson (S47.001)

LOT 3 DP 374296 BLK VIII WAIHO SD Potters Lane Franz Josef and adjacent properties as shown in the maps in **Appendix 2**	General Rural Zone[258]
31 Hans Bay Road, Lake Kaniere	General Rural Zone[259]

APPENDIX 1 – RECOMMENDATIONS ON PLAN PROVISIONS

Definitions - Ngā Tautuhinga	
Term	**Definition**
CAMPING GROUNDS	~~has the same meaning as the Camping Grounds Regulations 1985 (as set out below)~~ means any area of land used, or designed or intended to be used, for rent, hire, donation, or otherwise for reward, for the purposes of placing or erecting on the land temporary living places for occupation by two or more families or parties (whether consisting of one or more persons) living independently of each other, whether or not such facilities or parties enjoy the use in common of entrances, water supplies, cookhouse, sanitary fixtures or other premises and equipment, **and includes the use of permanent buildings for sleeping in such as cabins and motel accommodation ancillary to the camping ground.** **For the avoidance of doubt nohoanga established under the Ngāi Tahu Claims Settlement Act should not be considered as camping grounds.**
OPEN SPACE MANAGEMENT PLAN	means a Reserve Management Plan or Conservation Management Plan **or Conservation Management Strategy** or National Park Management Plan or Iwi/Papatipu Rūnanga Management Plan or other Management Plan prepared in accordance with the Reserves Act 1977 or the Conservation Act 1987.

OSRZ - Open Space and Recreation Zones Objectives	
OSRZ – O~~1~~1	Development and activities should complement and not conflict with the functions and values of ~~the particular~~ open space **areas** and the surrounding environment **including those identified in any relevant Open Space Management Plan**. Where appropriate open space accommodates a range of functions.
OSRZ – O~~2~~2	To recognise the different functions, values and purpose of open space on the West Coast through providing for three Open Space and Recreation Zones: a. The NOSZ - Natural Open Space Zone with high natural values and a low level of development and built form; b. The SARZ - Sport and Active Recreation Zone with sport and active recreation values and ~~and~~ associated buildings and facilities; and c. The OSZ - Open Space Zone with a very wide range of values including passive and active recreation, **mineral extraction** local purposes and pastoral farming.

OSRZ - Open Space and Recreation Zones Policies	
OSRZ - P1	Open space should be developed and used in accordance with any relevant operative Reserves Act or Conservation Act Management Plan.

OSRZ - P2	Open space may accommodate recreational, cultural, natural, heritage, access and amenity values and functions and ancillary activities to support these, **including electricity transmission, distribution and renewable electricity generation,** where this fits with the purpose of the open space and its classification under any relevant Act.
OSRZ - P3	Buildings and structures should be designed and sited to be compatible with the function and predominant purpose of the open space and**, where practicable,** fit within the character and amenity of the surrounding area.
OSRZ - P4	Commercial and Residential activities may be appropriate on some open spaces where this is either identified in a Reserves Act or Conservation Act Management Plan, or where it has a link with the open space and recreation resource.
OSRZ - P5	Provide for commercial recreation activities that maintain the quality of the open space and recreation experience of people using the open space, **while also protecting natural values. Have** ~~having~~ particular regard to the scale, intensity and cumulative effects of commercial recreation activities.
OSRZ - P6	Recognise that many open spaces have sites and areas of significance to Poutini Ngāi Tahu, and ensure that these are managed in collaboration with iwi and hapū.
OSRZ - P7	~~Promote the p~~**P**rotect~~ion~~ and enhance~~ment of~~ **the** existing natural environment values having regard to the relevant OSRZ - Open Space and Recreation Zone and the opportunities for enhancement of these on the site.
OSRZ - P8	Provide for indoor and outdoor organised sports, active recreation, recreation facilities, community activities, educational facilities, accessory activities and associated buildings and structures having regard to the relevant OZRZ - Open Space and Recreation Zone.
OSRZ - P9	**Provided that natural values can be protected** ~~P~~**p**rovide for ~~the~~ **a** range of purposes where compatible with the open space values including: a. The ongoing operation and appropriate management of cemeteries; b. Camping **and other visitor accommodation** opportunities at rivers, lakes and coastal areas ~~where this is compatible with the values of the open space~~; c. Gravel and shingle extraction for roading networks and other local purposes; d. Quarries for rock; e. Pastoral farming including grazing as a management tool; f. Mineral **prospecting, exploration and** extraction of resources where these **resources** are limited in their location ~~and~~ g. Water supply and drainage networks where this supports local community needs**; and** **h. Establishment and operation of renewable electricity generation**.
OSRZ - P10	Subdivision and new development should provide for the open space needs generated by the development either through direct provision of land and works, or through a financial contribution. This includes:

	a. Additional neighbourhood parks including waterfront areas, walkways**,** ~~and~~ cycleways **and accessible quality playgrounds** needed as a result of additional household and visitor accommodation growth; b. Additional recreation areas to enhance recreational opportunities and the visual amenity of the built environment; and c. Development of existing land set aside for neighbourhood parks and recreation areas.
OSRZ - P11	**When conservation stewardship land is reclassified, provide for the different functions, values and purpose of the reclassification in partnership with Poutini Ngāi Tahu and key stakeholders.**
Open Space Zone	
OSRZ - P1~~1~~2	The OSZ - Open Space Zone primarily provides for passive and active recreation activities, **natural, cultural and biodiversity values,** community facilities,~~ campgrounds~~ **camping grounds** and cemeteries**,** and limited associated facilities and structures.
OSRZ - P1~~2~~3	Enable activities and facilities within the OSZ - Open Space Zone that: a. Are consistent with the intended purpose, character and qualities of the OSZ – Open Space Zone; ~~and;~~ b. Contribute to the overall health and wellbeing of the community; and c. Minimise adverse effects on the character, **natural environment,** and amenity values of the surrounding area.
OSRZ - P1~~3~~4	Provide for activities that are ancillary to the functions of the OSZ - Open Space Zone **where the adverse effects on open space values can be appropriately managed** including: (a) Retail activities; (b) Residential activities, including for ~~for~~ caretaker purposes; and (c) Agricultural, horticultural or pastoral activities.
OSRZ - P1~~4~~5	Provide for mineral extraction activities within the OSZ - Open Space Zone where: a. Impacts on open space and recreation values of the site are minimised; b. This is provided for within any Open Space Management Plan for the area; c. Adverse effects on open space and recreation values and the environment are avoid, mitigated, remedied, offset or compensated; d. Sites are rehabilitated at the end of the mineral extraction activity to enable the land to be used for an appropriate activity.
Sport and Active Recreation Zone	
OSRZ - P1~~5~~6	The SARZ - Sport and Active Recreation Zone primarily provides for active, organised and informal recreation, sports and community activities.

OSRZ - P1~~6~~7	With the SARZ - Sport and Active Recreation Zone enable activities and facilities that: a. May generate temporary adverse effects such as increased levels of noise and traffic; and b. Maintain a sense of openness within the zone; and c. Retain existing planting and mature trees, where practicable; and d. Contribute to the health and wellbeing of the community; and e. Do not adversely affect character and qualities of the surrounding area and adjoining sites.
OSRZ - P1~~7~~8	Within the SARZ - Sport and Active Recreation Zone enable buildings and structures, where these: a. Are for the use of a recreation activity or a conservation activity or ancillary activity to these; b. Are compatible with the purpose, character and qualities of the zone; and c. Avoid or mitigate adverse effects on character and qualities of the surrounding area.
Natural Open Space Zone	
OSRZ - P1~~8~~9	**Require** ~~A~~ **a** low level of development and built form ~~is anticipated~~ within ~~this~~ **the** NOSZ – Natural Open Space Zone to retain the natural, cultural and biodiversity values within ~~the~~ natural open space areas.
OSRZ - P1~~9~~20	Within the NOSZ - Natural Open Space Zone enable activities and facilities that: a. Are consistent with the intended purpose, character and qualities of the Natural open space zone; and b. Protect, maintain and, where possible, enhance **and restore** indigenous biodiversity including taonga species, natural values and ecological linkages; and c. Contribute to the health and wellbeing of the community.
OSRZ - P2~~0~~1	Within the NOSZ - Natural Open Space Zone provide for small-scale buildings and structures that: (a) Are ancillary to a permitted activity; ~~and~~ (b) Do not adversely affect the conservation **and indigenous biodiversity** values of the site;~~ and~~ (c) Are of a scale, form, location and design that is compatible with the purpose, character and qualities of the zone; and (d) Do not adversely affect the character and qualities of the surrounding area.

OSRZ - Open Space and Recreation Zones Methods	
OSRZ – M1	**The Te Tai o Poutini Plan Committee will consider undertaking a plan change in relation to reclassification of stewardship land as part of their regular monitoring of Plan implementation. The TTPP Committee will work with Te Papa Atawhai/the Department of Conservation and Poutini Ngāi Tahu, to assess whether there is sufficient benefit of re-zoning and if so, initiate a Plan Change.**

NOSZ	**Natural Open Space Zone - Te Takiwā Pōaha Aotūroa**

Overview

The purpose of the NOZ - Natural Open Space Zone is to recognise and provide for open spaces that contain high natural, ecological and landscape values. The zone also applies to a variety of parks and reserves, coastal and riverside esplanade reserves, scenic reserves, local purpose reserves and recreation reserves.

This zone also applies to large areas of public conservation land – **specifically gazetted** national parks **and** scientific reserves, **as well as areas classified within the Department of Conservation reserve classification system as** ~~wilderness areas,~~ **Wildlife Management Areas and** ~~s~~**S**pecially ~~p~~**P**rotected ~~a~~**A**reas ~~and important ecological areas~~.

Natural Open Space has a high degree of biodiversity requiring recognition, protection, maintenance and/or enhancement.

These are spaces that the community value and areas where people can relax and enjoy recreation and leisure activities such as walking and cycling, fishing, picnicking, and boating. Some of these spaces are used for cultural and customary activities, such as gathering mahinga kai, and are rich in historic heritage and cultural heritage values.

A low level of development and built form is anticipated within this zone to retain the natural/ biodiversity values within the natural open space areas.

Activities and uses on publicly owned land are required to obtain permission (such as a lease or a licence) from the relevant administering authority. This is in addition to any requirements under Te Tai o Poutini Plan and the RMA. All activities will also **need to be consistent with** ~~have regard to~~ any relevant reserve management plans, national park management plans or national legislation (Reserves Act 1977 or Conservation Act 1987).

Other Relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the zone chapters, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for certain activities within the Natural Open Space Zones.

- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters - there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Natural Open Space Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.**
- **Natural Hazards - natural hazards are widespread on the coast and in some locations natural hazard overlays may affect areas in the Natural Open Space Zone. Information on natural hazard overlays and provisions can be found in the natural hazards chapter.**

- **Ecosystems and Biodiversity – As areas of high ecological value, the provisions of the Ecosystems and Biodiversity chapter are particularly relevant to the Natural Open Space Zone. The Ecosystems and Biodiversity chapter contains the provisions around the management of indigenous vegetation.**
- **Natural Features and Landscape -many areas of outstanding natural features or outstanding natural landscape will be located within the Natural Open Space Zone. The Natural Features and Landscape chapter contains the provisions for building and earthworks within areas of outstanding natural features and outstanding natural landscapes.**
- **Natural Character and the Margins of Waterbodies -in some locations areas of Natural Open Space Zone may extend into the riparian margins of waterbodies. The Natural Character and the Margins of Waterbodies chapter contains provisions on how these areas must be managed.**
- **Coastal Environment - where activities occur within the coastal environment, including areas of high or outstanding coastal natural character, the Coastal Environment chapter contains provisions for activities within these areas.**
- **General District Wide Matters - provisions in relation to noise, light and signs in particular may be relevant to activities in the Natural Open Space Zone.**

Adjacent Local Authority Administration

Lands within the Natural Open Space Zone adjoin a number of other territorial authority boundaries not managed by Te Tai o Poutini Plan. Plan users need to apply care in regard to any potential cross boundary resource management issues and check the relevant District Plans of adjacent Territorial Authorities when considering activities on the edges of the Te Tai o Poutini Plan planning area.

NOSZ - Natural Open Space Zone Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.

Permitted Activities

NOSZ - R1	**Park Facilities and Park Furniture**
Activity Status Permitted Where: 1. The maximum building height above ground level is 5m; 2. Masts, poles, aerials and pou whenua must not exceed 7m in height; 3. The maximum gross floor area is 100m^2; 4. Buildings are setback a minimum 4.5m from road boundaries; and No building shall project beyond a building envelope defined by a recession plane as outlined in Appendix Two to commence 2.5m above any RESZ - Residential Zone or SETZ	**Activity status where compliance not achieved:** Restricted Discretionary

- Settlement Zone boundary ~~except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~. This standard does not apply to: i. Road boundaries; ii. Buildings on adjoining sites that have a common wall along the boundary; iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard; iv. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and v. Solar panels and solar water heaters provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically. **Advice Note:** **1. <u>Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.</u>**	
NOSZ – R2	**Educational Facilities and Research Facilities Ancillary to a Conservation Activity or a Recreation Activity**
Activity Status Permitted Where: 1. All performance standards for Rule NOSZ - R1 are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
NOSZ – R3	**Conservation Activities, Recreation Activities and Poutini Ngāi Tahu Activities**
Activity Status Permitted **Where:** **1.** All performance standards for Rule NOSZ - R1 are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
~~NOSZ – R4~~	**~~Temporary Camping Grounds~~**
~~Activity Status Permitted~~ ~~Where:~~ ~~3. Written notification to the Council of the activity is provided at least 10 working days prior to the activity commencing; and~~	**~~Activity status where compliance not achieved:~~** ~~N/A~~

~~4. Camping activity is restricted to 10 days per calendar year.~~ ~~**Advice Note:**~~ ~~3. Temporary Camping Grounds may also be required to comply with the Camping Ground Regulations 1985 administered by the relevant District Council.~~ ~~4. Where activities are located in Overlay Chapter Areas the relevant provisions also apply.~~	
~~**NOSZ – R5**~~	~~**Residential Activities**~~
~~**Activity Status Permitted**~~ ~~Where:~~ ~~4. This is ancillary to a conservation activity or recreation activity;~~ ~~5. The activity has a functional or operational need to locate in a NOSZ - Natural Open Space Zone; and~~ ~~**6.** All performance standards for Rule NOSZ - R1 are complied with.~~	~~**Activity status where compliance not achieved:** Discretionary~~
~~**NOSZ – R6**~~	~~**Retail Activities**~~
~~**Activity Status Permitted**~~ ~~Where:~~ ~~3. This is ancillary to a recreation activity or a conservation activity; and~~ ~~4. Performance Standards for Rule NOSZ - R1 are complied with.~~	~~**Activity status where compliance not achieved:** Discretionary~~
Restricted Discretionary Activities	
NOSZ – R4	**Temporary Camping Grounds**
Activity Status Restricted Discretionary **Where:** **1. Camping activity is restricted to 10 days per calendar year.** **Discretion is Restricted to:** **a. Design, position and location of any buildings or structures;** **b. Measures to mitigate landscape effects;** **c. Vehicle access and parking design and location; and** **d. Management of effects on natural character, landscape, historical values, Poutini Ngāi Tahu values, and biodiversity values.** **Advice Note:** **1. Temporary Camping Grounds may also be required to comply with the Camping Ground Regulations 1985 administered by the relevant District Council.**	**Activity status where compliance not achieved: Discretionary**

2. Where activities are located in Overlay Chapter Areas the relevant provisions also apply. **3. This rule does not apply to nohoanga entitlements granted to Poutini Ngāi Tahu as part of the Ngāi Tahu Treaty Settlement Act. Nohoanga entitlements are regulated under Rule NOSZ – R3 as part of Poutini Ngāi Tahu Activities.**	
NOSZ - R5	**Residential Activities**
Activity Status Restricted Discretionary **Where:** **1. This is ancillary to a conservation activity or recreation activity;** **2. The activity has a functional or operational need to locate in a NOSZ - Natural Open Space Zone; and** **3. All performance standards for Rule NOSZ - R1 are complied with.** **Discretion is Restricted to:** **a. Design, position and location of any buildings or structures;** **b. Measures to mitigate landscape effects;** **c. Vehicle access and parking design and location; and** **d. Management of effects on natural character, landscape, historical values, Poutini Ngāi Tahu values, and biodiversity values.**	**Activity status where compliance not achieved: Discretionary**
NOSZ - R6	**Retail Activities**
Activity Status Restricted Discretionary **Where:** **1. This is ancillary to a conservation activity or a recreation activity; and** **2. All performance Standards for Rule NOSZ - R1 are complied with.** **Discretion is Restricted to:** **a. Design, position and location of any buildings or structures;** **b. Measures to mitigate landscape effects;** **c. Vehicle access and parking design and location; and** **d. Management of effects on natural character, landscape, historical values, Poutini Ngāi Tahu values, and biodiversity values.**	**Activity status where compliance not achieved: Discretionary**
NOSZ - R7	**Community Facilities**

Activity Status Restricted Discretionary **Discretion is restricted to:** a. Design, position and location of the building; b. ~~Landscape treatment~~ **Measures to mitigate landscape effects**; c. Vehicle access and parking design and location; and d. Management of effects on natural character, landscape, historical values, **Poutini Ngāi Tahu values**~~and cultural values~~ and biodiversity values.	**Activity status where compliance not achieved:** N/A
NOSZ - R8	**Vehicle Access and Carparking areas**
Activity Status Restricted Discretionary Where: 1. This is ancillary to a Permitted Activity within the NOSZ - Natural Open Space Zone. **Discretion is restricted to:** a. ~~Landscape measures~~ **Measures to mitigate landscape effects**; b. Compliance with transport standards; c. Vehicle access and parking design and location; d. Stormwater management and treatment; and e. Management of effects on natural character, landscape, historical values, **Poutini Ngāi Tahu values** ~~and cultural values~~ and biodiversity values.	**Activity status where compliance not achieved:** Non-complying
NOSZ - R9	**Recreational Activities, Conservation Activities, Educational Facilities and Research Facilities, Poutini Ngāi Tahu Activities, Parks Facilities and Parks Furniture not meeting Permitted Activity Standards**
Activity Status Restricted Discretionary **Discretion is restricted to:** a. Design, position and location of any buildings; b. ~~Landscape measures~~ **Measures to mitigate landscape effects**; c. Vehicle access and parking design and location; and d. Management of effects on natural character, landscape, historical values, **Poutini Ngāi Tahu values**~~and cultural values~~ and biodiversity values.	**Activity status where compliance not achieved:** N/A
Discretionary Activities	
NOSZ - R10	**Retail and Residential Activities not meeting Permitted Activity Standards**
Activity Status Discretionary Where:	**Activity status where compliance not**

1. These are ancillary to a recreation activity, education activity or research activity or conservation activity.	**achieved:** Non-complying
NOSZ - R11	**New Cemeteries and Urupā**
Activity Status Discretionary	**Activity status where compliance not achieved:** N/A
NOSZ - R12	**Camping Grounds and Temporary Camping Grounds not meeting Permitted Activity Standards**
Activity Status Discretionary	**Activity status where compliance not achieved:** N/A
NOSZ - R13	**Any Other Activity not provided for within another Rule in the Zone**
Activity Status Discretionary	**Activity status where compliance not achieved: N/A**
Non-complying Activities	
NOSZ - R~~13~~5	**Retail Activities and Residential Activities not meeting Permitted or Discretionary Activity Standards**
Activity Status Non-complying	**Activity status where compliance not achieved:** N/A
NOSZ - R14~~5~~6	**Vehicle Access and Carparking not meeting Restricted Discretionary Activity Standards**
Activity Status Non-complying	**Activity status where compliance not achieved:** N/A
NOSZ - R15~~6~~7	**Commercial Activities not provided for in another Rule in the Zone**
Activity Status Non-complying	**Activity status where compliance not achieved:** N/A
NOSZ - R16~~7~~8	**Mineral Extraction Activities**
Activity Status Non-complying	**Activity status where compliance not achieved:** N/A
NOSZ - R17~~8~~9	**Industrial Activities ~~or any other Activity not provided for in another Rule~~**
Activity Status Non-complying	**Activity status where compliance not achieved:** N/A

OSZ	**Open Space Zone - Te Takiwā Pōaha**
Overview	

The purpose of the OSZ - Open Space Zone is to provide open spaces that are used predominantly for a range of passive and active leisure and recreational activities, along with limited associated facilities and structures. The West Coast/Te Tai Tai o Poutini open spaces vary in size from small neighbourhood parks to large sized parks where people can enjoy activities such as walking and cycling, skateboarding, swimming, surfing, camping and kicking a ball around. Some of these open spaces are located near waterbodies and the coast, others are in urban neighbourhoods and others form an important part of the district's shared pathway network.

The zone includes civic spaces, land with community facilities, cemeteries, campgrounds and nohoanga sites. Historic reserves and large areas of public conservation land fall within this zone. Grazing is sometimes undertaken within these areas for land management purposes. This zone includes areas that may also be used for a range of local purpose uses - for example municipal buildings, water supply, gravel reserves, quarries, campgrounds and cemeteries. In some cases**,** they **are** also the locations for quarrying and mineral extraction before the land is remediated for other open space uses.

These public open spaces are generally more open, with less built features and contribute to an attractive living environment for people on the West Coast/Te Tai o Poutini. They can also have important natural, cultural and historic heritage values.

Activities and uses on publicly owned land are required to obtain permission (such as a lease**,** ~~or a~~ licence **or concession**) from the relevant administering authority. This is in addition to any requirements under Te Tai o Poutini Plan and the RMA. All activities will also **need to be consistent with** ~~have regard to~~ any relevant reserve management plans and legislation (Reserves Act 1977 or Conservation Act 1987).

Land included within the Open Space and Recreation Zones adjoins a number of other territorial authority boundaries not managed by Te Tai o Poutini Plan. When considering activities close to territorial authority boundaries, plan users need to apply care with regard to managing any potential cross boundary resource management issue.

Relationship With Energy, Infrastructure and Transport provisions

The ENG Energy chapter contains rules applying to energy activities and renewable electricity generation activities throughout the district, and accordingly the rules in this chapter do not apply to these activities.

Similarly, the INF Infrastructure chapter contains rules applying to specified infrastructure such as telecommunications, wastewater, stormwater and water supply installations, pipelines and meteorological facilities and accordingly the rules in this chapter do not apply to those activities.

The TRN Transport chapter contains the rules around the development of the transport network and the performance standards that apply for construction of these facilities and accordingly the rules in this chapter do not apply to those activities. There are rules in relation to the establishment of carparking and vehicle access within the Open Space Zone however, and this relates to these facilities being developed to support the activities associated with the use of the open space, on the lands within the zone.

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities in the Sport and Recreation Zone including:

- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters** - –there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Sport and Recreation Zone. Specific information on

the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.

- **Natural Hazards** - natural hazards are widespread on the coast and in some locations natural hazard overlays may affect areas in the Sport and Recreation Zone. Information on natural hazard overlays and provisions can be found in the natural hazards chapter.
- **Ecosystems and Biodiversity - as areas of high ecological value, the provisions of the Ecosystems and Biodiversity chapter are particularly relevant to the Open Space Zone. The Ecosystems and Biodiversity chapter contains the provisions around the management of indigenous vegetation.**
- **Natural Features and Landscape - many areas of outstanding natural features or outstanding natural landscape will be located within the Open Space Zone. The Natural Features and Landscape chapter contains the provisions for building and earthworks within areas of outstanding natural features and outstanding natural landscapes.**
- **Natural Character and the Margins of Waterbodies** - in some locations areas of ~~Sport and Recreation~~ **Open Space** Zone may extend into the riparian margins of waterbodies. The Natural Character and the Margins of Waterbodies chapter contains provisions on how these areas must be managed.
- **Coastal Environment - where activities occur within the coastal environment, including areas of high or outstanding coastal natural character, the Coastal Environment chapter contains provisions for activities within these areas.**
- **General District Wide Matters** - provisions in relation to noise, light and signs, in particular may be relevant to activities in the ~~Sport and Recreation~~ **Open Space** Zone.

OSZ - Open Space Zone Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.

Permitted Activities

OSZ - R1	**Park Facilities and Park Furniture**
Activity Status Permitted Where: 1. The maximum building height above ground level is 7m; 2. The maximum gross floor area is 100m **per building**; 3. Buildings and are setback: **a.** 4.5m from the road **and rail designation** boundr**ies**~~ary~~; and b. 3m from any RESZ - Residential Zone or SETZ - Settlement Zone boundary. 4. External storage is screened by a 1.8m fence or landscaping so that it is not visible from any adjoining residential zone boundary;	**Activity status where compliance not achieved:** ~~Controlled~~ **Restricted Discretionary**

5. Fences, walls and retaining walls are a maximum 2m height above ground level; 6. No building shall project beyond a building envelope defined by a recession plane as outlined in Appendix Two to commence 2.5m above any RESZ - Residential Zone or SETZ - Settlement Zone boundary~~. except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~ This standard does not apply to: i. Road boundaries; ii. Buildings on adjoining sites that have a common wall along the boundary; iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard; iv. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and v. Solar panels and solar water heaters provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically; and 7. **No Parks Facilities or Parks Furniture are established in the Rifle Range Protection Area except that which is reasonably necessary for the operation of the Rifle Range.** **Advice Note:** **1. Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.**	
OSZ – R2	**Conservation Activities, Recreation Activities and Poutini Ngāi Tahu Activities**
Activity Status Permitted Where: 1. All performance standards for Rule OSZ - R1 are complied with; **and** **2. Within the Rifle Range Protection Area, Recreation Activities are restricted to Recreational Firearms Target Shooting.**	**Activity status where compliance not achieved:** Restricted Discretionary
OSZ – R3	**Community Facilities**
Activity Status Permitted Where:	**Activity status where compliance not achieved:** Restricted Discretionary

1. All performance standards for Rule OSZ - R1 are complied with; 2. ~~The community facility:~~ a. ~~Is provided for within an Open Space Management Plan for the site; or~~ b. ~~Was lawfully established at the time of notification of the Plan; and~~ **2.** Hours of operation are limited to: i. 7am to 10pm Sunday - Thursday; ii. 7am to 12pm midnight Friday and Saturday; except iii. No restriction on hours is in place for up to 12 days per calendar year; and iv. No restriction on hours is in place where the hall is in use for Civil Defence Emergency Management purposes.**; and** **3. No community facilities are located within the Rifle Range Protection Area except that which are reasonably necessary for the operation of the Rifle Range.**	
~~OSZ – R4~~	**~~Clubrooms~~**
~~Activity Status Permitted~~ ~~Where:~~ ~~4. All performance standards for Rule OSZ - R1 are complied with;~~ ~~5. The clubrooms:~~ ~~iii. Are provided for within an Open Space Management Plan for the site; or~~ ~~iv. Were lawfully established at the time of notification of the Plan; and~~ ~~6. Hours of operation are limited to:~~ ~~v. 7am to 10pm Sunday - Thursday;~~ ~~vi. 7am to 12pm midnight Friday and Saturday; except~~ ~~vii. No restriction on hours is in place for up to 12 days per calendar year~~ ~~viii. No restriction on hours is in place where the clubrooms are in use for Civil Defence Emergency Management purposes.~~	**~~Activity status where compliance not achieved:~~** ~~Restricted Discretionary~~
OSZ – R~~5~~4	**Educational Facilities and Research Facilities Ancillary to a Recreation or Conservation Activity**
Activity Status Permitted Where:	**Activity status where compliance not**

1. All performance standards for Rule OSZ - R1 are complied with; 2. The education or research facility is provided for within an Open Space Management Plan for the site; ~~and~~ 3. Hours of operation are restricted to 7am to 7pm Monday to Sunday and including public holidays**; and** **4. No educational facilities or research facilities are located within the Rifle Range Protection Area**.	**achieved:** Restricted Discretionary
OSZ – R~~6~~5	**Camping Grounds and Accessory Buildings Ancillary to the Camping Ground**
Activity Status Permitted Where: 1. All performance standards for Rule OSZ - R1 are complied with**; and** 2. **No camping grounds or accessory buildings are located within the Rifle Range Protection Area**.	**Activity status where compliance not achieved:** Restricted Discretionary
OSZ – R~~7~~6	**Retail Activities**
Activity Status Permitted Where: 1. This is ancillary to a recreation activity, a conservation activity or a camping ground facility; 2. No more than 25% of any building is allocated to the retail activity; 3. Except where this is associated with a camping ground, hours of operation are restricted to 7am to 7pm Monday to Sunday and including public holidays; ~~and~~ **4.** All performance standards for Rule OSZ - R1 are complied with**; and** **5. No retail activities are located within the Rifle Range Protection Area.**	**Activity status where compliance not achieved:** Restricted Discretionary
OSZ – R~~8~~7	**Residential Activities**
Activity Status Permitted Where: 1. This is ancillary to a recreation activity, a conservation activity or a camping ground, or to provide a caretaker unit for a park facility; ~~and~~ **2.** All performance standards for Rule OSZ - R1 are complied with**; and** **3. No residential activities or residential units are located within the Rifle Range Protection Area**.	**Activity status where compliance not achieved:** Restricted Discretionary
OSZ - R~~9~~8	**Vehicle Access and Car Parking Areas**

Activity Status Permitted Where: 1. The vehicle access or carparking is **ancillary to a conservation activity, a recreation activity or a camping ground** ~~established at the time of notification of the Plan or provided for within an Open Space Management Plan for the site~~; and 2. All relevant Transport Standards in Appendix One are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
OSZ – R~~10~~9	**Cemeteries and Urupā**
Activity Status Permitted Where: 1. This is a cemetery or urupā lawfully established at the date of notification of the Plan; and 2. All performance standards for Rule OSZ - R1 are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
OSZ – R10~~1~~	**Mineral Prospecting and Mineral Exploration**
Activity Status Permitted Where: 1. This is authorised under a prospecting or exploration permit from NZPAM; 2. Notice is provided to the relevant District Council Consent Authority 10 working days prior to the works commencing; 3. Areas are to be disturbed, topsoil shall be stripped and stockpiled and then replaced over the area of land disturbed as soon as possible and no later than 3 months after the disturbance has occurred; 4. The site shall be rehabilitated as far as is practicable to its original condition; ~~and~~ 5. All stripped material (including vegetation, soil and debris) is not deposited within any riparian margin of a waterbody and is contained in such a ~~m~~anner that it does not enter any waterbody or cause the destruction of habitat.**; and** 6. **No Parks Facilities or Parks Furniture are established in the Rifle Range Protection Area except that which is reasonably necessary for the operation of the Rifle Range.** **Advice Note:** 1. Where an activity subject to this rule is located within an Overlay Chapter area then compliance with the relevant Overlay Chapter rules is required. 2. Mineral Prospecting and Mineral Exploration within the	**Activity status where compliance not achieved:** Restricted Discretionary

	Pounamu and Aotea Overlays is subject to Rule SASM - R7.	

1. The activity may require a resource consent from the West Coast Regional Council. In particular there are restrictions in relation to earthworks within 100m of a wetland and work which may affect waterbodies.	
OSZ - R11~~2~~	**Agricultural, Horticultural or Pastoral Activities**
Activity Status Permitted Where: 1. All performance standards for Rule OSZ - R1 are complied with; and 2. The activity does not include: a. Intensive indoor primary production;~~ or~~ **b.** Stock sale yards**;** **c. the storage, treatment and disposal of solid and liquid animal waste; or** **d. farm quarries outside of areas specifically identified as Local Purpose (Quarry) Reserves;** **3. The activity does not involve indigenous vegetation clearance or new agriculture, horticultural or pastoral activities occurring within areas identified in Schedules 1 – 8; and** **4. Within the Rifle Range Protection Area only buildings that are reasonably necessary to carry out Agricultural, Pastoral or Horticultural Activities are established.** **Advice Note:** **1.** Refer to Rule SASM - R7 in the Sites of Significance to Māori Chapter where a farm quarry is proposed within the Aotea or Pounamu Overlays.	**Activity status where compliance not achieved:** Restricted Discretionary
~~**Controlled Activities**~~ **Restricted Discretionary Activities**	
OSZ - R12~~3~~	**Park Facilities and Park Furniture not meeting Rule OSZ - R1**
Activity Status ~~Controlled~~Restricted Discretionary **~~Matters of control are~~Discretion is Restricted to:** a. Design, position and location of any buildings; b. ~~Landscape measures~~ **Measures to mitigate landscape effects**; c. Vehicle access and parking design and location; ~~and~~ d. Management of effects on natural character, landscape, historical ~~and~~ ~~cultural~~ values, ecological and biodiversity values.**; and** **e. The safe and efficient operation of the rail corridor.**	**Activity status where compliance not achieved:** N/A
Notification	

1. **When making notification decisions in relation to this rule, the Council will be informed by Radio New Zealand in terms of the safety risks of electromagnetic coupling that could arise with the construction of structures greater than 18m in height within 1000m of the Cape Foulwind radio transmission site.**	
~~Restricted Discretionary Activities~~	
OSZ - R13~~4~~	**Recreational Activities, Conservation Activities, Educational F~~f~~acilities and Research Activities, Community Facilities ~~and Clubrooms~~, Poutini Ngāi Tahu Activities and Camping Grounds and Accessory Buildings not meeting Permitted Activity Standards**
Activity Status Restricted Discretionary **Discretion is restricted to:** a. Design, position and location of any buildings; b. ~~Landscape measures~~ **Measures to mitigate landscape effects**; c. Hours of Operation; d. Vehicle access and parking design and location; e. Management of wastewater, stormwater and water supply; ~~and~~ f. Management of effects on natural character, landscape, historical ~~and cultural~~ values, ecological and biodiversity values; **and** g. **The safe and efficient operation of the rail corridor.** **Notification** 1. **When making notification decisions in relation to this rule, the Council will be informed by Radio New Zealand in terms of the safety risks of electromagnetic coupling that could arise with the construction of structures greater than 18m in height within 1000m of the Cape Foulwind radio transmission site.**	**Activity status where compliance not achieved:** N/A
OSZ - R14~~5~~	**Residential Activities not meeting Permitted Activity Standards**

Activity Status Restricted Discretionary Where: 1. This is ancillary to a conservation or recreation activity or to provide a caretaker unit for a camping ground. **Discretion is restricted to:** a. Design, position and location of any buildings; b. ~~Landscape measures~~ **Measures to mitigate landscape effects**; c. Management of effects on conservation or recreation activities; d. SARZ	**Sport and Active Recreation Zone - Te Takiwā Hākinakina**

Overview

The purpose of the SARZ - Sport and Active Recreation Zone is to provide open space areas for a range of sport and recreation activities, including organised sport and recreation for local, district-wide and regional communities. This zone applies in parks, sports grounds and multi-sport facilities. Such areas will normally have associated buildings such as club rooms, changing sheds or toilet facilities. These spaces are areas where people can also enjoy informal exercise and leisure activities.

Sport and active recreation areas are predominantly characterised by large open space areas with associated buildings and facilities that vary in scale depending on the sport and recreation activities that take place there. It is generally accepted that the level of development in this zone is higher than other OSRZ - Open Space and Recreation Zones and that the sport and recreation activities that are anticipated to take place in this zone can generate noise, light and traffic effects in surrounding neighbourhoods.

Activities and uses on publicly owned land are required to obtain permission (such as a lease or a licence) from the Council as the administering authority. This is in addition to any requirements under Te Tai o Poutini Plan and the RMA. All activities will also have regard to any relevant reserve management plan and legislation (Reserves Act 1977).

Other Relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities in the Sport and Recreation Zone including:

- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters** - there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Sport and Recreation Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.
- **Natural Hazards** - natural hazards are widespread on the coast and in some locations natural hazard overlays may affect areas in the Sport and Recreation Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards chapter.
- **Ecosystems and Biodiversity –The provisions of the Ecosystems and Biodiversity chapter may be relevant to the Sports and Active Recreation Zone. The Ecosystems and Biodiversity chapter contains the provisions around the management of indigenous vegetation.**
- **Natural Features and Landscape - The Natural Features and Landscape chapter contains the provisions for building and earthworks within areas of outstanding natural features and outstanding natural landscapes.**
- **Natural Character and the Margins of Waterbodies** -in some locations areas of Sport and Recreation Zone may extend into the riparian margins of waterbodies. The Natural Character and Margins of Waterbodies chapter contains provisions on how these areas must be managed.
- **Coastal Environment - where activities occur within the coastal environment, including areas of high or outstanding coastal natural character, the Coastal Environment chapter contains provisions for activities within these areas.**
- **General District Wide Matters** - provisions in relation to Noise, Light and Signs, in particular may be relevant to activities in the Sport and Recreation Zone.

SARZ - Sport and Active Recreation Zone Rules

Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.

Permitted Activities

SARZ - R1	**Park Facilities and Park Furniture**
Activity Status Permitted Where: 1. The maximum building height above ground level is 10m; 2. Masts, poles, aerials and pou whenua must not exceed 7m in height; 3. The maximum gross floor area is 200m^2 **per building**; 4. Buildings are setback:	**Activity status where compliance not achieved:** ~~Controlled~~**Restricted Discretionary Activity**

i. 4.5m from the road **and rail designation** boundies~~ary~~; and ii. 3m from any Residential Zone or Settlement Zone boundary. 5. External storage is screened by a 1.8m fence or landscaping so that it is not visible from any adjoining residential zone boundary; 6. Fences, walls and retaining walls are a maximum 2m height above ground level; 7. No building shall project beyond a building envelope defined by a recession plane as outlined in Appendix Two to commence 2.5m above any RESZ - Residential Zone or SETZ - Settlement Zone boundary~~ except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~. This standard does not apply to: i. Road boundaries; ii. Buildings on adjoining sites that have a common wall along the boundary; iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard; iv. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and v. Solar panels and solar water heaters provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically. **Advice Note:** 1. **Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.**	
SARZ - R2	**Conservation Activities, Recreation Activities and Poutini Ngāi Tahu Activities**
Activity Status Permitted Where: 1. All performance standards for Rule SARZ - R1 are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
SARZ - R3	**Community Facilities**
Activity Status Permitted Where:	**Activity status where compliance not**

1. All performance standards for Rule SARZ - R1 are complied with; 2. The community facility is: a. Provided for within an Open Space Management Plan for the site; or b. Was lawfully established at the time of notification of the Plan; and 3. Hours of operation are limited to: i. 7am to 10pm Sunday - Thursday; ii. 7am to 12pm midnight Friday and Saturday; except iii. No restriction on hours is in place for up to 12 days per calendar year.; and iv. No restriction on hours is in place where the hall is in use for Civil Defence Emergency Management purposes.	**achieved:** Restricted Discretionary
~~**SARZ - R4**~~	~~**Clubrooms**~~
~~**Activity Status Permitted**~~ ~~Where:~~ ~~4. All performance standards for Rule SARZ - R1 are complied with; and~~ ~~5. The clubrooms:~~ ~~iii. Are provided for within an Open Space Management Plan for the site; or~~ ~~iv. Were lawfully established at the time of notification of the Plan; and~~ ~~6. Hours of operation are limited to:~~ ~~iv. 7am to 10pm Sunday - Thursday;~~ ~~v. 7am to 12pm midnight Friday and Saturday; except~~ ~~vi. No restriction on hours is in place for up to 12 days per calendar year.~~	~~**Activity status where compliance not achieved:** Restricted Discretionary~~
SARZ - R~~5~~4	**Educational Facilities and Research Facilities ancillary to Conservation or Recreation Activities**
Activity Status Permitted Where: 1. All performance standards for Rule SARZ - R1 are complied with; and 2. The facility is identified in a relevant Open Space Management Plan for the site.	**Activity status where compliance not achieved:** Restricted Discretionary
SARZ - R~~6~~5	**Retail Activities**

Activity Status Permitted Where: 1. This is ancillary to a recreation activity or a conservation activity; 2. No more than 25% of any building is allocated to the retail activity; 3. Hours of operation are restricted to 7am to 7pm Monday to Sunday and including public holidays; and 4. All performance standards for Rule SARZ - R1 are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
SARZ - R~~7~~6	**Residential Activities**
Activity Status Permitted Where: 1. This is ancillary to a recreation activity or a conservation activity; and 2. All performance standards for Rule SARZ - R1 are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
SARZ - R~~8~~7	**Vehicle Access and Carparking Areas**
Activity Status Permitted Where: 1. The vehicle access or carparking is provided for within an Open Space Management Plan for the site; and 2. All relevant Transport Standards in Appendix One are complied with.	**Activity status where compliance not achieved:** Restricted Discretionary
~~SARZ - R9~~	**~~Grandstands~~**
~~Activity Status Permitted~~ ~~Where:~~ ~~4. The grandstand is provided for within an Open Space Management Plan for the site; and~~ ~~5. The grandstand is setback:~~ ~~i. 4.5m from the road boundary; and~~ ~~ii. 3m from any Residential Zone or Settlement Zone boundary;~~ ~~6. The grandstand shall not project beyond a building envelope defined by a recession plane as outlined in Appendix Two to commence 2.5m above any RESZ - Residential Zone or SETZ - Settlement Zone boundary.~~	~~**Activity status where compliance not achieved:** Restricted Discretionary~~
~~**Controlled Activities**~~ **Restricted Discretionary Activities**	
SARZ - R~~10~~8	**Park Facilities and Park Furniture not meeting Permitted Activity Standards**

Activity Status Controlled **Matters of control are:** a. Design, position and location of any buildings; b. ~~Landscape measures~~ **Measures to mitigate landscape effects**; c. Vehicle access and parking design and location;~~ and~~ d. Management of effects on natural character, landscape, historical ~~and cultural~~ values and biodiversity values.**; and** e. **The safe and efficient operation of the rail corridor.**	**Activity status where compliance not achieved:** N/A

APPENDICES

Appendix 1 – Recommendations

PART A – INTRODUCTORY MATTERS

1. PRELIMINARY MATTERS

1.1. Introduction

1. Matters to do with our appointment and other preliminary matters applicable to all Hearing Panel's recommendations on the Proposed Te Tai o Poutini Plan (**pTTPP** or 'the Plan') are recorded and addressed in Recommendation Report 1.

2. This Recommendation Report relates to the Residential Zone - Ngā Takiwa Noho chapter from pTTPP. This chapter is contained in Part 3 – Area Specific Matters – Zones Section, of the pTTPP.

3. The Report contains the Hearing Panel's evaluations and recommendations to the TTPP Committee on the submissions and further submissions received on this section of Part 3 of the Plan.

4. The Residential Zones Section 32 Report[1] provides evaluations of the options for the management of Residential Zones through the combined Plan, including the regulatory framework key resource management issues, the evidence and research basis, including the consultation, information and analysis undertaken and evaluation of the options.

5. The Residential Zones Section 42A Officer's Report[2] ('s42A Report'), authored by Ms Lois Easton, a planner with Kererū Consultants, acting as the Reporting Officer, was circulated prior to the hearing.

6. The s42A Report provided an analysis of submissions and further submissions received; and made recommendations on changes to the notified plan provisions (the changes were included in Appendix 1 and the recommendation on all submissions as to either be accepted, accepted in part or rejected in Appendix 2).

7. Ms Easton subsequently provided a combined s42A Report[3] right of reply covering both the Residential Zones and Special Purpose Zones, which responded to key matters raised by the Hearing Panel. Recommendations of the Panel on the Special Purpose Zones are contained in the separate report for those zones.

8. The s42A Report assessed a total of 707 submission points and 109 further submission points across the Residential Zone chapter. It provided summaries of all the submissions and further submissions received and the relief sought; an analysis of the proposed changes to provisions; and recommendations on changes to the plan provisions (see Appendix 1 of s42A Report) and the accept/accept in part/reject recommendations for individual submission and further submission points (see Appendix 2 of the s42A Report).

9. The matters raised by submitters were grouped in the s42A Report in relation to each of the following key issues for the chapter:

[1] Te Tai o Poutini Plan – Section 32 Evaluation Report 11 Residential - Ngā Takiwā Noho
[2] Section 42A Report on Residential Zones
[3] s42A Right of Reply on Residential and Special Purpose Zones

(a) Definitions;

(b) General/Overview;

(c) Objectives

(d) Policies;

(e) Rules; and

(f) Zoning Maps.

10. A s32AA evaluation for the changes in each chapter was provided at the end of the s42A Report.

11. This Recommendation Report follows this same structure of the s42A Report. It provides a brief summary of the issues raised in submissions and further submissions, the s42A Report analysis and recommendations, submitter evidence and the Reporting Officer's reply evidence, before providing our evaluation and recommendation.

12. This Recommendation Report should be read in conjunction with the s42A Report and the tracked change version of the notified Plan provisions (attached as Appendix 1 to this Report). The tracked change version of the TTPP provisions forms an integral part of the decision, recording all recommended amendments (additions and deletions) to the notified TTPP provisions made by the Panel. The tracked change version of the TTPP shows the Panel's recommended changes to the notified provisions in **bold and underlining** indicating additions and ~~strikethrough~~ indicating deletions. If there is any discrepancy between this Recommendation Report and the tracked change version of the Plan, the tracked change version of the Plan shown in Appendix 1 of this Report must prevail.

13. This Recommendation Report contains the reasons for the Panel's recommendations. These comprise either adoption of the reasoning and recommendations of the original section 42A Reports or the Reporting Officer's reply evidence (Councils' right of reply post hearing adjournment), or a specific reasoning by the Panel.

14. Where the Panel recommends the TTPP provisions should remain as notified, it is because:

(a) The Panel has adopted the reasoning and recommendation of the s42A Report or addendum to retain the provision as notified; or

(b) The Panel has adopted the reasoning and recommendation to retain the provision as notified as recommended in the Reporting Officer's reply evidence; or

(c) The Panel has recommended to retain the provision as notified for reasons set out in this Recommendation Report.

15. Where there is a recommended change to a notified provision of the TTPP, it is because:

(a) The Panel has recommended amendments to a provision for reasons set out in this Recommendation Report in response to a submission point, which the s42A Report did not recommend; or

(b) The Panel adopted the reasoning and recommendation of the s42A Report to change the provision to that recommended in the original s42A Report; or

(c) The Panel has adopted the reasoning and recommendation to that recommended in the Reporting Officer's reply evidence; or

(d) A consequential change has been necessary following on from a decision in either (a), (b) or (c).

16. Where there may be a different recommendation between the s42A Report and the Reporting Officer's addendum or reply evidence (i.e., the recommendation by the Reporting Officer has changed as a result of hearing the evidence of submitters), unless the Panel decision specifically adopts the original s42A Report's reasoning and recommendations, the reasoning and recommendations in the (later) reply to evidence has been adopted and it must be taken to prevail.

17. If there are circumstances where the Panel consider that alternative relief is more appropriate than that requested in submissions and further submission to give effect to the RMA, NZCPS, national policy statements and/or RPS, but are still within the scope of the relief sought, the relevant recommendation clearly sets out the nature of the change and the reason for the change. This is recorded in this Recommendation Report.

18. If any changes are recommended to the provisions (since the Section 32A Report was completed) a further evaluation if required pursuant to section 32AA of the RMA has been undertaken. Any such circumstances are referred to in this Recommendation Report in sufficient detail to demonstrate a further evaluation was undertaken.

19. Clause 16(2) of the First Schedule of the RMA enables the Panel to recommend amendments to alter information, where such an alteration is of minor effect, or may correct any minor errors. In the Panel's recommendations below each section considered in Part C of this Report and in the tracked change version of the notified Plan provisions (Appendix 1 of this Report) records any such minor amendments.

1.2. Buller District Council - Alma Road – Interim Decision Request

20. The Panel received a written request from Buller District Council (**BDC**) on 11 June 2024 and again on 30 September 2024 seeking an early release of the decision (or the issue of an interim recommending report) on the rezoning of Alma Road, Westport Area, if the Panel is not able to complete their recommendation on submissions prior to December 2024.

21. This request was based on Council accessing Crown Infrastructure Acceleration Funding to underpin the proposed rezoning at Alma Road with the risk of the funding offer being withdrawn if the outcome of this decision is not known by December 2024.

22. The Panel responded to this request via Minute #46 on 5 October 2024. In brief, while the Panel recognises the difficulty BDC were facing, there were procedural and best practice constraints on the Panel's ability to respond to aspects of the request from the Council. The Panel did indicate that based on information received and heard to date, that it was able to send a strong signal that it did not identify impediments to the revised rezoning sought at the hearing but would not be in a position meet Council's critical December 2024 date.

1.3. Terminology in this Report

23. Throughout this Report, the following abbreviations will be used:

BDC	Buller District Council
Councils	Buller District Council, Grey District Council, and Westland District Council
Director General	Director General of Conservation
FENZ	Fire and Emergency New Zealand
Forest and Bird	Royal Forest and Bird Protection Society of NZ Inc (Forest and Bird)
GDC	Grey District Council
GRZ	General Residential Zone
Kāinga Ora	Kāinga Ora – Homes and Communities
KiwiRail	KiwiRail Holdings Limited
LLRZ	Large Lot Residential Zone
MRZ	Medium Density Residential Zone
MoE	Ministry of Education Te Tāhuhu o Te Mātauranga
NCZ	Neighbourhood Centre Zone
NPSUD	National Policy Statement for Urban Development
Poutini Ngāi Tahu	Te Rūnanga o Ngāi Tahu, Te Runanga o Ngāti Waewae, Te Rūnanga o Makaawhio
Planning Standards	National Planning Standards
RMA or the Act	Resource Management Act 1991
RPS	West Coast Regional Policy Statement
SASM	Sites or Areas of Significance to Māori
Te Mana Ora	Te Mana Ora (Community and Public Health) of the NPHS/Te Whatu Ora
Waka Kotahi	Waka Kotahi NZ Transport Agency
WDC	Westland District Council
WCRC	West Coast Regional Council

1.4. Hearing Arrangements

24. The hearing was held at the West Coast Regional Council Building on the 16 and 17 of July 2024. Some submitters appeared online by internet connection.

25. At the hearing, Ms Easton tabled a Planning Summary Statement to her s42A Report.

26. At the conclusion of the hearing, the Hearing Panel requested that Ms Easton respond to several questions that arose during the hearing. These are dealt with in Ms Easton's Right of Reply.

1.5. Appearances

27. The following submitters appeared at the hearing in relation to the residential zone chapter:

Ms Frida Inta for herself and on behalf of the **Buller Conservation Group** (online)

Ms Inger Perkins for herself (online)

Ball Developments Limited and Davis Oglivie and Partners Limited

- Ms Pauline Hadfield, Planner
- Mr Geoff Ball
- Mr Sean Fibs

Silver Fern Farms Limited

- Ms Jo Appleyard and Ms Tallulah Parker, Legal Counsel (online)
- Mr Steven Tuck, Planner (online)
- Mr Darran Humpheson**,** Acoustic Engineer (online)

Westport Pistol Club, Chris Hartigan, and Westport Rifle Club Incorporated

- Mr Chris Coll, Westport Rifle Club
- Ms Katherine McKenzie, Planner

New Zealand Heavy Haulage Association Incorporated

- Mr Jonathan Bhana-Thompson, Planner (online)
- Ms Kim and Mr Glen Scrivener – for themselves

Buller District Council

- Mr Craig Barr, Planner
- Ms Rebecca Inwood, Planner
- Mr Nathan Riley, Regulatory Manager BDC

1.6. Overview of submitter evidence received

28. For those appearing at the hearing, legal submissions were received from Ms Appleyard and Ms Parker on behalf of Silver Fern Farms (dated 2 July 2024).

29. For those appearing at the hearing, the following evidence and/or statements were received:

    (a) Ms Inger Perkins, on behalf of herself, summary statement (dated 16 July 2024)

    (b) Ms Pauline Hadfield, planning, on behalf of Ball Developments Limited and Davis Ogilvie and Partners Limited (dated 17 June 2024) and summary statements (dated 16 July 2024 and 17 July 2024);

    (c) Mr Steven Tuck, planning, on behalf of Silver Fern Farms (dated 14 June 2024) with a summary statement (dated 2 July 2024);

    (d) Mr Darran Humpheson, acoustics, on behalf of Silver Fern Farms (dated 14 June 2024) with a summary statement (dated 2 July 2024);

    (e) Ms Katherine McKenzie, planning, on behalf of Westport Pistol Club, Chris Hartigan, and Westport Rifle Club Incorporated (17 June 2024) and summary statement (dated 17 July 2024);

    (f) Mr Jonathan Bhana-Thomson, planning, on behalf of the House Movers Section of the New Zealand Heavy Haulage Association Incorporated; and

    (g) Ms Kim and Mr Glen Scrivener, on behalf of themselves, statement (dated 17 July 2024).

    (h) Mr Craig Barr, planning, on behalf of Buller District Council (dated 17 June 2024) and summary statement (dated 17 July 2024);

30. Following receipt of the s42A Report concerning Residential Zones:

    (a) KiwiRail - advised (dated 17 June 2024) that it did not wish to be heard at the hearing and requested that their correspondence be tabled as a record of KiwiRail's position on safety setbacks from the rail corridor in the Residential Zone.

    (b) Fire and Emergency NZ – advised (dated 5 July 2024) that there was generally a high degree of support from the reporting officer for its submission points and opted not to attend the hearing. They requested that their correspondence letter be tabled at the hearing.

    (c) Ministry of Education (**MoE**) – advised (dated 15 July 2024) that they would not be attending the hearing and requested that their correspondence letter be tabled with the Hearing Panel. This correspondence confirmed that MoE requested that their original submission points and positions be retained.

31. Following the hearing, the Panel issued the following minutes of relevance to the residential chapter:

(a) Minute 34 – Following the Residential and Special Zone hearing held on 16-17 July at Greymouth, a minute (dated 22 July 2024) was issued by the Panel providing direction around the provision of further information from several submitters, some of which had already been submitted prior to this minute being issued. All further information was directed to be submitted by 16 August 2024.

(b) Minute 46 – Following the request from BDC for a recommendation on the rezoning of the Alma Road area to be released early, or the issue of an interim recommending report to satisfy a Kainga Ora condition for funding for the development. In its minute (dated 5 October 2024), the Panel recognised the difficulty BDC faced in this regard but, due to procedural and best practice constraints, confirmed that it would not be in a position to provide these recommendations until mid-2025.

32. Following the hearing, the subsequent further information received was as follows:

(a) Silver Fern Farms (dated 17 July 2024) – Correspondence received from Mr Tuck concerning operational information about Silver Fern Farms Hokitika.

(b) Buller District Council (dated 15 August 2024) – Correspondence received from Mr Pickford (CEO BDC) concerning further information requested in Minute 34 of the Hearing Panel.

(c) M. Delleca (dated 25 July 2024) – Correspondence received to provide additional background and knowledge of the Alma Road area. This information was not specifically requested by the Panel but was received and acknowledged.

1.7. Right of Reply

33. Ms Easton provided a written Right of Reply (dated 23 August 2024) addressing questions that arose from the Panel during the hearing. This Right of Reply included an updated Appendix 1 showing tracked changes to the notified provisions (Attachment 1),

34. A joint Right of Reply from Ms Easton and Ms Belgrave (Reporting Officers) was received on 7 October 2024. This reply concerned setback requirements in relation to the rail corridor, which applied to several different zones, including the Residential Zone.

35. A joint Right of Reply from Ms Easton, Ms Belgrave and Ms Evans (Reporting Officers) was received on 17 October 2024. This Reply pertained to specific submission points of Silver Fern Farms (**SFF**) related to setbacks and zoning surrounding the SFF Hokitika site.

1.8. Procedural Steps and Issues

36. No procedural matters were raised at the hearing.

1.9. Site Visits

37. As part of this hearing, we undertook site visits informed by matters raised in submissions and further information in response to Minute 34. Including, but not limited to:

Westland

- Hokitika residential around the rail corridor – houses off Sewell Street and SH6

- Hokitika Revell St (between Hampden St and Spencer St) Medium Density Area
- Silver Fern Farms Hokitika site and adjacent residential development (2 visits)

Grey

- Moana/Lake Brunner area
- 11 Lake Brunner Road – Klempl Block, Moana
- Cobden
- Dobson – Taylorville – State Highway 7
- Kaiata Park
- Greymouth

Buller

- Alma Road/McPadden Road Terrace
- Westport

PART B - STATUTORY REQUIREMENTS AND DOCUMENTS

38. Residential Zones – Ngā Takiwā Noho is one of six zone-based sections located in Part 3 – Area Specific Matters – Te Wāhanga 3 – Ngā Take a Ia Rohe. The Residential Zone (**RESZ**) section has shared objectives and policies, with separate rules that apply across the General Residential Zone – Te Takiwā Noho Whenua Nui (**GRZ**), Large Lot Residential Zone – Te Takiwā Noho Whenua Nui (**LLRZ**), and Medium Density Residential Zone – Te Takiwā Noho Āhua Mātotoru (**MRZ**).

39. The Section 32 Report outlined the relevant statutory considerations applicable to residential activities and the relationships between the sections of the RMA and higher order documents.

40. The section 42A Report highlighted the relevant matters from section 6, 7 and 8 of the RMA, the New Zealand Coastal Policy Statement (NZCPS), any relevant National Policy Statement including the National Policy Statement for Urban Design (NPSUD), the West Coast Regional Policy Statement (**RPS**), Regional Plans, District Plans of adjacent territorial authorities, iwi management plans and the National Planning Standards.

41. Clause 10 of the First Schedule states that it is not necessary to provide decisions on individual submissions. Recommendations of the Panel are made within the scope of the requested relief, either individual submissions or groups of submissions making similar requests, as specified in the reasons for recommendation. References to relevant submissions are made in the footers.

42. The National Planning Standards Mandatory Directions Clause 8.1 requires that only zones listed within Table 13 of the Planning Standards are to be used, except for Special Purpose Zones, or in the case of a combined regional and district plan, a zone that is both seaward and landward of mean high-water springs. The Planning Standards lists General Residential Zones, Large Lot Residential Zones, and Medium Density Residential Zones on its mandated list. We are satisfied that the Plan structure is consistent with this national direction.

PART C – SUBMISSIONS, EVIDENCE, EVALUATION AND RECOMMENDATIONS

2. RESIDENTIAL

2.1. Residential Definitions

Submissions and Further Submissions

43. Six submissions and three further submissions relating to definitions relevant to the Residential Zones topic were summarised in a Table on pages 9-10 of the s42A Report. The Panel has considered the relevant submissions, which included support for notified definitions, along with requests for new definitions to be added to the Plan and has adopted the summaries in the s42A Report.

Section 42A Report

44. The support of submitters Federated Farmers (S524.013) concerning the definition of "*minor residential unit*" and Ara Poutama (S349.002) (supported by Kāinga Ora FS58.002), concerning the definitions of "*minor residential unit*", "*residential activity*", "*residential unit*", and "*supported residential accommodation*", was acknowledged by Ms Easton.

45. Ms Easton did not support Ara Poutama's (S349.004) request (opposed in a further submission by Kāinga Ora (FS58.001)) for a new definition for "*household*" and considered that it was better to leave the term undefined to avoid any unintended narrowing of the term.

46. Ms Easton did not support David Ellerm's (S581.009) request for a new definition for the term "*residential character*" because the term was not widely referenced within the objectives and policies, and was a well-understood term in the planning field.

47. Ms Easton did not recommend any changes to the definitions in the Plan in response to these submissions.

Hearing and Submitter Evidence/Statements

48. No written evidence was provided concerning residential definitions or specifically raised by any submitters at the hearing.

Reporting Officer Reply Evidence

49. In response to questions from the Panel, concerning the submission points of Frida Inta and Buller Conservation Group[4] on the residential rules generally, Ms Easton provided further consideration of whether the word "*allotment*" should replace "*site*" in the residential zone rules. Ms Easton had made an earlier recommendation in the Introduction and General Provisions s42A Report, which included the Plan definitions, to delete the definition of "*site*". This was due to unintended consequences where the term "*site*" could be used in a different context, such as, where it applied to archaeological site, heritage site, and Sites or Areas of Significance to Māori (**SASM**). Therefore, where these provisions are used, the whole term, e.g. "*archaeological site*", is recommended to be used. As a result, changes will be required

[4] S552.007, S552.008, S553.007, S553.008

to some District-Wide Matters; however, the definition of "*site*" is now recommended to remain unchanged.[5]

50. Ms Easton responded to a further definition-related matter concerning the definition of "*residential unit*"[6]. She also responded to questions from the Panel that arose concerning submissions regarding the Residential Visitor Accommodation Rules, GRZ-R6, LLRZ-R6, and MRZ-R6. These rules are discussed further below under the Residential Rules section, but it is noted here that Ms Easton said that the definition of "*Homestay*" referred to "*the use of a residential unit*" and therefore she considered that issues of interpretation within the visitor accommodation-related rules did not arise.

Hearing Panel's Evaluation

51. The Panel agrees with Ms Easton that the appropriate option is to leave the term "*Household*" undefined to avoid any unintended narrowing of the term, which could lead to unintended outcomes. We consider the context in which any questions, if any, arise as to the meaning of the word "*Household*" is likely to be highly influential if not determinative.

52. The Panel agrees with Ms Easton that the term "*residential character*" is not widely referenced within the Plan's objectives and policies and is a well-understood term in planning. Therefore, we agree that there is no need to include a definition.

53. We agree with Ms Easton, for the reasons set out in her Reply, that the definition of "*site*" should not be deleted and replaced with "*allotment*". We also agree that where the word is used for an archaeological site, heritage site, and site or area of significance to Māori, the whole term, such as "*archaeological site"* should be used to improve clarity. This requires consequential Plan-wide amendments, and in particular to provisions in the Historic Heritage (**HH**) Chapter and the SASM Chapter.

54. We agree with and accept Ms Easton's response to a further definition-related matter concerning the definition of "*residential unit*"[7]. We agree that the definition of "*Homestay*" refers to "*the use of a residential unit*" and therefore issues of interpretation within the visitor accommodation-related rules do not arise.

Hearing Panel's Recommendation

55. The Panel recommends the definition of "*Residential Unit*" is retained as notified.

RESIDENTIAL UNIT	means means a building(s) or part of a building that is used for a residential activity exclusively by one household and must include sleeping, cooking, bathing and toilet facilities.

56. The Panel recommends the definition for "*site*" within the Introduction and General Provisions Chapter of the Plan is retained as notified, as follows:

[5] Para 6 – s42A Right of Reply
[6] Paras 12-17 - s42A Right of Reply
[7] Paras 12-17 - s42A Right of Reply

SITE	means (a) an area of land comprised in a single record of title as per the Land Transfer Act 2017; or (b) an area of land which comprises two or more adjoining legally defined allotments in such a way that the allotments cannot be dealt with separately without the prior consent of the council; or (c) the land comprised in a single allotment or balance area on an approved survey plan of subdivision for which a separate record of title as per the Land Transfer Act 2017 could be issued without further consent of the Council; or (d) despite paragraphs (a) to (c), in the case of land subdivided under the Unit Titles Act 1972 or the Unit Titles Act 2010 or a cross lease system, is the whole of the land subject to the unit development or cross lease.

57. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below[8] are accepted or accepted in part, and recommend the following provisions of the Historic Heritage and SASM Chapters within the District-Wide Matters – Historical and Cultural Values Chapter of the Plan are amended.

2.2. Residential General/Whole Chapter including the Overview

Submissions and Further Submissions

58. Nine submission points relating to general matters or the whole Residential Zones (**RESZ**) topic were summarised in a Table on pages 11-12 of the s42A Report. The Panel has considered the relevant submissions, which included a range of support for notified provisions or amendments related to general matters, and adopts the summaries in the s42A Report.

Section 42A Report

59. The support of BDC (S538.271) regarding relevant subdivision standards, was noted by Ms Easton.

60. The submissions of Inger Perkins (S462.034) and Richard Herring (S16.001) sought that the Plan introduce provisions that address air quality issues caused by the burning of rubbish and use of wood burners. Ms Easton did not support these submissions and considered air quality was a matter regulated by the WCRC and their Regional Air Plan.

61. Forest and Bird (S560.369) sought that the Residential Chapter be amended to include a reference to the provision of the Natural Environment and District-Wide Chapters to make it clear that the provisions of these chapters also apply. Ms Easton agreed with this

[8] Frida Inta S553.007 & S553.008, Buller Conservation Group S552.007 & S552.008

submission and recommended that this reference be included in the Overview section of each of the RESZ, GRZ, LLZ and MRZ chapters.

62. Scenic Hotel Group (483.007) sought to retain the approach that Airbnb be treated as a commercial activity in the Plan. Ms Easton clarified that Airbnb was not treated as a commercial activity in the Plan and was considered a residential visitor accommodation activity subject to various standards to be classified as a permitted activity, such as being ancillary to a residential activity. She did not support this submission or recommend any amendments in relation to it.

63. Davis Ogilvie and Partners Ltd (S465.036) sought amendments to the rules for outdoor living spaces in the GRZ and MRZ (as well as the NCZ) to include a minimum dimension or 'shape factor'. Ms Easton agreed with this submission and made a recommendation to include a minimum dimension (e.g. width or depth) of 3m for the GRZ and MRZ.

64. Frank and Jo Dooley (S478.003) sought to amend the RESZ rules to include provisions related to the management of sites that will be rezoned, providing for these rezonings where a complete infrastructure plan is in place. Ms Easton did not support this submission, noting that the rules for permitted new residential units and buildings require connections to community water supply and wastewater networks, while stormwater must not drain to any public road except for secondary flow purposes. She noted that there were servicing requirements for any new subdivision in the residential zone.

Hearing and Submitter Evidence/Statements

65. Ms Hadfield confirmed she agreed with the recommendation in the s42A Report for a 3m minimum dimension to apply to outdoor living spaces where required under RESZ provisions. She also suggested that this should apply to other zones where an outdoor living space was required, such as Rule SVZ–R1. This matter is addressed under the Special Purpose Zone Recommendation Report.

66. The tabled statement from KiwiRail (dated 17 June 2025) noted a 5m setback for buildings from the rail corridor boundary was sought in all zones adjacent to the rail corridor, except the Commercial Zone, Natural Open Space Zone (**NOSZ**) and the Open Space Zone (**OSZ**) where a 4.5m setback was sought. It highlighted the evidence of Ms Heppelthwaite (for Hearing Topic 1) regarding the importance of providing an adequate setback for safety and to protect the rail corridor.

67. No other written evidence was provided concerning the RESZ Chapter as a whole at the hearing.

Reporting Officer Reply Evidence

68. In response to queries raised by the Panel, Ms Easton further addressed the regulation of discharges from indoor or outdoor domestic fires in relation to the Objectives (general) section.

69. Ms Easton also addressed the Panel's query of whether there was sufficient scope to require that any residential development undertaken without connecting to reticulation should be a non-complying activity, as opposed to discretionary. She noted there were no submissions that specifically related to this request; and that the submission of Frank and Jo Dooley was

more concerned with the impacts on existing landowners where rezoning has occurred and sought that rules were only triggered where a complete infrastructure plan was not in place.

70. In relation to KiwiRail's (S442.093) submission, Ms Easton confirmed that she had met with Ms Belgrave on 9 September 2024, who was the s42A Reporting Officer for the Industrial Zone and Commercial and Mixed Use Zone Chapters. She noted they had prepared a joint Right of Reply dated 7 October 2024, with a particular view to agreeing setback requirements in the permitted activity standards for the zone rules concerning the rail corridor. Regarding the RESZ Chapter, both planners agreed that setbacks from the rail corridor designation boundary for buildings should be 1.5m for the GRZ and MRZ, and 4m for the LLRZ. Both planners considered that a 5m setback (as sought by KiwiRail) was excessive and not appropriate when considering the nature and frequency of all rail movements.

71. Ms Easton also responded to a question from the Panel regarding the submission from KiwiRail and how their request should be addressed in relation to the LLRZ. She noted that the railway line did not traverse any part of the LLRZ and therefore did not need to provide for any specific setback.

Hearing Panel's Evaluation

72. The Panel adopts the reasoning and recommendations put forward by Ms Easton that air quality is a matter regulated by the WCRC under the Regional Air Plan; and does not need to be addressed in the Plan to avoid duplication. We consider Ms Easton appropriately addressed discharges from indoor or outdoor domestic fires and the potential for nuisance issues within her Reply.

73. The Panel agree with Ms Easton's reasoning and recommendation to include a reference to the provisions in the Natural Environment and District-Wide chapters to make it clear that the provisions of these chapters also apply. We agree that this reference should be included in the Overview section of each of the RESZ chapters – GRZ, LLRZ, MRZ to provide clarity.

74. The Panel note that Airbnb accommodation is not treated as a commercial activity in the Plan, but is considered a residential visitor accommodation activity, which is subject to various standards to be classified as a permitted activity, such as being ancillary to a residential activity. We accept this is appropriate and note that no submission sought a change in status for Airbnb activities.

75. The Panel adopt Ms Easton's reasoning and recommendation to include outdoor living spaces in the Plan for GRZ, MRZ and Neighbourhood Centre Zone (**NCZ**). We consider her recommendation of including a minimum dimension of 3m to be appropriate for outdoor space and note Ms Hadfield agreed with this.

76. The Panel adopt Ms Easton's reasoning and agree that including new plan provisions that only allow rezonings where a complete infrastructure plan is in place is unnecessary because the existing rules for permitted new residential units and buildings require connections to community water supply and wastewater networks, while stormwater must not drain to any public road except for secondary flow purposes. We agree that no submissions sought that activity be a non-complying activity, as opposed to discretionary, if a subdivision or development did not connect to reticulation.

77. The Panel notes that concerns in relation to the Plan requiring new development to connect to existing reticulated water, stormwater and wastewater systems are addressed in the Infrastructure Chapter and Subdivision Chapter Recommendation Reports.

78. The Panel accept the joint evaluation of Ms Easton and Ms Belgrave in relation to setbacks for buildings from the rail corridor designation boundary of 1.5m for the GRZ and MRZ; and that a 5m setback in the LLRZ would be excessive and inappropriate when considering the nature and frequency of all rail movements. We agree that, given the railway line does not traverse any part of the LLRZ, it is not necessary to provide for any specific setback within the LLRZ provisions. We agree with the Reporting Officers that a 5m setback from the rail corridor designation boundary would capture a very large area of land in addition to the rail corridor.

79. The Panel notes that Ms Easton did not provide a comment on Brendan Te Amo's (S85.001) submission, but we note that this submission supports the general direction of all proposed new zonings in the Plan.

Hearing Panel's Recommendation

80. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommend amendments are made to the **GRZ, LLRZ and MRZ Overviews** and **Rule GRZ-R1** and **Rule MRZ-R1**, as follows:

GRZ Overview **LLRZ Overview** **MRZ Overview**	Other Relevant Te Tai o Poutini Plan Provisions It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities in the General Residential Zone including: … • **Natural Character and Margins of Waterbodies -**in some locations areas of General Residential Zone may extend into the riparian margins of waterbodies. The Natural Character and Margins of Waterbodies Chapter contains provisions on how these areas must be managed. • **Ecosystems and Biodiversity – where indigenous vegetation clearance is proposed within a Residential Zone, the provisions of the Ecosystems and Biodiversity chapter apply**. [9] • **Subdivision** - The Subdivision Chapter sets out the requirements for the development of new infrastructure and connections as part of subdivision activities. …

GRZ -R1	**Residential Activities and Residential Units and Accessory Buildings Activity Status Permitted** Where: …

[9] Royal Forest and Bird Protection Society S560.369

	6. A minimum of 30m^2 of outdoor living space is provided per residential unit and 12m^2 per minor residential unit which is separate to the outdoor space for the principal dwelling and excluding any parking and manoeuvring areas~~;~~ **and the outdoor living space must have a minimum dimension of 3m;** [10] … 10. Buildings are setback a minimum of **1.5m from the railway corridor**[11] and 1m from all other site boundaries, except that: i. Duplexes do not require a setback from the side boundary of the other duplex unit; and ii. Setbacks are not required from adjacent residential boundaries where neighbouring property owner's written approval is provided to the Council 10 working days prior to the works commencing. …

Setbacks are not required from adjacent residential boundaries where neighbouring property owner's written approval is provided to the Council 10 working days prior to the works commencing. …

2.3. Residential Objectives

Submissions and Further Submissions

81. Nine submission points and one further submission point relating to the Residential Objectives (as a whole) were summarised in a Table on pages 13-14 of the s42A Report. Six submission points sought to retain the three objectives as notified.

82. The submissions by the Buller Conservation Group (S552.168) and Frida Inta (S553.168) sought the introduction of a new objective regarding air pollution within residential areas.

83. The Te Tai o Poutini Plan Committee (S171.008) also sought an additional objective regarding residential development, intensification, or managed retreat. The further submission from SFF (FS101.038) opposed this submission and considered that it should be subject to

[10] Divis Ogilvie & Partners Limited S465.036
[11] KiwiRail Holdings Limited S442.093
[12] Divis Ogilvie & Partners Limited S465.036
[13] KiwiRail Holdings Limited S442.093

additional direction, particularly concerning potential reverse sensitivity effects raised by any potential rezonings.

84. Four submission points and one further submission point supported retaining Objective **RESZ-O1** as notified. One submission requested amendments. These were summarised in a Table on Pages 14-15 of the s42A Report.

85. One submission point and one further submission relating to **RESZ-O2** were summarised in a Table on page 15 of the s42A Report. This submission and a further submission supported the retention of the objective as notified.

86. Five submission points relating to **RESZ-O3** were summarised in a Table on page 15 of the s42A Report. Two submissions supported the retention of the objective as notified, and three sought amendments.

87. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

Section 42A Report

RESZ - Objectives (General)

88. Concerning the objectives (as a whole), Ms Easton acknowledged the support from the submitters[14] that sought to retain the objectives as notified.

89. Ms Easton did not support Frida Inta and the Buller Conservation Group's request a new objective to address air pollution because she considered air quality was not a matter within the jurisdiction of the district plan and was a regional council function.

90. Ms Easton did not support Te Tai o Poutini Committee's request for a new objective because she considered the three existing objectives were sufficient in addition to the urban form and development Strategic Direction in the Plan, which guided residential and other urban zones. She also acknowledged the further submission from SFF opposing this request due to concerns about reverse sensitivity effects and noted this was addressed under the zoning section of this chapter, as well as the Strategic Direction section of the Plan.

91. Ms Easton made no recommended changes to the objectives based on these submissions.

RESZ - O1

92. Ms Easton acknowledged the support from the four submission points and one further submission point[15] that sought to retain the objective as notified.

93. Ms Easton did not support Waka Kotahi NZTA's (S450.239) request the additional wording to RESZ-O1 because she considered it was unnecessary as accessibility for walking and cycling was already part of the general term "*infrastructure*" included in the objective wording.

94. Ms Easton recommended retaining RESZ-O1 as notified.

[14] S567.450, S558.396, S566.396, S538.473, S181.035
[15] S349.009, S190.832, FS58.0135, S573.021, S608.714

RESZ - O2

95. Ms Easton acknowledged the support from the one submitter and further submitter[16] that sought to retain the objective as notified.

96. Ms Easton recommended retaining RESZ-O2 as notified.

RESZ - O3

97. Ms Easton acknowledged the support from the two submitters[17] that sought to retain the objective as notified, noting that amendments were recommended in response to other submissions.

98. The s42A Report did not support the submission made by SFF (S441.063) to replace "*area"* with "*zone*" because Ms Easton considered that the term "*area"* was more appropriate for an objective that affected multiple zones.

99. Ms Easton recommended retaining RESZ-O3 as notified.

Hearing and Submitter Evidence/Statements

100. Ms Perkins, representing herself, highlighted that the Regional Air Quality Plan did not adequately regulate the burning of rubbish on residential properties. She noted that this matter was currently covered in a bylaw for BDC and GDC, which should also be adopted by WDC, and included in the requirements in the TTPP.

101. Mr Tuck, for SFF, reiterated concern that the existing effects from the Hokitika site were unlikely to be completely internalised to meet urban residential amenity expectations. He therefore continued to oppose the new residential objective sought by the TTPP Committee, which sought residential rezoning for new areas of residential development, to avoid reverse sensitivity effects. He noted he had recommended the introduction of a new objective specific to the SFF site that was focused on protecting the site from reverse sensitivity effects from activities in residential zones. He acknowledged that a site-specific caveat to zone-wide objectives was not an ideal solution. Mr Tuck highlighted the primary relief sought was changes to the zone configuration adjacent to the SFF and that he considered this was a more efficient and effective method to manage reverse sensitivity effects.

Reporting Officer Reply Evidence

102. Ms Easton responded to the regulation of discharges from indoor or outdoor domestic fires, which were not currently regulated in the WCRC Regional Air Plan and were regulated under bylaws enacted under the Health Act 1956 rather than the RMA. She noted the current Air Plan from 2001 predated the National Environmental Standard for Air Quality (2004) and its more recent 2020 amendments. She highlighted the WCRC had commenced a review of the Air Plan and considered that the matter of discharges from wood burners and outdoor fires was more appropriately addressed within the scope of this review rather than the TTPP.

103. Ms Easton further addressed the submission of SFF and the ability to manage potential reverse sensitivity effects and considered it was best addressed in the approach to adjacent

[16] S190.833, FS33.37
[17] S190.834, S456.039

zoning and setbacks. Her view was that a General Rural Zone (**GRUZ**) (as requested by SFF) would not result in a reduced likelihood of complaints compared to the proposed Rural Lifestyle Zone (**RLZ**); and that the inclusion of a setback for activities within the General Industrial Zone (**GIZ**) from rural zoned boundaries could address this issue. The Panel notes that the recommended rezoning of the land adjacent to the SFF from GRZ to RLZ is discussed further under the Residential Zoning section of this Report.

104. No further specific points were made in Ms Easton's Right of Reply regarding the remainder of the objectives and no further recommended changes were been made to the wording of the three residential objectives from the notified version.

Hearing Panel's Evaluation

105. The Panel agrees with the reasoning provided by Ms Easton, which supports her view that introducing a new objective to address air pollution within residential areas is unnecessary. We agree that air quality is a matter for the WCRC and the Regional Air Plan and should not be addressed in the TTPP.

106. The Panel agrees with the reasoning provided by Ms Easton, that introducing an additional objective in relation to residential development, intensification, or managed retreat is unnecessary. We agree that the three existing objectives are sufficient given the urban form and development Strategic Direction in the Plan guiding residential and other urban zones (e.g. CCR-O1, CCR-P4).

107. In relation to Objective **RESZ-O1,** we agree with Ms Easton's reasoning and recommendation that the additional wording requested by Waka Kotahi NZTA is unnecessary because accessibility for walking and cycling is already part of the general term "*infrastructure*" included in the objective wording. We therefore recommend that RESZ-O1 remain as notified.

108. The Panel accept Ms Easton's recommendation to retain **RESZ-02** as notified.

109. In relation to Objective **RESZ-O3,** the Panel agree with Ms Easton's reasoning and recommendation that use of the word "*area*" within this objective is more suitable than the word "*zones*" because this objective affects multiple zones. We accept Ms Easton's recommendation to retain RESZ-03 as notified.

110. The Panel consider it is not appropriate to include a new objective specific to SFF's Hokitika site. We agree with Ms Easton that adjacent land zoning and setbacks is a better approach to protect the existing site from potential reverse sensitivity effects from land use changes. We record our recommendations on this issue where we consider the appropriate zoning of the adjacent land in this Report and in the Recommendations Reports for Rural Zones, Noise and the Industrial chapters.

Hearing Panel's Recommendation

111. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends no changes to the notified **Residential Objectives** as follows:

RESZ - O1	To provide for a variety of housing forms and densities in the main towns of the West Coast/Te Tai o Poutini to enable individual residential lifestyle options while ensuring developments are serviced with all required infrastructure.
RESZ - O2	To maintain or enhance the distinctive character, amenity and heritage values of residential areas, build community resilience and protect these areas from the adverse effects of inappropriate development.
RESZ - O3	To provide for a range of non-residential activities within RESZ - Residential Zones where the effects are compatible with the residential character, scale and amenities and the cultural and historic heritage values of the area.

2.4. Residential Policies

Submissions and Further Submissions

112. Eleven submission points and three further submission points relating to the RESZ policies (as a whole) were summarised in the Table on pages 16-17 of the s42A Report. Six submissions sought to retain all policies as notified. Five submissions sought to add new policies while three of these submission points were opposed by further submissions.

113. Two submission points and one further submission in support of Policy **RESZ-P1** were summarised in the Table on page 17 of the s42A Report.

114. Six submission points relating to Policy **RESZ-P2** were summarised in the Table on pages 17-18 of the s42A Report. Three submission points supported the retention of the policy as notified, and three sought amendments.

115. One submission point in support of Policy **RESZ-P3** as notified was summarised in the Table on page 18 of the s42A Report.

116. Six submission points relating to Policy **RESZ-P4** were summarised in the Table on page 18 of the s42A Report. Four of these submissions sought to retain the policy wording as notified. Two sought amendments. No further submissions were received on this policy.

117. Three submission points relating to Policy **RESZ-P5** were summarised in the Table on pages 18-19 of the s42A Report. One submission supported the retention of the policy as notified, and two sought amendments.

118. One submission point in support of Policy **RESZ-P6** as notified was summarised in the Table on page 19 of the s42A Report.

119. One submission and two further submission points supporting Policy **RESZ-P7** as notified were summarised in the Table on page 19 of the s42A Report.

120. Two submission points supporting Policy **RESZ-P8** as notified were summarised in a Table on page 19 of the s42A Report.

121. Two submission points supporting Policy **RESZ-P9** as notified were summarised in a Table on page 19 of the s42A Report.

122. Three submission points relating to Policy **RESZ-P10** were summarised in a Table on pages 19-20 of the s42A Report. Two submissions supported the retention of the policy as notified, while the third supported it in part, subject to consistency in wording with earlier policies.

123. Two submission points supporting Policy **RESZ-P11** as notified were summarised in a Table on page 20 of the s42A Report.

124. Two submission points supporting Policy **RESZ-P12** as notified were summarised in a Table on page 20 of the s42A Report.

125. Two submission points supporting Policy **RESZ-P13** as notified were summarised in a Table on page 20 of the s42A Report

126. One submission and one further submission supporting Policy **RESZ-P14** as notified were summarised in a Table on page 20 of the s42A Report.

127. Two submission points supporting Policy **RESZ-P15** as notified were summarised in a Table on page 20 of the s42A Report.

128. Four submission points relating to Policy **RESZ-P16** were summarised in a Table on pages 20-21 of the s42A Report. Three of the submissions supported the retention of the policy as notified, while one sought amendment.

129. One submission and one further submission relating to Policy **RESZ-P17** were summarised in a Table on page 21 of the s42A Report. The submission sought amendments to the policy. The further submission opposed this submission.

130. The Panel has considered the relevant submissions and adopts the summaries in the s42A Report.

Section 42A Report

RESZ - Policies (General)

131. Ms Easton acknowledged most of the submissions and further submissions received generally supported the policies as notified.

132. Ms Easton did not support the addition of a new policy to support rezoning for residential development as sought by TTPP Committee (S171.013) (opposed by Forest and Bird FS34.014) because she did not consider this was necessary. Similarly, she did not support the new policy sought by TTPP Committee (S171.009) (opposed by Forest and Bird and SFF[18]) regarding rezoning specific land in Westport, Greymouth, and Hokitika because the rezoning had already occurred and was consistent with the current policy suite for residential development in areas outlined.

133. The submission of Te Mana Ora (S190.835) seeking a new policy related to the establishment of Clean Air Zones was not supported by Ms Easton because she noted that air quality was a matter regulated by the WCRC and did not fall within the jurisdiction of the district plan.

[18] Forest and Bird FS34.013 and Silver Fern Farms FS101.039

134. Ms Easton did not support the amendments proposed by Frida Inta (S553.231) and the Buller Conservation Group (S552.231) regarding the provision of a 20m buffer around the periphery of residential zones to separate them from non-residential activities. She considered that if a buffer was to apply to adjoining residential zones, it would be impractical given many residential zones were less than 20m wide. In addition, she noted that if the buffer were to apply to adjoining non-residential zones only, these adjoining zones were already subject to specific setbacks depending on the zone; and that where non-residential activities met the required permitted activity standards of their respective zone, she considered they should be able to establish without the need for an additional buffer.

135. Ms Easton made no recommended changes to the policies based on these submissions.

RESZ - P1

136. Ms Easton acknowledged the support from the two submissions and one further submission[19] that sought to retain the policy as notified. She recommended retaining RESZ-P1 as notified.

RESZ - P2

137. Ms Easton acknowledged the support from the two submitters[20] who sought to retain the policy as notified.

138. In response to Frida Inta (S553.228) and Buller Conservation Group's (S552.228) request to amend clause (b) to refer to minimising nuisance from air pollution, Ms Easton did not support this. She reiterated that regulating air pollution was a function of WCRC.

139. Ms Easton did not support the Director General's (S602.226) to add '*maintain and enhance the natural environment and cultural and historic heritage features of the zone*' because these were already managed through the district-wide chapters.

140. Ms Easton recommended retaining RESZ-P2 as notified.

RESZ - P3

141. Ms Easton acknowledged the support from the one submitter (S190.838) who sought to retain the policy as notified. She recommended retaining RESZ-P3 as notified.

RESZ - P4

142. Ms Easton acknowledged the support from submitters[21] who sought to retain the policy as notified.

143. Ms Easton did not support the submission points of Frida Inta (S553.229) and Buller Conservation Group (S552.229) that sought amendments to refer to the adverse effects of air pollution and vibration because she considered air pollution was within the jurisdiction of the WCRC. Ms Easton considered if vibration was not regulated in the Noise Chapter, then she would support its addition. She agreed that "*do not have*" in relation to significant adverse effects should be replaced with "*avoid*" because the residential rules identify

[19] S190.836, S349.015, FS58.0136
[20] S190.837, S608.715, S608.716
[21] S190.839, S450.241, S456.040, S608.717

activities such as incompatible industrial activities as a non-complying activity and "*avoid*" is the appropriate term in this context.

144. Ms Easton recommended changes to this policy as follows:

> ***RESZ - P4***
>
> *Enable existing non-residential activities and home occupations to continue and new non – residential activities to establish provided they ~~do not have an~~ **avoid** significant adverse effects on the character and amenity of RESZ - Residential Zones, particularly in relation to scale, car parking, vehicle movements, noise, visual appearance, glare, dust and odour.*

RESZ - P5

145. Ms Easton acknowledged the support from the submission (S190.840) who sought to retain the policy as notified.

146. Ms Easton did not support Frida Inta (553.230) and the Buller Conservation Group's (S553.230) request to include the words "*and will require a buffer zone*". She considered that the best way to manage the types of activities referred to in this policy was to ensure that residential zones were not located immediately adjacent to the Industrial Zone. Where this was not possible, she considered the use of a Light Industrial Zone (LIZ) to be preferable to minimise incompatible uses. She further considered that this direction was set in the strategic objectives rather than in the RESZ policies, which were to manage activities within these zones rather than in other zones.

147. Ms Easton recommended retaining RESZ-P5 as notified.

RESZ - P6, RESZ-P7, RESZ-P8 and RESZ-P9

148. Ms Easton acknowledged the support from the submissions and further submissions[22] that sought to retain these policies as notified. She recommended retaining policies RESZ-P6 to RESZ-P9 as notified.

RESZ - P10

149. Ms Easton acknowledged the support from the two submitters[23] who sought to retain the policy as notified.

150. Ms Easton agreed with GDC's (S608.718) request to amend the policy to reflect that infrastructure should be vested with "*the Council*" as opposed to "*the appropriate public agency*". She noted the policy was originally drafted to reflect the potential new public entities that were to be created under the Three Waters regime. However, as this was no longer applicable, she considered that the proposed amendment would ensure greater consistency with the rest of the Plan.

151. Ms Easton recommended changes to this policy as follows:

> ***RESZ - P10***

[22] S190.841, S190.842, FS58.0137, FS58.0138, S620.234, S190.844, S450.242
[23] S190.845, S573.022

> *Ensure that developments are serviced with all required infrastructure in an effective and efficient manner, while minimising impacts on the environment. Where new infrastructure such as roads and three waters (wastewater, water supply, stormwater) is provided to serve multiple households this infrastructure should be vested in the ~~appropriate public agency~~* ***district council****.*

RESZ - P11, RESZ-P12, RESZ-P13, RESZ-P14 and RESZ-P15

152. Ms Easton acknowledged the support from the submissions and further submissions[24] who sought to retain these policies as notified. She recommended retaining the policies as notified.

RESZ - P16

153. Ms Easton acknowledged the support from three submitters who sought to retain this policy as notified[25].

154. Ms Easton did not support SFF's request[26] to refer to "*existing businesses and industrial activity*" and specifically identify "*the meat processing plant located at 140 Kumara Junction highway*". She noted that the substantive matters raised by SFF, including those addressed in the submission on this policy, had been more fully discussed in the residential zoning section of the s42A Report. She considered the amendments proposed would create an inconsistency between RESZ-P16, which specifically focused on regionally significant infrastructure, and RESZ-P17**,** which focused on relocating industrial activities out of residentially zoned areas.

155. Ms Easton recommended retaining RESZ-P16 as notified.

156.

RESZ - P17

157. Ms Easton did not support Te Mana Ora's request (S190.852) (opposed by GDC FS1.346) to refer to out-of-zone industrial activities relocating to industrial zoned areas as being "*within the next 10 years*" rather than "*over the long term*". She noted the policy and the pTTPP generally were not able to overrule the existing use rights held by industrial activities within residential zones. She considered the intent of this policy was to provide support for relocation should these activities seek to expand or redevelop.

158. Ms Easton recommended retaining RESZ-P17 as notified.

Hearing and Submitter Evidence/Statements

159. In relation to RESZ-P2, Ms Inta reiterated her view that the Plan should include protection regarding air quality and odours. In relation to RESZ-P4, she confirmed her view that if air pollution generally could not be included, then the words "*dust and odour*" should be retained, while also reiterating that the word "*vibration*" should also be included.

[24] S190.846, S620.235, S190.847, S450.243, S620.236, S190.848, S190.849, FS58.0139, S620.237, S190.850
[25] S190.851, S450.244, S608.719
[26] S441.064 – Silver Fern Farms

160. In relation to RESZ-P16, Mr Tuck (for SFF) reiterated that proposed amendments were needed to include specific references to "*any existing industrial activity*" and "*the meat processing plant located at 140 Kumara Junction Highway"* being the SFF site. He considered these amendments were necessary, in addition to the new specific objective sought if the s42A Report recommendation to rezone land adjoining the SFF's Hokitika site to the south to from GRZ to RLZ rather than GRUZ was adopted. He acknowledged that a site-specific caveat to zone-wide objectives and policies was not ideal and reiterated the primary relief sought was to the zone configuration on land adjacent to the SFF site (i.e. to include a buffer zone) remained the more efficient and effective method to manage these effects. The Panel note that this zone-related discussion is addressed later in this Report and in the Recommendations Report on Rural Zones, Noise and the Industrial chapters.

Reporting Officer Reply Evidence

161. In relation to the issue of dust, Ms Easton considered that there was scope to address the amenity issues that may arise when dust was generated (e.g. wind picking up dust from an unsealed yard). She noted that Policy RESZ-P4 already included a reference to dust and therefore retained her recommendations in the s42A Report.

162. No further recommended changes were made in Ms Easton's Right of Reply regarding the remainder of the policies.

Hearing Panel's Evaluation

163. The Panel adopts Ms Easton's reasoning and her recommendation that it is unnecessary to include a new policy relating to rezoning areas for residential development because rezoning of specified areas can occur utilising other processes under the RMA.

164. Similarly, we agree that a new policy supporting the rezoning of specific land in Westport, Greymouth, and Hokitika is not necessary because the rezoning has already occurred and is consistent with the current policy suite in terms of residential development in these areas.

165. The Panel agree with Ms Easton that a new policy relating to the establishment of Clean Air Zones is outside the jurisdiction of a district plan and is a WCRC function.

166. The Panel agree with Ms Easton that applying a 20m buffer to an adjoining residential zone would result in impractical outcomes given many residential zones are less than 20m wide. We agree with Ms Easton that other plan provisions achieve the result the submitters seek and therefore a new policy providing buffers is not required.

167. In relation to **RESZ-P1**, the Panel adopts Ms Easton's reasoning and accepts her recommendation to retain the policy as notified.

168. In relation to **RESZ-P2,** the Panel agree with Ms Easton's reasoning and accepts her recommendation to retain the policy as notified.

169. In relation to **RESZ-P3**, the Panel agree with Ms Easton that no amendments are required. No submitters sought an amendment to this policy and the Panel recommend the policy is retained as notified.

170. In relation to **RESZ-P4,** the Panel agree with Ms Easton's analysis of the air pollution and vibration issues and agree with her reasons to recommend that these submissions be

rejected. We note vibration is included in the Noise Chapter as notified under NOISE-R3(b)(iii) and (c)(iii) in the context of new dwellings being constructed within proximity of the state highway or railway lines. The Panel adopt Ms Easton's reasoning and agree with her recommended use of "*avoid*" in this context. The Panel note that the submission points referenced correctly address RESZ-P4 but the summary of submissions document does not incorporate the requested amendment to replace "*do not have a*" with "*avoid*".

171. In relation to **RESZ-P5**, the Panel agree with Ms Easton that no amendments are necessary. We agree with her response to the submitters that the best way to manage the types of activities referred to in this policy is to ensure that residential zones are not located immediately adjacent to industrial zones. Where this is not possible, the use of a LIZ is preferable to minimise incompatible uses. We also agree with her that this direction is set out in the strategic direction (e.g. UFD-P1) rather than in the residential zone policies, which are to manage activities within these zones rather than in other zones. We recommend retaining the policy as notified.

172. In relation to policies **RESZ-P6 to RESZ-P9**, the Panel agree with Ms Easton's recommendation that no changes are required given the support for the notified version of these policies.

173. In relation to **RESZ-P10**, the Panel note Ms Easton's explanation of the policy wording as notified. While the vesting of infrastructure in councils is usually achieved through consent conditions attached to developments, such as subdivisions, we see no issue with setting this out within a policy, as recommended by Ms Easton. We recommend replacing "*appropriate public agency*" with "*district council".*

174. In relation to policies **RESZ-P11 to RESZ-P15**, Ms Easton recommended no changes to these policies, citing submissions in support. The Panel recommend retaining these policies as notified.

175. In relation to **RESZ-P16** the Panel partically agree with Ms Easton's analysis of the SFF submission and Mr Tuck's evidence. We agree with Ms Easton that the substantive matters raised by SFF, including those addressed in the submission on this policy, are best addressed in our recommendation on the appropriate zoning of the adjacent land to the south of the site. We do not consider the SFF amendment to the policy would create an inconsistency between RESZ-P16 and RESZ-P17. We consider the focus's of the policies are different. We accept as notified RESZ-P16 explicidly references Reionally Significant Infrastrucuture. But in our view adding Industrial Zones to that policity, given that Industrial zones are located throughout the region does not give rise to any inconsistency. We note that the amendment proposed would give effect the revise Strategic Direction UFD-P1.

176. In relation to **RESZ-P17** the Panel agree that a district plan cannot retrospectively remove existing use rights. Therefore, a policy specifying a period when existing lawfully established activities must cease is not appropriate. In any event, we note that the intent of this policy is to provide relocation support should these activities seek to expand or redevelop. We agree with Ms Easton that this policy does not need to change for these reasons. We recommend retaining the policy as notified.

Hearing Panel's Recommendation

177. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted, and recommend the following amendments are made to the **Residential Zone policies**:

RESZ -P4	Enable existing non-residential activities and home occupations to continue and new non – residential activities to establish provided they ~~do not have a~~ **avoid**[27] significant adverse effect**s** on the character and amenity of RESZ - Residential Zones, particularly in relation to scale, car parking, vehicle movements, noise, visual appearance, glare, dust and odour.
RESZ-P10	Ensure that developments are serviced with all required infrastructure in an effective and efficient manner, while minimising impacts on the environment. Where new infrastructure such as roads and three waters (wastewater, water supply, stormwater) is provided to serve multiple households this infrastructure should be vested in the ~~appropriate public agency~~ **district council**.[28]
RESZ - P16	Avoid reverse sensitivity effects from residential development adjacent to strategic infrastructure **and industrial zones**[29] including: a. Hokitika, Greymouth and Westport Airports; b. The rail network; c. The arterial road and State Highway network; d. The Ports of Westport and Greymouth; e. Wastewater treatment plants; f. Landfills; g. Potable water supply plants; h. Stormwater treatment facilities; i. The National Grid.

2.5. General Residential Zone – Rules and Standards

Submissions and Further Submissions

Residential - General

178. Five submission points and one further submission relating to the GRZ rules (as a whole or those that relate across multiple rules) were summarised in the Table on page 24 of the s42A Report. Three submission points sought to retain all, or selected, rules as notified. The remaining submissions all sought amendments. One further submission was received, which opposed one of the proposed amendments.

General Residential Zone

179. Nineteen submission points and eight further submission points relating to Rule **GRZ-R1** were summarised in a Table on pages 24-28 of the s42A Report. All submission points sought amendments to the rule as notified. One further submission was in opposition to a suggested

[27] Frida Inta S553.229 and Buller Conservation Group S552.229
[28] Grey District Council S608.718
[29] Silver Fern Farms (S441.064)

amendment, while the remaining seven were either in full support or partial support of various submission points.

180. Eight submission points relating to Rule **GRZ-R2** were summarised in a Table on pages 28-29 of the s42A Report. Two submission points supported the retention of the rule as notified. The remaining submission points sought amendments, while the two further submissions supported in part the amendments sought by one submitter.

181. Seven submission points relating to Rule **GRZ-R3** were summarised in a Table on page 29 of the s42A Report. All submission points supported the retention of the rule as notified.

182. Ten submission points and two further submissions relating to Rule **GRZ-R4** were summarised in a Table on pages 29-31 of the s42A Report. Two submission points supported the retention of the rule as notified. Five submission points opposed the rule as notified and sought its deletion in full. The remaining three submission points sought amendments, with one further submission supporting in part and the other opposing in part, suggesting amendments.

183. Eight submission points relating to Rule **GRZ-R5** were summarised in the Table on pages 31-32 of the s42A Report. Three submission points supported the retention of the rule as notified. The remaining five submission points sought amendments.

184. Seventeen submission points relating to Rule **GRZ-R6** were summarised in a Table on pages 32-33 of the s42A Report. Three submission points supported the retention of the rule as notified. One submission point opposed the rule and sought its complete deletion. The remaining submission points sought amendments.

185. Ten submission points and two further submission points relating to Rule **GRZ-R7** were summarised in a Table on pages 33-35 of the s42A Report. Four submission points supported the retention of the rule as notified. The remaining submission points sought amendments, while the two further submissions supported in part the amendments sought by one submitter.

186. Eight submission points and one further submission point relating to Rule **GRZ-R8** were summarised in a Table on page 35 of the s42A Report. Four submission points supported the retention of the rule, as notified, with one further submitter supporting one of these submissions. The remaining submission points sought amendments.

187. Four submission points relating to Rule **GRZ-R9** were summarised in the Table on page 35 of the s42A Report. Three submission points supported the retention of the rule as notified. The remaining submission point sought an amendment.

188. Two submission points relating to Rule **GRZ-R10** were summarised in the Table on page 36 of the s42A Report. Both submission points supported the retention of the rule as notified.

189. Seven submission points relating to Rule **GRZ-R11** were summarised in the Table on page 36 of the s42A Report. Three submission points supported the retention of the rule as notified. The remaining submission points sought amendments.

190. Seven submission points relating to Rule **GRZ-R12** were summarised in the Table on page 36 of the s42A Report. Two submission points supported the retention of the rule as notified. The remaining five submission points all opposed the rule and sought its deletion.

191. Thirteen submission points and four further submissions relating to Rule **GRZ-R13** were summarised in the Table on pages 36-38 of the s42A Report. Two submission points supported the retention of the rule as notified. The remaining submission points sought amendments with the four further submissions all in support or partial support of suggested amendments.

192. Five submission points relating to Rule **GRZ-R14** were summarised in a Table on page 38 of the s42A Report. Three submission points supported the retention of the rule as notified. The remaining submission point sought amendments.

193. Four submission points and one further submission relating to Rule **GRZ-R15** were summarised in a Table on pages 38-39 of the s42A Report. Three submission points supported the retention of the rule as notified. The remaining submission point sought amendments, with one further submission opposing the suggested amendments.

194. Seven submission points and one further submission relating to Rule **GRZ-R16** were summarised in a Table on page 39 of the s42A Report. Two submission points supported the retention of the rule as notified, with one further submission in support. The remaining submission points sought amendments.

195. Four submission points relating to Rule **GRZ-R17** were summarised in a Table on page 39 of the s42A Report. Three submission points supported the retention of the rule as notified. The remaining submission point sought amendments.

196. Two submission points relating to Rule **GRZ-R18** were summarised in a Table on page 39 of the s42A Report. Both submission points supported the retention of the rule as notified.

197. Twelve submission points relating to **GRZ-R19** were summarised in a Table on pages 39-40 of the S42A Report. Three submission points supported the retention of the rule as notified. The remaining submission point sought amendments with a single further submission in support of one of the submitters' suggested amendments.

198. Three submission points relating to Rule **GRZ-R20** were summarised in a Table on pages 40-41 of the s2A Report. All three submission points supported the retention of the rule as notified.

199. Three submission points relating to Rule **GRZ-R21** were summarised in a Table on page 41 of the s42A Report. Two submission points supported the retention of the rule as notified. The remaining submission point sought amendments.

200. Six submission points and one further submission relating to Rule **GRZ-R22** were summarised in a Table on page 41 of the s42A Report. Three submission points supported the retention of the rule as notified. The remaining submission point sought amendments, with one further submission supporting one of the submitters requested amendments.

201. Seven submission points relating to Rule **GRZ-R23** were summarised in a Table on page 41 of the s42A Report. All seven submission points supported the retention of the rule as notified.

202. Seven submission points relating to Rule **GRZ-R24** were summarised in a Table on pages 41-42 of the s42A Report. Three submission points supported the retention of the rule as notified. The remaining submission point sought amendments.

203. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

Section 42A Report

Rules (General)

204. Ms Easton acknowledged the support from the submitters who generally support all rules as notified.

205. Ms Easton did not support GDC's (S608.103) requested amendments to delete the references to "*Site of Area of Significance to Māori (SASM)".* She considered that these cross-references were important for clarity. She noted the more substantive request from GDC regarding SASM were specifically addressed in the SASM Chapter.

206. In response to Margaret Montgomery's submission point (S446.108) requesting that the standards better interact with subdivision provisions and to provide for the Council to be able to waive the residential activity/unit standard if no additional non-compliances were generated, Ms Easton did not support either approach. She noted that no examples had been provided as to how the residential standard interacts with subdivision standards; and waiving non-compliance could have unintended impacts on amenity and infrastructure.

207. Ms Easton recommended retaining the rule as notified.

GRZ-R1 Permitted Activity – Residential Activities and Residential Units

208. In relation to **GRZ-R1**, Ms Easton acknowledged the support from the four submitters who sought to retain the rule as notified. However, she acknowledged she recommended amendments in response to other submission points.

209. In response to Terry O'Regan's (S221.001) request to include height restrictions to prevent multistorey buildings or large trees blocking views, particularly in relation to Moana, Ms Easton noted that height restrictions were already included in the rule as notified. She noted that when these restrictions were coupled with recession planes there was appropriate control. However, she noted that protection of private views was not required under the RMA.

210. Ms Easton did not support the Westport Pistol Club's (S336.014) to add a requirement to the advice note for GRZ-R1 for any residential activity or unit within 250m of a rifle range protection area overlay to be subject to acoustic insulation requirements. She noted there were currently no insulation requirements concerning Rifle Range Protection Areas in Rule NOISE-R3 and she did not consider this amendment appropriate. However, she acknowledged that if this situation was to change and necessitate an amendment to NOISE-R3, then a consequential update to the advice notes for GRZ-R1 would be necessary.

211. Ms Easton did not support submitters requests to delete the advice note referring to Rule NOISE-R3[30] because she considered cross-referencing this rule was appropriate. She noted Rule NOISE-R3 would be considered under the Noise Chapter provision.

[30] S567.454, S558.400, S566.400, S574.400

212. Ms Easton did not support Te Mana Ora's (S190.854) request to include an additional standard in GRZ-R1 relating to clean air burners because this was outside of the jurisdiction of the Plan.

213. In response to the submissions[31] that sought a controlled activity status where compliance was not achieved, Ms Easton did not support this approach. She considered that defaulting to discretionary or restricted discretionary activity, depending on the standard that was not complied with, was appropriate to provide confidence in a basic level of amenity, density, infrastructure, and character would be provided for within the zone, noting that a controlled activity consent application cannot be declined.

214. In response to BDC's (S538.475) request for an exemption from the recession plane standards, and submitters seeking exemption because of the need to build higher to respond to flood hazard[32], Ms Easton did not support this approach.

215. In response to the submission points of GDC (S608.720) and Waka Kotahi NZTA (S450.245) to amend standard 8 to GRZ-R1 to specify that stormwater be managed on-site in accordance with NZS4404:2010, Ms Easton supported these submissions; and considered that NZS4404:2010 was an appropriate standard to ensure uncontrolled stormwater was not exacerbated and that secondary flow was managed appropriately. Her recommended amendments in response were as follows:

> *8. All residential units and buildings used for a residential activity must be connected to the community water supply, and wastewater networks and stormwater from the site **are managed in accordance with the relevant standards in NZS4404: 2010 Land Development and Subdivision** ~~Infrastructure used for the activity~~ **and** must not drain to any public road ~~except for secondary flow purposes;~~*

216. In response to the submission point made by Waka Kotahi NZTA (450.245), Ms Easton did not support separating performance standards from the rule and placing them in a separate table, as this would result in a substantial restructuring of the Plan, which would not improve the clarity of the rule.

217. BDC (S538.475) (supported by GDC FS1.434) sought several amendments to GRZ-R1, which are discussed under specific standard topics below.

218. BDC requested that rule GRZ-R1 also apply to accessory buildings as well as residential activities and residential units. Ms Easton supported this submission and considered that omitting accessory buildings from this rule was an error that should be corrected to avoid the need for accessory buildings to require resource consent otherwise. The amendments to include accessory buildings are outlined below, and the same amendments are recommended for Rule LLRZ-R1 and MRZ-R1.

> *Permitted Activities*
>
> *GRZ - R1 Residential Activities and Residential Units **and Accessory Buildings** - Activity Status Permitted*
>
> *Where:*

[31] S567.455, S558.401, S566.401, S574.401
[32] Rick Hayman S471.007, The Coda Trust S480.005, Warren French S494.005

…

219. BDC also sought to limit density to a maximum of two units per site and to delete the provision allowing one unit per 300m², where two or more adjoining sites were developed. BDC sought these amendments to prevent the low-density character of Westport and Reefton from being compromised, while also recognising that Westport was subject to significant natural hazards and more intensive development should be encouraged in safer locations. This submission was opposed by the further submission of GDC, who preferred the current rule framework, which reflected the operative GDP provisions. Ms Easton supported the submission of BDC and further submission of GDC, recommending that Rule GRZ-R1 be redrafted to provide a specific maximum of two residential units per site within the Buller District, as set as follows:

> *1. Residential unit density is no more than:*
> *a. 1 unit per 350m^2 net site area; ~~or~~ **but within the Buller District there is a maximum of 2 residential dwellings per allotment***
> *b. 1 unit per 300m^2 net site area where two or more adjoining sites are developed **except within the Buller District this standard does not apply**;*

220. The submission by Margaret Montgomery sought to relax residential provisions to allow three dwellings per site, aligning with the national direction of the NPSUD. Ms Easton did not support this submission and noted that the NPSUD did not apply to the West Coast in terms of directing increased densities.

221. Regarding the connection to services, the submission from BDC sought a further amendment to include the words "*where available*" in standard 8 of GRZ-R1, which requires all residential units and buildings used for residential activities to be connected to a community water supply and wastewater network. Ms Easton did not support this submission point and considered that for residential development to occur, connections to community infrastructure were a critical requirement; she noted that the permitted 350m^2 minimum section size for a residential unit would be unlikely to accommodate an on-site wastewater system as an alternative safely.

222. The submission from BDC sought amendments to remove wording related to neighbour approvals for recession plane infringements and to replace the wording in the standard with an advice note. Ms Easton supported making the standard clearer and recommended amendment as follows:

> *9. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~. This standard does not apply to:*
>
> *…*
>
> *Advice note**s**:*
>
> ***1** …*
>
> *2. Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.*

223. BDC also sought an additional amendment, requesting that a setback of 150m from the designated wastewater treatment facility site boundary be applied. Ms Easton supported this addition, which was present in the operative Buller and Grey District Plans and considered it an error that it was omitted from the notified pTTPP.

224. FENZ sought a new standard requiring a developer to demonstrate how an alternative satisfactory water supply could be provided to each lot if a new development was not connected to a public reticulated supply with a sufficient level of service. Ms Easton did not support this amendment and noted that if a connection to a public reticulated supply was not possible, then a development cannot be a permitted activity. She considered the permitted standard sought by FENZ would not provide sufficient certainty. She also noted that this matter was better addressed at the subdivision stage, where it was covered by standard SUB-S3.

225. Margaret Montgomery also sought that the setback standards be consistent with the existing rules currently applicable in the different districts. Ms Easton did not support this submission and considered that a key driver of the TTPP was to develop a more standardised approach across the West Coast and reduce the complexity of provisions.

226. Ms Easton recommended setback amendments as follows:

> *Buildings are setback a minimum of 1m from all other site boundaries, except that:*
>
> *a.* ***In the Grey and Westland Districts*** ~~*D*~~*duplexes do not require a setback from the side boundary of the other duplex unit; and*
>
> *b.* ~~*Setbacks are not required from adjacent residential boundaries where neighbouring property owner's written approval is provided to the Council 10 working days prior to the works commencing.*~~
>
> *b.* ***A setback of 150m is required from the site boundary of any designated wastewater treatment plant***

GRZ-R2 Minor Structures

227. Ms Easton acknowledged the support from the two submitters who sought to retain the rule as notified[33].

228. In response to the submissions[34] that sought amendments to accommodate existing legal non-compliances with the GRZ-R1 performance standards, and BDC's (S538.476) request to delete the reference to GRZ-R1 performance standards and replaced with a singular setback requirement from road and internal boundaries, Ms Easton supported these submissions in part and has recommended deleting the wording "*all performance standards for Rule GRZ-R2 are complied with*" from this rule. She noted that a consequential amendment to Rule GRZ-R11 was also recommended to provide alignment between the two rules.

229. FENZ (S573.024) also sought an exemption for hose drying towers and siren towers to be up to 15m high in this zone. Ms Easton supported this submission in part, noting that hose drying towers were an essential component of a functioning fire station. Ms Easton noted that only three fire stations were zoned GRZ whereas all other stations were zoned Commercial and Mixed Use. Ms Easton did not propose a change to GRZ-R2, noting that the

[33] S190.855, S446.085
[34] William McLaughlin S567.456, C and J Coll, S558.402, Chris Coll Surveying S566.402, Laura Coll McLaughlin S574.402

existing hose drying towers all hold existing use rights and that ideally any new fire stations would not be located within the GRZ.

230. Ms Easton's recommended amendments to GRZ-R2 and GRZ-R11 are set out below:

GRZ - R2 Minor Structures
Activity Status Permitted
Where:

a. ~~*All performance standards for Rule GRZ - R1 are complied with*~~ ***Structures are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries****;*
b. *Masts, poles, aerials and pou whenua must not exceed 7m in height;*
c. *Any antenna dish must be less than 1m in diameter;*
d. *Any ornamental or garden structure must not exceed 2.4 m in height; and*
e. *Any other structure must not exceed 10m^2 and 2m in height.*

Activity status where compliance not achieved: *Controlled*

GRZ - R11 Minor Structures not meeting Permitted Activity Standards Activity Status Controlled
Where:

1. *The minor structure does not exceed 10m in height; and*
2. ***Structures are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries;***

Matters of control are:

a. Design and location of structures; and

b. Landscape measures.

Activity status where compliance not achieved: *Discretionary*

GRZ-R3 Fence Wall and Retaining Walls

231. Ms Easton acknowledged the support from the submitters who sought to retain the rule as notified[35]. She recommends no changes to GRZ-R3.

GRZ-R4 Relocated Buildings

232. Ms Easton acknowledged the support from the submitters who sought to retain the rule as notified[36].

233. There were several submitters[37] that sought that Rules GRZ-R4 and GRZ-R12 be deleted in their entirety and that any references to relocated buildings in GRZ-R19 be deleted. Ms Easton did not support these submissions and considered that the rules were necessary to manage amenity and ensure necessary building work to meet standards is completed within a specified timeframe.

[35] S190.856, S446.086, S567.457, S558.403, S566.403, S574.403, S538.477
[36] S190.857, S446.087
[37] William McLaughlin S567.019, S567.458, C & J Coll S558.109, S558.404, Chris J Coll Surveying Limited S566.109, S566.404, Laura Coll McLaughlin S574.109, S574.404, BDC S538.478

234. Charles Elley (S251.003) sought to remove restrictions that only allow relocatable buildings intended to be dwellings that were originally built and used dwellings. Ms Easton supported this submission, but it appears she misinterpreted this submission because the s42A Report states the submission sought to amend the rule to relate only to those buildings that are intended to be dwellings and were originally dwellings. We consider the submission sought the opposite to that stated in the s42A Report.

235. NZ Heavy Haulage Association Inc. (S616.005) sought performance standards for relocatable buildings based on the matters in schedule 1 of its submission, including that any relocated building intended for use as a dwelling must have been previously designed, built and used as a dwelling, and additional standards around pre-inspections, foundations and reinstatement work. Ms Easton supported an amendment that buildings must originally be dwellings, but did not support the balance of changes, which she considered would make the rule more complex.

236. FENZ also sought that a new standard be added to GRZ-R4 around water supply. This was not supported by Ms Easton, who noted what the standards of GRZ-R1 apply to relocation of buildings, and these already necessitate a connection to a public reticulated water supply.

237. Ms Easton's recommended no amendments to GRZ-R12 or GRZ-R19 and recommended amendments to GRZ-R4 as follows:

> ***GRZ - R4 Relocated Buildings***
> ***Activity Status Permitted***
> *Where:*
>
> 1. *All performance standards for Rule GRZ - R1 are complied with;*
> 2. *Any relocated building intended for use as a dwelling must have been designed, ~~and~~ built ~~to be~~ **and** used as a dwelling;*
> 3. *…*
> 4. *…*
> 5. *…*
>
> ***Activity status where compliance not achieved:*** *Controlled*

GRZ-R5 Home Business

238. Ms Easton acknowledged the support from the three submissions that sought to retain the rule as notified[38].

239. Frida Inta (S553.169 and S553.233) and Buller Conservation Group (S552.169) sought to have this rule amended to require approval from neighbours or the community; and to add reference to "*other air pollution*" to the standard that requires no external generation of dust, odour, or smoke. These submission points were not supported by Ms Easton who did not consider it appropriate to include a requirement for neighbour or community consent to establish a home business, noting that there is a range of permitted activity standards to ensure home businesses do not adversely affect the amenity and character of the GRZ. She

[38] S190.858, S446.088, S608.721

considered the words "*or other air pollution*" were too broad to be appropriate as a permitted standard.

240. The submission of Waka Kotahi NZTA (S450.246) sought to amend the rule to reduce the permitted level of vehicle movements to no more than 30 car movements per day. Ms Easton noted the current standard was limited to no more than four heavy vehicle movements per day, 20 light vehicle movements per day or 140 vehicle movements per week, whichever is greater. She noted this could be interpreted to allow for 140 vehicle movements per day and none for the rest of the week. She therefore, recommended amendments to provide greater clarity.

241. BDC (S538.479) sought to further regulate home business through the provision of an additional standard requiring that no more than one full-time equivalent person engaged in the home business could reside off-site. Ms Easton noted that at present, there was no limit in the pTTPP. She supported this submission and considered it would ensure that the scale of any home business did not exceed what would be reasonably expected in a residential area.

242. Ms Easton's recommended amendments to GRZ-R5, were as follows:

GRZ - R5 Home Business Activity Status Permitted
Where:

1. *This is ancillary to a residential activity;*
2. *All performance standards for Rules GRZ - R1, NOISE R1-R2 and R4, LIGHT - R3 and SIGN - R10 are complied with;*
3. ***There is no more than one full – time -equivalent person engaged in the home business that resides off-site***
4. *Hours of operation are limited to:*
   a. *7am-7pm weekdays; and*
   b. *8am - 5pm weekends and public holidays;*
   c. *Except where:*
      i. *The entire activity is located within a building;*
      ii. *Each person engaged in the activity outside the above hours resides permanently on site; and*
      iii. *There are no visitors, customers or deliveries to the activity outside of the above hours*
5. *A maximum of 4 heavy vehicle movements per day**, ~~and whichever is the greater of~~** 20 light vehicle movements per day, **~~or~~** **and** 140 light vehicle movements per week;*
6. *…*
7. *…*

***Activity status where compliance not achieved**: Discretionary*

GRZ-R6 Residential Visitor Accommodation

243. Ms Easton acknowledged the support from the three submissions that sought to retain the rule as notified[39].

244. In relation to residential visitor accommodation, BDC (S538.480) supported the approach that only homestay accommodation was permitted in the Buller District, with the primary concern relating to long-term rentals being converted to short-term visitor accommodation, e.g. Airbnb.

245. In response to the submissions[40] that opposed the rule and sought that full house rentals for visitor accommodation be a permitted activity, Ms Easton did not support this approach. She considered the wider community concerns were a strong argument for restricting the conversion of residential dwellings to what is effectively a commercial use.

246. Regarding residential visitor accommodation in Westland, WDC (S181.036) sought to amend the rule to align with the approach pursued by BDC. This was supported by Ms Easton.

247. Regarding residential visitor accommodation in Greymouth, the submission of Lynda Richmond (S423.001) sought that this rule be amended to align with the approach of BDC and WDC above, noting concerns with this type of accommodation not facing the same sort of regulation as motels or hotels. This was not supported by Ms Easton, who considered that Greymouth was not impacted by residential visitor accommodation due to it not being a significant tourism destination compared to other parts of the West Coast.

248. GDC (S608.104) sought that records of letting activity be provided to the Council annually rather than on request because landowners undertaking such activity should provide the evidence rather than GDC trying to determine where the businesses have set up. Ms Easton considered this was reasonable requirement to ensure that permitted activity standards were met.

249. Margaret Montgomery (S446.089) sought additional standards for noise and a limit on the number of nights per 12-month period for use as visitor accommodation. Ms Easton did not support this submission and considered that it would make the rule unnecessarily complex. She considered that the noise standards in the Noise Chapter were appropriate.

250. Submissions[41] sought to amend this rule to accommodate existing legal non-compliance with the GRZ-R1 performance standard. This was not supported by Ms Easton because it could result in adverse environmental effects, using the example of insufficient wastewater capacity to cater to additional people.

251. Ms Easton recommends that GRZ-R6 be amended as follows:

> ***GRZ - R6 Residential Visitor Accommodation Activity Status Permitted***
> *Where:*
>
> *1. The accommodation is ancillary to a residential activity;*
>
> *2. All performance standards for Rules GRZ - R1, NOISE R1-R2 and R4, LIGHT - R3 and SIGN - R10 are complied with;*
>
> *3. There is a maximum of 6 paying guests at any one time;*

[39] S190.859, S450.247, S538.480
[40] Jon Baltrop S572.004, Daniel Beetham S43.001, Lawrence Eade S346.001, Vivienne Sweeney S21.002
[41] S567.460 William McLaughlin, S558.407 C & J Coll, S566.407 Chris J Coll Surveying Limited, S574.407 Laura Coll McLaughlin

4. *Written notification to the District Council is required 10 working days prior to the activity commencing;*
5. *Records of letting activity must be kept and provided to the District Council **annually** ~~on request~~; and*
6. *No heavy vehicle movements are generated; and*
7. *In the Buller **and Westland** District**s** the accommodation is homestay accommodation with a permanent resident living on site.*

***Advice Notes**:*
1. *Compliance with the Building Code is required for any use of residential property for visitor accommodation. Written notice to the relevant Council Building Compliance Team must be provided and a Building Consent may also be required.*
2. *In the Buller **and Westland** **Districts**, where residential visitor accommodation has been lawfully established under the Buller **or Westland** District Plan provisions, then existing use rights apply.*

***Activity status where compliance not achieved:** Restricted Discretionary*

GRZ-R7 Community Facilities and Educational Facilities

252. Ms Easton acknowledged the support from the four submissions that seek to retain the rule as notified[42].

253. Ms Easton did not support the submissions[43] that sought to amended the rule to accommodate existing legal non-compliance with GRZ-R1 performance standard because of potential adverse effects on the environment, as discussed in earlier.

254. Ms Easton did not support the Ministry of Education's (S456.041) that sought to amend the rule to allow for 140 light vehicle movements per day for educational facilities. She considered the intent of the rule was to allow very small educational and community facilities within residential areas rather than provide for schools, or other significant facilities as a permitted activity.

255. FENZ (S573.026) sought a new standard be added to GRZ-R7 to provide an alternative satisfactory water supply where a connection to a public reticulated water supply was not available. This was not supported by Ms Easton who noted that the standards of GRZ-R1 were required to be met for community and educational facilities, and these already required a connection to a public reticulated water supply.

256. No changes were recommended by Ms Easton to GRZ-R7.

GRZ-R8 Retirement Homes and Supported Residential Accommodation

257. Ms Easton acknowledged the support from the four submissions that sought to retain the rule as notified[44].

[42] S190.860, S446.090, S450.248, S538.481
[43] S567.461 William McLaughlin, S558.408 C & J Coll, S566.408 Chris J Coll Surveying Limited, S574.408 Laura Coll McLaughlin
[44] S349.011, S190.861, S446.091, S450.249, S608.722

258. In response to the submissions[45] that sought amendments to accommodate existing legal non-compliance with GRZ-R1 performance standard, Ms Easton did not support the amendments because of potential adverse effects on the environment.

259. No changes were recommended by Ms Easton to GRZ-R8.

GRZ-R9 Papakāinga Developments

260. Ms Easton acknowledged the support from the four submissions that sought to retain the rule as notified[46].

261. Ms Easton did not support Margaret Montgomery's (S446.092) request for an allowance for developers to develop in a similar manner to papakāinga. She noted Papakāinga housing was cultural housing where whānau members generally lived closely together, often with some communal facilities, and that their establishment was supported as part of honouring the Te Tiriti o Waitangi/Treaty of Waitangi. She noted that in relation to other parts of the community, the Plan introduced significant relaxation of the rules surrounding the development of minor household units as a broader measure to provide greater housing choice and availability.

262. Ms Easton recommended no changes to GRZ-R9.

GRZ-R10 Commercial Visitor Accommodation with the Hokitika Visitor Accommodation Area

263. Ms Easton acknowledged the support from the two submissions that sought to retain the rule as notified[47]. She recommended no changes to GRZ-R9.

GRZ-R11 Minor Structures not meeting Permitted Activity Standards

264. Ms Easton acknowledged the support from the three submissions that who sought to retain the rule as notified[48].

265. In response to the submissions[49] that sought amendments to accommodate existing legal non-compliance with GRZ-R1 performance standard, Ms Easton recognised existing use rights sat outside of a resource consent process but considered that otherwise existing non-compliance should not be explicitly accommodated within the rules due to potential adverse effects on the environment.

266. No changes were recommended by Ms Easton to GRZ-R11.

GRZ-R12 Relocated Buildings not meeting Permitted Activity Standards

267. Ms Easton recommended retention of this rule as notified. She advised the rule would most likely apply when someone was converting a non-residential building into a residential building and moving it onto a site. An example she gave was of a church being transformed into a dwelling and if the activity met the requirements of GRZ-R1, then matters of control

[45] S567.462 William McLaughlin, S558.409 C & J Coll, S566.409 Chris J Coll Surveying Limited, S574.409 Laura Coll McLaughlin
[46] S620.238, S190.862, S446.092, S538.482
[47] S190.863, S446.093
[48] S190.864, S446.094, S538.483
[49] S567.463 William McLaughlin, S558.410 C & J Coll, S566.410 Chris J Coll Surveying Limited, S574.410 Laura Coll McLaughlin

could address any amenity issues. However, she noted that if the rule was deleted, this would escalate to discretionary, which she considered to be unnecessarily onerous.

GRZ-R13 Buildings not meeting Rule GRZ-R1

268. Ms Easton acknowledged the support from the two submissions that sought to retain the rule as notified[50].

269. Ms Easton supported Margaret Montgomery's (S446.096) request to provide an allowance for party walls or where it was related to a subdivision for failing internal boundary standards because the rule related to circumstances where internal setbacks of less than 1m were proposed.

270. Ms Easton did not support the submissions[51] that sought amendments to accommodate existing legal non-compliance with GRZ-R1 performance standard because of the potential for adverse effects on the environment. However, she supported the same submissions that sought to amend the matters of discretion of GRZ-R13 to include consideration of whether a building project falls into the recession plan due to the application of natural hazards rules. She considered this recognised that such circumstances would become increasingly common on the West Coast as freeboard requirements were incorporated into new developments and additions to existing developments.

271. Ms Easton supported amendments in response to BDC's (S538.485) request for two additional matters of discretionary regarding "*shading and loss of sunlight to adjoining sites*" and "*loss of privacy to adjoining sites*". She considered that these were two principal adverse effects generated by the activities subject to this rule.

272. FENZ (S573.027) sought to add a further matter of discretion to GRZ-R13 regarding the provision of servicing, including a firefighting water supply. This was not supported by Ms Easton because the rule did not apply noted if a property did not have a connection and the activity would default to a discretionary activity.

273. Ms Easton recommended that GRZ-R13 be amended as follows:

> ***GRZ - R13 Buildings not meeting Rule GRZ-R1***
> ***Activity Status Restricted Discretionary***
>
> *Where:*
>
> 1. *The building projects into the recession plane as defined in Appendix Two; or*
> 2. *The building is set back less than 1m from internal boundaries; and*
> 3. *All other performance standards for Rule GRZ - R1 are complied with.*
>
> *Discretion is restricted to:*
>
> a. *Design and location of buildings;*
> b. *Design and location of parking and access; ~~and~~*
> c. *Landscape measures~~.~~;*
> d. ***Shading and loss of sunlight to adjoining sites; and***

[50] S190.866, S608.723
[51] S567.465, S567.466 William McLaughlin, S558.412, S558.413 C & J Coll, S566.412, S566.413 Chris J Coll Surveying Limited, S574.412, S574.413 Laura Coll McLaughlin

e. ***Loss of privacy to adjoining sites***

Activity status where compliance not achieved: *Discretionary*

GRZ-R14 Residential Visitor Accommodation not meeting Permitted Standards

274. Ms Easton acknowledged the support from the three submissions that sought to retain the rule as notified[52].

275. Ms Easton supported in part Margaret Montgomery's (S446.097) request for additional matters of discretion for access and fire standards but noted that access was already a matter of discretion. She did not support the addition of fire standards because it was addressed under the Building Act.

276. In response to BDC's (S538.486) to add noise insulation as matter of discretion and to delete the word noise from clause (e), Ms Easton did not support this submission. She considered the intent of this matter of discretion was that any insulation requirements were to attenuate noise and manage its effects.

277. Ms Easton made no recommended amendments to GRZ-R14.

GRZ-R15 Community Facilities and Educational Facilities not meeting Rule GRZ -R7, Retirement Homes and Supported Residential Accommodation not meeting Rule GRZ - R8 and Retirement Villages

278. Ms Easton acknowledged the support from the three submissions that sought to retain the rule as notified[53].

279. Ms Easton supported BDC's (S538.487) to add additional matters of discretion to cover noise management, traffic generation, loss of privacy to adjoining sites, and character and amenity of the surrounding area to manage key effects. She noted the further submission of Kainga Ora opposing the submission point of BDC concerning supported residential accommodation. However, she highlighted that Kainga Ora had stipulated in their submission that supported residential accommodation would generally be less than 10 residential units and therefore was likely to be permitted under GRZ-R8 and unlikely to be subject to GRZ-R15.

280. Ms Easton recommended that GRZ-R15 be amended as follows:

GRZ - R15 Community Facilities and Educational Facilities not meeting Rule GRZ - R7, Retirement Homes and Supported Residential Accommodation not meeting Rule GRZ - R8 and Retirement Villages

Activity Status Restricted Discretionary
Discretion is restricted to:

a. Design and location of buildings;

b. Design and location of parking and access;

c. Landscape measures;

d. Hours of operation;

e. Water supply, wastewater and stormwater management; and

[52] S190.867, S456.042, S608.724
[53] S190.868, S446.098

f. Acoustic and noise insulation requirements;

g. Noise management;

h. Traffic generation;

i. Loss of privacy to adjoining sites; and

j. Character and amenity of the surrounding area

Notification:
Applications for community facilities will always be notified to adjacent neighbours and may be publicly notified.
Activity status where compliance not achieved: *N/A*

GRZ-R16 Development of Medium Density Housing

281. Ms Easton acknowledged the support from the two submissions that sought to retain the rule as notified[54].

282. Ms Easton did not support Margaret Montgomery's (S445.099) request to waive the density standards if there are no other infringements of the rule. She considered that medium-density housing would generally be expected and preferred in the MRZ and noted that the main settlements on the West Coast were characterised by low-density housing.

283. In response to the submissions[55] that sought amendments to provide more clarity, Ms Easton noted that no further information or examples had been provided about what amendment would be appropriate and she therefore did not support the submissions

284. No changes were recommended by Ms Easton to GRZ-R16.

GRZ-R17 Papakāinga Developments not meeting Permitted Activity Standards

285. Ms Easton acknowledged the support from the three submissions that sought to retain the rule as notified[56].

286. Ms Easton supported in part Margaret Montgomery's (S446.100) to establish that the rule requires the same standards as medium density housing, noting that many of the same standards as those for medium density housing applied. In relation to standards that were not required, Ms Easton considered that papakāinga housing may be clustered and was less likely to involve subdivision; therefore, she considered the standards that apply to the rule supported a common ownership model rather than a traditional individual ownership developer-led model.

287. No changes were recommended by Ms Easton to GRZ-R17.

GRZ-R18 Commercial Visitor Accommodation within the Hokitika Visitor Accommodation Area not meeting Permitted Activity Standards

[54] S190.869, S608.726
[55] S567.467 William McLaughlin, S558.414 C & J Coll, S566.414 Chris J Coll Surveying Limited, S574.414 Laura Coll McLaughlin
[56] S620.239, S190.870

288. Ms Easton acknowledged the support from the two submissions that sought to retain the rule as notified[57]. She recommended no changes to this provision.

GRZ – R19 Residential Activity, Residential Units, Papakāinga developments, Fences, Walls and Minor Structures and Relocated Buildings not meeting Permitted, Controlled or Restricted Discretionary Activity Standards.

289. Ms Easton acknowledged the support from the three submissions that sought to retain the rule as notified[58].

290. Ms Easton did not support Poutini Ngai Tahu's (S620.240) request to amend the rule to reflect the points raised in their submission on the Nosie Chapter (Rule NOISE – R3 which was not referred to in this rule). She noted that the reference to Rule NOISE-R4 in this rule was an error because it should be Rule NOISE-R5.

291. In response to the submission of Frank and Jo Dooley and Frank O'Toole[59] which sought to remove fences, walls, and retaining structures from the rule and develop a new standalone rule for these structures, Ms Easton supported these submission points. She agreed that the rule contains matters that are not relevant to these structures and that these structures would otherwise be subject to an unreasonable degree of assessment against irrelevant matters at the resource consent stage.

292. Ms Easton recommended that GRZ-R19 be amended as follows:

> ***GRZ - R19 Residential Activity, Residential Units, Papakāinga developments, ~~Fences, Walls and Minor Structures~~ and Relocated Buildings not meeting Permitted, Controlled or Restricted Discretionary Activity Standards.***
>
> ***Activity Status Discretionary***
> *Where:*
> 1. *All performance standards for Rules NOISE R1-R2 and R4 and LIGHT - R3 are complied with.*
>
> ***Activity status where compliance not achieved:*** *Non-complying*

GRZ – R20 Home Business not meeting Permitted Activity Standards

293. Ms Easton acknowledged the support from the three submissions that sought to retain the rule as notified[60]. No changes were recommended by Ms Easton to this provision.

GRZ – R21 Residential and Commercial Visitor Accommodation not meeting the Permitted or Restricted Discretionary Activity Standards

294. Ms Easton acknowledged the support from the two submissions that sought to retain the rule as notified[61].

295. Ms Easton did not support Margaret Montgomery's (S446.104) request to add additional controls around residential visitor accommodation or some form of restriction upon time

[57] S190.871, S446.101
[58] S190.872, S446.102, S538.488
[59] S478.031, S478.037 Frank and Jo Dooley, S595.019, S595.025 Frank O'Toole
[60] S190.873, S446.103, S538.489
[61] S190.874, S538.490

limits for renting of dwellings. She considered that as a discretionary activity there as sufficient scope to consider the issues of the submitter.

296. No changes were recommended by Ms Easton to this provision.

GRZ – R22 Commercial Activities and Emergency Service Activities

297. Ms Easton acknowledged the support from the three submissions that who sought to retain the rule as notified[62].

298. In response to Frida Inda and Buller Conservation Group's[63] request to add "*air pollution*" and *"dust, odour and smoke"* to clause (4), Ms Easton did not support this submission. She considered that air pollution was an unquantifiable description and noted it was managed through the Regional Air Plan.

299. Ms Easton did not support FENZ's (S573.028) request to permit Emergency Service Activities in the GRZ because she considered that, although there were three fire stations located within the GRZ, the zone was generally not suitable and could create amenity issues.

300. No changes were recommended by Ms Easton to this provision.

GRZ – R23 Industrial Activities

301. Ms Easton acknowledged the support from the seven submissions who sought to retain the rule as notified[64]. No changes were recommended by Ms Easton to this provision.

GRZ – R24 Any activity not provided for by another Rule in the zone

302. Ms Easton acknowledged the support from the three submissions that sought to retain the rule as notified[65].

303. Ms Easton did not support the submissions[66] that sought to make this rule a discretionary rather than non-complying activity and noted no reasons had been provided to justify this change.

304. No changes were recommended by Ms Easton to GRZ-R24.

Hearing and Submitter Evidence/Statements

305. In relation to GRZ-R4 regarding relocated buildings, Ms Inta considered the amendments proposed in the s42A Report made less sense than the original wording. She recommended reinstating the wording as follows:

> ***GRZ - R4 Relocated Buildings***
> ***Activity Status Permitted***
> *Where:*
>
> 1. *All performance standards for Rule GRZ - R1 are complied with;*

[62] S190.875, S446.105, S538.491
[63] S552.170, S553.170
[64] S190.876, S446.106, S567.469, S558.416, S566.416, S574.416, S538.492
[65] S190.877, S446.107, S538.493
[66] S567.470 William McLaughlin, S558.418 C & J Coll, S566.418 Chris J Coll Surveying Limited, S574.418 Laura Coll McLaughlin

2. *Any relocated building intended for use as a dwelling must have been designed, **and** built **to be** ~~and~~ used as a dwelling;*

…

306. Mr Bhana-Thompson, on behalf of the NZ Heavy Haulage Association Inc., focused on Rule GRZ-R4. He generally agreed with the s42A Report recommendations for the residential zones, except for the amendments sought regarding the maintenance of amenity values of relocated buildings. He noted support for permitting this activity, subject to meeting performance standards and criteria, such as the use of a pre-inspection/reinstatement report. A suggested template for this pre-inspection report was provided, and it was noted that some other councils had adopted (or adapted) this for their district plans.

307. In response to questions from the panel, Mr Bhana-Thompson confirmed that the original notified wording, as opposed to the revised wording in the s42A Report, was preferred. He also confirmed that he considered a 12-month timeframe was appropriate and realistic for achieving reinstatement works.

308. In relation to GRZ-R5 regarding home businesses, Ms Inta considered the vehicle generation thresholds in clause (5) was too high and would disturb domestic animals and wildlife. She requested that any business with this level of traffic be subject to neighbours and/or community approval. She suggested that the number of permitted vehicular traffic should be reduced. She supported the inclusion of clause (7) and considered it should be applied to all parts of the Plan

Reporting Officer Reply Evidence

309. In her Right of Reply, Ms Easton addressed queries from the Panel and considered further amendments in response following the information presented in the hearing. Several of these queries are addressed earlier in this report, specifically in the definitions, general chapter, objectives, and policies sections. These are not repeated here.

310. In relation to the activity status for undertaking residential development without connecting to reticulation systems, Ms Easton was of the view that there was not sufficient scope within submissions to make a change from discretionary to non-complying.

311. In response to Panel questions, Ms Easton agreed that GRZ-R2 could recognise existing use rights for the fire stations to provide greater certainty and recommended the following amendments in addition to those already recommended:

GRZ - R2 Minor Structures
Activity Status Permitted
Where:

a. These are existing hose drying towers with a maximum height of 15m located at the Cobden, Runanga and Hokitika Fire Stations;

b. *~~All performance standards for Rule GRZ - R1 are complied with~~ **All other s**~~S~~tructures are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries;*

…

***Activity status where compliance not achieved:** Controlled*

312. Regarding the minor error in Rule GRZ-R19 (and other similar rules), where Rule NOISE-R4 was referenced rather than NOISE-R5, Ms Easton considered whether this could be undertaken as an RMA Schedule 1, clause 16 amendment. Her view was that it would meet the criteria and should be recommended for updating across all rules where it was currently incorrectly applied. These are set out as follows:

> Rules GRZ – R5, GRZ – R6, GRZ – R7, GRZ – R8, GRZ – R14, GRZ – R19, GRZ – R20, GRZ – R22, LLRZ – R5, LLRZ – R6, LLRZ – R7, LLRZ – R8, LLRZ – R13, LLRZ – R14, LLRZ – R15, LLRZ – R17, LLRZ – R19, LLRZ – R20, LLRZ – R22, MRZ – R5, MRZ – R6, MRZ – R7, MRZ – R8, MRZ – R14, MRZ – R15 and MRZ – R16.
>
> 1. *All performance standards for Rules NOISE R1-R2 and R4**5** and LIGHT - R3 are complied with…..*

313. In relation to Rule GRZ-R14 for visitor accommodation, as well as corresponding rules LLRZ-R13 and MRZ-R14, Ms Easton considered whether there was scope to add the number of occupants or size of building to the matters of discretion but concluded there was no scope to support such a change.

314. In response to the evidence of NZ Heavy Haulage and subsequent questions from the Panel on GRZ-R4, Ms Easton considered a pre-inspection schedule could be included in the Plan and suggested adding based on the information provided by NZ Heavy Haulage Association. She recommended a new schedule as follows:

> ***Schedule XXXX Requirements for a Relocated Building Pre-Inspection Report***
> ***This report must be provided prior to the building being relocated to its new site. The information required in the pre-inspection report is as follows:***
>
> - ***Proposed new site location***
> - ***Date of report***
> - ***Type of building***
> - ***Date of construction***
> - ***Building description – number of stories, ground floor area, general construction materials for roof, walls, floor, any additional features.***
> - ***Site address where the building was inspected***
> - ***Date when building inspected***
> - ***Name of inspector and qualifications***
> - ***Proposed use of the building***
> - ***Previous use of the building***
> - ***Description of areas accessed (i.e. interior/exterior)***
> - ***Condition assessment of the following external elements: roof, spouting and downpipes, wall cladding, foundation cladding, window and door joinery***
> - ***Any health and safety matters that need to be considered***
> - ***Estimate of costs of external reinstatement including repair of transit damage, repair of any broken or damaged external elements, cleaning and painting of exterior elements.***

315. In response to the Panel question regarding existing use rights on residential accommodation in relation to Rule GRZ-R6, Ms Easton considered that an RMA Schedule 1, clause 16 amendment to the advice note for the rule, to avoid ambiguity around lawfully established activities in Grey District, would be appropriate. This was as follows:

> ***Advice Notes:***

1. *…*
2. *~~In the Buller and Westland Districts, w~~**W**here residential visitor accommodation has been lawfully established under the Buller**, Grey or Westland** District Plan provisions, then existing use rights apply.*

Hearing Panel's Evaluation

316. The Panel agrees with Ms Easton's evaluation and recommendations on the general submissions on the rules provided in her s42A Report.

317. In relation to **GRZ-R1**, the Panel agrees with Ms Easton's evaluation that height restrictions are already included in this rule as notified, and when coupled with recession planes, will provide for appropriate control. We also agree that private views are not protected under the RMA. We therefore accept her recommendation on these submission points.

318. In relation to the Westport Pistol Club's submission to add a requirement to the advice note for any residential activity or residential unit within 250m of a rifle range protection area overlay to be subject to acoustic insulation requirements, the Panel agrees with Ms Easton that there are currently no insulation requirements concerning Rifle Range Protection Areas in Rule NOISE-R3. Therefore, we reject the Westport Pistol Club's submission and do not recommend any amendment.

319. The Panel agrees with Ms Easton that the Te Mana Ora submission, which sought an additional standard in GRZ-R1, relating to clean air burners, falls outside the jurisdiction of the Plan. We recommend no change in response to this submission.

320. The Panel agrees with Ms Easton that a controlled activity status where compliance is not achieved is inappropriate. This is because defaulting to discretionary or restricted discretionary, depending on the standard that is not complied with, is appropriate to provide confidence in a basic level of amenity, density, infrastructure, and character being provided within the zone. We also note that a controlled activity cannot be declined which we consider is another reason to reject the submission.

321. The Panel generally agrees with Ms Easton's evaluation of those submissions which sought an exemption from the recession plane standards, where there is a requirement for a building to meet a freeboard under the natural hazard rules. We have considered her advice that a freeboard can reasonably be provided without infringing the recession planes and note that this will be context specific. The Panel recognise this issue as it arises in relation to GRZ-R13.

322. The Panel agrees with Ms Easton's recommended amendments detailed in Appendix 1 of the s42A Report to clause (8) of GRZ-R1, specifying that stormwater be managed onsite in accordance with NZS 4404:2010. Ms Easton confirmed that NZS 4404:2010 is an appropriate standard to ensure that uncontrolled stormwater is not exacerbated and that secondary flow is managed appropriately. We consider as a consequential amendment the same wording should apply in the MRZ zone.

323. The Panel generally agrees with both Ms Easton's reasons and recommended amendments to GRZ-R1 as sought in submissions and further submissions regarding accessory buildings, differing residential densities in the three districts, the recognition that developments secure connections to community infrastructure as a critical issue, recession plane and setback matters. However, the Panel finds no submission point to support amendment to notified

clause 10(a) and therefore makes no change to that part of the rule. Amendments relating to including accessory buildings are also recommended for Rule LLRZ-R1 and Rule MRZ-R1.

324. The Panel also agrees that this rule does not need to be amended to address the issue of connections to the public reticulated water supply, as other plan provisions provide for the same circumstance. We agree with Ms Easton that there is no need to place the standards in this rule in a separate table, as that would result in unnecessary complexity.

325. The Panel has considered the amendment to GRZ-R1(a) in light of recommendations on use of the term "*site*" in preference to "*allotment*". The Panel are not satisfied that "*allotment*" is the correct term to use in this rule, as recommended by Ms Easton.

326. In relation to **GRZ-R2**, the Panel agrees with Ms Easton's recommended amendments in response to submissions and accepts BDC's submission to delete the reference to Rule GRZ-R1 performance standards and replace it with a 4.5m setback requirement from road boundary and 1m from internal boundaries. We also agree with her recommendation to amend the rule to recognise those existing fire stations with hose drying towers to avoid any uncertainty issues for those stations relying on existing use rights.

327. In relation to **GRZ-R3**, Ms Easton recommends no changes to this rule, and the Panel agree, noting no submitters sought to amend this rule.

328. In relation to **GRZ-R4**, the Panel agrees with the amendments proposed by Ms Easton to partially address the submission of the New Zealand Heavy Haulage Association, which states that buildings intended for dwellings must have originally been used as dwellings. We agree that the other submission points sought by the New Zealand Heavy Haulage Association do not clarify or simplify the rule, however we have added reference to a new Appendix 11 which will set out the information that is required in the building pre-inspection report which is based on information provided by the Association at the hearing. This is a Plan-wide amendment.

329. The Panel has also consolidated rule 4 by deleting Clause 5 and adding to Clause 3. We consider the two clauses were overlapping and there were elements of uncertainty between them. We consider the amendments now make it clear the works to completed within 12-months of the building being delivered to the site. We consider the scope for these amendments stem from the submissions seeking deletion given the changes reduce and clarify the rule. We therefore recommend the amendments proposed and note that similar amendments are proposed in other recommendations.

330. The Panel considers the s42A Report's interpretation of Charles Elley's submission point (S251.003) is the opposite to the relief sought, which is to <u>not</u> require that relocatable dwellings must have been originally used as dwellings. However, we agree with Ms Easton that such buildings that need converting into dwellings should not be a permitted activity and require assessment via a resource consent process. We therefore reject submission point S251.003.

331. In relation to **GRZ-R5**, the Panel accepts Ms Easton's recommendation in relation to the BDC submission to regulate home business through the provision of an additional standard requiring that no more than one full-time equivalent person engaged in the home business can reside off-site given, at present, there is no limit in the pTTPP. We agree this will ensure that the scale of any home business does not exceed what would be reasonably expected in

a residential area. We consider a consequencial amendment to the LLRZ and MRZ Home Business rules is also appropriate as a result of the BDC submission. should We accept Ms Easton's reasons for rejecting submissions that sought other changes to this rule. However, we note that the Panel's recommendations on the Transport Chapter is to delete notified clause (4) in this rule relating to vehicle movements to avoid the potential for uncertainty between provisions.

332. In relation to **GRZ-R6**, the Panel agrees with Ms Easton's recommended amendments to require annual reporting and to align WDC with BDC but not GDC. We also accept her recommendation to utilise clause 16 to make an amendment to the advice note for this rule, clarifying existing use rights related to this rule. For the same reasons Ms Easton provides, we consider LLRZ-R6 and MRZ-R6, which cover similar matters to GRZ-R6, also need the recommended advice note as consequential amendments. Further, we agree with her recommendation that full-house leasing for visitor accommodation should not have a permitted activity status under the Plan, as that activity can have adverse effects that require assessment. We have made minor amendments to clarify that existing use right only apply if the activity is not discontinued for more than 12 months and that these "may" apply depending on any assessment under section 10 of the RMA.

333. The Panel agree that providing records of letting activity to the GDC is a helpful way for the GDC to gather data and monitor for potential effects. We also agree with Ms Easton's recommendation not to alter the rule concerning noise, as the Noise chapter provisions apply. Additionally, we agree that a limit on the number of nights of stay is unnecessary; and that it is not appropriate make amendments to address existing non-compliances.

334. Regarding **GRZ-R7**, the Panel generally agree with Ms Easton, as detailed in her s42A, that no changes are required for this rule. We agree with her assessment and the reasons for recommending rejection of the Ministry of Education and FENZ submissions seeking amendments to the rule, as well as the rejection of the submission seeking to amend the rule to accommodate existing non-compliances. The Panel notes however that, as a result of recommendations in the Transport Chapter regarding trip generation, clause 2, relating to traffic movement, has been amended to ensure compliance with Rule TRN – R6 is also achieved in this situation. While we acknowledge that this has not been the situation for Home Businesses in the Residential Zones where the rule has been deleted in favour of TRN – R6, in the case of Community Facilities and Educational Facilities, we consider a bespoke approach is necessary in order to address the potential scale of these activities, which is not otherwise addressed. We are of the view that this is best achieved by retaining the notified part of the rule. We consider this is particularly necessary where such activities might seek to locate on local roads.

335. In relation to **GRZ-R8 to GRZ-R12**, the Panel accepts Ms Easton's recommendation to retain the rules as notified for the reasons outlined. We note however that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to 'landscape measures' and 'landscape treatment' have been removed from the matters of discretion and replaced with 'measures to mitigate landscape effects' throughout the chapter.

336. In relation to **GRZ-R13,** the Panel agrees with Ms Easton that it will become increasingly common on the West Coast for a building project to breach the recession plan due to the application of natural hazards rules, as freeboard requirements are included in new developments and additions to existing developments. We recommend this rule be amended to provide for that circumstance.

337. The Panel agrees with Ms Easton's recommendation to include two additional matters of discretion regarding "*shading and loss of sunlight to adjoining sites" and "loss of privacy to adjoining sites"* given the potential for adverse effects to be generated by the activities subject to this rule.

338. The Panel note this rule activates Appendix Two, which details where the relevant measurements are to be taken for determining recession planes. Appendix Two requires this to be taken from filled ground levels, except where an existing building is at a lower level on the other side of a common boundary, where the lower level is to be adopted. We consider this provision in combination with the recommended amendment to this rule will appropriately provide for circumstances where a breach of a recession plane arises due to the application of natural hazard rules and/or new freeboard requirements.

339. In relation to **GRZ-R14**, the Panel accepts Ms Easton's recommendation to retain the rule as notified. We agree that access is already a matter of discretion, so no amendment is needed. We also agree that clause (e) insulation requirements are to attenuate noise and manage its effects and therefore deletion of the word '*noise*' is inappropriate.

340. Regarding **Rule GRZ-R14** for visitor accommodation, as well as corresponding rules LLRZ-R13 and MRZ-R14, we agree with Ms Easton that there is no scope to add the number of occupants or size of building to the matters of discretion.

341. In relation to **GRZ-R15,** the Panel accepts Ms Easton's recommended amendments to include new matters of discretion because those matters are the key effects that should be managed.

342. In relation to **GRZ-R16, GRZ-R17 and GRZ-R18**, the Panel accepts Ms Easton's recommendation to retain the rules as notified for the reasons outlined. We note however that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to 'landscape measures' and 'landscape treatment' have been removed from the matters of discretion and replaced with 'measures to mitigate landscape effects' throughout the chapter.

343. In relation to new **GRZ-R18A**, the Panel accepts Ms Easton's recommendation to add this new rule and agree the matters of discretion are appropriate.

344. In relation to **GRZ-R19**, the Panel accepts Ms Easton's recommendation to delete '*fences, walls, and retaining structures'* from the heading because they are not relevant to the other structures identified in the rule and new GRZ-R18A addresses these.

345. In relation to **GRZ-R20** to **GRZ-R23**, apart from minor integration issues, the Panel accepts Ms Easton's recommendation to retain the rules as notified for the reasons outlined.

346. The Panel acknowledges that **GRZ-R24** is a 'catch-all' rule intended to manage activities not specifically provided for in the other rules. The Panel has considered this matter plan-wide and we agree with the submitters that such rules are better placed as discretionary; otherwise, they are unnecessarily limiting in our view and could have unforeseen consequences. Therefore, it is our recommendation to recategorise this rule as a discretionary activity.

Hearing Panel's Recommendation

347. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted and accepted in part, and recommend the following amendments are made to the **General Residential Zone Rules**:

GRZ – R1	**Residential Activities and Residential Units and Accessory Buildings**[67] **Activity Status Permitted** Where: 1. Residential unit density is no more than: a. **one**~~1~~[68] unit per 350m^2 net site area~~; or~~ **but within the Buller District there is a maximum of two residential dwellings per allotment**;[69] b. **one**~~1~~[70] unit per 300m^2 net site area where two or more adjoining sites are developed **except within the Buller District this standard does not apply**;[71] 2. There is no more than **one**~~1~~[72] minor residential unit per site with a maximum size of 65m^2; 3. Maximum building height above ground level is: a. 10m; except that b. No building, structure or tree shall protrude into the Airport Approach Path of any airport or aerodrome identified on the planning maps and as described in Appendix Nine; 4. Buildings are setback a minimum 4.5m from road boundaries, except that a roof overhang may encroach 750mm into the setback distance; 5. Maximum site coverage is 40%; 6. A minimum of 30m^2 of outdoor living space is provided per residential unit and 12m^2 per minor residential unit which is separate to the outdoor space for the principal dwelling and excluding any parking and manoeuvring areas~~;~~ **and the outdoor living space must have a minimum dimension of 3m**;[73] 7. No more than one heavy vehicle is stored on site; 8. All residential units and buildings used for a residential activity must be connected to the community water supply, and wastewater networks and stormwater from the site **and are managed in accordance with the relevant standards in NZS4404: 2010 Land Development and Subdivision Infrastructure** ~~used for the activity~~ **and** must not drain to any public road ~~except for secondary flow purposes~~;[74] 9. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing.~~ This standard does not apply to~~:~~ ~~a. Road boundaries;~~ ~~b. Buildings on adjoining sites that have a common wall along the boundary;~~

[67] Buller District Council S538.475
[68] RMA Schedule 1, clause 16 correction
[69] Buller District Council S538.475
[70] RMA Schedule 1, clause 16 correction
[71] Buller District Council S538.475
[72] RMA Schedule 1, clause 16 correction
[73] Davis Ogilvie & Partners Limited S465.036
[74] Waka Kotahi NZTA S450.245, Grey District Council S608.720

	~~c. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;~~ [75] ~~d. B~~**b**oundaries adjoining any site in a CMUZ - Commercial and Mixed Use, INZ - Industrial or RURZ - Rural Zone; ~~e. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or~~ ~~f. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically;~~ and[76] 10. Buildings are setback a minimum of **1.5m from the railway corridor** 1m from all other site boundaries, except that: a. Duplexes do not require a setback from the side boundary of the other duplex unit; and ~~b. Setbacks are not required from adjacent residential boundaries where neighbouring property owner's written approval is provided to the Council 10 working days prior to the works commencing.~~ b. **A setback of 150m is required from the site boundary of any designated wastewater treatment plant.** [77] **Advice Notes:** 1. Where a residential building or noise sensitive activity is located within: a. 80m of a State Highway with a speed limit of 70kph or greater; or b. 40m of a State Highway with a speed limit of less than 70kph; or c. 40m of a Railway Line; or d. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or e. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome. Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply. 2. **Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council**.[78] **Activity status where compliance not achieved**: Discretionary where standards 1 to 8 are not complied with. Restricted Discretionary where standards 9 and 10 are not complied with.
GRZ – R2	**Minor Structures** **Activity Status Permitted** Where: 1. **These are existing hose drying towers with a maximum height of 15m located at the Cobden, Runanga and Hokitika Fire Stations**; [79] 2. ~~All performance standards for Rule GRZ - R1 are complied with~~ **All other** ~~S~~structures **are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries**;[80]

3. Masts, poles, aerials and pou whenua must not exceed 7m in height;
4. Any antenna dish must be less than 1m in diameter;
5. Any ornamental or garden structure must not exceed 2.4 m in height; and

F6 Any other structure must not exceed 10m^2 and 2m in height.

Activity status where compliance not achieved: Controlled

GRZ – R3 No Change

GRZ – R4 **Relocated Buildings**

Activity Status Permitted

Where:

1. All performance standards for Rule GRZ - R1 are complied with;
2. Any relocated building intended for use as a dwelling must have been designed, ~~and~~ built, ~~to be~~ **and** used as a dwelling; [81]
3. A building pre-inspection report **completed in accordance with Appendix Eleven**[82] shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the **exterior** reinstatement works **including connections to infrastructure services and closing in and ventilation of the foundations** shall be completed within 12-month**s of the building being delivered to the site**; **and**;[83]
4. The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site; and
5. ~~All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.~~[84]

Activity status where compliance not achieved: Controlled

GRZ – R5 **Home Business**

Activity Status Permitted

Where:

1. This is ancillary to a residential activity;
2. All performance standards for Rules GRZ - R1, NOISE R1-R2 and R~~4~~5, LIGHT - R3 and SIGN - R10 are complied with;

3. There is no more than one full–time equivalent person engaged in the home business that resides off-site; [85]

4. Hours of operation are limited to:

a. 7am-7pm weekdays; and

2.6. Large Lot Residential Zone – Rules and Standards

Submissions and Further Submissions

Large Lot Residential Zone - General

348. Three submission points relating to the LLRZ rules (as a whole) were summarised in the Table on page 59 of the s42A Report. Two submission points sought to retain all, or select, rules as notified. The remaining submission sought amendments.

Large Lot Residential Zone

349. Eleven submission points and one further submission point relating to Rule **LLRZ-R1** were summarised in a Table on pages 59-60 of the s42A Report. Two submission points sought amendments to the rule as notified. The remaining submissions all sought amendments, with one further submission in partial support of a suggested amendment.

350. Six submission points and one further submission point relating to Rule **LLRZ-R2** were summarised in a Table on pages 60-61 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission points sought amendments, while the one further submission supported in part the amendments sought by one submitter.

351. Five submission points in support of Rule **LLRZ-R3** as notified were summarised in a Table on page 61 of the s42A Report.

352. Eight submission points and two further submissions relating to Rule **LLRZ-R4** were summarised in a Table on pages 61-62 of the s42A Report. Two submission points supported the retention of the rule as notified. Four submission points opposed the rule as notified and sought its deletion in full. The remaining two submission points sought amendments, with one further submission supporting in part and the other opposing in part, suggesting amendments.

353. Six submission points relating to Rule **LLRZ-R5** were summarised in the Table on pages 62-63 of the S42A Report. One submission point supported the retention of the rule as notified. The remaining five submission points sought amendments.

354. Nine submission points relating to Rule **LLRZ-R6** were summarised in a Table on page 63 of the s42A Report. Three submission points supported the retention of the rule as notified. The remaining submission points sought amendments.

355. Seven submission points and one further submission point relating to Rule **LLRZ-R7** were summarised in a Table on pages 63-64 of the s42A Report. Two submission points supported the retention of the rule as notified. The remaining submission points sought amendments, while the one further submission opposed in part the amendments sought by one submitter.

356. Six submission points and one further submission point relating to Rule **LLRZ-R8** were summarised in a Table on page 64 of the s42A Report. Two submission points supported the retention of the rule, as notified, with one further submitter supporting one of these submissions. The remaining submission points sought amendments.

357. One submission point supported Rule **LLRZ-R9** as notified and was summarised in the Table on page 64 of the s42A Report.

358. Five submission points relating to Rule **LLRZ-R10** were summarised in the Table on page 65 of the s42A Report. One submission point supported the retention of the rule as notified, while the remaining submissions sought amendments.

359. Five submission points relating to Rule **LLRZ-R11** were summarised in the Table on page 65 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission points opposed the rule and sought its deletion.

360. Eight submission points and two further submissions relating to Rule **LLRZ-R12** were summarised in the Table on pages 65-66 of the s42A Report. Seven submission points supported the retention of the rule as notified, with one further submitter in support. The remaining submission sought amendments, which were supported in part by one further submitter.

361. Six submission points relating to Rule **LLRZ-R13** were summarised in the Table on page 66 of the s42A Report. Two submission points supported the retention of the rule as notified. The remaining submission points sought amendments.

362. Four submission points relating to Rule **LLRZ-R14** were summarised in a Table on pages 66-67 of the s42A Report. Three submission points supported the retention of the rule as notified. The remaining submission point sought amendments.

363. Thirteen submission points relating to Rule **LLRZ-R15** were summarised in a Table on page 67 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission points sought amendments.

364. Nine submission points relating to Rule **LLRZ-R16** were summarised in a Table on pages 67-68 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission points sought amendments.

365. Nine submission points relating to Rule **LLRZ-R17** were summarised in a Table on page 68 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission point sought amendments.

366. Two submission points relating to Rule **LLRZ-R18** were summarised in a Table on page 68 of the s42A Report. One submission supported the retention of the rule as notified. One submission opposed the rule and sought amendments.

367. Five submission points relating to Rule **LLRZ-R19** were summarised in a Table on page 69 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission point sought amendments.

368. Five submission points relating to Rule **LLRZ-R20** were summarised in a Table on page 69 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission point sought amendments.

369. Five submission points relating to Rule **LLRZ-R21** were summarised in a Table on page 69 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission point sought amendments.

370. Five submission points relating to Rule **LLRZ-R22** were summarised in a Table on pages 69-70 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission points opposed the rule and sought its deletion.

371. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

Section 42A Report

Standards (General)

372. Ms Easton acknowledged the support from the submissions that support the rules, or selected rules, as notified.

373. In response to the submission of the New Zealand Motor Caravan Association (S490.014) that sought to provide campgrounds and camping as a permitted activity within this zone, Ms Easton did not support that submission. She considered that this zone primarily provides for residential activities, and that the visitor accommodation provisions in the zone rules address campgrounds and other visitor accommodations.

374. Ms Easton made no recommendations to amend the LLRZ rules in response to these submissions.

LLRZ-R1 Residential Activities and Residential Units

375. In relation to Rule **LLRZ-R1**, Ms Easton acknowledged the two submissions that sought to retain the standard as notified[115].

376. In response to the submission points of Buller Conservation Group and Frida Inta[116] that sought to amend clause (7) only to require connection to a community water supply and wastewater if these services are provided, Ms Easton did not support these submissions. She noted the expectation of residential zones, including large lot residential zones, was that buildings are connected to three waters services. She also noted that many large-lot residential areas are known to have stormwater management issues, and therefore, on-site wastewater systems have a higher chance of causing cumulative adverse effects on water quality.

377. Ms Easton did not support the submissions[117] requesting to delete the advice note on the basis that an advice note is not a rule and because it cross-references to the requirements under NOISE-R3, which remain in place regardless of this advice note. She noted that Rule

[115] S349.011, S190.879, S450.250
[116] S552.171, S553.171
[117] S567.471 William McLaughlin, S558.419-420 Chris and Jan Coll, S566.419-420 Chris J Coll Surveying Limited, S574.419-420 Laura Coll Mclaughlin

NOISE-R3 would be considered under the Noise Chapter, and provided it remained in the Plan, Ms Easton considered that this advice note should remain.

378. In response to William McLaughlin's (S567.472) requested for a controlled activity status when compliance with permitted standards is not achieved, Ms Easton did not support this this submission. She considered that landowners and residents should be able to have confidence in a basic level of amenity, density, infrastructure capacity and character within the zone and given a controlled activity must always be granted, she did not consider this status was appropriate.

379. Ms Easton did not support FENZ's (S573.029) to add a new standard to require a developer to demonstrate how an alternative and satisfactory water supply could be provided to each lot where a development would not be connected to an adequate public reticulated water supply. She noted that a development was not a permitted activity where it could not connect to a public reticulated water supply; and therefore, she did not consider such a standard necessary.

380. Ms Easton supported GDC's (S608.728) request to remove the reference to "*secondary flow purposes*" in clause (6) because the exemption for secondary flow purposes was not consistent with NZS4404:2010.

381. Ms Easton considered a consequential amendment necessary following on from her recommendation on the BDC submission S538.475 on GRZ-R1 regarding accessory buildings.

382. Ms Easton recommended that LLRZ-R1 be amended as follows:

> ***LLRZ-R1 Residential Activities and Residential Units <u>and Accessory Buildings</u>***
> ***Activity Status: Permitted***
>
> *1. …*
>
> *6. Stormwater is managed on site with any off-site discharge is managed in accordance with NZS4404:2010 Land Development and Subdivision Infrastructure and must not drain to any public road ~~except for secondary flow purposes~~;*
>
> *7. …*

LLRZ-R2 Minor Structures

383. Ms Easton acknowledged the submission that sought to retain the rule as notified[118].

384. In response to the submissions[119] that sought amendments to accommodate existing, legal non-compliances with the LLRZ-R1 performance standards, Ms Easton supported these submissions in part. She considered that the reference to the LLRZ-R1 performance standards was inappropriate as this rule related to very minor structures such as flagpoles, water tanks, garden ornaments and sheds. She therefore recommended that only the setback requirement be included, similar to the standard for the equivalent Rule GRZ-R2.

385. Ms Easton did not support FENZ's (S573.030) request for an exemption for hose drying towers and siren towers to be up to 15m high in this zone. She noted that there were no fire

[118] S190.880
[119] S567.473 William McLaughlin, S558.421 C and C Coll, S566.421 Chris Coll Surveying, S574.421 Laura Coll McLaughlin

stations within the LLRZ and considered that the merits of such a proposal should be assessed through a resource consent process.

386. Ms Easton's recommended amendments to LLRZ-R2 were as follows:

> ***LLRZ - R2 Minor Structures***
> ***Activity Status Permitted***
> *Where:*
>
> *a. ~~All performance standards for Rule LLRZ - R1 are complied with~~* ***Structures are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries****;*
>
> *b. Masts, poles, aerials and pou whenua must not exceed 7m in height;*
>
> *c. Any antenna dish must be less than 1m in diameter;*
>
> *d. Any ornamental or garden structure must not exceed 2.4 m in height; and*
>
> *e. Any other structure must not exceed 10m^2 and 2m in height.*
>
> ***Activity status where compliance not achieved:*** *Controlled*

LLRZ-R3 Fence Wall and Retaining Walls

387. Ms Easton acknowledged the support from submitters that sought to retain the rule as notified[120]. She recommended no changes to this provision.

LLRZ-R4 Relocated Buildings, LLRZ-R11 Relocated Buildings not meeting Permitted Activity Standards

388. Ms Easton acknowledged the two submissions that sought to retain the rule as notified[121].

389. There are several submissions[122] that sought that Rules LLRZ-R4 and LLRZ-R11 be deleted in their entirety. Ms Easton did not support these submissions and considered that the rules were necessary to manage amenity and ensure necessary building work to meet standards was completed within a specified timeframe.

390. As outlined above in relation to GRZ-R4, Charles Elley (S251.003) sought to remove restrictions that only allow relocatable buildings intended to be dwellings that were originally built and used dwellings. Ms Easton supported this submission, but it appears she misinterpreted this submission because the s42A Report states the submission sought to amend the rule to relate only to those buildings that are intended to be dwellings and were originally dwellings.

391. NZ Heavy Haulage Association Inc. (S616.005) sought performance standards for relocatable buildings based on the matters in schedule 1 of its submission, as outlined above in relation to GRZ-R4. Ms Easton supported an amendment that buildings must originally be dwellings, but did not support the balance of changes, which she considered would make the rule more complex.

392. Ms Easton's recommended retaining LLRZ-R11 as notified and amending LLRZ-R4, as follows:

> ***LLRZ - R4 Relocated Buildings***

[120] S190.881, S567.474, S558.422, S566.422, S574.422
[121] S190.882, S608.729
[122] S567.014, S567.475, S567.015, S567.481William McLaughlin, S558.054, S558.423, S558.065, S558.430 C & J Coll, S566.054, S566.423, S566.065, S566.430 Chris J Coll Surveying Limited, S574.054, S574.423, S574.065, S574.430 Laura Coll McLaughlin

Activity Status Permitted
Where:

1. *All performance standards for Rule LLRZ - R1 are complied with;*
2. *Any relocated building intended for use as a dwelling must have been designed, ~~and~~ built ~~to be~~ **and** used as a dwelling;*
3. *A building pre-inspection report shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the reinstatement works shall be completed within a 12 month period;*
4. *The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site; and*
5. *All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.*

Activity status where compliance not achieved: *Controlled*

LLRZ-R5 Home Business

393. Ms Easton acknowledged the one submitter that sought to retain the rule as notified[123].

394. In response to the submissions[124] that sought amendments to accommodate existing, legal non-compliances with the LLRZ-R1 performance standards, Ms Easton did not support these submissions. She considered that where there may be a non-compliance, for example with noise or light emissions, that could lead to cumulative effects on neighbouring amenity.

395. Ms Easton recommended amendments to provide greater clarity in response to Waka Kotahi NZTA's (S450.251) request to amend the rule to reduce the permitted level of vehicle movements to no more than 30 car movements per day. She noted the current standard was limited to no more than four heavy vehicle movements per day, 20 light vehicle movements per day or 210 vehicle movements per week, whichever is greater. She considered this could be interpreted to allow for 210 vehicle movements per day and none for the rest of the week.

396. Ms Easton recommended amendments to LLRZ-R5 as follows:

LLRZ - R5 Home Business
Activity Status Permitted
Where:
1. This is ancillary to a residential activity;
2. All performance standards for Rules LLRZ - R1, NOISE R1-R2 and R4, LIGHT - R3 and SIGN - R10 are complied with;
3. Hours of operation are limited to:
a. 7am-7pm weekdays; and
b. 8am - 5pm weekends and public holidays;
c. Except where:
i. The entire activity is located within a building;
ii. Each person engaged in the activity outside the above hours resides permanently on site; and

[123] S190.883
[124] S567.476 William McLaughlin, S558.424 Chris and Jan Coll, S566.424 Chris J Coll Surveying Limited, S574.424 Laura McLaughlin

iii. There are no visitors, customers or deliveries to the activity outside of the above hours
*4. A maximum of 4 heavy vehicle movements per day**, ~~and whichever is the greater of~~** 30 light vehicle movements per day, **~~or~~** **and** 210 light vehicle movements per week;*
…

***Activity status where compliance not achieved**: Discretionary*

LLRZ-R6 Residential Visitor Accommodation

397. Ms Easton acknowledged the three submissions that sought to retain the rule as notified[125].

398. The submission of GDC (S608.105) sought that records of letting activity be provided to the Council on an annual basis rather than on request so that landowners undertaking this activity should provide the evidence rather than GDC trying to determine where the businesses have set up. Ms Easton considered this was a reasonable requirement to ensure that permitted activity standards were met.

399. Ms Easton did not support Lynda Richmond's (S423.002) request that only homestay accommodation in Greymouth be a permitted activity. She considered that Greymouth was not impacted by residential visitor accommodation and was not a major tourism destination compared to other parts of the West Coast.

400. Ms Easton did not support submissions[126] that sought amendments to accommodate existing legal non-compliance with LLRZ-R1 performance standard due to the potential for adverse effects on the environment, using the example of where wastewater capacity was insufficient to cater for additional people.

401. Ms Easton recommended that LLRZ-R6 be amended as follows:

LLRZ - R6 Residential Visitor Accommodation Activity Status Permitted
Where:
…
*5. Records of letting activity must be kept and provided to the District Council **annually** ~~on request~~; and*
…

LLRZ-R7 Community Facilities and Educational Facilities

402. Ms Easton acknowledged the two submissions that sought to retain the rule as notified[127].

403. Similar to LLRZ-R6, Ms Easton did not support the amendments sought in submissions[128] to accommodate existing legal non-compliance because of potential adverse environmental effects.

404. In response to the Ministry of Education's (S456.043) request to allow for 210 light vehicle movements per day for educational facilities, Ms Easton did not support that amendment and considered that this rule intended to allow very small educational and community

[125] S190.884, S450.252
[126] S567.477 William McLaughlin, S558.425 C & J Coll, S566.425 Chris J Coll Surveying Limited, S574.425 Laura Coll McLaughlin
[127] S190.885, S450.253
[128] S567.478 William McLaughlin, S558.426 C & J Coll, S566.426 Chris J Coll Surveying Limited, S574.426 Laura Coll McLaughlin

facilities within residential areas rather than provide for schools, or other significant facilities as a permitted activity.

405. No changes were recommended by Ms Easton to this provision.

LLRZ-R8 Retirement Homes and Supported Residential Accommodation

406. Ms Easton acknowledged the two submissions that sought to retain the rule as notified[129].

407. Similar to LLRZ-R6 and LLRZ-R7, Ms Easton did not support the amendments sought in submissions[130] to accommodate existing legal non-compliance because of potential adverse environmental effects.

408. No changes are recommended by Ms Easton to this provision.

LLRZ-R9 Papakāinga Developments

409. Ms Easton acknowledged the submission that sought to retain the rule as notified[131]. She recommended no changes to this provision.

LLRZ-R10 Minor Structures not meeting Permitted Activity Standards

410. Ms Easton acknowledged the submission that sought to retain the rule as notified[132].

411. In response to the submissions[133] that sought that this rule be amended to accommodate existing legal non-compliance with LLRZ-R1 performance standard, Ms Easton supported that outcome insofar as recognising existing use rights sit outside of a resource consent process, but otherwise she considered existing non-compliance should not be explicitly accommodated within the rules given the potential for adverse effects on the environment.

412. Ms Easton noted that due to earlier changes recommended to LLRZ-R2, to focus on setbacks only, consequential amendments were required to this rule. She recommended amendments as follows:

> ***LLRZ - R10 Minor Structures not meeting Permitted Activity Standards***
> ***Activity Status Controlled***
> *Where:*
> *1. The minor structure does not exceed 10m in height; and*
> *2. ~~All other performance standards for Rule LLRZ - R1 are complied with~~* ***Structures are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries***
>
> ***Matters of control are:***
>
> *a. Design and location of structures; and*
>
> *b. Landscape measures.*
>
> ***Activity status where compliance not achieved:*** *Discretionary*

[129] S349.011, S190.886, S450.254
[130] S567.479 William McLaughlin, S558.427 C & J Coll, S566.427 Chris J Coll Surveying Limited, S574.427 Laura Coll McLaughlin
[131] S190.887
[132] S190.888
[133] S567.480 William McLaughlin, S558.429 C & J Coll, S566.429 Chris J Coll Surveying Limited, S574.429 Laura Coll McLaughlin

LLRZ-R11 Relocated Buildings not meeting Permitted Activity Standards

413. Ms Easton recommended retaining LLRZ-R11 as notified, which was supported by one submitter[134], and therefore rejected submissions seeking deletion of the rule[135].

LLRZ-R12 Community Facilities and Educational Facilities not meeting Rule LLRZ-R7, Retirement Homes and Supported Residential Accommodation not meeting Rule LLRZ-R8 and Retirement Villages

414. Ms Easton acknowledged the seven submissions that sought to retain the rule as notified[136].

415. Ms Easton did not support FENZ's (S573.032) request to add a matter of discretion to LLRZ-R12 regarding the provision of servicing, including a firefighting water supply. She noted that if a property did not have a connection, this rule would not apply and the activity escalated to a discretionary activity.

416. No changes were recommended by Ms Easton to this provision.

LLRZ-R13 Residential Visitor Accommodation not meeting Permitted Standards

417. Ms Easton acknowledged the two submissions that sought to retain the rule as notified[137].

418. Ms Easton did not support the amendments sought in submissions[138] for the reasons outlined in relation to other rules. She recommended LLRZ-R13 be retained as notified.

LLRZ-R14 Papakainga Developments not meeting Permitted Activity Standards

419. Ms Easton acknowledged the three submissions that sought to retain the rule as notified[139].

420. In response to Poutini Ngāi Tahu's (S620.402) to delete the reference to "*hours of operation*" as a matter of discretion, Ms Easton supported this amendment and considered it corrected an error in the Plan.

421. Ms Easton recommends that LLRZ-R14 be amended as follows:

> ***LLRZ - R14 Papakaianga Developments not meeting Permitted Activity Standards Activity Status Restricted Discretionary***
>
> *Where:*
>
> *1. The minimum residential unit density is 200m^2 net site area;*
>
> *...*
>
> ***Discretion is restricted to:***
>
> *a. Design and location of buildings;*
>
> *…*
>
> *~~f. Hours of operation;~~ and*

[134] S190.889
[135] S567.015, S567.481 William McLaughlin, S558.065, S558.430 C & J Coll, S566.065, S566.430 Chris J Coll Surveying Limited, S574.065, S574.430 Laura Coll McLaughlin
[136] S190.890, S567.482, S558.431, S566.431, S574.431, S456.044, S608.730
[137] S190.891, S608.731
[138] S567.483 William McLaughlin, S558.432 C & J Coll, S566.432 Chris J Coll Surveying Limited, S574.432 Laura Coll McLaughlin
[139] S620.241, S190.892, S608.732

...

Activity status where compliance not achieved: Discretionary

LLRZ-R15 Residential Activities, Residential Units, Papakāinga Developments, Fences, Walls and Retaining Walls and Minor Structures not meeting Permitted, Controlled or Restricted Discretionary Standards

422. Ms Easton acknowledged the submission that sought to retain the rule as notified[140].

423. In response to the submissions[141] that sought clause (1), which requires the relevant NOISE and LIGHT permitted activity rules to be met, be deleted; and where compliance was not achieved, the activity status becomes N/A, Ms Easton did not support these submissions. She considered that these rules applied to activities within a residential area and should provide for a reasonable expectation in terms of minimum standards around noise and light.

424. In response to the submissions of Frank and Jo Dooley[142] and Frank O'Toole[143] that sought that "*fences, walls and retaining structures*" were removed from the rule and subject to a separate restricted discretionary rule, Ms Easton supported these submissions and agreed that Rule LLRZ-R15 contained matters that were not relevant to these structures.

425. Ms Easton recommended change to the heading of LLRZ-R15 and recommended the inclusion of the following new rule into the Plan:

LLRZ – RXX Fences, Walls and Retaining Structures not meeting Permitted Activity Standards
Activity Status Restricted Discretionary
Discretion is restricted to:
a. Design and location of structures
b. Height of structures
c. Shading and dominance effects on adjoining sites

LLRZ-R16 Home Business not meeting Permitted Activity Standards

426. Ms Easton acknowledged the submission that sought to retain the rule as notified[144].

427. In response to the submissions[145] that sought that clause (1), which required the relevant NOISE and LIGHT permitted activity rules to be met, be deleted; and where compliance is not achieved, the activity status becomes N/A, Ms Easton did not support those submissions. She considered that these rules applied to activities within a residential area and should provide for a reasonable expectation in terms of minimum standards around noise and light.

428. Ms Easton recommended retaining this rule as notified.

[140] S190.893
[141] S567.484, S567.485William McLaughlin, S558.433, S558.434 C & J Coll, S566.433, S566.434 Chris J Coll Surveying Limited, S574.433, S574.434 Laura Coll McLaughlin

LLRZ-R17 Residential Visitor Accommodation not meeting Restricted Discretionary Activity Standards and Commercial Visitor Accommodation and LLRZ-R19 Visitor Accommodation not meeting the Permitted, Restricted Discretionary or Discretionary Activity Standards

429. Ms Easton acknowledged the submission that sought to retain the rule as notified[146].

430. Ms Easton did not support the submissions[147] that sought changes to clause (1) nor changing the default activity status for the reasons outlined previously in relation to LLRZ-R15 and LLZ-R16. She also did not support deleting Rule LLRZ-R19 be deleted. She noted that these rules applied to activities within a residential area and that home businesses should provide for a reasonable expectation in terms of minimum standards around noise and light.

431. Ms Easton recommended retaining this rule as notified.

LLRZ – R18 Emergency Service Activities

432. Ms Easton acknowledged the submission that sought to retain the rule as notified[148].

433. Ms Easton did not support FENZ's (S573.033) request for emergency service activities to be permitted in the LLRZ because she considered the predominant use of this zone should be residential with a reasonable expectation for residential activities and amenity. She noted that while there may be circumstances where an emergency service facility could locate in this zone, careful assessment needed to be undertaken via a consent process.

434. Ms Easton recommended retaining this rule as notified.

LLRZ – R20 Commercial Activities including Home Business not meeting the Permitted, Restricted Discretionary or Discretionary Activity Standards

435. Ms Easton acknowledged the submission that sought to retain the rule as notified[149].

436. Ms Easton did not support submissions[150] that sought to change the activity status from non-complying to discretionary. She considered that this zone was primarily for the purpose of residential use. Where the rules designed to provide for some commercial activities were not met, Ms Easton considered that there would be a high risk of adverse effects. She therefore considered it was appropriate that these be classified as a non complying activity in this zone.

437. Ms Easton recommended retaining this rule as notified.

LLRZ – R21 Industrial Activities

438. Ms Easton acknowledged the submission that sought to retain the rule as notified[151].

[146] S190.895
[147] S567.488, S567.489 William McLaughlin, S558.437, S558.438 C & J Coll, S566.437, S566.438 Chris J Coll Surveying Limited, S574.437, S74.438 Laura Coll McLaughlin
[148] S190.896
[149] S190.898
[150] S567.491 William McLaughlin, S558.441 C & J Coll, S566.441 Chris J Coll Surveying Limited, S574.441 Laura Coll McLaughlin
[151] S190.899

439. Ms Easton did not support submissions[152] that sought to change the activity status from non-complying to discretionary. For the same reasons as outlined for Rule LLZR-R20 above, she considered it was appropriate that these be classified as a non-complying activity in this zone.

440. Ms Easton recommended retaining this rule as notified.

LLRZ – R22 Any Activity not provided for by another Rule in the zone

441. Ms Easton acknowledged one submitter that sought to retain the rule as notified[153].

442. In response to the submission[154] that sought to delete this rule, Ms Easton noted that no reasons had provided to justify this and she therefore did not support these submissions.

443. Ms Easton recommended retaining this rule as notified.

Hearing and Submitter Evidence/Statements

444. Ms Inta requested two amendments to Rule LLRZ-R1. The first was to correct poor grammar; and the second related to the requirement to connect to reticulated services if these services were provided, using the example of a composting toilet, which does not require a connection. The amendments she sought was as follows:

> ***LLRZ – R1 Permitted Activities***
> ***Activity Status Permitted***
> *Where:*
> *1.*
> *…*
> *6. Stormwater is managed on site with any off-site discharge ~~is~~ managed in accordance with NZS4404:2010 Land Development and Subdivision Infrastructure and must not drain to any public road except for secondary flow purposes;*
> *7. All residential units and buildings used for a residential activity must be connected to the community water supply and wastewater networks **if these services are provided**;*
> *…*

445. As outline above, Mr Bhana-Thompson generally agreed with the s42A Report recommendations for the residential zones and sought use of a pre-inspection/reinstatement reports. He provided a template that some other Councils had adopted (or adapted) for district plans. He considered a 12-month timeframe was appropriate and realistic for achieving reinstatement works in Rule LLRZ-R4.

Reporting Officer Reply Evidence

446. In her Right of Reply, Ms Easton addressed queries from the Panel and considered further amendments in response following the information presented in the hearing. Several of these queries have been addressed earlier in this report under the definitions, general chapter, objectives, policies, and GRZ rule sections. These are not repeated here unless directly relevant.

[152] S567.492 William McLaughlin, S558.442 C & J Coll, S566.442 Chris J Coll Surveying Limited, S574.442 Laura Coll McLaughlin
[153] S190.900
[154] S567.493 William McLaughlin, S558.443 C & J Coll, S566.443 Chris J Coll Surveying Limited, S574.443 Laura Coll McLaughlin

447. Ms Easton considered the minor error where Rule NOISE-R4 was referenced rather than NOISE-R5 in some rules could be undertaken as a clause 16 amendment and should be used to update all rules across the Plan where there were errors or consequential numbering changes.

448. In relation to Rule LLRZ-R13 (and also Rule GRZ-R14 and MRZ-R14), Ms Easton considered was insufficient scope in submissions to add the number of occupants or size of building to the matters of discretion.

449. In response to the evidence of NZ Heavy Haulage Association, Ms Easton recommended including reference to a pre-inspection schedule in Rule LLRZ-R4, as set out above in relation to the GRZ-R4 above.

Hearing Panel's Evaluation

450. The Panel agrees with Ms Easton that there is no need to make any amendments arising from the submissions on the rules generally.

451. The Panel recommends consequential amendments to ensure consistency between equivalent rules in the GRZ and MRZ, where appropriate. We also recommend amendments under RMA Schedule 1, clause 16 to fix errors and consequential renumbering of the rules cross reference to reflect Panel recommendations on other chapters. We identify these consequential amendments and corrections in the footnotes included in our recommendation box below.

452. In relation to Rule **LLRZ-R1**, the Panel generally accepts Ms Easton's recommendation to amend the rule to match recommended amendments to GRZ-R1, with the exception that only the first advice note is considered relevant to the zone.

453. In relation to Rule **LLRZ-R2**, the Panel accepts Ms Easton's recommendation and reasons to retain the rule as notified, except for deleting the reference to the LLRZ-R1 performance standard.

454. In relation to Rule **LLRZ-R3**, the Panel accepts Ms Easton's recommendation to retain the rule as notified.

455. In relation to **LLRZ-R4**, the Panel agrees with the amendments proposed by Ms Easton to partially address the submission of the New Zealand Heavy Haulage Association, which states that buildings intended for dwellings must have originally been used as dwellings. We agree that the other submission points sought by the New Zealand Heavy Haulage Association do not clarify or simplify the rule, however we have added reference to a new Appendix 11 which will set out the information that is required in the building pre-inspection report which is based on information provided by the Association at the hearing. This is a Plan-wide amendment.

456. The Panel has also consolidated rule 4 by deleting Clause 5 and adding to Clause 3. We consider the two clauses were overlapping and there were elements of uncertainty between them. We consider the amendments now make it clear the works to completed within 12-months of the building being delivered to the site. We consider the scope for these amendments stem from the submissions seeking deletion given the changes reduce and clarify the rule. We therefore recommend the amendments proposed and note that similar amendments are proposed in other recommendations.

457. In relation to Rule **LLRZ-R5**, the Panel acknowledges Ms Easton's recommendation to retain the rule as notified, except for amendments to clause(4) to clarify traffic movements. However, we note that we have included a consequential amenmdnt stemming from BDC submission (538.479) to include a limit on employee numbers. Further, we note however that as a result of recommendations in the Transport Chapter in relation to trip generation that clause (4) relating to traffic movement is to be deleted so as to avoid the potential for uncertainty between provisions.

458. In relation to Rule **LLRZ-R6**, the Panel accepts Ms Easton's recommendation to retain the rule as notified, except for amendments to clause (5) for the reasons outlined, including minor clause 16 amendments.

459. In relation to Rule **LLRZ-R7**, the Panel notes that, as a result of recommendations in the Transport Chapter regarding trip generation, clause 2, relating to traffic movement, has been amended to ensure compliance with Rule TRN – R6 is also achieved in this situation. While we acknowledge that this has not been the situation for Home Businesses in the Residential Zones where the rule has been deleted in favour of TRN – R6, in the case of Community Facilities and Educational Facilities, we consider a bespoke approach is necessary in order to address the potential scale of these activities, which is not otherwise addressed. We are of the view that this is best achieved by retaining the notified part of the rule. We consider this is particularly necessary where such activities might seek to locate on local roads.

460. In relation to Rule **LLRZ-R8**, the Panel accepts Ms Easton's recommendation to retain the rule as notified.

461. In relation to Rule **LLRZ-R9**, the Panel accepts Ms Easton's recommendation to retain the rule as notified.

462. In relation to Rule **LLRZ-R10**, the Panel accepts Ms Easton's recommendation to retain the rule as notified, except that due to earlier changes recommended to LLRZ-R2 to focus on setbacks only, consequential amendments are also required to this rule. We note however that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to 'landscape measures' and 'landscape treatment' have been removed from the matters of discretion and replaced with 'measures to mitigate landscape effects' throughout the chapter.

463. In relation to rules **LLRZ-R11 to LLRZ-R13,** the Panel accepts Ms Easton's recommendation to retain the rules as notified. We note however that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to 'landscape measures' and 'landscape treatment' have been removed from the matters of discretion and replaced with 'measures to mitigate landscape effects' throughout the chapter.

464. In relation to Rule **LLRZ-R14**, the Panel accepts Ms Easton's recommendation to retain the rule as notified, except for deleting clause (f) to correct an error in the plan as notified. We note however that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to 'landscape measures' and 'landscape treatment' have been removed from the matters of discretion and replaced with 'measures to mitigate landscape effects' throughout the chapter.

465. In relation to Rule **LLRZ-R15**, the Panel accepts Ms Easton's recommendation to remove "*fences, walls and retaining structures*" and add a new **Rule LLRZ-RX** (new Rule LLRZ-R14A

below) for these because Rule LLRZ-R15 includes matters that are not relevant to these structures.

466. In relation to rules **LLRZ -R16** to **LLRZ-R21**, apart from minor integration issues, the Panel accepts Ms Easton's recommendation to retain the rules as notified.

467. The Panel acknowledges that **LLRZ-R22** is a 'catch-all' rule intended to manage activities not specifically provided for in the other rules. The Panel has considered this matter plan-wide and we agree with the submitters that such rules are better placed as discretionary; otherwise, they are unnecessarily limiting in our view and could have unforeseen consequences. Therefore, it is our recommendation to recategorise this rule as a discretionary activity.

Hearing Panel's Recommendation

468. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted and accepted in part, and recommend the following amendments are made to the **Large Lot Residential Zone Rules**:

LLRZ – R1	**Residential Activities and Residential Units and Accessory Buildings**[155] **Activity Status Permitted** Where: 1. There is no more than **one**~~1~~[156] unit per 1000m^2 net site area; 2. The maximum height of a building above ground level is 10m; 3. There is no more than **one**~~1~~[157] minor residential unit per 1000m^2 net site area with a maximum size of 65m^2; 4. Buildings are setback a minimum 10m from road boundaries, except that a roof overhang may encroach 750mm; 5. Maximum site coverage is 40% or 500m^2 whichever is the lesser; 6. Stormwater is managed on site with any off-site discharge ~~is~~ [158]managed in accordance with NZS4404:2010 Land Development and Subdivision Infrastructure and must not drain to any public road ~~except for secondary flow purposes~~; [159] 7. All residential units and buildings used for a residential activity must be connected to the community water supply and wastewater networks; 8. No more than two heavy vehicles are stored on site; 9. Buildings are setback a minimum of 4m from all other site boundaries except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing; 10. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing.~~ [160] This standard does not apply to~~:~~ ~~a. Road boundaries;~~ ~~b. Buildings on adjoining sites that have a common wall along the boundary;~~

[155] Consequential amendment Buller District Council S538.475
[156] RMA Schedule 1, clause 16 correction
[157] RMA Schedule 1, clause 16 correction
[158] Clause 16(2) of the RMA
[159] Grey District Council S608.728
[160] Consequential amendment Buller District Council S538.475

~~c. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;~~

~~d.~~ Boundaries adjoining any site in a CMUZ - Commercial and Mixed Use, INZ - Industrial or RURZ - Rural Zone~~;~~**.**[161]

~~e. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or~~

~~f. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically.~~ [162]

Advice Note:

1. Where a residential building or noise sensitive activity is located within:

i. 80m of a State Highway with a speed limit of 70kph or greater; or
ii. 40m of a State Highway with a speed limit of less than 70kph; or
iii. 40m of a Railway Line; or
iv. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or
v. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.

Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply.

Activity status where compliance not achieved: Discretionary

LLRZ – R2 **Minor Structures**

Activity Status Permitted

Where:

1. ~~All performance standards for Rule LLRZ - R1 are complied with~~ **Structures are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries**;[163]
2. Masts, poles, aerials and pou whenua must not exceed 7m in height;
3. Any antenna dish must be less than 1m in diameter;
4. Any ornamental or garden structure must not exceed 2.4 m in height; and
5. Any other structure must not exceed 10m^2 and 2m in height.

Activity status where compliance not achieved: Controlled

LLRZ – R3 No Change

LLRZ – R4 **Relocated Buildings**

Activity Status Permitted

Where:

1. All performance standards for Rule LLRZ - R1 are complied with;
2. Any relocated building intended for use as a dwelling must have been designed**,** ~~and~~ built ~~to be~~ **and** used as a dwelling; [164]

LLRZ – R21	As notified
LLRZ – R22	**Any Activity not provided for by another Rule in the zone** **Activity Status ~~Non-complying~~ Discretionary** **Activity status where compliance not achieved:** N/A[191]

2.7. Medium Density Residential Zone – Rules and Standards

Submissions and Further Submissions

Residential - General

469. Three submission points and three further submissions relating to the MRZ Rules (as a whole) were summarised in the Table on pages 78-79 of the s42A Report. Two submission

[187] Frank and Jo Dooley S478.038, Frank O'Toole S595.026
[188] Frank and Jo Dooley S478.032, Frank O'Toole S595.020
[189] RMA Schedule 1, clause 16 correction
[190] RMA Schedule 1, clause 16 correction
[191] William McLaughlin (S567.493), Chris & Jan Coll (S558.443), Chris J Coll Surveying Limited (S566.443), Laura Coll McLaughlin (S574.443)

points sought to retain all, or select, rules as notified. One of the further submissions supported these points, while two opposed. The remaining submission sought amendments.

Medium Density Residential Zone

470. Twelve submission points and two further submission points relating to Rule **MRZ-R1** were summarised in a Table on pages 79-80 of the s42A Report. All submission points sought amendments to the rule as notified. Both further submissions were in support of a suggested amendment.

471. Six submission points and one further submission relating to Rule **MRZ-R2** were summarised in a Table on pages 80-81 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission points sought amendments, while the one further submission supported in part the amendments sought by one submitter.

472. Five submission points supporting Rule **MRZ-R3** as notified were summarised in a Table on page 81 of the s42A Report.

473. Eight submission points and two further submissions relating to Rule **MRZ-R4** were summarised in a Table on pages 81-82 of the s42A Report. Two submission points supported the retention of the rule as notified. Four submission points opposed the rule as notified and sought its deletion in full. The remaining two submission points sought amendments, with one further submission supporting in part and the other opposing in part, suggesting amendments.

474. Six submission points relating to Rule **MRZ-R5** were summarised in the Table on pages 82-83 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining five submission points sought amendments.

475. Seven submission points relating to Rule **MRZ-R6** were summarised in a Table on page 83 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission points sought amendments.

476. Eight submission points and one further submission point relating to Rule **MRZ-R7** were summarised in a Table on pages 83-84 of the s42A Report. Two submission points supported the retention of the rule as notified. The remaining submission points sought amendments, while the one further submission opposed the amendments sought by one submitter.

477. Six submission points and relating to Rule **MRZ-R8** were summarised in a Table on pages 84-85 of the s42A Report. Two submission points supported the retention of the rule, as notified, with one further submitter supporting one of these submissions. The remaining submission points sought amendments.

478. Five submission points relating to Rule **MRZ-R9** were summarised in the Table on page 85 of the S42A Report. One submission point supported the retention of the rule as notified. The remaining submission points sought amendments.

479. Six submission points relating to Rule **MRZ-R10** were summarised in the Table on page 85 of the s42A Report. Two submission points supported the retention of the rule as notified, while the remaining four submissions opposed the rule and sought its deletion.

480. Six submission points and one further submission supporting Rule **MRZ-R11** as notified were summarised in the Table on pages 85-86 of the s42A Report.

481. Eight submission points and one further submission relating to Rule **MRZ-R12** were summarised in the Table on page 86 of the s42A Report. Six submission points supported the retention of the rule as notified, with one further submitter in support. The remaining submissions sought amendments.

482. Six submission points and one further submission supporting Rule **MRZ-R13** as notified were summarised in the Table on page 86 of the s42A Report.

483. Six submission points relating to Rule **MRZ-R14** were summarised in a Table on pages 86-87 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission point sought amendments.

484. Seventeen submission points relating to Rule **MRZ-R15** were summarised in a Table on pages 87-88 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission points sought amendments.

485. Nine submission points relating to Rule **MRZ-R16** were summarised in a Table on page 88 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission points sought amendments.

486. Nine submission points relating to Rule **MRZ-R17** were summarised in a Table on pages 88-89 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission point sought amendments.

487. Five submission points relating to Rule **MRZ-R18** were summarised in a Table on page 89 of the s42A Report. One submission supported the retention of the rule as notified. The remaining submission points sought amendments.

488. Five submission points relating to Rule **MRZ-R19** were summarised in a Table on pages 89 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission point sought amendments.

489. One submission point supporting Rule **MRZ-R20** as notified was summarised in a Table on page 89 of the s42A Report.

490. Five submission points relating to Rule **MRZ-R21** were summarised in a Table on pages 89-90 of the s42A Report. One submission point supported the retention of the rule as notified. The remaining submission point sought amendments.

491. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

Section 42A Report

Standards (General)

492. Ms Easton acknowledged the submissions that supported the rules, or selected rules, as notified.

493. Ms Easton made no recommendations to amend the MRZ rules in response to submissions.

MRZ-R1 Residential Activities and Residential Units

494.

495. In response to the submissions[192] that sought that the advice note in MRZ-R1 regarding NOISE-R3 be deleted, Ms Easton did not support these submissions for the reasons outlined previously. She recommended that this advice note should remain.

496. In response to the submission point made by the submitters[193] that sought a controlled activity status when compliance with permitted standards is not achieved, Ms Easton did not support this submission. She considered that the standards have been designed to allow for a range of housing types, including medium density, to develop over time. Additionally, she considered that as this transition to more intensive residential occurs, a good degree of residential amenity and infrastructure capacity needs to be provided.

497. Ms Easton supported Waka Kotahi NZTA's (S450.255) request to include reference to NZS4404:2010, to manage stormwater on-site and GDC's (S608.728) request to remove the reference to "*secondary flow purposes*" in clause (6), for the reasons previously outlined.

498. Ms Easton did not support FENZ's (S573.034) request for a new standard for the reason previously outlined.

499. Ms Easton recommended that MRZ-R1 be amended as follows:

> ***MRZ-R1 Residential Activities and Residential Units <u>and Accessory Buildings</u>***
> ***Activity Status: Permitted***
>
> *1. …*
>
> *7. All residential units and buildings used for a residential activity must be connected to the community water supply and wastewater networks;*
>
> *8 . ~~and s~~<u>S</u>tormwater ~~from the~~ <u>is managed on site with any off-site discharge is managed in accordance with NZS4404:2010 Land Development and Subdivision Infrastructure and</u> ~~used for the activity~~ must not drain to any public road ~~except for secondary flow purposes~~.*
>
> *…*

MRZ-R2 Minor Structures

500. Ms Easton acknowledged the submission that sought to retain the rule as notified[194].

501. Ms Easton supported in part the submissions[195] that sought amendments to accommodate existing, legal non-compliances with the MRZ-R1 performance standards, in that she considered the reference to the MRZ-R1 performance standards was inappropriate (as this rule relates to very minor structures such as flagpoles, water tanks, garden ornaments and sheds). Ms Easton therefore recommended that only the setback requirement be included,

[192] S567.494 William McLaughlin, S558.444 Chris and Jan Coll, S566.444 Chris J Coll Surveying Limited, S574.444 Laura Coll Mclaughlin
[193] S567.495 Wiliam McLaughlin, S558.445 Chris and Jan Coll, S566.445 Chris J Coll Surveying Limited, S574.445 Laura Coll Mclaughlin
[194] S190.903
[195] S567.496 William McLaughlin, S558.446 C and C Coll, S566.446 Chris Coll Surveying, S574.446 Laura Coll McLaughlin

similar to the standard for the equivalent Rule GRZ-R2. She noted consequential amendments would also be required to Rule MRZ-R9.

502. FENZ (S573.035) sought an exemption for hose drying towers and siren towers to be up to 15m high in this zone. Ms Easton did not support this submission, noting that there were no fire stations within the MRZ and she considered that the merits of such a proposal should be assessed through a resource consent process.

503. Ms Easton recommended amendments to MRZ-R2 as follows:

> ***MRZ - R2 Minor Structures***
> ***Activity Status Permitted***
> *Where:*
>
> *a. ~~All performance standards for Rule MRZ - R1 are complied with~~* ***Structures are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries****;*
>
> *…*
>
> ***Activity status where compliance not achieved:*** *Controlled*

MRZ-R3 Fence Wall and Retaining Walls

504. Ms Easton acknowledged the five submissions that sought to retain the rule as notified[196]. She did not recommend any changes to this provision.

MRZ-R4 Relocated Buildings, MRZ-R10 Relocated Buildings not meeting Rule MRZ-R4

505. Ms Easton acknowledged the submission that sought to retain the rule as notified[197].

506. Ms Easton did not support the submissions[198] that sought to delete rules MRZ-R4 and MRZ-R11 because she considered the rules were necessary to manage amenity and ensure necessary building work to meet standards is completed within a specified timeframe.

507. As outlined above, Charles Elley (S251.003) sought to remove restrictions that only allow relocatable buildings intended to be dwellings that were originally built and used dwellings. Ms Easton supported this submission, but it appears she misinterpreted this submission because the s42A Report states the submission sought to amend the rule to relate only to those buildings that are intended to be dwellings and were originally dwellings.

508. NZ Heavy Haulage Association Inc. (S616.006) sought performance standards for relocatable buildings based on the matters in schedule 1 of its submission, as outlined above in relation to GRZ-R4. Ms Easton supported an amendment that buildings must originally be dwellings, but did not support the balance of changes, which she considered would make the rule more complex.

509. Ms Easton recommended no changes to MRZ-R10 and amendments to MRZ-R4 as follows:

> ***MRZ - R4 Relocated Buildings***

[196] S190.904, S558.447, S566.447, S567.497, S574.447
[197] S190.905
[198] S567.016, S567.498, S567.017, S567.504 William McLaughlin, S558.076, S558.448, S558.087, S558.455 C & J Coll, S566.076, S566.448, S566.087, S566.455 Chris J Coll Surveying Limited, S574.076, S574.448, S574.087, S574.455 Laura Coll McLaughlin

Activity Status Permitted
Where:

1. *All performance standards for Rule MRZ - R1 are complied with;*
2. *Any relocated building intended for use as a dwelling must have been designed, ~~and~~ built ~~to be~~ **and** used as a dwelling;*

…

Activity status where compliance not achieved: *Controlled*

MRZ-R5 Home Business

510. Ms Easton acknowledged the submission that sought to retain the rule as notified[199].

511. Ms Easton did not support the submissions[200] that sought amendments to accommodate existing, legal non-compliances with the MRZ-R1 performance standards, for the reasons previously outlined.

512. Ms Easton recommended amendments to provide greater clarity in response to Waka Kotahi NZTA's (S450.246) request to amend the rule to reduce the permitted level of vehicle movements.

513. Ms Easton recommended amendments to MRZ-R5 as follows:

MRZ - R5 Home Business
Activity Status Permitted
Where:

1. *This is ancillary to a residential activity;*
2. *All performance standards for Rules LLRZ - R1, NOISE R1-R2 and R~~4~~**5**, LIGHT - R3 and SIGN - R10 are complied with;*

…

4. *A maximum of 4 heavy vehicle movements per day**,** and whichever is the greater of 20 light vehicle movements per day, ~~or~~ **and** 140 light vehicle movements per week;*

…

Activity status where compliance not achieved*: Discretionary*

MRZ-R6 Residential Visitor Accommodation

514. Ms Easton acknowledged the two submissions that sought to retain the rule as notified[201].

515. Ms Easton supported WDC's (S181.039) request to only provide for homestay accommodation as a permitted activity Westland District, being the same as Buller District, but different from Grey District. She considered that this reflected the primary concern relating to dwellings being converted to short-term visitor accommodation (e.g. Airbnb).

[199] S190.906
[200] S567.499 William McLaughlin, S558.449 Chris and Jan Coll, S566.449 Chris J Coll Surveying Limited, S574.449 Laura McLaughlin
[201] S190.907, S450.257

516. Ms Easton did not support the submissions[202] that sought to amendments to accommodate existing, legal non-compliance with MRZ-R1 performance standard, for the reasons outlined for the equivalent GRZ and LLRZ rules.

517. Ms Easton recommended amendments to MRZ-R6 as follows:

> ***MRZ - R6 Residential Visitor Accommodation Activity Status Permitted***
> *Where:*
> 1. *This is ancillary to a residential activity;*
> *…*
>
> 5. *Records of letting activity must be kept and provided to the District Council* ***annually*** ~~*on request;*~~ *and*
> 6. *No heavy vehicle movements are generated.*
> 7. *In the Buller* ***and Westland*** *District*s *the accommodation is homestay accommodation with a permanent resident living on site.*
> *…*

MRZ-R7 Community Facilities and Educational Facilities

518. Ms Easton acknowledged the three submissions that sought to retain the rule as notified[203].

519. Ms Easton did not support the submissions[204] that sought amendments to accommodate existing, legal non-compliance with MRZ-R1 performance standard, for the reasons outlined for the equivalent GRZ and LLRZ rules.

520. In response to the Ministry of Education's (S456.045) request to allow for 140 light vehicle movements per day for educational facilities, Ms Easton did not support this amendment. She considered that the intent of this rule is to allow very small educational and community facilities within residential areas rather than provide for schools, or other significant facilities as a permitted activity.

521. Ms Easton did not support FENZ's (S573.036) for similar reasons as her recommendations for other residential zones.

522. No changes were recommended by Ms Easton to this provision.

MRZ-R8 Retirement Homes and Supported Residential Accommodation

523. Ms Easton acknowledged the two submissions that sought to retain the rule as notified[205].

524. Ms Easton did not support the submissions[206] that sought amendments to accommodate existing, legal non-compliance with MRZ-R1 performance standard, for the reasons outlined for the equivalent GRZ and LLRZ rules.

525. No changes were recommended by Ms Easton to this provision.

[202] S567.500 William McLaughlin, S558.451 C & J Coll, S566.451 Chris J Coll Surveying Limited, S574.451 Laura Coll McLaughlin
[203] S190.908, S450.258
[204] S567.501 William McLaughlin, S558.452 C & J Coll, S566.452 Chris J Coll Surveying Limited, S574.452 Laura Coll McLaughlin
[205] S190.909, S349.011, S450.259
[206] S567.502 William McLaughlin, S558.453 C & J Coll, S566.453 Chris J Coll Surveying Limited, S574.453 Laura Coll McLaughlin

MRZ-R9 Minor Structures not meeting Permitted Activity Standards

526. Ms Easton acknowledged the submission that sought to retain the rule as notified[207].

527. Ms Easton did not support the submissions[208] that sought amendments to accommodate existing, legal non-compliance with MRZ-R1 performance standard, for the reasons outlined for the equivalent GRZ and LLRZ rules.

528. Ms Easton noted that due to earlier changes recommended to MRZ-R2, to focus on setbacks only, consequential amendments were recommended as follows:

> ***MRZ - R9 Minor Structures not meeting Rule MRZ - R2***
> ***Activity Status Controlled***
> *Where:*
>
> *1. The minor structure does not exceed 10m in height; and*
>
> *2. ~~All performance standards for Rule GRZ - R1 are complied with~~* ***Structures are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries****;*
>
> ***Matters of control are:***
>
> *1. Design and location of structures; and*
>
> *2. Landscape measures.*
>
> ***Activity status where compliance not achieved:*** *Discretionary*

MRZ-R11 Development of Medium Density Developments

529. Ms Easton acknowledged the six submissions that sought to retain the rule as notified[209]. No changes were recommended by Ms Easton to this provision.

MRZ-R12 Community Facilities and Educational Facilities not meeting Rule MRZ-R7, Retirement Homes and Supported Residential Accommodation not meeting Rule MRZ-R8 and Retirement Villages

530. Ms Easton acknowledged the six submissions that sought to retain the rule as notified[210].

531. FENZ (S573.037) supported the rule subject to a new standard being provided in MRZ-R1 to require servicing, including a firefighting water supply. This was supported in part by Ms Easton, who noted that MRZ-R1 already required connection to a reticulated water supply system.

532. Ms Easton supported GDC's (S608.737) request to include "*the provision of infrastructure to service the development*" as an additional matter of discretion. She noted the significant additional demand on servicing that these facilities could generate.

533. The following changes were recommended by Ms Easton:

> ***MRZ - R12 Community Facilities and Educational Facilities not meeting Rule MRZ - R7, Supported Residential Accommodation and Retirement Homes not meeting Rule MRZ - R8 and Retirement Villages***

[207] S190.910
[208] S567.503 William McLaughlin, S558.454 C & J Coll, S566.454 Chris J Coll Surveying Limited, S574.454 Laura Coll McLaughlin
[209] S190.912, S558.456, S566.456, S567.505, S574.456, S608.736
[210] S190.913, S456.046, S558.457, S556.457, S567.506, S574.457

Activity Status Restricted Discretionary
Discretion is restricted to:

a. Design and location of buildings;

b. Design and location of parking and access;

c. Landscape measures;

d. Hours of operation; ~~and~~

*e. Acoustic and noise insulation requirements; **and***

f. Provision of infrastructure to service the development

Notification:

Applications for community facilities will always be notified to adjacent neighbours and may be publicly notified.

***Activity status where compliance not achieved:** N/A*

MRZ-R13 Medium Density Housing not meeting Rule MRZ-R11

534. Ms Easton acknowledged the six submissions that sought to retain the rule as notified[211]. She made no recommended amendments to MRZ-R13.

MRZ-R14 Residential Visitor Accommodation not meeting Permitted Standards

535. Ms Easton acknowledged the submission that sought to retain the rule as notified[212].

536. Ms Easton did not support the submissions[213] that sought amendments to accommodate existing, legal non-compliance with MRZ-R1 performance standard, for the reasons outlined for the equivalent GRZ and LLRZ rules.

537. Ms Easton recommended no changes to this rule.

MRZ-R15 Residential Activities, Residential Units, Relocated Buildings, Fences, Walls and Retaining Walls and Minor Structures not meeting Permitted, Controlled or Restricted Discretionary Standards

538. Ms Easton acknowledged the submission that sought to retain the rule as notified[214].

539. Ms Easton did not support submissions[215] that sought to delete clause (1), which requires the relevant NOISE and LIGHT permitted activity rules to be met; or the request to change activity status to 'N/A' where compliance was not achieved. She considered these rules applied to activities within a residential area and should provide for a reasonable expectation in terms of minimum standards around noise and light.

[211] S190.914, S558.458, S566.458, S567.507, S574.458, S608.738
[212] S190.915
[213] S567.508 William McLaughlin, S558.459 C & J Coll, S566.459 Chris J Coll Surveying Limited, S574.459 Laura Coll McLaughlin
[214] S190.916
[215] S567.509, S567.510 William McLaughlin, S558.460, S558.462 C & J Coll, S566.460, S566.462 Chris J Coll Surveying Limited, S574.460, S574.462 Laura Coll McLaughlin

540. In response to the submissions[216] that sought deletion of the reference to relocated buildings, Ms Easton did not support those submissions. She noted that the management and residential character were important considerations, including for relocated buildings.

541. In response to the submissions of Frank and Jo Dooley[217] and Frank O'Toole[218] that sought that fences, walls and retaining structures be removed from the rule and subject to a separate restricted discretionary rule, Ms Easton supported these submissions and agreed that Rule MRZ-R15 contained matters that were not relevant to these structures.

542. Ms Easton recommended no changes to MRZ-R15, but recommended the addition of the following new rule into the Plan:

> ***MRZ – RXX Fences, Walls and Retaining Structures not meeting Permitted Activity Standards***
> ***Activity Status Restricted Discretionary***
> ***Discretion is restricted to:***
> ***a. Design and location of structures***
> ***b. Height of structures***
> ***c. Shading and dominance effects on adjoining sites***

MRZ-R16 Home Business not meeting Rule MRZ-R6

543. Ms Easton acknowledged the submission that sought to retain the rule as notified[219].

544. In response to the submitters[220] seeking that standard 1, which requires the relevant NOISE and LIGHT permitted activity rules to be met, be deleted, and where compliance is not achieved, the activity status becomes N/A, Ms Easton did not support these submissions. Ms Easton considered that these rules apply to activities within a residential area and should provide for a reasonable expectation in terms of minimum standards around noise and light.

545. No changes were recommended by Ms Easton to this provision.

MRZ-R17 Residential Visitor Accommodation not meeting Restricted Discretionary Activity Standards

546. Ms Easton acknowledged the submission that sought to retain the rule as notified[221].

547. Ms Easton did not support submissions[222] that sought to delete clause (1), which requires the relevant NOISE and LIGHT permitted activity rules to be met; or the request to change activity status to 'N/A' where compliance was not achieved and that Rule MRZ-R19 be deleted. She considered these rules applied to activities within a residential area and that home businesses should provide for a reasonable expectation in terms of minimum standards around noise and light.

548. No changes were recommended by Ms Easton to this provision.

[216] S567.018 William McLaughlin, S558.098 C & J Coll, S566.098 Chris J Coll Surveying Limited, S574.098 Laura Coll McLaughlin
[217] S478.033, S478.039 Frank and Jo Dooley
[218] S595.021, S595.027 Frank O'Toole
[219] S190.917
[220] S567.511, S567.512 William McLaughlin, S558.463, S558.464 C & J Coll, S566.463, S566.464 Chris J Coll Surveying Limited, S574.463, S574.464 Laura Coll McLaughlin
[221] S190.918
[222] S567.513, S567.514 William McLaughlin, S558.465, S558.466 C & J Coll, S566.465, S566.466 Chris J Coll Surveying Limited, S574.465, S574.466 Laura Coll McLaughlin

MRZ – R18 Visitor Accommodation not meeting Permitted, Restricted Discretionary or Discretionary Standards

549. Ms Easton acknowledged the submission that sought to retain the rule as notified[223].

550. In response to the submissions[224] that sought that the activity status be amended from non-complying to discretionary, Ms Easton did not support these submissions. She considered that the medium density residential zone was one where the primary purpose was around residential activities, and that while the framework was designed to allow for some commercial activities subject to meeting set standards, any failure to meet these standards would result in a high risk of adverse effects, and therefore that a non-complying status was appropriate.

551. No changes were recommended by Ms Easton to this rule.

MRZ – R19 Any Commercial Activity not meeting another Rule in the Zone

552. Ms Easton acknowledged the submission that sought to retain the rule as notified[225].

553. In response to the submissions[226] that sought that these activities be classified as a discretionary rather than non-complying activity, Ms Easton did not support these submissions. She considered that this zone was primarily for the purpose of residential use. Where the rules designed to provide for some commercial activities are not met, Ms Easton considered that there was a high risk of adverse effects and considered it appropriate that these were classified as non-complying.

554. No changes were recommended by Ms Easton to this rule.

MRZ – R20 Industrial Activities

555. Ms Easton acknowledged the submission that sought to retain the rule as notified[227]. No changes were recommended by Ms Easton.

MRZ – R21 Any Activity not provided for by another Rule in the zone

556. Ms Easton acknowledged the submission that sought to retain the rule as notified[228].

557. In response to the submissions[229] that sought that this rule be a discretionary rather than non-complying activity, Ms Easton did not support these submissions without further justification.

558. No changes were recommended by Ms Easton.

Hearing and Submitter Evidence/Statements

[223] S190.919
[224] S567.515 William McLaughlin, S558.467 C & J Coll, S566.467 Chris J Coll Surveying Limited, S574.467 Laura Coll McLaughlin
[225] S190.920
[226] S567.516 William McLaughlin, S558.468 C & J Coll, S566.468 Chris J Coll Surveying Limited, S574.468 Laura Coll McLaughlin
[227] S190.921
[228] S190.922
[229] S567.517 William McLaughlin, S558.469 C & J Coll, S566.469 Chris J Coll Surveying Limited, S574.469 Laura Coll McLaughlin

559. Ms Inta noted the differences between the structure and wording of similar rules between the GRZ and MRZ.

560. In response to Panel questions, Mr Bhana Thomson noted his evidence also of relevance to Rule MRZ-R4.

Reporting Officer Reply Evidence

561. The Right of Reply acknowledged that the recommended amendments to MRZ-R1 in response to the submissions of GDC and Waka Kotahi NZTA were not shown in Appendix 1 of the s42A Report and therefore included these in the Right of Reply as follows:

> ***MRZ-R1 Residential Activities and Residential Units and Accessory Buildings***
> ***Activity Status: Permitted***
>
> *1. …*
>
> *7. All residential units and buildings used for a residential activity must be connected to the community water supply and wastewater networks;*
>
> *8. ~~and s~~Stormwater ~~from the~~ is managed on site with any off-site discharge is managed in accordance with NZS4404:2010 Land Development and Subdivision Infrastructure and ~~used for the activity~~ must not drain to any public road ~~except for secondary flow purposes.~~*

562. In response to the evidence of NZ Heavy Haulage Association and subsequent questions from the Panel regarding GRZ-R4, Ms Easton considered that a pre-inspection schedule (new Appendix Eleven) should also be included in MRZ-R4.

563. In response to a question on GRZ-R5 on whether there was scope to apply the same restriction sought by BDC concerning the number of people engaged in a home business that reside off-site to equivalent rules MRZ – R5 or LLRZ – R5, Ms Easton did not consider there was scope to address this matter within these rules.

564. In response to the question regarding existing use rights on residential accommodation rule GRZ-R6, Ms Easton considered that a clause 16 amendment to the advice note for the rule, to avoid ambiguity, around lawfully established activities in Grey District, would be appropriate as follows:

> ***Advice Notes:***
> *1. …*
> *2. ~~In the Buller and Westland Districts, w~~**W**here residential visitor accommodation has been lawfully established under the Buller**, Grey or Westland** District Plan provisions, then existing use rights apply.*

565. With regard to Rule GRZ-R14 for visitor accommodation, as well as corresponding rules LLRZ-R13 and MRZ-R14, Ms Easton considered whether there was scope to add the number of occupants or size of building to the matters of discretion. She concluded there was scope no scope to make this change to Rule MRZ-R14.

Hearing Panel's Evaluation

566. The Panel agrees with Ms Easton that there is no need to make any amendments arising from the submissions on the rules generally.

567. The Panel recommends consequential amendments to ensure consistency between equivalent rules in the GRZ and LLRZ, where appropriate. We also recommend amendments under RMA Schedule 1, clause 16 to fix errors, provide forconsequential renumbering of the rules and cross reference to reflect Panel recommendations on other chapters. We identify these consequential amendments and corrections in the footnotes included in our recommendation box below.

568. In relation to **MRZ-R1**, the Panel accepts Ms Easton's recommendation to retain the rule as notified, except for a clause to be included, reference NZS4404:2010, to manage stormwater on-site, as well as the removal of the reference to "*secondary flow purposes*" in clause (6). We note that MRZ-R7 includes, in clause 2, simlar wording to clause 1. in this rule that we recommend amending as a consequential amendment so as to ensure consisentcey. We also recommend consequential amendments to be consistent with our recommendations on GRZ-R1 and LLRZ-R1, to include a reference to accessory buildings.

569. In relation to **MRZ-R2**, the Panel agrees with Ms Easton that the reference to the MRZ-R1 performance standards is inappropriate, as this rule relates to very minor structures, such as flagpoles, water tanks, garden ornaments, and sheds. Ms Easton therefore recommends that only the setback requirement be included, similar to the standard for the equivalent rule in GRZ-R2. Consequential amendments will also apply to MRZ-R9. We agree with that approach and amendment to those rules.

570. In relation to **MRZ-R3**, the Panel accepts Ms Easton's recommendation to retain the rule as notified.

571. In relation to **MRZ-R4**, the Panel agrees with the amendments proposed by Ms Easton to partially address the submission of the New Zealand Heavy Haulage Association, which states that buildings intended for dwellings must have originally been used as dwellings. We agree that the other submission points sought by the New Zealand Heavy Haulage Association do not clarify or simplify the rule, however we have added reference to a new Appendix 11 which will set out the information that is required in the building pre-inspection report which is based on information provided by the Association at the hearing. This is a Plan-wide amendment.

572. The Panel has also consolidated rule 4 by deleting Clause 5 and adding to Clause 3. We consider the two clauses were overlapping and there were elements of uncertainty between them. We consider the amendments now make it clear the works to completed within 12-months of the building being delivered to the site. We consider the scope for these amendments stem from the submissions seeking deletion given the changes reduce and clarify the rule. We therefore recommend the amendments proposed and note that similar amendments are proposed in other recommendations.

573. In relation to **MRZ-R5**, the Panel acknowledges Ms Easton's recommendation to retain the rule as notified, except for an amendment to provide greater clarity. However, we note that we have included a consequential amenmdnt stemming from BDC submission (538.479) to include a limit on employee numbers. Further, we also note that as a result of recommendations on the Transport Chapter in relation to trip generation that clause (4)

relating to traffic movement is to be deleted so as to avoid the potential for uncertainty between provisions.

574. In relation to **MRZ-R6**, the Panel notes WDC's request that the Westland District only provide for homestay accommodation as a permitted activity, being the same as the Buller District, but different from Grey District. Ms Easton supported this submission and considered that this reflects the primary concern relating to dwellings being converted to short-term visitor accommodation (e.g. Airbnb). We recommend changes for consistency with GRZ-R6 and LLRZ-R6 consistency.

575. In relation to **MRZ-R7**, the Panel notes Ms Easton's recommendation was to retain the rule as notified. However, as we record above, when discussing MRZ-R1, we recommend a consequential amendment to performance standard 2 in this rule to ensure consistency with MRZ-R1 regarding the inclusion of NZS4404:2010. We also note that, as a result of recommendations in the Transport Chapter in relation to trip generation, clause (2) relating to traffic movement is recommended to be deleted to avoid the potential for uncertainty between provisions.

576. In relation to **MRZ-R8**, **MRZ-R10 and MRZ-R11** the Panel accepts Ms Easton's recommendation to retain the rules as notified. However, we note that we recommend minor corrections to MRZ-R8. We also note in relation to MRZ-R10 and MRZ-R11 that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to 'landscape measures' and 'landscape treatment' have been removed from the matters of discretion and replaced with 'measures to mitigate landscape effects' throughout the chapter.

577. In relation to **MRZ-R9,** Ms Easton noted that, due to earlier changes recommended to MRZ-R2 to focus on setbacks only, consequential amendments were required to this rule. The Panel accept Ms Easton's recommendation to make those consequential amendments. We note however that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to 'landscape measures' and 'landscape treatment' have been removed from the matters of discretion and replaced with 'measures to mitigate landscape effects' throughout the chapter.

578. In relation to **MRZ-R12** the Panel agrees with Ms Easton's response to the submission of GDC that sought additional requirements to ensure that infrastructure is provided to service the development and that a further matter of discretion, "*the provision of infrastructure to service the development*" be added. Ms Easton supported that submission and noted the significant additional demand on servicing that these facilities could generate. We agree and support the rule amendment to include a new clause (f). We also note that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to 'landscape measures' and 'landscape treatment' have been removed from the matters of discretion and replaced with 'measures to mitigate landscape effects' throughout the chapter.

579. In relation to **MRZ-R13,** the Panel accepts in part the submission of GDC (S608.738) and recommends the addition of a clause to match the recommendation on MRZ-R12. We also note that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to 'landscape measures' and 'landscape treatment' have been removed from the matters of discretion and replaced with 'measures to mitigate landscape effects' throughout the chapter.

580. In relation to **MRZ-R14**, the Panel notes that Ms Easton did not specifically address GDC's (S608.739) to add "*the provision of infrastructure to service the development*" as a new matter of discretion to MRZ-R14. We recommend this new matter of discretion is appropriate and is consistent with Ms Easton's reasons and recommendation on MRZ-R12. We accept GDC's submission point (S608.739). We agree with Ms Easton that there is no scope to include number of occupants or size of building as new matters of discretion. We also note that as part of a Plan wide amendment stemming from a submission by Manawa (S438.100) reference to 'landscape measures' and 'landscape treatment' have been removed from the matters of discretion and replaced with 'measures to mitigate landscape effects' throughout the chapter.

581. In relation to **MRZ-R15**, Ms Easton recommended no changes to MRZ-R15, but she did recommend the inclusion of a new restricted discretionary rule in the Plan providing for *Fences, Walls and Retaining Structures,* which we agree with**.** However, we also recommend that "*Fences, Walls and Retaining Structures*" is deleted from Rule MRZ-R15, as requested, in recognition of the new rule.

582. In relation to **MRZ-R16** to **MRZ-R20,** apart from minor integration issues, the Panel accepts Ms Easton's recommendation to retain the rules as notified.

583. The Panel acknowledges that **MRZ-R21** is a 'catch-all' rule intended to manage activities not specifically provided for in the other rules. The Panel has considered this matter plan-wide and we agree with the submitters that such rules are better placed as discretionary; otherwise, they are unnecessarily limiting in our view and could have unforeseen consequences. Therefore, it is our recommendation to recategorise this rule as a discretionary activity.

Hearing Panel's Recommendation

584. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted and accepted in part and recommends the following amendments are made to the **Medium Density Residential Zone Rules**:

MRZ-R1	**Residential Activities and Residential Units and Accessory Buildings**[230] **Activity Status Permitted** Where: 1. Residential unit density is no more than **one**~~1~~[231] unit per 300m^2 net site area; 2. The maximum building height above ground level is 10m; 3. Buildings are setback a minimum 4.5m from road boundaries, except that a roof overhang may encroach 750mm; 4. Maximum site coverage is 40%; 5. A minimum of 30m^2 of outdoor living space is provided per residential unit excluding any parking and manoeuvring areas~~;~~ **and the outdoor living space must have a minimum dimension of 3m**[232]; 6. No heavy vehicles are stored on site; 7. All residential units and buildings used for a residential activity must be connected to the community water supply, and wastewater networks and

[230] Consequential amendment Buller District Council S538.475
[231] RMA Schedule 1, clause 16 correction
[232] Davis Ogilvie & Partners Ltd S465.036

stormwater from the site and are **managed in accordance with the relevant standards in NZS4404:2010 Land Development and Subdivision Infrastructure**[233] ~~used for the activity~~ and must not drain to any public road ~~except for secondary flow purposes~~; [234]

~~8~~**9**. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing.~~ This standard does not apply to~~:~~

~~a. Road boundaries;~~

~~b. Buildings on adjoining sites that have a common wall along the boundary;~~

~~c. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;~~[235]

~~d.~~ ~~**B**~~**b**oundaries adjoining any site in a CMUZ - Commercial and Mixed Use, INZ - Industrial or RURZ - Rural Zone;

~~e. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or~~

~~f. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically;~~ [236] and

10. Buildings are setback a minimum of 1.5m from the railway corridor and 1m from all other site boundaries, except that:

a. Duplexes do not require a setback from the side boundary of the other duplex unit; and

~~b. Setbacks are not required from adjacent residential boundaries where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing.~~ [237]

Advice Notes:

1. Where a residential building or noise sensitive activity is located within:
i. 80m of a State Highway with a speed limit of 70kph or greater; or
ii. 40m of a State Highway with a speed limit of less than 70kph; or
iii. 40m of a Railway Line; or
iv. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or
v. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.
Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply.
2. **Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.**[238]

2.8. Zoning Maps

Submissions and Further Submissions

Zoning Maps – Buller District – Alma Road Zoning

585. Sixty-five submission points and 48 further submission relating to the Zoning Maps for the Alma Road zoning were summarised in the Table on pages 98-105 of the s42A Report.

586. Seven submitters sought specific zone changes for residential purposes. The remainder of the submissions sought to have that particular land zoned or retained as general rural. The

[269] Frank and Jo Dooley S478.039, Frank O'Toole S595.027
[270] Frank and Jo Dooley S478.033, Frank O'Toole S595.021
[271] RMA Schedule 1, clause 16 correction
[272] RMA Schedule 1, clause 16 correction
[273] William McLaughlin (S567.517), Chris & Jan Coll (S558.469), Chris J Coll Surveying Limited (S566.469), Laura Coll McLaughlin (S574.469)

further submissions included a mix of support and opposition to submissions on the proposed zoning as notified.

Zoning Maps – Buller District – Wider Westport Zoning

587. Fifteen submission points relating to the Zoning Maps for the Wider Westport Area were summarised in the Table on pages 105-107 of the s42A Report. Twelve submission points were in support of specific zonings as notified. Three submissions sought amendments.

Zoning Maps – Buller District – Reefton Zoning

588. Two submission points relating to the Zoning Maps for Reefton area were summarised in the Table on page 107 of the s42A Report. One submission point was in opposition, while the other sought amendments.

Zoning Maps – Grey District – Greymouth Area

589. Three submission points and two further submissions relating to the Zoning Maps for the Greymouth area were summarised in the Table on pages 107 of the s42A Report. All three submission points sought amendments, with one further submission in support and the other in opposition.

Zoning Maps – Grey District – Kaiata Park

590. Three submission points relating to the Zoning Maps for the Kaiata Park area were summarised in the Table on page 107 of the s42A Report. All three submission points sought amendments.

Zoning Maps – Westland District – Hokitika Area

591. Thirteen submission points relating to the Zoning Maps for the Hokitika Area were summarised in the Table on pages 107-108 of the s42A Report. Four submissions were in opposition to specific zonings, three were in support of specific zonings, while the remainder sought amendments.

Zoning Maps – Other Zoning Requests

592. Two submission points and one further submission relating to the Zoning Maps for other areas were summarised in the Table on page 108 of the s42A Report. The two submission points seek amendments, with one further submitter supporting one of the submissions.

593. The Panel adopts these summaries and has considered all of the relevant submissions and further submissions

Section 42A Report

Zoning Maps – Buller District – Alma Road Zoning

594. The 65 submission points in related to the Alma Road Terrace zoning sought a range of outcomes.

595. Ms Easton set out the context for rezoning of this area, noting that BDC had long considered this site for residential development and long-term growth direction for Westport given that the terrace was largely free from natural hazard risk. Ms Easton noted that because Westport was subject to significant flooding in 2019, planning for infrastructure servicing on the terrace had been undertaken.

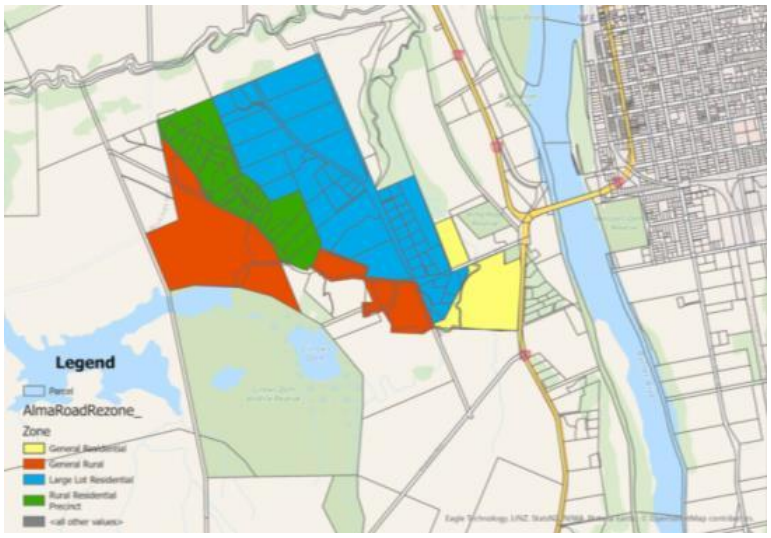
596. Due to master planning and infrastructure work not being complete prior to the TTPP notification, Ms Easton noted that the zone boundaries for Alma Road were not finalised and that more information was expected to come forward from BDC during the submission period. She highlighted that BDC's submission sought alterations to the proposed zoning. She noted that in addition to the submission of BDC, many other submissions sought various zoning changes. These are outlined in more detail in a Table located in the s42A Report on pages 111-113.

597. Ms Easton identified three main groups of submitters: 'The Avery Group', 'The Rifle Range Group', 'The BDC, TTPP Committee' and other landowners in favour of urban development on the Alma Road Terrace Group.

598. Ms Easton noted The Avery Group represented the owners of the quarry at Alma Road, who had cited concerns that the quarry's operation could be impacted by reverse sensitivity effects as the reason for not supporting any rezoning of the Alma Road Terrace for urban uses.

599. Ms Easton noted The Rifle Range Group represented gun clubs and users of the range who were concerned about reverse sensitivity effects on the rifle range if urban uses were to occur in the area but do not oppose urban development *per se* if this could be addressed.

600. Ms Easton noted The BDC, TTPP Committee, and other landowner groups generally acknowledge the existing uses in the area but considered that providing a safe, low-hazard location for residential development and progressive managed retreat was now the highest priority for this land.



601. Following a pre-hearing meeting on 21 May 2024, for any submitters who wished to attend, BDC proposed additional amendments to address the range of submission points, while still enabling the development of part of the Alma Road terrace. Reverse sensitivity effects to noise were identified as the principal concern of the Rifle Range Group, and a technical noise assessment was considered necessary to understand the impact of any rezoning. BDC provided an agreement stating that the land between the rifle range and Gillows Dam should remain rural at this time.

602. The amended zoning sought by BDC following this pre-hearing meeting was set out by Ms Easton in her s42A Report as follows:

Notified Zoning Map

Proposed Rezoning Map (Proposed by BDC)

603. Ms Easton supported BDC's amended proposal and considered it had taken a pragmatic approach to addressing landowner concerns while also addressing the critical housing needs of Westport.

604. As a result, Ms Easton recommended to accept, accept in part, reject and reject in part, the various submissions as they related to the amended zoning map provided above. A table of these recommendations, which can also be found on pages 114-117 of the s42A Report of Ms Easton is provided below:

Submission	How the Buller District Council amended zoning Proposal Addresses This	Recommendation And Scope Comment
Retain General Rural Zone at 107 Alma Road S507.074 S558.495 S567.540 S574.495 S510.074 S512.074 S511.074 S513.074 S609.066 S508.074 S509.074	Retains General Rural Zone at 107 Alma Road	Accept In Scope
Retain General Rural Zone at Lot 1 DP 17523 (103 Alma Road_ S558.496 S566.496 S567.541 S574.496	Retains General Rural Zone at 103 Alma Road	Accept In Scope

Retain General Rural Zone at the land between the quarry and Pakiihi Road (Lot 2 DP 404550, Lot 2 DP 418652 and Pt Section 24 Blk VII Kawatiri SD) S507.076 S512.076 S511.076 S508.076 S510.076 S509.076 S513.076 S574.497 S567.542 S566.497 S558.497 S336.005 S457.002 S330.001 S457.006 S263.001 S336.006 S336.007	Retains General Rural Zone on these three properties	Accept In scope
Ensure that there is sufficient buffer around the Westport rifle range to allow the existing use of the rifle range to continue without bring new developments in the area into dispute with current operations, particularly with regard to noise. S338.001	Uncertain without noise report	Accept in part. I consider the General Rural Zoning around the rifle range provides sufficient buffer.
Rezone Lot 2 DP 418652 Lot 2 DP 404550 Part Section 24 Block VII Kawatiri	Retains these sites as General Rural Zone	Reject In scope

residential or rural lifestyle		
Address the issues raised in the submission around drainage and land covenants if rezoning of Alma Road area is to go ahead. S87.001	Infrastructure servicing has informed the revised zoning approach from Buller District Council. Land covenants are a civil matter that sit outside of the RMA.	Accept in part In scope
Amend General Residential Zoning in the Alma Road area to a lower density zone such as General Rural Zone or Rural Lifestyle Zone. 510.072 S511.072 S512.072 S513.072 S567.453 S609.064 S507.072 S508.072 S509.072 S558.399 S566.399	The Buller District Council proposal identifies that: • the area around the quarry is rezoned General Rural, • the area around Alma Road that has already been subdivided to lifestyle properties is rezoned Settlement Zone: Rural Residential Precinct, and • the McPadden Road area is rezoned Large Lot Residential Zone. This is a significant reduction in density from the notified plan provisions, though is not to the degree sought by these submitters.	Accept in part In scope

SD General Residential Zone S171.002 S538.528		
Retain General Residential Zone at 5/153 Alma Road 193.001	Proposes this site as General Rural Zone	Reject In scope due to other submissions seeking a return to General Rural Zone
Rezone 103 Alma Road from Commercial to Residential 165.001	Proposes this site as General Rural Zone	Reject. In scope due to other submissions seeking a return to General Rural Zone
Rezone the proposed commercial zone designated at Alma Road, Westport to General Rural Zone 358.005	Proposes this site as General Rural Zone	Accept In scope
Remove the commercial zone from the property at 20 Gillows Dam Rd. 475.001	Proposes this site as General Rural Zone	Accept In scope
Change the zoning over 103 Alma Road and 20 Gillows Dam Road from Commercial to General Residential Zone 538.407	Proposes this site as General Rural Zone	Reject In scope due to other submissions seeking a return to General Rural Zone
Rezone the land to the west of Buller Road between Alma Road and the Crossroads to General Residential Zone 358.002	Proposes this site as General Rural Zone	Reject In scope
To keep buildings at least 300 meters from Pakihi Road and to note ALL land titles that there is an active existing rifle range on Pakihi Road which is an approved activity.	N/A – not a zoning matter – is existing rifle range protection area	Reject In scope
Zone 141 Alma Road(Lot 2 DP362094 Blk IV Steeples SD) either	Retains this site as General Rural Zone	Reject In scope

Zoning Maps – Buller District – Wider Westport Zoning

605. Ms Eason acknowledged the submissions[274] that supported the zoning of specific properties within Westport as notified.

606. In response to the submission of The O'Connor Institute Trust Board (S466.002) and Frank and Jo Dooley (S478.045) that sought that Stafford Street beside the O'Connor Home was rezoned from General Rural Zone to GRZ, Ms Easton supported these submissions and noted that the general principle in the Plan was that the zone is the same as the adjacent land. She noted that where the zone differs on one side of the road from the other, the zone would change at the road centreline. In this circumstance, she confirmed the adjacent zoning was GRZ on one side and Special Purpose Hospital Zone on the other. Ms Easton considered that the rezoning to GRZ was a practical and pragmatic zoning in this situation.

607. In response to the submission of Paul Finlay (408.006) that sought that the zoning provided for cadastral and subdivision planning, including servicing, Ms Easton supported the submission. She noted that a 30-year Infrastructure Strategy and Master Planning exercise was currently underway for Westport, which would address this strategic planning issue outside the Plan.

608. Ms Easton made the following recommendations in response to these submissions.

Rezone the identified area of Stafford Street from General Rural to General Residential Zone.

Zoning Maps – Buller District – Reefton Zoning

609. Paul Finlay (S408.005) also sought a non-specific area of growth in Reefton be provided generally in the Butts and Crampton Road area. Ms Easton did not support this submission and considered that there was sufficient infill and rezoned development land provided for Reefton within the Plan, as well as a greenfield development area around Wicken Place/Conlon Street and Buller Road. She considered this zoning sufficient to meet the additional residential growth needs of Reefton beyond the life of the Plan.

610. In response to the submission by BDC that sought the rezoning of four Neighbourhood Centre Zones (NCZ) to GRZ, Ms Easton supported this submission. She noted that, prior to the TTPP, these sites were all zoned for residential use. She considered spot zoning was not appropriate

[274] S507.071 Leonie Avery, S509.071 Kyle Avery, S508.071 Jared Avery, S510.071 Avery Bros, S511.071 Bradshaw Farms, S512.071 Paul Avery, S513.071 Brett Avery, S609.063 Avery Brothers, S558.398 Chris and Jan Coll, S566.398 Chris J Coll Surveying Limited, S574.398 Laura Coll McLaughlin.

in these locations, where limited demand has been identified for small commercial premises outside the town centre of Reefton.

611. Ms Easton made the following recommendations in response to these submissions:

Rezone the land with red dots from Neighbourhood Centre Zone to General Residential Zone

Zoning Maps – Grey District – Greymouth Area

612. Kim Scrivener (S5.001) requested the property at 2 Sturge Street, Cobden, be rezoned back to General Rural Zone from the proposed GRZ. Ms Easton noted that this land was proposed to be rezoned to GRZ to provide for the growth of Cobden because it was contiguous with the surrounding residential community. She noted that there was no obligation on the current landowners to develop the land but that its rezoning was advantageous in that it was a large land block on a terrace outside the coastal and flood hazard overlay areas. For this reason, Ms Easton did not support this submission.

613. Paul Finlay (S408.003) sought the rezoning of a section of Rural Lifestyle Zone to provide for increased subdivision potential. Ms Easton did not support that submission because the land was not contiguous with Cobden or other more developed areas.

614. Scoped Planning and Design Limited (S617.001) sought to rezone five parcels of land from Future Urban Zone (**FUZ**) to Large Lot Residential Zone (**LLRZ**) on Glen Road, Greymouth. Ms Easton did not support this submission and noted that this land was zoned FUZ because there was not sufficient infrastructure capacity for this area at present. She noted that the site was also subject to an instability overlay and, therefore, would require further consideration of this factor to determine what a suitable alternative zone would be.

615. Ms Easton did not recommend any changes as a result of these submissions.

Zoning Maps – Grey District – Kaiata Park

616. Ball Developments Ltd (S453.002, S453.003, S453.006) requested a range of amendments to the zoning of land at Kaiata Park to reflect their proposed subdivision plan for the area. Ms Easton supported this submission in part concerning changes to Open Space Zone (OSZ) within the Park. However, she noted those changes had been more specifically addressed under the OSZ Chapter. Ms Easton did not support changes that sought a reduction in the Commercial Mixed Use Zone or the conversion from Commercial and Light Industrial Zones to GRZ. She considered these zones were intended to mitigate the potential for reverse sensitivity effects by providing a buffer between the GRZ and the General Industrial Zone (GIZ).

617. Ms Easton did not make any recommended changes beyond those addressed under the Open Space Zone as referenced above.

Zoning Maps – Westland District – Hokitika Area

618. Westland Milk Products (S63.001) supported the General Industrial Zone for their manufacturing plant and the GRZ for 14, 41, 43, 51, and 59 Livingstone Street.

619. Ms Easton supported Paul Finlay's (S408.004) request to provide for the former racecourse and Seaview mental institution sites to be rezoned for residential purposes. She noted that both areas had been rezoned in the Plan for residential development.

620. Silver Fern Farms (S441.071, S441.062) sought the GRZ be removed from land adjacent to the Hokitika Silver Fern Farms site to avoid reverse sensitivity effects. Ms Easton shared this concern but noted that the consents for subdivision of this adjoining land for residential properties had already occurred, with roads built and houses under construction. She considered changing the proposed GRZ to General Rural Zone, as requested by the submitter, would be inappropriate given it was now subdivided and sold for residential development at urban densities. However, for the lots that had not been consented to full residential densities, she recommended changing the proposed zoning from GRZ to Rural Lifestyle Zone to reduce the risk of further potential reverse sensitivity effects.

621. Ms Easton did not support submissions[275] that sought land along Revell Street be changed from MRZ to GRZ due to concerns about coastal erosion in this area. She referred to the coastal natural hazard overlays mapped in the area. She noted that the modelling work undertaken by NIWA concerning these hazards did not indicate that the properties zoned MRZ would be affected by these hazards. However, she did acknowledge that some of the properties proposed to be MRZ had existing building encroachments beyond their legal title boundaries and within the coastal esplanade reserve, which may contribute to the impression that the properties were subject to a higher degree of risk than indicated in the hazard overlays. In response to Panel questions, she did not know why this part of Revell St and only one side had been rezoned MRZ. She said there was no information to support why Westland District Council had identified this area.

622. Clare Backes (S444.018) requested that the Plan acknowledge the flooding potential in Hokitika, stop further building along the coastal strip, and encourage managed retreat. Ms Easton did not support this submission. She noted that the Plan included several different

[275] S617.010 Scoped Planning and Design Ltd, S462.007 Inger Perkins, S473.017 Katherine Gilbert, S462.032 Inger Perkins, S195.001 Lois Meldrum, S267.001 Karyn Davis, S268.001 Michael Anderson, S424.001 Noeline Pullan

hazard overlays across various parts of Hokitika, which significantly restrict development in these areas. She also referred to policies in the Plan that supported managed retreat and noted that existing use rights could not be extinguished through the Plan.

623. Ms Easton made the following recommendations in response to these submissions.

Rezone the land with red dots from General Residential to Rural Lifestyle Zone.

Zoning Maps – Other Zoning Requests

624. Ms Easton supported in part WCRC's (S488.023 and S488.024) request for the Regional Council be party to the refinement of greenfield areas of the TTPP to ensure sites were efficient, effective and useable, and were appropriately serviced. She noted that the primary concern of this submitter related to the impact of earthworks and stormwater management. She highlighted several amendments recommended to provisions concerning stormwater management, including the requirement that this management be in accordance with NZS 4404:2010 and that stormwater be controlled within a site as part of any earthwork activities, in accordance with Rule EW-R1.

625. Lynley Hargreaves (S481.023) requested that there be no rezoning of any areas unless the rezoning approach had been subject to public consultation. Ms Easton supported this submission and outlined the consultation that was undertaken for proposed areas to be rezoned, including through the draft plan consultation process.

626. Ms Easton made no recommendations to amend the zoning maps rules in response to these submissions.

Hearing and Submitter Evidence/Statements

627. Concerning Zoning Maps – Buller District – Alma Road Zoning, the Panel heard from Ms McKenzie, planner, on behalf of the Westport Pistol Club, Westport Rifle Club Inc., and Mr Chris Hartigan. Ms McKenize provided details on the location and nature of activities at the

Westport Rifle Club and Pistol Club. She outlined the relevant regulatory framework currently applicable to the activity, including a Rifle Range Protection Area. Ms McKenzie considered that there was potential for reverse sensitivity effects in the rezoning proposed in the notified TTPP, as well as additional rezoning sought by submitters, including both BDC and WCRC. Ms McKenize was concerned with a lack of information and evidence to support the rezoning, in particular a noise evaluation to determine the extent of the noise profile and the effect on future residents.

628. Ms McKenzie also discussed the pre-hearing meeting held on 21 May 2024, whereby BDC tabled a revised zoning proposal. She noted that the revised proposal showed that BDC were no longer pursuing residential zoning directly adjacent to the Westport Rifle Range, but that the most intensive residential zoning proposed was still within 250m of the Rifle Range. Ms McKenzie was of the view that the additional areas sought to be rezoned through submissions (i.e. those adjacent to the rifle range) should remain General Rural Zone. Regarding the proposed residential zoning at Alma Road, Ms McKenzie considered that further noise analysis was required to ensure suitable provisions were included, which she considered should be incorporated into the Noise Chapter of the TTPP and essentially provided a buffer around the rifle range.

629. The Panel heard from the BDC, which was represented by Mr Barr, planner, and Ms Inwood, also a planner. Ms Inwood produced a written preliminary noise assessment (dated 14 June, 2024) and a supplementary written statement (dated 31 July 2024), both prepared at her request by Mr Farren, an acoustic expert, with Marshall Day Acoustic Consultants.

630. The preliminary noise assessment considered the shooting noise from the existing Rifle Range in relation to the proposed rezoned residential boundaries at Alma Road and provided three noise contours based on preliminary shooting noise, which were set at 50 dB LAFMax, 55 dB LAFMax, and 60 dB LAFMax. As a guide, Ms Inwood considered that gunshot noise levels in the range of 50-55db LAFMax were appropriate for residential amenity. However, she noted an advisory note may be appropriate to inform new residents that shooting noise will be audible. Between 55-60 dBLAFMax, Ms Inwood noted that some consideration of noise mitigation for new dwellings and their outdoor areas was deemed appropriate, while new residential development should be discouraged where noise levels will exceed 60 dBLAFMax. Ms Inwood also noted that if the noise contours were to be adopted by the Council, then actual measurements on site would be required to refine the contour extents.

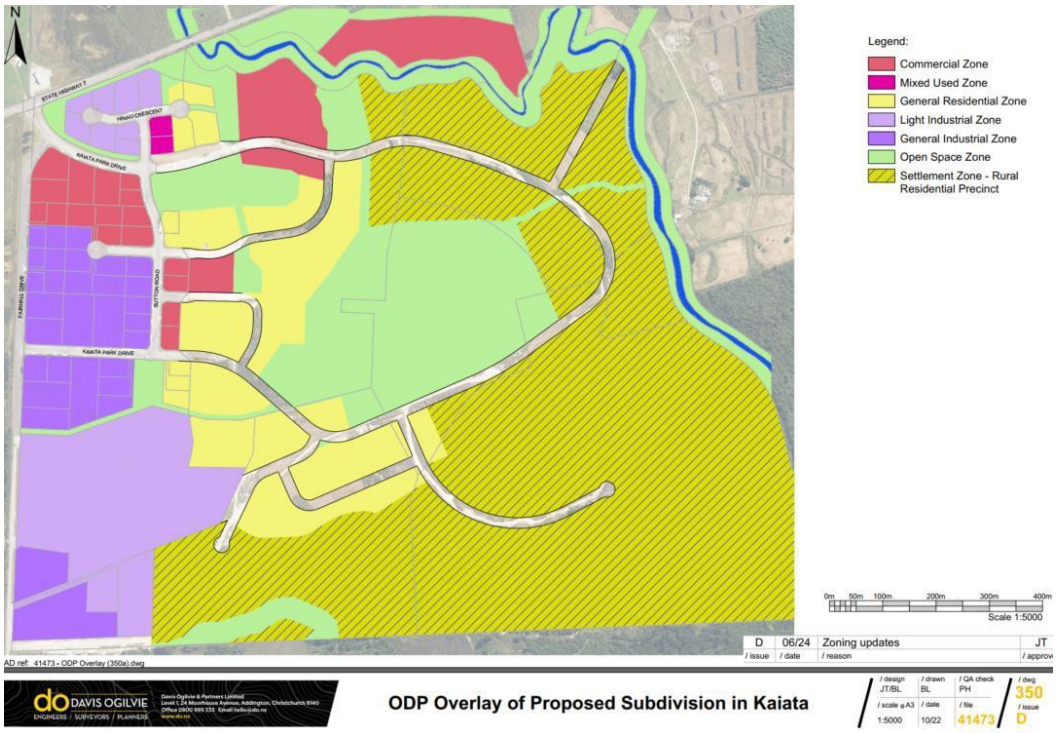
631. The supplementary assessment, prepared by Mr Farren provided revised noise modelling with detailed terrain data. As a result of the updated assessment, an adjustment had been made to the 55 dB LAFMax contour that crossed the Alma Road land compared to the preliminary assessment. Mr Barr outlined the proposed rezoning that BDC now sought following consideration of submissions and noise information provided by Marshall Day. He noted that this rezoning would provide for a mix of GRZ, LLRZ, and Settlement Zone – Precinct 4 zoning. He stated that this could provide for approximately 605 residential units in an area that was not vulnerable to severe flooding, and one that BDC plans to service with water and wastewater infrastructure. Mr Barr also considered that the proposed rezoning would alleviate at least some of the concerns of submitters regarding Alma Road.

632. Mr Barr referred to the noise assessment prepared by Mr Farren, which identified the noise characteristics and nature, as well as the scale of activities from the Rifle Range. The assessment modelled the estimated noise and identified three sound level areas as noise contours. Mr Barr considered that the estimated sound levels modelled by Mr Farren could

be managed through rules in the TTPP so that new sensitive activities within the proposed GRZ and LLRZ could be appropriately managed. Mr Barr considered that the most efficient way to achieve this was through amendments to the rules in the Noise Chapter, with an additional matter of discretion added to the Subdivision Chapter, which could serve to provide further opportunities for site-specific mitigation as necessary. With this considered, Mr Barr concluded the proposed rezoning was appropriate and would not lead to any incompatibility issues between the Rifle Range and future residential activity within the proposed GRZ and LLRZ.

633. Mr Barr also addressed the existing Avery Brothers Quarry located at 107 Alma Road. He noted that the proposed rezoning, which sought to retain all properties located between the quarry as General Rural Zone as opposed to GRZ, had alleviated the concerns of those submitters.

634. Overall, Mr Barr considered the change in amenity and character as a result of the proposed rezoning would not be inappropriate and that the provision of acoustic attenuation rules for new housing within the influence of the Rifle Range would address compatibility effects. He also confirmed that the retention of the GRUZ land adjacent to the Avery quarry would provide an appropriate buffer.

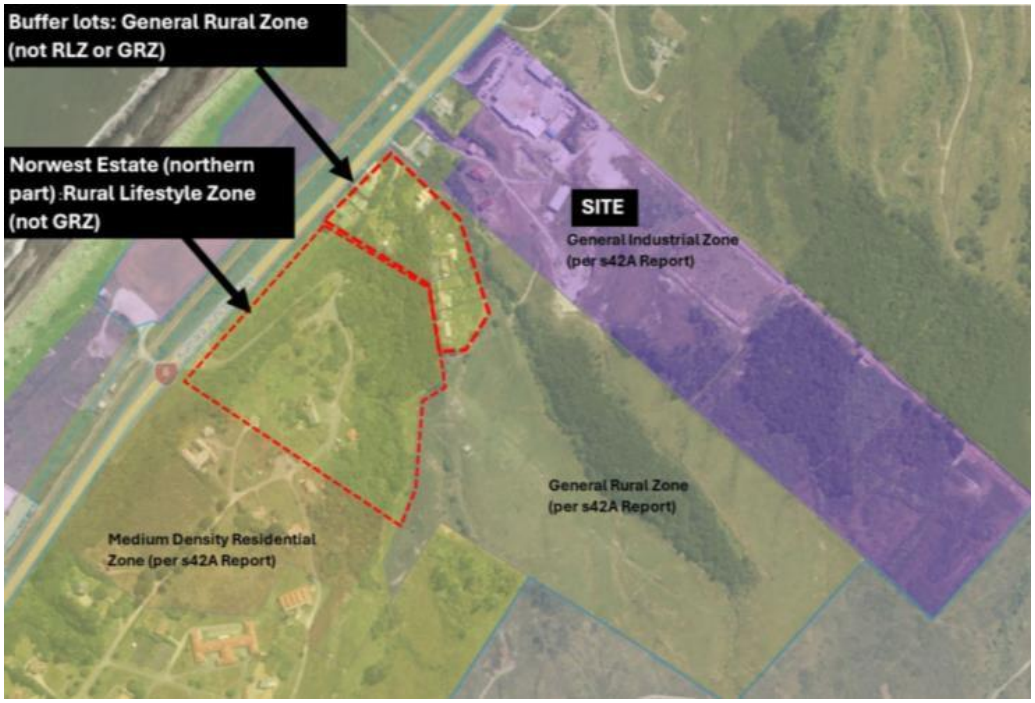


635. The Panel issued direction via Minute #34 on 22 July 2024 following the Residential and Special Purpose Zones hearing. This minute acknowledged that several parties sought to provide further information to the Panel following the hearing. Further information was received from BDC on 16 August 2024, regarding the proposed rezoning at the Alma Road site. This information included details on flood risk, consideration of alternative sites, any further discussions or agreements between the submitters and the Council, and whether the Council wished to withdraw the part of their submission that sought to rezone land beyond the updated and refined proposed rezoning map presented at the hearing.

636. Regarding Zoning Maps – Grey District – Greymouth Area, the Panel heard from Mr Glen and Ms Kim Scrivener, who outlined the success of their property for use as an Airbnb farm stay accommodation and reiterated their opposition to the proposed rezoning of their land from General Rural Zone to GRZ in the Plan. Ms Scrivener considered that their land would be tricky to subdivide or undertake urban development on due to limited access and natural hazards (land instability). She considered that Rural Lifestyle Zone would be more appropriate, taking into account the circumstances. Ms Scrivener also raised concerns around the potential for rates to increase on the property due to the rezoning. They provided photographs of the site to support their submission.

637. Regarding the Zoning Maps – Grey District – Kaiata Park, a statement of evidence was provided by Ms Hadfield, which included an updated Outline Development Plan (ODP) zoning overlay for Kaiata Park. The updated plan included amendments to the roading layout, as well as to the Open Space, General Industrial, Light Industrial, Commercial, Mixed Use, General Residential, and Small Settlement Zoning – Rural Residential Precinct. In particular, the GRZ area had been amended to a smaller area to reduce the area within Kaiata Park where reticulated services were required and to provide a larger area of Open Space Zone, as well as increases in the Settlement Zone – Rural Residential Precinct where onsite servicing had been indicated.

638. In response to the matters raised in the s42A Report, Ms Hadfield also noted that she considered that adequate buffers between residential and industrial land uses had now been



provided in the updated ODP. The updated Kaiata Park ODP presented by Ms Hadfield is provided below:

639. In relation to Zoning Maps – Westland District – Hokitika Area, statements of evidence were provided by Mr Humpheson, acoustics, and Mr Tuck, planning, on behalf of Silver Fern Farms.

640. From a planning perspective, Mr Tuck did not support the recommendation in the s42A Report to rezone land adjacent to the Silver Fern Farms Hokitika site, known as the Norwest Estate site, to a mix of GRZ and RLZ. He considered these rezonings presented a risk of reverse sensitivity effects that would affect the Silver Fern Farms industrial site. He also considered the rezoning may result in the perception of a high level of amenity being warranted and available in the context, which presented a risk of constraining Silver Fern Farms' ability to operate as envisaged by the GIZ and the resource consents that regulate the site.

641. Mr Tuck noted the resource consents issued for the adjoining site to the Silver Fern Farms site were issued in the context of the current rural zoning and that consenting and development of the adjoining land did not demand retrospective legitimisation by rezoning to a residential zone. He recommended an amended zone configuration, which would involve rezoning the Norwest Estate site to a mix of General Rural Zone and RLZ as set out below:

642. The acoustic evidence of Mr Humpheson focused on residential amenity expectations from a noise perspective. He considered that reverse sensitivity effects were likely to occur from more dwellings being permitted and more future occupants being exposed to noise from the Silver Fern Farms site. He also considered that the outdoor noise level of residential zones was overly permissive and would be sufficient to interfere with speech and communication, while the WHO-recommended internal noise levels would also be exceeded through an open window at residential dwellings. Mr Humpheson noted that even if the Silver Fern Farms site was fully compliant with the TTPP noise rules, the expectation of noise amenity in residential environments was still likely to lead to reverse sensitivity issues that may constrain site operations.

643. Mr Humpheson therefore recommended the provision of a buffer zone between the GIZ and Residential zones, of approximately 100m in width, with light industrial or rural zoned land being suitable for the buffer zone area. Alternatively, he considered that, should the residential zoning remain, additional acoustic requirements should be introduced, which could include acoustic insulation requirements, or the use of "no complaints" covenants on lot titles.

644. Ms Inger Perkins provided a statement opposing the proposed MRZ on the seaside of Revell Street and requested it be zoned GRZ like the rest of the town. She noted that WCRC was behind other councils in its consideration of the risk of climate change and needed to plan for protection from storms, storm surge and sea level rise. She considered the intensification of housing beside the sea should not be an option and that allowing medium density housing on the seaward side of Revell Street was "frankly bonkers". She also considered medium density housing (up to 10m high) would be at odds with the amenity and character of the existing low single storey housing.

Reporting Officer Reply Evidence

645. In her Right of Reply, Ms Easton addressed queries from the Panel and considered further amendments in response following the information presented in the hearing.

646. Regarding the **Zoning Maps – Alma Road Zoning**, Ms Easton retained her view expressed in the s42A Report, which was that she supported the updated rezoning proposal presented by Mr Barr on behalf of BDC. She considered that there was a need for some acoustic management provisions within the 55 dBLAMax contour, which would be addressed in the Noise Chapter of the Plan.

647. The Panel asked Ms Easton whether she could provide a joint view from the s42A authors on the rezoning and noise issues at Alma Road regarding the Rifle Range. Given that the noise hearing had not commenced at the time of the residential hearing, it was agreed by the respective s42A Reporting Officers that this joint position would be provided after the Noise Chapter hearing.

648. A joint Right of Reply statement was provided to the Panel on 24 September 2024 following the noise hearing. This confirmed that a joint witness statement (**JWS**) was prepared by the relevant s42A Reporting Officers for the residential and noise topics, BDC, Westport Pistol Club, Mr Hartigan, and Westport Rifle Club Incorporated, in relation to the provisions and mapping associated with the Westport Rifle Range noise overlay. This JWS confirmed agreement as they related to provisions of the Noise and Subdivision chapters, as well as the planning maps to reflect the Rifle Range Noise Overlay. It was also confirmed BDC had formally withdrawn its original submission seeking to rezone land adjacent to the Rifle Range for residential zoning.

649. No further recommendations were made by Ms Easton to the Zoning Maps – Buller District – Alma Road Zoning.

650. Regarding **Zoning Maps – Grey District – Greymouth Area**, Ms Easton considered the evidence of Ms Scrivener further. Regarding the land instability issue raised, Ms Easton noted that the land instability overlay was mapped at a regional scale based on the adjacent Elizabeth Range, rather than considering the past use and filling on the site from its previous use as sports grounds. In terms of the demand for residential land at Cobden, she agreed that at present, demand was low but was of the view that, due to the significant coastal and flood hazard overlays that sit across the low-lying area of Cobden, that overtime this could have significant effects on the ability for infill development to occur. In terms of the potential for rates to increase, Ms Easton was unable to comment on the specific implications for this site, other than to acknowledge that the value of a property often increased when it was rezoned, which can have an impact on rates. Overall, Ms Easton considered the property was likely to be important for the future development of Cobden but agreed that parts of the property were unlikely to be developable. Given that there was no strong pressure for development in this location and considering the detailed work that WCRC was continuing to undertake on land instability hazards, Ms Easton considers it was possible to leave this property as General Rural Zone and reconsider it at the time of the next Plan review.

651. In relation to the **Zoning Maps – Grey District – Kaiata Park**, Ms Easton reviewed the updated material presented by Ms Hadfield at the hearing and considered that the majority of change requests were within scope of the submission. In terms of proposed changes to zoning, Ms Easton supported the change from specific General Industrial to Commercial zoned land and considered this addressed her previous reverse sensitivity concerns with the ODP layout in the original submission of Ball Developments. Ms Easton reached the same conclusions for the change from specific Commercial Mixed Use and Open Space to GRZ zoning, Light Industrial to Commercial and GRZ, and Commercial to GRZ zoning.

652. Regarding the **Zoning Maps – Westland District – Hokitika Area**, Ms Easton retained her view on the rezoning of the properties adjacent to the Silver Fern Farms site, as outlined in the s42A Report. She considered there was no difference in the likelihood of complaints between a RLZ and a GRUZ and noted people's expectations around amenity levels would be the same regardless of zoning. Ms Easton also considered that there was no practical rural production use of the properties adjacent to the Silver Fern Farms site.

653. Ms Easton considered the best approach to manage reverse sensitivity effects was through the use of setbacks from boundaries within the GIZ site. She noted that, at notified, the GIZ included setback requirements for buildings within 5m of any residential or settlement zoned property and considered that the inclusion of a setback from rural/rural lifestyle properties could further assist with addressing this issue.

654. Ms Easton also met with Mr Belgrave, Reporting Officer for the Industrial and Commercial Zones Chapters, and Ms Evans, Reporting Officer for the Noise Chapter, in relation to the submission points of Silver Fern Farms. A joint Right of Reply was provided on 17 October 2024. It recorded agreement that no further changes to the Residential Zone provisions were recommended as a result of these discussions.

655. In response to Panel questions regarding the proposed MRZ located at Revell St, Hokitika, Ms Easton confirmed that there was an assumption that existing rock protection works would continue to be maintained and upgraded for coastal hazard protection. She also noted that discussions with WCRC's Chief Engineer confirmed that the existing seawall was constructed by the WCRC as emergency works and was unconsented, although a retrospective resource consent had been lodged to upgrade the protection works along the Revell Street frontage.

656. In response to Panel questions regard the proposed Revell Street MRZ and the relevant provisions of the NZCPS and RPS that apply, Ms Easton set out Policy 27 of the NZCPS, Policy 6, 7 and 8 of the coastal environment chapter of the RPS, and Policy 2 of natural hazards chapter of the RPS. In relation the NZCPS, Ms Easton understood that it was intended that Hokitika would continue to be protected by hard engineering structures to mitigate coastal erosion risk but that without the present seawall or similar structure in place, coastal properties along Revell Street would be increasingly at risk from coastal erosion. Ms Easton also noted that the Revell Street area was not at risk, even taking a 100-year view with allowance for climate change, from the coastal inundation hazard as modelled by NIWA.

657. No further recommendations were made to the Zoning Maps – Westland District – Hokitika Area in Ms Easton's Right of Reply.

Hearing Panel's Evaluation

658. In relation to **Zoning Maps – Buller District – Alma Road Zoning,** the Panel agree with both Mr Barr's and Ms Easton's assessment of the evidence, particularly the evidence available from the Avery Group and the Rifle Range Group. We agree with Ms Easton's evaluation of submissions in respect of scope. We further agree with Ms Easton's reasons for supporting the updated rezoning proposal presented by Mr Barr on behalf of BDC. We note Ms Easton's view that there is a need for some acoustic management provisions within the 55 dBLAMax contour, which should be provided in the Noise Chapter of the Plan. We understand the acoustic management provisions will include rifle range noise contours in the planning maps provided under the Noise Chapter, as outlined in the Recommendations Report for that

chapter. We agree that Alma Road rezoning will provide much needed options for Westport's community to be able to respond to existing flooding issues and future flood risks.

659. Regarding **Zoning Maps – Buller District – Wider Westport Zoning,** the Panel agree with Ms Easton's recommendation to rezone the identified area of Stafford Street from GRUZ to GRZ, for the reasons outlined in the s42A Report.

660. In relation to **Zoning Maps – Buller District – Reefton Zoning,** the Panel agree with Ms Easton recommendation to rezone the land with red dots from NCZ to GRZ, for the reasons outlined in the s42A Report.

661. Regarding **Zoning Maps – Grey District – Greymouth Area** and Mr and Ms Scrivener's property at 2 Sturge Street, Cobden, the Panel agree with Ms Easton's recommendation included in her Reply that the land be rezoned back to General Rural Zone. We agree this should be reconsidered when the Plan is next reviewed, given there is currently no strong pressure for development in this location and detailed work is presently being undertaken by WCRC on land instability hazards.

662. In relation to Mr Finlay's submission, the Panel agree with Ms Easton's recommendation to not rezone the land as requested by the submitter, for the reasons outlined in the s42A Report.

663. Regarding the Scoped Planning and Design Limited submission that sought to rezone five parcels of land from FUZ to LLRZ on Glen Road, Greymouth, the Panel agree with Ms Easton not to change the zone. The Panel recommend retaining future options for the zone and allowing for future council planning to guide the most effective use of the area, consistent with the purpose of the FUZ.

664. In relation to **Zoning Maps – Grey District – Kaiata Park**, the Panel notes Ms Easton supported this submission in part concerning changes to OSZ and agrees those changes need to be addressed in the recommendation in the OSZ Chapter. We agree with Ms Easton that the updated material, detailing changes from the submission are all within the scope of the submission. We accept Ms Easton's recommended changes to the zoning as set out in her Reply.

665. Regarding **Zoning Maps – Westland District – Hokitika Area**, we agree with Ms Easton's recommendation to rezone the land adjacent to the Hokitika Silver Fern Farms site from GRZ (as notified) to RLZ. The consents for subdividing this adjoining land for residential properties have already been issued and the development is existing, with roads built and houses both built and under construction. The Panel visited the Silver Fern Farms site to understand its processes and activities and to familiarise ourselves with the context of both the site and the adjacent developed land. We agree with Ms Easton that a General Rural Zone, as requested by the submitter, would be inappropriate for land that is now subdivided and sold for residential development at urban densities. However, we also agree that, for the lots that have not been consented to full residential densities, these could potentially be rezoned as Rural Lifestyle Zone to reduce the risk of further reverse sensitivity issues. We agree with Ms Easton that there is no difference in the likelihood of complaints between a rural lifestyle vs rural zone, and that expectations around amenity levels would be the same regardless of zoning. In particular, we noted that anticipated noise levels in the GRUZ and RLZ are identical, with reference to the Noise Chapter provisions. We also agree with Ms Easton that there is no practical rural production use of the properties adjacent to the Silver Fern Farms site.

666. Ms Easton considered that the best approach to manage reverse sensitivity effects is through the use of setbacks from boundaries with the General Industrial Zone site. Ms Easton notes that at present the General Industrial Zone includes setback requirements for buildings within 5m of any residential or settlement zoned property and considers that the inclusion of a setback from rural/rural lifestyle properties could further assist with addressing this issue. However, as she did not propose a specific setback distance for the Silver Fern site, we assume either there was no scope to do so, or she was satisfied with the 5m setback.

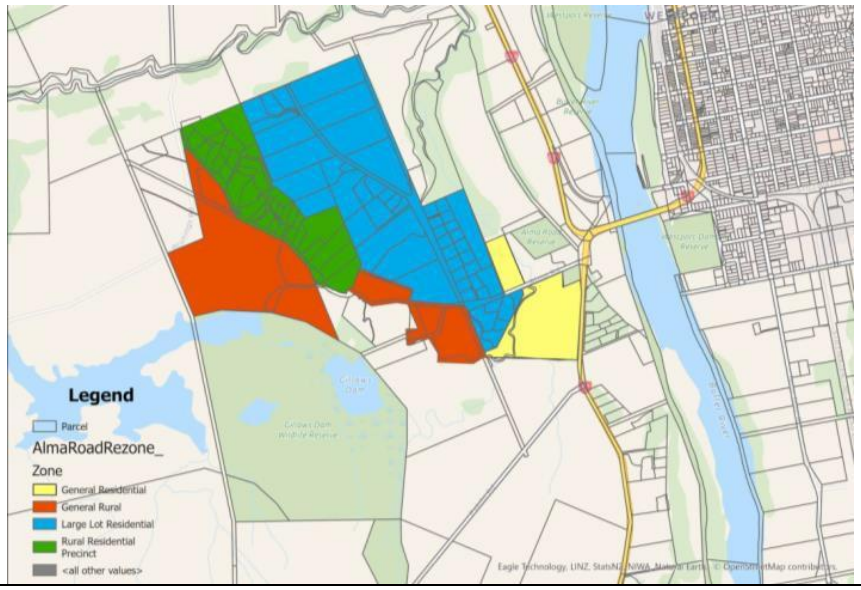
667. Regarding the submissions that sought land along Revell Street be rezoned from MRZ to GRZ due to concerns about natural hazards from coastal erosion and flooding, the Panel disagrees with Ms Easton's recommendation to reject these submissions. The Panel considers it is not appropriate to take into account any protection currently provided by an unconsented rock seawall that was constructed under the emergency provisions of the RMA to support the rezoning. There is no information available of any analysis undertaken to support the suitability of this area for medium density housing, except for the NIWA coastal mapping which takes into account the existing seawall. However, the seawall does not extend along the entire frontage of the MRZ. There is no certainty that the existing seawall will be extended to protect the entire frontage of the proposed MRZ or that it will be maintained for 50 years (the minimum life of a building).

668. During the Panel's site visit, we noted the seawall is currently being undermined and overtopped, with driftwood and tidal debris evident on top of the seawall and on the adjacent land. While we acknowledge Ms Easton's point that some of the properties proposed to be MRZ have existing building encroachments beyond their legal title boundaries and within the coastal esplanade reserve, which may contribute to the impression that the properties are subject to a higher degree of risk than indicated in the hazard overlays, our observations indicate the risks posed by coastal erosion are very real in this location.

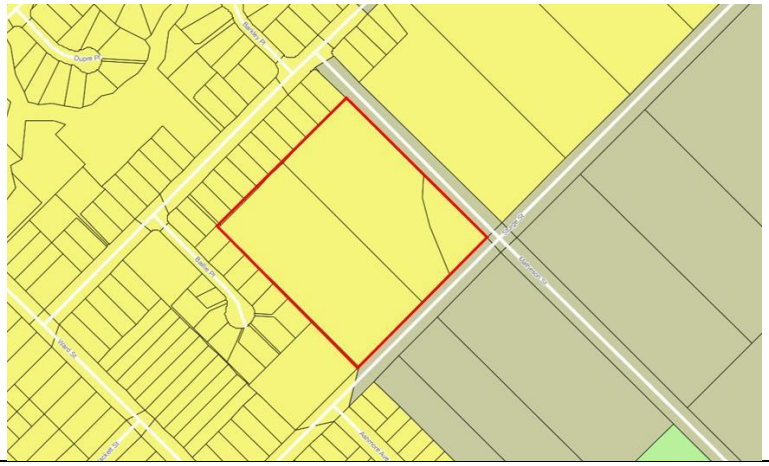
669. Policy 25 of the NZCPS directs the Panel to avoid increasing the risk of social, environmental and economic harm from coastal hazards; to avoid redevelopment or change in land use that would increase the risk; and to discourage the use of hard protection structures. Policy 27 of the NZCPS is about strategies to protect significant existing development, not strategies for increasing development, and it directs that hard protection structure to protect private properties should not be located on public land.

670. The RPS objectives and policies must give effect to the NZCPS. RPS Chapter 9 (coastal environment) Policies 6, 7 and 8 direct that new development affected by coastal hazards must adopt a risk management approach, over a 100-year timeframe, and in areas of significant development, planners must use a range of options to reduce the risk. RPS Chapter 11 (natural hazards) Policies 1 and 2 direct a reduction of susceptibility to natural hazard by improving planning, and locating new use and development to avoid or minimise the need for hazard protection works.

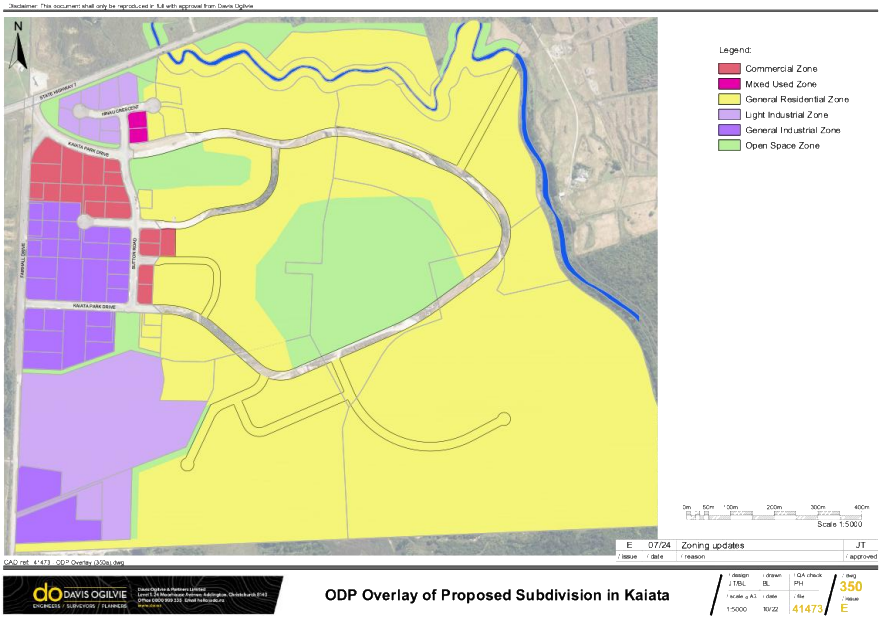
671. The Panel finds there is no information or evidence available to support the proposed rezoning to MRZ on the seaward side of Revell Street. While Ms Easton considers the Revell Street area is not at risk from coastal inundation, as modelled by NIWA (even taking a 100-year view with allowance for climate change), the Panel's recommendation must take into account the *existing environment*. This does not include the existing unconsented *ad hoc* coastal protection structure or assumptions that new hard protection structures will be constructed and maintained along the frontage of the MRZ areas in the future.

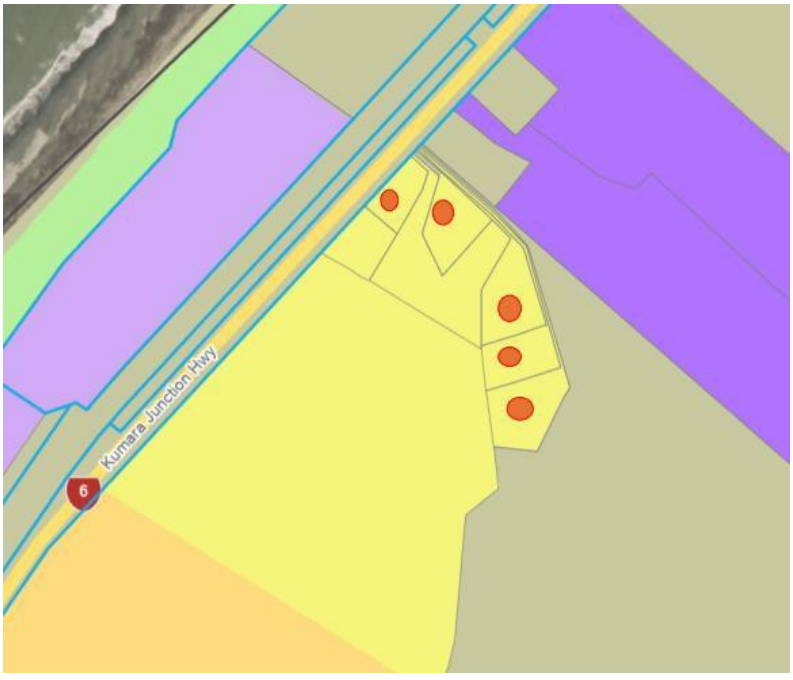


672. The Panel also agrees with submitters that medium density development in this area would be inconsistent with the existing amenity and character of the area. It also seems disconnected and some distance from the town centre.



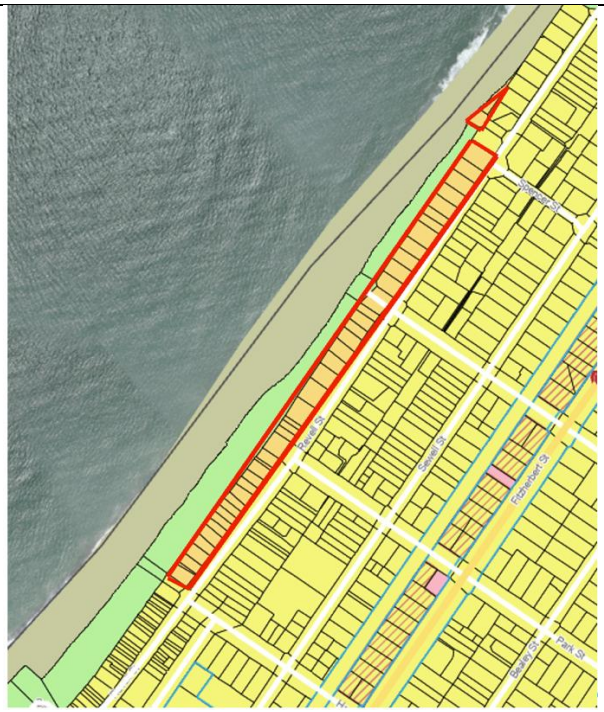
673. For these reasons, the Panel recommends the MRZ on Revell Street Hokitika is changed to GRZ as requested by submitters. We accept the submissions of Scoped Planning and Design Limited (S617.010), Inger Perkins (S462.007 and S562.032), Katherine Gilbert (S473.017), Lois Meldrum (S195.001), Karyn Davis (S267.017) Michael Anderson (S268.001) and Noeline Pullan (S424.001). We consider our recommendation also partly addresses Clare Backes' submission (S444.018) that sought to have the Plan acknowledge the flooding potential in Hokitika and stop building along the coastal strip, and encourage managed retreat; and therefore, also partly accept this submission point.





674. In relation to **Zoning Maps – Other Zoning Requests**, the Panel accepts Ms Easton's recommendation that no amendment to the zoning maps were required in response to submissions.

Hearing Panel's Recommendation



675. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points are accepted and accepted in part, and recommend the following amendments are made to the Zoning Maps:

Provision	Recommended Amendments to Planning Maps
Alma Road Terrace Area	Amend the Alma Road Terrace Area in accordance with the Map Below 

Stafford Street - Westport	Amend Stafford Street (red outline) beside the O'Connor Home as General Residential Zone 
Neighbourhood Centre Zones - Reefton	Amend Neighbourhood Centre Zones (red dots) as General Residential Zone 
Sturge Street – Cobden - Greymouth	Amend General Residential Zone (red outline) to General Rural Zone 

Kaiata Park - Greymouth	Amend Kaiata Park in accordance with the Kaiata Park ODP below 
Land Adjacent to Silver Fern Farms Site	Amend Land (shown with red dots) adjacent to Silver Fern Farms site to Rural Lifestyle Zone 
Medium Density Residential	Amend Medium Density Residential Zone at Revell Street to General Residential Zone

Zone Revell Street, Hokitika

2.9. Appendix 2 of the Plan – Recession Planes

Submissions and Further Submissions

Appendix 2 of the Plan – Recession Planes

676. Fifteen submission points and two further submissions relating to **Appendix 2 – Recession Planes** of the Plan were summarised in the Table on pages 128-130 of the s42A Report. All submission points sought amendments, with the two further submissions supporting in part the proposed amendments of two submissions.

677. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

Section 42A Report

Standards (General)

678. Ms Easton acknowledged the submissions that supported the rules, or selected rules, as notified.

679. In response to the submissions[276] that sought amendments to the recession diagrams and indicators to improve clarity or reduce the restrictiveness of the recession plane, as notified,

[276] S190.854, S190.837 Te Mana Ora, S567.736 William McLaughlin, S558.710 Chris and Jan Coll, S566.710 Chris J Coll Surveying Limited, S574.710 Laura Coll McLaughlin.

Ms Easton did not support replacing the recession planes as notified in the Plan, including the request to replace these with those from the operative BDP.

680. In response to the submission of BDC (S538.635) that sought additional clarification be added to Appendix Two to confirm that "*the level of site boundaries shall be measured from filled ground level except where there is an existing building at a lower level on the other side of a common boundary, where that lower level shall be adopted*", Ms Easton supported this approach. She considered it was a practical approach to managing the issue of site boundaries in locations where land was required to be built up due to natural hazard or geotechnical reasons. Ms Easton also supported the additional submission point of BDC that providing exclusions to recession planes, e.g. road boundaries, antennas, solar panels, should be included with Appendix Two. Ms Easton considered that this would reduce duplication within the Plan, provided these exclusions were removed from the respective zone-based rules.

681. In response to the submissions[277] that sought a new recession plane diagram that was more enabling for those seeking to satisfy requirements for natural hazard mitigation, Ms Easton did not support changing the recession plane diagram. However, she noted that the above exclusions under the BDP submission points above would partly address these submission points.

682. Ms Easton recommended amending Appendix Two – Recession Planes as follows:

Appendix Two: Recession Planes

[277] S567.738 William McLaughlin, S558.712 Chris and Jan Coll, S566.712 Chris J Coll Surveying Limited, S574.712 Laura Coll McLaughlin.

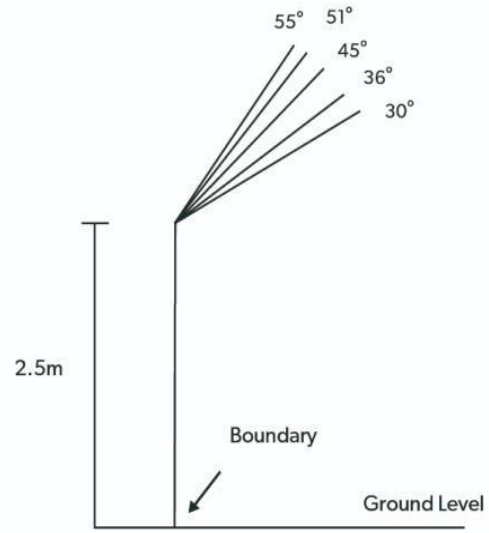


Diagram A

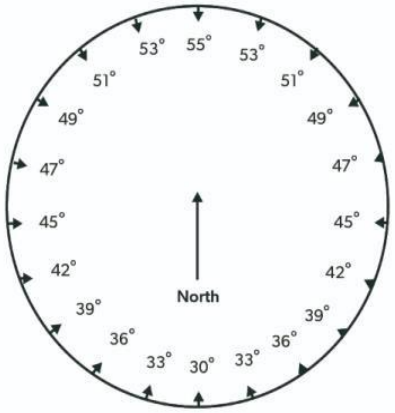

Diagram B

Place Diagram B on the inside of the boundary. The angle tangential to the boundary is the angle of the recession plane. Note North is True North. The recession plane angle shall be applied as per Diagram A.

The level of site boundaries shall be measured from filled ground level except where there is an existing building at a lower level on the other side of a common boundary, where that lower level shall be adopted. For the purpose of measuring recession planes only internal boundaries shall be taken as site boundaries. These standards do not apply to:

1. *Road boundaries;*
2. *Buildings on adjoining sites that have a common wall along the boundary;*
3. *Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;*
4. *Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or*
5. *Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically;*

683. Ms Easton also recommended subsequent amendments to various zone rules in the Plan to remove duplication as follows:

Remove the following from NOSZ – R1, OSZ – R1, SARZ – R1, MUZ – R1, NCZ – R1, TCZ – R1, GIZ -R1, LIZ – R1, SETZ – R1, HOSZ – R1, PORTZ – R1, STADZ – R1, SVZ – R1.

~~*These standards do not apply to:*~~
~~*i. Road boundaries;*~~
~~*ii. Buildings on adjoining sites that have a common wall along the boundary;*~~
~~*iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;*~~

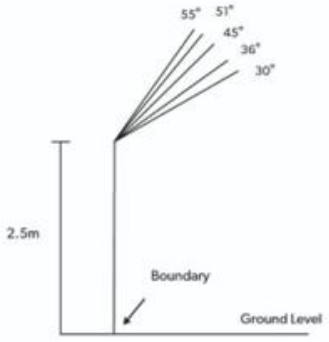
~~iv. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or~~

~~v. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically;~~

Hearing and Submitter Evidence/Statements

684. No evidence or statements were presented by any party in relation to Appendix Two: Recession Planes.

Reporting Officer Reply Evidence



685. No further material related to Appendix Two: Recession Planes was provided in Reply.

Hearing Panel's Evaluation

686. The Panel agree with Ms Easton's assessment of the issues raised in submissions relating to Recession Planes and we also agree with her recommendations to make amendments to those provisions for the reasons she outlined.

Hearing Panel's Recommendation

687. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points are accepted and accepted in part, and recommend the following amendments are made to Appendix 2:

Provision	Recommendation
Appendix Two: Recession Planes	**Appendix Two: Recession Planes**  **Diagram A**  **Diagram B** Place Diagram B on the inside of the boundary. The angle tangential to the boundary is the angle of the recession plane. Note North is True North. The recession plane angle shall be applied as per Diagram A. ***The level of site boundaries shall be measured from filled ground level except where there is in existing building at a lower level on the other side of a common boundary, where that lower level shall be adopted. For the purpose of measuring recession planes only internal boundaries shall be taken as site boundaries These standards do not apply to:***

	1. Road boundaries; ***2. Buildings on adjoining sites that have a common wall along the boundary;*** ***3. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;*** ***4. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or*** ***5. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically;***
NOSZ – R1, OSZ – R1, SARZ – R1, MUZ – R1, NCZ – R1, TCZ – R1, GIZ -R1, LIZ – R1, SETZ – R1, HOSZ – R1, PORTZ – R1, STADZ – R1, SVZ – R1.	Remove the following from NOSZ – R1, OSZ – R1, SARZ – R1, MUZ – R1, NCZ – R1, TCZ – R1, GIZ -R1, LIZ – R1, SETZ – R1, HOSZ – R1, PORTZ – R1, STADZ – R1, SVZ – R1. ~~*These standards do not apply to:*~~ ~~*i. Road boundaries;*~~ ~~*ii. Buildings on adjoining sites that have a common wall along the boundary;*~~ ~~*iii. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or*~~ ~~*v. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically;*~~

Kumara Junction Development Plan

Submissions and Further Submissions

Kumara Junction Development Plan

688. One submission point relating to the **Kumara Junction Development Plan** was summarised in the Table on page 130 of the s42A Report. That submission sought to retain the Kumara Junction Development Plan as notified.

689. The Panel adopts this summary and has considered the relevant submission.

Section 42A Report

Standards (General)

690. Ms Easton acknowledged the submission that supported this development plan, as notified. She recommended retaining the Kumara Development Plan as notified.

Hearing and Submitter Evidence/Statements

691. No evidence or statements were presented by any party concerning the Kumara Junction Development Plan.

Reporting Officer Reply Evidence

692. No matters related to the Kumara Junction Development Plan were addressed in Reply.

Hearing Panel's Evaluation

693. The Panel agree with Ms Easton's assessment of the issues raised in and accept her recommendations to retain the Kumara Junction Development Plan as notified.

Hearing Panel's Recommendation

694. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends retaining the Kumara Junction Development Plan as notified.

Paul Rogers

Hearings Panel - Chair

Date: 5 September 2025

APPENDIX 1 – RECOMMENDATIONS ON PLAN PROVISIONS

Appendix One: Residential Zones

RESZ - O1	To provide for a variety of housing forms and densities in the main towns of the West Coast/Te Tai o Poutini to enable individual residential lifestyle options while ensuring developments are serviced with all required infrastructure.
RESZ - O2	To maintain or enhance the distinctive character, amenity and heritage values of residential areas, build community resilience and protect these areas from the adverse effects of inappropriate development.
RESZ - O3	To provide for a range of non-residential activities within RESZ - Residential Zones where the effects are compatible with the residential character, scale and amenities and the cultural and historic heritage values of the area.

RESZ -P4	Enable existing non-residential activities and home occupations to continue and new non – residential activities to establish provided they ~~do not have a~~ **avoid** significant adverse effect**s** on the character and amenity of RESZ - Residential Zones, particularly in relation to scale, car parking, vehicle movements, noise, visual appearance, glare, dust and odour.
RESZ-P10 **RESZ - P16**	Ensure that developments are serviced with all required infrastructure in an effective and efficient manner, while minimising impacts on the environment. Where new infrastructure such as roads and three waters (wastewater, water supply, stormwater) is provided to serve multiple households this infrastructure should be vested in the ~~appropriate public agency~~ **district council**. Avoid reverse sensitivity effects from residential development adjacent to strategic infrastructure **and industrial zones** including: a. Hokitika, Greymouth and Westport Airports; b. The rail network; c. The arterial road and State Highway network; d. The Ports of Westport and Greymouth; e. Wastewater treatment plants; f. Landfills; g. Potable water supply plants; h. Stormwater treatment facilities; i. The National Grid.

GRZ – R1	**Residential Activities and Residential Units and Accessory Buildings** **Activity Status Permitted** Where:

1. Residential unit density is no more than:

a. **one**~~1~~ unit per 350m^2 net site area~~; or~~ **but within the Buller District there is a maximum of two residential dwellings per allotment**;

b. **one**~~1~~ unit per 300m^2 net site area where two or more adjoining sites are developed **except within the Buller District this standard does not apply**;

2. There is no more than **one**~~1~~ minor residential unit per site with a maximum size of 65m^2;

3. Maximum building height above ground level is:

a. 10m; except that

b. No building, structure or tree shall protrude into the Airport Approach Path of any airport or aerodrome identified on the planning maps and as described in Appendix Nine;

4. Buildings are setback a minimum 4.5m from road boundaries, except that a roof overhang may encroach 750mm into the setback distance;

5. Maximum site coverage is 40%;

6. A minimum of 30m^2 of outdoor living space is provided per residential unit and 12m^2 per minor residential unit which is separate to the outdoor space for the principal dwelling and excluding any parking and manoeuvring areas~~;~~ **and the outdoor living space must have a minimum dimension of 3m**;

7. No more than one heavy vehicle is stored on site;

8. All residential units and buildings used for a residential activity must be connected to the community water supply, and wastewater networks and stormwater from the site **and are managed in accordance with the relevant standards in NZS4404: 2010 Land Development and Subdivision Infrastructure** ~~used for the activity~~ **and** must not drain to any public road ~~except for secondary flow purposes~~;

9. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing.~~ This standard does not apply to~~:~~

~~a. Road boundaries;~~

~~b. Buildings on adjoining sites that have a common wall along the boundary;~~

~~c. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;~~

~~d. B~~**b**oundaries adjoining any site in a CMUZ - Commercial and Mixed Use, INZ - Industrial or RURZ - Rural Zone;

~~e. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or~~

~~f. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically;~~ and

10. Buildings are setback a minimum of 1m from all other site boundaries, except that:

a. Duplexes do not require a setback from the side boundary of the other duplex unit; and

~~b. Setbacks are not required from adjacent residential boundaries where neighbouring property owner's written approval is provided to the Council 10 working days prior to the works commencing.~~

b. **A setback of 150m is required from the site boundary of any designated wastewater treatment plant.**

Advice Notes:

1. Where a residential building or noise sensitive activity is located within:

a. 80m of a State Highway with a speed limit of 70kph or greater; or

b. 40m of a State Highway with a speed limit of less than 70kph; or

c. 40m of a Railway Line; or

d. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or

e. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.

Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply.

2. **Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council**.

Activity status where compliance not achieved: Discretionary where standards 1 to 8 are not complied with. Restricted Discretionary where standards 9 and 10 are not complied with.

GRZ – R2 **Minor Structures**

Activity Status Permitted

Where:

1. **These are existing hose drying towers with a maximum height of 15m located at the Cobden, Runanga and Hokitika Fire Stations**;

2. ~~All performance standards for Rule GRZ – R1 are complied with~~ **All other** ~~S~~structures **are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries**;

3. Masts, poles, aerials and pou whenua must not exceed 7m in height;

4. Any antenna dish must be less than 1m in diameter;

	5. Any ornamental or garden structure must not exceed 2.4 m in height; and F6 Any other structure must not exceed 10m^2 and 2m in height. **Activity status where compliance not achieved**: Controlled
GRZ – R3	No Change
GRZ – R4	**Relocated Buildings** **Activity Status Permitted** Where: 1. All performance standards for Rule GRZ - R1 are complied with; 2. Any relocated building intended for use as a dwelling must have been designed, ~~and~~ built, ~~to be~~ **and** used as a dwelling; 3. A building pre-inspection report **completed in accordance with Appendix Eleven** shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the **exterior** reinstatement works **including connections to infrastructure services and closing in and ventilation of the foundations** shall be completed within 12-month**s of the building being delivered to the site**; **and**; 4. The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site; and ~~5. All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.~~ **Activity status where compliance not achieved**: Controlled
GRZ – R5	**Home Business** **Activity Status Permitted** Where: 1. This is ancillary to a residential activity; 2. All performance standards for Rules GRZ - R1, NOISE R1-R2 and R45, LIGHT - R3 and SIGN - R10 are complied with; **3. There is no more than one full–time equivalent person engaged in the home business that resides off-site;** 4. Hours of operation are limited to:

a. 7am-7pm weekdays; and

b. 8am - 5pm weekends and public holidays;

c. Except where:

i. The entire activity is located within a building;

ii. Each person engaged in the activity outside the above hours resides permanently on site; and

iii. There are no visitors, customers or deliveries to the activity outside of the above hours

~~5. A maximum of 4 heavy vehicle movements per day, and whichever is the greater of 20 light vehicle movements per day or and 140 light vehicle movements per week;~~

5. No external storage of products except those associated with residential use shall be visible from any residential zoned property or public place; and

6. No external generation of dust, odour or smoke occurs as part of the activity.

Activity status where compliance not achieved: Discretionary

GRZ – R6 **Residential Visitor Accommodation**

Activity Status Permitted

Where:

1. The accommodation is ancillary to a residential activity;

2. All performance standards for Rules GRZ - R1, NOISE R1-R2 and R~~4~~5, LIGHT - R3 and SIGN - R10 are complied with;

3. There is a maximum of **six**~~6~~ paying guests at any one time;

4. Written notification to the District Council is required 10 working days prior to the activity commencing;

5. Records of letting activity must be kept and provided to the District Council **annually** ~~on request~~; and

6. No heavy vehicle movements are generated; and

7. In the Buller **and Westland** District**s** the accommodation is homestay accommodation with a permanent resident living on site.

Advice Notes:

1. Compliance with the Building Code is required for any use of residential property for visitor accommodation. Written notice to the relevant Council Building Compliance Team must be provided and a Building Consent may also be required.

2. ~~In the Buller and Westland Districts, w~~**W**here residential visitor accommodation has been lawfully established under the Buller, **Grey** or Westland District Plan

	provisions **and not discontinued for more than 12 months**, ~~then~~ existing use rights **may** apply. **Activity status where compliance not achieved**: Restricted Discretionary
GRZ – R7	**Community Facilities and Educational Facilities** **Activity Status Permitted** Where: 1. All performance standards for Rules GRZ - R1, NOISE R1-R2 and R4~~4~~5, LIGHT - R3 and SIGN - R10 are complied with; **and** 2. A maximum of 4 heavy vehicle movements and whichever is the greater of 20 light vehicle movements per day or 140 vehicle movements per week and **compliance is achieved with TRN – R6**; and 3. No external storage of products except those associated with residential use shall be visible from any residential zoned property or public place. **Activity status where compliance not achieved**: Restricted Discretionary
GRZ – R8	**Retirement Homes and Supported Residential Accommodation Activity Status Permitted** Where: 1. All performance standards for Rules GRZ - R1, NOISE R1-R2 and R4~~4~~5, LIGHT - R3 and SIGN - R10 are complied with; 2. There is a maximum of 10 residents; and 3. No external storage of products except those associated with residential use shall be visible from any residential zoned property or public place. **Activity status where compliance not achieved**: Restricted Discretionary
GRZ – R9	As notified
GRZ – R10	As notified
GRZ – R11	**Minor Structures not meeting Permitted Activity Standards** **Activity Status Controlled** Where: 1. The minor structure does not exceed 10m in height; and 2. **Structures are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries.**

	Matters of control are: a. Design and location of structures; and b. ~~Landscape measures.~~**Measures to mitigate landscape effects;** **Activity status where compliance not achieved:** Discretionary
GRZ – R12	**Relocated Buildings not meeting Permitted Activity Standards** **Activity Status Controlled** Where: All performance standards for Rule GRZ - R1 are complied with. **Matters of control are:** a. Design and location of structures; b. ~~Landscape measures~~ **Measures to mitigate landscape effects**; and c. Appearance of buildings. **Activity status where compliance not achieved: Discretionary**
GRZ – R13	**Buildings not meeting Rule GRZ-R1** **Activity Status Restricted Discretionary** Where: 1. The building projects into the recession plane as defined in Appendix Two; or 2. The building is set back less than 1m from internal boundaries; and 3. All other performance standards for Rule GRZ - R1 are complied with. **Discretion is restricted to:** a. Design and location of buildings; b. Design and location of parking and access; ~~and~~ c. ~~Landscape measures.~~**Measures to mitigate landscape effects;** **d. Shading and loss of sunlight to adjoining sites; and** **e. Loss of privacy to adjoining sites.** **Activity status where compliance not achieved:** Discretionary
GRZ – R14	**Residential Visitor Accommodation not meeting Rule GRZ - R6 Activity Status Restricted Discretionary** Where: 1. This is ancillary to a residential activity;

	2. No heavy vehicle movements are generated; and 3. All performance standards for Rules GRZ - R1, NOISE R1-R2 and R4**5**, LIGHT - R3 and SIGN - R10 are complied with. **Discretion is restricted to:** a. Design and location of buildings; b. Design and location of parking and access; c. ~~Landscape measures.~~**Measures to mitigate landscape effects;** d. Hours of operation; and e. Acoustic and noise insulation requirements. **Activity status where compliance not achieved:** Discretionary
GRZ – R15	**Community Facilities and Educational Facilities not meeting Rule GRZ - R7, Retirement Homes and Supported Residential Accommodation not meeting Rule GRZ - R8 and Retirement Villages** **Activity Status Restricted Discretionary Discretion is restricted to:** a. Design and location of buildings; b. Design and location of parking and access; c. ~~Landscape measures.~~**Measures to mitigate landscape effects**; d. Hours of operation; e. Water supply, wastewater and stormwater management; ~~and~~ f. Acoustic and noise insulation requirements; **g. Noise management;** **h. Traffic generation;** **i. Loss of privacy to adjoining sites; and** **j. Character and amenity of the surrounding area.** **Notification**: Applications for community facilities will always be notified to adjacent neighbours and may be publicly notified. **Activity status where compliance not achieved:** N/A
GRZ – R16	**Development of Medium Density Housing**

	Activity Status Restricted Discretionary Where: 1. These do not meet the GRZ - 1 Permitted Activity Standards in relation to any of density, height, setbacks, recession planes and building coverage; 2. All other performance standards for Rules GRZ - R1 are complied with; 3. The minimum density is 150m2 net site area; 4. The maximum height is 12.5m; 5. Within 10 metres of a site boundary that is zoned General Residential the maximum height shall be 10m; and 6. Maximum building coverage is 50%. Discretion is restricted to: a. Number of units; b. Provision of infrastructure to service the development; c. Design and location of parking and access; d. Design and location of buildings; e. Compliance with the Medium Density Housing Design guidelines in Appendix Three; f. ~~Landscape measures~~ **Measures to mitigate landscape effects**; and g. Acoustic and noise insulation requirements
GRZ – R17	Papakāinga Developments not meeting Permitted Activity Standards Activity Status Restricted Discretionary Where: 1. The minimum residential unit density is 150m2 net site area; 2. The maximum height is 12.5m; 3. Within 10 metres of a site boundary that is zoned General Residential the maximum height shall be 10m; and 4. Maximum building coverage is 50%. **Discretion is restricted to:** a. Number of units; b. Provision of infrastructure to service the development; c. Design and location of parking and access; d. Design and location of buildings; e. Where relevant compliance with the Medium Density Housing Design guidelines in Appendix Three; f. ~~Landscape measures~~ **Measures to mitigate landscape effects**; and g. Acoustic and noise insulation requirements
GRZ – R18	**Commercial Visitor Accommodation within the Hokitika Visitor Accommodation Area not meeting Permitted Activity Standards** Activity Status Restricted Discretionary

	1. The maximum height is 12.5m; 2. Within 10 metres of a site boundary that is zoned General Residential the maximum height shall be 10m; and 3. Maximum building coverage is 50%. Discretion is restricted to: a. Number of units; b. Provision of infrastructure to service the development; c. Design and location of parking and access; d. Design and location of buildings; e. ~~Landscape measures~~ **Measures to mitigate landscape effects**; and f. Acoustic and noise insulation requirements
GRZ – R18A	**Fences, Walls and Retaining Structures not meeting Permitted Activity Standards** **Activity Status Restricted Discretionary** **Discretion is restricted to:** **a. Design and location of structures;** **b. Height of structures; and** **c. Shading and dominance effects on adjoining sites.**
GRZ – R19	**Residential Activity, Residential Units, Papakāinga developments, ~~Fences, Walls and~~ Minor Structures and Relocated Buildings not meeting Permitted, Controlled or Restricted Discretionary Activity Standards.** **Activity Status Discretionary** Where: 1. All performance standards for Rules NOISE R1-R2 and R4**5** and LIGHT - R3 are complied with. **Activity status where compliance not achieved:** Non-complying
GRZ – R20	**Home Business not meeting Permitted Activity Standards Activity Status Discretionary** Where: 1. All performance standards for Rules NOISE R1-R2 and R4**5** and LIGHT - R3 are complied with. **Activity status where compliance not achieved:** Non-complying
GRZ – R21	As notified

GRZ – R22	**Commercial Activities and Emergency Service Activities Activity Status Discretionary** Where: 1. This is not a Home Business or Visitor Accommodation; 2. All performance standards for Rules NOISE R1-R2 and R4**5** and LIGHT - R3 are complied with; 3. Commercial Activities Hours of Operation are limited to 7am to 7pm weekdays and 8am to 5pm weekends and public holidays; and 4. No external generation of dust, odour or smoke occurs as part of the activity. **Activity status where compliance not achieved:** Non-complying Refer Home Business and Visitor Accommodation Rules for these activities
GRZ – R23	As notified
GRZ – R24	**Any Activity not provided for by another Rule in the zone** **Activity Status ~~Non-complying~~ Discretionary** **Activity status where compliance not achieved**: N/A
Appendix Eleven	**Requirements for a Relocated Building Pre-Inspection Report** **This report must be provided prior to the building being relocated to its new site. The information required in the pre-inspection report is as follows:** • **Proposed new site location** • **Date of report** • **Type of building** • **Date of construction** • **Building description – number of stories, ground floor area, general construction materials for roof, walls, floor, any additional features.** • **Site address where the building was inspected** • **Date when building inspected** • **Name of inspector and qualifications** • **Proposed use of the building** • **Previous use of the building** • **Description of areas accessed (ie interior/exterior)** • **Condition assessment of the following external elements: roof, spouting and downpipes, wall cladding, foundation cladding, window and door joinery** • **Any health and safety matters that need to be considered** • **Estimate of costs of external reinstatement including repair of transit damage, repair of any broken or damaged external elements, clearning and painting of exterior elements.**

LLRZ – R1	**Residential Activities and Residential Units and Accessory Buildings**

Activity Status Permitted

Where:

1. There is no more than **one**~~1~~unit per 1000m^2 net site area;

2. The maximum height of a building above ground level is 10m;

3. There is no more than **one**~~1~~ minor residential unit per 1000m^2 net site area with a maximum size of 65m^2;

4. Buildings are setback a minimum 10m from road boundaries, except that a roof overhang may encroach 750mm;

5. Maximum site coverage is 40% or 500m^2 whichever is the lesser;

6. Stormwater is managed on site with any off-site discharge ~~is~~ managed in accordance with NZS4404:2010 Land Development and Subdivision Infrastructure and must not drain to any public road ~~except for secondary flow purposes~~;

7. All residential units and buildings used for a residential activity must be connected to the community water supply and wastewater networks;

8. No more than two heavy vehicles are stored on site;

9. Buildings are setback a minimum of 4m from all other site boundaries except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing;

10. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing.~~ This standard does not apply to~~:~~

~~a. Road boundaries;~~

~~b. Buildings on adjoining sites that have a common wall along the boundary;~~

~~c. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;~~

~~d.~~ Boundaries adjoining any site in a CMUZ - Commercial and Mixed Use, INZ - Industrial or RURZ - Rural Zone~~;~~.

~~e. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or~~

~~f. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically.~~

Advice Note:

1. Where a residential building or noise sensitive activity is located within:

vi. 80m of a State Highway with a speed limit of 70kph or greater; or
vii. 40m of a State Highway with a speed limit of less than 70kph; or

viii. 40m of a Railway Line; or
ix. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or
x. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.

Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply.

Activity status where compliance not achieved: Discretionary

LLRZ – R2 **Minor Structures**

Activity Status Permitted

Where:

1. ~~All performance standards for Rule LLRZ - R1 are complied with~~ **Structures are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries**;

2. Masts, poles, aerials and pou whenua must not exceed 7m in height;

3. Any antenna dish must be less than 1m in diameter;

4. Any ornamental or garden structure must not exceed 2.4 m in height; and

5. Any other structure must not exceed $10m^2$ and 2m in height.

Activity status where compliance not achieved: Controlled

LLRZ – R3 No Change

LLRZ – R4 **Relocated Buildings**

Activity Status Permitted

Where:

1. All performance standards for Rule LLRZ - R1 are complied with;

2. Any relocated building intended for use as a dwelling must have been designed**,** ~~and~~ built ~~to be~~ **and** used as a dwelling;

3. A building pre-inspection report **completed in accordance with Appendix Eleven** shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the **exterior** reinstatement works **including connections to infrastructure services and closing in and ventilation of the foundations** shall be completed within 12-month**s of the building being delivered to the site**; **and**;

4. The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site; and

~~5. All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.~~

Activity status where compliance not achieved: Controlled

LLRZ – R5 **Home Business**

Activity Status Permitted

Where:

1. This is ancillary to a residential activity;

2. All performance standards for Rules LLRZ - R1, NOISE R1-R2 and R4<u>5</u> and LIGHT - R3 are complied with;

3. Hours of operation are limited to:

a. 7am-10pm weekdays; and

b. 8am - 8pm weekends and public holidays;

c. Except where:

i. The entire activity is located within a building;

ii. Each person engaged in the activity outside the above hours resides permanently on site; and

iii. There are no visitors, customers or deliveries to the activity outside of the above hours.

4. **<u>There is no more than one full–time equivalent person engaged in the home business that resides off-site</u>.**

~~4. A maximum of 4 heavy vehicle movements per day, and whichever is the greater of 30 light vehicle movements per day or and 210 light vehicle movements per week;~~

5. No external storage of products except those associated with residential use shall be visible from any residential zoned property or public place; and

6. No external generation of dust, odour or smoke occurs as part of the activity.

Activity status where compliance not achieved: Discretionary

LLRZ – R6 **Residential Visitor Accommodation**

Activity Status Permitted

Where:

1. This is ancillary to a residential activity;

2. All performance standards for Rules LLRZ - R1, NOISE R1-R2 and R4~~4~~5 and LIGHT - R3 and SIGN - R10 are complied with;

3. There is a maximum of **six**~~6~~ paying guests at any one time;

4. Written notification to the District Council is required 10 working days prior to the activity commencing;

5. Records of letting activity must be kept and provided to the Council **annually** ~~on request~~; and

6. No heavy vehicle movements are generated.

Advice Notes:

1. Compliance with the Building Code is required for any use of residential property for visitor accommodation. Written notice to the relevant Council Building Compliance Team must be provided and a Building Consent may also be required.

2. Where residential visitor accommodation has been lawfully established under the Buller, Grey or Westland District Plan provisions and has not been discontinued for more than 12 months, then existing use rights may apply.

Activity status where compliance not achieved: Restricted Discretionary

LLRZ – R7 **Community Facilities and Educational Facilities**

Activity Status Permitted

Where:

1. All performance standards for Rules LLRZ - R1, NOISE R1-R2 and R4**5** and LIGHT - R3 and SIGN - R10 are complied with; **and**

2. A maximum of 4 heavy vehicle movements and whichever is the greater of 30 light vehicle movements per day or 210 vehicle movements per week **and compliance is achieved with TRN – R6**; and

3. No external storage of products except those associated with residential use shall be visible from any residential zoned property or public place.

Activity status where compliance not achieved: Restricted Discretionary

LLRZ – R8 **Retirement Homes and Supported Residential Accommodation Activity Status Permitted**

Where:

1. All performance standards for Rules LLRZ - R1, NOISE R1-R2 and R4**5** and LIGHT - R3 and SIGN - R10 are complied with;

2. The maximum number of residents is 10; and

	3. No external storage of products except those associated with residential use shall be visible from any residential zoned property or public place. **Activity status where compliance not achieved**: Restricted Discretionary
LLRZ – R9	As notified
LLRZ – R10	**Minor Structures not meeting Permitted Activity Standards Activity Status Controlled** Where: 1. The minor structure does not exceed 10m in height; and 2. ~~All performance standards for Rule LLRZ - R1 are complied with~~ **Structures are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries.** **Matters of control are:** a. Design and location of structures; and b. ~~Landscape measures.~~**Measures to mitigate landscape effects**. **Activity status where compliance not achieved:** Discretionary
LLRZ – R11	**Relocated Buildings not meeting Permitted Activity Standards** **Activity Status Controlled** Where: 1. All performance standards for Rule LLRZ - R1 are complied with. **Matters of control are**: a. Design and location of structures; b. ~~Landscape measures~~ **Measures to mitigate landscape effects**; and c. Appearance of buildings.
LLRZ – R12	**Community Facilities and Educational Facilities not meeting Rule LLRZ -R7, Supported Residential Accommodation and Retirement Homes not meeting Rule LLRZ - R8 and Retirement Villages** **Activity Status Restricted Discretionary** Discretion is restricted to: a. Design and location of buildings; b. Design and location of parking and access; c. ~~Landscape treatment~~ **Measures to mitigate landscape effects**; d. Water supply, wastewater and stormwater requirements;

e. Hours of operation; and
f. Acoustic and noise insulation requirements.

Notification:

Applications for community facilities will always be notified to adjacent neighbours and may be publicly notified.

LLRZ – R13 **Residential Visitor Accommodation not meeting Permitted Activity Standards**

Activity Status Restricted Discretionary

Where:

1. This is ancillary to a residential activity;

2. No heavy vehicle movements are generated; and

3. All performance standards for Rules LLRZ - R1, NOISE R1-R2 and R4**5** and LIGHT - R3 and SIGN - R10 are complied with.

Discretion is restricted to:

a. Design and location of buildings;

b. Design and location of parking and access;

c. ~~Landscape measures.~~**Measures to mitigate landscape effects;**

d. Water supply, wastewater and stormwater requirements;

e. Hours of operation; and

f. Acoustic and noise insulation requirements.

Activity status where compliance not achieved: Discretionary

LLRZ – R14 **Papakainga Developments not meeting Permitted Activity Standards Activity Status Restricted Discretionary**

Where:

1. The minimum residential unit density is 200m^2 net site area;

2. The maximum height is 12.5m;

3. Within 10 metres of a site boundary that is zoned Large Lot Residential the maximum height shall be 10m;

4. All performance standards for Rules NOISE R1-R2 and R4**5** and LIGHT - R3 are complied with; and

5. Maximum building coverage is 50%.

Discretion is restricted to:

a. Design and location of buildings;

	b. Design and location of parking and access; c. ~~Landscape measures.~~**Measures to mitigate landscape effects;** d. Water supply, wastewater and stormwater requirements; e. Where relevant compliance with the Medium Density Housing Design guidelines in Appendix Three; ~~f. Hours of operation;~~ and f. Acoustic and noise insulation requirements. **Activity status where compliance not achieved:** Discretionary
LLRZ - R14A	**Fences, Walls and Retaining Structures not meeting Permitted Activity Standards** **Activity Status Restricted Discretionary** **Discretion is restricted to:** **a. Design and location of structures;** **b. Height of structures; and** **c. Shading and dominance effects on adjoining sites.**
LLRZ – R15	**Residential Activities, Residential Units, Papakāinga Developments~~, Fences, Walls and Retaining Walls~~ and Minor Structures not meeting Permitted, Controlled or Restricted Discretionary Standards** **Activity Status Discretionary** Where: 1. All performance standards for Rules NOISE R1-R2 and R4**5** and LIGHT - R3 are complied with. **Activity status where compliance not achieved:** Non-complying
LLRZ – R16	As notified
LLRZ – R17	**Residential Visitor Accommodation not meeting Restricted Discretionary Activity Standards and Commercial Visitor Accommodation** **Activity Status Discretionary** Where: 1. All performance standards for Rules NOISE R1-R2 and R4**5** and LIGHT - R3 are complied with.

	Activity status where compliance not achieved: Non-complying
LLRZ – R18	As notified
LLRZ – R19	As notified
LLRZ – R20	As notified
LLRZ – R21	As notified
LLRZ – R22	**Any Activity not provided for by another Rule in the zone** **Activity Status ~~Non-complying~~ Discretionary**
	Activity status where compliance not achieved: N/A

MRZ-R1	**Residential Activities and Residential Units and Accessory Buildings** **Activity Status Permitted** Where: 1. Residential unit density is no more than **one**~~1~~ unit per 300m^2 net site area; 2. The maximum building height above ground level is 10m; 3. Buildings are setback a minimum 4.5m from road boundaries, except that a roof overhang may encroach 750mm; 4. Maximum site coverage is 40%; 5. A minimum of 30m^2 of outdoor living space is provided per residential unit excluding any parking and manoeuvring areas~~;~~ **and the outdoor living space must have a minimum dimension of 3m**; 6. No heavy vehicles are stored on site; 7. All residential units and buildings used for a residential activity must be connected to the community water supply, and wastewater networks and stormwater from the site and are **managed in accordance with the relevant standards in NZS4404:2010 Land Development and Subdivision Infrastructure** ~~used for the activity~~ and must not drain to any public road ~~except for secondary flow purposes~~; 8. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing.~~ This standard does not apply to~~:~~ ~~a. Road boundaries;~~ ~~b. Buildings on adjoining sites that have a common wall along the boundary;~~ ~~c. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;~~ ~~d. B~~**b**oundaries adjoining any site in a CMUZ - Commercial and Mixed Use, INZ - Industrial or RURZ - Rural Zone;

	~~e. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or~~ ~~f. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically;~~ and 9. Buildings are setback a minimum of 1.5m from the railway corridor and 1m from all other site boundaries, except that: a. Duplexes do not require a setback from the side boundary of the other duplex unit; and ~~b. Setbacks are not required from adjacent residential boundaries where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing.~~ **Advice Notes:** 1. Where a residential building or noise sensitive activity is located within: i. 80m of a State Highway with a speed limit of 70kph or greater; or ii. 40m of a State Highway with a speed limit of less than 70kph; or iii. 40m of a Railway Line; or iv. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or v. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome. Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply. 2. **Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.** **Activity status where compliance not achieved**: Controlled where this is for Medium Density Housing and standards 1 - 4 are not complied with. Otherwise: Discretionary
MRZ-R2	**Minor Structures** **Activity Status Permitted** Where: 1. ~~All performance standards for Rule GRZ - R1 are complied with~~ **Structures are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries;** 2. Masts, poles, aerials and pou whenua must not exceed 7m in height; 3. Any antenna dish must be less than 1m in diameter; 4. Any ornamental or garden structure must not exceed 2.4 m in height; and

	5. Any other structure must not exceed 10m^2 and 2m in height. **Activity status where compliance not achieved**: Controlled
MRZ-R3	As notified
MRZ-R4	**Relocated Buildings** **Activity Status Permitted** Where: 1. All performance standards for Rule MRZ - R1 are complied with; 2. Any relocated building intended for use as a dwelling must have been designed, ~~and~~ built**,** ~~to be~~ and **used** as a dwelling; 3. A building pre-inspection report **completed in accordance with Appendix Eleven** shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the **exterior** reinstatement works **including connections to infrastructure services and closing in and ventilation of the foundations** shall be completed within 12-month**s of the building being delivered to the site**; **and**; 4. The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site; and ~~5. All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.~~ **Activity status where compliance not achieved**: Controlled
MRZ-R5	**Home Business** **Activity Status Permitted** Where: 1. This is ancillary to a residential activity; 2. All performance standards for Rules MRZ - R1, NOISE R1-R2 and R~~4~~**5**, LIGHT - R3 and SIGN - R10 are complied with; 3. Hours of operation are limited to: a. 7am-7pm weekdays; and b. 8am - 5pm weekends and public holidays; c. Except where:

i. The entire activity is located within a building;

ii. Each person engaged in the activity outside the above hours resides permanently on site; and

iii. There are no visitors, customers or deliveries to the activity outside of the above hours;

4. **There is no more than one full–time equivalent person engaged in the home business that resides off-site**.

~~4. A maximum of 4 heavy vehicle movements per day and whichever is the greater of 20 light vehicle movements per day or and 140 light vehicle movements per week;~~

5. No external storage of products except those associated with residential use shall be visible from any residential zoned property or public place; and

6. No external generation of dust, odour or smoke occurs as part of the activity.

Activity status where compliance not achieved: Discretionary

MRZ-R6 **Residential Visitor Accommodation**

Activity Status Permitted

Where:

1. This is ancillary to a residential activity;

2. All performance standards for Rules MRZ - R1, NOISE R1-R2 and R~~4~~**5**, LIGHT - R3 and SIGN - R10 are complied with;

3. There is a maximum of **six**~~6~~ paying guests at any one time;

4. Written notification to the District Council is required 10 working days prior to the activity commencing;

5. Records of letting activity must be kept and provided to the Council on request;

6. No heavy vehicle movements are generated; and

7. In the Buller **and Westland** District**s** the accommodation is homestay accommodation with a permanent resident living on site.

Advice Notes:

1. Compliance with the Building Code is required for any use of residential property for visitor accommodation. Written notice to the relevant Council Building Compliance Team must be provided and a Building Consent may also be required.

2. **Where residential visitor accommodation has been lawfully established under the Buller, Grey or Westland District Plan provisions and not discontinued for more than 12 months, then existing use rights may apply**.

	Activity status where compliance not achieved: Restricted Discretionary
MRZ-R7	**Community Facilities and Educational Facilities** **Activity Status Permitted** Where: 1. All performance standards for Rules MRZ - R1, NOISE R1-R2 and R4**5**, LIGHT - R3 and SIGN - R10 are complied with; 2. A maximum of 4 heavy vehicle movements and whichever is the greater of 20 light vehicle movements per day or 140 vehicle movements per week **and compliance is achieved with TRN – R6**;and 3. Any buildings must be connected to the community water supply and wastewater networks and stormwater from the site used for the activity from the site and are **managed in accordance with the relevant standards in NZS4404:2010 Land Development and Subdivision Infrastructure** ~~used for the activity~~ and must not drain to any public road ~~except for secondary flow purposes~~; and 4. No external storage of products except those associated with residential use shall be visible from any residential zoned property or public place. **Activity status where compliance not achieved**: Restricted Discretionary
MRZ-R8	**Retirement Homes and Supported Residential Accommodation Activity Status Permitted** Where: 1. All performance standards for Rules MRZ - R1, NOISE R1-R2 and R4**5**, LIGHT - R3 and SIGN - R10 are complied with; 2. There are a maximum of **six**~~6~~ residents living on site; and 3. No external storage of products except those associated with residential use shall be visible from any residential zoned property or public place. **Activity status where compliance not achieved**: Restricted Discretionary
MRZ-R9	**Minor Structures not meeting Rule MRZ - R2** **Activity Status Controlled** Where: 1. The minor structure does not exceed 10m in height; and 2. ~~All performance standards for Rule GRZ - R1 are complied with~~ **Structures are set back a minimum of 4.5m from the road boundary and 1m from internal boundaries**.

Matters of control are:

1. Design and location of structures; and

2. ~~Landscape measures.~~**Measures to mitigate landscape effects**.

Activity status where compliance not achieved: Discretionary

MRZ-R10 Relocated Buildings not meeting Rule MRZ - R4

Activity Status Controlled

Where:

1. All performance standards for Rule MRZ - R1 are complied with.
2.

Matters of control are:

a. Design and location of structures;
b. ~~Landscape measures~~ **Measures to mitigate landscape effects**;
c. Connections to water supply, wastewater and stormwater; and
d. Appearance of buildings.

Activity status where compliance not achieved: Discretionary

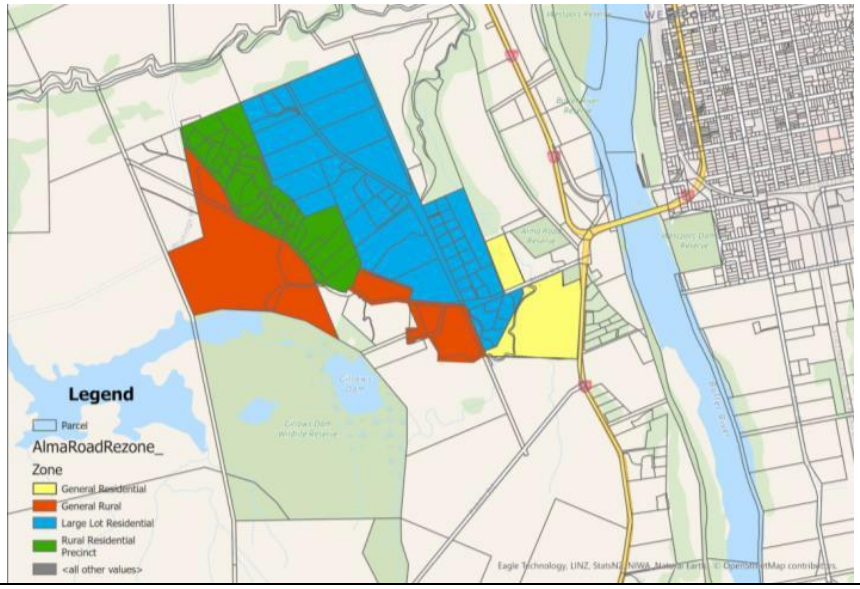
MRZ-R11 Development of Medium Density Developments

Activity Status Controlled

Where:

1. These do not meet the MRZ - 1 performance standards in relation to any of density, height, setbacks, recession planes and building coverage;
2. The maximum height is 12.5m;
3. Residential unit density is no more than 1 unit per 200m^2 net site area;
4. Within 10 metres of a site boundary that is zoned General Residential the maximum height shall be 10m; and
5. Maximum building coverage is 50%.

Matters of control are:

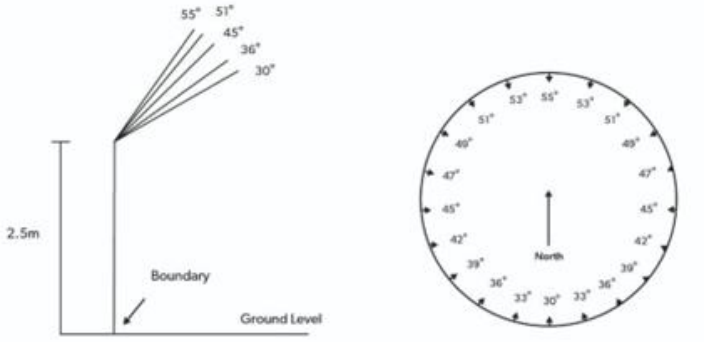


a. Provision of infrastructure to service the development;
b. Design and location of parking and access;
c. Design and location of buildings and compliance with the Medium Density Housing Design guidelines in Appendix Three; and
d. ~~Landscape measures~~ **Measures to mitigate landscape effects**.

	Activity status where compliance not achieved: Restricted Discretionary
MRZ-R12	**Community Facilities and Educational Facilities not meeting Rule MRZ - R7, Supported Residential Accommodation and Retirement Homes not meeting Rule MRZ - R8 and Retirement Villages** **Activity Status Restricted Discretionary** **Discretion is restricted to:** a. Design and location of buildings; b. Design and location of parking and access; c. ~~Landscape measures.~~**Measures to mitigate landscape effects**; d. Hours of operation; ~~and~~ e. Acoustic and noise insulation requirements; **and** **f. Provision of infrastructure to service the development.** **Notification**: Applications for community facilities will always be notified to adjacent neighbours and may be publicly notified. **Activity status where compliance not achieved:** N/A
MRZ-R13	**Community Facilities and Educational Facilities not meeting Rule MRZ - R7, Supported Residential Accommodation and Retirement Homes not meeting Rule MRZ - R8 and Retirement Villages** **Activity Status Restricted Discretionary** **Discretion is restricted to:** Design and location of buildings; a. Design and location of parking and access; b. ~~Landscape measures.~~**Measures to mitigate landscape effects**; c. Hours of operation; ~~and~~ d. Acoustic and noise insulation requirements; **and** **e. Provision of infrastructure to service the development.**
MRZ-R14	**Residential Visitor Accommodation not meeting Rule MRZ - R6** **Activity Status Restricted Discretionary** Where:

	a. This is ancillary to a residential activity; b. No heavy vehicle movements are generated; and c. All performance standards for Rules MRZ - R1, NOISE R1-R2 and R4**5**, LIGHT - R3 and SIGN - R10 are complied with. **Discretion is restricted to:** 1. Design and location of buildings; 2. Design and location of parking and access; 3. ~~Landscape measures.~~**Measures to mitigate landscape effects;** 4. Hours of operation; and 5. Acoustic and noise insulation requirements; **and** **6. Provision of infrastructure to service the development.** **Activity status where compliance not achieved:** Discretionary
MRZ-R14A	**Fences, Walls and Retaining Structures not meeting Permitted Activity Standards** **Activity Status Restricted Discretionary** **Discretion is restricted to:** **a. Design and location of structures;** **b. Height of structures; and** **c. Shading and dominance effects on adjoining sites.**
MRZ-R15	**Residential Activities, Residential Units~~, Fences, Walls and Retaining Walls, Relocated Buildings~~ and Minor Structures not meeting Permitted, Controlled or Restricted Discretionary Standards.** **Activity Status Discretionary** Where: a. All performance standards for Rules NOISE R1-R2 and R4**5** and LIGHT - R3 are complied with. **Activity status where compliance not achieved:** Non-complying
MRZ-R16	**Home Business not meeting Rule MRZ - R5** **Activity Status Discretionary** Where:

	a. This is ancillary to a Residential Activity; and b. All performance standards for Rules NOISE R1-R2 and R4**5** and LIGHT - R3 are complied with. **Activity status where compliance not achieved:** Non-complying
MRZ-R17	As notified
MRZ-R18	As notified
MRZ-R19	As notified
MRZ-R20	As notified
MRZ-R21	**Any Activity not provided for by another Rule in the zone** **Activity Status ~~Non-complying~~ Discretionary** **Activity status where compliance not achieved**: N/A



Zoning Maps

Provision	Recommended Amendments to Planning Maps
Alma Road Terrace Area	Amend the Alma Road Terrace Area in accordance with the Map Below 

Stafford Street - Westport	Amend Stafford Street (red outline) beside the O'Connor Home as General Residential Zone 
Neighbourhood Centre Zones - Reefton	Amend Neighbourhood Centre Zones (red dots) as General Residential Zone 
Sturge Street – Cobden - Greymouth	Amend General Residential Zone (red outline) to General Rural Zone 

Kaiata Park - Greymouth	Amend Kaiata Park in accordance with the Kaiata Park ODP below 
Land Adjacent to Silver Fern Farms Site	Amend Land (shown with red dots) adjacent to Silver Fern Farms site to Rural Lifestyle Zone 
Medium Density Residential Zone Revell Street, Hokitika	Amend Medium Density Residential Zone at Revell Street to General Residential Zone

Provision	Recommendation
Appendix Two: Recession Planes	**Appendix Two: Recession Planes**  **Diagram A** **Diagram B** Place Diagram B on the inside of the boundary. The angle tangential to the boundary is the angle of the recession plane. Note North is True North. The recession plane angle shall be applied as per Diagram A. ***The level of site boundaries shall be measured from filled ground level except where there is in existing building at a lower level on the other side of a common boundary, where that lower level shall be adopted. For the purpose of measuring recession planes only internal boundaries shall be taken as site boundaries These standards do not apply to:*** ***1. Road boundaries;*** ***2. Buildings on adjoining sites that have a common wall along the boundary;***

	3. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard; ***4. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or*** ***5. Solar panels and solar water heaters, provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically;***

APPENDICES

Appendix 1 – Recommendations

PART A – INTRODUCTORY MATTERS

1. PRELIMINARY MATTERS

1.1. Introduction

1. Matters to do with our appointment and other preliminary matters applicable to all Hearing Panel's recommendations on the Proposed Te Tai o Poutini Plan (**pTTPP** or 'the Plan') are recorded and addressed in Recommendation Report 1.

2. This Recommendation Report relates to the Settlement Zone - Ngā Takiwa Nōhanga Pōnaho of the pTTPP. It contains the Hearing Panel's evaluations and recommendations to the TTPP Committee on the submissions and further submissions received on the Settlement Zone provisions and planning maps.

3. The Section 32 Report[1] provided an evaluation of the Settlement Zone and how it was managed through the combined Plan, including the regulatory framework, resource management issues, the evidence base, consultation, information and analysis undertaken and evaluation of the options.

4. The Section 42A Officer's Report[2] ('s42A Report') for the Settlement Zones was authored by Ms Lois Easton, a planner with Kererū Consultants as the Reporting Officer, and was circulated before the hearing. The Reports provided an analysis of submissions and further submissions received and made recommendations on changes to the notified plan provisions.

5. Ms Easton subsequently provided an Addendum s42A Report[3] covering the rural and settlement zone topics, prepared to address submission points which were omitted, and updated commentary and recommendations on the specific submission of Russell Robinson concerning rezoning at Moana as a result of further technical information received from the Grey District Council.

6. The Settlement Zone (SETZ) s42A Report assessed a total of 378 submission points and 29 further submission points on the SETZ and the planning maps. It provided summaries of all submissions and further submissions received, as well as the relief sought; an analysis of the proposed changes to the provisions; and recommendations on changes to the plan provisions.

7. The matters raised by submitters were generally grouped in the s42A Report in relation to each of the key issues. The Panel notes that this format was slightly different from other s42A reports as it deals with Rules as a Whole prior to the Precinct Policies, as follows:

    - Overview and Rules as a whole;
    - Precinct Policies;
    - Rules SETZ-R1 and SETZ-R2;
    - Coastal Settlement Precinct rules – SETZ-R3, SETZ-R16 and SETZ-R20;
    - Rules SETZ-R4 – SETZ-R14;
    - Rules SETZ-R17 – SETZ-R28;

[1] Te Tai o Poutini Plan – Section 32 Evaluation Report Twelve

[2] Te Tai o Poutini Plan Section 42A Officer's Report Settlement Zone– Ngā Takiwa Nōhanga Pōnaho

[3] Addendum to Rural Zones and Settlement Zones s42A Reports and Appendices

- Subdivision Standard SUB1 in relation to the Settlement Zone; and
- Planning Maps and rezonings

8. In this recommendation report the Panel have moved the Rules as a Whole section to follow the Precinct Policies section.

9. An s32AA Evaluation for the changes was provided at the end of the s42A Report.

1.2. Recommendation Report

10. This Recommendation Report follows the same structure as the s42A Report. It provides a brief summary of the issues raised in submissions and further submissions, the s42A Report analysis and recommendations, submitter evidence and the Reporting Officer's reply evidence, before providing our evaluation and recommendation.

11. This Recommendation Report should be read in conjunction with the s42A Report and the tracked change version of the notified Plan provisions (attached as Appendix 1 to this Report). The tracked change version of the TTPP provisions forms an integral part of the decision, recording all recommended amendments (additions and deletions) to the notified TTPP provisions made by the Panel. The tracked change version of the TTPP shows the Panel's recommended changes to the notified provisions in **bold and underlining** indicating additions and ~~strikethrough~~ indicating deletions. If there is any discrepancy between this Recommendation Report and Appendix 1, the tracked change version of the Plan provisions that form part of the Panel recommendations in this Recommendations Report must prevail.

12. This Recommendation Report contains the reasons for the Panel's recommendations. These comprise either adoption of the reasoning and recommendations of the original section 42A Reports or the Reporting Officer's reply evidence (Councils' right of reply post hearing adjournment), or a specific reasoning by the Panel.

13. Where the Panel recommends the TTPP provisions should remain as notified, it is because:

    (a) The Panel has adopted the reasoning and recommendation of the s42A Report or addendum to retain the provision as notified; or

    (b) The Panel has adopted the reasoning and recommendation to retain the provision as notified as recommended in the Reporting Officer's reply evidence; or

    (c) The Panel has recommended to retain the provision as notified for reasons set out in this Recommendation Report.

14. Where there is a recommended change to a notified provision of the TTPP, it is because:

    (a) The Panel has recommended amendment to a provision for reasons set out in this Recommendation Report in response to a submission point, which the s42A Report did not recommend; or

    (b) The Panel adopted the reasoning and recommendation of the s42A Report to change the provision to that recommended in the original s42A Report; or

    (c) The Panel has adopted the reasoning and recommendation to that recommended in the Reporting Officer's reply evidence; or

(d) A consequential change has been necessary following on from a decision in either (a), (b) or (c).

15. Where there may be a different recommendation between the s42A Report and the Reporting Officer's addendum or reply evidence (i.e., the recommendation by the Reporting Officer has changed as a result of hearing the evidence of submitters), unless the Panel decision specifically adopts the original s42A Report's reasoning and recommendations, the reasoning and recommendations in the (later) reply to evidence has been adopted and it must be taken to prevail.

16. If there are circumstances where the Panel consider that alternative relief is more appropriate than that requested in submissions and further submissions to give effect to the RMA, NZCPS, national policy statements and/or RPS, but are still within the scope of the relief sought, the relevant recommendation clearly sets out the nature of the change and the reason for the change. This is recorded in this Recommendation Report.

17. If any changes are recommended to the provisions (since the Section 32A Report was completed), a further evaluation, if required pursuant to section 32AA of the RMA, has been undertaken. Any such circumstances are referred to in this Recommendation Report in sufficient detail to demonstrate a further evaluation was undertaken.

18. Clause 16(2) of the First Schedule of the RMA enables the Panel to recommend amendments to alter information, where such an alteration is of minor effect, or may correct any minor errors. In the Panel's recommendations below each section considered in Part C of this Report and in the tracked change version of the notified Plan provisions (Appendix 1 of this Report) records any such minor amendments.

1.3. Terminology in this Report

19. Throughout this Report, the following abbreviations will be used:

Department of Corrections	Ara Poutama Aotearoa, Department of Corrections
Director General	Director General of Conservation
BDC	Buller District Council
BCG	Buller Conservation Group
Councils	Buller District Council, Grey District Council, and Westland District Council
FENZ	Fire and Emergency New Zealand
Foodstuffs	Foodstuffs (South Island) Properties Limited
Forest & Bird	Royal Forest & Bird Protection Society of NZ Inc
GDC	Grey District Council
GIZ	General Industrial Zone

HortNZ	Horticulture New Zealand
KiwiRail	KiwiRail Holdings Limited
MOE	Ministry of Education
Ngāi Tahu	Te Rūnanga o Ngāi Tahu, Te Runanga o Ngāti Waewae, Te Rūnanga o Makaawhio
NZAAA	New Zealand Agricultural Aviation Association
NPSHPL	National Policy Statement for Highly Productive Land
NPSFM	National Policy Statement for Freshwater Management 2020
NPSUD	National Policy Statement on Urban Development 2020
pTTPP	Proposed Te Tai Poutini Plan
RNZ	Radio New Zealand
RMA or the Act	Resource Management Act 1991
RPS	West Coast Regional Policy Statement
SASM	Sites and Areas of Significance to Māori
SFF	Silver Fern Farms Limited
Waka Kotahi	NZ Transport Agency Waka Kotahi
WCRC	West Coast Regional Council
WDC	Westland District Council

1.4. Hearing Arrangements

20. The hearing was held at two venues, the first being the NBS Theatre in Westport on the 29 & 30 July 2024 and the second being the West Coast Regional Council Building on the 1 & 2 August 2024. Some submitters appeared by internet connection.

21. At the hearing, Ms Easton tabled a Planning Summary Statement to her s42A Report and Addendum Report.

1.5. Appearances

22. The following submitters appeared at the hearing:

Mr Vance Boyd for himself

Hadleigh Pedler, Steve White and Mark Bucham for Radio New Zealand

Mr Frank O'Toole for himself and **Ms Anna Bensemann** for Mr Frank O'Toole

Mr Philippe Dumout, Mr Andrei Cotiga, Mr Jade McFarlane, Ms Claire McKeever, Mr Garry Howard, Ms Holly Luzak, Mr Anthony Fisher, Mr Tom McGaveston & Mr Bryan McGillan for Tauranga Bay Holdings Ltd

Ms Marie Elder for herself

Ms Pauline Hadfield for Te Kinga Investments Ltd and Davis Oglivie Ltd

Ms Kelsey Barry, Mr Russel Robinson, Mr Tony Penny, Mr Richard Nichol, Ms Helen Kellet, Ms Louise Bailey & Mr Craig Barr for Russell Robinson and Brunner Builders Limited

Mr Jonathan Bhana-Thomson for New Zealand Heavy Haulage Association Inc

Karl Luxon for Scenic Hotel Group

Rob Kinney for Te Kinga Estate Ltd

1.6. Overview of submitter evidence received

23. Legal submissions were received from Ms Kelsey Barry for Russell Robinson and Brunner Builders Limited, and Hadleigh Pedler for RNZ.

24. For those appearing at the hearing, the following evidence and/or statements were received:

    (a) Mr Jonathan Bhana-Thomson, Chief Executive of the New Zealand Heavy Haulage Association Inc. (dated 14 June 2024);

    (b) Mr Martin Kennedy, planner for Westpower Limited (dated 1 July 2024);

    (c) Anna Jane Bensemann, planner for Frank O'Toole (dated 1 July 2024)

    (d) Craig Barr, Helen Kellett, Louise Bailey, Richard Nichol, Russell Robinson, Sophie South, Tony Penny for Russell Robinson and Brunner Builders Limited, (dated 18 March 2024)

    (e) Steve White, Transmission Engineer Specialist for RNZ (dated 2 July 2024).

25. Following the receipt of the s42A Report and the Addendum to the s42A Report, the following were received:

    (a) FENZ provided a letter[4] with additional discussion on those submission points that the reporting officer rejected.

    (b) KiwiRail provided a letter[5] confirming that they did not wish to be heard. The letter indicated that KiwiRail sought minimum building setback requirements from the rail corridor in the settlement zone.

    (c) A memorandum of Counsel was submitted on behalf of Foodstuffs (South Island) Properties Ltd. The letter confirms support for the officer's recommendation to accept Foodstuff's submission point on SETZ-PREC2 and confirms that Foodstuffs maintains its

[4] Letter from Alec Duncan dated 19 July 2024
[5] Letter from Michelle Grinlinton-Hancock dated 1 July 2024

position on other submission points. The letter also provides additional comments on supermarkets in the Settlement Zone, in response to the s42A report.

(d) A statement of rebuttal evidence of Craig Barr, planner for Russel Robinson and Brunner Builders Ltd, addresses matters raised in the s42A report relating to residential density and location of the rezoning, and lack of detail in the Development Area Plan.

26. Following the hearing, the subsequent information was received as follows:

(a) Closing legal submissions and statement of planning evidence were submitted on behalf of Russell Robinson and Brunner Builders Ltd (dated 9 September 2024)

(b) Further legal submissions were submitted on behalf of RNZ, providing legal advice on the scope of RNZ's submission and confirmed support for the draft provisions prepared by the s42A Officer (dated 25 September 2024).

(c) Scenic Hotels Ltd provided a letter and memo[6] responding to the Panel's request for proposed text amendments to the Proposed Plan.

1.7. Right of Reply

27. Ms Easton provided a written right of reply (dated 30 September 2024) that addressed the Panel's questions on various matters and proposed amendments to several provisions, including both track changes and a clean copy of the amended provisions.

28. Ms Easton provided a written right of reply (dated 12 February 2024, although the date should have been 12 February 2025) addressing the matters raised by the Panel in relation to rezoning at Moana and Cape Foulwind.

1.8. Procedural Steps and Issues

29. The Panel notes that Commissioner Chrystal took no part in recommendations relating to Scenic Hotel Group. No other procedural issues arose from this hearing.

30. The Panel notes that the provisions concerning Mineral Prospecting and Mineral Extraction (SETZ–R15 and SETZ–R23) within the Settlement Zone are not included within this report and are assessed in the Mining and Minerals s42A Report.

1.9. Site Visits

31. As part of this hearing, we undertook site visits as follows:

- Te Kinga
- Moana – Russel Robinson Builder's Block
- 11 Lake Brunner Road -Klempel Block
- Punakaiki Township
- Pekenga Drive Fox Glacier
- Cron, Cowan, and Condon Streets in Franz Josef Glacier

[6] Letter from Karl Luxon dated 22 August 2024 and attached memo from Planz Consultants dated 23 August 2024

PART B - STATUTORY REQUIREMENTS AND DOCUMENTS

32. The Settlement Zone - Te Takiwā Nōhanga Pōnaho is in Part 3 – Area-specific Matters – Te Wāhanga 3 – Ngā Take a Ia Rohe. The zone forms part of the Rural Zones section of the Plan, which also includes the General Rural and Rural Lifestyle zones. The section comprises one objective and policy chapter (with specific provisions) that applies across all three zones, as well as three rule chapters, each with rules specific to its respective zone. Submissions on the Rural Zones policies, the General Rural Zone and Rural Lifestyle Zone provisions are addressed in a separate s42A report.

33. The creation of the Settlement Zones provisions required the amalgamation of the three different approaches and zones used across the Operative Plans, as well as aligning the zones to the National Planning Standards requirements. That has resulted in four Precincts to reflect the range of types of Settlements found across the West Coast. Additionally, a further Settlement Centre Precinct was developed and applied to commercial areas in certain settlements.

34. The rules for the Settlement Zone and its precincts generally:

- Provide for a wide range of expected activities that would occur in the zone, which are compatible with the settlement/precinct type.
- Provide for some other activities that may be appropriate to locate in the Settlement Zone areas through resource consent requirements.
- Recognise that the Settlement Zone – Rural Residential Precinct is an important new precinct to provide for what has become a very popular type of rural living development.

35. The Section 32 Report outlined the relevant statutory considerations applicable to the rural zones, and the relationships between the sections of the RMA and higher order documents.

36. The section 42A Reports highlighted the relevant sections of the RMA, and higher-order statutory documents and relevant documents. The Panel notes in particular the following:

- New Zealand Coastal Policy Statement 2010 (**NZCPS**);
- National Policy Statement for Freshwater Management 2020 (**NPSFM**);
- National Policy Statement for Highly Productive Land 2022 (**NPSHPL**);
- National Policy Statement for Indigenous Biodiversity 2023 (**NPSIB**);
- Iwi Management Plans, Mana Whakahono a Rohe; and
- West Coast Regional Policy Statement 2020 (**RPS**).

37. It is also noted there are three iwi management plans on the West Coast – the Te Rūnanga o Makaawhio Pounamu Management Plan, the Ngāti Waewae Pounamu Management Plan and the Lake Māhinapua Management Plan.

38. Clause 10 of the First Schedule of the RMA, states that providing decisions on individual submissions is unnecessary. The Panel's recommendations are made within the scope of requested relief, either individual submissions or groups of submissions making similar requests, as specified in the reasons for recommendation.

39. The National Planning Standards set out the zones allowed for use in the Plan and provide the following information for the Settlement Zone:

    Areas used predominantly for a cluster of residential, commercial, light industrial and/or community activities that are located in rural areas or coastal environments.

40. The Panel are satisfied that the Settlement Zone is consistent with this national direction.

PART C – SUBMISSIONS, EVIDENCE, EVALUATION AND RECOMMENDATIONS

2. SETTLEMENT ZONE

2.1. Overview and rules as a whole

Submissions and Further Submissions

41. Four submission points and one further submission point were received on the overview and are summarised in a table on page 10 of the s.42A report. One submission was in support, and three sought amendments.

42. Three submission points and one further submission point were received on SETZ-PREC2 - Settlement Centre Precinct Overview and are summarised in a table on pages 10-11 of the s.42A report. One submission was in support, and two sought amendments.

43. Eleven submission points and one further submission point were received on the rules as a whole and are summarised in tables on pages 11-12 of the s.42A report and pages 5-6 of the addendum report. Two submissions were in support, one was neutral, and the remainder sought amendments.

44. Seven submission points were received on SETZ-PREC3 - Coastal Settlement Precinct and are summarised in tables on pages 12-13 of the s.42A report. All submissions sought amendments.

45. The Panel has considered the relevant submissions and further submissions received and adopts the summaries in the s42A Report.

Section 42A Report

46. Ms Easton acknowledged submissions received in support of the overview and rules as notified.

47. Ms Easton did not support submission points from Marie Elder (S352.003) and Teresa Wyndham-Smith (S312.003) seeking that the overview refers to '*limited commercial activities*,' because some settlements have a reasonable extent of commercial activity, recognised by a Settlement Centre Precinct.

48. Ms Easton did not support a submission point from Marie Elder (S352.003) seeking the overview refer to settlements also in Buller and Westland Districts, noting that the overview mentions settlements across the three Districts.

49. Ms Easton did not support a submission point from Te Mana Ora (S190.1029) seeking the overview to provide more accurate information about wastewater services, as she considered it to be a general introduction to the zone. She noted that the individual councils would need to be consulted for specific information on water and wastewater reticulation. She also noted that, as Moana is predominantly zoned general Residential, it should not be referenced in the Settlement Zone overview.

50. Ms Easton did not support a submission point from Te Mana Ora (S190.1030) seeking that Waimangaroa, Ikamatua, Ahaura, Barrytown, Otira and Whataroa have areas identified as Settlement Centre Precinct. She acknowledged that these small centres have commercial activities but considered that this is largely limited to 1-2 premises that have not developed

into centres over time. She advised that Settlement Centre Precincts were carefully identified and applied only where there was a clear expectation or experience of growth and expansion of commercial activity, with multiple commercial premises.

51. Ms Easton did not support a submission point from Te Mana Ora (190.1031) seeking that Hector, Ngakawau, Granity and Mokihinui/Seddonville be included as Coastal Settlement Precinct, as this precinct was developed to replace the existing Westland Coastal Settlement and Buller Scenically Sensitive Residential Zones. She acknowledged these settlements are charming, but considered that, as they were not in one of those zones in the operative plans, these settlements do not meet the criteria for inclusion in the coastal precinct. She advised that this precinct has more restrictive rules focused on ensuring that development is compatible with scenic coastal values.

52. Ms Easton did not support a submission from Frida Inta (S553.185) requesting that intensive rural production be limited, noting that the rules already restrict these activities in the zone.

53. Ms Easton did not support a submission from the New Zealand Motor Caravan Association (S490.016) seeking that camping and camping grounds be a permitted activity, noting that settlement zones are residential areas and camping grounds should be appropriately assessed through a resource consent process.

54. Ms Easton did not support several submission points[7] seeking an advice note stating that existing non-compliance with the standards does not mean the rule does not apply. She considered that, outside of a resource consent process, existing non-compliance should not be accommodated in the rules, as this could result in a range of adverse effects.

55. Ms Easton did not support submissions from Jane Whyte and Jeff Page (S467.040) seeking a new rule to make it clear that the rights provided for in NH-R1 and NH-R39, as modified by the submission, are enabled within the Settlement Zone. She noted that the natural hazard rules sit across all the rule chapters, and duplication of rules is not efficient.

56. Ms Easton did not support a submission point from Jane Whyte and Jeff Page (S467.003) seeking that tourism activities be enabled in Punakaiki Village. She noted that Punakaiki has a Scenic Visitor Zone for commercial activity, and residents have expressed strong concerns about the loss of amenity in residential areas due to the expansion of commercial activity. She considered the rules recognise this concern and reflect the operative Plan approach for retaining the residential area primarily for residential use.

57. Ms Easton did not support submission points from Jane Whyte and Jeff Page (S467.015) seeking that Punakaiki Village be removed from the chapter, or that the rules be amended to reflect the character and type of development appropriate for the village as a significant tourism destination. She noted there is a specific zone in Punakaiki Village for commercial activities and considered this to be the appropriate location. She noted that the natural hazards, high natural values, and limited private land available constrain the level of development possible in the area and considered that the Plan strikes an appropriate balance in managing this.

58. Ms Easton did not support a submission from Foodstuffs (S464.004) seeking specific provisions to be developed for supermarkets in the zone. She considered that the

[7] Chris J Coll Surveying Limited S566.625, Chris & Jan Coll S558.625, William McLaughlin S567.659, Laura Coll McLaughlin S574.625

settlements subject to these provisions are very small and are unlikely locations for supermarket development, as the communities would not provide sufficient catchment area. She noted that SETZ-R13 provides for retail activities and considered that a Four Square or similar small convenience store could be established as a permitted activity under this rule. She noted that a larger supermarket would be a Discretionary activity. She considered that it provides an appropriate level of assessment and management for what would be a significant development for this type of settlement.

59. Ms Easton did not support several submission points from Marie Elder (S352.005, S352.006, S352.008, S352.014) concerning clearing for access and building in the Ross Subdivision (Punakaiki), vegetation clearance for commercial car parking in the Coastal Settlement Precinct,evelopment of tourism infrastructure and road widening, as well as prevention of overdevelopment and continued expansion of existing tourism businesses. She considered these reflected specific circumstances and compliance issues that have arisen under the operative Buller District Plan. She considered that the pTTPP provisions address these matters appropriately.

60. Ms Easton did not support a submission from WMS Group (S599.160) seeking that a new rule allow for port activities in Jackson Bay, as SETZ-R16 specifically provides for port activities, including expansion. She noted that the rule is drafted to reflect high natural values in the area and the limited accessibility of the location.

61. Ms Easton did not recommend any amendments as a result of these submissions; however, she recommended that the overview section be standardised as sought by the Forest and Bird submission (S560.034). She discussed in the Rural Zones s42A report (para 65), that all relevant chapters be included under the heading '*Other relevant Te Tai o Poutini Plan provisions*'.

S.42A Addendum

62. Ms Easton noted that she supported a setback from water supply catchments in principle, where these are designated and identified on the planning maps, but was not clear on where these activities are located, as they do not appear to be designated or mapped, or what the appropriate setback distance would be. She considered that these activities should be mapped and identified so that landowners are aware of the rules that apply to them.

63. Ms Easton did not support a submission from Frank and Jo Dooley (S478.003) seeking provisions addressing the management of sites to be rezoned, and that they only be triggered when a full infrastructure plan is in place. She noted that the Settlement Zone, Rural Lifestyle and general Rural zones are anticipated to be serviced through on-site methods rather than via public infrastructure. She considered that roading infrastructure could be accommodated through the development phase, with the financial contributions chapter addressing funding. She noted that provisions allowing for higher density development in Settlement zones with 3 waters servicing are principally designed to provide for existing serviced areas in some of the small towns. Ms Easton clarified that new Settlement Zone development will not be serviced as there is no capacity in the Council's infrastructure planning for significant expansion of 3 waters infrastructure.

64. Ms Easton did not support Scenic Hotel Group's submission point in support of treating Airbnb as a commercial land use (S483.006). She considered that the submitter had misinterpreted how these activities are managed through the Plan, as they are addressed in

the residential visitor accommodation provisions and required to be ancillary to residential activities.

Hearing and Submitter Evidence

65. Marie Elder continued to seek further restrictions on vegetation clearance, intrusive tourist infrastructure and road widening to accommodate tourist traffic in the Ross Subdivision (Punakaiki).

66. A memorandum of Counsel submitted on behalf of Foodstuffs[8] confirmed that they continued to seek the relief sought in their original submission, including specific provisions for supermarkets. The memorandum confirmed that there are two existing supermarkets in the Settlement zones, namely Karamea and Franz Josef Four Squares, and that these stores meet the Plan definition of '*supermarket*'. Foodstuffs disagreed with the Reporting Officers' statement that the settlements are unlikely locations for supermarket development, considering the evidential basis from an economic perspective to be unclear. They also disagreed that a supermarket could '*easily establish'* as of right, as 250m^2 is not a viable floorspace for a supermarket activity.

67. Scenic Hotel Group sought the Settlement Zone overview be amended to include visitor and worker accommodation activities, and for an addition to the description of the Coastal Settlement Precinct, acknowledging the high proportion of visitor and worker accommodation in Punakaiki.

Reporting Officer Reply Evidence

68. Based on the Foodstuffs evidence presented, Ms Easton agreed that Four Square is a supermarket. She confirmed that the Karamea Four Square is the only supermarket in the Settlement Zone, as the Franz Josef Four Square is within a Scenic Visitor Zone. She accepted that 250m^2 is too small for a supermarket and considered that a resource consent process would appropriately consider how to manage the effects of a larger building. She noted that the maximum permitted building size within a Settlement Centre Precinct would be 350m^2 under SETZ-R2 (Standard 3).

69. Ms Easton considered the Scenic Hotel Group's requested changes to the Settlement Zone overview to be out of the scope of their original submission. However, she noted that these changes could be made as Section 16 amendments, as they have no statutory weight.

70. No amendments to the overview or zone provisions were recommended.

Hearing Panel's Evaluation

71. The Panel has considered the evidence provided by the Reporting Officer and agrees with the conclusions reached that amendment to the Overview in response to Forest & Bird submission is necessary to ensure consistency with other chapters of the Plan. Otherwise, the Panel retain the notified wording. The Panel notes that we have supported Ms Easton's recommendation relating to deleting reference to the Overlay Chapters and including the more detailed wording arising from the Rural Zones recommendation, and those changes are shown below.

[8] Sarah Schulte/Alex Booker

72. The Panel acknowledge the statement from Foodstuffs, and we agree that 250m^2 is too small for a supermarket. We have considered the issue further and we do not see the necessity for Clause 4 under SETZ-R13. The rule itself is problematic as it does not define '*combined floor area*' and 350m^2 is already permitted in SETZ-R2. The Panel considered it would be more appropriate and clearer to simply rely on SETZ-R2 for the scale of retail activities (acknowledging the gross floor area is defined) and delete Clause 4 under SETZ-R13. We consider the Foodstuffs submission provides scope for this to occur, and we recommend this amendment.

73. The Panel note that we have taken the opportunity via Clause 16(2) of the First Schedule of the RMA to update '*plantation forestry*' to '*commercial forestry*' as per the National Environmental Standards for Commercial Forestry

74. In relation to the remainder of the submissions on the Overview and Rules as a Whole, the Panel agrees that these should be rejected based on the conclusions reached by Ms Easton.

Hearing Panel's Recommendation

75. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted in part and recommends the following amendments are made to the **SETZ Overview**:

> **Overview**
>
> The SETZ - Settlement Zone covers all the wide range of settlements that are outside of the four main towns throughout the West Coast/Te Tai o Poutini. Settlements differ from the main towns because of their small scale and low intensity of development. They comprise a mixture of residential, commercial, recreational, rural, community and other uses, often interspersed. The character of settlements is influenced by the prevailing mixture of uses, large section sizes, low intensity of development and informal appearance.
>
> The extent of reticulated services is limited. While some settlements in Grey District have a reticulated water supply, most settlements have no reticulated servicing, and are reliant on the use of on-site wastewater systems and water supplies. The degree of road infrastructure developed is also variable. Older settlements may have a main street with footpaths, streetlights and kerb and channel, but many locations do not have this infrastructure and this more rural character should generally prevail in any new development.
>
> The SETZ - Settlement Zone provides for residential activities as well as some commercial activities. Where industrial activities are proposed these need to be undertaken in an INZ - Industrial Zone.
>
> There are three Precincts within the SETZ Settlement Zone - SETZ - PREC2 - Settlement Centre, SETZ - PREC3 - Coastal Settlement and SETZ - PREC4 - Rural Residential.
>
> The RURZ - Rural Zones Objectives and Policies and SETZ - Settlement Zone Rules provide the framework for managing the effects of development in the SETZ - Settlement Zone. However, there are additional specific policies and rules for each of the three Precincts. Where there is a conflict between a SETZ - Settlement Zone provision and a Precinct provision, the Precinct provision applies.

SETZ - PREC2 - Settlement Centre Precinct is located in settlements where a focal community and commercial area is developing. It is anticipated that the Settlement Centre character will develop over time, with more commercial development in particular. This precinct anticipates the possibility that the settlement will grow and demand for retail and commercial services will increase, and that community facilities could be developed or expanded with this growth. Settlement Centre Precincts are identified in Karamea, Charleston, Blackball, Kumara, Ross, Harihari, Kaniere and Haast.

SETZ - PREC3 - Coastal Settlement Precinct is located over settlements which are located in coastal areas, generally within or near areas of high coastal natural character and coastal landscape values. The Coastal Settlement Precinct provides principally for residential activities, and a low-scale development and subdivision pattern which fits with the surrounding scenic landscape. Design of buildings, their size and location are all key matters which are controlled within the Coastal Settlement Precinct. Little Wanganui (subdivision area), Punakaiki (including within Grey District), Ōkarito, Okuru, Hannah's Clearing, Neil's Beach, Mahitahi/Bruce Bay and Okahu/Jackson Bay are included in the Coastal Settlement Precinct. These areas are also all subject to significant natural hazards and the provisions in the natural hazards chapter are very relevant for activities in this Precinct.

SETZ - PREC 4 - Rural Residential Precinct is located over areas on the edge of settlements and towns where larger lots - 4000m^2 are provided for a more rural residential lifestyle. These areas sit on an interface with the GRUZ - General Rural Zone or RLZ - Rural Lifestyle Zone and avoiding reverse sensitivity for rural uses is often as important as managing the amenity for residents within the Precinct. Alongside residential uses, some sorts of rural activities such as small-scale horticulture or market gardening, or grazing of animals may occur in this Precinct, reflecting its more rural character. The Precinct is also characterised by more rural infrastructure with an absence of footpaths, streetlights and kerb and channel in these areas.

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities in the SETZ - Settlement Zone, including:

~~Overlay Chapters - the Overlay Chapters have provisions in relation to historic heritage; notable trees; sites and areas of significance to Māori; biodiversity; landscape; riparian areas; natural hazards; and the coastal environment. Where an activity is located within an overlay area (as identified in the planning maps) then the relevant overlay provisions apply.~~

- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters – there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Settlement Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.**
- **Natural Hazards - natural hazards are widespread on the coast and in some locations natural hazard overlays may affect areas in the Settlement Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards chapter.**
- **Natural Character and Margins of Waterbodies -in some locations areas of Settlement Zone may extend into the riparian margins of waterbodies. The**

Natural Character and Margins of Waterbodies Chapter contains provisions on how these areas must be managed.

- **Ecosystems and Biodiversity – Where indigenous vegetation clearance is proposed within a Settlement Zone, the provisions of the Ecosystems and Biodiversity chapter apply**[9]

General District Wide Matters - provisions in relation to earthworks may be relevant to many activities.

Subdivision - The Subdivision chapter sets out the requirements for subdivision activities the SETZ - Settlement Rural Zone.

Financial Contributions - The Financial Contributions chapter sets out the requirements for contributions of costs for activities which impact on the local network utility operators.

Relationship with Other Plans

Many activities that occur in rural areas are also regulated by the West Coast Regional Council through Regional Plans, including the Regional Land and Water Plan, Regional Air Plan and Regional Coastal Plan. When planning to undertake an activity, the status under the relevant Regional Plans should also be confirmed and any necessary resource consents applied for under both Plans.

Note with Regard to ~~Plantation~~ Commercial Forestry[10]

There are no specific provisions as relate to ~~plantation~~ **commercial** forestry within the RURZ - Rural Zone Chapters. This is because ~~plantation~~ **commercial** forestry is principally regulated by the Resource Management (National Environmental Standard**s** for ~~Plantation~~ **Commercial** Forestry) Regulations 2017. Exceptions to this occur in the Overlay Chapters and where forestry activities are proposed**,** these chapters must be considered. [11]

2.2. Precinct Policies

Submissions and Further Submissions

76. Five submission points were received in support of SETZ-PREC-P2 and are summarised in a table on page 15 of the s.42A report.

77. Nine submission points relating to SETZ-PREC-P3 were received and are summarised in a table on pages 15-16 of the s42A report. Seven submission points supported the policy; two submission points opposed the policy and sought amendments.

78. Eight submission points relating to SETZ-PREC-P4 were received and are summarised in a table on pages 16-17 of the s.42A report. Seven submissions supported the policy, and one was in opposition, seeking amendments.

Section 42A Report

[9] Forest and Bird (S560.370, S560.0543)
[10] Schedule 1 Clause 16(2) RMA
[11] Schedule 1 Clause 16(2) RMA

79. Ms Easton acknowledged the submissions received in support of the policies.

80. Ms Easton supported a submission from Paparoa Track Services (S605.028) seeking that clause (d) of SETZ-PREC3-P3 be amended to state:

*Be located to avoid **or designed to mitigate** the significant risks of natural hazards.*

81. She agreed that there may be a range of mitigations to address natural hazards and considered this to be appropriately referenced in the policy.

82. Ms Easton supported in part a submission point from the Director General (S602.232) seeking several amendments to SETZ-PREC-P3. She supported a request to delete the reference to the coastal development guidelines, considering this to be an error, as these are not included in the Plan. She considered that some of the matters raised by the Director General were s6 RMA matters addressed in the Coastal Environment overlay, but agreed it was appropriate to strengthen the policy wording relating to managing scenic and visual effects. She considered the amendment made in response to the Paparoa Track Services submission addressed natural hazards matters raised by the Director General and did not think it was appropriate to add a clause seeking to avoid hard protection structures, as this matter would predominantly sit in the Coastal Environment chapter.

83. Ms Easton supported a submission from RNZ seeking an additional clause in SETZ-PREC4-P4 *'to avoid reverse sensitivity effects on rural activities and established infrastructure'*, considering that this precinct is where a conflict between rural activities and established infrastructure is most likely to occur, although she recommended an amended wording. She noted that this amendment is consistent with the Plan's wider approach to reverse sensitivity.

84. Ms Easton supported a submission from Westland Farm Services (S550.014) seeking an amendment to SETZ-PREC-P4 Clause 1 to include reference to '*industrial or commercial activities which have a functional relationship with rural areas'* as she considered the precinct to be a likely location for such activities, and they are provided for in the rules.

Hearing and Submitter Evidence

85. At the hearing, Scenic Hotel Group sought an additional clause to be added to SETZ-PREC3-P3 '*Support and enable the development of visitor accommodation, worker accommodation and tourism support facilities in Punakaiki.'*

Reporting Officer Reply Evidence

86. Ms Easton considered that SETZ-PREC3-P3 should refer to the titles on which the Port Activity can be undertaken for Jackson Bay, as this would better integrate the policy with the rule provisions in SETZ-R16.

87. Ms Easton considered the requested amendment above to SETZ-PREC-P3 by Scenic Hotel Group to be one of the few submission points to be within the scope of their original submission.

Hearing Panel's Evaluation

88. The Panel agrees with Ms Easton the need for a new clause in SETZ-PREC-P3 to indicate the reference to the titles on which Port Activity can be undertaken at Jackson Bay, based

partially on the submission from WMS Group. We consider such a clause will provide greater clarity for any assessment associated with SETZ-R16. However, we consider the wording of the clause needs to be revised because the default position of not complying with SETZ-R16 is fully discretionary. In that context in our view the development of port activities beyond the referenced titles should be discouraged at a policy level and we have revised the clause accordingly.

89. The Panel agrees with Ms Easton's recommendation to amend clause (e) of SETZ-PREC-P3 to refer to *designed to mitigate*, as sought by submitters. We acknowledge that there are a range of mitigation measures that can be used to address natural hazards. Having considered the submission of the Director General in this context and we are of a view that the clause needs to be amended further to recognise '*increasing the significant risk of natural hazards*'. We recommend the clause (d) be reworded as follows:

> *Be located **and designed to mitigate or** avoid **increasing** the significant risks of natural hazards.*

90. The Panel agree with Ms Easton's recommendation that Policy SETZ - PREC-P3 (a) be amended to "*Recognise and provide for*" coastal natural character, rather than "*Take into account*" and the policy states that the scenic landscape values of the area are protected. We consider this wording to provide greater clarity and direction, thereby strengthening the policy. We also agree with the deletion of the reference to the Coastal Development Guidelines from SETZ-PREC-P3 (b) sought by the Director General. We accept this is an error and should not be included in the Plan.

91. Subject to minor rewording, the Panel accepts the proposed wording of Scenic Hotels Group for SETZ-PREC-P3 and recommends it be included. We consider Punakaiki to be a unique settlement, based mainly on tourism and constrained in terms of development opportunities. We consider that the additional wording in the policy will support that tourism focus.

92. The Panel accept Westland Farm Services' submission seeking the inclusion of a further clause in SETZ-PREC-P4 regarding acknowledging that industrial or commercial activities which have a functional relationship with rural areas. We agree that the precinct is likely to be a location for such activities and that they are provided for in the rules.

93. The Panel agree with Ms Easton's recommendation to add an additional clause to SETZ-PREC-P4 - *Presence of rural activities and established infrastructure, which should be protected from reverse sensitivity effects.* We acknowledge that this stems from a submission from RNZ, and we recognise that this is a precinct where reverse sensitivity could occur, given the established infrastructure and rural activities.

94. In relation to the remainder of the submissions on SETZ-PREC-P2 and SETZ-PRES-P3, the Panel agrees that these should be rejected based on the conclusions reached by Ms Easton.

Hearing Panel's Recommendation

95. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accept or accepted in part and recommends the following amendments be made to the **SETZ Policies**:

SETZ-PREC-P2	Subdivision, use and development within the SETZ - PREC2 - Settlement Centre Precinct should: a. Maintain or enhance the character and built form of the settlement; b. Adaptively reuse existing heritage and character buildings where practicable; and c. Provide for commercial activities and community facilities which serve the settlement, rural community and visitors
SETZ-PREC3_P3	Subdivision, use and development within the SETZ - PREC3 - Coastal Settlement Precinct should: a. ~~Take into account~~ **Recognise and provide for** the coastal natural character and **protect the** scenic landscape values of the area; [12] b. Have appropriate controls on design and height to protect the landscape and coastal natural character values ~~and be undertaken in accordance with the coastal development guidelines~~;[13] c. Recognise and provide for access to mahinga kai and Sites and Areas of Significance to Māori for Poutini Ngāi Tahu; ~~and~~ **d. Development of the port area at Jackson Bay is:** **i. discouraged other than on legal road reserve at Jackson Bay, Sections 208 and 209 TN of Arawata and Sections 8, 9 and 10 TN of Arawata; and** **ii. of a scale and extent appropriate to the location**[14] **e.** Be located **and designed to mitigate or** avoid **increasing** the significant risks of natural hazards.[15] **f. Support the development of visitor accommodation, worker accommodation and tourism support facilities in Punakaiki.**[16]
SETZ-PREC-P4	Subdivision, use and development within the SETZ - PREC4 - Rural Residential Precinct should maintain the predominant rural character and amenity values, which include: a. Low-density residential living and small-scale rural activities; b. Open space and privacy around buildings; ~~and~~ c. On-site servicing and a general absence of urban infrastructure; **d. Industrial or commercial activities which have a functional relationship with rural areas;**[17] **and** **e. Presence of rural activities and established infrastructure which should be protected from reverse sensitivity effects.**[18]

[12] Department of Conservation (S602.232)

[14] WMS Group (S599.107)
[15] Paparoa Track Services Ltd, Craig and Sue Findlay, Tim Findlay and Punakaiki Beach Camp (S605.028)
[16] Scenic Hotel Group (S483.003)
[17] Westland Farm Services (S550.014)
[18] Radio New Zealand (S476.039)

2.3. Rules SETZ-R1 and SETZ-R2

Submissions and Further Submissions

96. Fifty submissions points and sixteen further submission points relating to the SETZ-R1 and R2 were received and are summarised in a Table on pages 19-29 of the s42A Report.

97. Twenty-eight submission points related to **SETZ-R1**, of which seven were in support, and twenty-one sought amendments.

98. Twenty-two submission points related to **SETZ-R2**, of which four were in support, and eighteen sought amendments.

Section 42A Report

SETZ-R1

99. Ms Easton acknowledged the submissions in support of the rules.

100. Ms Easton supported submissions from Marie Elder, Davis Ogilvie & Partners Ltd and Cashmere Bay Dairy seeking that the rule be amended to allow dwellings to be built on existing undersized lots. She noted that the existing grandfather clause only applies to reticulated areas and considered that it should be extended to include unreticulated sites as well.

101. Ms Easton did not support submissions from Stephen Page and Greenstone Retreat seeking that the rule allow on-site servicing, noting that community infrastructure is an effective way of minimising cumulative effects and is funded based on the whole community connecting.

102. Ms Easton supported a submission from Waka Kotahi seeking that the rule requires vehicle crossings to meet minimum permitted standards, considering that new or expanded activities should be required to have vehicle crossings constructed to safe standards. She recommended an amendment to Rule 2, as Rule 1 deals with density matters.

103. Ms Easton did not support a submission from Davis Ogilvie & Partners Ltd. seeking to amend the density standard to be consistent with the subdivision standard approach, which applies the minimum area to both sewered and unsewered sites. She acknowledged an inconsistency between the zone and subdivision chapters, but considered the subdivision chapter should be amended, although she noted there may not be scope to do so.

104. BDC sought to have the grandfather clauses removed, considering that existing use rights are sufficient. Ms Easton did not support this submission point, noting that there are a large number of existing sites that were lawfully developed with lesser lot sizes, and the grandfather clause allows these to be built upon without resource consent.

105. Ms Easton supported submissions from BDC and several other submitters[19] seeking that a mandatory connection to services requires a qualification that the scheme must have the capacity.

106. Ms Easton did not support submissions from Frida Inta and BCG seeking that servicing by composting toilets and rainwater for drinking water be provided. She noted that community

[19] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin

infrastructure is an effective way of minimising cumulative effects and is funded based on the whole community connecting.

107. Ms Easton did not support submissions[20] seeking a controlled activity status for activities that do not comply, as she considered landowners and residents should be able to have confidence that a basic level of amenity, density, infrastructure capacity and character would be maintained in the zone. She noted no reason was given for requesting this change.

108. Ms Easton did not support a submission point from FENZ seeking minimum requirements for firefighting water support, as she considered that connection to a reticulated system should provide adequately for firefighting. She considered this to be a subdivision matter covered by SUB-S3. She acknowledged that there can be issues with firefighting water supply in rural areas and invited the submitter to provide more information about the needs they see in unreticulated areas.

109. Ms Easton did not support a submission from David Ellerm seeking an additional standard for on-site wastewater treatment, collection and disposal, noting this is managed through the building code and the Regional Council's land and water plan.

SETZ-R2

110. Ms Easton acknowledged the submissions received in support of the rule.

111. Ms Easton did not support a submission from Marie Elder seeking that clause 5a apply to the Ross subdivision at Punakaiki, as this is a rollover of the Westland District Plan requirements for the Kumara Junction subdivision. Ms Easton considered that these distances from boundaries are unlikely to be achieved within the smaller site sizes at Punakaiki.

112. Ms Easton supported in part a submission point from RNZ seeking the addition of an advice note concerning tall structures within 1000m of their Cape Foulwind facility. She considered that, as the permitted height limit is 10m, there is no need to amend the standard. She considered an amendment to SETZ-R12 more relevant as emergency service activities are more likely to include structures of 15m or more in height.

113. Ms Easton did not support a submission point from Foodstuffs seeking an exemption for existing supermarkets. As above, she was not aware of any supermarkets in the Settlement Zone and noted that the Karamea Four Square would be subject to the 12m height limit in that precinct.

114. Ms Easton supported submissions from BDC seeking changes to the reference to the deemed permitted boundary infringements and the introduction of a minimum setback from designated wastewater treatment facilities. She also recommended an amendment to rule SETZ-R2 to include a 150m setback from designated wastewater treatment sites, sought by BDC. She recommended that the rule be amended also to apply this setback to designated landfill sites. She did not support reduced height limits for Settlement Centre Precincts, noting that this standard applies across all three Districts. She acknowledged that a lower height limit could be appropriate in the Buller District Settlement Centre Precincts, reflecting the lower density character in these settlements.

115. Ms Easton did not support submissions from Frida Inta and BCG seeking to change the standard 5b relating to indigenous vegetation clearance to Discretionary or to reword it to

[20] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin

specify 2000m² or 10% of the site area, whichever is lesser. She noted that this standard is a roll-over of the Westland District Plan provisions and is in addition to the Ecosystems and Biodiversity Chapter rules.

116. Ms Easton did not support submission points[21] seeking to delete the noise advice note. She noted that noise matters would be considered as part of the Noise topic, and any changes to the rule would be reflected through consequential amendments to the advice note.

117. Ms Easton did not support several submission points[22] seeking a controlled activity status for activities that do not comply, as she considered landowners and residents should be able to have confidence that a basic level of amenity, density, infrastructure capacity and character would be maintained in the zone. She noted no reason was given for requesting this change.

118. Ms Easton did not support a submission from David Ellerm seeking a reduction in the height limit to 8m for residential and emergency service buildings, and 5m for accessory buildings, as well as a decrease in site coverage to 35%. She noted that no reasons are given for requesting these changes and that these would be significant reductions from the operative plans.

119. Ms Easton did not support a submission point from Paparoa Track Services seeking to increase the gross ground floor area from 200m² to 250m², noting that the requirement is intended to ensure developments are in harmony with the environment in these sensitive coastal locations. She considered a 50m² increase to be a significant potential increase in the dominance of the built environment, as existing sites in these areas are often small, and that this change would be inappropriate and would not align with the precinct's intent.

120. GDC sought to amend the rule to clarify whether the term *'non-residential buildings'* referred to in Standard 4. ii meant commercial/industrial buildings, or accessory buildings. Ms Easton recommended that the rule be amended to refer to non-residential and accessory buildings.

Hearing and Submitter Evidence

121. In a letter dated 1 July 2024, KiwiRail sought that SETZ-R2 be amended to include a minimum 5m setback from the rail designation boundary, and that the rule refer to *buildings and structures*. They also sought additional matters of discretion relating to impacts on the safe and efficient operation of the rail network when there is non-compliance with the setback.

122. FENZ continued to seek requirements for firefighting water supply to be included, and provided a suggested amended approach for consideration, being an addition to R2 as follows:

> ***4. Provision shall be made for sufficient water supply and access to water supplies for firefighting in accordance with the New Zealand Fire Service Firefighting Water Supplies Code of Practice (SNZ PAS:4509:2008)***
>
> ***Advice Note:***
> ***2. The New Zealand Fire Service Firefighting Water Supplies Code of Practice PAS:4509:2008 should be consulted when determining the most appropriate design for firefighting water supply. Fire and Emergency New Zealand is available to assist with this***

[21] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin
[22] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin

123. Foodstuffs maintained its position, including amendments to R2 to allow a 12m height limit for existing supermarkets and to exempt existing supermarkets from conditions 2, 3, and 4.

124. Marie Elder continued to seek that Rule 5a, relating to the Kumara Junction Developments Area, also be applied to the subdivision at Hartmount Place and Ross Place.

125. Scenic Hotel Group sought several amendments to SETZ-R2, including:

- A 10m height limit to visitor and worker accommodation, as well as residential units,
- A 10m height limit in the Punakaiki Coastal Settlement Precinct
- A maximum of 50% site coverage in the Punakaiki Coastal Settlement Precinct,
- Exempt Punakaiki from the 200m^2 ground floor area limit,
- Include an exemption from recession planes for boundaries adjoining Open Space zones,
- Adding an advice note stating that within areas subject to a flood or coastal hazard overlay, recession planes and height limits should be measured from the level specified on a minimum floor level certificate.

Reporting Officer Reply Evidence

126. Ms Easton noted that FENZ had provided further evidence on the policy gap that existed around firefighting water supply and the limitations of the building code. She revised her view in relation to this issue, recommending that a performance standard and advice note be added to SETZ-R2, consistent with the wording used across the rural zones.

127. Ms Easton provided a comparison between the proposed rules applicable to the Ross subdivision and those of the operative Buller District Plan.

128. Ms Easton considered the Scenic Hotel Group's submission points, requesting amendments to the recession plane provisions under SETZ-R2, to be within the scope of their original submission. She considered other changes requested to SETZ-R2 to be outside of scope, noting the following:

- Amendments to Rule SETZ – R2 seeking that provisions that apply to residential buildings also apply to worker and visitor accommodation. This would be a substantial difference from the operative plan rules.
- Increase in maximum site coverage to 50% in Punakaiki – this differs from the operative Buller District Plan provisions
- Change to Rule SETZ – R2 to increase the maximum total gross ground floor area of buildings at Punakaiki – the TTPP rule is less restrictive than the operative Buller District Plan (which has a 150m^2 maximum).

129. In a joint right of reply addressing KiwiRail's submission, prepared by Ms Easton and Ms Briar Belgrave, (reporting planner for the Commercial and Industrial zones), the planners considered a 5m setback from the Settlement zone to be excessive given that many existing sites in this zone are a similar size to those in the General Residential zone. They considered that a 5m setback would considerably constrain use on a 500m^2 site. In addition, they considered that KiwiRail had not provided clear and detailed evidence to support a 5m

setback as being either appropriate or necessary. They considered a 1.5m setback to be a balanced and appropriate setback requirement in the Settlement zone, ensuring new buildings are not located on the boundary and that maintenance can occur.

Hearing Panel's Evaluation

SETZ-R1

130. The Panel agree with the extension of the grandfather clause recommended by Ms Easton to apply to unreticulated sites where they have been lawfully established. In this context, we also note Ms Easton's comments regarding BDC's submission that there are a large number of existing sites that were lawfully developed with smaller lot sizes, and the grandfather clause allows these to be built upon without requiring resource consent. We agree with this conclusion.

131. The Panel agrees with Ms Easton's addition to clause 2, clarifying that mandatory connection to services is subject to a qualification: the scheme must have sufficient capacity.

132. The Panel also agrees with Ms Easton's recommended amendment, supporting a submission from Waka Kotahi, which seeks to require vehicle crossings to meet minimum permitted standards. We agree that this amendment should be included in SETZ-R2.

133. The Panel acknowledge Ms Easton's revised position concerning the FENZ submission, and we accept her recommendation to include a performance standard and advice note in SETZ-R2 based on the further information provided by FENZ. We agree that this addresses a gap between policies and the building code.

134. In relation to the remainder of the submissions on SETZ-R1, the Panel agrees that these should be rejected based on the conclusions reached by Ms Easton.

SETZ-R2

135. The Panel agrees with Ms Easton that a 5m setback from the rail corridor is excessive and would result in inefficiencies in terms of land use. While we acknowledge the safety issue raised by KiwiRail, we consider a 1.5m setback, as recommended by Ms Easton, more appropriate and would still address the safety concerns around building maintenance. We also consider the rule should refer to the setback being from the '*rail designation*' rather than the '*rail corridor*' so as to provide a definitive point of measurement.

136. The Panel accepts Ms Easton's recommendation to reject the submission from Paparoa Track Services to increase the gross ground floor area in the Coastal Settlement Precinct to 250m^2 from 200m^2. We agree that this requirement is intended to ensure developments are in harmony with the environment in these sensitive coastal locations. We note that the scale has already increased by 100 m² in the pTTPP compared to the operative Buller District Plan.

137. The Panel agrees with Ms Easton regarding that part of the Foodstuffs submission seeking an exemption for existing supermarkets from Standards 2, 3, and 4. As we understand it, Karamea Four Square is the only existing supermarket in the settlement zone. We note that the three standards concerned allow for 60% site coverage, a 350m² gross ground floor area (we note we have recommended the deletion of scale on the retail activity clause in SETZ-R13), and a 1m boundary setback within the Settlement Centre Precinct. We do not consider these to be unreasonable and note there is a consenting pathway if they are exceeded.

138. The Panel accepts the recommendation of Ms Easton to add an advice note concerning tall structures within 1000m of their Cape Foulwind facility in response to RNZ's submission. We agree that, as the permitted height limit is 10m, there is no need to amend SETZ-R2, and that an amendment to SETZ-R12 to address emergency service activities, which are more likely to include structures of 15m or more in height, was appropriate.

139. The Panel also agrees with the BDC submission to change the reference to the deemed permitted boundary infringements and introduce a minimum setback from designated wastewater treatment facilities. We also note that Ms Easton, in addition to accepting this, accepted in part a submission from Cashmere Bay Dairy seeking setbacks from infrastructure, including wastewater treatment plants, land disposal areas, transmission infrastructure, and water supply catchments. She recommended that, in addition to amending rule SETZ-R2 to include a 150m setback from designated wastewater treatment facility site, the rule be further amended to apply the setback to designated landfill sites. We agree with adding the designated landfill setback.

140. We agree with Ms Easton that a differentiation can be applied to the Buller District in terms of height in the Settlement Centre Precincts, due to its being less developed and having a lower density character compared to other settlements.

141. The Panel have further considered the submission of Marie Elder regarding matters associated with the Hartmount Place and Ross Place subdivision in Buller District. While some of the matters Ms Elder sought to be addressed are beyond the scope of what a District Plan can put in place and may well relate to enforcement issues, we have noted that this subdivision did have some carve-out provisions in the operative Buller District Plan due to its uniqueness in terms of scenic values and indigenous vegetation. We consider the pTTPP addresses most of these provisions, albeit sometimes in a different way, in the Coastal Settlement Zone including Residential Visitor Accommodation (SETZ-R10). We also note that as the subdivision falls within a High Coastal Natural Character Overlay the permitted level of development for any new building is no more than 100m^2 ground floor area (CE-R5) rather than the recommended 150m^2 ground floor area that would be permitted generically within Coastal Settlement Precinct.

142. The remaining issue referred to by Ms Elder was indigenous vegetation clearance. Again, this is already addressed in an overlay (Coastal Environment) where the extent of indigenous vegetation disturbed and/or cleared per site is limited to 500m^2 in area per site in any three year period (ECO-R2). In this case the Panel considers Ms Elder has a point as we consider the ability to clear 500m^2 per site of indigenous vegetation over a 3-year period is, given the small-scale nature of the sites within the subdivision (most are only around 800m^2), could result in all indigenous vegetation being removed over a 4 year period. In our view, given the Hartmount Place and Ross Place subdivision is rather unique, we consider indigenous vegetation removal should be limited to 500m^2 per site with no permitted status beyond that (i.e. no 3 year period). We consider this will enable a building platform to be formed and is in line with the 40% site coverage which is permitted per site. The rule would continue to sit within the Ecosystems and Biodiversity Chapter in ECO-R1 as follows:

> *except in the Hartmount Place and Ross Place subdivision in Buller District where the extent of indigenous vegetation disturbed and/or cleared is restricted to a one-off 500m^2 per site;*

143. The Panel agrees with Ms Easton's recommended clarification of Standard 4 (ii) to refer to accessory buildings. We consider that this partially addresses the submission of GDC and provides greater clarity.

144. The Panel acknowledges the KiwiRail submission point to include the word 'structures' in the heading of SETZ-R2 but considers that structures such as telecommunications and electricity poles and antennas, are covered in the Energy and Infrastructure Chapters. We also note that such a change would necessitate a significant amendment to the rules that follow the heading. We have therefore rejected this submission.

145. In relation to the remainder of the submissions on SETZ-R2, the Panel agrees that these should be rejected based on the conclusions reached by Ms Easton.

Hearing Panel's Recommendation

146. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part and recommends the following amendments be made to rules **SETZ-R1 and SETZ-R2**

SETZ-R1 Residential Activities and Residential Buildings - Density

Activity Status Permitted

Where:

1. Residential unit density is no more than:
    - **i. 1 unit per site where these were lawfully established under the previous District Plans; otherwise**[23]
    - ii. 1 unit per 500m^2 net site area in areas fully serviced by a network utility operator with wastewater, water supply and stormwater systems**;** ~~except that:~~
        - ~~a. where smaller sites were lawfully established under the previous Buller, Grey or Westland District Plan then the residential unit density is one residential unit per site; or~~[24]
    - iii. 1 unit per 1000m^2 net site area in areas where there is on site servicing of wastewater, water supply and stormwater systems; except
    - iv. In the SETZ - PREC4 - Rural Residential Precinct residential unit density is 1 unit per 4000m^2 net site area;
2. Where the settlement is serviced by a network utility operator for wastewater, water supply or stormwater**, and provided there is capacity,**[25] all residential units and buildings used for a residential activity must be connected to the community wastewater, water supply and stormwater infrastructure;
3. Where the settlement is not serviced by a network utility operator for wastewater, water supply or stormwater on site collection, treatment and disposal must be undertaken in accordance with NZS4404:2010 Land Development and Subdivision Infrastructure or the relevant Council Engineering Technical Standards.

Activity status where compliance not achieved: Discretionary

[23] Marie Elder (S352.002), Davis Ogilvie +Partners LTD (S465.028), (S465.026) Cashmere Dairy Ltd (S461.002)
[24] Marie Elder (S352.002), Davis Ogilvie +Partners LTD (S465.028), (S465.026) Cashmere Dairy Ltd (S461.002)
[25] Buller District Council (S538.553), Chris and Jan Coll (S558592), Chris J Coll Surveying Limited (S566.592), Laura Coll Mclaughlin (S574.592) and William McLaughlin (S567.629)

SETZ-R2 Buildings and Sites - Design

Activity Status Permitted

Where:

1. The maximum height above ground level for buildings is:
    i. 10m for residential buildings and Emergency Service Facilities and 7m for accessory buildings; except
    ii. No building, structure or tree shall protrude into the Airport Approach Path of any airport or aerodrome identified on the planning maps and as described in Appendix Nine;
    iii. 7m for buildings in the SETZ - PREC3 - Coastal Settlement Precinct; and
    iv. 12m for buildings in the SETZ - PREC2 - Settlement Centre Precinct **in the Grey,** ~~and~~ **Westland Districts and 10m in the Buller District**;[26]

2. The maximum site coverage is:
    i. 40%; except
    ii. Maximum site coverage is 60% in the SETZ - PREC2 - Settlement Centre Precinct

3. The maximum gross ground floor area of any one building
    i. Is 350m^2; except
    ii. In the SETZ - PREC3 - Coastal Settlement Precinct the gross ground floor area is a maximum of 200m^2 total for all buildings on the site.

4. Buildings are setback from boundaries as follows:
    i. 5m from the road and any GRUZ - General Rural or INZ Industrial Zone boundary, **1.5m from the rail designation,**[27] and 1m from internal boundaries; except
    ii. In the SETZ - PREC4 - Rural Residential Precinct all buildings are setback 10m from road boundaries, residential buildings are setback 10m from the internal boundaries and non-residential buildings **and accessory buildings**[28] are setback 5m from internal boundaries;
    iii. In the SETZ - PREC2 - Settlement Centre Precinct no setback from the road boundary is required where there is a verandah provided over an adjacent footpath; **and**
    iv. **No building housing sensitive activities shall be located within 150m of a designated community wastewater treatment facility site boundary**[29] **or a designated landfill site boundary.**[30]

5. In the Kumara Junction Developments area:
    a. A minimum 5m wide buffer strip of indigenous vegetation is to be retained on all boundaries. Native species will be retained or planted to ensure that, at maturity, buildings will be screened from the road and neighbouring allotments;

[26] Buller District Council (S538.554)
[27] KiwiRail (S442.093)
[28] Grey District Council (S608.119)
[29] Buller District Council (S538.554)
[30] Casmere Bay dairy Ltd (S461.021

b. A maximum of 2000m^2 indigenous vegetation in total is allowed to be cleared from each site; and
c. Development will be in accordance with the Outline Plan set out in the Development Areas section of the Plan;

6. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing.~~ [31] This standard does not apply to:
   i. Road boundaries;
   ii. Buildings on adjoining sites that have a common wall along the boundary;
   iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;
   iv. Boundaries adjoining any site in a CMUZ - Commercial and Mixed Use, INZ - Industrial or GRUZ General Rural Zone;
   v. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or
   vi. Solar panels and solar water heaters provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically**;**

7. **Vehicle crossing standards in Rule TRN – R1 are met; and**[32]

8. **Provision shall be made for sufficient water supply and access to water supplies for firefighting in accordance with the New Zealand Fire Service Firefighting Water Supplies Code of Practice (SNZ PAS:4509:2008)**[33]

Advice Notes:

1. In relation to indigenous vegetation clearance in Kumara Junction developments and Standard 5. it should be noted that indigenous vegetation clearance provisions in the Ecosystems and Biodiversity Chapter also apply;

2. Where a residential building or noise sensitive activity is located within:
   i. 80m of a State Highway with a speed limit of 70kph or greater; or
   ii. 40m of a State Highway with a speed limit of less than 70kph; or
   iii. 40m of a Railway Line; or
   iv. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or
   v. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.

   Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply.

3. **Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.**[34]

[31] Buller District Council (S 538.554)
[32] Waka Kotahi (S450.403)
[33] Fire and Emergency New Zealand (S573.049)
[34] Buller District Council (S538.554)

4. **The New Zealand Fire Service Firefighting Water Supplies Code of Practice PAS:4509:2008 should be consulted when determining the most appropriate design for firefighting water supply. Fire and Emergency New Zealand is available to assist with this.**[35]

Activity status where compliance not achieved: Discretionary where standards 1-4 are not complied with. Restricted Discretionary where standards 5-~~6~~**8** are not complied with.

2.4. Specific Coastal Settlement Precinct Rules SETZ-R3, SETZ-R16 and SETZ-R20

Submissions and Further Submissions

147. Twenty-four submission points relating to rules R3, R16 and R20 were received and are summarised in a table on pages 35-37 of the s42A Report.

148. Fifteen submission points were received on SETZ-R3 and are summarised in a Table on pages 35-36 of the s42A Report, of which five were in support and one was in opposition, seeking that the rule be deleted. The remaining nine sought amendments.

149. Two submission points were received on SETZ-R16 and are summarised in a table on page 36 of the s42a report, one in support and one seeking amendments.

150. Seven submission points were received on SETZ-R20 and are summarised in a Table on pages 36-37 of the s42A Report. Two were in support, and the remaining five sought amendments.

Section 42A Report

151. Ms Easton acknowledged submission points in support of the rules.

SETZ-R3

152. Ms Easton did not support a submission point from Paparoa Track Services seeking to delete the standard restricting building size. She noted that this standard intends to ensure the balance between the natural and built environment retains an emphasis on the natural. She noted that, as existing sites in this precinct are often small, there is a risk that buildings will dominate the environment.

153. Ms Easton supported a submission point from BDC seeking an increase in the minimum permitted ground floor area to 150m^2, and several others[36] seeking an unspecified increase. She noted that 150m^2 is consistent with the operative Buller District Plan standards for the Paparoa Character Area. BDC considered that this has achieved appropriate outcomes in this sensitive environment and suggests the same be applied.

154. Ms Easton did not support submission points[37] seeking the rule be amended so that existing non-compliance with performance standards for Rule SETZ-R2 (3) does not preclude the application of this rule, noting that new or expanded activities should comply to ensure amenity and effects are adequately managed.

SETZ-R16

[35] Fire and Emergency New Zealand (S573.049)
[36] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin
[37] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin

155. Ms Easton did not support a submission point from WMS Group, seeking that the reference to 'the lots fronting the esplanade' be removed, the maximum building size be increased to 500m^{2,} and the height increased to 10m. She noted that Jackson Bay Port is currently a small collection of sheds, and a car park located in a very small coastal settlement within a wider area of outstanding natural landscape and coastal natural character. She considered the current rule allows for modest expansion as a permitted activity, and that expansion beyond this should be assessed through a resource consent process.

SETZ-R20

156. Ms Easton supported a submission point from BDC seeking 3 additional matters of discretion, noting that these are appropriate and reflect the potential environmental effects of the activity.

157. Ms Easton did not support submission points[38] seeking the rule be amended so that existing non-compliance with performance standards Rule SETZ-R1 and R2 does not preclude the application of this rule, noting that new or expanded activities should comply to ensure amenity and effects are adequately managed.

Hearing and Submitter Evidence

158. Scenic Hotels Group sought that the SETZ-R3 rule name be amended to state '*except Punakaiki*.'

Reporting Officer Reply Evidence

159. In response to the Scenic Hotels Group's request for an amendment to Rule R3, Ms Easton noted that this rule is the same as the operative Buller District Plan rule and considered the requested change out of scope of the original submission.

Hearing Panel's Evaluation

160. The Panel agrees with the amendment sought by the BDC and other submitters to increase the permitted ground floor area in SETZ-R3 to 150m^2, which is consistent with the operative Buller District Plan.

161. The Panel agrees with BDC and Ms Easton that the inclusion of three new matters of discretion proposed to SETZ-R20, relating to shading and loss of sunlight, loss of privacy, character, and amenity, is appropriate. We acknowledge that these are factors to consider when assessing and managing the impacts of these activities. We agree that these reflect the potential effects of the activity. (We note that similar changes have been proposed to other rules below).

162. In relation to the remainder of the submissions on SETZ-R3, SETZ-R16 and SETZ-R20, the Panel agrees that these should be rejected based on the conclusions reached by Ms Easton.

Hearing Panel's Recommendation

163. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are

[38] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin

accepted and recommends that the following amendments be made to rules **SETZ-R3 and SETZ-R20**.

SETZ-R3 Building Design in the Coastal Settlement Precinct

Activity Status Permitted

Where:

(f) All standards for Rule SETZ - R1 and R2 are complied with;

(g) New buildings are no more than 1~~0~~**5**0m^2 [39] in ground floor area and additions to existing buildings add up to no more than 50m^2 ground floor area.

Activity status where compliance not achieved: Restricted Discretionary

SETZ-R16 Port Activities at Jackson Bay Port

Activity Status Permitted

Where:

1. These are undertaken on lots fronting The Esplanade as follows:
    i. On legal road reserve between Mean High-Water Springs and the edge of the road carriageway;
    ii. On the following lots:
        i. Sections 208 and 209 TN OF Arawata; and
        ii. Sections 8, 9 and 10 TN of Arawata;
2. Permitted Port Activities are limited to the following:
    i. Cargo handling, including the loading, unloading, storage, processing and transit of cargo (including fish);
    ii. Passenger handling, including the loading, unloading and transit of passengers including passenger or cruise ship terminals;
    iii. Port administration.
    iv. Facilities for recreational boating.
    v. Activities associated with maritime navigation; and
    vi. Ancillary buildings, structures, utilities, signs, parking, landscaping, offices and other facilities.
3. Maximum building size is 200m^2;
4. Maximum building height is 5m;
5. Buildings must be setback 1m from the road and internal boundaries; and
6. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing. This standard does not apply to:

[39] Buller District Council (S538.555) Chris and Jan Coll (S558.598) Chris J Coll Surveying Limited (S566.598) William McLaughlin (S567.634) and Laura Coll Mclaughlin (S574.598)

i. Road boundaries;

ii. Buildings on adjoining sites that have a common wall along the boundary;

iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;

iv. Boundaries adjoining any site in a CMUZ - Commercial and Mixed Use, INZ - Industrial or GRUZ - General Rural Zone;

v. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or

vi. Solar panels and solar water heaters provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically.

Activity status where compliance not achieved: Discretionary

SETZ-R20 Buildings in the SETZ - PREC2 - Coastal Settlement Precinct not meeting Building Design Requirements in SETZ - R3

Activity Status Restricted Discretionary

Where:

1. All performance standards for Rule SETZ - R1 - and R2 are complied with.

Discretion is restricted to:

a. Design, size, height and location of buildings;

b. Design, size and location of parking and access;

c. Any requirement for financial contributions;

d. Retention of existing vegetation;

~~e.~~ Volume and location of earthworks; ~~and~~

f. ~~Landscape measures~~ **Measures to mitigate landscape effects;**[40]

g. Shading and loss of sunlight to adjoining sites;

h. Loss of privacy to adjoining sites; and

i. Character and amenity of the surrounding area.[41]

Activity status where compliance not achieved: Discretionary

2.5. Other permitted activity rules

Submissions and Further Submissions

164. Six submission points and two further submission points were received on rule SETZ-R4 and are summarised in a table on pages 39-40 of the s.42A report. Three submissions were in

[40] Consequential Plan wide amendment to Manawa Energy Limited S438.100
[41] Buller District Council (S538.568)

support and three requested amendments and two further submission points supported the amendments sought.

165. Seven submission points were received on rule SETZ-R5 and are summarised in a table on page 41 of the s42A report. Two submissions were in support, and five requested amendments.

166. Eight submission points were received on rule SETZ-R6 and are summarised in a table on pages 41-42 of the s42A report. Two submissions were in support, and six requested amendments.

167. Seven submission points were received in support of rule SETZ-R7 and are summarised in a table on page 42 of the s42A report.

168. Eleven submission points and one further submission point were received on rule SETZ-R8 and are summarised in a table on pages 42-44 of the s42A report. Two submission points were in support, and the remainder requested amendments. The further submission point supported the amendment sought.

169. Ten submission points and one further submission point were received on rule SETZ-R9 and are summarised in a table on pages 44-45 of the s42A report. Two submissions were in support, and the remainder requested amendments.

170. Thirteen submission points were received on rule SETZ-R10 and are summarised in a table on pages 45-46 of the s42A report. Three were in support, and the remainder requested amendments.

171. Thirteen submission points were received on rule SETZ-R11 and are summarised in a table on pages 46-47 of the s42A report. Four were in support, and the remainder requested amendments.

172. Twelve submission points were received on rule SETZ-R12 and are summarised in a table on page 47 of the s42A report. Three were in support, and the remainder requested amendments.

173. Thirteen submission points were received on rule SETZ-R13 and are summarised in a table on pages 47-48 of the s42A report. Five were in support, and the remainder requested amendments.

174. Fourteen submission points were received on rule SETZ-R14 and are summarised in a table on pages 48-49 of the s42A report. Five were in support, and the remainder requested amendments.

175. The Panel has considered the relevant submissions and further submissions received and adopts the summaries in the s42A Report and the addendum report.

Section 42A Report

176. Ms Easton acknowledged submissions in support of each rule.

SETZ-R4

177. Ms Easton supported a submission point from Ngai Tahu seeking to amend the standard providing for clustered units, so it applies in reticulated areas, noting that she considered this a drafting error of omission.

178. Ms Easton did not support a submission from FENZ seeking an additional standard for firefighting water supply, considering this a building consent matter. She acknowledged concerns around the sufficient provision of firefighting water to rural properties and invited FENZ to provide more specific information at the hearing on this matter.

179. Ms Easton supported a submission from Ngai Tahu seeking an amendment to allow the same residential densities as for SETZ-R2, considering the omission of a residential density in reticulated areas to be an error.

SETZ-R5

180. Ms Easton supported a submission from BDC seeking an amendment to limit agricultural activities to grazing where shelters and buildings for housing or feeding livestock are at least 30m from any boundary. Ms Easton noted that a similar submission was made on the Rural Lifestyle Zone, and she recommended the following change be made for consistency:

~~*Performance standards for poultry farming and pig keeping apply as follows:*~~

- ~~*For poultry setbacks of 10m from any residential building on another site and 2m from the site boundary;*~~
- ~~*For pig keeping setbacks of 50m from any residential building on another site and 100m for any shelter holding 4 or more pigs*~~

Shelters and buildings used to house or feed poultry or pigs must be setback at least 30m from any boundary.

181. Ms Easton did not support submission points[42] seeking that the rule be amended so that existing non-compliance does not preclude the application of the rule. She considered that existing building activities have existing use rights; therefore, this rule does not prevent these activities from continuing to operate at their current scale. However, new or expanded activities should comply with these standards to ensure that amenity and infrastructure effects are adequately managed.

SETZ-R6

182. Ms Easton supported in part a submission point from BDC seeking that the performance standard requiring compliance with the standards in SETZ-R2 be deleted. She considered that minor structures should still be required to comply with setbacks in SETZ-R2, as BDC sought in other zones.

183. Ms Easton did not support submission points[43] seeking that the rule be amended so that existing non-compliance does not preclude the application of the rule. She considered that existing building activities have existing use rights; therefore, this rule does not prevent these activities from continuing to operate at their current scale. However, new or expanded activities should comply with these standards to ensure that amenity and infrastructure effects are adequately managed.

[42] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin
[43] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin

184. Ms Easton did not support submission points seeking to increase the height in Standard 2 to 8m. She considered the notified height of 7m aligns with the maximum permitted heights in the Coastal Settlement Precinct and accessory buildings.

SETZ-R7

185. All submissions supported this rule, and no changes were requested or recommended.

SETZ-R8

186. Ms Easton did not support several submission points seeking that this rule be deleted, as she considered the rules are needed to protect amenity, noting that issues have arisen with the relocation of old dwellings on the West Coast.

187. Ms Easton did not support submission points from Greg Maitland seeking to increase the timeframe for compliance to 24 months, as she considered 12 months to be sufficient. She also did not support a submission point from David Ellerm seeking that a bond be required, as she did not think this was appropriate for a permitted activity.

188. Ms Easton supported the submission of the NZ Heavy Haulage Association Inc. in part, concerning the amendment to require buildings used for dwellings to have originally been dwellings. She considered that the other amendments requested did not make the rule clearer or easier to enforce.

SETZ-R9

189. Ms Easton did not support a submission from Marie Elder seeking an amendment to restrict all visitors and guests to a home business (including visitor accommodation) from socialising outdoors between 10 pm and 8 am. She noted that the District Plan cannot regulate the behaviour of visitors and that adverse effects are managed by limiting visitor numbers.

190. Ms Easton supported a submission from Waka Kotahi, seeking to limit the permitted level of vehicle movements to 30 equivalent car movements per day, noting that exceeding this number would consider the use of the vehicle crossing a high trip-generating activity. She noted that the current rule wording could allow 210 vehicle movements on one day and none of the rest of the week. She recommended the standard read: "a maximum of 10 heavy vehicle movements per day and whichever is the greater of 30 light vehicle movements per day ~~or~~ and 210 light vehicle movements per week.

191. Ms Easton did not support a submission point from Jane Whyte and Jeff Page seeking to delete the word '*permanently*' from condition 3(ii)(b). She considered that this would result in people coming to the business out of hours and create a greater risk of disturbance. She considered that the effects of people working outside of normal work hours would be appropriately assessed through the resource consent process.

192. Ms Easton supported a submission point from BDC seeking an additional performance standard outside the SETZ-PREC2 Settlement Centre Precinct, allowing a maximum of one full-time equivalent employee who resides off-site. She noted that the Council are concerned that the traffic generation standards would be difficult to monitor and enforce when there are combined business and residential activities in one dwelling.

193. Ms Easton did not support submission points[44] seeking that the rule be amended so that existing non-compliance does not preclude the application of the rule. She considered that existing building activities have existing use rights; therefore, this rule does not prevent these activities from continuing to operate at their current scale. However, new or expanded activities should comply with these standards to ensure amenity and effects are adequately managed.

SETZ – R10 Residential Visitor Accommodation

194. Paparoa Track Services sought to delete Standard 7 and considered that whole-house visitor accommodation should be permitted. Ms Easton did not support this submission point, noting that the loss of residential housing to visitor accommodation was the single biggest issue raised in the Settlements zone across the West Coast, and that this has had a significant impact on local communities. She noted that the impacts include a lack of housing for residents, difficulties for businesses in finding staff, the performance capabilities of volunteer fire brigades, overall community cohesion, and environmental effects. She noted that this matter was carefully examined during the development of TTPP and was the subject of specific consultation before this approach was included in the Plan.

195. WDC sought that Standard 7 be amended so the same rules apply in Westland as in the Buller District, rather than the Grey approach being applied to Westland. Ms Easton supported this submission, noting that Westland faces similar problems to Buller in relation to high tourist numbers. She said that the staff recommendation was to manage Westland and Buller visitor accommodation in the same way, but the TTPP Committee overruled this.

196. Ms Easton did not support a submission from Marie Elder seeking specific restrictions for Hartmount Place and Ross Place. She noted that these matters relate to a particular activity established under resource consent, and where there are compliance issues, that is not a matter for rules in a District Plan. The Panel notes this matter has been addressed above.

197. Ms Easton did not support a submission from Jane Whyte & Jeff Page seeking to delete standards 1, 3 and 7. She noted that these standards ensure that commercial activities are not established without appropriate oversight and limit the number of paying guests to manage the scale of adverse effects to what is reasonable in a residential area. Clause 7 pertains to the differences between the rules in Buller and those in other districts.

198. Ms Easton supported a submission point from GDC seeking that Clause 5 be amended to require records to be provided annually rather than on request.

199. Ms Easton did not support submission points[45] seeking to amend the rule so that existing non-compliance does not preclude its application. She considered that existing building activities have existing use rights therefore this rule does not prevent these activities from continuing to operate at their current scale. However, new or expanded activities should comply with these clauses in order to ensure amenity and effects are adequately managed.

SETZ-R11

[44] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin
[45] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin

200. Ms Easton did not support submission points[46] seeking to delete the acoustic insulation advice note. She noted that this matter would be addressed in the noise topic, and any changes to the rules would be reflected in consequential amendments to the advice note.

201. Ms Easton did not support submission points[47] seeking that the rule be amended so that existing non-compliance does not preclude the application of the rule. She considered that existing building activities have existing use rights; therefore, this rule does not prevent these activities from continuing to operate at their current scale. However, new or expanded activities should comply with these standards to ensure amenity and effects are adequately managed.

SETZ-R12

202. Ms Easton did not support submission points[48] seeking to delete the acoustic insulation advice note. She noted that this matter would be addressed in the noise topic, and any changes to the rules would be reflected in consequential amendments to the advice note.

203. Ms Easton did not support submission points[49] seeking that the rule be amended so that existing non-compliance does not preclude the application of the rule. She considered that existing building activities have existing use rights; therefore, this rule does not prevent these activities from continuing to operate at their current scale. However, new or expanded activities should comply with these standards to ensure amenity and effects are adequately managed.

SETZ-R13

204. Ms Easton supported a submission point from Westland Farm Services, seeking to delete Standard 9, as air discharge is a regional matter, and agreed that the standard is unnecessary for retail activities. She noted, however, that the Regional Air Plan is very permissive and that, in the context of other Plan provisions, additional regulation may be necessary for amenity reasons.

205. Ms Easton did not support a submission point from David Ellerm seeking that Standard 3 be amended to 5km rather than 10km. She noted that the implications of the distance had been considered and 10km was chosen to ensure the expected environmental outcomes of focusing retail businesses within areas specifically set aside for that activity.

206. Ms Easton did not support a submission from Foodstuffs seeking a restricted discretionary activity status, noting that the zone is largely residential in character and that a discretionary activity status provides for careful consideration of activities that could have significant adverse effects on the residential character.

207. Ms Easton did not support a submission from BDC seeking that rules 13 and 14 be combined to reduce confusion, noting that rule 14 explicitly states it does not apply to retail, home businesses, or visitor accommodations.

208. Ms Easton did not support submission points[50] seeking that the rule be amended so that existing non-compliance does not preclude the application of the rule. She considered that

[46] BDC, Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin
[47] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin
[48] BDC, Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin
[49] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin
[50] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin

existing building activities have existing use rights; therefore, this rule does not prevent these activities from continuing to operate at their current scale. However, new or expanded activities should comply with these standards in order to ensure amenity and effects are adequately managed.

SETZ – R14

209. Ms Easton supported a submission point from Westland Farm Services seeking that the rule apply in the SETZ-PREC4 Rural Residential Precinct and that Standard 6 be deleted. She considered control of dust, odour, or smoke discharge to be unnecessary for commercial activities, but noted, however, that the Regional Air Plan is very permissive and that, in the context of other Plan provisions, additional regulation may be necessary for amenity reasons.

210. Ms Easton did not support submission points[51] seeking to delete the acoustic insulation advice note. She noted that this matter would be addressed in the noise topic, and any changes to the rules would be reflected in consequential amendments to the advice note.

211. Ms Easton did not support submission points[52] seeking that the rule be amended so that existing non-compliance does not preclude the application of the rule. She considered that existing building activities have existing use rights; therefore, this rule does not prevent these activities from continuing to operate at their current scale. However, new or expanded activities should comply with these standards in order to ensure amenity and effects are adequately managed.

Hearing and Submitter Evidence

212. Frida Inta noted that, in relation to rule 10, up to 6 paying guests would generate heavy vehicle movements and considered the restriction on heavy vehicle movements to be illogical. She considered that retirement homes and educational activities should not be permitted activities, as these activities need public scrutiny. She also considered that Standards 13 and 14 should not include a permitted activity status.

213. Jonathan Bhana-Thomson, in evidence presented on behalf of the NZ Heavy Haulage Association, supported Ms Easton's recommendation to retain the relocated building rule, but continued to seek the other amendments requested in the submission on the basis that they would clarify the rule and make it easier to enforce.

214. Scenic Hotel Group sought further amendments to SETZ-R11 to provide for worker accommodation in the Settlement Zone in Barrytown and the Settlement Coastal Precinct in Punakaiki, and to delete the advice note stating that visitor accommodation is permitted in SETZ-PREC2.

215. In a written response to the Panel relating to their submission point on SETZ-R4, FENZ agreed with Ms Easton that papakainga development are likely to connect to reticulated water supplies, where they are available. They proposed an alternative amendment to the rule to require firefighting water supply, as follows:

[51] BDC, Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin
[52] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin

3.iii Provision shall be made for sufficient water supply and access to water supplies for firefighting in accordance with the New Zealand Fire Service Firefighting Water Supplies Code of Practice (SNZ PAS:4509:2008)

Advice Note:

The New Zealand Fire Service Firefighting Water Supplies Code of Practice PAS:4509:2008 should be consulted when determining the most appropriate design for firefighting water supply. Fire and Emergency New Zealand is available to assist with this.

216. Foodstuffs continued to seek that SETZ-R13 have a restricted discretionary activity status for activities that do not comply, as sought in their original submission point.

217. Marie Elder acknowledged Ms Easton's comments on SETZ-R10. She continued to seek the changes requested in her original submission, noting that she considered them reasonable requests given the road safety issues and her neighbourhood experience. She considered that the Buller District Plan provides precedent for rules controlling parking for commercial premises.

Reporting Officer Reply Evidence

218. In response to a question from the Panel about whether there is scope to consider non-notification clauses at Punakaiki, Ms Easton noted that the original submissions on the settlement zone provisions did not provide any specific scope for this. For completeness, she also reviewed submissions on the Scenic Visitor Zone and confirmed these also did not provide specific scope for non-notification clauses.

219. Ms Easton noted that the Scenic Hotel Group submission opposed all proposed rules and zone changes affecting their properties, and that the Panel could consider a non-notification clause as providing partial relief to this submission for some rules. However, she pointed out that there are no non-notification clauses in the Westland or Buller Operative District Plans, so she considered the link between the submission and introduction of a non-notification clause to be tenuous.

220. In relation to the Scenic Hotels requested changes to SETZ-R11, Ms Easton noted the original submission did not reference worker accommodation or Barrytown.

221. Ms Easton acknowledged the additional information provided by FENZ and recommended an amendment to SETZ-R4 to include an additional performance standard and advice note as follows:

Provision shall be made for sufficient water supply and access to water supplies for firefighting in accordance with the New Zealand Fire Service Firefighting Water Supplies Code of Practice (SNZ PAS:4509:2008)

***Advice Note**: The New Zealand Fire Service Firefighting Water Supplies Code of Practice PAS:4509:2008 should be consulted when determining the most appropriate design for firefighting water supply. Fire and Emergency New Zealand is available to assist with this.*

222. In relation to SETZ-R5, Ms Easton did not consider additional road boundary setbacks to be necessary for chicken and pig keeping. She noted that many other Councils have bylaws for pig and chicken keeping and that it is common for keeping of up to 10 chickens or 4 pigs to be excluded from more significant regulation. She recommended a similar approach be taken

to allow a domestic level of production where nuisance matters are less likely. She recommended the following amendment to Standard 3:

Shelters and buildings used to house or feed more than 10 poultry or 4 pigs must be setback at least 30m from any internal boundary

223. No further comment was given in the ROR in relation to Foodstuffs request for Restricted Discretionary Status for SETZ-R13.

Hearing Panel's Evaluation

224. The Panel generally agrees with Ms Easton's analysis of submissions and recommended changes to the Rules.

SETZ-R4

225. The Panel accepts Ms Easton's recommendation and reasoning to amend the SETZ-R4 to provide for clustering of units in relation to Papakainga Developments, where this is serviced, as she acknowledges these amendments address an omission error in the notified Plan, which only applied in areas not serviced by reticulation. We agree that this should also include providing for the same residential densities as in SETZ-R2.

226. The Panel acknowledge Ms Easton's revised position concerning the FENZ submission, and we accept her recommendation to include a performance standard and advice note in SETZ-R4 based on the further information provided by FENZ. We agree that this addresses a gap between policies and the building code.

SETZ-R5

227. The Panel agrees with Ms Easton's recommendation to amend the setback distance from residential properties for the keeping of pigs and poultry farming as partially sought by BDC. We do not agree with the wording proposed by BDC that the rule should be extended to all agricultural activities as this would have perverse outcomes.

228. We accept the setback distances should relate to shelters and buildings and that they be from any internal boundary rather than a residential building as the latter could result in shelters and buildings being built up to the boundary. We also agree that the allowable number of pigs should be restricted but we consider the wording should be clarified to refer to "*more than 3 pigs*". This reflects the notified plan limit.

229. In terms of poultry, we have found it difficult to justify scope for a limit of 10 as proposed by Ms Easton as BDC did not propose a limit in their submission. We have therefore not placed a limit on poultry.

SETZ-R6

230. The Panel agrees with Ms Easton's recommendation to amend the Rule as sought by BDC, as we consider this provides greater clarity to plan users without the need to refer to SETZ-R2. We note that the amendment necessitates the replication of all subclauses from Standard 2 of SETZ-R2 for consistency.

231. In relation to the remainder of the submissions on SETZ-R6 the Panel agree that these be rejected based on the conclusions reached by Ms Easton.

SETZ-R7

232. In relation to SETZ-R7, the Panel accepts Ms Easton's recommendation to retain the rule as notified.

SETZ-R8

233. The Panel agrees with the amendments proposed by Ms Easton to partially address the submission of the New Zealand Heavy Haulage Association, which states that buildings intended for dwellings must have originally been used as dwellings. We agree that the other submission points sought by the New Zealand Heavy Haulage Association do not clarify or simplify the rule, however we have added reference to a new Appendix 11 which will set out the information that is required in the building pre-inspection report which is based on information provided by the Association at the hearing. This is a Plan-wide amendment.

234. The Panel has also consolidated rule 8 by deleting Clause 5 and adding to Clause 3. We consider the two clauses were overlapping and there were elements of uncertainty between them. We consider the amendments now make it clear the works to completed within 12-months of the building being delivered to the site. We consider the scope for these amendments stem from the submissions seeking deletion given the changes reduce and clarify the rule. We therefore recommend the amendments proposed and note that similar amendments are proposed in other recommendations.

235. In relation to other submissions on SETZ-R8 the Panel agree that these be rejected based on the conclusions reached by Ms Easton.

SETZ-R9

236. The Panel agrees that further regulation of home businesses through the provision of an additional standard, requiring that no more than one full-time equivalent person engaged in the home business can reside off-site, as sought by BDC, is warranted. We note that, at present, there is no limit in the Plan; therefore, there is a potential for adverse effects on amenity to occur due to the scale of the business. While we note that the definition of Home Business provides some level of control, there needs to be further control in our view to address the scale of activity of a Home Business. We also note that without controlling scale, there are also potential impacts on the use of existing commercial centres.

237. While the Panel notes Ms Easton's recommendation to amend Standard 6 in relation to traffic movement as a result of the Waka Kotahi submission, as a result of our recommendations in the Transport Chapter on trip generation, this standard is to be deleted to avoid the potential for uncertainty between provisions. We note that the inclusion of the no more than one full-time equivalent person should address the amenity issue associated with people and vehicle numbers.

238. In relation to the remainder of the submissions on SETZ-R9 the Panel agree that these be rejected based on the conclusions reached by Ms Easton.

SETZ-R10

239. The Panel agrees with Ms Easton's amendment to Standard 7 to include '*and Westland*' as requested by the WDC. We acknowledge that Westland faces similar challenges to Buller in terms of high tourist numbers and a shortage of housing accommodation.

240. The Panel agree with GDC that providing records of letting activity annually, rather than on request, will enable better monitoring of potential effects and ensure compliance with regulatory controls.

241. In relation to the remainder of the submissions on SETZ-R10 the Panel agree that these be rejected based on the conclusions reached by Ms Easton.

SETZ-R11

242. In relation to SETZ-R11, the Panel accepts Ms Easton's recommendation to retain the rule as notified and reject the submissions based on the conclusions reached by Ms Easton.

SETZ-R12

243. The Panel notes that, as a result of recommendations in the Transport Chapter regarding trip generation, clause 2, relating to traffic movement, has been amended to ensure compliance with Rule TRN – R6 is also achieved in this situation. While we acknowledge that this has not been the situation for Homes Businesses where the rule has been deleted in favour of TRN – R6, in the case of Community Facilities, Educational Facilities, Emergency Service Facilities and Retirement Homes (where they are not exempted) we consider a bespoke approach is necessary in order to address the potential scale of these activities, which is not otherwise addressed. We are of the view that this is best achieved by retaining the notified part of the rule. We consider this is particularly necessary where such activities might seek to locate on local roads.

244. In terms of the remainder of the rule the Panel accepts the recommendations to retain the rule as notified (aside from the inclusion of a Standard relation to the risk of Electromagnetic coupling) and rejects the submissions on the basis of the conclusions reached by Ms Easton.

SETZ-R13 and SETZ-R14

245. The Panel has considered the submissions from Westland Farm Services on SETZ-R13 and R14. The submission appears to seek the deletion of SETZ-R13 or that Standards 9 and 6, of the two rules respectively, relating to the generation of dust, odour, or smoke, be deleted. Firstly, we agree with Ms Easton that responsibility for air discharges sits with the West Coast Regional Council (WCRC) through the Regional Air Plan. We acknowledge, however, that the effects of air discharges can extend into District Council territory, where there may be potential impacts on amenity. However, this is usually addressed through other rules, such as setbacks, or considered during the consenting process. In this situation, we agree that the standards should be deleted as a non-compliance with these standards could only appropriately be addressed via a consent from the WCRC.

246. Secondly, while the Panel do not agree that SETZ-R13 should be delete, we do accept that the rule as currently drafted is problematic. In particular clause 2 effectively means that all activity subject to the rule has to be within the PREC2 - Settlement Centre Precinct. This means that clauses 3, 6 and 7 are redundant because they relate to activity outside PREC2 - Settlement Centre Precinct. We consider the inclusion of clause 2 is an error and recommend it be deleted.

247. The Panel note that as a consequence of its earlier recommendation stemming from the Foodstuffs submission it has deleted clause 4.

248. The Panel notes that, as a result of recommendations in the Transport Chapter regarding trip generation, clause 5 and 4 respectively, relating to traffic movement, have been amended to ensure compliance with Rule TRN – R6 is also achieved. While we acknowledge that this has not been the situation for Home Businesses where the rule has been deleted in favour of TRN – R6, in the case of Retail Activities and Commercial Activities other than Retail, Home Business or Visitor Accommodation we consider a bespoke approach is necessary in order to address the potential scale of these activities, which is not otherwise addressed. We are of the view that this is best achieved by retaining the notified part of the rule. We consider this is particularly necessary where such activities might seek to locate on local roads.

249. In relation to the remainder of the submissions on SETZ-R13 and SETZ-R14, the Panel agrees that these should be rejected based on the conclusions reached by Ms Easton.

Hearing Panel's Recommendation

250. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part and recommends the following amendments are made to the rules **SETZ-R4** to **SETZ-R14:**

SETZ-R4 Papakāinga Developments

Activity Status Permitted

Where:

1. All standards for Rule SETZ - R2 are complied with;
2. Where developments are in the SETZ - PREC3 - Coastal Settlement Precinct all standards for Rule SETZ - R3 are complied with **however units are able to be clustered**;[53]
3. In areas not serviced by reticulated wastewater, stormwater and water supply:
   i. The average residential building density is no more than one unit per 1000m^2 net site area, ~~although units can be clustered~~; and
   ii. On-site wastewater, water supply and stormwater systems are developed to serve the entire papakāinga.
4. **In areas fully serviced by a network utility operator with wastewater, water supply and stormwater systems the average residential building density is no more than one unit per 500m^2 net site area; and**[54]
5. **Provision shall be made for sufficient water supply and access to water supplies for firefighting in accordance with the New Zealand Fire Service Firefighting Water Supplies Code of Practice (SNZ PAS:4509:2008)**[55]

Advice Notes:

1. Where a residential building or noise sensitive activity is located within:
   i. 80m of a State Highway with a speed limit of 70kph or greater; or
   ii. 40m of a State Highway with a speed limit of less than 70kph; or

[53] Ngai Tahu (S620.403)
[54] Ngai Tahu (S620.248)
[55] Fire and Emergency New Zealand (S573.049)

iii. 40m of a Railway Line; or

iv. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or

v. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.

Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply.

2. The New Zealand Fire Service Firefighting Water Supplies Code of Practice PAS:4509:2008 should be consulted when determining the most appropriate design for firefighting water supply. Fire and Emergency New Zealand is available to assist with this.[56]

Activity status where compliance not achieved: Discretionary

SETZ-R5 Agricultural, Horticultural and Pastoral Activities, Recreational Activities and Conservation Activities

Activity Status Permitted

Where:

1. All standards for Rule SETZ - R2 and in the SETZ - PREC3 - Coastal Settlement Precinct Rule SETZ - R3 are complied with;
2. The activity does not include:
   i. Intensive indoor primary production;
   ii. The storage and disposal of solid or liquid animal waste not generated on the site;
   iii. Woodlots;
   iv. Stock sale yards; or
   v. Farm quarries
3. Performance standards for poultry farming and pig keeping apply as follows:
   i. **Shelters and buildings used to house or feed poultry or more than 3 pigs must be setback at least 30m from any internal boundary** ~~For poultry setbacks of 10m from any residential building and 2m from the site boundary~~;
   ~~ii. For pig keeping setbacks of 50m from any residential building and 100m for any shelter holding 4 or more pigs; and~~[57]
4. Performance standards for beekeeping in the Westland District apply as follows:
   i. No bees may be kept on a property less than 600m^2 net site area;
   ii. Beehives must be placed with an obstruction in front of them or be elevated to ensure all bees are able to be 2.5m above ground level prior to crossing the site boundary; and
   iii. A water source for bees must be provided and maintained on the property.

Advice Note:

[56] Fire and Emergency New Zealand (S573.049)
[57] Buller District Council (S538.556)

If land is used for disposal of effluent or solid waste, then there may be rules in the Regional Air Plan and Regional Land and Water Plan administered by West Coast Regional Council that apply.

Activity status where compliance not achieved: Discretionary

SETZ-R6 Minor Structures

Activity Status Permitted

Where:

1. ~~All standards for Rule SETZ - R2 are complied with;~~ **Structures are set back:**
    i. **5m from the road and any GRUZ - General Rural or INZ Industrial Zone boundary and 1m from internal boundaries; except**
    ii. **In the SETZ - PREC4 - Rural Residential Precinct all buildings are setback 10m from road boundaries, residential buildings are setback 10m from the internal boundaries and non-residential buildings and accessory buildings are setback 5m from internal boundaries;**
    iii. **In the SETZ - PREC2 - Settlement Centre Precinct no setback from the road boundary is required where there is a verandah provided over an adjacent footpath.**
2. Masts, poles, aerials and pou whenua must not exceed 7m in height;
3. Any antenna dish must be less than 1m in diameter;
4. Any ornamental or garden structure must not exceed 2.4 m in height;
5. Any other structure must not exceed $10m^2$ and 2m in height.

Activity status where compliance not achieved: Controlled

SETZ-R7 Fences, Walls and Retaining Walls

Activity Status Permitted

Where:

1. Fences, walls and retaining walls are a maximum 2m height above ground level; and
2. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall or wall.

Activity status where compliance not achieved: **Restricted** Discretionary

SETZ-R8 Relocated Buildings

Activity Status Permitted

Where:

1. All standards for Rule SETZ - R1 and R2 and in the SETZ - PREC3 - Coastal Settlement Precinct Rule SETZ - R3 are complied with;

2. Any relocated building intended for use as a dwelling must have been designed**,** ~~and~~ built ~~to be~~ **and**[58] used as a dwelling;
3. A building pre-inspection report **in accordance with Appendix Eleven**[59] shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the **exterior** reinstatement works **including connections to infrastructure services and closing in and ventilation of the foundations** shall be completed within ~~a~~ 12-month**s of the building being delivered to the site** period; **and** [60]
4. The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site.~~; and~~

~~5. All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.~~[61]

Activity status where compliance not achieved: Controlled

SETZ-R9 Home Business

Activity Status Permitted

Where:

1. All standards for Rule SETZ - R1 and R2 and in the SETZ - PREC3 - Coastal Settlement Precinct Rule SETZ - R3 are complied with;
2. There is no limit to hours of operation in the SETZ - PREC2 - Settlement Centre Precinct;
3. Outside of the SETZ - PREC2 - Settlement Centre Precinct, hours of operation are limited to:
    i. 7am-10pm weekdays and 8am - 8pm weekends and public holidays;
    ii. Except where:
        a. The entire activity is located within a building;
        b. Each person engaged in the activity outside the above hours resides permanently on site; and
        c. There are no visitors, customers or deliveries to the activity outside of the above hours.
4. **Outside of the SETZ - PREC2 - Settlement Centre Precinct, there is no more than one full time equivalent person engaged in the home business that resides off site;** [62]
5. No external storage of products except those associated with residential use shall be visible from any SETZ - Settlement Zoned property or adjoining public place; **and**
6. No external generation of dust, odour or smoke occurs as part of the activity**.**~~; and~~

[58] New Zealand Heavy Haulage Inc (S616.009)
[59] New Zealand Heavy Haulage Inc (S616.009)
[60] Buller District Council (S538.558), Chris & Jan Coll (S558.175 S558.602), Chris J Coll Surveying Limited (S566.175 S566.602), William McLaughlin (S567.025 S567.638), Laura Coll McLaughlin (S574.175 S574.602)
[61] Buller District Council (S538.558), Chris & Jan Coll (S558.175 S558.602), Chris J Coll Surveying Limited (S566.175 S566.602), William McLaughlin (S567.025 S567.638), Laura Coll McLaughlin (S574.175 S574.602)
[62] Buller District Council (538.559)

~~7. A maximum of 10 heavy vehicle movements per day and whichever is the greater of 30 light vehicle movements per day or 210 light vehicle movements per week.~~[63]

Activity status where compliance not achieved: Discretionary

SETZ-R10 Residential Visitor Accommodation

Activity Status Permitted

Where:

1. This is ancillary to a residential or conservation activity;
2. All standards for Rule SETZ - R1 and R2 and in the SETZ - PREC3 - Coastal Settlement Precinct Rule SETZ - R3 are complied with;
3. There is a maximum of 6 paying guests at any one time;
4. Written notification to the District Council is required 10 working days prior to the activity commencing;
5. Records of letting activity must be kept and provided to the Council ~~on request~~ **annually**; [64]
6. No heavy vehicle movements are generated; and
7. In the Buller **and Westland**[65] District**s** the accommodation is homestay accommodation with a permanent resident living on site.

Advice Notes:

a. Compliance with the Building Code is required for any use of residential property for visitor accommodation. Written notice to the relevant Council Building Compliance Team must be provided and a Building Consent may also be required.

b. ~~In the Buller District, where~~ **Where** residential visitor accommodation has been lawfully established under the Buller**, Grey or Westland** District Plan provisions, then existing use rights **may** apply.[66]

c. This rule does not apply to Residential Visitor Accommodation in the Settlement Centre Precinct - refer to Rule SETZ - R11.

Activity status where compliance not achieved: Restricted Discretionary

SETZ-R11 Visitor Accommodation in the Settlement Centre Precinct

Activity Status Permitted

Where:

1. All performance standards for Rule SETZ -R2 are complied with.

Advice Note:

1. All types of visitor accommodation are Permitted in the SETZ - PREC2- Settlement Centre Precinct including homestay, hosted short-term residential accommodation, hotels, motels, boarding houses and backpackers.
2. Where visitor accommodation is located within:

[63] Consequential amendment stemming from amendments to the Transport Chapter, Buller District Council S538.083
[64] Grey District Council (S608.120)
[65] Westland District Council (S181.045)
[66] Consequential amendment stemming from amendments to the Residential Chapter

i. 80m of a State Highway with a speed limit of 70kph or greater; or

ii. 40m of a State Highway with a speed limit of less than 70kph; or

iii. 40m of a Railway Line; or

iv. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or

v. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.

Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply.

Activity status where compliance not achieved: Discretionary

SETZ-R12 Community Facilities, Educational Facilities, Emergency Service Facilities and Retirement Homes

Where:

1. All performance standards for Rule SETZ -R2 are complied with except that hose drying towers are exempt from height standards in all areas other than the Coastal Settlement Precinct;
2. A maximum of 10 heavy vehicle movements and the greater of 30 light vehicle movements per day or 210 light vehicle movements per week are generated **and compliance is achieved with TRN – R6**;[67] except:

   No vehicle movement limit applies to:

   a. Emergency Service Facilities;

   b. Community halls or Educational Facilities lawfully established at the time of notification of the Plan; or

   c. Activities within the SETZ - PREC2 Settlement Centre Precinct; and
3. No external storage of products except those associated with residential use shall be visible from any Settlement zoned property or adjoining public place**; and**
4. **Where the facility will be located within the Westport Radio Mast EM Overlay any hose drying or siren tower of a height of 18m or greater must be certified by Radio New Zealand that the risk of Electromagnetic coupling with this structure has been mitigated**[68]

Advice Note:

Where a noise sensitive activity is located within:

i. 80m of a State Highway with a speed limit of 70kph or greater; or

ii. 40m of a State Highway with a speed limit of less than 70kph; or

iii. 40m of a Railway Line; or

iv. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or

v. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.

[67] Consequential amendment associated with amendments to the Transport Chapter, Buller District Council (S538.083)
[68] Radio New Zealand (S476.042)

Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply.

Activity status where compliance not achieved: Restricted Discretionary

SETZ-R13 Retail Activities

Activity Status Permitted

Where:

1. Performance standards for Rule SETZ - R2 are complied with;

~~2. The activity is located within a SETZ - PREC2 - Settlement Centre Precinct;~~[69]

2. Where the activity is located outside of a SETZ - PREC2 - Settlement Centre Precinct, there is no SETZ - PREC2 - Settlement Centre Precinct or CMUZ Commercial or MUZ - Mixed Use Zone within 10km of the site;

~~4. The maximum combined floor and yard area for any retail activity is 250m^2~~;[70] and

3. The activity does not include:
   i. Service stations;
   ii. Car sales;
   iii. Yard-based retail; and
   iv. Drive through restaurants.
4. Outside of the SETZ - PREC2 - Settlement Centre Precinct, hours of operation are limited to 7am-10pm weekdays and 8am - 8pm weekends and public holidays.
5. Outside of the SETZ - PREC2 - Settlement Centre Precinct there are a maximum of 10 heavy vehicle movements per day, and whichever is the greater of 30 light vehicle movements per day or 210 light vehicle movements per week generated by the activity **and compliance is achieved with TRN – R6**; [71]
6. No external storage of products except those associated with residential use shall be visible from any Settlement zoned property or adjoining public place; **and**

~~9. No external generation of dust, odour or smoke occurs as part of the activity; and~~[72]

7. Vehicle crossings and access meet the design standards as set out in Appendix One Transport Performance Standards.

Activity status where compliance not achieved: Discretionary

SETZ-R14 Commercial Activities other than Retail, Home Business or Visitor Accommodation

Activity Status Permitted

Where:

1. The activity does not occur in the SETZ - PREC3 - Coastal Settlement Precinct or the SETZ - PREC4 - Rural Residential Precinct;
2. Performance standards for Rule SETZ - R2 are complied with;

[69] Westland Farm Services (S550.018)
[70] Foodstuffs (S464.004)
[71] Consequential amendment associated with amendments to the Transport Chapter, Buller District Council S538.083
[72] Westland Farm Services (S550.018)

3. Outside of the SETZ - PREC2 - Settlement Centre Precinct, hours of operation are limited to: 7am-10pm weekdays and 8am - 8pm weekends and public holidays;

4. Outside of the SETZ - PREC2 Settlement Centre Precinct, a maximum of 10 heavy vehicle movements per day and whichever is the greater of 30 light vehicle movements per day or 210 light vehicle movements per week **and compliance is achieved with TRN – R6**;-[73]

5. No external storage of products except those associated with residential use shall be visible from any Settlement zoned property or public place; **and**

~~5. No external generation of dust, odour or smoke occurs as part of the activity; and~~[74]

6. Vehicle crossings and access meet the design standards as set out in Appendix One Transport Performance Standards.

Advice Note:

Where a noise sensitive activity is located within:

i. 80m of a State Highway with a speed limit of 70kph or greater; or

ii. 40m of a State Highway with a speed limit of less than 70kph; or

iii. 40m of a Railway Line; or

iv. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or

v. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.

vi. Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply

Activity status where compliance not achieved: Restricted Discretionary

2.6. Rules SETZ-R17-R28 where resource consent is required

Submissions and Further Submissions

251. Seventy-nine submission points and one further submission point were received on rules SETZ-17-28 and are summarised in a table on pages 57-62 of the s42A report.

252. Ten submission points were received on rule SETZ-R17 and are summarised in a table on page 57 of the s42A report. Two were in support of the rule, four requested amendments, and four opposed the standard and sought its deletion.

253. Seven submission points and one further submission point were received for SETZ-R18. One submission point supported the rule, while five sought to delete the rule in its entirety. One further submission point sought to disallow an amendment.

254. Seven submission points were received on rule SETZ-R19 and are summarised in a table on pages 58-59 of the s42A report. Two were in support of the rule, and five requested amendments.

[73] Consequential amendment associated with amendments to the Transport Chapter, Buller District Council S538.083
[74] Westland Farm Services (S550.018.

255. Eleven submission points were received on the two rules numbered SETZ-21 and are summarised in a table on page 59 of the s42A report. Seven were in support of the rules, and four requested amendments.

256. Seven submission points were received on rules SETZ-22 and are summarised in a table on page 59- 60 of the s42A report. Two were in support, and five sought amendments.

257. Seven submission points were received on rules SETZ-24 and are summarised in a table on page 60 of the s42A report. Two were in support, and five sought amendments.

258. Fourteen submission points were received on rule SETZ-25 and are summarised in a table on pages 60-61 of the s42A report. Two were in support, and twelve sought amendments.

259. Seven submission points were received on rule SETZ-26 and are summarised in a table on pages 61-62 of the s42A report. Six were in support, and one sought an amendment.

260. Ten submission points were received on rule SETZ-27 and are summarised in a table on page 62 of the s42A report. Two were in support, four sought amendments, and four opposed the rule, seeking to delete it.

261. Six submission points were received on rule SETZ-28 and are summarised in a table on pages 62-63 of the s42A report. Two were in support, and four opposed the rule, seeking its deletion.

262. The Panel has considered the relevant submissions and further submissions received and adopts the summaries in the s42A Report and the addendum report.

Section 42A Report

263. Ms Easton acknowledged submissions in support of the rules.

SETZ-R17

264. Ms Easton did not support submission points[75] seeking to amend the rule so that existing non-compliance does not preclude its application. She considered that existing building activities have existing use rights therefore this rule does not prevent these activities from continuing to operate at their current scale. However, new or expanded activities should comply with these standards to ensure amenity and effects are adequately managed.

265. M Easton did not support several submission points[76] seeking that Standard 1 be deleted. She noted that the submitters provided no reasons for why this rule should apply in the Coastal Settlement Precinct, where the rules are carefully tailored to reflect the high natural values, and balance the natural over the built environment in those areas.

SETZ-R18

266. Ms Easton did not support several submission points[77] seeking that the rule be deleted, for the reasons she outlined concerning SETZ-R8.

[75] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin
[76] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin
[77] BDC, Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin

267. Ms Easton did not support a submission from David Ellerm seeking a new matter of control, stating that compliance with any Character Area standards for the locality was not required, as she noted that there are no character area standards.

SETZ-R19

268. Ms Easton supported a submission from BDC seeking three additional matters of discretion to be added, being (f) Shading and loss of sunlight to adjoining sites, (g) Loss of privacy to adjoining sites, and h) Character and amenity of the surrounding area. She considered these to be appropriate matters to consider when assessing and managing the effects of these activities.

269. Ms Easton did not support several submission points[78] seeking that the rule be amended so that existing non-compliance does not preclude the application of the rule. She considered that existing building activities have existing use rights; therefore, this rule does not prevent these activities from continuing to operate at their current scale. However, new or expanded activities should comply with these standards to ensure that amenity and effects are adequately managed.

SETZ-R21

270. Ms Easton noted that a numbering error had resulted in two SETZ-R21 rules in the notified plan and supported submissions seeking that this error be corrected.

271. Ms Easton supported submission points from BDC seeking reference to acoustic requirements in the visitor accommodation rule be deleted, that an additional matter of discretion around loss of privacy to adjoining sites be added, and that matter of discretion (g) be expanded to include all amenity and character effects.

SECOND SETZ-R21

272. Ms Easton supported a submission from BDC seeking that two additional matters of discretion be included in the community facilities rule, being: (j) Loss of privacy to adjoining sites; and (k) Character and amenity of the surrounding area.

273. Ms Easton did not support a submission from FENZ seeking a new activity status and permitted activity rule for Emergency Service Activities. She noted that existing activities would have existing use rights. She considered that new activities in largely residential locations should be subject to a resource consent process and management of adverse effects.

SETZ-R22

274. Ms Easton supported a submission from GDC seeking the rule numbering be fixed as referred to above.

275. Ms Easton did not support several submissions seeking to delete all of the performance standards. She considered that rural industry activities are likely to be inappropriate in some settlement zone areas, which are predominantly residential environments, particularly where there are high character and amenity values. She noted that the performance

[78] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin

standards aim to focus the development of any rural industry on appropriate locations where its adverse effects on amenity and character can be remedied or mitigated.

NEW RULE

276. Ms Easton supported submission points from Frank and Jo Dooley and Frank O'Toole seeking a separate restricted discretionary activity rule for fences, walls and retaining walls, noting that she had supported these submitters' similar submissions on other zones.

SETZ-R24

277. Ms Easton did not support several submission points[79] seeking that the rule be deleted, for the reasons she outlined in relation to SETZ-R8.

278. Ms Easton did not support a submission from Ngai Tahu seeking the rule be redrafted and merged with SETZ-R25, as she considered the rules were drafted to focus on like-grouped activities. She did not consider it necessary or appropriate to group these rules.

SETZ-R25

279. Ms Easton supported submissions seeking to remove fences, walls and retaining structures as a consequence of the new rule. She noted that the submitters had made similar submissions in other zones, and, as elsewhere, she supported these submissions and the proposed change.

280. Ms Easton did not support several submission points seeking that this rule also applies to industrial activities and that such activities are not non-complying. She noted that no reasons were given, except that the rule was deemed 'too stringent.'

SETZ-R26

281. Ms Easton did not support a submission point from Foodstuffs seeking a restricted discretionary activity status. She noted the Settlement zone is primarily a residential environment with compatible other uses, and that submissions raised strong concerns about the adverse effects of non-residential activities. She considered that these needs, namely establishing a supermarket, needed to be carefully managed and located in these areas.

SETZ-R27

282. Ms Easton did not support several submission points[80] seeking that this rule apply in the Coastal Settlement Precinct and not escalate to a non-complying activity status. She considered that industrial activities do not align with the zone's purpose and are inappropriate in coastal settlements. She noted the Settlement zone is primarily a residential environment with compatible other uses, and that submissions raised strong concerns about the adverse effects of non-residential activities. She considered that these industrial activities need to be carefully managed and located in these areas.

SETZ-R28

[79] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin
[80] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin

283. Ms Easton did not support several submission points[81] seeking that this rule be deleted, noting that no reasons were given. She acknowledged that this type of 'catch-all' rule often has a Discretionary activity status in other Plans and invited the submitters to present more information at the hearing about whether they would support that as an alternative relief.

Hearing and Submitter Evidence

284. A letter to the Panel from KiwiRail requested an amendment to SETZ-R22 to include two additional matters of discretion relating to effects on the rail corridor.

Reporting Officer Right of Reply

285. Ms Easton's right of reply did not address these rules further.

Hearing Panel's Evaluation

SETZ-R17

286. The Panel agrees that SETZ-R17 should not be amended so that existing non-compliance does not preclude the application of the rule as sought by submitters. We agree that existing building activities would have existing use rights; therefore, the rule does not prevent these activities from continuing to operate at their current scale. We also agree that Standard 1 should remain and acknowledge Ms Easton's comment that the rules have been carefully tailored to reflect the high natural values of the SETZ-PREC 3 Coastal Settlement Precinct and reflect the balance of natural over built environment in those areas.

SETZ-R18

287. The Panel agrees with Ms Easton that the rule should be retained, and we note she covered this matter under SETZ-R8. We also accept that there is no necessity for a new matter of control, stating Compliance with any Character Area standards for the locality, as there are no Character Area standards.

SETZ-R19

288. As noted, and reasoned above, the Panel agrees with BDC and Ms Easton that the inclusion of three new matters of discretion relating to shading and loss of sunlight, loss of privacy, character and amenity is appropriate.

289. The Panel agrees that SETZ-R19 should not be amended so that existing non-compliance does not preclude the application of the rule as sought by submitters. We agree that existing building activities would have existing use rights; therefore, the rule does not prevent these activities from continuing to operate at their current scale.

SETZ-R21

290. The Panel agrees with the submitters that a correction to the numbering sequence is necessary to eliminate having two SETZ-R21s, and this has been undertaken within the recommendations below.

[81] Chris & Jan Col, Chris J Coll Surveying Limited, Laura Coll McLaughlin and William McLaughlin

291. The Panel agrees with BDC and Ms Easton to include an additional matter of discretion regarding loss of privacy, as this is an appropriate consideration in assessing and managing the effects of visitor accommodation.

292. The Panel notes that Ms Easton has included in her Appendix 1, supporting the BDC submission, a request to delete references to '*visual*' and '*rural*' in subclause (g); however, we note that there is no analysis of this. We have considered this proposed amendment, and we agree that the matter of discretion should refer solely to '*amenity*' and '*character*' to address relevant matters associated with visitor accommodation, such as noise and scale of activity. We consider visual amenity is unlikely to be a major issue and that rural character within a Settlement zone is of limited relevance. While we accept this broadens the scope of the discretion we consider this is appropriate and more relevant to the activity concerned.

SECOND SETZ-R21

293. The Panel notes that BDC has sought an amendment to remove acoustic requirements from matter of discretion (i) in the second SETZ-R21 as a consequence of their broader submissions to remove reference to acoustic insulation in SETZ-R11 and SETZ-R12, which relate to transport effects. It seems to us that Ms Easton has mistakenly considered this submission under the first SETZ-R21, and therefore, there is no analysis. We note that the acoustic insulation requirements in these two rules have been addressed in the Noise Chapter recommendation. In terms of matters of discretion (i), we do not consider this to be directly related to the acoustic issue in SETZ-R11 and SETZ-R12. Turning to the matter of discretion itself, we are unclear as to what leaving the wording as '*noise management'* would mean in terms of exercising discretion. In our view, this matter of discretion is seeking to address situations where noise is emanating from the activities listed under the rules heading. We therefore consider the wording as notified to be appropriate and recommend that this submission be rejected.

294. The Panel agrees that an additional matter of discretion regarding loss of privacy, character, and amenity is appropriate, as we have previously discussed above.

295. The Panel notes that, as a consequential amendment resulting from SETZ-R12 in relation to the RNZ submission, a further matter of discretion has been added to this rule to address situations where a breach in the height limits near the RNZ facility at Cape Foulwind occurs.

296. The Panel agrees with Ms Easton's reasoning regarding the exclusion of Emergency Service Activities as a permitted activity, as sought by FENZ.

SETZ-R22

297. The Panel agree with Ms Easton regarding the retention of the performance standards to be deleted. We acknowledge that rural industry activities may be inappropriate in some settlement zones, which are predominantly residential environments, particularly where there are high character and amenity values.

NEW RULE

298. The Panel agrees with Ms Easton that a separate restricted discretionary activity rule for fences, walls and retaining walls is appropriate. We consider that having the default position for fences, walls and retaining walls as a discretionary activity is too restrictive in the context of the activity. We note that as a consequential amendment, as sought by the submitters, fences, walls and retaining walls would need to be removed from SETZ-R24 and SETZ-R25.

We also note Ms Easton has supported similar submissions from these submitters in other zones.

SETZ-R24

299. The Panel agrees with Ms Easton that SETZ-R24 should be retained. We note that submissions on this stem from those on SETZ-R8 and that we have agreed with Ms Easton's reasoning outlined in relation to SETZ-R8.

300. The Panel acknowledge Ms Easton did not support a submission from Ngai Tahu seeking that the rule be redrafted and merged with SETZ-R25. We agree these rules were drafted to focus on like-grouped activities and do not consider it necessary to merge them.

SETZ-R25

301. The Panel notes Ms Easton did not support several submission points seeking that SETZ-R25 also applies to industrial activities and that such activities do not become non-compliant. We have considered these submissions and agree with Ms Easton that the rule should be retained as notified.

SETZ -R26

302. In relation to the Foodstuffs submission seeking a restricted discretionary activity status, the Panel agrees with Ms Easton that the Settlement zone is primarily a residential environment with compatible other uses. Further, we note that there is only one supermarket within the Settlement zone.

SETZ-R27

303. The Panel accept Ms Easton's recommendation that SETZ-R27 should continue to exclude the Coastal Settlement Precinct. We agree that industrial activities do not fit within the purpose of the zone and are inappropriate in the coastal settlements, and therefore, their status as a non-complying activity is appropriate. We also agree that the Settlement zone is primarily a residential environment with compatible other uses, and these need to be carefully managed.

SETZ-R28

304. The Panel notes that Ms Easton did not support submissions seeking the deletion of SETZ-R28, and no reasons were given. We agree with Ms Easton that this type of '*catch-all'* rule often has a Discretionary activity status in other Plans, and we noted that we have recommended such a status in other chapters, such as Energy. The Panel considers, for reasons of consistency, that the activity status of SETZ-R28 should be revised to Discretionary.

Hearing Panel's Recommendation

305. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part and recommends the following amendments are made to Rules **SETZ -R17 – SETZ 28** and that these be accordingly renumbered.

SETZ-R17 Minor structures not meeting Permitted Activity Standards

Activity Status Controlled

Where:

1. This is not located in the SETZ - PREC3 - Coastal Settlement Precinct.
2. The minor structure does not exceed 10m in height; and
3. All performance standards other than height for Rule STEZ - R2 are complied with.

Matters of control are:

a. Design and location of structures; and
b. Landscape measures **Measures to mitigate landscape effects**.[82]

Activity status where compliance not achieved: Discretionary

SETZ-R18 Relocated Buildings not meeting Permitted Activity Standards

Activity Status Controlled

Where:

1. This is not located in the SETZ - PREC3 - Coastal Settlement Precinct; and
2. All performance standards Rule STEZ - R2 are complied with.

Matters of control are:

a. Design and location of structures;
b. Any requirement for financial contributions;
c. ~~Landscape measures~~ **Measures to mitigate landscape effects**; and[83]
d. Appearance of buildings.

Activity status where compliance not achieved: Discretionary

SETZ-R19 Residential Buildings not meeting Building and Sites - Design Standards in Rule SETZ - R2

[82] Consequential Plan wide amendment to Manawa Energy Limited S438.100
[83] Consequential Plan wide amendment to Manawa Energy Limited S438.100

Activity Status Restricted Discretionary

Where:

~~i.~~ **1.** The building projects into the 45 degree recession plane; or

~~ii.~~ **2.** The building is set back less than 1m from internal boundaries or 10m from internal boundaries in the Rural Residential Precinct; and

~~2.~~ **3.** All other performance standards for Rule SETZ - R2 are complied with.[84]

Discretion is restricted to:

a. Design and location of buildings;

b. Size and height of buildings;

c. Any requirement for financial contributions;

d. Design and location of parking and access; ~~and~~

e. ~~Landscape measures~~ **Measures to mitigate landscape effects;**[85]

f. Shading and loss of sunlight to adjoining sites;

g. Loss of privacy to adjoining sites; and

h. Character and amenity of the surrounding area[86]

SETZ – R21 Residential Visitor Accommodation not meeting Rule STEZ - R10

Activity Status Restricted Discretionary

Where:

1. All performance standards for Rule SETZ - R1 - and R2 are complied with.

Discretion is restricted to:

a. Number of visitors staying on site;

b. Number of days of use for the visitor accommodation;

c. Management of traffic and parking;

d. ~~Landscape measures~~ **Measures to mitigate landscape effects**;[87]

e. Any impacts on the production values of the surrounding land;

f. Any requirement for financial contributions;

g. Effects on ~~visual~~ amenity and ~~rural~~ character; ~~and~~ [88]

h. Methods of wastewater treatment and disposal; **and**

i. Loss of privacy to adjoining sites.[89]

Activity status where compliance not achieved: Discretionary

[84] Schedule 1 Clause 16(2) RMA
[85] Consequential Plan wide amendment to Manawa Energy Limited S438.100
[86] Buller District Council (S538.568)
[87] Consequential Plan wide amendment to Manawa Energy Limited S438.100
[88] Buller District Council (S538.570)
[89] Buller District Council (S538.570)

SETZ - R2~~1~~2 Community Facilities, Educational Facilities, Emergency Service Facilities and Retirement Homes not meeting Permitted Activity Standards [90]

Activity Status Restricted Discretionary

Discretion is restricted to:

a. Design and location of buildings;

b. Size and height of buildings;

c. Vehicle movements and access;

d. Design and location of parking and access;

e. ~~Landscape measures~~ **Measures to mitigate landscape effects**;[91]

f. Any requirement for financial contributions;

g. Methods of water supply, wastewater and stormwater treatment and disposal;

h. Hours of operation; ~~and~~

i. Acoustic and noise management requirements;

j. Loss of privacy to adjoining sites;

k. Character and amenity of the surrounding area; and[92]

l. Within the Westport Radio Mast EM Overlay, any requirements to mitigate the risk of electromagnetic coupling, including during the construction phase[93]

Notification:

Applications for community facilities will always be limited notified to adjacent neighbours and may be publicly notified.

Activity status where compliance not achieved: N/A

SETZ – R2~~2~~3 Rural Industry

Activity Status Restricted Discretionary

Where:

1. This is not in the SETZ - PREC3- Coastal Settlement Precinct;
2. There is no INZ - Industrial Zoned site of sufficient size to accommodate the activity within 10km of the proposed site; and
3. All performance standards for Rule SETZ - R2 are complied with.

Discretion is restricted to:

a. Design and location of buildings;

b. Design and location of parking and access;

c. ~~Landscape measures~~ **Measures to mitigate landscape effects**;[94]

[90] Grey District Council (S608.774) Buller District Council (S538.571)
[91] Consequential Plan wide amendment to Manawa Energy Limited S438.100
[92] Buller District Council (S538.571)
[93] Consequential amendment resulting from Radio New Zealand (S476.042)
[94] Consequential Plan wide amendment to Manawa Energy Limited S438.100

d. Hours of operation;

e. Vehicle movements;

f. Any requirement for financial contributions;

g. Methods of water supply, wastewater and stormwater treatment and disposal;

h. Management of odour, noise, light and dust; and

i. Acoustic and noise management requirements.

Activity status where compliance not achieved: Discretionary

SETZ-R25 Fences, Walls and Retaining Walls not meeting Permitted Activity standards

Activity Status Restricted Discretionary

Discretion is restricted to:

a. Design and location of structures;

b. Height of structures; and

c. Shading and dominance effects on adjoining sites

Activity status where compliance not achieved: N/A [95]

SETZ – R246 Residential Activities and Residential Buildings, Buildings and Sites - Design, Conservation, Recreational, Agricultural, Horticultural and Pastoral Activities, Papakāinga Developments, Minor Structures, ~~Fences, Walls and Retaining Walls~~,[96] Relocated Buildings and Buildings not meeting Permitted or Restricted Discretionary Activity Rules in relation to Performance Standards in Rules SETZ - R1 or SETZ - R2 or SETZ - R4

Activity Status Discretionary

Activity status where compliance not achieved: N/A

SETZ – R257 All Activities and Buildings, Papakāinga, Minor Structures~~, Fences, Walls and Retaining Walls~~[97] and Port Activities at Jackson Bay Port in the Coastal Settlement Precinct not meeting Permitted, Controlled or Restricted Discretionary Activity Rules

Activity Status Discretionary

Where:

1. This is not Industrial Activity subject to Rule SETZ - R2~~7~~**8**.[98]

Activity status where compliance not achieved: Non-complying

SETZ – R2~~6~~8 Home Business, Retail Activities, Commercial Activities and Residential Visitor Accommodation not meeting Permitted, Controlled or Restricted Discretionary Activity Rules

[95] Frank and Jo Dooley (S478.042) and Frank O'Toole (S595.024)
[96] Frank and Jo Dooley (S478.036), (S478.042) and Frank O'Toole (S595.024)
[97] Frank and Jo Dooley (S478.036), (S478.042) and Frank O'Toole (S595.024)
[98] Consequential amendment from Grey District Council (S608.774) Buller District Council (S538.571)

Activity Status Discretionary

Activity status where compliance not achieved: N/A

SETZ – R2~~7~~9 Industrial Activities not meeting Rule SETZ - R2~~2~~3 [99]

Activity Status Discretionary

Where:

1. This is not located in the SETZ - PREC3 - Coastal Settlement Precinct;
2. There is no INZ - Industrial Zoned site of suitable size to accommodate the activity within 10km of the proposed site.

Activity status where compliance not achieved: Non-complying

SETZ – R30 Any activity not provided for by another Rule in the zone

Activity Status ~~Non-complying~~ **Discretionary**[100]

Activity status where compliance not achieved: N/A

SETZ – R31 Industrial Activities not meeting SETZ – R29.

Activity Status: Non-complying

Activity status where compliance not achieved: N/A[101]

2.7. Subdivision standards SUB-S1 in relation to the settlement zone

Submissions and Further Submissions

306. Three submission points and one further submission point were received on the minimum lot size standard and are summarised in a table on page 67 of the s42a report.

307. The Panel has considered the relevant submissions and further submissions received and adopts the summaries in the s42A Report.

Section 42A report

308. Ms Easton acknowledged submissions in support of the rule.

309. In relation to Davis Ogilvie's support of minimum lot sizes in sewered and unsewered areas, Ms Easton noted that the reference to sewered areas is an error and different to the approach taken in the residential density rule.

310. Ms Easton did not support a submission from David Ellerm seeking an increase in minimum lot sizes and noted that no reason was given for requesting this change. She noted that the

[99] Consequential amendment from Grey District Council (S608.774) Buller District Council (S538.571)
[100] Chris & Jan Coll (S558.632), Chris J Coll Surveying Limited (S566.632), William McLaughlin (S567.665) and Laura Coll McLaughlin (S574.632)
[101] Consequential amendment stemming from Chris & Jan Coll (S558.632), Chris J Coll Surveying Limited (S566.632), William McLaughlin (S567.665) and Laura Coll McLaughlin (S574.632)

settlement zone replaces several different zones across the three plans, and the proposed lot sizes represent a 'harmonisation' approach to density.

311. Ms Easton did not recommend any amendments to the rule.

Hearing and Submitter Evidence

312. No hearing or submitter evidence was presented in relation to this matter.

Reporting officers right of reply

313. The reporting officer's right of reply does not address this matter further.

Hearing Panel's Evaluation

314. The Panel notes Ms Easton, in response to a submission in support from Davis Ogilvie, referred to an error in SUB-S1(e) related to sewered areas, and she said this was a different approach than that taken in the residential density rule. We take from Ms Easton's response that the error concerned goes beyond a minor Schedule 1 Clause 16(2) RMA matter and therefore would require a specific amendment to the Plan.

315. The Panel agree with Ms Easton that there is no reason to increase the minimum lot sizes in the Settlement zone and no amendments to the subdivision standards are recommended.

Hearing Panel's Recommendation

316. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that no amendments are made to the Subdivision **Standards-SUB-S1** in relation to Settlement Zone.

2.8. Planning maps and rezoning requests

Submissions and Further Submissions

317. Thirty-two submission points and four further submission points on the planning maps and zoning requests were received and are summarised in a table on pages 68-70 of the s42A report. Twenty submissions were in support, and twelve requested amendments.

318. The Panel has considered the relevant submissions and further submissions received and adopts the summaries in the s42A Report and the addendum report.

Section 42A Report

319. Ms Easton acknowledged the submissions received in support of the existing zoning.

Buller District

320. Ms Easton did not support a submission from Terra Firma Mining seeking that the Settlement Zone around the General Industrial zone, as proposed by Reefton Engineering, be reviewed. She noted that the new area of the Settlement Zone-Rural Residential Precinct, along Andersons Road, is separated from the General Industrial Zone and Reefton Engineering by the State Highway, which she considered a logical zone boundary.

321. Ms Easton noted that BDC carefully considered reverse sensitivity when considering where to provide further residential development at Reefton, where existing residential development adjoins the industrial zone at Elizabeth Road. Some of this land was downzoned to General Rural. Reefton is constrained by flood hazards and the land down Andersons Road represented the best available option for further low-density residential development as it is not subject to flooding and is contiguous with the remaining undeveloped General Residential zone.

322. Ms Easton did not support a submission from Scenic Hotel Group opposing the proposed zoning of several of their sites and seeking compensation for any restrictions. She noted that the operative Scenically Sensitive Residential Zone in the Buller District Plan was a very restrictive zone for development, and the provisions of this zone have been rolled over into the pTTPP. She considered existing businesses would have existing use rights, and the restrictions of the zone would only apply if further development were proposed. Ms Easton noted that the submission does not identify what alternative zoning would be preferred, and that s85 of the RMA prohibits compensation for restrictions arising from zoning.

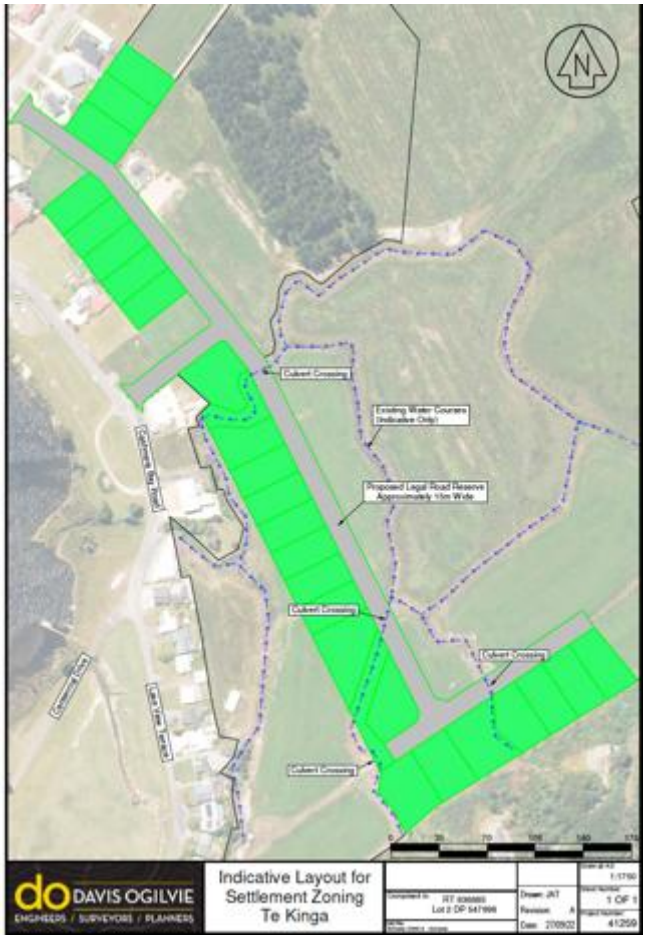
323. Ms Easton did not support the submission from Frida Inta seeking additional residential properties to be included in the Settlement Zone. She considered that there is sufficient land available within the zone for further development to meet demand for many years.

Grey District

324. Ms Easton did not support a submission from David Ellerm seeking that Lot 1 DP 3316 be zoned as a Settlement Zone, noting that no reasons were given for requesting rezoning, and she was unable to confirm the property's location.

325. Ms Easton did not support a submission from Kevin Klempel seeking to rezone 11 Lake Brunner Road to a Settlement Zone, as it would not create the same infrastructure requirements as the proposed General Residential Zone. Ms Easton noted that this site was identified as being appropriate for residential zoning when the Grey District Plan was developed in the 1990s. She noted that there is no requirement for the landowner to undertake development, and the zoning has not been utilised over the past 20 years. Ms Easton did not support rezoning the site to get around infrastructure requirements.

326. Ms Easton did not support a submission point from Cynthia Robins seeking that commercial land in small towns such as Blackball be given commercial status. She noted that the Settlement Zone – Settlement Centre Precinct is the equivalent of a commercial zone in the rural settlement context and aims to support commercial activities in these locations. She noted that there is a Settlement Centre Precinct in Blackball.



327. Ms Easton did not support a submission from Russel Robinson seeking to rezone Lot 1 DP2820 (14.0027ha) and Pt RS 3806 (12.7168ha) at Moana from Settlement Zone with a Rural Residential Precinct to a mix of residential and commercial development, because at the time of writing the s42A report she had not received feedback from GDC on the supporting technical information.

328. Ms Easton did not support a submission from Te Kinga Estates seeking that Lot 2 568525 on Arnold Valley Road be rezoned from General Industrial Zone to Settlement Zone- Rural Residential Precinct. She was unable to confirm which land the request related to.

329. Ms Easton did not support a submission from Greg Maitland seeking that the Settlement Zone – Rural Residential Zoning at Kumara be removed, and that land around Greenstone be zoned for this purpose instead. She noted that the Rural Residential Precinct is intended to be a lower-density 'halo' around the main settlements, allowing for alternative residential lifestyles on larger lots adjacent to the services provided in the settlement. She noted that the intent is not to create new settlements separate from existing communities, but to reinforce and support the existence and expansion of the current West Coast communities.

330. Te Kinga Investments Ltd sought to rezone 28ha of land at Lot 2, DP 547998, from the Settlement Zone - Rural Residential Precinct to the Settlement Zone (no precinct) to allow sites of up to 1000m² to be developed. Ms Easton noted that GDC supported the rezoning for locations identified in green in the image below.

331. She noted that this would result in a split zoning of the property, with a new road established to service the Settlement Zone properties, and the remainder of the site remaining in the Settlement Zone – Rural Residential Precinct. She recommended that the land be rezoned in line with the Council's advice.

Westland District

332. Ms Easton did not support a submission from Scenic Hotel Group opposing the zoning of the following properties and seeking compensation for any restrictions from the zoning:

- 31 Pekanga Drive, Fox Glacier
- 35 Pekanga Drive, Fox Glacier

- 24 Cowan Street, Franz Josef Glacier
- 26 Cron Street, Franz Josef Glacier
- 2 Condon Street, Franz Josef Glacier

333. Ms Easton made the following comments:

- The Fox Glacier property is understood to be staff accommodation on a residential street, and Settlement Zoning is appropriate as it is the same zone as the surrounding residential properties.
- All three Franz Josef properties are within a Settlement Zoned area.
- Significant planning work has been carried out by the Westland District Council and the Franz Josef community because of the multi-hazard situation. This has resulted in an overall approach to Franz Josef zoning which envisages the centre moving northwards – away from the Waiho River and the Alpine Fault. In particular, the focus is on ensuring that further sensitive activities are not developed on the Alpine Fault – which runs directly through 24 Cowan Street.

334. Ms Easton did not support a submission from David Ellerm seeking a new spatial layer to manage character area settlements, specifically for the Te Kinga Bay – Cashmere Road Character Area. She noted that no such framework has been developed that can be incorporated into the Plan. She agreed that the communities around Lake Brunner would benefit from development of a proactive planning framework or structure planning, but considered this to be a role of the Grey District Council and outside of TTPP to develop.

S.42a Addendum report

335. Ms Easton's addendum report, addressed the Russel Robinson submission further, noting that she had received technical feedback from GDC as follows:

- The Council confirmed there is capacity at the Moana wastewater treatment plant. There is currently no sewer pipe connection along Arnold Valley Road to the site, but the Council was satisfied that a solution could be put in place. Specific detailed investigation and design would be required at the time of the subdivision consent, which will include some pipework upgrades through the existing wastewater network.
- Moana currently has no water supply network, and the proposed large-scale development would require a reticulated network to be developed, including a firefighting water supply. The Council has funding in the 2024/25 year to commence investigations into a reticulated solution. The developer would need to fund the development; however, the Council would need to consider and consult with the existing community on the proposal, available options, and funding mechanisms. Specific detailed investigation and design for the development would be required at the time of the subdivision consent.
- The Council were satisfied that the proposed stormwater solution was technically feasible and noted that specific detailed investigation and design would be required at the time of the subdivision consent.

336. Based on the Council's comments, Ms Easton did not oppose the proposed rezoning but did not support providing for densities down to 300m², as she was concerned that the submitter was seeking urban densities without the degree of infrastructure and amenity typically associated with these densities (e.g., footpaths, streetlights, and parks). She noted that 300

m² is smaller than the permitted area for the General Residential zone. The TTPP is clear that the Settlement zone is a rural zone with rural infrastructure expectations, and densities of 500m^2 are only allowed where 3 waters reticulation is provided. She considered the lack of water supply at Moana to be problematic. She noted that the General Residential zone also requires 3 waters reticulation and connection to a community system, and that financial contribution requirements are included, recognising this.

337. Ms Easton was also concerned about the connection and cohesion of the development to the wider Moana Settlement and whether the proposal fits the policy framework, particularly RURZ-P2 and RURZ-P12. She noted that the site is located away from the Moana Valley township up Arnold Valley Road, and that the Plan recognised this by providing for Rural Residential Precinct zoning, with Rural Lifestyle Zone to the north. The current community is based around the school, community facilities, park and small commercial area alongside the lakefront area, which provides substantial amenities. The Plan anticipated that the residential area would continue along the area behind the lakefront, with a gradation of lower-density properties up Arnold Valley Road. She noted that the proposed 200 dwellings would nearly double the size of Moana, which currently has around 300 dwellings, and that the development plan contains no details on facilities such as footpaths, parks, or on-street car parking. She acknowledged there was some provision for a retail area but considered the detail about what was proposed to be low.

338. Ms Easton concluded that she supported the submission in part, in that she supported a rezoning to Settlement Zone, with provision for a Settlement Centre Precinct within the site, but not bespoke provisions for the site that would allow a higher level of residential density than provided for in the Settlement Zone.

339. Ms Easton recommended rezoning the site to Settlement Zone.

Submitter and hearing evidence

Te Kinga Investments

340. Pauline Hadfield presented planning evidence on behalf of Te Kinga Investments (TKI). She noted that TKI supported Ms Easton's recommendations and requested that the Panel accept the reporting officer's recommendation. Ms Hadfield also identified two apparent errors in the s.42A report. These included a plan caption that incorrectly identifies the recommended zoning, and an error in the accept/reject table.

Russel Robinson and Brunner Builders

341. Russel Robinson presented a statement in support of his submission. He considered that Moana had grown significantly and now faced a shortage of rental accommodation and land available for building. He noted that there is current demand for housing in the area and he expected this to increase in future.

342. Mr Robinson noted that the notified commercial zone within Moana included the existing school and hotel and considered that there was little land available in the township for commercial activity. He advised that GDC had suggested including a village centre within his development, intended to provide for activities suitable in a residential area, with a notified commercial area across the road accommodating larger activities.

343. Craig Barr presented planning evidence in support of the proposed rezoning. Mr Barr noted that the notified SETZ Precinct 4 zoning allows for 4,000m² lots and has the potential to

create 45-50 lots across the site. He considered that the site could absorb greater levels of residential development and supported a zoning framework providing for up to 200 residential units with allotment sizes of 300m^2 or more, provided that an average lot size of 1000m^2 is achieved across the site. Mr Barr considered that the ODP would ensure the appropriate management of roading, pedestrian connections, indigenous biodiversity, and the provision of local retail and services.

344. Mr Barr acknowledged that the site contains two regional council consents associated with the former landfill and considered that the proposed rezoning and subsequent development would still ensure that the conditions of these consents are fulfilled.

345. Helen Kellett provided further technical evidence to support the rezoning on contaminated land, Louise Bailey on landscape, Richard Nichol on ecology and Tony Penney on transport.

346. In further rebuttal evidence, Mr Barr responded to Ms Easton's concerns about the residential density and lack of detail in the development plan area. Mr Barr considered that the proposed lot sizes would provide for flexibility and variation in housing options, and considered the proposed rule limiting vegetation clearance in the Forest Residential Overlay area would limit the ability to develop 300m^2 lots to the eastern part of the site around the proposed SETZ PREC 2 local retail overlay. Mr Barr advised that, if the hearings panel had similar concerns about a proliferation of small lots, he would support limiting the number of lots under 500m² to a maximum of 20 and provided text amendments to illustrate how this could be achieved in SUB-S1.

347. Mr Barr considered that the ODP and location-specific rules proposed would ensure the pattern of development would become less intensive as the distance from Moana increased, and did not consider it would adversely impact the cohesion of Moana or wider landscape values. He also noted the presence of a relatively large undeveloped SETZ zoned site to the east, and including a commercial zone would provide for additional development, which he considered would double Moana's size and provide for further expansion of commercial activity. Mr Barr noted that with the lake to the south, the river and DOC land to the west and northwest, the only practicable opportunity for development is to the north and east of Moana. In this regard, he considered the site to be important from a spatial zoning perspective.

348. Following the hearing, further supplementary evidence was provided. In this, Mr Barr responded to questions from the Panel and provided an updated set of proposed provisions. Mr Barr proposed an amendment to the matter of discretion relating to no-build areas, to remove unnecessary wording regarding the avoidance of development in these areas.

349. The Panel queried the appropriateness of the Policy DA-P1(b) wording, which requires development to be in general accordance with the proposed ODP, in relation to protection of natural inland wetlands. Having further considered the ecological evidence of Mr Nichol, Mr Barr considered that the roading alignment affecting wetland 6 should be moved northward to avoid appearing to predetermine any resource consent process for works within the wetland setback. He considered there was a consent pathway available for the Regional Council to assess any proposed modification of the wetlands, under the NES-F and the policy framework of the National Policy Statement Freshwater, Regional Policy Statement and the West Coast Land and Water Plan. He did not consider a stronger policy direction appropriate, noting that the subdivision and development should be able to undertake appropriate wetland modification based on the wetland values and stormwater management for the site.

350. Mr Nichol provided supplementary evidence addressing wetland identification, significance and protection. He did not consider it necessary to identify the 3 natural inland wetlands on the DAP and did not oppose the modification of wetlands 1 and 2. He supported the retention of Wetland 6, which is a significant natural inland wetland.

351. In relation to a Panel query about the appropriateness of development being required to be in general accordance with the DAP, and whether stronger language was required, Mr Barr considered that sufficient flexibility should be accounted for as part of the detailed subdivision design. He considered the location-specific provisions to be sufficient guidance and direction on what constitutes general accordance and what the critical elements are.

352. Mr Barr did not consider amendments requiring building platforms to be necessary, as this is already required by SUB-S2(2) for lots less than 4ha. He noted that wider areas of vegetation clearance could be identified, with other areas required to have indigenous vegetation protected by a consent notice.

353. Mr Barr clarified that a reference in the Moana DAP to a 5m landscaping strip is an error and should show a 10m width.

354. Mr Barr considered that the proposed retail precinct would not undermine the existing commercial centre at Moana, noting that the built form would be limited by the zone rules and taking into account the land area required for roads and infrastructure.

355. Mr Barr considered the Settlement Zone to be more appropriate than the General Residential Zone. He noted that the proposed average density would result in development outcomes being significantly less than that anticipated by the GRZ. He also considered the Settlement zone retail framework better suited to Moana North than the neighbourhood retail zone accompanying the GRZ. He noted that the RMA Section 6 matters requiring intervention and management are not typically addressed through GRZ zoning. He considered that the proposed zoning provides a graduated pattern of density, and the SETZ framework, which is part of the rural area framework, is more appropriate to manage landscape and biodiversity values than the GRZ framework.

Reporting Officers Right of Reply

356. In relation to the Russel Robinson/Brunner Builders submission, Ms Easton did not support the amended zoning proposals presented at the hearing. She considered the proposed density approach, using a minimum and minimum average lot size, was not consistent with the Plan, would be complex to administer, and that there were no compelling reasons for this approach to be taken. She was concerned that the averaging approach could result in a very small number of very large sites and many sites smaller than 1000m² being developed.

357. Ms Easton did not support 300m^2 lots around the Settlement Centre Precinct. She considered lots of this size likely to result in large areas of impervious surfacing, leading to cumulative effects on stormwater generation. She reiterated that 300 m² is smaller than the minimum permitted lot size in the General Residential zone and out of kilter with anticipated densities in the Settlement zone.

358. Ms Easton considered that if the Panel deemed small lots appropriate, they should be specifically located and zoned as General Residential, with the normal minimum lot size of 350m², to provide for appropriate infrastructure and management. She also considered the

former landfill should be specifically identified as a no-build area, and supported the proposal for the Settlement Centre Precinct, noting that the location appeared appropriate.

359. With respect to the proposed objectives and policies, Ms Easton considered the wording to be vague and not clearly linked to the requirements in the proposed rules. She considered that stronger language and more specific requirements flowing through to the rules would be necessary if the submitter's proposal were to proceed.

360. Ms Easton raised further concerns about the ability to service the site. She noted that the wastewater treatment plant's resource consent would expire within five years, and there is a reasonable expectation that the plant would need to transition to a land-based disposal approach, which could incur significant unbudgeted costs for the Council. She advised that the stormwater system upgrade was not included in the Council's long-term plan or infrastructure strategy and remained concerned about the potential cumulative effects of stormwater discharge.

361. Ms Easton also highlighted the comments in a cultural impact assessment prepared in response to a lodged plan change application for the site, which is currently on hold. She noted that the rezoning proposal does not appear to address the matters raised in the cultural assessment, and she understood no further consultation had been undertaken with Ngati Waiwai.

362. Ms Easton concluded that she did not oppose rezoning the site to a Settlement Zone, allowing for 500m² sites where reticulation is provided. She also supported the provision of a Settlement Centre Precinct as proposed by the submitter. Her recommendation was not altered by the further evidence presented.

Hearing Panel's Evaluation

Buller District

363. The Panel agrees with Ms Easton's recommendation to decline the submission from Terra Firma Mining seeking a review of the Settlement zone along Andersons Road in Reefton. While we acknowledge the potential reverse sensitivity concerns, the proposed zoning is clearly separated from the Industrial zone by the State Highway, and we consider this provides a logical separation boundary. We also note that, at its closest point, the Industrial zone is part of railway land designated by KiwiRail, and that distances to Industrial zoned land where industrial activity is occurring, or might be anticipated to occur, exceed 70m at their closest point. We therefore recommend that the Settlement zoning on Andersons Road be retained, acknowledging that this area is considered the best option for further expansion in Reefton.

364. The Panel agrees with Ms Easton's recommendation not to accept the submission from Scenic Hotel Group opposing the proposed zoning of sites at Punakaiki. We note that the submitter provided no alternative zoning options, and we agree that no compensation is available to the submitters who may be affected by the proposed zoning.

365. The Panel agrees with Ms Easton's recommendation to reject the submission for more residential sections to be included in the Settlement Zone in Seddonville sought by Ms Inta. Having reviewed the location, we consider that adequate provision for development has already been provided in the Settlement zone as notified.

Grey District

366. The Panel agrees with Ms Easton's recommendation and reasoning to reject the request for rezoning sought by David Ellerm to rezone Lot 1 DP 3316 to Settlement Zone.

367. The Panel agrees with Ms Easton's recommendation not to provide for further residential development around the Barrytown Village in the form of an expanded Settlement zone, as sought by Riarnne Klempel. We accept that, with no evidence to the contrary, there is sufficient zoned land available in Barrytown to meet the community's needs.

368. The Panel agrees with Ms Easton's recommendation to reject Cynthia Robbins' submission to provide commercial land in small towns, such as Blackball, with commercial status. We note that, where appropriate within the Settlement Zone areas, a Settlement Centre Precinct has been applied, including in Blackball, which is referenced by Ms Robins. We agree that the Settlement Centre Precinct is equivalent to a commercial zone within the rural settlement context and supports the development of a level of commercial activities in these locations.

369. The Panel agrees with Ms Easton's recommendation and reasoning not to support the submission from Greg Maitland seeking to remove the Settlement Zone-Rural Residential Zoning at Kumara and rezone land around the Greenstone area for this purpose.

Moana

370. Following the hearing process the Panel sought further information in relation the potential for significant adverse effects to occur on a broader basis because of proposed rezonings at Moana and Cape Foulwind in terms of on-site wastewater disposal. West Coast Regional Council commissioned BTW Company Limited (BTW) to provide an assessment to investigate the cumulative effects of onsite wastewater disposal for rural properties in Moana and Cape Foulwind.

371. For Moana the findings concluded that:

- *The current method of primary septic treatment and disposal via soak pits at Moana is recommended to cease at for the level of development proposed. This is due to the very high permeability of the soils present, which could transmit perched groundwater to surface water receptors within days to weeks. Secondary treatment as a minimum is recommended, and disposal to land via other methods such as sub-surface irrigation (where possible) or beds/mounds. Where soak pits are deemed the only viable option, and/or minimum setback distances cannot be maintained for any installation, advanced secondary or tertiary treatment for nutrients and bacteria is highly recommended.*
- *Potential adverse effects to the environment are expected for any land use change scenario. The key effects at Moana likely being to the smaller tributaries to Molloy Bay of Lake Brunner from the development of Areas B and C. This assessment is currently unable to quantify the degree of adverse effects to these tributaries from the current undeveloped scenario. However, the effects between scenarios A and B are expected to be marginal. If the Hearing Panel remain uncertain about the proposed rezonings, stream flow measurements of the tributaries would be required to more accurately determine the actual or potential localised effects.*

372. The Panel have taken into account the findings of the BTW report in our considerations below.

11 Lake Brunner Road

373. The Panel agrees with Ms Easton's recommendation that the General Residential zone at 11 Lake Brunner Road should be retained rather than being rezoned to Settlement Zone as requested by Kevin Klempel. We note that this site has been identified for future residential activity in the operative Grey District Plan, and the Panel considers, given its location, this is appropriate to help meet future needs for Moana.

374. While the Panel acknowledge the submitter's concerns with servicing, we are also conscious of the findings of the BTW report above in terms of any future development of this site. We also note that there is no requirement for the landowner to undertake this development or to develop to the densities provided for by the General Residential zone.

Russel Robinson - Proposed Rezoning at Moana

375. The Panel has considered the zoning request from Russel Robinson at Moana. We accept that sufficient detailed evidence has been provided to enable the consideration of a higher density of development than the Rural Residential provided for in the notified Plan. We have also taken into consideration that GDC have confirmed that there is available capacity for connection to existing wastewater infrastructure and that a drinking water supply for Moana is needed. The difficulty we have encountered is reconciling the proposed method, which is a bespoke Settlement zone, with the intent and purpose of the Settlement zone framework.

Is a bespoke zone appropriate

376. The Panel has gone back to the relevant objectives and policies, as well as the Settlement Zone Overview, in our considerations. The relevant objectives and policies for a Settlement zone stem from the Rural zone provisions. They therefore include:

RURZ - O2 To provide for low-density rural lifestyle living on the outskirts of settlements where this will support settlement viability and not lead to conflicts with productive rural land use or rural character.

RURZ – P2 Provide for growth and change to settlements that:

- *a. Improves the long-term viability of the settlements and their communities;*
- *b. Fits with the historic, cultural and environmental character of the existing settlement;*
- *c. Provides new housing opportunities in locations that are away from significant risks to life, safety and property damage from natural hazards;*
- *d. Integrates with the existing residential settlement and maintains a consolidated settlement form;*
- *e. Supports rural community needs by providing for community facilities and educational facilities; and*
- *f. Does not compromise the dominance of the natural and cultural landscape setting and minimises ribbon residential development along the coastline, on prominent spurs, ridges and skylines and avoids development on the ridgelines and peaks of ancestral mountains.*

RURZ - P3 *Expansion of existing settlements beyond current boundaries should support the existing character and amenity of the settlement and avoid areas of high hazard risk, high natural or Poutini Ngāi Tahu cultural values, or significant agricultural production values.*

RURZ - P11 *Subdivision and development in GRUZ - General Rural and RLZ - Rural Lifestyle Zones, the SETZ - PREC3 - Coastal Settlement Precinct and the SETZ - PREC4 - Settlement Zone - Rural Residential Precinct should recognise the character and form of rural infrastructure including:*

a. Roads with roadside ditches rather than kerb and channel;

b. An absence of street lights and urban style footpaths; and

c. On site provision of water supply and on-site land treatment and disposal of stormwater and wastewater.

RURZ - P12 *Within the SETZ - Settlement Zone (outside of the SETZ - PREC3 Coastal Settlement Precinct and SETZ - PREC4 - Rural Residential Precinct) ensure that sufficient wastewater, water supply, refuse disposal, roading, footpath, open space and parking infrastructure servicing is provided as part of new development.*

377. While we acknowledge that the proposal aligns with some of the above provisions, we do not consider it particularly well-suited to the primary objective of providing for a low-density rural lifestyle on the outskirts of settlements.

378. We also note the following from the Overview:

- *Settlements differ from the main towns because of their small scale and low intensity of development.*
- *The character of settlements is influenced by the prevailing mixture of uses, large section sizes, low intensity of development and informal appearance.*
- *The extent of reticulated services is limited. While some settlements in Grey District have a reticulated water supply, most settlements have no reticulated servicing, and are reliant on the use of on-site wastewater systems and water supplies.*
- *The degree of road infrastructure developed is also variable. Older settlements may have a main street with footpaths, streetlights and kerb and channel, but many locations do not have this infrastructure and this more rural character should generally prevail in any new development.*

379. Again, we do not consider the proposal to be in keeping with the Settlement zone Overview. In our view, it is clear from the above that the zone's purpose is connected to small-scale development, and because it has been placed in the Rural section of the Plan, it has a more rural focus rather than an urban one. We note that the Settlement Zone description in the National Planning Standards is:

Areas used predominantly for a cluster of residential, commercial, light industrial and/or community activities that are located in rural areas or coastal environments. [emphasis added]

380. While the Panel acknowledges the ingenuity shown by Mr Barr in terms of the bespoke provisions, in the end, we consider that what is being proposed effectively attempts to shoehorn, for the most part, an urban-style zoning into a Settlement zone framework. In our

view, what is being proposed does not fit with what is anticipated in the Settlement zone and, as such, does not pass the s32 test in terms of being the most appropriate to achieve the objectives. In this context, we consider that there are other reasonably practicable options for achieving the objectives, such as a General Residential Zone (GRZ), and that the proposal is not efficient or effective in achieving these objectives. We are also concerned that such zoning may impact the wider integrity of the Settlement zone moving forward, particularly with the proposed densities. We therefore disagree with Mr Barr that the SETZ framework is the most appropriate.

Alternative zoning

381. As mentioned above, the Panel generally accepts the proposition that the site in question is capable of being rezoned for residential purposes. We also agree that the provided details are sufficient for us to consider such a rezoning. This includes the provision of reticulated services, including wastewater, which would address the issues raised in the BTW report.

382. The Panel notes that Moana is the only location outside of the four main centres that has a GRZ, and that in Moana, the GRZ is located adjacent to the proposal site. While we acknowledge Mr Barr's comment that the Moana GRZ is not referenced in the Overview, the reality is it exists.

383. The Panel considers there is sufficient scope within the Russel Robinson submission to consider a General Residential (and a Neighbourhood Centre zone) zoning over at least part of the site, with low-density Settlement zoning (SETZ - PREC 4 - Rural Residential Precinct) with bespoke provisions similar to Kumara Junction Developments on the remainder, while still addressing the various environmental issues associated with the site. We consider this would better meet the s32 tests of appropriately achieving the objectives.

384. The Panel acknowledge that the level of density proposed in the submission is in places higher than that of the GRZ. Nevertheless, there remains a pathway to consent higher levels of density provided adverse effects are able to be addressed. In this regard, we note Ms Easton remained concerned about issues such as stormwater disposal, which she felt were not adequately addressed. We have also considered the commercial component of the proposal and consider that a Neighbourhood Centre zone can be included, which would still enable residential development should this not be pursued.

385. In terms of environmental issues (landfill, wetlands, and ecology), the Panel considers that these can be appropriately managed through an Outline Development Plan along the lines proposed by Mr Barr. This would include restricting development in these sensitive areas.

386. The Panel has undertaken an evaluation in accordance with s32AA of the RMA of recommended rezoning given this is a change from what was sought by the submitter and what was in the notified plan.

387. The Panel considers the amendment to a General Residential zone will create consistency and improve the effectiveness of the Plan by aiding in plan interpretation and administration. We consider the Plan will be easier for plan users to understand, resulting in it being more efficient and effective than that sought by the submitter and is a more appropriate means of achieving the objectives of the pTTPP. We acknowledge that some activity types may now require consent, which will be an additional cost for those activities in certain circumstances, as part of consenting processes. Conversely, some activities will now be permitted, and costs are avoided.

388. The Panel considers there is a risk of not acting in that there would be an inconsistency in the use of the Settlement Zone. We have not identified any risks from acting.

389. Overall, the Panel considers that a level of rezoning of the Russell Robinson site is appropriate; however, we consider that the initially chosen method was not appropriate, and we have therefore recommended an alternative approach as detailed in Appendix 1 below.

Te Kinga Investments

390. The Panel has considered and agrees with Ms Easton's recommendation to support the rezoning of 28ha at Te Kinga from Settlement Zone-Rural Residential precinct to Settlement Zone (no precinct). We acknowledge this was supported by the GDC, who had advised that they were satisfied with the level of technical information provided to support this request. We note that the rezoning would result in a split zoning for the property, with a new road established to service the Settlement Zone part of the property. The remainder of the property would be classified as Settlement Zone-Rural Residential Precinct.

Westland District.

391. The Panel agrees with Ms Easton's recommendation to reject the submission from Scenic Hotel Group opposing the Settlement Zoning of sites in Fox Glacier and Franz Josef. We consider the sites to be appropriately zoned as Settlement Zone.

Hearing Panel's Recommendation

392. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part and recommends the following amendments to zoning are made.

Zoning	
1/ Rezone	Lot 1 DP2820 and Pt RS 3806 at Moana from SETZ (Rural Residential) to a mixture of General Residential, Neighbourhood Centre and SETZ-Rural Residential with associated Outline Development Plan and provisions as detailed in Appendix 1. [102]
2/ Rezone	Part of Lot 2 DP547998 Te Kinga (Iveagh Bay) from SETZ (Rural Residential) to SETZ as detailed in Appendix 1. [103]

APPENDIX 1 – RECOMMENDATIONS ON PLAN PROVISIONS

Plan Text Amendments

Recommended amendments to the provisions in response to submissions are shown in ~~strikethrough~~ and **bold** and **underline**.

Overview

The SETZ - Settlement Zone covers all the wide range of settlements that are outside of the four main towns throughout the West Coast/Te Tai o Poutini. Settlements differ from the main towns because of their small scale and low intensity of development. They comprise a mixture of residential, commercial, recreational, rural, community and other uses, often interspersed. The character of settlements is influenced by the prevailing mixture of uses, large section sizes, low intensity of development and informal appearance.

The extent of reticulated services is limited. While some settlements in Grey District have a reticulated water supply, most settlements have no reticulated servicing, and are reliant on the use of on-site wastewater systems and water supplies. The degree of road infrastructure developed is also variable. Older settlements may have a main street with footpaths, streetlights and kerb and channel, but many locations do not have this infrastructure and this more rural character should generally prevail in any new development.

The SETZ - Settlement Zone provides for residential activities as well as some commercial activities. Where industrial activities are proposed these need to be undertaken in an INZ - Industrial Zone.

There are three Precincts within the SETZ Settlement Zone - SETZ - PREC2 - Settlement Centre, SETZ - PREC3 - Coastal Settlement and SETZ - PREC4 - Rural Residential.

The RURZ - Rural Zones Objectives and Policies and SETZ - Settlement Zone Rules provide the framework for managing the effects of development in the SETZ - Settlement Zone. However, there are additional specific policies and rules for each of the three Precincts. Where there is a conflict between a SETZ - Settlement Zone provision and a Precinct provision, the Precinct provision applies.

SETZ - PREC2 - Settlement Centre Precinct is located in settlements where a focal community and commercial area is developing. It is anticipated that the Settlement Centre character will develop over time, with more commercial development in particular. This precinct anticipates the possibility that the settlement will grow and demand for retail and commercial services will increase, and that community facilities could be developed or expanded with this growth. Settlement Centre Precincts are identified in Karamea, Charleston, Blackball, Kumara, Ross, Harihari, Kaniere and Haast.

SETZ - PREC3 - Coastal Settlement Precinct is located over settlements which are located in coastal areas, generally within or near areas of high coastal natural character and coastal landscape values. The Coastal Settlement Precinct provides principally for residential activities, and a low-scale development and subdivision pattern which fits with the surrounding scenic landscape. Design of buildings, their size and location are all key matters which are controlled within the Coastal Settlement Precinct. Little Wanganui (subdivision area), Punakaiki (including within Grey District), Ōkarito, Okuru, Hannah's Clearing, Neil's Beach, Mahitahi/Bruce Bay and Okahu/Jackson Bay are included in the Coastal Settlement Precinct. These areas are also all subject to significant natural hazards and the provisions in the natural hazards chapter are very relevant for activities in this Precinct.

SETZ - PREC 4 - Rural Residential Precinct is located over areas on the edge of settlements and towns where larger lots - 4000m^2 are provided for a more rural residential lifestyle. These areas sit on an interface with the GRUZ - General Rural Zone or RLZ - Rural Lifestyle Zone and avoiding

reverse sensitivity for rural uses is often as important as managing the amenity for residents within the Precinct. Alongside residential uses, some sorts of rural activities such as small-scale horticulture or market gardening, or grazing of animals may occur in this Precinct, reflecting its more rural character. The Precinct is also characterised by more rural infrastructure with an absence of footpaths, streetlights and kerb and channel in these areas.

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities in the SETZ - Settlement Zone, including:

~~Overlay Chapters - the Overlay Chapters have provisions in relation to historic heritage; notable trees; sites and areas of significance to Māori; biodiversity; landscape; riparian areas; natural hazards; and the coastal environment. Where an activity is located within an overlay area (as identified in the planning maps) then the relevant overlay provisions apply.~~

- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters – there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Settlement Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.**
- **Natural Hazards - natural hazards are widespread on the coast and in some locations natural hazard overlays may affect areas in the Settlement Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards chapter.**
- **Natural Character and Margins of Waterbodies -in some locations areas of Settlement Zone may extend into the riparian margins of waterbodies. The Natural Character and Margins of Waterbodies Chapter contains provisions on how these areas must be managed.**
- **Ecosystems and Biodiversity – Where indigenous vegetation clearance is proposed within a Settlement Zone, the provisions of the Ecosystems and Biodiversity chapter apply**

General District Wide Matters - provisions in relation to earthworks may be relevant to many activities.

Subdivision - The Subdivision chapter sets out the requirements for subdivision activities the SETZ - Settlement Rural Zone.

Financial Contributions - The Financial Contributions chapter sets out the requirements for contributions of costs for activities which impact on the local network utility operators.

Relationship with Other Plans

Many activities that occur in rural areas are also regulated by the West Coast Regional Council through Regional Plans, including the Regional Land and Water Plan, Regional Air Plan and Regional Coastal Plan. When planning to undertake an activity, the status under the relevant Regional Plans should also be confirmed and any necessary resource consents applied for under both Plans.

Note with Regard to ~~Plantation~~ Commercial Forestry

There are no specific provisions as relate to ~~plantation~~ **commercial** forestry within the RURZ - Rural Zone Chapters. This is because ~~plantation~~ **commercial** forestry is principally regulated by the Resource Management (National Environmental Standard**s** for ~~Plantation~~ **Commercial** Forestry) Regulations 2017. Exceptions to this occur in the Overlay Chapters and where forestry activities are proposed**,** these chapters must be considered.

Settlement Zone Policies

SETZ-PREC-P2	Subdivision, use and development within the SETZ - PREC2 - Settlement Centre Precinct should: a. Maintain or enhance the character and built form of the settlement; b. Adaptively reuse existing heritage and character buildings where practicable; and c. Provide for commercial activities and community facilities which serve the settlement, rural community and visitors
SETZ-PREC3_P3	Subdivision, use and development within the SETZ - PREC3 - Coastal Settlement Precinct should: a. ~~Take into account~~ **Recognise and provide for** the coastal natural character and **protect the** scenic landscape values of the area; b. Have appropriate controls on design and height to protect the landscape and coastal natural character values ~~and be undertaken in accordance with the coastal development guidelines~~; c. Recognise and provide for access to mahinga kai and Sites and Areas of Significance to Māori for Poutini Ngāi Tahu; ~~and~~ d. **Development of the port area at Jackson Bay is:** **i. discouraged other than on legal road reserve at Jackson Bay, Sections 208 and 209 TN of Arawata and Sections 8, 9 and 10 TN of Arawata; and** **ii. of a scale and extent appropriate to the location** **e.** Be located **and designed to mitigate or** avoid **increasing** the significant risks of natural hazards. **f. Support the development of visitor accommodation, worker accommodation and tourism support facilities in Punakaiki.**
SETZ-PREC-P4	Subdivision, use and development within the SETZ - PREC4 - Rural Residential Precinct should maintain the predominant rural character and amenity values, which include: a. Low-density residential living and small-scale rural activities; b. Open space and privacy around buildings; ~~and~~ c. On-site servicing and a general absence of urban infrastructure; **d. Industrial or commercial activities which have a functional relationship with rural areas; and** **e. Presence of rural activities and established infrastructure which should be protected from reverse sensitivity effects.**

Settlement Zone Rules

SETZ-R1 Residential Activities and Residential Buildings - Density

Activity Status Permitted

Where:

1. Residential unit density is no more than:
   - **i. <u>1 unit per site where these were lawfully established under the previous District Plans; otherwise</u>**
   - ii. 1 unit per 500m^2 net site area in areas fully serviced by a network utility operator with wastewater, water supply and stormwater systems**<u>;</u>** ~~except that:~~
     - ~~b. where smaller sites were lawfully established under the previous Buller, Grey or Westland District Plan then the residential unit density is one residential unit per site;~~ or
   - iii. 1 unit per 1000m^2 net site area in areas where there is on site servicing of wastewater, water supply and stormwater systems; except
   - iv. In the SETZ - PREC4 - Rural Residential Precinct residential unit density is 1 unit per 4000m^2 net site area;
4. Where the settlement is serviced by a network utility operator for wastewater, water supply or stormwater**<u>, and provided there is capacity,</u>** all residential units and buildings used for a residential activity must be connected to the community wastewater, water supply and stormwater infrastructure;
5. Where the settlement is not serviced by a network utility operator for wastewater, water supply or stormwater on site collection, treatment and disposal must be undertaken in accordance with NZS4404:2010 Land Development and Subdivision Infrastructure or the relevant Council Engineering Technical Standards.

Activity status where compliance not achieved: Discretionary

SETZ-R2 Buildings and Sites - Design

Activity Status Permitted

Where:

1. The maximum height above ground level for buildings is:
   - i. 10m for residential buildings and Emergency Service Facilities and 7m for accessory buildings; except
   - ii. No building, structure or tree shall protrude into the Airport Approach Path of any airport or aerodrome identified on the planning maps and as described in Appendix Nine;
   - iii. 7m for buildings in the SETZ - PREC3 - Coastal Settlement Precinct; and
   - iv. 12m for buildings in the SETZ - PREC2 - Settlement Centre Precinct **<u>in the Grey,</u>** ~~and~~ **<u>Westland Districts</u>** ~~**and 10m in the Buller District**~~;
2. The maximum site coverage is:
   - i. 40%; except
   - ii. Maximum site coverage is 60% in the SETZ - PREC2 - Settlement Centre Precinct
3. The maximum gross ground floor area of any one building
   - i. Is 350m^2; except

ii. In the SETZ - PREC3 - Coastal Settlement Precinct the gross ground floor area is a maximum of 200m^2 total for all buildings on the site.

4. Buildings are setback from boundaries as follows:
   i. 5m from the road and any GRUZ - General Rural or INZ Industrial Zone boundary, **1.5m from the rail designation,** and 1m from internal boundaries; except
   ii. In the SETZ - PREC4 - Rural Residential Precinct all buildings are setback 10m from road boundaries, residential buildings are setback 10m from the internal boundaries and non-residential buildings **and accessory buildings** are setback 5m from internal boundaries;
   iii. In the SETZ - PREC2 - Settlement Centre Precinct no setback from the road boundary is required where there is a verandah provided over an adjacent footpath; **and**
   iv. **No building housing sensitive activities shall be located within 150m of a designated community wastewater treatment facility site boundary or a designated landfill site boundary.**

5. In the Kumara Junction Developments area **and Moana North Development area**:
   i. A minimum 5m wide buffer strip of indigenous vegetation is to be retained on all boundaries. Native species will be retained or planted to ensure that, at maturity, buildings will be screened from the road and neighbouring allotments;
   ii. A maximum of 2000m^2 indigenous vegetation in total is allowed to be cleared from each site; and
   iii. Development will be in accordance with the Outline Plan**s** set out in the Development Areas section of the Plan;
   iv. In the Moana North Development area:
      a. Where indigenous tree species with a diameter of greater than 20cm at breast height are removed, these are replaced in accordance with a Landscape Plan to be developed for the area;
      b. No residential or ancillary buildings are to occur within the "No-Build" areas identified in the Moana North Development Area Outline Plan in the Development Areas section of the Plan.

6. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing.~~ This standard does not apply to:
   i. Road boundaries;
   ii. Buildings on adjoining sites that have a common wall along the boundary;
   iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;
   iv. Boundaries adjoining any site in a CMUZ - Commercial and Mixed Use, INZ - Industrial or GRUZ General Rural Zone;
   v. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or
   vi. Solar panels and solar water heaters provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically**;**

7. Vehicle crossing standards in Rule TRN – R1 are met; and

8. **Provision shall be made for sufficient water supply and access to water supplies for firefighting in accordance with the New Zealand Fire Service Firefighting Water Supplies Code of Practice (SNZ PAS:4509:2008)**

Advice Notes:

1. In relation to indigenous vegetation clearance in Kumara Junction developments and Standard 5. it should be noted that indigenous vegetation clearance provisions in the Ecosystems and Biodiversity Chapter also apply;
2. Where a residential building or noise sensitive activity is located within:

i. 80m of a State Highway with a speed limit of 70kph or greater; or

ii. 40m of a State Highway with a speed limit of less than 70kph; or

iii. 40m of a Railway Line; or

iv. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or

v. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.

Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply.

3. **Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.**
4. **The New Zealand Fire Service Firefighting Water Supplies Code of Practice PAS:4509:2008 should be consulted when determining the most appropriate design for firefighting water supply. Fire and Emergency New Zealand is available to assist with this.**

Activity status where compliance not achieved: Discretionary where standards 1-4 are not complied with. Restricted Discretionary where standards 5-~~6~~**8** are not complied with.

SETZ-R3 Building Design in the Coastal Settlement Precinct

Activity Status Permitted

Where:

(a) All standards for Rule SETZ - R1 and R2 are complied with;

(b) New buildings are no more than 1~~0~~**5**0m^2 in ground floor area and additions to existing buildings add up to no more than 50m^2 ground floor area.

Activity status where compliance not achieved: Restricted Discretionary

SETZ-R4 Papakāinga Developments

Activity Status Permitted

Where:

1. All standards for Rule SETZ - R2 are complied with;
2. Where developments are in the SETZ - PREC3 - Coastal Settlement Precinct all standards for Rule SETZ - R3 are complied with **however units are able to be clustered**;
3. In areas not serviced by reticulated wastewater, stormwater and water supply:

i. The average residential building density is no more than one unit per 1000m^2 net site area, ~~although units can be clustered~~; and

ii. On-site wastewater, water supply and stormwater systems are developed to serve the entire papakāinga.

iii. In areas fully serviced by a network utility operator with wastewater, water supply and stormwater systems the average residential building density is no more than one unit per 500m^2 net site area; and

iv. Provision shall be made for sufficient water supply and access to water supplies for firefighting in accordance with the New Zealand Fire Service Firefighting Water Supplies Code of Practice (SNZ PAS:4509:2008)

Advice Notes:

1. Where a residential building or noise sensitive activity is located within:
   i. 80m of a State Highway with a speed limit of 70kph or greater; or
   ii. 40m of a State Highway with a speed limit of less than 70kph; or
   iii. 40m of a Railway Line; or
   iv. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or
   v. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.

Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply.

2. The New Zealand Fire Service Firefighting Water Supplies Code of Practice PAS:4509:2008 should be consulted when determining the most appropriate design for firefighting water supply. Fire and Emergency New Zealand is available to assist with this.

Activity status where compliance not achieved: Discretionary

SETZ-R5 Agricultural, Horticultural and Pastoral Activities, Recreational Activities and Conservation Activities

Activity Status Permitted

Where:

1. All standards for Rule SETZ - R2 and in the SETZ - PREC3 - Coastal Settlement Precinct Rule SETZ - R3 are complied with;
2. The activity does not include:
   i. Intensive indoor primary production;
   ii. The storage and disposal of solid or liquid animal waste not generated on the site;
   iii. Woodlots;
   iv. Stock sale yards; or
   v. Farm quarries
3. Performance standards for poultry farming and pig keeping apply as follows:
   i. **Shelters and buildings used to house or feed poultry or more than 3 pigs must be setback at least 30m from any internal boundary** ~~For poultry setbacks of 10m from any residential building and 2m from the site boundary~~;

~~ii. For pig keeping setbacks of 50m from any residential building and 100m for any shelter holding 4 or more pigs; and~~

4. Performance standards for beekeeping in the Westland District apply as follows:

   i. No bees may be kept on a property less than 600m^2 net site area;

   ii. Beehives must be placed with an obstruction in front of them or be elevated to ensure all bees are able to be 2.5m above ground level prior to crossing the site boundary; and

   iii. A water source for bees must be provided and maintained on the property.

Advice Note:

If land is used for disposal of effluent or solid waste, then there may be rules in the Regional Air Plan and Regional Land and Water Plan administered by West Coast Regional Council that apply.

Activity status where compliance not achieved: Discretionary

SETZ-R6 Minor Structures

Activity Status Permitted

Where:

1. ~~All standards for Rule SETZ - R2 are complied with;~~ **Structures are set back:**

   i. 5m from the road and any GRUZ - General Rural or INZ Industrial Zone boundary and 1m from internal boundaries; except

   ii. In the SETZ - PREC4 - Rural Residential Precinct all buildings are setback 10m from road boundaries, residential buildings are setback 10m from the internal boundaries and non-residential buildings and accessory buildings are setback 5m from internal boundaries;

   iii. In the SETZ - PREC2 - Settlement Centre Precinct no setback from the road boundary is required where there is a verandah provided over an adjacent footpath.

2. Masts, poles, aerials and pou whenua must not exceed 7m in height;
3. Any antenna dish must be less than 1m in diameter;
4. Any ornamental or garden structure must not exceed 2.4 m in height;
5. Any other structure must not exceed 10m^2 and 2m in height.

Activity status where compliance not achieved: Controlled

SETZ-R7 Fences, Walls and Retaining Walls

Activity Status Permitted

Where:

1. Fences, walls and retaining walls are a maximum 2m height above ground level; and
2. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall or wall.

Activity status where compliance not achieved: **Restricted** Discretionary

SETZ-R8 Relocated Buildings

Activity Status Permitted

Where:

1. All standards for Rule SETZ - R1 and R2 and in the SETZ - PREC3 - Coastal Settlement Precinct Rule SETZ - R3 are complied with;
2. Any relocated building intended for use as a dwelling must have been designed**,** ~~and~~ built ~~to be~~ **and** used as a dwelling;
3. A building pre-inspection report **in accordance with Appendix Eleven** shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the **exterior** reinstatement works **including connections to infrastructure services and closing in and ventilation of the foundations** shall be completed within ~~a~~ 12-month**s of the building being delivered to the site** ~~period~~; **and**
4. The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site.~~; and~~
5. ~~All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.~~

Activity status where compliance not achieved: Controlled

SETZ-R9 Home Business

Activity Status Permitted

Where:

1. All standards for Rule SETZ - R1 and R2 and in the SETZ - PREC3 - Coastal Settlement Precinct Rule SETZ - R3 are complied with;
2. There is no limit to hours of operation in the SETZ - PREC2 - Settlement Centre Precinct;
3. Outside of the SETZ - PREC2 - Settlement Centre Precinct, hours of operation are limited to:
   i. 7am-10pm weekdays and 8am - 8pm weekends and public holidays;
   ii. Except where:
      a. The entire activity is located within a building;
      b. Each person engaged in the activity outside the above hours resides permanently on site; and
      c. There are no visitors, customers or deliveries to the activity outside of the above hours.
4. **Outside of the SETZ - PREC2 - Settlement Centre Precinct, there is no more than one full time equivalent person engaged in the home business that resides off site;**
5. No external storage of products except those associated with residential use shall be visible from any SETZ - Settlement Zoned property or adjoining public place; **and**
6. No external generation of dust, odour or smoke occurs as part of the activity**.**~~; and~~
7. ~~A maximum of 10 heavy vehicle movements per day and whichever is the greater of 30 light vehicle movements per day or 210 light vehicle movements per week.~~

Activity status where compliance not achieved: Discretionary

SETZ-R10 Residential Visitor Accommodation

Activity Status Permitted

Where:

1. This is ancillary to a residential or conservation activity;
2. All standards for Rule SETZ - R1 and R2 and in the SETZ - PREC3 - Coastal Settlement Precinct Rule SETZ - R3 are complied with;
3. There is a maximum of 6 paying guests at any one time;
4. Written notification to the District Council is required 10 working days prior to the activity commencing;
5. Records of letting activity must be kept and provided to the Council ~~on request~~ **annually**;
6. No heavy vehicle movements are generated; and
7. In the Buller **and Westland** District**s** the accommodation is homestay accommodation with a permanent resident living on site.

Advice Notes:

a. Compliance with the Building Code is required for any use of residential property for visitor accommodation. Written notice to the relevant Council Building Compliance Team must be provided and a Building Consent may also be required.

b. ~~In the Buller District, where~~ **Where** residential visitor accommodation has been lawfully established under the Buller**, Grey or Westland** District Plan provisions, then existing use rights **may** apply.

c. This rule does not apply to Residential Visitor Accommodation in the Settlement Centre Precinct - refer to Rule SETZ - R11.

Activity status where compliance not achieved: Restricted Discretionary

SETZ-R11 Visitor Accommodation in the Settlement Centre Precinct

Activity Status Permitted

Where:

1. All performance standards for Rule SETZ -R2 are complied with.

Advice Note:

1. All types of visitor accommodation are Permitted in the SETZ - PREC2- Settlement Centre Precinct including homestay, hosted short-term residential accommodation, hotels, motels, boarding houses and backpackers.
2. Where visitor accommodation is located within:
    i. 80m of a State Highway with a speed limit of 70kph or greater; or
    ii. 40m of a State Highway with a speed limit of less than 70kph; or
    iii. 40m of a Railway Line; or
    iv. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or
    v. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.

Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply.

Activity status where compliance not achieved: Discretionary

SETZ-R12 Community Facilities, Educational Facilities, Emergency Service Facilities and Retirement Homes

Where:

1. All performance standards for Rule SETZ -R2 are complied with except that hose drying towers are exempt from height standards in all areas other than the Coastal Settlement Precinct;
2. A maximum of 10 heavy vehicle movements and the greater of 30 light vehicle movements per day or 210 light vehicle movements per week are generated **and compliance is achieved with TRN – R6**; except:

   No vehicle movement limit applies to:

   a. Emergency Service Facilities;
   b. Community halls or Educational Facilities lawfully established at the time of notification of the Plan; or
   c. Activities within the SETZ - PREC2 Settlement Centre Precinct; and
3. No external storage of products except those associated with residential use shall be visible from any Settlement zoned property or adjoining public place**; and**
4. **Where the facility will be located within the Westport Radio Mast EM Overlay any hose drying or siren tower of a height of 18m or greater must be certified by Radio New Zealand that the risk of Electromagnetic coupling with this structure has been mitigated**

Advice Note:

Where a noise sensitive activity is located within:

i. 80m of a State Highway with a speed limit of 70kph or greater; or
ii. 40m of a State Highway with a speed limit of less than 70kph; or
iii. 40m of a Railway Line; or
iv. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or
v. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.

Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply.

Activity status where compliance not achieved: Restricted Discretionary

SETZ-R13 Retail Activities

Activity Status Permitted

Where:

1. Performance standards for Rule SETZ - R2 are complied with;

~~2. The activity is located within a SETZ - PREC2 - Settlement Centre Precinct;~~

2. Where the activity is located outside of a SETZ - PREC2 - Settlement Centre Precinct, there is no SETZ - PREC2 - Settlement Centre Precinct or CMUZ Commercial or MUZ - Mixed Use Zone within 10km of the site;

~~4. The maximum combined floor and yard area for any retail activity is 250m^2~~; and

3. The activity does not include:
    i. Service stations;
    ii. Car sales;
    iii. Yard-based retail; and
    iv. Drive through restaurants.
4. Outside of the SETZ - PREC2 - Settlement Centre Precinct, hours of operation are limited to 7am-10pm weekdays and 8am - 8pm weekends and public holidays.
5. Outside of the SETZ - PREC2 - Settlement Centre Precinct there are a maximum of 10 heavy vehicle movements per day, and whichever is the greater of 30 light vehicle movements per day or 210 light vehicle movements per week generated by the activity **and compliance is achieved with TRN – R6**;
6. No external storage of products except those associated with residential use shall be visible from any Settlement zoned property or adjoining public place; **and**

~~9. No external generation of dust, odour or smoke occurs as part of the activity; and~~

7. Vehicle crossings and access meet the design standards as set out in Appendix One Transport Performance Standards.

Activity status where compliance not achieved: Discretionary

SETZ-R14 Commercial Activities other than Retail, Home Business or Visitor Accommodation

Activity Status Permitted

Where:

1. The activity does not occur in the SETZ - PREC3 - Coastal Settlement Precinct or the SETZ - PREC4 - Rural Residential Precinct;
2. Performance standards for Rule SETZ - R2 are complied with;
3. Outside of the SETZ - PREC2 - Settlement Centre Precinct, hours of operation are limited to: 7am-10pm weekdays and 8am - 8pm weekends and public holidays;
4. Outside of the SETZ - PREC2 Settlement Centre Precinct, a maximum of 10 heavy vehicle movements per day and whichever is the greater of 30 light vehicle movements per day or 210 light vehicle movements per week **and compliance is achieved with TRN – R6**;
5. No external storage of products except those associated with residential use shall be visible from any Settlement zoned property or public place; **and**

~~5. No external generation of dust, odour or smoke occurs as part of the activity; and~~

6. Vehicle crossings and access meet the design standards as set out in Appendix One Transport Performance Standards.

Advice Note:

Where a noise sensitive activity is located within:

i. 80m of a State Highway with a speed limit of 70kph or greater; or
ii. 40m of a State Highway with a speed limit of less than 70kph; or

iii. 40m of a Railway Line; or

iv. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or

v. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports or Greymouth or Karamea Aerodrome.

vi. Then the acoustic insulation requirements set out in Rule NOISE - R3 will apply

Activity status where compliance not achieved: Restricted Discretionary

SETZ-R16 Port Activities at Jackson Bay Port

Activity Status Permitted

Where:

1. These are undertaken on lots fronting The Esplanade as follows:
    i. On legal road reserve between Mean High-Water Springs and the edge of the road carriageway;
    ii. On the following lots:
        a. Sections 208 and 209 TN OF Arawata; and
        b. Sections 8, 9 and 10 TN of Arawata;
2. Permitted Port Activities are limited to the following:
    i. Cargo handling, including the loading, unloading, storage, processing and transit of cargo (including fish);
    ii. Passenger handling, including the loading, unloading and transit of passengers including passenger or cruise ship terminals;
    iii. Port administration.
    iv. Facilities for recreational boating.
    v. Activities associated with maritime navigation; and
    vi. Ancillary buildings, structures, utilities, signs, parking, landscaping, offices and other facilities.
3. Maximum building size is 200m^2;
4. Maximum building height is 5m;
5. Buildings must be setback 1m from the road and internal boundaries; and
6. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary except where the neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing. This standard does not apply to:
    i. Road boundaries;
    ii. Buildings on adjoining sites that have a common wall along the boundary;
    iii. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;
    iv. Boundaries adjoining any site in a CMUZ - Commercial and Mixed Use, INZ - Industrial or GRUZ - General Rural Zone;

v. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; or

vi. Solar panels and solar water heaters provided these do not exceed the height in relation to boundary plane by more than 0.25m vertically.

Activity status where compliance not achieved: Discretionary

SETZ-R17 Minor structures not meeting Permitted Activity Standards

Activity Status Controlled

Where:

1. This is not located in the SETZ - PREC3 - Coastal Settlement Precinct.
2. The minor structure does not exceed 10m in height; and
3. All performance standards other than height for Rule STEZ - R2 are complied with.

Matters of control are:

a. Design and location of structures; and

b. ~~Landscape measures~~ **Measures to mitigate landscape effects**.

Activity status where compliance not achieved: Discretionary

SETZ-R18 Relocated Buildings not meeting Permitted Activity Standards

Activity Status Controlled

Where:

1. This is not located in the SETZ - PREC3 - Coastal Settlement Precinct; and
2. All performance standards Rule STEZ - R2 are complied with.

Matters of control are:

a. Design and location of structures;

b. Any requirement for financial contributions;

c. ~~Landscape measures~~ **Measures to mitigate landscape effects**; and

d. Appearance of buildings.

Activity status where compliance not achieved: Discretionary

SETZ-R19 Residential Buildings not meeting Building and Sites - Design Standards in Rule SETZ - R2

Activity Status Restricted Discretionary

Where:

~~i.~~ **1.** The building projects into the 45 degree recession plane; or

~~ii.~~ **2.** The building is set back less than 1m from internal boundaries or 10m from internal boundaries in the Rural Residential Precinct; and

~~3.~~ **3.** All other performance standards for Rule SETZ - R2 are complied with.

Discretion is restricted to:

a. Design and location of buildings;

b. Size and height of buildings;

c. Any requirement for financial contributions;

d. Design and location of parking and access; ~~and~~

e. ~~Landscape measures~~ **Measures to mitigate landscape effects;**

f. Shading and loss of sunlight to adjoining sites;

g. Loss of privacy to adjoining sites; and

h. Character and amenity of the surrounding area.

SETZ-R20 Buildings in the SETZ - PREC2 - Coastal Settlement Precinct not meeting Building Design Requirements in SETZ - R3

Activity Status Restricted Discretionary

Where:

1. All performance standards for Rule SETZ - R1 - and R2 are complied with.

Discretion is restricted to:

a. Design, size, height and location of buildings;

b. Design, size and location of parking and access;

c. Any requirement for financial contributions;

d. Retention of existing vegetation;

~~e.~~ Volume and location of earthworks; ~~and~~

f. ~~Landscape measures~~ **Measures to mitigate landscape effects;**

g. Shading and loss of sunlight to adjoining sites;

h. Loss of privacy to adjoining sites; and

i. Character and amenity of the surrounding area.

Activity status where compliance not achieved: Discretionary

SETZ – R21 Residential Visitor Accommodation not meeting Rule STEZ - R10

Activity Status Restricted Discretionary

Where:

1. All performance standards for Rule SETZ - R1 - and R2 are complied with.

Discretion is restricted to:

a. Number of visitors staying on site;

b. Number of days of use for the visitor accommodation;

c. Management of traffic and parking;

d. ~~Landscape measures~~ **Measures to mitigate landscape effects**;

e. Any impacts on the production values of the surrounding land;

f. Any requirement for financial contributions;

g. Effects on ~~visual~~ amenity and ~~rural~~ character; ~~and~~

h. Methods of wastewater treatment and disposal; **and**

I. Loss of privacy to adjoining sites.

Activity status where compliance not achieved: Discretionary

SETZ - R2~~1~~2 Community Facilities, Educational Facilities, Emergency Service Facilities and Retirement Homes not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Discretion is restricted to:

a. Design and location of buildings;

b. Size and height of buildings;

c. Vehicle movements and access;

d. Design and location of parking and access;

e. ~~Landscape measures~~ **Measures to mitigate landscape effects**;

f. Any requirement for financial contributions;

g. Methods of water supply, wastewater and stormwater treatment and disposal;

h. Hours of operation; ~~and~~

i. Acoustic and noise management requirements;

j. Loss of privacy to adjoining sites;

k. Character and amenity of the surrounding area; and

l. Within the Westport Radio Mast EM Overlay, any requirements to mitigate the risk of electromagnetic coupling, including during the construction phase

Notification:

Applications for community facilities will always be limited notified to adjacent neighbours and may be publicly notified.

Activity status where compliance not achieved: N/A

SETZ – R2~~2~~3 Rural Industry

Activity Status Restricted Discretionary

Where:

1. This is not in the SETZ - PREC3- Coastal Settlement Precinct;
2. There is no INZ - Industrial Zoned site of sufficient size to accommodate the activity within 10km of the proposed site; and

3. All performance standards for Rule SETZ - R2 are complied with.

Discretion is restricted to:

a. Design and location of buildings;

b. Design and location of parking and access;

c. ~~Landscape measures~~ **Measures to mitigate landscape effects**;

d. Hours of operation;

e. Vehicle movements;

f. Any requirement for financial contributions;

g. Methods of water supply, wastewater and stormwater treatment and disposal;

h. Management of odour, noise, light and dust; and

i. Acoustic and noise management requirements.

Activity status where compliance not achieved: Discretionary

SETZ-R25 Fences, Walls and Retaining Walls not meeting Permitted Activity standards

Activity Status Restricted Discretionary

Discretion is restricted to:

a. Design and location of structures;

b. Height of structures; and

c. Shading and dominance effects on adjoining sites

Activity status where compliance not achieved: N/A

SETZ – R24~~5~~6 Residential Activities and Residential Buildings, Buildings and Sites - Design, Conservation, Recreational, Agricultural, Horticultural and Pastoral Activities, Papakāinga Developments, Minor Structures, ~~Fences, Walls and Retaining Walls~~, Relocated Buildings and Buildings not meeting Permitted or Restricted Discretionary Activity Rules in relation to Performance Standards in Rules SETZ - R1 or SETZ - R2 or SETZ - R4

Activity Status Discretionary

Activity status where compliance not achieved: N/A

SETZ – R25~~5~~7 All Activities and Buildings, Papakāinga, Minor Structures~~, Fences, Walls and Retaining Walls~~ and Port Activities at Jackson Bay Port in the Coastal Settlement Precinct not meeting Permitted, Controlled or Restricted Discretionary Activity Rules

Activity Status Discretionary

Where:

1. This is not Industrial Activity subject to Rule SETZ - R2~~7~~**8**.

Activity status where compliance not achieved: Non-complying

SETZ – R26~~6~~8 Home Business, Retail Activities, Commercial Activities and Residential Visitor Accommodation not meeting Permitted, Controlled or Restricted Discretionary Activity Rules

Activity Status Discretionary

Activity status where compliance not achieved: N/A

SETZ – R2~~7~~9 Industrial Activities not meeting Rule SETZ - R2~~2~~3

Activity Status Discretionary

Where:

1. This is not located in the SETZ - PREC3 - Coastal Settlement Precinct;
2. There is no INZ - Industrial Zoned site of suitable size to accommodate the activity within 10km of the proposed site.

Activity status where compliance not achieved: Non-complying

SETZ – R30 Any activity not provided for by another Rule in the zone

Activity Status ~~Non-complying~~ **Discretionary**

Activity status where compliance not achieved: N/A

SETZ – R31 Industrial Activities not meeting SETZ – R29.

Activity Status: Non-complying

Activity status where compliance not achieved: N/A

Change to General Residential Zone Rule GRZ – R1

GRZ – R1 Residential Activities and Residential Units a

Activity Status Permitted

Where:

…

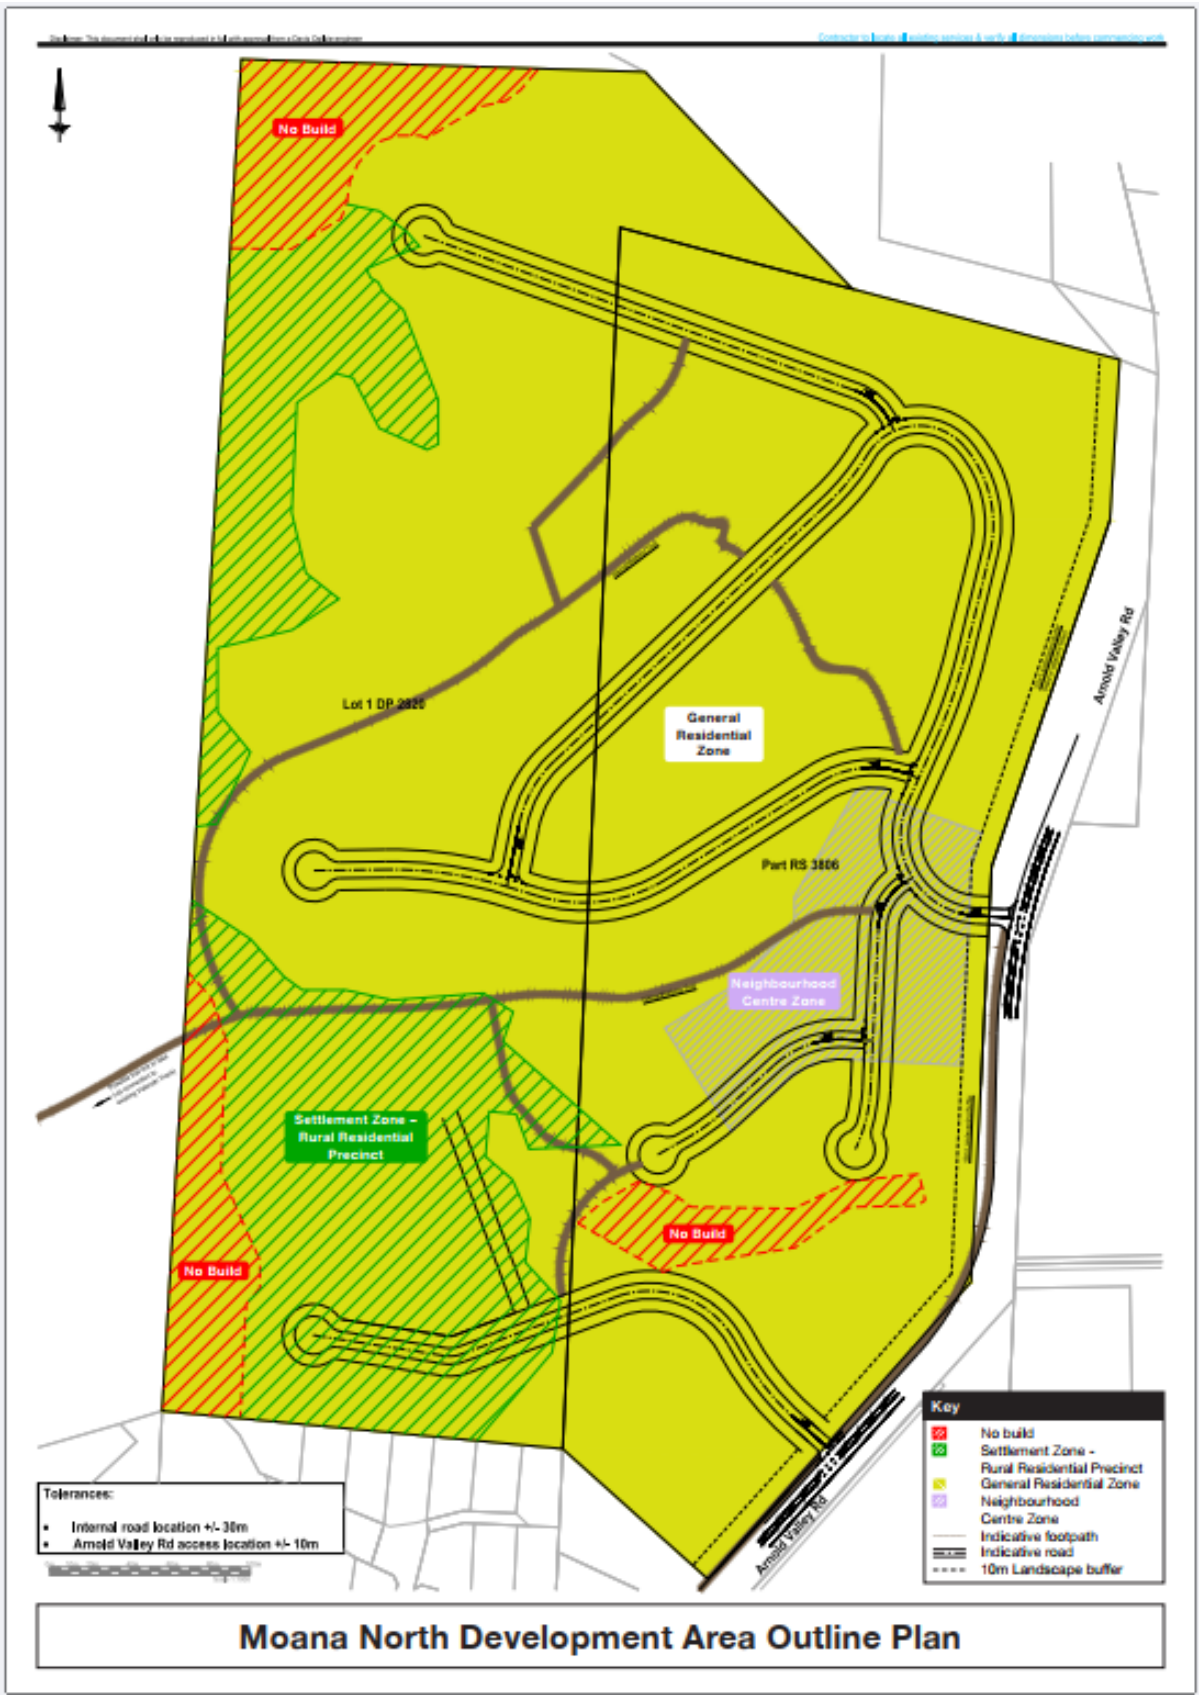
11. **In the Moana North Development area:**
    a. **Development (including vehicle access) will be in accordance with the Outline Plan set out in the Development Plans section of the Plan;**
    b. **No residential or ancillary buildings are to occur within the "No – Build" areas identified in the Moana North Development Area Outline Plan in the Development Areas section of the Plan; and**
    c. **Landscaping comprising indigenous vegetation is provided within the 10m landscape treatment buffer along the Arnold Road boundary (except for vehicle accesses onto Arnold Valley Road).**

…

Activity status where compliance not achieved:

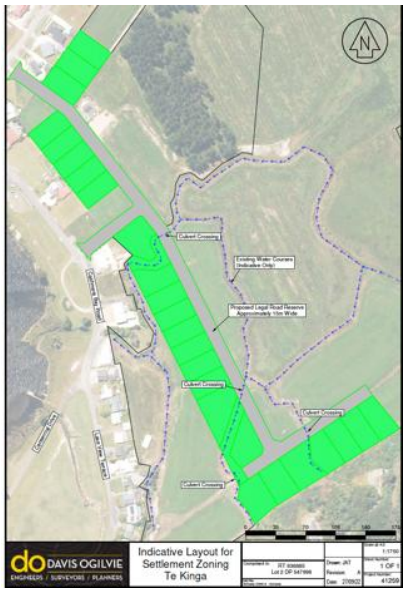
Discretionary where standards 1 to 8 **and 11** are not complied with.

Restricted Discretionary where standards 9 and 10 are not complied with.



Changes to Subdivision Chapter Rules SUB – R5 and SUB – R6

SUB – R5 Subdivision to create allotments in all RESZ – Residential Zones, CMUZ – Commercial and Mixed Use Zones, INZ – Industrial Zones, SVZ – Scenic Visitor Zone or PORTZ – Port Zones
Activity Status Controlled Where: … 8. the subdivision is in general accordance with any development plan in place for the site **and in the case of the Moana North Development Area is in accordance with the Moana North Development Area Outline Plan in the Development Areas section of the Plan.** **...** **Matters of Control are:** **q. Within the Moana North Development Area:** **a. Future ownership and management of the former landfill;** **b. Management of adverse effects on the significant values of natural wetlands.** … **Activity status where compliance not achieved**: Discretionary where 2, 6, 7 or 8 is not complied with.



SUB – R6 Subdivision to create allotment(s) in any RURZ – Rural Zone or MPZ – Māori Purpose Zone
Activity Status Controlled Where: … **7. Any subdivision in the Moana North Development Area is in accordance with the Moana North Development Area Outline Plan in the Development Areas section of the Plan.** ... **Matters of Control are:** **...** **n. Within the Moana North Development Area:** **i. Future ownership and management of "no build areas" adjacent to Moana Scenic Reserve; and** **ii. Development and implementation of an ecological management plan.** … **Activity status where compliance not achieved**: Discretionary where 2, or 5-7 is not complied with.

PART A – INTRODUCTORY MATTERS

1. PRELIMINARY MATTERS

1.1. Introduction

1. Matters to do with our appointment and other preliminary matters applicable to all Hearing Panel's recommendations on the Proposed Te Tai o Poutini Plan (**pTTPP** or 'the Plan') are recorded and addressed in Recommendation Report 1.

2. This Recommendation Report relates to the Signs - Ngā Tohu (**SIGN**) Chapter of the pTTPP; and contains the Hearing Panel's evaluations and recommendations to the TTPP Committee on the submissions and further submissions received on this Chapter in Part 2, Section 7 of the Plan.

3. The Section 32 Report[1] provided an evaluation of the options for the management of signs through the combined Plan, including the regulatory framework key resource management issues, the evidence base, consultation, information and analysis undertaken) and evaluation of the options.

4. The section 42A Officer's Report[2] ('s42A Report'), authored by Ms Lois Easton, a planner with Kererū Consultants acting as the Reporting Officer, was circulated prior to the hearing. The s42A Report provided an analysis of a total of 119 submission points and 19 further submissions points; and made recommendations on changes to the notified plan provisions (the changes were included in Appendix 1 and the recommendation on all submissions as to either accepted, accepted in part or rejected in Appendix 2).

5. The matters raised by submitters were grouped in the s42A Report in relation to each of the following key issues for the chapter:

    - General/Whole Chapter;
    - Overview;
    - Objective;
    - Policies;
    - Rules;

6. This Recommendation Report follows this same structure of the s42A Report and provides a brief summary of the issues raised in submissions and further submissions, the s42A Report analysis and recommendations, submitter evidence and the Reporting Officer's reply evidence, before providing our evaluation and recommendation.

7. This Recommendation Report should be read in conjunction with the s42A Report and the tracked change version of the notified Plan provisions (attached as Appendix 1 to this Report). The tracked change version of the TTPP provisions forms an integral part of the decision and records all recommended amendments (additions and deletions) to the notified TTPP provisions made by the Panel. The tracked change version of the TTPP shows the Panel's recommended changes to the notified provisions in **bold and underlining** indicating additions

[1] Te Tai o Poutini Plan – Section 32 Report 7: Noise, Light, Signs, Earthworks and Temporary Activities (See https://ttpp.nz/proposed-ttpp-plan/section-32-reports/).

[2] Te Tai o Poutini Plan Section 42A Officer's Report Signs - Ngā Tohu (See https://ttpp.nz/wp-content/uploads/2024/07/TTPP-s42A-Signs.pdf)

and ~~strikethrough~~ indicating deletions. If there is any discrepancy between this Recommendation Report and the tracked change version of the Plan, the tracked change version of the Plan shown in Appendix 1 of this Report must prevail.

8. This Recommendation Report contains the reasons for the Panel's recommendations. These comprise either adoption of the reasoning and recommendations of the original section 42A Reports or the Reporting Officer's reply evidence (Councils' right of reply post hearing adjournment), or a specific reasoning by the Panel.

9. Where the Panel recommends the TTPP provisions should remain as notified, it is because:

   (a) The Panel has adopted the reasoning and recommendation of the s42A Report to retain the provision as notified; or

   (b) The Panel has adopted the reasoning and recommendation to retain the provision as notified as recommended in the Reporting Officer's reply evidence; or

   (c) The Panel has recommended to retain the provision as notified for reasons set out in this Recommendation Report.

10. Where there is a recommended change to a notified provision of the TTPP, it is because:

   (a) The Panel has recommended amendment to a provision for reasons set out in this Recommendation Report in response to a submission point, which the s42A Report did not recommend; or

   (b) The Panel adopted the reasoning and recommendation of the s42A Report to change the provision to that recommended in the original s42A Report; or

   (c) The Panel has adopted the reasoning and recommendation to that recommended in the Reporting Officer's reply evidence; or

   (d) A consequential change has been necessary following on from a decision in either (a), (b) or (c).

11. Where there may be a different recommendation between the s42A Report and the Reporting Officer's reply evidence (i.e., the recommendation by the Reporting Officer has changed as a result of hearing the evidence of submitters), unless the Panel decision specifically adopts the original s42A Report's reasoning and recommendations, the reasoning and recommendations in the (later) reply to evidence has been adopted and it must be taken to prevail.

12. If there are circumstances where the Panel consider that alternative relief is more appropriate than that requested in submissions and further submission to give effect to the RMA, national policy statements and/or RPS, but are still within the scope of the relief sought, the relevant recommendation clearly sets out the nature of the change and the reason for the change. This is recorded in this Recommendation Report.

13. If any changes are recommended to the provisions (since the Section 32A Report was completed) a further evaluation if required pursuant to section 32AA of the RMA has been undertaken. Any such circumstances are referred to in this Recommendation Report in sufficient detail to demonstrate a further evaluation was undertaken.

14. Clause 16(2) of the First Schedule of the RMA enables the Panel to recommend amendments to alter information, where such an alteration is of minor effect, or may correct any minor errors. In the Panel's recommendations below each section considered in Part C of this Report and in the tracked change version of the notified Plan provisions (Appendix 1 of this Report) records any minor amendments.

1.2. Terminology in this Report

15. Throughout this Report, the following abbreviations will be used:

TTPP	Te Tai o Poutini Plan
BDC	Buller District Council
DOC	Department of Conservation
Forest & Bird	Royal Forest & Bird Protection Society of NZ
GDC	Grey District Council
KiwiRail	KiwiRail Holdings Limited
Poutini Ngāi Tahu	Te Rūnanga o Ngāi Tahu, Te Runanga o Ngāti Waewae, Te Rūnanga o Makaawhio
NPS	National Policy Statement
NZCPS	New Zealand Coastal Policy Statement
pTTPP	Proposed Te Tai Poutini Plan
Planning Standards	National Planning Standards
RMA or the Act	Resource Management Act 1991
RPS	West Coast Regional Policy Statement
RSI	Regionally Significant Infrastructure
SASM	Sites and Areas of Significance to Māori
Waka Kotahi NZTA	NZ Transport Agency Waka Kotahi
WCRC	West Coast Regional Council
WDC	Westland District Council

1.3. Hearing Arrangements

16. A combined hearing with the Noise Chapter was held on 4 September 2024 at the West Coast Regional Council Chambers, 388 Main South Road, Greymouth. The one submitter who wished to speak on the Signs Chapter appeared by internet connection.

1.4. Appearances

17. The following submitters appeared at the hearing:

Section 42A Reporting Officer – Ms Lois Easton, Principal Consultant with Kererū Consultants

Waka Kotahi NZTA - Mr Stuart Pearson, Senior Planner[3]

1.5. Overview of submitter evidence received

18. No legal submissions were received in relation to the Signs Chapter.

19. A statement of evidence was received from Mr Stuart Pearson on behalf of Waka Kotahi NZTA.[4]

20. A statement of evidence was received from Mr Francis Costello on Behalf of Go Media Limited (S501) and was tabled at the hearing.[5]

21. A letter from Mr Martin Kennedy on behalf of Westpower Ltd[6] was received confirming acceptance of the proposed amendments to Objective SIGN-O1.

1.6. Right of Reply

22. Ms Easton provided a written Right of Reply (dated 17 September 2024).[7] This included additional recommended amendments to the provisions shown highlighted in yellow.

1.7. Procedural Steps and Issues

23. No pre-hearing conferences or clause 8AA meetings or expert witness conferencing was held in relation to this topic.

24. No procedural matters were raised at or after the hearing.

1.8. Site Visits

25. The Panel has undertaken site visits throughout the pTTPP process to inform hearings better when and where necessary.

26. No site visits were undertaken specifically in relation to the Signs Chapter.

PART B - STATUTORY REQUIREMENTS AND DOCUMENTS

27. Sections 58 B- 58 J of the RMA (as inserted by the Resource Legislation Amendment Act 2017) have imposed National Planning Standards. The first National Planning Standards were developed and took effect in 2019. These impose a District Plan Structure Standard, whereby Signs are one of seven General District-Wide Matters chapters that need to be addressed under General District-Wide Matters in new District Plans (the others being Activities on the Surface of Water, Coastal Environment, Earthworks, Light, Noise, and Temporary Activities). General District-Wide matters itself is one of seven sections that need to be addressed under Part 2: District Wide Matters (the others being Strategic Direction, Energy, Infrastructure and Transport, Hazards and Risks, Historical and Cultural Values, Natural Environment Values and Subdivision).

28. Consistent with the National Planning Standards, Signs – Ngā Tohu is one of seven chapters included within the General District Wide Matters – Ngā Kaupapa ā-Rohe Whānui Section under Part 2: District Wide Matters - Ngā Kaupapa ā-Rohe Whānui of the pTTPP.

29. The Section 32 Report outlined the relevant statutory considerations applicable to signs and the relationships between the sections of the RMA and higher order documents.[8]

30. The s42A Report highlighted the relevant sections of the RMA (including Part 2, Sections 31, 32, 32AA, 74 and 75).[9] The relationship between the NZCPS, other NPS, the National Planning Standards and the RPS were also highlighted.

31. Clause 10 of the First Schedule of the RMA states that it is not necessary to provide decisions on individual submissions. Recommendations of the Panel are made within the scope of requested relief, with either individual submissions or groups of submissions making similar requests. References to relevant submissions for the recommended changes to provisions are made in the footnotes.

32. The Planning Standards mandatory direction 7.36 requires that if provisions for managing signs are to be included, then they must be done so in the Signs Chapter under the General District Wide Matters Section. Mandatory direction 7.38 requires that chapters within the General District Wide Matters Section itself must be included alphabetically. The Panel is satisfied the Plan structure is consistent with this national direction.

PART C – SUBMISSIONS, EVIDENCE, EVALUATION AND RECOMMENDATIONS

2. SIGNS

2.1. SIGN General/Whole Chapter

Submissions and Further Submissions

33. Six submission points and one further submission point relating to general matters or the whole Signs Chapter were summarised in the Table on page 6 of the s42A Report. Four submission points supported the provisions as notified,[10] one opposed the provisions,[11] one

[8] Te Tai o Poutini Plan – Section 32 Report 7: Noise, Light, Signs, Earthworks and Temporary Activities (See https://ttpp.nz/proposed-ttpp-plan/section-32-reports/).
[9] Lois Easton Section 42A Author Right of Reply (See https://ttpp.nz/wp-content/uploads/2024/07/TTPP-s42A-Signs.pdf)
[10] Westland District Council S181.031, David Marshall S347.005, Waka Kotahi NZTA S450.005 & S450.009
[11] Greenstone Retreat S459.004

submission sought amendments,[12] and one further submission opposed an amendment being sought.[13]

34. The Panel has considered the relevant submissions and further submissions received and adopts the summaries in the s42A Report.

Section 42A Report

35. The s42A Report did not support GDC's (S608.087) request to remove references to Sites and Areas of Significance to Māori (**SASM**) and the overlays chapters of the Plan given this gives effect to RMA section 6 matters of national importance.

36. The s42A Report did not support a case-by-case review of the rules as sought by Greenstone Retreat (S459.004). It noted the rules in the pTTPP were less restrictive than those in the operative plans for Buller and Westland District Councils and were similar in stringency to those in the operative Grey District Plan.

Hearing and Submitter Evidence/Statements

37. No evidence was provided at the hearing in relation to general matters.

Reporting Officer Reply Evidence

38. In Reply, Ms Easton responded to two questions from the Panel and responded to Mr Kennedy for Westpower. These responses are dealt with under the respective provisions below.

39. The Panel questioned where else in the Plan (other than the Signs Chapter itself) the term '*Formed Legal Road*' is used. Ms Easton confirmed that this term was only used in the Signs Chapter but noted that the section 42A Reports for both the Natural Character of the Margins of Waterbodies and the Coastal Environment Chapters recommended that the term be defined. Ms Easton considered that a definition of the term would be useful and recommended including it under the Definitions -Ngā Tautuhinga Chapter of the Interpretation - Ngā Whakamāramatanga section of the Plan.

Hearing Panel's Evaluation

40. The Panel agrees with Ms Easton that it is not appropriate to remove references to overlays or to remove all references to SASM in the Signs Chapter, given that this gives effect to RMA s6 matters of national importance.

41. The Panel consider there is scope for adding a definition for '*formed legal road*'.

Hearing Panel's Recommendation

42. No changes to the provisions are required in relation to issues raised in submissions and further submission made on general matters or to the Signs Chapter as a whole.

2.2. SIGN Overview

Submissions and Further Submissions

[12] Grey District Council S608.087
[13] Poutini Ngāi Tahu FS41.023

43. No submissions points and no further submission point relating to the Overview specifically were received.

Recommendation

44. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that there are no changes to the SIGN Overview, as follows:

Overview

Signs are an important method of providing community, consumer and destination information and safety messages and traffic controls, they include a wide range of type and scale including large billboards; free standing signs attached to or painted onto buildings, illuminated and/or moving signs and digital displays.

Signs are generally anticipated in commercially focussed areas such as the Town Centre Zone and Neighbourhood Centre Zone, Settlement Centre Precinct and in the General Industrial Zone, where they are used to advertise products and services that are available on the site on which the sign is located. However, if not carefully managed, signs have the potential to cause visual clutter and undermine the character and amenity values of an area.

To ensure signs are compatible with an area, their scale number, illumination, motion and placement are matters that are managed through Te Tai o Poutini Plan. This chapter contains the provisions that control signs and includes provisions which manage signage that advertises services or products which are not directly related to or associated with the activity undertaken on the site upon which the sign is located.

Other relevant Te Tai Poutini Plan provisions.
It is important to note that in addition to the zone chapters, other Part 2: District-wide Matters chapters may contain provisions that are relevant to signs, in particular the specific Overlay Chapters referred to within this chapter such as Historic Heritage and Sites and Areas of Significance to Māori.

2.3. SIGN Objective

Submissions and Further Submissions

45. Seven submission points relating to Objective SIGN-O1 were summarised in the Table on page 7 of the s42A Report. Five submission points supported the wording as notified,[14] one submission point supported in part[15] and one submission point sought an amendment to the wording.[16]

46. The Panel adopts these summaries and has considered the relevant submissions.

Section 42A Report

[14] Foodstuffs S464.050, Grey District Council S608.678, Te Mana Ora/Te Whatu Ora S190.550, Waka Kotahi NZTA S450.173. Buller District Council S538.344
[15] Go Media Limited S501.002
[16] Westpower Limited S547.491

47. The s42A Report noted the five submission points in support of Objective SIGN-O1.

48. The s42A Report supported the submission point from Go Media, seeking the deletion of the reference to visual and amenity effects, and considered the proposed amendments largely addresses the e Westpower submission point.

49. The s42A Report supported Westpower's submission to amend the provision so the proposed signage is compatible with the character and amenity values of the surrounding area, acknowledging the current wording was clumsy, but did support deleting reference to visual effects.

50. The s42A Report recommended the following amendments to SIGN-O1:

> *Signs contribute to the social, cultural and economic wellbeing of the West Coast/Te Tai o Poutini while:*
>
> *1. Supporting the needs of business, infrastructure and community activities;*
>
> *2. Ensuring that <u>any proposed signage is compatible with</u> the character, <u>visual</u> and amenity values of the surrounding area, <u>and that these</u> are maintained or enhanced ~~and protected from any adverse visual and amenity effects~~: and*
>
> *3. Maintaining public safety.*

<u>Hearing and Submitter Evidence/Statements</u>

51. Mr Kennedy (for Westpower), Mr Pearson (for Waka Kotahi NZTA) and Mr Costello (for Go Media Ltd) indicated support for the s42A Report's recommended amendments to SIGN-O1.

<u>Reporting Officer Reply Evidence</u>

52. No further amendments to SIGN-O1 were recommended in Reply.

<u>Hearing Panel's Evaluation</u>

53. The Panel note the support from submitters for Ms Easton's recommended amendments to Objective SIGN-O1 and accepts these amendments are appropriate for the reasons given in the s42A Report.

<u>Hearing Panel's Recommendation</u>

54. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommends the following changes to the **Signs Objective**:

SIGN – O1
Signs contribute to the social, cultural and economic wellbeing of the West Coast/Te Tai Poutini while: 1. Supporting the needs of business, infrastructure and community activities;

2. Ensuring that **any proposed signage is compatible with** the character**, visual** and amenity values of the surrounding area, **and that these** are maintained or enhanced~~ and protected from any adverse visual and amenity effects~~; and[17]

3. Maintaining public safety.

2.4. SIGN Policies

Submissions and Further Submissions

55. One submission point relating to the policies was received supporting the retention of the policies as notified.[18]

56. Three submissions were received to SIGN-P1 supporting the retention of the policy as notified.[19]

57. Two submissions were received supporting to retain SIGN-P2 as notified,[20] two submissions sought amendments to the Policy,[21] one further Submission sought to allow amendment sought[22] and two further submissions sought to disallow an amendment being sought.[23]

58. Four submissions were received in relation to SIGN-P3 supporting to retain the Policy as notified[24] and one further submission supporting the policy in part.[25]

59. One submission was received supporting to retain SIGN-P4 as notified.[26]

60. Two submission points were received supporting SIGN-P5 as notified,[27] one submission point sought to amend the policy,[28] and one further submission sought to disallow the amendment being sought.[29]

61. One submission point was received supporting to retain SIGN-P6 as notified,[30] two submission points sought amendments to the policy,[31] and one further submission point was received supporting and amendment.[32]

Section 42A Report

62. In relation to **SIGN-P2**, the s42A Report supported the requested amendments sought by Westpower to bring the reference to adverse effects to the front of the policy; and considered the submission point by Foodstuffs (South Island) Properties Limited and Foodstuffs South

[32] Poutini Ngāi Tahu FS41.075

Island Limited to add the word '*unacceptable*' but recommended that adding '*significant*' would be more appropriate wording.

63. The s42A Report agreed with the submission from Go Media Limited that there was no guidance in relation to offsite advertising but, recommended an alternative to amending SIGN-P5. Ms Easton considered that there is a need for an additional policy to address this issue and proposed a new Policy SIGN-P7 to address the submitter's concerns.

64. The s42A Report supported the request from the Buller Conservation Group and Frida Inta to correct the wording of SIGN-P6 so that this is not drafted as an objective.

65. The s42A report recommended the following amendments to the SIGN policies:

> *SIGN-P2*
>
> *Ensure that the significant adverse effects, including cumulative effects of signs on the landscape, natural character and amenity values of residential areas, settlements, rural areas, open space and outstanding natural landscapes and features are avoided remedied or mitigated. ~~protected from adverse visual and amenity effects from large areas or numbers of signs.~~*
>
> *SIGN-P6*
>
> *~~To s~~Support the use of bilingual signage and the use of traditional Poutini Ngāi Tahu place names within the district.*
>
> *New Policy SIGN-P7*
>
> *Avoid new off-site signs in Rural and Residential Zones and ensure that off-site signs in all other zones maintain transport safety and are compatible with the character and visual amenity values of the surrounding area, particularly where they are visible from any Residential or Rural Zone*

Hearing and Submitter Evidence/Statements

66. Mr Pearson (for Waka Kotahi NZTA) supported retaining SIGN-P1, SIGN-P3, and SIGN-P5 as notified.

67. No other evidence was presented at the hearing relating to the policies.

Reporting Officer Reply Evidence

68. In response to the questions raised by the Panel relating to the use of '*avoid*' in new Policy SIGN-P7, Ms Easton agreed its use was not correct because it supported a restricted discretionary activity rule, rather than non-complying activity rule. She supported replacing '*Avoid*' with '*Strongly discourage'*. She noted that the intent was for this new policy to apply to all Rural Zones, including Rural Lifestyle and Settlement Zones, and therefore considered it necessary to amend it to clarify this.

69. In relation to SIGN-P6, Ms Easton considered that '*West Coast districts*' would be more appropriate than the word '*District*' in this policy but recommended using '*West Coast'* because this was the most common phraseology used throughout the Plan. She noted there were no submissions relating to this matter but considered this could be addressed as a clause 16(2) amendment.

Hearing Panel's Evaluation

70. The Panel accepts Ms Easton's recommended amendments to SIGN-P2, SIGN-P6 and new SIGN-P7, for the reasons set out in the s42A Report and in Reply. However, the Panel considers adding '*significant*' to SIGN-P2 is not appropriate, given the reference to outstanding natural landscapes and features. We also note this was not sought by Westpower. The Panel also considers '*Discourage*' in new SIGN-P7 is appropriate without needing the qualifier '*strongly*'.

Hearing Panel's Recommendation

71. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommends the following changes to the **SIGN Policies**:

SIGN - P1
Enable a diversity of sign types that provide for effective communication of government, business and community information and whilst maintaining public safety, access needs and the overall character of the area.
SIGN – P2
Ensure **that** the **adverse effects, including cumulative effects of signs on the** landscape, natural character and amenity values of residential areas, settlements, rural areas, open space and outstanding natural landscapes and features are **avoided, remedied or mitigated.**~~Protected from adverse visual and amenity effects from large areas or number of signs.~~ [33]
SIGN – P3
Ensure that signs do not adversely affect traffic safety of all road users including motorists, cyclists, pedestrians, or obstruct roads or footpaths.
SIGN - P4
Enable temporary signage subject to meeting basic activity and built form standards.
SIGN – P5
Ensure signs relating to a particular activity or/use of land or buildings on the site are located at the site of that activity land or building.
SIGN – P6
~~To s~~**S**upport[34] the use of bilingual signage and the use of traditional Poutini Ngāi Tahu place names within the ~~District~~**West Coast/Te Tai o Poutini**. [35]
SIGN – P7

[33] Westpower Limited S547.492
[34] Buller Conservation Group S552.157 and Frida Inta S553.157
[35] Clause 16(2) of First Schedule of RMA.

Discourage new off-site signs in all RURZ - Rural and RESZ - Residential Zones and ensure that off-site signs in all other zones maintain transport safety and are compatible with the character and visual amenity values of the surrounding area, particularly where they are visible from any RESZ - Residential or RURZ - Rural Zone. [36]

2.5. SIGN Rules - General

Submissions and Further Submissions

72. The s42A Report summarised four submission points in relation to the rules **as a whole** in the Table on page 11. One submission point sought to clarify the rules,[37] one submission point sought an activity-specific rule to enable billboards, including digital billboards and non-site related advertising in the TTPP provisions,[38] and two submission points sought an additional provision.[39]

73. Thirteen submission points and three further submission points were received in relation to **SIGN-R1**. Two submission points sought to retain the rule as notified,[40] three submissions supported the rule in part,[41] five submission points sought amendments to the rule,[42] three submission points opposed the rule[43] or opposed the rule in part[44] and three further submission points supported a proposed amendment to the rule.[45]

74. Five submission points were received in relation to **SIGN-R2**. Three submission points sought to retain the rule as notified,[46] one submission point supported the rule in part and sought an amendment,[47] and one submission point sought an amendment to the proposed rule.[48]

75. Three submission points were received in relation to **SIGN-R3**. Two submission points sought to retain the rule as notified[49] and one submission point opposed the rule in part and sought an amendment.[50]

76. Four submission points were received in relation to **SIGN-R4**. Two submission points sought to retain the rule as notified,[51] one submission point supported the rule in part,[52] and one submission point opposed the rule in part.[53]

[51] Greenstone Retreat S459.006 and Te Mana Ora/Te Whatu Ora S190.560
[52] Waka Kotahi NZTA S450.180
[53] Buller District Council S538.349

77. Three submission points were received in relation to **SIGN-R5**. One submission point sought to retain the rule as notified,[54] one submission point opposed the rule and sought to have it deleted,[55] and one submission point opposed the rule in part and sought an amendment.[56]

78. Two submission points were received in relation to **SIGN-R6**. Both submission points sought to retain the rule as notified.[57]

79. Three submission points were received in relation to **SIGN-R7**. Two submission points sought to retain the rule as notified,[58] and one submission points sought amendments to the rule.[59]

80. Three submission points were received in relation to **SIGN-R8**. One submission point sought to retain the rule as notified,[60] one submission point sought to amend the rule,[61] and one submission point supported the rule in part, subject to amendments.[62]

81. Two submission points were received in relation to **SIGN-R9**. both submission points sought to retain the rule as notified.[63]

82. Two submission points were received in relation to **SIGN-R18**. both submission points sought to retain the rule as notified.[64]

83. Six submission points and three further submission points were received in relation to **SIGN-R19.** One submission point sought to retain the rule as notified,[65] two submission points supported the rule in part and sought amendments to the rule,[66] one submission point opposed the rule in part,[67] two submission points sought amendments to the rule,[68] two further submission points opposed an amendment sought,[69] and one further submission point sought to allow an amendment sought.[70]

Section 42A Reports

84. The s42A Report highlighted submissions that sought changes to the rules as a whole and recommended a range of amendments based on specific submissions. Ms Easton did not support the submission seeking to enable billboards and non-site related advertising in the TTPP provisions because the general approach for signs in the pTTPP is to focus on the property the sign is located on. Ms Easton did not support additional restrictions on signage in areas of high natural value given she considered this was covered by discretionary activity Rule SIGN-R22.

SIGN-R1 General Permitted Activity Performance Standards-All Zones

[54] Te Mana Ora/Te Whatu Ora S190.561
[55] Greenstone Retreat S459.007
[56] Buller District Council S538.350
[57] Buller District Council S538.352, Te Mana Ora/Te Whatu Ora S190.562

[64] Buller District Council S538.363 and Te Mana Ora/Te Whatu Ora S190.574
[65] Te Mana Ora/Te Whatu Ora S190.575
[66] Grey District Council S608.685 and Waka Kotahi NZTA S450.183
[67] Buller DC S538.364
[68] Westpower Ltd S547.493, S547.494
[69] Go Media Ltd FS102.003, FS102.002
[70] Go Media Ltd FS102.005

85. The s42A Report supported the BDC's request for a definition for '*Transport Corridor'* and recommended adding the following definition:

> *Means, in relation to the SIGN Chapter, any formed legal road and the Designated railway corridor.*

86. The s42A Report supported the following requests for amendments to the standards relating to the rule, including:

(a) A new sub clause in clause (6) to include '*Digital or LED light components*'

(b) Relacing '*Exceed with*' with '*Be smaller than*' in clause (10) and adding '*with a posted speed limit of 70 km or more*' at the end; and

(c) Relacing '*Exceed*' with '*Be smaller than*' in clause (11) and deleting sub clause (i).

87. The s42A Report did not support the other amendments sought by submitters as Ms Easton considered these were unnecessary and were covered in other rules, including Waka Kotahi NZTA's request to include additional performance standards.

88. The s42A Report considered the response to the BDC submission (S538.346) addressed the concerns raised in the GDC submission (608.681) regarding the reference to the *'transport corridor'* with the proposed definition referred to above. It did not support the submission from Stephen Page (S270.004) seeking to reduce the minimum size of the lettering allowed on signs because this was a significant matter in terms of road safety.

SIGN-R2 Traffic and Railway Signs - All Zones

89. The s42A Report supported the submission point from GDC (S608.682) seeking a definition for '*formed legal road*' and recommended adding the following definition:

> *Means, a legal road that has been physically constructed and includes gravelling, metalling, sealing or permanently surfacing the road.*

90. The s42A Report also supported the submission from KiwiRail (S442.091) requesting to delete the reference to '*NZ Railways Corporation*' as KiwiRail is the operator and responsible for safety and signage.

SIGN-R3 Official Signs that are not Traffic and Railway Signs – All Zones

91. The s42A Report supported the submission point from BDC (S538.348) seeking an additional standard exempting signs required to meet health and safety obligations from the six word limit.

SIGN-R4 Temporary Signs- All Zones

92. The s42A Report did not support the submission point from Waka Kotahi NZTA (S450.180) seeking an advice note referring people to the Waka Kotahi NZTA General Election Sign guidance because it considered advice notes generally do not refer to third-party guidance. It supported the submission point from BDC (S538.349) seeking a reduction for the maximum height allowable from 4m above ground level to 2.5m.

SIGN-R5 Community Signs-All Zones

93. The s42A Report did not support the submission point from Greenstone Retreat (S459.007) opposing the rule and seeking to have it deleted. It supported the same amendment to the maximum allowable height as recommended to SIGN-R4 in response to the BDC submission.

SIGN-R7 Interpretation signs on the site of a Scheduled Feature in Schedules 1-4 or Schedule 6- All Zones.

94. The s42A Report did not support the submission point from Go Media Limited seeking to delete the maximum sign provisions or significantly increase them. It considered that a $3m^2$ sign, 4m high, is sufficient as a permitted activity.

SIGN-R8 Footpath Signs-All Zones

95. The s42A Report did not support the submission from Greenstone Retreat (S459.010) opposing the standard requiring a 2m-wide clear space for pedestrians. It noted the sizing of footpaths was for pedestrian use, with two people walking side by side (a mother pushing a pram and holding the hand of a second child) and a disabled person who requires the 2m width.

96. The s42A Report supported the request from Te Mana Ora (S190.564) for an amendment that directs that signs are located at the outer edge of the footpath because sight- impaired people tend to use the part of the footpath closer to buildings. It did not support the parts of the submission seeking an additional standard for outdoor dining, as this is covered by sign bylaws by each council. It also did not support the introduction of a performance standard that states the sign does not compromise pedestrian safety because it was ambiguous and difficult to implement.

SIGN-R19 Signs which do not meet Permitted Activity standards not subject to Rule-SIGN R18

97. The s42A Report supported the submission point from BDC (S538.364) opposing the inclusion of the limited notification clause for this rule and noted that limited notification clauses are no longer provided for under the RMA.

98. The s42A Report supported the submission points from GDC (S608.685) and Waka Kotahi NZTA (S450.183) seeking an additional matter of discretion be included around the content of the sign. It noted this was a key matter given it would include things, such as font size and number of words, which were important matters for traffic safety.

99. The s42A Report did not support the submission points form Westpower (S547.493 and (S547.494) seeking additional matters of discretion relating to the '*technical, locational, functional or operational constraints'* of the activity given these matters were not relevant to signs.

2.6. SIGN Rules – Specific Zones

Submissions and Further Submissions

100. Two submission points were received relating to **SIGN-R10** seeking to retain the Rule as notified.[71]

[71] Buller District Council S538.355 and Te Mana Ora/Te Whatu Ora 190.566

101. Two submission points were received relating to **SIGN-R11** seeking to retain the Rule as notified.[72]

102. Two submission points were received relating to **SIGN-R12** seeking to retain the Rule as notified.[73]

103. Two submission points were received relating to **SIGN-R13** seeking to retain the Rule as notified,[74] and three submission points were received seeking amendments to Rule as notified,[75] and one submission point opposed the Rule as notified.[76]

104. Two submission points were received relating to **SIGN-R14** seeking to retain the Rule as notified.[77]

105. Two submission points were received relating to **SIGN-R15** seeking to retain the Rule as notified,[78] and three submission point sought amendments to the notified Rule.[79]

106. Two submission points were received relating to **SIGN-R16** seeking to retain the Rule as notified.[80]

107. Two submission points were received relating to **SIGN-R17** seeking to retain the Rule as notified,[81] six submission points were received seeking amendments to the notified rule,[82] and two further submission points were received supporting the proposed amendments to the Rule.[83]

108. Two submission points were received relating to **SIGN-R20** seeking to retain the Rule as notified.[84]

109. Two submission points were received relating to **SIGN-R21** seeking to retain the Rule as notified.[85]

110. Two submission points were received relating to **SIGN-R22** seeking to retain the Rule as notified,[86] one further submission points supported the submissions to retain the Rule as notified,[87] and one submission point sought to delete the Rule.[88]

[73] Buller District Council S538.357 and Te Mana Ora/Te Whatu Ora S190.568
[74] Buller District Council S538.358 and Te Mana Ora/Te Whatu Ora S190.569
[75] Greenstone Retreat S459.011, Grey District Council S608.683 and Waka Kotahi NZTA S450.181
[76] Stephen Page S270.003
[77] Buller District Council S538.359 and Te Mana Ora/Te Whatu Ora S190.570
[78] Buller District Council S538.360 and Te Mana Ora/Te Whatu Ora S190.571
[79] Grey District Council S608.088, S608.844 and Waka Kotahi NZTA S450.182
[80] Buller District Council S538.361 and Te Mana Ora/Te Whatu Ora S190.572
[81] Buller District Council S538.362 and Te Mana Ora/Te Whatu Ora S190.573
[82] Grey District Council S608.089, Foodstuffs S464.009, S464.052 and Go Media Ltd S501.004, S501.006, S501.009
[83] Martin & Co and Lumberland Building Market FS140.027 and Westpower Ltd FS222.0113
[84] Buller District Council S538.365 and Te Mana Ora/Te Whatu Ora S190.576
[85] Buller District Council S538.366 and Te Mana Ora/Te Whatu Ora S190.577
[86] Buller District Council S538.367 and Te Mana Ora/Te Whatu Ora S190.578
[87] Go Media Ltd FS102.004
[88] Greenstone Retreat S459.012

111. In relation to **SIGN-R13,** the s42A Report supported the submissions from GDC (S608.683) and Waka Kotahi NZTA (S450.181) seeking to delete the reference to '*adjoining site'* from the rule due to the potential impacts on traffic safety that could arise from this.

112. The s42A Report did not support the submission points from Stephen Page (S270.003) and Greenstone Retreat (S459.011) requesting to allow signs regardless of whether it relates to the property on which it is located. It considered that this would be inconsistent with the policy direction of the chapter to avoid the proliferation of signs unrelated to properties where the activity is located.

113. The s42A Report also supported the deletion of *'adjoining site'* from Rule **SIGN-R15** for the reasons outlined in relation to SIGN-R13. It also supported GDC's (S608.088) request to increase the maximum size of the sign from $2m^2$ to $3m^2$ which is the common size of a sheet of plywood.

114. In relation to **SIGN-R17**, the s42A Report supported the request from GDC (608.089) to amend the rule to make it clear that signs attached to the face of a building must be '*no larger'* than the specified size.

115. The s42A Report did not support the submission points from Foodstuffs (S464.009 and S464.052) and Go Media Limited (S501.006) seeking an increase in the maximum size of signage per activity by removing the reference to a maximum $3m^2$ (the Panel notes this was incorrectly referenced in the s42 Report as $3m^3$). It did not support adding '*where practicable*' because it considered this was inappropriate in a permitted activity standard. Ms Easton considered setting the maximum size, as notified, was appropriate because of the potential for adverse visual effects from a proliferation of signage on a building; and concluded a resource consent process for larger signs was appropriate.

116. The s42A Report did not support the submission points from Go Media Limited (S501.004 and S501.009) seeking to provide a rule for off-site advertising and to delete clause (1) of the Rule. It noted the intention of the policy framework was to manage the visual effects of signs and avoid the proliferation of signs that can lead to cumulative visual effects.

Hearing and Submitter Evidence/Statements

117. Mr Pearson confirmed that overall, he accepted the s42A Report recommendation, except for minor changes to SIGN-R1(11(i), which he noted was still outstanding.

118. Mr Costello's tabled statement indicated his preference was to have SIGN-R1 deleted in its entirety but accepted the limitation applying to higher speed areas.

Reporting Officer Reply Evidence

119. In Reply, Ms Easton supported the proposed amendment to Rule SIGN-R1(11)(i)1 as proposed by Mr Pearson.

120. Ms Easton addressed questions from the Panel in relation to off-site signage. She recommended adding '*For signs with Digital or LED components, maintenance requirements, management of light spill, duration of images and fail-safe mechanisms in the event of a malfunction*' to the matters of discretion in SIGN-R18.

121. Ms Easton responded to the Panel's query regarding government regulation around the size of election signs and advised the maximum size of an election sign is $3m^2$.

122. Ms Easton also responded to the Panel's question, whether lowering the maximum height from 4m to 2.5m would cause concerns regarding graffiti, and advised there was no available information that linked the height of signs to risk of graffiti. She noted that it was arguable that a 4m high sign may be more appealing for graffiti, as it would be potentially more visible from a distance.

123. Ms Easton checked how other district plans referenced KiwiRail in relation to signs rules and advised it was common to refer to KiwiRail, (and also New Zealand Railways Corporation/Kiwi Rail) but considered it would equally appropriate to refer to a generic '*Railway Operator*'.

Hearing Panel's Evaluation

124. The Panel agrees with Ms Easton's recommended amendments to the Rules as sought by various submitters in their submissions and further submissions in relation to the SIGN Chapter. However, we have made minor corrections and reworded Rule SIGN-R4(3) to clarify the sign should be erected '*before the start of construction activity*'.

Hearing Panel's Recommendation

125. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommends the following changes to the **SIGN Rules**:

Signs – Ngā Tohu
Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach.
Permitted Activities
SIGN - R1 General Permitted Activity Performance Standards-All Zones
Where Activity Status is Permitted All signs shall not: 1. Project over the road or be located within a transport corridor; 2. Obstruct the line of sight of any corner, bend, intersection or vehicle or rail crossing; 3. Obstruct, obscure or impair the view of any traffic or railway sign or signal; 4. Physically obstruct or impede traffic, trains or pedestrians; and 5. Resemble or likely to be confused with any traffic sign or signal; 6. Have: i. Reflective materials, ii. Flashing, revolving or intermittent light, iii. Sound effects, ~~or~~

iv. Animated, trivisual, inflatable or aerial components; **or**[89]
v. **Digital or LED light components;**[90]

7. Be affixed to vehicles or trailers and parked in a location visible from a public place. This does not apply to advertising incidental to the primary use of the vehicle or trailer;
8. Exceed the height requirements for buildings in the relevant zone;
9. Be of a colour or size which could be confused with a traffic signal;
10. ~~Exceed~~ **Be smaller than**[91] ~~with~~ the following minimum lettering size and character requirements:
    i. 120mm minimum lettering size where facing any road with a posted speed limit of less than 70km/h;
    ii. 160mm minimum lettering size where facing any road with a posted speed limit of 70km/h or more;
    iii. Have a maximum of 6 words and/or symbols with a maximum of 40 characters per sign whe**re**~~n~~[92] facing any road **with a posted speed limit of 70km/h or more; and**[93]
11. ~~Exceed~~ **Be smaller than**[94] the following separation distances between signs where these are located within 10 metres of a road:
    ~~i. 60m separation distances between signs facing a road with a posted speed limit of 70km/h~~[95]
    i~~i~~. 70m separation distances between signs facing a road with a spotted speed limit of 7~~1~~**0**[96] - 80km/h; **and**[97]
    i~~iii~~.80m separation distances between signs facing a road with a posted speed limit of 80km/h.

Advice Note:
Any sign located within the road corridor of a State Highway may require approval from New Zealand Transport Agency- Waka Kotahi as the landowner and network utility operator. Activity status where compliance not achieved: Restricted Discretionary

Activity status where compliance not achieved: Restricted Discretionary

SIGN - R2 Traffic and Railway Signs-All Zones

Activity Status Permitted
Where:

1. The sign is required by Waka Kotahi - NZ Transport Agency and is located within a road reserve; or
2. The sign is required by NZ Railways Corporation/Kiwi**R**~~r~~ail[98] and is located within a rail corridor; or
3. The sign is required by the Council and is located within a road reserve or road corridor for a formed legal road.

Activity status where compliance not achieved: Controlled

SIGN - R3	**Official Signs that are not Traffic and Railway Signs - All Zones**

Activity Status Permitted
Where:

1. The sign is required to meet legislative requirements such as health and safety legislation; or
2. The sign provides information relating to public safety or wayfinding, such as equipment use, property entrances or for security purposes, and is no larger than is reasonably necessary to convey the information; and
3. All performance standards of Rule Sign-R1 are complied with**, the exception being that signs required to meet health and safety obligations are not subject to the six-word limit.** [99]

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R4	**Temporary Signs - All Zones**

Activity Status Permitted
Where:

1. These are for community events and the sign is erected no earlier than **six**~~6~~[100] months before the event and is removed with **seven**~~7~~[101] days of the event **ending,** [102] or
2. These are for temporary activities and the sign is erected no earlier than **one**~~1~~[103] month before the activity and is removed within **seven**~~7~~[104] days of the activity **ending**;[105] or
3. These are for construction sites and the sign is erected no earlier than **six**~~6~~[106] months before the ~~event~~ **start of the construction activity**[107] and is removed within **seven**~~7~~[108] days of the construction activity ending ~~event~~; or
4. These are for land/premises for sale or lease and once the property is sold or let the sign is removed within **seven**~~7~~[109] days; or
5. These are for electioneering where the sign is erected no more than **nine**~~9~~[110] weeks before the election to which it relates and is removed within **one**~~1~~[111] day of the election day, unless otherwise required by statute; and
6. There is a maximum of one sign per road frontage;
7. The maximum sign face area is $3m^2$;
8. The maximum height measure from ground level is ~~4~~**2.5m;** and[112]
9. All performance standards for Rule SIGN - R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R5	**Community Signs - All Zones**

Activity Status Permitted
Where:

[99] Buller District Council S538.348

[112] Buller District Council S538.349

1. There is a maximum of one sign per site;
2. The maximum sign face area is 2m^2;
3. The maximum height measured from ground level is 4**2.5**m[113]; and
4. All performance standards for Rule SIGN-R1 are complied with.

Activity status where compliance not achieved: Restricted discretionary

SIGN - R6	**Signs not visible from a road, publicly accessible space, RESZ - Residential, SETZ - Settlement or OSRZ - Open Space and Recreation Zone - All Zones.**

Activity Status Permitted

Activity status where compliance not achieved: N/A

SIGN-R7	**Interpretation signs on the site of a Scheduled Feature in Schedules One-Four~~1-4~~[114] or Schedule Six~~6~~[115] - All Zones**

Activity Status Permitted
Where:
Where:
1. The maximum sign face area of each sign is 3m^2;
2. The maximum sign height measured from ground level is 4m; and
3. Performance standards for Rule SIGN - R1 are complied with.

Activity status where compliance not achieved: Restricted discretionary

Advice Note:
For signs located on or within Scheduled features compliance with the relevant rules for earthworks, buildings and structures may mean a resource consent is required.

SIGN - R8	**Footpath Signs- All Zones**

Activity Status Permitted
Where:
1. The sign is placed on the footpath immediately in front of the premises to which it relates;
2. A consistent 2m wide clear space for pedestrians on the footpath is maintained **between the sign and the internal boundary on the footpath**;[116]
3. The sign is removed from the footpath at the completion of the day's trading and not returned until the start of the next day's trading;
4. The sign is not displayed or attached to any public structure or traffic control device in a public place; and
5. All performance standards for Rule SIGN - R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R9	**Verandah Signs - All Zones**

Activity Status Permitted

[113] Buller District Council S538.350
[114] Clause 16(2) of First Schedule of RMA
[115] Clause 16(2) of First Schedule of RMA
[116] Te Mana Ora S190.564

Where:
1. The sign is under the verandah, on top of the verandah or within the verandah fascia;
2. The sign relates to an activity occurring on the site;
3. All performance standards for Rule SIGN - R1 are complied with;
4. There is a maximum of one under-verandah, one verandah fascia sign and one above verandah sign per premises per road frontage;
5. Any under-verandah sign must:
a. Provide a clearance of at least 2.5m from the footpath to the bottom of the sign;
b. Have a maximum height of 0.6m and a maximum depth of 0.25m;
c. Be setback 0.5m from the kerb of the road; and
d. Be mounted at right angles to the kerb line.
6. Any sign on a verandah fascia must be contained entirely within the verandah fascia;
7. Any sign above the verandah must:
a. Not exceed 1.2m in height above the fascia;
b. Not project beyond the face of the verandah; and
c. Be setback 0.5m from the kerb of the road.

Activity Status where compliance not achieved: Restricted Discretionary

Permitted Activities - Specific Zones

SIGN - R10 Signs in the MPZ - Māori Purpose Zone

Activity Status Permitted
Where:
1. These are erected with the approval of the relevant Poutini Ngāi Tahu Rūnanga; and
2. All performance standards for Rule SIGN - R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R11 Signs in the AIRPZ - Airport Zone

Activity Status Permitted
Where:
1. These are erected by the airport/aerodrome/heliport controlling authority and relate to the purpose of the zone; and
2. All performance standards for Rule SIGN - R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R12 Signs in the RESZ - Residential Zones

Activity status Permitted
Where:
1. The sign relates to an activity occurring on the site;
2. There is a maximum of one sign per site;
3. There is a maximum sign face of $1m^2$; and
4. All performance standards for Rule SIGN - R1 are complied with.

Activity Status where compliance not achieved: Discretionary

SIGN - R13	**Signs in the SETZ - Settlement outside of the SETZ - PREC2 Settlement Centre Precinct and SETZ - PREC3 - Coastal Settlement Precinct**

Activity Status Permitted
Where:
1. The sign relates to an activity occurring on the site ~~or an adjoining site~~; [117]
2. There is a maximum of one sign per site;
3. There is a maximum sign face of $2m^2$; and
4. All performance standards for Rule SIGN-R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R14	**Signs in the SETZ - PREC3 - Settlement Zone - Coastal Settlement Precinct**

Activity Status Permitted
Where:
1. The sign relates to an activity occurring on the site;
2. There is a maximum of one sign per site;
3. There is a maximum sign face of $1m^2$; and
4. All performance standards for Rule SIGN - R1 are complied with.

Activity Status where compliance not achieved: Discretionary

SIGN - R15	**Signs in the GRUZ-General Rural Zone, RLZ-Rural Lifestyle Zone, FUZ-Future Urban Zone, MINZ - Mineral Extraction Zone and BCZ - Buller Coalfield Zone**

Activity Status Permitted
Where:
1. The sign relates to an activity occurring on the site ~~or an adjoining site~~; [118]
2. There is a maximum of one sign per road frontage of the site;
3. There is a maximum sign face of ~~2~~**3**m^2; [119] and
4. All performance standards for Rule SIGN - R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R16	**Signs in any OSRC- Open Space and Recreation Zone or the STADZ - Stadium Zone**

Activity Status Permitted
Where:
The sign is located in an OSRZ - Open Space and Recreation Zone; and
1. The sign is:
a. Ancillary to a conservation, recreation or community activity; or
b. For commercial sponsorship of a recreation activity; and
2. All performance standards for Rule SIGN – R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R17	**Signs in any CMUZ - Commercial and Mixed Use Zone, any INZ - Industrial Zone, the PORTZ - Port Zone or a SETZ – PREC2 - Settlement Centre Precinct**

[118] Waka Kotahi NZTA S450.182 and Grey District Council S608.684
[119] Grey District Council S608.088

Activity Status Permitted
Where:
1. Signs must relate to an activity occurring on the site;
2. Signs are not directed towards residential or rural areas;
3. Signs attached to the structure or face of the building must **be no larger than**[120] a maximum of 10% of the area of the building façade or 3m^2, whichever is the lessor; and
4. All performance standards for Rule SIGN-R1 are complied with.

Activity status where compliance not achieved: Restricted Discretionary

Controlled Activities

SIGN - R18 Traffic and Railway Signs not meeting Permitted Activity Standards-All Zones

Activity Status Controlled
Matters of control are:
a. The location of the sign;
b. The size and height of the sign; and
c. The management of effects on road and footpath user safety.

Activity status where compliance not achieved: N/A

Restricted Discretionary Activities

SIGN - R19 Signs which do not meet Permitted Activity standards not subject to Rule SIGN - R18

Activity Status Restricted Discretionary
Where:
1. The sign is not located in a RESZ-Residential Zone or a SETZ-PREC2-Coastal Settlement Precinct; and

2. The sign is not located in, on or within a Scheduled Natural or Cultural feature identified in Schedules **One-Eight**~~1-8~~[121] except the following Sites and Areas of Significance to Māori:

~~i.~~SASM 10 Kawatiri Pā; SASM 12 Kawatiri Town Reserve; SASM 15 No. 42 Kawatiri (Township) Native Reserve; SASM 31 Punakaiki Area; SASM 59 Māwhera Pa 1; SASM 57 Māwhera Gardens; SASM 58 Greymouth Railway Land; SASM 59 Māwhera Pā 2; SASM 60 Māwhera Kāinga; SASM 61 Victoria Park; SASM 63 No. 32 Nga Moana e Rua Native Reserve; SASM 94 No. 30 Arahura Native Reserve; SASM 96 Taramakau River; SASM 104 Kawhaka Creek Catchment; SASM 112 Arahura River at Tūhua; SASM 117 Waitaiki Catchment; SASM 121 Waitaiki Reserve; **and**[122] SASM 197 Ōkuru.

Discretion is restricted to:
a. The location of the sign;
b. **The content of the sign;** [123]
c. The design materials and appearance of the sign and/or support structure and their effects on visual amenity;
d. The size and height of the sign;

[120] Grey District Council S608.089

APPENDIX 1 – RECOMMENDATIONS ON PLAN PROVISIONS

Overview

Signs are an important method of providing community, consumer and destination information and safety messages and traffic controls, they include a wide range of type and scale including large billboards; free standing signs attached to or painted onto buildings, illuminated and/or moving signs and digital displays.

Signs are generally anticipated in commercially focussed areas such as the Town Centre Zone and Neighbourhood Centre Zone, Settlement Centre Precinct and in the General Industrial Zone, where they are used to advertise products and services that are available on the site on which the sign is located. However, if not carefully managed, signs have the potential to cause visual clutter and undermine the character and amenity values of an area.

To ensure signs are compatible with an area, their scale number, illumination, motion and placement are matters that are managed through Te Tai o Poutini Plan. This chapter contains the provisions that control signs and includes provisions which manage signage that advertises services or products which are not directly related to or associated with the activity undertaken on the site upon which the sign is located.

Other relevant Te Tai Poutini Plan provisions.

It is important to note that in addition to the zone chapters, other Part 2: District-wide Matters chapters may contain provisions that are relevant to signs, in particular the specific Overlay Chapters referred to within this chapter such as Historic Heritage and Sites and Areas of Significance to Māori.

SIGN – O1

Signs contribute to the social, cultural and economic wellbeing of the West Coast/Te Tai Poutini while:

1. Supporting the needs of business, infrastructure and community activities;
2. Ensuring that **any proposed signage is compatible with** the character**, visual** and amenity values of the surrounding area, **and that these** are maintained or enhanced~~ and protected from any adverse visual and amenity effects~~; and
3. Maintaining public safety.

SIGN - P1

Enable a diversity of sign types that provide for effective communication of government, business and community information and whilst maintaining public safety, access needs and the overall character of the area.

SIGN – P2

Ensure **that** the **adverse effects, including cumulative effects of signs on the** landscape, natural character and amenity values of residential areas, settlements, rural areas, open space and outstanding natural landscapes and features are **avoided, remedied or mitigated.**~~Protected from adverse visual and amenity effects from large areas or number of signs.~~

SIGN – P3

Ensure that signs do not adversely affect traffic safety of all road users including motorists, cyclists, pedestrians, or obstruct roads or footpaths.
SIGN - P4
Enable temporary signage subject to meeting basic activity and built form standards.
SIGN – P5
Ensure signs relating to a particular activity or/use of land or buildings on the site are located at the site of that activity land or building.
SIGN – P6
~~To s~~**S**upport[128] the use of bilingual signage and the use of traditional Poutini Ngāi Tahu place names within the ~~District~~**West Coast/Te Tai o Poutini**.
SIGN – P7
Discourage new off-site signs in all RURZ - Rural and RESZ - Residential Zones and ensure that off-site signs in all other zones maintain transport safety and are compatible with the character and visual amenity values of the surrounding area, particularly where they are visible from any RESZ - Residential or RURZ - Rural Zone.

Signs – Ngā Tohu
Note: There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach
Permitted Activitie
SIGN - R1 General Permitted Activity Performance Standards-All Zones
Where Activity Status is Permitted All signs shall not: 1. Project over the road or be located within a transport corridor; 2. Obstruct the line of sight of any corner, bend, intersection or vehicle or rail crossing; 3. Obstruct, obscure or impair the view of any traffic or railway sign or signal; 4. Physically obstruct or impede traffic, trains or pedestrians; and 5. Resemble or likely to be confused with any traffic sign or signal; 6. Have: i. Reflective materials, ii. Flashing, revolving or intermittent light, iii. Sound effects, ~~or~~ iv. Animated, trivisual, inflatable or aerial components; **or**[129] v. **Digital or LED light components;**

[128] Buller Conservation Group S552.157 and Frida Inta S553.157
[129] Clause 16(2) of First Schedule of RMA

7. Be affixed to vehicles or trailers and parked in a location visible from a public place. This does not apply to advertising incidental to the primary use of the vehicle or trailer;
8. Exceed the height requirements for buildings in the relevant zone;
9. Be of a colour or size which could be confused with a traffic signal;
10. ~~Exceed~~ **Be smaller than** ~~with~~ the following minimum lettering size and character requirements:
    i. 120mm minimum lettering size where facing any road with a posted speed limit of less than 70km/h;
    ii. 160mm minimum lettering size where facing any road with a posted speed limit of 70km/h or more;
    iii. Have a maximum of 6 words and/or symbols with a maximum of 40 characters per sign whe**re**~~n~~ facing any road **with a posted speed limit of 70km/h or more; and**
11. ~~Exceed~~ **Be smaller than** the following separation distances between signs where these are located within 10 metres of a road:
    ~~i. 60m separation distances between signs facing a road with a posted speed limit of 70km/h~~
    ~~i~~**i**~~i~~. 70m separation distances between signs facing a road with a spotted speed limit of 7~~1~~**0** - 80km/h; **and**
    ~~i~~**i**~~iii~~.80m separation distances between signs facing a road with a posted speed limit of 80km/h.

Advice Note:

Any sign located within the road corridor of a State Highway may require approval from New Zealand Transport Agency- Waka Kotahi as the landowner and network utility operator. Activity status where compliance not achieved: Restricted Discretionary

Activity status where compliance not achieved: Restricted Discretionary

SIGN - R2 Traffic and Railway Signs-All Zones

Activity Status Permitted

Where:

1. The sign is required by Waka Kotahi - NZ Transport Agency and is located within a road reserve; or
2. The sign is required by NZ Railways Corporation/Kiwi**R**~~r~~ail and is located within a rail corridor; or
3. The sign is required by the Council and is located within a road reserve or road corridor for a formed legal road.

Activity status where compliance not achieved: Controlled

SIGN - R3 Official Signs that are not Traffic and Railway Signs - All Zones

Activity Status Permitted

Where:

1. The sign is required to meet legislative requirements such as health and safety legislation; or
2. The sign provides information relating to public safety or wayfinding, such as equipment use, property entrances or for security purposes, and is no larger than is reasonably necessary to convey the information; and

3. All performance standards of Rule Sign-R1 are complied with**, the exception being that signs required to meet health and safety obligations are not subject to the six-word limit.**

Activity Status where compliance not achieved:	Restricted Discretionary
SIGN - R4	**Temporary Signs - All Zones**
Activity Status Permitted Where: 1. These are for community events and the sign is erected no earlier than **six**~~6~~ months before the event and is removed with **seven**~~7~~ days of the event **ending,** or 2. These are for temporary activities and the sign is erected no earlier than **one**~~1~~ month before the activity and is removed within **seven**~~7~~ days of the activity **ending**; or 3. These are for construction sites and the sign is erected no earlier than **six**~~6~~ months before the ~~event~~ **start of the construction activity**and is removed within **seven**~~7~~ days of the construction activity ending ~~event~~; or 4. These are for land/premises for sale or lease and once the property is sold or let the sign is removed within **seven**~~7~~days; or 5. These are for electioneering where the sign is erected no more than **nine**~~9~~weeks before the election to which it relates and is removed within **one**~~1~~ day of the election day, unless otherwise required by statute; and 6. There is a maximum of one sign per road frontage; 7. The maximum sign face area is $3m^2$; 8. The maximum height measure from ground level is ~~4~~**2.5m;** and 9. All performance standards for Rule SIGN - R1 are complied with.	
Activity Status where compliance not achieved:	Restricted Discretionary
SIGN - R5	**Community Signs - All Zones**
Activity Status Permitted Where: 1. There is a maximum of one sign per site; 2. The maximum sign face area is $2m^2$; 3. The maximum height measured from ground level is ~~4~~**2.5**m and 4. All performance standards for Rule SIGN-R1 are complied with	
Activity status where compliance not achieved:	Restricted discretionary
SIGN - R6	**Signs not visible from a road, publicly accessible space, RESZ - Residential, SETZ - Settlement or OSRZ - Open Space and Recreation Zone - All Zones.**
Activity Status Permitted	
Activity status where compliance not achieved:	N/A
SIGN-R7	**Interpretation signs on the site of a Scheduled Feature in Schedules One-Four~~1-4~~or Schedule Six~~6~~ - All Zones**
Activity Status Permitted **Where:**	

1. The maximum sign face area of each sign is $3m^2$;
2. The maximum sign height measured from ground level is 4m; and
3. Performance standards for Rule SIGN – R1 are complied with.

Activity status where compliance not achieved: Restricted discretionary

Advice Note:

For signs located on or within Scheduled features compliance with the relevant rules for earthworks, buildings and structures may mean a resource consent is required.

SIGN - R8 Footpath Signs- All Zones

Activity Status Permitted

Where:

1. The sign is placed on the footpath immediately in front of the premises to which it relates;
2. A consistent 2m wide clear space for pedestrians on the footpath is maintained **between the sign and the internal boundary on the footpath**;
3. The sign is removed from the footpath at the completion of the day's trading and not returned until the start of the next day's trading;
4. The sign is not displayed or attached to any public structure or traffic control device in a public place; and
5. All performance standards for Rule SIGN - R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R9 Verandah Signs - All Zones

Activity Status Permitted

Where:

1. The sign is under the verandah, on top of the verandah or within the verandah fascia;
2. The sign relates to an activity occurring on the site ;
3. All performance standards for Rule SIGN – R1 are complied with;
4. There is a maximum of one under-verandah, one verandah fascia sign and one above verandah sign per premises per roadfrontage;
5. Any under-verandah sign must:

    a. Provide a clearance of at least 2.5m from the footpath to the bottom of the sign;
    b. Have a maximum height of 0.6m and a maximum depth of 0.25m;
    c. Be setback 0.5m from the kerb of the road; and
    d. Be mounted at right angles to the kerb line.

6. Any sign on a verandah fascia must be contained entirely within the verandah fascia;

7. Any sign above the verandah must:

a. Not exceed 1.2m in height above the fascia;

b. Not project beyond the face of the verandah; and

c. Be setback 0.5m from the kerb of the road.

Activity Status where compliance not achieved: Restricted Discretionary

Permitted Activities - Specific Zones

SIGN - R10 Signs in the MPZ - Māori Purpose Zone

Activity Status Permitted

Where:

1. These are erected with the approval of the relevant Poutini Ngāi Tahu Rūnanga and
2. All performance standards for Rule SIGN – R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R11 Signs in the AIRPZ - Airport Zone

Activity Status Permitted

Where:

1. These are erected by the airport/aerodrome/heliport controlling authority and relate to the purpose of the zone; and
2. All performance standards for Rule SIGN – R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R12 Signs in the RESZ - Residential Zones

Activity status Permitted

Where:

1. The sign relates to an activity occurring on the sign;
2. There is a maximum of one sign per sign;
3. There is a maximum sign face of $1m^2$; and
4. All performance standards for Rule SIGN – R1are complied with.

Activity Status where compliance not achieved: Discretionary

SIGN - R13 Signs in the SETZ - Settlement outside of the SETZ - PREC2 Settlement Centre Precinct and SETZ - PREC3 - Coastal Settlement Precinct

Activity Status Permitted

Where:

1. The sign relates to an activity occurring on the site ~~or an adjoining site~~;
2. There is a maximum of one sign per site;
3. There is a maximum sign face of $2m^2$; and
4. All performance standards for Rule SIGN-R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R14 Signs in the SETZ - PREC3 - Settlement Zone - Coastal Settlement Precinct

Activity Status Permitted

Where:

1. The sign relates to an activity occurring on the site;
2. There is a maximum of one sign per site;
3. There is a maximum sign face of $1m^2$; and
4. All performance standards for Rule SIGN – R1 are complied with.

Activity Status where compliance not achieved: Discretionary

SIGN - R15 Signs in the GRUZ-General Rural Zone, RLZ-Rural Lifestyle Zone, FUZ-Future Urban Zone, MINZ - Mineral Extraction Zone and BCZ - Buller Coalfield Zone

Activity Status Permitted

Where:

1. The sign relates to an activity occurring on the site ~~or an adjoining site~~;
2. There is a maximum of one sign per road frontage of the site;
3. There is a maximum sign face of ~~2~~**3**m^2; and
4. All performance standards for Rule SIGN - R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R16 Signs in any OSRC- Open Space and Recreation Zone or the STADZ - Stadium Zone

Activity Status Permitted

Where:

The sign is located in an OSRZ - Open Space and Recreation Zone; and

1. The sign is:
a. Ancillary to a conservation, recreation or community activity; or
b. For commercial sponsorship of a recreation activity; and
2. All performance standards for Rule SIGN – R1 are complied with.

Activity Status where compliance not achieved: Restricted Discretionary

SIGN - R17 Signs in any CMUZ - Commercial and Mixed Use Zone, any INZ - Industrial Zone, the PORTZ - Port Zone or a SETZ – PREC2 - Settlement Centre Precinct

Activity Status Permitted

Where:

1. Signs must relate to an activity occurring on the site;
2. Signs are not directed towards residential or rural areas;
3. Signs attached to the structure or face of the building must **be no larger than** a maximum of 10% of the area of the building façade or $3m^2$, whichever is the lessor; and
4. All performance standards for Rule SIGN-R1 are complied with.

Activity status where compliance not achieved: Restricted Discretionary

Controlled Activities

SIGN - R18 Traffic and Railway Signs not meeting Permitted Activity Standards-All Zones

Activity Status Controlled

Matters of control are:

a. The location of the sign;

b. The size and height of the sign; and

c. The management of effects on road and footpath user safety.

Activity status where compliance not achieved: N/A

Restricted Discretionary Activities

SIGN - R19 Signs which do not meet Permitted Activity standards not subject to Rule SIGN - R18

Activity Status Restricted Discretionary

Where:

1. The sign is not located in a RESZ-Residential Zone or a SETZ-PREC2-Coastal Settlement Precinct; and
2. The sign is not located in, on or within a Scheduled Natural or Cultural feature identified in Schedules **One-Eight** ~~1-8~~ except the following Sites and Areas of Significance to Māori:

~~i.~~SASM 10 Kawatiri Pā; SASM 12 Kawatiri Town Reserve; SASM 15 No. 42 Kawatiri (Township) Native Reserve; SASM 31 Punakaiki Area; SASM 59 Māwhera Pa 1; SASM 57 Māwhera Gardens; SASM 58 Greymouth Railway Land; SASM 59 Māwhera Pā 2; SASM 60 Māwhera Kāinga; SASM 61 Victoria Park;

SASM 63 No. 32 Nga Moana e Rua Native Reserve; SASM 94 No. 30 Arahura Native Reserve; SASM 96 Taramakau River; SASM 104 Kawhaka Creek Catchment; SASM 112 Arahura River at Tūhua; SASM 117 Waitaiki Catchment; SASM 121 Waitaiki Reserve; **and** SASM 197 Ōkuru.

Discretion is restricted to:

a. The location of the sign;

b. **The content of the sign;**

c. The design materials and appearance of the sign and/or support structure and their effects on visual amenity;

d. The size and height of the sign;

e. For temporary signs, the length of time the sign is in place;

f. Effects on road and footpath user safety; ~~and~~

g. **Effects on traffic safety**; ~~and~~

h. **For signs with digital or LED light components, maintenance requirements, management of light spill, duration of images and fail-safe mechanisms in the event of malfunction; and**

b. The relationship of the sign with existing signage on the site and in the surrounding area.

~~Notification~~

~~Where a sign is visible from a state highway and does not meet the Performance standards in rule SIGN-R1 then the application will be Limited Notified to NZ Transport Agency-Waka Kotahi and may Be publicly notified~~

Activity Status where compliance not achieved: Discretionary

PART A – INTRODUCTORY MATTERS

1. PRELIMINARY MATTERS

1.1. Introduction

1. Matters to do with our appointment and other preliminary matters applicable to all Hearing Panel's recommendations on the proposed Te Tai o Poutini Plan (**pTTPP** or 'the Plan') are recorded and addressed in Recommendation Report 1.

2. This Recommendation Report relates to the Sites and Areas of Significance to Māori - Ngā Wāhi Tāpu ki te Māori (**SASM**) Chapter of the pTTPP; and contains the Hearing Panel's evaluations and recommendations to the TTPP Committee on the submissions and further submissions received on this section in Part 2, Schedule Three in Part 4 and the planning maps, including the Pounamu Management Area and Aotea Management Area overlays.

3. The Section 32 Report[1] provided an evaluation of the options for the management of sites and areas of significance to Māori through the combined Plan, including the regulatory framework key resource management issues, the evidence base (research and basis for identifying Sites and Areas of Significance to Māori), consultation, information and analysis undertaken) and evaluation of options. The Section 32 Report distinguishes SASM from archaeological sites, which are separately addressed in relation to the Historic Heritage Ngā Tuku Ihotanga Chapter of the plan, although there are archaeological sites within SASMs. Sites and areas of significance to Māori are a subset of "historic heritage" within the RMA definition[2] and therefore the Hearings Panel ('**the Panel'**) recognise a close relationship between the SASM and Historic Heritage chapters, although they are required to be separated in accordance with planning standards[3]. SASM are also considered by the Panel as recognising and providing for matters of national importance under the RMA s6(e) and s(f)), as well as RMA s7(a) and RMA s8.

4. The Section 32 Report identifies the key resource management issue to be protection of Poutini Ngāi Tahu cultural landscapes and taonga, with specific reference to pounamu and aotea stone; and recognition that only Poutini Ngāi Tahu can identify impacts of activities on their taonga. The Section 32 Report records that SASM provisions were developed collaboratively with Poutini Ngāi Tahu. Sites and areas incorporated in the notified pTTPP as SASM (according to the Section 32) cover: wāhi tapu or sacred sites; Māori reserve lands; pā, kāinga, gardens and other occupation areas; mahinga kai and waterway sites; as well as significant maunga (mountains) and ridgelines identified as ancestors in the landscape. The Section 32 Report does not consider Māori other than Poutini Ngāi Tahu in relation to this topic.

5. The Section 42A Officer's Report[4] ('**s42A Report'**), authored by Ms Lois Easton, a planner with Kererū Consultants acting as the Reporting Officer, was circulated prior to the hearing. The s42A Report provided an analysis of submissions and further submissions received; and made recommendations on changes to the notified plan provisions (the changes were included in

[2] RMA Section 2, **historic heritage** - … (b)(iii)

[3] National Planning Standards, November 2019, Section 4 District Plan Structure Standard Table 4 and Section 7 District-wide Matters Standard, 15 and 17

[4] Te Tai o Poutini Plan Section 42A Officer's Report: Sites and Areas of Significance to Māori Ngā Wāhi Tāpua ki te Māori

Appendix 1 and the recommendation on all submissions as to either accept, accept in part or reject in Appendix 2).

6. Ms Easton subsequently provided an Addendum s42A Report[5], which responded to the submission and evidence of Mr Graeme Walsh (S664), whose submission had been missed in the Summary of Submissions and therefore had not be assessed in the s42A Report, prior to the initial hearing.

7. Ms Easton also provided a supplementary s42A Report[6] for the hearing held in Franz Josef where the topic of SASM was also covered in relation to the submission and evidence of Skyline Enterprises Limited (S250) in relation to SASM 145.

8. The s42A Report and Addendum assessed a total of 1,057 submissions points and 581 further submissions points on the Sites and Area of Significance to Māori Chapter, including Schedule Three and the planning maps. These reports provided summaries of all of the submissions and further submissions received and the relief sought; an analysis of the proposed changes to provisions; and recommendations on changes to the plan provisions (see Appendix 1 of s42A Report and Addendum) and the accept/accept in part/reject recommendations for individual submission and further submission points (see Appendix 2 of the s42A Report and Addendum). A section 32AA evaluation for all the recommended changes was provided at the end of the s42A Report.

9. The matters raised by submitters were grouped in the s42A Report in relation to each of the following key issues for the chapter:

    - Definitions
    - General/Whole Chapter;
    - Overview;
    - Objective;
    - Policies;
    - Rules; and
    - Schedules Three and the associated Planning Maps.

10. This Recommendation Report largely follows the same structure as the s42A Report and provides a brief summary of the issues raised in submissions and further submissions, the s42A Report and Addendum analysis and recommendations, submitter evidence and statements, the Reporting Officer's reply evidence and the responses to Minutes, before providing our evaluation and recommendation.

11. This Recommendation Report should be read in conjunction with the s42A Report and Addendum Report and the tracked change version of the notified Plan provisions (attached as Appendix 1 to this Report). The tracked change version of the TTPP provisions forms an integral part of the recommendations and records all recommended amendments (additions and deletions) to the notified TTPP provisions made by the Panel. The tracked change version of the TTPP shows the Panel's recommended changes to the notified provisions in **bold and underlining** indicating additions and ~~strikethrough~~ indicating deletions. If there is any discrepancy between this Recommendation Report and the tracked change version of the

[5] Addendum to s42A Report: Sites and Areas of Significance to Māori Report and Appendices, 2 July 2024
[6] Te Tai o Poutini Plan Section 42A Officer's Report Franz Josef Area, 19 August 2024

Plan, the tracked change version of the Plan provisions that form part of the Panel's recommendations in this Recommendations Report must prevail.

12. This Recommendation Report contains the reasons for the Panel's recommendations. These comprise either adoption of the reasoning and recommendations of the original section 42A Reports or the Reporting Officer's reply evidence (Councils' right of reply post hearing adjournment), or a specific reasoning by the Panel.

13. Where the Panel recommends the TTPP provisions should remain as notified, it is because:

    (a) The Panel has adopted the reasoning and recommendation of the s42A Report or Addendum Report to retain the provision as notified; or

    (b) The Panel has adopted the reasoning and recommendation to retain the provision as notified as recommended in the Reporting Officer's reply evidence; or

    (c) The Panel has recommended to retain the provision as notified for reasons set out in this Recommendation Report.

14. Where there is a recommended change to a notified provision of the TTPP, it is because:

    (a) The Panel has recommended amendment to a provision for reasons set out in this Recommendation Report in response to a submission point, which the s42A Report did not recommend; or

    (b) The Panel adopted the reasoning and recommendation of the s42A Reports or Addendum to change the provision to that recommended in the original s42A Report; or

    (c) The Panel has adopted the reasoning and recommendation to that recommended in the Reporting Officer's reply evidence; or

    (d) A consequential change has been necessary following on from a recommendation in either (a), (b) or (c).

15. Where there may be a different recommendation between the s42A Report and the Reporting Officer's Addendum or reply evidence (i.e., the recommendation by the Reporting Officer has changed as a result of hearing the evidence of submitters), unless the Panel recommendation specifically adopts the original s42A Report's reasoning and recommendations, the reasoning and recommendations in the (later) reply to evidence has been adopted and it must be taken to prevail.

16. If there are circumstances where the Panel consider that alternative relief is more appropriate than that requested in submissions and further submission to give effect to the RMA, NZCPS, national policy statements and/or RPS, but are still within the scope of the relief sought, the relevant recommendation clearly sets out the nature of the change and the reason for the change. This is recorded in this Recommendation Report.

17. If any changes are recommended to the provisions (since the Section 32 Report was completed) a further evaluation, if required pursuant to section 32AA of the RMA, has been undertaken. Any such circumstances are referred to in this Recommendation Report in sufficient detail to demonstrate a further evaluation was undertaken.

18. Clause 16(2) of the First Schedule of the RMA enables the Panel to recommend amendments to alter information, where such an alteration is of minor effect, or may correct any minor errors. In the Panel's recommendations below each section considered in Part C of this Report and in the tracked change version of the notified Plan provisions (Appendix 1 of this Report) records any such minor amendments.

1.2. Terminology in this Report

19. Throughout this Report, the following abbreviations will be used:

BDC	Buller District Council
Councils	Buller District Council, Grey District Council, and Westland District Council
Director General	Director General of Conservation
Fish & Game	West Coast Fish and Game Council
Forest & Bird	Royal Forest & Bird Protection Society of NZ Inc
GDC	Grey District Council
Hort NZ	Horticulture New Zealand
KiwiRail	KiwiRail Holdings Limited
Manawa	Manawa Energy Limited
Māwhera Inc	The Proprietors of Māwhera Incorporation
NPSIB	National Policy Statement for Indigenous Biodiversity
NPSFM	National Policy Statement for Freshwater Management 2020
NESF	National Environmental Standard for Freshwater
NESCS	Resource Management (National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health) Regulations 2011
NESCF	National Environmental Standard for Commercial Forestry
NTCSA	Ngāi Tahu Claims Settlement Act 1998
NZCPS	New Zealand Coastal Policy Statement
Planning Standards	National Planning Standards

Poutini Ngāi Tahu	Te Rūnanga o Ngāi Tahu, Te Runanga o Ngāti Waewae, Te Rūnanga o Makaawhio
pTTPP or the Plan	Proposed Te Tai Poutini Plan
REG	Renewable Electricity Generation
RMA or the Act	Resource Management Act 1991
RPS	West Coast Regional Policy Statement
RSI	Regionally Significant Infrastructure
SASM	Sites and Areas of Significance to Māori
Te Tumu Paeroa	The Office if the Māori Trustee
Transpower	Transpower New Zealand Limited
TTPP Committee	Te Tai o Poutini Plan Committee
Waka Kotahi NZTA	NZ Transport Agency Waka Kotahi
WCRC	West Coast Regional Council
WDC	Westland District Council
WMS	WMS Group (HQ) Limited and WMS Land Co. Limited

1.3. Procedural Steps and Issues

20. A number of procedural matters arose in relation to the decision-making process for the SASM Chapter of the Plan, including:

- correction of an administrative error in the notified SASM mapping and duplication in a number of SASM rules;
- an error in the Summary of Submissions that missed the submission of Mr Graeme Walsh (S664);
- consideration of section 42 of the RMA and protection of sensitive information in relation to the submissions and evidence of Ridgeline 3 Investments Limited (S127) and Poutini Ngāi Tahu (S620); and
- conferring of legal counsel and subsequent planning witness conferencing, on the matter of approval or certification as part of a permitted activity process.

21. On 12 August 2022, after notification of the Plan, Ms Easton recommended to the Chair of the Te Tai o Poutini Plan Committee (**TTPP Committee**) that changes be made to the notified plan under clause 16 of Schedule 1 of the RMA in order to correct mapping errors

affecting SASM. She advised the TTPP Committee, in conjunction with legal advice, that errors were the result of shortening timeframes to notify the Plan and that it was important to correct these because the SASM Chapter provisions had immediate legal effect at the time of notification. She noted the errors were in the e-Plan maps, which missed 23 SASM that were included as part of the printed and pdf copies of the notified Plan. In addition, she advised that a technical issue arose when transferring GIS files from the Ngāi Tahu system to the West Coast Regional Council (**WCRC**) system hosting the Plan, which then created the wrong shape for 39 SASM (an ellipse instead of a circle). Ms Easton advised 37 SASM had been corrected with no new landowners being affected and six SASM were corrected in a way that reduced the number of landowners affected. She noted these amendments were duly made by the TTPP Committee without a further Schedule 1 process. The Panel have not compared the original notified Plan with the corrected maps, unless as part of a recommendation on a particular submission made on the notified Plan.

22. On 25 August 2022, after notification of the Plan, Ms Easton recommended to the Chair of the TTPP Committee that amendments be made under clause 16, Schedule 1 of the RMA to rules SASM-R15, SASM-R16, SASM-R17 and SASM-R18 on the basis that there would be no change to activity status for activities in Residential, Commercial and Mixed Use Zones that were already non-complying in those zones (i.e. mineral extraction, plantation forestry/shelterbelts/woodlots, a range of waste management and hazardous facilities, and activities on upper slopes/ridgelines/peaks of ancestral maunga). Legal Counsel advised the TTPP Committee that there was a risk if these activities changed status to a lower activity classification as a consequence of hearings on the Residential, Commercial and Mixed Use Zones. Changes were duly made by the TTPP Committee under clause 16, amending the notified Plan so that SASM-R15, SASM-R16, SASM-R17 and SASM-R18 no longer apply in Residential, Commercial and Mixed Use Zones. The Panel confirm that there has been no change in the status of these activities as a consequence of our recommendations on the Residential, Commercial and Mixed Use Zones such that the risk identified by legal counsel for the TTPP Committee does not arise.

23. On 10 May 2024, after the initial hearing of the SASM Chapter, an Addendum to the Summary of Submissions was notified to allow further submissions on the submission of Mr Graeme Walsh (S664) on the SASM Chapter. Mr Walsh's submission was missing from the original Summary of Submissions notified on 28 April 2023. Submitters to the notified Plan had until 27 May 2024 to lodge a further submission on Mr Walsh's submission. Four submitters took the opportunity to lodge further submissions. Mr Walsh presented to the Panel at a resumed hearing on 18 November 2024.

24. Prior to the hearing, the Panel issued a minute (Minute 24, dated 28 April 2024) responding to the request of Mr Mark Dixon, director of Ridgeline 3 Investments Limited (S127), for a confidentiality agreement in relation to his evidence on the SASM Chapter. Minute 24 outlined section 42 provisions for protecting sensitive information in RMA hearing processes, excluding the public from access to that information, and the time limited nature of protection for commercially sensitive material, which may become available at the close of proceedings. Minute 24 advised the Panel considered the test of serious offence to tikanga Māori in section 42(a) had not been met by the submitter. In terms of unreasonable prejudice to a commercial position (section 42(b), the minute also conveyed that insufficient evidence had been provided for the Panel to establish such prejudice. Opportunity was given for the submitter to supply further evidence prior to the hearing.

25. The Panel received evidence from the submitter on 30 April 2024. This evidence did not change the assessment regarding application of section 42 in the circumstances. Nothing

further was provided by the submitter following the issuing of Minute 25 on 1 May 2024, although the minute offered further opportunity to provide evidence in support of the request. Material provided to the Panel in support of the Ridgeline 3 Investments Limited submission was made publicly available from 8 May 2024, in accordance with Minute 25.

26. Minute 24 also raised the matter of "silent files", as referenced in the evidence of Mr Paul Madgwick on behalf of Poutini Ngāi Tahu. In particular, the minute raised the need to be able to test evidence, whilst respecting the reasons for protecting specific details around sites and areas included within silent files. Minute 24 signalled the need to discuss silent files in an open forum, in order to assist submitters who had submitted on affected SASM sites and areas. The Panel invited Poutini Ngāi Tahu to make an application under section 42 of the RMA if there was an identified need to protect sensitive information in relation to silent files.

27. Poutini Ngāi Tahu responded to Minute 24 with a Memorandum of Counsel on 29 April 2024 stating that all silent files identified as SASM in the Plan were wāhi tapu[7], with five being the subject of submissions (SASM 41, SASM 42, SASM 122, SASM 135 and SASM 199). The Memorandum advised that all information Poutini Ngāi Tahu are comfortable sharing in public regarding these five SASM was contained in Appendix 1 to the evidence of Mr Paul Madgwick. Ms Sarah Scott requested on behalf of Poutini Ngāi Tahu that a public excluded session be utilised in the event that the Panel considered it necessary to avoid serious offence to tikanga Māori or to avoid the disclosure of the location of wāhi tapu, in accordance with section 42 of the RMA. The Panel did not adopt a public excluded session in order to question Mr Madgwick at the hearing, working instead with the publicly available information contained in Mr Madgwick's evidence.

28. Mr McEnaney presented evidence to the Panel on behalf of Grey District Council (**GDC**) on 1 May 2024, as a planner and as an advocate for the position of the Council. The Panel considered this distinction, in light of legal submissions, and weighed aspects of his evidence accordingly.

29. Following the hearing at Arahura Marae, the Panel issued directions (in Minute 26 dated 8 May 2024) that legal counsel for the TTPP Committee, Poutini Ngāi Tahu and GDC confer to resolve, as far as possible, conflicting advice provided to the Panel on lawful options for a permitted activity, due to matters arising from the SASM Chapter provisions. This advice was provided, as requested by the Panel, on 7 June 2024. Receipt of this combined legal advice led to the Panel issuing Minute 37 (dated 13 August 2024) which directed planner caucusing amongst those involved in the SASM hearing. The planners were directed to utilise the outcome of the conference of legal counsel in order to provide permitted activity rule recommendations, as well as consider policies and methods in the SASM Chapter. A joint witness statement (**JWS**) was received from the planners on 10 September 2024.

1.4. Hearing Arrangements

30. The initial hearing was held over three days at Arahura Marae, 1 Old Christchurch Road, Arahura, from 30 April to 2 May 2024. Presentations were made to the Panel both in person and remotely by internet connection. Mr Francois Tumahai, Tumuaki of Te Rūnanga o Ngāti Waewae, led a mihi at the outset of the hearing to welcome participants. A number of

[7] There are 21 silent files in total, roughly 10% of all identified SASMs, including: SASM 26, SASM 34, SASM 38, SASM 41, SASM 42, SASM 49, SASM 53, SASM 64, SASM 71, SASM 80, SASM 122, SASM 127, SASM 130, SASM 135, SASM 155, SASM 162, SASM 165, SASM 168, SASM 175, SASM 199 and SASM 207. Silent files are subject to a variety of SASM rules, or in some cases no rules in the SASM chapter.

whānau and kaimahi were on site to support the presentations made on behalf of Poutini Ngāi Tahu, and to look after (manaaki) participants at the hearing.

31. At the marae hearing, the s42A Reporting Officer Ms Easton began with an Introductory Planning Statement outlining the topic and her response to written material provided by submitters ahead of the hearing, including any amendments to her recommendations in the s42A Report.

32. Legal counsel on behalf of TTPP Committee, Ms Lucy de Latour, appeared at the hearing on 2 May 2024 to assist the Panel in relation to the proposal for written approval or certification by Poutini Ngāi Tahu as a standard or condition for a permitted activity status.

33. Following the hearing, Ms Easton provided her Addendum to the s42A Report (dated 2 July 2024) with her recommendations on the submission of Mr Graeme Walsh and further submissions received on his submission points.

34. Ms Easton also provided a supplementary s42A Report (dated 19 August 2024) on matters relevant to the Franz Josef area prior to the hearing held in Franz Josef on 8 and 9 October 2024. Submissions and evidence on SASM 145 were considered in her supplementary report and at that hearing.

35. The Panel received a written Right of Reply from Ms Easton on 25 October 2024, which was not further updated.

36. During the Ecosystems and Indigenous Biodiversity (**ECO**) Chapter hearing in Westport on 18 November 2024, there was a presentation in person from Mr Walsh, where he spoke to his submission on the SASM Chapter. Ms Easton advised the Panel at the hearing that her recommendations had not changed following Mr Walsh's presentation.

1.5. Appearances

37. The following participants appeared at the hearing:

Poutini Ngāi Tahu (S620)

- Mr Paul Madgwick, Chairman of Te Rūnanga o Makaawhio
- Ms Sarah Scott, Legal Counsel
- Rachel Pull, Senior Environmental Advisor
- Phillipa Lynch, Poutini Environmental General Manager

Mr Ian Stewart (S124) for themself

Mr Ken McTigue (S551) for themself

Te Kinga/Iveagh Bay Residents and Ratepayers Association (S531)

- Mr Grant Moreton
- Mr John Hanning

Mr Tangi Weepu (S630) for themself, whānau and tūpuna

Mr Peter Kennedy (S418) for Angela Sweetman (Trustee) and Patrick William Kennedy

The Proprietors of Māwhera Incorporation (S621)

- Mr Hemi Meihana Retara/James Mason Russell

Mr George and Mrs Caryl Coates (S415) for themselves

Ms Inger Perkins (S274) for Herenga ā Nuku Aotearoa, the Outdoor Access Commission

Ms Mary Stewart (S222) for themself

Westpower Limited (S547)

- Mr Martin Kennedy, Planner

Mr Julian Hall (S400) for themself

Mr James Sutherland for Federated Farmers West Coast (S524)

Grey District Council (S608)

- Ms Kristy Rusher, Legal Counsel
- Mr Michael McEnaney, Planner

Skyline Enterprises Limited (S250)

- Ms Rosie Hill, Legal Counsel
- Mr Sean Dent, Planner
- Ms Nikki Smetham, Landscape Architect

Mr Graeme Walsh (S664) for themself

1.6. Overview of submitter evidence received

38. For those appearing at the hearing, legal submissions were received from Ms Sarah Scott for Poutini Ngāi Tahu (dated 16 April 2024) and Ms Kristy Rusher for Grey District Council (dated 24 April 2024). In addition, at the Franz Josef hearing a synopsis of legal submissions was received from Ms Rosie Hill for Skyline Enterprises Limited (dated 23 September 2024).

39. For those appearing at the hearing the following evidence and/or statements were received:

    (a) Mr Paul Madgwick, cultural expert for Poutini Ngāi Tahu (dated 5 April 2024);

    (b) Ms Rachael Pull, Planner for Poutini Ngāi Tahu (evidence dated 5 April 2024 and statement dated 30 April 2024);

    (c) Ms Phillipa Lynch, Poutini Environmental General Manager (written approval process)

    (d) Mr Ian Stewart of Taramakau, aerial maps of the Taramakau River;

    (e) Mr Grant Moreton and Mr John Hanning, Chairman and Secretary of the Te Kinga/Iveagh Bay Residents and Ratepayers Association (statement of 30 April 2024);

    (f) Mr Peter Kennedy of Totara Flat (statement of 30 April 2024);

(g) Mr Hemi Meihana Retara/James Mason Russell, Chairman of the Committee of Management of The Proprietors of Māwhera Incorporation (Māwhera Inc) (statement of 30 April 2024);

(h) Mr George & Mrs Caryl Coates of Nikau Deer Farm Limited, Barrytown (statement of 30 April 2024)

(i) Ms Inger Perkins, regional field advisor for Herenga ā Nuku Aotearoa, the Outdoor Access Commission (statement of 1 May 2024)

(j) Ms Mary Stewart of Karamea (statement of 1 May 2024, and a statement in support of Ms Stewart's submission from Mr Hamish Macbeth of Karamea;

(k) Mr Martin Kennedy, Planner for Westpower Limited (evidence dated 27 March 2024);

(l) Mr Julian Hall, Greymouth landowner (statement of 1 May 2024);

(m) Mr James Sutherland, policy advisor for Federated Farmers West Coast (evidence dated 27 March 2024);

(n) Mr Michael McEnaney, Environmental Planning Team Leader for Grey District Council (evidence dated 10 April 2024); and

(o) Mr Sean Dent, Planner for Skyline Enterprises Limited (evidence dated 9 September 2024).

40. Following the receipt of the s42A Report:

(a) Mr Mark Dixon, director of Ridgeline 3 Investments Limited (S127), provided a statement of evidence dated 23 April 2024 and another for the 1 May 2024 hearing outlining his concerns that SASM 104, SASM 107, SASM 109, SASM 112, SASM 116, SASM 117 and SASM 121 and the Pounamu Management Overlay would interfere with his rights associated with land in the upper Arahura River valley. He provided a map showing the location of the three land parcels and documents describing the history of the land dating back to 1876, including associated mining privileges. He sought to protect sensitive information under section 42(1)(a) of the Act and did not further elaborate regarding the basis of his concerns or appear at the hearing, once he was made aware of the limitations on protection of sensitive information. The materials he provided to the Panel are part of the record of the hearing, having been publicly released on 8 May 2024.

(b) Mr Dean Van Mierlo, legal counsel, provided a letter dated 17 April 2024 on behalf of West Coast Fish and Game Council ('**Fish & Game'**) (S302) stating that, in relation to the two submission points made by Fish & Game on the chapter provisions, the s42A Report position was accepted. Fish & Game confirmed it was satisfied that the definition of "*temporary activities*" did not include recreational activities; and that a case-by-case assessment would be undertaken when resource consent requirements were triggered. The letter also acknowledged other avenues to assist in protection of SASM through Te Rūnanga o Ngāi Tahu representation at the West Coast Fish & Game Council.

(c) Ms Frida Inta for herself and the Buller Conservation Group (S552 and S553) provided a statement dated 22 April 2024 that there were no additional comments she wished to make on the chapter; and noted that the "*Plantation Forestry*" definition was recommended for adoption, which she supported.

(d) Ms Lyn McIntosh (S469) provided a statement received by the Panel on 26 April 2024 that she had initially been advised that SASM 120 had been revised and did not interact with her property. She said it now appeared there's been an oversight, and her land was not corrected.

(e) Ms Stephanie Styles, a planner acting on behalf of Manawa Energy Limited ('**Manawa**') (S438) provided a statement (dated 27 March 2024) that indicated general support for identification of SASM. She noted that Manawa have a memorandum of partnership with Te Rūnanga o Ngāti Waewae. Her evidence identified that there were Manawa activities located within SASM 67 (the Arnold Scheme) and SASM 104, SASM 107 and SASM 121 (the Dillmans Scheme) which were affected by SASM rules. Ms Styles asserted that enabling provisions for renewable electricity generation (**REG**) in higher order documents should be reflected in SASM provisions, including SASM-P13, SASM-R2, SASM-R9 and SASM-R10. Ms Styles focussed on ensuring that the term "*regionally significant infrastructure*" (**RSI**) was used in the policy and rule framework because Manawa were not a "*network utility operator*", and this would ensure a more enabling pathway for Manawa activities, consistent with the importance of REG nationally and regionally.

(f) Mr Michael Snowden (S492) provided a short statement on 30 April 2024 reiterating his formal objection to SASM 197 at Okuru because it was drawn as an ellipse and appeared to be arbitrary. He expressed concern that the ellipse did not differentiate between indigenous vegetation cover and pasture.

(g) Ms Alex Booker provided a letter on behalf of WMS Group (HQ) Limited and WMS Land Co. Limited (**WMS**) (S599) dated 21 March 2024 withdrawing their submission points on SASM 151 and SASM 179 (S599.155 and S599.156 respectively), which were requesting a review of the accuracy of the areas identified on the planning maps. The letter also supported the change to activity status of Rule SASM-R15 from non-complying to discretionary, in relation to submission S599.047.

41. Te Tumu Paeroa – the Office of the Māori Trustee (S440) were scheduled to speak to the Panel virtually during the marae hearing but did not appear. No written materials were provided to the Panel. Poutini Ngāi Tahu advised that discussions were ongoing with Te Tumu Paeroa outside of the hearing in efforts to resolve points of difference.

42. Following the hearing, subsequent information was received as follows:

(a) Mr Peter Langford (S615) supplied a short statement opposing the SASM affecting Māori Point Terrace in Karamea (dated 4 May 2024). However, the Panel notes Mr Langford's original submission did not contain a submission point on the SASM Chapter; and

(b) Mr Mark Dixon (S127) responded to queries raised about "Victorian title" and the relevance of this subject to his submission and evidence provided (8 May 2024), indicating that he could prove the existence of such title in relation to the three land parcels owned by Ridgeline 3 Investments Limited.

43. Minute 26 issued by the Panel on 8 May 2024, in addition to directing procedural matters to do with legal counsel and planner conferencing, also sought a legal opinion from Ms de Latour on the definition of "Victorian title". The Panel received a request from Ms Scott as part of joint advice from legal counsel in response to Minute 26 (dated 7 June 2024) to also be able to provide a response on the matter of Victorian title (although the matter was later resolved to the satisfaction of Poutini Ngāi Tahu such that no further advice was provided). Ms de

Latour provided her response to the Panel on 6 June 2024 regarding the nature of Victorian title and whether it was capable of being defined for the purposes of the TTPP. She identified that land transferred from Crown ownership prior to 1913 fell in to the category of "Victorian title", and that the Crown could only vest what it owned at the time of the Pounamu Vesting Act 1996 when pounamu was vested with Te Rūnanga o Ngāi Tahu. She advised that minerals other than gold, silver, uranium or petroleum, which are reserved to the Crown, may be affected by Victorian title. Ms de Latour explained that a landowner may seek to prove ownership rights to minerals other than Crown minerals in cases where Victorian title applies. She offered a definition of "Victorian title" based on the Mining Act 1971 and its elements in continuation through the Crown Minerals Act 1991. Overall, the advice of Ms de Latour tied "Victorian title" to the matter of mineral ownership as a feature of land ownership over time.

Written Approval

44. Ms de Latour, counsel for the TTPP Committee, confirmed in the joint legal advice in response to Minute 26 (dated 7 June 2024) that her position had not changed since the Memorandum of Counsel (dated 23 November 2023) that indicated: "*a permitted activity rule must not reserve by subjective formulation a discretion to decide whether an activity is a permitted activity*". In this respect Ms de Latour did not support a permitted activity rule that reserved discretion to a third party by way of written approval.

45. Ms Sarah Scott, counsel for Poutini Ngāi Tahu, agreed on the principles outlined in Ms de Latour's Memorandum of 23 November 2023 but differed in her assessment that a written approval rule could be drafted that met the criteria set out for a permitted activity. Her conclusion was based upon mana whenua being best placed to identify impacts of a proposal on the physical and cultural environment valued by them, such that a Ngāi Tahu cultural expert was the appropriate person to determine whether an activity would have an adverse effect on the Poutini Ngāi Tahu values associated with each SASM site or area. Ms Scott saw this as no different to an assessment by an acoustic expert, for example. She considered that it would need to be clear in the rule that an approval was based on a binary condition, either the proposed activity would or would not have adverse effects on Poutini Ngāi Tahu values associated with a SASM.

46. Ms Kristy Rusher, counsel for GDC, also agreed with the principles outlined in Ms de Latour's memorandum of 23 November 2023. However, she did not consider it good practice to define a regulatory framework based on a control that requires certification of the absence of an adverse effect. She considered that an assessment that effects on a SASM were "*less than minor*" would constitute the exercise of a discretion and therefore would be contrary to the principles set out in Ms de Latour's memorandum. Her preference was for the regulatory controls to be more precise with regards to triggers for resource consent.

47. As an alternative to a written approval approach, legal counsel for the TTPP Committee considered that certification requirements could be lawfully included in planning documents. Principles were identified, in addition to those outlined in Ms de Latour's Memorandum of 23 November 2023. These principles included that a certification requirement could not reserve an unlawful discretion as to whether the activity is permitted or not, or leave the classification to the discretion of the consent authority. A requirement for written approval could be distinguished from a requirement for certification in principle, provided a council did not need to make an evaluative judgement as to the sufficiency of measures to achieve outcomes in order to be a permitted activity. Ms de Latour found that certification decisions could be made by a person using their skills and experience, but that the making of a substantive decision could not be delegated. Ms de Latour advised that a permitted activity rule requiring

certification would need to be carefully formulated to ensure that the principles, as a whole, could be met. A range of examples of certification rules were provided in Appendix 1 to the joint response of legal counsel, including district plan permitted activity rules, although no examples were found in relation to effects on mana whenua values. In that respect, the approach being proposed was described as "novel", but also no less appropriate than other examples in Appendix 1 to the Memorandum of Counsel. A key consideration emphasised by Ms de Latour was that certification could not require an assessment of degree of effect, but only the presence or absence of an effect.

48. Ms Scott advised that a permitted activity rule requiring certification could be drafted to achieve the binary condition and further principles outlined by Ms de Latour. Ms Scott observed that certification criteria would need to be included in the Plan to support such a rule and should be developed with Poutini Ngāi Tahu. She also emphasised that there should be no delegation of decision-making enabled by the drafting, and considered that refinement of SASM boundaries had assisted in narrowing what would be captured by permitted activity rules or trigger requirement for a resource consent.

49. Ms Rusher recorded broad agreement with Ms de Latour and Ms Scott, however, she considered that it was a matter for the Panel to determine whether a regulatory control was needed to manage effects of activities on a SASM, and that this role could not be passed to an entity that is not a consent authority by way of a rule.

50. Legal counsel further considered section 33 and section 34A of the RMA and the potential for transfer of powers or delegation of functions to Poutini Ngāi Tahu to assist in the matter. While powers and functions may be transferred to an iwi authority in accordance with these sections of the Act, counsel could not determine which powers or functions could be usefully transferred to assist. The principles to guide a permitted activity rule would still need to be met, regardless of which entity held the status of the consent authority. Ms de Latour also identified that the Panel do not have delegations to direct such a transfer. Ms Scott and Ms Rusher both agreed with the points made by Ms de Latour in relation to transfer of powers and functions.

51. Following the advice of legal counsel, planning experts that included Ms Easton for the TTPP Committee, Mr Kennedy for Westpower, Ms Styles for Manawa, Ms Pull for Poutini Ngāi Tahu and Mr McEnaney for GDC undertook video conferencing on 27 August 2024 and 10 September 2024 in response to Minute 26 and Minute 37 and provided a joint witness statement (**JWS**) dated 10 September 2024. The planning witnesses indicated a preference for the Ōtorohanga District Plan example of a permitted activity rule requiring certification, which was included in Appendix 1 of the joint statement of legal counsel. Rule wording and criteria were drafted collectively and attached to the JWS.

Minimise

52. In addition, the planners considered the question of use of the term "*minimise*" in policy, however, the JWS records no agreed position could be reached. Ms Easton considered it to be a commonly used term, looking at other plan examples. Ms Styles considered that it needed a definition if it was to be used as a term, and that "*where practicable*" as an addition was supported if it was used. Mr Kennedy did not support use of the term and sought consistency across policies. Mr McEnaney preferred "*avoid, remedy or mitigate*" but was open to use of "*minimise*" if it was defined. Ms Pull considered it to be appropriate, particularly in cases where a policy linked to discretionary activity status. When looking at

specific policies, all but Mr Kennedy supported use of the term "*minimise*" in policies SASM-P8 and SASM-P9.

Policy and Method

53. When considering Policy SASM-P4 as notified, all the planners agreed that the policy would be better positioned as a method, with some redrafting, and saw links with SASM-O2, SASM-P1, SASM-P9, SASM-P14 and SASM-P15. The planners collectively drafted new Method SASM-M4 and recommended that Policy SASM-P4 be deleted. The planners did not progress a potential linkage from SASM-P2 into methods, which was a put forward by Federated Farmers West Coast, but in the absence of a planner participating on behalf of that submitter the matter was left unexplored in the JWS.

SASM Discussions

54. Minute 37 (dated 13 August 2024), aside from procedural directions for planner conferencing, included a request for Poutini Ngāi Tahu to provide details of further discussions that had been undertaken with submitters and the outcomes of those discussions. This further information was provided on 16 September 2024 and included a summary of all reviews of SASM boundaries in response to submissions and evidence. Four SASM were reviewed that resulted in no change to boundaries (SASM 6, SASM 42, SASM 79 and SASM 218). Poutini Ngāi Tahu recommended amendment to the boundary of SASM 96 where it intersects with the property of Mr Ian Stewart (S124) in response to river channel changes in that location. Following review and consideration of submitter evidence, Poutini Ngāi Tahu agreed that there were errors in SASM 34 and SASM 36, resulting in withdrawal of submission points FS41.583 and FS41.576 and consideration of a plan change to correctly map these SASM.

Te Tumu Paeroa Submission

55. Te Tumu Paeroa provided a letter to the Panel dated 22 August 2024, following on from a joint statement to the Panel from Te Tumu Paeroa and Poutini Ngāi Tahu dated 14 August 2024. The letter from Te Tumu Paeroa formally withdrew a number of submission points, including on SASM-O2, SASM-P5, SASM-P14, SASM-P15, SASM-R5 and on the mapped extent of SASM 18, SASM 133, SASM 149, SASM 151, SASM 153, SASM 158, SASM 178, SASM 179, SASM 180, SASM 181 and SASM 183[8].

56. The joint statement from Te Tumu Paeroa and Poutini Ngāi Tahu dated 14 August 2024 agreed that submission point S440.053 regarding the mapped extent of particular SASM would be withdrawn, except in relation to SASM 157. The joint statement recorded points of agreement, including in relation to the challenges faced by Māori freehold landowners that limit the use and development of their whenua. The Plan was acknowledged by both parties as one method to help address those challenges by enabling use and development of Māori land. The Ngāi Tahu Claims Settlement Act 1998 (**NTCSA**) was also cited jointly as including Crown recognition of Ngāi Tahu as "*the tangata whenua of, and as holding rangatiratanga within, the Takiwā of Ngāi Tahu Whānui*". The joint statement records that the matter of inclusion of Māori landowners within plan provisions remained a point of disagreement, although there was agreement reached that provisions should enable use of Māori land. A further point of disagreement remained in terms of restrictions on use of SASM 157, which was administered by the Māori Trustee.

[8] Submissions points S440.017, S440.018, S440.019, S440.020, S440.021 and S440.053 respectively

57. Ngāti Māhaki (represented by Te Rūnanga o Makaawhio) provided information attached as Appendix B to the joint statement from Te Tumu Paeroa and Poutini Ngāi Tahu outlining the differences between SASM 157 and SASM 158, to explain why less restrictions were proposed in the rule framework affecting SASM 158 compared with SASM 157. This information records that SASM 158 was a more modified site than SASM 157, and that SASM 157 was a much older pā site and ancient urupā, with trees on site that were used for snaring and spearing birds, including some virgin forest. It noted SASM 157 had experienced some damage as a consequence of track clearing which caused concern for Ngāti Māhaki and highlighted the need for greater controls on activities affecting the area.

1.7. Right of Reply

58. Ms Easton provided a written Right of Reply (dated 25 October 2024), which included an updated Appendix 1 showing tracked changes to the notified provisions. She subsequently updated her Appendix 1 on 11 November 2024 to reflect both her Right of Reply and the outcome of the planners' joint witness statement of 10 September 2024.

59. Ms Easton's Right of Reply included responses to questions from the Panel, including a scan of district plans and their approach to SASM chapter provisions, following the promulgation of the National Planning Standards ('**Planning Standards**'). She advised that there are 534 privately owned land titles affected by SASM rules. She considered use of the term "*avoid*" in SASM-P6, SASM-P8, SASM-P12, and SASM-P15 and its relationship with activity status, which variously led to non-complying or discretionary classifications. She provided a definition of "*landfill*", "*cleanfill area*" and "*cleanfill material*", and further considered the definition of "*cultural landscape*". She responded to the matter of maintaining public access, as well as inclusion of the term "*access*" in relation to Ngāi Tahu access to valued sites or areas. She considered the inclusion of minerals within the definition of "*cultural materials*" and any consequential relationship with the Crown Minerals Act 1991. She considered "*network utility structures"* as compared to "*network utility infrastructure*" within the chapter provisions, and in particular SASM-P13 and SASM-R9, SASM-R10 and SASM-R13, as well as the use of "*regionally significant infrastructure*" in these same rules. She confirmed her recommended amendments to Rule SASM-R6 and the '*Other Relevant Te Tai o Poutini Plan Provisions*' section.

60. Ms Easton advised that there was nothing in particular in the iwi management plans pertaining to pounamu management that needed to be reflected in the SASM Chapter or Pounamu Management Area overlay. She concluded that there was no need to refer to "Victorian title" or include a definition in the Plan because such title was confirmed by legal counsel as being about ownership and potential extraction rights rather than a matter of Ngāi Tahu cultural values held in relation to pounamu. Ms Easton further considered Policy SASM-P8 and the matter of "*operational need*" and "*more than minor*" adverse effects as a reference in policy. She also addressed the term "*ahikāroa*" as it appears in the Glossary. She recommended changes to Rule SASM-R4 in relation to indigenous vegetation clearance and considered use of the phrase "*buildings and structures*" rather than just "*structures*" as a matter of consistency across the Plan.

61. Ms Easton amended some of her recommendations in light of the response of Poutini Ngāi Tahu to Minute 37, and in light of the withdrawal of submission points by Te Tumu Paeroa. She corrected an error in Table SASM-T1 and considered the application of Advice Note (2) to Rule SASM-R5 in terms of the regularity of certification. She addressed the question of how archaeological sites outside of SASM were managed. Ms Easton advised, as a consequence of issues raised by Ms Pull (recorded in the JWS), that the Panel would need to take care to

rationalise terminology around infrastructure across the Plan because of the multitude of terms in use, not all of which are defined in the Plan.

1.8. Site Visits

62. The Panel undertook a number of sites visits over the course of the hearing process, from Karamea to Jacksons Bay. Each part of the coast that the Panel visited was viewed with various overlays in mind, including SASM overlays, and in particular locations where submissions raised concerns about the presence of overlays or the boundaries of those overlays.

PART B - STATUTORY REQUIREMENTS AND DOCUMENTS

63. This section of the report considers the requirements for preparation of a district plan, as relevant to the SASM Chapter, particularly section 73, section 74 and section 75 of the RMA, with reference to the Memorandum of Counsel from Ms de Latour dated 13 October 2024.

64. The Panel have considered the role of the SASM Chapter in assisting Buller District Council, Grey District Council and Westland District Council ('**the Councils**') to carry out their functions under section 31 of the Act, including integrated management, and any need to identify responsibilities of each local authority in relation to the chapter, in accordance with section 80 of the Act.

65. The Panel relies on the Section 32 Report[9], which records how the Mana Whakahono ā Rohe agreement[10] guided the development of the Plan, and the management of Poutini Ngāi Tahu Heritage, including through the provisions of the SASM Chapter, in accordance with the Act[11].

66. The SASM Chapter is particularly relevant to Section 8 of the RMA and the need to take into account the principles of the Treaty of Waitangi/Te Tiriti o Waitangi. The West Coast Regional Policy Statement (**RPS**), which must be given effect to in decision-making on the Plan, identifies rangatiratanga as a relevant principle[12]. The Mana Whakaono ā Rohe agreement between Poutini Ngāi Tahu and the WCRC, which the Plan must be prepared in accordance with under Schedule 1, Clause 1A of the RMA (as a consequence of WCRC involvement on the TTPP Committee), includes reference to the Treaty principles of partnership, mutual benefit, informed decisions and active protection in its Appendix 2. The Panel has taken these principles into account when making recommendations on the SASM Chapter, particularly considering that the provisions have been developed in partnership with Poutini Ngāi Tahu, the information available on identified SASM provides for informed decision-making, and the provisions of the chapter respect rangatiratanga and provide for active protection of identified SASM. Rangatiratanga has been asserted by submitters other than Poutini Ngāi Tahu, including Māori land owners within the district, which is considered in the context of relevant submissions and evidence, with reference to section 6(e), section 7(a) and section 8 of the RMA, and higher order instruments under the Act, as well as relevant Treaty settlement legislation and legislation guiding the management of Māori land.

67. The inclusion of a SASM Chapter in the Plan gives effect to the Planning Standards[13] that require the following matters to be located in a SASM chapter where they are addressed:

[9] Section 11.2.7, p57
[10] Mana Whakahono ā Rohe Resource Management Act Iwi Participation Arrangement, October 2020
[11] Section 73 and Schedule 1, Clause 1A
[12] Resource Management Issues of Significance to Poutini Ngāi Tahu, overview of key values, principles and practices, 2. Rangatiratanga, p11
[13] Section 7 District-wide Matters Standard, 17, p33, in accordance with section 75(3)(ba)

descriptions of sites and areas (with agreement by Māori for inclusion); provisions to manage sites and areas; an agreed process for identification of sites and areas; a description of any regulatory processes for identification; and a schedule listing the general location of sites and areas. The Panel notes that descriptions of sites and areas have been agreed for inclusion with Poutini Ngāi Tahu (as outlined in evidence of Poutini Ngāi Tahu), provisions have been developed to manage them, there was a process for their identification (as outlined in the Section 32 Report) and a schedule has been developed listing their general location (Schedule Three), in conjunction with mapping. A further method has also been proposed to guide future inclusion of SASM in the Plan, new Method SASM-M2.

68. The Panel has given effect to higher order documents to the extent relevant to the provisions of the SASM Chapter in reaching its recommendations. In doing so, we observe that identified SASM occur across a broad range of environments on the West Coast, inland and coastal, highly modified and more pristine environments, such that there are a number of national direction instruments relevant to their management.

69. In particular, the recommended provisions of the SASM Chapter manage any potential subdivision, use of development of land within SASM, some of which qualifies as "*specified Māori land"* as defined in the National Policy Statement for Highly Productive Land (**NPSHPL**) and may also include areas of highly productive land (e.g. SASM 43). Where this intersection occurs, the NPSHPL does not require protection of the highly productive land from subdivision, use or development[14]. Māori land owner priorities for management of SASM land in those circumstances take precedence, as provided for in the Panel's recommended provisions for the SASM Chapter.

70. Identified SASM may qualify as "*specified Māori land*" under the National Policy Statement for Indigenous Biodiversity (**NPSIB**) and may also contain areas of significant indigenous vegetation and significant habitats of indigenous fauna that require protection from inappropriate subdivision, use and development (section 6(c) of the RMA), and qualify as "*significant natural areas*" (**SNA**), as defined in the NPSIB. Clause 3.18 of the NPSIB applies in those circumstances, which is considered by the Panel as part of recommending provisions in the ECO Chapter. The Panel are satisfied that provisions of the SASM Chapter are consistent with giving effect to the NPSIB where significant areas of indigenous vegetation and habitats are present, in particular clause 1.5(3)(f), the definition of mātauranga Māori and clause 3.3 of the NPSIB, and in conjunction with the provisions of the ECO Chapter.

71. Some identified SASM encompass waterbodies (e.g. SASM 67), which is considered by the Panel to be consistent with giving effect to the National Policy Statement for Freshwater Management (**NPSFM**), in particular clause 1.3(4), clause 3.2(2)(d) and clause 3.5(4). The Panel received evidence that the Plan provisions can also assist to meet the Resource Management (Stock Exclusion) Regulations 2020 that support the NPSFM wherever rules manage fencing activities.

72. The Panel received submissions and evidence on application of the National Policy Statement for Renewable Electricity (**NPSREG**) in the context of the SASM Chapter, in particular from Manawa (S438). The NPSREG recognises in its preamble that there is potential for conflict between renewable electricity generation and the relationship of Māori with their taonga and their role of kaitiaki. Some SASM are sites and areas where renewable electricity generation infrastructure is present (e.g. SASM 104). The Panel are satisfied that the SASM Chapter and any recommended amendments detailed below and in Appendix 1 appropriately give effect

[14] Clause 3.9(2)(d) and the definition of "specified Māori land" on p5 of the NPSHPL

to the NPSREG, addressing potential conflict with renewable electricity providers, as discussed in relation to particular provisions subject to submissions and evidence from Manawa.

73. The Panel received submissions and evidence on application of the National Policy Statement on Electricity Transmission (**NPSET**) in the context of the SASM Chapter, in particular from Transpower New Zealand Limited ('**Transpower**')(S299). National Grid infrastructure (e.g. transmission lines) may be present in sites and areas identified as SASM. The NPSET does not specifically address relationship of National Grid infrastructure with sites and areas of significant to Māori. The Panel are satisfied that recommended chapter provisions appropriately give effect to the NPSET, as identified in the submission of Transpower (S299.024), and as considered in response to Transpower requests for amendment to provisions.

74. The National Policy Statement for Urban Development (**NPSUD**) is relevant to SASM identified in urban environments, particularly in the Greymouth central business district (CBD) which was developed on the site of the original Māwhera pā[15]. The Grey District is a 'Tier 3' local authority under the NPSUD, as identified in the Section 32 Report[16]. The Panel are satisfied that recommended SASM Chapter provisions appropriately give effect to the NPSUD, in particular Policy 1(a)(ii), Policy 9 and clause 3.14.

75. Many identified SASM are located within the coastal environment such that the New Zealand Coastal Policy Statement (**NZCPS**) is pertinent to their management. The Panel are satisfied that the provisions of the SASM Chapter assist in giving effect to the NZCPS, in particular Objective 3, Policy 2 (especially (g)(ii)), Policy 15 (to some extent) and Policy 19(3)(c), relevant to consideration of public access matters in the coastal environment.

76. The Panel have considered matters of consistency with the Water Conservation (Buller River) Order 2001 (**Buller WCO**) and the National Water Conservation (Grey River) Order 1991 (**Grey WCO**) that arise in relation to the SASM Chapter. The Buller WCO in Schedule 1 records waters to be retained in their natural state due to outstanding eel fisheries, native fisheries, blue duck habitat and wild and scenic values. There are a number of SASM identified along the Buller River associated with nohoanga (traditional encampments and mahinga kai gathering sites), Māori Reserve lands, and pā sites[17], which relate to the availability of harvestable resources in those areas, such as those described in the Buller WCO. The Grey WCO is primarily concerned with particular outstanding scenic features, the outstanding natural characteristic of an incised river gorge with meandering pattern, retention of particular waters in a natural state, and others to be partially retained in a natural state[18]. There are a number of identified SASM along the Grey River that are not within the waters protected by the Grey WCO. Recommended SASM Chapter provisions are considered by the Panel to be complementary to both WCO and therefore are not inconsistent with them.

77. The Panel have considered the need to give effect to the West Coast Regional Policy Statement (**RPS**) through the provisions of the SASM Chapter. The RPS records, with reference to "*taonga*" in Section 3[19] that the term "*cultural landscapes*" is an inclusive expression for taonga sites and areas, which is relevant to consideration of sites and areas of significance to Māori. As part of building resilient and sustainable communities, the RPS contains an objective to recognise and provide for the relationships of Poutini Ngāi Tahu with cultural landscapes,

[15] As described in the notified Plan description of the Grey District (p8) and descriptions of SASM 56, SASM 57, SASM 58 and SASM 59
[16] Te Tai o Poutini Plan – Section 32 Evaluation – Report One – Overview and Strategic Directions, Section 2.25, p7
[17] For example, SASM 21, SASM 23 and SASM 25 in the upper reaches of the river
[18] National Water Conservation (Grey River) Order 1991, Clauses 3, 4 and 5
[19] Resource Management Issues of Significance to Poutini Ngāi Tahu, brief overview of key values, principles and practices, 7. Taonga, p11

which is supported by policy requiring appropriate identification of cultural landscapes, and management of the effects of activities in a way that provides for the cultural relationships of Poutini Ngāi Tahu. An associated method directs that district councils will consult with Poutini Ngāi Tahu about appropriate provision for cultural landscapes in district plans[20]. The Panel is satisfied that the process for identification of SASM by Poutini Ngāi Tahu (in collaboration with the Councils through the TTPP Committee) as described in the evidence of Mr Madgwick and the Section 32 Report, and the proposals for management of them through provisions in the SASM Chapter, are consistent with the RPS objective, policy and method in relation to cultural landscapes. Identified SASM include cultural landscapes, or taonga sites and areas, as described in the evidence of Mr Madgwick, which is accepted by the Panel. The Plan also identifies a range of SASM other than cultural landscapes, consistent with objectives, policies and methods for historic heritage[21]. The RPS has therefore been given effect to in the Panel's recommendations for the SASM Chapter provisions.

78. The Panel did not receive any submissions or evidence to suggest that the SASM Chapter provisions were in any way inconsistent with operative or proposed regional plans. Evidence was received to improve alignment in particular instances, which the Panel recommends in the context of specific provisions.

79. The Panel received evidence of the relevance of the Paparoa National Park Management Plan 2017 to the relationship of Poutini Ngāi Tahu with SASM in the Paparoa area. We also received evidence regarding the Waitaiki Historic Reserve Management Plan and its relevance to understanding the pounamu traditions associated with SASM.

80. The Panel understand that identified SASM are generally distinct and separate from listed items on the Historic Places Register/Rārangi Kōrero, which are managed under the Historic Heritage Chapter of the Plan.

81. The Panel considers that there is a relationship between identified SASM and customary fisheries regulations[22] where the SASM are associated with mahinga kai harvest locations, such that management of the SASM is complementary to the purpose of those regulations.

82. Planning evidence variously referenced planning frameworks of other councils, including neighbouring territorial authorities. The Panel received evidence that Queenstown Lakes District Council has also mapped sites and areas of significance to Māori, including one that overlaps in to the Westland District Council (**WDC**) jurisdiction. The Panel recommendation is to incorporate this as an additional SASM in the Plan on the basis of submissions and evidence.

83. With reference to the National Adaptation Plan prepared in accordance with the Climate Change Response Act 2002, the Panel observe that management of SASM under the recommended provisions of the SASM Chapter is consistent with a climate change adaptation approach that works in partnership with Māori, elevates te ao Māori and mātauranga Māori, and empowers Māori in adaptation planning by Māori for Māori, in relation to sites and areas of significance to Poutini Ngāi Tahu that are vulnerable to the effects of climate change[23].

84. The Panel have considered the relationship of SASM Chapter provisions with the Pounamu Management Plans prepared by Ngāti Māhaki ki Makaawhio and Ngāti Waewae. The Panel relies on the involvement of Papatipu Rūnanga in developing the SASM Chapter, including the

[20] Section 4 Resilient and Sustainable Communities, Objective 5 and Policy 6, p15, explanation to the policies on p16, and Method 6, p17
[21] RPS Chapter 4, Objective 4, Policy 5
[22] Fisheries (South Island Customary Fishing) Regulations 1999
[23] Urutau, ka taurikura: Kia tū pakari a Aotearoa I ngā huringa āhuarangi – Adapt and thrive: Building a climate-resilient New Zealand – Aotearoa New Zealand's First National Adaptation Plan, p13

Pounamu Management Overlay and the Aotea Management Overlay, to reflect the aspirations of ngā hapū as expressed in those iwi management plans. Similarly, identification of SASM at Lake Māhinapua[24] has a relationship with Te Mahaere Whakahaere o Te Tāwhiri a Te Makō: Lake Māhinapua Management Plan. In that respect the Panel are confident that regard has been had to these iwi management plans during the development of the SASM Chapter. Recommendations of the Panel have not significantly altered the effect of notified provisions in relation to the Pounamu Management Overlay, the Aotea Management Overlay or the SASM at Lake Māhinapua.

85. Clause 10 of the First Schedule states that providing decisions on individual submissions is unnecessary. The Panel's recommendations are made within the scope of requested relief, either individual submissions or groups of submissions making similar requests, as specified in the reasons for recommendation.

PART C – SUBMISSIONS, EVIDENCE, EVALUATION AND RECOMENDATIONS

2. SITES AND AREAS OF SIGNIFICANCE TO MĀORI – NGĀ WĀHI TĀPUA KI TE MĀORI

86. The SASM Chapter, as a whole, attracted a significant number of submissions, the Panel considers in part due to the errors associated with the notified version of the SASM maps, of which there were 216 identified SASM at the time of notification. In addition, the draft version of the Plan shared with the public prior to notification did not contain the identified SASM so notification was the first public exposure of the location and number of SASM. The Panel understand from the Section 32 Report and evidence provided that this has had an impact on trust in the quality of information and confidence in the SASM Chapter amongst submitters to the Plan; and contributed to errors that have been sought to be corrected through submissions and evidence, particularly that of Poutini Ngāi Tahu but also some individual submitters.

87. The s42A Report begins by assessing submissions and evidence on the definitions relevant to the SASM Chapter. The Panel adopts this same approach within this general section of the report, considering submissions on definitions ahead of the whole of chapter submissions.

88. The Panel adopts the summaries in the s42A Report when considering the relevant submissions and further submissions received, unless otherwise described. It should be noted that the Panel has also revisited original submissions and further submissions to inform recommendations on the SASM chapter.

2.1. SASM General/Whole Chapter

Submissions and Further Submissions

89. There were three submissions received on the definition of "*cultural landscapes*" and no further submissions.

90. There were 36 submissions that sought additional definitions, which attracted eight further submissions predominantly in support, with one opposed in part. The definitions sought included "*landfill*", "waste disposal facilities", "*hazardous facilities*", "*wastewater treatment plant*", "*wastewater disposal facilities*", "*offensive industry*", "*plantation forest*", "*shelterbelt*", *"woodlot*", "*upper slopes*" and *"cultural material*".

[24] SASM 105, SASM 110 and SASM 111

91. There were 43 submission points on the chapter as a whole (eight supporting, one supporting in part, one neutral, one not stated, 13 requesting amendment and 19 opposed), and 21 further submission points variously supporting and opposed to the original submission points.

92. For those opposed, some simply requested deletion of the chapter, some opposed based on the effect on property owners, some sought engagement with landowners, some sought compensation, some were concerned about the accuracy of methodology or mapping, some tied their opposition to the Plan as a whole, and some thought it was a matter better dealt with by central government, the Māori Land Court or Treaty Settlement processes.[25]

93. For those seeking amendment, some wanted more details provided about the SASM and their values, clarity for landowners to understand what it means for activities, as well as an explanation of the relationship with Treaty settlements, or review of SASM boundaries.[26] In addition, recognition of the functional and operational needs of mining and limited use of terms such as "*avoid*", "*protect*", "*prevent*", "*minimise*", "*restrict*" and "*preserve*" because of their impact on the "gateway test" (presumably in relation to non-complying activities) was requested by mining companies.[27] The Proprietors of Māwhera Incorporation (Māwhera) also requested recognition of the owners of the Native Reserves within the boundaries of the Arahura Deed of Purchase.[28] Consideration was sought as to whether current statutory provisions would be sufficient to protect SASM.[29]

Section 42A Report Analysis and Recommendations

94. **Ms Easton** considered that the notified definition of "*cultural landscape*" could benefit from clarification as to the location of cultural landscapes, as was requested in the submissions of WMS (S599) and TiGa Minerals and Metals Limited (**TiGa**) (S493) who sought a schedule. She recommended a link to the schedule of outstanding natural landscapes (**ONL**) (Schedule Five), to record where there is an identified SASM located within an ONL.[30]

95. Ms Easton supported the requests for new definitions, with the exception of "*shelterbelt*", which she recommended be deleted where it appears in the provisions, negating the need for a definition. She utilised the definition of "*plantation forestry*" from the National Environmental Standard for Commercial Forestry (**NES-CF**). She also referred to the definition of "*offensive industries*" provided at the time of hearing submissions and evidence on the Introduction and General Provisions Chapter. Ms Easton otherwise developed definitions based on her understanding of their meaning and use within the SASM Chapter.

96. Ms Easton recommended rejecting the submissions in opposition on the basis that higher order instruments directed or supported the need for a SASM Chapter, including the RPS and section 6 of the RMA.

97. Ms Easton considered that no further review of the extent of SASM was necessary given the comprehensive review already undertaken by Poutini Ngāi Tahu, which resulted in only minor amendments compared with what was notified, including to SASM boundaries (e.g. the concern of Ms Charlotte Bradley-Peni (S370)). She responded to submitters that referred to

[25] G.E. and C.J. Coates (S415), Clare Gilroy (S341), Garry Livingstone (S201), Donna Mitchell (S107), Grey District Council (S608), Bernard Hands (S350), Taipo Dairies Limited (S520), Ann Bradley (S371), Stephen Page (S270), Paul Heal (S133), Kawhaka Creek Catchment Residence (S297), Scenic Hotel Group (S483), Neil Bradley (S298), Gerrit and Suzie Wolters (S308), Skyline Enterprises Limited (S250)

[26] Charlotte Bradley-Peni (S370), Greenstone Retreat (S459), Tangi Weepu (S630), Amy Paterson (S128), Toni Chittock (S61), Rodney Wright (S62), Michael Robson (S327)

[27] Rocky Mining Limited (S474) and Papahaua Resources Limited (S500)

[28] The Proprietors of Māwhera Incorporation (S621)

[29] Jennifer Lake (S323)

[30] This matter is further discussed in the Panel's recommendations on the Natural Features and Landscapes chapter

the potential for other Acts or processes outside of the RMA to look after SASM by pointing to the specific requirements of the RMA.

98. Ms Easton recognised the difficulties created as a result of SASM not being included in the draft Plan prior to notification. In response to submitters that sought direct engagement with landowners prior to SASM being included in the Plan, including GDC, Ms Easton noted that the full RMA Schedule 1 plan process had been followed and that there was no requirement in that schedule for direct engagement with affected landowners. However, she noted that landowners affected by SASM were notified by letter at the time of notification of the Plan, which was how mapping errors were identified (subsequently corrected under Schedule 1, Clause 16 of the RMA) because people who received letters raised queries with WCRC[31].

99. In response to submissions concerned about the impact on property rights, Ms Easton said that restrictions over private land were minimised during development of the Plan and often resulted in lower levels of restriction than other section 6 matters (e.g. outstanding natural landscapes and features) covered by overlays in the Plan. She noted that there was no compensation mechanism in the RMA and historic heritage values present within identified SASM required protection under the Act. In relation to property LIM reports, Ms Easton advised that this was not a district plan matter.

100. Ms Easton supported the submission of Mr Tangi Weepu (S630.001 and S630.002) as he sought to improve understanding around the values of Lake Māhinapua and ways to protect them. She noted that SASM 10 and SASM 11 are intended to achieve what Mr Weepu seeks.

101. In considering the submission of Skyline Enterprises Limited ('Skyline') (S250.003) Ms Easton observed that the location of proposed development, Franz Josef Glacier, would require assessment under a number of more restrictive provisions in other chapters of the Plan (e.g. ONL) compared with the SASM Chapter provisions. Ms Easton emphasised that the focus of the Chapter was on protecting SASM, rather than future development opportunities.[32]

102. Ms Easton supported submissions seeking further information about the methodology and basis for identifying SASM, which was not available in detail at the time of notification.

103. Ms Easton also supported the submission of Michael Robson (S327.002) who sought guidelines on what matters need to be considered in relation to a SASM and when consent would be needed. She proposed introduction of a Method in the Plan as a response to this concern, as follows:

> ***SASM – M1:***
>
> *Develop in partnership with Poutini Ngāi Tahu the following:*
>
> *(a) Which information and in what form shall information be available to the public on identified SASM sites and their values;*
> *(b) Written protocols on how to engage with Poutini Ngāi Tahu for resource consent or plan change applications; and*
> *(c) Guidance for the public in how to apply for a resource consent for an activity on a site containing an identified SASM.*

[31] West Coast Regional Council administered the hearing process on behalf of the TTPP Committee

[32] Ms Easton responded further to the Skyline proposal in her s42A Report for the hearing in Franz Josef (Te Tai o Poutini Plan Section 42A Officer's Report Franz Josef Area, 19 August 2024), p7-8, specifically in relation to SASM 145, on a similar basis as her s42A Report for the SASM Chapter

104. In response to the mining companies, Ms Easton pointed to the requirement under section 6(f) of the RMA to "*protect*" historic heritage from inappropriate subdivision, use and development, such that language indicating protection was suitable in the SASM Chapter provisions. She did not address the matter of "*functional or operational need*" generally, other than to acknowledge that the companies had made similar submissions on other chapters of the Plan, although she considers the point where it arises in relation to specific provisions of the SASM Chapter in response to particular submissions and evidence.

105. Ms Easton summarised the submission of Māwhera, in particular that the SASM are more accurately described as Sites and Areas of Significance "*to Poutini Ngāi Tahu*" rather than "*to Māori*" more broadly, and that Māwhera are distinct from Poutini Ngāi Tahu as defined in the Plan, as an incorporated group. She agreed that the chapter applied to sites and areas of significance to Poutini Ngāi Tahu, rather than Māori more broadly, and that the chapter title was governed by the requirements of the Planning Standards. She did not recommend any amendments as a consequence of the submission.

106. Additional methods Ms Easton proposed to include in the plan to support the objectives, policies and rules included:

> **SASM – M2**
>
> The TTPP Committee will consider the merits of inclusion of additional sites and areas of significance to Māori in the Plan as part of their regular monitoring of Plan implementation. Where Poutini Ngāi Tahu identify any further sites or areas they seek to be scheduled these will need to be accompanied by an appropriate cultural assessment that outlines the values of the site or area. Evidence of consultation with the owner of the area or site should also be provided. Where such an assessment and evidence of consultation and its outcomes is provided to the TTPP Committee, the Committee will assess whether there is sufficient justification for scheduling, and if so schedule the site or area via a Committee initiated Plan Change.
>
> **SASM – M3**
>
> Develop in partnership with Poutini Ngāi Tahu information on the cultural certification process for mineral extraction within the Pounamu and Aotea management area overlays.

107. These proposed methods are further discussed in this Report where they arise in relation to specific provisions, submissions and evidence.

Hearing and Submitter Evidence/Statements

108. Legal submissions from **Ms Sarah Scott** confirmed Poutini Ngāi Tahu as mana whenua within the West Coast/Te Tai o Poutini region and emphasised the inherited kaitiaki relationship of mana whenua within their takiwā, entailing an active exercise of rights and responsibilities in a manner beneficial to the resource and the environment. Ms Scott equated the identification of SASM as assisting Poutini Ngāi Tahu to fulfil kaitiaki responsibilities, as well as make council staff and consent applicants aware of activities that may impact on Poutini Ngāi Tahu values, such as mahinga kai. She described the SASM Chapter provisions as a "targeted approach" to each identified SASM, allowing for site and area specific responses in regulation, having assessed values at the plan-making stage rather than the resource consent stage. At the hearing she described this as a way of providing for appropriate subdivision, use and development. She alluded to the extensive expert assistance provided to the TTPP Committee by Poutini Ngāi Tahu in identifying, mapping and categorising SASM sites and areas in the Plan, at the request of the Committee.

109. Ms Scott reminded the Panel of the foundations of Ngāi Tahu tribal structure, the role of rūnanga and the origins and outcomes of Treaty Settlement, as outlined in legal submissions at the outset of the hearing process, as well as Part 2 requirements and National Planning Standards. Altogether she noted that section 6(e), section 7(a) and section 8 are "*strong directions, to be borne in mind at every stage of the planning process*" in accordance with case law[33].

110. Ms Scott summarised the wide range of SASM identified, all illuminating aspects of Poutini Ngāi Tahu culture, traditions and intergenerational relationships, as set out in Mr Madgwick's evidence.

111. Ms Scott stated that removing SASM from the Plan, as requested by some submitters, was not an option available to the Panel because of the requirements of higher order documents and the purpose and principles in Part 2 of the RMA. She also outlined case law that reinforced rangatiratanga and the role of iwi or hapū in identifying values held in relationship with cultural landscapes and effects on them[34]. Ms Scott submitted that the significance of SASM was individual to Poutini Ngāi Tahu and any removal of them or amendment to their level of protection would need to be supported by Poutini Ngāi Tahu, with no potential to challenge the evidence provided as compared with other types of evidence.

112. Ms Scott outlined her initial position on the use of a permitted activity rule with a written approval or certification requirement, noting that the idea of certification was raised in submission by the New Zealand Defence Force (**NZDF**) in relation to temporary activities, which Poutini Ngāi Tahu supported. Ms Scott identified a number of rules in the plan that similarly relied on a written approval process as part of the permitted activity requirements[35]. She described a written approval requirement as pragmatic and available, as a means of overcoming the variability of SASM and potential effects on them, which would be hard to otherwise address in a permitted activity. While she acknowledged it would be *ultra vires* in the context of resource consent conditions, she found no similar hurdle in relation to a plan, and she considered there was case law in support of such an approach[36] and a number of district plan examples. Ms Scott determined that the matter of discretion by Council did not arise because the role of Council would be to simply to receive the written approval prior to commencement of an activity. She alluded to section 87B as an example where the RMA accommodated a written approval process. In comparison, she considered certification to be an undeveloped proposal and criteria would need to be included in the Plan.

113. Ms Scott addressed the matter of sensitivity in relation to silent files and submitted that Ngāi Tahu had a right not to publicly disclose details of cultural, spiritual and heritage values important to them.

114. Ms Scott responded to the evidence of GDC and the matter of consultation with affected landowners. She pointed to Schedule 1, Clause 3 of the RMA which contained mandatory consultation requirements and advised that there was no obligation on the Councils to consult with affected landowners. In her submission, neither was there any obligation to make a draft plan available to the public prior to notification. Ms Scott identified that opportunity to submit on the notified plan provides for public participation, and those affected by identified SASM could approach Poutini Ngāi Tahu. She highlighted the role of GDC on the TTPP Committee

[33] McGuire v Hastings District Council [2000] UKPC 43, [2002] 2 NZLR 577 at [21]. Recently cited in Environmental Protection Society Inc v Tauranga City Council [2021] 3 NZLR 882.

[36] Population and Public Health Unit of the Northland District Health Board v Northland Regional Council [2021] NZEnvC 96

where concerns could be raised in that forum. She also challenged the evidence of Mr McEnaney for GDC, which references the Environment Court code of conduct for expert witnesses, but she questioned his adherence to that code because his evidence did not read as independent planning evidence, which she asserted should affect any weight given to it.

115. **Mr Paul Madgwick**, Poutini Ngāi Tahu, began his evidence with an explanation of his whakapapa, roles and background as a tribal historian.

116. Mr Madgwick listed the sources he drew from in preparing his evidence, both oral and written. He acknowledged the collaborative approach taken by the TTPP Committee in developing the Plan, including Poutini Ngāi Tahu representation on the committee, honouring the spirit of the Mana Whakahono ā Rohe agreement with WCRC and enabling expression of tino rangatiratanga, kaitiakitanga and mana motuhake. He emphasised Poutini Ngāi Tahu support for the Plan and the recommendations of the s42A Report. He reiterated legislative recognition of the mana whenua status of Poutini Ngāi Tahu, and their tino rangatiratanga and role as kaitiaki.

117. Mr Madgwick outlined the history of the Arahura Deed of 1860 and failure of the Crown to honour agreements in relation to reserve lands, schools and hospitals. He advised that some of the identified SASM were native reserves dating back to this time, constituting the only land left in Māori ownership after the Arahura purchase. He described migration of Poutini Ngāi Tahu whānau from the Māhwera Reserve at the location of the expanding town of Greymouth to Arahura, a process that occurred between 1860 and the early 1880s. He identified these circumstances as material to the Ngāi Tahu Treaty Settlement process and the resulting apology to Ngāi Tahu in the NTCSA. He raised the significance of affirmation by the Crown of the rangatiratanga of Ngāi Tahu. He described what rangatiratanga meant to him, that it was fundamental to identity as Poutini Ngāi Tahu, uninterrupted since before 1840, the right to freely live, govern, work and care for te taiao/the natural environment in a manner that dignifies tūpuna, and something to be protected and enhanced for future generations.

118. Mr Madgwick advised that kaitiaki are the people who practice kaitiakitanga because they hold the authority and responsibility to do so, as an inherited and intergenerational responsibility, linked to mahinga kai practice. He stated that identification of SASM assisted Poutini Ngāi Tahu to exercise kaitiaki responsibilities, and that Poutini Ngāi Tahu have a team of experienced RMA practitioners and cultural experts able to respond to RMA demands. He noted this enabled Poutini Ngāi Tahu to be able to respond to the request of the TTPP Committee to identify and digitally map SASM for inclusion in the Plan.

119. Mr Madgwick described SASM as important places that provide significant associations to cultural traditions, history or identity for Poutini Ngāi Tahu, including sacred sites and areas such as burial caves, urupā/cemetaries, battle sites, occupation sites such as kāinga/villages, pā and Māori reserves, as well as cultural landscapes such as significant maunga/mountains, ara tāwhito/trails, waka landing areas, nohoanga/temporary camp sites and important mahinga kai gathering areas. He stated that these needed to be protected as a matter of national importance. He described their potential destruction or damage as causing a loss of knowledge and connection to the past, identity, history and cultural traditions.

120. Mr Madgwick observed that in the past Heritage New Zealand/Pouhere Taonga (**HNZPT**) had better protected European heritage, and that often, planning documents only recorded New Zealand Archaeological Association (**NZAA**) or HNZPT archaeological sites. At the hearing, he explained that many SASM contained clusters of archaeological sites and that in those cases the SASM boundaries extend beyond the individual find locations, and that there are also

individual archaeological sites outside of SASM. He referred to deficiencies in existing district plans, with very limited record of culturally significant sites or archaeological sites and that what was there had been identified without Poutini Ngāi Tahu involvement. He noted that the TTPP Committee sought to use current best practice in the Plan development process, resulting in the request to Poutini Ngāi Tahu for assistance.

121. Mr Madgwick explained that identifying the SASM was a substantial piece of work requiring over 30 hui with rūnanga representatives, with a number of steps, including site visits. He commented on the mapping errors at the time of notification, indicating that they were largely the consequence of technological issues. He considered that the SASM were accurately mapped and no further changes would be required other than those requested in the Poutini Ngāi Tahu submission. He also noted that the exercise of identifying SASM also created Appendix Ten to the Plan, which picked up references from the existing district plans and recorded archaeological sites that have been confirmed as being of Māori origin.

122. Mr Madgwick's evidence outlined that the SASM identified reflected the migratory patterns of Poutini Ngāi Tahu, connected to the life cycles of animals and plants in the forests and rivers, and the concentration of use along the coastline due to an abundance of mahinga kai. He observed that European settlers often found the same locations desirable for similar reasons. He explained that there has been significant land modification, and that identifying SASM in modified locations provided for Poutini Ngāi Tahu to have their connections to ancestral lands recognised.

123. Mr Madgwick clarified that SASM include "*cultural landscapes*", which were described in Schedule Three as "*ancestors embedded in the landscape*". He acknowledged that the entire takiwā was important to Poutini Ngāi Tahu but this has not been mapped as a single cultural landscape. He explained the difficulties in using "western" planning terms that don't fit easily with a Te Ao Māori view and that categorising ancestral maunga was not consistent with how Poutini Ngāi Tahu think about relationships but that the information was provided to meet the needs of the planning system.

124. Mr Madgwick responded to submitter concerns that SASM should be removed from their properties because they had purchased land from either Māwhera Incorporation or The Māori Land Trustees (Te Tumu Paeroa and its predecessors) and it must therefore be of no cultural significance. He explained that Poutini Ngāi Tahu identified former Māori reserve sites as significant because they were chosen and reserved by tūpuna as places for occupation, kāinga, historic pā, urupā and other wāhi tapu or for mahinga kai. He indicated that there may have been a variety of reasons why land was sold, however, it was important that Ngāi Tahu whānui had their connection to ancestral lands recognised. He clarified that Poutini Ngāi Tahu would not routinely be seeking access to private land.

125. **Ms Rachael Pull**, Senior Environmental Advisor for Poutini Ngāi Tahu, assessed various definitions including some that were subject of submission points from Te Tumu Paeroa, which were subsequently withdrawn, and which were not included in the initial s42A Report assessment. Ms Pull referred to her evidence in the first hearing in relation to the term "*ancestral land*", which she did not consider needed a definition, and also in relation to "*cultural uses*", "*cultural purposes*", "*cultural activities*", which she recommended replacing with "*Māori purpose activities*" or "*Poutini Ngāi Tahu activities*" and confirmed that her position had not changed. She also addressed "*Poutini Ngāi Tahu land*", "*Poutini Ngāi Tahu members*" and "*Poutini Ngāi Tahu whānui*" in the first hearing and retained her position that reliance could be placed on the "*Poutini Ngāi Tahu*" definition in the Plan to understand these variations. She also did not support a definition for the term "*Te Rūnanga o Ngāi Tahu Land*",

which was not discussed in the s42A Report, indicating that "*specified Māori land*" would be considered in the ECO Chapter in relation to the NPS-IB. She did not support the introduction of the term "*Victorian title*" because she proposed changing the wording of Rule SASM-R7 where it was used.

126. In relation to "*cultural landscapes*", Ms Pull referred to her evidence for the Energy, Infrastructure and Transport chapters hearing where she noted that there was an extra sentence in the definition in the RPS compared with the Plan and no clarity as to why they are different. She pointed to the evidence of Mr Madgwick regarding the inclusion of some cultural landscapes within SASM.

127. Ms Pull recommended amendment to the proposed definition of "*cultural materials*" in the s42A Report to include minerals, as follows:

> **Cultural materials** means minerals, plants, plant materials and materials derived from animals, marine mammals or birds which are important to Poutini Ngāi Tahu in maintaining their culture.

128. In relation to "*hazardous facilities*", Ms Pull favoured drawing from the definition in the West Coast Land and Water Plan (WCLWP) for "*hazardous substances*", and the Hazardous Substances and New Organisms Act 1996 (HASNO), and using the term consistently across the plan. She recommended the definition read as follows:

> **Hazardous facilities** means in relation to Sites and Areas of Significance to Māori, activities that involve the manufacturing and disposal of hazardous substances including any substance
>
> (a) With one or more of the following intrinsic properties:
>
> (i) Explosiveness:
> (ii) Flammability:
> (iii) A capacity to oxidise:
> (iv) Corrosiveness:
> (v) Toxicity (including chronic toxicity):
> (vi) Ecotoxicity, with or without bioaccumulation; or
>
> (b) Which on contact with air or water (other than air or water where the temperature or pressure has been artificially increased or decreased) generates a substance with any one or more of the properties specified in paragraph (a) of this definition.
>
> Advice Note: Hazardous Facilities are also managed through the West Coast Regional Council and the Hazardous Substances and New Organisms Act 1996.

129. Ms Pull also supported utilising the definition of "*landfill*" from the WCLWP and using it consistently across the Plan, as follows:

> **Landfill** means any premises used for the lawful deposit or disposal of waste materials into or onto land.

130. She recommended considering the definitions of "*plantation forestry*", "*shelterbelt*" and "*woodlot*" in the context of the General Rural Zone.

131. In relation to "*Iwi/Papatipu Rūnanga Management Plan*", Ms Pull in her Appendix One pointed towards retaining the definition with amendments as sought in the Poutini Ngāi Tahu submission, which was not discussed in the s42A Report.

132. In relation to "*waste disposal facilities*", "*wastewater disposal facilities*" and "*wastewater treatment plant*", Ms Pull noted that the SASM Chapter was the only chapter in the Plan that referred to "*waste disposal facilities*" and "*wastewater disposal facilities*" and was unsure if the definitions were needed, although she supported clarification that domestic and farm related facilities would be excluded. She recommended review of the use of these terms.

133. Ms Pull raised concerns around ongoing confusion caused by inconsistent use of infrastructure terminology and favoured consistent use of the term "*Regionally Significant Infrastructure*".

134. Ms Pull supported the s42A analysis that sought to achieve consistency between the Historic Heritage Chapter and the SASM Chapter, however she emphasised the influence of section 6(e) and that Māori heritage typically requires more intervention than a more "hands off" approach to other kinds of historic heritage. She used mining as an example of an activity that needs to occur in a way that respects the relationship between mana whenua and taonga, including when pounamu and aotea are unearthed during operations, which has the potential to provide a source of stone for mana whenua.

135. Ms Pull considered that SASM are a tool that supports a range of matters of national importance and higher order documents.

136. Ms Pull went on to note that the SASM Chapter supports section 7(c) because there will be an assessment of the natural and physical qualities and characteristics that contribute to Poutini Ngāi Tahu historical and cultural identity, and similarly in relation to section 7(d). She highlighted, in relation to section 8, that the SASM Chapter provided for rangatiratanga, active protection and informed decision-making.

137. Ms Pull emphasised the high degree of support for the Plan in the Poutini Ngāi Tahu submission, and support for the recommendations of the s42A Report. She stated that the site-specific analysis that had enabled a targeted rule framework to apply to identified SASM meant that there was more clarity for plan users, which she considered to be an enabling framework for subdivision, use and development, appropriate to each site. She noted that this approach differed from other district planning frameworks that take a more standardised approach, with reliance on a resource consenting pathway.

138. Ms Pull supported the drafting of Method SASM-M1 in the s42A Report, on the basis that it will direct the Councils to work with Poutini Ngāi Tahu around implementation of the Plan rules, in order to appropriately balance clarity and information for the landowner and cultural sensitivity. Ms Pull alluded to issues arising when information provided in one context is used inappropriately in another context without checking with Poutini Ngāi Tahu, and concerns about intellectual property.

139. Ms Pull supported the new Tables SASM T1 to SASM-T8 that group SASM according to applicable rules and thought they would be most helpful embedded in the rules, with hyperlinks. She noted, however, that: Table SASM T1 was missing reference to SASM 127, SASM 133 and SASM 135; and that Table SASM- T2 was missing SASM 163 and SASM 216. Ms Pull supported use of the term "*Regionally Significant Infrastructure*" in Table SASM-T8.

140. In response to questions at the hearing, Ms Pull considered that the word "*avoid*" would be most suitable in policy where it then led to non-complying activity status in the rules, and that "*only allow*" would be better suited to policies that lead to discretionary activity status. Ms Pull also advised the Panel at the hearing that she considered "*minimise*" to mean reduce all

the way down, as far as practicable, which was different to "*reduce*" which could involve a reduction less than that.

141. **Mr Tangi Weepu** spoke to his basic written submission, with his oral evidence being the primary basis of his submission. He described his understanding of tino rangatiratanga and mana whenua, and asserted his right to speak on the basis of both. He described Te Tiriti o Waitangi as intending to preserve the social structure, and that therefore tino rangatiratanga was essential to his lived experience. He said that although statute assigned mana whenua to Papatipu Rūnanga, he was adamant that Papatipu Rūnanga did not speak for him, as mana whenua. He expressed his connection to Lake Māhinapua and his responsibility to care for the lake, for his tūpuna and his mokopuna, as well as his sadness that the site of so many deaths of his tūpuna in battle was treated as a recreational site.

142. **Mr Hemi Meihana Retara/James Mason Russell**, chairman of the Committee of Management of The Proprietors of Māwhera Incorporation (Māwhera Inc.) presented to the Panel in relation to the interests of the shareholding members of the incorporation, who own and manage lands reserved for Māori as a consequence of the Arahura Deed of Purchase in 1860. Mr Retara/Russell in his written statement described these reserve lands as ancestral land and that the owners are kaitiaki of that land. He indicated that the SASM should only refer to takata whenua of Te Tai o Poutini and not Māori generally. He pointed to tino rakatirataka over lands that were never acquired by the Crown and challenged kawanatanga as only applying to land purchased by the Crown.

143. Mr Retara/Russell explained that owners of 36 reserve lands amalgamated their interests in 1976. He asserted that neither the Plan nor the Mana Whakahono ā Rohe agreement reflected manawhenua status because neither included Māori reserve landowners who may not whakapapa to Ngāti Waewae or Ngāti Mahaki. He argued that the Papatipu Rūnanga representing Ngāti Waewae and Ngāti Mahaki did not have authority over reserve landowners, in accordance with tikaka Māori. Mr Retara/Russell stated that Te Rūnanga o Ngāi Tahu only had authority over assets gained through the Treaty Settlement process and the WAI 27 claim, and that all pounamu within the Arahura River catchment was vested in Māwhera Inc on 23 September 1997. Mr Retara/Russell emphasised that the lands and pounamu resources were managed for the benefit of the incorporated members, including in relation to cultural values, customary harvest or other cultural practices. He countered suggestion that land sold had no cultural values, explaining that a range of economic and valuation factors might influence sale of land but cultural values remain. He described Papatipu Rūnanga as also being incorporated societies representing their members. Mr Retara/Russell considered that Victorian title in relation to pounamu had been superseded when pounamu was vested with Te Rūnanga o Ngāi Tahu and Māwhera Inc.

144. At the hearing, Mr Retara/Russell indicated that some lands owned and managed by Māwhera Inc. would be subject to processes that required approval from Poutini Ngāi Tahu, as per the notified version of the Plan. He stated that tikanga over time has been that Ngāi Tahu does not interfere with organised groups of whānau that were set up prior to the finalisation of Te Kēreme, the Ngāi Tahu claim, such as Māwhera Inc.

145. **Mr George & Mrs Caryl Coates** of Nikau Deer Farm Limited, Barrytown sought removal of the SASM Chapter on the grounds of poor communication, inaccurate mapping, excessive rules, no quantitative section 32 analysis, no respect for freehold landowners (e.g. owners for 50 years and allowed archaeologists on in the 1970s), disregard for private property rights, the need for business flexibility, and the Government's intention to remove SASM. Mr & Mrs Coates pointed to the operative Grey District Plan implementation method and the need to

consult with and provide information to landowners. Concerns were also expressed about the rules having immediate legal effect; and impact on every day farming activities like trimming native vegetation, digging post holes, reinstating flood damaged drains, creek crossings, culverts, bridges and creek channels, cleaning out drains, filling in holes and laying gravel. They considered that there would be quantifiable economic effects due to the costs of consenting and devaluation of land (e.g. loss of $500,000 land value for not being able to subdivide their bush block), as well as costs that Poutini Ngāi Tahu would need to recoup for managing SASM. Mr & Mrs Coates indicated that dialogue between Poutini Ngāi Tahu and landowners would get further than rules in a plan that irritate landowners, and compensation should be given where restrictions were placed on use of land.

146. **Ms Inger Perkins**, regional field advisor for Herenga ā Nuku Aotearoa, the Outdoor Access Commission provided a written statement to the Panel at the time of her presentation. Ms Perkins explained the role of the Commission in providing leadership on outdoor access issues and advocating for free, certain, enduring and practical access to the outdoors. She requested that that existing legal access not be restricted as a consequence of SASM Chapter provisions and considered alternative public access could be provided where necessary to avoid sensitive cultural sites on a case by case basis. She could not identify an issue of this nature arising over the previous eight years. Ms Perkins indicated that review of the Walking Access Act 2008 resulted in improved response to Māori interests, including: a partnership approach; providing access for relevant Māori specifically; preserving Māori ownership and control where public access is provided; controlling authorities managing public access to sites of cultural significance in negotiation with Māori; improving code of behaviour on culturally sensitive sites; and working more closely with post-Settlement Māori to explore access opportunities.

147. **Mr Martin Kennedy**, planner for Westpower Limited (Westpower) focussed his evidence of remaining areas of difference between the s42A Report recommendations and Westpower submission points. Mr Kennedy supported use of the term "*regionally significant infrastructure*" within the provisions provided it captured infrastructure managed by Westpower.

148. **Mr Julian Hall**, Greymouth landowner, presented to the Panel regarding his concerns about SASM being placed over land that had been made freehold by Māwhera Inc. and sold within the last five years. He provided evidence of a transaction in 2021 where the Māori Land Court changed the status of land under its administration to general land. Although he understood that land within the Greymouth CBD would not be subject to rules, he was concerned about the potential for further restrictions to be placed on the area over time.

149. **Mr James Sutherland**, policy advisor for Federated Farmers West Coast, indicated support for Ms Easton's proposed Method SASM-M1. He cited the Mackenzie District Council process for Plan Change 24 as a good example of council and rūnaka communicating well with landowners about the introduction of SASM. Information was made available to the landowner without it being publicly available in order to help protect sites and areas from amateur archaeologists. He acknowledged that council resources may be constrained but more refined information and better communication with landowners would be beneficial. He expressed concern about impacts on existing use rights. He described the West Coast as a region that still had large swathes of land farmed intergenerationally so landowners understand about the need to protect land for the next generation. Mr Sutherland expressed concerns about the accuracy of the mapping.

150. **Ms Kristy Rusher**, legal counsel for GDC, presented to the Panel in support of the GDC position that the SASM Chapter not be adopted without further consultation. Ms Rusher acknowledged Poutini Ngāi Tahu as kaitiaki and the role of the SASM Chapter in assisting with the exercise of kaitiakitanga responsibility. She identified GDC as an affected landowner and a consent authority, and the evidence of Mr McEnaney as representing both GDC roles. Ms Rusher indicated GDC support for the structure of the Plan and the enabling of land use that does not impact on a SASM but expressed concern regarding the spatial extent of mapped SASM and provisions that set expectations of access to SASM sites on private land.

151. Ms Rusher emphasised that further consultation would resolve concerns regarding the spatial extent of SASM, and so the focus was on removal of the SASM overlay until further review and assessment has been undertaken to ensure accuracy. She stated that GDC sought a future plan change to introduce SASM. She compared this with the process for introduction of Significant Natural Areas (**SNA**) in the Grey District and indicated that landowners affected by SASM had been excluded from the process that was used to develop other chapters of the Plan. Ms Rusher pointed to obligations for consultation under the Local Government Act 2002 (LGA) in support of her position that consultation on the SASM Chapter had been inadequate prior to notification, regardless of the fact that the Schedule 1 process under the RMA had been followed. She highlighted GDC had the power to undertake further consultation.

152. Ms Rusher submitted that regulations should be expressed clearly and that restrictions on rights should be limited to the greatest degree possible to achieve a statutory purpose. She stated that outcomes under the regulatory framework should have a high degree of predictability or certainty. She considered that the imposition of a spatial area overlay on private property, which required resource consent when permitted activity conditions were not met, interfered with a landowner's peaceful enjoyment of their property to the fullest extent. She stated that the Plan should be in a form that is accurate, clear, certain and predictable, and that where there are uncertainties as to the location or spatial extent of a SASM or the significance to iwi is unknown or not communicated then it is not possible for a private landowner to use their land in a "respectful and considerate" manner. Ms Rusher proposed that the spatial extent of SASM should be the minimum area necessary to provide protection. Ms Rusher contended that no site visits had been undertaken on private land to confirm SASM and that there was evidence of errors and anomalies in the documentation. She pointed to reliance on oral history as a reason for further consultation. She submitted that it was justifiable to impose upon the free use of land to give effect to section 6(e) of the RMA, section 7(a) and (aa), and section 8. She also indicated that GDC consider it appropriate that resource consent is only required when there is an impact on the cultural significance of a SASM but expressed concern about the potential for "third party approval" in order to be a permitted activity.

153. Ms Rusher cited case law that confirmed that decision-makers must provide for connections of hapū with their ancestral lands of a *"cultural, spiritual and historical nature as well as other more tangible connections*"[37] and that the spiritual element of kaitiakitanga has been recognised in decisions of the Court of Appeal and the Supreme Court, such that the existence and significance of a belief that underpins identification of a SASM was a finding of fact for the decision-maker. She submitted, however, that the belief must be supported by consistent and credible evidence, particularly in relation to wāhi tapu. She pointed towards the late discovery of spatial mapping errors as pertinent to the reliability of evidence provided to the Panel in support of the spatial area of SASM. She highlighted SASM 218 Aromahana/Cobden Island as an example where GDC were not aware of the reason for identifying cultural

[37] Raikes v Hastings District Council [2023] NZCA 264 at para 16

significance. She supported the introduction of Methods SASM-M1 and SASM-M2 but considered that they did not cure the issues raised regarding the spatial extent of mapped SASM.

154. **Mr Michael McEnaney**, Environmental Planning Team Leader for GDC, advised the Panel that he presented his evidence on behalf of GDC as a regulatory authority and as a landowner affected by the Plan. He acknowledged the identification and protection of SASM was a matter of national importance and the influence of higher order documents such as the RPS and the Mana Whakahono ā Rohe agreement between WCRC and Poutini Ngāi Tahu. Mr McEnaney emphasised GDC's concerns with the consultation process, that the wording of policies, objectives and rules goes beyond what was required under the RMA in a way that affects private property rights and that information relied on to spatially identify SASM was not accurate or complete. He highlighted that GDC supported submitters, through further submissions, who advocated for private property rights and existing use rights.

155. Mr McEnaney included a timeline for the development of the SASM Chapter and described it as relatively compressed, and that documentary resources used by Poutini Ngāi Tahu were inaccurate or incomplete, alongside technical issues with the mapping. As a consequence, he said that some landowners had very late notice of the inclusion of their land within a SASM. He compared the process with the SNA process undertaken by GDC, which he said did not only rely on a desktop exercise, and considered site visits should be undertaken. He indicated that GDC wanted to be able to carry out its own verification exercise as concerns remain regarding the accuracy of spatial areas. Mr McEnaney considered that the same approach should be taken to all SASM as had been taken by Ms Easton to the introduction of the Cobden Island SASM. He considered that the spatial extent of SASM had tended towards over-estimation of sites and areas. He expressed concern that corrections to SASM would require a costly plan change process. He alluded to anger and mistrust from landowners who had been surprised by a SASM overlay on their property. Mr McEnaney supported the introduction of Method SASM-M1.

156. Mr McEnaney elaborated on the impact on GDC as a landowner, much of which he described as leased and undeveloped greenfield land. He noted GDC were concerned about the impact of broad overlays and their potential to impose significant constraints and costs.

Reporting Officer Reply Evidence

157. Ms Easton provided her Right of Reply on 25 October 2024 in response to questions from the Panel.

158. Ms Easton provided examples of SASM chapter approaches in other district plans that had been developed since the National Planning Standards 2019 ('the Planning Standards'), including Porirua, New Plymouth, Timaru, Selwyn, Waimakariri, Central Hawkes Bay and Northland. She noted New Plymouth had identified roughly seven times as many SASM and Northland roughly twice as many as the pTTPP. In contrast Porirua, Timaru and Waimakariri identified around 10-15% of the number in the pTTPP, and Central Hawkes Bay around a third of those identified on the West Coast. She noted a high degree of variability in approach to permitted activities and non-complying activities was evident, with Timaru, Selwyn and Waimakariri having variable rule responses depending on the type of SASM.

159. Ms Easton identified 534 privately owned titles that are subject to SASM rules.

160. Ms Easton identified the need for a consequential amendment arising from required use of the Planning Standards definition of "*landfill*", which relied on a further definition of "*cleanfill areas*" and "*cleanfill material*". Accordingly, she recommended the following additions to the Interpretation section of the Plan:

> **Landfill** means an area used for, or previously used for, the disposal of solid waste. It excludes cleanfill areas.
>
> **Cleanfill areas** means an area used exclusively for the disposal of cleanfill material.
>
> **Cleanfill material** means virgin excavated natural materials including clay, gravel, sand, soil and rock that are free of:
>
> a) combustible, putrescible, degradable or leachable components;
> b) hazardous substances and materials;
> c) products and materials derived from hazardous waste treatment, stabilisation or disposal practices;
> d) medical and veterinary wastes, asbestos, and radioactive substances;
> e) contaminated soil and other contaminated materials; and
> f) liquid wastes.

161. Ms Easton did not believe there was scope to change the definition of "*cultural landscape*" from that in the notified Plan, when considering potential for use of the RPS definition. She relied on the evidence of Ms Pull for Poutini Ngāi Tahu and noted that Mr Madgwick clarified that cultural landscapes have now all been identified in SASM. She considered the RPS definition to be superseded by the development of SASM, of which cultural landscapes were a part.

162. Ms Easton identified the submission point of Herenga ā Nuku Aotearoa Outdoor Access Commission (S274.006) as the only submission providing scope to address the matter of maintaining public access.

163. In considering the status of minerals, Ms Easton identified that the Crown Minerals Act 1991 does not regulate pounamu that has been vested with Ngāi Tahu or minerals that are within land subject to "Victorian title". She noted that restrictions do not apply under that Act in relation to minerals used for "*any reasonable agricultural, pastoral, domestic, roadmaking, or building purpose on land of which the person is an owner or occupier; or for any sand, shingle, or other natural material in the bed of a river or a lake or in the coastal marine area unless otherwise specified in a minerals programme*". Ms Easton considered that "*cultural materials*" other than aotea were likely to be covered by these exclusions, such as the gathering of hangi stones or pigments and dyes. She noted that Te Rūnanga o Makaawhio hold a mining permit under the Crown Minerals Act for the area where aotea stone is located, and that restrictions in the pTTPP on collection of aotea were not in conflict with the mining permit.

164. Ms Easton did not support use of the term "*network utility infrastructure*" as a replacement for "*network utility structure*" on a widespread basis as she considered that infrastructure could include below ground infrastructure and that activities not currently regulated would fall under the provisions if that were done.

165. Ms Easton responded to the Panel regarding guidance in the pounamu management plans of Ngāi Tahu. She summarised that the plans set out key principles for sustainable management of pounamu in each takiwā. Objectives in the plans include upholding pounamu as a taonga of each Rūnanga and providing for kaitiakitanga in relation to control, use, protection, extraction and management of pounamu within their takiwā for the best possible advocacy,

protection, service and performance to their respective hapū. The plans direct sustainable management of pounamu according to tikanga, including in relation to fossicking, customary collection and commercial extraction. Her overall analysis was that there was nothing in the plans that specifically needed to be pulled into the pTTPP.

166. Ms Easton agreed with the evidence of Ms Pull that the matter of ownership of pounamu was not as material to provisions as the cultural value of the stone, which is what the Plan is trying to manage. For that reason, she saw no need to use the term "*Victorian title*".

167. Ms Easton confirmed that the term "*ahikāroa*" was in the Glossary but noted it was shown as "*ahi kā roa*".

168. Ms Easton assessed various uses in the plan of "*structures*" versus "*buildings and structures*" and found no consistency. She indicated that "*structures*" tended to be referenced in relation to infrastructure, and that "*building and structures*" was common in the District-wide chapters of the Plan. She considered it appropriate for consistency to change "*structures*" to "*buildings and structures*" in the District-wide chapters where there were still some differences. However, she cautioned about referring to "*buildings and structures*" when rules refer only to "*buildings*" because this would be a substantial change to the meaning of the provision. She also did not support reference to "*minor structures*" being changed to "*minor buildings and structures*" where this occurs. She noted that "*buildings*" were included within the definition of "*structures*". She concluded that there was no further consequence of this analysis to the SASM Chapter because of the changes that she recommended to refer to "network utility infrastructure".

169. Ms Easton responded to the issue raised by Ms Pull in planner caucusing regarding the multiple terms used for infrastructure in the Plan. She recorded that the planners as a whole identified a multiplicity of terms, including "*critical infrastructure*", "*infrastructure*" (RMA definition), "*network utility operator*" (RMA definition), "*lifeline utilities*", "*network utilities*", "*network infrastructure*", "*network utility structures*", "*public network utilities*", "*reticulated network utility systems*" and "*temporary network utilities*", as well as terms supported in s42A Reports such as "*regionally significant infrastructure*" and "*network utility infrastructure*". Ms Easton recommended looking holistically across the Plan to resolve the appropriate terminology in each instance. Recommendations on the Energy and Infrastructure Chapters include recommendations on infrastructure definitions, referencing this evidence and evidence received in other hearings.

Hearing Panel's Evaluation

170. The Panel accept, based on the advice of legal counsel for the TTPP Committee and Poutini Ngāi Tahu, that the statutory basis for recommendations on the SASM Chapter includes recognition of Ngāi Tahu rangatiratanga; and that there is a direct relationship between this recognition of rangatiratanga and Ngāi Tahu tribal structure that establishes Papatipu Rūnanga, Te Rūnanga o Ngāti Waewae and Te Rūnanga o Makaawhio, as having local authority. This position was recognised by Te Tumu Pāeroa in their joint statement with Poutini Ngāi Tahu dated 14 August 2024. The Panel do not find it an available pathway to determine any other party as having rangatiratanga status, based on the submissions and evidence received, which is considered by the Panel to be a matter better established by the Crown through Treaty Settlement processes. This finding is relevant to submissions and evidence from Māwhera Inc.

171. As discussed at the hearing with Mr Retara/Russell, presenting on behalf of Māwhera Inc., the Panel recommendations must be made within the bounds of relevant statutory instruments. The RMA references iwi and hapū, iwi authorities, Māori land owners, Māori generally, and tikanga in various sections of the Act. Mr Retara/Russell confirmed that shareholders of Māhwera Inc. are variously members that whakapapa to Kāti Waewae and Kāti Mahaaki, members that whakapapa to other Ngāi Tahu hapū represented by Papatipu Rūnanga, members that whakapapa to other iwi, and also include non-Maori members as a consequence of the history of whānau connected with original Māori reserve lands (e.g. intermarriage and succession).

172. The Panel finds that exploration of tikanga during the hearing is particularly relevant to recommendations on the SASM Chapter and the impact of provisions on owners of Māori land, including Māori reserve lands that were never sold to the Crown. The Panel accepts that the status of this land is different to other land held in freehold title. This is recognised in higher order instruments that refer to "*specified Māori land*" and that then allow for exceptions in the national direction on the basis of those differences. Such differences are also acknowledged in the joint statement of Te Tumu Pāeroa and Poutini Ngāi Tahu dated 14 August 2024. The Panel finds that in the specific case of Māwhera Inc., there is a distinct relationship between Te Rūnanga o Ngāi Tahu and Māwhera Inc., as illustrated in the Pounamu Vesting Act 1996 and in the Crown negotiation that Mr Retara/Russell described during Te Kēreme, the Ngāi Tahu Waitangi Tribunal claim process. The Panel do not consider it appropriate to make a determination as to the precise nature of tikanga involved between the parties but do determine that tikanga is a relevant factor when recommending provisions in the SASM Chapter. This finding is true in relation to Māwhera Inc. and to other owners of Māori freehold land. The Panel's understanding of this matter is applied in the context of discussions and recommendations on specific provisions, as relevant.

173. The Panel consider that there is a need to recognise the potential existence of "*Victorian title*" in some circumstances, which is included in the Overview to this chapter. However, consideration of Poutini Ngāi Tahu values is not dependent on ownership, in the event that such title can be proven. The Panel do not consider it necessary to include a definition of "*Victorian title*" in the Plan because in circumstances where it may apply, title owners will be familiar with its meaning.

174. The Panel find that, contrary to the primary briefs of evidence of Ms Easton and Poutini Ngāi Tahu, the mapped extent of SASM cannot be described as "*accurate and complete*" following the Schedule 1, Clause 16 amendments, as has been shown during the further exchanges of evidence at the hearing. However, we disagree with GDC and other submitters that cite further refinement of mapped areas as evidence that the SASM Chapter should be abandoned in its entirety. We consider such refinement and adjustment to be appropriate and typical of evidential exchange in a plan hearing process. The Panel acknowledge the advantage to users of the Plan of having clarity around which rules in the chapter, if any, apply in the context of a particular SASM, and the relationship of this level of detail with the values of each site and how they may be affected by various activities.

175. The Panel note that GDC has signalled intent to undertake further consultation with landowners affected by SASM within their district, which is a pathway open to them as part of their local government responsibilities. We consider that recommendations on the SASM Chapter provisions pertaining to particular SASM is not dependent on this process having occurred and does not interfere with the potential for that process to occur subsequent to decisions on the Plan. The Panel have recommended amendments to individual SASM based on the submissions and evidence received, and recommended removal of two SASM that will

need to be introduced to the Plan by way of a future plan change. Any additional SASM not recommended for adoption into the Plan will also need to be subject to a plan change process. In the event that further consultation is undertaken by GDC with affected landowners and any refinement is identified that has the support of Poutini Ngāi Tahu, this may also be dealt with by way of a plan change process.

176. In making this finding, the Panel accept that Poutini Ngāi Tahu are best placed to identify applicable cultural relationships, including the variety of relationships described across SASM. The Panel also find that Poutini Ngāi Tahu have been responsive to concerns raised by individual submitters, and to contrary evidence where that has impacted on cultural assessments undertaken, have recommended amendments depending on the specifics of each case. The Panel therefore have confidence that further refinement may be enabled if and when additional evidence comes to light on particular SASM.

177. The Panel accept the cultural expertise of Mr Madgwick, as outlined in the introduction to his evidence in chief, and those amongst Poutini Ngāi Tahu that supported the development of SASM, despite additional roles undertaken by Mr Madgwick. The Panel recognise that Mr Madgwick "wears a number of hats", which is not unusual for iwi and hapū representatives, including in this case a role on the TTPP Committee. The Panel consider it a matter for the TTPP Committee to reconcile any conflicts of interest between the role of Mr Madgwick as a cultural expert, on behalf of Poutini Ngāi Tahu as a submitter, and his role in decision-making on the TTPP Committee at the time of their decisions on our recommendations on the Plan.

178. The Panel also find that there are significant deficiencies in existing district plans when it comes to section 6(f) and section 6(e), including identification and protection of sites and areas of significance to Māori. We rely on directions in the National Planning Standards in support of introduction of the chapter and the clear need to improve upon the extent to which existing district plans give effect to higher order instruments. We therefore reject all submissions opposing the chapter as a whole. The Panel agree with Ms Easton that freehold land is affected by a range of provisions and overlays in the Plan, in full accordance with direction in higher order instruments, such that SASM Chapter provisions are no different. We note that existing use rights are unaffected, in accordance with the Act. The Panel therefore also reject all submissions seeking deletion of the chapter based on actual or perceived imposition on freehold land.

Definitions

179. The Panel recommend amendment to the notified definition of "*cultural landscapes*" based on evidence received that individual SASM have addressed cultural landscapes on a case-by-case basis. We acknowledge the evidence of Mr Madgwick that cultural landscapes will only be identified through SASM and will not otherwise apply in other chapters of the Plan. Submissions on this point are consequently accepted in part where they sought better understanding of the term "*cultural landscapes*" as applied in the Plan. We agree with Ms Easton's recommended amendment to the definition of "*cultural landscapes*" that introduces an advice note to the definition, linking SASM to landscapes where they occur within an ONL. The Panel consider that an addition to the definition is needed to reflect that cultural landscapes are identified within SASM.

180. The Panel have considered the definition proposed for "*cultural materials*", noting that Te Tumu Paeroa did not withdraw their submission point on this definition. The Panel prefer, rather than incorporating the word "*minerals*" in the description of "*cultural materials*" (as proposed by Ms Pull) to specifically include mention of hangi stones, pigments and dyes, aotea

and pounamu as referenced in evidence at the hearing. In reaching that conclusion the Panel is mindful of the different roles of the Crown Minerals Act 1991 and the RMA. The definition of "*cultural materials*" is therefore related to matters around ongoing access to those materials to protect cultural heritage and maintain cultural practices, and adverse effects on those materials, from a variety of activities managed under the jurisdiction of the Plan.

181. The Panel prefers the definition of "*hazardous facilities*" recommended by Ms Easton in her Right of Reply over the evidence of Ms Pull and submitters seeking reference to "*major hazard facilities*" because Ms Easton's recommendation is succinct, relies on the definition of "*hazardous substances*" in the Act without including the text in full, and is consistent with RPS definition referenced by Ms Pull. We agree with Ms Easton that the nature of effects on cultural values from such activities is not dependent on an assessment as to scale (e.g. "*major*" versus "*minor*" facilities). The Panel disagrees with Ms Easton regarding the need for the definition of "*hazardous facilities*" to only apply within the SASM Chapter and consider that where it is relevant to other chapters of the Plan it should similarly apply (e.g. references in relation to port activities). The Panel therefore variously accepts or rejects submission points based on this determination.

182. The Panel prefers Ms Easton's proposed definitions for "*landfill*", "*cleanfill*" and "*cleanfill materials*" in her Right of Reply over the definition recommended by Ms Pull, for the reason that Ms Easton has utilised the definitions in the Planning Standards, which must be given effect to in our recommendations.

183. The Panel consider use of the terms "*plantation forestry*" and "*woodlot*" in the context of the NES-CF. As with recommendations on the Rural Zones Chapter, the Panel rely on differentiation between "*commercial forestry*" and "*plantation forestry*", and "*woodlots*", when making recommendations on specific provisions, as discussed below in the context of each provision.

184. The Panel agree that no definition of the term "*shelterbelts*" is needed in relation to the SASM Chapter, based on recommended provisions.

185. The Panel agree with Ms Pull that rationalisation is required in relation to the definitions of "*waste disposal facilities*", "*wastewater treatment plants*" and "*wastewater disposal facilities*", and that our recommendation must give effect to the Planning Standards. The Panel note that "wastewater" in the Planning Standards includes sewerage, greywater, industrial and trade waste and that therefore the definition of "*wastewater treatment plants*" is inconsistent with those standards, referring to "*human wastewater*". The Panel consider that there is no need for the definition of "*wastewater disposal facilities*" on the basis that the only material difference between that definition and the notified definition of "*wastewater treatment plants*" is that it references disposal as well as treatment, and that one refers to "*facilities*" and the other "*plants*". There is no definition in the Planning Standards, the RPS or the WCLWP to assist. The Panel consider that the Plan should have a single definition across all chapters of the Plan and recommends a preferred definition. The Panel also consider that "*waste disposal facilities*" that are not "*wastewater disposal facilities*" are covered by the definition of "*landfill"* as recommended. The Panel also consider that the definition should align with reference in the definition of "*regionally significant infrastructure*".

186. The Panel recommend use of the term "*regionally significant infrastructure*" within SASM Chapter provisions as relevant given this is consistent with our recommendations on other parts of the Plan.

187. The Panel agree with the recommendation of Ms Easton in relation to providing a definition of "*upper slopes*" as requested by BDC (S538.003 and S538.184). However, we consider that the definition proposed in Ms Easton's Right of Reply should be utilised across the Plan, as relevant, and not just in the SASM Chapter.

Methods

188. The Panel acknowledge the support of submitters at the hearing for proposed **SASM-M1**. The final version of this method as recommended in Ms Easton's Right of Reply did not alter from her original s42A Report. The value of materials proposed to be developed through implementation of the method for the public and landowners affected by SASM is recognised by the Panel. Although there were no submissions that specifically sought such a method, we are satisfied that this mechanism falls within the wide scope of submissions, being somewhere between the Plan as notified and requests to delete SASM based on a lack of knowledge of their values or implications. The Panel consider SASM-M1 to be an appropriate response to those concerns raised by submitters and therefore accept those submissions in part. No refinement to the wording of the method was proposed in evidence of any party, however, we consider that amendment is required to improve readability and include reference to permitted activity processes that were thoroughly canvassed in the hearing.

189. The Panel did not receive evidence seeking to amend proposed **SASM-M2** following the s42A Report, and therefore the proposed provision remained unchanged at the time of Ms Easton's recommendations in her Right of Reply. The Panel do not consider it necessary to include proposed method SASM-M2 in the Plan because it essentially describes a variation or plan change process. The Panel acknowledge that these processes will be needed to amend individual SASMs or include new SASMs in the Plan, with standard procedures for those processes applying at the time. The proposed method, therefore, does not add anything useful, and any public communication around the process for amending SASMs or incorporating new SASMs can be managed outside of the Plan.

190. The Panel received very little evidence on proposed Method **SASM-M3** recommended by Ms Easton in her s42A Report in response to submissions and evidence on Rule SASM-R7, which remained unchanged in her Right of Reply and was not addressed in the JWS, despite that statement being directly concerned with the certification process for permitted activities. We consider that in light of the JWS recommendations, Method SASM-M3 is not required and SASM-M1, as recommended for amendment by the Panel, is sufficient.

191. The Panel agrees with submitters that sought clarification as to the meaning of "*access*" in the SASM Chapter provisions in terms of maintaining or enhancing Ngāi Tahu access to sites and areas. We agree with Ms Perkins for Herenga ā Nuku Aotearoa, that existing use rights are unaffected by the provisions and that there is a role for Herenga ā Nuku in relationship with Poutini Ngāi Tahu to ensure that, where needed, access arrangements are reconsidered on a case-by-case basis where SASM have been identified. We also support the outcome of the JWS that introduced a proposed Method **SASM-M4** to address the concerns of a number of submitters, including GDC, around the matter of access, and in recognition by the planners that Policy SASM-P4 was better suited as a method than a policy. However, the Panel prefer use of the language "*encourage*" in association with formal and informal mechanisms, rather than "*promote*". We accept the recommendation of the JWS without considering any need for further amendment to the proposed method, aside from numbering the method as SASM-M2 because of the recommendation of the Panel in relation to proposed methods SASM-M2 and SASM-M3.

Hearing Panel's Recommendation

192. The Panel recommend the SASM Chapter and Schedule Three are retained in the Plan, with amendments as discussed through this report in relation to specific provisions or SASM.

193. The Panel recommend that the term "*shelterbelts*" is not defined in the Plan.

194. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends accepting or accepting in part the submission points footnoted below, and recommend the following changes to the to the **Interpretation and Glossary sections** of the Plan and the addition of the following **new methods after the SASM rules**:

Cleanfill area means an area used exclusively for the disposal of cleanfill material.[38]

Cleanfill material means virgin excavated materials including clay, gravel, sand, soil and rock that are free of:

a) combustible, putrescible, degradable or leachable components;

b) hazardous substances and materials;

c) products and materials derived from hazardous waste treatment, stabilisation or disposal practices;

d) medical and veterinary wastes, asbestos, and radioactive substances;

e) contaminated soil and other contaminated materials; and

f) **liquid wastes.**[39]

Cultural landscape means broader geographical areas that hold significant value to Poutini Ngāi Tahu due to the concentration of wāhi tapu or taonga values, or the importance of the area to cultural traditions, history or identity~~.~~**, as identified as part of sSites and Areas of Significance to Māori.**

Advice Note: where Sites and Areas of Significance to Māori have been identified within outstanding natural landscapes the values associated with those sites and areas have been included within the descriptions in Schedule Five: Outstanding Natural Features and Landscapes – Te Rārangi Tuarima: Ngā Whenua Aotūroa Puru Rourou.[40]

Cultural materials means hangi stones, pigments and dyes, aotea and pounamu, plants, plant materials and materials derived from animals, marine mammals or birds which are important to Poutini Ngāi Tahu in maintaining their culture[41]

[38] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.027
[39] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.027
[40] WMS Group (HQ) Limited and WMS Land Co. Limited, S599.008

Hazardous facilities means activities that involve the manufacturing and disposal of hazardous substances.[42]

Landfill means an area used for, or previously used for, the disposal of solid waste. It excludes cleanfill areas.[43]

Upper slopes means the area within a 50 metre radius (measured on the horizontal plane) from the summit of the mountain or hill.[44]

Wastewater treatment facilities means municipal or community scale facilities for the treatment and disposal of wastewater, excluding domestic septic tank/on site and dairy shed effluent treatment and disposal facilities.[45]

~~**Ahikaroa**~~ **ahi kā roa** continuous occupation

SASM – M1:[46]

Councils to develop and provide, in partnership with Poutini Ngāi Tahu, the following:

a. written protocols to guide engagement with Poutini Ngāi Tahu for permitted activities (including the certification process), resource consents or plan change applications; and

b. guidance for the public on how to apply for a resource consent for an activity on a site containing an identified Site and Area of Significance to Māori;

c. information available for landowners of identified Sites and Areas of Significance to Māori and their values, including the nature and form of that information.

SASM – M2:[47]

The Councils in partnership with Poutini Ngāi Tahu will encourage the provision or development of access for Poutini Ngāi Tahu to identified Sites and Areas of Significance to Māori listed in Schedule Three through a range of methods, including:

a. Formal arrangements, such as co-management, joint management or relationship agreements, easements and land covenants, or access agreements; and/or

2.2. SASM Overview

Submissions and Further Submissions

195. Eight submissions points relating to the Overview section of the SASM Chapter were summarised in a Table on pages 27-28 of the s42A Report, from three submitters (Poutini Ngāi Tahu (S620), Māwhera Inc (S621) and Forest & Bird (S560)). All submission points sought amendments to the wording in the Overview.

196. The Panel adopts these summaries and has considered the relevant submissions.

Section 42A Report

197. The s42A Report supported the submission point of Māwhera Inc. that sought clarification that all pounamu within the catchment of the Arahura River is vested with them (S621.019). Ms Easton supported the Poutini Ngāi Tahu submission in part (S620.113) because she recognised the complexity of pounamu ownership, which was simplified in the notified version of the Plan. Ms Easton noted there were three types of pounamu ownership, with Te Rūnanga o Ngāi Tahu, Māwhera Inc. and with landowners that can prove "*Victorian title*". She supported amending the wording of the Overview to reflect this situation, as follows:

> Pounamu and Aotea are taonga of Poutini Ngāi Tahu. Under the Pounamu Vesting Act, all pounamu owned by the Crown on the West Coast/Tai o Poutini **was vested in** ~~is owned by Poutini~~ Te Rūnanga o Ngāi Tahu. **In the case of the pounamu in the Arahura Catchment, this has in turn been vested in Māwhera Incorporation**. ~~Their presence~~ **Pounamu** is widespread across parts of the West Coast/Tai o Poutini.

198. Ms Easton noted the assertion of Māwhera Inc. that they have mana whenua status within Te Tai o Poutini (S621.017, S621.027, S621.918 and S621.020) and their request for wording changes in the Overview. She referred back to the Introduction and General Provisions s42A Report where she outlined that Poutini Ngāi Tahu, as defined in the Plan (Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae and Te Rūnanga o Makaawhio), are mana whenua as described in law. She agreed that members of Māwhera Inc. and other Māori landowners may whakapapa to Poutini Ngāi Tahu but that as entities they do not have mana whenua status in terms of the RMA definition.

199. Ms Easton considered the request of Māwhera Inc. that the chapter instead refer to "*Sites and Areas of Significance to Poutini Kāi Tahu Iwi*" and did not believe this was possible due to the mandatory directions in the Planning Standards. She agreed, however, that the chapter did not address sites and areas of significance to Māori generally and only identified sites and areas of significance to Poutini Ngāi Tahu, so she supported the submission in part.

200. Ms Easton supported the submission of Forest & Bird (S560.189) that sought the addition of a section similar to other chapters of the Plan that provided for cross-references to other chapters. She provided recommended wording in her Appendix 1 for the '*Other relevant Te Tai o Poutini Plan provisions*' section of the Overview that was missing from the notified Plan.

Hearing and Submitter Evidence/Statements

201. Poutini Ngāi Tahu and Māwhera Inc. both provided evidence at the hearing that is discussed in the SASM General/Whole Chapter section of this Report above, which influenced the recommendations on the Overview section in the s42A Report and Right of Reply.

Reporting Officer Reply Evidence

202. In her Right of Reply, Ms Easton updated her recommendation on the Other Relevant Te Tai o Poutini Plan Provisions section of the Overview to include reference to the Ecosystems and Biodiversity chapter, as follows:

> **Other relevant Te Tai o Poutini Plan provisions**
>
> It is important to note that in addition to this chapter, a number of chapters also contain provisions that may be relevant for sites and areas of significance to Māori, including:
> • Historic Heritage - the Historic Heritage Chapter contains the provisions in relation to the sites and areas identified in Schedule One. It also contains Objectives and Policies that are also relevant to Sites and Areas of Significance to Māori.
> • Notable Trees - the Notable Trees Chapter contains the provisions in relation to the trees identified in Schedule Two. Some trees are listed in this schedule due to their Poutini Ngāi Tahu values.
> • Natural Features and Landscapes – the Natural Features and Landscapes Chapter contains provisions in relation to the landscapes and natural features in Schedules Five and Six. Poutini Ngāi Tahu values are part of what makes these areas significant.
> • Subdivision - the Subdivision Chapter contains provisions which relate to the subdivision of land with sites and areas of significance to Māori- in particular Rules SUB - R10 and SUB - R17;
> • Financial Contributions - the Financial Contributions Chapter provides the framework and provisions that allow for waivers for financial contributions in circumstances where heritage items, including sites and areas of significance to Māori are protected.
> • Activities on the Surface of Water – the Activities on the Surface of Water chapter contains provisions for the surface of waterbodies. In some instances, activities are restricted on some waterbodies due to the potential impacts on Poutini Ngāi Tahu values.
> • Ecosystems and Biodiversity – The Ecosystems and Biodiversity Chapter contains provisions for the management of indigenous vegetation and biodiversity. This includes provisions relating to indigenous vegetation clearance in the coastal environment.
> • Appendix Ten - This appendix contains NZAA listed archaeological sites of Māori origin. The exact spatial location and extent of these sites has not yet been clearly identified but they are included in this appendix for information purposes. Like all archaeological sites, these are protected under the Heritage New Zealand Pouhere Taonga Act 2014.

Hearing Panel's Evaluation

203. The Panel considers that a clear statement is required at the outset of the Overview section, in response to the submission from Māwhera Inc. (S621.021), to indicate that while the title of the chapter references "*Māori*" generally, the chapter only references sites and areas of significance to Poutini Ngāi Tahu. The Panel also considers that recognition of Māori freehold land within SASM is warranted.

204. The Panel agrees with Ms Easton that amendment is needed to the section of the Overview that discusses pounamu in response to the evidence from Māwhera Inc., Te Tumu Paeroa, and also submitters that sought to demonstrate "*Victorian title*". These matters are further discussed in relation to recommendations on the Pounamu Management Area overlay and the Aotea Management Area Overlay. The Panel has amended the wording to clarify the nature of the mining permit referenced in relation to aotea.

205. The Panel note that some mapped Sites and Areas of Significance to Māori in the plan extend in to the coastal marine area. The Panel therefore consider it important to make it clear that the jurisdiction of the Plan is limited to landward of the coastal marine area, above mean high water springs.

206. The Panel agrees with Ms Easton that a new section, similar to other chapters, be added to reference other relevant Te Tai o Poutini provisions; and that it should contain the wording proposed by Ms Easton, with the exception that the Panel also considers it important to reference Appendix Ten in relation to the Historic Heritage Chapter provisions, consistent with Panel recommendations on Appendix Ten which is discussed later in this Report. The Panel also recommends minor changes to the wording proposed by Ms Easton to improve readability.

Hearing Panel's Recommendation

207. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends accepting or accepting in part the submission points footnoted below, and recommend the following changes to the **SASM – Ngā Wāhi Tāpua ki Māori Overview**:

Overview

The Sites and Areas of Significance to Māori -Ngā Wāhi Tāpua ki te Māori Chapter only relates to identified sites and areas of significance to Poutini Ngāi Tahu. A number of sites and areas are Māori land[48].

The West Coast/Te Tai o Poutini Councils acknowledge Poutini Ngāi Tahu as mana whenua. Te Rūnanga o Ngāti Waewae and Te Rūnanga o Makaawhio are the only elected and mandated bodies with authority to represent and administer to all Poutini Ngāi Tahu interests. The West Coast/Te Tai o Poutini Councils also acknowledge Te Rūnanga o Ngāi Tahu as the Iwi Authority with jurisdiction over the West Coast/Te Tai o Poutini. They have legal mandate to represent wider Ngāi Tahu whānui interests, and support the positions of Poutini Ngāi Tahu.

Poutini Ngāi Tahu live and travel extensively across the West Coast/Te Tai o Poutini ~~and,~~ and have historical and ongoing cultural connections with land and waterways throughout the area. There are a wide range of sites and areas of significance to Māori, these include:

- Cultural Landscapes - or areas of association. These are areas with significant associations to cultural traditions, history or identity and include ancestral maunga;
- Wāhi taonga – places that are treasured due to their high intrinsic values and their role in maintaining a balanced and robust ecosystem, sustaining quality of life and providing for the needs of present and future generations.
- Mahinga kai - Mahinga kai is central to the Poutini Ngai Tahu way of life. Mahinga kai includes the gathering of food and natural materials and the places where these resources are gathered. The mahinga kai custom of producing or procuring food resources from a range of resources throughout the region on a seasonal basis is a fundamental practice. Mahinga kai resources include kai/food, rokoa/medicine, other materials such as feathers and fibres;
- Wāhi tapu - sacred sites or areas held in reverence according to whakapapa. They may be associated with tāngata whenua creation stories, particular events or ceremonies, or valued resources, and include sites such as urupā, pā, tuhituhi o neherā, and tauranga waka;

[48] The Proprietors of Māwhera Incorporation S621.021

• Pounamu and Aotea management areas - Pounamu and Aotea are taonga of Poutini Ngāi Tahu. Under the Pounamu Vesting Act, all pounamu on the West Coast/Tai o Poutini ~~is owned by Poutini~~ **formerly owned by the Crown was vested in Te Rūnanga o**-Ngāi Tahu. **In the case of pounamu in the Arahura River catchment, this has in turn been vested in Māwhera Incorporation.**[49] ~~Their presence~~ **Pounamu** is widespread across parts of the West Coast/Tai o Poutini. Aotea is only found in the Makaawhio River, over which Te Rūnanga o Ngāi Tahu hold a statutory acknowledgement and Te Rūnanga o Makaawhio hold a ~~Crown M~~**m**ining ~~P~~**p**ermit **under the Crown Minerals Act 1991.**[50] **There may be circumstances where Victorian title applies to an area of land[51].**

In parallel with the process of identifying significant sites and areas, threats to the values of the sites and areas from a range of land use activities have been considered. Based on this, the approach to management of activities agreed with Poutini Ngāi Tahu is a layered approach with the following characteristics:

1. In some locations a resource consent is needed for a range of activities that could adversely affect cultural values of these areas. Different types of activities affect the different cultural values and some sites need a higher degree of management and oversight by Poutini Ngāi Tahu than others. Different rules relate to different Sites and Areas of Significance to Māori, and these are identified within the Rule, and cross referenced to the description in Schedule Three.
2. Across the region as a whole, policies and matters of discretion provide for consideration of effects on cultural values, particularly when consent is required for key activities with the potential to impact on cultural values, and there are also enabling provisions for customary harvest or other cultural practices of benefit to Poutini Ngāi Tahu.

Sites and Areas of Significance to Māori are listed and described in Schedule Three and mapped on the planning maps. Where mapped areas extend in to the coastal marine area, provisions of this plan only apply landward of the coastal marine area (mean high water springs).

Other relevant Te Tai o Poutini Plan provisions[52]

It is important to note that in addition to this chapter, a number of chapters also contain provisions that may be relevant to Sites and Areas of Significance to Māori, including:

• Historic Heritage – the Historic Heritage Chapter contains the provisions in relation to the sites and areas identified in Schedule One. It also contains objectives and policies that are relevant to Sites and Areas of Significance to Māori and Appendix Ten. Appendix Ten contains New Zealand Archaeological Association listed archaeological sites of Māori origin. The exact spatial location and extent of these sites has not yet been clearly identified but they are included in Appendix Ten for information purposes. Like all archaeological sites, these are protected under the Heritage New Zealand Pouhere Taonga Act 2014[53].
• Notable Trees – the Notable Trees Chapter contains the provisions in relation to the trees identified in Schedule Two. Some trees are listed in Schedule Two due to their Poutini Ngāi Tahu values.

[49] The Proprietors of Māwhera Incorporation S621.019
[50] RMA First Schedule, Clause 16
[51] Ridgeline 3 Investments Limited S127.001
[52] Royal Forest & Bird Protection Society of New Zealand Inc S560.189
[53] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.100

• Natural Features and Landscapes – the Natural Features and Landscapes Chapter contains provisions in relation to the outstanding landscapes and natural features in Schedules Five and Six. Poutini Ngāi Tahu values are part of what makes these areas outstanding.
• Subdivision – the Subdivision Chapter contains provisions which relate to the subdivision of land within Sites and Areas of Significance to Māori, in particular rules SUB-R10 and SUB-R17.
• Financial Contributions – the Financial Contributions Chapter provides the framework and provisions that allow for waivers for financial contributions in circumstances where heritage items, including Sites and Areas of Significance to Māori, are protected.
• Activities on the Surface of Water – the Activities on the Surface of Water Chapter contains provisions for the surface of waterbodies. In some instances, activities are restricted on some waterbodies due to the potential impacts on Poutini Ngāi Tahu values.
• Ecosystems and Indigenous Biodiversity – the Ecosystems and Indigenous Biodiversity Chapter contains provisions for the management of indigenous vegetation and biodiversity. This includes provisions relating to indigenous vegetation clearance in the coastal environment.

2.3. SASM Objectives

Submissions and Further Submissions

208. On the SASM objectives as a whole there were a total of seven submissions points and no further submissions, with six in support and one seeking amendment.

209. In relation to Objective **SASM-O1,** there were four submissions points (one in support, two opposed and one seeking amendment) and three further submissions.

210. In relation to Objective **SASM-O2,** there were eight submissions points (two in support, three supporting in part, one opposed, one opposing in part, and one seeking amendment) and seven further submissions. Te Tumu Paeroa later withdrew their submission point (S440.017).

211. In relation to Objective **SASM-O3,** there were seven submissions points (two in support, one opposed, one opposing in part, and three seeking amendment) and eight further submissions.

212. All the submissions on SASM objectives were summarised in a table on pages 31-34 of the s42A Report. The Panel adopts these summaries and has considered all of the relevant submissions and further submissions.

Section 42A Report

213. The s42A Report supported in part the submission of J P Parson (S335.001) that sought definitions to assist with interpretation of "*broad brush*" statements in the objectives. Ms Easton considered that detail was better suited to policies and rules, whereas objectives often contain broad statements of direction. She also supported the submitter's point that there needed to be appropriate engagement with rūnanga, which she linked to her recommendation for new Method SASM-M1.

214. In relation to Objective **SASM-O1**, Ms Easton did not support the submission of Stephen Page (S270.019) that requested the objective be written in English only. She considered that the two Te Reo Māori terms in the objective, tino rangatiratanga and kaitiakitanga, were well defined and understood in case law, in planning and general usage, and reflected Te Reo Māori as an official language of New Zealand. She also supported continued use of the terms because the concepts were more accurately communicated in Te Reo Māori than in English. Kristy Henderson (S125.005) and Helen Carter (S209.002) were similarly concerned with use

of the terms due to their potential impact on private property. Ms Easton noted identification and regulation of SASM was similar to other chapters of the Plan that regulated land use activities, particularly in relation to the protection of matters of national importance. She also considered that it was for Poutini Ngāi Tahu to determine impacts on cultural values and the terms were used in that context. She therefore did not recommend any changes to the objective in response to submissions.

215. In relation to Objective **SASM-O2**, Ms Easton did not support the submission of Stephen Page (S270.006) that sought recourse to the Māori Land Court in relation to access, maintenance and use of SASM because of direction in higher order instruments. In response to a number of submitters concerned about reference to "*access*"[54], she considered that there was consistency between Objective SASM-O2 and Objective PA-O1 in terms of thinking about access and how it is maintained or enhanced. She did not support excluding private land from the objective as she considered it necessary to provide a pathway for Māori to be able to maintain their relationships, whilst giving appropriate consideration to the rights and responsibilities of landowners. She favoured requiring agreement for access on private land. She did not recommend any changes to the objective in response to submissions.

216. In relation to Objective **SASM-O3**, Ms Easton responded to submitters concerned about how to interpret what is "*appropriate*" or "*inappropriate"* subdivision, use and development with reference to section 6 of the RMA and other objectives in the Plan, such as Objective ECO-O2. She pointed towards the policies and rules as expanding on the activities envisaged within SASM, particularly policies SASM-P10 through to SASM-P15; and therefore, did not support the submissions (Kirsty Henderson (S125.007) and Stephen Page (S270.007)). She also responded to mining companies[55] concerned that the objective may not provide an adequate consenting pathway where minerals coincide with SASM, particularly mineral sands in beach locations. The submitters sought that SASM be protected from effects rather than from activities, but Ms Easton reiterated that the wording proposed came directly from the RMA and section 6(f) in particular. Ms Easton did not recommend any changes to the objectives in response to submissions.

Hearing and Submitter Evidence/Statements

217. Ms Rusher, legal counsel for GDC, emphasised that protection did not mean that activity must not occur, but rather that it must be determined how to provide for the significance of the site without unreasonably restricting other activities. She noted GDC's concern regarding "*access*" referenced in the objectives and policies, which Ms Rusher submitted is not required to give effect to section 6(e), and sought removal of these references.

218. Mr McEnaney, for GDC, also raised concerns with use of the phrases "*access, maintain and use*" in the objectives and policies because it implied that a landowner must provide physical access to a SASM. He disagreed with the s42A Report that providing for a SASM as a matter of national significance required physical access. Mr McEnaney could not find other examples of district plans that provided for physical access in a SASM objective, although he acknowledged this was provided in some district plans at the policy level. His analysis of other district plans indicated a focus at the objective level on identification, protection and

[54] Helen Carter S209.003, Kirsty Henderson S125.006, Grey District Council S608.013, Horticulture New Zealand S486.025, Federated Farmers of New Zealand S524.048, and Te Tumu Paeroa S440.017, although this last submission point was later withdrawn

[55] WMS Group (HQ) Limited and WMS Land Co. Limited S599.036, TiGa Minerals and Metals Limited S493.032, and Birchfield Ross Mining Limited S604.021

recognition of SASM. He requested that all instances of "*access, maintain and use*" be replaced with "*recognise, protect and maintain*".

219. In relation to Objective **SASM-O1**, Mr McEnaney acknowledged recognition of Poutini Ngāi Tahu relationship with ancestral lands, higher order instruments and the importance of Poutini Ngāi Tahu involvement in decision-making where values are threatened. He sought the following changes in his Appendix 1:

> **SASM – O1**
>
> Sites and areas of significance to ~~Poutini Ngāi Tahu~~ Māori are identified, recognised and ~~identified~~ managed ~~and Poutini Ngāi Tahu are actively involved in decision making that affects their values to provide for tino rangatiratanga and kaitiakitanga~~, to ensure their long-term protection for future generations.

220. In relation to Objective **SASM-O2,** Ms Pull, for Poutini Ngāi Tahu, responded to the submission of Te Tumu Paeroa on SASM-O2, which was subsequently withdrawn through discussions between the parties. Ms Pull's recommendation, prior to formal withdrawal by Te Tumu Paeroa, was for the objective to state:

> **SASM - O2**
>
> Poutini Ngāi Tahu are enabled through formal and informal access arrangements with landowners, to maintain and use areas and resources of cultural value within identified sites, areas and cultural landscapes.

Ms Pull considered "*enabled*" to be more respectful of private property rights, in conjunction with a process involving the formation of arrangements, which may be offered as part of a resource consent application, for example. She saw this as providing a clear connection to the landowner arrangements referred to in Policy SASM-P4.

221. Mr James Sutherland, for West Coast Federated Farmers, requested that access be granted with landowners' consent only, due to safety concerns associated with a working farm environment. He stressed the importance of building relationships between the parties, early engagement and transparency, and indicated that farmers are often happy to enable access under the right conditions.

222. Mr McEnaney, for GDC, reiterated opposition to providing for physical access to lands in private ownership. He considered that agreement with landowners was necessary, or that the objective should apply to public land only and link to Objective PA-O1. He indicated some consistency with Poutini Ngāi Tahu evidence. He sought the following changes in his Appendix 1:

> **SASM - O2**
>
> The relationship of Poutini Ngāi Tahu with sites and areas of significance to Māori is recognised and provided for and are involved in decision making that affects their values to provide for tino rangatiratanga and kaitiakitanga ~~are able to access, maintain and use areas and resources of cultural value within identified sites, areas and cultural landscapes~~.

223. In relation to a new Objective **SASM-O3,** Mr McEnaney expressed support for the objective to protect SASM sites from inappropriate subdivision, use and development.

224. In relation to a new Objective **SASM-O4,** Mr McEnaney proposed the following wording in his Appendix 1, although he did not specifically address the new objective in the body of his evidence:

> **SASM O4**
>
> Develop partnership between the Council, landowners and tangata whenua in the management of sites and areas of significance.

Reporting Officer Reply Evidence

225. Ms Easton did not further address the objectives in her Right of Reply.

Hearing Panel's Evaluation

226. The Panel notes that GDC did not submit on objectives SASM-O1 and SASM-O3 specifically. However, Mr McEnaney's proposed changes to SASM-O2 from his Appendix 1 are akin to notified SASM-O1. On this basis, the Panel understand that GDC are comfortable with the wording of SASM-O1. Otherwise, the Panel has only considered the GDC submission on SASM-O2 and has not further assessed Mr McEnaney's proposed SASM-O4, although the Panel note that partnership approaches may be undertaken outside of and apart from the provisions of the Plan.

227. In relation to Objective **SASM-O1**, the Panel agrees with Ms Easton, including her reasoning, that no amendment is required to this objective in response to submissions and evidence.

228. In relation to Objective **SASM-O2**, the Panel prefer some amendment to the wording put forward by Ms Pull to address concerns from submitters about use of the term "*access*" in this objective. Ms Pull built on the wording first proposed by Te Tumu Paeroa, based on the submission point that has since been withdrawn. The Panel observe that Federated Farmers have requested amendment to the objective with regards to landowner agreement around any access to private property (S524.048) but did not provide any recommended wording. However, the Panel consider that amendment to the wording put forward by Ms Pull is appropriate to address Federated Farmers' submission point, in light of the evidence received from Mr Sutherland, and the submission point of Kirsty Henderson (S125.006). The Panel consider that reference to agreement with landowners provides a clear link to notified Policy SASM-P4, which is recommended to become new Method SASM-M2.

229. In relation to Objective **SASM-O3**, the Panel agrees with Ms Easton that no change is required to the objective in response to submissions and evidence, in particular because the objective is consistent with section 6(f) of the RMA.

Hearing Panel's Recommendation

230. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends accepting or accepting in part the submission points footnoted below, and recommend the following changes to the **SASM Objectives**:

SASM – O1	Sites and areas of significance to Poutini Ngāi Tahu are recognised and identified and Poutini Ngāi Tahu are actively involved in decision-making[56] that affects their values to provide for tino rangatiratanga and kaitiakitanga.
SASM – O2	Poutini Ngāi Tahu are able to access, maintain and use areas and resources of cultural value within identified sites, areas and cultural landscapes **with landowner agreement**[57].
SASM – O3	The values of sites and areas of significance to Māori and cultural landscapes are protected from inappropriate subdivision, use and development,[58] including inappropriate modification, demolition or destruction.

2.4. SASM Policies

Submissions and Further Submissions

231. On the SASM policies as a whole, there were a total of two submissions points in support.

232. In relation to Policy **SASM-P1,** there were 11 submissions points (six in support and five seeking amendments) and seven further submissions. The mining companies[59] sought that the wording change to indicate protection from "*significant adverse effects of*" inappropriate sub-division, use and development. GDC (S608.014) sought removal of reference to "*access*", while Westpower Limited (S547.204) sought addition of the word "*inappropriate*".

233. In relation to Policy **SASM-P2** there were nine submissions points (six in support, one supporting in part, one opposed and one seeking amendment) and no further submissions. Westpower Limited (S547.205) sought to remove clause (a), Stephen Page (S270.008) sought a clear process for identification of any further SASM, and Federated Farmers (S524.049) sought an explanation of the values of sites and areas.

234. In relation to Policy **SASM-P3** there were seven submissions points (five in support, one supporting in part, and one seeking amendment) and one further submission. HNZPT (S140.034) sought reference to an archaeological authority being issued by HNZPT, and that there would be no need to follow the Accidental Discovery Protocol when an authority was issued, which was opposed by Poutini Ngāi Tahu. Poutini Ngāi Tahu (S620.114) sought deletion of reference to "*urupā*" and addition of reference to "*taonga*".

235. In relation to Policy **SASM-P4** there were nine submissions points (eight in support and one opposed) and one further submission. Stephen Page (S270.010) sought clarification of the process if informal arrangements were unsuccessful.

236. In relation to Policy **SASM-P5** there were seven submissions points (five in support, one supporting in part[60], and one opposed) and one further submission, although Te Tumu Paeroa later withdrew their submission point (S440.018). Kristy Henderson (S125.008) sought clarification of what tino rangatiratanga and kaitiakitanga meant in relation to private landowners and particular SASM.

[56] RMA Schedule One.Clause 16
[57] Federated Farmers of New Zealand – West Coast S524.048, Kirsty Henderson S125.006
[58] RMA Schedule One.Clause 16
[59] WMS Group (HQ) S599.037, TiGa Minerals and Metals Limited S493.033 and Birchfield Ross Mining Limited S604.022
[60] Te Tumu Paeroa later withdrew this submission point

237. In relation to Policy **SASM-P6** there were 10 submissions points (five in support and five seeking amendment) and four further submissions. Minerals West Coast (S569.020) sought reference to "*or their authorised representatives or contractors*" in the policy, while the mining companies[61] sought to include the word "*intentional*".

238. In relation to Policy **SASM-P7** there were nine submissions points (two in support, one opposed and six seeking amendments) and eight further submissions. Kenneth Doig (S172.002) sought recognition of "*Victorian title*". Stephen Page (S270.011) sought clarity around what was "*inappropriate*" and what the values, interests and associations are. The mining companies[62] and GDC (S608.017) sought to change the word "*minimise*" to "*manage"*, while Westpower (S547.206) sought that "*minimise*" change to "*avoid, remedy or mitigate*".

239. In relation to Policy **SASM-P8** there were 10 submissions points (three in support, one opposing in part, and six seeking amendments) and eight further submissions. HNZPT (S140.038) sought reference to an archaeological authority being issued by HNZPT, and that the Accidental Discovery Protocol need not be followed when an authority is issued, and the Director General (S602.057) sought reference to engagement with HNZPT. GDC (S608.018) sought to change "*avoid*" to "*mitigate*". The mining companies[63] sought reference to "*operational need*", as did Transpower (S299.024). Westpower (S547.208) sought further amendments.

240. In relation to Policy **SASM-P9** there were four submissions points (two in support, one opposing in part, one opposed and one seeking amendment) and two further submissions. Westpower (S547.209) sought that "*minimise*" change to "*avoid, remedy or mitigate*" in sub-clause (a). GDC (S608.019) sought to change "*minimise*" to "*mitigate*".

241. In relation to Policy **SASM-P10** there were three submissions points (two in support and one seeking amendment) and no further submissions. The Director General (S602.058) sought to allow for land disturbance during the installation of fence posts. Herenga ā Nuku Aotearoa Outdoor Access Commission (S274.006) sought cross-referencing to ensure no loss of public access where it currently exists.

242. In relation to Policy **SASM-P11** there were six submissions points (one in support, one opposing in part, two opposed and two seeking amendments) and eight further submissions. The mining companies sought deletion of clause (a)[64] and Rocky Mining Ltd (S474.038) did not want a presumption of adverse effect in the policy. Kenneth Doig (S172.002) wanted recognition of "*Victorian title*". GDC (S608.020) sought deletion of all words after "*sites*" so that the policy stops before the words "*by avoiding*".

243. In relation to Policy **SASM-P12** there were three submissions points (one in support, one opposed and one seeking amendment) and two further submissions. The mining companies[65] sought deletion of the policy or amendment to exclude minerals prospecting, exploration and extraction.

244. In relation to Policy **SASM-P13** there were 14 submissions points (five in support, one supporting in part, two opposing in part, two opposed, and four seeking amendments) and

[61] WMS Group (HQ) S599.038, TiGa Minerals and Metals Limited S493.034, Birchfield Ross Mining Limited S604.023 and Birchfield Coal Mines Limited S601.030
[62] WMS Group S599.039, TiGa Minerals and Metals Limited S493.035, Birchfield Ross Mining Limited S604.024
[63] WMS Group (HQ) Limited and WMS Land Co. Limited S599.040, TiGa Minerals and Metals Limited S493.036, Birchfield Ross Mining Limited S604.025
[64] WMS Group (HQ) Limited and WMS Land Co. Limited S599.041, and TiGa Minerals and Metals Limited S493.037
[65] WMS Group (HQ) Limited and WMS Land Co. Limited S599.042, and TiGa Minerals and Metals Limited S493.038

seven further submissions. Frida Inta and the Buller Conservation Group (S553.056 and S552.056) sought reference to other rules around indigenous vegetation clearance in sub-clause (d). Fish & Game (S302.003) sought additional reference to lawful recreational and conservation activities. Kirsty Henderson (S125.004) sought clarification on what "*critical infrastructure*" meant, and Stephen Page (S270.012) sought clarification on access to private property and what the identified values were. Westpower (S547.210) sought to replace "*protected*" with "*maintained or potential effects managed*" and sought separate reference to "*existing energy activities*". GDC (S608.021) sought to delete all words after "*protected*". Manawa (S438.070) sought reference to "*regionally significant infrastructure*".

245. In relation to Policy **SASM-P14** there were 11 submissions points (six in support, one supporting in part[66], two opposed and two seeking amendments) and five further submissions, although Te Tumu Paeroa later withdrew their submission point. Kirsty Henderson (S125.002) sought deletion of the policy to allow for landowners and business owners to make improvement without undue cost or uncertainty. Helen Carter (S209.004) sought to exclude private land. Stephen Page (S270.013) sought to clarify what measures might arise from the policy and how access might occur. GDC (S608.022) sought to delete clause (d).

246. In relation to Policy **SASM-P15** there were 12 submissions points (seven in support, one supporting in part[67], two opposed and two seeking amendments) and seven further submissions, although Te Tumu Paeroa later withdrew their submission point. The mining companies[68] sought to delete the words "*any other*" from the policy. Kirsty Henderson (S125.003) sought deletion of the policy to allow for landowners and business owners to make improvement without undue cost or uncertainty. Westpower (S547.213) sought substantial amendments to the policy.

247. All the submissions on SASM policies were summarised in a table on pages 37-52 of the s42A Report. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

Section 42A Report

248. In relation to Policy **SASM-P1**, Ms Easton supported the submission of Westpower and recommended introduction of the word "*appropriate*" to the policy, which also partly supported the submissions of the mining companies. However, she did not support reference to "*significant adverse effects*" because this did not reflect section 6 of the Act.

249. In response to GDC's concerns around the term "access", Ms Easton considered that there should be agreement with landowners and therefore supported the submission in part.

250. She recommended that the policy be amended to read as follows:

> **SASM – P1**
>
> Protect Poutini Ngāi Tahu cultural landscapes from adverse effects of inappropriate subdivision, use and development while enabling their values to be enhanced through ongoing Poutini Ngāi Tahu access and cultural use in agreement with affected landowners.

[66] Te Tumu Paeroa subsequently withdrew this submission point.
[67] Te Tumu Paeroa subsequently withdrew this submission point.
[68] WMS Group (HQ) Limited and WMS Land Co. Limited S599.043, and TiGa Minerals and Metals Limited S493.039

251. In relation to Policy **SASM-P2**, Ms Easton supported the submission of Mr Stephen Page (S270.008) and Federated Farmers (S524.049) that sought clarity around the process for identifying any further SASMs and including those in Schedule 3, and in response proposed a new method addressing the point, utilising similar wording as in the Historic Heritage chapter, as follows:

> **SASM – M2**
>
> The TTPP Committee will consider the merits of inclusion of additional sites and areas of significance to Māori in the Plan as part of their regular monitoring of Plan implementation. Where Poutini Ngāi Tahu identify any further sites or areas they seek to be scheduled these will need to be accompanied by an appropriate cultural assessment that outlines the values of the site or area. Evidence of consultation with the owner of the area or site should also be provided. Where such an assessment and evidence of consultation and its outcomes is provided to the TTPP Committee, the Committee will assess whether there is sufficient justification for scheduling, and if so schedule the site or area via a Committee - initiated Plan Change.

252. Ms Easton noted that there were 24 different values identified for SASM in Schedule Three, which reflected the context specific nature of understanding what is present and how it might be affected.

253. In response to Westpower (S547.205) Ms Easton agreed that the policy should be focussed on identification rather than protection so recommended amendment to the policy as follows:

> **SASM – P2**
>
> Work with Poutini Ngāi Tahu to identify and list sites and areas of significance to Poutini Ngāi Tahu in Schedule Three ~~and protect the identified values of the sites and areas~~.

254. In relation to Policy **SASM-P3**, Ms Easton supported the submissions of HNZPT and Poutini Ngāi Tahu in part. She emphasised that SASM were not archaeological sites, although they may contain such sites. She considered that the submissions were best addressed through amendment to the Accidental Discovery Protocol, rather than the policy so she did not recommend any changes to SASM-P3 in response to submissions.

255. In relation to Policy **SASM-P4**, Ms Easton responded to the submission of Stephen Page by clarifying that it would not be the role of council to assist in landowner agreement and that it would be up to the parties to arrange. She also referred to new Method SASM-M1 in response to the submitter's concerns. She noted at the hearing that the language of the policy was supportive of access rather than compulsive.

256. In relation to Policy **SASM-P5**, Ms Easton responded to the concerns of Kristy Henderson by referring to the RMA definition of "*kaitiakitanga*" and she considered that guidance developed through new Method SASM-M1 would assist in addressing the concerns of the submitter.

257. In relation to Policy **SASM-P6**, Ms Easton supported in part the submission of Minerals West Coast, with reference to the further submission of Poutini Ngāi Tahu (SS41.265) but preferred the solution offered by Poutini Ngāi Tahu with the words "*avoid the unauthorised deliberate disturbance"* rather than the words "*or their authorised representatives or contractors*" as sought by Minerals West Coast. She therefore recommended amendment to the policy as follows:

SASM – P6

Within the Pounamu and Aotea Management overlay, enable tino rangatiratanga and kaitiakitanga of the pounamu and aotea resource by Poutini Ngāī Tahu and avoid the unauthorised deliberate disturbance or removal of this resource by non-hapū members.

258. In relation to Policy **SASM-P7**, Ms Easton considered that the submission of Kenneth Doig in relation to "*Victorian title*" was better suited to a different policy. In response to Stephen Page, she referred to RMA section 6(f) and the word "*inappropriate*", which she noted was elaborated on in policies SASM-P10 to SASM-P12. She referred to Schedule Three in relation to values identified by Poutini Ngāi Tahu and considered that guidance developed through new Method SASM-M1 would assist. In terms of potential replacements for the word "*minimise"* Ms Easton dismissed them because she considered "*minimise*" related well to the requirement to "*protect*" under section 6(f). She therefore did not recommend any changes to Policy SASM-P7.

259. In relation to Policy **SASM-P8**, Ms Easton responded to the Director General's submission requesting wording that signalled engagement with HNZPT, which was not supported by HNZPT in further submission, so was not supported in the s42A Report. Ms Easton also referred to amendment to the Accidental Discovery Protocol as the appropriate response to HNZPT requested policy wording changes. Ms Easton supported additional reference to "*operational need*" as requested by the mining companies and Transpower, similar to recommendations in other chapters, but did not support further additions requested by Westpower. She also considered "*where practicable*" was too diluted in terms of the intent of the policy, in relation to Westpower requests, and that "*protect*" was the appropriate term to reflect the RMA, so overall, she only supported Westpower in part in relation to "*operational need*". She did not support the submission of GDC because she considered the use of "*avoid*" allowed for mitigation of any residual effects that could not be avoided in the wording of the policy. She recommended amendment to the policy as follows:

SASM – P8

Where an activity is proposed within any site or area of significance to Māori identified in Schedule Three ensure that:

a. Engagement with Poutini Ngāi Tahu occurs to ensure that effects of the activity on the values of the site or area are understood;

b. The accidental discovery protocol in Appendix Four is adopted for any earthworks;

c. Any adverse effects on identified values are avoided, unless it can be demonstrated that due to the functional needs or operational needs of the activity it is not possible to avoid all adverse effects; and …

260. In relation to Policy **SASM-P9**, Ms Easton supported the submission of Westpower to replace "*minimise*" with *"avoid, remedy or mitigate*" in the context of this policy because it was not protecting the sites themselves so can be less stringent. She also considered that indigenous biodiversity and waterbodies are subject to other provisions in the Plan. She therefore partially supported the submission of GDC, as follows:

SASM – P9

> Require that activities within identified sites and areas of significance to Poutini Ngāi Tahu that support taonga species and mahinga kai resources as identified in Schedule Three:
>
> a. ~~Minimise~~ Avoid, remedy or mitigate adverse effects on indigenous habitats and waterbodies;
> …

261. In relation to Policy **SASM-P10**, Ms Easton supported the submission of the Director General to include land disturbance for the installation of fence posts because there was potential to adversely affect the upper slopes and peaks of ancestral maunga. Ms Easton did not support the submission of Herenga ā Nuku Aotearoa Outdoor Access Commission because she did not consider that public access to culturally sensitive sites should continue if such access was inappropriate. She therefore considered that public access needed to be considered on a case-by-case basis. Ms Easton recommended the following wording changes to the policy:

> **SASM – P10**
>
> Restrict buildings, structures, forestry, network utility structures, installation of fence posts, mining and earthworks on the upper slopes and peaks of ancestral maunga as identified in Schedule Three.

262. In relation to Policy **SASM-P11**, Ms Easton did not support the submissions of the mining companies to have mining and quarrying removed as inappropriate activities because Poutini Ngāi Tahu had indicated that earthworks and land disturbance posed the greatest risks to cultural values within SASM. Ms Easton supported the submission of Kenneth Doig who referenced *"Victorian title*" but did not think that SASM-P11 was the right place to address the matter, which she considered would be best suited to a standalone policy in relation to the Pounamu Management Area and the Aotea Management Area. Ms Easton considered, in response to a further submission for the Fuel Companies (FS64.001), that "*or in close proximity to these areas*" was appropriate in the policy because it linked to SASM-R17. She partially supported the submission of GDC that sought to remove reference to "*avoid*" in the policy because mineral extraction was not an activity regulated by Rule SASM-R17; although she considered "*avoid"* was suitable in relation to the activities listed that are of considerable offence to tikanga. Ms Easton recommended the following amendments to the policy wording[69]:

> **SASM – P11**
>
> Recognise the significance to Poutini Ngāi Tahu of the sites and areas of significance to Māori listed in Schedule Three and protect the identified values of these sites and areas by avoiding the following activities in, or in close proximity to, these areas;
>
> ~~a. Mining and quarrying other than Poutini Ngāi Tahu collection of Pounamu and Aotea;~~ a~~b~~. Landfills and waste disposal facilities, hazardous facilities and offensive industries;
> b~~c~~. Intensive indoor primary production;
> c~~d~~. Cemeteries and crematoria; and
> d~~e~~. Wastewater treatment plants and disposal facilities

263. In relation to Policy **SASM-P12**, Ms Easton did not support the submission of the mining companies with reference to RMA section 6(f), stating that demolition or destruction was not protection, and did not recognise and provide for the relationship of Poutini Ngāi Tahu with

[69] Note that the s42A Report incorrectly labelled the policy "Policy 12", which was amended in Ms Easton's right of reply, but for the purposes of this report it is recorded as she intended

sites and areas (RMA section 6(e)). She therefore did not recommend any amendment to SASM-P12.

264. In relation to Policy **SASM-P13**, Ms Easton responded to the submissions of Frida Inta and the Buller Conservation Group by stating that the Plan was clear that the ECO Chapter provisions would apply and therefore nothing further was needed in the SASM policy. In response to Fish & Game, she considered that public access for a lawful conservation or recreational activity should be on a case-by-case basis to ensure appropriate respect for urupā and former battle sites. Ms Easton partially supported the submission of Kristy Henderson and the need for clear definitions in relation to infrastructure. In response to Stephen Page, Ms Easton clarified that a SASM did not create ownership rights and only regulated specific activities through the rules, which she considered were not particularly onerous. She explained that any activity not specifically regulated is a permitted activity. She also considered that new Method SASM-M1 would address some of the concerns of the submitter.

265. Ms Easton did not support the submission of Westpower that some level of effect must be envisaged by the list of appropriate activities therefore the word "*protect*" was too strong, because she considered that protection was still required under the RMA and as in other chapters, she did not support specific reference to "*energy activities*". She did not support GDC's request to delete the list of activities because she considered the list necessary so that the policy signals support for a range of permitted activities. She supported Manawa's request to incorporate reference to "*regionally significant infrastructure*". Her recommended amendments to SASM-P13 were as follows:

> **SASM – P13**
>
> Enable activities in sites and areas of significance to Poutini Ngāi Tahu included in Schedule Three where the cultural and spiritual values of the site or area are protected. This includes:
>
> a. Alterations to, demolitions and removal of existing buildings and structures;
> b. Maintenance, operation, repair and upgrading of existing network utility structures and ~~critical~~ regionally significant infrastructure;

266. In relation to Policy **SASM-P14**, Ms Easton responded to the submissions of Stephen Page and Kristy Henderson by stating that subdivision is not a permitted activity or automatic right on any land, regardless of the location. She considered that new Method SASM-M1 would assist landowners. Ms Easton also indicated, in response to Helen Carter and GDC, that the policy did not allow access as of right but provided for the possibility at the time of subdivision, which may be by way of an esplanade reserve for instance and that would allow for potential access to mahinga kai. She did not recommend any changes to the policy in response to submissions.

267. In relation to Policy **SASM-P15**, Ms Easton did not support the submission of Kristy Henderson because she considered the policy to be enabling of a range of permitted activities; and noted that restrictions were likely to be greater in other chapters of the Plan. She did not support the mining companies' submissions seeking removal of the words "*any other*" because she considered that the policy already achieved what the submitters were seeking to achieve in relation to functional and operational need. Ms Easton did not support the Westpower amendments, and particularly considered consistency with the Historic Heritage Chapter, finding similarities in wording between Policy SASM-P15 and Policy HH-P10. She found less restrictions on infrastructure in the SASM Chapter compared with the Historic Heritage Chapter. She responded to the submission of Te Tumu Paeroa (later withdrawn) that requested agreement with landowners where Poutini Ngāi Tahu access was to be maintained

or enhanced, and recommended amendment to the policy to reflect her support of that submission, as follows:

> **SASM – P15**
>
> Allow any other use and development on sites and areas of significance to Māori in Schedule Three where it can be demonstrated that the identified values of the site or area are protected and maintained, having regard to: ….
>
> f. Any practical mechanisms to maintain or enhance the ability of Poutini Ngāi Tahu to access and use the site or area of significance for karakia, monitoring, cultural activities and ahi kā roa <u>are made in agreement with affected landowners.</u>

268. In relation to a new policy, Ms Easton proposed **SASM-P16** to address submissions raised regarding the ownership of pounamu and aotea stone, as follows:

> **SASM – P16**
>
> Recognise that pounamu and aotea are significant cultural resources and where these are owned by Poutini Ngāi Tahu within the pounamu and aotea management overlays support Poutini Ngāi Tahu management of them.

<u>Hearing and Submitter Evidence</u>

269. In relation to the policies as a whole, Ms Pull **(**for Poutini Ngāi Tahu) responded to the submission of Te Tumu Paeroa on policies SASM-P5, SASM-P14 and SASM-P15, which were subsequently withdrawn through discussions between the parties. Prior to the withdrawal by Te Tumu Paeroa Ms Pull had recommended no change to SASM-P5, SASM-P14 or SASM-P15 in response to the submission. Ms Pull considered that reference to landowner arrangements would be unnecessary in any policy other than notified SASM-P4 because that policy would need to be considered in consenting processes alongside the others in the chapter.

270. Ms Pull indicated support for the use of an Accidental Discovery Protocol, as defined in the hearing on the Historic Heritage Chapter and linking this to SASM-P3, SASM-P8 and SASM-R2. She considered it would be valuable to agree on wording with HNZPT for the Protocol included in Appendix Four, which is further discussed in this Report in relation to the content of Appendix Four.

271. Ms Pull did not support a blanket enablement of Regionally Significant Infrastructure (**RSI**) in the SASM Chapter given that these sites and areas involve irreplaceable taonga and historic heritage, which needs be considered on a case-by-case basis. She referenced use of the term "*enable*" (SASM-P13) and "*allow*" (SASM-P15), and that in relation to activities with a "*functional or operational need*" to be located within a SASM, Policy SASM-P8 did not require avoidance, which was a lower level of protection than other historic heritage. She related the higher level of enablement to the detailed work that had been done on each SASM to determine what may be appropriate.

272. In relation to Policy **SASM-P1**, Mr McEnaney (for GDC) expressed support for the s42A Report amendments that require access to be by way of landowner agreement, but maintained that reference to physical access be removed. He proposed the following changes in his Appendix 1:

SASM-P1

Protect Poutini Ngāi Tahu cultural landscapes from adverse effects of inappropiate subdivision, use and development while enabling their values to be enhanced through ongoing Poutini Ngāi Tahu management ~~access and cultural use~~.

273. Ms Pull expressed concern about use of the phrase "*in agreement with affected landowners*" because of the word "*affected*", which she considered introduced an unnecessary degree of uncertainty about who was "*affected*".

274. In relation to Policy **SASM-P2**, Ms Pull supported the introduction of proposed SASM-M2 to support the policy, as proposed in the s42A Report, on the basis that it was similar to wording of a method in the Historic Heritage Chapter.

275. Mr Sutherland, for Federated Farmers, supported identifying and listing SASM, and the need to engage with relevant iwi and rūnanga. He indicated the importance of farmers better understanding what needs protecting and working together to achieve protection, acknowledging that rules and maps can be daunting to landowners.

276. Mr McEnaney highlighted GDC's concern that SASM-P2 (as notified) interferes with private property rights, based on the idea that "*identifying and listing*" should be a consultative approach and that the policy should reflect that. He considered that new Method SASM-M1 would assist but that the policy should be directed at ensuring the connection between iwi and SASM was identified, recognised and managed. He proposed the following changes in his Appendix 1:

SASM – P2

~~Work with Poutini Ngāi Tahu to identify and list sites and areas of significance to Poutini Ngāi Tahu in Schedule Three and protect the identified values of the sites and areas.~~ Support land owners to manage, maintain and preserve sites and areas of significance to Māori by:

a. increasing awareness, understanding and appreciation within the community of the presence and importance of sites and areas of significance to Māori;

b. encouraging land owners to engage with mana whenua to develop positive working relationships in regard to the on-going management and/or protection of sites and areas of significance to Māori.

c. providing assistance to land owners to preserve, maintain and enhance sites and areas of significance to Māori; and

d. through engagement, consultation and collaboration with mana whenua, promoting the use of mātauranga Māori, tikanga and kaitiakitanga to manage, maintain, preserve and protect sites and areas of significance to Māori;

e. for identified SASM, or for silent SASM, seeking to establish an extent through engagement, consultation and collaboration with tangata whenua.

277. In relation to Policy **SASM-P3**, Ms Pull supported retaining the Accidental Discovery Protocol, and continue to opposed the position of HNZPT that sought for an archaeological authority to negate the need to follow the protocol.

278. In relation to Policy **SASM-P4**, Mr Sutherland supported the drafting on the basis that access was in collaboration with landowners.

279. Mr McEnaney requested that the policy remove reference to "*access, use and maintain*" and supported recommended Method SASM-M1. He supported the requirement for landowner agreement, but considered landowners must retain the right to restrict access and that formal access must be by way of landowner, council and mana whenua partnership.

280. In relation to Policy **SASM-P6**, Ms Pull noted that the submission points of mining companies had not been identified in the s42A Report analysis and that Poutini Ngāi Tahu had supported these submissions[70]. Ms Pull supported the proposed addition to the policy as outlined in the s42A Report clarifying that it is only "*unauthorised, deliberate disturbance or removal"* that was of concern in relation to non-hapū members. She identified that this better clarified existing practice that is working well. However, she recommended an "*and*" between "*unauthorised"* and "*deliberate"* for purposes of readability, such that the policy would read:

> **SASM – P6**
>
> Within the Pounamu and Aotea Management overlay, enable tino rangatiratanga and kaitiakitanga of the pounamu and aotea resource by Poutini Ngāi Tahu and avoid <u>the unauthorised and deliberate</u> disturbance or removal of this resource by non-hapū members.

281. In relation to Policy **SASM-P7**, Mr Kennedy, on behalf of Westpower, sought to replace the term "*minimise*" with "*avoid, remedy or mitigate*".

282. In relation to Policy **SASM-P8**, Mr Kennedy sought for adverse effects to be "*avoided where practicable*" in clause (c), combined with reference to "*technical, locational, functional or operational constraints or requirements*" rather than just "*functional needs*" of the activity. Mr McEnaney, for GDC indicated support for the proposed amendments to this policy.

283. In relation to Policy **SASM-P9**, Ms Pull did not support replacing the term "*minimise*" with *"avoid, remedy or mitigate*", which she believed to be a lower level of protection for indigenous habitats and waterbodies that are recognised in the NTCSA as being of high importance to Poutini Ngāi Tahu. She alluded to mahinga kai as the "9th Tall Tree" of the Ngāi Tahu Claim, essential to identified values in the Tangata Whenua chapter of the Plan. She noted that all three SASM objectives link to mahinga kai through recognition of values (SASM-O1), undertaking mahinga kai (SASM-O2) and the protection of mahinga kai locations (SASM-O3). She recommended "*avoid or minimise*", which would allow for some flexibility around what was practicable, as follows:

> **SASM – P9**
>
> Require that activities within identified sites and areas of significance to Poutini Ngāi Tahu that support taonga species and mahinga kai resources as identified in Schedule Three:
>
> a. Avoid~~,~~ <u>or minimise</u> ~~remedy or mitigate~~ adverse effects on indigenous habitats and waterbodies;
> …

284. Mr McEnaney indicated support for the proposed amendments to this policy

285. In relation to Policy **SASM-P10**, Ms Pull supported use of the term "*Regionally Significant Infrastructure"*.

286. In relation to Policy **SASM-P11**, Ms Pull discussed opposition to submissions from mining companies and recommended retention of reference to "*mineral extraction*" in the policy due

[70] Further Submission on S493.034, S599.038, S604.023, and S601.030

to the potential for such activities to cause offence to tikanga, similar to other activities referenced in the policy. Within her evidence she recommended no change to the policy as notified. She discussed with the Panel the implications of "*avoid*" in the policy and considered that this usually led to non-complying activity status; whereas, the Poutini Ngāi Tahu submission requested that SASM-R15 be amended to discretionary status. She agreed that "*only allow*" would be more appropriate for a discretionary activity.

287. In relation to Policy **SASM-P12**, Ms Pull discussed opposition to submissions from mining companies and recommended retention of the policy as notified, which utilises the term *"avoid*" in relation to the "*demolition or destruction*" of sites and areas in Schedule Three. Her analysis indicated that Poutini Ngāi Tahu anticipated the potential for use of sites and areas for mineral extraction in some circumstances. Mr McEnaney indicated support for the proposed amendments to this policy but sought that the error in s42A Report version of the policy was corrected so that it was not a repeat of SASM-P11.

288. In relation to Policy **SASM-P13**, Ms Pull supported use of the term "*Regionally Significant Infrastructure*", as did Mr Kennedy, provided that the definition captures Westpower infrastructure. Mr Sutherland supported the drafting and s42A Report recommendations on the basis that the policy provided sufficient cover for appropriate activities to occur within SASM. Mr McEnaney indicated support for the proposed amendments to this policy

289. In relation to Policy **SASM-P14**, Mr McEnaney indicated that his recommended changes to SASM-P1 and SASM-P4 would satisfy GDC concerns with clause (d) of the policy.

290. In relation to Policy **SASM-P15**, Ms Pull for Poutini Ngāi Tahu opposed the inclusion of "*affected landowner*" in clause (f) because the phrase may refer to landowners other than those where the activity was taking place and would require an impact assessment of whether the landowner at that site of activity could be "*affected*". She considered that the amendment added nothing to the policy and that relying on SASM-P4 would be more appropriate, including because of the range of options envisaged in SASM-P4. She therefore recommended no change to the policy as notified. In exchange with the Panel at the hearing, Ms Pull gave the example of using the policy to assess an infrastructure application, which may be considered in terms of the timing of works to avoid impacts on mahinga kai.

291. Mr Kennedy sought to replace "*protected and maintained*" with "*avoided, remedied or mitigated*", add in a new clause (a) that read "*avoidance in the first instance, and where this is not practicable the proposed measures to manage potential effects on the identified values*" and expand on the reference to "*functional and operational need*" in clause (b), as per SASM-P8 and requested in other chapters of the Plan.

292. In relation to proposed new policy **SASM-P16** (as recommended in the s42A Report), Ms Pull considered the policy to be inappropriately worded. She referred in her evidence of pounamu as a taonga and how its value was not dependent upon ownership, and the need for the SASM Chapter provisions to focus on the potential for cultural effects. Ms Pull recommended that the policy should appropriately read:

> **SASM – P16** Recognise that pounamu and aotea are significant cultural resources.

Reporting Officer Reply Evidence

293. In her Right of Reply, responding to questions from the Panel, Ms Easton explained her rationale for policies SASM-P6 and SASM-P12 leading to non-complying activity status, while policies SASM-P8 and SASM-P15 led to discretionary activity status. She considered use of the

term "*avoid"* on its own is linked to non-complying activity status, whereas qualified use of the term "*avoid*" that allows for exceptions is linked to discretionary activity status.

294. Ms Easton did not consider there was scope within submissions to amend Policy **SASM-P1** to refer to "*no more than minor*" effects in relation to public access. She identified one submission seeking that reference to "*access*" be removed, which she did not support.

295. In relation to Policy **SASM-P8**, Ms Easton did not change her view on addition of reference to "*operational needs"* from that contained in her s42A Report. She also did not support use of the phrase "*no more than minor*" within this policy, or generally as a phrase used in other policies of the Plan. She considered it to be more of a matter for resource consent and application of section 104D for non-complying activities, and in relation to notification decisions. After looking across other recent plans, implementing the Planning Standards, she found one instance of the phrase being used in an assessment criterion.

296. In relation to Policy **SASM-P13**, Ms Easton considered that the phrase "*network utility infrastructure*" was suitable in the context, to replace "network utility structures" because the policy applies to maintenance, repair and upgrade of existing infrastructure within SASM that were located primarily in areas of substantial built development. Her final recommendation for the policy was as follows:

> **SASM – P13**
>
> Enable activities in sites and areas of significance to Poutini Ngāi Tahu included in Schedule Three where the cultural and spiritual values of the site or area are protected. This includes:
>
> a. Alterations to, demolitions and removal of existing buildings and structures;
> b. Maintenance, operation, repair and upgrading of existing network utility ~~structures~~ infrastructure and ~~critical~~ **regionally significant** infrastructure;
> c. Customary harvest and other cultural practices in accordance with tikanga;
> d. Indigenous vegetation clearance;
> e. Temporary events;
> f. Small-scale earthworks for burials within an urupā, fencing, archaeological survey and
> g. maintenance of overhead network utilities, roads and tracks;
> h. Animal grazing where identified values are maintained.

297. In relation to Policy **SASM-P15**, Ms Easton advised that as a result of Te Tumu Paeroa withdrawing their submission point on this policy there was no longer scope for her recommended amendment to the policy. Accordingly, she removed the previously recommended phrase "*are made in agreement with affected landowners*" from clause (f).

Hearing Panel's Evaluation

298. In relation to Policy **SASM-P1**, the Panel prefer the wording put forward by Ms Easton in her s42A Report, and therefore also accept the Westpower submission point seeking to incorporate reference to "*inappropriate"*, due to the amended policy overall being in accordance with section 6(f) of the RMA. Although Ms Easton expressed some concern about scope to include the words "*in agreement with affected landowners*", the Panel consider this to be a suitable response to the concerns expressed by GDC in their submission seeking to remove the word "*access*" from the policy (S608.014), and their evidence presented at the hearing. We consider this phrase is also consistent with recommended amendments to SASM-O2, and ensures policy support for new Method SASM-M2, which was supported by all the planners in the JWS (although referenced as SASM-M4 in that document). However, the Panel

agree with Ms Pull that the word "*affected*" is not needed and could potentially cause confusion.

299. In relation to Policy **SASM-P2**, the Panel note that GDC submitted in support of the policy and so no further consideration has been given to Mr McEnaney's proposed amendments; although we consider the recommended methods will achieve some of what he sought to cover, and also address concerns raised by Federated Farmers in their submission and evidence. The Panel agree with Ms Easton's reasoning in her s42A Report and therefore also accept the Westpower submission point.

300. In relation to Policy **SASM-P3**, the Panel note that Appendix 1 to Ms Easton's Right of Reply did not include the Poutini Ngāi Tahu submission point on this policy, which sought to replace "*or urupā*" and replace it with "*and/or taonga*" (S620.114). The Panel accept this submission point. The Panel do not support the submission of HNZPT that would negate the need to follow the Accidental Discovery Protocol when an Archaeological Authority has been issued (S140.034), on the basis that the matter is relevant to both HNZPT and Poutini Ngāi Tahu.

301. In relation to notified Policy **SASM-P4**, the Panel recommend deletion of the policy and replacement with new Method SASM-M2, in line with the recommendation of the planners in the JWS. We note that this substantial amendment is dependent upon a submission point, from Stephen Page (S270.010), who sought clarification about what would happen if agreement was not reached between a landowner and Poutini Ngāi Tahu representatives. Other submission points support the policy, and therefore the Panel partially accepts these submissions. The Panel is satisfied that, overall, there is scope between these submissions to make the recommended changes given the method responds to the nature of Mr Page's submission and provides guidance on how the process signalled in recommendations on policy SASM-P1 will work in practice. Essentially, the Panel understand that the result of no agreement would be no access to private property, and therefore access will be dependent upon building and strengthening relationships between the parties, in line with evidence received from Federated Farmers and GDC on this issue.

302. In relation to notified Policy **SASM-P5**, the Panel agree with Ms Easton that new method SASM-M1 will assist to address the submission point of Kirsty Henderson (S125.008) and that no changes are required to the policy, aside from re-numbering. In reaching this conclusion, we have considered the submissions and evidence of Māwhera Inc. and Mr Weepu regarding rangatiratanga, as discussed in relation to the whole chapter. The Panel understand this policy applies, regardless of land ownership status, and relies on the role of tikanga in relationship between these submitters to resolve matters, alongside application of the Plan provisions.

303. In relation to notified Policy **SASM-P6**, the Panel accept the wording proposed by Ms Pull that clarifies application of the policy, which we consider to be alternative relief to that sought by the mining companies. We also recommend additional minor amendments to improve wording. The Panel has been mindful when assessing this policy that not all pounamu is owned by Poutini Ngāi Tahu, as outlined in the evidence of Māwhera Inc., and as previously discussed in relation to the Pounamu Vesting Act 1996. Similar to our analysis of SASM-P5, the Panel understand this policy to apply regardless of the status of pounamu ownership, and recognise that the role of tikanga in relationship between ngā rūnanga and Māwhera Inc. will be a matter for the parties, alongside application of the Plan provisions. To be clear, the Panel consider that the Plan provisions do not over-ride tikanga, as it applies in the circumstances, and it is not for the Panel or local authorities to determine appropriate application of tikanga. We expect that, in practice, Māwhera's relationship with pounamu in the Arahura River catchment will necessitate a very different interpretation of "*unauthorised and deliberate*

disturbance or removal" by non-hapū members, than a party that has no direct connection with the resource. Te Rūnanga o Ngāi Tahu vesting the resource with Māwhera Inc. may well be interpreted as a form of authorisation.

304. In relation to notified Policy **SASM-P7**, the Panel generally agree with Ms Easton. We have reviewed the outcome of the JWS, in which the majority of the planners supported use of the term "*minimise*" in clause (b) of the policy and Mr Kennedy for Westpower maintained a preference for "*avoid, remedy or mitigate*".

305. The Panel consider that the policy is implementing a blend of section 6(f) and section 6(e) of the RMA, due to clause (a) requiring that inappropriate activities do not disturb, destroy, remove and/or visually encroach upon sites and areas; while clause (b) requires activities to otherwise minimise their adverse effects on values that are present. We are satisfied that in the context of the policy "*minimise*" is an available option, and is recommended to be retained. The Panel considers that a resource user may employ a range of techniques to minimise adverse effects, including a combination of avoidance, remedy and mitigation, whilst clause (a) ensures protection from inappropriate subdivision, use and development. The Panel therefore recommends no change to the policy, aside from re-numbering.

306. In relation to notified Policy **SASM-P8**, the Panel generally agree with the assessments of Ms Easton and therefore accept the submission of Transpower (S299.024) to incorporate reference to "*operational need*". The Panel do not support the submission of HNZPT that would negate the need to follow the Accidental Discovery Protocol when an Archaeological Authority has been issued (S140.038), on the basis that the matter is relevant to both HNZPT and Poutini Ngāi Tahu.

307. In relation to notified Policy **SASM-P9**, the Panel note that Ms Easton is recorded in the JWS as agreeing with use of the term "*minimise*" in clause (a) of this policy, along with the majority of planners, however this differs from her prior recommendation and differs from Appendix 1 in her Right of Reply. We have considered the JWS, which records Mr Kennedy was the only planner advocating for use of "*avoid, remedy or mitigate*" (although Ms Easton had previously supported this). In the context of SASM, the Panel is satisfied that "*minimise*" is appropriate, particularly when considering how the NPS-IB addresses specified Māori land (although not all SASM would qualify) and in light of the fact that the ECO Chapter provisions will also be relevant when looking at Plan provisions as a whole. The Panel noted that there is reference to "*access*" in sub-clause (c) of the policy and therefore it needs to be amended to be consistent with Objective SASM-O2, amendment to Policy SASM-P1 and new Method SASM-M2. The Panel therefore recommends addition of "*with landowner agreement*" to the end of sub-clause (c) of the policy, and re-numbering.

308. In relation to notified Policy **SASM-P10**, the Panel agree with the assessment of Ms Easton and therefore accept in part the submission point of the Director General. The Panel note that, while Ms Pull has recommended replacing the term "*network utility structures*" with "*regionally significant infrastructure*", Poutini Ngāi Tahu do not have a submission point on this policy and the Panel have not identified scope to make the change requested.

309. In relation to notified Policy **SASM-P11**, the Panel disagree with Ms Easton that clause (a) be deleted, as requested by the mining companies. Although the policy links to SASM-R17, as Ms Easton identified that it can equally be considered to link to SASM-R15, and the Panel is guided by the evidence of Ms Pull in relation to the management of these sites and areas from the perspective of Poutini Ngāi Tahu. The Panel makes consequential amendments to the policy

from recommendations regarding definitions, so that only "*landfills*" and "*wastewater treatment facilities*" are referenced, rather than other variations of these particular activities.

310. The Panel agrees with Ms Pull that there is a difference between the activities in the policy that lead to non-complying status and the mineral extraction and quarrying activities that lead to a discretionary status, because of Poutini Ngāi Tahu requested amendments to SASM-R15. The Panel considers it necessary to amend the policy so that "*avoid*" leads to a non-complying rule and "*only allow*" leads to a discretionary rule, with the caveat that such activity would only be allowed within a SASM if it was supported by Poutini Ngāi Tahu to occur in that location. This is the only basis upon which the Panel can discern the difference between the activities covered by the policy, on the basis of evidence received from Poutini Ngāi Tahu.

311. In relation to notified Policy **SASM-P12**, the Panel agree with Ms Easton that no amendment is required to this policy, as per the reasoning in her s42A Report and the reasoning of Ms Pull. We note that there is some overlap with SASM-P7(a), which means that the policies reinforce one another in relation to protection of sites and areas in accordance with section 6(f) of the RMA.

312. In relation to notified Policy **SASM-P13**, the Panel agree with Ms Easton that it is appropriate to amend the policy to reference "*regionally significant infrastructure*" for the reasons she outlined, as also supported by Ms Pull for Poutini Ngāi Tahu; and that submitter concerns can be addressed through the methods recommended.

313. In relation to notified Policy **SASM-P14**, the Panel agree with Ms Easton that no amendment is required to the policy for the reasons given, and acknowledge the change in position of GDC.

314. In relation to notified Policy **SASM-P15**, the Panel consider that no amendment is required to the policy, as per Ms Easton's Right of Reply, other than minor amendments, for the reasons outlined in her s42A Report.

315. In relation to Policy **SASM-P16**, the Panel do not consider this additional policy as proposed by Ms Easton to be necessary in light of notified SASM-P6, which already provides for exercise of tino rangatiratanga and kaitiakitanga. We consider that the exercise of these duties and responsibilities will differ in practice depending on whether or not Poutini Ngāi Tahu own the resource. The Panel consider that the policy as reworded by Ms Pull has some merit, in order to support other policies, such as POU-P6 and notified SASM-P6, however the Panel does not find scope to introduce the policy and consider that it will be sufficient to rely on the Poutini Ngāi Values section of the Tangata Whenua Chapter and its passage under the heading of Taonga to support the understanding of plan users that pounamu and aotea are significant cultural resources. The Panel consider that reference to the Pounamu Management Area and Aotea Management Area overlays in the SASM Chapter reinforces this point.

Hearing Panel's Recommendation

316. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends accepting or accepting in part the submission points footnoted below, and recommend the following changes to the **SASM Policies**:

Cultural Landscapes

SASM - P1

Protect Poutini Ngāi Tahu cultural landscapes from adverse effects of **inappropriate**[71] subdivision, use and development**,** while enabling their values to be enhanced through ongoing Poutini Ngāi Tahu access and cultural use**, in agreement with landowners.**[72]

Identification and access to significant sites and areas

SASM – P2

Work with Poutini Ngāi Tahu to identify and list sites and areas of significance to Poutini Ngāi Tahu in Schedule Three ~~and protect the identified values of the sites and areas.~~[73]

SASM – P3

Upon accidental discovery of kōiwi (skeletal remains) or ~~urupā~~ **taonga**[74] ensure that the Accidental Discovery Protocol in Appendix Four is followed.

~~**SASM - P4**~~

~~Promote the provision or development of access for Poutini Ngāi Tahu to the identified sites and areas of significance to Poutini Ngāi Tahu listed in Schedule Three, including through:~~

~~a. Formal arrangements, such as co-management, joint management or relationship agreements, easements; and/or~~

~~b. Informal arrangements or understandings between landowners and local Poutini Ngāi Tahu hapū and/or marae.~~[75]

Poutini Ngāi Tahu Roles

SASM - P~~5~~4[76]

Recognise and provide for the exercise of tino rangatiratanga and kaitiakitanga by Poutini Ngāi Tahu in decisions made in relation to identified sites and areas of significance in Schedule Three.

SASM - P~~6~~5[77]

Within the Pounamu **Management Area** and Aotea **Management Area** ~~O~~**o**verlay**s**,[78] enable tino rangatiratanga and kaitiakitanga of the pounamu and aotea resource by Poutini Ngāi Tahu and avoid the **unauthorised and deliberate**[79] disturbance or removal of this resource by non-hapū members.

Management of Activities on Identified Significant Sites and Areas

SASM – P~~7~~6[80]

Protect and maintain sites and areas of significance to Māori from adverse effects by:

a. Ensuring identified sites and areas of significance to Māori are not disturbed, destroyed, removed and/or visually encroached upon by inappropriate activities; and

b. Requiring activities on sites and areas of significance to Māori to minimise adverse effects on cultural, spiritual and/or heritage values, interests or associations of importance to Poutini Ngāi Tahu.

SASM – P~~8~~7[81]

Where an activity is proposed within any site or area of significance to Māori identified in Schedule Three**,** ensure that:

a. Engagement with Poutini Ngāi Tahu occurs to ensure that effects of the activity on the values of the sites or area are understood;

b. The ~~a~~**A**ccidental ~~d~~**D**iscovery ~~p~~**P**rotocol[82] in Appendix Four is adopted for any earthworks;

c. Any adverse effects on identified values are avoided, unless it can be demonstrated that to the functional need~~s~~ **or operational need**[83] of the activity it is not possible to avoid all adverse effects; and

d. Any residual effects that cannot be practicably avoided are mitigated in a way that protects, maintains or enhances the values of the site or area.

SASM – P~~9~~8[84]

Require that activities within sites and areas of significance to Poutini Ngāi Tahu ~~that~~ support taonga species and mahinga kai resources as identified in Schedule Three**, by**:

a. Minimis~~e~~**ing** adverse effects on indigenous habitats and waterbodies;

b. Enabl~~e~~**ing** the maintenance and enhancement of these areas; and

c. Maintain**ing** and where appropriate improv~~e~~**ing**[85] access for Poutini Ngāi Tahu to these areas**, with landowner agreement**[86].

Inappropriate Activities

SASM – P~~10~~9[87]

[87] RMA First Schedule, Clause 16, consequential amendment

Restrict buildings, structures, forestry, network utility structures**, installation of fence posts,**[88] mining and earthworks on the upper slopes and peaks of ancestral maunga as identified in Schedule Three.

SASM – P~~11~~10[89]

Recognise the significance to Poutini Ngāi Tahu of the sites and areas of significance to Māori listed in Schedule Three and protect the identified values of these sites and areas by:

1. avoiding the following activities in, or in close proximity to, these areas:

~~a. Mining and quarrying other than Poutini Ngāi tahu collection of P**p**ounamu and A**a**otea;~~

~~b~~**a**. Landfills ~~and waste disposal facilities~~, hazardous facilities and offensive industries;

~~c~~**b**. Intensive indoor primary production;

~~d~~**c**. Cemetaries and crematoria; and

~~e~~**d**. Wastewater treatment ~~plants and disposal~~[90] facilities; and

2. only allowing mineral extraction and quarrying other than by Poutini Ngāi Tahu where this is supported by Poutini Ngāi Tahu.[91]

SASM – P~~12~~11[92]

Avoid the demolition or destruction of sites and areas of significance to Māori identified in Schedule Three.

Appropriate Activities

SASM – P~~13~~12[93]

Enable activities in sites and areas of significance to Poutini Ngāi Tahu included in Schedule Three where the cultural and spiritual values of the site or area are protected. This includes:

a. Alterations to, demolitions and removal of existing buildings and structures;

b. Maintenance, operation, repair and upgrading of existing network utility structures and ~~critical~~ **regionally significant** infrastructure; [94]

c. Customary harvest and other cultural practices in accordance with tikanga;

d. Indigenous vegetation clearance;

g. Animal grazing where identified values are maintained.

SASM – P~~14~~13[96]

Allow subdivision of sites or areas of significance to Māori listed in Schedule Three where it can be demonstrated that:

a. The values identified in Schedule Three are maintained and protected;

b. Sufficient land is provided around the site or area listed in Schedule Three to protect identified values;

c. The remainder of the site is of a size which continues to provide it with a suitable setting to the values identified in Schedule Three; and

d. Measures are taken to maintain or enhance the ability of Poutini Ngāi Tahu to access and use the site or area of significance for mahinga kai, karakia, monitoring, cultural activities and ahi kā roa.

SASM – P~~15~~14[97]

Allow any other use and development on the sites and areas of significance to Māori in Schedule Three where it can be demonstrated that the identified values of the site or area are protected and maintained, having regard to:

a. Whether there are alternative methods, locations or designs that would avoid or reduce the impact on the values associated with the site or area of significance;

b. The functional **need**[98] or operational need for the activity to be undertaken in the location;

c. Outcomes articulated by Poutini Ngāi Tahu through an assessment of environmental effects, cultural impact assessment or iwi planning documents;

d. The potential to enhance the values of the site **or area**[99] of significance and the relationship of Poutini Ngāi Tahu with their taonga, commensurate with the scale and nature of the proposal;

e. How the values of significance to Poutini Ngāi Tahu, including tikanga, kaitiakitanga and mātauranga Māori may be incorporated; and

f. Any practical mechanisms to maintain or enhance the ability of Poutini Ngāi Tahu to access and use the site or area of significance for karakia, monitoring, cultural activities and ahi kā roa.

2.5. SASM Rules

Submissions and Further Submissions

317. In relation to the SASM rules as a whole, there were 58 submission points (five in support, three supporting in part, four neutral or not stated, 15 opposed and 31 seeking amendments) and nine further submissions.

318. In relation to SASM permitted activity rules as a whole, there were seven submission points (one in support, one opposed and five seeking amendments) and five further submissions. Poutini Ngāi Tahu sought that tables should be created for each rule to be embedded in the rule in order to make it easier for plan users (S620.115) and sought removal of the first reference to "*Sites and Areas in Schedule Three*" in the rule headings (S620.395). Westpower sought a stand-alone permitted activity rule for "*energy activities*" and an appropriate activity status when consent was required (S547.215, S547.216). Stephen Page queried how the written approval process would work, and the costs involved (S270.015).

319. In relation to **SASM-R1** (grazing of animals), there were nine submissions (seven in support, one opposed and one seeking amendment) and one further submission. GDC sought deletion of the rule (S608.023). Poutini Ngāi Tahu sought reference to Table SASM-R1 as a replacement for the listed SASM in the rule (S620.116).

320. In relation to **SASM-R2** (minor earthworks), there were 17 submissions (two in support, four supporting in part, ten opposing in part, and two seeking amendments) and 11 further submissions. A number of submitters[100] sought deletion of clauses (iii)(a) and (iii)(b), while GDC sought deletion of the rule as a whole (S608.024), as well as inclusion of an agreed Accidental Discovery Protocol and a timeframe for response (S608.626), while BDC wanted assurance that Poutini Ngāi Tahu could meet written approval requests in a timely manner (S538.179). Federated Farmers (S524.053) sought a list in the rule similar to SASM-R4, and Kirsty Henderson sought to be able to fence without consent (S125.009). Westpower sought to be able to maintain underground lines and cables and existing substations, through specific wording amendments (S547.217) and Manawa sought to be able to maintain and repair existing RSI (S438.071). Poutini Ngāi Tahu sought reference to Table SASM-R2 as a replacement for the listed SASM in the rule (S620.117) and that SASM 17 no longer be included in the rule (S620.320).

321. In relation to **SASM-R3** (demolition, removal or alteration of a structure), there were 18 submissions (three in support, one supporting in part, one opposing in part, two opposed and 11 seeking amendments) and 11 further submissions. A number of submitters[101] sought removal of SASM 14 from the rule, while Kirsty Henderson sought to be able to disturb land (S125.010). Westpower sought reference to "*building or structure*", a stand-alone rule for "*energy activities*" and deletion of clauses (ii) and (iii) (S547.222, S547.223 and S547.224). Poutini Ngāi Tahu sought amendment to include Table SASM-R3 (S620.118).

[100] Leonie Avery S507.022, Jared Avery S508.022, Kyle Avery S509.022, Avery Bros S510.022, Bradshaw Farms S511.022, Paul Avery S512.022, Brett Avery S513.022, and Avery Brothers S609.021

[101] Leonie Avery S507.023, Jared Avery S508.023, Kyle Avery S509.023, Avery Bros S510.023, Bradshaw Farms S511.023, Paul Avery S512.023, Brett Avery S513.023, and Avery Brothers S609.022

322. In relation to **SASM-R4** (indigenous vegetation clearance), there were 12 submissions (three in support, one supporting in part, five opposed and three seeking amendments) and five further submissions. GDC sought deletion of the rule as a whole (S608.026), while BDC wanted assurance that Poutini Ngāi Tahu could meet written approval requests in a timely manner (S538.181). Rodney Wright (S62.001) and Toni Chittock (S61.001) sought that the rule did not apply to private land, while Avery Brothers sought that it be removed from SASM 14 (S609.023). Hapuka Landing Limited (S514.007) sought amendment around the indigenous vegetation clearance rule to remove SASM 197 from the rule, which was supported by Poutini Ngāi Tahu submission (S620.372). Poutini Ngāi Tahu sought amendment to include Table SASM-R4 (S620.119). Westpower sought to be able to maintain existing buildings and structures as part of its network (S547.225).

323. In relation to **SASM-R5** (temporary events), there were 11 submissions (three in support, two supporting in part, two not stated, one opposing in part, one opposed and two seeking amendments) and three further submissions. GDC sought deletion of the rule as a whole (S608.027), while BDC wanted assurance that Poutini Ngāi Tahu could meet written approval requests in a timely manner (S538.182). Jet Boating NZ sought that written approvals should not be unreasonably withheld (S161.009) and Lake Mahinapua Aquatic Club Inc sought a single approval for their regular annual event (S332.003). Kawhaka Creek Catchment Residence (S297.016) and Gerrit & Suzie Wolters (S308.017) sought clarification of which SASM the rule applied to. Poutini Ngāi Tahu sought amendment to include Table SASM-R5 (S620.120).

324. In relation to **SASM-R6** (earthworks not provided for in SASM-R2), there were 19 submissions (two in support, one supporting in part, one opposing in part, nine opposed and six seeking amendments) and nine further submissions. GDC sought deletion of the rule as a whole (S608.028), while BDC wanted assurance that Poutini Ngāi Tahu could meet written approval requests in a timely manner (S538.183) and that minor structures and buildings would not require approval, as well as a definition of "*upper slopes*" (S538.184). A number of submitters[102] sought removal of SASM 14 from the rule, while Steve Croasdale sought a more enabling rule (S516.024) and Stephen Page (S270.021) sought removal of the requirement for written approval. Mining companies[103] proposed an exclusion for their activities. Poutini Ngāi Tahu sought amendment to include Table SASM-R6 and Table SASM-R6A (S620.121), and that SASM 14A and SASM 14B be removed from Rule SASM-R6 (S620.319). Westpower sought amendments that enabled maintenance, replacement, reconstruction or addition to existing buildings and structures within their network (S547.227).

325. In relation to **SASM-R7** (quarries and mineral extraction in the Pounamu Management Area and the Aotea Management Area), there were 18 submissions (three in support, two opposing in part, two opposed and 11 seeking amendments) and 10 further submissions. Poutini Ngāi Tahu sought to include reference to Te Rūnanga o Ngāi Tahu (S620.122), delete requirement to consult with Poutini Ngāi Tahu for mineral extraction and quarrying outside the boundary (S620.400) and amend the rule so that prohibited activity status was connected with Standard 1 only and activity status was discretionary where Standards 2 and 3 were not complied with (S620.394). Mining companies[104] sought reference to "*mineral extraction*" rather than just "*extraction*" and deletion of the requirement for written approval from Poutini Ngāi Tahu, which GDC (S608.029), Alistair Cameron (S452.005) and Davis Ogilvie & Partners Ltd

[102] Leonie Avery S507.024, Jared Avery S508.024, Kyle Avery S509.024, Avery Bros S510.024, Bradshaw Farms S511.024, Paul Avery S512.024, Brett Avery S513.024
[103] WMS Group (HQ) Limited and WMS Land Co. Limited S599.044, TiGa Minerals and Metals Limited S493.040
[104] WMS Group (HQ) Limited and WMS Land Co. Limited S599.045, TiGa Minerals and Metals Limited S493.041 and Rocky Mining Limited S474.042 in relation to written approval only

(S465.003) and Forest & Bird (S560.190) also opposed. Alistair Cameron preferred reference to notifying Poutini Ngāi Tahu. Forest & Bird sought connection to other relevant rules for mineral extraction and farm quarries, as well as clarification around how the rule would be managed by councils, and potential for resource consent instead (S560.473 and S560.474). Federated Farmers sought clarity over application of the rule to farm quarries (S524.055)

326. In relation to **SASM-R8** (fossicking of aotea within the Aotea Management Area), there were three submissions, all in support, and no further submissions.

327. In relation to **SASM-R9** (maintenance, repair and upgrading of network utility structures), there were 17 submissions (four in support, two opposing in part, two opposed and 11 seeking amendments) and 10 further submissions. A number sought deletion of the rule or removal of SASM 14[105], while GDC sought removal of the rule (S608.030). Poutini Ngāi Tahu sought amendments to include Table SASM-R9 (S620.124, S620.393). Westpower sought to be able to include reference to "*buildings and structures*", "*associated earthworks and vegetation clearance*" and "*limited to what is necessary for the work required*" (S547.231). Manawa sought clear reference to "*regionally significant infrastructure*" (S438.072).

328. In relation to **SASM-R10** (maintenance, repair and upgrading of network utility structures not meeting Permitted Activity standards), there were 14 submissions (one in support, two supporting in part, one opposing in part, eight opposed and two seeking amendments) and nine further submissions. A number simply sought deletion of the rule[106], while Misato Nomura (S151.003) sought a permitted activity status. Poutini Ngāi Tahu sought clarification that all sites in Schedule Three are subject to the rule (S620.125, S620.126). Westpower sought amendments to provide for maintenance, repair and upgrade of their infrastructure (S547.234) and Manawa sought reference to "*regionally significant infrastructure*" (S438.073).

329. In relation to **SASM-R11** (quarries and mineral extraction not meeting Permitted Activity standards), there were 15 submissions (two in support, one supporting in part, nine opposed and three seeking amendments) and two further submissions. A number simply sought deletion of the rule[107], including GDC (S608.031). Mining companies[108] sought mandatory notification to Poutini Ngāi Tahu where written approval was not obtained. Poutini Ngāi Tahu sought reference to "*Extraction of Pounamu Activities*" in the titles to the rule (S620.128) and deletion of the requirement to consult with Poutini Ngāi Tahu for mineral extraction and quarrying outside the boundary (S620.401).

330. In relation to **SASM-R12** (earthworks, buildings and structures, including demolition and removal of buildings and structures not meeting Permitted Activity standards), there were 19 submissions (two in support, nine opposed and eight seeking amendments) and 15 further submissions. A number simply sought deletion of the rule[109], including GDC (S608.032), while others requested that the rule refer to SASM-R15 rather than SASM-R14[110]. Steve Croasdale (S516.025) requested a controlled or restricted discretionary activity status. Westpower

[105] Leonie Avery S507.025, Jared Avery S508.025, Kyle Avery S509.025, Avery Bros S510.025, Bradshaw Farms S511.025, Paul Avery S512.025, Brett Avery S513.025, and Avery Brothers S609.024

[110] Buller District Council S538.187, William McLaughlin S567.163, Chris & Jan Coll S558.080, Chris J Coll Surveying Limited S566.080, Laura Coll McLaughlin S574.080

sought a stand-alone rule (S547.236) and notification only to Poutini Ngāi Tahu (S547.240). Poutini Ngāi Tahu sought amendment to include Table SASM-R6B (S620.129).

331. In relation to **SASM-R13** (maintenance, repair, upgrade and new network utility structures not meeting permitted or controlled activity standards), there were 15 submissions (two in support, nine opposed and four seeking amendments) and 13 further submissions. A number simply sought deletion of the rule[111]. Steve Croasdale (S516.026) requested a controlled or restricted discretionary activity status. Westpower sought a stand-alone rule (S547.241), notification only to Poutini Ngāi Tahu (S547.243) and a change to the rule title (S547.242). Poutini Ngāi Tahu sought amendment to include Table SASM-R6B (S620.130).

332. In relation to **SASM-R14** (grazing, indigenous vegetation clearance and temporary events not meeting permitted standards), there were 13 submissions (two in support, ten opposed and one seeking amendment) and 12 further submissions. A number simply sought deletion of the rule[112], including GDC (S608.033). Westpower sought a stand-alone rule (S547.244) and notification only to Poutini Ngāi Tahu (S547.245). Poutini Ngāi Tahu sought amendment to include Table SASM-R6B (S620.130).

333. In relation to **SASM-R15** (mineral extraction other than by Poutini Ngāi Tahu in SASM), there were 24 submissions (two in support, one opposing in part, 12 opposed and nine seeking amendments) and ten further submissions. A number simply sought deletion of the rule[113], including GDC (S608.034). Bill Baxter opposed restrictions on planting of trees and gold mining (S210.003). Mining companies and advocates sought a restricted discretionary rule[114] or a discretionary rule[115], as did Steve Croasdale (S516.028) and Poutini Ngāi Tahu (S620.396). Poutini Ngāi Tahu sought amendment to the title of the rule and to retain requirement for notification to rūnanga (S620.131, S620.397).

334. In relation to **SASM-R16** (plantation forestry or planting of shelterbelts or woodlots in SASM), there were 19 submissions (three in support, ten opposed and six seeking amendments) and one further submission. A number simply sought deletion of the rule[116], while others sought a discretionary activity status[117]. Bill Baxter opposed restrictions on planting of trees and gold mining (S210.003). Poutini Ngāi Tahu sought that the rule did not apply to amenity plantings (S620.405) and Federated Farmers sought that it did not apply to shelterbelts (S524.056).

335. In relation to **SASM-R17** (Landfills, waste disposal facilities, new crematoria, hazardous facilities, intensive indoor primary production, wastewater treatment plants and wastewater disposal facilities, on or within 50m of sites and areas in Schedule Three), there were 18 submissions (three in support, two opposing in part, ten opposed and three seeking amendments) and 14 further submissions. A number simply sought deletion of the rule[118], including GDC (S608.035), while others sought a discretionary activity status[119]. Kirsty

Henderson opposed restrictions on new wastewater disposal (S125.011). Horticulture New Zealand (S486.027) and Federated Farmers (S524.057) sought that "*major hazard facility*" replace "*hazardous facilities*".

336. In relation to **SASM-R18** (earthworks, buildings or structures on the upper slopes, ridgelines or peaks of ancestral maunga), there were five submissions (three in support and two opposing) and two further submissions. GDC sought deletion of the rule (S608.036), while Straterra sought a non-complying activity status (S536.007).

337. In relation to **SASM-R19**, mineral extraction or fossicking of aotea by anyone other than Poutini Ngāi Tahu, there were six submissions (three in support, two opposed and one seeking amendment) and two further submissions. Mining companies[120] sought deletion of the rule. Poutini Ngāi Tahu sought amendment to the title of the rule to remove reference to "*Mineral Extraction of Pounamu*" (S620.135).

338. The Panel adopts these summaries and has considered the relevant submissions and further submissions.

Section 42A Report

339. Ms Easton responded to submitters concerned about how to understand the rules and the varying importance of individual SASM. She noted that the targeted approach to each SASM had created a confusing rule framework, and she supported submissions from Poutini Ngāi Tahu to improve clarity around which rules apply to each SASM by using tables, as well as removing unnecessary words in the title of rules. She discussed lack of clarity around when rules SASM-R2 and SASM-R6 apply.

340. Ms Easton discussed a range of submissions that raised concerns about how the written approval process would work, including Kristy Henderson's concern (S125.001) that iwi might withhold approval on a prejudicial basis and Misato Nomura's concern (S151.004) that there be a timeframe for the process, and other concerns associated with costs and information about values that may be affected. She responded with reference to new Method SASM-M1. She noted that since the rule framework had taken immediate legal effect, a number of written approval letters had been provided for free by Poutini Ngāi Tahu, which outlined understanding of the activity and that adverse cultural effects would not occur on the basis of what had been described.

341. At the hearing, Ms Easton noted that the intention of the permitted activity rules was to filter out low impact activities from the consenting process. She considered risks to the process were low because there is only one iwi and two hapū involved. She could not guarantee that there would be a "no fees" approach taken by the Councils for administration of the permitted activities because there were three councils involved, and she considered this would be a decision for them. She considered this process would be considerably cheaper and less burdensome than a controlled activity process. She noted that the process would allow for discussion to occur between the resource user and Poutini Ngāi Tahu, which may result in modification of the activity (e.g. method or design) to avoid adverse effects and achieve written approval.

342. Ms Easton responded to concerns that further rules might be applied over and above those already included in the Plan and confirmed that no new rules were proposed in this process. In terms of the immediate legal effect of rules, Ms Easton explained in response to concerned

[120] WMS Group (HQ) Limited and WMS Land Co. Limited S599.048, TiGa Minerals and Metals Limited S493.044

submitters that section 88B(3) of the RMA directs that rules protecting areas of historic heritage have immediate legal effect at the point of notification. In response to submitter concerns about the impact on their LIM reports, she noted that recording information was a council responsibility that sat outside the hearing process. She did not support submissions seeking that SASM rules do not apply to freehold land, pointing to higher order instruments and noting that land tenure did not impact on whether or not sites and areas are culturally significant. In response to WCRC seeking that SASM rules be refined in consultation with landowners, Ms Easton considered that the submissions and hearing process allowed for this to occur.

343. A number of submitters affected by a mapping error associated with SASM 68 (Paroa Lagoon) were reassured by Ms Easton that the error had been fixed so that private properties fronting the State Highway at Paroa were no longer included within the boundaries of the SASM. She noted that this correction was made by the TTPP Committee using RMA Schedule 1, clause 16 on 16 September 2022.

344. A number of submitters supported retention of the rule framework that meant some SASM identified in Schedule Three did not have any rules associated with them, which Ms Easton supported. Mining companies[121] requested a restricted discretionary status for mining activities, which Ms Easton did not support as she considered a non-complying activity status to be appropriate given the likely significant adverse effects on cultural values arising from mining activities. She did not support the Fish & Game request for a new permitted activity rule because she considered the conservation and recreation activities, they wanted to support would be permitted activities by default because they are not specifically managed by the rules. She also did not support a new stand-alone rule for "*energy activities*" as sought by Westpower because she considered the SASM rules were permissive and that the rule drafting was concerned with cultural effects rather than particular activities.

345. Ms Easton responded to concerns of David Ellerm (S581.022) regarding sewerage collection at Cashmere Bay by indicating the issue to be a matter more relevant to regional council functions and the Infrastructure Chapter of the pTTPP.

346. Ms Easton did not recommend any changes to the rules in response to submissions relating to the rule framework as a whole, aside from adopting the approach of using tables in association with the rules to simplify them.

347. Ms Easton did support addition of a definition of "*Victorian title*" and an advice note to the rules, acknowledging that the plan drafting had not considered the matter, although she noted that regardless of ownership status, pounamu was a significant taonga to Poutini Ngāi Tahu. Her recommendation was as follows:

> **Victorian title** means land whereby ownership of minerals in the ground lies with the landowner, not the Crown, or Ngāi Tahu, in the case of pounamu.
>
> Advice Note: In order to establish whether Victorian title exists a Land and Minerals (LMS) report prepared under the Crown Minerals (Minerals Other than Petroleum) 2007

348. Ms Easton recommended that the general advice note accompanying relevant rules should be amended to read as follows:

[121] Rocky Mining Limited (S474.007, S474.041) and Papahaua Resources (S500.028, S500.023)

1. Under the Pounamu Vesting Act all pounamu formerly owned by the Crown, is owned by Te Rūnanga o Ngāi Tahu…

349. Ms Easton indicated to the Panel at the hearing that she saw some value in referring to the new methods relied upon to implement the rules, potentially in the Overview section, but did not offer any additional wording for consideration by the Panel.

350. In relation to Rule **SASM-R1**, Ms Easton supported retention of the rule, noting that considerable care had been taken to identify where grazing animals would be inappropriate, and in most cases the sites and areas were bush covered and not grazed currently. She recommended accepting the approach to tables included in the Poutini Ngāi Tahu submission. Ms Easton's recommended amendments were as follows:

SASM -R1: Grazing of Animals on Sites and Areas ~~in Schedule Three – Sites and Areas~~ of Significance to Māori listed within Table SASM – T1

Activity Status Permitted

1. Where the activity is not ~~on the following~~ in the Sites and Areas of Significance to Māori ~~as identified in Schedule Three~~ included within Table SASM – T1~~: SASM 22 Ōkari Lagoon; SASM 41 Kotorepi (Nine Mile); SASM 55 Māwhera Burial Cave Site; SASM 81 Takataka Islands; SASM 84 Knoll Point; SASM 127 Ulipa; SASM 133 No. 19 Ōkārito Native Reserve; SASM 135 Ōkārito (No. 18 Kaomaru Native Reserve); SASM 168 No. 4 Heretaniwha Native Reserve; or SASM 207 Awawhata Reserve at River Mouth.~~

SASM – T1 - Table for Rule SASM - R1 Grazing of Animals

SASM 22 Ōkari Lagoon
SASM 41 Kotorepi (Nine Mile)
SASM 55 (Māwhera Burial Cave Site
SASM 81 Takataka Islands
SASM 84 Ōkarito (No. 18 Kaomaru Native Reserve)
SASM 168 No 4. Heretaniwha Native Reserve
SASM 207 Arawhata Reserve at River Mouth – Silent File

351. In relation to Rule **SASM-R2**, Ms Easton supported retention of the rule, rather than a non-regulatory approach as sought by GDC, with new Method SASM-M1 to guide the process. She also considered that reference to the "*footprint*" of an existing activity could be readily understood, in response to query from GDC. She confirmed that the Avery properties were not affected by the rule. She indicated that considerable care had been taken to identify where earthworks were likely to impact on cultural values or where archaeological material may be found, such that only 19 out of 216 sites were affected by the rule.

352. Ms Easton did not support the submission of Westpower due to only 4 out of 216 sites being affected in relation to their infrastructure and she was unaware of any affected substations. She did not support reference to RSI because she considered this only affected the State Highway and NZTA Waka Kotahi due to network utilities already being provided for in the rule. She recommended a variation on the approach to tables included in the Poutini Ngāi Tahu submission to improve rule clarity. Ms Easton's recommended amendments were as follows:

SASM - R2: Minor Earthworks on Sites and Areas ~~in Schedule Three – Sites and Areas~~ of Significance to Māori listed within Table SASM – T2

Where:

1. These are earthworks associated with:

i. Burials at urupā; or

ii. Archaeological survey by Pouhere Taonga - Heritage New Zealand, Poutini Ngāi Tahu or authorised representatives; or

iii. Installing fence posts and the replacement of poles for overhead network utility lines provided that:

a. The area of land disturbed is limited to what is necessary to maintain an existing fence or line along its existing alignment; and

b. T he activity does not involve installation or digging of new holes for overhead network utility lines; or

iv. Maintaining roads/tracks within the footprint or modified ground compromised by the existing road/ track; and

2. In relation to standards ii., iii. and iv. These earthworks are not undertaken in ~~at the following~~ Sites and Areas of Significance to Māori identified in Table SASM – T2 ~~Schedule Three~~ except where these have been certified by ~~with the written approval from~~ the relevant Poutini Ngāi Tahu rūnanga that the activity will not have adverse effects on the cultural values of the site or area, and this certification ~~which~~ is provided to the relevant District Council at least 10 working days prior to the activity commencing~~:~~; and ~~i. SASM 17 Kawatiri South Bank Native Reserve; SASM 41 Kotorepi (Nine Mile); SASM 54 Motutapu; SASM 55 Māwhera Burial Cave Site; SASM 81 Takataka Islands; SASM 84 Knoll Point; SASM 110 Māhinapua; SASM 127 Ulipa; SASM 130 Whataroa Native Reserves Secs 21; SASM 133 No. 19 Ōkārito Native Reserve; SASM 135 Ōkārito (No. 18 Kaomaru Native Reserve); SASM 155 Hunts Beach Māori Reserve; SASM 157 No. 10 Makāwhio Native Reserve; SASM 162 Heretaniwha; SASM 165 No 7. Mahitahi Beach Native Reserve; SASM 168 No. 4 Heretaniwha Native Reserve; SASM 170 Porangirangi to Mahitahi; SASM 185 Lake Moeraki Reserve; or SASM 207 Awawhata Reserve at River Mouth; and~~

3. An Accidental Discovery Protocol commitment has been completed and the form submitted to Council 10 working days prior to the commencement of any earthworks.

Advice Note: Rule SASM – R2 relates to minor earthworks on Sites and Areas of Significance to Māori within Table SASM – T2. There are additional rules for earthworks in other SASM outlined in rule SASM – R6

SASM – T2 – Table for Rule SASM - R2 Minor Earthworks

SASM 41 Kotorepi (Nine Mile);
SASM 54 Motutapu;
SASM 55 Māwhera Burial Cave Site;
SASM 81 Takataka Islands;
SASM 84 Knoll Point;
SASM 110 Māhinapua;
SASM 127 Ulipa;
SASM 130 Whataroa Native Reserves Secs 21;
SASM 133 No. 19 Ōkārito Native Reserve;
SASM 135 Ōkārito (No. 18 Kaomaru Native Reserve);
SASM 155 Hunts Beach Māori Reserve;
SASM 157 No. 10 Makāwhio Native Reserve;
SASM 162 Heretaniwha;
SASM 165 No 7. Mahitahi Beach Native Reserve;
SASM 168 No. 4 Heretaniwha Native Reserve;
SASM 170Porangirangi to Mahitahi;
SASM 185 Lake Moeraki Reserve;
SASM 207 Arawhata Reserve at River Mouth;

353. In relation to Rule **SASM-R3**, Ms Easton supported retention of the rule, rather than a non-regulatory approach as sought by GDC, with new Method SASM-M1 to guide the process. She confirmed that the Avery properties were not affected by the rule. She did not support the submissions of Westpower due to only 3 out of 216 sites potentially interacting with their infrastructure, each of which being highly sensitive and previously affected by activities (wāhi tapu at 9 Mile, burial cave at Greymouth and urupā at Blaketown), as well as "*buildings*" being included in the definition of a "*structure*". She did not support the submission of Manawa and reference to RSI because she considered this only affected the State Highway and NZTA Waka Kotahi due to network utilities already being provided for in the rule. She recommended a variation to the approach to tables included in the Poutini Ngāi Tahu submission to improve rule clarity. Ms Easton's recommended amendments were as follows:

> **SASM - R3 Demolition, removal of, or alterations to a structure on Sites and Areas ~~in Schedule Three - Sites and Areas~~ of Significance to Māori listed in Table SASM – T3**
>
> **Activity Status Permitted**
>
> Where:
>
> ~~1. In relation to the Sites and Areas of Significance to Māori identified in Schedule Three identified in 2. below:~~
>
> 1. ~~i.~~The activity does not occur in Sites and Areas of Significance to Māori listed in Table SASM – T3 except where it has been certified by ~~with the written approval from~~ the relevant Poutini Ngāi Tahu rūnanga that the activity will not have adverse effects on the cultural values of the site or area, with evidence of this certification ~~which is~~ provided to the relevant District Council at least 10 working days prior to the activity commencing; and
>
> 2.~~ii.~~ No land disturbance is involved; and
>
> 3. ~~i.~~ There is no change to the size or location of the structures foundation or building footprint occupied by the structure;
>
> ~~2. SASM 41 Kotorepi (Nine Mile); SASM 55 Māwhera Burial Cave Site; SASM 64 Blaketown Part Reserve; SASM 81 Takataka Islands; SASM 84 Knoll Point; SASM 121 Waitaiki Historic Reserve; SASM 127 Ulipa; SASM 135 Ōkārito (No. 18 Koamaru Native Reserve); SASM 155 Hunts Beach Māori Reserve; SASM 157 No. 10 Makāwhio Native Reserve; SASM 162 Heretaniwha; SASM 168 No. 4 Heretaniwha Reserve; and SASM 170 Porangirangi to Mahitahi;~~
>
> **SASM – T3 – Table for Rule SASM - R3 Demolition Removal or Alteration of a Structure**
>
> SASM 41 Kotorepi (Nine Mile);
> SASM 55 Māwhera Burial Cave Site;
> SASM 64 Blaketown Part Reserve;
> SASM 81 Takataka Islands;
> SASM 84 Knoll Point;
> SASM 121 Waitaiki Historic Reserve;
> SASM 127 Ulipa;
> SASM 135 Ōkārito (No. 18 Koamaru Native Reserve);
> SASM 155 Hunts Beach Māori Reserve;
> SASM 157 No. 10 Makāwhio Native Reserve;
> SASM 162 Heretaniwha;
> SASM 168 No. 4 Heretaniwha Reserve;
> SASM 170 Porangirangi to Mahitahi

354. In relation to Rule **SASM-R4**, Ms Easton supported retention of the rule, rather than a non-regulatory approach as sought by GDC, with new Method SASM-M1 to guide the process. She confirmed that the Avery properties were not affected by the rule. She supported removal of

SASM 197 from the rule. She did not support the submissions of Westpower because she did not consider it onerous to consult with Poutini Ngāi Tahu ahead of works. She recommended a variation to the approach to tables included in the Poutini Ngāi Tahu submission to improve rule clarity. Ms Easton's recommended amendments were as follows:

SASM - R4 Indigenous vegetation clearance on Sites and Areas ~~in Schedule Three - Sites and Areas~~ of Significance to Māori listed in Table SASM – T4

Activity Status Permitted

Where:

1. The activity does not occur ~~on the following~~ within the Sites and Areas of Significance to Māori ~~identified in Schedule Three~~ listed in Table SASM – T4, except ~~with the written approval from the~~ where it has been certified by the relevant Poutini Ngāi Tahu rūnanga that the activity will not have adverse effects on the cultural values of the site or area, with evidence of this certification ~~which is~~ provided to the relevant District Council at least 10 working days prior to the activity commencing: ~~i. All sites identified in Category Tahi (1) and Category Rua (2) in Schedule Three; ii. SASM 52 Cobden Native Reserve; iii. SASM 109 Pyramid Hill/Tumuaki Hill; iv. SASM 117 Waitaiki Catchment; v. 355. In relation to Rule **SASM-R5**, Ms Easton supported retention of the rule, rather than a non-regulatory approach as sought by GDC, with new Method SASM-M1 to guide the process and use of an advice note in relation to Lake Māhinapua. She noted that SASM 104 was not affected by the rule. She recommended a variation to the approach to tables included in the Poutini Ngāi Tahu submission to improve rule clarity. Ms Easton's recommended amendments were as follows:

> **SASM – R5 Temporary Events on Sites and Areas ~~in Schedule Three - Sites and Areas~~ of Significance to Māori listed in Table SASM – T5**
>
> **Activity Status Permitted**
>
> Where:
>
> 1. These are Poutini Ngāi Tahu cultural events in accordance with tikanga; or
>
> 2. They are temporary events and activities in accordance with the Temporary Activities Chapter; and
>
> 3. These activities do not occur ~~On the following~~ within the Sites and Areas of Significance to Māori identified in Schedule Three except where it has been certified by ~~these only occur with the written approval from~~ the relevant Poutini Ngāi Tahu rūnanga that the activity will not have adverse effects on the cultural values of the site or area, with evidence of this certification ~~that is~~ provided to the relevant District Council at least 10 working days prior to the activities commencing: ~~i. All sites identified in Category Tahi (1) in Schedule Three; ii. 356. In relation to Rule **SASM-R6**, Ms Easton supported retention of the rule, rather than a non-regulatory approach as sought by GDC, with new Method SASM-M1 to guide the process. She did not support the submission of BDC to allow for minor structures and buildings because of the risk that such development may disturb culturally sensitive sites and materials, and because she considered the rule framework was generally permissive. She did support the addition of a definition for "*upper slopes*" as requested by BDC. She noted that, on the advice of Poutini Ngāi Tahu, the Avery property affected by SASM 14 did not need be captured in the rule and she therefore supported those submissions. She did not support the Westpower submission because she did not consider it onerous to consult with Poutini Ngāi Tahu ahead of works. She recommended a variation on the approach to tables included in the Poutini Ngāi

Tahu submission to improve rule clarity. Ms Easton's recommended amendments were as follows:

SASM – R6 Earthworks Buildings and Structures ~~not Provided for in SASM – R2 in~~ within ~~Schedule Three –~~Sites and Areas of Significance to Māori listed in Tables SASM – T6 and SASM – T7 and not provided for in Rule SASM – R2

Activity Status Permitted

Where:

1. The activity does not occur within the ~~on the following~~ Sites and Areas of Significance to Māori listed ~~identified~~ in Table SASM – T6A ~~Schedule Three~~, except where it has been certified by ~~with written approval from~~ the relevant Poutini Ngāi Tahu that the activity will not have adverse effects on cultural values of the site and that evidence of this certification ~~which~~ is provided to the relevant District Council at least 10 working days prior to the activity commencing,: and ~~i. All sites identified in Category Tahi (1), Category Rua (2), Category Toru (3) and Category Wha (4) in Schedule Three; and ii. SASM 3 Whakapoai Native Reserve 7B and SASM 170 Porangirangi to Mahitahi; iii. provided that~~ 2. No earthworks, buildings or structures are located on the upper slopes, ridgelines or peaks of ancestral maunga identified in Table SASM 6B ~~Category Toru (3) in Schedule Three.~~

357. In relation to Rule **SASM-R7**, Ms Easton preferred a certification process to a written approval process, in response to submitter concerns about how such a process would work; and supported clarification about the process to be followed. She proposed a new method to guide the written approval or certification process referenced in Rule SASM-R7, in response to a number of submitters[122], as follows:

SASM – M3

[122] WMS Group (HQ) Limited and WMS Land Co. Limited S599.045, TiGa Minerals and Metals Limited S493.041, Alistair Cameron S452.006, Davis Ogilvie Partners Ltd S465.003

Develop in partnership with Poutini Ngāi Tahu information on the cultural certification process for mineral extraction within the Pounamu and Aotea management area overlays.

358. Ms Easton supported the submission of Poutini Ngāi Tahu and recommended amending the rule as requested, including a correction that escalated the rule to discretionary activity status under Rule SASM-R11. She noted that the discretionary activity pathway would be available for landowners that could demonstrate "*Victorian title*". Ms Easton also supported the Forest & Bird submission in part, proposing the addition of an advice note referring plan users to other relevant provisions in the Plan that manage mineral extraction and quarrying activities. She did not support Forest & Bird's request for resource consenting to apply on the basis of protecting indigenous biodiversity because she considered these matters were addressed in other parts of the Plan. Ms Easton supported the Director General's submission in part, noting that resource consent would be required under Rule SASM-R15 and that would enable consideration of any need for an archaeological authority. She noted that it may not be clear that Rule SASM-R7 applied outside of SASM, within the Pounamu Management Overlay and the Aotea Management Overlay, so she recommended changing the heading of the rule to provide that clarification.

359. In addition to the new proposed method, Ms Easton's recommended amendments to Rule SASM-R7 are as follows:

SASM – R7

Farm Quarries, including Farm Quarries and Mineral Extraction Activities within the Pounamu and Aotea Overlay Areas Outside of Sites and Areas of Significance to Māori in Schedule 3
Activity Status Permitted

Where:

1. In relation to extraction of ~~A~~aotea:

   i. Any extraction of ~~A~~aotea is only undertaken by Te Rūnanga o Makaawhio or their authorised representatives or contractors;
   ii. Where an Aotea Management Plan prepared by Te Rūnanga o Makaawhio exists, any extraction of ~~A~~aotea is in accordance with that plan;
   iii. Where this is ~~A~~aotea extraction in the Aotea overlay, notice of the activity is provided to the Westland District Council by Te Rūnanga o Makaawhio, at least 10 working days prior to the activity occurring.

2. In relation to extraction of ~~P~~pounamu:

   i. Any extraction of ~~P~~pounamu is only undertaken by Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio or their authorised representatives or contractors;
   ii. Where a Pounamu Management Plan prepared by Poutini Ngāi Tahu exists, any extraction of ~~P~~pounamu is in accordance with that plan;
   iii. Where this ~~P~~pounamu extraction is within the Pounamu overlay, notice of the activity is provided to the relevant district council by the relevant Poutini Ngāi Tahu rūnanga, at least 10 working days prior to the activity commencing;

3. In relation to other mineral extraction and quarrying activity:

   i. Certification that there will not be adverse cultural effects from the activity ~~Written approval~~ is provided by the relevant Poutini Ngāi Tahu rūnanga - Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio, that the activity can occur within the Pounamu

and/or Aotea overlay(s) and ~~the written confirmation shall be~~ this is provided to the relevant district council at least 10 working days prior to the activity commencing.

Advice Note~~s~~:

1. Under the Pounamu Vesting Act, all pounamu formerly owned by the Crown, is owned by Te Rūnanga o Ngāi Tahu. Where Victorian title is established, the pounamu is owned by the landowner. Outside of Victorian title lands ~~A~~any pounamu or ~~A~~aotea disturbed shall be returned to the relevant Poutini Ngāi Tahu papatipu rūnanga - Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio.

2. This rule manages the adverse cultural effects of mineral extraction and quarrying in relation to the cultural taonga of pounamu and aotea. This rule is in addition to the rules in the zone chapters for mineral extraction and quarrying.

Activity status where compliance not achieved:

Prohibited where Standard 1 ~~or 2~~ is not complied with

Discretionary where Standard 2, or 3 is not complied with

SASM – T7 – Ancestral Maunga – Table for Rule SASM - R6, SASM - R12, SASM – R13, SASM – R14 and SASM R-18

SASM 162 Heretaniwha

360. In relation to Rule **SASM-R8**, no amendments were recommended by Ms Easton.

361. In relation to Rule **SASM-R9**, Ms Easton noted that the Avery property affected by SASM 14 was undeveloped land and was not captured by the rule. She did not support the Westpower submissions because she considered that their activities were already covered by the rule as they were network utilities, and that the term "*structures*" already includes "*buildings*". She did not support the submission of Manawa and reference to RSI because she considered that unintended activities would then be included, other than those found in urban and suburban locations. She recommended a variation on the approach to tables included in the Poutini Ngāi Tahu submission to improve rule clarity. Ms Easton's recommended amendments were as follows:

SASM – R9 Maintenance, Repair and Upgrading of Network Utility Structures on or within Sites and Areas of Significance to Māori ~~identified~~ listed in ~~Schedule Three~~ Table SASM – T8

Activity Status Permitted

~~Where: 1. The activity occurs in one of the following Sites and Areas of Significance to Māōri as identified in Schedule Three: i. SASM 10 Kawatiri Pā ii. SASM 12 Kawatiri Town Reserve iii. SASM 15 No. 42 Kawatiri (Township) Native Reserve iv. SASM 31 Punakaiki Area v. SASM 56 Māwhera~~

~~Pā 1 vi. SASM 57 Māwhera Gardens vii. SASM 58 Greymouth Railway Land viii. SASM 59 Māwhera Pā 2 ix. SASM 60 Māwhera Kāinga x. SASM 61 Victoria Park xi. SASM 63 No. 32 Nga Moana e Rua Native Reserve xii. SASM 94 No. 30 Arahura Native Reserve xiii. SASM 96 Taramakau River xiv. SASM 104 Kawhaka Creek Catchment xv. SASM 112 Arahura River at Tūhua xvi. SASM 117 Waitaiki Catchment xvii. SASM 121 Waitaiki Historic Reserve xviii. SASM 197 Ōkuru~~

SASM – T8 -Table for Rule SASM – R9 Maintenance, Repair and Upgrading of Network Utility Structures

SASM 56 Māwhera Pā 1
SASM 57 Māwhera Gardens
SASM 58 Greymouth Railway Land
SASM 59 Māwhera Pā 2
SASM 60 Māwhera
SASM 61 Victoria Park
SASM 62 No 31. Māwhera Native Reserve
SASM 63 No. 32 Nga Moana e Rua Native Reserve
SASM 94 No. 30 Arahura Native Reserve
SASM 96 Taramakau River
SASM 104 Kawhaka Creek Catchment
SASM 112 Arahura River at Tūhua
SASM 117 Waitaiki Catchment
SASM 121 Waitaiki Historic Reserve
SASM 197 Ōkuru

362. In relation to Rule **SASM-R10**, Ms Easton did not support deletion of the rule due to section 6 of the RMA and because she considered a controlled activity status was reasonable, and less stringent than the Historic Heritage Chapter. She considered that the rule was unsuited to a certification process, but as a controlled activity provided certainty for network utility operators. She supported the Poutini Ngāi Tahu requested amendments. She did not support the Westpower submission because "*structures*" already included "*buildings*"; and she considered the maximum area parameters of the rule to be important for the activity status. She did not support reference to RSI because she considered network utilities already covered what was intended and no additional infrastructure needed to be brought in. Ms Easton recommended the following amendments to the rule:

SASM – R10 Maintenance, Repair and Upgrading of Network Utility Structures on or within Sites and Areas in Schedule Three Sites and Areas of Significance to Māori where Permitted Activity standards are not met

Activity Status Controlled

Where:

1. Notice of works is provided to the relevant Poutini Ngāi Tahu Rūnanga - Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio, 10 working days prior to any earthworks commencing; and…

Advice Note: This rule applies to all Sites and Areas of Significance to Māori other than those within Table SASM – T8

363. In relation to Rule **SASM-R11**, Ms Easton supported the request of the mining companies to include a reference to notification to Poutini Ngāi Tahu when permitted activity conditions were not met; although she noted that requiring limited notification would be *ultra vires*. She recommended adopting wording put forward in her s42A Report in relation to the Activities on the Surface of Water Chapter. She did not support requests to delete the rule on the basis that pounamu was a significant taonga to Poutini Ngāi Tahu. She supported the submission points of Poutini Ngāi Tahu. Ms Easton recommended the following amendments to this rule:

> **SASM – R11 ~~Farm~~ Quarries, including Farm Quarries, and Mineral Extraction and Extraction of Pounamu Activities within the Pounamu and Aotea Overlay Areas not meeting Permitted Activity Standards**
> **Activity Status Discretionary**
>
> Notification: When making notification decisions in relation to this rule, the Council will be informed by advice from Poutini Ngāi Tahu.
>
> Advice Note: Under the Pounamu Vesting Act all pounamu, formerly owned by the Crown is owned by Te Rūnanga o Ngāi Tahu.

364. In relation to Rule **SASM-R12**, Ms Easton did not support deletion of the rule due to section 6 of the RMA and because she considered a discretionary status was consistent with the Historic Heritage Chapter. She supported the correction to refer to Rule SASM-R15. She did not support the Westpower's request for a stand-alone rule, consistent with other rules, but supported in part the matter of notification to Poutini Ngāi Tahu. She supported the Poutini Ngāi Tahu requested amendment to refer to the relevant table. Ms Easton recommended the following amendments to this rule:

> **SASM – R12 Earthworks, Buildings and Structures, including Demolition and Removal of Buildings and Structures on or within Sites and Areas in Schedule Three Sites and Areas of Significance to Māori not meeting Permitted Activity Standards**
>
> **Activity Status Discretionary**
>
> Where:
>
> 1. No earthworks or structures are located on the upper slopes, ridgelines or peaks of ancestral maunga identified in ~~Category Toru (3) in Schedule Three~~ Table SASM – R7;
>
> 2. This is not Mineral Extraction subject to Rule SASM - R14~~4~~5; and
>
> 3. This will not result in the destruction of a Site or Area of Significance to Māori.
>
> Notification: ~~Applications for earthworks on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu Rūnanga~~ When making notification decisions in relation to this rule, the Council will be informed by advice from Poutini Ngāi Tahu

365. In relation to Rule **SASM-R13**, Ms Easton did not support deletion of the rule due to section 6 of the RMA and because she considered a discretionary status was consistent with the Historic Heritage Chapter. She did not support the Westpower submission for a stand-alone rule, consistent with other rules, or inclusion of earthworks and vegetation clearance, but she supported in part the matter of notification to Poutini Ngāi Tahu. She supported the Poutini Ngāi Tahu's requested amendment to refer to the relevant table. Ms Easton recommended the following amendments to this rule:

> **SASM - R13 Maintenance, Repair, Upgrade and New Network Utility Structures on or within Sites and Areas of Significance to Māori in Schedule Three not meeting Controlled Activity Standards**
>
> **Activity Status Discretionary**
>
> Where:
>
> 1. There are no new structures on the upper slopes, ridgelines or peaks of ancestral maunga identified in ~~Category Toru (3) in Schedule Three~~ Table SASM – T7
>
> Notification: ~~Applications for earthworks on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu Rūnanga~~ When making notification decisions in relation to this rule, the Council will be informed by advice from Poutini Ngāi Tahu

366. In relation to Rule **SASM-R14**, Ms Easton did not support deletion of the rule due to section 6 of the RMA and because she considered the activity status was appropriate when considering the potential cultural effects. She did not support the Westpower submission for a stand-alone rule, consistent with other rules, but she supported in part the matter of notification to Poutini Ngāi Tahu. Ms Easton recommended the following amendments to this rule:

> **SASM - R14 Grazing, Indigenous Vegetation Clearance and Temporary Events on Sites and Areas of Significance to Māori in Schedule Three not meeting Permitted Activity Standards**
>
> **Activity Status Discretionary**
>
> Notification: ~~Applications for earthworks on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu Rūnanga~~ When making notification decisions in relation to this rule, the Council will be informed by advice from Poutini Ngāi Tahu

367. In relation to Rule **SASM-R15**, Ms Easton did not support deletion of the rule due to section 6 of the RMA and because she considered the activity status was appropriate when considering the potential cultural effects. She supported the mining companies and advocates that sought a discretionary activity status on the basis that this was also supported by Poutini Ngāi Tahu. She supported submission points of Poutini Ngāi Tahu. She considered that Bill Baxter's concerns were likely addressed by the recommended amendment to SASM 104, which altered the scope of the SASM to apply only to the river bed and not to the whole of the Kawhaka Creek catchment. Ms Easton recommended the following amendments to this rule:

> **SASM - R15 Mineral Extraction by other than by Poutini Ngāi Tahu in Sites and Areas of Significance to Māori**
>
> **Activity Status ~~Non-complying~~ Discretionary**
>
> Where:
>
> 1. This occurs in any RURZ - Rural Zone, OSRZ - Open Space and Recreation Zone, SPZ - Special Zone or INZ - Industrial Zone.
>
> Notification: ~~Applications for earthworks on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu Rūnanga~~ When making notification decisions in relation to this rule, the Council will be informed by advice from Poutini Ngāi Tahu.

368. In relation to Rule **SASM-R16**, Ms Easton did not support deletion of the rule because she considered tight controls on plantation forestry was necessary to protect sites and areas of cultural significance, and although over a lesser area, the same effects could arise from woodlots. She considered the level of restriction was appropriate, rather than allowing for a

discretionary activity, because of the potential scale and significance of effects. She considered that Bill Baxter's concerns were likely addressed by the recommended amendment to SASM 104, which altered the scope of the SASM to apply only to the river bed and not to the whole of the Kawhaka Creek catchment. She agreed with Poutini Ngāi Tahu and Federated Farmers that amenity plantings and shelterbelts should not be captured by the rule because the likely effects of these activities are lower than for plantation forestry and woodlots. Ms Easton recommended the following amendments to this rule:

> **SASM - R16 Plantation forestry or planting of ~~shelterbelts or~~ woodlots on land in Schedule Three - Sites and Areas of Significance to Māori**
>
> **Activity Status Non-complying**
>
> Where:
>
> 1. This occurs in any RURZ - Rural Zone, OSRZ - Open Space and Recreation Zone, SPZ - Special Zone or INZ - Industrial Zone.
>
> Notification: ~~Applications for earthworks on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu Rūnanga~~ When making notification decisions in relation to this rule, the Council will be informed by advice from Poutini Ngāi Tahu.
>
> Advice Note: Plantation Forestry~~, shelterbelts~~ and woodlots in the RESZ - Residential Zones and COMZ - Commercial and Mixed Use Zones are not regulated by this rule. Refer relevant zone rules, and the NES - Plantation Forestry for the status of these activities in these area

369. In relation to Rule **SASM-R17**, Ms Easton did not support deletion of the rule or change to discretionary activity status because she considered the level of restriction on activities offensive to Poutini Ngāi Tahu was appropriate in relation to sites and areas of cultural significance, where such activities would be incompatible. In response to Kristy Henderson, she considered that a definition would be useful to ensure that domestic wastewater systems were not captured by the rule. She did not support amendment to refer to "*major hazardous facilities*" because the definition of "*hazardous facilities*" is appropriate given the activities it refers to being incompatible with culturally sensitive sites. She also considered that the definition of "*hazardous facilities*" does not include the kinds of activities of concern to Horticulture New Zealand and Federated Farmers. Ms Easton recommended the following amendments to this rule:

> **SASM - R17 Landfills, waste disposal facilities, new crematoria, hazardous facilities, intensive indoor primary production, wastewater treatment plants and wastewater disposal facilities, on or within 50m of sites and areas in Schedule Three - Sites and Areas of Significance to Māori**
>
> **Activity Status Non-complying**
>
> Where:
>
> 1. This occurs in any RURZ - Rural Zone, OSRZ - Open Space and Recreation Zone, SPZ - Special Zone or INZ - Industrial Zone.
>
> Notification: ~~Applications for earthworks on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu Rūnanga~~ When making notification decisions in relation to this rule, the Council will be informed by advice from Poutini Ngāi Tahu

370. In relation to Rule **SASM-R18**, Ms Easton did not support deletion of the rule because of section 6 of the RMA and the need to protect culturally significant sites. She did not support a change in activity status to discretionary because ancestral maunga have very high cultural

values and earthworks or buildings on their upper slopes would be considered desecration by Poutini Ngāi Tahu. She recommended the following amendments to this rule:

> **SASM - R18 Earthworks, Buildings or Structures on the Upper Slopes, Ridgelines or Peaks of Ancestral Maunga listed in ~~Schedule Three – Sites and Areas of Significance to Māori~~ Table SASM – T7 not meeting Permitted, Controlled, Restricted Discretionary or Discretionary Activity Standards**
>
> **Activity Status Non-complying**
>
> Where:
>
> 1. This occurs in any RURZ - Rural Zone, OSRZ - Open Space and Recreation Zone, SPZ - Special Zone or INZ - Industrial Zone. 131 Te Tai o Poutini Plan – Section 42A Report Sites and Areas of Significance to Māori 132 Te Tai o Poutini Plan – Section 42A Report Sites and Areas of Significance to Māori
>
> Notification: ~~Applications for earthworks on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu Rūnanga~~ When making notification decisions in relation to this rule, the Council will be informed by advice from Poutini Ngāi Tahu

371. In relation to Rule **SASM-R19**, Ms Easton supported a consequential amendment arising from the Poutini Ngāi Tahu submission. She recommended the following amendments to this rule:

> **SASM - R19 Mineral extraction or Fossicking of Aotea or Mineral Extraction of Pounamu by anyone other than Poutini Ngāi Tahu in the Pounamu - Aotea Overlay area not meeting Rule SASM - R7 or Rule SASM – R8**

Hearing and Submitter Evidence/Statements

372. Ms Pull, for Poutini Ngāi Tahu, explained that the overlay and SASM Chapter must be read in conjunction with other parts of the Plan, particularly in relation to activities not otherwise covered by the SASM rules. She used the Natural Character and Margins of Waterbodies Chapter as an example, because there were SASM covering waterbodies, but rules in that chapter also apply to consideration of effects on Ngāi Tahu values, and similarly the Energy Chapter rules where activities occur within SASM. In that way, she considered the identified SASM specific values and associated rules were complemented by Ngāi Tahu values more broadly in the context of other chapters and their rules, which she noted was similar to the approach taken in the West Coast Land and Water Plan, Schedule 7C.

373. Ms Pull noted that the SASM rules have had legal effect since notification of the Plan. She explained that Ms Philippa Lynch of Poutini Environmental had assisted in implementing the rules and that six written approval requests had been answered since notification with no issues arising in the process. In conjunction with the presentation of Ms Pull at the hearing, Ms Lynch supplied the Panel with copies of written approval letters and confirmed the statement in Ms Pull's evidence, noting turnaround of requests within a fortnight, subject to reference to cultural experts (including the chairs of Te Rūnanga o Ngāti Waewae and Te Rūnanga o Makaawhio). She explained that only "light detail" had been required from applicants, subject to set questions that met Poutini Ngāi Tahu information needs, and that any costs associated with an on-site expert or archaeologist would be unlikely for a permitted activity. She noted greater levels of information and effort would be required without a written approval option and would trigger a resource consent pathway. Ms Pull noted that this description of the existing written approval process by Ms Lynch had contributed to her support for the methods proposed in the s42A Report.

374. Ms Pull outlined that a certification process could assist in achieving the goal of not creating unnecessary costs and delays to landowners within SASM, whilst appropriately protecting Poutini Ngāi Tahu values associated with the sites and areas, in the event that a written approval process was deemed to be *ultra vires*. She saw advantage in a certification clause for clarifying that what is being sought is an expert opinion from Poutini Ngāi Tahu, similar to rules NOISE-R3 or TRN-R11, but observed that quantifiable measures would be needed, in comparison to the simplicity of the written approval process, which she preferred. She noted that neither approach was common in district plans and that efforts to find a simple, cost effective process were laudable. She emphasised that criteria for certification would need to be developed before finalising the Plan and referred to the Healthy Streets design check as an example to score and certify qualitative measures like sense of place. Ms Pull considered that proposed Method SASM-M3 should apply to more than just mineral extraction processes and therefore recommended amendment, as follows:

> **SASM-M3**
>
> Develop in partnership with Poutini Ngāi Tahu information on the cultural certification process.

375. Ms Pull also indicated that a discretionary activity status was appropriate in relation to the rule framework governing SASM, as compared to a non-complying framework that may be more appropriate in the context of the Historic Heritage Chapter. She explained that there can be a beneficial and interactive relationship involved in resolving Māori heritage issues specific to activities and their location, which makes it different than other forms of historic heritage. She noted that Poutini Ngāi Tahu opposed a restricted discretionary activity status for mining activities in SASM, as sought by a number of mining companies.

376. Ms Pull did not support a blanket enablement of RSI in the SASM Chapter given that these sites and areas involve irreplaceable taonga and historic heritage, which needed be considered on a case-by-case basis. She supported the combination of permitted, controlled, discretionary and non-complying activities for various RSI and the use of the term "*enable*" in relation to activities with a "*functional or operational need*" to be located within SASM.

377. Ms Pull supported the addition of new activities to the permitted activity provisions because they were addressed in other parts of the Plan and would also apply to SASM. She supported the advice notes to address the Lake Māhinapua Aquatic Club and mining concerns. She also supported the S42A Report approach to not detail each type of infrastructure activity or structure beyond what was necessary to clarify activity status.

378. Ms Rusher, for GDC, submitted that rules SASM-R2, SASM-R3, SASM-R4, SASM-R5 and SASM-R6 did not align well with the rule of law because they relied on a third party assessment of actual and potential adverse effects in order to achieve written approval or certification, something that does not conform with lawful approach to resource consent conditions. She expressed concern about unfettered discretion being given to Poutini Ngāi Tahu and use of "*subjective formulation*".

379. Mr McEnaney, for GDC, considered the s42A Report recommendations to the SASM rules were an improvement on the notified version. His principal concern remained the spatial extent of SASM triggering rules unnecessarily. While he considered the introduction of the rule framework should be delayed, he addressed the drafting to improve upon it.

380. In relation to Rule **SASM-R1,** Mr Sutherland, for Federated Farmers, supported the drafting because it recognised that animal grazing can be an appropriate activity. He advised that animal grazing can assist to keep pest plants down. Mr McEnaney noted that SASM 55 was

listed as requiring consent for grazing but was located within an urban area and therefore potential for grazing at the site was fanciful. He sought that reference to SASM 55 be removed from the rule.

381. In relation to Rule **SASM-R2**, Ms Pull recommended use of the term "*Regionally Significant Infrastructure*" and use of a written approval or certification process. Mr Kennedy recommended that maintenance of existing underground lines and cables should be specifically provided for in the rule, in conjunction with a certification process that allowed consideration by Poutini Ngāi Tahu of the activity in the specific circumstances. He also reminded the Panel, as in prior evidence, that replacing poles often required digging new holes and therefore clause (1)(iii)(b) should be amended to reflect that practical reality. Mr Kennedy identified six sites where the rule would impact Westpower infrastructure, which necessitated provision in the rule. His recommended amendment to the rule as follows:

SASM R2

1. These are earthworks associated with:

i. Burials at urupā; or

ii. Archaeological survey by Pouhere Taonga - Heritage New Zealand, Poutini Ngāi Tahu or authorised representatives; or

iii. Installing fence posts and the replacement of poles for overhead network utility lines provided that:

a. The area of land disturbed is limited to what is necessary to maintain an existing fence or line along its existing alignment; ~~and~~

~~b. The activity does not involve installation or digging of new holes for overhead network utility lines;~~ or

iv. maintaining existing underground lines and cables provided that:

a. The area of land disturbed is limited to what is necessary to maintain the lines or cables; or

~~iv~~v. Maintaining roads/tracks within the footprint or modified ground compromised by the existing road/ track; and

382. Mr Sutherland supported the s42A Report recommendations to redraft the rule so that it was clearer which SASM were affected by the rule. He emphasised the importance of being able to undertake simple tasks such as installing fence posts in order to maintain existing fences or lines, which assisted with Stock Exclusion Regulation compliance.

383. Mr McEnaney sought that the rule provides for the replacement of fence posts and fence maintenance as a permitted activity and allow for installation of a new fence along the boundary of a SASM as a permitted activity. He considered the scope of permitted activities was too narrow and that small projects with minor effects should be able to obtain consent more easily compared to large, complex projects via a controlled or restricted discretionary pathway.

384. In relation to Rule **SASM-R3**, Mr Kennedy considered that the most important aspect of the rule, the certification process, was contained in clause (1) and therefore clauses (2) and (3)

were not needed. Mr Sutherland confirmed Federated Farmers supported the rule as it was clear and concise. Similar to Rule SASM-R2, Mr McEnaney sought that the rule provide for the replacement of fence posts and fence maintenance as a permitted activity and allow for installation of a new fence along the boundary of a SASM as a permitted activity. He considered the scope of permitted activities was too narrow and that small projects with minor effects should be able to obtain consent more easily compared to large, complex projects via a controlled or restricted discretionary pathway.

385. In relation to Rule **SASM-R4**, Ms Pull recommended use of a written approval or certification process. Mr Kennedy identified 14 sites where the rule would impact Westpower infrastructure. He expressed concern that Westpower were required to meet electrical safety standards and it was unclear how those obligations were provided for in the Plan in the event that certification was not forthcoming. He accepted the s42A Report recommendation but with reservations about the impact on Westpower's obligations.

386. Mr Sutherland confirmed Federated Farmers supported the rule as it was clear and concise; and sought that the list of SASM were formatted as per Rule SASM-R4.

387. Mr McEnaney questioned the written approval or certification process for a permitted activity, as he considered it was an administrative step rather than determining activity status by reference to effects on the environment. He acknowledged that Far North District Council included a similar provision in their district plan. He did not see the need for temporary events and activities with minor effects on SASM to apply to private land, which he thought should be permitted activities.

388. Ms Pull responded to the submission of Te Tumu Paeroa on Rule **SASM-R5**, but this submission point was subsequently withdrawn. Prior to the withdrawal by Te Tumu Paeroa, Ms Pull had recommended no change to Rule SASM-R5 in response to the submission, considering that every day activities of Māori landowners would not be affected by the rule, which only applies to some sites and temporary activities as defined in the Plan. Ms Pull recommended use of a written approval or certification process.

389. Mr Sutherland confirmed Federated Farmers supported the rule as it was clear and concise.

390. Similar to Rule SASM-R4, Mr McEnaney questioned the written approval or certification process for a permitted activity as he considered it was an administrative step rather than determining activity status by reference to effects on the environment. He acknowledged that Far North District Council included a similar provision in their district plan. He did not see the need for temporary events and activities with minor effects on SASMs to apply to private land, which he thought should be permitted activities.

391. In relation to Rule **SASM-R6**, Ms Pull recommended use of a written approval or certification process. Mr Kennedy identified 20 sites where the rule would impact Westpower infrastructure, which he said was over 20% of sites. He favoured a single rule for Westpower infrastructure to be able to manage issues in a comprehensive and co-ordinated manner. He confirmed that Westpower support the certification process. He queried whether the rule referred to the correct tables and identified a relationship with Rule SASM-R3 rather than Rule SASM-R2 in the title.

392. Similar to Rule SASM-R2, Mr McEnaney sought that the rule provides for the replacement of fence posts and fence maintenance as a permitted activity and allow for installation of a new fence along the boundary of a SASM as a permitted activity. He considered the scope of

permitted activities was narrow and that small projects with minor effects should be able to obtain consent more easily compared to large, complex projects via a controlled or restricted discretionary pathway.

393. In relation to Rule **SASM-R7**, Ms Pull recommended use of a written approval or certification process. Ms Pull also responded to the concept of "*Victorian title*" and considered there was potential for confusion about what it meant. She noted that not all natural state pounamu was owned by Te Rūnanga o Ngāi Tahu. She therefore recommended amendment to the Advice note accompanying the rule, as follows:

> 1. ~~Under t~~The Ngai Tahu (Pounamu Vesting) Act 1997~~, all pounamu is owned by~~ vested Crown owned pounamu in Te Rūnanga o Ngāi Tahu~~. Any pounamu or Aotea disturbed shall be returned to the relevant~~ Please contact a Poutini Ngāi Tahu ~~papatipu rūnanga – Te Rūnanga o Ngāti Waewae o Te Rūnanga o Makaawhio.~~ Rūnanga or the Department of Conservation if any raw pounamu finds, not discovered on beaches open to public fossicking, are made.

394. Ms Pull also supported the introduction of proposed Method SASM-M3 in the s42A Report to assist with implementation of a written approval or certification process.

395. Mr Sutherland identified that that heading and body of the rule did not align and sought greater clarity in the rule drafting with regards to management of farm quarries. He considered that mineral extraction and farm quarries should be separated within the rule because they are two different uses, one about farm maintenance and the other about commercial activity. He supported the s42A Report recommendations.

396. Mr McEnaney considered that Pounamu and Aotea overlays should only apply where those resources have been identified as present, to avoid the need for unnecessary resource consents. He sought deletion of clause (3) in the rule or amendment of the spatial extent of the overlay.

397. In relation to Rule **SASM-R9**, Ms Pull supported use of the term "*Regionally Significant Infrastructure".* Mr Kennedy identified some overlap with Rule SASM-R9 between SASM 62 in SASM-R2 and SASM 55 in Rule SASM-R6, which he noted could be a mapping error. He saw some potential for confusion in implementing Rule SASM-R9.

398. In relation to Rule **SASM-R10**, Ms Pull supported use of the term "*Regionally Significant Infrastructure*". Mr Kennedy maintained that the additional wording sought in submission would clarify the rule but did not pursue the point. He assumed that the rule did not apply to activities under Rule SASM-R9 and Table SASM-T8, but did apply to sites and areas identified in SASM-T2, SASM-T3, SASM-T4, SASM-T6 and SASM-T7. He was unsure whether compliance with Rule SASM-R4 negated the need for a controlled activity consent under Rule SASM-R10, and particularly clause (4). He favoured the certification process and a separate rule for Westpower activities. He recommended allowing a maximum depth of 1200mm for replacement of poles and for underground activities.

399. In relation to Rule **SASM-R12**, Mr Kennedy indicated some confusion as to whether the rule applied to network utilities and expressed concern that parties other than Poutini Ngāi Tahu may become involved if the affected party were not identified in the rule.

400. In relation to Rule **SASM-R13**, Ms Pull supported use of the term "*Regionally Significant Infrastructure".* Mr Kennedy expressed concern that parties other than Poutini Ngāi Tahu may become involved if the affected party were not identified in the rule. He also pointed out that Rule SASM-R13 was the first rule to refer to "*new*" activities and that the controlled activity

pathway in Rule SASM-R10 was therefore not available for such activities, including within a large part of Greymouth township. He recommended either developing a specific rule or amending the scope of Rule SASM-R10.

401. In relation to Rule **SASM-R14**, Mr Kennedy expressed concern that parties other than Poutini Ngāi Tahu may become involved if the affected party were not identified in the rule.

402. In relation to Rule **SASM-R16**, Mr Sutherland sought that "*shelterbelts*" be excluded because they provide shelter for stock, as well as seasonal food supply and shelter for indigenous fauna. He supported the Poutini Ngāi Tahu submission point that differentiated "*amenity plantings*" and considered that shelterbelts can be considered amenity plantings, as well as providing essential services for animal welfare, and can assist with management of nutrient run-off. He wanted their exclusion specifically included in the rule, rather than relying on the term "*amenity plantings*" so that there was no doubt.

403. In relation to Rule **SASM-R17**, Mr Sutherland expressed concern that the rule could capture indoor raised stock. He considered that an amendment to the definition of "*intensive indoor primary production*" could assist or otherwise wintering barns could be provided for as a restricted discretionary activity with limited notification to Poutini Ngāi Tahu. He noted that SASM could cover whole farms and that there was a need to provide for wintering barns. Mr Sutherland did not support the s42A Report recommendations and was concerned about how to determine the 50m buffer when a site was not pinpointed within an area.

Reporting Officer Reply Evidence

404. Ms Easton reconsidered Rule **SASM-R4** in light of evidence from GDC regarding indigenous vegetation clearance. She identified five SASM that have developed areas that may include planted gardens, indigenous vegetation or farmed properties, including SASM 33, SASM 52, SASM 102, SASM 135 and SASM 197. She therefore considered there was value in providing for some exceptions to the rule, as follows:

> **SASM - R4 Indigenous vegetation clearance on Sites and Areas ~~in Schedule Three – Sites and Areas~~ of Significance to Māori listed in Table SASM – T4**
> **Activity Status Permitted**
> Where:
> 1. The activity does not occur ~~on the following~~ within the Sites and Areas of Significance to Māori ~~identified in Schedule Three~~ listed in Table SASM – T4, except ~~with the written approval from the~~ where:
>
> i. it has been certified by the relevant Poutini Ngāi Tahu rūnanga that the activity will not have adverse effects on the cultural values of the site or area, with evidence of this certification ~~which is~~ provided to the relevant District Council at least 10 working days prior to the activity commencing; or
>
> ii. this is hand clearance for: the maintenance of existing fencelines within 1m of the fenceline; or removal of planted garden vegetation.
>
> ~~i. All sites identified in Category Tahi (1) and Category Rua (2) in Schedule Three;~~
>
> ~~ii. SASM 52 Cobden Native Reserve;~~
>
> ~~iii. SASM 109 Pyramid Hill/Tumuaki Hill;~~
>
> ~~iv. SASM 117 Waitaiki Catchment;~~

~~v. SASM 156 Te Puku o te Wairapa;~~

~~vi. SASM 159 Tikitiki o Rehua;~~

~~vii. SASM 162 Heretaniwha;~~

~~viii. SASM 170 Porangirangi to Mahitahi;~~

~~ix. SASM 192 Awarua;~~

~~x. SASM 197 Ōkuru;~~

~~xi. SASM 204 Waiototo Lagoon, South Bank Nohoanga; and~~

~~xii. SASM 214 Huruhuru Manu/Spoon River.~~

Advice Note: Indigenous vegetation clearance is also subject to the provisions in the ECO - Ecosystems and Biodiversity Chapter.

405. In relation to Rule **SASM-R5**, Ms Easton responded to a question from the Panel regarding certification, as described in Advice Note (2) in relation to Lake Māhinapua, and whether certification would be required annually. She considered that the frequency of certification for be a matter for the certifying party. She noted there would be opportunity for dialogue with the Lake Māhinapua Aquatic Club as part of the certification process about the scale and types of activities planned and how they could be adjusted over time to recognise cultural values. She relied on the certification process described in the JWS in giving her answer, and considered it was a matter better addressed between the parties than as part of the Plan provisions.

406. As a consequence of Ms Easton agreeing with the evidence of Ms Pull that the matter of ownership of pounamu was not as material to the Plan provisions as the cultural value of the stone, she recommended deleting the Advice Note under Rule **SASM-R7** and its reference to "*Victorian title*".

407. As a consequence of Ms Easton amending Policy SASM-P13, she recommended amending the heading of Rule **SASM-R9** to refer to "*network utility infrastructure*", and she confirmed her support for the inclusion of "*regionally significant infrastructure*" in this rule.

408. As a consequence of Ms Easton amending Policy SASM-P13, she recommended amending the heading of Rule **SASM-R10** to refer to "*network utility infrastructure*", and she confirmed her support for the Rule inclusion of "*regionally significant infrastructure*" in this rule.

409. As a consequence of Ms Easton amending Policy SASM-P13, she recommended amending the heading of **SASM-R13** to refer to "*network utility infrastructure*", and she confirmed her support for the inclusion of "*regionally significant infrastructure*" in this rule.

Hearing Panel's Evaluation

410. The Panel recommends amendment to Advice Note (2) in order to reflect the amended wording of the Overview regarding ownership of pounamu. The Panel do not consider it necessary to refer to Victorian title given that, where such title is proven, pounamu will be encountered *in situ* where the title is present. In a wider catchment setting, such as the Arahura River catchment or another pounamu rich catchment, the likelihood increases that pounamu vested with Poutini Ngāi Tahu or Māwhera Incorporation will be incidentally

encountered outside of public fossicking beaches. This may be true during minor earthworks activities, for instance, similar to accidental discovery of other taonga.

411. The Panel accept the evidence of Ms Pull that the recommended new methods should reference the certification process, which the Panel has recommended be incorporated into new Method SASM-M1. The Panel also recommends an additional advice note that alerts plan users to the presence of the methods at the end of the rules because this differs from other chapters of the Plan where there are no methods.

412. The Panel has thoroughly considered the matter of written approval and certification within permitted activity rules (e.g. notified Rule SASM-R2), based on the various legal opinions received and the collective view of the planners in the JWS. The understanding of the Panel is that a level of agreement was reached by the parties to make a permitted activity process work, in preference to a resource consent process. The Panel find that it is desirable to support a permitted activity process that is simple to administer, and therefore efficient and cost effective, whilst allowing for Poutini Ngāi Tahu to confirm that a proposed activity will not give rise to adverse effects of concern on values in sensitive sites and areas. In landing on an option to achieve this outcome, the Panel has first considered the alternative of a controlled activity. Aside from determining suitable matters of control, establishing a controlled activity status for the activities that were notified as permitted activities requiring written approval would be a fairly straightforward recommendation. However, such a recommendation would not achieve what was sought to be achieved by the notified Plan. Use of controlled activity status would increase the administrative burden on the Councils and increase cost and complexity for resource users. The Panel consider that the notified approach has support from a number of submitters, with submission points predominantly concerned about the way in which the process for permitted activities would work, in order to be able to rely upon a permitted status. This has also been a primary concern of the Panel in considering the most effective and efficient rule framework.

413. The Panel find that a written approval process, although it has been occurring since notification of the Plan without incident (based on evidence provided by Poutini Ngāi Tahu), is not the right approach over the life of the Plan. The Panel determine that a written approval process constitutes third party approval and is therefore potentially *ultra vires,* although acknowledging the advice of Ms Scott that this has not been tested by the courts. The Panel accept the concerns of submitters that written approval may be withheld for a variety of reasons in the absence of parameters set in the Plan, or even potentially withdrawn, which creates uncertainty for resource users[123]. The Panel accept that written approval as part of a permitted activity is a "novel" mechanism to include within a plan, as opposed to occurring as part of a resource consent process. The Panel's preference is to utilise a proven mechanism that is found in other district plans, which provides more certainty for Plan users. We consider that a certification process better formalises the written approval process that has been relied upon since notification of the Plan.

414. The Panel agree with the assessment of legal counsel and the planners that a certification process can form part of a permitted activity rule, looking at other district plans around the country. A certification process, therefore, does not give rise to the same concerns as a written approval process. We note that certification as proposed by the planners in the JWS relies upon a suitably qualified or experienced person certifying that an activity does or does not given rise to adverse effects of concern on the values of a particular SASM. The Panel recognise that, in this case, the suitably qualified or experienced person is not independent,

[123] For example, Stephen Page S270.015, Erin Stagg S314.004, Misato Nomura S151.004, Kirsty Henderson S125.001 and Buller District Council S538.179

as expected with other kinds of environmental effects, because of who holds the necessary mātauranga or knowledge. We accept that this is necessarily true, consistent with relevant case law[124]. The Panel understand that certification in relation to effects on mana whenua values is also "novel" because there are no examples of an equivalent approach being taken in any other jurisdiction for these types of environmental effects. The Panel does not see this as a barrier to adopting a certification process, but it does mean that considerable care has been taken to ensure that there are clear parameters and that the process can be readily understood by Plan users. The Panel is first guided in this regard by the legal advice received, and in particular, that a permitted activity rule "*must not reserve by subjective formulation a discretion to decide whether an activity is a permitted activity*"[125], and also by the advice of the planners recorded in the JWS.

415. The Panel agree with Ms Scott that cultural expertise is required to understand effects on mana whenua values, and that such expertise will necessarily sit within Poutini Ngāi Tahu, as she outlined in the joint memorandum of counsel[126]. We also agree that the determination would necessarily be binary in nature, rather than being dependent upon an approach that was subject to conditions - either the proposed activity does or does not give rise to adverse effects of concern to Poutini Ngāi Tahu on values that are present within the sensitive site or area.[127] The Panel therefore identify that certification is: (a) reliant upon the details of a proposed activity as provided to Poutini Ngāi Tahu; (b) specific to the identified values of a particular SASM; and (c) a determination that is not subject to any conditions or caveats. These aspects of the certification process are incorporated in our recommendation on Schedule Three (SCHED 3A) and further discussed in relation to that new Schedule to the Plan.

416. The Panel disagree with Ms Rusher that determining that a proposed activity within a sensitive site or area does not give rise to adverse effects on values present in the site or area necessarily means that there is an issue with the spatial extent of a SASM. We are satisfied that it will be the particulars of a proposed activity that will be considered and certified by Poutini Ngāi Tahu in the circumstances of each site or area, and accept that it would be onerous to identify all potential variations of sensitivities within a site or area and particulars of proposed activities. We do not consider it to be efficient to undertake such an identification process, which also may not be achievable. We are satisfied that a process has been undertaken by Poutini Ngāi Tahu to "narrow down" the types of activities that are permitted in certain sites or areas, and that allowance has been made through some of the permitted activity rules to accommodate activities, provided there is an opportunity for Poutini Ngāi Tahu to review what is proposed, and confirm that there are no concerns with regards to adverse effects on mana whenua values once the particulars of a proposal are known. The Panel disagree with Ms Rusher that this is a matter for the Panel to determine because the members do not have the necessary expertise to establish whether or not the particulars of an activity will give rise to adverse effects on mana whenua values associated with a particular SASM[128].

417. The Panel is assisted by the joint memorandum of counsel findings regarding the necessity for criteria to be included in a Plan if a certification process is to be used as part of a permitted activity rule. We understand that it is the combination of criteria and expertise that are necessary for a certification process, and that the making of a substantive decision cannot be

[124] For example, Environmental Protection Society Inc v Tauranga City Council [2021] 3 NZLR 882 at [65] and SKP Incorporated v Auckland Council [2018] NZEnvC 81 at [157] as noted in Footnote 34 of this report
[125] Confirmed as the most relevant principle in the Joint Memorandum of Counsel, 7 June 2024, para 4
[126] Ibid., para 7
[127] Ibid., para 10
[128] Ibid., para 31

delegated[129]. The joint memorandum of counsel confirms the position in case law that "*persons who hold mana whenua are best placed to identify impacts of any proposal on the physical and cultural environment valued by them*"[130]. As previously noted, we accept this position and have therefore concentrated on the nature and role of criteria and the process of certification. The Panel also accept the advice of Ms de Latour that certification is binary in nature (similar to the advice of Ms Scott), and therefore a matter of the presence or absence of effects of concern, rather than a consideration of the level of effect, which she advises will ensure that there has been no delegation of a substantive decision[131]. In this regard, we understand that Ms de Latour is making a distinction between confirming the presence or absence of an effect and assessing the scale of an effect that has been found to be present. As such, the Panel also understand that the presence of an adverse effect of concern would mean that certification was not given and that therefore the level of effect that has been found to be present would be assessed as part of a discretionary resource consent process. The Panel note that at that point Poutini Ngāi Tahu may be able to provide an indication of the basis upon which they would provide written approval, for instance once conditions have been put forward to address identified adverse effects of the proposed activity, for inclusion on a resource consent.

418. The Panel acknowledge that the planners' preference (as recorded in the JWS) is for a permitted activity rule reliant on certification, similar to that in the Ōtorohanga District Plan, included as an example in Appendix 1 of the joint memorandum of counsel. We note that this example from the Ōtorohanga District Plan allows for an assessment by a suitably qualified person as to the nature of indigenous vegetation present, to determine whether it crosses the threshold of being "*significant*" and therefore requiring protection under section 6(c). We understand that such an assessment is generally undertaken by an ecologist and will be an assessment of vegetation present, and to some extent the impact of loss or modification of that vegetation[132]. In that respect, we are not convinced that methodologies employed by suitably qualified persons are necessarily always black and white, or completely absent of consideration of level of effect, but rather require a judgement based on relevant skills and expertise in order to reach a clear conclusion. This differs from an assessment of a measured level of effect, for instance, such as a particular decibel level from a source of noise, which might also require technical expertise, but judgement based on skills and experience may play less of a role. The Panel agree with the planners that the Ōtorohanga District Plan example is useful in the context of considering adverse effects on mana whenua values and how cultural expertise would be employed in a certification process to reach a clear conclusion. We acknowledge that the planners were unanimous in their preference for the Ōtorohanga example as the basis for amending the rules and incorporating a schedule in the Plan, which would contain the criteria for certification.

419. The Panel recommend inclusion of a new schedule in the Plan, as proposed by the planners in the JWS, to be named "*Schedule Three (SCHED 3A)*" and incorporated at the end of Schedule Three. The contents of new SCHED 3A are further discussed in this Recommendations Report when considering Schedule Three, after the recommendations on individual SASM. The Panel's recommendations on the wording of each rule that was notified as a permitted activity requiring written approval are included in this section.

[129] Ibid., para 20
[130] Ibid., para 24
[131] Ibid., para 26
[132] The Ōtorohanga District Plan assessment criteria for the rule are contained in Appendix 2 and include a criterion that must consider whether vegetation in the riparian margin of waterbodies is critical for the life cycle of aquatic species, and therefore to what extent loss of the vegetation would impact on those species.

420. The Panel rely on the s32 Report and s32AA assessments of the planners in adopting a certification process, rather than a written approval process. We consider a certification process to be more certain, and therefore more effective, than the notified written approval process, whilst being similarly efficient and cost effective for the Councils and resource users.

421. In relation to Rule **SASM-R1**, the Panel notes that Poutini Ngāi Tahu requested that SASM 22, Ōkari Lagoon, be removed from SASM – R1 (S620.116), which was not reflected in Ms Easton's Right of Reply. We agree with GDC that SASM 55, Māwhera Burial Cave, is not in a location likely to be grazed by animals and recommend it is removed from Table SASM-T1, as shown in Ms Easton's Right of Reply. This means the permitted activity rule will only apply to five SASM. The Panel otherwise agrees with Ms Easton regarding amendments to the rule arising from the Poutini Ngāi Tahu submission.

422. In relation to Rule **SASM-R2**, the Panel recommend amending the wording to reflect our acceptance of a certification process instead of requiring written approval, in response to submissions.[133] This is the first of the permitted activity rules that were notified as requiring written approval for certain activities in identified SASM and we recommend wording in this rule is replicated in the other permitted activity rules notified as requiring a written approval process.

423. The Panel recommends amending the notified wording to that provided by the planners in the JWS, with some simplification of the reference to "*being assessed and certified as not having adverse effects on cultural values*", to match the text recommended by the Panel in new Schedule Three (SCHED 3A). The Panel recommends the wording in the rule simply refers to certification *"in accordance with Schedule Three (SCHED 3A)*" so that the matter of "*not having adverse effects on cultural values*" is addressed in the Schedule (including by amending the wording proposed for the Schedule as drafted by the planners in the JWS). This is further discussed within this report in the section on Schedule Three (SCHED 3A).

424. The Panel otherwise agree with the reasoning of Ms Easton in relation to this rule but could not find analysis for inclusion of the new advice note. However, the Panel consider it to be a helpful addition for plan users navigating rules in the chapter.

425. In relation to Rule **SASM-R3**, the Panel accepts the reasoning of Ms Easton in her s42A Report and Right of Reply, whilst recommending amendments to the wording regarding certification in order to be consistent across similar permitted activities.

426. In relation to Rule **SASM-R4**, the Panel accepts the reasoning of Ms Easton in her s42A Report and Right of Reply, whilst recommending amendments to the wording regarding certification to be consistent across the rule framework. We recommend SASM 34, Te Nikau Scenic Reserve, is deleted from Table SASM – T4 as a consequence of our recommendation for that SASM, as discussed later in this Report in relation to Schedule Three. We understand the concerns expressed by Westpower regarding clearance of vegetation around electricity distribution lines and have considered Mr Kennedy's requested addition to the rule but note his acceptance of Ms Easton's recommendations and support for certification through the JWS. The Panel also note that recommendations for rules SASM-R9 and SASM-R10 are likely to address any remaining concerns of Mr Kennedy.

427. In relation to Rule **SASM-R5**, the Panel considers that Advice Note (2), as proposed in the s42A Report, is not required. The Panel find it necessary to differentiate between activities that may

[133] For example, Misato Nomura S151.004, Kirsty Henderson S125.001, Stephen Page S270.015, Erin Stagg S314.004, Michael Robson S327.002, J P Parsons S335.001, Buller District Council S538.179

be permitted under Rule ASW-R2 and other activities that may be subject to Rule SASM-R5, to ensure that the Plan is internally consistent. The Panel therefore include a further exception to the rule that references Rule ASW-R2. We otherwise accept the reasoning of Ms Easton and recommend amendment to the wording regarding certification to be consistent across the rule framework. The Panel recommends SASM 34, Te Nikau Scenic Reserve, is deleted from Table SASM–T5 as a consequence of our recommendation for that SASM, as discussed later in this Report in relation to Schedule Three.

428. In relation to Rule **SASM-R6**, the Panel agrees with the recommendations and reasoning of Ms Easton. As with other rules, we recommend SASM 34, Te Nikau Scenic Reserve, is deleted from Table SASM–T6 as a consequence of recommendation for that SASM, and recommend amendment to the wording regarding certification to be consistent across the rule framework. The Panel has considered the evidence of Westpower and consider that there is provision within the rules as a consequence of recommendations for rules SASM-R9 and SASM-R10.

429. In relation to Rule **SASM-R7**, the Panel is concerned with ensuring the rule is clear about its purpose, which is to manage activities within the jurisdiction of the district plan, as distinct from the management of mineral extraction under the Crown Minerals Act. The Panel has amended wording in the rule to ensure there is no confusion, utilising RMA Schedule 1, clause 16 to ensure the rule is managing activities that disturb or remove pounamu or aotea during mineral extraction or quarrying. The Panel agree with Federated Farmers and Forest & Bird submission points that indicate confusion arising from the three standards in the notified rule and how they are intended to work, including in relation to who is undertaking the activity, what the activity is, and how the rule relates to other rules in the Plan. The Panel has recommended amendments to the wording of the rule to clarify the intention of each standard in the rule.

430. The Panel accept the JWS version of the title, including reference to SASM in Schedule Three, which differs from the s42A Report that excluded SASM in Schedule Three. No explanation is provided in the JWS for this amendment, but the Panel considers it is likely there may be pounamu or aotea within some SASM and that application of the rule in those sites and areas is therefore appropriate. The Panel has recommended removing capitalisation of the words "*pounamu*" and "*aotea*" and using the full title of the overlays, being the "*Pounamu Management Area*" and the "*Aotea Management Area*". The extent of these overlays is discussed later in this Report. The Panel recommends not including Advice Note (1) as shown in the Right of Reply evidence because it replicates Advice Note (2) included at the start of all the rules in the chapter. The Panel do not consider it necessary to repeat the advice. Otherwise, the Panel accepts the recommendation to include a new advice note in response to the Forest & Bird submission point.

431. In relation to Rule **SASM-R8**, the Panel has similar concerns about this rule as notified, which needs to be clear about its purpose. The rule must manage activities within the jurisdiction of the district plan, as distinct from the management of mineral extraction under the Crown Minerals Act. The Panel has amended wording in the rule to ensure there is no confusion, utilising RMA Schedule 1, clause 16 to express that the rule is managing land disturbance associated with fossicking. The Panel acknowledge the three submissions in support of this rule.

432. In relation to Rule **SASM-R9**, the Panel accepts the reasoning of Ms Easton and her recommended amendments in the Right of Reply. We have considered the evidence of Westpower and conclude that suite of permitted activity rules will provide suitable pathways for maintenance, operation and upgrade of the existing electricity distribution network. The

Panel notes the point made by Mr Kennedy regarding overlapping SASM but consider that the overlapping SASM will not impede decision-making or ability for infrastructure providers to be able to rely on Rule SASM-R9.

433. In relation to Rule **SASM-R10,** the Panel accepts the recommended amendments of Ms Easton to the title and the introduction of the advice note in response to the Poutini Ngāi Tahu submission point. However, the Panel have further considered the evidence of Westpower in relation to the depth of earthworks to maintain, repair or upgrade infrastructure and prefer the wording proposed in their submission for clause (2). We consider that, as this is a controlled activity rule, the matters for control will allow an assessment of the extent of any earthworks, with conditions to manage any actual or potential adverse effects. We make this recommendation in light of the purpose of the rule, which is the maintenance, repair and upgrade of existing network utility infrastructure or RSI.

434. In relation to Rule **SASM-R11,** the Panel accepts the recommended amendments of Ms Easton in her s42A Report and Right of Reply, and her reasoning. However, the Panel does not consider it necessary to have an advice note regarding pounamu when there is already one at the beginning of all the rules. The Panel also prefers the phrase "*will consult with*" rather than "*will be informed by advice from*" in the advice note regarding notification.

435. In relation to Rule **SASM-R12,** the Panel accepts the recommended amendments of Ms Easton and her reasoning, aside from preferring consistent wording for the notification advice note. The Panel also recommends minor and consequential amendments.

436. In relation to Rule **SASM-R13,** the Panel accepts the recommended amendments of Ms Easton and her reasoning, aside from preferring consistent wording for the notification advice note. The Panel also recommends minor and consequential amendments.

437. In relation to Rule **SASM-R14,** the Panel accepts the recommended amendments of Ms Easton and her reasoning, aside from preferring consistent wording for the notification advice note. The Panel also recommends minor and consequential amendments.

438. In relation to Rule **SASM-R15,** the Panel accepts the recommended amendments of Ms Easton and her reasoning, including the re-classification of the rule as discretionary in response to the submission of Poutini Ngāi Tahu, aside from preferring consistent wording for the notification advice note. However, we recommend that the proposed activity in special purpose zones should be limited to the BCZ, MINZ and MPZ zones because it would not be appropriate for the Plan to enable mineral extraction and quarrying activities in the AIRPZ, FUZ, HOSZ, PORTZ, STADZ or SVZ zones. The Panel also recommends minor and consequential amendments.

439. In relation to Rule **SASM-R16,** the Panel accepts the recommended amendments of Ms Easton and her reasoning, aside from preferring consistent wording for the notification advice note. In addition, we recommend amendment to match the NES-CF, referring to "*commercial forestry*" instead of "*plantation forestry*" to avoid unintended consequences of a gap in the rule in relation to "*exotic continuous-cover forestry*", which is not covered by the definition of "*plantation forestry*" in the NES-CF but is included in the definition of "*commercial forestry*". The Panel has also recommended that the proposed activity in special purpose zones should be limited to the BCZ, MINZ, and MPZ because it would not be appropriate for the Plan to enable commercial forestry and woodlots in the AIRPZ, FUZ, HOSZ, PORTZ, STADZ or SVZ zones. The Panel also recommends minor and consequential amendments.

440. In relation to Rule **SASM-R17,** the Panel accepts the recommended amendments of Ms Easton and her reasoning, aside from preferring consistent wording for the notification advice note. We also recommend minor and consequential amendments, including as a result of recommendations regarding definitions earlier in this report. We consider that the types of activities covered by Rule SASM-R17 may occur in a variety of special purpose zones, therefore it is not recommended to amend that aspect of the rule. The Panel has further considered the evidence of Federated Farmers but do not recommend amendment to the rule. We consider that a resource consent process, while a non-complying activity, would allow for discussions with Poutini Ngāi Tahu regarding written approval based on the design or location of any intensive indoor primary production. This is considered by the Panel to be appropriate given the various sensitivities of identified SASM and provides a consent pathway depending on the circumstances.

441. In relation to Rule **SASM-R18,** the Panel generally accept the recommendation and analysis of Ms Easton, aside from preferring consistent wording for the notification advice note. However, we do not consider it necessary to retain the standard in the rule given that it is a catch-all rule after all other rules have been breached. The Panel recommend deleting reference to '*controlled and restricted discretionary rules'* in the title to the rule because there are no applicable rules of this classification associated with the activities.

442. In relation to Rule **SASM-R19,** the Panel generally accept the recommendation and the analysis of Ms Easton. However, we have recommended amendment to the title of the rule to reflect changes made to rules SASM-R7 and SASM-R8, to make the rule less confusing, given its antecedents are only the first standard of rules SASM-R7 and SASM-R8, which are specific to aotea, the Aotea Management Area, and Ngāti Māhaki.

Hearing Panel's Recommendation

443. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends accepting or accepting in part the submission points footnoted below, and recommend the following changes to the **Sites and Areas of Significance to Māori Rules**:

Sites and Areas of Significance to Māori Rules
Advice Notes: 1. There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan users should take to determine the status of an activity are provided in General Approach. 2. Under the Pounamu Vesting Act all pounamu ~~is owned by~~ **formerly owned by the Crown was vested in** Te Rūnanga o Ngāi Tahu. **In the case of pounamu in the Arahura River catchment, this has in turn been vested in Māwhera Incorporation.** Please contact ~~a~~ Poutini Ngāi Tahu ~~Rūnanaga~~ or the Department of Conservation if any raw pounamu finds, not discovered on beaches open to public fossicking, are made, **and return it to the relevant owner.**[134] 3. Poutini Ngāi Tahu may place a restriction on fossicking to protect pounamu resources or

[134] The Proprietors of Māwhera Incorporation S621.019

for cultural reasons. These restrictions may limit both the activity and the locations available for collection.
4. Fossicking for pounamu on the beaches of the West Coast/Te Tai o Poutini is limited to what an individual can physically lift by themselves and take unaided within a 24 hour period.
5. The rules are accompanied by methods that are shown at the end of the rules and indicate the means by which the policies and rules of the chapter will be implemented. This differs from other parts of the plan that do not contain methods.[135]

Permitted Activities

SASM -R1 Grazing of Animals on ~~Sites and Areas in Schedule Three –~~[136] Sites and Areas of Significance to Māori listed within Table SASM – T1[137]

1. Where the activity is not ~~on the following~~ **in the** Sites and Areas of Significance to Māori ~~as identified in Schedule Three~~ **listed within Table SASM – T1**: ~~SASM 22 Ōkari Lagoon[138]; SASM 41 Kotorepi (Nine Mile); SASM 55 Māwhera Burial Cave Site[139]; SASM 81 Takataka Islands; SASM 84 Knoll Point; SASM 127 Ulipa; SASM 133 No. 19 Ōkārito Native Reserve; SASM 135 Ōkārito (No. 18 Kaomaru Native Reserve); SASM 168 No. 4 Heretaniwha Native Reserve; or SASM 207 Awawhata Reserve at River Mouth.~~

Activity status where compliance not achieved: Discretionary

SASM - R2 Minor Earthworks on ~~Sites and Areas in Schedule Three –~~[140] Sites and Areas of Significance to Māori listed within Table SASM – T2[141]

Activity Status Permitted

1. These are earthworks associated with:

~~i~~**a**. Burials at urupā; or

~~ii~~**b**. Archaeological survey by Pouhere Taonga – Heritage New Zealand, Poutini Ngāi Tahu or authorised representatives; or

~~iii~~**c**. Installing fence posts and the replacement of poles for overhead network utility lines provided that:

~~A~~**i**. The area of land disturbed is limited to what is necessary to maintain an existing fence or line along its existing alignment; and

~~B~~**ii**. The activity does not involve installation or digging of new holes for overhead network utility lines; or

[135] RMA First Schedule, Clause 16
[136] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.395
[137] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.116
[138] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.116, so SASM 22 Ōkari Lagoon is not subject to the rule
[139] Grey District Council S608.023, so SASM 55 Māwhera Burial Cave Is not subject to the rule
[140] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.395
[141] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.117, consequential amendment

~~iv~~**d**. Maintaining roads/tracks within the footprint or modified ground compromised by the existing road/track; and

2. In relation to standards ~~ii.~~**a)**, ~~iii.~~**b)** and ~~iv.~~**c)**[142] these earthworks are not undertaken at the ~~following Sites and Areas of Significance to Māori identified in Schedule Three~~ **Sites and Areas of Significance to Māori listed in Table SASM – T2**[143] ~~except with the written approval from the relevant Poutini Ngāi Tahu rūnanga which~~ **where the activity has been certified by an authorised representative of the relevant Poutini Ngāi Tahu rūnanga in accordance with Schedule Three (SCHED 3A) and this certification**[144] is provided to the relevant District Council at least 10 working days prior to the activity commencing~~:~~

~~i.a) SASM 17 Kawatiri South Bank Native Reserve; SASM 41 Kotorepi (Nine Mile); SASM 54 Motutapu; SASM 55 Māwhera Burial Cave Site; SASM 81 Takataka Islands; SASM 84 Knoll Point; SASM 110 Māhinapua; SASM 127 Ulipa; SASM 130 Whataroa Native Reserves Secs 21; SASM 133 No. 19 Ōkārito Native Reserve; SASM 135 Ōkārito (No. 18 Kaomaru Native Reserve); SASM 155 Hunts Beach Māori Reserve; SASM 157 No. 10 Makāwhio Native Reserve; SASM 162 Heretaniwha; SASM 165 No 7. Mahitahi Beach Native Reserve; SASM 168 No. 4 Heretaniwha Native Reserve; SASM 170 Porangirangi to Mahitahi; SASM 185 Lake Moeraki Reserve; or SASM 207 Awawhata Reserve at River Mouth~~; and

3. An Accidental Discovery Protocol commitment has been completed and the form submitted to Council 10 working days prior to the commencement of any earthworks.

Activity Status where compliance not achieved: Discretionary

Advice Note:
1. Rule SASM – R2 relates to minor earthworks on Sites and Areas of Significance toMāori within Table SASM – T2. There are additional rules for earthworks in other SASMs outlined in rule SASM – R6.[145]

SASM – R3	**Demolition, removal of, or alterations to a building or[146] structure on ~~Sites and Areas in Schedule Three –~~[147] Sites and Areas of Significance to Māori listed within Table SASM – T3**[148]

Activity Status Permitted

Where:

1. In relation to the Sites and Areas of Significance to Māori ~~identified in Schedule Three identified in 2. Below~~ **listed in Table SASM-T3**[149]:

   ~~i~~**a**. The activity does not occur except ~~with the written approval from the relevant Poutini Ngāi Tahu rūnanga which~~ **where the activity has been certified by an authorised representative of the relevant Poutini Ngāi Tahu rūnanga in accordance with Schedule Three (SCHED 3A)**

[170] RMA First Schedule, Clause 16

1. ~~In relation to~~ **The activity is mineral** extraction that **disturbs or removes** ~~A~~**a**otea:

   ~~i~~**a**. ~~Any extraction of Aotea~~ **this** is only undertaken by Te Rūnanga o Makaawhio or their authorised representatives or contractors; **and**

   ~~ii~~**b**. Where an Aotea Management Plan prepared by Te Rūnanga o Makaawhio exists, ~~any extraction of Aotea is~~ **the activity is undertaken** in accordance with that plan; **and**

   ~~iii~~**c**. Where ~~this is Aotea extraction~~ **the activity occurs** in the Aotea ~~overlay~~ **Management Area**, notice of the activity is provided to the Westland District Council by Te Rūnanga o Makaawhio~~,~~ at least 10 working days prior to the activity ~~occurring~~ **commencing**.

2. ~~In relation to~~ **The activity is mineral** extraction ~~of~~ **that disturbs or removes** ~~P~~**p**ounamu:

   ~~i~~**a**. ~~Any extraction of Pounamu~~**This**[171] is only undertaken by **Te Rūnanga o Ngāi Tahu,**[172] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio or their authorised representatives or contractors;~~ **and**

   ~~ii~~**b**. Where a~~n~~ ~~P~~**p**ounamu Management Plan prepared by Poutini Ngāi Tahu exists, ~~any extraction of P~~**p**~~ounamu is~~ the activity is undertaken in accordance with that plan; **and**

   ~~iii~~**c**. Where ~~this Pounamu extraction is~~ **the activity occurs** within the Pounamu ~~overlay~~ **Management Area**,[173] notice of the activity is provided to the relevant district council by the relevant Poutini Ngāi Tahu rūnanga, at least 10 working days prior to the activity commencing;

3. ~~In relation to other~~**The activity is** mineral extraction and quarrying activity **(including farm quarries) that disturbs or removes pounamu and is not undertaken by Poutini Ngāi Tahu:**[174]

   ~~i~~**a**. ~~Written approval is provided by~~ **The mineral extraction or quarrying** ~~the relevant Poutini Ngāi Tahu rūnanga – Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio, that the activity can occur within the Pounamu and/or Aotea overlay(s) and the written confirmation shall be~~ **has been certified by an authorised representative of the relevant Poutini Ngāi Tahu rūnanga in accordance with Schedule Three (SCHED 3A) and this certification is**[175] provided to the relevant district council at least 10 working days prior to the activity commencing.

Activity Status where compliance not achieved:

Prohibited where Standard 1 ~~or 2~~ is not complied with.

Discretionary where Standard **2 or**[176] 3 is not complied with.

Advice Note~~s~~:

1. ~~Under the Pounamu Vesting Act, all pounamu is owned by Te Rūnanga o Ngāi Tahu. Any pounamu or Aotea disturbed shall be returned to the relevant Poutini Ngāi Tahu papatipu rūnanga - Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio.~~

[171] RMA First Schedule, Clause 16, consistent with recommendations on notified SASM P6 (re-named SASM P5)
[172] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.122
[173] RMA First Schedule, Clause 16
[174] Royal New Zealand Forest & Bird Protection Society Inc S560.190, Federated Farmers of New Zealand – West Coast S524.055, Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.122
[175] Misato Nomura S151.004, Kirsty Henderson S125.001, Stephen Page S270.015, Erin Stagg S314.004, Michael Robson S327.002, J P Parsons S335.001
[176] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.394

This rule manages the adverse cultural effects of mineral extraction and quarrying in relation to the cultural taonga of pounamu and aotea. This rule is in addition to the rules in the zone chapters for mineral extraction and quarrying.[177]

SASM – R8	**Land disturbance from ~~F~~fossicking of Aotea by Ngāti Mahaki whanui within the Aotea ~~overlay~~ Management Area**[178]

Activity Status Permitted

Where:

1. Any **land disturbance associated with** fossicking **for** ~~of~~ ~~A~~**a**otea stone is only undertaken by Ngāti Māhaki o Makaawhio whanui and only occurs seaward of the State Highway Bridge on the Makaawhio (Jacobs) River within the Aotea ~~overlay~~ **Management** ~~a~~**A**rea.
2. Any **land disturbance associated with** fossicking of ~~A~~**a**otea is in accordance with:
   ~~i~~**a**. An Aotea Management Plan prepared by Te Rūnanga o Makaawhio; or
   ~~ii~~**b**. Where there is no Aotea Management Plan, ~~the fossicking~~ **any resulting removal of aotea** is limited to what an individual can hold within one hand within any 24 hour period.

Activity Status where compliance not achieved: Prohibited

Advice Note:

1. Te Rūnanga o Makaawhio do not allow public fossicking to protect the ~~A~~**a**otea[179] resource and for cultural reasons.

SASM – R9	**Maintenance, Repair and Upgrading of Network Utility ~~Structures~~ Infrastructure**[180] **and Regionally Significant Infrastructure**[181] **on or within Sites and Areas of Significance to Māori ~~identified in Schedule Three~~ listed in Table SASM – T8**[182]

Activity Status Permitted

Where:

1. The activity occurs within the Sites and Areas of Significance to Māori listed within Table SASM – T8. ~~in the following Sites and Areas of Significance to Māori as identified in Schedule Three:~~

~~i. SASM 10 Kawatiri Pā~~

~~ii. SASM 12 Kawatiri Town Reserve~~

Activity Status where compliance not achieved: Controlled

Controlled Activities

SASM -R10 **Maintenance, Repair and Upgrading of Network Utility ~~Structures~~ Infrastructure[184] and Regionally Significant Infrastructure[185] on or within ~~Sites and Areas in Schedule Three –~~ [186]Sites and Areas of Significance to Māori where Permitted Activity standards are not met**

Activity Status Controlled

Where:

1. Notice of works is provided to the relevant Poutini Ngāi Tahu rūnanga – Te Rūnanga o Ngāti Waewae or Te Rūnanga of Makaawhio, 10 working days prior to any earthworks commencing; and

2. The work**s** ~~is~~ **are** in an area that has previously been disturbed by the network utility **infrastructure or regionally significant infrastructure**[187] **and the area of land disturbed is limited to what is necessary for the work required**; ~~and~~ **or**~~:~~

~~a. For the maintenance, repair and upgrading of above ground structures any earthworks involves no more than 0.3m2 to a maximum depth of 450mm at the base of the above ground structure; and~~

~~b. For underground structures, a maximum area of 10m2 or a maximum volume of 5m3 of land; or.~~ [188]

[183] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.393
[184] Westpower Limited S547.234, infrastructure includes buildings and structures
[185] Manawa Energy Limited S438.073
[186] Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.395
[187] RMA First Schedule, clause 16
[188] Westpower Limited S547.234

3. The work is installing customer connections to an existing network, provided that any associated earthworks are limited to the extent that is necessary to install the connection; or

4. The work is the trimming or removal of trees or vegetation for the purpose of protecting the integrity of the structure or is otherwise undertaken in accordance with the Electricity (Hazards from Trees) Regulations 2003.

Matters of control are:

a. Area and depth of earthworks for above ground structures;
b. Area and volume of earthworks for underground structures;
c. Extent of earthworks for new customer connections;
d. Extent of any vegetation trimming or removal;
e. Impacts of the activity on the cultural values on any site or area of significance to Māori;
f. Implementation of any advice received from the relevant Poutini Ngāi Tahu rūnanga on ways to manage the effects on cultural values of the proposed maintenance works.

Activity Status where compliance not achieved: Discretionary

Advice Note:

1. This rule applies to all Sites and Areas of Significance to Māori, not only those sites and areas within Table SASM– T8[189]

Discretionary Activities

SASM -R11	**~~Farm~~ Quarries, including Farm Quarries,**[190] **and Mineral Extraction Activities within the Pounamu Management Area and Aotea ~~Overlay~~ Management Area~~s~~ or in a Site or Area of Significance to Māori in Schedule Three**[191] **not meeting Permitted Activity Standards**

Activity Status Discretionary

APPENDIX 1:RECOMMENDATIONS FOR DEFINITIONS, SITES AND AREAS OF SIGNIFICANCE TO MĀORI CHAPTER 98

Recommendation on Pounamu Management Overlay and Aotea Management Overlay

Submissions and Further Submissions

1. The s42A Report summarised a number of submission points and Ms Easton provided recommendations in response to evidence.

2. In relation to the rules applying within the Pounamu Management Overlay and the Aotea Management Overlay, there were two general submissions seeking amendment to recognise "*Victorian title*" and one further submission in opposition from Poutini Ngāi Tahu.

3. In relation to the planning maps and the extent of the Pounamu Management Overlay and the Aotea Management Overlay, there were seven submissions (three opposed and four seeking amendments). Some submitters opposed the extent of the overlays based on the presence of "*Victorian title*" (e.g. Ridgeline 3 Investments Ltd, S127.001) or otherwise sought to have them adjusted to reflect known deposits (e.g. Anne Chapman, S425.005). Poutini Ngāi Tahu sought to amend the overlays to follow the Waitaha River and Haast River and to adjust the northern Pounamu Management Area boundary (S620.022, S620.399).

Section 42A Report

4. Ms Easton supported Poutini Ngāi Tahu's requested amendments to the Pounamu Management Overlay and the Aotea Management Overlay maps.

Hearing and Submitter Evidence/Statements

5. Ms Pull for Poutini Ngāi Tahu relied on the evidence of Mr Madgwick in relation to the cultural value of pounamu and aotea to Poutini Ngāi Tahu and the geographic boundary identified in the planning maps. She noted that Poutini Ngāi Tahu experts had worked with Council staff to make the mapping as accurate as possible.

6. Mr McEnaney for GDC considered that pounamu and aotea overlays should only apply where those resources have been identified as present, to avoid the need for unnecessary resource consents.

Reporting Officer Reply Evidence

7. Ms Easton did not further address the mapped overlays in her right of reply.

Hearing Panel's Evaluation

8. The Panel accept the amended mapped boundaries as contained in the Poutini Ngāi Tahu submission and evidence, including their response to concerns raised that have reduced or refined the area of the overlays. The Panel note that amendments to mapped overlays in order to follow the Waitaha River and Haast River were not shown in the s42A Report.

9. In supporting use of the overlays, and the amendments made to them, the Panel consider this to be the most efficient and effective option for achieving protection of cultural taonga, given that it would be too costly and difficult to achieve what GDC are seeking in their submission, namely that the maps reflect where resource is found. The Panel note that the scale of area concerned would be prohibitive. The Panel considers that the mapped overlay approach provides for a response from Poutini Ngāi Tahu when resource is found, as well as controlling

activities to avoid disturbance of taonga, and covers the areas where pounamu and aotea stone are mostly likely to be found.

10. In relation to areas where "*Victorian title*" may still apply in relation to pounamu or aotea, the Panel consider that there is no need to amend the overlays to carve out any such known areas. The Panel rely on the rule framework to provide pathways for those wishing to use their land and mineral resources within the overlay areas. The matter of "*Victorian title*" is therefore considered in the context of each of the relevant rules.

11. Similarly, the overlays have not been amended to exclude the Arahura River where pounamu is vested with Māwhera Inc. This matter is addressed in relation to the relevant rules and how the overlay applies where Poutini Ngāi Tahu, as defined in the Plan, are not the owners of natural state pounamu.

Hearing Panel's Recommendation

12. The Panel recommends making amendments to the Pounamu Management Area overlay proposed by Poutini Ngāi Tahu in their submissions and evidence, including:

    - amending the northern Pounamu Management Area boundary southwards;
    - amending the southern boundary of the northern Pounamu Management Area to follow the Waitaha River; and
    - amending the southern Pounamu Management Area boundary to follow the Haast River.

RECOMMENDATION ON SCHEDULE THREE: SITES AND AREAS OF SIGNIFICANCE TO MĀORI – NGĀ WĀHI TĀPUA KI TE MĀORI

13. The s42A Report summarised a number of submission points on Schedule 3, as a whole, and on individual SASM, and Ms Easton provided recommendations in response to evidence received.

14. In relation to Schedule Three as a whole, there were 31 submissions (three in support, one supporting in part, 13 opposed, and 14 seeking amendments) and 11 further submissions.

15. Poutini Ngāi Tahu submitted to amend the boundaries of 33 SASM[1] that could not be amended using RMA Schedule 1, Clause 16, which were submissions supported by **Ms Easton** in her s42A Report. These amendments meant that Ms Easton supported 30 submissions[2] that sought to have SASM removed from their properties because the SASM no longer applied to them after boundary adjustment. Ms Easton also supported the WCRC submission point (S488.013) that sought to have SASM boundaries confirmed and corrected through the hearing process.

16. Ms Easton responded to submitters that were concerned that Māori owned land had been transferred to freehold title over time, then on-sold to end up in the hands of the submitters, which they then considered should exempt that land from SASM, including land previously held by Māwhera Inc[3]. Of the submissions and SASM identified in her s42A Report, Ms Easton noted that there were no rules applying to these lands, aside from some in relation to utilities. Ms Easton also responded to submitters seeking that current and former Māori reserve lands be removed from Schedule Three and relied on information provided by Poutini Ngāi Tahu regarding the cultural significance of such land to recommend retaining them in the schedule.

17. Ms Easton rejected submissions that opposed the scheduling of SASM in Schedule Three as a whole, including GDC's submission points, on the basis that scheduling assists with giving effect to section 6(e) of the RMA. Ms Easton's rejection of the GDC request to remove all SASM is not repeated below in relation each individual SASM.

18. Ms Easton did not support submissions seeking removal of SASM where she could not identify the location of properties that were the subject of submissions. She supported in part requests of submitters to have more information available in relation to scheduled SASM and recommended linking the schedule to publicly available reports online, which could be facilitated through recommended Method SASM-M1.

19. Ms Easton supported the submission of Poutini Ngāi Tahu to incorporate eight more SASM into the Plan, that were not part of the notified Plan, although she considered that more information would be required on landowner consultation associated with proposed SASM 218 (Aromahana (Cobden Island)) and SASM 220 (Parihaka Memorial and Old Hokitika Gaol). For the other six sites identified, she had no concerns recommending their acceptance on Schedule Three because they were on publicly owned land and there were no specific rules proposed to apply to them.

[1] SASM 178, SASM 172, SASM 170, SASM 167, SASM 165, SASM 156, SASM 153, SASM 144, SASM 139, SASM 122, SASM 121, SASM 120, SASM 119, SASM 104, SASM 98, SASM 86, SASM 79, SASM 74, SASM 72, SASM 68, SASM 64, SASM 60, SASM 59, SASM 56, SASM 54, SASM 48, SASM 44, SASM 40, SASM 27, SASM 26, SASM 24, SASM 18, SASM 6

[2] See paragraph 354 on p168-169 of the s42A Report

[3] See paragraph 358 of the s42A Report and subsequent discussion on p169

20. **Mr Paul Madgwick,** for Poutini Ngāi Tahu, responded to each submitter requesting amendment to particular SASM, both in his written evidence and as a result of discussions with individual submitters, throughout the hearing process. The Poutini Ngāi Tahu response to Minute 37 outlined these interactions, which are referred to in this Report where relevant to a particular SASM.

21. **Ms Rachael Pull,** for Poutini Ngāi Tahu, supported the s42A Report response to submissions requesting deletion of SASM overlays. She noted there was little relevant evidence provided in those submissions and no consideration of how the purpose and principles of the Act would be provided for in relation to those sites. She referred to the effort taken to create bespoke rules so that only those necessary would apply in the circumstances of each SASM, and that landowners could rely on permitted activity rules, where relevant. She cautioned that several of the SASM are waterbodies and Statutory Acknowledgement Areas, with the SASM boundaries drawn to reflect the current waterbody locations rather than how they were surveyed at the time of settlement. She noted the intent of the SASM was to recognise their relationship with the waterbody, which would continue to move naturally.

22. Ms Pull supported reformatting the SASM Chapter, and Schedule Three, as proposed in the s42A Report, because of ease of use, with the SASM reference numbers from the maps linking to the Schedule and SASM provisions. She also supported removal of the column in the Schedule that categorised SASM because the numbering was not sequential and could infer priorities of value that were not intended.

23. The evidence of submitters and recommendations of Ms Easton are detailed below in relation to each SASM that was subject to an individual submission.

24. The exception is that evidence in relation to SASM 149, SASM 180, SASM 181 and SASM 183 are not addressed below because Te Tumu Paeroa – The Office of the Māori Trustee withdrew submission points on these SASM and there were no other matters arising in submissions relevant to these SASM. Mr Madgwick provided evidence on their values as part of the hearing, which is part of the public record, and includes values associated with Former Māori Reserves, Kāinga, Mahinga Kai, Pā site and Urupā, however Mr Madgwick's evidence addresses SASM 182 rather than SASM 183 so the values of SASM 183 are not included in his analysis. Te Tumu Paeroa retained their submission point on SASM 157, which is considered in the evidence of Mr Madgwick and discussed below.

Hearing Panel's Evaluation

25. The Panel consider Schedule Three to be fundamental to implementation of the SASM Chapter and agree that the "*Category*" column in the table SCHED 3 is confusing. The Panel has been concerned with ensuring that the schedule is clear and accurate.

26. The Panel consider it needs to be clear that the Schedule works in combination with the planning maps, as evidenced by the number of submission points lodged by Poutini Ngāi Tahu seeking to change the planning maps that outline individual SASM. The Panel consider it helpful to reiterate, in relation to the Schedule, that jurisdiction of the Plan is landward of the coastal marine area (mean high water springs).

27. The Panel also considers the relationship between the planning maps and identified SASM that are waterbodies, and can be expected to move over time, needs to be clear. We have

received evidence relating to particular waterbodies that have moved over time[4] (e.g. Taramakau River) and expect that this will be the norm in the dynamic environment of the region. However, we understand that the relationship of Poutini Ngāi Tahu does not alter because the channel or bed of the waterbody has altered, which needs to be reflected in the Plan approach to appropriately give effect to RMA section 6(e). The Panel consider that a statement needs to be added to the beginning of Schedule Three in order to clarify these points for Plan users, as well as including "*Waterbody*" within the "*Values*" column of the Schedule to signify that the statement accords with those particular SASM. Where Poutini Ngāi Tahu have indicated in evidence an intention for the whole of a catchment to be recognised as a SASM (e.g. SASM 117), this is understood by the Panel to be more than just the waterbody itself. In such cases reference to "*Waterbody*" in the "*Values*" column of the Schedule is not considered necessary by the Panel because the issue raised in submissions of the active bed of a waterbody changing over time does not arise, due to such movement already being captured within the area of a catchment.

28. The Panel has considered a number of requested amendments to the mapped SASM, predominantly within Poutini Ngāi Tahu submission points. In each case the Panel has preferred amendments that do not increase the extent of a SASM and do not affect new landowners that were not included with the notified extent of a particular SASM. While the Panel understand that the further submission process provided the opportunity for potentially affected landowners to participate in the hearing process, the Panel's preference is for such amendments to be made at the same time as other changes that will need to be made by way of a variation or plan change (e.g. amendment to SASM 34), as accepted in the evidence of Poutini Ngāi Tahu to the Panel during the hearing process.

Hearing Panel's Recommendation

29. The Panel recommends additional text at the beginning of SCHED 3 – Sites and Areas of Significance to Māori to read as follows:

All Sites and Areas of Significance to Māori shown in this Schedule are also shown on the planning maps, which outline each identified site or area.[5]

Where mapped Sites and Areas of Significance to Māori extend in to the coastal marine area, this Schedule only applies landward of the coastal marine area (mean high water springs).[6]

All waterbodies that are identified as a whole on the planning maps as a Site or Area of Significance to Māori, and listed in this Schedule as "*Waterbody*", include their active channels, beds, banks and immediate margins where they are outside the outline on the planning maps. The planning maps are indicative of Poutini Ngāi Tahu relationship with the waterbody.[7]

30. The Panel makes recommendations on each of the individual SASM in the following passages of this Report, with changes to the notified Schedule SCHED 3 shown in Appendix 2 to this Report .

[4] For example Jennifer Lake S323.001, William & Vicki Molloy S227.00, Ian Stewart S124.001, Ann Bradley S371.001, Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.351, S620.362, Lyn McIntosh S469.002

[5] RMA First Schedule, clause 16

[6] RMA First Schedule, clause 16

[7] Response to a range of submitters, for example: Jennifer Lake S323.001; William & Vicki Molloy S227.002; Ian Stewart S124.001; Ann Bradley S371.001; Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio S620.351, S620.362; and Lyn McIntosh S469.002; including concerns raised in submissions about the relationship between the waterbody SASM identified on planning maps and the active channel or bed of waterbodies that may change over time (e.g. S124.001 and S620.346). Also supported by West Coast Regional Council S488.013

SASM 1 – Kahurangi Point

31. GDC requested the removal of SASM 1 (S608.143).

Hearing Panel's Evaluation

32. The Panel note that the Plan notified SASM 1 as a Category Whā (4), which means that it would be subject to Rule SASM-R6, however, Schedule Three only records SASM-R5 as relevant to the rule, in line with its reference in notified Rule SASM-R5. The Panel consider there is an error in relation to Rule SASM-R6 that needs correction.

Hearing Panel's Recommendation

33. The Panel recommends that SASM 1 be added to Table SASM-T6 and that Rule SASM-R6 be added to Schedule Three for this SASM.

SASM 4 – Karamea (township) Native Reserve

34. There were two submission points on SASM 4, including GDC. Poutini Ngāi Tahu sought amendment (S620.314) so that rules relating to earthworks, buildings and structures no longer apply because these activities could occur without impacting on cultural values in that area.

35. Ms Easton supported the Poutini Ngāi Tahu submission point in her s42A Report.

Hearing Panel's Evaluation

36. The Panel notes that SASM 4 is not included in the rule tables and therefore is not impacted by rules relating to earthworks, buildings and structures, based on the s42A recommended wording for the rules. The Panel accept the advice of Poutini Ngāi Tahu that it is not appropriate to manage earthworks, buildings and structures as permitted activities within SASM 4.

Hearing Panel's Recommendation

37. The Panel recommends excluding SASM 4 from the rule tables and revising Schedule Three so that the permitted activity rules do not apply.

SASM 6 – Karamea (Pā Point)

38. There were three submitters on SASM 6, including GDC. Mary Stewart (S222.001) requested that this SASM be removed from her property at Karamea (Pā Point) because she did not consider the area was of significance to Māori. Poutini Ngāi Tahu (S620.315) sought to reduce the size of the SASM.

39. In her s42A Report, Ms Easton supported amending the boundary of SASM 6, as requested by Poutini Ngāi Tahu. However, she noted this amendment did not remove Ms Stewart's property from within the circular shape of the SASM.

40. Ms Stewart presented to the Panel and provided a written statement, accompanied by material in support of her submission from Mr Hamish Macbeth of Karamea. She stated that she had not been able to find evidence in her research of permanent settlement in the area of Maori Point Road within SASM 6, considering it a food gathering area as part of the

greenstone trail. She pointed to wider errors with the SASM maps and poor communication, and the impact on unencumbered freehold title. She referred to changes in the land resulting from the Murchison earthquake and river changes, as well as her understanding about the origins of the name "Maori Point Rd". She indicated greater Māori occupation on the north side of the river and the site of her land being less desirable swamp and scrubland in the past. Mr Macbeth wrote, similar to Ms Stewart, that no artefacts have been found on his property and considered that SASM 6 was a case of "mistaken identity" given river changes over time.

41. Mr Madgwick provided a 19th century map of the area (circa 1860s) obtained from the National Library and held by Archives New Zealand, recording the area as Māori owned land. He identified it as a historic pā site and kāinga. He noted that an archaeological site recorded within the SASM as a midden containing artefacts was listed in the operative Buller District Plan and was included in Appendix 10 to the Plan. Mr Madgwick highlighted that there are other archaeological sites and recorded native reserves within the wider vicinity of SASM 6 that provide context for the area. He noted that the Poutini Ngāi Tahu submission sought to reduce the size of the SASM but confirmed Ms Stewart's property remained affected.

42. In the response to Minute 37 Poutini Ngāi Tahu provided a copy of a letter sent to Ms Stewart that included copies of the 19th century map, including "zoomed in" and rotated versions. The letter also confirmed that Ms Stewart's property was situated just outside the eastern edge of SASM 6.

Notified SASM 6 *Amended SASM 6*

43. Ms Easton in her right of reply supported Ms Stewart's submission point on the basis of the confirmed map boundary from Poutini Ngāi Tahu that showed her property was excluded from SASM 6. She therefore corrected her previous s42A Report statement.

Hearing Panel's Evaluation

44. The Panel consider that SASM 6 provides for appropriate recognition and provision for Poutini Ngāi Tahu relationship with the area, and that impacts on private property have been minimised through the Plan process.

Hearing Panel's Recommendation

45. The Panel recommends that amendment is made to reduce the mapped area of this SASM as requested in the Poutini Ngāi Tahu submission, with SASM-R6 applicable in the area as per Schedule Three.

SASM 7 – No.7 Kongahu Native Reserve

46. There were three submission points on SASM 7, including GDC. B P & C A Jones requested that this SASM be reduced in size to exclude their dairy farm and residences because the land was once Māori reserve land but had long ago passed into freehold title (S526.002).

47. Poutini Ngāi Tahu requested that rules relating to earthworks, buildings and structures no longer apply to SASM 7 because these activities could occur without consultation with rūnanga (S620.316).

48. Ms Easton supported the Poutini Ngāi Tahu submission point in her s42A Report.

49. Mr Madgwick provided a map (circa 1860s) showing the location of the former Māori reserve land named 'No. 47 Kongahu Native Reserve', obtained from the National Library and held by Archives New Zealand. He noted that Kā Huru Manu details the area of the reserve as well and contains the following description:

> *This 40-acre reserve situated south of Karamea on the South Bank of the Otamahana River was set aside as part of the Arahura Purchase 1860. In 1878, the Young Commission determined that the ownership of the reserve resided with Ihaia Tainui and Wikitoria te Piki as to 20 acres, and Mata Nihoniho, Henare Mahuika and Hoani Mahuika as to 20 acres. In 1935, 8 acres of the reserve was taken under the Public Works Act as road reserve and a further 2 acres was taken as the site of a public school. In 1963, the land taken for the school site was no longer required by the Nelson Education Board and was re-vested in the owners. In 1967, the land was vest in the Maori Trustee to facilitate the sale of the block and in 1968, the land was sold and converted to general title.*

50. Mr Madgwick confirmed that Schedule Three should be amended to refer to this area as a former Māori Reserve.

Hearing Panel's Evaluation

51. The Panel note that, despite recommending accepting Poutini Ngāi Tahu's submission point, SASM 7 was included in the rule tables based on the s42A Report recommended wording for the rules and table SASM-T6. The Panel accept Poutini Ngāi Tahu's view that it is not appropriate to manage earthworks, buildings and structures as permitted activities in this SASM.

Hearing Panel's Recommendation

52. The Panel recommends removing SASM 7 from SASM-T6 and amending Schedule Three to refer to SASM 7 as a "*former Māori Reserve*".

SASM 8 – Mokihinui Native Reserve

53. There were two submission points on SASM 8, including GDC. Poutini Ngāi Tahu sought amendment (S620.317) that rules relating to earthworks, buildings and structures, and indigenous vegetation clearance no longer apply because these activities could occur without consultation with rūnanga.

54. Ms Easton supported the Poutini Ngāi Tahu submission point in her s42A Report.

Hearing Panel's Evaluation

55. The Panel confirm SASM 8 is not included in the rule tables and therefore is not impacted by rules relating to earthworks, buildings and structures, and indigenous vegetation clearance, based on the s42A Report recommended wording for the rules. We accept the advice of Poutini Ngāi Tahu that it is not appropriate to manage earthworks, buildings and structures or indigenous vegetation clearance as permitted activities in SASM 8. If a resource consent is required as a result of a rule in another chapter of the Plan (e.g. a breach of building height standard for the zone), SASM objectives and policies, along with other objectives and policies in the Plan, will apply, as relevant.

Hearing Panel's Recommendation

56. The Panel recommend deleting SASM 8 from the rule tables and amending Schedule Three so that no permitted activity rules apply to this SASM.

SASM 9 – Waimangaroa Native Reserve

57. There were two submission points on SASM 9, including GDC. Poutini Ngāi Tahu sought amendment (S620.422) that rules relating to earthworks, buildings and structures no longer apply because these activities could occur without consultation with rūnanga.

58. Ms Easton supported the Poutini Ngāi Tahu submission point in her s42A Report.

Hearing Panel's Evaluation

59. The Panel confirm that SASM 9 is not included in the rule tables and therefore is not impacted by rules relating to earthworks, buildings and structures, based on the s42A Report recommended wording for the rules. The Panel accept the advice of Poutini Ngāi Tahu that it is not appropriate to manage earthworks, buildings and structures as permitted activities in this location.

Hearing Panel's Recommendation

60. The Panel recommends deleting SASM 9 from the rule tables and amending Schedule Three so that no permitted activity rules apply to this SASM.

SASM 10 – Kawatiri Pā

61. GDC were the only submitter specific to SASM 10 (S608.152), which is included in SASM-T8 in the right of reply evidence. Schedule Three, as notified, did not include any rules applicable to the SASM. However, notified Rule SASM-R9 did include SASM-10.

Hearing Panel's Evaluation

62. The Panel assume that an error occurred in the notified version of the Plan and that both SASM-R9, as notified, and SASM-T8 in the right of reply are correct, such that amendment is required to Schedule Three to reflect the applicable rule for this SASM.

Hearing Panel's Recommendation

63. The Panel recommends amendment to Schedule Three to show that Rule SASM-R9 applies to SASM 10.

SASM 12 – Kawatiri Town Reserve

64. There were seven submission points on SASM 12, including GDC; and four further submissions from Poutini Ngāi Tahu.

65. Mr Grant Weston (S113.001) requested that the SASM be removed because land that was once leasehold is now freehold and therefore did not hold any significance to Māori. Ms Hannah Nicholas (S170.001) opposed the SASM because it decreased property value with no compensation and would create issues for selling the property in the future. Mr Sean Casey (S416.002) sought removal of the SASM from section 115 Romilly St, Westport because he considered it was an error that needed to be fixed. Ms Idena Schultze (S89.001) sought removal of the SASM from 12a and 12b Brougham Street in Westport due to concerns regarding potential rule and regulation changes. She noted that prior to purchase she had checked whether there were any Māori connections. Mark Bowe (S69.001) sought to remove 171 Peel St from SASM 12.

66. Ms Easton rejected the submissions from landowners in favour of the further submissions from Poutini Ngāi Tahu, based on cultural values not being tied to land ownership status.

67. Mr Madgwick explained that SASM 12 included several areas across Kawatiri/Westport that include current and former Māori reserves, as shown on a map obtained from the National Library, held by Archives New Zealand.

Hearing Panel's Evaluation

68. The Panel note that SASM 12 is included within table SASM T8 and therefore connects these lands to management under rule SASM – R9, covering network utilities within the SASM. The impact of the rule framework within SASM 12 is therefore primarily on managers of network utility infrastructure, rather than individual property owners. The SASM will be applicable in circumstances where a discretionary or non-complying resource consent is required, at which time SASM Chapter objectives and policies will apply, along with other relevant objectives and policies in the Plan as relevant. The Panel also note that Schedule Three at the time of notification did not reference SASM-R9 for this SASM, which requires correction.

Hearing Panel's Recommendation

69. The Panel recommends SASM 12 is includes SASM-R9 in Schedule Three and is included within the Table SASM-T8.

SASM 13 – No.36 Kawatiri South Bank Native Reserve

70. There were two submission points on SASM 13 from Mr Graeme Walsh (S664.001) and GDC Council (S608.155) opposing the overlay[8]. Mr Walsh's submission was opposed by Poutini Ngāi Tahu (FS41.0746), supported by Tony Anderson (FS240.001) and received two further submissions that did not state a view on his submission (John Sutton, FS239.001, and Vern Morris, FS.241.001).

71. Ms Easton's Addendum Report (2 July 2024) rejected Mr Walsh's submission point but noted some overlap between SASM 13 and his property at 74 Cape Foulwind Road, part of the northern paddock. Ms Easton relied on the view of Poutini Ngāi Tahu that the area is culturally significant as a Māori reserve and kāinga location, with use that pre-dates the arrival of

[8] Note that these submission points were not discussed on page 140 of the s42A Report where individual SASMs are discussed.

European settlers. She noted that there are no specific rules that apply to SASM 13. She supported the further submission of Poutini Ngāi Tahu; and accepted the sites are significant to Poutini Ngāi Tahu and exist regardless of the Plan. She highlighted the obligation on the Councils and landowners under the RMA and other legislation to protect significant sites.

72. Mr Walsh presented to the Panel on 18 November 2024 and read from his extensive notes on historic references he considered relevant to consideration of SASM 13, utilising a combination of written and oral family history. He considered the property was significant to his family, but he could not find evidence that it was significant to Poutini Ngāi Tahu. He used examples to demonstrate that oral histories are fallible and prone to error, and that non-Māori have assisted to preserve sites of cultural significance over time, including within his family. He considered the SASM a risk to his property rights. He assumed that Māori other than Poutini Ngāi Tahu have history in the area. He found evidence through family oral histories of Māori gardens on Martin's Island, which was outside the SASM, and provided an account of his family's support for exploration and protection of archaeological finds.

Hearing Panel's Evaluation

73. The Panel acknowledge the considerable effort Mr Walsh put into his written submission and statement at the hearing; and his attendance late in the piece as a consequence of being missed from the initial summary of submissions. The Panel understand that Mr Walsh is not confident that the site is proven to be culturally significant, based on his own research, and that he was unable to access Poutini Ngāi Tahu information used to identify the SASM.

74. The Panel accept the evidence of Mr Madgwick that reserve lands chosen by tūpuna at the time of land sales remain significant to Poutini Ngāi Tahu, whether or not they have been subsequently subdivided or turned into freehold title. The Panel also accept occupation and use prior to European settlement would not necessarily be reflected in settler accounts. The Panel are of the view that landowners should be able to access information relevant to SASM affecting their properties to understand what is valued, as long as there is no cultural risk associated with providing that information.

75. While the Panel understand the concern of Mr Walsh that identifying part of his property within the SASM 13 will affect his property rights, we consider there is no significant change of permitted use for landowners from the introduction of SASM 13 because there are no rules that are associated with it in Schedule Three. If a resource consent is required as a result of a rule in another chapter of the Plan (e.g. a breach of building height standard for the zone), SASM objectives and policies, along with other objectives and policies in the Plan, will apply, as relevant.

76. The Panel consider identification of SASM 13 recognises the relationship of Poutini Ngāi Tahu with the area, while providing for appropriate subdivision, use and development.

Hearing Panel's Recommendation

77. The Panel recommend no change to the mapped area of SASM 13 or Schedule Three in terms of application of the rules.

SASM 14 – No. 43 Ōrowaiti Native Reserve

78. There were 21 submission points on SASM 14 (17 opposed, one opposed in part, and three sought amendments), with 17 further submissions.

79. Mr Russel Lane (S286.001) requested that SASM 14 be deleted from property at Ōrowaiti Road because there was no substantiated evidence of Māori occupation. Leonie Avery (S507), Jared Avery (S508), Kyle Avery (S509), Avery Bros (S510), Bradshaw Farms (S511), Paul Avery (S512) and Brett Avery (S513)[9] requested that SASM 14 be removed because the rule is generally too restrictive. Michael and Dawn Ross (S98.001) requested removal of SASM 14 from 34 Ōrowaiti Road, Westport on the basis that Māwhera Inc. had sold it for private use. They noted that the Māwhera Inc. website states - *"Many of the properties owned by the incorporation are of little economic or cultural value. The incorporation had approval from the Māori Land Court to sell residential lands."*

80. Poutini Ngāi Tahu (S620.318) requested that SASM 14 be renamed SASM 14A and SASM 14B because the two sites are not adjacent, including amending Schedule Three and the maps; and that two SASM not be subject to rules on earthworks, buildings and structures (S620.319).

81. In the s42A Report, Ms Easton supported Poutini Ngāi Tahu's request to remove application of rules on earthworks, buildings and structures (SASM-R6) and rename the SASM as two parts. She did not support removal of the SASM because she considered that land tenure was not the basis of cultural significance. She noted that neither 81 Brougham St nor 21 Dommett Street were included within the identified SASM. The amended maps with new names shown were depicted as shown below:

Notified SASM 14 *New SASM 14A* *New SASM 14B*

82. Mr Madgwick noted SASM 14 included two areas of land that cover current and former Māori reserve land. He advised that SASM 14B contained NZAA site K29/66, an urupā, and that Ōrowaiti Lagoon was a significant mahinga kai area.

Hearing Panel's Evaluation

83. The Panel confirms that SASM 14 is not contained in the rule tables, based on the s42A Report recommended wording. With the removal of reference to Rule SASM-R6 in Schedule Three, the Panel understand that there are no longer any rules proposed to apply to SASM-14A and SASM-14B. The Panel considers there is therefore no change to permitted land use on submitters' properties. If a resource consent is required as a result of a rule in another chapter of the Plan (e.g. a breach of building height standard for the zone), SASM objectives and policies will apply, along with other objectives and policies in the Plan as relevant. We agree with Ms Easton that inclusion of the SASM in Schedule Three and on the planning maps recognise Poutini Ngāi Tahu's relationship with the current and former reserve lands, while providing for appropriate subdivision, use and development.

[9] Three submission points each, numbered ".021, .024 and .027"

Hearing Panel's Recommendation

84. The Panel recommend amendment to Schedule Three and the planning maps to rename SASM 14 as two SASM labelled '*SASM 14A'* and *'SASM 14B'*, as depicted above, and that Schedule Three indicate no rules are applicable to either SASM. The Panel also recommend amendment to Schedule Three to indicate that these areas are a combination of current and former Māori reserves.

SASM 15 – No. 42 Kawatiri (Township) Native Reserve

85. GDC sought the removal of SASM 15 from the Plan (S608.157), which is addressed earlier in this report. No other submission points were specific to this SASM.

Hearing Panel's Evaluation

86. As with SASM 12, the Panel has identified that Schedule Three at the time of notification did not reference Rule SASM-R9 for this SASM, which requires correction. The Panel notes that this correction was included in table SASM-T8 in the right of reply evidence.

Hearing Panel's Recommendation

87. The Panel recommends SASM 15 includes Rule SASM-R9 in Schedule Three and is included within the Table SASM-T8.

SASM 16 – Tauranga Bay

88. There were three submission points on SASM 16, including GDC and Graeme Walsh. LG.JH Brownlee Partnership & Tbay Limited (S303.001 and S303.002) requested that SASM 16 and SASM 19 be amended so that only significant areas are included, and to identify the specific areas that are significant. The further submission of Poutini Ngāi Tahu opposed this.

89. The s42A Report recorded Ms Easton supported SASM 16, in conjunction with SASM 19 and SASM 22, as representing a major area of habitation for Poutini Ngāi Tahu, with multiple pā, kainga, mahinga kai and tauranga waka present in the area of Tauranga Bay. She supported greater information being made available to landowners affected by the SASM.

90. Mr Madgwick explained that SASM 16 contained an historic pā site, kāinga/village, and mahinga kai gathering areas. He stated that it was well known for its concentration of cultural and archaeological sites, including sites containing evidence of occupation, middens, pits and oven deposits, and a village site, as recorded in the operative Buller District Plan and included in Appendix 10 of the Plan. He advised that, given the number of sites and that the site was a former kāinga, an area approach to mapping acknowledged that not all archaeological sites had been discovered or recorded. He noted that a permitted activity pathway had been provided.

91. Mr Madgwick shared the following text from Kā Huru Manu:

> *Tauranga Bay is located south of Cape Foulwind in the Buller District of Te Tai Poutini (the West Coast). Tauranga has several meanings, including "anchorage", and "fishing-ground". The name Tauranga is likely to refer to the bay being used as a landing place for waka." (References: Kā Huru Manu; Mitchell, G.G.M. (1948) Māori place-names in Buller County. Wellington, N.Z. : A. H. & A. W. Reed. P49-50; and Taylor, W.A. (1952) Lore and history of the South Island Māori. Christchurch, N.Z.: Bascands. P14*

Hearing Panel's Evaluation

92. The Panel are satisfied that the area identified as SASM 16 is an area of cultural significance to Poutini Ngāi Tahu, having the associations described in Mr Madgwick's evidence. We also support ensuring that information about SASM sites is available for affected landowners during the life of the Plan, as has been provided during this hearing process and as may be supplemented over time.

93. The Panel consider it appropriate that the area is subject to Rule SASM-R6 (as notified) given the concentration of archaeological sites in the area. Although the mapped area appears to extend partially into the coastal marine area, the Panel note that the jurisdiction of the district plan is limited to the coastal environment on the landward side of the coastal marine area, above mean high water springs. We have included reference to this jurisdiction in the Overview to the chapter and in the recommendation for SCHED 3.

Hearing Panel's Recommendation

94. The Panel recommend no amendment to Schedule Three, Table SASM-T6 or the planning maps in relation to SASM 16.

SASM 17 – Kawatiri South Bank Native Reserve

95. There were two submission point on SASM 17, including GDC. Ms Pull noted that Poutini Ngāi Tahu submitted to amend the permitted activity rules, so that that SASM 17 would be removed from Rule SASM-R2 and proposed Table SASM-T2 (S620.320). This was accepted in the s42A Report.

Hearing Panel's Evaluation

96. The Panel accept the evidence of Poutini Ngāi Tahu that minor earthworks are not appropriate to be managed as permitted activities within SASM 17 and confirm that Table SASM-T2 in the right of reply evidence does not include this SASM.

Hearing Panel's Recommendation

97. The Panel recommend deleting the reference to Rule SASM-R2 in Schedule Three for SASM 17 and delete SASM 17 from Table SASM-T2.

SASM 18 - No. 38 Kawatiri North Bank Native Reserve

98. There were two submission points on SASM 18, including GDC. Poutini Ngāi Tahu sought to change the shape file of SASM 18 (S620.321) to capture the full extent of the native reserve, which was accepted in the s42A Report.

Notified SASM 18 *Amended SASM 18*

Hearing Panel's Evaluation

99. The Panel accept the advice of Poutini Ngāi Tahu that the map of SASM 18 requires amendment to match the full extent of the native reserve. However, the submitted area of change is an increase in area compared with what was notified and extends on to an additional land parcel. This increases the area to which Rule SASM-R6 applies.

100. The Panel recommends rejecting the increase in mapped area of the SASM, from that notified, because more land will be subject to Rule SASM-R6. This approach to rejecting increases is consistent with our recommendations on other mapped areas. The requested adjustment to the boundaries of SASM 18 is considered by the Panel to be better suited to a plan change, alongside other similar amendments identified in this Report (e.g. SASM 36).

Hearing Panel's Recommendation

101. The Panel recommend no changes to SASM 18 on the planning maps as notified.

<u>SASM 19 – Ōkari</u>

102. There were eight submission points on SASM 19 (three opposed, one neutral and four seeking amendment), and six further submissions in opposition from Poutini Ngāi Tahu. WMS Group (S599.154) sought re-evaluation of the SASM to accurately locate kāinga and mahinga kai sites. George Brownlee (S247.001) sought that mapping be amended to capture the location of specific sites on his property, similar to lG.JH Brownlee Partnership & Tbay Limited (S303.001 and S303.002). Jennifer Lake (S323.001 and S323.002) sought review of the SASM boundaries where they affect private grazing land and extend beyond the lagoon and its boundaries; and requested more information on the values present. Dale Stephen (S277.002) provided information about the area and why it had been identified in that location. Waitakere Trust (S497.001 and S497.002) requested more detail on the significance and rationale for SASM 19.

103. The s42A Report supported retention of SASM 19 as notified and considered that information provided by Poutini Ngāi Tahu to describe the values of the area should be available to affected landowners.

104. Mr Madgwick explained that SASM19 contained a historic kāinga and mahinga kai gathering areas, well known for its concentration of cultural and archaeological sites, all of which were

included in the operative Buller District Plan and recorded in Appendix Ten to the Plan. Given the number of sites, Mr Madgwick said that an area approach was taken to mapping the site, acknowledging that not all archaeological sites would have been found. He noted that a permitted activity pathway is provided through SASM-R6.

Hearing Panel's Evaluation

105. The Panel accept the evidence of Poutini Ngāi Tahu regarding the cultural significance of the area notified as SASM 19 and consider that it is appropriate for SASM-R6 to apply to the area due to the concentration of archaeological sites. The Panel note that cultural significance is not entirely dependent upon the presence of archaeological material, but such material where it has been found in the past can be considered evidence of occupation and use by Poutini Ngāi Tahu over time. Although the mapped area appears to extend partially into the coastal marine area, the Panel note that the jurisdiction of the district plan is limited to the coastal environment on the landward side of the coastal marine area.

Hearing Panel's Recommendation

106. The Panel recommends no change to Schedule Three or the planning maps in associated with SASM 19.

SASM 22 – Ōkari Lagoon

107. Three submission points opposed SASM 22, including GDC. Jennifer Lake (S323.001 and S323.002) sought review of the SASM boundaries where they affect private grazing land and extend beyond the lagoon and its boundaries. Waitakere Trust (S497.001) requested more detail on the location and basis for SASM 22.

108. The Poutini Ngāi Tahu submission (S620.322) sought that SASM 22 no longer be subject to Rules SASM-R1, SASM-R4 and SASM-R6, which was supported by Ms Easton in her s42A Report.

109. Ms Pull noted that Poutini Ngāi Tahu submitted to amend the permitted activity rules, so that SASM 22 would consequently be removed from proposed Table SASM-T1, which was missed in the recommendations of Ms Easton in her s42A Report.

110. Mr Madgwick explained that Ōkari Lagoon was a cultural redress site (both a Statutory Acknowledgement and Deed of Recognition area) under the Ngāi Tahu Claims Settlement Act 1998 (NTCSA), section 212, and Schedule 47. He highlighted that the area also contained archaeological sites recorded as middens, which are in the operative Buller District Plan and in Appendix Ten of the Plan. He noted that the Poutini Ngāi Tahu submission points reduced the impact of the rule framework on SASM 22.

Hearing Panel's Evaluation

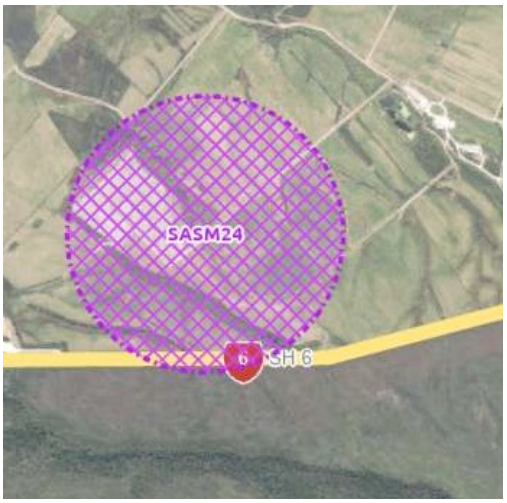
111. The Panel accept the basis given for the cultural significance of SASM 22, which is recognised in statute, and the advice of Poutini Ngāi Tahu that Rules SASM-R1, SASM-R4 and SASM-R6 should be removed from Schedule Three in relation to SASM 22. The effect of accepting this submission point from Poutini Ngāi Tahu is that there are no longer any permitted activity rules applying to SASM 22. If a resource consent is required as a result of a rule in another chapter of the Plan (e.g. a breach of building height standard for the zone), SASM objectives and policies will apply, along with other objectives and policies in the Plan as relevant. We

accept the evidence of Poutini Ngāi Tahu that it is not appropriate to manage earthworks, buildings and structures, minor earthworks or grazing animals as permitted activities in this location. We also agree with Ms Pull that reference to SASM 22 needs to be removed from Table SASM-T1.

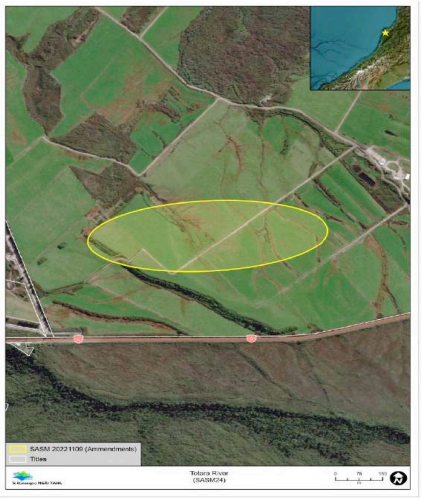
112. The Panel do not consider that a change in position of the waterbody over time due to natural processes need detract from the fact that it has been recognised as a Statutory Acknowledgement Area and therefore reject the submission point requesting removal of that reference from Schedule Three. We understand that waterbodies will naturally shift and change and that when they do, this does not negate the associations Poutini Ngāi Tahu have with them, including associations recognised through statutory acknowledgement. The Panel consider that Schedule 47 of the NTCSA is applicable and provides useful information for Plan users wanting to understand more about the Poutini Ngāi Tahu values associated with Ōkari Lagoon, which in part responds to concerns of submitters, such as Waitakere Trust (S497.001). The Panel also consider that assigning "*Waterbody*" in the "*Values*" column of Schedule Three would account for any movement of the waterbody over time.

113. The Panel consider that retention of SASM 22 in the planning maps and Schedule Three recognises the significance of the area to Poutini Ngāi Tahu and provides for appropriate subdivision, use and development. Although the mapped area appears to extend partially into the coastal marine area, the Panel note that the jurisdiction of the district plan is limited to the coastal environment on the landward side of the coastal marine area.

Hearing Panel's Recommendation



114. The Panel recommend deleting the reference to Rules SASM-R1, SASM-R4 and SASM-R6 in Schedule Three for SASM 22, and deleting SASM 22 from associated tables; and that SASM 22 is otherwise retained in Schedule Three and on the planning maps, as well as retaining reference to the lagoon being a Statutory Acknowledgement Area, and incorporating "*Waterbody*" as a value for this SASM.



SASM 24 – Totara River

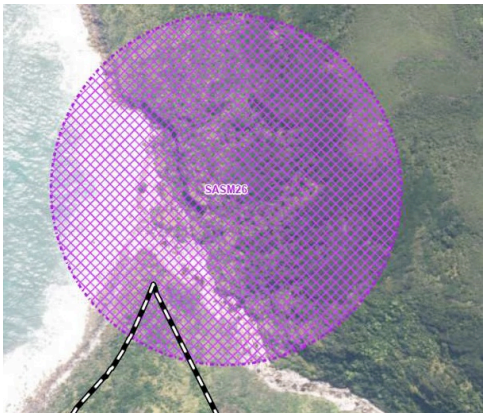
115. There were three submission points on SASM 24, including GDC. Mr John O'Connor (S284.001) sought clarification of the reasons why the SASM was classified. Poutini Ngāi Tahu sought amendment to the mapped area of SASM 24 (S620.324).

116. Mr Madgwick explained that SASM 24 contained an urupā where a Māori chief who passed away while waiting to cross the Totara River was buried, and the tribe had carried him inland and buried him on high land north of the river. He noted the burial area was covered in rocks that turned it in to a long and high mound, which became known as the "Giant's Grave". He highlighted that Poutini Ngāi Tahu submitted to reduce the size of SASM 24.

Notified SASM 24 *Amended SASM 24*

Hearing Panel's Evaluation

117. The Panel accept the advice of Poutini Ngāi Tahu that the mapped area of SASM 24 should be reduced as requested. The Panel note that there are no rules applying to SASM 24 in Schedule Three of the Plan. If a resource consent is required as a result of a rule in another chapter of the Plan (e.g. a breach of building height standard for the zone), SASM objectives and policies will apply, along with other objectives and policies in the Plan as relevant. The Panel therefore consider that retention of SASM 24 in the planning maps and Schedule Three recognises the significance of the area to Poutini Ngāi Tahu and provides for appropriate subdivision, use and development.



Hearing Panel's Recommendation

118. The Panel recommend that the mapped extent of SASM 24 be amended as shown in the submission of Poutini Ngāi Tahu, only to the extent that there are no incidental increases that impact on any additional landowners as a result of the change.

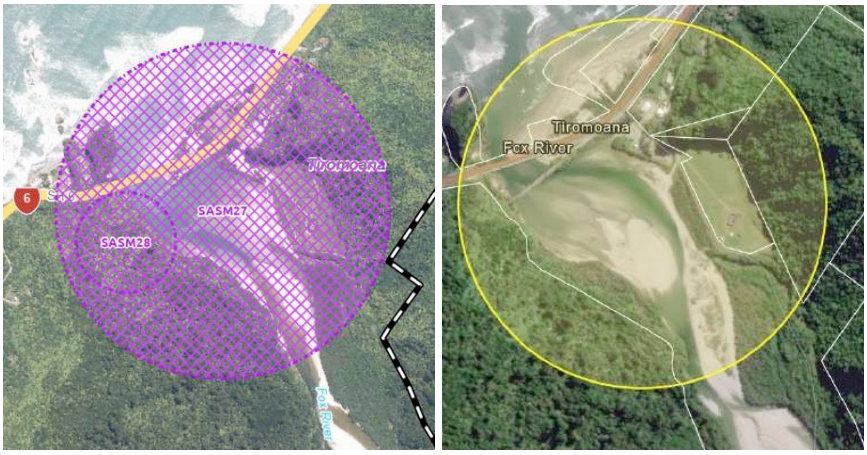
SASM 26 - Tiropahi - Silent File

119. There were two submission points on SASM 26, including GDC. Poutini Ngāi Tahu sought to change the mapped extent of SASM 26 (S620.325), which was supported in the s42A Report. The requested change was as follows:

Notified SASM 26 *Amended SASM 26*

Hearing Panel's Evaluation

120. The Panel are satisfied that amendments to SASM 26 requested by Poutini Ngāi Tahu are a reduction in the mapped extent. The Panel observe that there are no rules in Schedule Three that apply to SASM 26. If a resource consent is required as a result of a rule in another chapter of the Plan (e.g. a breach of building height standard for the zone), SASM objectives and policies will apply, along with other objectives and policies in the Plan as relevant. The Panel therefore consider that retention of SASM 24 in the planning maps and Schedule Three recognises the significance of the area to Poutini Ngāi Tahu and provides for appropriate subdivision, use and development. Although the mapped area appears to extend partially into the coastal marine area, the Panel note that the jurisdiction of the district plan is limited to the coastal environment on the landward side of the coastal marine area.



Hearing Panel's Recommendation

121. The Panel recommend that the mapped extent of SASM 26 be amended as shown in the submission of Poutini Ngāi Tahu, only to the extent that there are no incidental increases that impact on any additional landowners as a result of the change.

SASM 27 – Fox River

122. There were three submission points on SASM 27, including GDC and Moira Devlin (S117.001) who sought to be able to develop her land. Poutini Ngāi Tahu sought to change the mapped extent of SASM 27 (S620.326), which was supported in the s42A Report. The requested change was as follows:

Notified SASM 27 *Amended SASM 27*

Hearing Panel's Evaluation

123. The Panel assess the amended area of SASM 27 to be slightly smaller than the notified extent of the mapped area. No amendment is proposed by Poutini Ngāi Tahu to Schedule Three and therefore Rules SASM-R4 and SASM-R6 apply to the mapped area. The Panel considers that there are pathways to use of land, as sought by Moira Devlin in her submission, including through the certification process.

124. The Panel consistently recommends rejecting any increases in mapped SASM, from that notified. However, in this case the effect of the amendment appears to be marginal and affects the same landowners as those notified. On that basis, we accept the submission of Poutini Ngāi Tahu to amend the mapping of SASM 27, as requested.

125. Although the mapped area appears to extend partially into the coastal marine area, the Panel note that the jurisdiction of the district plan is limited to the coastal environment on the landward side of the coastal marine area.

Hearing Panel's Recommendation

126. The Panel recommend that the mapped extent of SASM 27 be amended as shown in the submission of Poutini Ngāi Tahu, only to the extent that there are no incidental increases that impact on any additional landowners as a result of the change.

<u>SASM 30 – Te MIko</u>

127. There were four submission points on SASM 30, including GDC, and no further submissions. Ms Anne Chapman (S425.002) requested more information about the significance of the site. Graeme & Helen O'Dea (S375.001 and S475.002) sought proof of the significance of the site.

128. The s42A Report relied on the work undertaken by Poutini Ngāi Tahu in preparing the mapped SASM and associated rules and did not support any changes based on the evidence. Ms Easton supported ensuring there was information available to affected landowners.

Hearing Panel's Evaluation

129. Poutini Ngāi Tahu did not submit on SASM 30 and Mr Madgwick did not provide evidence specific to this site. The evidence of Mr Madgwick generally referred to the provenance of Kā

Huru Manu. The Panel have referred to the publicly available information on Kā Huru Manu (www.kahurumanu.co.nz), guided by the evidence of Mr Madgwick, to understand the values of the site and found the following reference:

> *Te Miko is the Māori name for Perpendicular Point, the southern point of Irimahuwhero (Irimahuwheri Bay) near Barrytown in the Grey District of Te Tai Poutini (the West Coast). Miko is the shoot of the world's southernmost palm, the nīkau (Rhopalostylis sapida), which are numerous throughout the area.*

130. The Panel observe that there are no rules in Schedule Three that apply to SASM 30. If a resource consent is required as a result of a rule in another chapter of the Plan (e.g. a breach of building height standard for the zone), SASM objectives and policies will apply, along with other objectives and policies in the Plan as relevant. We therefore consider that retention of SASM 30 in the planning maps and Schedule Three recognises the significance of the area to Poutini Ngāi Tahu and provides for appropriate subdivision, use and development. Although the mapped area appears to extend partially into the coastal marine area, the Panel note that the jurisdiction of the district plan is limited to the coastal environment on the landward side of the coastal marine area.

Hearing Panel's Recommendation

131. The Panel recommends no change to Schedule Three or the planning maps in associated with SASM 30.

SASM 31 – Punakaiki Area

132. There were eight submission points on SASM 31, including GDC, and Poutini Ngāi Tahu lodged three further submissions in opposition.

133. Desmond Pender (S265.001) sought removal of the overlay because there had been no archaeology report for the area or archaeologists on site. Scenic Hotel Group (S483.017) was concerned that it would limit further development, such as hotel extensions or conference centres, and could impact valuations or otherwise cost landowners. Peter Haddock (S417.006) wanted SASM 31 removed from 3 Webb Street, Punakaiki because he believed that that the town was only a food gathering area. In addition, Kristy Henderson (S125.008) sought clarification of what tino rangatiratanga and kaitiakitanga would mean in relation to SASM 31 in her submission on Policy SASM-P5. Neil Mouat (S535.078) supported retention of SASM 31.

134. Mr Madgwick explained that SASM 31 contained historic kāinga, mahinga kai gathering areas and is part of the coastal ara tāwhito. He noted the area contained archaeological sites including midden/oven remains and a cave/rock shelter, as in the operative Grey District Plan and recorded in Appendix Ten of the Plan. He said the Punakaiki area was important because Ngāi Tahu finally defeated Ngāti Wairangi at Paparoa, and the rugged pathway between Māwhera/Greymouth and Kawatiri/Westport was a key trade route for pounamu and mahinga kai from inshore fishing. He said that the pathway largely followed the beach but the vertical bluffs at Te Miko (Perpendicular Point) and Punakaiki fractured the pathway and a bush track cut overland through kiekie and nikau forest. He noted that the highway between the current visitor centre and the Pancake Rocks followed this old path. He also pointed to the Paparoa National Park Management Plan that records the Poutini Ngāi Tahu relationship with the Paparoa area.

Hearing Panel's Evaluation

135. The Panel accept the evidence that this area is of cultural significance to Poutini Ngāi Tahu. The Panel note that Schedule Three shows that there are no rules applying to SASM 31. However, we note the notified plan included SASM 31 within Rule SASM-R9 and that the right of reply evidence recommended it be retained in Table SASM-T8. The nature of Rule SASM-R9 means that property owners concerned about the impact of SASM 31 are unlikely to be affected because it will primarily affect network utility operators, although it will be relevant to discretionary and non-complying activities. The Panel therefore consider that retention of SASM 31 in the planning maps and Schedule Three recognises the significance of the area to Poutini Ngāi Tahu and provides for appropriate subdivision, use and development. Although the mapped area appears to extend partially into the coastal marine area, the Panel note that the jurisdiction of the district plan is limited to the coastal environment on the landward side of the coastal marine area.

Hearing Panel's Recommendation

136. The Panel recommend no amendments to the planning maps and recommend inclusion of SASM 31 in Table SASM-T8 and Schedule Three to show that Rule SASM-R9 is applicable.

SASM 32 – Punakaiki River Nohoanga

137. There were four submission points on SASM 32, including GDC. Kristy Henderson (S125.008) sought clarification of what tino rangatiratanga and kaitiakitanga meant in relation to private landowners and SASM 32.

138. This point was not assessed as part of the s42A Report or right or reply and was not further examined in the evidence of Mr Madgwick for Poutini Ngāi Tahu.

Hearing Panel's Evaluation

139. There are no rules applying this SASM, so the Panel consider that tino rangatiratanga and kaitiakitanga are associated with recognition of the significance of this nohoanga to Poutini Ngāi Tahu. The objectives and policies of the SASM Chapter will be referenced when proposed activities within the SASM trigger discretionary or non-complying status in other chapters of the Plan, which will provide opportunity for assessment of effects on cultural values in the circumstances. SASM 32 sits within SASM 31, which the Panel has recommended to retain in the Plan.

Hearing Panel's Recommendation

140. The Panel recommend no changes to SASM 32, either in the planning maps or Schedule Three, in response to the submission points.

SASM 33 – Pakiroa Beach

141. There were five submission points on SASM 33, including GDC, and four further submissions in opposition from Poutini Ngāi Tahu.

142. Waitakere Trust (S497.003) requested more detail on the location and basis for SASM 33. Bruce Stuart-Monteath (S315.001) requested amendments due to lack of evidence of Māori activity on the properties, some of which were away from the beach; and requested that areas in QEII covenant should be excluded. G E & C J Coates (S415.011) sought to remove the

identified SASM that affected their properties. TiGa Minerals & Metals Limited (S493.126) requested the re-evaluation of SASM 33 to provide an accurate area on the planning maps showing kāinga sites.

143. The s42A Report noted that cultural values are more than just archaeological remains. Ms Easton supported Poutini Ngāi Tahu sharing information about the process of identification of the SASM and more information about sites and areas, but she did not support removal of SASM 33.

144. Mr Madgwick explained that SASM 33 contained a historic kāinga and mahinga kai gathering areas, well known for a concentration of cultural and archaeological sites, including multiple middens, pits, oven stones, stone working areas, evidence of fire and a track, as recorded in the operative Grey District Plan and in Appendix Ten in the Plan. As with other areas of high concentration of archaeological remains, Poutini Ngāi Tahu advised they had taken an area approach to mapping the site in acknowledgement that not all archaeological sites may yet have been uncovered. Mr Madgwick noted that a permitted activity pathway has been provided through Rule SASM-R6.

145. Mr George and Mrs Caryl Coates questioned information about villages, archaeological sites and burial sites based on the notified Plan, Mr Madgwick's evidence and discussion with a Ngāti Waewae representative. They recounted the history of land ownership associated with the mapped area and coastal changes that mean the SASM covers an area of ocean. They also considered that due to prior humping and hollowing there should be no SASM mapped east of the NZAA sites. Overall, they considered that SASM 33 covered an area larger than necessary.

146. Poutini Ngāi Tahu did not further address SASM 33 in response to Minute 37.

147. In Ms Easton's Right of Reply she reviews SASM 33 in relation to rule SASM-R4 and amends that rule to address the concerns of submitters regarding restrictions on indigenous vegetation clearance where SASMs intersect with areas of developed land.

Hearing Panel's Evaluation

148. The Panel accepts that SASM 33 has been drawn to extend across recorded archaeological sites and by taking an area approach to recognition of those sites and associations of Poutini Ngāi Tahu with the location. There is a close relationship between SASM 33 and SASM 34 and therefore the Panel consider it likely that SASM 33 will be reviewed at the time SASM 34 is reintroduced through a plan change process and may or may not be amended through that process. The Panel is satisfied that it is appropriate to recognise and provide for the relationship of Poutini Ngāi Tahu with SASM 33 and include application of SASM-R4 and SASM-R6. In doing so the Panel observe that existing use rights are not affected by these rules, which is relevant to the concerns expressed by Mr and Mrs Coates. Although the mapped area appears to extend partially into the coastal marine area, the Panel note that the jurisdiction of the district plan is limited to the coastal environment on the landward side of the coastal marine area.

Hearing Panel's Recommendation

149. The Panel recommend no changes to SASM 33, either in the planning maps or Schedule Three, in response to submissions and evidence.

SASM 34 – Te Nikau Scenic Reserve – silent file

150. Two submission points opposed SASM 34, GDC (S608.176) and G E & C J Coates on behalf of Nikau Deer Farm Limited (S415.003), although the Coates submission did not specifically identify the SASM affecting their properties.

151. The s42A Report did not specifically discuss SASM 34, although the position of the submitters was considered in more general terms.

152. Mr and Mrs Coates questioned the identified area and its status as a wāhi tapu. They had originally thought that the SASM was in the scenic reserve due to its name but were advised it was located on their family property. This has caused Mr and Mrs Coates to question whether the mapped SASM was in the right place because they had an understanding that there was a sacred site related to burials within the scenic reserve around 100m from the mapped boundary of the SASM. They noted that knowledge of the site had been passed on within the family from the generation before, including from a ceremony associated with the site.

153. Mr Madgwick's evidence did not contain discussion in relation to SASM 34.

154. In response to Minute 37, Poutini Ngāi Tahu advised that the boundaries of SASM 34 had been reviewed and there was agreement with Mr and Mrs Coates that the mapped location of Te Nikau Scenic Reserve needed to be amended to better reflect the situation on the ground. Poutini Ngāi Tahu consequently withdrew further submission point FS41.576 and indicated that SASM 34 would be revisited through a future plan change process.

155. Ms Easton's right of reply indicated support for the submission of Mr and Mrs Coates, and that she would consider whether there was scope to amend the maps through this hearing process once she received updated maps from Poutini Ngāi Tahu.

Hearing Panel's Evaluation

156. The Panel did not receive updated planning maps showing the confirmed location of SASM 34. Rules SASM-R4, SASM-R5 and SASM-R6 were proposed to apply to SASM 34 but the Panel considers that they should no longer apply to the area. We consider further investigation, and more accurate mapping is required to appropriately recognise and provide for Poutini Ngāi Tahu relationship with Te Nikau Scenic Reserve. We agree this should be achieved through a future plan change process.

157. The Panel note that SASM 33 will continue to apply to the area because SASM 34 was embedded within SASM 33.

Hearing Panel's Recommendation

158. The Panel recommends that SASM 34 be removed from the planning maps, Schedule Three, Tables SASM-T4 and SASM-T5, and Rule SASM-R6.

SASM 36 – Totara Bush Native Reserve

159. There were ten submission points on SASM 36, including GDC, variously opposing, seeking amendment to the mapped area or requesting more information on the SASM and its implications (Leanne Hart (S326.001), Margaret Steele (S214.001), Angela Sweetman (Trustee) & Patrick William Kennedy (S418.001 & S418.002), Angela Sweetman (S413.001 &

S413.002), Bruce Truman (S84.001), and Nyoli Waghorn-Rogatski (S301.001)). Bruce Truman considered that only a small area at SH7/Granville Road intersection has historical used, such that a 50 – 100m circle would be sufficient. Poutini Ngāi Tahu made further submissions in opposition to each point.

160. Angela Sweetman (Trustee) and Patrick William Kennedy sought proof of the original reserve. Mr Peter Kennedy presented to the Panel on behalf of these submitters and brought along historical maps showing the location of Totara Bush Native Reserve to show that the mapped area was in the wrong location.

161. Mr Madgwick explained in his written evidence that SASM 36 recognised the Totara Bush Native Reserve. He included text from Kā Huru Manu, as follows:

> *This 2,000-acre reserve, north-east of Greymouth, at Totara Flat, was land reserved by the Crown for the Survey Fund under the terms of the Arahura Purchase 1860. Unlike the other reserves allocated under the terms of the Deed, the ownership of this reserve was retained by the Crown. Portions of the reserve were to be sold to Pākehā settlers from time to time to finance the surveying of the other Native Reserves which had been allocated to individuals or allocated for special purposes as part of the Arahura Deed. A portion of the remaining original reserve was vested in Ngāi Tahu Forest Estates Limited as a result of the Ngāi Tahu Claims Settlement Process with surplus land retained by the Crown.*

162. In response to Minute 37, Poutini Ngāi Tahu agreed with Mr Kennedy that the mapped area was incorrect for SASM 36 and withdrew further submission point (FS41.583). Poutini Ngāi Tahu indicated that SASM 36 would be revisited through a future plan change process.

163. In her right of reply, Ms Easton confirmed that she now supported the submitters requesting that the overlay be corrected or removed, and that she would consider whether there was scope to amend the maps through this hearing process once she received updated maps from Poutini Ngāi Tahu.

Hearing Panel's Evaluation

164. The Panel did not receive updated planning maps showing the confirmed location of SASM 36 at the time of making recommendations. While there were no rules proposed in relation to SASM 36, the Panel considers that more investigation and accurate mapping is required to appropriately recognise Poutini Ngāi Tahu relationship with Totara Bush Native Reserve. We agree this should be achieved through a future plan change process.

Hearing Panel's Recommendation

165. The Panel recommends that SASM 36 be removed from the planning maps and Schedule Three.

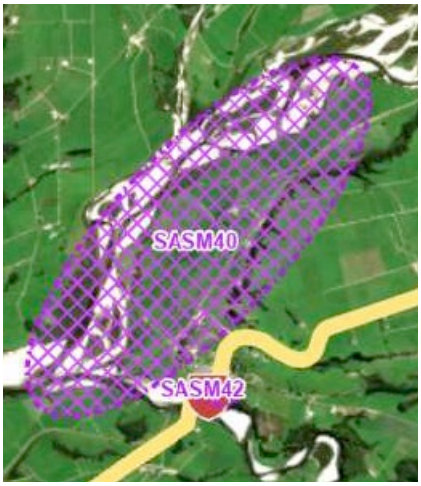
SASM 39 – Kararoa

166. GDC were the only submitter on SASM 39 (S608.181), seeking its removal from the Plan, which was opposed by Poutini Ngāi Tahu in further submission.

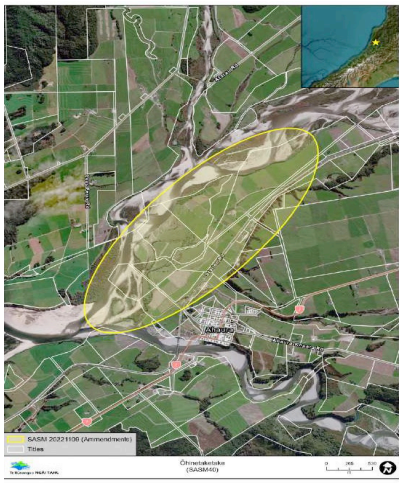
167. The s42A Report generally did not support removal of SASM from the Plan.

Hearing Panel's Evaluation

168. Proposed SASM 39 is entirely within the coastal marine area and is therefore outside the jurisdiction of the Plan. While the Panel acknowledge that activities landward of mean highwater springs may have an impact on SASM within the coastal marine area, such SASM will need to be incorporated into a coastal plan.



Hearing Panel's Recommendation



169. The Panel recommends that SASM 39 be removed from the planning maps and Schedule Three.

SASM 40 – Ōhinetaketake

170. There were two submission points on SASM 40, including GDC. Poutini Ngāi Tahu requested the following amendment to the mapped extent of the SASM (S620.327), which was supported in the s42A Report:

Notified SASM 40 *Amended SASM 40*

Hearing Panel's Evaluation

171. The Panel are satisfied that the requested amendment reduces the area of SASM 40 and that fewer properties are affected. The Panel note that there are no rules applying to SASM 40 and therefore consideration of its values will only be a matter for discretionary and non-complying activities potentially affecting the SASM. We therefore consider that retention of SASM 40 in the planning maps and Schedule Three recognises the significance of the area to Poutini Ngāi Tahu and provides for appropriate subdivision, use and development.

Hearing Panel's Recommendation

172. The Panel recommend that the mapped extent of SASM 40 be amended as shown in the submission of Poutini Ngāi Tahu, only to the extent that there are no incidental increases that impact on any additional landowners as a result of the change.

SASM 41 – Kotorepi (Nine Mile) – silent file

173. GDC sought the removal of SASM 41 (S608.183), which is addressed earlier in this Report. Bruce Annabell (S189.001) requested undeniable proof of the iwi relationship with SASM 41, having researched the area.

174. Mr Madgwick noted that SASM 41 was a very small area of great significance to Poutini Ngāi Tahu, which is why it is protected by a "silent file". He noted that any further disclosure of information regarding the site would need to be given in a forum with public excluded to protect the site.

Hearing Panel's Evaluation

175. The Panel did not consider it necessary to require Mr Madgwick to disclose sensitive details about the nature of the site in a closed hearing session. The Panel accepts that there around 10% of "silent files" amongst the notified SASM and that the mapped area is necessary to provide for their protection, while not disclosing the precise location. We consider this small percentage indicates "silent files" have been used sparingly as a mechanism in the Plan, considering the size of the region. We note the RMA contemplates circumstances where Māori need to protect culturally sensitive information (e.g. section 42 protection of sensitive information) and the Panel respects that need, whilst understanding this may be frustrating for the public and for the submitter.

176. The Panel is satisfied the Plan appropriately provides for a process that will enable Poutini Ngāi Tahu to guide landowners and resource users in methods to ensure protection of culturally sensitive sites, including SASM 41.

177. The Panel notes that Schedule Three, at the time of notification, did not reference Rule SASM-R3 for this SASM and consider this requires correction. The Panel notes that it was included in table SASM-T3 in the right of reply evidence.

Hearing Panel's Recommendation

178. The Panel recommends SASM 41 includes Rule SASM-R3 in Schedule Three and is included within the Table SASM-T3.

SASM 42 – Ahaura Township – silent file

179. Two submission points opposed SASM 42, including GDC, and Poutini Ngāi Tahu lodged further submissions in opposition.

180. Mr Ken McTigue (S551.001) did not want the overlay on his property and indicated his willingness to pass on any artefacts found (S551.002). He invited a site visit and considered that the site had been dug over in the past for housing. The Poutini Ngāi Tahu response to Minute 37 records that a letter was provided to Ken and Linda McTigue confirming that there were no permitted activity rules impacting their property.

181. Mr Madgwick noted that SASM 42 was located along a trail used by Māori, beside the Ahaura River. He advised it was the site of a battle and is a wāhi tapu, with no rules associated with earthworks. He quoted Kā Huru Manu in relation to this SASM, as follows:

> *The Ahaura River drains the western flanks of Kā Tiritiri-o-te-moana (the Southern Alps) before flowing into Māwhera (the Grey River). The Ahaura River was also the start of an*

> *alternative trail through the mountains to Waipara and Kaiapoi. Ahaura was the site of a battle during the Kai Huanga Feud; when a tauā (war-party) from Kaikōura raided the pā at Aromahana (Cobden) they were pursued and caught at Ahaura on the terrace where the township now stands. (Reference: Madgwick, P. (1992) Aotea: A history of the South Westland Maori. Greymouth, N.Z.: Greymouth Evening Star. P25.)*

Hearing Panel's Evaluation

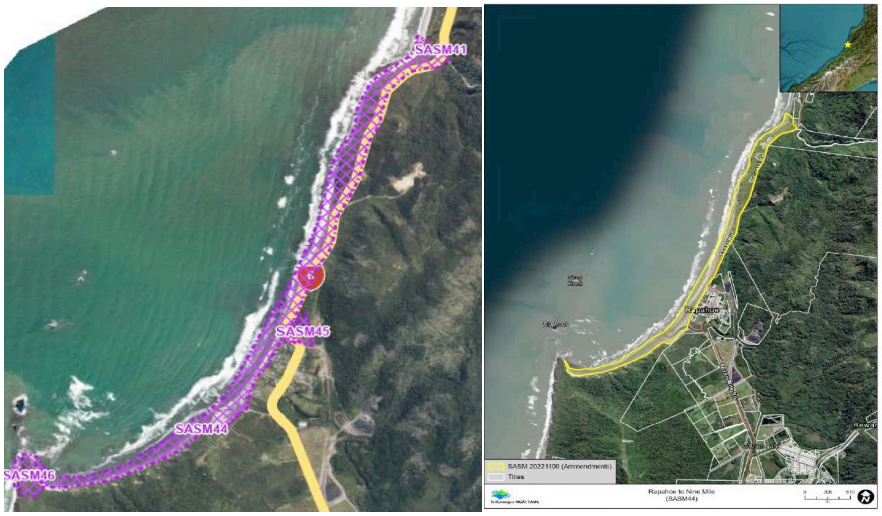
182. The Panel did not seek a public excluded session to understand more about this "silent file" area and accepts the evidence that this wāhi tapu site is significant to Poutini Ngāi Tahu. The Panel note that there are no rules applying to SASM 42 and therefore consideration of its values will only be a matter for discretionary and non-complying activities potentially affecting the SASM. The Panel therefore consider that retention of SASM 42 in the planning maps and Schedule Three recognises the significance of the area to Poutini Ngāi Tahu and provides for appropriate subdivision, use and development.

Hearing Panel's Recommendation

183. The Panel recommend no changes to SASM 42, either in the planning maps or Schedule Three, in response to submissions and evidence.

SASM 44 – Rapahoe to Nine Mile

184. Four submission points opposed SASM 44, including GDC, and Poutini Ngāi Tahu submitted to change the mapped area (S620.328), as well as lodging a further submission in opposition.



185. Bruce Annabell (S189.001) sought undeniable proof of an iwi relationship with the area, having done his own research. He considered that the area of significance ended before the Nine Mile Bluff. Madelene Gibson (S215.001) sought information on how the SASM would impact her property in the future. Helen Carter (S209.001) sought removal of the SASM.

186. Mr Madgwick explained that SASM 44 was an example of a 'cultural landscape', linked to Poutini Ngāi Tahu pounamu legends, as the landing point for Tairea Waka. He outlined the journey of Tairea Waka, pursued by Tama Ahua, and the drowning of Hineaotea in the Makaawhio River and Hinetangiwai at Piopiotahi, before the waka itself sank in the upper Arahura River with the loss of Hinekawakawa and Hinepounamu, which accounts for the pounamu in the Arahura River. He detailed that SASM 44 contained a known burial ground that pre-dated Ngāi Tahu conquest, and that there was an archaeological site recorded as a burial site in the operative Grey District Plan, as well as in Appendix Ten to the Plan. He included text from Kā Huru Manu, as follows:

> *Kotorepi (Nine Mile Creek) is located north of Māwhera (Grey River) on Te Tai Poutini (the West Coast). Kotorepi is the place where the renowned Tairea waka of the pounamu legends was bailed out. The waka was hauled ashore here for repairs before continuing on its journey, which is why pounamu is sometimes found here." (Reference: Taylor, W.A. (1952) Lore and history of the South Island Māori. Christchurch, N.Z.: Bascands. P175 & 187.)*

187. The submission of Poutini Ngāi Tahu requested the following amendment to the mapped area of SASM 44:

Notified SASM 44 *Amended SASM 44*

Hearing Panel's Evaluation

188. The Panel consider there is a reduction in the notified mapped extent of SASM 44 and the amended map provided in submission from Poutini Ngāi Tahu. On that basis the Panel accept the proposed amendment and the evidence of Mr Madgwick regarding the cultural significance of the area. We note that there are no rules applying to SASM 44 and therefore consideration of its values will only be a matter for discretionary and non-complying activities potentially affecting the SASM. The Panel therefore consider that retention of SASM 44 in the planning maps and Schedule Three recognises the significance of the area to Poutini Ngāi Tahu and provides for appropriate subdivision, use and development. Although the mapped area appears to extend partially into the coastal marine area, the Panel note that the jurisdiction of the district plan is limited to the coastal environment on the landward side of the coastal marine area.

Hearing Panel's Recommendation

189. The Panel recommend that the mapped extent of SASM 44 be amended as shown in the submission of Poutini Ngāi Tahu, only to the extent that there are no incidental increases that impact on any additional landowners as a result of the change

SASM 47 – Māwheranui Native Reserve

190. There were two submission points on SASM 47, including GDC. Poutini Ngāi Tahu requested amendment to Schedule Three to remove application of Rules SASM-R4 and SASM-R6 (S620.329), which was supported in the s42A Report.

Hearing Panel's Evaluation

191. The Panel note that SASM 47 is not referenced in the rule tables as recommended in the s42A Report. We accept the evidence of Poutini Ngāi Tahu that it is not appropriate to manage earthworks, buildings and structures or indigenous vegetation clearance as permitted activities in relation to SASM 47. If a resource consent is required as a result of a rule in another chapter of the Plan (e.g. a breach of building height standard for the zone), SASM objectives and policies will apply, along with other objectives and policies in the Plan as relevant. We consider that retention of SASM 47 in the planning maps and Schedule Three recognises the

significance of the area to Poutini Ngāi Tahu and provides for appropriate subdivision, use and development.

Hearing Panel's Recommendation

192. The Panel recommend that reference to Rules SASM-R4 and SASM-R6 are removed from Schedule Three in relation to SASM 47.

SASM 48 – Brunner

193. There were two submission points on SASM 48, including GDC. Poutini Ngāi Tahu requested the following amendment to its mapped extent (S620.330), which was supported in the s42A Report:

Notified SASM 48 *Amended SASM 48*

Hearing Panel's Evaluation

194. The Panel accept the proposed amendment reduces the extent of SASM 48 and on that basis the amendment is considered acceptable. We note that there are no rules applying to SASM 48 and therefore consideration of its values will only be a matter for discretionary and non-complying activities potentially affecting the SASM. We therefore consider that retention of SASM 48 in the planning maps and Schedule Three recognises the significance of the area to Poutini Ngāi Tahu and provides for appropriate subdivision, use and development.

Hearing Panel's Recommendation

195. The Panel recommend that the mapped extent of SASM 48 be amended as shown in the submission of Poutini Ngāi Tahu, only to the extent that there are no incidental increases that impact on any additional landowners as a result of the change.

SASM 51 No. 34 Kōtukuwhakaoko Native Reserve

196. There were two submission points on SASM 51, including GDC. Poutini Ngāi Tahu requested amendment to Schedule Three to remove application of Rule SASM-R6 (S620.331), which was supported in the s42A Report.

Hearing Panel's Evaluation

197. The Panel accept the evidence of Poutini Ngāi Tahu that it is not appropriate to manage earthworks, buildings and structures as a permitted activity in relation to SASM 51. If a resource consent is required as a result of a rule in another chapter of the Plan (e.g. a breach

of building height standard for the zone), SASM objectives and policies will apply, along with other objectives and policies in the Plan as relevant. The Panel consider that retention of SASM 51 in the planning maps and Schedule Three recognises the significance of the area to Poutini Ngāi Tahu and provides for appropriate subdivision, use and development.

Hearing Panel's Recommendation

198. The Panel recommend that reference to Rule SASM-R6 is removed from Schedule Three in relation to SASM 51.

SASM 52 – Cobden Native Reserve

199. GDC sought the removal of SASM 52 (S608.194), which is addressed earlier in this report. No other submissions were specific to this SASM.

Hearing Panel's Evaluation

200. The Panel notes that SASM 52 was included in Table SASM-T5 in the right of reply evidence. However, SASM 52 is not specifically referenced in notified Rule SASM-R5 and is not categorised in notified Schedule Three as "*Category Tahi (1)*". The Panel therefore considers SASM 52 should not be included in Table SASM-T5.

Hearing Panel's Recommendation

201. The Panel recommends SASM 52 is removed from Table SASM-T5 and no changes to Schedule Three.

SASM 54 - Motutapu

202. There were two submission points on SASM 54, including GDC. Poutini Ngāi Tahu requested the following amendment to its mapped extent, in order to merge together two sites (S620.332), which was supported in the s42A Report:

Notified SASM 54 *Amended SASM 54*

Hearing Panel's Evaluation

203. The Panel considers there is marginal difference between the notified area of SASM 54 and the amendment sought by Poutini Ngāi Tahu and on that basis accept the amendment.

Hearing Panel's Recommendation

204. The Panel recommend that the mapped extent of SASM 54 be amended as shown in the submission of Poutini Ngāi Tahu.

SASM 55 – Māwhera Burial Cave Site

205. Two submission points opposed SASM 55, including GDC, and Poutini Ngāi Tahu made a further submission in opposition. Mr Alan O'Connell (S6.001) requested his freehold section to be taken out of the overlay.

206. Ms Easton did not discuss this submission or further submission in her s42A Report.

Mr Madgwick explained that SASM 55 was a small but significant site because it was an ancient burial cave. He noted that although the burial cave was gone, due to blasting and quarrying for harbour works in the early 1900s, the site was still of great significance. He highlighted that SASM 55 was embedded within SASM 62.

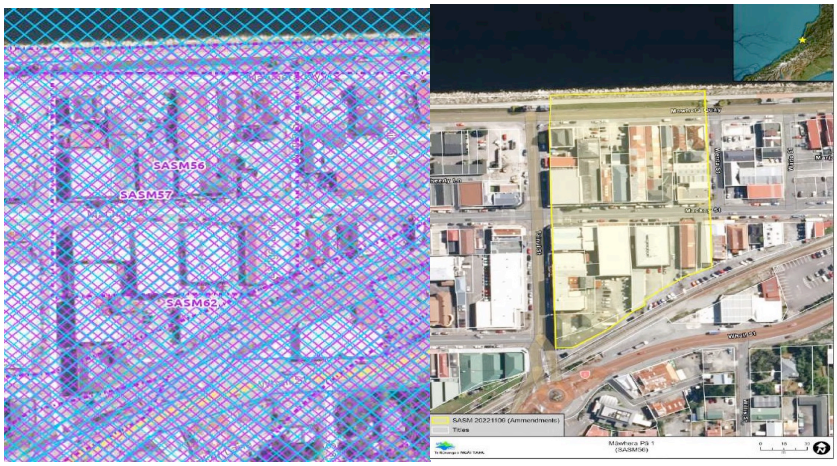
207. Mr Madgwick considered that sale of the land by Māwhera Inc. did not change the cultural association for Poutini Ngāi Tahu. He included SASM 55 in his request for a public excluded session if further information was required, although his evidence did not specifically state that the site was a "silent file".

208. Ms Easton confirmed in her right of reply that due to the grazing of animals not being a relevant activity in this area, SASM 55 should be removed from Table SASM-T1, so that Rule SASM-R1 did not apply.

Hearing Panel's Evaluation

209. The Panel accepts that grazing animals is not a matter of concern for SASM 55 due to its location and small size and therefore accepts the amendment proposed by Ms Easton, including its removal from Table SASM-T1.

210. The Panel is satisfied that the Plan provides for a process that will enable Poutini Ngāi Tahu to guide landowners and resource users in methods to ensure protection of culturally sensitive sites, including SASM 55, through applicable rules in this case. We also accept that SASM 55 is a discrete area of high sensitivity and therefore the approach is appropriate to assist in protecting remaining values at the site, whilst providing pathways for appropriate subdivision, use and development.



Hearing Panel's Recommendation

211. The Panel recommend the reference to Rule SASM-R1 is removed from Schedule Three in relation to SASM 55, and that SASM 55 is removed from Table SASM-T1.

SASM 56 – Māwhera Pā 1

212. GDC sought the removal of SASM 56, which is addressed earlier in this Report. Poutini Ngāi Tahu sought to amending the shape file (S620.333) as follows, which was supported in the s42A Report:

Notified SASM 56 *Amended SASM 56*

Hearing Panel's Evaluation

213. The Panel consider this requested amendment can be accommodated, to the extent that it does not increase the area of SASM and does not incorporate additional landowners within the footprint of the SASM.

214. The Panel notes that Schedule Three, as notified, did not reference Rule SASM-R9 for this SASM, which requires correction. We note that it was included in Table SASM-T8 in the right of reply evidence, and that it was notified with Rule SASM-R9.

Hearing Panel's Recommendation

215. The Panel recommends SASM 56 includes Rule SASM-R9 in Schedule Three and is included within Table SASM-T8. We recommend amending the planning maps in relation to SASM 56 in accordance with the Poutini Ngāi Tahu submission point (S620.333) only to the extent that it does not increase the area of SASM and does not incorporate additional landowners within the footprint of the SASM.

SASM 57 – Māwhera Gardens

216. GDC sought the removal of SASM 57 (S608. 199), which is addressed earlier in this report. Black Singlet Investments Limited also sought to remove the SASM from their property (S395.001) because the land was purchased freehold from Māwhera Inc.

217. The s42A Report did not support these submissions. It noted that the significance of the Māwhera settlement around the lagoon area to Poutini Ngāi Tahu remained regardless of land tenure.

Hearing Panel's Evaluation

218. The Panel accept the area is of significance to Poutini Ngāi Tahu regardless of land ownership.

219. The Panel notes Schedule Three, as notified, did not reference Rule SASM-R9 for this SASM, which requires correction. The Panel notes that it was included in Table SASM-T8 in the right of reply evidence, and that it was notified with rule SASM-R9.

Hearing Panel's Recommendation

220. The Panel recommends no change to the planning maps in relation to SASM 57. We recommend including Rule SASM-R9 in Schedule Three and Table SASM-T8 in relation to this SASM.

SASM 58 – Greymouth Railway Land

221. GDC sought the removal of SASM 58 (S608.200), which is addressed earlier in this Report. Black Singlet Investments Limited sought to remove the SASM from their property (S395.001) because the land was purchased freehold from Māwhera Inc. Both submission points were rejected in the s42A Report.

Hearing Panel's Evaluation

222. The Panel notes Schedule Three, as notified, did not reference Rule SASM-R9 for this SASM, which requires correction. The Panel notes that it was included in Table SASM-T8 in the right of reply evidence, and that it was notified with Rule SASM-R9.

Hearing Panel's Recommendation

223. The Panel recommends no change to the planning maps in relation to SASM 58. We recommend including Rule SASM-R9 in Schedule Three and Table SASM-T8 in relation to this SASM.

SASM 59 – Māwhera Pā 2

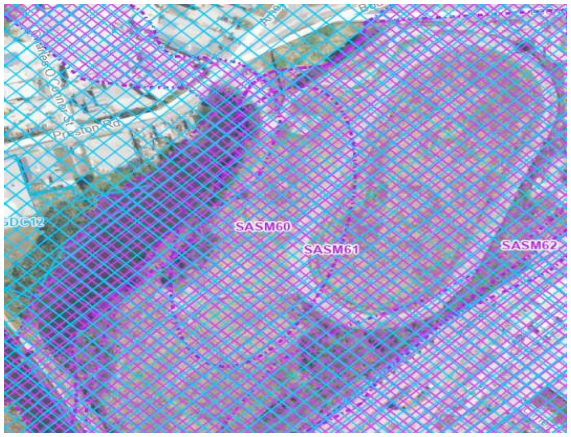
224. GDC sought the removal of SASM 59, which is addressed earlier in this report. Poutini Ngāi Tahu sought to amend the shape file (S620.334), with some increases and decreases in shape, as follows, which is supported in the s42A Report:

Notified SASM 59 *Amended SASM 59*

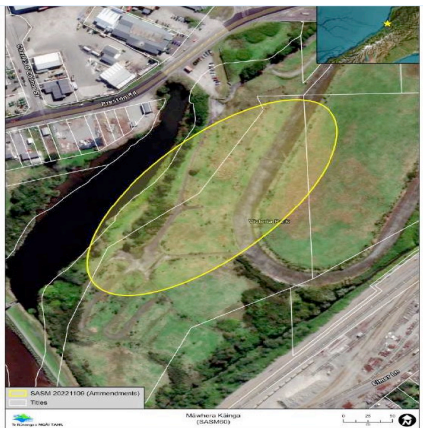
Hearing Panel's Evaluation

225. The Panel considers that requested amendment can be accommodated to the extent that it does not increase the area affected by the SASM or incorporate additional landowners within the footprint of the SASM.

226. The Panel notes Schedule Three, as notified, did not reference Rule SASM-R9 for this SASM, which requires correction. The Panel notes that it was included in table SASM-T8 in the right of reply evidence, and that it was notified with Rule SASM-R9.



Hearing Panel's Recommendation



227. The Panel recommends SASM 59 includes Rule SASM-R9 in Schedule Three and is included within Table SASM-T8. We recommend that any change to the mapped extent of SASM 59 in response to the Poutini Ngāi Tahu submission is only to the extent it reduces the extent of land potentially affected by the SASM.

SASM 60 – Māwhera Kainga

228. GDC sought the removal of SASM 60 (S608.202), which is addressed earlier in this Report. Poutini Ngāi Tahu sought to amend the shape file (S620.335), to change the orientation of the shape as follows, which was supported in the s42A Report:

Notified SASM 60 *Amended SASM 60*

Hearing Panel's Evaluation

229. The Panel are not recommending any changes in mapped area of SASMs unless the change affects the same landowners, so if the proposed amendment involves new landowners within the shape of the SASM this will need to be made by way of a variation. The Panel has identified that Schedule Three at the time of notification did not reference SASM-R9 for this SASM, which requires correction. The Panel notes that it was included in table SASM-T8 in the right of reply evidence, and that it was notified with rule SASM-R9.

Hearing Panel's Recommendation

230. The Panel recommends SASM 60 includes Rule SASM-R9 in Schedule Three and Table SASM-T8. We recommend accepting the change to the mapped extent of the SASM in response to the Poutini Ngāi Tahu submission to the extent that there are no incidental increases or any additional affected landowners as a result of the change.

SASM 61 – Victoria Park

231. GDC sought the removal of SASM 61 (S608.203), which is addressed earlier in this Report.

Hearing Panel's Evaluation

232. The Panel notes Schedule Three, as notified, did not reference Rule SASM-R9 for this SASM, which requires correction. The Panel notes that it was included in Table SASM-T8 in the right of reply evidence, and that it was notified with rule SASM-R9.

Hearing Panel's Recommendation

233. The Panel recommends SASM 61 includes Rule SASM-R9 in Schedule Three and within Table SASM-T8.

SASM 62 – No. 31 Māwhera Native Reserve

234. There were seven submission points on SASM 62 and Poutini Ngāi Tahu lodged five further submissions.

235. William Johnsen (S182.001) requested removal of the SASM from freehold property. Melva Crampton (S401.001) wanted the SASM removed due to concerns regarding future potential restrictions, consequences for valuations and sale prices, and that the property was purchased freehold 34 years previous, indicating that local iwi no longer had an interest in the property. Murray Cochrane (S435.001) wanted the SASM removed because of uncertainty about future restrictions and that it would affect his LIM report. Alain Daunes (S199.002) sought removal of the SASM from 36 Chapel Street, Greymouth, as did Mr Allan Hinch (S219.001), due to insufficient consultation. Black Singlet Investments (S395.001) wanted the SASM removed from 130 Māwhera Quay, Greymouth.

236. Ms Easton did not support these submissions in her s42A Report on the basis that land ownership was not a factor in considering cultural significance to Poutini Ngāi Tahu.

237. Mr Madgwick explained that SASM 62 recognised the Māwhera Native Reserve and contained archaeological sites recorded as 'burial tomo' and 'village', as recorded in the operative Grey District Plan and Appendix Ten of the Plan. Mr Madgwick shared text from Kā Huru Manu, as follows:

> *This 500-acre reserve is situated within Greymouth. In 1856, the reserve came under the control of Native Reserves Act and 181 acres were subdivided into town allotments with a system of leasing introduced. The remaining 319 acres of the reserve was regarded as being unsuitable for building. By 1875, there were approximately 323 leases in place. In 1878, the Young Commission determined that the ownership of the reserve resided with Wereta Tainui and 25 others in unequal shares as tenants in common. In 1921, management of the reserve was vested in the Māori Trustee, prior to this control had been with the Public Trust. Since 1976, the remaining land has been vested in the Māwhera Incorporation to facilitate the management, use and development of the land.*

238. Ms Pull noted that Poutini Ngāi Tahu submitted to amend the permitted activity rules, so that SASM 62 would consequently be added to proposed Table SASM-T8 and acknowledged that this was accepted in the s42A Report.

Hearing Panel's Evaluation

239. The Panel confirms that the s42A Report recommended incorporating SASM 62 in Table SASM-T8 but did not add Rule SASM-R9 to Schedule Three in relation to SASM 62. We note Mr Kennedy (for Westpower) questioned the applicability of Rule SASM-R9 in this area and

the overlap with other SASM. We recognise the relevance of Rule SASM-R9 for maintenance, repair and upgrade of network utility structures within the urban portion of SASM 62, and that the other SASM, within SASM 62 in this urban portion, refer to rules other than Rule SASM-R9. In that respect, with SASM 62 being the larger area, we consider Rule SASM-R9 will apply to the other SASM located within SASM 62. However, the Panel is unable to find a submission point that would provide scope for the change sought by Poutini Ngāi Tahu to add reference to Rule SASM-R9. We therefore consider this needs to be addressed by a future plan change process.

240. The Panel accepts the evidence of Poutini Ngāi Tahu regarding cultural association with this area and consider submitters' concerns about effects on their freehold properties are unwarranted given their existing use rights will be largely unaffected. The main impact will be consideration of Poutini Ngāi Tahu values at the time of making application for any discretionary or non-complying activities.

Hearing Panel's Recommendation

241. The Panel recommends no changes in response to submissions.

SASM 63 – No. 32 Ngā Moana e Rua Native Reserve

242. Two submission points opposed SASM 63, including GDC, and Poutini Ngāi Tahu lodged a further submission.

243. Mr Ronald Olsen (S130.001) requested that his property at 138 Preston Road be left out of SASM 63 because it was sold by Māhwera Inc. some years ago. He indicated that the old grave site was situated over 100 metres away and so the property should not be considered significant.

244. The s42A Report did not support the submission because it did not consider land ownership status to be a relevant factor in recognising the areas significance to Poutini Ngāi Tahu.

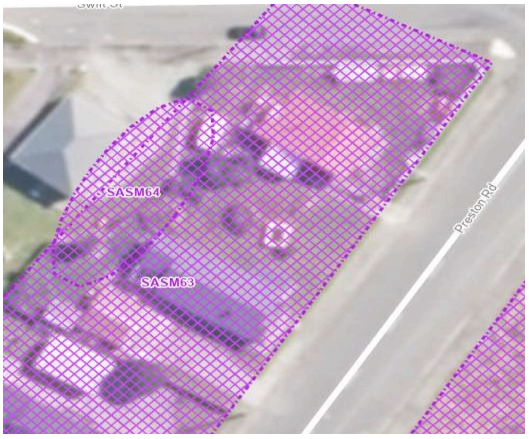
245. Mr Madgwick explained that SASM 63 recognised the Ngā Moana e Rua Native Reserve. He cited Kā Huru Manu, as follows:

> *This 4-acre reserve is situated within Greymouth, and originally bordered Lake Karoro. Originally estimated at 8 acres, this was reduced to 4 acres and later subdivided into three smaller subdivisions (Lot 4 on DP 497 - urupā). In 1878, the Young Commission determined that the ownership of the reserve resided with Wereta Tainui and two others, as trustees of the burial ground. In 1921, management of the reserve was vested in the Māori Trustee, prior to this control had been with the Public Trust, with early records noting that leases had been arranged on the block as early as 1866. The ownership of the reserve wasn't determined until 1925, when the Court ascertained that nine people were entitled to an interest. Since 1976, the remaining land was vested in the Māwhera Incorporation to facilitate the management, use and development of the land.*

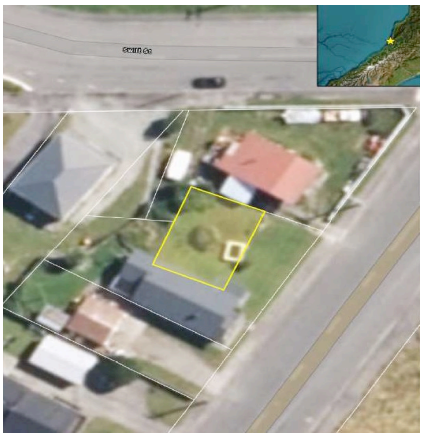
Hearing Panel's Evaluation

246. The Panel notes Schedule Three, as notified, did not reference Rule SASM-R9 for this SASM, which requires correction. The Panel notes that it was included in Table SASM-T8 in the right of reply evidence, and that it was notified with Rule SASM-R9. We accept that the area is of cultural significance to Poutini Ngāi Tahu and note that the rule specific to SASM 63 potentially impacts network utility operators rather than landowners. We therefore consider that

retention of SASM 63 in the planning maps and Schedule Three recognises the significance of the area to Poutini Ngāi Tahu and provides for appropriate subdivision, use and development



Hearing Panel's Recommendation



247. The Panel recommends SASM 63 includes Rule SASM-R9 in Schedule Three and is included within Table SASM-T8.

SASM 64 –Blaketown Part Reserve - Silent File

248. There were two submission points on SASM 64, including GDC. Poutini Ngāi Tahu requested amendment to its mapped extent (S620.336), which was supported in the s42A Report as follows:

Notified SASM 64 *Amended SASM 64*

Hearing Panel's Evaluation

249. The Panel note that the ellipse shape originally notified for SASM 64 was west of the requested amendment to its mapped location. The amendment affects a property already affected by the notified map location and reduces the effect on properties that were otherwise included in the SASM at the time of notification. On the basis that no new landowners are affected and there is a reduction in the size and effect of SASM 64, we consider the requested amendment is acceptable.

250. The Panel observe that SASM 64 is a small and discrete location that is indicated as a "silent file". We consider that the Plan provides for a process that will enable Poutini Ngāi Tahu to guide landowners and resource users in methods to ensure protection of culturally sensitive sites, including SASM 64, through applicable rules in this case.

Hearing Panel's Recommendation

251. The Panel recommend that the mapped extent of SASM 64 is amended as shown in the submission of Poutini Ngāi Tahu.

SASM 65 - Eruaerua Moana Lagoon

252. There were three submission points on SASM 65, including GDC.

253. Richard Cairney (S56.001) requested that SASM not apply to freehold properties. Poutini Ngāi Tahu sought to replace "*Eruaerua Moana Lagoon*" with "*Ngā Moana e Rua and Sawyers Creek*" as the title of the SASM (S620.337).

Hearing Panel's Evaluation

254. The Panel consider that retention of SASM 65 in the planning maps and Schedule Three recognises the significance of the area to Poutini Ngāi Tahu and provides for appropriate subdivision, use and development.

255. The Panel accept that Poutini Ngāi Tahu are best placed to determine the relationship with this area and the appropriate name for it.

Hearing Panel's Recommendation

256. The Panel recommend deleting "*Eruaerua Moana Lagoon*" and replacing it with "*Ngā Moana e Rua and Sawyers Creek*" in Schedule Three in relation to SASM 65.

SASM 66 - No. 33 Kaiata Native Reserve

257. There were two submission points on SASM 66, including GDC. Poutini Ngāi Tahu requested that Rule SASM-R6 no longer apply to this SASM, with corresponding amendment to Schedule Three (S620.339).

Hearing Panel's Evaluation

258. The Panel accept the advice of Poutini Ngāi Tahu that it is not appropriate to manage earthworks, buildings and structures as a permitted activity in this location.

Hearing Panel's Recommendation

259. The Panel recommend removing reference to Rule SASM-R6 from Schedule Three for SASM 66 and removing SASM 66 from Table SASM-T6.

SASM 67 - Kōtukuwhakaoko/Arnold River

260. GDC was the only submitter on SASM 67 (S608.209), seeking its deletion from the Plan, which was opposed in further submission by Poutini Ngāi Tahu.

261. The s42A generally did not support removal of SASM from the Plan.

Hearing Panel's Evaluation

262. The Panel have identified that the planning maps incorporate the whole of the river as a SASM, and in that respect it is like other waterbodies shown on the planning maps, which may move over time. The Panel consider that in order to appropriately reflect Poutini Ngāi Tahu relationship with the river, Schedule Three will need to record "*Waterbody*" in the "*Values*" column, which will allow for movement of the river, as with other such waterbodies specified in the Schedule.

Hearing Panel's Recommendation

263. The Panel recommend incorporating reference to "*Waterbody*" in Schedule Three in association with this SASM.

SASM 68 – Paroa Lagoon

264. There were a large number of submission points in relation to SASM 68 that sought realignment of the eastern border of the area to aligned with the western side of State Highway 7.

Amended SASM 68

Hearing Panel's Evaluation

265. The Panel note the s42A Report considered the submission points had been addressed by the TTPP Committee as a minor amendment under RMA Schedule 1 clause 16 to resolve the issue raised by the submitters. We note Poutini Ngāi Tahu also requested amending the eastern border of SASM 68 to align with the western side of the State Highway (S620.340). The Panel also consider that assigning "*Waterbody*" in the "*Values*" column of Schedule Three would account for any movement of the waterbody over time.

Hearing Panel's Recommendation

266. The Panel recommend removing reference to Rule SASM-R6 from Schedule Three for SASM 66 and removing SASM 66 from Table SASM-T6.

267. The Panel also recommends amending the planning maps to show SASM 68 aligning with State Highway 7 on its eastern boundary and incorporating reference to "*Waterbody*" in Schedule Three.

SASM 72 - Taramakau Kāinga

268. There were two submission points on SASM 72, including GDC. Poutini Ngāi Tahu requested that it be renamed as "*Taramakau Ngutu Awa*" and that its mapped extent be amended (S620.341, S620.342), which was supported in the s42A Report as follows:

Notified SASM 72 *Amended SASM 72*

Hearing Panel's Evaluation

269. The Panel accept the advice of Poutini Ngāi Tahu regarding the appropriate name for this SASM. The Panel consider the requested amendment to the mapped extent of SASM 72 is a reduction in extent and therefore consider it can be supported less land is included and the same landowners are affected.

Hearing Panel's Recommendation

270. The Panel recommend deleting "*Taramakau Kāinga"* and replacing it with "*Taramakau Ngutu Awa*" in relation to SASM 72; and amending the mapped extent of the SASM in accordance with the Poutini Ngāi Tahu submission to the extent that there are no increases in the extent of land included and no additional landowners are potentially affected as a result of the change.

<u>SASM 74 – Lake Haupiri Nohoanga</u>

271. The Poutini Ngāi Tahu submission contained a request to amend the shape of SASM 74. Although the submission point for this amendment was not clear, being missed off the summary of submissions report, the s42A Report supported the requested amendment.

Notified SASM 74 *Amended SASM 74*

Hearing Panel's Evaluation

272. The Panel consider that the amendment can be accepted because there are no new landowners affected by the change.

Hearing Panel's Recommendation

273. The Panel recommend amending the mapped extent of the SASM in accordance with the Poutini Ngāi Tahu submission, only to the extent that there are no incidental increases that impact on any additional landowners as a result of the change.

SASM 75 – Taramakau Mussel Bed

274. GDC were the only submitter on SASM 39 (S608.217), seeking its removal from the Plan, which was opposed by Poutini Ngāi Tahu in further submission.

275. The s42A Report generally did not support removal of SASM from the Plan.

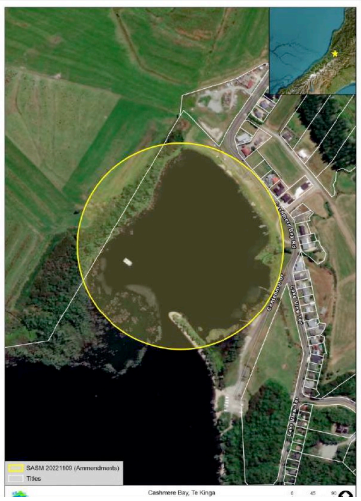
Hearing Panel's Evaluation

276. Proposed SASM 75 is entirely within the coastal marine area and is therefore outside the jurisdiction of the Plan. While the Panel acknowledge that activities landward of the mean highwater springs may have an impact on SASM within the coastal marine area, such SASM will need to be incorporated into a coastal plan.

Hearing Panel's Recommendation

277. The Panel recommends that SASM 75 be removed from the planning maps and Schedule Three.

SASM 79 – Cashmere Bay, Te Kinga



278. There were seven submission points on SASM 79, one in support (David Ellerm (S581.023) and six submissions sought amendments that were variously recorded as in support or opposed (Moreporks Lakeside Lodge Ltd (S470.002), Glenn Colenso (S155.001), Michael Chernishoff (S156.001), Te Kinga/Iveagh Bay Residents & Ratepayers Association (S531.001), Mike Greer Family Trust & Daniel Chima Trust (S530.001) and Poutini Ngāi Tahu (S620.343). Four submissions sought that SASM 79 should continue to have no specific rules apply to it[10], which the s42A Report supported.

279. The s42A Report recommended no further amendment to the boundaries of SASM 79 and relied on amendments already made by the TTPP Committee using RMA Schedule 1, clause 16.

280. Mr Madgwick explained that Poutini Ngāi Tahu submitted to shrink the area of SASM 79 to remove private properties inadvertently included in the circle. He recommended no further amendments to those made by the TTPP Committee, which he considered addressed submitter concerns.

[10] Moreporks Lakeside Lodge Ltd (S470.003), Jane Whyte & Jeff Page (S467.031), Mike Greer Family Trust and Daniel Chima Trust (S530.002) and Te Kinga/Iveagh Bay Residents & Ratepayers Association (S531.002)

Amended SASM 79

281. Te Kinga/Iveagh Bay Residents & Ratepayers Association were represented at the hearing by their Chairman Grant Moreton and their Secretary John Hanning. In their statement to the Panel, Mr Moreton and Mr Hanning outlined membership of the association, their purpose, and projects to enhance the area for the benefit of residents and the visiting public, including native plantings and pest management. They explained that their biggest project was refurbishment and reconstruction of the boat ramp on the foreshore, which was within the boundaries of SASM 79. They noted the amended SASM boundaries, to exclude private properties, still covered the lake foreshore and grass area. They requested that these areas also be excluded due to concerns it could affect access for residents and the public, or that Ngāi Tahu access would be prioritised. They emphasised the importance of the boat ramp for safely launching on the northeastern side of Lake Brunner, high use of the ramp (100 – 200 launchings on a busy day), and its role in local Civil Defence emergency planning. They also requested that Schedule Three remain blank in relation to "relevant Permitted Activity rules".

282. In response to Minute 37, Poutini Ngāi Tahu advised that a letter had been sent to Te Kinga/Iveagh Bay Residents & Ratepayers Association on 30 April 2024 to confirm that there would be no impact on public access to the boat ramp and surrounds at Cashmere Bay because SASM Chapter rules did not apply.

Hearing Panel's Evaluation

283. The Panel are satisfied that boundary amendments have been made in response to submitter concerns regarding application of the SASM to private properties by the TTPP Committee through RMA Schedule 1, Clause 16. We accept that there will be no impact on users of the foreshore or boat ramp as a consequence of the edges of the lake being included within the boundaries of SASM 79 because there are no applicable rules. If a resource consent is required as a result of a rule in another chapter of the Plan (e.g. a breach of building standard for the zone), SASM objectives and policies will apply, along with other objectives and policies in the Plan as relevant.

284. The Panel consider that SASM 79 recognises Poutini Ngāi Tahu relationship with the historic pā site at the margin of the lake and foreshore area.

Hearing Panel's Recommendation

285. The Panel recommends no further change to SASM 79, either in relation to the mapped boundaries or application of rules.

SASM 81 – Takataka Islands

286. There was one submission specific to SASM 81 from GDC (S608.223).

Hearing Panel's Evaluation

287. The Panel notes that SASM 81 was included in Table SASM-T5 in the right of reply evidence and was part of notified SASM-R5 due to being categorised as "*Category Tahi (1)*". The Panel consider this is an error that needs correcting.

Hearing Panel's Recommendation

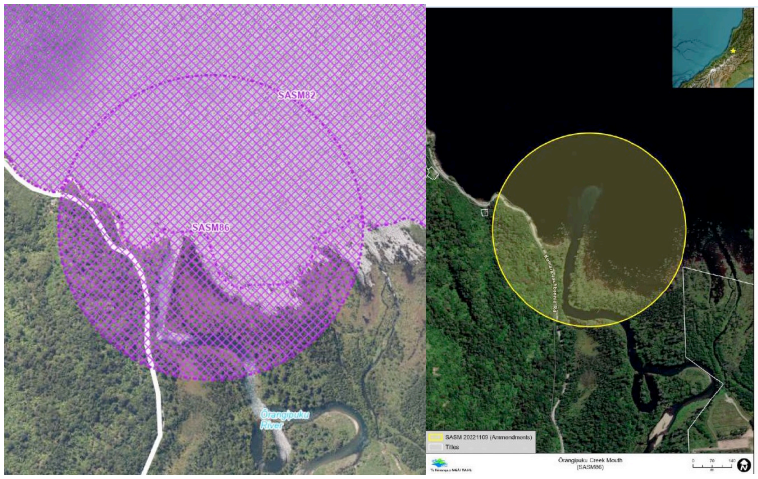
288. The Panel recommend that SASM 81 is retained in Table SASM-T5 and reference to SASM-T5 is made in Schedule Three in relation to SASM 81.

SASM 82 – Kōtukuwhakaoko/Lake Brunner (Moana)

289. There were two submission points on SASM 82, including GDC. Poutini Ngāi Tahu requested that reference to Statutory Acknowledgement be removed from Schedule Three (S620.344), which was supported in the s42A Report.

Hearing Panel's Evaluation

290. The Panel consider that it is natural for waterbodies to change boundaries over time, which does not negate the associations Poutini Ngāi Tahu have with them, as recognised by the Statutory Acknowledgement. The Panel therefore consider it appropriate that Schedule Three record that the lake is a Statutory Acknowledgement Area arising from the Treaty Settlement process. The Panel consider that Schedule 25 of the NTCSA is applicable and provides useful information for Plan users wanting to understand more about the Poutini Ngāi Tahu values associated with Kōtukuwhakaoko/Lake Brunner (Moana). The Panel also consider that Schedule Three should reflect that this SASM is a waterbody, so that both the planning maps and the Schedule work together to identify the relationship of Poutini Ngāi Tahu with this waterbody.



Hearing Panel's Recommendation

291. The Panel recommend amendment to Schedule Three in relation to SASM 82 to include "*Waterbody*" within the "*Values*" column.

SASM 86 - Ōrangipuku Creek Mouth

292. There were two submission points on SASM 86, including GDC. Poutini Ngāi Tahu requested changes to its mapped extent (S620.345), which as supported in the s42A Report as follows:

Notified SASM 86 Amended SASM 86

Hearing Panel's Evaluation

293. The Panel are satisfied that the change in mapped extent is a reduction in area included and accept this is acceptable give any potential effect of the SASM on landowners is also reduced.

Hearing Panel's Recommendation

294. The Panel recommend amendment to the map of SASM 86 as per the Poutini Ngāi Tahu submission only to the extent that there are no incidental increases in extent and no additional landowners are potentially impacted as a result of the change.

SASM 87 – Kapukapuka Lagoon

295. GDC was the only submitter on SASM 67 (S608.229), seeking its deletion from the Plan, which was opposed in further submission by Poutini Ngāi Tahu.

296. The s42A generally did not support removal of SASM from the Plan.

Hearing Panel's Evaluation

297. The Panel have identified that the planning maps incorporate the whole of the lagoon as a SASM, and in that respect it is like other waterbodies shown on the planning maps, which may move over time. The Panel consider that in order to appropriately reflect Poutini Ngāi Tahu relationship with the lagoon, Schedule Three will need to record "*Waterbody*" in the "*Values*" column, which will allow for movement of the lagoon, as with other such waterbodies specified in the Schedule.

Hearing Panel's Recommendation

298. The Panel recommend incorporating reference to "*Waterbody*" in Schedule Three in association with this SASM.

<u>SASM 94 - No. 30 Arahura Native Reserve</u>

299. There was only one submission specific to SASM 94 from GDC (S608.236).

Hearing Panel's Evaluation

300. The Panel note the notified Plan included Rules SASM-R4 and SASM-R9 but this was not included in Schedule Three, which requires correction. The Panel note SASM 94 was included in the right of reply evidence and in notified Table SASM-T8.

Hearing Panel's Recommendation

301. The Panel recommend that Schedule Three include reference to SASM-R9 and in Table SASM-T8 in relation to SASM 94.

SASM 96 – Taramakau River

302. There were three submission points on SASM 96, including GDC. Ian Stewart (S124.001) sought amendment to the mapped area of the SASM. Poutini Ngāi Tahu sought to remove reference to Statutory Acknowledgement in Schedule Three (S620.346).

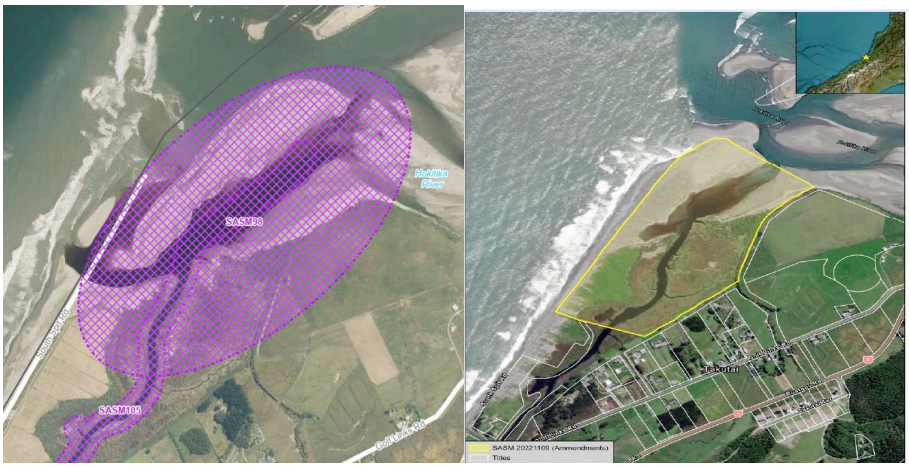
303. Mr Ian Stewart presented in person at the hearing and brought with him aerial maps of the Taramakau River in relationship with his property. His main concern was the impact of gold dredging undertaken in the vicinity forty years ago that had changed the course of the river. Mr Stewart explained that he was progressing efforts to return the river to its original channel. He wanted to ensure the SASM connected with the river's the original channel when the river moved back, rather than staying where it was identified.

304. At the hearing, Mr Madgwick indicated willingness to work with Mr Stewart to resolve the matter. In response to Minute 37, the memorandum of counsel on behalf of Poutini Ngāi Tahu indicated that the SASM could be adjusted to follow the channel corresponding with the course of the river in the early 1900s, whilst noting that this would not be consistent with the approach taken for the rest of the river. The memorandum records that both the historic channel and line of SASM 96 were within the bed of the Taramakau River and therefore, the proposed change would not affect other landowners. A GIS file of the proposed change is shown in the map below:

Hearing Panel's Evaluation

305. The Panel acknowledge that the movement of waterbodies and their channels over time is a challenge for SASM that are mapped to follow waterbodies. The Panel understand that implementation of SASM rules is dependent upon both Schedule Three and the accompanying planning maps, such that Schedule Three may reference the active channel of waterbodies in combination with the maps. For Mr Stewart this would mean that an adjustment to the map could be made, as agreed by Mr Madgwick, but until the active channel of the river followed the old course of the river (as shown in the amended map), reference in the schedule to the active channel would mean the intent of the SASM would be preserved. The Panel do not consider it necessary to remove reference to the Statutory Acknowledgement for this river because the Panel understand that it is acknowledging Poutini Ngāi Tahu association with the river, irrespective of whether it moves over time. The Panel consider that Schedule 56 of the NTCSA is applicable and provides useful information for Plan users wanting to understand more about the Poutini Ngāi Tahu values associated with Taramakau River. The Panel also consider that Schedule Three needs to reference this SASM as a waterbody, to ensure that the combination of the planning maps and Schedule apply to identify the river as a whole as a SASM.

306. The Panel note that SASM 96 was included in Rule SASM-R9, as notified, but this was not shown in Schedule Three. The right of reply evidence included SASM 96 in Table SASM-T8.



Hearing Panel's Recommendation

307. The Panel recommend that the map of SASM 96 is amended as agreed between Mr Madgwick and Mr Stewart, and as shown in the map above. The Panel recommend retaining reference to the Statutory Acknowledgement. The Panel also recommend that Schedule Three is amended to show Rule SASM-R9 and included in Table SASM-T8 in relation to SASM 96, and incorporate reference to "Waterbody" in the "Values" column.

SASM 98 - Māhinapua Pā

308. There were two submissions on SASM 98, including GDC. Poutini Ngāi Tahu requested changes to its mapped extent (S620.347), which was supported in the s42A Report as follows:

Notified SASM 98 *Amended SASM 98*

Hearing Panel's Evaluation

309. The Panel consider that the amended shape of the SASM helps to clarify the area of interest to Poutini Ngāi Tahu, however it appears to be a reduction in extent in some areas and potentially an increase in extent in other areas. The Panel recommends amendments where the extent of land included is reduced from the notified mapping.

Hearing Panel's Recommendation

310. The Panel recommends amending the mapping where the extent of land included in the SASM is reduced and where there are no incidental increases that impact on any additional landowners as a result of the change.

SASM 101 – Hokitika Pā

311. There were four submission points on SASM 101, including GDC. Samantha Pooley (S291.001), Susanne Pooley (S292.001) and Bradley Serong (S294.001) sought to remove SASM 101 from their freehold properties at Arthurstown Road. Both Samantha and Susanne Pooley noted Māwhera Inc. kept an interest in a neighbouring 8 metre strip, connecting a paper road to the Hokitika River, but they did not believe her property impeded interests in that site.

312. The s42A Report attributed these submission points to SASM 102 and did not support them because Ms Easton considered that Poutini Ngāi Tahu values were not dependent upon land ownership status.

313. Mr Madgwick on behalf of Poutini Ngāi Tahu provided evidence of the values of SASM 101, identify it as containing a pā site and cultivations, being part of No. 24 Hokitika Native Reserve. He notes that Kā Huru Manu records this as a 400 acre reserve situated on the south bank of the Hokitika River. He emphasised the importance of reserve lands because they were some of the few areas left in Māori ownership after the Arahura Deed of Purchase in 1860. He reiterated that sale by Māhwera Inc did not indicate there were no cultural values present.

Hearing Panel's Evaluation

314. The Panel note that SASM 101 is part of SASM 102, because SASM 102 is the whole of the No. 24 Hokitika Native Reserve. The Panel accept the evidence of Mr Madgwick regarding the values present within SASM 101.

Hearing Panel's Recommendation

315. The Panel recommends no change to the planning maps or Schedule Three in response to submissions.

SASM 102 – No.24 Hokitika Native Reserve

316. There were two submission points on SASM 102, including GDC. Poutini Ngāi Tahu sought to remove reference to Rule SASM-R4 and Rule SASM-R6 from Schedule Three in relation to this SASM, on the basis that earthworks, buildings and structures and indigenous vegetation clearance could occur at the site without the need to consult with Poutini Ngāi Tahu (S620.423).

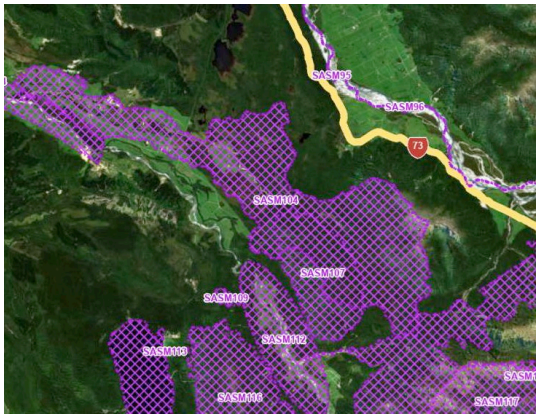
317. The s42A Report supported the submission of Poutini Ngāi Tahu to remove permitted activity rule references.

Hearing Panel's Evaluation

318. The Panel note that the right of reply evidence included SASM 102 in Tables SASM-T4 and Rule SASM-T6. We consider this is an error because the reply evidence showed rules deleted in Schedule Three in response to the submission of Poutini Ngāi Tahu.

319. The Panel accept the advice of Poutini Ngāi Tahu regarding the values of the area and that it is not appropriate for the earthworks, buildings and structures or indigenous vegetation clearance permitted activity rules to apply to the area. We understand that the intent of Poutini Ngāi Tahu is to enable use of the land, which the Panel considers addresses some of the concerns expressed by the submitters on SASM 101 (within SASM 102), given that it will only be discretionary and non-complying activities that will need to address potential effects on the SASM.

Hearing Panel's Recommendation



320. The Panel recommend deleting reference to Rule SASM-R4 and SASM-R6 from Schedule Three and from Table SASM-T4 in relation to SASM 102.

<u>SASM 104 – Kawhaka Creek Catchment</u>

321. A number of submission points opposed SASM 104, including GDC. Neil Bradley (S298.001, S298.002) requested information on why SASM 104 was scheduled and wanted it removed from his property. Kenneth Doig (S172.001) wanted the size of the SASM to be reduced to align better with the location of the waterbody. Myles Benge (S241.001) wanted the SASM removed from his property on Old Christchurch Road. Kawhaka Creek Catchment Residents (S297.002, S297.003) wanted the SASM removed from their properties, as did Ann Bradley (S371.001) and Bill Baxter (S210.001). Gerrit and Suzie Wolters (S308.002) wanted the boundaries reviewed in light of land modification. Carol Cameron (S152.001) and Katie Baxter (S211.001) requested the significance to be reconsidered.

322. Mr Madgwick explained that Poutini Ngāi Tahu submitted to have the area of SASM 104 reduced to just cover Kawhaka Creek (S620.349), which he considered addressed submitter concerns; and requested that the SASM would be re-name "*Kawhaka Creek*" (S620.350).

Notified SASM 104 *Amended SASM 104*

323. Mr Madgwick explained that the name Kawhaka commemorates an event within the pounamu legend whereby Tama Ahua was pursuing his wives who drowned, but that with the right karakia and action he had one chance to revive them. He instructed his slave Timuaki to

strike a fire and set an umu to cook two birds so the noa of the food would counter the tapu of death and save Hine Kawakawa and Hine Auhuka. However, Timuaki burnt his fingers on the hot stones as he opened the umu and instinctively put his fingers in his mouth to cool them breaking the karakia and with it hope of saving the women. Enraged, Tama Ahua struck and killed Timuaki who was turned into a hill and the women were petrified in the Arahura River. The area was named Kawhaka (to light the fire) in memory of the event and applied to the whole of the creek.

324. Mr Madgwick explained Kawhaka was significant because the Arahura River was searched for over and over for pounamu. He noted it was also described as an ara tāwhito, an old trail from the Arahura to Okuku and Taramakau, and over to Greenstone Creek (Ōhunu). As well as a trail up the creek that followed the Wainihinihi River down to the Taramakau River, both ending at Kōtukuwhakaoko (Lake Brunner) and eventually to the upper Taramakau River, over the alpine pass (Tarahanga of Rakamaunikura) and down the east coast to Kaiapoi pā.

325. Ms Pull noted that Poutini Ngāi Tahu submitted to amend the permitted activity rules, so that the SASM, as described by Mr Madgwick, only applied to the creek and for it to be renamed, which was accepted in the s42A Report. However, she noted that this was not reflected in the text of proposed Table SASM-T8.

Hearing Panel's Evaluation

326. The Panel agree that reducing the mapped extent of the SASM to only apply to the creek is appropriate and is likely to satisfy many of the concerns of submitters. The Panel consider that, as with other waterbodies, the Poutini Ngāi Tahu association is with the active extent of the waterbody, which may differ from the mapped area over time, and therefore Schedule Three needs to record "*Waterbody*" in the "*Values*" column. The Panel also agree with Ms Pull that the name of the SASM needs to be amended in Table SASM-T8 and Rule SASM-R9 needs to be added to Schedule Three in relation to SASM 104 to correct an error in the notified Plan.

Hearing Panel's Recommendation

327. The Panel recommend amending the mapped extent of SASM 104 to only cover the creek rather than the whole catchment; deleting "*catchment*" from the name to read "Kawhaka Creek"; and amending Schedule Three to reference Rule SASM-R9 and Table SASM-T8 in relation to SASM 104, as well as "*Waterbody*" in the "*Values*" column.

SASM 105 - Tuwharewhare (Māhinapua Creek)

328. GDC was the only submitter on SASM 67 (S608.247), seeking its deletion from the Plan, which was opposed in further submission by Poutini Ngāi Tahu.

329. The s42A generally did not support removal of SASM from the Plan.

Hearing Panel's Evaluation

330. The Panel have identified that the planning maps incorporate the whole of the creek as a SASM, and in that respect it is like other waterbodies shown on the planning maps, which may move over time. The Panel consider that in order to appropriately reflect Poutini Ngāi Tahu relationship with the creek, Schedule Three will need to record "*Waterbody*" in the "*Values*" column, which will allow for movement of the creek, as with other such waterbodies specified in the Schedule.

Hearing Panel's Recommendation

331. The Panel recommend incorporating reference to "*Waterbody*" in Schedule Three in association with this SASM.

SASM 109 – Pyramid Hill/Timuaki Hill

332. There were two submission points on SASM 109, including GDC. Rex Scott (S25.001) sought that the SASM be removed from his property.

333. Mr Madgwick explained that SASM 109 was an example of a cultural landscape. The story of Timuaki, as relayed in explanation of SASM 104, was in relation to him turning into a hill, which is Pyramid Hill or Timuaki Hill. Timuaki originally came from Tūhua/Mayor Island in the Bay of Plenty and his hill is in the shadow of the mountain Tūhua, named after his home.

Hearing Panel's Evaluation

334. The Panel accept the evidence of Poutini Ngāi Tahu regarding the values present at the site.

Hearing Panel's Recommendation

335. The Panel recommend no amendments to the planning mapping, Schedule Three or rule tables in relation to SASM 109.

SASM 110 – Māhinapua

336. Mr Tangi Weepu (S630.001) described his association with Māhinapua and the lake where a great battle took place, impacting his tūpuna.

Hearing Panel's Evaluation

337. The Panel accept the oral submission of Mr Weepu regarding the values present at the site. There are a number of activities that will require certification by Poutini Ngāi Tahu in order to take place as permitted activities in this location, including minor earthworks, indigenous vegetation clearance, temporary activities, and earthworks, buildings and structures. The Panel has provided for certification of permitted activities to incorporate tikanga where appropriate.

Hearing Panel's Recommendation

338. The Panel recommend no amendments to SASM 110, associated Schedule Three or rule tables.

SASM 111 – Lake Māhinapua

339. GDC was the only submitter on SASM 111 (S608.253), seeking its deletion from the Plan, which was opposed in further submission by Poutini Ngāi Tahu. The oral submission of Tangi Weepu (S630.001) is also particularly relevant to this SASM.

340. The s42A generally did not support removal of SASM from the Plan.

Hearing Panel's Evaluation

341. The Panel have identified that the planning maps incorporate the whole of the lake as a SASM, and in that respect it is like other waterbodies shown on the planning maps, which may move over time. The Panel consider that in order to appropriately reflect Poutini Ngāi Tahu relationship with the lake, Schedule Three will need to record "*Waterbody*" in the "*Values*" column, which will allow for movement of the lake, as with other such waterbodies specified in the Schedule. The Panel has also provided for certification of permitted activities to incorporate tikanga where appropriate.

Hearing Panel's Recommendation

342. The Panel recommend incorporating reference to "*Waterbody*" in Schedule Three in association with this SASM.

SASM 112 – Arahura River at Tūhua

343. There were two submission points on SASM 112, including GDC. Mr Vernon Morris (S143.001) wanted his land at Milltown/Arahura Valley to be removed from the SASM unless genuine reasons could be demonstrated.

344. Mr Madgwick explained that SASM 112 recognises the Arahura River and the Wainihinihi River, because of the centrality of the Arahura in pounamu traditions and because of the ara tāwhito connected with the Wainihinihi River that facilitated pounamu trade, as outlined in relation to SASM 104. He noted SASM 112 was also connected with the nearby Waitaiki Historic Reserve, vested with Ngāi Tahu after Settlement, and the bed of the Arahura River that is also vested with Ngāi Tahu. Mr Madgwick cited Kā Huru Manu, as follows:

> *The Arahura River on Te Tai Poutini (the West Coast) was apparently named by Ngahue during his explorations, returning to Hawaiki with pounamu that was later used for the toki that carved the canoes for the major migrations. Arahura has always been an important source of pounamu (greenstone). There are two main traditions relating to Arahura and pounamu. The first concerns Tama-ki-te-Rangi, who came from Tūhua (Mayor Island) in search of his three wives, who had deserted him in the Tairea waka. By using his magic dart he followed the waka down the west coast of the South Island and up the Arahura River where the waka capsized. His wives had turned into pounamu. The Tairea waka was commemorated by being the name for the old Rūnanga Hall at Arahura. The second tradition records Arahura as the final resting place for Waitaiki, the essence of pounamu, who was captured and taken there by Poutini, the kaitiaki of pounamu. During the negotiations for the Crown purchase of Te Tai Poutini (the West Coast), Poutini Ngāi Tahu requested that all the land between the Māwhera (the Grey River) and Hokitika River be excluded. The Crown refused this request, and instead only agreed to exclude the Arahura River. When Poutini Ngāi Tahu lost control of their principal kāinga at Māwhera, due to the Crown taking over the Māwhera Reserve to create the expanding township of Greymouth in 1865 to meet the demands of the mid-19th century gold-rushes, Ngāi Tahu families began moving from Māwhera to Arahura to settle amongst the resident families. This gradual shift was completed in the early 1880s, directly after the death of Wereta Tainui. Arahura became the principal Ngāi Tahu settlement on Te Tai Poutini, and continues to be a stronghold for Poutini Ngāi Tahu." (References: Pukahu, H., Tauara, H., Te Kaapo, H., Te Naihi, W.K., Te Naihi, Rea, Te Naihi, Ripeka and Bannister, S. (1897) Nomenclature, legends as supplied by the Māoris in south Westland, 1897 in Andersen, Johannes Carl, 1873-1962 : Papers. Ref: MS-Papers-0148-112. Alexander Turnbull Library, Wellington, New Zealand. no.21.).*

Hearing Panel's Evaluation

345. The Panel accept the evidence of Mr Madgwick regarding the Poutini Ngāi Tahu values at this site. We note that SASM 112 was included in notified Rule SASM-R9 and was included in Table SASM-T8 of the right of reply evidence, but that this reference is missing from Schedule Three. The Panel consider this is an error that requires correction.

Hearing Panel's Recommendation

346. The Panel recommend adding reference to Rule SASM-R9 to Schedule Three and in Table SASM-T8 in relation to SASM 112

SASM 116 – Mt Tūhua

347. There were two submissions on SASM 116, including GDC. Ridgeline 3 Investments Limited (S127.002) sought that SASM 116 be removed because the title has been in private ownership since 1887 and it was not a Statutory Acknowledgement Area. The evidence of Mark Dixon on behalf of Ridgeline 3 Investments Limited is discussed in Section 1.3 of the Recommendations Report.

348. Mr Madgwick explained that Mt Tūhua was significant due to its relationship with the pounamu legends, which he noted were associated with the entire Arahura and environs, including Kawhaka, Tūhua, Timuaki, Raparapahoe, Mt Tara o Tama (the great mountain of the pounamu explorer Tama Ahua) and as far as Mt Kaniere (Mt Harman), named for sawing the pounamu. He noted these places were all remembered in whakapapa, waiata and oral histories because war parties trod these lands, and battles for ascendancy of this taonga see-sawed at Kokatahi, Kaniere, Māhinapua, Arahura and Kōtukuwhakaoko. Mr Madgwick cited Kā Huru Manu, as follows:

> *Tūhua is a mountain in the Arahura Valley on Te Tai Poutini (the West Coast). It is named after the volcanic island of that name, which is now known as Mayor Island in the Bay of Plenty. Tūhua features in several pounamu legends, one concerning Tama ki te Rangi and the Tairea waka which was wrecked at Arahura close to Tūhua. The waka was commemorated in the naming of the old Tairea Rūnanga Hall at Arahura that was opened in 1896. The other legend concerns Tamaahua whose wife Waitaiki, was captured from Tūhua by Poutini, the kaitiaki of pounamu. She was eventually taken to the Arahura River where she transformed into the essence of pounamu." (References: Pukahu, H., Tauara, H., Te Kaapo, H., Te Naihi, W.K., Te Naihi, Rea, Te Naihi, Ripeka and Bannister, S. (1897) Nomenclature, legends as supplied by the Maoris in south Westland, 1897 in Andersen, Johannes Carl, 1873-1962 : Papers. Ref: MS-Papers-0148-112. Alexander Turnbull Library, Wellington, New Zealand. no.166; and Mason, Maika cited in Beck, R.J. (2010) Pounamu: the jade of New Zealand. Auckland, N.Z.: Penguin. P44-45.).*

349. The s42A Report did not support the submissions and considered the area was significant to Poutini Ngāi Tahu regardless of land ownership.

Hearing Panel's Evaluation

350. The Panel accepts the evidence of Mr Madgwick regarding Poutini Ngāi Tahu values at this site and understand that these values and relationships are not dependent on the ownership status of land.

Hearing Panel's Recommendation

351. The Panel recommend no amendment to the planning maps, Schedule Three or associated rule tables in relation to SASM 116.

SASM 117 – Waiitaiki Catchment

352. There were two submission points on SASM 117, including GDC. Ridgeline 3 Investments Limited (S127.002) sought remove SASM 117 because the title had been in private ownership since 1887 and was not a Statutory Acknowledgement Area. The evidence of Mark Dixon on behalf of Ridgeline 3 Investments Limited is discussed in Section 1.3 of the Recommendations Report.

353. Mr Madgwick explained that SASM 117 recognised the Waitaiki catchment due to its connection with pounamu traditions. Mr Madgwick cited Kā Huru Manu, as follows:

> *Waitaiki is the Māori name for the Olderog Creek that flows into the Arahura River on Te Tai Poutini (The West Coast). Waitaiki was a young woman who was captured by Poutini – the kaitiaki (guardian) of pounamu – from her home of Tūhua (Mayor Island) in the Bay of Plenty. Poutini brought Waitaki down south, and when Tamaahua realised his wife had been taken, he used his powers of karakia to discover her whereabouts. Along with his slave Tumuaki, they went in search for Waitaki. Sensing Tamaahua in close pursuit Poutini fled all the way down the west coast of the South Island before reaching Piopiotahi (Milford Sound). Here Waitaki wept, and begged him to stop and turn back. With her tears she created the tangiwai pounamu that is still found there today. Reluctantly, Poutini turned back and went to the Arahura River. By this time Tamaahua was closing in, and realising that there was little chance of escaping and that Tamaahua was to powerful, Poutini decided that if he could not have Waitaki, neither would anyone else and he transformed her into his own likeness and essence – pounamu – and laid her in the bed of the river near the stream that today bears her name." (References: Mason, Maika cited in Beck, R.J. (2010) Pounamu: the jade of New Zealand. Auckland, N.Z.: Penguin. P44-45.).*

Hearing Panel's Evaluation

354. The Panel accept the evidence of Mr Madgwick regarding Poutini Ngāi Tahu values at this site and understand that values and relationships are not dependent on the ownership status of land.

The Panel note that notified Rule SASM-R9 included SASM 117 but there is no corresponding reference in Schedule Three. We note SASM 117 was included in Table SASM-T8 in the right of reply evidence. The Panel consider this is an error that requires correction.

Hearing Panel's Recommendation

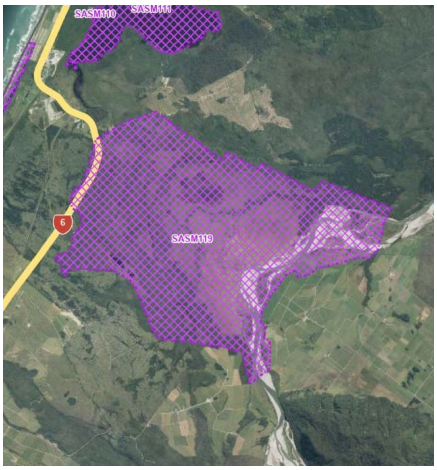
355. The Panel recommend adding reference to Rule SASM-R9 in Schedule Three and in Table SASM-T8 in relation to SASM 117.

SASM 118 – Lake Kaniere

356. There were two submissions on SASM 118, including GDC. Poutini Ngāi Tahu sought to remove reference to Statutory Acknowledgement in Schedule Three (S620.351).

Hearing Panel's Evaluation

357. The Panel consider that it is natural for waterbodies to change boundaries over time, which does not negate the associations Poutini Ngāi Tahu have with them that are part of the reason for statutory acknowledgement. The Panel therefore consider it appropriate that Schedule Three record that the lake is a Statutory Acknowledgement Area arising from the Treaty Settlement process. The Panel consider that Schedule 31 of the NTCSA is applicable and provides useful information for Plan users wanting to understand more about the Poutini Ngāi Tahu values associated with Lake Kaniere. The Panel also consider that, as a consequence of the whole waterbody being identified as a SASM, this should be reflected in Schedule Three, so that both the planning maps and Schedule Three identify Poutini Ngāi Tahu relationship with the lake as a whole.



Hearing Panel's Evaluation

358. The Panel recommend including reference to "Waterbody" in the "Values" column of Schedule Three for SASM 118.

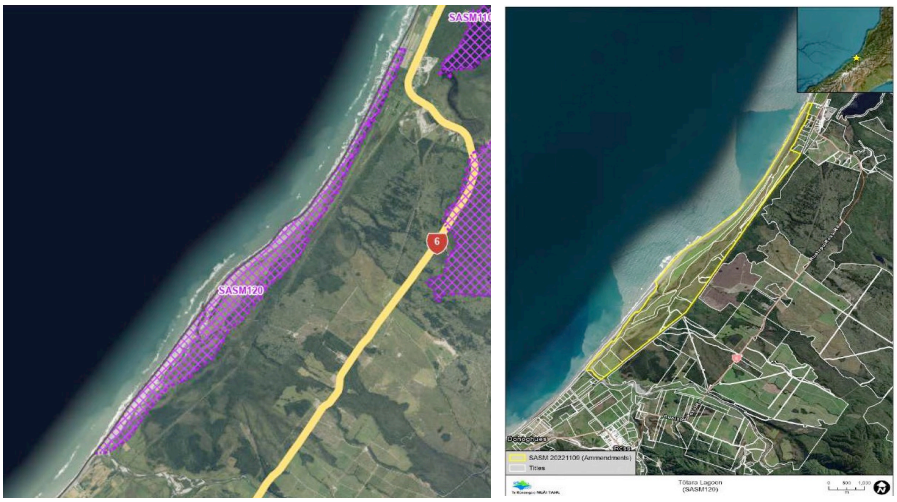
<u>SASM 119 – Orautahi (Eel Creek)</u>

359. There were two submissions on SASM 118, including GDC. Poutini Ngāi Tahu sought to amend the mapped area of this SASM (S620.352), which was supported in the s42A Report as follows:

Notified SASM 119 *Amended SASM 119*

Hearing Panel's Evaluation

360. The Panel notes this is a minor shift in location. We consider that the amendment can be accepted because there is not increase in extent and no new landowners affected by the change.



Hearing Panel's Recommendation

361. The Panel recommend amending the mapped extent of the SASM in accordance with the Poutini Ngāi Tahu submission only to the extent that there are no incidental increases in extent that impact on any additional landowners as a result of the change.

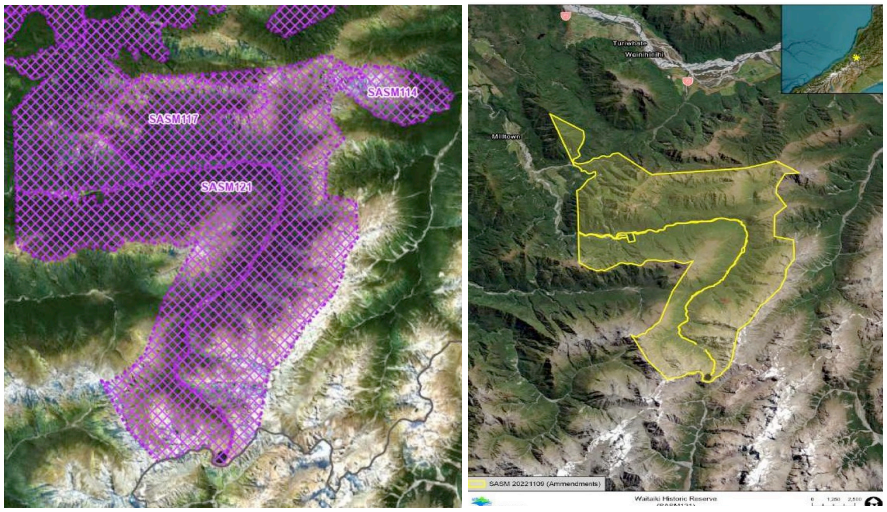
SASM 120 – Tōtara Lagoon

362. There were three submissions on SASM 120, including GDC. Lyn McIntosh (S469.002) was concerned that her land had inadvertently been included, when it was meant to just be the lagoon. Poutini Ngāi Tahu sought to amend the mapped area of this SASM (S620.352), which was supported in the s42A Report as follows:

Notified SASM 120 *Amended SASM 120*

Hearing Panel's Evaluation

The Panel consider that the amendment can be accepted because it represents a reduction in extent of the mapped area so that no new landowners are impacted. However, while the extent of the SASM is reduced on Ms Mcintosh's land and area of land remains in the SASM. The Panel also consider that, as a consequence of the whole lagoon being identified as a SASM, this should be reflected in Schedule Three, so that both the planning maps and Schedule Three identify Poutini Ngāi Tahu relationship with the lagoon as a whole.



Hearing Panel's Recommendation

363. The Panel recommend amending the mapped extent of the SASM in accordance with the Poutini Ngāi Tahu submission, only to the extent that there are no incidental increases in area of affected land parcels or any additional landowners affected as a result of the change. The Panel also recommend adding reference to "*Waterbody*" in the "*Values*" column of Schedule Three, noting also that the sandspit is intended to be included as part of the SASM.

SASM 121 – Waitaiki Historic Reserve

364. There were three submissions on SASM 121, including GDC. Ridgeline 3 Investments Limited (S127.002) sought the removal of SASM 121 because the title had been in private ownership since 1887 and was not a Statutory Acknowledgement Area. The evidence of Mark Dixon on behalf of Ridgeline 3 Investments Limited is discussed in Section 1.3 of the Recommendations Report. Poutini Ngāi Tahu sought to amend the mapped area of SASM 121 (S620.354), as follows.

Notified SASM 121 *Amended SASM 121*

365. Mr Madgwick explained that SASM 121 recognised the Waitaiki Historic Reserve due to its association with pounamu traditions. He noted that the reserve had been created for the purpose of protecting and preserving in perpetuity its significant natural, historic, archaeological, cultural and educational features. Mr Madgwick cited the Waitaiki Historic Reserve Management Plan, as follows:

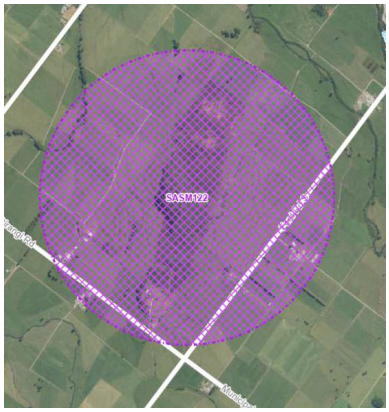
> *The Waitaiki Historic Reserve has historical value to all New Zealanders as a place of spiritual and cultural significance, with its rich Māori and European history. Its central significance is as the source of pounamu and its place in the Poutini-Waitaiki creation tradition associated with pounamu. In particular, Waitaiki (Jade Creek) commemorates the resting place of Waitaiki, along with the surrounding features of Tamaahua (Mt Tara Tama); Tumuaki (Island Hill) and Tūhua. The long-standing use of pounamu within the Arahura catchment and sourced from Waitaiki, along with the associated trials and trade routes, as well as the subsequent European history associated with exploration, settlement and mining all form part of its unique history… …The ancestral landscapes of tangata whenua are inseparable from their identity and wellbeing. Among these landscapes are wāhi tapu (sacred sites), wāhi taonga (sacred treasures) and other places of significance..." (Reference: The Māwhera Incorporation (2019) The Waitaiki Historic Reserve Management Plan. P14.).*

Hearing Panel's Evaluation

366. The Panel accept the evidence of Mr Madgwick regarding Poutini Ngāi Tahu values at this site and understand that values and relationships are not dependent on land ownership status. The Panel have incorporated consideration of tikanga in Schedule Three (SCHED 3A) where relevant to the certification process for permitted activities, of which there are five attributed to this SASM.

367. The Panel note that SASM 121 was included in notified Rule SASM-R9 and was included in Table SASM-T8 in the right of reply evidence, but that this reference is missing from Schedule Three. The Panel consider this is an error that requires correction.

368. The Panel support the mapping amendments requested by Poutini Ngāi Tahu only to the extent that there is no increase in area and no new landowners are affected by the change.



Hearing Panel's Recommendation

369. The Panel recommend adding reference to Rule SASM-R9 in Schedule Three and in Table SASM-T8 in relation to SASM 121. The Panel also recommend amending the mapped extent of SASM 121 to match the Poutini Ngāi Tahu submission, only to the extent that there is no increase in extent and no additional landowners are potentially affected as a result of the change.

SASM 122 – Kowhitirangi- silent file

370. Three were five submissions on SASM 122, including GDC. Janna Bradley (S593.001), James Bradley (S428.002) and Glen Bradley (S592.001) sought to remove SASM 122. Poutini Ngāi Tahu (S620.355) sought to reduce the size of the SASM to better reflect its location, as follows, although it was noted to be a silent file:

Notified SASM 122 *Amended SASM 122*

371. Mr Madgwick noted that SASM 122 was very significant to Poutini Ngāi Tahu, which was why it was protected by a "silent file". He explained that any further disclosure regarding the site would need to be given in a public excluded hearing session to protect the site.

Hearing Panel's Evaluation

372. The Panel accepts the evidence of Mr Madgwick regarding the significant values at this site. As with other silent files, the Panel did not consider it necessary to require Mr Madgwick to disclose sensitive details about the nature of the site in a closed session. The Panel is satisfied the Plan provides for a process that will enable Poutini Ngāi Tahu to guide landowners and resource users in methods to ensure protection of culturally sensitive sites, including SASM 122.

373. The Panel note that SASM 121 was included in notified Rule SASM-R9 and that it is included in Table SASM-T8 in the right of reply evidence, but that this reference is missing from Schedule Three. The Panel consider this is an error that requires correction.

374. The Panel support the mapping amendments requested by Poutini Ngāi Tahu on the basis that there is a reduction in the extent of area included and therefore less potential effect on landowners.

Hearing Panel's Recommendation

375. The Panel recommend adding reference to Rule SASM-R9 to Schedule Three and in Table SASM-T8 in relation to SASM 121. The Panel also recommend amending the mapped extent of SASM 121 to match the Poutini Ngāi Tahu submission, and only to the extent that there are no increases in extent and no additional landowners are affected as a result of the change.

SASM 111 – Lake Matahi/Lake Ianthe

376. GDC was the only submitter on SASM 125 (S608.253), seeking its deletion from the Plan, which was opposed in further submission by Poutini Ngāi Tahu.

377. The s42A generally did not support removal of SASM from the Plan.

Hearing Panel's Evaluation

378. The Panel have identified that the planning maps incorporate the whole of the lake as a SASM, and in that respect it is like other waterbodies shown on the planning maps, which may move over time. The Panel consider that in order to appropriately reflect Poutini Ngāi Tahu relationship with the lake, Schedule Three will need to record "*Waterbody*" in the "*Values*" column, which will allow for movement of the lake, as with other such waterbodies specified in the Schedule.

Hearing Panel's Recommendation

379. The Panel recommend incorporating reference to "*Waterbody*" in Schedule Three in association with this SASM.

SASM 126 – Pouerua-hāpua/Saltwater Lagoon

380. There were two submission points on SASM 126, including GDC. Poutini Ngāi Tahu sought to remove reference to Statutory Acknowledgement in Schedule Three (S620.356).

Hearing Panel's Evaluation

381. The Panel consider that it is natural for waterbodies to change boundaries over time, which does not negate the associations Poutini Ngāi Tahu have with them that are part of the reason for statutory acknowledgement. The Panel therefore consider it appropriate that Schedule Three record that the lagoon is a Statutory Acknowledgement Area arising from the Treaty Settlement process. The Panel consider that Schedule 53 of the NTCSA is applicable and provides useful information for Plan users wanting to understand more about the Poutini Ngāi Tahu values associated with Pouerua-hāpua/Saltwater Lagoon. The Panel also consider that, as a consequence of the whole lake being identified as a SASM, this should be reflected in Schedule Three, so that both the planning maps and Schedule Three identify Poutini Ngāi Tahu relationship with the lake as a whole.

Hearing Panel's Recommendation

382. The Panel recommends amendment to Schedule Three for SASM 126 to incorporate reference to "*Waterbody*" in the "*Values*" column.

SASM 127 – Ulipa

383. The only submitter on SASM 127 was GDC seeking to remove it from the Plan (S608.269).

Hearing Panel's Evaluation

384. The Panel note that the notified Plan included SASM 127 in Rule SASM-R1 and that SASM-R1 was included in Schedule Three in the right of reply evidence. However, we note SASM 127 is missing from Table SASM-T1, which the Panel considers is an error that requires correction.

Hearing Panel's Recommendation

385. The Panel recommend inclusion of SASM 127 in Table SASM-T1 and no change to Schedule Three for SASM 127.

SASM 131 – Ōkārito Lagoon

There were two submission points on SASM 131, including GDC. Poutini Ngāi Tahu sought to remove reference to Statutory Acknowledgement in Schedule Three (S620.357)**.**

Hearing Panel's Evaluation

386. The Panel consider that it is natural for waterbodies to change boundaries over time, which does not negate the associations Poutini Ngāi Tahu have with them that are part of the reason for statutory acknowledgement. The Panel therefore consider it appropriate that Schedule Three record that the lagoon is a Statutory Acknowledgement Area arising from the Treaty Settlement process. We consider that Schedule 48 of the NTCSA is applicable and provides useful information for Plan users wanting to understand more about the Poutini Ngāi Tahu values associated with Ōkarito Lagoon. We also consider that, as a consequence of the whole lagoon being identified as a SASM, this should be reflected in Schedule Three, so that both the planning maps and Schedule Three identify Poutini Ngāi Tahu relationship with the lagoon as a whole.

Hearing Panel's Recommendation

387. The Panel recommend amendment to Schedule Three for this SASM to incorporate reference to "*Waterbody*" in the "*Values*" column.

SASM 133 – No. 19 Ōkarito Native Reserve

388. The only submitter was GDC seeking removal of SASM 133 (S608.275).

Hearing Panel's Evaluation

389. The Panel note that the notified Plan included SASM 133 in Rule SASM-R1 and that SASM-R1 was included in Schedule Three, which was also reflected in the right of reply evidence. However, the Panel notes SASM 133 is missing from Table SASM-T1, which we consider is an error that requires correction.

Hearing Panel's Recommendation

390. The Panel recommend inclusion of SASM 133 in Table SASM-T1 and no change to Schedule Three for SASM 133.

SASM 135 – Ōkarito (No. 18 Koamaru Native Reserve) – silent file

391. There were two submission points on SASM 135, including GDC. Mr John Hughson (S445.001) was concerned about the lack of information due to the SASM being a "silent file" and considered that unhelpful, however, he indicated intent to work constructively with the proposal.

392. Mr Madgwick explained that SASM 135 recognised the Koamaru Native Reserve. He described that the pā site was located at the foot of the hill, overlooking the village and is tapu because it was the scene of some bloody battles. He noted it was a "silent file" due to the sensitive nature of the site. He cited Kā Huru Manu, as follows:

> *This 13-acre reserve originally adjoined the Ōkarito Township and was set aside as part of the Arahura Purchase 1860. The correct name is Kohuamaru; it was here that Te Niho and Takarei arrived after capturing the northern Poutini Ngāi Tahu at Kokatahi. In 1878, the Young Commission determined that the ownership of the reserve resided with Tare Parata, Riria Parata and Rena Parata, as tenants in common in equal shares. Since 1878, the Māori Land Court has maintained succession schedules detailing changes in ownership. The size of the reserve was reduced to just over 9 acres, as land was sold to the Crown or taken under the Public Works Act to lay out streets. In 1971, the land was converted to general title by way of status declaration pursuant to part 1 of the Māori Affairs Amendment Act 1967.*

Hearing Panel's Evaluation

393. The Panel accept the evidence of Mr Madgwick regarding the significant values at this site. As with other silent files, the Panel did not consider it necessary to require Mr Madgwick to disclose sensitive details about the nature of the site in a closed session. The Panel is satisfied the Plan provides for a process that will enable Poutini Ngāi Tahu to guide landowners and resource users in methods to ensure protection of culturally sensitive sites, including SASM 135.

Hearing Panel's Recommendation

394. The Panel recommend adding reference to Rule SASM-R9 to Schedule Three and in Table SASM-T8 in relation to SASM 135.

SASM 139 – Gillespies Beach

395. There were three submissions on SASM 139, including GDC. Margaret Williams (S394.001) wanted the southern boundary of the SASM moved to exclude freehold land and the northern boundary moved to the northern end of the beach to include the lagoon. Poutini Ngāi Tahu submitted to amend the boundaries of SASM 139 (S620.358) to remove freehold land.

396. Mr Madgwick explained that the amendment sought by Poutini Ngāi Tahu removed the submitter's property from the area of the SASM resolving their concerns.

397. The s42A Report supported the amendment requested by Poutini Ngāi Tahu as follows:

Notified SASM 139 *Amended SASM 139*

Hearing Panel's Evaluation

398. The Panel accept that the amended map for SASM 139 is a reduction in area and that this reduces the potential effect on landowners within the mapped area. We consider this amendment removes the submitter's property from the identified SASM.

Hearing Panel's Recommendation

399. The Panel recommends amending SASM 139 as requested in the Poutini Ngāi Tahu submission to the extent that there are no increases in the extent of area included and there are no additional landowners impacted as a result of the change.

SASM 140 – Lake Matheson

400. GDC was the only submitter on SASM 140 (S608.282), seeking its deletion from the Plan, which was opposed in further submission by Poutini Ngāi Tahu.

401. The s42A generally did not support removal of SASM from the Plan.

Hearing Panel's Evaluation

402. The Panel have identified that the planning maps incorporate the whole of the lake as a SASM, and in that respect it is like other waterbodies shown on the planning maps, which may move over time. The Panel consider that in order to appropriately reflect Poutini Ngāi Tahu relationship with the lake, Schedule Three will need to record "*Waterbody*" in the "*Values*" column, which will allow for movement of the lake, as with other such waterbodies specified in the Schedule.

Hearing Panel's Recommendation

403. The Panel recommend incorporating reference to "*Waterbody*" in Schedule Three in association with this SASM.

SASM 144 – Karangarua Lagoon

404. There were two submission points on SASM 144, including GDC. Poutini Ngāi Tahu sought to remove reference to Statutory Acknowledgement in Schedule Three (S620.360) and to amend

the mapped extent of the SASM (S620.359), which was supported in the s42A Report as follows:

Notified SASM 144 *Amended SASM 144*

Hearing Panel's Evaluation

405. The Panel support the amended map of SASM 144 to the extent that it is a reduction in area. The Panel also consider that it is natural for waterbodies to change boundaries over time, which does not negate the associations Poutini Ngāi Tahu have with them that are part of the reason for statutory acknowledgement. The Panel therefore consider it appropriate that Schedule Three record that the lagoon is a Statutory Acknowledgement Area arising from the Treaty Settlement process. We consider that Schedule 24 of the NTCSA is applicable and provides useful information for Plan users wanting to understand more about the Poutini Ngāi Tahu values associated with Karangarua Lagoon. We also consider that, as a consequence of the whole lagoon being identified as a SASM, this should be reflected in Schedule Three, so that both the planning maps and Schedule Three identify Poutini Ngāi Tahu relationship with the lagoon as a whole.

Hearing Panel's Recommendation

406. The Panel recommend amending the map for SASM 144 as requested in the Poutini Ngāi Tahu submission to the extent that there is no increase incidental increase in extent and no additional landowners are impacted as a result of the change. We also recommend amendment to Schedule Three to include "*Waterbody*" within the "*Values*" column.

<u>SASM 145 – Kā Roimata-a-Hinehukatere/Franz Josef Glacier</u>

407. There were two submission points on SASM 145, including GDC. Skyline Enterprises Limited (S250.009) sought that SASM 145 and the SASM Chapter provide for development of an aerial cableway designed to provide access to the glacier, in conjunction with a special purpose zone. Skyline noted concern that the SASM could restrict these future development plans.

408. Ms Easton in her s42A Report for the SASM hearing and the Franz Josef hearing did not support removal of the SASM or excluding the Franz Josef Glacier given its cultural significance to Ngāti Māhaki and Poutini Ngāi Tahu. She emphasised that future development plans were not a relevant consideration when assessing cultural significance of a site or area. She noted the restrictions imposed by recognition of the SASM were "*fairly light*" and considered consultation with Poutini Ngāi Tahu around any design and location of proposed tourist facilities on the glacier would be appropriate. She noted that recognition of the glacier as an

outstanding natural feature (ONF 16) would likely introduce greater planning restrictions than recognition of SASM 145.

409. Skyline Enterprises Limited (SEL) presented evidence to the Panel at Franz Josef on 8 October 2024 regarding the proposed aerial cableway and requested a special purpose zone to enable the development. Mr Sean Dent, planner, and Ms Nikki Smetham, landscape architect, presented evidence for SEL in relation to SASM 145.

410. Ms Smetham noted the presence of the SASM in her description of the proposed special purpose zone and highlighted tangata whenua values were recognised in place names (Kā Roimata o Hine Hukatere) and interpretation panels on walks in the Waiho Valley and at Sentinel Rock. She did not specifically address the relationship between the outstanding natural feature of the glacier (ONF 16) and SASM 145 in the Plan.

411. Mr Dent identified the Franz Josef Valley was subject to the SASM 145 overlay. He noted SEL's submission sought recognition of the proposed cableway in the SASM Chapter. He referred to POU-P10 in the Strategic Directions chapter, which required protection of SASM while ensuring Poutini Ngāi Tahu have a key role in decision-making on their management. He provided suggested text for a proposed special purpose zone, the Franz Josef Amenities Area Zone (FJAAZ), as Appendix A to his evidence, which described SASM 145 as "*immediately adjacent to*" the special purpose zone. He provided a section 32AA evaluation to support his Appendix A, included as Appendix C, which assessed the relationship of proposed objective FJAAZ-O5 and proposed policy FJAAZ-P8, with SASM-O1 and SASM-O3. He acknowledged the need for a cultural impact assessment for any future resource consent application for the cableway development.

412. Mr Madgwick explained that SASM 145 recognised Kā Roimata-a-Hinehukatere/Franz Josef Glacier and applied to the ice bed of the glacier only. He cited Kā Huru Manu, as follows:

> *Kā Roimata-a-Hinehukatere is the traditional Māori name for the Franz Josef Glacier. Hinehukatere was a woman who in ancient times had a passion for mountaineering. Her sweetheart Wawe tried to keep up, but he was not as agile as Hinehukatere. When traversing the region at the head of the glacier, Wawe lost his footing and fell to his death. Hinehukatere witnessed the fatality, and became greatly stricken with grief. Her tears were so excessive that the gods froze them as a perpetual memorial to her sorrow. Even today her tears remain frozen as Kā Roimata-a-Hinehukatere — "The tears of Hinehukatere"." (Reference: Madgwick, P. (1992) Aotea: A history of the South Westland Māori. Greymouth, N.Z.: Greymouth Evening Star. P65.)*

Hearing Panel's Evaluation

413. The Panel did not receive any evidence that countered the cultural significance of Kā Roimata-a-Hinehukatere/Franz Josef Glacier to Poutini Ngāi Tahu. We note that Schedule Three of the Plan does not identify applicable rules for SASM 145 and on that basis the Panel agree with Ms Easton that greater restrictions are likely to apply as a result of other chapters in the Plan, particularly the Natural Features and Landscapes Chapter. SASM objectives and policies, along with other objectives and policies in the Plan, will apply in any resource consent process associated with a discretionary or non-complying activity. We note the planning maps show ONF 16 to be situated within SASM 145 and therefore the values associated with SASM 145 will form part of the description of values for ONF 16. We note that the Panel's recommendation in relation to ONF 16 is to retain the identified site as notified.

Hearing Panel's Recommendation

414. The Panel recommend no change to SASM 145 in response to submissions and evidence.

SASM 146 – Puketahi – The Sugar Loaf

415. There were two submission points on SASM 146, including GDC. Poutini Ngāi Tahu sought reference to "*Maunga*" and "*Ancestors Embedded in the Landscape*" in the "*Values*" column of Schedule Three in order to correct an error in the notified Plan (S620.361).

416. The s42A Report supported the proposed amendment.

Hearing Panel's Evaluation

417. The Panel are satisfied that there is a need to amend the Plan as requested by Poutini Ngāi Tahu, which will assist with application of Rule SASM-R6 and Table SASM-T7.

Hearing Panel's Recommendation

418. The Panel recommend adding the relevant values of "*Maunga*" and "*Ancestors Embedded in the Landscape*" to Schedule Three, associated with SASM 146.

SASM 151 – Bruce Bay/Manakaiaua

419. There were three submission points on SASM 151, including GDC (following the withdrawal of Te Tumu Paeroa's submission point).

420. Mr Robert Scott (S380.001) wanted the boundaries of the SASM reconsidered around his farmed block of land. WMS Group (HQ) Limited and WMS Land Co. Limited (S599.155) initially sought that SASM 151 be re-evaluated to provide an accurate area that reflects cultural values at the site, however, this submission point was withdrawn on 21 March 2024.

421. Mr Madgwick explained that SASM 151 recognised the area of Bruce Bay/Manakaiaua and South Island Landless Native Reserve under the South Island Landless Natives Act 1906. He cited Kā Huru Manu, as follows:

> *The Bruce Bay/ Manakaiaua grant was made under the provisions of the South Island Landless Natives Act 1906 (SILNA). The SILNA grants were an attempt by the Crown to address the inadequate provision of reserves under previous awards. The Bruce Bay/ Manakaiaua award is situated in South Westland, 80km from Haast and 224km from Hokitika, and originally comprised twelve sections within the Karangarua and Bruce Bay Survey Districts. The sections were surveyed in 1898 and the resultant grants were recorded in the New Zealand Gazette on 9 June 1908 as an award to 135 people. Since 1982, most of the land (excluding sections 890 and 892) has been vested in the Māori Trustee to facilitate its management, use and development on behalf of the beneficial owners. In 1983, the ownership of the above blocks was combined through an Aggregation Order (the blocks retain individual titles, but have common ownership).*

Hearing Panel's Evaluation

422. The Panel accept the evidence of Mr Madgwick regarding the significant values present at the site. The Panel note that there are no permitted activity rules applicable in Schedule Three

and as such only discretionary and non-complying activities will need to consider the values of the SASM.

Hearing Panel's Recommendation

423. The Panel recommend no change to SASM 151 in response to submissions and evidence.

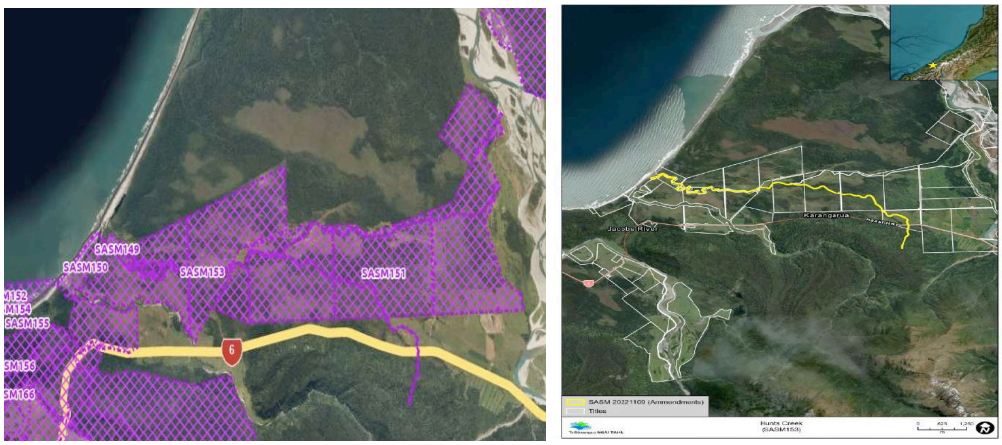
SASM 152 – Manakaiaua Mātaitai Reserve

424. GDC were the only submitter on SASM 152 (S608.294), seeking its removal from the Plan, which was opposed by Poutini Ngāi Tahu in further submission.

425. The s42A Report generally did not support removal of SASM from the Plan.

Hearing Panel's Evaluation

426. Proposed SASM 152 is entirely within the coastal marine area and is therefore outside the jurisdiction of the Plan. While the Panel acknowledge that activities landward of mean highwater springs may have an impact on SASM within the coastal marine area, such SASM will need to be incorporated into a coastal plan.



Hearing Panel's Recommendation

427. The Panel recommends that SASM 152 be removed from the planning maps and Schedule Three.

SASM 153 – Hunts Creek

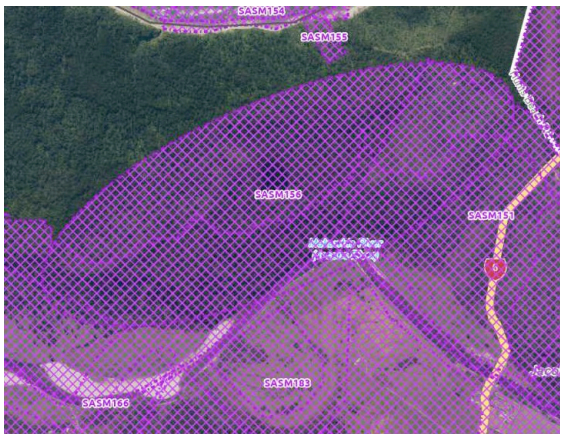
428. There were two submission points on SASM 153, including GDC. Poutini Ngāi Tahu sought to amend the mapped extent of the SASM (S620.362) as follows:

Notified SASM 153 *Amended SASM 153*

Hearing Panel's Evaluation

429. The Panel support the amended map of SASM 153 as a reduction in extent of area included. The Panel understand that waterbodies will naturally move around over time and that the mapped outline for Hunts Creek may at times be different than the active channel, which is accounted for in introduction to the Schedule. We also consider it necessary to include reference to "*Waterbody*" in the "*Values*" column of Schedule Three so that the planning

maps and the Schedule work together to identify Poutini Ngāi Tahu relationship with the creek as a whole.



Hearing Panel's Recommendation

430. The Panel recommend amending the map for SASM 153 as requested in the Poutini Ngāi Tahu submission, and including the value "*Waterbody*" within Schedule Three for this SASM

SASM 156 – Te Puku o te Wairapa

431. There were two submission points on SASM 156, including GDC. Poutini Ngāi Tahu sought to amend the mapped extent of the SASM (S620.363) as follows:

Notified SASM 156 *Amended SASM 156*

Hearing Panel's Evaluation

432. The Panel support the amended map of SASM 156 on the basis that it does not increase the extent of land included and no additional landowners are impacted by the change.

Hearing Panel's Recommendation

433. The Panel recommend amending the map for SASM 156 as requested in the Poutini Ngāi Tahu submission, to the extent that there are no incidental increases in extent and there are no additional landowners impacted as a result of the change.

SASM 157 – No. 10 Makāwhio Native Reserve

434. There were two submission points on SASM 157, including GDC. Te Tumu Paeroa (S440.053) retained their submission point on SASM 157, while withdrawing others, and expressed concern with identification of the extent of the SASM, covering the entire record of title.

435. Mr Madgwick explained that SASM 157 was a Māori reserve and a mahinga kai. He identified the site as a pā site, as well as containing an urupā.

436. Ngāti Māhaki (represented by Te Rūnanga o Makaawhio) provided information attached as Appendix B to the joint statement from Te Tumu Paeroa and Poutini Ngāi Tahu (dated 14 August 2024) outlining the differences between SASM 157 and SASM 158, to explain why less restrictions were proposed in the rule framework affecting SASM 158 compared with SASM 157. This information records that SASM 157 is an older pā site and ancient urupā than the

area covered by SASM 158, with trees on site that were used for snaring and spearing birds, including virgin forest. The information from Ngāti Māhaki noted that SASM 157 had experienced some damage as a consequence of track clearing which caused concern and highlighted the need for greater controls on activities affecting the area.

Hearing Panel's Evaluation

437. The Panel accept the evidence of Mr Madgwick and Ngāti Māhaki regarding the significant values present at the site. We note there are a number of activities that will require certification by Poutini Ngāi Tahu to enable permitted activities in this location, including minor earthworks, demolition, removal or alteration of structures, indigenous vegetation clearance, temporary activities, and earthworks, buildings and structures. The Panel has provided for certification of permitted activities to incorporate tikanga where appropriate.

Hearing Panel's Recommendation

438. The Panel recommend no amendments to notified planning maps for SASM 157, associated Schedule Three or rule tables.

SASM 158 – No. 8 Makāwhio and No. 9 Makāwhio

439. GDC sought removal of SASM 158, which is addressed earlier in this Report.

440. Ngāti Māhaki (represented by Te Rūnanga o Makaawhio) provided information attached as Appendix B to the joint statement from Te Tumu Paeroa and Poutini Ngāi Tahu (dated 14 August 2024) to explain why less restrictions were proposed in the rule framework affecting SASM 158 compared with SASM 157. This information records that SASM 158 contains two pā sites and three urupā, with a mixture of virgin forest and highly modified areas used for grazing animals. Ngāti Māhaki sought to not inhibit existing farming activities, while providing for the opportunity to respond to expansion or intensification of activities.

Hearing Panel's Evaluation

441. The Panel note that SASM 158 was notified with reference to Rule SASM-R5 in Schedule Three but Rule SASM-R5 did not include reference to SASM 158. The right of reply evidence included SASM 158 in Table SASM-T5, which the Panel assume is correct. We consider the notified Rule SASM-R5 contained the error and that no further correction is required.

Hearing Panel's Recommendation

442. The Panel recommend SASM 158 is included in Table SASM-T5.

SASM 163 – No. Māori Beach Kāinga

443. GDC sought removal of SASM 163, which is addressed earlier in this Report.

Hearing Panel's Evaluation

444. The Panel note that SASM 163 was notified with reference to Rule SASM-R2 in Schedule Three but Rule SASM-R2 did not contain any reference to SASM 163. We note the right of reply evidence did not include SASM 163 in Table SASM-T2. The Panel assume notified Schedule Three is correct and consider that notified SASM-R2 contained the error. We consider SASM 163 should be included in Table SASM-T2.

Hearing Panel's Recommendation

445. The Panel recommend SASM 163 is included in Table SASM-T2.

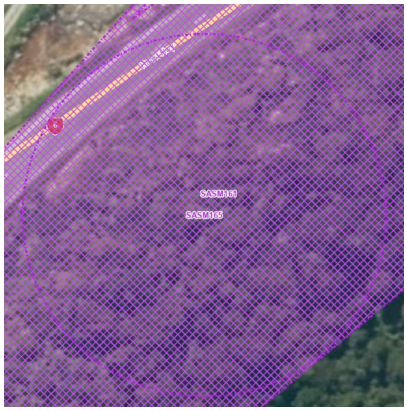
SASM 164 – Mahitahi Mātaitai Reserve

446. GDC were the only submitter on SASM 164 (S608.306), seeking its removal from the Plan, which was opposed by Poutini Ngāi Tahu in further submission.

447. The s42A Report generally did not support removal of SASM from the Plan.

Hearing Panel's Evaluation

448. Proposed SASM 164 is entirely within the coastal marine area and is therefore outside the jurisdiction of the Plan. While the Panel acknowledge that activities landward of the mean high water springs may have an impact on SASM within the coastal marine area, such SASM will need to be incorporated into a coastal plan.



Hearing Panel's Recommendation

449. The Panel recommends that SASM 164 be removed from the planning maps and Schedule Three.

SASM 165 – No. 7 Mahitahi Beach Native Reserve - Silent File

450. There were two submission points on SASM 165, including GDC. Poutini Ngāi Tahu sought to amend the mapped extent of the SASM (S620.364) as follows:

Notified SASM 165 *Amended SASM 165*

Hearing Panel's Evaluation

451. The Panel support the amended map of SASM 165 on the basis that it clarifies the area of interest to Poutini Ngāi Tahu and it is a reduction in the extent of land included in the identified area.

Hearing Panel's Recommendation

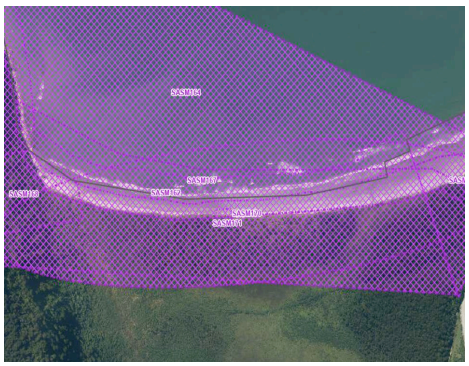
452. The Panel recommend amending the map for SASM 165 as requested in the Poutini Ngāi Tahu submission.

SASM 166 – Makāwhio River (Jacobs River)

453. There were two submission points on SASM 144, including GDC. Poutini Ngāi Tahu sought to remove reference to Statutory Acknowledgement in Schedule Three (S620.365).

Hearing Panel's Evaluation

454. The Panel consider that it is natural for waterbodies to change boundaries over time, which does not negate the associations Poutini Ngāi Tahu have with them that are part of the reason for statutory acknowledgement. The Panel therefore consider it appropriate that Schedule Three record that the river is a Statutory Acknowledgement Area arising from the Treaty Settlement process. We consider that Schedule 38 of the NTCSA is applicable and provides useful information for Plan users wanting to understand more about the Poutini Ngāi Tahu values associated with Makāwhio River (Jacobs River). We also consider it necessary to include reference to "*Waterbody*" in the "*Values*" column of Schedule Three so that the planning maps and the Schedule work together to identify Poutini Ngāi Tahu relationship with the creek as a whole.



Hearing Panel's Recommendation

455. The Panel recommend amendment to Schedule Three to incorporate reference to "*Waterbody*" in relation to this SASM.

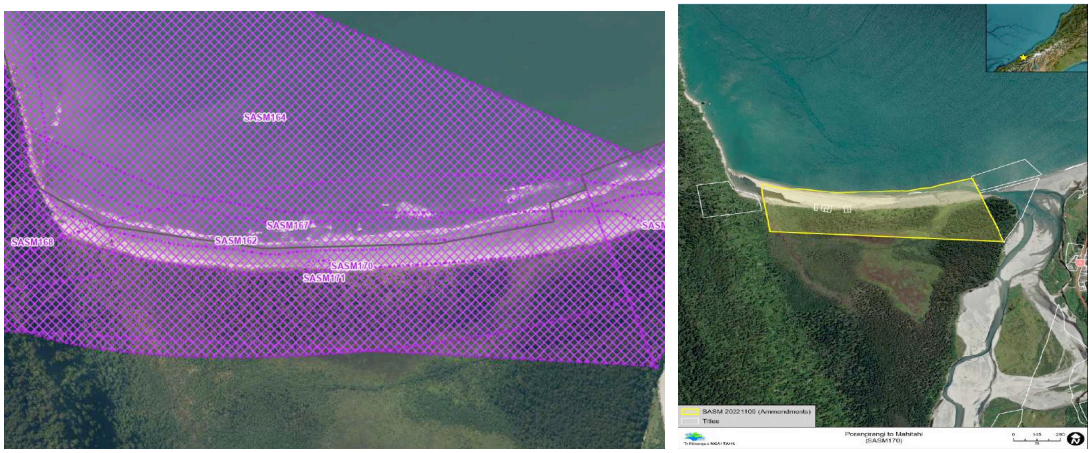
SASM 167 – Mahitahi Mussel & Pipi Bed

456. There were two submission points on SASM 167, including GDC. Poutini Ngāi Tahu sought to amend the mapped extent of the SASM (S620.366) as follows:

Notified SASM 167 *Amended SASM 167*

Hearing Panel's Evaluation

457. The Panel note that as a coastal SASM, it will only be relevant landward of the coastal marine area. The Panel could not discern any area of the proposed SASM that would be within the jurisdiction of the Plan.



Hearing Panel's Recommendation

458. The Panel recommend deleting proposed SASM 167 from Schedule Three and the planning maps because it is outside the jurisdiction of the Plan, relying on the GDC request to remove the SASM from the Plan.

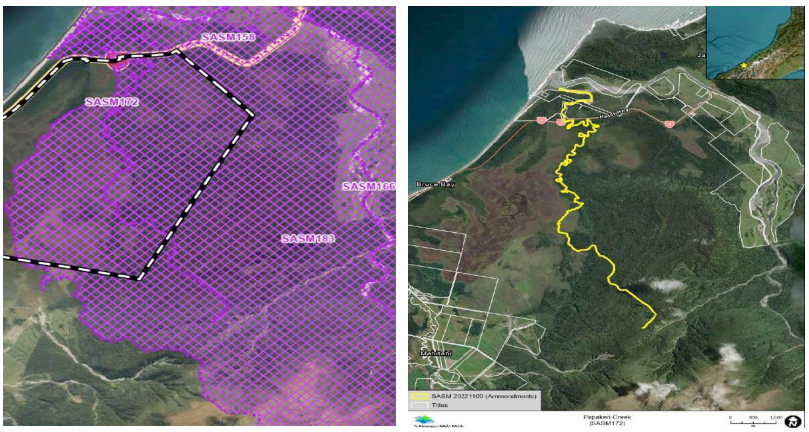
SASM 170 – Porangirangi to Mahitahi

459. There were two submission points on SASM 170, including GDC. Poutini Ngāi Tahu sought to amend the mapped extent of the SASM (S620.367) as follows:

Notified SASM 170 *Amended SASM 170*

Hearing Panel's Evaluation

460. The Panel support the amended map of SASM 170 as it more accurately reflects the area of interest to Poutini Ngāi Tahu and does not include any additional land. We note that as a coastal SASM, it will only be relevant landward of the coastal marine area.



Hearing Panel's Recommendation

461. The Panel recommend amending the map for SASM 170, as requested in the Poutini Ngāi Tahu submission, to the extent that there are no incidental increases in the extent of land included and no additional landowners are impacted as a result of the change.

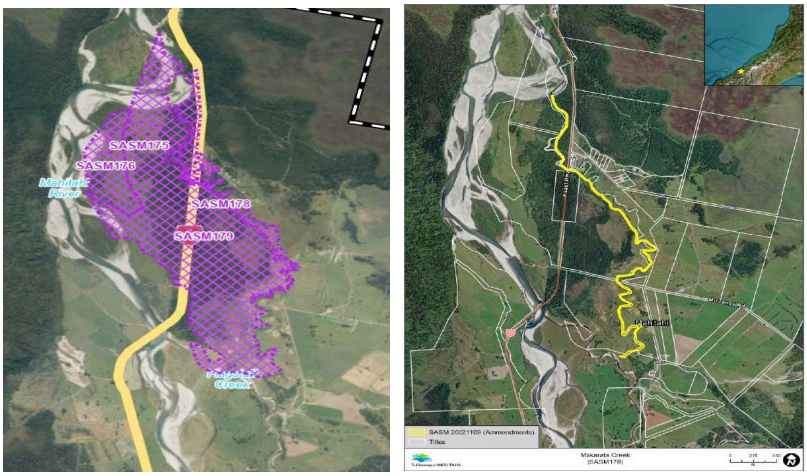
SASM 172 – Pāpākeri Creek

462. There were two submission points on SASM 172, including GDC. Poutini Ngāi Tahu sought to amend the mapped extent of the SASM (S620.368) as follows:

Notified SASM 172 *Amended SASM 172*

Hearing Panel's Evaluation

463. The Panel support the amended map of SASM 172 as it more accurately reflects the area of interest to Poutini Ngāi Tahu and does not include any additional land. As Pāpākeri Creek is a waterbody, the Panel also consider it necessary to reflect this in Schedule Three, allowing for any movement of the waterbody over time.



Hearing Panel's Recommendation

464. The Panel recommend amending the map for SASM 172, as requested in the Poutini Ngāi Tahu submission, and listing the SASM as a "*Waterbody*" in Schedule Three.

SASM 178 – Makarata Creek

465. There were two submission points on SASM 178, including GDC. Poutini Ngāi Tahu sought to amend the mapped extent of the SASM (S620.369) as follows:

Notified SASM 178 *Amended SASM 178*

Hearing Panel's Evaluation

466. The Panel support the amended map of SASM 178 as it more accurately reflects the area of interest to Poutini Ngāi Tahu and does not include any additional land. As Makarata Creek is a waterbody, the Panel also consider it necessary to reflect this in Schedule Three, allowing for any movement of the waterbody over time.

Hearing Panel's Recommendation

467. The Panel recommend adopting the amended map for SASM 178 as requested in the Poutini Ngāi Tahu submission and listing the SASM as a "*Waterbody*" in Schedule Three.

SASM 179 – No. 6 Mahitahi Reserve

468. Two submitters opposed SASM 179, however both Te Tumu Paeroa (S440) and WMS Group (HQ) Limited and WMS Land Co. Limited (S599) withdrew their submission points.

469. Mr Madgwick explained that SASM 179 recognised No.6 Mahitahi Māori Reserve. He cited Kā Huru Manu, as follows:

This 630-acre reserve at Bruce Bay was set aside as part of the Arahura Purchase 1860. In 1878, Reserves 6 and 7 were treated as being combined and the Young Commission determined that the ownership of the reserve resided with Kinihe te Kaoho and 58 others. Since 1878, the Māori Land Court has maintained succession schedules detailing changes in ownership. The reserve remained combined until 1915, when it was subdivided into three separate parcels: Sections 781A, 781B & 782 (Sections 781A and 781B comprising former Reserve No. 6). Over 100 acres of the reserve was taken under the Public Works Act for use as a road reserve; an aerodrome and as a scenic reserve. Since 1980, Section 781B has been vested in responsible trustees to facilitate the management, use and development of the land on behalf of the beneficial owners.

Hearing Panel's Evaluation

470. The Panel address the GDC request earlier in this Report.

Hearing Panel's Recommendation

471. The Panel recommend no change to the planning maps for SASM 179.

SASM 184 – Lake Pāringa

472. There were two submission points on SASM 184, including GDC. Poutini Ngāi Tahu sought to remove reference to Statutory Acknowledgement in Schedule Three (S620.370).

Hearing Panel's Evaluation

473. The Panel consider that it is natural for waterbodies to change boundaries over time, which does not negate the associations Poutini Ngāi Tahu have with them that are part of the reason for statutory acknowledgement. The Panel therefore consider it appropriate that Schedule Three record that the river is a Statutory Acknowledgement Area arising from the Treaty Settlement process. We consider that Schedule 33 of the NTCSA is applicable and provides useful information for Plan users wanting to understand more about the Poutini Ngāi Tahu values associated with Lake Pāringa. We also consider it necessary to include reference to "*Waterbody*" in the "*Values*" column of Schedule Three so that the planning maps and the Schedule work together to identify Poutini Ngāi Tahu relationship with the lake as a whole.

Hearing Panel's Recommendation

474. The Panel recommend amendment to Schedule Three to reference "*Waterbody*" in the "*Values*" column.

SASM 188 – Tauparikaka Mātaitai Reserve

475. GDC were the only submitter on SASM 164 (S608.330), seeking its removal from the Plan, which was opposed by Poutini Ngāi Tahu in further submission.

476. The s42A Report generally did not support removal of SASM from the Plan.

Hearing Panel's Evaluation

477. Proposed SASM 188 is entirely within the coastal marine area and is therefore outside the jurisdiction of the Plan. While the Panel acknowledge that activities landward of the mean highwater springs may have an impact on SASM within the coastal marine area, such SASM will need to be incorporated into a coastal plan.

Hearing Panel's Recommendation

478. The Panel recommends that SASM 188 be removed from the planning maps and Schedule Three.

SASM 193 – Awarua/Haast River South Bank

479. There were two submission points on SASM 193, including GDC. Poutini Ngāi Tahu sought to remove reference to SASM-R6 in Schedule Three (S620.371), which was supported in the s42A Report.

Hearing Panel's Evaluation

480. The Panel accept the advice of Poutini Ngāi Tahu that it is not appropriate for SASM 193 to be subject to the permitted activity rule.

Hearing Panel's Recommendation

481. The Panel recommend reference to Rule SASM-R6 is removed from Schedule Three in relation to SASM 193.

SASM 196 – Ōkuru River Nohoanga

482. There were three submission points on SASM 196, including GDC. Anthony Eden (S578.007) sought that SASM 196 be removed from private developed land and be confined to the lagoon and other sites of cultural value. Gerard Nolan (S261.002) sought proof of significance for SASM 196, SASM 197, SASM 198 and SASM 199 Ōkuru. Nicola Main (S131.001) sought removal of Ōkuru from SASM 196, SASM 197 and SASM 198.

483. Mr Madgwick explained that SASM 196 was a nohoanga site recorded in the Ngāi Tahu Claims Settlement Act 1998 and was not in private ownership, due to nohoanga being Crown owned land adjacent to waterbodies and usually one hectare in size. He noted nohoanga literally means "*a place to sit*" and referred to seasonal occupation sites that were part of the mobile lifestyle of Ngāi Tahu Whānui as they pursued food and other natural resources. He described it as a traditional concept given contemporary effect through the Settlement process through the allocation of specific "camping" sites for mahinga kai activities. He noted that nohoanga provide all Ngāi Tahu with an opportunity to experience the landscape as their tupuna did, and to rekindle the traditional practices.

Hearing Panel's Evaluation

484. The Panel accept the evidence of Mr Madgwick regarding the values at this site.

Hearing Panel's Recommendation

485. The Panel recommend no change to SASM 196 or Schedule Three.

SASM 197 – Ōkuru

486. There were a number of submission points on SASM 197, including GDC. Anthony Eden (S578.006) sought that SASM 197 be removed from private developed land and be confined to the lagoon and other sites of cultural value. Gerard Nolan (S261.002) sought proof of significance for SASM 196, SASM 197, SASM 198 and SASM 199 Ōkuru. Nicola Main (S131.001)

sought removal of Ōkuru from SASM 196, SASM 197 and SASM 198. Toni Chittock (S61.002) sought review of the SASM 197 boundaries, as did Rodney Wright (S62.002). Michael Snowden (S492.001) sought more precise mapping and differentiation between indigenous vegetation and improved pasture. Gary Gaasbeek (S398.003) sought historical evidence of any Māori village at Ōkuru. Ian and Sue Munro (S45.001) sought that the SASM be removed from private property, as did Lynn Findlay (S86.001) and Sue Templeton (S203.001). Hapuka Landing Limited (S514.007) sought amendment around the indigenous vegetation clearance rule to remove SASM 197 from the rule, which was supported by Poutini Ngāi Tahu's submission (S620.372).

487. Mr Madgwick explained that SASM 197 contained a historic kāinga/village, urupā, mahinga kai gathering areas, as well as containing a nohoanga site as recorded in the NTCSA; and was well known for a concentration of cultural and archaeological sites, including graves, artefacts, middens and ovens, as recorded in Appendix Ten in the Plan.

Hearing Panel's Evaluation

488. The Panel agree with submitters that sought removal of reference to Rule SASM-R4 in Schedule Three in relation to SASM 197, based on the advice of Poutini Ngāi Tahu that this is supported by mana whenua.

489. The Panel note that submitters did not mention Rule SASM-R9, which included reference to this SASM at the time of notification but was not included in Schedule Three. We note the right of reply evidence included SASM 197 in the associated Table SASM-T8. We concluded a correction is required to Schedule Three to correct this error.

Hearing Panel's Recommendation

490. The Panel recommend removing reference to Rule SASM-R4 in Schedule Three in relation to this SASM and removal of SASM 197 from table SASM-T4. The Panel recommend adding reference to Rule SASM-R9 in Schedule Three and including SASM 197 in SASM-T8.

SASM 198 – Ōkuru Mātaitai Reserve

491. There were three submitters on SASM 198, including GDC. Gerard Nolan (S261.002) sought proof of significance for SASM 196, SASM 197, SASM 198 and SASM 199 Ōkuru. Nicola Main (S131.001) sought removal of Ōkuru from SASM 196, SASM 197 and SASM 198.

492. Mr Madgwick explained that SASM 198 was the Ōkuru`/Mussel Point Mātaitai Reserve, approved by the Ministry of Fisheries, covering approximately 0.2km^2 and extending seaward 200 metres from mean high-water mark. He noted the mātaitai provides for customary fishing and management practices and recognises it as a significant mahinga kai gathering area for Ngāti Māhaki.

Hearing Panel's Evaluation

493. The Panel accept the advice of Mr Madgwick regarding the values of this area. The Panel note that as a coastal SASM, it will only be relevant on the landward side of the coastal marine area. As the entirety of the SASM is within the coastal marine area it is outside the jurisdiction of this Plan. Although activities on the landward side of the SASM may impact on its values, introduction of the SASM will need to be included in a coastal plan.

Hearing Panel's Recommendation

494. The Panel recommend that SASM 198 is deleted from the planning maps and Schedule Three.

SASM 199 – Mussel Point - Silent File

495. There were two submission points on SASM 199, including GDC. Gerard Nolan (S261.002) sought proof of significance for SASM 196, SASM 197, SASM 198 and SASM 199 Ōkuru.

496. Mr Madgwick noted that SASM 199 was a very small area of great significance to Poutini Ngāi Tahu, which was why it was protected by a "silent file". He explained that any further disclosure regarding the site would need to be public excluded to protect the site.

Hearing Panel's Evaluation

497. The Panel did not consider it necessary to require Mr Madgwick to disclose sensitive details about the nature of the site in a closed session. The Panel is satisfied the Plan provides for a process that will enable Poutini Ngāi Tahu to guide landowners and resource users in methods to ensure protection of SASM 199.

Hearing Panel's Recommendation

498. The Panel recommend no changes to SASM 199 or Schedule Three.

SASM 200 – Jackon Bay – Ōkahu Village

499. There were two submission ponts on SASM 200, including GDC. Kathryn Bennie (S116.001) sought removal of the SASM from private property.

500. Mr Madgwick explained that SASM 200 recognised an historic pā site, kāinga and mahinga kai gathering areas and that archaeological remains have been found there. He cited Kā Huru Manu, as follows:

> *Ōkahu is the traditional name for Jackson Bay — a large, gently-curving bay in South Westland south of Haast. Ōkahu faces Te Tai-o-Rehua (the Tasman Sea) and is backed by Kā Tiritiri-o-te-moana (the Southern Alps). Ōkahu was traditionally the name of a pā located at the mouth of the Arawhata River, and has since been applied to the wider Jackson Bay area. Along with Ōkārito, and Maitahi (Bruce Bay), Ōkahu was one of the main Kāi Tahu kāika situated throughout South Westland." (References: Taylor, W.A. (1952) Lore and history of the South Island Māori. Christchurch, N.Z.: Bascands. P192.; Madgwick, P. (1992) Aotea: A history of the South Westland Māori. Greymouth, N.Z.: Greymouth Evening Star. P24, 25 & 43.)*

Hearing Panel's Evaluation

501. The Panel accept the evidence of Mr Madgwick regarding the significant values of the site. The Panel note that there are no permitted activity rules applying to this SASM, so it will only be discretionary and non-complying activities that will be required to consider the cultural values of the SASM.

Hearing Panel's Recommendation

502. The Panel recommend no changes to SASM 200 or Schedule Three.

SASM 201 – Ōkahu Rāhui

503. GDC were the only submitter on SASM 164 (S608.343), seeking its removal from the Plan, which was opposed by Poutini Ngāi Tahu in further submission.

504. The s42A Report generally did not support removal of SASM from the Plan.

Hearing Panel's Evaluation

505. Proposed SASM 201 is entirely within the coastal marine area and is therefore outside the jurisdiction of the Plan. While the Panel acknowledge that activities landward of the mean high water springs may have an impact on SASM within the coastal marine area, such SASM will need to be incorporated into a coastal plan.

Hearing Panel's Recommendation

506. The Panel recommends that SASM 201 be removed from the planning maps and Schedule Three.

SASM 208 – Arawhata Pā Site

507. There were three submission points on SASM 208, including GDC. John Sutton (S153.001) sought restriction of SASM 208 to Māori and public lands and the exclusion of freehold titles. Mandy Deans (S549.001) sought further consultation with the Neils Beach Community and noted that her submission incorrectly referred to SASM 1 instead of SASM 208.

508. Mr Madgwick explained that SASM 208 recognised the No.1 Arawhata Native Reserve and contained a historic pā site and urupā, as well as being known for a concentration of cultural and archaeological sites, including middens, as recorded in Appendix Ten. He cited Kā Huru Manu, as follows:

> *This reserve comprising 55 acres over two sections situated on the south bank of the Arawata River was set aside as part of the Arahura Purchase 1860. Originally estimated at 100 acres, the reserve was never allocated in its entirety. Instead, it was allocated as two separate grants: Arawata No. 1 (33 acres) and Arawata No. 2 (20 acres). This reduction was attributed to the surveyor laying off the rest of the area as settlement sections and as a gold mining reserve for an expected influx of European settlers. In 1878 the Young Commission determined that the ownership of the reserve resided with Ihaia Tanui and nine others in varying share amounts. Since 1878 the Māori land Court has maintained succession schedules detailing changes in the ownership of the block. Both sections remain in their entirety, having never been partitioned or subdivided.*

Hearing Panel's Evaluation

509. The Panel accept the evidence of Mr Madgwick regarding the significant value of the site. The Panel note that there are no permitted activity rules applying to this SASM, so it will only be discretionary and non-complying activities that will be required to consider the cultural values of the SASM.

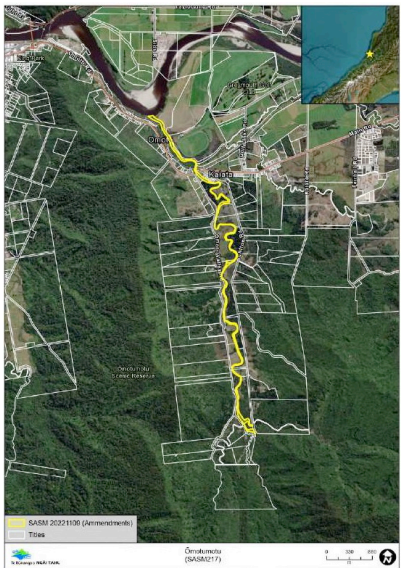
Hearing Panel's Recommendation

510. The Panel recommend no changes to SASM 208 or Schedule Three.

SASM 216 – Ōtukoro Historic Reserve / Ōtukoro Iti, Kahurangi

511. There were two submission points on SASM 216, including GDC. Poutini Ngāi Tahu submitted to remove reference to Statutory Acknowledgement for this SASM because although it was part of Treaty Settlement redress, it is not a Statutory Acknowledgement Area (S620.313). This was supported in the s42A Report.

Hearing Panel's Evaluation



512. The Panel support the request to amend SASM 216 on the basis expressed, noting that the NTCSA includes this area as a Tōpuni in Schedule 86, consistent with the other values identified for this SASM.

Hearing Panel's Recommendation

513. The Panel recommend deleting reference to "*Statutory Acknowledgement*" in relation to SASM 216.

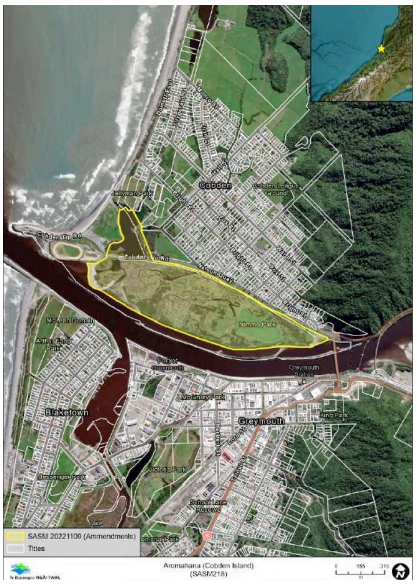
Proposed SASM 217 Ōmotumotu

514. GDC sought to remove SASM 217, which is addressed earlier in this Report. Poutini Ngāi Tahu sought to add Ōmotumotu to Schedule Three (S620.375) and record it as a mahinga kai area with no applicable permitted activity rules.

515. Ms Easton recommended acceptance based on the SASM being a waterbody and therefore a matter of Crown ownership rather than private land ownership. The right of reply evidence records this SASM as "*Nohoanga*", which does not correspond with the submission.

Hearing Panel's Evaluation

516. The Panel accept the recommendation to include SASM 217 in Schedule Three, with the recorded value as "*Mahinga Kai*", on the basis that no landowners are affected. The Panel understand that a waterbody may move over time but that this does not affect Poutini Ngāi Tahu association with the waterbody, and in that respect the Panel determine this SASM to be the active channel, bed, banks and immediate margins.



Hearing Panel's Recommendation

517. The Panel recommend including the area as SASM 217, named "*Ōmotumotu*" on the planning maps, following the current channel of the waterbody, and including it in Schedule Three with the values recorded as "*Mahinga Kai*" and "*Waterbody*"

<u>Proposed SASM 218 Aromahana/Cobden Island</u>

518. Poutini Ngāi Tahu (S620.376) requested adding new SASM 218.

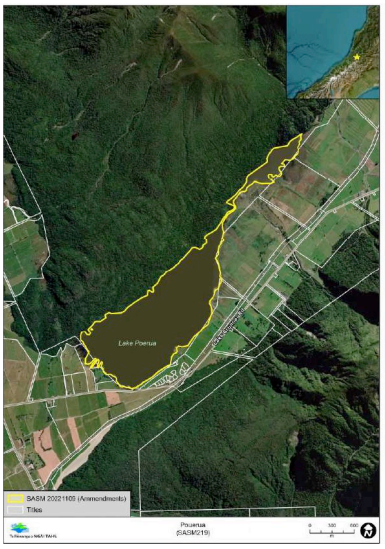
519. Mr Madgwick explained SASM 218 was one of several included in the Poutini Ngāi Tahu submission that had been missed off the schedule and planning maps at the time of notification. He described it as a rich mahinga kai, an eeling ground, that was straight across the river from Māwhera Pā, on the edge of the pā site, and that it was very popular for harvesting. The area requested is shown below:

520. Ms Rusher, legal counsel for GDC, questioned the basis for identifying this area as significant to Poutini Ngāi Tahu, and raised issues of natural justice if it were to be included in the Plan by way of submission.

521. Mr McEnaney, for GDC, described the site as undeveloped land adjacent to the Grey River that was a mix of wetland (as part of the Cobden Aromahana Sanctuary and Recreation Areas) and pasture, with Council recreation facilities at the eastern end, including a boat ramp, wastewater dump station and freedom camping site. He expressed concern about consent requirements for minor indigenous vegetation clearance and temporary events held in the recreation area. He reiterated concern around lack of consultation with GDC and other affected landowners.

522. Ms Easton identified in her s42A Report that further consultation would be required with GDC regarding this SASM, and for this reason did not recommend including it in Schedule Three in her right of reply evidence.

Hearing Panel's Evaluation



523. The Panel accept the evidence that SASM 218 should not be introduced to the Plan at this time, and that a plan change will be required for that purpose.

Hearing Panel's Recommendation

524. The Panel reject submission point S620.376 and therefore do not include Aromahana/Cobden Island in Schedule Three or the planning maps

Proposed SASM 219 Pouerua

525. Poutini Ngāi Tahu sought to add the "*Pouerua*" area to Schedule Three (S620.377) with the values listed as "*Mahinga kai*", with no applicable permitted activity rules. The requested area is shown below:

526. Ms Easton outlined in her s42A Report that SASM 219 was primarily a lake, located mainly within the OSZ but affecting a small area of the GRUZ. She recommended accepting the submission.

Hearing Panel's Evaluation

527. The Panel acknowledge that no rules are proposed to be attached to SASM 219 and that it is primarily a waterbody. As with other waterbodies, over time there may be some discrepancy between the mapped extent of the SASM and the active bed of the lake.

Hearing Panel's Recommendation

528. The Panel recommend incorporating the area as SASM 218, named "*Pouerua*", on the planning maps and in Schedule Three, with the values recorded as "*Mahinga kai*" and "*Waterbody*".

Proposed SASM 220 Parihaka Memorial

529. Poutini Ngāi Tahu sought to add the "*Parihaka Memorial*" to Schedule Three (S620.378), with the value listed as "*Cultural and Historic Area*".

530. Ms Easton in her s42A Report was concerned that more consultation would be required because of the urban location of the site, situated in the RESZ. She did not recommend its inclusion in Schedule Three.

Hearing Panel's Evaluation

531. The Panel agree with Ms Easton that this SASM should be introduced by way of a plan change process following further consultation, relying on recommended Method SASM M2 in the Plan.

Hearing Panel's Recommendation

532. The Panel reject submission point S620.378 and therefore do not recommend including Parihaka Memorial on the planning maps or in Schedule Three.

<u>Proposed SASM 221 Paringa</u>

533. Poutini Ngāi Tahu sought to add the "*Paringa*" to Schedule Three (S620.379), with the value listed as "*Mahinga kai*" and no applicable permitted activity rules.

534. Ms Easton in her s42A Report recommended acceptance of the submission on the basis that the SASM was a beach.

Hearing Panel's Evaluation

The Panel note that as a coastal SASM it would only be relevant on the landward side of the coastal marine area. The Panel consider that the proposed SASM appears to be primarily in the coastal marine area and therefore outside the jurisdiction of the district plan.

Hearing Panel's Recommendation

535. The Panel reject submission point S620.379 and therefore do not include Paringa on the planning maps or in Schedule Three.

Proposed SASM 222 – Mikonui

536. Poutini Ngāi Tahu sought to include a new SASM in the Plan for the "Mikonui" area, as shown in Appendix 6 to their submission (S620.380), with the value listed as "*Mahinga kai*" and no applicable permitted activity rules.

537. Ms Easton in her s42A Report recommended acceptance of the submission on the basis that the SASM was a beach.

Hearing Panel's Evaluation

538. The Panel note that as a coastal SASM it will only be relevant on the landward side of the coastal marine area. The proposed SASM appears to be primarily in the coastal marine area and therefore outside the jurisdiction of the district plan.

Hearing Panel's Recommendation

539. The Panel reject submission point S620.380 and therefore do not include Mikonui on the planning maps or in Schedule Three.

Proposed SASM 223 – Te Papakini

540. Poutini Ngāi Tahu sought to include a new SASM in the Plan for Te Papakini, as shown in Appendix 6 to their submission (S620.381), with the value listed as "*Mahinga kai*" and no applicable permitted activity rules.

541. Ms Easton in her s42A Report recommended acceptance of this SASM on the basis that it was OSZ and DOC land.

Hearing Panel's Evaluation

542. The Panel accept Ms Easton's advice that the area is a combination of OSZ and DOC land. The Panel accept that the area is valued as mahinga kai, and that the implications of including the SASM would be that its mahinga kai values would be considered in relation to discretionary and non-complying activities during the resource consent process.

Hearing Panel's Recommendation

543. The Panel recommend that the area is recorded as SASM 219 on the planning maps and in Schedule Three, named "*Te Papakini*", with its value recorded as "*Mahinga kai*", only to the extent that it covers public conservation land.

Proposed SASM 224 – Tauneke

544. Poutini Ngāi Tahu sought to include a new SASM in the Plan for the "*Tauneke"* area, as shown in Appendix 6 to their submission (S620.382), with the value listed as "*Mahinga kai*" and no applicable permitted activity rules.

545. Ms Easton in her s42A Report recommended acceptance of the submission on the basis that the SASM was a beach, OSZ and public conservation land.

Hearing Panel's Evaluation

546. The Panel note that as a coastal SASM it will only be relevant on the landward side of the coastal marine area. The proposed SASM appears to be primarily in the coastal marine area and therefore outside the jurisdiction of the district plan.

Hearing Panel's Recommendation

547. The Panel reject submission point S620.382 and therefore do not include Tauneke the planning maps or in Schedule Three.

<u>Proposed SASM 226 – Pororari River Nohoanga</u>

548. Poutini Ngāi Tahu sought to include a new SASM in the Plan for the "*Porari River Nohoanga*" area, as shown in Appendix 6 to their submission (S620.384), with the value listed as "*Nohoanga*" and no applicable permitted activity rules.

549. Ms Easton in her right of reply evidence has recommended acceptance based on the location being public conservation land. She has recorded it in Schedule Three as "*Pororari Nohoanga*" which differs from the submission.

Hearing Panel's Evaluation

550. The Panel accept the evidence of this location as a nohoanga on public conservation land and on that basis agree that it can be included in the planning maps and Schedule Three. The Panel note that Pororari River is recorded as a nohoanga in the NTCSA.

Hearing Panel's Recommendation

551. The Panel recommend that the area is recorded as SASM 220 and included on the planning maps and in Schedule Three as "*Pororari River Nohoanga*", with its value recorded as "*Nohoanga*".

Proposed SASM 227 – Makarore & Tiore Pātea

552. Ms Easton supported the submission of Queenstown Lakes District Council (**QLDC**) (S523.004) to include this additional SASM in the Plan, which is part of the QLDC district plan, with the area of overlap into Westland District indicated on the associated map. She did so on the basis that the QLDC request was supported by Poutini Ngāi Tahu and the proposed SASM area was within public conservation land. She considered that it should be linked to Rule SASM-R6 and that information from the QLDC district plan should be included in Schedule Three.

553. Mr Madgwick supported inclusion of SASM 227 ("*Makarore & Tiore Pātea*") in the Plan, which he acknowledged were important to Poutini Ngāi Tahu. He advised thatthe values should be recorded as *"Kainga, Mahinga Kai and Ara tāwhito*".

554. Ms Pull supported the inclusion of SASM 227 in Schedule Three and in Table SASM-T6 to provide for clarity and consistency users of the Plan and the Queenstown Lakes District Plan, allowing for a holistic approach to the management of the values of the site.

Hearing Panel's Evaluation

555. The Panel accept the recommendations to include this SASM in the Plan, on the planning maps and in Schedule Three. The Panel adopt the advice of Mr Madgwick with regard to the appropriate label to apply to the values, in order to be consistent with the remainder of the SASMs in the Plan. The Panel accept the recommendations of Ms Easton and Ms Pull to have the SASM subject to Rule SASM-R6, and therefore its inclusion in Table SASM-T6.

Hearing Panel's Recommendation

556. The Panel recommend that the area is included on the planning maps and in Schedule Three as SASM 221, named "*Makarore & Tiore Pātea*", with its value recorded as "*Kainga, Mahinga kai and Ara Tāwhito*", and with reference to Rule SASM-R6. The Panel also recommend its inclusion in the associated Table SASM-T6.

Schedule Three (SCHED 3) – Sites and Areas of Significance to Māori

557. The Panel recommendations for changes to the able in Schedule Three (SCHED 3) are included as Appendix 2 to this Recommendations Report.

Schedule Three (SCHED 3A) – Criteria for Certification

Submissions and Evidence/Statements

558. The Panel received advice from the planners through joint witness conferencing on their recommendations for criteria to be included in a schedule to the Plan that would guide a certification process for permitted activities, as discussed in the SASM rules section of this Report. The planners' recommended content for the schedule is as follows:

Schedule xx: Criteria for Certification within Sites and Areas of Significance to Māori and Pounamu and Aotea Overlay Areas

A number of the rules within the SASM Sites and Areas of Significance to Māori – Ngā Wāhi Tāpua ki te Māori chapter require certification to confirm if an activity meets the conditions of the rule and falls within the permitted activity rule. Where certification is not achieved, the activity will become a Discretionary Activity.

The certification process will be undertaken by an authorised representative of the relevant Poutini Ngāi Tahu Rūnanga.

The table below sets out the criteria that will be applied to the certification process. More information on the criteria can be found in the Tangata Whenua section of the Plan.

Criterion	**Why this criterion is important to assess against Schedule 3 Values**	**How this criterion is used to measure against the specific SASM rules**
Kaitiakitanga	Poutini Ngāi Tahu value that includes having the intergenerational responsibility for ensuring resources are managed in a manner beneficial to the resource.	Review the proposed activity against the listed values of the area or site (set out in Schedule 3) to determine if natural resources will be protected or managed in a way beneficial to the values at the site, including ensuring resource availability for future generations.
Tino Rangatiratanga	Poutini Ngāi Tahu value that involves having the mana to determine how a resource is to be used and managed, and by whom. This value is about recognising the relationship of Poutini Ngāi Tahu within the site and their ability to	Review the proposed activity against the listed values of the area or site (set out in Schedule 3) to determine if the proposed activity will impact the relationship of Poutini Ngāi Tahu with the values associated with the site.

	be actively involved in decision making processes.	
Mauri	Poutini Ngāi Tahu value that involves preserving the physical and spiritual health/life force of the environment.	Review the proposed activity against the listed values of the area or site (set out in Schedule 3) to determine if the activity will maintain or enhance the mauri of the site.
Mahinga kai	Poutini Ngāi Tahu practice that involves the gathering of food and other natural resources. It includes the social and educational elements as well as the process of gathering of natural resources.	Review the proposed activity against the listed values of the area or site (set out in Schedule 3) to determine if the activity will adversely affect mahinga kai, which includes use and access to mahinga kai.
Ki Uta Ki Tai	Poutini Ngāi Tahu principle that reflects the interdependent nature and function of the various elements of the environment within a catchment.	Review the proposed activity against the listed values of the area or site (set out in Schedule 3) to determine if the activity will adversely affect the whenua surrounding the site or any nearby waterways.
Wāhi tapu	Poutini Ngāi Tahu value that indicates an area of sacredness or restriction.	Note any Wāhi Tapu values on the site and if the activity will be carried out according to tikanga and kawa to determine if there are adverse effects.
Taonga	Poutini Ngāi Tahu value that indicates a site or resource highly prized and important. Taonga are treasures to be protected.	Review the proposed activity against the listed values of the area or site (set out in Schedule 3) to determine if the activity will adversely affect the identified taonga.

Advice Note: upon receiving certification from the authorised representative of the relevant Poutini Ngāi Tahu Rūnanga, the applicant must provide the certification to the relevant District Council at least 10 working days prior to the activity commencing.

Hearing Panel's Evaluation

559. The Panel accept a new schedule is required to guide the Poutini Ngāi Tahu certification process for permitted activities.

560. The Panel consider the suggested title of the new schedule is shortened due to the recommended location of the new schedule within Schedule Three, using the shorthand "*SCHED 3A*", as per the table in the notified plan that includes all the individual SASM and uses the heading "*SCHED 3*". We consider the title should be "*SCHED 3A: Criteria and Process for Certification of Permitted Activities*" so that the purpose of the schedule is clearly described, using the same font as the title of "*SCHED 3: Sites and Areas of Significance to Māori*".

561. The Panel considers it is appropriate to amend the first paragraph drafted by the planners to make it clear that certification from Poutini Ngāi Tahu is required to meet the condition of the permitted activity rule. We consider the wording provided by the planners lacks clarity that certification must be achieved to meet the permitted activity rule.

562. The Panel considers additional wording is needed in the second paragraph drafted by the planners to make it clear that the authorised representative of the relevant Poutini Ngāi Tahu Rūnanga must be a suitably qualified or experienced person for the purposes of certification. We consider it is important that plan users have confidence that the person undertaking the review during the certification process constitutes a suitably qualified or experienced person and that they have the cultural expertise to undertake the required assessment. This is reflected in recommended amendments to the wording of this paragraph.

563. The Panel have reviewed the criteria in Appendix 2 to the Ōtorohanga District Plan in order to compare the expression of criteria in that appendix with the table of criteria proposed by the planners, since this was the model for certification in a permitted activity rule preferred in the JWS. The Panel observe a clear difference in expression within Appendix 2 to the Ōtorohanga District Plan when compared with the wording proposed by the planners in the JWS for the new Schedule. The Panel find that the recommendation falls short of what is needed to reflect the advice of legal counsel and respond to the concerns of submitters regarding clarity and certainty. As previously discussed in this Recommendations Report, the Panel have identified some basic components of the certification process that will be required in order to achieve these aims.

564. In particular, the Panel consider that an efficient and effective certification process will be reliant on:

- specific details of a proposed activity, as they are provided to Poutini Ngāi Tahu;
- consideration of the proposed activity by a suitably qualified or experienced person, authorised by Poutini Ngāi Tahu;
- a timely process, that meets the two week timeframe Poutini Ngāi Tahu indicated in evidence to the Panel;
- a determination directly linked to the values present within a particular SASM, as recorded in Schedule Three (rather than a suite of more generic values that have informed the notified Plan as a whole);

- a binary determination, rather than an assessment of the degree of any effect present (e.g. less than minor, minor or more than minor); and

- a clear communication of the outcome of the process.

565. The Panel have outlined these basic components of the process in recommendations for SCHED 3A, which may be expanded on through guidance created using new Method SASM-M1. Importantly, the Panel have identified a single relevant criterion that meets the legal test outlined by counsel, tied directly to the values present in a SASM. The Panel has also recognised the potential for delays in the process, which was a concern raised by submitters, and has therefore included the timeframe of 10 working days, as referenced in evidence from Poutini Ngāi Tahu, to support the efficiency and effectiveness of the process.

The Panel has also considered all the evidence received on the relationship between Poutini Ngāi Tahu and owners of Māori land, as defined in the Plan. The Panel understand that there are a wide range of Māori land owners, who may be members of Ngāti Waewae or Ngāti Māhaki, may be members of other Ngāi Tahu hapū, or other iwi, and may or may not live locally, or always be Māori, as a consequence of the history of each land parcel. On that basis the Panel expect that tikanga will variously apply, and in some cases may mean that the certification process is considered to be inappropriate in the circumstances. The Panel, therefore, provide for an optional alternative in the Schedule that may be used in such circumstances.

Hearing Panel's Recommendation

566. The Panel recommendation is for new **Schedule Three (SCHED 3A)** to consist of the following:

SCHED 3A: CRITERIA AND PROCESS FOR CERTIFICATION OF PERMITTED ACTIVITIES

A number of the permitted activity rules within the SASM Sites and Areas of Significance to Māori – Ngā Wāhi Tāpua ki te Māori Chapter require certification to be provided by Poutini Ngāi Tahu in order to meet the conditions of the rule.

Suitably Qualified or Experienced Person (SQEP)

The certification process will be undertaken by an authorised representative of the relevant Poutini Ngāi Tahu Rūnanga who has the necessary expertise to assess activities against the criteria, and is therefore a SQEP for the purposes of certification in accordance with this Schedule.

Criterion

In order for an activity to be able to rely on the relevant permitted activity rule, the SQEP will be required to certify that:

"The proposed activity does not give rise to any unacceptable effects on any of the values of the identified SASM recorded in Schedule Three."

General Process

The following elements of process support certification:

1. Certification is specific to details of the proposed activity as provided to Poutini Ngāi Tahu;

2. **The outcome of the process will be communicated to those seeking to undertake the proposed activity within 10 working days of them providing specific details of the proposed activity to Poutini Ngāi Tahu; and**

3. **In the event that the outcome of the process is that the SQEP cannot provide certification against the Criterion, then Poutini Ngāi Tahu will advise those seeking to undertake the proposed activity either:**

(i) the nature of any effects of concern, in order to inform any subsequent process; or

(ii) that based on the specific details provided to Poutini Ngāi Tahu the SQEP cannot conclude that there are no effects of concern, which may be due to lack of information to support a definitive conclusion.

Optional Criterion and Process for Māori Land

The SQEP may determine, in relation to Māori Land, that tikanga applies in the circumstances and that, therefore, the General Process with associated Criterion is inappropriate for the purposes of certification.

In such circumstances the SQEP may instead certify that:

"The proposed activity will be undertaken in accordance with tikanga."

In such circumstances the process between the parties will also be guided by tikanga.

Note

More information on Poutini Ngāi Tahu Values can be found in the Tangata Whenua section of the Plan.

Recommendations on Appendix Four – Accidental Discovery Protocols – Te Āpitihanga Tuawhā: Ngā Tikana o te Kite Pokerehū

Submissions and Evidence/Statements

567. GDC (S608.626) sought that a standardised Accidental Discovery Protocol be included in the Plan in Appendix Four. Stephen Page (S270.009) sought that contacting the Police should be the first action upon finding human remains. HNZPT (S140.079) sought that the HNZPT Accidental Discovery Protocol be included in Appendix Four of the Plan. Poutini Ngāi Tahu (S620.388) sought a version of the protocol specific to Te Tai o Poutini, utilising Ngāi Tahu protocol, which was opposed by Māwhera Inc.

568. Ms Pull provided amended wording for Appendix Four in her evidence at the SASM hearing. She referred to the Protocol contained in the Mahaanui Iwi Management Plan 2013 as a guide. She observed that the HNZPT and Poutini Ngāi Tahu protocols were very similar in terms of steps to be taken but that tikanga around partnership was absent from the HNZPT protocol. She supported the quantifiable 20m setback in the NZHPT protocol. She considered it likely, due to the extent of occupation and use by Poutini Ngāi Tahu in the region, that any archaeological site would involve a connection with Ngāi Tahu and warrant notification at the time of discovery. She blended the protocols, in the absence of being able to confer with HNZPT in advance of writing her evidence. She confirmed at that hearing that she had since combined feedback from HNZPT, and that both parties were happy with the protocol.

569. HNZPT did not provide evidence to the SASM hearing.

Hearing Panel's Evaluation

570. The Panel are satisfied that a protocol that addresses the needs of both HNZPT and Poutini Ngāi Tahu is appropriate, and that a protocol is required.

Hearing Panel's Recommendation

571. The Panel recommends the following amendments to **Appendix Four** based on the submissions and evidence received in both the SASM and Historic Heritage hearings:

Appendix Four: Accidental Discovery Protocols~~~~ Te Āpitihanga Tuawhā: Ngā Tikana o te Kite Pokerehū

PRIOR TO COMMENCEMENT OF ANY WORKS, A COPY OF THIS ADP SHOULD BE MADE AVAILABLE TO ALL CONTRACTORS WORKING ON SITE.

Purpose:

In the event that an unidentified archaeological site is located during works, the Accidental Discovery Protocol (ADP) sets out the procedures that must be followed in the event that taonga (Māori artefacts), burial sites/kōiwi (human remains), or archaeological sites are accidentally discovered.

Background:

Land use activities involving earthworks have the potential to disturb material of cultural significance to tāngata whenua. In all cases, such material will be a taonga, and in some cases such material will also be tapu. Accidental discoveries may be indicators of additional sites in the area. They require appropriate care and protection, including being retrieved and handled with the correct Māori tikanga (protocol).

Under the Heritage New Zealand Pouhere Taonga Act 2014, an archaeological site is defined as any place associated with pre-1900 human activity, where there is material evidence relating to the history of New Zealand. It is an offence under s87 to modify or destroy the whole or any part of an archaeological site (known or unknown) without an authority from Heritage New Zealand irrespective of whether the works are permitted, or a consent has been issued under the Resource Management Act.

Protocol:

~~On~~**Immediately following the** discovery of ~~any human remains or~~ **material suspected to be a taonga, kōiwi or archaeological site**, ~~the owner of the site or the consent holder must take~~ the following steps **shall be taken**:

1. ~~*Cease works and secure the area* Immediately cease a~~All works **on the site will cease immediately at that place and** within 20m ~~of any part of~~ **around** ~~the discovery~~ **the site,** ~~including shutting down all earth disturbing machinery and stopping all earthmoving activity~~.
- ~~Secure the area of the discovery, including a sufficient buffer area to ensure that all sensitive material remains undisturbed;~~

2. ~~*Inform relevant authorities and parties*~~ **Immediate steps will be taken to secure the site to ensure the archaeological material is not further disturbed**.

3. ~~Inform the following parties immediately of the discovery:~~
- ~~The New Zealand Police;~~
- ~~Poutini Ngāi Tahu;~~
- ~~Heritage New Zealand Pouhere Taonga;~~
- ~~The relevant District Council in all cases.~~

The contractor/works supervisor/owner will notify the Rūnanga, Council and the Area Archaeologist of Heritage New Zealand. In the case of kōiwi (human remains), the New Zealand Police must be notified.

~~3. *Wait for and enable inspection of the site*~~
- ~~The New Zealand Police are required to investigate the human remains to determine whether they are those of a missing person or are a crime scene. The remainder of this process will not apply until the New Zealand Police confirm that they have no further interest in the discover.~~
- ~~A site inspection for the purpose of initial assessment and response will be arranged by the Council in consultation with Heritage New Zealand Pouhere Taonga and appropriate Poutini Ngāi Tahu representatives,~~
- ~~Following site inspection and consultation with all relevant parties (including the owner and consent holder), the Council will determine the area within which work must cease, until the requirements of this Rule are met.~~

4. **The Rūnanga and Heritage New Zealand will jointly appoint/advise a qualified archaeologist who will confirm the nature of the accidentally discovered material.**

5. If the material is confirmed as being archaeological, the contractor/works supervisor/owner will ensure that an archaeological assessment is carried out by a qualified archaeologist, and if appropriate, an archaeological authority is obtained from Heritage New Zealand before work resumes (as per the Heritage New Zealand Pouhere Taonga Act 2014).

6. The contractor/works supervisor/owner will also consult the Rūnanga on any matters of tikanga (protocol) that are required in relation to the discovery and prior to the commencement of any investigation.

7. **If kōiwi (human remains) are uncovered, in addition to the steps above, the area must be treated with utmost discretion and respect, and the kōiwi dealt with according to both law and tikanga, as guided by the Rūnanga. Remains are not to be moved until such time as Rūnanga, NZ Police and Heritage New Zealand have responded.**

~~*4. Recommencement of work*~~

~~Work within the area determined by the Council must not recommence until all of the following requirements, so far as relevant to the discovery, have been met:~~

~~1. Heritage New Zealand has confirmed that an archaeological authority has been approved for the work or that none is required;~~

~~2. Any required notification under the Protected Objects Act 1975 has been made to the Ministry for Culture and Heritage;~~

~~3. Any material of scientific or educational importance has been recorded and if appropriate recovered and preserved;~~

~~4. Where the site is of Māori origin and an authority from Heritage New Zealand Pouhere Taonga is not required the Council will confirm, in consultation with Poutini Ngāi Tahu, that:~~

- ~~Any kōiwi have either been retained where discovered or removed in accordance with the appropriate tikanga; and~~
- ~~Any agreed revisions to the planned works to be/have been made in order to address adverse effects on Māori cultural values.~~

~~5. Resource consent has been granted for any alteration or amendment to the earthworks or land disturbance that may be necessary to avoid the sensitive materials and that is not otherwise permitted under the Plan or allowed by any existing resource consent.~~

8**. Works in the site area shall not recommence until authorised by the Rūnanga, Heritage New Zealand (and the NZ Police in the case of kōiwi) and any other authority with statutory responsibility, to ensure that all statutory and cultural requirements have been met.**

9. All parties will work towards work recommencing in the shortest possible timeframe while ensuring that any archaeological sites discovered are protected until as much information as practicable is gained and a decision regarding their appropriate management is made, including obtaining an archaeological authority under the Heritage New Zealand Pouhere

Taonga Act 2014 if necessary. Appropriate management may include recording or removal of archaeological material.

10. Although bound to uphold the requirements of the Protected Objects Act 1975, the contractor/works supervisor/owner recognises the relationship between Ngāi Tahu whānui, including its Rūnanga, and any taonga (Māori artefacts) that may be discovered. Where Rūnanga so request, any information recorded as the result of the find such as a description of location and content, is to be provided for their records.

Recommendations on Appendix Ten – New Zealand Archaeological Association Sites of Māori Origin

Submissions and Evidence/Statements

572. There were four submissions received specific to Appendix Ten, from Frida Inta and Buller Conservation Group (S552.207, S553.207, S553.210) and Poutini Ngāi Tahu (S620.391). Frida Inta sought location descriptions and a record of all known sites. Poutini Ngāi Tahu sought that all the sites listed in Appendix Ten should remain and be included in an alert layer with the planning maps.

573. Ms Easton advised that there were no submissions seeking deletion of Appendix Ten and that at the time of notification the Appendix was not connected specifically to any policies or rules. She advised that the estimated cost of mapping Appendix Ten sites, for instance with buffer circles given they are indicative locations only and unverified, would be in the order of $15,000, and that work could not begin on the project until at least 2026. She advised that the work was not currently programmed to occur. She considered the priority to be development of information on the Historic Heritage scheduled items, as well as ONL and hazard mapping. This evidence is also discussed in the Historic Heritage Chapter Recommendation Report.

574. Ms Pull, for Poutini Ngāi Tahu, noted the relationship between the SASM Chapter and Appendix Six: Nohoanga Entitlements Te Āpitihanga Tuaono: Ngā Āheinga Nohoanga, which she supported in evidence at the first hearing. She considered Appendix Ten: New Zealand Archaeological Association Sites of Māori Origin and the fact that there are no rules attached to it; and that the listed sites were not necessarily accurate in terms of location, scale or completeness. She expressed support for the Poutini Ngāi Tahu submission point that an 'alert layer' be created using the listed sites, to raise awareness of any increased likelihood of unearthing archaeological material of Māori origin. She emphasised that protecting archaeological sites from inappropriate subdivision, use and development was a matter of national importance; and was not persuaded that a $15,000 estimated cost for an alert layer was in any way unreasonable given the purpose. She compared this to the role of information on a LIM report to alert landowners of special characteristics on their properties. She recommended that an alert layer be created based on the archaeological sites listed in Appendix Ten.

Reporting Officer Reply Evidence

575. Ms Easton responded to a question regarding the number of archaeological sites outside of SASM, how this information could be included in the Plan and how other plans deal with them. She explained that the NZ Archaeological Association mapped sites did not differentiate between sites of Māori and European origin. However, she noted an analysis of West Coast sites revealed around 400 sites of Māori origin amongst the approximately 1000 NZAA mapped sites. She estimated the cost of an archaeological alert layer to be in the region of $15,000. She discovered during her analysis of other district plans that New Plymouth District Council had used the NZAA sites on their planning maps, whilst others simply noted that not all sites had been identified in their district. Ms Easton recommended retaining Appendix Ten as an "information only" appendix in the Plan to serve as an alert to plan users.

Hearing Panel's Evaluation

576. The Panel agree that Appendix Ten should remain in the Plan, and have recommended a new Method HH-M5 in the Historic Heritage Chapter Recommendation Report that addresses the submission points of Frida Inta and Poutini Ngāi Tahu.

Hearing Panel's Recommendation

577. The Panel recommendation is to retain Appendix Ten in the Plan as notified.

APPENDIX 1:RECOMMENDATIONS FOR DEFINITIONS, SITES AND AREAS OF SIGNIFICANCE TO MĀORI CHAPTER

Definitions

Cleanfill area	**means an area used exclusively for the disposal of cleanfill material**
Cleanfill material	**means virgin excavated materials including clay, gravel, sand, soil and rock that are free of:** **a) combustible, putrescible, degradable or leachable components;** **b) hazardous substances and materials;** **c) products and materials derived from hazardous waste treatment, stabilisation or disposal practices;** **d) medical and veterinary wastes, asbestos, and radioactive substances;** **e) contaminated soil and other contaminated materials; and** **f) liquid wastes**
Cultural landscape	means broader geographical areas that hold significant value to Poutini Ngāi Tahu due to the concentration of wāhi tapu or taonga values, or the importance of the area to cultural traditions, history or identity~~.~~**, as identified as part of sSites and Areas of Significance to Māori.** **Advice Note: where Sites and Areas of Significance to Māori have been identified within outstanding natural landscapes the values associated with those sites and areas have been included within the descriptions in Schedule Five: Outstanding Natural Features and Landscapes – Te Rārangi Tuarima: Ngā Whenua Aotūroa Puru Rourou**
Cultural materials	**means hangi stones, pigments and dyes, aotea and pounamu, plants, plant materials and materials derived from animals, marine mammals or birds which are important to Poutini Ngāi Tahu in maintaining their culture**
Hazardous facilities	**means activities that involve the manufacturing and disposal of hazardous substances**
Landfill	**means an area used for, or previously used for, the disposal of solid waste. It excludes cleanfill areas.**
Upper slopes	**means the area within a 50 metre radius (measured on the horizontal plane) from the summit of the mountain or hill.**
Wastewater treatment facilities	**means municipal or community scale facilities for the treatment and disposal of wastewater, excluding domestic septic tank/on site and dairy shed effluent treatment and disposal facilities.**

Sites and Areas of Significance to Māori Chapter

Overview

The Sites and Areas of Significance to Māori -Ngā Wāhi Tāpua ki te Māori Chapter only relates to identified sites and areas of significance to Poutini Ngāi Tahu. A number of sites and areas are Māori land.

The West Coast/Te Tai o Poutini Councils acknowledge Poutini Ngāi Tahu as mana whenua. Te Rūnanga o Ngāti Waewae and Te Rūnanga o Makaawhio are the only elected and mandated bodies with authority to represent and administer to all Poutini Ngāi Tahu interests. The West Coast/Te Tai o Poutini Councils also acknowledge Te Rūnanga o Ngāi Tahu as the Iwi Authority with jurisdiction over the West Coast/Te Tai o Poutini. They have legal mandate to represent wider Ngāi Tahu whānui interests, and support the positions of Poutini Ngāi Tahu.

Poutini Ngāi Tahu live and travel extensively across the West Coast/Te Tai o Poutini ~~and,~~ and have historical and ongoing cultural connections with land and waterways throughout the area. There are a wide range of sites and areas of significance to Māori, these include:

- Cultural Landscapes - or areas of association. These are areas with significant associations to cultural traditions, history or identity and include ancestral maunga;
- Wāhi taonga – places that are treasured due to their high intrinsic values and their role in maintaining a balanced and robust ecosystem, sustaining quality of life and providing for the needs of present and future generations.
- Mahinga kai - Mahinga kai is central to the Poutini Ngai Tahu way of life. Mahinga kai includes the gathering of food and natural materials and the places where these resources are gathered. The mahinga kai custom of producing or procuring food resources from a range of resources throughout the region on a seasonal basis is a fundamental practice. Mahinga kai resources include kai/food, rokoa/medicine, other materials such as feathers and fibres;
- Wāhi tapu - sacred sites or areas held in reverence according to whakapapa. They may be associated with tāngata whenua creation stories, particular events or ceremonies, or valued resources, and include sites such as urupā, pā, tuhituhi o neherā, and tauranga waka;
- Pounamu and Aotea management areas **-** Pounamu and Aotea are taonga of Poutini Ngāi Tahu. Under the Pounamu Vesting Act, all pounamu on the West Coast/Tai o Poutini ~~is owned by Poutini~~ **formerly owned by the Crown was vested in Te Rūnanga o** Ngāi Tahu. **In the case of pounamu in the Arahura River catchment, this has in turn been vested in Māwhera Incorporation.** ~~Their presence~~ **Pounamu** is widespread across parts of the West Coast/Tai o Poutini. Aotea is only found in the Makaawhio River, over which Te Rūnanga o Ngāi Tahu hold a statutory acknowledgement and Te Rūnanga o Makaawhio hold a ~~Crown M~~**m**ining ~~P~~**p**ermit **under the Crown Minerals Act 1991. There may be circumstances where Victorian title applies to an area of land.**

In parallel with the process of identifying significant sites and areas, threats to the values of the sites and areas from a range of land use activities have been considered. Based on this, the approach to management of activities agreed with Poutini Ngāi Tahu is a layered approach with the following characteristics:

1. In some locations a resource consent is needed for a range of activities that could adversely affect cultural values of these areas. Different types of activities affect the different cultural values and some sites need a higher degree of management and oversight by Poutini Ngāi Tahu than others. Different rules relate to different Sites and Areas of Significance to Māori, and these are identified within the Rule, and cross referenced to the description in Schedule Three.
2. Across the region as a whole, policies and matters of discretion provide for consideration of effects on cultural values, particularly when consent is required for key activities with the potential to impact on cultural values, and there are also enabling provisions for customary harvest or other cultural practices of benefit to Poutini Ngāi Tahu.

Sites and Areas of Significance to Māori are listed and described in Schedule Three and mapped on the planning maps. Where mapped areas extend in to the coastal marine area, provisions of this plan only apply landward of the coastal marine area (mean high water springs).

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to this chapter, a number of chapters also contain provisions that may be relevant to Sites and Areas of Significance to Māori, including:

• Historic Heritage – the Historic Heritage Chapter contains the provisions in relation to the sites and areas identified in Schedule One. It also contains objectives and policies that are relevant to Sites and Areas of Significance to Māori and Appendix Ten. Appendix Ten contains New Zealand Archaeological Association listed archaeological sites of Māori origin. The exact spatial location and extent of these sites has not yet been clearly identified but they are included in Appendix Ten for information purposes. Like all archaeological sites, these are protected under the Heritage New Zealand Pouhere Taonga Act 2014.
• Notable Trees – the Notable Trees Chapter contains the provisions in relation to the trees identified in Schedule Two. Some trees are listed in Schedule Two due to their Poutini Ngāi Tahu values.
• Natural Features and Landscapes – the Natural Features and Landscapes Chapter contains provisions in relation to the outstanding landscapes and natural features in Schedules Five and Six. Poutini Ngāi Tahu values are part of what makes these areas outstanding.
• Subdivision – the Subdivision Chapter contains provisions which relate to the subdivision of land within Sites and Areas of Significance to Māori, in particular rules SUB-R10 and SUB-R17.
• Financial Contributions – the Financial Contributions Chapter provides the framework and provisions that allow for waivers for financial contributions in circumstances where heritage items, including Sites and Areas of Significance to Māori, are protected.
• Activities on the Surface of Water – the Activities on the Surface of Water Chapter contains provisions for the surface of waterbodies. In some instances, activities are restricted on some waterbodies due to the potential impacts on Poutini Ngāi Tahu values.
• Ecosystems and Indigenous Biodiversity – the Ecosystems and Indigenous Biodiversity Chapter contains provisions for the management of indigenous vegetation and biodiversity. This includes provisions relating to indigenous vegetation clearance in the coastal environment.

SASM – O1	Sites and areas of significance to Poutini Ngāi Tahu are recognised and identified and Poutini Ngāi Tahu are actively involved in decision-making that affects their values to provide for tino rangatiratanga and kaitiakitanga.
SASM – O2	Poutini Ngāi Tahu are able to access, maintain and use areas and resources of cultural value within identified sites, areas and cultural landscapes **with landowner agreement**.
SASM – O3	The values of sites and areas of significance to Māori and cultural landscapes are protected from inappropriate subdivision, use and development**,** including inappropriate modification, demolition or destruction.

Cultural Landscapes

SASM - P1

Protect Poutini Ngāi Tahu cultural landscapes from adverse effects of **inappropriate** subdivision, use and development**,** while enabling their values to be enhanced through ongoing Poutini Ngāi Tahu access and cultural use**, in agreement with landowners.**

Identification and access to significant sites and areas

SASM – P2

Work with Poutini Ngāi Tahu to identify and list sites and areas of significance to Poutini Ngāi Tahu in Schedule Three ~~and protect the identified values of the sites and areas.~~

SASM – P3

Upon accidental discovery of kōiwi (skeletal remains) or ~~urupā~~ **taonga** ensure that the Accidental Discovery Protocol in Appendix Four is followed.

~~**SASM - P4**~~

~~Promote the provision or development of access for Poutini Ngāi Tahu to the identified sites and areas of significance to Poutini Ngāi Tahu listed in Schedule Three, including through:~~

~~a. Formal arrangements, such as co-management, joint management or relationship agreements, easements; and/or~~

~~b. Informal arrangements or understandings between landowners and local Poutini Ngāi Tahu hapū and/or marae.~~

Poutini Ngāi Tahu Roles

SASM - P~~5~~4

Recognise and provide for the exercise of tino rangatiratanga and kaitiakitanga by Poutini Ngāi Tahu in decisions made in relation to identified sites and areas of significance in Schedule Three.

SASM - P~~6~~5

Within the Pounamu **Management Area** and Aotea **Management Area** ~~O~~**o**verlay**s**, enable tino rangatiratanga and kaitiakitanga of the pounamu and aotea resource by Poutini Ngāi Tahu and avoid the **unauthorised and deliberate** disturbance or removal of this resource by non-hapū members.

Management of Activities on Identified Significant Sites and Areas

SASM – P~~7~~6

Protect and maintain sites and areas of significance to Māori from adverse effects by:

a. Ensuring identified sites and areas of significance to Māori are not disturbed, destroyed, removed and/or visually encroached upon by inappropriate activities; and

b. Requiring activities on sites and areas of significance to Māori to minimise adverse effects on cultural, spiritual and/or heritage values, interests or associations of importance to Poutini Ngāi Tahu.

SASM – P~~8~~7

Where an activity is proposed within any site or area of significance to Māori identified in Schedule Three**,** ensure that:

a. Engagement with Poutini Ngāi Tahu occurs to ensure that effects of the activity on the values of the sites or area are understood;

b. The ~~a~~**A**ccidental ~~d~~**D**iscovery ~~p~~**P**rotocol in Appendix Four is adopted for any earthworks;

c. Any adverse effects on identified values are avoided, unless it can be demonstrated that to the functional need~~s~~ **or operational need** of the activity it is not possible to avoid all adverse effects; and

d. Any residual effects that cannot be practicably avoided are mitigated in a way that protects, maintains or enhances the values of the site or area.

SASM – P~~9~~8

Require that activities within sites and areas of significance to Poutini Ngāi Tahu ~~that~~ support taonga species and mahinga kai resources as identified in Schedule Three**, by**:

a. Minimis~~e~~**ing** adverse effects on indigenous habitats and waterbodies;

b. Enabl~~e~~**ing** the maintenance and enhancement of these areas; and

c. Maintain**ing** and where appropriate improv~~e~~**ing** access for Poutini Ngāi Tahu to these areas**, with landowner agreement**.

Inappropriate Activities

SASM – P~~10~~9

Restrict buildings, structures, forestry, network utility structures**, installation of fence posts,** mining and earthworks on the upper slopes and peaks of ancestral maunga as identified in Schedule Three.

SASM – P~~11~~10

Recognise the significance to Poutini Ngāi Tahu of the sites and areas of significance to Māori listed in Schedule Three and protect the identified values of these sites and areas by:

1. avoiding the following activities in, or in close proximity to, these areas:

~~a. Mining and quarrying other than Poutini Ngāi tahu collection of P~~**p**~~ounamu and A~~**a**~~otea;~~

~~b~~**a**. Landfills ~~and waste disposal facilities~~, hazardous facilities and offensive industries;

~~c~~**b**. Intensive indoor primary production;

~~d~~**c**. Cemetaries and crematoria; and

~~e~~**d**. Wastewater treatment ~~plants and disposal~~ facilities; and

2. only allowing mineral extraction and quarrying other than by Poutini Ngāi Tahu where this is supported by Poutini Ngāi Tahu.

SASM – P~~12~~11

Avoid the demolition or destruction of sites and areas of significance to Māori identified in Schedule Three.

Appropriate Activities

SASM – P~~13~~12

Enable activities in sites and areas of significance to Poutini Ngāi Tahu included in Schedule Three where the cultural and spiritual values of the site or area are protected. This includes:

a. Alterations to, demolitions and removal of existing buildings and structures;

b. Maintenance, operation, repair and upgrading of existing network utility structures and ~~critical~~ **regionally significant** infrastructure;

c. Customary harvest and other cultural practices in accordance with tikanga;

d. Indigenous vegetation clearance;

e. Temporary events;

f. Small-scale earthworks for burials within an urupā, fencing, archaeological survey and maintenance of overhead network utilities, roads and tracks; **and**

g. Animal grazing where identified values are maintained.

SASM – P~~14~~13
Allow subdivision of sites or areas of significance to Māori listed in Schedule Three where it can be demonstrated that: a. The values identified in Schedule Three are maintained and protected; b. Sufficient land is provided around the site or area listed in Schedule Three to protect identified values; c. The remainder of the site is of a size which continues to provide it with a suitable setting to the values identified in Schedule Three; and d. Measures are taken to maintain or enhance the ability of Poutini Ngāi Tahu to access and use the site or area of significance for mahinga kai, karakia, monitoring, cultural activities and ahi kā roa.
SASM – P~~15~~14
Allow any other use and development on the sites and areas of significance to Māori in Schedule Three where it can be demonstrated that the identified values of the site or area are protected and maintained, having regard to: a. Whether there are alternative methods, locations or designs that would avoid or reduce the impact on the values associated with the site or area of significance; b. The functional **need** or operational need for the activity to be undertaken in the location; c. Outcomes articulated by Poutini Ngāi Tahu through an assessment of environmental effects, cultural impact assessment or iwi planning documents; d. The potential to enhance the values of the site **or area** of significance and the relationship of Poutini Ngāi Tahu with their taonga, commensurate with the scale and nature of the proposal; e. How the values of significance to Poutini Ngāi Tahu, including tikanga, kaitiakitanga and mātauranga Māori may be incorporated; and f. Any practical mechanisms to maintain or enhance the ability of Poutini Ngāi Tahu to access and use the site or area of significance for karakia, monitoring, cultural activities and ahi kā roa.

Sites and Areas of Significance to Māori Rules
Advice Notes:
1. There may be a number of Plan provisions that apply to an activity, building, structure and site. In some cases, consent may be required under rules in this Chapter as well as rules in other Chapters in the Plan. In those cases, unless otherwise specifically stated in a rule, consent is required under each of those identified rules. Details of the steps Plan

users should take to determine the status of an activity are provided in General Approach.
2. Under the Pounamu Vesting Act all pounamu ~~is owned by~~ **formerly owned by the Crown was vested in** Te Rūnanga o Ngāi Tahu. **In the case of pounamu in the Arahura River catchment, this has in turn been vested in Māwhera Incorporation.** Please contact ~~a~~ Poutini Ngāi Tahu ~~Rūnanaga~~ or the Department of Conservation if any raw pounamu finds, not discovered on beaches open to public fossicking, are made, **and return it to the relevant owner.**
3. Poutini Ngāi Tahu may place a restriction on fossicking to protect pounamu resources or for cultural reasons. These restrictions may limit both the activity and the locations available for collection.
4. Fossicking for pounamu on the beaches of the West Coast/Te Tai o Poutini is limited to what an individual can physically lift by themselves and take unaided within a 24 hour period.
5. The rules are accompanied by methods that are shown at the end of the rules and indicate the means by which the policies and rules of the chapter will be implemented. This differs from other parts of the plan that do not contain methods.

Permitted Activities

SASM -R1 **Grazing of Animals on ~~Sites and Areas in Schedule Three –~~ Sites and Areas of Significance to Māori listed within Table SASM – T1**

1. Where the activity is not ~~on the following~~ **in the** Sites and Areas of Significance to Māori ~~as identified in Schedule Three~~ **listed within Table SASM – T1**: ~~SASM 22 Ōkari Lagoon; SASM 41 Kotorepi (Nine Mile); SASM 55 Māwhera Burial Cave Site; SASM 81 Takataka Islands; SASM 84 Knoll Point; SASM 127 Ulipa; SASM 133 No. 19 Ōkārito Native Reserve; SASM 135 Ōkārito (No. 18 Kaomaru Native Reserve); SASM 168 No. 4 Heretaniwha Native Reserve; or SASM 207 Awawhata Reserve at River Mouth.~~

Activity status where compliance not achieved: Discretionary

SASM - R2 **Minor Earthworks on ~~Sites and Areas in Schedule Three –~~Sites and Areas of Significance to Māori listed within Table SASM – T2**

Activity Status Permitted

1. These are earthworks associated with:

~~i~~**a**. Burials at urupā; or

~~ii~~**b**. Archaeological survey by Pouhere Taonga – Heritage New Zealand, Poutini Ngāi Tahu or authorised representatives; or

~~iii~~**c**. Installing fence posts and the replacement of poles for overhead network utility lines provided that:

~~A~~**i**. The area of land disturbed is limited to what is necessary to maintain an existing fence or line along its existing alignment; and

~~B~~**ii**. The activity does not involve installation or digging of new holes for overhead network utility lines; or

~~iv~~**d**. Maintaining roads/tracks within the footprint or modified ground compromised by the existing road/track; and

2. In relation to standards ~~ii.~~**a)**, ~~iii.~~**b)** and ~~iv.~~**c)** these earthworks are not undertaken at the ~~following Sites and Areas of Significance to Māori identified in Schedule Three~~ **Sites and Areas of Significance to Māori listed in Table SASM – T2** except ~~with the written approval from the relevant Poutini Ngāi Tahu rūnanga which~~ **where the activity has been certified by an authorised representative of the relevant Poutini Ngāi Tahu rūnanga in accordance with Schedule Three (SCHED 3A) and this certification** is provided to the relevant District Council at least 10 working days prior to the activity commencing~~:~~

~~i.a) SASM 17 Kawatiri South Bank Native Reserve; SASM 41 Kotorepi (Nine Mile); SASM 54 Motutapu; SASM 55 Māwhera Burial Cave Site; SASM 81 Takataka Islands; SASM 84 Knoll Point; SASM 110 Māhinapua; SASM 127 Ulipa; SASM 130 Whataroa Native Reserves Secs 21; SASM 133 No. 19 Ōkārito Native Reserve; SASM 135 Ōkārito (No. 18 Kaomaru Native Reserve); SASM 155 Hunts Beach Māori Reserve; SASM 157 No. 10 Makāwhio Native Reserve; SASM 162 Heretaniwha; SASM 165 No 7. Mahitahi Beach Native Reserve; SASM 168 No. 4 Heretaniwha Native Reserve; SASM 170 Porangirangi to Mahitahi; SASM 185 Lake Moeraki Reserve; or SASM 207 Awawhata Reserve at River Mouth~~; and

3. An Accidental Discovery Protocol commitment has been completed and the form submitted to Council 10 working days prior to the commencement of any earthworks.

Activity Status where compliance not achieved: Discretionary

Advice Note:
1. Rule SASM – R2 relates to minor earthworks on Sites and Areas of Significance toMāori within Table SASM – T2. There are additional rules for earthworks in other SASMs outlined in rule SASM – R6.

SASM – R3	**Demolition, removal of, or alterations to a building or structure on ~~Sites and Areas in Schedule Three –~~Sites and Areas of Significance to Māori listed within Table SASM – T3**

Activity Status Permitted

Where:

1. In relation to the Sites and Areas of Significance to Māori ~~identified in Schedule Three identified in 2. Below~~ **listed in Table SASM-T3**:

   ~~i~~**a**. The activity does not occur except ~~with the written approval from the relevant Poutini Ngāi Tahu rūnanga which~~ **where the activity has been certified by an authorised representative of the relevant Poutini Ngāi Tahu rūnanga in accordance with Schedule Three (SCHED 3A) and this certification** is provided to the relevant District Council at least 10 working days prior to the activity commencing; and

   ~~ii~~**b**. No land disturbance is involved; and

   ~~iii~~**c**. There is no change in the size or location of the structure**'**s foundation or building footprint occupied by the structure~~;~~**.**

~~2. SASM 41 Kotorepi (Nine Mile); SASM 55 Māwhera Burial Cave Site; SASM 64 Blaketown Part Reserve; SASM 81 Takataka Islands; SASM 84 Knoll Point; SASM 121 Waitaiki Historic Reserve; SASM 127 Ulipa; SASM 135 Ōkārito (No. 18 Koamaru Native Reserve); SASM 155 Hunts Beach Māori Reserve; SASM 157 No. 10 Makāwhio Native Reserve; SASM 162 Heretaniwha; SASM 168 No. 4 Heretaniwha Reserve; and SASM 170 Porangirangi to Mahitahi;~~

Activity Status where compliance not achieved: Discretionary

SASM – R4 Indigenous vegetation clearance on ~~Sites and Areas in Schedule Three –~~Sites and Areas of Significance to Māori listed in Table SASM – T4

Activity Status Permitted

Where:

1. The activity does not occur ~~o~~**i**n the ~~following~~ Sites and Areas of Significance to Māori ~~identified in Schedule Three~~ **listed in Table SASM-T4**, except ~~with the written approval from the relevant Poutini Ngāi Tahu rūnanga which~~ **where the activity has been certified by an authorised representative of the relevant Poutini Ngāi Tahu rūnanga in accordance with Schedule Three (SCHED 3A) and this certification** is provided to the relevant District Council at least 10 working days prior to the activity commencing~~:~~**; or**

2. The activity is hand clearance for:

a. the maintenance of existing fencelines within 1m of the fenceline; or

b. removal of planted garden vegetation.

~~i. All sites identified in Category Tahi (1) and Category Rua (2) in Schedule Three;~~

~~ii. SASM 52 Cobden Native Reserve;~~

~~iii. SASM 109 Pyramid Hill/Tumuaki Hill;~~

~~iv. SASM 117 Waitaiki Catchment;~~

~~v. SASM 156 Te Puku o te Wairapa;~~

~~vi. SASM 159 Tikitiki o Rehua;~~

~~vii. SASM 162 Heretaniwha;~~

~~viii. SASM 170 Porangirangi to Mahitahi;~~

~~ix. SASM 192 Awarua;~~

~~x. SASM 197 Ōkuru;~~

~~xi. SASM 204 Waiototo Lagoon, South Bank Nohoanga; and~~

~~xii. SASM 214 Huruhuru Manu/Spoon River.~~

Activity Status where compliance not achieved: Discretionary

Advice Note:

1. Indigenous vegetation clearance is also subject to the provisions in the ECO – Ecosystems and **Indigenous** Biodiversity Chapter.

SASM – R5	**Temporary Events on ~~Sites and Areas in Schedule Three –~~Sites and Areas of Significance to Māori listed in Table SASM – T5**

Activity Status Permitted

Where:

1. These are Poutini Ngāi Tahu cultural events in accordance with tikanga; or

2. They are temporary events and activities in accordance with the Temporary Activities Chapter; and

3. On ~~the following~~ Sites and Areas of Significance to Māori ~~identified~~ **listed** in ~~Schedule Three~~ **Table SASM-T5**, these only occur: ~~with the written approval from the relevant Poutini Ngāi Tahu rūnanga that~~ **(i) where the activity has been certified by an authorised representative of the relevant Poutini Ngāi Tahu rūnanga in accordance with Schedule Three (SCHED 3A) and this certification** is provided to the relevant District Council at least 10 working days prior to the activity commencing**; or (ii) where the activity is permitted in accordance with Rule ASW-R2.**

~~:~~

~~i) All sites identified in Category Tahi (1) in Schedule Three;~~

~~ii) SASM 1 Kahurangi Point; SASM 3 Whakapoai Native Reserve 7B; SASM 17 No. 37 Kawatiri South Bank Native Reserve; SASM 34 Te Nikau Scenic Reserve; SASM 67 Kōtukuwhakaoko/Arnold River including on the surface of its waters; SASM 94 No. 3 Arahura Native Reserve; SASM 107 Island Hill/Raparapahoi; SASM 109 Pyramid Hill/Tumuakai Hill; SASM 110 Māhinapua; SASM 114 Tara o Tama; SASM 116 Mt Tūhua; SASM 117 Waitaiki Catchment; SASM 121 Waitaiki Historic Reserve; SASM 130 Whataroa Native Reserves Secs 21; SASM 131 Ōkarito Lagoon; SASM 162 Heretaniwha; SASM 165 No.7 Mahitahi Beach Native Reserve; SASM 169 No. 5 Mahitahi Native Reserve; SASM 170 Porangirangi to Mahitahi; and SASM 205 No. 2 Waiototo Native Reserve.~~

Activity Status where compliance not achieved: Discretionary

Advice Notes:

1. Where Temporary Events are proposed on the Surface of Water within Sites and Areas of Significance to Māori then this Rule SASM -R5 will apply.

SASM – R6	**Earthworks, Buildings and Structures ~~not provided for in SASM-R2 in Schedule Three –~~within Sites and Areas of Significance to Māori listed in Table SASM – T6 and SASM – T7**

Activity Status Permitted

Where:

1. The **earthworks, buildings and structures** ~~activity does not occur on the following Sites and Areas of Significance to Māori identified in Schedule Three, except with written approval from the relevant~~

~~Poutini Ngāi Tahu rūnanga which~~ **within Sites and Areas of Significance to Māori listed in Table SASM-T6 or SASM-T7** ~~have been certified by an authorised representative of the relevant Poutini Ngāi Tahu rūnanga in accordance with Schedule Three (SCHED 3A) and this certification~~ is provided to the relevant District Council at least 10 working days prior to the activity commencing~~,~~:

~~i) All sites identified in Category Tahi (1), Category Rua (2), Category Toru (3) and Category Wha (4) in Schedule Three; and~~

~~ii) SASM 3 Whakapoai Native Reserve 7B and SASM 170 Porangirangi to Mahitahi;~~

~~iii)~~ provided that~~:~~:

2. No earthworks, buildings or structures are located on the upper slopes, ridgelines or peaks of ancestral maunga identified in ~~Category Toru (3) in Schedule Three~~ **Table SASM – T7.**

Activity Status where compliance not achieved:

Discretionary where Standard 1 is not complied with.

Non-complying where Standard 2 is not complied with.

SASM – R7	**~~Farm~~ Quarries, including Farm Quarries, and Mineral Extraction Activities within the Pounamu Management Area and Aotea ~~Overlay~~ Management Area~~s~~ or in a Site or Area of Significance to Māori in Schedule Three**

Activity Status Permitted

Where:

1. ~~In relation to~~ **The activity is mineral** extraction that **disturbs or removes** ~~A~~**a**otea:

   ~~i~~**a**. ~~Any extraction of Aotea~~ **this** is only undertaken by Te Rūnanga o Makaawhio or their authorised representatives or contractors; **and**

   ~~ii~~**b**. Where an Aotea Management Plan prepared by Te Rūnanga o Makaawhio exists, ~~any extraction of Aotea is~~ **the activity is undertaken** in accordance with that plan; **and**

   ~~iii~~**c**. Where ~~this is Aotea extraction~~ **the activity occurs** in the Aotea ~~overlay~~ **Management Area**, notice of the activity is provided to the Westland District Council by Te Rūnanga o Makaawhio~~,~~ at least 10 working days prior to the activity ~~occurring~~ **commencing**.

2. ~~In relation to~~ **The activity is mineral** extraction ~~of~~ **that disturbs or removes** ~~P~~**p**ounamu:

   ~~i~~**a**. ~~Any extraction of Pounamu~~**This** is only undertaken by **Te Rūnanga o Ngāi Tahu,** Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio or their authorised representatives or contractors; **and**

   ~~ii~~**b**. Where a~~n~~ ~~P~~**p**ounamu Management Plan prepared by Poutini Ngāi Tahu exists, ~~any extraction of P~~**p**~~ounamu is~~ the activity is undertaken in accordance with that plan; **and**

   ~~iii~~**c**. Where ~~this Pounamu extraction is~~ **the activity occurs** within the Pounamu ~~overlay~~ **Management Area**, notice of the activity is provided to the relevant district council by the relevant Poutini Ngāi Tahu rūnanga, at least 10 working days prior to the activity commencing;

3. ~~In relation to other~~**The activity is** mineral extraction and quarrying activity **(including farm quarries) that disturbs or removes pounamu and is not undertaken by Poutini Ngāi Tahu:**

~~i~~**a**. ~~Written approval is provided by~~ **The mineral extraction or quarrying** ~~the relevant Poutini Ngāi Tahu rūnanga – Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio, that the activity can occur within the Pounamu and/or Aotea overlay(s) and the written confirmation shall be~~ **has been certified by an authorised representative of the relevant Poutini Ngāi Tahu rūnanga in accordance with Schedule Three (SCHED 3A) and this certification is** provided to the relevant district council at least 10 working days prior to the activity commencing.

Activity Status where compliance not achieved:

Prohibited where Standard 1 ~~or 2~~ is not complied with.

Discretionary where Standard **2 or** 3 is not complied with.

Advice Note~~s~~:

1. ~~Under the Pounamu Vesting Act, all pounamu is owned by Te Rūnanga o Ngāi Tahu. Any pounamu or Aotea disturbed shall be returned to the relevant Poutini Ngāi Tahu papatipu rūnanga - Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio.~~

This rule manages the adverse cultural effects of mineral extraction and quarrying in relation to the cultural taonga of pounamu and aotea. This rule is in addition to the rules in the zone chapters for mineral extraction and quarrying.

SASM – R8	**Land disturbance from ~~F~~fossicking of Aotea by Ngāti Mahaki whanui within the Aotea ~~overlay~~ Management Area**

Activity Status Permitted

Where:

1. Any **land disturbance associated with** fossicking **for** ~~of~~ ~~A~~**a**otea stone is only undertaken by Ngāti Māhaki o Makaawhio whanui and only occurs seaward of the State Highway Bridge on the Makaawhio (Jacobs) River within the Aotea ~~overlay~~ **Management** ~~a~~**A**rea.
2. Any **land disturbance associated with** fossicking of ~~A~~**a**otea is in accordance with:

   ~~i~~**a**. An Aotea Management Plan prepared by Te Rūnanga o Makaawhio; or

   ~~ii~~**b**. Where there is no Aotea Management Plan, ~~the fossicking~~ **any resulting removal of aotea** is limited to what an individual can hold within one hand within any 24 hour period.

Activity Status where compliance not achieved: Prohibited

Advice Note:

1. Te Rūnanga o Makaawhio do not allow public fossicking to protect the ~~A~~**a**otea resource and for cultural reasons.

SASM – R9	**Maintenance, Repair and Upgrading of Network Utility ~~Structures~~ Infrastructure and Regionally Significant Infrastructure on or within Sites and Areas of Significance to Māori ~~identified in Schedule Three~~ listed in Table SASM – T8**

Activity Status Permitted

Where:

1. The activity occurs within the Sites and Areas of Significance to Māori listed within Table SASM – T8. ~~in the following Sites and Areas of Significance to Māori as identified in Schedule Three:~~

~~i. SASM 10 Kawatiri Pā~~

~~ii. SASM 12 Kawatiri Town Reserve~~

~~iii. SASM 15 No. 42 Kawatiri (Township) Native Reserve~~

~~iv. SASM 31 Punakaiki Area~~

~~v. SASM 56 Māwhera Pā 1~~

~~vi. SASM 57 Māwhera Gardens~~

~~vii. SASM 58 Greymouth Railway Land~~

~~viii. SASM 59 Māwhera Pā 2~~

~~ix. SASM 60 Māwhera Kāinga~~

~~x. SASM 61 Victoria Park~~

~~xi. SASM 63 No. 32 Nga Moana e Rua Native Reserve~~

~~xii. SASM 94 No. 30 Arahura Native Reserve~~

~~xiii. SASM 96 Taramakau River~~

~~xiv. SASM 104 Kawhaka Creek Catchment~~

~~xv. SASM 112 Arahura River at Tūhua~~

~~xvi. SASM 117 Waitaiki Catchment~~

~~xvii. SASM 121 Waitaiki Historic Reserve~~

~~xviii. SASM 197 Ōkuru~~

Activity Status where compliance not achieved: Controlled

Controlled Activities

SASM -R10	**Maintenance, Repair and Upgrading of Network Utility ~~Structures~~ Infrastructure and Regionally Significant Infrastructure on or within ~~Sites and Areas in Schedule Three –~~Sites and Areas of Significance to Māori where Permitted Activity standards are not met**

Activity Status Controlled

Where:

1. Notice of works is provided to the relevant Poutini Ngāi Tahu rūnanga – Te Rūnanga o Ngāti Waewae or Te Rūnanga of Makaawhio, 10 working days prior to any earthworks commencing; and

2. The work**s** ~~is~~ **are** in an area that has previously been disturbed by the network utility **infrastructure or regionally significant infrastructure and the area of land disturbed is limited to what is necessary for the work required**; ~~and~~ **or**~~:~~

~~a. For the maintenance, repair and upgrading of above ground structures any earthworks involves no more than 0.3m2 to a maximum depth of 450mm at the base of the above ground structure; and~~

~~b. For underground structures, a maximum area of 10m2 or a maximum volume of 5m3 of land; or.~~

3. The work is installing customer connections to an existing network, provided that any associated earthworks are limited to the extent that is necessary to install the connection; or

4. The work is the trimming or removal of trees or vegetation for the purpose of protecting the integrity of the structure or is otherwise undertaken in accordance with the Electricity (Hazards from Trees) Regulations 2003.

Matters of control are:

a. Area and depth of earthworks for above ground structures;
b. Area and volume of earthworks for underground structures;
c. Extent of earthworks for new customer connections;
d. Extent of any vegetation trimming or removal;
e. Impacts of the activity on the cultural values on any site or area of significance to Māori;
f. Implementation of any advice received from the relevant Poutini Ngāi Tahu rūnanga on ways to manage the effects on cultural values of the proposed maintenance works.

Activity Status where compliance not achieved: Discretionary

Advice Note:

1. This rule applies to all Sites and Areas of Significance to Māori, not only those sites and areas within Table SASM– T8

Discretionary Activities

SASM -R11	**~~Farm~~ Quarries, including Farm Quarries, and Mineral Extraction Activities within the Pounamu Management Area and Aotea ~~Overlay~~ Management Area~~s~~ or in a Site or Area of Significance to Māori in Schedule Three not meeting Permitted Activity Standards**

Activity Status Discretionary

Activity Status where compliance not achieved:

N/A

~~Advice Note:~~

~~Under the Pounamu Vesting Act all pounamu is owned by Te Rūnanga o Ngāi Tahu.~~

Notification:

When making notification decisions in relation to this rule, the Council will consult with Poutini Ngāi Tahu.

SASM -R12	**Earthworks, Buildings and Structures, including Demolition and Removal of Buildings and Structures on or within ~~Sites and Areas in Schedule Three –~~Sites and Areas of Significance to Māori not meeting Permitted Activity Standards.**

Activity Status Discretionary

Where:

1. No earthworks or structures are located on the upper slopes, ridgelines or peaks of ancestral maunga identified in ~~Category Toru (3) in Schedule Three~~ **Table SASM – R7;**
2. This is not Mineral Extraction subject to Rule SASM – ~~R14~~**15;** and
3. This will not result in the destruction of a Site or Area of Significance to Māori.

Activity Status where compliance not achieved: Non-complying

Notification:

~~Applications for earthworks on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu rūnanga.~~ **When making notification decisions in relation to this rule, the Council will consult with Poutini Ngāi Tahu.**

SASM -R13	**Maintenance, Repair~~,~~ and Upgrade of ~~and New~~ Network Utility ~~Structures~~ Infrastructure and Regionally Significant Infrastructure on or within Sites and Areas of Significance to Māori in Schedule Three not meeting Controlled Activity Standards, and any New Network Utility Infrastructure and Regionally Significant Infrastructure**

Activity Status Discretionary

Where:

1. There are no new structures on the upper slopes, ridgelines or peaks of ancestral maunga identified in ~~Category Toru (3) in Schedule Three~~ **Table SASM – R7.**

Activity Status where compliance not achieved: Non-complying

Notification:

~~Applications for activities on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu rūnanga.~~ **When making notification decisions in relation to this rule, the Council will consult with Poutini Ngāi Tahu**.

SASM -R14	**Grazing, Indigenous Vegetation Clearance and Temporary Events on Sites and Areas of Significance to Māori in Schedule Three not meeting Permitted Activity Standards**

Activity Status Discretionary

Activity Status where compliance not achieved: N/A

Notification:

~~Applications for activities on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu rūnanga.~~ **When making notification decisions in relation to this rule, the Council will consult with Poutini Ngāi Tahu.**

SASM -R15 **Quarries, including Farm Quarries, and Mineral Extraction Activities ~~by~~ other than by Poutini Ngāi Tahu in Sites and Areas of Significance to Māori identified in Schedule Three**

Activity Status ~~Non-complying~~ Discretionary

Where:

1. This occurs in any RURZ – Rural Zone, OSRZ – Open Space and Recreation Zone, SPZ – Special **Purpose** Zone (other than AIRPZ, FUZ, HOSZ, PORTZ, STADZ or SVZ) or INZ – Industrial Zone

Notification:

~~Applications for activities on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu rūnanga.~~ **When making notification decisions in relation to this rule, the Council will consult with Poutini Ngāi Tahu.**

Advice Note:

1. Mineral Extraction in RESZ – Residential Zones and ~~COMZ~~ **CMUZ**– Commercial and Mixed Use Zones is not regulated by this rule. Refer to relevant zone rules for the status of industrial activities in these areas.

Activity Status where compliance not achieved: N/A

Non-complying Activities

SASM -R16 **~~Plantation~~Commercial forestry or planting of ~~shelterbelts or~~ woodlots on land in ~~Schedule Three~~ Sites and Areas of Significance to Māori identified in Schedule Three**

Activity Status Non-complying

Where:

1. This occurs in any RURZ – Rural Zone, OSRZ – Open Space and Recreation Zone, SPZ – Special **Purpose** Zone (other than AIRPZ, FUZ, HOSZ, PORTZ, STADZ or SVZ) or INZ – Industrial Zone

Notification:

~~Applications for activities on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu rūnanga.~~ **When making notification decisions in relation to this rule, the Council will consult with Poutini Ngāi Tahu.**

Advice Note:

~~1. Plantation~~**Commercial** ~~F~~**f**orestry ~~shelterbelts~~ and woodlots in RESZ – Residential Zones and ~~COMZ~~ **CMUZ**– Commercial and Mixed Use Zones are not regulated by this rule. Refer to relevant zone rules and the NES – ~~Plantation~~ Commercial Forestry for the status of these activities in these areas.

Activity Status where compliance not achieved: N/A

SASM -R17	**Landfills, ~~waste disposal facilities,~~ new crematoria, hazardous facilities, intensive indoor primary production, and wastewater treatment plants ~~and wastewater disposal facilities,~~ on or within 50m of sites and areas ~~in Schedule Three~~ Sites and Areas of Significance to Māori identified in Schedule Three**

Activity Status Non-complying

Where:

1. This occurs in any RURZ – Rural Zone, OSRZ – Open Space and Recreation Zone, SPZ – Special **Purpose** Zone or INZ – Industrial Zone

Notification:

~~Applications for activities on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu rūnanga.~~ **When making notification decisions in relation to this rule, the Council will consult with Poutini Ngāi Tahu.**

Advice Note:

1. Where these activities are proposed in RESZ – Residential Zones and ~~COMZ~~ **CMUZ** – Commercial and Mixed Use Zones are not regulated by this rule. Refer to relevant zone rules for the status of these activities in these areas.

Activity Status where compliance not achieved: N/A

SASM -R18	**Earthworks, Buildings or Structures on the Upper Slopes, Ridgelines or Peaks of Ancestral Maunga in ~~Schedule ThreeSites and Areas of Significance to Māori~~ Table SASM – T7not meeting Permitted, Controlled, ~~– Restricted Discretionary –~~ or Discretionary Activity Standards**

Activity Status Non-complying

~~Where:~~

~~1. This occurs in any RURZ – Rural Zone, OSRZ – Open Space and Recreation Zone, SPZ – Special Zone or INZ – Industrial Zone~~

Notification:

~~Applications for activities on sites and areas of significance to Māori will always be limited notified to the relevant Poutini Ngāi Tahu rūnanga.~~ **When making notification decisions in relation to this rule, the Council will consult with Poutini Ngāi Tahu.**

~~**Advice Note:** Where these activities are proposed in RESZ – Residential Zones and COMZ – Commercial and Mixed Use Zones are not regulated by this rule. Refer to relevant zone rules for the status of these activities in these areas~~.

Activity Status where compliance not achieved: N/A

Prohibited Activities	
SASM -R19	**Quarries, including Farm Quarries, and ~~M~~mineral extraction that disturb or remove aotea, or land disturbance from fossicking of ~~A~~aotea, ~~or Mineral Extraction of~~**

OTHER METHODS

SASM – M1:

Councils to develop and provide, in partnership with Poutini Ngāi Tahu, the following:

a. written protocols to guide engagement with Poutini Ngāi Tahu for permitted activities (including the certification process), resource consents or plan change applications; and

b. guidance for the public on how to apply for a resource consent for an activity on a site containing an identified Site and Area of Significance to Māori;

c. information available for landowners of identified Sites and Areas of Significance to Māori and their values, including the nature and form of that information.

SASM – M2:

The Councils in partnership with Poutini Ngāi Tahu will encourage the provision or development of access for Poutini Ngāi Tahu to identified Sites and Areas of Significance to Māori listed in Schedule Three through a range of methods, including:

a. Formal arrangements, such as co-management, joint management or relationship agreements, easements and land covenants, or access agreements; and/or

b. Informal arrangements or understanding between landowners and local Poutini Ngāi Tahu hapū and/or marae.

APPENDIX 2 - SCHEDULE THREE (SCHED 3) – SITES AND AREAS OF SIGNIFICANCE TO MĀORI

APPENDIX 2 – RECOMMENDATIONS FOR SCHEDULE THREE (SHED 3) – SITES AND AREAS OF SIGNIFICANCE TO MĀORI, SASM MAPS AND APPENDICES

Schedule Three (SCHED 3) – Sites and Areas of Significance to Māori

All Sites and Areas of Significance to Māori shown in this Schedule are also shown on the planning maps, which outline each identified site or area.[1]

Where mapped Sites and Areas of Significance to Māori extend in to the coastal marine area, this Schedule only applies landward of the coastal marine area (above mean high water springs).[2]

All waterbodies that are identified as a whole on the planning maps as a Site or Area of Significance to Māori and listed in this Schedule include their active channels, beds, banks and immediate margins where they fall outside the outline on the planning maps. The planning maps are indicative of Poutini Ngāi Tahu relationship with the waterbody.[3]

SCHEDULE 3 (SCHED 3A)

SCHED 3A: CRITERIA AND PROCESS FOR CERTIFICATION OF PERMITTED ACTIVITIES

A number of the permitted activity rules within the SASM Sites and Areas of Significance to Māori – Ngā Wāhi Tāpua ki te Māori Chapter require certification to be provided by Poutini Ngāi Tahu in order to meet the conditions of the rule.

Suitably Qualified or Experienced Person (SQEP)

The certification process will be undertaken by an authorised representative of the relevant Poutini Ngāi Tahu Rūnanga who has the necessary expertise to assess activities against the criteria, and is therefore a SQEP for the purposes of certification in accordance with this Schedule.

Criterion

In order for an activity to be able to rely on the relevant permitted activity rule, the SQEP will be required to certify that:

"The proposed activity does not give rise to any unacceptable effects on any of the values of the identified SASM recorded in Schedule Three."

General Process

The following elements of process support certification:

1. **Certification is specific to details of the proposed activity as provided to Poutini Ngāi Tahu;**

2. **The outcome of the process will be communicated to those seeking to undertake the proposed activity within 10 working days of them providing specific details of the proposed activity to Poutini Ngāi Tahu; and**

3. **In the event that the outcome of the process is that the SQEP cannot provide certification against the Criterion, then Poutini Ngāi Tahu will advise those seeking to undertake the proposed activity either:**

(i) the nature of any effects of concern, in order to inform any subsequent process; or

(ii) that based on the specific details provided to Poutini Ngāi Tahu the SQEP cannot conclude that there are no effects of concern, which may be due to lack of information to support a definitive conclusion.

Optional Criterion and Process for Māori Land

The SQEP may determine, in relation to Māori Land, that tikanga applies in the circumstances and that, therefore, the General Process with associated Criterion is inappropriate for the purposes of certification.

In such circumstances the SQEP may instead certify that:

"The proposed activity will be undertaken in accordance with tikanga."

In such circumstances the process between the parties will also be guided by tikanga.

Note

More information on Poutini Ngāi Tahu Values can be found in the Tangata Whenua section of the Plan.

APPENDIX FOUR: ACCIDENTAL DISCOVERY PROTOCOLS

Appendix Four: Accidental Discovery Protocols~~:~~ Te Āpitihanga Tuawhā: Ngā Tikana o te Kite Pokerehū

PRIOR TO COMMENCEMENT OF ANY WORKS, A COPY OF THIS ADP SHOULD BE MADE AVAILABLE TO ALL CONTRACTORS WORKING ON SITE.

Purpose:

In the event that an unidentified archaeological site is located during works, the Accidental Discovery Protocol (ADP) sets out the procedures that must be followed in the event that taonga (Māori artefacts), burial sites/kōiwi (human remains), or archaeological sites are accidentally discovered.

Background:

Land use activities involving earthworks have the potential to disturb material of cultural significance to tāngata whenua. In all cases, such material will be a taonga, and in some cases such material will also be tapu. Accidental discoveries may be indicators of additional sites in the area. They require appropriate care and protection, including being retrieved and handled with the correct Māori tikanga (protocol).

Under the Heritage New Zealand Pouhere Taonga Act 2014, an archaeological site is defined as any place associated with pre-1900 human activity, where there is material evidence relating to the history of New Zealand. It is an offence under s87 to modify or destroy the whole or any part of an archaeological site (known or unknown) without an authority from Heritage New Zealand irrespective of whether the works are permitted, or a consent has been issued under the Resource Management Act.

Protocol:

~~On~~**Immediately following the** discovery of ~~any human remains or~~ **material suspected to be a taonga, kōiwi or archaeological site**, ~~the owner of the site or the consent holder must take~~ the following steps **shall be taken**:

1. ~~*Cease works and secure the area* Immediately cease a~~All work~~s~~ **on the site will cease immediately at that place and** within 20m ~~of any part of~~ **around** ~~the discovery~~ **the site,** ~~including shutting down all earth disturbing machinery and stopping all earthmoving activity~~.

- ~~Secure the area of the discovery, including a sufficient buffer area to ensure that all sensitive material remains undisturbed;~~

2. ~~*Inform relevant authorities and parties*~~ **Immediate steps will be taken to secure the site to ensure the archaeological material is not further disturbed**.

3. ~~Inform the following parties immediately of the discovery:~~
- ~~The New Zealand Police;~~
- ~~Poutini Ngāi Tahu;~~
- ~~Heritage New Zealand Pouhere Taonga;~~
- ~~The relevant District Council in all cases.~~

The contractor/works supervisor/owner will notify the Rūnanga, Council and the Area Archaeologist of Heritage New Zealand. In the case of kōiwi (human remains), the New Zealand Police must be notified.

~~3.~~ ~~*Wait for and enable inspection of the site*~~
- ~~The New Zealand Police are required to investigate the human remains to determine whether they are those of a missing person or are a crime scene. The remainder of this process will not apply until the New Zealand Police confirm that they have no further interest in the discover.~~
- ~~A site inspection for the purpose of initial assessment and response will be arranged by the Council in consultation with Heritage New Zealand Pouhere Taonga and appropriate Poutini Ngāi Tahu representatives,~~
- ~~Following site inspection and consultation with all relevant parties (including the owner and consent holder), the Council will determine the area within which work must cease, until the requirements of this Rule are met.~~

4. **The Rūnanga and Heritage New Zealand will jointly appoint/advise a qualified archaeologist who will confirm the nature of the accidentally discovered material.**

5. If the material is confirmed as being archaeological, the contractor/works supervisor/owner will ensure that an archaeological assessment is carried out by a qualified archaeologist, and if appropriate, an archaeological authority is obtained from Heritage New Zealand before work resumes (as per the Heritage New Zealand Pouhere Taonga Act 2014).

6. The contractor/works supervisor/owner will also consult the Rūnanga on any matters of tikanga (protocol) that are required in relation to the discovery and prior to the commencement of any investigation.

7. **If kōiwi (human remains) are uncovered, in addition to the steps above, the area must be treated with utmost discretion and respect, and the kōiwi dealt with according to both law and tikanga, as guided by the Rūnanga. Remains are not to be moved until such time as Rūnanga, NZ Police and Heritage New Zealand have responded.**

~~*4. Recommencement of work*~~

~~Work within the area determined by the Council must not recommence until all of the following requirements, so far as relevant to the discovery, have been met:~~

~~1. Heritage New Zealand has confirmed that an archaeological authority has been approved for the work or that none is required;~~

~~2. Any required notification under the Protected Objects Act 1975 has been made to the Ministry for Culture and Heritage;~~

~~3. Any material of scientific or educational importance has been recorded and if appropriate recovered and preserved;~~

~~4. Where the site is of Māori origin and an authority from Heritage New Zealand Pouhere Taonga is not required the Council will confirm, in consultation with Poutini Ngāi Tahu, that:~~

- ~~Any kōiwi have either been retained where discovered or removed in accordance with the appropriate tikanga; and~~

- ~~Any agreed revisions to the planned works to be/have been made in order to address adverse effects on Māori cultural values.~~

~~5. Resource consent has been granted for any alteration or amendment to the earthworks or land disturbance that may be necessary to avoid the sensitive materials and that is not otherwise permitted under the Plan or allowed by any existing resource consent.~~

8**. Works in the site area shall not recommence until authorised by the Rūnanga, Heritage New Zealand (and the NZ Police in the case of kōiwi) and any other authority with statutory responsibility, to ensure that all statutory and cultural requirements have been met.**

9. All parties will work towards work recommencing in the shortest possible timeframe while ensuring that any archaeological sites discovered are protected until as much information as practicable is gained and a decision regarding their appropriate management is made, including obtaining an archaeological authority under the Heritage New Zealand Pouhere Taonga Act 2014 if necessary. Appropriate management may include recording or removal of archaeological material.

10. Although bound to uphold the requirements of the Protected Objects Act 1975, the contractor/works supervisor/owner recognises the relationship between Ngāi Tahu whānui, including its Rūnanga, and any taonga (Māori artefacts) that may be discovered. Where Rūnanga so request, any information recorded as the result of the find such as a description of location and content, is to be provided for their records.

IF IN DOUBT, STOP AND ASK; TAKE A PHOTO AND SEND IT TO THE HERITAGE NEW ZEALAND ARCHAEOLOGIST

APPENDICES

Appendix 1 – Recommendations

PART A – INTRODUCTORY MATTERS

1. PRELIMINARY MATTERS

1.1. Introduction

1. Matters to do with our appointment and other preliminary matters applicable to all Hearing Panel's recommendations on the Proposed Te Tai o Poutini Plan (**pTTPP** or 'the Plan') are recorded and addressed in Recommendation Report 1.

2. This Recommendation Report relates to the Special Purpose Zones (**SPZ**) - Ngā Takiwa mō Kaupapa kē sections of the pTTPP, excluding the Mineral Extraction Zone (**MINZ**) and Buller Coalfield Zone (**BCZ**).

3. The Report contains the Hearing Panel's evaluations and recommendations to the TTPP Committee on the submissions and further submissions received on these sections of Part 3 of the Plan.

4. The Section 32 Report[1] provides an evaluation of the Special Purpose Zones and how they are managed through the combined Plan, including the regulatory framework key resource management issues, the evidence and research basis, including the consultation, information and analysis undertaken and evaluation of the options.

5. The Section 42A Officer's Report[2] ('s42A Report'), authored by Ms Lois Easton, a planner with Kererū Consultants, acting as the Reporting Officer, was circulated before the hearing.

6. The s42A Report provided an analysis of submissions and further submissions received. It made recommendations on changes to the notified plan provisions (the changes were included in Appendix 1 and the recommendation on all submissions and further submissions as to either 'accepted', 'accepted in part' or 'rejected' in Appendix 2).

7. Ms Easton subsequently provided an Addendum s42A Report[3] which responded to key matters raised by the Hearings Panel.

8. The s42A Report assessed a total of 680 submissions points and 61 further submissions points were received on the Special Purpose Zones chapter, associated zoning maps and relevant definitions. It provided summaries of all the submissions and further submissions received and the relief sought; an analysis of the proposed changes to provisions; and recommendations on changes to the plan provisions (see Appendix 1 of s42A Report) and the accept/accept in part/reject recommendations for individual submission and further submission points (see Appendix 2 of the s42A Report).

9. The matters raised by submitters were grouped in the s42A Report in relation to each of the following key issues:

    - General;
    - Overview;

[1] Te Tai o Poutini Plan – Section 32 Evaluation Report 13 Special Purpose Zones - Ngā Takiwā mō Kaupapa kē
[2] Section 42A Report on Residential Zones
[3] s42A Right of Reply on Residential and Special Purpose Zones

- Objectives;
- Policies; (excluding PA)
- Rules (excluding PA); and
- Standards (Sub only).

10. The s42A Report notes that because of the minor nature of the changes and the intention for them to correct errors or improve the readability of the TTPP, further evaluation under s32AA was not required.

11. This Recommendation Report follows this same structure of the s42A Report. It provides a brief summary of the issues raised in submissions and further submissions, the s42A Report analysis and recommendations, submitter evidence and the Reporting Officer's reply evidence, before providing our evaluation and recommendation.

12. This Recommendation Report should be read in conjunction with the s42A Report and the tracked change version of the notified Plan provisions (attached as Appendix 1 to this Report). The tracked change version of the TTPP provisions forms an integral part of the decision and records all recommended amendments (additions and deletions) to the notified TTPP provisions made by the Panel. The tracked change version of the TTPP shows the Panel's recommended changes to the notified provisions in **bold and underlining** indicating additions and ~~strikethrough~~ indicating deletions. If there is any discrepancy between this Recommendation Report and the tracked change version of the Plan, the tracked change version of the Plan shown in Appendix 1 of this Report must prevail.

13. This Recommendation Report contains the reasons for the Panel's recommendations. These comprise either adoption of the reasoning and recommendations of the original section 42A Reports or the Reporting Officer's reply evidence (Councils' right of reply post hearing adjournment), or a specific reasoning by the Panel.

14. Where the Panel recommends the TTPP provisions should remain as notified, it is because:

    (a) The Panel has adopted the reasoning and recommendation of the s42A Report to retain the provision as notified; or

    (b) The Panel has adopted the reasoning and recommendation to retain the provision as notified as recommended in the Reporting Officer's reply evidence; or

    (c) The Panel has recommended to retain the provision as notified for reasons set out in this Recommendation Report.

15. Where there is a recommended change to a notified provision of the TTPP, it is because:

    (a) The Panel has recommended amendment to a provision for reasons set out in this Recommendation Report in response to a submission point, which the s42A Report did not recommend; or

    (b) The Panel adopted the reasoning and recommendation of the s42A Report to change the provision to that recommended in the original s42A Report; or

    (c) The Panel has adopted the reasoning and recommendation to that recommended in the Reporting Officer's reply evidence; or

(d) A consequential change has been necessary following on from a decision in either (a), (b) or (c).

16. Where there may be a different recommendation between the s42A Report and the Reporting Officer's r reply evidence (i.e., the recommendation by the Reporting Officer has changed as a result of hearing the evidence of submitters), unless the Panel decision specifically adopts the original s42A Report's reasoning and recommendations, the reasoning and recommendations in the (later) reply to evidence has been adopted and it must be taken to prevail.

17. If there are circumstances where the Panel consider that alternative relief is more appropriate than that requested in submissions and further submission to give effect to the RMA, NZCPS, national policy statements and/or RPS, but are still within the scope of the relief sought, the relevant recommendation clearly sets out the nature of the change and the reason for the change. This is recorded in this Recommendation Report.

18. If any changes are recommended to the provisions (since the Section 32A Report was completed) a further evaluation if required pursuant to section 32AA of the RMA has been undertaken. Any such circumstances are referred to in this Recommendation Report in sufficient detail to demonstrate a further evaluation was undertaken.

19. Clause 16(2) of the First Schedule of the RMA enables the Panel to recommend amendments to alter information, where such an alteration is of minor effect, or may correct any minor errors. In the Panel's recommendations below each section considered in Part C of this Report and in the tracked change version of the notified Plan provisions (Appendix 1 of this Report) records any minor amendments.

1.2. Terminology in this Report

20. Throughout this Report, the following abbreviations will be used:

BDC	Buller District Council
Councils	Buller District Council, Grey District Council, and Westland District Council
DOC	Department of Conservation
Director General	Director General of Conservation
FENZ	Fire and Emergency New Zealand
Forest & Bird	Royal Forest & Bird Protection Society of NZ Inc
GDC	Grey District Council
KiwiRail	KiwiRail Holdings Limited
MOE	Ministry of Education Te Tāhuhu o Te Mātauranga
NPS	National Policy Statement

Ngāi Tahu	Te Rūnanga o Ngāi Tahu, Te Runanga o Ngāti Waewae, Te Rūnanga o Makaawhio
Planning Standards	National Planning Standards
RMA or the Act	Resource Management Act 1991
RPS	West Coast Regional Policy Statement
SASM	Sites and Areas of Significance to Māori
SEL	Skyline Enterprises Limited
SNA	Significant Natural Area
Te Mana Ora	Te Mana Ora (Community and Public Health) of the NPHS/Te Whatu Ora
Transpower	Transpower New Zealand Limited
Waka Kotahi NZTA	NZ Transport Agency Waka Kotahi
WDC	Westland District Council
WCRC	West Coast Regional Council

1.3. Hearing Arrangements

21. The hearing for the Specific Purpose Zone, excluding the Franz Josef Area, was held at the West Coast Regional Council offices in Paroa on 16-17 July 2024. Some submitters appeared by internet connection.

22. The Franz Josef Special Purpose Zone and Settlement Zone hearing was held at the St John Training Room, 97 Cron Street, Franz Josef on 8 October 2024. Some submitters appeared by internet connection.

23. At both hearings, Ms Easton tabled a Planning Summary Statement to her s42A Report.

24. At the conclusion of the hearings, the Hearing Panel requested that Ms Easton respond to several questions that arose during the hearing. These are dealt with in Ms Easton's Right of Reply.

1.4. Appearances

25. The following submitters appeared at the Specific Purpose Zone hearing, excluding the Franz Josef area hearing:

Ms Frida Inta for herself and on behalf of the **Buller Conservation Group** (online)

The O'Conor Institute Trust Board

- Mr Mark Lile, Planner (online)

Te Tumu Paeroa for the Māori Trustee

Ball Developments Limited and Davis Oglivie and Partners Limited

- Ms Pauline Hadfield, Planner

Mr Laurence McGuire and Mr Tom Overton for Haast Airfield

- Peter Ibbotson, Acoustician Marshall Day
- Stephanie King, Acoustician Marshall Day

New Zealand Heavy Haulage Association Incorporated

- Mr Jonathan Bhana-Thompson, Planner (online)

Buller District Council

- Mr Craig Barr, Planner
- Ms Rebecca Inwood, Planner
- Mr Nathan Riley, Regulatory Manager BDC

26. The following submitters appeared at the Franz Josef Area hearing.

Skyline Enterprises Limited (SEL)

- Mr Geoff McDonald, SEL
- Ms Rosie Hill and Mr Graeme Todd, Counsel
- Mr Paul Faulkner, Geotechnical (online)
- Mr Rob Greenaway, Recreation and Tourism (online)
- Mr Fraser Colegrave, Economist (online)
- Dr Andrew Wells, Ecologist
- Ms Nikki Smetham, Landscape Architect
- Mr Sean Dent, Planner

Scenic Hotel Group

- Ms Melanie Foote (online)

Freehold Properties Limited

- Mr Richard Innes (online)

Mr Neil Mouat, for himself

1.5. Overview of submitter technical report received

27. A Memorandum of Counsel from Mr Todd and Ms Hill on behalf of Skyline Enterprises Limited (**SEL**) in relation to hearing procedures and timetabling (dated 6 June 2024).

28. A synopsis of legal submissions was received from Mr Todd and Ms Hill on behalf of SEL (dated 23 September 2024).

29. A technical report from Marshall Day Acoustics, Acoustic Engineers engaged by McGuires Ltd (dated 14 May 2024) was received in relation to including the Haast Airport in the Airport Zone.

30. For those appearing at the hearing, the following evidence and/or statements were received:

    (a) Mr Lile, planning, on behalf of the O'Conor Institute Board;

    (b) Ms Hadfield, planning, on behalf of Ball Developments Limited and Davis Ogilvie and Partners Limited (dated 17 June 2024) and summary statements (dated 16 July 2024 and 17 July 2024);

    (c) Mr Bhana-Thomson, planning, on behalf of the House Movers Section of the New Zealand Heavy Haulage Association Incorporated;

    (d) Mr Barr, planning, on behalf of BDC (dated 17 June 2024) and summary statement (dated 17 July 2024);

    (e) Mr McDonald, SEL representative, on behalf of SEL;

    (f) Mr Faulkner, geotechnical, on behalf of SEL;

    (g) Mr Greenaway, recreation and tourism, on behalf of SEL;

    (h) Mr Colegrave, economics, on behalf of SEL;

    (i) Dr Wells, ecology, on behalf of SEL;

    (j) Ms Smetham, landscape, on behalf of SEL;

    (k) Mr Dent, planning, on behalf of SEL; and

    (l) Ms Foote, planning, on behalf of Scenic Hotel Group.

31. Following the receipt of the s42A Report on the Special Purpose Zone (excluding Franz Josef), the following submitter correspondence was received:

    (a) Statement from the Aircraft Owners and Pilots Association NZ (dated 10 May 2024) in support of the 'Haast Airfield Rezoning Submission';

    (b) KiwiRail letter (dated 17 June 2024) advising that it did not wish to be heard at the hearing and requested that the correspondence be tabled as a record of KiwiRail's position on safety setbacks from the rail corridor in the Residential Zone;

    (c) Hearing Notes from Ms Inta for herself and on behalf of the Buller Conservation Group (dated 4 July 2024);

    (d) Joint Statement of Position from Te Rūnanga o Ngāi Tahu and Te Tumu Paeroa (dated 15 July 2024);

(e) Fire and Emergency NZ letter (dated 5 July 2024) advising that there was generally a high degree of support from the Reporting Officer for its submission points and it would not be attending the hearing. They requested the letter be tabled at the hearing.

(f) Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu ('Poutini Ngāi Tahu') letter from Ms Susan Aitken, Consultant Planner for Poutini Environmental (dated 15 July 2024);

(g) Letter from Scenic Hotel Group (dated 22 August 2024);

(h) Memorandum from Mr Sam Flewellen on behalf of Scenic Hotel Group (dated 23 August 2024); and

(i) Memorandum of Counsel on behalf of SEL seeking leave for persons presenting evidence to appear by AVL (11 September 2024).

32. In preparation for the hearing at Franz Josef on 8 and 9 October 2024, legal counsel for SEL advised (email on 30 September 2024) that Mr McDonald would not be attending the hearing. The Panel agreed to a process of written questions in relation to Mr McDonald's evidence.

33. Following the hearing, the Panel issued Minute 34 (dated 22 July 2024) providing direction around the provision of further information from several submitters by 16 August 2024. The following further information received:

(a) Memorandum of Counsel on behalf of Scenic Hotel Group on the matter of 'Scope' (8 November 2024).

(b) Memorandum from Ms Foote on behalf of Scenic Hotel Group (8 November 2024).

1.6. Right of Reply

34. Ms Easton provided a written Right of Reply (dated 23 August 2024) in relation to SPZ (excluding the Franz Josef Area), addressing questions that arose from the Panel during the hearing, including an updated Appendix 1 showing tracked changes to the notified provisions (as Attachment 1).

35. A joint Right of Reply from Ms Easton and Ms Belgrave (Reporting Officers) was received on 7 October 2024 in relation to setback requirements for the railway corridor, which apply to several different zones, including the SPZ.

36. Ms Easton provided a written Right of Reply (dated 14 October 2024) in relation to the Franz Josef Area (Part 1), addressing questions that arose from the Panel during the hearing. The Reply included recommended amendments to the definition of '*Recreation Activity*'.

37. Ms Easton provided a written Right of Reply (dated 10 December 2024) in relation to the Franz Josef Area (Part 2), addressing questions that arose from the Panel during the hearing. The Reply included further recommended amendments to the Plan.

1.7. Procedural Steps and Issues

38. The Panel notes that Commissioner Chrystal took no part in recommendations relating to Scenic Hotel Group. No other procedural issues arose from this hearing.

1.8. Site Visits

39. Site visits were undertaken as follows:

Franz Josef Scenic Visitor Zone including Scenic Hotel Group properties and West Coast Wildlife Centre, Donovan Drive, Glacier Lookout Carpark-Gondola Proposal site, and the Airport Zone helicopter area.

Punakaiki Scenic Visitor Zone

Fox Glacier Scenic Visitor Zone, including Scenic Hotel Group properties at Pekenga Drive

Haast Airfield

Jackson Bay Port area

Hokitika Airport Zone

Karamea Airfield

Greymouth Port Zone

Arahura Marae Māori Purpose Zone

Haast Highway Māori Purpose Zones

PART B - STATUTORY REQUIREMENTS AND DOCUMENTS

40. Special Purpose Zones - Ngā Takiwa mō Kaupapa kē is one of six zone based sections located in Part 3 – Area Specific Matters – Te Wāhanga 3 – Ngā Take a Ia Rohe. The Special Purpose Zones section has separate objectives, policies and rules that apply to each of the SPZ.

41. The Section 32 Report outlines the relevant statutory considerations applicable to the SPZ and the relationships between the sections of the RMA and higher order documents.

42. The Section 32 and section 42A Reports also highlight the relevant matters from section 6, 7 and 8 of the RMA, the New Zealand Coastal Policy Statement (**NZCPS**), any relevant National Policy Statement including the National Environmental Standard for Assessing and Managing Contaminated Soil to Protect Human Health (**NPS-CS**), the West Coast Regional Policy Statement (**RPS**), Regional Plans, District Plans of adjacent territorial authorities, iwi management plans and the National Planning Standards.

43. Clause 10 of the First Schedule states that it is not necessary to provide decisions on individual submissions. Recommendations of the Panel are made within the scope of requested relief, either individual submissions or groups of submissions making similar requests, as specified in reasons for recommendation.

44. The National Planning Standards Mandatory Directions ('Planning Standards') Clause 8.1 requires only zones listed within Table 13 of the Planning Standards to be used, except for Special Purpose Zones, or in the case of a combined regional and district plan, a zone that is both seaward and landward of mean high-water springs. The Planning Standards[4] direct that the district plan must only contain the zones listed where they are consistent with the following descriptions:

    - Airport Zone: Areas used predominantly for the operation and development of airports and other aerodromes, as well as operational areas and facilities, administrative, commercial and other industrial activities associated with airports and other aerodromes.
    - Hospital Zone Areas used predominantly for the operation and development of locally or regionally important medical, surgical or psychiatric care facilities, as well as other health care services and facilities, administrative and commercial activities associated with these facilities.
    - Stadium Zone: Areas used predominantly for the operation and development of large-scale sports and recreation facilities, buildings, and structures. It may accommodate a range of large-scale sports, leisure, entertainment, art, recreation, and/or event and cultural activities.
    - Port Zone: Areas used predominantly for the operation and development of ports, as well as operational areas and facilities, administrative, commercial and industrial activities associated with ports.
    - Māori Purpose Zone: Areas used predominantly for a range of activities that specifically meet Māori cultural needs including but not limited to residential and commercial activities.

[4] Section 8: Zone Framework Standard, Discretionary Direction 5

- Future Urban Zone: Areas suitable for urbanisation in the future and for activities that are compatible with and do not compromise potential future urban use.

45. The Planning Standards state[5] that an additional special purpose zone must only be created when the proposed land use activities or anticipated environment outcomes of the additional zone meet all the following criteria:

    (a) Are significant to the district, region or country;

    (b) Are impractical to be managed through another zone; and

    (c) Are impractical to be managed through a combination of spatial layers.

46. In deciding to include the Scenic Visitor Zone (**SVZ**), the TTPP Committee determined that these criteria were met.

47. Decisions on the MINZ and BCZ, which are separate SPZ, are contained within the Recommendation Report for Mineral Extraction.

48. The Panel is satisfied that the Plan structure is consistent with this national direction.

[5] Section 8: Zone Framework Standard, Mandatory Direction 3

PART C – SUBMISSIONS, EVIDENCE, EVALUATION AND RECOMMENDATIONS

2. SPECIAL PURPOSE ZONES

2.1. AIRPZ - Airport Zone - Te Takiwā Taunga Rererangi

Submissions and Further Submissions

49. Nine submission points and one further submission point were received on the Airport Zone as a whole, including zoned land, boundaries and noise contours. These were summarised in a Table on page 12 of the s42A Report. The Panel has considered the relevant submissions and further submissions received and adopts the summaries in the s42A Report.

50. Forest and Bird (S560.391, S560.0541) requested clarification on the treatment of vegetation clearance in the district-wide chapters. Specifically, they sought to ensure that a consistent "*Other relevant Te Tai o Poutini Plan provisions*" section was included within the overview, encompassing all relevant chapters with an explanatory note. They seek that all Natural Environment Chapters and District-Wide Chapters be included in this section.

Section 42A Report

51. Ms Easton acknowledged the general support from several submitters, including Totally Tourism Limited for the zoned Franz Josef Heliport and definition of "*airport activities*" (S449.003 and S449.001), Te Mana Ora for the role of airports and helipads in community connection and resilience (S190.1060), BDC (S538.580) for retention of the Airport Zone Chapter; and support from WDC (S181.047) supporting the objectives and policies.

52. GDC (S608.121) sought all references to "*Site or Area of Significance to Māori*" be removed from this Chapter. Ms Easton did not support this submission for the reasons discussed in the substantive matter in the s42A Report for Sites and Areas of Significance to Māori (**SASM**) and she recommended rejecting this submission. GDC's submission was opposed by Poutini Ngāi Tahu (FS41.034) in further submissions, which Ms Easton recommended accepting.

53. Ms Easton supported the inclusion of the more standardised and expanded "Other relevant Te Tai o Poutini Plan provisions" section in the Overview, as sought by Forest and Bird, and she considered this was consistent with recommendations on other chapters in the Plan.

54. Totally Tourism Limited (S449.004) sought that the Airport Noise Boundary at Franz Josef be amended to reflect the maximum air movements from either 2018 or 2019, if these were greater than those in 2017. Ms Easton supported this submission as she noted that the intention was that the contours reflect pre-COVID-19 peak use but do not provide for further expansion of heliport use beyond this peak.

55. Two submitters (S504.011 and S505.011) sought to have the airport nose contours removed from their property and other properties in the same situation. Ms Easton did not support the requested change given that the purpose of the contours was to help protect the ongoing use of the airports, which were considered critical infrastructure. She also noted that the noise contours did not impact existing uses but that new development

would require sufficient acoustic insulation to ensure that people were comfortable and have a good degree of noise amenity in their homes.

56. In response to questions regarding the definition of '*regionally significant infrastructure'*, Ms Easton recommended that Haast Airfield and Karamea Aerodrome be added but not the Franz Josef Heliport.

Hearing and Submitter Evidence/Statements

57. Mr Jonathan Bhana-Thomson, for the New Zealand Heavy Haulage Association, reiterated the submitters request for recognition in the Airport Zone that relocated buildings for non-residential purposes could occur.

58. Poutini Ngāi Tahu provided a hearing statement opposing the submission point of GDC (S608.121).

Reporting Officer Reply Evidence

59. No specific points were made in the Reply Evidence regarding the Airport Zone as a whole, with matters to do with zoning and noise contours discussed later in this Report.

Hearing Panel's Evaluation

60. The Panel accepts Ms Easton's recommendation to accept the Forest and Bird submission and recommends amendments to the Overview to standardise cross-refencing to other chapters of the Plan.

61. The Panel accepts the reasoning set out in the s42A Report and agrees with Ms Easton's recommendation that no other changes to the notified version are required to the Airport Zone Chapter in response to submissions on the whole chapter. However, we note that a consequential amendment to accepting the submission point from Laurence McGuire (S458.001) to include *'Haast Airfield'* in the Overview is required. The Panel acknowledges the Franz Josef Heliport, Haast Airfield and Karamea Aerodrome are not included within the definition of '*regionally significant infrastructure',* while Westport and Hokitika are included, and therefore the Panel are satisfied that the term *"critical infrastructure"* should remain in the Overview in this context.

62. In considering the recommended addition of Haast Airfield to the Airport Zone Overview, the Panel notes the Plan definition for '*Airport Activities'* also needs a consequential amendment to include the Haast Airfield. Our recommended consequential amendment to the definition is also included below.

63. The Panel note the provisions do not use consistent terms throughout the provisions. We consider the provisions should use '*airports, airfields, aerodromes and heliports*' to reflect the names of the existing airport zone facilities, where appropriate. We have made these consistency changes to the terms used in the provisions where necessary and to reflect the addition of the Haast Airfield.

Hearing Panel's Recommendation

64. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below

are accepted or accepted in part, and recommend that the following changes to the **Airport Zone** Overview:

AIRPZ Airport Zone – Te Takiwā Taunga Rererangi

Overview

The Hokitika and Westport Airports, Greymouth and Karamea Aerodromes**,** ~~and~~ Franz Josef Heliport **and Haast Airfield**[6] are major strategic infrastructure assets and facilities for the West Coast/Te Tai o Poutini. Hokitika and Westport Airports are key entry points along with Greymouth and Karamea Aerodromes**, and** Franz Josef Heliport **and Haast Airfield**[7] play a significant role in facilitating access, trade, tourism and economic activity locally, regionally and nationally.

These facilities contain critical infrastructure assets such as runways, aprons, aircraft hangers and carparking areas. They contain operations including Air Ambulance services, refuelling services and navigational aids. They also have areas of land and buildings to serve commercial tenants. All of these facilities are included within the AIRPZ - Airport Zone. The purpose of the zone is to enable the efficient operation and development of the airports and associated land and facilities.

Other relevant Te Tai o Poutini Plan provisions

There are two key overlays which affect the Airport Zones - the Airport Approach Path Overlay which applies to the flight paths into the airports and the runways themselves, and the Airport Noise Contour Overlay.

These overlays can be viewed on the planning maps.

Rules in relation to the Airport Approach Path Overlay as it relates to areas outside of the AIRPZ - Airport Zone can be found in the Zone Chapters.

The Rules in relation to the Airport Noise Contour Overlays can be found in the NOISE Chapter at Rule NOISE - R~~10~~**7**.

It is important to note that in addition to the provisions in this Chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for Airport Zone activities, including:

- **Sites and Areas of Significance to Māori Chapter - there may be sites and areas of significance to Māori, identified at individual sites within the Airport Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori Chapter.**
- **Natural Hazards - natural hazards are widespread on the West Coast and in some locations natural hazard overlays may affect areas in the Airport Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards Chapter.**
- **Natural Character and Margins of Waterbodies - in some locations areas of Airport Zone may extend into the riparian margins of waterbodies. The Natural Character and Margins of Waterbodies Chapter contains provisions on how these areas must be managed.**
- **Coastal Environment - in some locations areas of Airport Zone may be within the Coastal Environment. The Coastal Environment Chapter contains provisions on how these areas must be managed.**

[6] Consequential amendment Laurence McGuire S458.001
[7] Consequential amendment Laurence McGuire S458.001

- **Ecosystems and Indigenous Biodiversity – the Ecosystems and Indigenous Biodiversity Chapter contains the provisions around the management of indigenous vegetation, including within the Airport Zone.** [8]

65. For the reasons outlined above, we recommended consequential amendment to the **definition of** '**Airport Activities**' as follows:

AIRPORT ACTIVITIES

means the use of land and/or buildings where the principal activities relate to the function and operation of the Karamea or Greymouth Aerodrome, Westport or Hokitika Airport**, Haast Airfield**[9] or Franz Josef Heliport. These include, but are not limited to:

a. Aircraft operations, including landing, taxiing and take off;

b. Airport operations, including freight, luggage and passenger facilities;

c. Airport navigational, control and safety equipment;

d. Aviation, educational and training and recreational facilities and activities;

e. Maintenance and servicing of aircraft;

f. Fuel installations and fuel servicing facilities;

g. Warehousing and storage;

h. Catering and preparation of food;

i. Access roads, car parking, walkways and cycleways;

j. Emergency services.

They may include ancillary activities such as the sale of food and beverages which are ancillary to the principal activity.

AIRPZ - Airport Zone Objectives

Submissions and Further Submissions

66. Ten submission points and one further submission point relating to the Airport Zone Objectives (as a whole) were summarised in a Table on page 14 of the s42A Report. Nine submission points sought to retain the four objectives as notified and one sought a new objective.

Section 42A Report

67. Ms Easton acknowledged the support from the submitters for the objectives as notified. She did not support GDC (S608.122) request to insert an additional objective to support the use of Greymouth's Aerodrome as an outdoor entertainment facility; and recommended rejecting this submission and the supporting further submission by PE Property Trust (FS88.2). She considered a separate objective was not necessary to provide for the use of the aerodrome for temporary activities because this was captured by the outcomes anticipated in Objective AIRPZ-O1.

[8] Royal Forest Bird Protection Society Incorporated S560.391 and S560.0541
[9] Consequential amendment Laurence McGuire S458.001

Hearing and Submitter Evidence/Statements

68. No evidence was presented at the hearing in relation to the submission points on the Airport Zone objectives.

Reporting Officer Reply Evidence

69. No specific points were made in the Reply Evidence regarding the Airport Zone objectives.

Hearing Panel's Evaluation

70. The Panel accepts the reasoning set out in the s42A Report and agrees with Ms Easton's recommendation that no changes are required to the notified Airport Objectives, apart from a consequential change to AIRPZ-02 arising from Ms Easton's recommendation to accept the submission from Laurence McGuire (S458.001) to include Haast Airfield within the Airport Zone Chapter provisions. We discuss this submission in detail in relation to the Airport Zone rules below. Amendments are also made to ensure consistent reference to the full range of airports, airfields, aerodromes and heliports included in the zone.

71. The Panel have considered whether "*critical infrastructure*" needs to be changed to "*regionally significant infrastructure*" in the objective AIRPZ-O1, but the Greymouth Aerodrome is not included in the definition of "*regionally significant infrastructure*" so our recommendation is to not make consequential changes in this context. We were not given evidence in support of including Greymouth Aerodrome in the definition of "*regionally significant infrastructure*". The notified definition of "*critical infrastructure*" only included "*airports*" (e.g. Westport and Hokitika) as opposed to "*airfields, aerodromes and heliports*".

Hearing Panel's Recommendation

72. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommend the following amendments are made to the **Airport Objectives:**

AIRPZ - O1
To support the continued operation, maintenance and upgrading of the Hokitika and Westport Airports, Greymouth Aerodrome as critical infrastructure and recognising the contribution they make to the economic and social wellbeing and health of communities of the West Coast/Te Tai o Poutini.
AIRPZ - O2
To ensure that Franz Josef (Glacier Country) Heliport, ~~**and**~~ Karamea Aerodrome **and Haast Airfield**[10] continue to operate as significant tourism and industry infrastructure.
AIRPZ - O3

[10] Laurence McGuire S458.001

To manage the potential reverse sensitivity effects on the airports**, airfields, aerodromes**[11] and heliports in the AIRPZ - Airport Zone by providing noise contours and requirements for mitigation of these effects during subdivision and development.
AIRPZ - O4
To ensure that the airport**s, airfields, aerodromes and heliports** and related activities within the AIRPZ - Airport Zone maintain an acceptable level of noise amenity that recognises the**ir** inherent function, alongside the need for general amenity, for those using the **airports, airfields, aerodromes and heliports**[12] and living adjacent to them.

AIRPZ - Airport Zone Policies

Submissions and Further Submissions

73. Twenty-two submission points and one further submission point relating to the Airport Zone Policies (as a whole) were summarised in a Table on pages 15-17 of the s42A Report.

74. One submission point sought a new policy to support the temporary use of the Greymouth Aerodrome as an outdoor entertainment facility.

75. Two submission points were made by the same submitters in support of policies **AIRPZ-P1**, **AIRPZ-P2**, **AIRPZ-P3** and **AIRPZ-P4**. The submission points sought to retain the policies as notified.

76. One submission point was made in relation to Policy **AIRPZ-P5**, which sought to retain the policy as notified. A further submission point was made in support of this.

77. One submission point was made in relation to Policy **AIRPZ-P6**, which sought to retain the policy as notified.

78. Two submission points relating to Policy **AIRPZ-P7** were summarised in a Table on page 16 of the s42A Report. One submission point supported the retention of the policy as notified and one sought amendment.

79. Two submission points were made in support of each of the policies **AIRPZ-P8**, **AIRPZ-P9**, and **AIRPZ-P10** and sought to retain the policies as notified.

80. Three submission points relating to Policy **AIRPZ-P11** were summarised in a Table on pages 16-17 of the s42A Report. Two submission points supported the retention of the policy as notified, and one sought amendment.

81. The Panel has considered all the relevant submissions and adopts the summaries in the s42A Report.

Section 42A Report

[11] RMA First Schedule Clause 16(2)
[12] RMA First Schedule Clause 16(2)

82. Ms Easton acknowledged the support from the submitters who supported the majority of the policies as notified. However, she acknowledged her recommended amendments in response to other submissions on policies **AIRPZ–P7** and **AIRPZ-P11**.

83. Ms Easton supported GDC's (S608.123) request for an additional policy to provide for the temporary use of Greymouth's aerodrome as an outdoor entertainment facility and recommended the following wording:

> ***AIRPZ–P12***
>
> *To allow the use of the Greymouth Aerodrome as an outdoor events and entertainment, where this will not compromise its primary use as an aerodrome.*

84. Ms Easton supported the request of Poutini Ngāi Tahu (S620.251) to split clause (c) of Policy **AIRPZ-P7** into two clauses to improve clarity.

85. Ms Easton recommended that **AIRPZ-P7** be amended as follows:

> ***AIRPZ-P7***
>
> *To allow for the future expansion of the Hokitika and Westport Airports aviation activities including a lengthened runway, aircraft hangers and expanded terminal whilst:*
>
> *a. Minimising effects on amenity values and traffic effects on the land transport network;*
>
> *b. Ensuring noise and light emissions remain at an acceptable level, particularly in relation to sensitive activities; ~~and~~*
>
> *c. Recognising natural features and landforms, waterbodies, coastal environment, indigenous vegetation, historic heritage, sites and areas of significance to Poutini Ngāi Tahu, archaeological sites or scheduled features~~,~~; **and***
>
> ***d.** ~~including by~~ using best practice industry requirements and technology to ensure efficient use of land and to reduce effects.*

86. Ms Easton supported the Poutini Ngāi Tahu request (S620.410) to add '*artificial*' before '*open water*' in Policy **AIRPZ-P11** to avoid restricting the restoration of natural water bodies. She considered it was important to recognise the requirements of other national directions such as the NPSFM and NPSIB, which seek to restore water quality and biodiversity values where they are degraded. She noted that, provided safety was not affected, restoration of natural waterbodies around airports should be encouraged.

87. Ms Easton recommended that Policy AIRPZ-P11 be amended as follows:

> ***AIRPZ-P11***
>
> *To minimise the development or location of large **artificial** areas of open water, or other land disturbance which could act as a significant bird attractant near to the airports and heliports in the AIRPZ - Airport Zone.*

Hearing and Submitter Evidence/Statements

88. No evidence was presented at the hearing in relation to the submission points.

89. The Poutini Ngāi Tahu hearing statement included commentary supporting several of the policies.

Reporting Officer Reply Evidence

90. No specific points were made in the Reply Evidence regarding the Airport Zone policies.

Hearing Panel's Evaluation

91. The Panel accepts Ms Easton's recommendation to amend policies AIRPZ-P7 and AIRPZ-P11; add a new policy to allow the use of the Greymouth Aerodrome for outdoor events and entertainment where this will not compromise its primary use as an aerodrome; and to retain all other AIRPZ Policies as notified. However, we consider '*airports*' should be replaced with '*AIRPZ – Airport Zone*' in AIRPZ-P6(d) to improve clarity. We have also corrected the recommended wording in new Policy AIRPZ-12 from '*as an outdoor events and entertainment'* to '*for outdoor events and entertainment',* and consequential amendments to use the full range of terms describing areas in the zone, to reflect changes at the objective level.

Hearing Panel's Recommendation

92. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommend the following changes are made to the **Airport Zone policies**:

AIRPZ – P1

Enable the efficient operation, use and development of the West Coast/Te Tai o Poutini public airports, **airfields, aerodromes**[13] and heliports by providing for aviation activities and associated infrastructure necessary for them to operate in a safe and efficient manner.

AIRPZ – P2

Ensure that aircraft takeoff and landing, and safe airport**, airfield, aerodrome**[14] and heliport function is not affected by the intrusion of vegetation and into approach paths within the Airport Approach Path Overlay.

AIRPZ – P3

Manage adverse effects on amenity values arising from the on-going development, use and maintenance of the airports**, airfields, aerodromes** and helip~~ads~~**orts**[15] in the AIRPZ - Airport Zone.

AIRPZ – P4

Ensure that the noise associated with the operation of the airports**, airfields, aerodromes**[16] and heliports within the AIRPZ - Airport Zone does not exceed nationally accepted standards, and that any new noise sensitive activities provide adequate acoustic management.

AIRPZ – P5

[13] RMA First Schedule Clause 16(2)
[14] RMA First Schedule Clause 16(2)
[15] RMA First Schedule Clause 16(2)
[16] RMA First Schedule Clause 16(2)

Avoid the location of noise sensitive activities close to the airports**, airfields, aerodromes**[17] and heliports in the AIRPZ - Airport Zone that have the potential to result in reverse sensitivity effects.

AIRPZ – P6

To provide for development on AIRPZ - Airport Zone land that allows for a range of commercial and industrial activity, where such activities would not:

a. Constrain airport/aviation operations;
b. Result in significant adverse effects on urban form, including on the role, function, viability and amenity of the Town Centres and Settlements;
c. Lead to significant adverse effects on transportation networks; or
d. Adversely affect the visual amenity of the residential and rural areas adjacent to the ~~airports~~**AIRPZ – Airport Zone**.[18]

AIRPZ – P7

To allow for the future expansion of the Hokitika and Westport Airports aviation activities including a lengthened runway, aircraft hangers and expanded terminal whilst:

a. Minimising effects on amenity values and traffic effects on the land transport network;

b. Ensuring noise and light emissions remain at an acceptable level, particularly in relation to sensitive activities; ~~**and**~~

c. Recognising natural features and landforms, waterbodies, coastal environment, indigenous vegetation, historic heritage, sites and areas of significance to Poutini Ngāi Tahu, archaeological sites or scheduled features~~**.**~~**; and**

d. ~~**including by**~~[19] **U**~~u~~sing best practice industry requirements and technology to ensure efficient use of land and to reduce effects.

AIRPZ – P8

To provide for future additions of airports**, airfields, aerodromes**[20] and heliports to the AIRPZ - Airport Zone where these are significant public infrastructure or public benefit and are operated by a network utility operator.

AIRPZ – P9

To encourage the incorporation of Poutini Ngāi Tahu mātauranga principles into the design of buildings in the AIRPZ - Airport Zone and opportunities for Poutini Ngāi Tahu to exercise their customary responsibilities as mana whenua and kaitiaki in respect of activities and/or development at the airports**, airfields, aerodromes**[21] and heliports that may affect cultural, spiritual and/or heritage values of importance to Poutini Ngāi Tahu.

AIRPZ – P10

To manage the risks of natural hazards to the airports**, airfields, aerodromes** and helip~~ads~~**orts**[22] within the AIRPZ - Airport Zone including:

a. Providing for maintenance and development activities that increase West Coast/Te Tai o Poutini public airports**, airfields, aerodromes** and heliports' resilience to natural hazards; and

[17] RMA First Schedule Clause 16(2)
[18] RMA First Schedule Clause 16(2)
[19] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.251
[20] RMA First Schedule Clause 16(2)
[21] RMA First Schedule Clause 16(2)
[22] RMA First Schedule Clause 16(2)

b. Planning for managed retreat from existing hazards at Westport Airport including potential relocation in the future.

AIRPZ – P11

To minimise the development or location of large **artificial**[23] areas of open water, or other land disturbance which could act as a significant bird attractant near to the airports**, airfields, aerodromes** and heliports in the AIRPZ - Airport Zone.

AIRPZ – P12

To allow the use of the Greymouth Aerodrome for outdoor events and entertainment, where this will not compromise its primary use as an aerodrome.[24]

AIRPZ - Airport Zones Rules

Submissions and Further Submissions

93. One submission point relating to the Airport Zone Rules (as a whole) was received that sought a new permitted activity rule.

94. Three submission points supporting Rule **AIRPZ-R1** as notified were received.

95. Three submission points and one further submission point relating to Rule **AIRPZ-R2** were summarised in a Table on pages 18-19 of the S42A Report. One submission point supported the retention of the rule as notified. Two submission points sought amendments.

96. Two submission points supporting Rule **AIRPZ-R3** as notified were received.

97. Two submission points supporting Rule **AIRPZ-R4** as notified were received.

98. One submission point supporting Rule **AIRPZ-R5** as notified was received.

99. Three submission points relating to Rule **AIRPZ—R6** were summarised in a Table on page 19 of the s42A Report. Two submission points supported the retention of the rule as notified and the remaining submission point sought amendments.

100. Three submission points relating to Rule **AIRPZ—R7** were summarised in a Table on page 20 of the s42A Report. Two submission points supported the retention of the rule as notified and the remaining submission point sought amendments.

101. Three submission points and one further submission point relating to Rule **AIRPZ-R8** were summarised in a Table on page 20 of the s42A Report. One submission point supported the retention of the rule as notified and the remaining submission points sought amendments.

102. Four submission points relating to Rule **AIRPZ-R9** were summarised in a Table on pages 20-21 of the s42A Report. Two submission points supported the retention of the rule as notified and the remaining submission points sought amendments.

[23] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.410
[24] Grey District Council S608.123

103. One submission point supporting the retention of Rule **AIRPZ-R10** as notified was received.

104. One submission point supporting the retention of Rule **AIRPZ-R11** as notified was received.

105. The Panel adopts the s42A Report summaries and has considered the relevant submissions and further submissions.

Section 42A Report

Rules (General)

106. Ms Easton acknowledged the support from submitters for the majority of the rules as notified.

107. Ms Easton supported GDC's (S181.048) request for a new permitted activity rule to provide for the temporary use of Greymouth's Aerodrome as an outdoor entertainment facility. In reaching her position, Ms Easton noted that the large area around Greymouth Aerodrome, and its location between the industrial areas of Greymouth and the sea, made it ideally located as an outdoor events venue.

108. Ms Easton recommended adding a new rule as follows:

> ***AIRPZ – RXXX Outdoor events and entertainment activities at Greymouth Aerodrome***
>
> ***Activity Status Permitted:***
> *Where:*
> *1. No building or structure, including temporary buildings and structures, shall protrude into the Airport Approach Path for Greymouth Aerodrome identified on the planning maps and as described in Appendix Nine.*

AIRPZ-R2: Permitted Activity – Grazing, cropping, moss collection and beekeeping activities

109. Ms Easton supported the submission point made by WDC (S181.048) regarding the allowance for cropping. However, she considered the rule, as notified, already provided for cropping as a permitted activity and therefore no changes to the wording were required.

110. Ms Easton supported in part the request of Poutini Ngāi Tahu (S620.253) for amendment so that new measurements are given from the site boundaries and that a standard recession plan formula or diagram is used for ease of understanding and implementation. However, she noted that there was no additional information available to her to amend these provisions. She also stated that the airports were consulted about this matter during the development of the Plan and could not provide any further information or advice on appropriate height restrictions. On this basis, no amendments to the notified wording were proposed.

AIRPZ-R6, R7, R8, R9 and R10

111. Ms Easton was supportive of GDC's (S608.791 - S608.794) requests for an additional matter of discretion to be added to these rules to include wastewater, water supply, and stormwater management, as well as design compliance with NZS4404:2010, in rules AIRPZ-

R6, AIRPZ-R7, AIRPZ-R8 and AIRPZ-R9. Ms Easton acknowledged the additional Three Waters demands associated with activities and considered it was important that an additional matter of discretion be included to address these when resource consent was required. She recommended that the additional matter of discretion for each rule is as outlined below.

112. Ms Easton was supportive of the submission from Poutini Ngāi Tahu (S620.256) that sought an additional matter of discretion to Rule AIRPZ – R8 – "*incorporating Poutini Ngāi Tahu design principles into buildings"*. She noted that the submission was consistent with the intention and direction provided in Policy AIRPZ–P9 and considered its omission from this rule was a drafting error. She recommended the additional matter of discretion for AIRPZ–R8 as outlined below.

113. Ms Easton was supportive of WDC's (S181.049) request to exclude Hokitika Airport from AIRPZ–R9 and to classify visitor accommodation at that airport as a discretionary activity. Ms Easton considered that the development of visitor accommodation at Hokitika Airport did not fit with the overall planning approach that WDC has taken to the expansion of commercial activities and visitor accommodation in Hokitika. She considered that a discretionary activity status was more appropriate.

114. Laurence McGuire (S458.001) sought the inclusion of Haast Airfield within the Airport Zone. The submission included a range of information about the airfield, its use, and significance to Haast, as well as its importance to the wider South Westland area. This submission was supported by two further submissions by Erin Stagg (FS42.1) and P.E. Property Trust (FS88.1), who sought that the area included in a Haast Airfield Airport Zone incorporated the helicopter operations area on their property.

115. Ms Easton noted that the Haast Airfield had not been included because the land was privately owned. However, she supported the relief sought because she considered the information provided by the submitter and further submitters provided 'a compelling case' for the inclusion of the Haast Airfield within the Airport Zone, and the WDC supported this position. Although the land is privately owned, she acknowledged the airfield had a similar importance to that played by Karamea Aerodrome in the north of the West Coast.

116. Ms Easton also considered that sufficient information was provided by the submitter to identify an Airport Flight Path Overlay for the airfield, which could be included on the Planning Maps. She noted the submitter had provided, as part of their technical planning information ahead of the hearing, a noise report prepared by Marshall Day Acoustics with recommended noise contours for the Haast Airfield. Ms Easton supported and recommended that those noise contours should be included on the Planning Maps.

117. In terms of the application of rules, Ms Easton noted that the noise contours covered most of the property, and she therefore did not consider it was appropriate for Rule AIRPZ-R9 to apply to Haast Airfield. She considered that visitor accommodation activities should be a non-complying activity at that location.

118. In summary, in response to the submission from Laurence McGuire, Ms Easton recommended the following:

    (a) That the Haast Airfield (Lot 4 DP 3407 and Lot 1 DP 2832) be included within the Airport Zone and shown on the Planning Maps as such.

(b) That the Airport Flight Path Overlay for Haast Airfield be included in Appendix Nine and on the Planning Maps.

(c) That the 55 dB Ldn[25] Noise Contour Boundary for Haast Airfield be included on the Planning Maps.

(d) That consequential amendments be made to the Airport Zone Chapter to provide for Haast Airfield within the Airport Zone.

119. The further submission from P.E. Property Trust (FS88.1) sought to include their land within a Haast Airport Zone. It also sought a range of amendments to the zone provisions, including the provision of residential dwellings as a permitted activity. Ms Easton did not support these submission points and considered that residential activity was not an appropriate activity to include in an Airport Zone. She also considered that the further submitter had not provided sufficient information for an aircraft flight path overlay or noise contours concerning the helicopter operations. For these reasons, she did not support the relief sought in the further submission.

120. Ms Easton recommended that Rule AIRPZ-R6 be amended as follows:

> **AIRPZ – R6 Industrial Activities and Buildings at Hokitika or Westport Airport or Greymouth Aerodrome**
> **Activity Status Restricted Discretionary**
> Where:
> 1. All performance standards for Rule AIRPZ – R1 are complied with.
>
> **Matters of discretion are:**
>
> **…**
>
> ***j. Management of wastewater, stormwater and water supply in accordance with relevant requirements of NZS 4044: 2010***

121. Ms Easton recommends that Rule AIRPZ – R7 be amended as follows:

> **AIRPZ – R7 Commercial Activities and Buildings other than Visitor Accommodation at Hokitika or Westport Airport or Greymouth Aerodrome**
> Activity Status Restricted Discretionary
> Where:
> 1. All performance standards for Rule AIRPZ – R1 are complied with.
>
> **Discretion is restricted to:**
> …
>
> ***j. Management of wastewater, stormwater and water supply in accordance with relevant requirements of NZS 4044: 2010***

122. Ms Easton recommended that Rule AIRPZ – R8 be amended as follows:

> **AIRPZ - R8 Airport Activities and Fences, Walls and Retaining Walls not meeting Permitted Activity Standards**
> **Activity Status Restricted Discretionary**
> Where:

[25] Day-Night Average Sound Level

1. No building, structure or tree shall protrude into the Airport Approach Path of any airport or aerodrome identified on the planning maps and as described in Appendix Nine.

Discretion is restricted to:

…

h. Management of wastewater, stormwater and water supply in accordance with relevant requirements of NZS 4044: 2010; and

i. Incorporating Poutini Ngāi Tahu design principles into buildings.

123. Ms Easton recommended that Rule AIRPZ – R9 be amended as follows:

AIRPZ - R9 Visitor Accommodation at ~~Hokitika and~~ Westport Airport or Greymouth or Karamea Aerodrome
Activity Status Restricted Discretionary
Where:
1. No building, structure or tree shall protrude into the Airport Approach Path of any airport or aerodrome identified on the planning maps and as described in Appendix Nine; and
2. Visitor accommodation buildings shall meet the standards specified in Rule NOISE R3.

Discretion is restricted to:

…

i. ***Management of wastewater, stormwater and water supply in accordance with the relevant requirements of NZS 4044: 2010***

Advice Note: Visitor Accommodation Activities at Hokitika Airport are regulated under Rule AIRPZ – R10

124. Ms Easton recommended that Rule AIRPZ – R10 be amended as follows:

AIRPZ - R10 Industrial and Commercial Activities and Buildings not meeting Restricted Discretionary Activity Standards
Activity Status Discretionary
Where:
1. This does not include Visitor Accommodation ***except where this is located at Hokitika Airport;*** and…

Hearing and Submitter Evidence/Statements

125. Mr Laurence McGuire and Mr Tom Overton spoke at the hearing in relation to the Haast Airfield. Mr McGuire explained to the Panel that the Haast airfield accommodates pilots and passengers when they are caught by adverse weather events, as a matter of safety. He noted the risk of local accommodation providers being fully booked at these times. Mr McGuire sought for visitor accommodation to be restricted discretionary under AIRPZ-R9, rather than non-complying as in the notified Plan, which he considered should be a consequence of including Haast airfield in the AIRPZ as requested in submission.

126. The Poutini Ngāi Tahu hearing statement included commentary supporting several rules.

127. The Aircraft Owners and Pilots Association NZ submitted a letter (dated 10 May 2024) supporting the submission to include Haast Airfield in the Airport Zone.

Reporting Officer Reply Evidence

128. No specific points were made in the Reply Evidence regarding the recommended changes to Airport Zone rules discussed above. It is noted that the matter of visitor accommodation at Haast Airfield is considered below.

129. In relation to Rule AIRPZ – R9, Ms Easton responded to questions from the Panel as to her view on the appropriateness of the Visitor Accommodation rule at Haast Airfield. She altered her view from her s42A Report and considered that there was scope in the submission to make the change sought by the submitter, namely that the airfield be included in the Airport Zone. She recommended amendments to Rule AIRPZ-R9, as follows:

> **AIRPZ - R9 Visitor Accommodation at ~~Hokitika and~~[26] Haast Airfield[27], Westport Airport or Greymouth or Karamea Aerodrome**
>
> **Activity Status Restricted Discretionary**

Hearing Panel's Evaluation

130. The Panel accepts Ms Easton's recommended additions to rules AIRPZ-R6, R7, R8, R9, and R10 to include an additional matter of discretion relating to wastewater, water supply, and stormwater management, as well as design compliance with NZS 4404:2010, enabling assessment of those matters at the resource consent stage.

131. The Panel also agree with Ms Easton's recommendation to include as a new matter of discretion to AIRPZ-R8 incorporating Poutini Ngāi Tahu design principles into buildings. We agree this addition links well with Policy AIRPZ-P9 and note that points of arrival and departure for air travellers are suitable locations and opportunities for such design principles to be utilised.

132. The Panel agrees with Ms Easton's recommendation to exclude Hokitika Airport from AIRPZ–R9 and to classify visitor accommodation at that airport as a discretionary activity. We agree that the development of visitor accommodation at Hokitika Airport does not align with the overall planning approach taken by WDC regarding the expansion of commercial activities and visitor accommodation in Hokitika.

133. The Panel agrees that a new permitted activity rule (AIRPZ-R6) should be added to the zone to provide for the temporary use of the Greymouth Aerodrome as an outdoor entertainment facility. We agree its size and location make it suitable for temporary outdoor events and entertainment. This new rule provides a method to give effect to the new policy related to the new and additional use of the Greymouth Aerodrome. We note that rule as drafted was missing an activity status where not complied with and we consider in such circumstances that status should be non-complying given it is about aircraft safety.

134. The Panel agrees with Ms Easton's reasoning and recommendation that Haast Airfield (Lot 4 DP 3407 and Lot 1 DP 2832) be included within the Airport Zone and shown on the Planning Maps accordingly. We agree that the submission by Laurence McGuire (S458.001) includes information that provides a compelling case for inclusion of the Haast Airfield

[26] Westland District Council S181.049
[27] Laurence McGuiire S458.001

within the Airport Zone. We agree that the Haast Airfield is of similar importance to the Karamea Aerodrome in the north of the West Coast.

135. The Panel also agree with Ms Easton's assessment regarding visitor accommodation and recommend this is provided for as a discretionary activity. We consider Haast Airfield should be treated the same as other airports and aerodromes named in the rule.

136. The Panel recommends other minor changes to wording for consistency (as discussion in relation to the whole zone above) and consequential renumbering to accommodate the recommended new permitted activity rule.

Hearing Panel's Recommendation

137. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommend the following changes are made to the **Airport Zone Rules**:

Airport Zone Rules	
Permitted Activities	
AIRPZ– R1	**Airport Activities**
Activity Status Permitted Where: 1. The maximum gross ground floor area of a single building is 2000m^2; 2. No building, structure or tree shall protrude into the Airport Approach Path of any airport**,** **airfield**[28] or aerodrome identified on the planning maps and as described in Appendix Nine; and 3. Buildings are setback a minimum of 10m from the road boundary, 20m from the State Highway Boundary, and 10m from internal boundaries. **Activity status where compliance not achieved: Restricted Discretionary**	
AIRPZ– R2	**Grazing, cropping, moss collection and beekeeping Activities**
Activity Status Permitted Where: 1. No building, structure or tree shall protrude into the Airport Approach Path of any airport**,** **airfield**[29] or aerodrome identified on the planning maps and as described in Appendix Nine. **Activity status where compliance not achieved:** Non-complying	
AIRPZ– R3	**Emergency Service Facilities**
Activity Status Permitted Where:	

[28] Consequential amendment Laurence McGuire S458.001
[29] Consequential amendment Laurence McGuire S458.001

1. No building, structure or tree shall protrude into the Airport Approach Path of any airport**, airfield**[30] or aerodrome identified on the planning maps and as described in Appendix Nine; and
2. Buildings are setback a minimum of 3m from the road boundary and 5m from the State Highway Boundary.

Activity status where compliance not achieved: Non-complying

AIRPZ– R4	Network Utility and Meteorological Structures

Activity Status Permitted

Where:

1. No building, structure or tree shall protrude into the Airport Approach Path of any airport**, airfield**[31] or aerodrome identified on the planning maps and as described in Appendix Nine.

Activity status where compliance not achieved: Non-complying

AIRPZ– R5	Fences Walls and Retaining Walls

Activity Status Permitted

Where:

1. No fence shall protrude into the Airport Approach Path of any airport**, airfield**[32] or aerodrome identified on the planning maps and as described in Appendix Nine;
2. Fences, walls and retaining walls are a maximum 2m height above ground level; and
3. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall or wall.

Activity status where compliance not achieved: Restricted Discretionary

AIRPZ– R6	**Outdoor events and entertainment activities at Greymouth Aerodrome**[33]

Activity Status Permitted

Where:

1. **No building or structure, including temporary buildings and structures, shall protrude into the Airport Approach Path for Greymouth Aerodrome identified on the planning maps and as described in Appendix Nine.**

Activity status where compliance not achieved: Non-complying

Restricted Discretionary Activities

AIRPZ– R~~6~~7	Industrial Activities and Buildings at Hokitika or Westport Airport or Greymouth Aerodrome

Activity Status Restricted Discretionary

Where:

[30] Consequential amendment Laurence McGuire S458.001
[31] Consequential amendment Laurence McGuire S458.001
[32] Consequential amendment Laurence McGuire S458.001
[33] Grey District Council S608.124

1. All performance standards for Rule AIRPZ - R1 are complied with.

Discretion is restricted to:

~~Matters of discretion are:~~ [34]

a. Bulk, design and location of buildings;
b. Incorporating Poutini Ngāi Tahu design principles into buildings;
c. Management of access, traffic and parking;
d. Management of odour and dust;
e. ~~Landscape measures~~**Measures to mitigate landscape effects;** [35]
f. Any impacts on the amenity or production value of surrounding rural land;
g. Effects on visual amenity;
h. Any impacts on the amenity of adjacent residential land; and
i. Any impacts on the efficiency or function of the main Airport Activity in the Zone; and
j. Management of wastewater, stormwater and water supply in accordance with relevant requirements of NZS 4044: 2010. [36]

Activity status where compliance not achieved: Discretionary

AIRPZ– R~~7~~8	**Commercial Activities and Buildings other than Visitor Accommodation at Hokitika and Westport Airports and Greymouth Aerodrome**

Activity Status Restricted Discretionary

Where:

1. All performance standards for Rule AIRPZ - R1 are complied with.

Discretion is restricted to:

a. Bulk, design and location of buildings;
b. Management of access, traffic and parking;
c. ~~Landscape measures~~**Measures to mitigate landscape effects;** [37]
d. Incorporating Poutini Ngāi Tahu design principles into buildings;
e. Any impacts on the amenity or production value of surrounding rural land;
f. Effects on visual amenity;
g. Any impacts on the amenity of adjacent residential land; ~~and~~
h. Any impacts of retail activities on the viability of the Hokitika, Westport or Greymouth town centres; ~~and~~
i. Any impacts on the efficiency or function of the main Airport Activity in the Zone; ~~and~~
j. Management of wastewater, stormwater and water supply in accordance with relevant requirements of NZS 4044: 2010. [38]

AIRPZ– R~~8~~9	**Airport Activities and Fences, Walls and Retaining Walls not meeting Permitted Activity Standards**

Activity Status Restricted Discretionary

Where:

[34] RMA First Schedule Clause 16(2)
[35] Consequential Plan-wide amendment Manawa Energy Limited S438.100
[36] Grey District Council S608.791
[37] Consequential Plan-wide amendment Manawa Energy Limited S438.100
[38] Grey District Council S608.792

1. No building, structure or tree shall protrude into the Airport Approach Path of any airport, **airfield** or aerodrome identified on the planning maps and as described in Appendix Nine.

Discretion is restricted to:

a. Bulk, design and location of buildings;
b. Management of access, traffic and parking;
c. ~~Landscape measures~~**Measures to mitigate landscape effects;**[39]
d. Any impacts on the amenity or production value of surrounding rural land;
e. Effects on visual amenity;
f. Any impacts on the amenity of adjacent residential land; and
g. Any impacts on the efficiency or function of the main Airport Activity in the Zone;
h. Management of wastewater, stormwater and water supply in accordance with relevant requirements of NZS 4044: 2010; and[40]
i. Incorporating Poutini Ngāi Tahu design principles into buildings.[41]

AIRPZ– R~~9~~10 Visitor Accommodation at ~~Hokitika and~~[42] Haast Airfield,[43] Westport Airport or Greymouth or Karamea Aerodrome

Activity Status Restricted Discretionary

Where:

1. No building, structure or tree shall protrude into the Airport Approach Path of any airport**,** **airfield**[44] or aerodrome identified on the planning maps and as described in Appendix Nine; and
2. Visitor accommodation buildings shall meet the standards specified in Rule NOISE - R3.

Discretion is restricted to:

a. Bulk, design and location of buildings;
b. Management of access, traffic and parking;
c. ~~Landscape measures~~**Measures to mitigate landscape effects;**[45]
d. Incorporating Poutini Ngāi Tahu design principles into buildings;
e. Any impacts on the amenity or production value of surrounding rural land;
f. Effects on visual amenity;
g. Any impacts on the amenity of adjacent residential land; ~~and~~
h. Any impacts on the efficiency or function of the main Airport Activity in the Zone; and
i. **Management of wastewater, stormwater and water supply in accordance with the relevant requirements of NZS 4044: 2010.**[46]

Activity status where compliance not achieved: Non-complying

Advice Note: Visitor Accommodation Activities at Hokitika Airport are regulated under Rule AIRPZ – R12.[47]

[39] Consequential Plan-wide amendment Manawa Energy Limited S438.100
[40] Grey District Council S608.793
[41] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.256
[42] Westland District Council S181.049
[43] Laurence McGuiire S458.001
[44] Consequential amendment Laurence McGuire S458.001
[45] Consequential Plan-wide amendment Manawa Energy Limited S438.100
[46] Grey District Council S608.794
[47] Consequential amendment Westland District Council S181.049

Discretionary Activities

AIRPZ– R1~~0~~1	**Industrial and Commercial Activities and Buildings not meeting Restricted Discretionary Activity Standards**

Activity Status Discretionary

Where:

1. This does not include Visitor Accommodation **except where this is located at Hokitika Airport**[48]; and
2. No building, structure or tree shall protrude into the Airport Approach Path of any airport**, airfield**[49] or aerodrome identified on the planning maps and as described in Appendix Nine.

Activity status where compliance not achieved: Non-complying

Non-complying Activities

AIRPZ– R1~~1~~2	**Any activity not provided for by another Rule in the zone**

Activity Status Non-complying

Activity status where compliance not achieved: N/A

AIRPZ– R12	**Outdoor events and entertainment activities at Greymouth Aerodrome not meeting the Permitted Activity Standard**

Activity Status Non-complying

Activity status where compliance not achieved: N/A

AIRPZ - Airport Zone Appendix Nine: Airport Approach Path Overlay

Submissions and Further Submissions

138. Thirteen submission points relating to Appendix Nine were summarised in a Table on pages 24-25 of the s42A Report. Nine submission points sought various amendments, three submissions were in opposition, one opposed in part, and one submission was neutral. The Panel adopts these summaries and has considered the submission but note that the submissions recorded in opposition sought amendments.

Section 42A Report

Standards (General)

139. Ms Easton supported the nine submission points[50] that requested the Airport Flight Path Overlay for Westport Airport be amended to reflect the overlay as currently set out in the Buller District Plan. She considered this would correct an error in the Plan resulting from the incorrect shape file being supplied to the TTPP GIS team.

[48] Westland District Council S181.049
[49] Consequential amendment Laurence McGuire S458.001
[50] William McLaughlin (S567.550, S567.740), Chris & Jan Coll (S558.506, S558.715), Chris J Coll Surveying Limited (S566.506, S566.715), Laura Coll McLaughlin (S574.506, S574.715) and Buller District Council (S538.581)

140. In response to the three submissions[51] that sought to remove or increase the height of the Westport and Karamea Airport flight paths, Ms Easton did not support the relief sought. She noted that with the correct Flight Path Overlay for Westport Airport, the height restrictions would be the same as those in the operative Buller District Plan and were necessary to support the safety of airport use. In the case of the Karamea Airport, she noted the Flight Path Overlay only affected the runway area, which she considered was appropriate to protect aircraft safety.

141. For the reasons outlined in the preceding paragraph, Ms Easton supported in part the submission[52] that sought that alterations be made to the airport approach path for Westport to allow for more permitted activities and fewer restrictions.

Hearing and Submitter Evidence/Statements

142. No evidence was presented at the hearing in relation to the submission points

Reporting Officer Reply Evidence

143. Mr McGuire and Mr Ibbotson provided evidence at the hearing that described the north south orientation of the runway, corresponding with the flight path for the Haast airfield. Comparisons were made with Karamea Aerodrome.

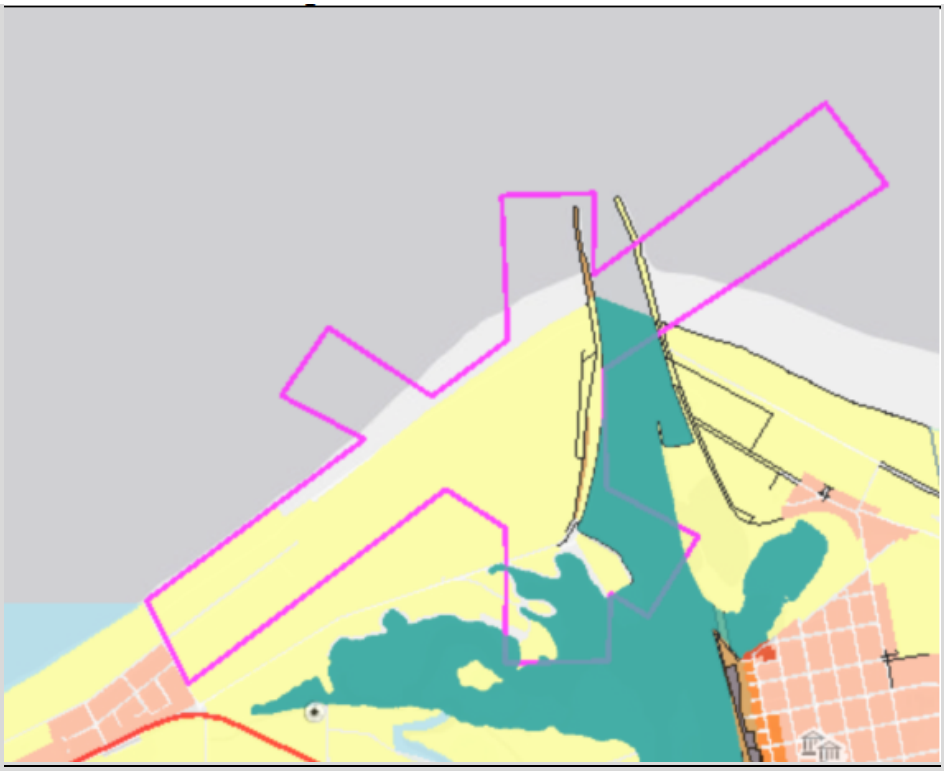
Hearing Panel's Evaluation

144. The Panel accept Ms Easton's reasons and recommendation that the Airport Flight Path Overlay for Westport Airport is amended to reflect the overlay as currently set out in the Buller District Plan.

145. The Panel accepts Ms Easton's reasons and recommendation to not remove or increase the height of the Westport and Karamea Airport flight paths and to retain those provisions as notified.

146. The Panel recommends amendments to Appendix Nine to include the Haast Airfield, with the same requirements as for Karamea Aerodrome based on the submission and evidence of Mr McGuire and Mr Ibbotson.

Hearing Panel's Recommendation



147. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points[53] are accepted or accepted in part, and recommend the following changes to the **Appendix Nine** and **Airport Approach Path Overlay for Westport Airport shown in the Planning Maps** so that it is the same as that found in the Operative Buller District Plan, as shown below:

Airport Zone – Appendix Nine: Airport Approach Path Overlay
Westport Airport**, Haast Airfield** and Karamea Aerodrome

[51] Kelsey Mundy (S41.001), Lyndal Watson (S42.001) and Neil Hateley (S139.001)
[52] Gail Dickson (S407.007)
[53] William McLaughlin S567.550, S567.740, Chris & Jan Coll S558.506, S558.715, Chris J Coll Surveying Limited S566.506, S566.715, Laura Coll McLaughlin S574.506, S574.715 and Buller District Council S538.581

Height Restrictions – 1.2m height for any building, structure or tree that extends into the Westport Airport**, Haast Airfield,** or Karamea Aerodrome Flight Path as shown on the planning maps.

Amendment to the Planning Maps – Westport Flight Path Overlay

Amendment to the Planning Maps – Haast Airfield Flight Path Overlay

- **Include Airport Flight Path Overlay for Haast Airfield into the Planning Maps**

Zoning Maps

Submissions and Further Submissions

148. One submission point and two further submission points were summarised in a Table on page 26 of the s42A Report. The Panel has considered the relevant submissions and further submissions and adopts the summaries in the s42A Report.

Section 42A Report

149. As noted above, a submission was received by Laurence McGuire (S458.001), which sought that Haast Airfield be included within the Airport Zone. The submission included a range of information about the airfield, its use, and significance to Haast, as well as its importance to the wider South Westland area. This submission was supported by two further submissions by Erin Stagg (FS 42.1) and P.E. Property Trust (FS 88.1), who sought that the area included in a Haast Airfield Airport Zone include the helicopter operations area on their property.

Hearing and Submitter Evidence/Statements

150. Mr McGuire relied on the evidence of Mr Ibbotson and the Marshall Day report in support of zoning the Haast Airfield within the AIRPZ, based on comparisons with Karamea Aerodrome, which was included in the zone at the time of notification of the Plan. Evidence from Mr Ibbotson included reference to acoustic modelling and 55dB noise contour, as well as predictions regarding future use of the airfield. As noted above, the Aircraft Owners and Pilots Association NZ submitted a letter in support of the submission to include Haast Airfield in the Airport Zone.

Reporting Officer Reply Evidence

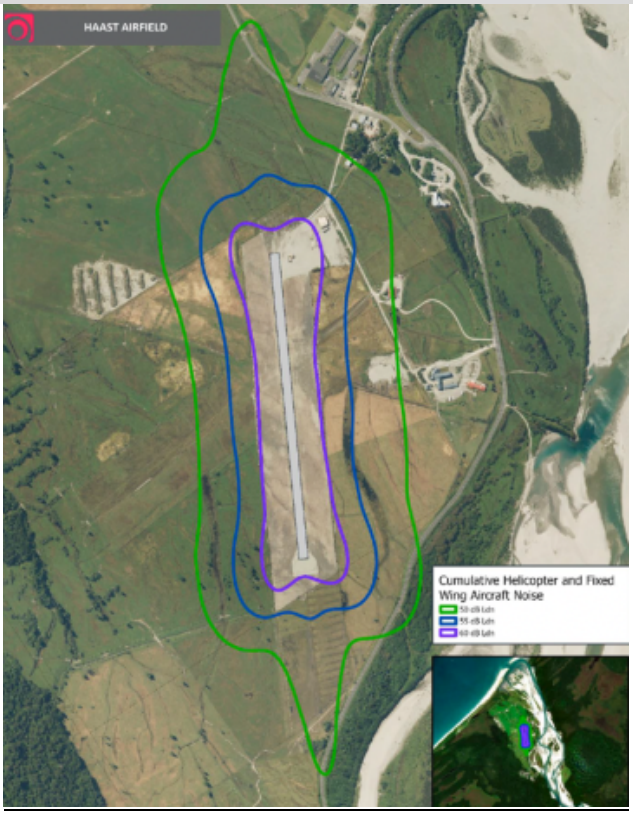
151. In response to Panel questions regarding the potential for development within the proposed 55dBA noise contour at Haast Airfield, Ms Easton provided a map showing the location of the P.E. Property Trust sites in her Right of Reply. She noted that the 55dBA noise contour was tightly focused on the airfield and was almost entirely over land zoned General Rural Zone, except for a small area where it crossed airfield land into an area zoned Settlement Zone. Given the minimal area of land affected within the Settlement Zone, she considered it was probable that development could occur on the P.E. Property Trust sites, without locating any dwellings within the 55dBA noise contour.

152. In response to Panel questions regarding the extent of property affected at Karamea Aerodrome, Ms Easton provided maps showing the extent of the noise contour and the location of dwellings within the noise contour in her Right of Reply. She noted that existing dwellings had the benefit of existing use rights and therefore no modification as a result of the noise contour would be required. She also stated that new dwellings built within the noise contours would require mechanical ventilation to be installed. She noted acoustic experts had advised that modern building codes and insulation requirements imply that no additional requirements would be necessary when windows were closed but that mechanical ventilation may be required where the acoustic requirements cannot be met when windows are open.

Hearing Panel's Evaluation

153. As noted above, the Panel agrees with Ms Easton's reasoning and recommendation that Haast Airfield (Lot 4 DP 3407 and Lot 1 DP 2832) be included within the Airport Zone and shown on the Planning Maps accordingly.

154. The Panel agrees with Ms Easton that the submitter has provided sufficient evidence, including the noise report prepared by Marshall Day Acoustics, to recommend the inclusion of noise contours for the Haast Airfield. We accept Ms Easton's view that the 55dBA noise contour is tightly focused on the airfield and does not restrict existing development potential given the contour is mainly over land zoned General Rural Zone, except for a small area of Settlement Zone. We therefore agree with Ms Easton's recommendation to include noise contours for the Haast Airfield on the Planning Maps.



Hearing Panel's Recommendation

155. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommend an **Airport Zone – Haast Airfield** and **Haast Airfield 55 dB Ldn Noise Contour Boundary** is included in Planning Maps as follows**:**

Airport Zone – Haast Airfield[54]

Haast Airfield - 55dB Ldn Noise Contour Boundary

[54] Laurence McGuire S458.001

2.2. FUZ - FUTURE URBAN ZONE - Te Takiwā Tāone mō Raurangi

Submissions and Further Submissions

156. Seven submission points and one further submission point relating to the Future Urban Zone (**FUZ**) Chapter as a whole were summarised in a Table on pages 29-30 of the s42A Report. The Panel adopts these summaries and has considered the submissions and further submission.

157. The Panel note that Toka Tū Ake EQC (S612.109) supported in part, raising concerns that some land identified for future urban development was subject to land instability, which is further considered in the rule framework.

Section 42A Report

158. Ms Easton did not support GDC's (S608.125) request that all references to the SASM in the FUZ Chapter be deleted for the reasons outlined in detail in the other s42A Reports.

159. Ms Easton noted the support of Westland District Council (S181.051), Te Mana Ora (S190.1102) and Toka Tū Ake EQC (S612.110) for the FUZ Chapter; and Peter Haddock's (S417.005) support for the FUZ over his property in the Grey District.

160. Forest and Bird (S560.393) sought that the Overview be amended to state that the land must be rezoned before any urban development can occur. Ms Easton did not support this because the provisions of the zone had been specifically developed to recognise the costs to the West Coast Councils in preparing plan changes to rezone land. She considered that provided a structure plan was developed to identify the appropriate zoning for a site, this would be sufficient to unlock the development of the land.

161. Ms Easton supported the inclusion of the more standardised and expanded "Other relevant Te Tai o Poutini Plan provisions" section in the Overview, as sought by Forest and Bird, to be consistent with the wider Plan provisions.

162. Charles Elley (S251.002) sought that the land block contained in DP 543155 be rezoned from GRUZ to FUZ to recognise the extensive existing infrastructure, which was required to be installed as part of a subdivision consent at Beach Drive, Westport. Ms Easton did not support this submission and provided information on the multiple natural hazards affecting the site that made it unsuitable for identification as FUZ.

163. Ms Easton did not recommend that any amendments to the whole FUZ Chapter in response to these submissions.

Hearing and Submitter Evidence/Statements

164. There was no submitter evidence presented specifically relating to the Overview or the FUZ Chapter as a whole.

Reporting Officer Reply Evidence

165. Following a question from the Panel regarding the protection of significant ecological values in identified FUZ areas, Ms Easton advised amendments could be made to the Overview (as an RMA Schedule 1, clause 16 amendment) to clarify that this work is yet to

be undertaken. She considered this was appropriate because the overview is not an objective, policy or rule. She recommended adding the following text:

> …
> The FUZ - Future Urban Zone is currently proposed in some areas on the fringes of Greymouth, as well as some locations around Franz Josef. **It is noted that significant indigenous biodiversity values in areas of Future Urban Zone haven't been assessed prior to the identification of areas as Future Urban Zone and that this work is planned to be undertaken in the future.**

Hearing Panel's Evaluation

166. The Panel agrees with Ms Easton that her recommended amendments to the Overview can be made as a clause 16 amendment to clarify the identification of significant indigenous biodiversity values within FUZ is yet to be undertaken. We accept the proposed amendments do not alter the substance of the Overview but provide clarity that further assessment work is required. We have slightly modified Ms Easton's recommended wording to further enhance readability.

167. For similar reasons, the Panel consider an addition in response to the submission of Toka Tū Ake EQC regarding land instability risks is warranted.

Hearing Panel's Recommendation

168. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part and recommends the following changes are made to the **Future Urban Zone Overview**:

Overview
This zone applies to land which is intended for housing and business purposes in the future. The FUZ - Future Urban Zone applies to rural land which has been identified as being suitable for these purposes. It is located in places where this need may arise as a result of natural hazards and the need for managed retreat for settlements. The zone is a holding zone where land can continue to be used for a range of rural activities and subdivision and urban development are discouraged until a structure plan is prepared, or the land is rezoned. Structure planning helps achieve an optimal type, form and extent of urban development and demonstrates how future development can be adequately serviced by infrastructure. Rural-lifestyle subdivision, use and development, non-farming related industry and commercial activities are discouraged in the FUZ - Future Urban Zone along with ad hoc urban development. Subdivision and development is restricted to limit fragmentation of land and to maintain the land's character, amenity and productive capability in the interim. The FUZ - Future Urban Zone is currently proposed in some areas on the fringes of Greymouth, as well as some locations around Franz Josef. **It is noted that significant indigenous biodiversity values in areas of the Future Urban Zone have not been assessed before the identification of areas as the Future Urban Zone, and that this work**

is planned to be undertaken in the future.[55] **Where there are potential land instability issues in the zone, any necessary remediation will be addressed during subdivision.**[56]

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District - wide Matters chapters also contain provisions that may be relevant for ~~hospital~~ **Future Urban Zone**[57] activities, including:

- ~~**Overlay Chapters - the Overlay Chapters have provisions in relation to historic heritage; notable trees; sites and areas of significance to Māori; biodiversity; landscape; riparian areas; natural hazards; and the coastal environment. Where an activity is located within an overlay area (as identified in the planning maps) then the relevant overlay provisions apply.**~~[58]
- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters. There may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Future Urban Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.**
- **Natural Hazards - natural hazards are widespread on the West Coast and in some locations natural hazard overlays may affect areas in the Future Urban Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards Chapter.**
- **Natural Character and Margins of Waterbodies - in some locations areas of Future Urban Zone may extend into the riparian margins of waterbodies. The Natural Character and Margins of Waterbodies Chapter contains provisions on how these areas must be managed.**
- **Ecosystems and Indigenous Biodiversity – the Ecosystems and Indigenous Biodiversity Chapter contains the provisions around the management of indigenous vegetation, including within the Future Urban Zone.**
- **Subdivision -** The Subdivision chapter sets out the requirements for subdivision activities in the FUZ - Future Urban Zone.
- **Financial Contributions -** The Financial Contributions chapter sets out the requirements for contributions of costs for activities which impact on the local network utility operators.

FUZ- Future Uban Zone Objectives and Objective SUB - 04

Submissions

169. Twelve submission points received on the FUZ objectives were summarised in a Table on pages 31-32 of the s42A Report. Eleven submission points supported the retention of the objectives as notified and one submission point sought amendments to Objective FUZ-04.

[55] RMA First Schedule Clause 16(2)
[56] Toka Tū Ake EQC (S612.109)
[57] RMA First Schedule Clause 16(2)
[58] Royal Forest and Bird Protection Society Incorportated S560.394, S560.391, S560.054

170. Six submission points relating to Objective **SUB-04** were summarised in a Table on page 32 of the s42A Report. Four submission points supported the retention of the objective as notified and two submission points sought amendments.

171. The Panel adopts these summaries and has considered the relevant submissions.

Section 42A Report

172. Ms Easton acknowledged most of the submissions supported all or individual objectives.

173. Toka Tū Ake EQC (S612.112) sought amendment of FUZ – O4 to include the process used to identify risk levels regarding natural hazard risk, identification of levels of risk tolerance/risk thresholds and whether risk tolerance levels had been met; and queried whether there had been the opportunity for external agencies and individuals to submit on the Plan. Ms Easton supported this submission in part and considered that this objective needed amendment.

174. Ms Easton noted that the natural hazard thresholds referred to were those where managed retreat was required and not that the FUZ land met some specific natural hazard threshold. She explained that FUZ-O4 was developed when the primary purpose of FUZ was to hold land for managed retreat. However, she noted this had changed through the Plan development process and that the areas related to this objective had their zoning changed from FUZ following draft Plan feedback. She noted that due to an error, FUZ-O4 had not subsequently been amended. She highlighted FUZ now existed in only two locations (Franz Josef and Greymouth) and that did not support future managed retreat. Ms Easton, therefore, recommended FUZ-O4 be amended as follows:

> **FUZ – O4**
>
> Urbanisation on sites zoned FUZ - Future Urban Zone occurs in a planned manner either by Plan Change, or by implementation of a Structure Plan ~~where Council resolution identifies that natural hazard risk thresholds have been met~~.

175. Ms Easton did not support BDC (S552.107) and Frida Inta's (S552.107) request to amend Objective SUB-O4 to refer to protecting valuable horticultural land from urban sprawl. She noted that while this matter was the subject of the NPS for Highly Productive Land, no FUZ areas met the NPS criteria (Land Use Classes 1-3). She also noted locations with Land Use Class 3 were adjacent to Westport and Karamea, in areas subject to significant flood hazards; and in the upper Grey Valley where there was no urban development. On this basis, she did not recommend any amendments to Objective SUB – 04.

Hearing and Submitter Evidence/Statements

176. Ms Frida Inta, for herself and the Buller Conservation Group, presented at the hearing reiterating her view that an objective was required to promote the protection of valuable horticultural land from urban sprawl.

Reporting Officer Reply Evidence

177. Ms Easton made no specific comments in her Right of Reply about the objectives of the Future Urban Zone chapter.

Hearing Panel's Evaluation

178. The Panel accepts Ms Easton's recommendation to amend Objective FUZ-04 to reflect the changed purpose of the FUZ. We accept land identified as FUZ does not include any highly productive land, which requires protection under the NPS-HPL. We agree that no further changes are required to the remaining objectives.

Hearing Panel's Recommendation

179. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission point identified in the footnote below is accepted in part, and recommend the following changes to the **Future Urban Zone objectives**:

FUZ – O1
Future urban development is not compromised by incompatible subdivision, use and development.
FUZ – O2
Future urban land is available for managed retreat of vulnerable communities.
FUZ – O3
Rural activities that will not create reverse sensitivity issues in the future are provided for until the land is rezoned for urban purposes.
FUZ – O4
Urbanisation on sites zoned FUZ - Future Urban Zone occurs in a planned manner either by Plan Change, or by implementation of a Structure Plan ~~where Council resolution identifies that natural hazard risk thresholds have been met~~.[59]

FUZ - Future Urban Zone Policies

Submissions

180. Six submission points relating generally to the policies as a whole were summarised in a Table on page 33 of the s42A Report. Four submission points supported the retention of the policies as a whole and two submission points sought a new policy.

181. One submission point supported retention of **FUZ–P1** as notified.

182. One submission point supported retaining **FUZ–P2** as notified.

183. Two submission points relating to **FUZ – P3** were summarised in a Table on page 34 of the s42A Report, with one supporting the policy as notified and one seeking amendments.

184. Two submission points supported retaining **FUZ–P4** as notified.

185. Two submission points supported retention of **FUZ–P5** as notified.

[59] Toka Tū Ake EQC S612.112

186. The Panel has considered the submissions and adopts these summaries in the s42A Report.

Section 42A Report

187. Ms Easton acknowledged the majority of submissions support all or individual policies.

188. Ms Easton did not support the Buller Conservation Group (S552.191) and Frida Inta's (S553.191) request for a new policy to avoid FUZ development in areas of indigenous biodiversity and natural character. She noted the purpose of these policies was to support resource consent processes within land already zoned FUZ and that both locations (at Franz Josef and Greymouth) were outside of Outstanding Natural Landscapes and did not include areas identified as significant natural areas (**SNA**).

189. Waka Kotahi NZTA (S450.293) sought that FUZ–P3 be amended to include the word "*safe*" in relation to transport networks. Ms Easton supported this submission and advised that she considered safety to be an important component of any transport system. She recommended the following amendments to FUZ-P3:

> **FUZ - P3**
>
> Avoid subdivision, use and development of land that may result in one or more of the following:
>
> a. Structures and buildings of a scale and form that will hinder or prevent future urban development;
> b. Compromise the **safe,** efficient and effective operation of a future urban transport and infrastructure networks;
>
> ....

Hearing and Submitter Evidence/Statements

190. Ms Inta reiterated the need for a new policy to avoid FUZ development in areas of indigenous biodiversity and natural character.

Reporting Officer Reply Evidence

191. Ms Easton made no specific comments in her right of reply about the objectives of the Future Urban Zone chapter.

Hearing Panel's Evaluation

192. The Panel accepts the reasoning set out in the s42A Report and agrees with Ms Easton that no changes are required to policies FUZ-P1 to FUZ-P5, except for her recommended amendment to FUZ-P3. However, we recommend removing the word '*a*' from Policy FUZ-P3 to improve readability.

Hearing Panel's Recommendation

193. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part and recommends that the following changes to the **Future Urban Zone Policies**:

FUZ – P1

Provide for use and development that is consistent with the policies of the GRUZ - General Rural Zone unless that use will give rise to reverse sensitivity issues when urban development occurs.

FUZ – P2

Avoid subdivision in the FUZ - Future Urban Zone that will result in the fragmentation of land and compromise future urban development.

FUZ – P3

Avoid subdivision, use and development of land that may result in one or more of the following:

a. Structures and buildings of a scale and form that will hinder or prevent future urban development;

b. Compromise the **safe,**[60] efficient and effective operation of ~~a~~ future urban transport and infrastructure networks;

c. The provision, or extension of the transport, wastewater, water supply, stormwater networks or other infrastructure unless this is provided as part of the development in a way that will not compromise the ultimate infrastructure configuration of the zone;

d. Create or extend infrastructure out of sequence or that is not contiguous with the existing network infrastructure;

e. Establishment of incompatible activities that could give rise to reverse sensitivity issues when urban development occurs; or

f. Undermine the form or nature of future urban development or compromise the integrity of any relevant Structure Plan.

FUZ – P4

Where land is zoned FUZ - Future Urban Zone, subject to adequate provision of any infrastructure, to allow for:

a. The provision of the necessary infrastructure by any person or by the Council for any part or all of that land;

b. The provision of wastewater infrastructure that utilises disposal to land or connects to a Council operated reticulated system;

c. Infrastructure servicing plans that are approved by Council, prior to the removal of the Future Urban Zone, which are required to be implemented under the urban zone through subsequent subdivision or development.

FUZ – P5

Where the FUZ - Future Urban Zone is activated by Council Resolution, or where urban development is undertaken prior to rezoning, provide for use and development which is

[60] Waka Kotahi NZTA S450.293

consistent with the policies of the relevant urban zone as identified in the Structure Plan for the area.

FUZ - Future Urban Zone Rules and Rule SUB–R12

Submissions and Further Submissions

Rules

194. Two submission points and a further submission point received on the rules as a whole were summarised in a Table on page 35 of the s42A Report. Both submission points sought amendments and the further submission supported in part.

195. Seven submission points received on **FUZ-R1** were summarised in a Table on page 35 of the s42A Report. Four submission points supported the rule as notified and three sought amendments in the form of an advice note.

196. Four submission points received on **FUZ-R2** were summarised in a Table on page 36 of the s42A Report. One submission point supported the rule as notified and three sought amendments.

197. Five submission points received on **FUZ-R3** were summarised in a Table on page 36 of the s42A Report. Two submission points supported Rule FUZ-R3 as notified and three sought amendments.

198. Four submission points received on **FUZ-R4** were summarised in a Table on page 36 of the s42A Report. One submission point supported Rule FUZ-R4 as notified and three sought amendments.

199. Four submission points supported **FUZ-R5** as notified.

200. Five submission points and a further submission point relating to **FUZ—R6** were summarised in a Table on pages 37-38 of the s42A Report. One submission point supported the rule as notified and one sought amendment, with a further submission in support. Three submissions sought to have the rule deleted.

201. Four submission points relating to **FUZ—R7** were summarised in a Table on page 38 of the s42A Report. One submission point supported the retention of the rule as notified and three submission points sought amendments.

202. Eight submission points relating to **FUZ—R8** were summarised in a Table on page 38 of the s42A Report. One submission point supported the rule as notified and seven submission points sought amendments.

203. Eleven submission points and three further submission points relating to **FUZ-R9** were summarised in a Table on page 39 of the s42A Report. Nine submission points sought amendments and one sought an amendment to require all mining activities to require consent, with two of the further submission points opposing this submission point and one supporting it.

204. Six submission points relating to **FUZ—R10** were summarised in a Table on pages 39-40 of the s42A Report. Two submission points supported the rule as notified and three

submission points sought amendments. One submission point sought that the rule be deleted.

205. Four submission points relating to **FUZ-R11** were summarised in a Table on page 40 of the s42A Report. One submission point supported the rule as notified and three submission points sought that the rule be deleted.

206. Four submission points relating to **FUZ-R12** were summarised in a Table on page 40 of the s42A Report. One submission point supported the rule as notified and three submission points sought amendments to the rule.

207. Four submission points relating to **FUZ-R13** were summarised in a Table on page 41 of the s42A Report. One submission point supported the rule as notified and three sought amendments to the rule.

208. Four submission points relating to **FUZ-R14** were summarised in a Table on page 41 of the s42A Report. One submission point supported the rule as notified and three submission points sought amendments to the rule.

209. Four submission points that sought amendments to **FUZ-R15** were summarised in a Table on page 42 of the s42A Report.

210. Four submission points relating to **FUZ-R16** were summarised in a Table on page 42 of the s42A Report. One submission point supported the rule as notified and three submission points sought amendments.

211. Four submission points relating to **FUZ-R17** were summarised in a Table on pages 42-43 of the s42A Report. One submission point supported rule as notified and three submission points sought amendments.

212. Ten submission points relating to **FUZ-R18** were summarised in a Table on page 43 of the s42A Report. One submission point supported the rule as notified and nine submission points sought amendments.

FUZ -R19 Agricultural, Pastoral and Horticultural Activities not meeting Rule FUZ - R1

213. Eight submission points relating to FUZ-R19 were summarised in a Table on page 44 of the S42A Report. Two submission points supported the retention of the rule as notified. The remaining six submission points sought amendments to the rule.

FUZ – R20 – FUZ -R24 Non complying activities

214. Ten submission points relating to FUZ-R20 were summarised in a Table on pages 44-45 of the S42A Report. Six submission points supported the retention of the rule as notified. The remaining four submission points sought the deletion of the rule.

SUB – R12 Subdivision of land to create allotments within the Future Urban Zone

215. Twenty-three submission points and a further submission point relating to Rule SUB–R12 were summarised in a Table on pages 45-46 of the s42A Report. One submission point supported the retention of the rule as notified and 21 submission points sought amendments to the rule. A further submission point opposed to two of the submissions

seeking amendments. One submission point sought that greater direction be provided by the Plan.

Section 42A Report

216. Ms Easton acknowledged the majority of the submissions support the rules as notified.

Permitted Activities FUZ – R1 – FUZ – R10

217. Forest and Bird (S560.394) requested that the rules clearly state that any vegetation clearance associated with the activities was governed by the ECO and NC chapters. Ms Easton supported this submission in part; however, she considered that the appropriate location for this clarity was the "*Other relevant Te Tai o Poutini Plan provisions*" section of the Overview. She recommended that this be amended to add reference to the Overlay Chapters and to be consistent with other chapters.

218. Ms Easton supported in part Toka Tū Ake EQC's (S612.109) request that the rule framework for FUZ in areas subject to land instability include global land stability mitigation measures before development, rather than allowing *ad-hoc* development on potentially unstable slopes. She considered the appropriate location to address this matter was in the subdivision provisions, as this would be a precursor to land development. She noted Rule SUB–R12 was the relevant rule for the FUZ and recommended including additional matter of discretion "*the extent to which area-wide land stability measures are undertaken on potentially unstable slopes prior to development*".

219. William McLaughlin (S567.668, S567.670 and S567.672) Chris J Coll Surveying Limited (S566.635, S566.638, S566.640) and Chris & Jan Coll (S558.635 and S558.638) sought that Rules FUZ – R1, FUZ – R2, FUZ –R4, FUZ – R7 and FUZ – R8 be amended so that any pre-existing non-compliance with noted performance standards did not preclude the application of these rules. Ms Easton did not support these submissions because she considered that, outside of a resource consent process, existing non-compliance should be accommodated specifically within the rules. She therefore did not recommend any amendments to this rule.

220. William McLaughlin (S567.669), Chris and Jan Coll (S558.636), and Chris J Coll Surveying Limited (S566.636) sought that, where compliance was not achieved with Rule FUZ-R1, the activity status should be controlled and not discretionary. Ms Easton did not support these submissions. She noted that the intent of the FUZ was a "*holding pattern*" zone, where the rules were deliberately strict to avoid compromising future urban form and development. For these reasons, she did not consider controlled activity status was appropriate and did not recommend any amendments to the rule.

221. Ms Easton did not support William McLaughlin (S567.671), Chris & Jan Coll (S558.639) and Chris J Coll Surveying Limited's (S566.639) requests that FUZ–R3 be amended to be more enabling of residential activities because the intent of the FUZ as a "*holding pattern*" zone, as outlined previously. She did not recommend any amendments to this rule.

222. The New Zealand Heavy Haulage Association Inc. (S616.010) sought an amendment to the standard for relocated buildings in Rule FUZ–R6, consistent with submissions it had made on equivalent rules in other zones. Ms Easton did not support this submission and considered it would result in new pre-built residential housing being moved onto a site, potentially requiring a resource consent, as it will not have been previously used as a

dwelling. She also did not support the other changes requested and considered these did not improve the clarity or enforceability of the rule. Ms Easton did not recommend any amendments to this rule.

223. Ms Easton supported William McLaughlin (S567.028, S567.674), Chris & Jan Coll (S558.208, S558.642) and Chris J Coll Surveying Limited's (S566.208, S556.642) requests to delete Rule FUZ-R6. She noted the principal issue that the TTPP sought to manage in relation to relocated buildings was amenity issues for adjacent neighbours. She agreed that there were some zones (including the FUZ) where regulation of relocated buildings was unnecessary. She therefore recommended the deletion of the rule.

224. Ms Easton supported GDC's (S608.126) request to amend Rule FUZ–R8 to require records of letting visitor accommodation to be provided annually, instead of on request, because it created a much clearer permitted activity standard and would better enable the Councils to manage compliance.

225. Ms Easton did not support William McLaughlin (S567.676), Chris & Jan Coll (S558.644) and Chris J Coll Surveying Limited's (S566.644) request to delete the advice note regarding NOISE-R3 requirements. She noted an advice note had no legal status and was not part of the rule. She explained the requirements of Rule NOISE-R3 were a District-wide provision and applied regardless of the advice note. She did not recommend any amendments to this rule.

226. Several submission points were received concerning FUZ–R9 Mineral Prospecting and Exploration. Te Mana Ora (S190.1120) sought that this activity did not occur within a Drinking Water Source Protection Zone (**DWSPZ**). Minerals West Coast (S569.027) sought that mineral extraction be added to this rule. William McLaughlin (S567.678), Chris & Jan Coll (S558.646) and Chris J Coll Surveying Limited (S566.646) sought that clause (1) of the rule be amended to refer to authorisations from NZPAM only where these were legally required. William McLaughlin (S567.679), Chris and Jan Coll (S558.647), and Chris J Coll Surveying Limited (S566.647) also sought to extend the timeframe for clause (3), related to topsoil disturbance, until a period after the cessation of mining activity.

227. Ms Easton considered the most appropriate approach to Rule FUZ-R9 was to be consistent with the recommendations of the Mineral Extraction s42A Report, where these issues were canvassed. She noted the Mineral Extraction s42A Report did not recommend changes to the timeframe for land disturbance stabilisation and therefore did not support changes. She did not support Minerals West Coast's request to expand the permitted activity to include mineral extraction because mineral extraction can involve the use of hazardous substances and affect hydrology, potentially leaving the land in a state unsuitable for urban development. She supported a requirement that the activity be authorised under a prospecting or exploration permit from NZPAM, where this is required.

228. Ms Easton did not support the submission of Te Mana Ora because no DWSPZ had been identified on the West Coast. She also did not support Forest and Bird's (S560.0542) request that all mining activities require consent and that an ecological assessment be required for all resource consent applications. She considered there were circumstances where an ecological assessment would not be required, particularly concerning mineral prospecting and exploration.

229. Ms Easton recommended the following amendments to Rule FUZ – R9:

FUZ - R9 Mineral Prospecting and Exploration

Activity Status Permitted
Where:
a. This is authorised under a prospecting or exploration permit from NZPAM **where legally required;**
b. Notice is provided to the relevant District Council Consent Authority 5 working days ahead of work being undertaken;
c. Where areas are to be disturbed, topsoil shall be stripped and stockpiled and then replaced over the area of land disturbed as soon as possible and no later than 3 months after the disturbance has occurred;
d. The site shall be rehabilitated generally to its original condition; and
e. All stripped material (including vegetation, soil and debris) is deposited or contained in such a manner that it does not enter any waterbody or cause the destruction of habitat.

Activity status where compliance not achieved: Restricted Discretionary

230. In relation to Rule FUZ – R10, William McLaughlin (S567.680), Chris & Jan Coll (S558.649) and Chris J Coll Surveying Limited William McLaughlin (S567.680), Chris & Jan Coll (S558.649) and Chris J Coll Surveying Limited (S566.649) (S566.649) sought that this rule be amended to provide a clearer idea of what a Structure Plan is and to ensure that its formulation involves community consultation. Ms Easton supported these submissions and considered that the most appropriate way to do this was through the inclusion of a new appendix to the Plan, which spelt out the process by which such a structure plan should be developed. She proposed this be based on the Quality Planning best practice[61]. She also recommended that Rule FUZ–R10 be amended to refer to the requirement that the structure plan be prepared in accordance with the new appendix.

231. Ms Easton recommended amendments to Rule FUZ – R10 as follows:

FUZ - R10 Any Activity provided for as a Permitted Activity within the relevant Urban Zone
Activity Status Permitted
Where:
a. The relevant District Council has made a Resolution to activate the Future Urban Zone for urban uses; and
b. A Structure Plan has been prepared **in accordance with Appendix XXX** for the site and adopted by the relevant District Council; and
c. The activity, use and development are in accordance with the Permitted Activities in the Zone(s) identified in the adopted Structure Plan.

Activity status where compliance not achieved: Refer to relevant Zone rules

232. Ms Easton did not support Forest and Bird's (S560.395) request delete FUZ-10 due to concern it would allow permitted activities to occur ahead of a rezoning plan change and the potential for site-specific issues that require specific management that would not be achieved under the permitted zone rules. She noted that this rule was drafted with the understanding that the process of preparing a structure plan was in itself significant and would be costly for the relevant Council in a community where there were substantial

[61] https://www.qualityplanning.org.nz/node/1139.

financial constraints. Ms Easton supported the current approach of allowing the Council to approve the implementation of the structure plan ahead of any plan change.

Activities Requiring Resource Consent: FUZ – R11, FUZ – R18 Relocated Buildings

233. Ms Easton supported the submission points from William McLaughlin (S567.029, S567.681, S567.030, S567.688), Chris & Jan Coll (S558.219, S567.681, S558.230, S558.657) and Chris J Coll Surveying Limited (S566.219, S566.650, S566.230, S566.657) seeking that Rule FUZ – R11 and references to relocated buildings in Rule FUZ – R18 be deleted. For the same reasons provided concerning Rule FUZ–R6, Ms Easton did not consider this rule needed in this zone and recommended it be deleted.

234. William McLaughlin (S567.689), Chris & Jan Coll (S558.658) and Chris J Coll Surveying Limited (S566.689) sought that clause (1) of FUZ–R18, requiring compliance with FUZ–R3, be deleted. William McLaughlin (S567.690), Chris & Jan Coll (S558.660) and Chris J Coll Surveying Limited (S566.660) also sought that FUZ–R18 not default to a non-complying activity. Ms Easton supported these submissions. She considered that the reference to Rule FUZ–R3 was unnecessary because it was a non-complying activity to establish residential activities lower than those set out in Rule FUZ– R3 and therefore, there was no necessity to refer to FUZ–R3 in a rule about relocated buildings and other minor structures. Ms Easton recommended the following amendments to Rule FUZ–R18:

> **FUZ - R18 ~~Relocated Buildings~~, Minor Structures, Fences, Walls and Retaining Walls, Community Facilities and Camping Grounds not meeting Permitted, Controlled or Restricted Discretionary Activity Standards**
> **Activity Status Discretionary**
>
> Where:
> 1. The performance standards for Rule FUZ-R3 are complied with.
>
> **Activity status where compliance not achieved:** Non-complying

FUZ – R12, FUZ – R13, FUZ -R14, FUZ – R16, FUZ -R17

235. William McLaughlin (S567.682, S567.683, S567.684, S567.686, S567.687) Chris & Jan Coll (S558.651, S558.652, S556.653,S588.655, S558.656) and Chris J Coll Surveying Limited (S566.651, S566.652, S566.653, S566.655, S566.656) sought that pre-existing non-compliance with the standards in Rule FUZ – R1 and FUZ -R3 not preclude the application of these rules. Ms Easton did not support these submissions for the reasons outlined above. She noted FUZ was a "*holding pattern*" zone ahead of it being used for urban purposes.
non-compliance required careful consideration. Ms Easton did not recommend any amendments to these rules.

FUZ – R15 – Mineral Extraction, Mineral Prospecting, Mineral Exploration not meeting Permitted Activity Standards

236. Te Mana Ora (S190.1126) partially supported this rule but sought an overlay for drinking water infrastructure development and the exclusion of DWSPZ from mineral prospecting activities. Ms Easton did not support this because DWSPZ were yet to be established. She also stated that this was primarily a matter regulated through the NES – Drinking Water, which is administered at a regional level and not through district plans.

237. William McLaughlin (S567.685), Chris & Jan Coll (S558.654), and Chris J Coll Surveying Limited (S566.654) supported the rule in principle but considered that clauses (a) and (b) did not provide sufficient certainty. Ms Easton did not support these submissions. She considered that the objectives and policies for the zone provide good information to support the assessment of these activities.

238. Ms Easton did not recommend any amendments to this rule.

FUZ – R19 Agricultural, Pastoral and Horticultural Activities

239. Ms Easton acknowledged the support of Te Mana Ora (S190.1130) and Forest and Bird (S560.396) for this rule.

240. William McLaughlin (S567.6891, S567.692), Chris & Jan Coll (S558.661, S558.662) and Chris J Coll Surveying Limited (S566.661, S566.662) sought to delete clause (1), which excluded intensive indoor primary production from the rule. Ms Easton did not support this submission. She noted that intensive indoor primary production facilities typically require significant capital investment and are often incompatible with residential urban use. Therefore, she noted, allowing the establishment of an intensive indoor primary production facility could preclude future urban uses establishing on nearby sites, or lead to significant reverse sensitivity issues.

241. Ms Easton did not recommend any amendments to this rule.

FUZ – R20 – FUZ -R24 Non complying activities

242. Ms Easton acknowledged the support of Te Mana Ora (S190.1131, S190.1132, S190.1133, S190.1134, S190.1135) for these rules; and Forest and Bird (S560.397) for their support of FUZ–R23.

243. William McLaughlin (S567.693), Chris & Jan Coll (S558.663), Chris J Coll Surveying Limited (S566.663) and Laura Coll McLaughlin (S574.663) sought that these rules be deleted. Ms Easton did not support those submissions. She noted that the submitters provided no reasons for the deletion other than "*the rules are not appropriate and are too restrictive*". As discussed above, she considered that the rules were deliberately restrictive to avoid inappropriate activities being located in what will be future urban land.

244. Ms Easton did not recommend any amendments to these rules.

SUB – R12 Subdivision of land to create allotment(s) within the FUZ – Future Urban Zone

245. Ms Easton acknowledged the support of Te Mana Ora (S190.427) for the rule as notified.

246. Buller Conservation Group (S552.120) and Frida Inta (S552.120) sought that clause (g) be amended to include effects on "*existing amenity values, the quality of the environment and natural character"*. They also sought to have the clause amended to refer to historic heritage. Ms Easton supported these submissions in part. She noted that in terms of existing amenity and natural character values, the FUZ was intended to be urbanised. Therefore, she considered that there would be a significant change in both the type of amenity provided (from a rural character to an urban character) and inevitably, the area would become less natural as urban uses and infrastructure were developed. However,

she noted that the natural character of waterbodies remained an important consideration in FUZ areas and supported the addition of a reference to this.

247. Ms Easton did not support the inclusion of the existing quality of the environment within the assessment criterion. She noted that this was an unclear matter to assess in an environment where significant change was expected. However, she did support the inclusion of historic heritage, as this is a relevant matter alongside notable trees and Poutini Ngāi Tahu values.

248. Toka Tū Ake EQC (S612.100) and BDC (S538.259) sought that natural hazards and geotechnical constraints be included in the matters of discretion. Ms Easton supported this and considered it particularly important as one area of FUZ was located within a land instability hazards overlay, and that other FUZ may also be identified as subject to land instability hazards in the future.

249. Margaret Montgomery (S446.056) sought greater direction from the Plan regarding subdivision in the FUZ. Chris and Jan Coll (S558.234), William McLaughlin (S567.303), and Chris J Coll Surveying Limited (S566.234) sought to amend the rule so that it did not apply until a robust development or concept plan was approved. Ms Easton supported these submissions in part. She noted that the rule currently allowed only for subdivision to 4 ha (the key performance standard) but was silent on subdivision where this was in accordance with the structure plan developed. Ms Easton considered that the rule needed to be modified to include a requirement that any subdivision be in accordance with a structure plan developed for the site. She recommended that this be a performance standard.

250. William McLaughlin (S567.306), Chris and Jan Coll (S558.237), and Chris J Coll Surveying Limited (S566.237) sought that the activity status, where there is non-compliance, should be discretionary and not non-complying. Ms Easton did not support these submissions. She considered that, in order to achieve the intent of the zone, a precise requirement was necessary for development to be consistent with the zone's objectives and policies, and that a non-complying activity status was necessary to achieve this.

251. Chris and Jan Coll (S558.235) and Chris J Coll Surveying Limited (S566.235) sought that the reference in clause (h) to "*the need for access to be provided to any esplanade reserve or strip created"* be deleted. Ms Easton noted that the submitters provided no reasons for this and she did not support the submissions. She noted that public access was a key reason for establishing esplanade reserves and strips and she therefore considered the reference entirely appropriate.

252. William McLaughlin (S567.305), Chris and Jan Coll (S558.236) and Chris J Coll Surveying Limited (S566.236) sought that clause (i) "*Management of construction effects, including traffic movements, hours of operation, noise, earthworks and erosion and sediment control*" be deleted. Ms Easton did not support those submissions because no reasons were provided as to why this clause was opposed. She considered that it was reasonable that these construction effects were appropriately managed through consent conditions.

253. Westpower Limited (S547.382) sought that clause (j) be amended to refer to "*critical infrastructure (including energy activities)"*. Ms Easton supported this submission in part. She considered that reverse sensitivity impacts on regionally significant infrastructure were an important issue. She did not support the term "*including energy activities*" as these are a subset of network utilities and/or regionally significant infrastructure.

254. Westpower Limited (S547.383) sought an additional matter of discretion to be added to the rule in relation to "*the provision of easements, including for both existing and proposed energy activities and associated infrastructure*". Ms Easton did not support this submission as she considered that this matter was adequately dealt with in standard SUB-S10, which was a compliance requirement in the rule.

255. Waka Kotahi NZTA (S450.127) sought that clause (d) be amended to include transport infrastructure and that a new clause be added around adverse effects on existing infrastructure. Ms Easton supported this submission and considered these to be important and relevant matters for consideration in future subdivision of the urban zone.

256. BDC (S538.265) sought that the reference to notable trees in clause (g) include reference that these were identified in Schedule Two. Ms Easton supported this submission as it clarified which trees are notable. As a consequential amendment to her recommendation that
amended to
or notable trees identified in Schedule Two within or adjacent to the site'.

257. Ms Easton recommended amendments to Rule SUB – R12 as follows:

> **SUB - R12 Subdivision of land to create allotment(s) within the FUZ - Future Urban Zone**
>
> **Activity Status Restricted Discretionary**
>
> Where:
>
> 1. All Subdivision Standards are complied with; except that
> 2. **Compliance with SUB -S1 is not required when the subdivision is in accordance with any structure plan that has been adopted by the relevant district council for the Future Urban Zone area.**
>
> **Discretion is restricted to:**
>
> a. The size, design, shape, location and layout of allotments;
> b. The extent to which the subdivision will be consistent with the Objectives and Policies for the Future Urban Zone and Policy SUB - P5
> c. Where relevant consistency with the NZS 4404 Code of Practice for Land Development and Subdivision infrastructure;
> d. The provision of infrastructure and services for **transport**, drinking water, wastewater and stormwater, telecommunications and energy;
> e. The adequacy of water supply for firefighting;
> f. The requirement for financial contributions as outlined in Rules FC–R1 to FC–R12;
> g. Effects on Poutini Ngāi Tahu values**, historic heritage identified in Schedule One, natural character of waterbodies** or notable trees **identified in Schedule Two** within or adjacent to the site;
> h. The provision of esplanade reserves or strips, and the need for access to be provided to any esplanade reserve or strip created;
> i. Management of construction effects, including traffic movements, hours of operation, noise, earthworks and erosion and sediment control; ~~and~~

j. Management of potential reverse sensitivity effects on existing land uses, including network utilities, rural activities, **regionally significant infrastructure** or significant hazardous facilities;

k. **Management of adverse effects on existing infrastructure;**

l. **Management of natural hazards and any geotechnical constraints; and**

m. **The extent to which area - wide land stability measures are undertaken on potentially unstable slopes prior to development.**

258. Ms Easton recommended adding a new appendix to the Plan as follows:

Appendix XXX Structure Plan Requirements

In order to meet the requirements of Rule MUZ – R10 the structure plan shall be prepared using the following process.

Process

1. SCOPING AND PROJECT PLANNING

The scoping and project planning phase of structure planning shall include the following considerations:

a. Defining the area of the structure plan

b. An initial review of existing information on the area

c. Constraints identification and analysis

d. The overall outcomes desired of the structure plan:

e. Development and implementation timeframes including infrastructure sequencing

f. Identification of key stakeholders

g. The resources required for the structure planning process and implementation:

h. Risk assessment

2. COMMUNITY AND STAKEHOLDER CONSULTATION

Consultation will be undertaken with the following stakeholders as a minimum

a. stormwater, wastewater and roading engineer at the relevant district council

b. parks, and community facilities staff at the relevant district council

c. those who will be responsible for budgeting and finance in the planning and implementation phases of the structure plan

d. landowners and occupiers of the area affected by the structure plan;

e. landowners adjoining the area being structure planned

f. the New Zealand Transport Agency

g. public agencies responsible for social/community infrastructure (Ministry of Education, Ministry of Health and other health service providers etc.)

h. Network utility providers

A well-defined consultation process similar to Schedule 1 of the RMA and section 82 of the LGA should be followed for the structure plan, so that the plan can be given some weight in any subsequent RMA consent processes. A structured submission and hearing processes is required for the draft structure plan, prior to its adoption.

3. ENGAGEMENT WITH POUTINI NGĀI TAHU

Poutini Ngāi Tahu should be engaged with at the commencement of the structure planning process to gauge their level of interest and role that they wish to play in the process.

Depending on the nature of the structure plan, Poutini Ngāī Tahu involvement could include:

a. representation on a steering group that will guide the structure plan process
b. preparation of a cultural impact assessment or other reports and analysis documents
c. examining ways to facilitate Māori development opportunities, including development of Māori land
d. projects involving the identification of places and areas of significance
e. being consulted, receiving regular updates or being kept informed.

4. RESEARCH AND INFORMATION ANALYSIS

The research and analysis phase is a core component of the structure plan process. This research and analysis should build on the work carried out in the scoping phase and may run parallel to consultation, with each helping inform the other. Research and analysis should therefore be ongoing and detailed information obtained during this phase can be used to refine the final design.

Research and analysis should include a review of all available relevant existing information on the area being structure planned. Further research and investigation may need to be undertaken where critical information gaps are identified. Depending on the issues identified, the outcomes desired and the information already available, research and investigation may need to be carried out into:

a. Existing and desired urban form:
b. Natural resources and environmental constraints:
c. Open space and recreational opportunities:
d. Landscape and visual amenity:
e. Natural hazards and land suitability:
f. Māori culture and heritage:
g. Infrastructure (roading and transport, stormwater management, energy supply, telecommunications, roading and transport):

5. URBAN DESIGN REQUIREMENTS

Structure plans can play an important part in achieving good urban design and promoting quality outcomes. As a starting point for promoting good urban design the New Zealand Urban Design Protocol identifies seven essential design qualities

> that should also act as guiding considerations in the structure planning process. These are referred to as the seven Cs: Context, Character, Choice, Connections, Creativity, Custodianship and Collaboration.
>
> 6. GENERATION AND EVALUATION OF ALTERNATIVES
>
> The alternatives need not be developed to a highly detailed level, and could take the form of concept drawings or sketches (and an accompanying statement or explanation) until such time as they are either discarded or selected for further work or refinement.
>
> 7. FINALISING THE STRUCTURE PLAN
>
> A formal consultation and adoption process is required with the opportunity for written submissions and a hearing of these by decision makers. This could be integrated with consultation processes under the LGA for the LTP or annual plan which may be beneficial to provide efficiencies and alignment given the direct relationship between these plans, especially in relation to infrastructure provision.

Hearing and Submitter Evidence/Statements

259. Mr Bhana-Thomson, for the New Zealand Heavy Haulage Association, reiterated the request for recognition in the FUZ that relocated buildings for non-residential purposes may occur.

260. Mr Kennedy, on behalf of Westpower Limited, confirmed that Ms Easton's recommended amendment to SUB–R12 (j) would achieve the outcome sought in the submission (S547.382). He also considered that further amendments were required in the FUZ Rules, including SUB-R12, to include the following additional matter of discretion:

> n. The provision of easements, including for both existing and proposed energy activities and associated infrastructure.

Reporting Officer Reply Evidence

261. In response to queries from the Panel on the KiwiRail evidence on FUZ–R1 (seeking a setback from the rail corridor from both buildings and structures) Ms Easton advised that she did not oppose the addition of the word '*structures*' into the setback standards for the rail corridor within this rule.

Hearing Panel's Evaluation

262. In relation to rules **FUZ-R1 to FUZ-R10**, the Panel agrees with Ms Easton's analysis of submissions seeking amendment to these rules and her reasons for recommending those submissions be rejected or accepted in part.

263. The Panel accept Ms Easton's reasons and recommendation that Rules **FUZ–R1, FUZ–R2, FUZ–R4, FUZ-R7, and FUZ–R8** should not be amended so that any pre-existing non-compliance with noted performance standards.

264. The Panel agree with Ms Easton that where compliance is not achieved with Rule FUZ-R1, the activity status should be discretionary and not controlled because the intent of the FUZ

is a "holding pattern" zone, and the rules are deliberately strict to avoid compromising future urban form and development.

265. The Panel agree with Ms Easton that **FUZ–R3** should not be amended to be more enabling of residential activities because the intent of the FUZ as a "holding pattern" zone and to avoid compromising future urban form and development. The Panel recommend no changes, except a consequential amendment to the advice note to add the Haast Airfield.

266. Regarding Rule **FUZ-R6**, the Panel agree that the principal issue the TTPP seeks to address in relation to relocated buildings is amenity concerns for adjacent neighbours. We consider that the zone is intended for future urban use and therefore relocated buildings should be treated the same in this zone as in other residential settings. For that reason, we recommend retaining the rule, with the same amended wording as similar rules in the residential zones (e.g. GRZ), with reference to new Appendix Eleven.

267. In relation to **Rule FUZ–R8**, the Panel accept Ms Easton's analysis of GDC's (S608.126) request to amend the rule to require records of letting visitor accommodation to be provided annually, instead of on request. We agree this amendment creates a much clearer permitted activity standard and will Councils to manage compliance. However, we note this amendment was not shown in Appendix 1 of the Right of Reply, which we consider was an oversight. We also accept Ms Easton's recommendation not to delete the advice note regarding NOISE-R3. We agree with Ms Easton that the requirements of NOISE–R3 are a District-Wide provision and apply regardless of the Advice Note.

268. In relation **Rule FUZ-R9**, the Panel consider it is appropriate to be consistent with the recommendations in the Mineral Extraction Recommendation Report. We recommend consequential changes to be consistent with the equivalent rules in the GRUZ, RLZ, SETZ and OSZ. We consider the submissions points seeking to delete this rule provide wide scope to change the rule. We recommend changing the default activity status from restricted discretionary to discretionary, which is consistent with the recommendations for equivalent rules addressed in the Mineral Extraction Recommendation Report.

269. In relation Rule **FUZ-R10**, the Panel agree that this rule should be amended to provide a clearer idea of what a Structure Plan is and to ensure that its formulation involves community consultation. We accept Ms Easton's view that the most appropriate way to do is by including a new appendix. We consider it is appropriate that the new appendix be based on the Quality Planning best practice. We accept the recommended amendments to the rule and the content of the new appendix (as Appendix Twelve in the Plan).

270. In relation to Rule **FUZ-R11**, the Panel disagree with Ms Easton's reasons and recommendation to delete the rule and references to relocated buildings in Rule FUZ–R18, as a consequence of retaining Rule FUZ-R6.

271. In relation to Rules **FUZ-R12, FUZ-R13, FUZ-R14, FUZ-R16, FUZ-R17**, the Panel agree with Ms Easton's reasons and recommendation to retain the rules as notified.

272. In relation to Rule **FUZ-R15**, the Panel agree with Ms Easton's reasons for not supporting the Te Mana Ora (S190.1126) submission to develop an overlay for drinking water infrastructure and to exclude mineral prospecting activities from DWSPZ. We agree this is primarily a matter regulated through the NES – Drinking Water at the regional level. We also agree with her recommendation to reject the submissions seeking the deletion of clauses (a) and (b) given the objectives and policies for the zone provide good information

to support an assessment of these activities. The Panel consider it necessary to ensure consistency with recommendations in the Minerals Extraction Recommendations Report for rules in other zones managing the same activity, which would be consequential in nature and related to amendments to FUZ-R9.

273. In relation to **FUZ-R18**, the Panel does not accept Ms Easton's recommendation to delete the reference to '*Relocated buildings'* in the heading of the rule, as a consequence of retaining FUZ-R6.

274. The Panel agrees with Ms Easton's analysis in the s42A Report (paragraph 127) that it is not necessary for Rule FUZ-R18 to refer to Rule FUZ-R3 given it relates to minor structures, fences walls and retaining walls, community facilities and camping grounds not meeting the permitted, controlled or restricted discretionary rules. However, the Panel notes that Ms Easton's recommended amendments shown in Appendix 1 of the s42A Report and Appendix 1 of the Right of Reply do not align with the analysis provided in the s42A Report where the submission points outlined were supported. We note Appendix 2 of the s42A Report records the submission points S567.689, S558.658 and S566.658 requesting the deletion of the reference to Rule FUZ-R3 were recommended to be rejected; and the submission points S567.690, S558.660 and S566.660 requesting amending the default status from '*Non complying'* to '*N/A'* were also recommended to be rejected.

275. The Panel agrees with Ms Easton that the reference to Rule FUZ-R3 is not necessary and accept submission points S567.689, S558.658 and S566.658 to delete this clause. We also agree that given the activities included in the discretionary activity rule, the default should be changed from '*Non complying'* to '*N/A'*; and accept submission points S567.690, S558.660 and S566.660.

276. In relation to Rule **FUZ-R19**, the Panel agree with Ms Easton that clause (1), which excludes intensive indoor primary production from this rule, should not be deleted. We agree that the establishment of an intensive indoor primary production facility could preclude future urban uses establishing on nearby sites or lead to significant reverse sensitivity issues. We recommend no changes to the rule.

277. In relation to Rules **FUZ-R20 to FUZ-R23**, the Panel accept Ms Easton's recommendation to retain the rules as notified to prevent inappropriate activities from locating in what will become future urban land.

278. In relation to **SUB–R12**, the Panel accepts Ms Easton's reasoning and recommendation to add a new clause (2) so that compliance with SUB-S1 is not required when the subdivision is in accordance with any structure plan that has been adopted by the relevant district council for the FUZ area. We agree this amendment recognises that a structure plan development process would identify and resolve any issues in a manner that resulted in there being no need to comply with SUB-S1. We also accept her recommended amendment to require subdivision to be in accordance with a structure plan developed for the site.

279. The Panel agree with Ms Easton's partial support for the Toka Tū Ake EQC (S612.109) submission that sought to include global land stability mitigation measures in the rule framework for future urban zones in areas subject to land instability, rather than allowing *ad-hoc* development on potentially unstable slopes. We accept the subdivision provisions are the appropriate place to achieve this outcome given this would be a precursor to land development. We agree that Rule SUB–R12 is the relevant rule to FUZ and agree with the

recommendation to include a new matter of discretion "*the extent to which area-wide land stability measures are undertaken on potentially unstable slopes prior to development*". We recommend SUB-R12 is amended in this manner.

280. The Panel agree with Ms Easton's reasons and recommendation to amend SUB-R12(d) to include transport infrastructure and to add a new clause in relation to adverse effects on existing infrastructure. We agree with her recommended amendments to clause (g) given natural character of waterbodies, historic heritage and notable trees are important considerations in FUZ areas. We also agree that natural hazards and geotechnical constraints should be included as matters of discretion for the reasons Ms Easton details.

281. The Panel accept Ms Easton's recommendation that a non-complying activity status when compliance is not achieved with the subdivision standards within the FUZ under SUB-R12 is necessary to achieve the intent of the zone and to ensure development is consistent with the zone's objectives and policies. We also accept her recommendation to amend clause (j) to include potential reverse sensitivity effects on regionally significant infrastructure.

282. The Panel consider that there is a need to also reference indigenous biodiversity values in SUB-R12 to connect with the matter included in Appendix Twelve as part of the structure plan development.

283. In relation to **FUZ-24** the Panel note that this type of 'catch-all' rule and that such rules often have a Discretionary activity status in other Plans, and we noted that we have recommended such a status in other chapters. In this case we considers, for reasons of consistency, that the activity status of FUZ-24 should be revised to Discretionary.

Hearing Panel's Recommendation

284. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommend that the following changes to the **Future Urban Zone rules**:

Future Urban Zone Rules

Permitted Activities

FUZ - R1 Agricultural, Pastoral and Horticulture Activities and Buildings

Activity Status Permitted
Where:

1. The maximum gross ground floor area of a single building is 500m^2;
2. Maximum building height above ground level is 10m;
3. Buildings are setback a minimum of 10m from the road boundary, 5m from side boundaries and 20m from rear boundaries; and
4. The minimum separation distance between buildings housing more than 10 animals or commercial livestock and a residential/settlement/rural lifestyle zone boundary shall be 30m and from any residential building on another site 50m, and from any other boundary 20m.

Activity status where compliance not achieved: Discretionary

FUZ - R2 Conservation and Recreation Activities

Activity Status Permitted
Where:

1. All performance standards for Rule FUZ - R1 are complied with.

Activity status where compliance not achieved: Discretionary

FUZ - R3 Residential Activities and Residential Units

Activity Status Permitted
Where:

1. All performance standards for Rule FUZ - R1 are complied with.
2. Residential unit density is no more than one unit per 4ha net site area except where the site is already in existence at the date of notification of the Plan;
3. There is a maximum **one**~~1~~[62] residential building per site;
4. There is no more than **one**~~1~~[63] minor residential unit with a maximum gross floor area of 65m^2 where this is located within 20 metres of and shares the driveway with the principal residential dwelling; and
5. Any minor residential unit shares a driveway with the site's principal residential unit.

Advice Note:

Where a residential building or noise sensitive activity is located within:

1. 80m of a State Highway with a speed limit of 70kph or greater; or
2. 40m of a State Highway with a speed limit of less than 70kph; or
3. 40m of a Railway Line; or
4. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or
5. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports, **Haast Airfield,**[64] or Greymouth or Karamea Aerodrome.

Then the acoustic insulation requirements are set out in Rule NOISE - R3 will apply.

Activity status where compliance not achieved: Non-complying

FUZ - R4 Minor Structures

Activity Status Permitted
Where:

1. All performance standards for Rule FUZ - R1 are complied with.
2. Masts, poles, aerials and pou whenua must not exceed 7m in height;
3. Any antenna dish must be less than 1m in diameter;
4. Any ornamental or garden structure must not exceed 2.4m in height; and
5. Any other structure must not exceed 10m^2 and 2m in height.

Activity status where compliance not achieved: Controlled

FUZ - R5 Fences, Walls and Retaining Walls

Activity Status Permitted

[62] RMA First Schedule Clause 16(2)
[63] RMA First Schedule Clause 16(2)
[64] Consequential amendment Laurence McGuire S458.001

Where:

1. Fences, walls and retaining walls are a maximum 2m height above ground level; and
2. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall or wall.

Activity status where compliance not achieved: Discretionary

FUZ - R6 Relocated Buildings

Activity Status Permitted
Where:

a. All performance standards for Rule FUZ - R1 and FUZ - R3 are complied with;
b. Any relocated building intended for use as a dwelling must have been designed**,** ~~and~~ built**,** ~~to be~~ **and**[65] used as a dwelling;
c. A building pre-inspection report **completed in accordance with Appendix Eleven**[66] shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the **exterior** reinstatement works **including connections to infrastructure services and closing in and ventilation of the foundations** shall be completed within a 12 month period **of the building being delivered to the site**; **and**[67]
d. The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site.~~; and~~
e. ~~All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.~~[68]

Activity status where compliance not achieved: Controlled

FUZ - R7 Home Business

Activity Status Permitted
Where:

1. All performance standards for Rules FUZ - R1, FUZ - R3, NOISE - R1, -R2, -R4 and -R5, LIGHT - R1 and – R~~3~~**4** and SIGN - R15 are complied with;
2. There is a maximum of 10 heavy vehicle movements per day and whichever is the greater of 30 light vehicle movements per day or 210 light vehicle movements per week; and
3. No external generation of dust, odour or smoke occurs as part of the activity.

Activity status where compliance not achieved: Restricted Discretionary

FUZ - R8 Visitor Accommodation

Activity Status Permitted
Where:

1. This is ancillary to a residential, conservation or rural activity;

[65] New Zealand Heavy Haulage Association Inc. S616.010
[66] New Zealand Heavy Haulage Association Inc. S616.010
[67] William McLaughlin S567.028, S567.674, Chris & Jan Coll S558.208, S558.642 and Chris J Coll Surveying Limited S566.208, S556.642
[68] William McLaughlin S567.028, S567.674, Chris & Jan Coll S558.208, S558.642 and Chris J Coll Surveying Limited S566.208, S556.642

2. All performance standards for Rules FUZ - R1, FUZ - R3, NOISE - R1, -R2, -R4 and -R5, LIGHT - R1 and -R3**4** and SIGN - R15 are complied with;
3. There are a maximum of **six**~~6~~[69] paying guests at any one time;
4. Notification to the District Council is required at the time of the activity commencing; and
5. Records of letting activity are kept and provided to the Council ~~on request~~ **annually**.[70]

Advice Notes:

1. Compliance with the Building Code is also required.
2. Where a residential building or noise sensitive activity is located within:
   a. 80m of a State Highway with a speed limit of 70kph or greater; or
   b. 40m of a State Highway with a speed limit of less than 70kph; or
   c. 40m of a Railway Line; or
   d. The 50 dBA Noise Contour boundary of Franz Josef Heliport; or
   e. The 55 dBA Noise Contour boundary of the Westport or Hokitika Airports**, Haast Airfield,**[71] or Greymouth or Karamea Aerodrome. Then the acoustic insulation requirements are set out in Rule NOISE - R3 will apply.

Activity status where compliance not achieved: Restricted Discretionary

FUZ - R9 Mineral Prospecting and Mineral Exploration

Activity Status Permitted
Where:

1. This is authorised under a prospecting or exploration permit from ~~NZPAM~~**New Zealand Petroleum and Minerals, where legally required;**[72]
2. Notice is provided to the relevant District Council Consent Authority **10**~~5~~ working days ~~ahead of work being undertaken~~ **prior to any Mineral Prospecting or Mineral Exploration commencing**;
3. ~~Where areas are to be disturbed, topsoil shall be stripped and stockpiled and then replaced over the area of land disturbed as soon as possible and no later than 3 months after the disturbance has occurred;~~[73]
3. **Any earthworks associated with Mineral Prospecting or Mineral Exploration are undertaken more than 20m from a site boundary;**
4. The site ~~shall be~~ **is progressively** rehabilitated ~~generally~~**as far as is practicable** to its ~~original~~ condition **prior to activity occurring with rehabilitation to be completed no later than three months after Mineral Prospecting and Mineral Exploration ceases**; ~~and~~[74]
5. ~~All stripped material (including vegetation, soil and debris) is deposited or contained in such a manner that it does not enter any waterbody or cause the destruction of habitat.~~

Activity status where compliance not achieved: Restricted Discretionary

FUZ - R10 Any Activity provided for as a Permitted Activity within the relevant Urban Zone

Activity Status Permitted
Where:

[69] RMA First Schedule Clause 16(2)
[70] Grey District Council S608.126
[71] Consequential amendment Laurence McGuire S458.001
[72] William McLaughlin S567.678, Chris & Jan Coll S558.646 and Chris J Coll Surveying Limited S566.646
[73] William McLaughlin S567.679, Chris & Jan Coll S558.647 and Chris J Coll Surveying Limited S566.647
[74] William McLaughlin S567.679, Chris & Jan Coll S558.647 and Chris J Coll Surveying Limited S566.647

1. The relevant District Council has made a Resolution to activate the Future Urban Zone for urban uses; and
2. A Structure Plan has been prepared **in accordance with Appendix Twelve**[75] for the site and adopted by the relevant District Council; and
3. The activity, use and development are in accordance with the Permitted Activities in the Zone(s) identified in the adopted Structure Plan.

Activity status where compliance not achieved: Refer to relevant Zone rules

Controlled Activities

FUZ - R11 Relocated Buildings not meeting Permitted Activity Standards Activity Status Controlled

Where:

1. All performance standards for Rule FUZ - R1 and FUZ - R3 are complied with.

Matters of control are:

a. Design and location of structures;
b. Methods of wastewater and stormwater treatment and disposal;
c. Methods of ensuring safe drinking water supply;
d. Landscape measures; and
e. Appearance of buildings.

Activity status where compliance not achieved: Discretionary [76]

FUZ - R12 Minor Structures not meeting Permitted Activity Standards

Activity Status Controlled

Where:

1. The minor structure does not exceed 10m in height above ground level; and
2. All other performance standards from Rule FUZ - R1 are complied with.

Matters of control are:

a. Design and location of structures; and
b. ~~Landscape measures~~**Measures to mitigate landscape effects;**[77].

Activity status where compliance not achieved: Discretionary

Restricted Discretionary Activities

FUZ - R13 Home Business not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Where:

1. This is ancillary to a residential or rural activity; and
2. All performance standards for Rule FUZ - R1 and FUZ - R3 are complied with.

Discretion is restricted to:

a. Hours of operation, emission of noise and traffic generation;
b. Compatibility with the character and amenity values of the Future Urban Zone;
c. Site design, layout and scale;
d. Adequacy of infrastructure servicing including on-site servicing;

[75] William McLaughlin S567.680, Chris & Jan Coll S558.649 and Chris J Coll Surveying Limited S566.649
[76] William McLaughlin S567.029, S567.681, S567.030, S567.688, Chris & Jan Coll S558.219, S567.681, S558.230, S558.657 and Chris J Coll Surveying Limited S566.219, S566.650, S566.230, S566.657
[77] Consequential Plan-wide amendment Manawa Energy Limited S438.100

e. Ensuring that the activity avoids constraining the establishment of activities otherwise anticipated within the Future Urban Zone;
f. The extent to which measures are included that internalise effects and avoid conflict and potential reverse sensitivity effect on activities anticipated within the Future Urban Zone; and
g. No external generation of dust, odour or smoke occurs as part of the activity.

Activity status where compliance not achieved: Non-complying

FUZ - R14 Visitor Accommodation and Temporary Worker Accommodation not meeting Permitted Activity Standards

Activity Status Restricted Discretionary
Where:
1. This is ancillary to a residential, rural or conservation activity; and
2. All performance standards for Rule FUZ - R1 and FUZ - R3 are complied with.

Discretion is restricted to:
a. Requirements for record keeping of letting activity;
b. Hours of operation, emission of noise and traffic generation;
c. Compatibility with the character and amenity values of the Future Urban Zone;
d. Site design, layout and scale;
e. Adequacy of infrastructure servicing including on-site servicing;
f. Ensuring that the activity avoids constraining the establishment of activities otherwise anticipated within the Future Urban Zone; and
g. The extent to which measures are included that internalise effects and avoid conflict and potential reverse sensitivity effect on activities anticipated within the Future Urban Zone.

Activity status where compliance not achieved: Non-complying

FUZ - R15 Mineral Extraction, Mineral Prospecting, Mineral Exploration not meeting Permitted Activity Standards

Activity Status Restricted Discretionary

Discretion is restricted to:
a. Whether the activity could compromise the future intended use of the Future Urban Zone;
b. The extent to which measures are included that internalise effects and avoid conflict and potential reverse sensitivity effect on activities anticipated within the Future Urban Zone;
c. Management of access, parking and traffic generation from the site;
d. Noise, glare, light, dust, blasting and vibration management;
e. Hours of operation;
f. Hazardous substances and waste management;
g. Historic and cultural heritage requirements;
h. Extent and design of earthworks and indigenous vegetation clearance;
i. Effects on ecological values including any threatened fauna or their habitats;
j. Design and location of ancillary buildings, structures and infrastructure;
k. Overburden management;
l. Monitoring, reporting and community liaison requirements;
m. Financial contributions and any requirement for bonds;
n. Potential for reverse sensitivity effects; and

o. Site rehabilitation and mine closure requirements.

Activity status where compliance not achieved: N/A

FUZ -R16 Community Facilities

Activity Status Restricted Discretionary
Where:

1. All performance standards for Rule FUZ - R1 and FUZ - R3 are complied with.

Discretion is restricted to:

a. Compatibility with the character and amenity values of the Future Urban Zone;
b. Site design, layout and scale;
c. Adequacy of infrastructure servicing including on-site servicing;
d. Ensuring that the activity avoids constraining the establishment of activities otherwise anticipated within the Future Urban Zone; and
e. The extent to which measures are included that internalise effects and avoid conflict and potential reverse sensitivity effect on activities anticipated within the Future Urban Zone.

Activity status where compliance not achieved: Discretionary

FUZ -R17 Camping Grounds

Activity Status Restricted Discretionary
Where:

1. All performance standards for Rule FUZ - R1 and FUZ - R3 are complied with.

Discretion is restricted to:

a. Compatibility with the character and amenity values of the Future Urban Zone;
b. Site design, layout and scale;
c. Adequacy of infrastructure servicing including on-site servicing;
d. Ensuring that the activity avoids constraining the establishment of activities otherwise anticipated within the Future Urban Zone; and
e. The extent to which measures are included that internalise effects and avoid conflict and potential reverse sensitivity effect on activities anticipated within the Future Urban Zone.

Activity status where compliance not achieved: Discretionary

Activity status where compliance not achieved: N/A

FUZ - R24 Intensive Indoor Primary Production

Activity Status Non-complying

Activity status where compliance not achieved: N/A

285. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the submission points identified in the footnote below is accepted or accepted in part, and recommend adding a new appendix as follows:

Appendix Twelve Structure Plan Requirements[81]

In order to meet the requirements of Rule FUZ – R10, the Structure Plan must be prepared using the following process:

Process

1. SCOPING AND PROJECT PLANNING

[80] William McLaughlin S567.693, Chris & Jan Coll S558.663 and Chris J Coll Surveying Limited S566.663, Laura Coll McLaughlin (S574.663)
[81] William McLaughlin S567.680, Chris & Jan Coll S558.649 and Chris J Coll Surveying Limited S566.649

The scoping and project planning phase of structure planning shall include the following considerations:

i. **Defining the area of the structure plan**
j. **An initial review of existing information on the area**
k. **Constraints identification and analysis**
l. **The overall outcomes desired of the structure plan:**
m. **Development and implementation timeframes including infrastructure sequencing**
n. **Identification of key stakeholders**
o. **The resources required for the structure planning process and implementation:**
p. **Risk assessment**

2. COMMUNITY AND STAKEHOLDER CONSULTATION

Consultation will be undertaken with the following stakeholders as a minimum

- **a. stormwater, wastewater and roading engineer at the relevant district council**
- **b. parks, and community facilities staff at the relevant district council**
- **c. those who will be responsible for budgeting and finance in the planning and implementation phases of the structure plan**
- **d. landowners and occupiers of the area affected by the structure plan;**
- **e. landowners adjoining the area being structure planned**
- **f. the New Zealand Transport Agency**
- **g. public agencies responsible for social/community infrastructure (Ministry of Education, Ministry of Health and other health service providers etc.)**
- **h. Network utility providers**

A well-defined consultation process similar to Schedule 1 of the RMA and section 82 of the LGA should be followed for the structure plan, so that the plan can be given some weight in any subsequent RMA consent processes. A structured submission and hearing processes is required for the draft structure plan, prior to its adoption.

3. ENGAGEMENT WITH POUTINI NGĀI TAHU

Poutini Ngāi Tahu should be engaged with at the commencement of the structure planning process to gauge their level of interest and role that they wish to play in the process.

Depending on the nature of the structure plan, Poutini Ngāī Tahu involvement could include:

- **a. representation on a steering group that will guide the structure plan process**
- **b. preparation of a cultural impact assessment or other reports and analysis documents**
- **c. examining ways to facilitate Māori development opportunities, including development of Māori land**
- **d. projects involving the identification of places and areas of significance**
- **e. being consulted, receiving regular updates or being kept informed.**

4. RESEARCH AND INFORMATION ANALYSIS

The research and analysis phase is a core component of the structure plan process. This research and analysis should build on the work carried out in the scoping phase and may run parallel to consultation, with each helping inform the other. Research and analysis should therefore be ongoing and detailed information obtained during this phase can be used to refine the final design.

Research and analysis should include a review of all available relevant existing information on the area being structure planned. Further research and investigation may need to be undertaken where critical information gaps are identified. Depending on the issues identified, the outcomes desired and the information already available, research and investigation may need to be carried out into:

a. **Existing and desired urban form:**
b. **Natural resources and environmental constraints:**
c. **Open space and recreational opportunities:**
d. **Landscape and visual amenity:**
e. **Natural hazards and land suitability:**
f. **Māori culture and heritage:**
g. **Infrastructure (roading and transport, stormwater management, energy supply, telecommunications, roading and transport):**

5. URBAN DESIGN REQUIREMENTS

Structure plans can play an important part in achieving good urban design and promoting quality outcomes. As a starting point for promoting good urban design the New Zealand Urban Design Protocol identifies seven essential design qualities that should also act as guiding considerations in the structure planning process. These are referred to as the seven Cs: Context, Character, Choice, Connections, Creativity, Custodianship and Collaboration.

6. GENERATION AND EVALUATION OF ALTERNATIVES

The alternatives need not be developed to a highly detailed level, and could take the form of concept drawings or sketches (and an accompanying statement or explanation) until such time as they are either discarded or selected for further work or refinement.

7. FINALISING THE STRUCTURE PLAN

A formal consultation and adoption process is required with the opportunity for written submissions and a hearing of these by decision makers. This could be integrated with consultation processes under the LGA for the LTP or annual plan which may be beneficial to provide efficiencies and alignment given the direct relationship between these plans, especially in relation to infrastructure provision.

287. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommend the following changes to the Subdivision Zone Rules:

SUB - R12 Subdivision of land to create allotment(s) within the FUZ - Future Urban Zone

Activity Status Restricted Discretionary
Where:
1. All Subdivision Standards are complied with; **except that**
2. **Compliance with SUB -S1 is not required when the subdivision is in accordance with any structure plan that has been adopted by the relevant district council for the Future Urban Zone area.**[82]

[82] Margaret Montgomery S446.056, Chris & Jan Coll S558.234, William McLaughlin S567.303 and Chris J Coll Surveying Limited S566.234

Discretion is restricted to:

a. The size, design, shape, location and layout of allotments;
b. The extent to which the subdivision will be consistent with the Objectives and Policies for the Future Urban Zone and Policy SUB - P5
c. Where relevant consistency with the NZS 4404 Code of Practice for Land Development and Subdivision infrastructure;
d. The provision of infrastructure and services for **transport**[83] drinking water, wastewater and stormwater, telecommunications and energy;
e. The adequacy of water supply for firefighting;
f. The requirement for financial contributions as outlined in Rules FC – R1 to FC – R12;
g. Effects on Poutini Ngāi Tahu values, **indigenous biodiversity,**[84] **historic heritage identified in Schedule One, natural character of waterbodies**[85] or notable trees **identified in Schedule Two**[86] within or adjacent to the site;
h. The provision of esplanade reserves or strips, and the need for access to be provided to any esplanade reserve or strip created;
i. Management of construction effects, including traffic movements, hours of operation, noise, earthworks and erosion and sediment control; ~~and~~
j. Management of potential reverse sensitivity effects on existing land uses, including network utilities, rural activities, **regionally significant infrastructure**[87] or significant hazardous facilities;
k. **Management of adverse effects on existing infrastructure;**[88]
l. **Management of natural hazards and any geotechnical constraints; and**[89]
m. **The extent to which area - wide land stability measures are undertaken on potentially unstable slopes prior to development.**[90]

2.3. HOSZ - HOSPITAL ZONE – Takiwā Hōhipera

Submissions and Further Submissions

288. Five submissions points and two further submission points were received on the Hospital Zone (**HOSZ**) as a whole. These were summarised in a Table on page 55 of the s42A Report. The Panel has considered the relevant submissions and further submissions received and adopts the summaries in the s42A Report.

Section 42A Report

289. Ms Easton acknowledged the general support from WDC for the objectives, policies and rules. She also acknowledged the support of two submitters, for the Hospital Zoning of the property at 190 Queen Street Westport[91].

290. Te Mana Ora sought that the Overview be amended to include the medical centres of Ngākawau, Moana and Whataroa within the HOSZ. Ms Easton noted that as these areas

[83] Waka Kotahi NZTA S450.127
[84] Buller Conservation Group S552.191 and Frida Inta S553.191
[85] Buller Conservation Group S552.120 and Frida Inta S552.120
[86] Buller District Council S538.265
[87] Westpower Limited S547.382
[88] Waka Kotahi NZTA S450.127
[89] Toka Tū Ake EQC S612.100 and Buller District Council S538.259
[90] Toka Tū Ake EQC S612.109
[91] O'Conor Institute Trust Board (S466.001) and Frank and Jo Dooley (S478.044)

were not currently identified as a Hospital Zone and considered a consequential amendment from this submission would be to rezoning these sites HOSZ. She supported this submission in part.

291. Ms Easton noted that when identifying the sites for the HOSZ, these three medical centres were considered. She explained that with the Moana Medical Centre and the Whataroa Medical Centre buildings were located on large sites with other facilities. She noted that to identify these two medical centres as HOSZ required a decision on how to split zone the sites and advised that the submission did not provide sufficient information to enable her to recommend a split zoning. She did not consider it appropriate to rezone the entire title for these sites, as this would mean that in the case of Moana, part of a school would be zoned as HOSZ; and in the case of Whataroa, unrelated residential and commercial development would be HOSZ. For this reason, she invited Te Mana Ora to provide more information on these sites and how they envisage they should be split-zoned at the hearing

292. In the case of the Ngākawau Medical Centre, Ms Easton noted that this occupied the entirety of a site currently zoned Settlement Zone in the proposed Plan. She supported BDC's request (538.606) to rezone the site HOSZ.

Hearing and Submitter Evidence/Statements

293. No evidence was presented at the hearing in relation to the submission points on the HOSZ Chapter as a whole.

Reporting Officer Reply Evidence

294. No other specific points were made in the Reply Evidence regarding the HOSZ Chapter.

Hearing Panel's Evaluation

295. The Panel accepts Ms Easton's reasons for not rezoning the Moana Medical Centre and the Whataroa Medical Centre as HOSZ. We agree that more detailed information is needed before a split zone could be considered. We agree that the rezoning of the Ngākawau Medical Centre is appropriate for the reasons provided by Ms Easton.

296. The Panel notes Ms Easton's recommended inclusion of Ngākawau in the Overview was not shown in Appendix 1 of the s42A Report or Right of Reply and consider this was an oversight by Ms Easton given her analysis in the s42A Report.

Hearing Panel's Recommendation

297. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends the submission point identified in the footnote below is accepted, and recommend the following change to the **Hospital Zone Planning Map**:

Hospital Zone Planning Map

The Ngākawau Medical Centre property at 1B Main Road, Hector is changed from Settlement Zone to Hospital Zone as shown in the map below:[92]

298. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends the submission point identified in the footnote below is accepted, and recommend that the following changes to the **Hospital Zone Overview:**

HOSPITAL ZONE

Overview

The HOSZ - Hospital Zone applies to the three public hospitals that are located on the West Coast/Te Tai o Poutini. It also applies to major medical centres and aged care facilities. Te Nikau, Grey Hospital and Health Centre is the main public regional hospital and is located in Greymouth/Māwhera. It provides a range of services that are essential to the social wellbeing and health for people and communities throughout the West Coast/Te Tai o Poutini. Buller and Reefton Hospitals provide a range of hospital and health services for the communities within the Buller District.

There are also medical centres at Fox Glacier/Weheka, Franz Josef/Waiau, Haast, Harihari, Hokitika, **Ngākawau,**[93] and Karamea and aged care facilities in Westport/ Kawatiri, Greymouth/Māwhera and Hokitika included within the zone.

The zone's purpose is to provide for efficient and effective operation and development of these regionally important medical facilities. It also provides for ancillary activities that are associated with each hospital, such as pharmacies, offices, administrative activities and commercial activities.

[92] Buller District Council S538.606
[93] Te Mana Ora S190.1136

The sites on which the hospitals are located are predominantly characterised by bulky buildings with large footprints. These buildings tend to generate higher volumes of passenger vehicle traffic compared with typical residential or business activities and as a result, have large areas of sealed parking. Signage is important for wayfinding and providing information about hospital facilities and lighting is important for wayfinding and safety. Sporadic noise is generated from ambulance sirens and helicopters.

Flexibility for medical facilities to develop, upgrade, expand and adapt is important. Some of the facilities run 24 hours per day and have special operational needs and environmental effects. The special purpose is to provide for a degree of operational flexibility, subject to environmental considerations, while ensuring neighbouring communities are aware of what is anticipated within the zone.

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for hospital activities, including:

a. ~~**Overlay Chapters** - the Overlay Chapters have provisions in relation to historic heritage; notable trees; sites and areas of significance to Māori; biodiversity; landscape; riparian areas; natural hazards; and the coastal environment. Where an activity is located within an overlay area (as identified in the planning maps) then the relevant overlay provisions apply.~~[94]

- **Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters - there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Hospital Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.**
- **Natural Hazards - natural hazards are widespread on the West Coast and in some locations natural hazard overlays may affect areas in the Hospital Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards Chapter.**
- **Coastal Environment - in some locations areas of Hospital Zone may be within the Coastal Environment. The Coastal Environment Chapter contains additional provisions on how these areas must be managed.**
- **Ecosystems and Indigenous Biodiversity – the Ecosystems and Indigenous Biodiversity Chapter contains the provisions around the management of indigenous vegetation, including within the Hospital Zone.**
- **Noise** - The Noise Chapter contains the provisions for managing noise effects from sites in the HOSZ - Hospital Zone.
- **Signs** - The Signs Chapter contains the provisions for signs, including those within the HOSZ - Hospital Zone.
- **Light** - The Light Chapter contains the provisions for artificial outdoor light, including lighting within the HOSZ - Hospital Zone.

[94] Royal Forest and Bird Protection Society Incorporated S560.391, S560.0541

Definitions and HOSZ – Hospital Zone Objectives and Policies

Submissions and Further Submissions

299. Two submission points[95] and a further submission point sought amendments to the definition of "*Healthcare and Medical Activities*" to include *"aged care facilities and associated residential activity, including independent living".*

300. Three submission points in support were received on the HOSZ objectives.

301. Five submission points relating to the HOSZ policies were summarised in a Table on pages 58-59 of the s42A Report. Three submissions sought to retain the provision as notified and two sought amendments.

Section 42A Report

Definitions

302. Ms Easton supported the O'Connor Institute Trust Board (S466.004) and Frank and Jo Dooley's (S478.047) request to amend the definition of "*Healthcare and Medical Activities"* to include "*aged care facilities"* but did not support the inclusion of the reference to *"associated residential activity, including independent living"* because she considered that the intent of the zone did not support general residential accommodation.

303. Ms Easton recommended the following amendment to the definition of Healthcare and Medical Activities:

> **Healthcare and Medical Activities**
> means
> a. medical and psychiatric assessment, diagnosis, treatment, rehabilitation and in-patient services, including operating theatres;
> b. dispensaries;
> c. outpatient departments and clinics;
> d. medical research and testing facilities, including diagnostic laboratories;
> e. medical training and education;
> f. ambulance facilities;
> g. first aid and other health-related training facilities;
> h. rehabilitation facilities, including gymnasiums and pools;
> i. palliative facilities;
> j. hospice facilities;
> k. **aged care facilities**;
> l. ~~k.~~ residential care services and facilities;
> m. ~~l.~~ temporary living accommodation;
> n. ~~m.~~ secure facilities;
> o. ~~n.~~ mortuaries; and
> p. ~~o.~~ operations and maintenance support services, including laundries, kitchens, cafeterias, refreshment facilities, generators, substation, storage facilities, ancillary offices, ancillary retail, ancillary childcare and ancillary business services and workshops

[95] The O'Connor Institute Trust Board S466.004 and Frank and Jo Dooley S478.047

Objectives and Policies

304. Ms Easton accepted the submission points to retain the objectives as notified and recommended no changes to the HOSZ objectives.

305. Ms Easton supported the submissions[96] that sought for aged care facilities to be specifically identified in the policies. She considered that Policy HOSZ-P1, which determines the types of facilities expected within the zone, should also specifically include aged care facilities. In response to Panel questions regarding the inclusion of "*ancillary residential activity, including independent living*", Ms Easton noted that the provisions were very enabling.

306. Ms Easton recommended amendments to HOSZ-P1 as follows:

> **POLICY HOSZ – P1**
>
> Allow activities that are compatible with the role, function and predominant character of the HOSZ - Hospital Zone, including:
>
> a. Major healthcare activities;
> b. Medical and health services;
> c. Helicopter facilities, including helicopter take-off and associated fuelling and service facilities at Te Nikau Grey Hospital, Buller Integrated Health Facility and Reefton Hospital sites;
> d. Building activities;
> e. Carparking;
> f. Emergency response services;
> g. Temporary accommodation;
> h. Ancillary retail, café and service facilities; ~~and~~
> i. Ancillary community facilities; **and**
> j. **Aged care facilities**.

Hearing and Submitter Evidence/Statements

307. Mr Mark Lile provided a statement of evidence for the O'Connor Institute Trust Board addressing HOSZ-P1. He supported the s42A Report recommendation to add '*aged care facilities*' to the policy and noted this was consistent with the definition of '*Healthcare and Medical Activities'*. However, he noted the submission sought to add '*aged care facilities and associated residential activities, including independent living*'.

308. Mr Lile explained the O'Connor Home site at 190 Queen Street was a large site that could accommodate residential retirement village living as an extension of the activities and services provided at the site. He noted this was not for general residential accommodation but for a partner or spouse whose partner or spouse in in hospital care or the dementia ward on the site. He provided photographs of the site to show the opportunity for residential retirement village (type) living between the existing and consented wings of the buildings and the residential zone.

Reporting Officer Reply Evidence

309. Minute 34 directed that the Reporting Officer meet with Mr Lile, for the O'Connor Institute Trust Board, to discuss the definition of Healthcare and Medical Facilities, a different zoning for the submitter's site and the potential for bespoke provisions. In Reply, Ms Easton noted agreement that a different zoning for the site was not appropriate. She did

[96] The O'Connor Institute Trust Board S466.003 and Frank and Jo Dooley S478.046

not support a bespoke provision for reasons of plan integrity and complexity. However, based on discussions with Mr Lile, she recommended changes to the definition of *'Healthcare and Medical Activities'* as follows:

> **Healthcare and Medical Activities**
> means
> a. medical and psychiatric assessment, diagnosis, treatment, rehabilitation and in-patient services, including operating theatres;
> b. dispensaries;
> c. outpatient departments and clinics;
> d. medical research and testing facilities, including diagnostic laboratories;
> e. medical training and education;
> f. ambulance facilities;
> g. first aid and other health-related training facilities;
> h. rehabilitation facilities, including gymnasiums and pools;
> i. palliative facilities;
> j. hospice facilities;
> k. ~~aged care facilities;~~
> l. ~~k.~~ residential care services and facilities;
> m. ~~l.~~ temporary living accommodation;
> n. **retirement villages where these are ancillary to the hospital activity**;
> o. ~~m.~~ secure facilities;
> p. ~~n.~~ mortuaries; and
> q. ~~o.~~ operations and maintenance support services, including laundries, kitchens, cafeterias, refreshment facilities, generators, substation, storage facilities, ancillary offices, ancillary retail, ancillary childcare and ancillary business services and workshops.

310. The Reply recorded Ms Easton and Mr Lile agreed that the amendments to this definition would provide for a level of retirement living that was appropriate and addressed the submitter's concerns.

Hearing Panel's Evaluation

311. The note that the notified definition for *'Healthcare and Medical Activities'* is not accurately recorded in the s42A Report (paragraph 180) or in the Right of Reply, as clause (b) '*aged care facilities'* are already included in the notified Plan. We recommend clause (b) is retained as notified.

312. The Panel accepts Ms Easton's recommendation to add a new clause '*retirement villages where these are ancillary to the hospital activity'* and accept the submission points of The O'Connor Institute Trust Board S466.004 and Frank and Jo Dooley S478.047.

313. The Panel also considers this recommended amendment to the definition for *'Healthcare and Medical Activities'* should be reflected in HOSZ-P1. We accept Ms Easton's recommendation to add *'Aged care facilities'* but recommend also adding ''*Aged care facilities, including retirement villages where these are ancillary to the hospital activity'.* We accept the submission points of The O'Connor Institute Trust Board S466.003 and Frank and Jo Dooley S478.046.

314. The Panel agrees with Ms Easton's recommendation to retain the HOSZ objectives as notified.

Hearing Panel's Recommendations

315. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the submission points identified in the footnote below are accepted, and recommend that the following changes to the **Definitions**:

Definitions

Healthcare and Medical Activities
means

a. medical and psychiatric assessment, diagnosis, treatment, rehabilitation and in-patient services, including operating theatres;
b. aged care facilities;
c. dispensaries;
d. outpatient departments and clinics;
e. medical research and testing facilities, including diagnostic laboratories;
f. medical training and education;
g. ambulance facilities;
h. first aid and other health-related training facilities;
i. rehabilitation facilities, including gymnasiums and pools;
j. palliative facilities;
k. hospice facilities;
l. residential care services and facilities;
m. temporary living accommodation;
n. **retirement villages where these are ancillary to the hospital activity**;[97]
~~n.~~**o.** secure facilities;
~~o.~~**p.** mortuaries; and
~~p.~~**q.** operations and maintenance support services, including laundries, kitchens, cafeterias, refreshment facilities, generators, substation, storage facilities, ancillary offices, ancillary retail, ancillary childcare and ancillary business services and workshops

316. The Panel recommends the **HOSZ objectives** are retained as notified, as shown below:

Hospital Zone Objectives

HOSZ-O1

To ensure the safe and efficient operation, maintenance, upgrading and expansion of the West Coast/Te Tai o Poutini hospitals, medical centres and aged care facilities.

HOSZ- O2

To recognise the scale, form, nature and use of development at the Te Nikau Grey Hospital, Reefton Hospital and Buller Integrated Health Facility sites. These sites are characterised by:

a. Large scale grounds and buildings which accommodate major healthcare activities and ancillary support activities;
b. A range of scales of buildings; and
c. A spacious and open environment.

[97] The O'Connor Institute Trust Board S466.004 and Frank and Jo Dooley S478.047

317. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the submission points identified in the footnote below is accepted or accepted in part, and recommend the following changes to the **Hospital Zone policies**:

Hospital Zone Policies

HOSZ-P1

Allow activities that are compatible with the role, function and predominant character of the HOSZ - Hospital Zone, including:

a. Major healthcare activities;
b. Medical and health services;
c. Helicopter facilities, including helicopter take-off and associated fuelling and service facilities at Te Nikau Grey Hospital, Buller Integrated Health Facility and Reefton Hospital sites;
d. Building activities;
e. Carparking;
f. Emergency response services;
g. Temporary accommodation;
h. Ancillary retail, café and service facilities; ~~and~~
i. Ancillary community facilities; **and**
j. Aged care facilities, including retirement villages where these are ancillary to the hospital activity.[98]

HOSZ-P2

Require activities within the HOSZ - Hospital Zone to maintain the residential amenity of adjoining residential sites by:

1. Ensuring structures are of a bulk, height and form that minimises adverse dominance effects on adjoining residential activities;
2. Achieving adequate separation distances and/or setbacks to minimise adverse daylighting and shading effects;
3. Managing adverse noise and light overspill within adjoining residential sites;
4. Providing screening to minimise adverse visual effects for adjoining residential sites; and
5. Avoiding industrial and non-hospital related commercial and residential activities within the zone.

HOSZ - Hospital Zone Rules

Submissions and Further Submissions

318. Six submission points relating to **HOSZ-R1** were summarised in a Table on page 60 of the s42A Report. One submission point supported the retention of the rule as notified. Four submission points sought amendments, and one opposed the rule in part.

319. Two submission points and two further submission points relating to **HOSZ-R2** were summarised in a Table on page 61 of the s42A Report. One submission point supported the

[98] The O'Connor Institute Trust Board S466.003 and Frank and Jo Dooley S478.046

retention of the rule as notified. One submission point and two further submission points sought amendments.

320. Two submission points relating to **HOSZ-R3** were received, one supported the retention of the rule as notified and one sought amendment.

321. Two submission points were received supporting **HOSZ-R4** as notified.

322. Two submission points were received supporting **HOSZ-R5** as notified.

323. Four submission points relating to **HOSZ—R6** were summarised in a Table on page 62 of the s42A Report. Two submission points supported the retention of the rule as notified, one submission sought amendment and one requested that the rule be deleted.

324. Three submission points relating to **HOSZ—R7** were summarised in a Table on page 62 of the s42A Report. Two submission points supported the retention of the rule as notified and one sought amendment.

325. Two submission points were received supporting **HOSZ-R8** as notified.

326. Two submission points were received supporting **HOSZ-R9** as notified.

327. Four submission points relating to **HOSZ-10** were summarised in a Table on page 63 of the s42A Report. Two submission points supported the retention of the rule as notified and two supported in part but sought amendments.

328. Two submission points were received supporting **HOSZ-R11** as notified.

329. Two submission points were received supporting **HOSZ-R12** as notified.

330. The Panel has considered the submissions and further submissions received and adopts the summaries in the s42A Report.

Section 42A Report

HOSZ – R1

331. Ms Easton acknowledged the support from Te Mana Ora and BDC. She was supportive of BDC's (S538.594) requests to amend clause (6) regarding recession planes for consistency with provisions in other chapters but did not support amendments to clause (4) regarding the screening of waste storage areas.

332. Ms Easton supported the O'Connor Institute Trust Board (S466.005) and Frank and Jo Dooley's (S478.005) request to amend clauses (3) and (5) so that they did not contradict each other. Ms Easton noted that in both instances there was a 5m setback from a residential zone. She acknowledged clause (3) unnecessary and recommended it be deleted.

333. Ms Easton did not support the O'Connor Institute Trust Board (S466.006) and Frank and Jo Dooley's (S478.049) request to reduce the setback from the General Residential Zone boundary from 5m to 2m. She noted that a 5m setback ensured that large buildings, and potentially noisy activities, did not impinge on the amenity values of adjacent residential properties.

334. Ms Easton recommended HOSZ–R1 be amended as follows:

HOSZ – R1
Healthcare and Medical Activities and Buildings Activity Status Permitted
Where:

1. Any ancillary commercial activity does not exceed 200m^2 gross floor area or 10% of the hospital building footprint per commercial activity per site, whichever is the lesser;
2. The maximum building height above ground level is:
    a. 12 metres at the Te Nikau Grey Hospital, Reefton Hospital and Buller Integrated Health Centre Site; and
    b. 10m at all other locations in the zone; and
    c. This does not include solar water heating components, antennas, aerials, flues, chimneys, satellite dishes (less than 1m in diameter) and architectural features (e.g. finials, spires) that do not exceed the height by more than 1m.
3. ~~The maximum building length is 20m where this is within 5m of an adjoining RESZ - Residential Zone;~~
4. All outdoor rubbish and collection areas must be fully screened with a fence that is

    1.8m in height measured from ground level;
5. Any building or structure including car parking areas, outdoor storage and rubbish collection areas must be setback:
    a. 5m from any RESZ - Residential Zone or OSRZ - Open Space and Recreation Zone; and
    b. 5m from the road boundary; and
6. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~. This standard does not apply to:
    a. Road boundaries;
    b. Buildings on adjoining sites that have a common wall along the boundary;
    c. Boundaries abutting an access lot or right of way, in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;
    d. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and
    e. Solar panels and solar water heaters provided; these do not exceed the height in relation to the boundary plane by more than 0.5m vertically.

Advice Note:

1. Where Healthcare and Medical Facilities are located within one of the Natural Hazard Overlays, the relevant rules for sensitive activities and critical response facilities of the Natural Hazards Chapter will apply.
2. Where Healthcare and Medical Facilities are located within the Airport Noise Contour boundary, the acoustic insulation requirements of Rule NOISE - R3 will apply.

3. **Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.**

Activity status where compliance not achieved: Restricted Discretionary

HOSZ – R2

335. Ms Easton acknowledged the support of Te Mana Ora (S190.1142) for Rule HOSZ–R2. She supported BDC's (S538.595) request that medical centres be included within the rule given this was the intention of the rule.

336. Ms Easton recommended HOSZ–R2 be amended as follows:

HOSZ – R2 Helicopter facilities, including helicopter pads and associated fuelling and servicing facilities.
Activity Status Permitted.

Where:

1. These are located at the Te Nikau Grey Hospital, Reefton Hospital or Buller Integrated Health Facility **or Medical Centre** sites only;
2. All performance standards for Rule HOSZ–R1 are complied with.

HOSZ – R3

337. Ms Easton acknowledged the support of Te Mana Ora (S190.1143) for Rule HOSZ–R3. She supported BDC's (S538.596) request to remove the exception for hose drying towers in relation to the height standards given there were no fire station activities identified within this zone.

338. Ms Easton recommended that HOSZ-3 be amended as follows:

HOSZ - R3 Community Facilities and Emergency Service Facilities Activity Status Permitted
Where:

1. All performance standards for Rule HOSZ -R1 are complied with ~~except that hose drying towers associated with Emergency Service Facilities are exempt from height standards~~; and
2. Any community facility is ancillary to and/or supports healthcare and medical activity.

HOSZ – R4 and R5

339. Ms Easton acknowledged the support of Te Mana Ora (S190.1144 and S190.1145).

HOSZ – R6

340. Ms Easton acknowledged the support of Te Mana Ora (S190.1146) and GDC (S608.795).

341. Ms Easton supported BDC's (S616.011) request to delete relocated buildings from the rule. She noted that building consents were required for all relocated buildings and considered that within the HOSZ no further regulation under the district plan was unnecessary.

342. Ms Easton did not support the New Zealand Heavy Haulage Association Inc (S616.011) request to amend Rule HOSZ-R6 because she recommended that the rule be deleted.

HOSZ – R7 to HOSZ - R12

343. Ms Easton supported the submission points from Te Mana Ora (S190.11447, S190.11448, S190.11449, S190.1150, S190.1151, S190.1152) and BDC (S538.600, S538.601, S538.602, S538.603, S538.604, S538.605) in support of rules HOSZ – R7 to HOSZ – R12.

344. Ms Easton supported GDC's (S608.796) request to include a new matter of discretion regarding the wastewater, water supply, and stormwater management design compliance with NZS 4404:2010 in HOSZ–R7. She considered it was essential to ensure that hospitals were served by appropriately designed and located water services infrastructure to mitigate adverse environmental effects.

345. The O'Connor Institute Trust Board (S466.007) and Frank and Jo Dooley (S478.050) submission points supported HOSZ-R10, provided that the definition of Healthcare and Medical Activities was amended as per their other submission points. As previously noted, Ms Easton did not support all the amendments sought by these submitters to the definition. While there was some provision for some types of supported residential care in the definition, she considered the HOSZ was not intended to be a zone that is predominantly used for residential activities.

346. Ms Easton recommended HOSZ–R7 be amended as follows:

> **HOSZ - R7 Activities, Buildings, Facilities, Minor Structures, Fences, Walls and Retaining Walls Provided for as Permitted Activities but not meeting the Permitted Activity Standards**
>
> **Activity Status Restricted Discretionary**
>
> **Discretion is restricted to:**
>
> a. Design, size and location of buildings, structures and facilities;
>
> b. Screening, planting and landscape measures;
>
> c. Shading and privacy impacts on neighbouring properties;
>
> d. Any adverse effects on the streetscape;
>
> e. Any adverse effects on the amenity of neighbouring properties;
>
> f. The extent to which the infringement is necessary due to the shape, natural or physical features of the site; and
>
> g. The extent to which any helicopter facilities are ancillary to and necessary for effective Healthcare and Medical Activities in the zone; and
>
> h. **Management of wastewater, stormwater and water supply in accordance with the relevant requirements of NZS 4044: 2010.**

347. Ms Easton recommended that the Ngākawau Medical Centre site at 1B Main Road, Hector, be rezoned to Hospital Zone.

Hearing and Submitter Evidence/Statements

348. Mr Lile, for the O'Connor Institute Trust Board, confirmed acceptance of the s42A Report recommendations, except for HOSZ-R10. He considered HOSZ-R10 should not capture '*aged care facilities and associated residential activities, including independent living*' for the reasons outlined in relation to HOSZ-P1.

Reporting Officer Reply Evidence

349. As outlined above, Ms Easton addressed the O'Connor Institute Trust Board submission point in relation to HOSZ-R10 by recommending amendments to the definition *'Healthcare and Medical Activities'*.

Hearing Panel's Evaluation

350. In relation to **HOSZ-R1**, the Panel accept Ms Easton's reasoning and recommendation to amend clause (6) and add a new advice note; and to delete clause (3).

351. In relation to **HOSZ-R2**, the Panel agree with Ms Easton's recommendation to include '*Medical Centres*' within the rule given this was the original intention of the rule.

352. The Panel agrees that the exception for the height of hose drying towers in clause (1) of **HOSZ-R3** should be deleted given there are no fire station activities identified within this zone.

353. The Panel accepts Ms Easton recommendation to retain **HOSZ-R4** and **HOSZ-R5** as notified.

354. In relation to **HOSZ-R6**, the Panel accepts Ms Easton's reasons and recommendation to delete this rule.

355. The Panel accepts Ms Easton recommendation to add new clause (h) to **HOSZ–R7** regarding the wastewater, water supply, and stormwater management design compliance with NZS 4404:2010.

356. The Panel accepts Ms Easton's recommendation to retain **HOSZ-R8** and **HOSZ-R9** as notified.

357. In relation to **HOSZ-R10**, the Panel accepts Ms Easton's recommendation to retain the rule as notified. We agree that the recommended changes to the definition of '*Healthcare and Medical Activities*' addresses The O'Connor Institute Trust Board (S466.007) and Frank and Jo Dooley (S478.050) submission points to provide for associated residential living and recommend accepting these submission points.

358. The Panel accepts Ms Easton's recommendation to retain **HOSZ-R11** as notified.

359. The Panel notes that **HOSZ-R12** is essentially a repeat of HOSZ-R8 and can therefore be deleted. We consider this is a Clause 16(2) for the First Schedule of the RMA matter.

Hearing Panel's Recommendation

354. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommend that the following changes to the **Hospital Zone Rules:**

Hospital Zone Rules

Permitted Activities

HOSZ – R1 Healthcare and Medical Activities and Buildings

Activity Status Permitted
Where:

1. Any ancillary commercial activity does not exceed 200m^2 gross floor area or 10% of the hospital building footprint per commercial activity per site, whichever is the lesser;
2. The maximum building height above ground level is:
   a. 12 metres at the Te Nikau Grey Hospital, Reefton Hospital and Buller Integrated Health Centre Site; and
   b. 10m at all other locations in the zone; and
   c. This does not include solar water heating components, antennas, aerials, flues, chimneys, satellite dishes (less than 1m in diameter) and architectural features (e.g. finials, spires) that do not exceed the height by more than 1m;
3. ~~The maximum building length is 20m where this is within 5m of an adjoining RESZ - Residential Zone;~~[99]
4. All outdoor rubbish and collection areas must be fully screened with a fence that is 1.8m in height measured from ground level;
5. Any building or structure including car parking areas, outdoor storage and rubbish collection areas must be setback:
   a. 5m from any RESZ - Residential Zone or OSRZ - Open Space and Recreation Zone; and
   b. 5m from the road boundary; and
6. No building shall project beyond a building envelope defined by a recession plane as defined in Appendix Two to commence 2.5m above any site boundary ~~except where neighbouring property owner's written approval is provided to the Council at least 10 working days prior to the works commencing~~.[100] This standard does not apply to:
   a. Road boundaries;
   b. Buildings on adjoining sites that have a common wall along the boundary;
   c. Boundaries abutting an access lot or right of way in which case the furthest boundary of the access lot or right of way may be used for assessing compliance with this standard;
   d. Antennas, aerials, satellite dishes (less than 1m in diameter), chimneys, flues and architectural features (e.g. finials, spires) provided these do not exceed the recession plane by more than 3m vertically; and
   e. Solar panels and solar water heaters provided, these do not exceed the height in relation to the boundary plane by more than 0.5m vertically.

Advice Note:

1. Where Healthcare and Medical Facilities are located within one of the Natural Hazard Overlays, the relevant rules for sensitive activities and critical response facilities of the Natural Hazards Chapter will apply.
2. Where Healthcare and Medical Facilities are located within the Airport Noise Contour boundary, the acoustic insulation requirements of Rule NOISE - R3 will apply.

[99] The O'Connor Institute Trust Board S466.005 and Frank and Jo Dooley S478.048
[100] Buller District Council S538.594

3. **Where boundary setbacks are infringed, the Deemed Permitted Activity Boundaries process will apply where the neighbouring property owner's written approval is provided to the relevant district council.** [101]

HOSZ – R2 Helicopter facilities including helicopter pads and associated fuelling and servicing facilities

Activity Status Permitted
Where:
1. These are located at the Te Nikau Grey Hospital, Reefton Hospital or Buller Integrated Health Facility **or Medical Centre**[102] sites only;
2. All performance standards for Rule HOSZ – R1 are complied with.

HOSZ - R3 Community Facilities and Emergency Service Facilities

Activity Status Permitted
Where:
1. All performance standards for Rule HOSZ -R1 are complied with ~~except that hose drying towers associated with Emergency Service Facilities are exempt from height standards~~[103]; and
2. Any community facility is ancillary to and/or supports healthcare and medical activity.

Activity status where compliance not achieved: Restricted Discretionary

HOSZ - R4 Minor Structures

Activity Status Permitted
Where:
All performance standards for Rule HOSZ -R1 are complied with;
Masts, poles, aerials and pou whenua must not exceed 7m in height;
3. Any antenna dish must be less than 1m in diameter and not project more than 3.5m above the highest point of any building they are attached to;
4. Any ornamental or garden structure must not exceed 2.4 m in height; and
5. Any other structure must not exceed 10m^2 and 2m in height.

Activity status where compliance not achieved: Restricted Discretionary

HOSZ - R5 Fences, Walls and Retaining Walls

Activity Status Permitted
Where:
1. Fences, walls and retaining walls are a maximum 2m height above ground level.

Activity status where compliance not achieved: Restricted Discretionary

~~**HOSZ - R6 Relocated Buildings**~~

~~**Activity Status Permitted**~~
~~Where:~~
~~1. All performance standards for Rule HOSZ -R1 are complied with;~~

[101] Buller District Council S538.594
[102] Buller District Council S538.595
[103] Buller District Council S538.596

~~2. A building pre-inspection report shall accompany the application for a building consent for the destination site. That report is to identify all reinstatement works that are to be completed to the exterior of the building. The report shall include a certification by the property owner that the reinstatement works shall be completed within a 12 month period;~~

~~3. The building shall be located on permanent foundations approved by building consent no later than 2 months of the building being moved to the site; and~~

~~4. All other reinstatement work required by the building inspection report and the building consent to reinstate the exterior of any relocated dwelling shall be completed within 12 months of the building being delivered to the site. This reinstatement work is to include connections to all infrastructure services and closing in and ventilation of the foundations.~~

~~**Activity status where compliance not achieved**: Restricted Discretionary~~[104]

Restricted Discretionary Activities

HOSZ - R~~7~~6 Activities, Buildings, Facilities, Minor Structures, Fences, Walls and Retaining Walls Provided for as Permitted Activities but not meeting the Permitted Activity Standards

Activity Status Restricted Discretionary
Discretion is restricted to:

a. Design, size and location of buildings, structures and facilities;
b. Screening, planting and landscape measures;
c. Shading and privacy impacts on neighbouring properties;
d. Any adverse effects on the streetscape;
e. Any adverse effects on the amenity of neighbouring properties;
f. The extent to which the infringement is necessary due to the shape, natural or physical features of the site; ~~and~~
g. The extent to which any helicopter facilities are ancillary to and necessary for effective Healthcare and Medical Activities in the zone; **and**
h. **Management of wastewater, stormwater and water supply in accordance with the relevant requirements of NZS 4044: 2010**.[105]

Discretionary Activities

HOSZ - R~~8~~7 Any Activity that is not a Permitted Activity, a Restricted Discretionary Activity or a Non-complying Activity

Activity Status Discretionary

Activity status where compliance not achieved: N/A

Non-complying Activities

HOSZ - R~~9~~8 Commercial Activity not ancillary to a Healthcare and Medical Activity

Activity Status Non-complying

Activity status where compliance not achieved: N/A

HOSZ - R~~10~~9 Residential Activity not provided for as a Permitted Activity

[104] Buller District Council S538.599
[105] Grey District Council S608.796

Activity Status Non-complying

Activity status where compliance not achieved: N/A

HOSZ - R11~~0~~ Industrial Activity

Activity Status Non-complying

Activity status where compliance not achieved: N/A

~~**HOSZ - R121 Any activity not provided for by another Rule in the zone**~~

~~**Activity Status Non-complying**~~

~~**Activity status where compliance not achieved:** N/A~~[106]

2.4. MPZ - MĀORI PURPOSE ZONE

MPZ as a Whole

Submissions and Further Submissions

360. Eighteen submission points and two further submission points were received on the Māori Purpose Zone (**MPZ**) as a whole. These were summarised in a Table on pages 68-71 of the s42A Report. The Panel has considered the submissions and further submissions received and adopts the summaries in the s42A Report.

Section 42A Report

Definitions

361. Ms Easton did not support the request of Poutini Ngāi Tahu (S620.034) to amend the definition of '*Iwi/Papatipu Rūnanga Management Plan'*, to include '*a relevant planning document recognised by Te Rūnanga o Ngāi Tahu as the iwi authority as an Iwi Management Plan'*. She noted that the purpose of the Iwi/Papatipu Rūnanga Management Plan was to give confidence to the Councils that matters of amenity and infrastructure and in particular neighbouring impacts of development were appropriately identified and managed, while allowing for a wide range of activities on MPZ land that was substantially broader than other, comparable, rural zoned land.

362. Ms Easton did not support the request of Poutini Ngāi Tahu (S620.035) to delete the definition of Māori Land. However, she noted Poutini Ngāi Tahu and Te Tumu Paeroa had provided a joint statement in relation to the definition of '*Papakāinga*', which relied on the definition of '*Māori Land*' (with some amendment). Ms Easton recommended that the definition should remain in the Plan, with the agreed-upon amendment.

363. Ms Easton noted Poutini Ngāi Tahu (S620.036) supported the definition of '*Māori Purpose Activities*'.

364. Forest and Bird (S560.425, S560.074) sought that the difference between the definition of '*Māori Purpose Activities'* and '*Poutini Ngāi Tahu Activities'* be clarified. Ms Easton supported these submissions in part but noted that both terms were already defined in the Plan. She explained '*Māori Purpose Activities*' specifically related to activities

[106] Clause 16(2) of the RMA

undertaken in the MPZ and included a wider list of activities than '*Poutini Ngāi Tahu Activities'*, which were undertaken across the West Coast and outside of the MPZ. She considered the definitions and difference were clear and no amendments were required in response to submissions.

365. Forest and Bird (S560.069) sought that the intended meaning of '*integrated Māori development'* within the definition of '*Māori Purpose Activities'* be clarified. Ms Easton did not support this submission as she considered that the list in the definition made it clear the types of development that may be involved.

366. Poutini Ngāi Tahu (S620.037) supported the definition of '*Papakāinga*'. Te Tumu Paeroa (S440.001) sought that this definition be amended. However, as discussed above, Poutini Ngāi Tahu and Te Tumu Paeroa provided a joint statement regarding the definition of '*Papakāinga*'. Ms Easton supported the inclusion of the agreed-upon definition.

367. Ms Easton supported the submission point from Poutini Ngāi Tahu (S620.038), which sought to amend the definition of '*Papatipu Rūnanga'* to be consistent with how other definitions taken from legislation were set out.

MPZ Overview

368. Ms Easton supported the request of Poutini Ngāi Tahu (S620.268) to delete the paragraph that related to what might happen if land ceases to be Māori Land and delete the reference to the General Rural Zone in the '*Other relevant Te Tai o Poutini Plan provisions'*. She did not support the other changes to the '*Other relevant Te Tai o Poutini Plan provisions'* because she recommended standardising this section of the zone overviews throughout the Plan in response to a Forest and Bird submission. She did not support the deletion of the reference to the Landscape Chapter because it contained provisions that relate to MPZ land.

369. Forest and Bird (S560.399) requested greater clarity in the Overview and in the rules for this zone that the provisions of the ECO Chapter apply. They also sought that other relevant chapters were referenced. Ms Easton supported this submission in part and considered that the "*Other relevant Te Tai o Poutini Plan provisions*" section of the Overview was the appropriate location for this information, as per the standard format she had recommended for other zones and in other s42A Reports.

MPZ Chapter as a Whole

370. Ms Easton acknowledged the support of WDC (S181.055) and BDC (S538.579) for the Chapter; and Te Mana Ora's (S190.1175) support for tino rangatiratanga.

371. Ms Easton supported the request of Poutini Ngāi Tahu (S620.305) to change zoning of the cultural redress land, known as the Lake Moeraki Reserve (Lot 1, Deposited Plan 3772), SASM 185 within the Plan, from GRUZ to MPZ because the land was consistent with the criteria for MPZ.

372. Māwhera Incorporation (S621.030) opposed the zoning of some of their lands as MPZ and opposed any zoning being placed on their land across the West Coast. Ms Easton did not support this submission and noted that all land was required to be zoned.

373. Poutini Ngāi Tahu (S620.278) sought that this chapter be amended to reflect relief sought in their submissions on overlay provisions, as they considered that in some cases the zone provisions should have primacy over the overlays. Ms Easton did not support this submission. She considered the structure of the Plan was clear and provided that the overlay provisions in the District-Wide Matters section of the Plan sit over the zones.

Hearing and Submitter Evidence/Statements

374. Te Tumu Paeroa provided verbal evidence to the hearing requesting that a further 12 blocks they administered be zoned MPZ.

375. The Poutini Ngāi Tahu hearing statement included commentary on definitions and the overview section, as well as requesting the rezoning of specific sites (Appendix B). Appendix A set out the s42A Report response to S620.034, and in reply set out a revised amendment to the definition for '*Iwi/Papatipu Rūnanga Management Plan'* as follows:

means a plan developed by Poutini Ngāi Tahu and:

(1)

a. Endorsed by the relevant Poutini Ngāi Tahu papatipu rūnanga – Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawho; or

b. In areas where the takiwa of the two rūnanga overlaps endorsed by both rūnanga; **or**

c. **A relevant planning document recognised by Te Runanga o Ngai Tahu, as the iwi authority, as an Iwi Management Plan; and**

(2) In relation a Māori Purpose Zone an Iwi/Papatipu Rūnanga Management Plan ~~Which~~ **also must** include the following information for any **MPZ** site it applies to:

i. a description of activities, buildings and structures, existing or proposed to be established within any development area;

ii. the bulk and location of any buildings and structures;

iii. how any adverse effects resulting from proposed activities, particularly at zone boundaries, will be avoided, remedied or mitigated;

iv. the provision of sufficient infrastructure to service the needs of all activities proposed to be established; and

v. the protection of mauri of any identified features potentially affected by any activities, buildings or structures proposed to be established.

Reporting Officer Reply Evidence

376. In response to the Poutini Ngāi Tahu hearing statement requesting that the rezoning of specific sites to MPZ, Ms Easton considered there was no scope to consider the proposed changes, except for Lake Moeraki Reserve, which she has supported. She made no comment on the revised amendments to the definition for '*Iwi/Papatipu Rūnanga Management Plan*'

377. In response to the Te Tumu Paeroa verbal evidence seeking that a further 12 blocks they administer be included within the MPZ, Ms Easton considered that there was no scope for

the rezoning sought. She confirmed she had reviewed Te Tumu Paeroa's submission and noted this related solely to changes sought to the MPZ objectives and policies, and support for the MPZ rules.

Hearing Panel's Evaluation

378. The Panel accepts Ms Easton's reasons and recommended amendments to the Overview. We recommend changes that are consistent with our recommendations on the "*Other relevant Te Tai o Poutini Plan provisions*" section across the Plan. We also recommend amendment in response to the agreed resolution between Poutini Ngāi Tahu and Te Tumu Paeroa, including in relation to MPZ-O2, that settled submission points of Te Tumu Paeroa (e.g. S440.049).

379. The Panel agrees with the submission point of Poutini Ngāi Tahu that the notified definition of "*Māori land*" should be deleted from the Plan. This was the only submission point on the definition, and while scope is potentially provided between the notified definition and its deletion to make the amendments agreed between Poutini Ngāi Tahu and Te Tumu Paeroa, we do not see value in retaining the definition because it is not material to application of the chapter provisions.

380. Neither do we see value in incorporating reference to "*Māori land*" in the definition of "*Papakāinga*", the thrust of which remains unchanged by the amendments agreed between Poutini Ngāi Tahu and Te Tumu Paeroa. In either case, the definition signals that it is only relevant to Poutini Ngāi Tahu, rather than Māori land owners more broadly. The Panel understand, therefore, that the term "*Papakāinga*" will not be applied to developments undertaken on Māori land within the MPZ where the land owners do not whakapapa to Poutini Ngāi Tahu, which may include land owned by Māwhera Inc. We focus on the application of definitions in the rule framework and how development is provided for within the MPZ, relevant to Poutini Ngāi Tahu owned land and land held by other Māori land owners. Where the NPS-IB references "*specified Māori land*", the Panel discuss this in the Recommendation Report on the ECO Chapter.

381. The Panel agrees with amendments to the definition of "*Iwi/Papatipu Rūnanga Management Plan*" as sought by Poutini Ngāi Tahu (S620.034) and shown in their tabled hearing statement. In relation to the proposed addition in clause (c), to reference a planning document recognised by Te Rūnanga o Ngāi Tahu, this is understood to be consistent with the nature of Ngāi Tahu iwi management plans produced by both papatipu rūnanga and the iwi authority. The clarification that requirements in clause (2) apply in the context of MPZ zoned land we find a useful addition. The Panel consider use of these plans for MPZ zoned land in the context of each rule, while accepting that the recommended definition is appropriate. We also anticipate that tikanga will guide the development of these plans and is therefore a matter between the owners of Māori land within the MPZ and Poutini Ngāi Tahu, rather than a matter for determination under the Plan. In other words, the Panel do not expect a management plan to be created by Poutini Ngāi Tahu specific to a site in circumstances where this would not be appropriate in accordance with tikanga. We have considered the submission of Māwhera Inc in relation to this matter and find that tikanga is a relevant factor, but it is not for the Panel to determine its application.

382. The Panel accepts Ms Easton's recommendation to change the zoning of the land known as the Lake Moeraki Reserve (Lot 1, Deposited Plan 3772), SASM 185 within the Plan, from GRUZ to the MPZ because the land is consistent with the criteria for Māori Purpose Zone

land. We agree with Ms Easton that there is no scope to include rezoning land not included in the original submission.

383. The Panel agrees with Ms Easton that there is no scope within Te Tumu Paeroa's submission to rezone 12 blocks of land MPZ.

Hearing Panel's Recommendation

384. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the submission points identified in the footnotes below are accepted or accepted in part, and recommend that the following changes to the **Definitions:**

IWI/PAPATIPU RŪNANGA MANAGEMENT PLAN

Means a plan developed by Poutini Ngāi Tahu and:

(1)

a. Endorsed by the relevant Poutini Ngāi Tahu papatipu rūnanga - Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawho; or

b. In areas where the takiwa of the two rūnanga overlaps endorsed by both rūnanga; **or**

c. **A relevant planning document recognised by Te Rūnanga o Ngāi Tahu, as the iwi authority, as an Iwi Management Plan; and**

(2) In relation to a Māori Purpose Zone an Iwi/Papatipu Rūnanga Management Plan ~~Which~~ **also must** include~~s~~ the following information for any **MPZ** site it applies to:[107]

~~i~~**a**. A description of the activities, buildings and structures, existing or proposed to be established within any development area;

~~ii~~**b**. The bulk and location of any buildings and structures;

~~iii~~**c**. How any adverse effects resulting from proposed activities, particularly at zone boundaries, will be avoided, remedied or mitigated;

~~iv~~**d**. The provision of sufficient infrastructure to service the needs of all activities proposed to be established; and

~~v~~**e**.[108] The protection of mauri of any identified features potentially affected by any activities, buildings or structures proposed to be established.

~~**MĀORI LAND**~~

~~means:~~

~~a. Land owned by Te Rūnanga o Ngāi Tahu, Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio or one of their holding companies;~~

[107] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.035
[108] RMA First Schedule Clause 16(2)

~~b. Land gazetted or determined by order of the Māori Land Court as Māori reservation under s338 Te Ture Whenua Māori Act 1993;~~

~~c. Māori customary and Māori freehold land as defined in s4 and s129 of Te Ture Whenua Māori Act 1993;~~

~~d. Any land where:~~

~~i. A status declaration under the Māori Affairs Amendment Act 1967 was made converting Māori freehold land to general title, and where there have been no changes of ownership since the conversion other than to an owner's bloodline successor(s); or~~

~~ii. One or more owners are able to provide written evidence of Whakapapa to the original grantees of the land as confirmed by the Te Rūnanga o Ngāi Tahu Whakapapa Unit or the Māori Land Court; or~~

~~iii. The land is vested in a Trust constituted pursuant to Part 12 of Te Ture Whenua Māori Act 1993 or a Māori incorporation constituted pursuant to Part 13 of the Te Ture Whenua Māori Act 1993.~~ [109]

PAPAKĀINGA

means a development ~~for Poutini Ngāi Tahu residing on the West Coast providing~~ **of** residential accommodation for members of Poutini Ngāi Tahu and may also including include communal buildings and facilities**, for the benefit of members of Poutini Ngāi Tahu and others who whakapapa to Poutini Ngāi Tahu.** [110]

PAPATIPU RŪNANGA

has the same meaning as in the Ngāi Tahu Claims Settlement Act 1998 (as set out below):
means the Papatipu Rūnanga of Ngāi Tahu Whānui referred to in section 9 of Te Runanga o Ngai Tahu Act 1996. ~~[Ngāi Tahu Claims Settlement Act 1998]~~ [111]

385. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the submission points identified in the footnotes below are accepted or accepted in part, and recommend that the following changes to the **Māori Purpose Zone Overview**:

MĀORI PURPOSE ZONE

Overview

The purpose of the MPZ - Māori Purpose Zone is to enable tino rangatiratanga for Poutini Ngāi Tahu in relation to their own lands**,** and allow for their unique social, cultural, environmental and economic needs to be met within Te Tai o Poutini/the West Coast, **and a variety of uses of Māori land.** [112]

[109] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.035
[110] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.037, Te Tumu Paeroa – The office of the Māori Trustee S440.001
[111] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.268
[112] Consequential to agreement between Poutini Ngāi Tahu and Te Tumu Paeroa on MPZ-O2, in response to submission point S440.049

A key element of the rules in the zone, is the development of Iwi/Papatipu Rūnanga Management Plans. These plans will be developed by Poutini Ngāi Tahu and endorsed by the relevant rūnanga - Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio, **or Te Rūnanga o Ngāi Tahu.**[113] In areas where their takiw~~a~~**ā**[114] overlaps, the plan(s) will need to be endorsed by both **Papatipu** **R**~~r~~ūnanga. [115]

These Iwi/Papatipu Rūnanga Management Plans will enable Poutini Ngāi Tahu to undertake activities on specific sites in a way that reflects the unique identities and values of the sites, while managing the effects of the activities.

Once the Iwi/Papatipu Rūnanga Management Plan is lodged with the Council, many activities become **p**~~P~~ermitted.[116] Prior to that, the zone still provides for a wide range of **p**~~P~~ermitted **a**~~A~~ctivities[117] which enable Poutini Ngāi Tahu to use and develop the land within a cultural framework.

~~The MPZ – Māori Purpose Zone incorporates a variety of land types, but it is only Māori Land that should benefit from these provisions and enjoy the additional activities that can be undertaken within the Zone. When land is no longer Māori Land in this zone, other zone provisions should apply and a Plan Change will be required to amend the zone.~~[118]

Other relevant Te Tai o Poutini Plan provisions

It is important to note that in addition to the provisions in this chapter, a number of Part 2: District-wide Matters chapters also contain provisions that may be relevant for activities in the ~~GRUZ - General Rural Zone~~[119] MPZ – Māori Purpose Zone, including:

~~a. Overlay Chapters - the Overlay Chapters have provisions in relation to historic heritage; notable trees; sites and areas of significance to Māori; biodiversity; landscape; riparian areas; natural hazards; and the coastal environment. Where an activity is located within an overlay area (as identified in the planning maps) then the relevant overlay provisions apply.~~[120]

Sites and Areas of Significance to Māori, Historic Heritage and Notable Tree Chapters - there may be sites and areas of significance to Māori, historic heritage or notable trees identified on individual sites within the Māori Purpose Zone. Specific information on the provisions that apply to these can be found in the Sites and Areas of Significance to Māori, Historic Heritage, and Notable Trees Chapters.

Natural Hazards - natural hazards are widespread on the coast and in some locations natural hazard overlays may affect areas in the Māori Purpose Zone. Information on natural hazard overlays and provisions can be found in the Natural Hazards Chapter.

Natural Character and Margins of Waterbodies - in some locations areas of Māori Purpose Zone may extend into the riparian margins of waterbodies. The Natural Character and Margins of Waterbodies Chapter contains provisions on how these areas must be managed.

Ecosystems and Indigenous Biodiversity – The Ecosystems and Indigenous Biodiversity Chapter contains the provisions around the management of indigenous vegetation, including within the Māori Purpose Zone.

[113] Consequential to acceptance of S620.034
[114] RMA First Schedule Clause 16(2)
[115] RMA First Schedule Clause 16(2)
[116] RMA First Schedule Clause 16(2)
[117] RMA First Schedule Clause 16(2)
[118] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.268
[119] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.268
[120] Royal Forest and Bird Protection Society Incorporated Bird S560.399

Coastal Environment - where activities occur within the coastal environment, including areas of high or outstanding coastal natural character, the Coastal Environment Chapter contains provisions for activities within these areas.

General District Wide Matters - provisions in relation to earthworks, signs, subdivision and activities on the surface of water in particular may be relevant to many activities.

386. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part and recommends that the following changes to the **Māori Purpose Zone Planning Map**:

MĀORI PURPOSE ZONE

Rezoning

The land known as **Lake Moeraki Reserve (Lot 1 Deposited Plan 3772), SASM 185 within this plan, is to be rezoned from General Rural Zone to Māori Purpose Zone**[121]. This land is shown on the map below:

MPZ – Māori Purpose Zone Objectives

Submissions and Further Submissions

387. Nine submission points and two further submission points received on the MPZ objectives were summarised in a Table on pages 74-76 of the s42A Report.

388. Three submission points and one further submission point relating to **MPZ-O1.** One submission point supported the objective as notified and two sought amendments. A further submission from Poutini Ngāi Tahu opposed the submission of Te Tumu Paeroa.

[121] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.305

389. Three submission points and one further submission point relating to **MPZ-O2**. Two submission points supported the objective as notified and one sought amendment. A further submission from Poutini Ngāi Tahu opposed the submission of Te Tumu Paeroa, which sought amendments to the objective.

390. Three submission points relating to **MPZ-O3** Two submissions supported the objective as notified and one sought amendment.

Section 42A Report

391. In relation to Objective **MPZ-O1**, Ms Easton noted Te Mana Ora's (S190.1176) support. She supported the request of Poutini Ngāi Tahu (S620.269) to delete "*ancestra*l" in relation to land and delete the reference to Te Rūnanga o Ngāi Tahu in the objective. She agreed the term "*ancestral land*" was confusing and unnecessary in the context. She also agreed that the reference to "*Te Rūnanga o Ngāi Tahu*" should be deleted because it was included within the definition of Poutini Ngāi Tahu.

392. Ms Easton did not support Te Tumu Paeroa's (S440.048) request to include "*Māori landowners*" alongside Poutini Ngāi Tahu because she considered the statutory relationship with Poutini Ngāi Tahu was entirely different from that with Māori landowners. She noted the objectives and policies gave effect to those legal directions and agreements, whereas Māori landowners did not have a statutory relationship and were not subject to legal directions.

393. The Te Tumu Paeroa submission also sought a definition for "*ancestral land" and "Poutini Ngāi Tahu land*". Ms Easton did not support this and considered the definitions were unnecessary given her recommendation to delete *"ancestral*" and the term "*Poutini Ngāi Tahu land*" was only used once in a strategic direction policy.

394. In relation to Objective **MPZ-O2**, Ms Easton acknowledged the support from Poutini Ngāi Tahu (S620.270) and Te Mana Ora (S190.1177) and recommend the Objective be retained as notified.

395. Ms Easton did not support the submission point from Te Tumu Paeroa (S440.049) that sought the objective be amended to refer to Māori Landowners alongside Poutini Ngāi Tahu for the same reasons outlined in relation to MPZ – O1 above.

396. In relation to Objective **MPZ-O3**, Ms Easton acknowledged the support from WMS Group (S599.139) and Te Mana Ora (S190.1178). However, she supported the request of Poutini Ngāi Tahu (S620.271) to reword the objective to make it clearer and also recommended changes to improve readability.

Hearing and Submitter Evidence/Statements

397. The Poutini Ngāi Tahu hearing statement confirmed support for the s42A Report recommendations in relation to the objectives. It noted the objectives and policies of the MPZ were strongly worded towards enablement over protection and recommended the Panel balance this with the overlays and district-wide objectives and policies to still enable use on MPZ land.

398. Te Tumu Paeroa withdrew their submission point on MPZ-O1, after reaching agreement with Poutini Ngāi Tahu, through their written statement dated 22 August 2024.

399. In relation to MPZ-O2, Poutini Ngāi Tahu and Te Tumu Paeroa reached agreement on rewording this objective in response to the Te Tumu Paeroa submission point S440.049, as

recorded in their joint statement dated 14 August 2024. The submitters recommended including reference to use of Māori land and ensuring there was no doubt that this applied to both Poutini Ngāi Tahu and other owners of Māori land.

400. Ms Inta highlighted the poor wording of MPZ-O3 and considered this should be corrected, despite not submitting on the MPZ objectives.

Reporting Officer Reply Evidence

401. In Reply, Ms Easton agreed the poor wording of MPZ–O3 should be amended as follows:

> **MPZ - O3**
> Provide for ~~T~~the use and development of the MPZ - Māori Purpose Zone ~~is provided~~ for while recognising identified natural environment overlays and the contribution their values make to the wider community is recognised~~, and the appropriate use and development of the Zone is provided for~~.

Hearing Panel's Evaluation

402. The Panel accepts Ms Easton's reasoning and recommended amendments to **MPZ-O1,** which responds to the submission points of Poutini Ngāi Tahu, and the Panel acknowledge the withdrawal of the Te Tumu Paeroa submission point.

403. In relation to **MPZ-O2**, the Panel recommend adopting the wording agreed between Poutini Ngāi Tahu and Te Tumu Paeroa that resolved the Te Tumu Paeroa submission point S440.049 because it appropriately provides for the development and use of Māori land within the MPZ.

404. In relation to **MPZ-O3**, the Panel agrees with Ms Easton that the notified wording is poor and should be corrected. We note Ms Easton's recommended amendments did not include "*appropriate use and development*" and recommend this is retained to reflect the notified wording but in a better order, without changing the intent. We consider this also partly addresses the amendments requested by Poutini Ngāi Tahu (S620.271).

Hearing Panel's Recommendation

405. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommend that the following changes to the **Māori Purpose Zone Objectives**:

Māori Purpose Zone Objectives
MPZ – O1
The use and possession of ~~ancestral~~[122] land by Poutini Ngāi Tahu ~~and Te Rūnanga o Ngāi Tahu~~[123] is recognised and provided for within the MPZ - Māori Purpose Zone, within which Ngāi Tahu are able to exercise tino rangatiratanga.
MPZ – O2

[122] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.269
[123] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.269

The MPZ - Māori Purpose Zone specifically provides **for use of Māori land and** Poutini Ngāi Tahu needs and activities, including **for the avoidance of doubt in respect of both**[124] residential, social, cultural, environmental and economic use and development to:

a. Provide a safe, nurturing environment for ngā uri (descendants), whānau (family), hapū (extended family), iwi me ngā manuhiri (tribe and visitors);

b. Ensure the whenua is managed in accordance with tikanga Māori; and

c. Ensure the protection and maintenance of ngā taonga tuku iho (treasures)

MPZ – O3

Provide for appropriate use and development of the MPZ - Māori Purpose Zone while recognising ~~The significant coverage of~~ identified natural environment overlays across some parts of the ~~MPZ – Māori Purpose Z~~zone and the contribution their values make to the wider community ~~is recognised, and the appropriate use and development of the Zone is provided for~~.[125]

MPZ – Māori Purpose Zone Policies

Submissions and Further Submissions

406. Twenty submission points and two further submission points relating to the MPZ policies were summarised in the Table on pages 77-79 of the s42A Report.

407. One submission point supported the policy as notified and one submission point sought amendments to Policy **MPZ–P1.**

408. Two submission points supported Policy **MPZ-P2** as notified and five sought amendments, with one submission point opposed by a further submission.

409. One submission point supported Policy **MPZ–P3** as notified, two sought amendment and one opposed the policy and sought it be deleted.

410. Two submission points supported Policy **MPZ–P4** as notified.

411. Two submission points supported Policy **MPZ–P5** as notified.

412. Two submission points supported Policy **MPZ-P6** as notified and one sought amendment, with a further submission in opposition.

Section 42A Report

413. In relation to **MPZ-P1**, Ms Easton acknowledged the support of Te Mana Ora (S190.1179).

414. Ms Easton supported the request of Poutini Ngāi Tahu (S620.272) for links to the glossary for the terms "*whanaungatanga*" and "*mātauranga*" be included in the e-plan version of the Plan. She noted that this would correct an error in the Plan whereby the electronic links were not included.

415. In relation to **MPZ-P2**, Ms Easton acknowledged the support of Te Mana Ora (S190.1180) and WMS Group (S599.140).

[124] Te Tumu Paeroa S440.049
[125] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.271

416. Ms Easton supported the request of Poutini Ngāi Tahu (S620.273) to add "*or remedied*" alongside "*are mitigated*" in clause (i) in relation to significant adverse effects on adjoining landowners. She acknowledged that these effects could be remedied rather than mitigated. She also supported the request (S620.406) to make it clear that the on-site or community scale facilities were those "*for water supply, wastewater and stormwater*" and considered this would clarify the intent of the policy.

417. Ms Easton did not support the submission point from Te Tumu Paeroa (S440.050) that sought to add "*and Māori landowners*" for the same reasons as outlined in relation to the objectives.

418. Ms Easton did not support the Buller Conservation Group (S552.198) and Frida Inta's (S553.198) request to delete "*significant*" in relation to adverse effects and to replace "*mitigated*" with "*avoided*". She considered the term "*avoid*" was generally associated with non-complying activities and noted this policy supports permitted activities. However, she recommended adding "*remedied and mitigated*". In relation to the deletion of the word "*significant*" she considered this was also inappropriate.

419. In relation to **MPZ-P3**, Ms Easton acknowledged the support of Te Mana Ora (S190.1181) and WMS Group (S599.140).

420. Ms Easton did not support Buller Conservation Group (S552.199) and Frida Inta's (S553.199) request to add a new clause "*Indigenous biodiversity is protected*" because she noted that matters related to indigenous biodiversity were subject to the ECO Chapter, which was cross-referenced in the MPZ Overview.

421. Poutini Ngāi Tahu (S620.274) requested that Policy MPZ-P3 be deleted because it duplicated MPZ–P2. Ms Easton did not support this submission and considered Policy MPZ – P2 was focussed on the types of activities that were provided for in the zone; whereas Policy MPZ – P3 was focussed on the outcomes that should be achieved when those activities were undertaken.

422. Ms Easton recommended retaining Policy MPZ – P3 as notified.

423. In relation to **MPZ-P4 and MPZ-P5**, Ms Easton acknowledged the support of Te Mana Ora (S190.1182 S620.1183) and Poutini Ngāi Tahu (S620.275, S620.276) and recommended these policies be retained as notified.

424. In relation to **MPZ-P6**, Ms Easton acknowledged the support of Te Mana Ora (S190.1184) and Ngāi Tahi (S620.277) and recommended the policy be retained as notified.

425. Ms Easton did not support the submission point from Te Tumu Paeroa (S440.051) that sought to have this policy refer to "*Māori Landowners*" for the same reasons outlined for the MPZ objectives.

Hearing and Submitter Evidence/Statements

426. In relation to MPZ-P2, Poutini Ngāi Tahu and Te Tumu Paeroa reached agreement on resolution of Te Tumu Paeroa submission point S440.050, reflecting changes made to MPZ-O2, so that the policy enables the use and development of Māori land.

427. Ms Inta highlighted the poor wording of MPZ-P2 and considered it should be amended to be "*avoided, remedied or mitigated*".

428. The Poutini Ngāi Tahu hearing statement confirmed support for the s42A Report recommendations in relation to the policies, and support for position agreed with Te Tumu Paeroa. However, it recommended replacing "*Enable*" with "*provide for*" in MPZ-P3 to provide clarity that it is to be considered in relation to a restricted discretionary application.

429. In relation to **MPZ-P6**, this was also the subject of agreement between Poutini Ngāi Tahu and Te Tumu Paeroa, resolving Te Tumu Paeroa submission point S440.051. The statement of these two submitters recommended inclusion of a method to support a future plan change, enabling additional zoning of MPZ land, which both parties had sought in the hearing process but were limited by the scope of their submissions.

Reporting Officer Reply Evidence

430. In response to questions from the Panel, Ms Easton agreed with Ms Inta that Policy MPZ – P2 should be amended to "*avoided, remedied or mitigated*".

431. Ms Easton recommended the following amendments to the wording of this policy and a formatting change to clause (ii) as follows:

> **MPZ – P2**
>
> Enable the use and development of the land in the MPZ - Māori Purpose Zone for a wide range of activities to support the Poutini Ngāi Tahu community, including:
> a. Single dwellings, multiple dwellings, and papakāinga housing;
> b. Marae complexes;
> c. Cultural uses including harvest of mahinga kai;
> d. Social, recreational, educational and community facilities; and
> e. Farming and other economic activities.
>
> While
>
> i. Ensuring any significant adverse effects from these activities on adjoining landowners beyond the zone and the wider environment are **avoided, remedied or** mitigated; and
> ii. Requiring that the above activities are adequately serviced with on-site or community scale facilities **for water supply, wastewater or stormwater.**

Hearing Panel's Evaluation

432. In relation to **MPZ-P1** the Panel accepts Ms Easton's recommendation that links to the glossary for the terms "w*hanaungatanga*" and "*mātauranga*" are included in the e-plan version of the Plan. We recommended MPZ-P1 is retained as notified.

433. In relation to **MPZ-P2**, the Panel agrees with Ms Easton that "*significant*" should not be deleted in this context. We accept her recommended changes to add "*avoided, remedied or mitigated*"; and to add "*for water supply, wastewater and stormwater*". We also accept the recommended amendments of Poutini Ngāi Tahu and Te Tumu Paeroa that resolved Te Tumu Paeroa submission point S440.050, to enable the use and development of Māori land within MPZ.

434. The Panel accepts Ms Easton's recommendations to retain policies **MPZ-P3**, **MPZ-P4,** and **MPZ-P5** as notified for the reasons outlined in the s42A Report.

435. In relation to **MPZ-P6**, the Panel accept the recommended amendments of Poutini Ngāi Tahu and Te Tumu Paeroa that resolved Te Tumu Paeroa submission point S440.051, to enable the use and development of Māori land within MPZ, but do not consider that a new method to support the policy is necessary.

Hearing Panel's Recommendation

436. For the reasons outlined above, and subject to our consideration of Part 2 of the RMA, the Panel recommends that the relevant submission points identified in the footnotes below are accepted or accepted in part, and recommend the following changes to the **Māori Purpose Zone policies:**

Māori Purpose Zone Policies

MPZ - P1

Enable the incorporation of whānaungatanga, mātauranga and tikanga in relation to the use, design and layout of development within the MPZ - Māori Purpose Zone.

MPZ – P2

Enable the use and development of the land in the MPZ - Māori Purpose Zone for a wide range of activities to support ~~the~~ Poutini Ngāi Tahu ~~community~~ **and enable the use and development of Māori land**,[126] including:

a. Single dwellings, multiple dwellings, and papakāinga housing;
b. Marae complexes;
c. Cultural uses including harvest of mahinga kai;
d. Social, recreational, educational and community facilities; and
e. Farming and other economic activities.

While

i. Ensuring any significant adverse effects from these activities on adjoining landowners beyond the zone and the wider environment are **avoided,**[127] **remedied or**[128] mitigated; and
ii. Requiring that the above activities are adequately serviced with on-site or community scale facilities **for water supply, wastewater or stormwater.**[129]

MPZ - P3

Enable the establishment of compatible activities within the MPZ - Māori Purpose Zone while ensuring that:

a. Use and development is consistent with the purpose of the zone;
b. The Poutini Ngāi Tahu community is sustained;
c. Cultural values are maintained or enhanced; and
d. The quality of the environment within or adjacent to the zone is not adversely affected.

MPZ – P4

Avoid activities which are likely to be incompatible with the purpose of the MPZ - Māori Purpose Zone, unless a cultural impact assessment endorsed by the relevant rūnanga demonstrates that the effects on the cultural values are acceptable or can be mitigated.

[126] Te Tumu Paeroa S440.050
[127] Frida Inta S553.198
[128] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.273
[129] Te Rūnanga o Ngāti Waewae, Te Rūnanga o Makaawhio and Te Rūnanga o Ngāi Tahu S620.406

MPZ – P5

Provide for the use of Papatipu Rūnanga mandated Iwi/Papatipu Rūnanga management plans to provide for development in different areas within the MPZ - Māori Purpose Zone; ensuring that these plans contain the level of detail necessary to ensure that comprehensive, coordinated and efficient development occurs, including:

a. A description of activities, buildings and structures existing, or proposed to be established within the development area;
b. The bulk and location of any buildings and structures;
c. How adverse effects resulting from proposed activities, in particular at zone boundaries, will be avoided, remedied or mitigated;
d. The provision of sufficient infrastructure to service the needs of all activities proposed to be established; and
e. The protection of the mauri of any identified features potentially affected by any activities, buildings or structures proposed to be established.

MPZ – P6

Support the future application of the MPZ - Māori Purpose Zone to locations where it will enable the use and development of land in accordance with tikanga Māori and to meet **the needs of** Poutini Ngāi Tahu ~~needs~~ **and enable the use of Māori land**.[130]

MPZ - Māori Purpose Zones Rules

437. Sixty-eight submission points and five further submission points relating to the MPZ rules were summarised in the Table on pages 81-90 of the s42A Report.

438. One submission point requested including "*emergency services facility*" and "*public amenities*" as permitted activities in the MPZ and developing appropriate activity standards.

439. Two submission points supported Rule **MPZ-R1** as notified and two sought amendments, with a further submission in opposition to a suggested amendment.

440. Two submission points supported Rule **MPZ-R2** as notified.

441. Two submission points supported Rule **MPZ-R3** as notified.

442. Four submission points supported Rule **MPZ-R4** as notified and one sought an amendment, with a further submission in opposition to the suggested amendment.

443. Two submission points supported Rule **MPZ-R5** as notified.

444. One submission points supported Rule **MPZ-R6** as notified and one sought amendment.

445. Three submission points supported Rule **MPZ-R7** as notified and one sought amendment.

446. Three submission points supported Rule **MPZ-R8** as notified and three sought amendments, with two further submissions in opposition to two of the suggested amendments.

447. Two submission points supported Rule **MPZ-R9** as notified.

[130] Te Tumu Paeroa S440.051

448. Two submission points supported Rule **MPZ-R10** as notified.

449. One submission point supported Rule **MPZ-R11** as notified and two sought amendments, with a further submission in opposition to one of the suggested amendments.

450. One submission point supported Rule **MPZ-R11** as notified and one sought amendment.

451. One submission point supported Rule **MPZ-R12** as notified and one sought amendment.

452. One submission point supported Rule **MPZ-R13** as notified and one sought amendment.

453. One submission point supported Rule **MPZ-R14** as notified and two sought amendments.

454. Two submission points supported Rule **MPZ-R15** as notified and one sought amendment.

455. One submission point supported Rule **MPZ-R16** as notified and one sought amendment.

456. Two submission point supported Rule **MPZ-R17** as notified and two sought to delete the rule.

457. Two submission points supported Rule **MPZ-R18** as notified and one sought amendment.

458. One submission point supported Rule **MPZ-R19** as notified and one sought amendment.

459. Two submission points supported Rule **MPZ-R20** as notified.

460. One submission point supported Rule **MPZ-R21** as notified and one sought amendment.

461. Two submission points supported Rule **MPZ-R22** as notified.

462. Two submission points supported Rule **MPZ-R23** as notified.

463. Two submission points supported Rule **MPZ-R11** as notified and one sought amendment.

464. The Panel has considered the submissions and further submissions received and adopts the summaries in the s42A Report.

Section 42A Report

Rules (Permitted)

465. Ms Easton supported the submission point from Poutini Ngāi Tahu (S620.279) that sought "*emergency services facility*" be provided for as a permitted activity. She considered that emergency services facilities were appropriate within this zone and could be accommodated through an amendment to Rule MPZ–R9 (Community Facilities). Ms Easton did not support the submission point seeking the provision of "*public amenities*" as permitted activities. She noted that the term was not used in the pTTPP and was unclear about what it could include.

MPZ – R1 Māori Purpose Activities

466. Ms Easton acknowledged the support from Te Mana Ora (S190.1185) and Waka Kotahi NZTA (S450.300) for this rule as notified.

467. Ms Easton supported GDC's (S608.800) request to amend clauses (5) and (6) to require connection to reticulated services in fully serviced areas; and in areas not serviced, that systems be designed and constructed in compliance with NZS 4404:2010. She considered this was consistent with the recommendations made on other zones and the wider approach to these matters in the Plan.

468. Ms Easton did not support the amendments requested by Poutini Ngāi Tahu (S620.280) for the following reasons:

(a) Changing '*site coverage'* to '*building coverage'* because '*site coverage'* was the term used throughout the Plan.
(b) Changing the area of maximum site coverage to 50% of the site from 40% of the site because the site coverage was the same as the GRUZ (reflecting the wider environment) and these areas generally do not have reticulated stormwater systems.
(c) Reducing setbacks from the road of 10m to 4.5m and from 5m to 1m for internal boundaries because these were the same as those in the GRUZ.
(d) Reducing residential density from no more than one unit per 500m^2 net site area in areas fully serviced by a network utility operator to one unit per 300m^2 net site area because these sites were likely to be located within small settlements and areas where urban densities were not in keeping with the wider character and amenity of the area.
(e) Reducing in residential density in areas unserved by three-waters to an unspecified density consistent with the carrying capacity of the land and infrastructure because advice received from the Regional Council notes that it is difficult to manage on-site wastewater on sites smaller than 1000m².

469. Ms Easton recommended amendments to MPZ–R1 as follows:

MPZ - R1 Māori Purpose Activities Activity Status Permitted
Where:
1. The maximum gross ground floor area of a single building is 500m^2;
2. Maximum building height above ground level is 10m;
3. Maximum site coverage is 40%;
4. Buildings are setback a minimum of 10m from the road boundary, 20m from the State Highway Boundary, and 5m from internal boundaries, except that:
    a. In the Arahura Pā settlement buildings are setback 5m from the road and any GRUZ - General Rural Zone or INZ - Industrial Zone boundary and 1m from internal boundaries;
5. The average residential density is no more than 1 unit per 500m2 net site area in areas fully serviced by a network utility operator with wastewater, water supply and stormwater systems~~; and~~
6. In areas not serviced by network utility operated wastewater, stormwater and water supply the average dwelling/papakāinga building density is no more than one unit and one minor residential unit per 1000m^2 net site area; and
7. Where reticulated systems are available, buildings are connected to the reticulated wastewater, stormwater and water supply systems, and where these are not available, wastewater, stormwater and water supply systems are designed to meet the relevant standards of NZS4404:2010.

MPZ – R2 Agricultural, Pastoral or Horticultural Activities or Buildings

470. Ms Easton acknowledged the support of Poutini Ngāi Tahu (S620.281, S620.282) and Te Mana Ora (S190.1186, S190.1187)

MPZ – R3 Conservation and Recreation Activities

471. Ms Easton acknowledges the support of Ngāi Tahu (, S620.282) and Te Mana Ora (S190.1187) and recommended retaining the rule as notified.

MPZ – R4 Residential Activities

472. Ms Easton acknowledged the support of Poutini Ngāi Tahu (S620.283), Te Mana Ora (S190.1188), Waka Kotahi NZTA (S450.301) and GDC (S608.801) and recommended retaining the rule as notified.

473. Ms Easton did not support the Westport Rifle Club's (S457.012) request to add reference to the Rifle Range Protection Area in this rule because she considered it unnecessary given there was no MPZ land in that part of the Buller District.

MPZ – R5 Minor Structures

474. Ms Easton acknowledged the support of Poutini Ngāi Tahu (S620.284) and Te Mana Ora (S190.1189) and recommended retaining the rule as notified.

MPZ – R6 Fences, Walls and Retaining Walls

475. Ms Easton acknowledged the support of Te Mana Ora (S190.1190) for this rule.

476. Ms Easton supported the request of Poutini Ngāi Tahu (S620.285) that clause (2) concerning the use of the fences, retaining walls or walls be deleted to avoid duplication with the Signs Chapter.

477. Ms Easton recommended amendments to MPZ – R6 as follows:

> **MPZ - R6 Fences, Walls and Retaining Walls**
> **Activity Status Permitted**
> Where:
> 1. Fences, walls and retaining walls are a maximum 2m height above ground level.; and
> ~~2. The fence, wall or retaining wall is not used for advertising or any other purpose other than a fence, retaining wall or wall~~

MPZ – R7 Relocated Buildings

478. Ms Easton acknowledged the support of Te Mana Ora (S190.1191), Poutini Ngāi Tahu (S620.286) and GDC (S608.802) and recommended retaining the rule as notified.

479. The New Zealand Heavy Haulage Association Inc. (S616.013) sought amendments to the rule that were consistent with other submissions it has made in other zones. Ms Easton did not support this submission because she considered that it would result in new pre-built residential housing being moved onto a site, potentially requiring a resource consent. Similarly, she did not support the other changes proposed by the submitter as she considered they did not improve the clarity or enforceability of the rule.

MPZ – R8 Visitor Accommodation that is not in a Marae Complex

480. Ms Easton acknowledged the support of Te Mana Ora (S190.1192), Poutini Ngāi Tahu (S620.287) and Waka Kotahi NZTA (S450.302) and recommended retaining the rule as notified.

481. Ms Easton did not support the Westport Rifle Club (S457.013) and Westport Pistol Club's (S336.015) requests to amend the rule to refer to the Rifle Range Protection Area because there was no MPZ land within that part of Buller District.

MPZ – R9 Community Facilities

482. Ms Easton acknowledged the support of Te Mana Ora (S190.1193) and Poutini Ngāi Tahu (S620.288) for this rule.

483. Ms Easton recommended the following addition to this rule as alternative relief to Poutini Ngāi Tahu (S620.279) that sought "*emergency services facility*" be provided for as a permitted activity:

> **MPZ - R9 Community Facilities and Emergency Services Facilities**
> **Activity Status Permitted**
> Where:
> 1. All performance standards for Rule MPZ - R1 are complied with.
>
> **Activity status where compliance not achieved**: Restricted Discretionary

MPZ – R10 Buildings and Other Activities in Accordance with an Iwi/Papatipu Rūnanga Management Plan not Provided for in another Permitted Activity Rule

484. Ms Easton acknowledged the support of Te Mana Ora (S190.1194) and Poutini Ngāi Tahu (S620.289) for this rule and recommended retaining the rule as notified.

Restricted Discretionary Activities

485. Poutini Ngāi Tahu (S620.290) sought that a non-notification clause be applied to all restricted discretionary activity rules specifying that they would not be publicly notified and would only be limitedly notified to directly abutting landowners. Ms Easton supported this submission in part. She agreed that public notification of the types of activities covered by these rules was inappropriate, as they were not expected to generate significant adverse effects. However, she did not consider that restricting notification to only immediately abutting landowners was appropriate given the potential for adverse effects on amenity or other concerns that extend beyond the directly abutting sites.

MPZ – R11 Māori Purpose Activities not meeting Permitted Activity Standards

486. Ms Easton acknowledged the support of Te Mana Ora (S190.1195) for this rule.

487. Poutini Ngāi Tahu (S620.291) sought that if there was an Iwi/Papatipu Rūnanga Management Plan in place that the matters of discretion in clauses (b) to (e) not apply. Ms Easton did not support this submission. She considered that these matters related to potential adverse environmental effects or effects on neighbouring amenity that needed to be assessed and managed through consent conditions if necessary.

488. Ms Easton supported GDC's (S608.803) request for a new matter of discretion relating to design and location of vehicle access given this could be an important consideration.

489. Ms Easton recommended amending MPZ-R11 as follows:

> **MPZ - R11 Māori Purpose Activities not meeting Permitted Activity Standards**
> **Activity Status Restricted Discretionary Discretion is restricted to:**
> a. The extent to which the proposal complies with any Iwi/Papatipu Rūnanga management plan in place for the site;
> b. Size, height, design and location of any buildings and structures;
> c. Landscape measures;
> d. Density of any residential buildings; and
> e. Methods of water supply, wastewater and stormwater treatment and disposal; and
> f. Design and location of vehicle access
> **Activity status where compliance not achieved:** N/A
> **Notification: Applications for activities under this rule will not be Publicly Notified**

MPZ – R12 Minor structures not meeting Permitted Activity Standards

490. Ms Easton acknowledged the support of Te Mana Ora (S190.1196) for this rule.

491. Poutini Ngāi Tahu (S620.292) sought that if an Iwi/Papatipu Rūnanga Management Plan was in place that matters of discretion in clause (2) and (3) not apply. Ms Easton supported this submission and noted that considering that the rule related only to structures up to 10m high, the risk of adverse off-site effects was low and would be appropriately managed by the Iwi/Papatipu Rūnanga Management Plan.

492. Ms Easton recommended amending the rule as follows:

> **MPZ -R12 Minor structures not meeting Permitted Activity Standards Activity Status Restricted Discretionary**
> Where:
> 1. The minor structure does not exceed 10m in height; and
> 2. All other performance standards for Rule MPZ - R1 are complied with.
> **Discretion is restricted to:**
> a. Compliance with any Iwi/Papatipu Rūnanga management plan in place for the site;
> **or**
> b**. If there is no Iwi/Papatipu Rūnanga management plan in place for the site:**
> i. Design and location of structures; and
> ii. Landscape measures.
> **Activity status where compliance not achieved:** Discretionary
> **Notification: Applications for activities under this rule will not be Publicly Notified**

MPZ – R13 Relocated buildings not meeting Permitted Activity Standards

493. Ms Easton acknowledged the support of Te Mana Ora (S190.1197) for this rule.

494. Poutini Ngāi Tahu (S620.293) sought that if there was an Iwi/Papatipu Rūnanga Management Plan in place that matters of discretion in clauses (b) to (d) not apply. Ms Easton supported this submission. She noted that buildings subject to this rule still must comply with the performance standards for bulk and setbacks. She considered that the risk of adverse off-site effects was low and would be appropriately managed in an Iwi/Papatipu Rūnanga Management Plan.

495. Ms Easton recommended amendments to the rule as follows:

> **MPZ - R13 Relocated buildings not meeting Permitted Activity Standards Activity Status Restricted Discretionary**
> Where:
> 1. All performance standards for Rule MPZ - R1 are complied with.
> **Discretion is restricted to:**
> a. Compliance with any Iwi/Papatipu Rūnanga management plan in place for the site;
> **or**
> **b. If there is no Iwi/Papatipu Rūnanga management plan in place for the site**
> i. Design and location of structures;
> ii. Appearance of buildings; and
> iii. Landscape measures
> **Activity status where compliance not achieved:** Discretionary
> **Notification: Applications for activities under this rule will not be Publicly Notified**

MPZ – R14 Intensive indoor primary production

496. Ms Easton acknowledged the support of GDC (S608.804) for this rule.

497. Te Mana Ora (S190.1198) sought that this rule be amended to include a requirement that the activity does not occur within a DWSZ. Ms Easton did not support this submission for the reasons outlined in relation to other special zones.

498. Poutini Ngāi Tahu (S620.294) sought that if there was an Iwi/Papatipu Rūnanga Management Plan in place that matters of discretion in clauses (b) to (h) not apply. Ms Easton did not support this submission. She considered that these matters were those where there was a potential for adverse environmental effects or effects on neighbouring amenity. She considered that these matters needed to be assessed and managed through consent conditions if necessary.

499. Ms Easton recommended amendments to this rule as follows:

> **MPZ - R14 Intensive indoor primary production**
> **Activity Status Restricted Discretionary**
> Where:
> 1. This is not within the Arahura Pā settlement area; and
> 2. All performance standards for Rule MPZ - R1 are complied with.
> **Discretion is restricted to:**
> a. Compliance with any Iwi/Papatipu Rūnanga management plan in place for the site;
> b. Bulk and location of buildings;
> c. Management of traffic and parking;
> d. Management of odour;
> e. Landscape measures;
> f. Any impacts on the production values of the surrounding land;
> g. Effects on visual amenity and rural character; and
> h. Methods of water supply and effluent and stormwater treatment and disposal.
> **Activity status where compliance not achieved**: Discretionary
> **Notification: Applications for activities under this rule will not be Publicly Notified**

MPZ – R15 Visitor and temporary worker accommodation not meeting Permitted Activity Standards

500. Ms Easton acknowledged the support of GDC (S608.1199) and Te Mana Ora (S190.1199).

501. Poutini Ngāi Tahu (S620.295) sought that if there was an Iwi/Papatipu Rūnanga Management Plan in place that matters of discretion in clauses (2) to (7) not apply. Ms Easton supported this submission and noted that buildings subject to this rule must still comply with the performance standards for bulk and setbacks. She considered the risk of adverse off-site effects was low and would be appropriately managed in an Iwi/Papatipu Rūnanga Management Plan.

502. Ms Easton recommended the amendments to this rule as follows:

> **MPZ - R15 Visitor and temporary worker accommodation not meeting Permitted Activity Standards**
> **Activity Status Restricted Discretionary**
> Where:
> 1. This is ancillary to a farming, conservation, residential or Māori purpose activity; and
> 2. All performance standards for Rule MPZ - R1 are complied with.
> **Discretion is restricted to:**
> a. Compliance with any Iwi/Papatipu Rūnanga management plan in place for the site;
> **or**
> **b. If there is no Iwi/Papatipu Rūnanga management plan in place for the site**
> i. Number of visitors/workers staying on site;
> ii. Number of days of use for the accommodation;
> iii. Management of traffic and parking;
> iv. Landscape measures;
> v. Any impacts on the production values of the surrounding land;
> vi. Effects on visual amenity and rural character; and
> vii. Methods of water supply and wastewater and stormwater treatment and disposal
> **Activity status where compliance not achieved:** Discretionary
> **Notification: Applications for activities under this rule will not be Publicly Notified**

MPZ – R16 Community Facilities not meeting Rule MPZ - R9

503. Ms Easton acknowledged the support of Te Mana Ora (S190.1200) for this rule.

504. Poutini Ngāi Tahu (S620.296) sought that if there was an Iwi/Papatipu Rūnanga Management Plan in place that matters of discretion in clauses (b) to (e) not apply. Ms Easton supported this submission and noted that buildings subject to this rule still must comply with the performance standards for bulk and setbacks. She considered the risk of adverse off-site effects was low and that these would be appropriately managed by the Iwi/Papatipu Rūnanga Management Plan.

505. Ms Easton recommended amendments to the rule as follows:

> **MPZ - R16 Community Facilities not meeting Rule MPZ - R9**
> **Activity Status Restricted Discretionary**
> **Discretion is restricted to:**
> a. Compliance with any Iwi/Papatipu Rūnanga management plan in place for the site;
> **or**
> **b. If there is no Iwi/Papatipu Rūnanga management plan in place for the site**
>
> i. Management of access, parking and traffic generation;
> ii. Hours of operation;
> iii. Noise management and lighting;
> iv. Landscape measures.

Activity status where compliance not achieved: N/A
Notification: Applications for activities under this rule will not be Publicly Notified

MPZ – R17 Non - rural Activities not meeting Permitted Activity Standards

506. Ms Easton acknowledged the support of Te Mana Ora (S190.1201) and GDC (S608.806).

507. WMS Group (S599.141) and Poutini Ngāi Tahu (S620.297) opposed this rule and sought its deletion. Ms Easton agreed that this rule was unnecessary and recommended it be deleted.

MPZ – R18 Buildings and Other Activities in Accordance with an Iwi/Papatipu Rūnanga Management Plan not meeting Rule MPZ - R10

508. Ms Easton acknowledges the support of Te Mana Ora (S190.1202) and GDC (S608.807).

509. Poutini Ngāi Tahu (S620.298) sought that if there was an Iwi/Papatipu Rūnanga Management Plan in place that matters of discretion in clause (b) to (i) not apply. Ms Easton did not support this submission. She noted that this rule specifically applied to activities outlined in an Iwi/Papatipu Rūnanga Management Plan and that where there was no Iwi/Papatipu Rūnanga Management Plan, this rule would not apply.

510. Ms Easton recommended amendments to the rule as follows:

MPZ - R18 Buildings and Other Activities in Accordance with an Iwi/Papatipu Rūnanga Management Plan not meeting Rule MPZ - R10
Activity Status Restricted Discretionary
Discretion is restricted to:
a. Compliance with any Iwi/Papatipu Rūnanga management plan in place for the site;
b. The extent to which the activity could be undertaken more appropriately in another zone;
c. Bulk and location of buildings;
d. Management of traffic and parking;
e. Management of odour;
f. Landscape measures;
g. Any impacts on the production values of the surrounding land;
h. Effects on visual amenity and rural character; and
i. Methods of water supply, wastewater and stormwater treatment and disposal.
Activity status where compliance not achieved: N/A
Notification: Applications for activities under this rule will not be Publicly Notified

Discretionary Activities

MPZ – R19 Agricultural, Pastoral and Horticultural Activities, Conservation and Recreation Activities not meeting Permitted, Controlled or Restricted Discretionary Activity Rules

511. Ms Easton acknowledged the support of Te Mana Ora (S190.1203) for this rule.

512. Poutini Ngāi Tahu (S620.299) sought that the reference to "*Controlled*" activities in the rule title be deleted. Ms Easton supported this submission to correct this error. She recommended the following amendment to the rule:

MPZ - R19 Agricultural, Pastoral and Horticultural Activities, Conservation and Recreation Activities not meeting Permitted, ~~Controlled~~ or Restricted Discretionary Activity Rules
Activity Status Discretionary

MPZ – R20 Rural Industry or Intensive Indoor Primary Production not meeting Permitted or Restricted Discretionary Activity Rules

513. Ms Easton acknowledged the support of Te Mana Ora (S190.1204) and Poutini Ngāi Tahu (S629.300) and recommended retaining the rule as notified.

MPZ – R21 Non-rural activities not meeting Permitted or Restricted Discretionary Activity Rules.

514. Ms Easton acknowledged the support of Te Mana Ora (S190.1205) for this rule.

515. Poutini Ngāi Tahu (S620.302) sought to alter this rule from "*Non-rural activities*" to "*Conservation and Recreation Activities*". Ms Easton supported this submission because the deletion of MPZ–R17 meant there was no rule that this escalates from. However, as identified by Poutini Ngāi Tahu, she agreed there was no escalation rule for Rule MPZ-R3 and therefore, recommended renaming the rule to address the issue identified.

516. Ms Easton recommended the following amendments to this rule:

MPZ - R21 ~~Non-rural~~ <u>Conservation and Recreation</u> activities not meeting Permitted or Restricted Discretionary Activity Rules.
Activity Status Discretionary

MPZ – R22 Minor structures, Fences, Walls and Retaining Walls, and Relocated buildings not meeting Permitted or Restricted Discretionary Rules

517. Ms Easton acknowledged the support of Te Mana Ora (S190.1206) and Poutini Ngāi Tahu (S629.303) and recommended retaining the rule as notified.

MPZ – R23 Residential activities and visitor accommodation activities not meeting Permitted or Restricted Discretionary Rules.

518. Ms Easton acknowledged the support of Te Mana Ora (S190.1207) and Poutini Ngāi Tahu (S629.301) and recommended retaining the rule as notified.

MPZ – R24 Any Activity not provided for in another Rule in the Zone

519. Ms Easton acknowledged the support of Te Mana Ora (S190.1208) and Poutini Ngāi Tahu (S629.304) for this rule.

520. WMS Group (S599.142) opposed this rule and sought to have minerals extraction provided for as a discretionary activity. Ms Easton supported this submission in part in that providing for mineral extraction as a discretionary activity was consistent with the approach taken in the SASM Chapter. She did, however, note that the definition of "*Māori Purpose Activities*" included some types of mineral extraction (for cultural resources). She therefore proposed wording that reflected the existence of some permitted activities.

521. Ms Easton recommended adding a new rule as follows:

MPZ – RXXX Mineral Extraction not meeting Permitted or Restricted Discretionary Rules
Activity Status: Discretionary
Notification:
Applications will always be limited notified to the relevant hapū rūnanga (Te Rūnanga o Ngāti Waewae or Te Rūnanga o Makaawhio).
Activity status where compliance not achieved: N/A

Hearing and Submitter Evidence/Statements

522. The Poutini Ngāi Tahu hearing statement requested consideration of including "*Parks Furniture*" instead of "*Public Facilities*" as a permitted activity within the MPZ, as requested in the original submission.

523. In relation to MPZ-R2, the Poutini Ngāi Tahu hearing statement noted that connections to water, wastewater and stormwater systems were already addressed under Rule INF-R2 and that adding the requested clause would result in duplication. It also noted that the reduced setbacks sought were to enable reasonable use, including urban activities and Papakāinga, which were not comparable uses to the Rural Zone, despite often adjoining rural land.

524. In relation to MPZ-R18, the Poutini Ngāi Tahu hearing statement recommended alternative wording for clause (b) to "*the extent to which the activity is compatible with the Māori Purpose Zone and amenity of the environment is maintained*", although this was not specifically sought in submission point S620.298.

Reporting Officer Reply Evidence

525. In response to queries from the Panel on the KiwiRail evidence on MPZ–R1 seeking a setback from the rail corridor from both buildings and structures, Ms Easton advised that she did not oppose the addition of the word '*structures*' into the setback standards for the rail corridor within this rule.

526. No other specific points were made in the Reply Evidence regarding specific rules.

Hearing Panel's Evaluation

527. The Panel accepts Ms Easton's recommended amendments to Rule **MPZ-R1** to add a new clause to require connection to the reticulated wastewater, stormwater, and water supply systems, where reticulated systems are available; and where those systems are not available, they are designed to the appropriate standard. We also recommend a consequential change to the advice note to add reference to the Haast Airfield, as discussed above in relation to the Airport Zone. We note this consequential amendment is also required for rules MPZ-R4 and MPZ-R8.

528. The Panel recommends replacing "*Landscape measures*" with "*Measures to mitigate landscape effects"*, which is a Plan-wide change for consistency from recommendations in the Natural Feature and Landscapes Chapter Recommendation Report. We consider

529. The Panel notes Appendix 1 of the Right of Reply did not include "*Buildings and structures*" as requested by KiwiRail. We note Ms Easton did not oppose this but assume she does not recommend this is added. We consider it is not necessary in the context of this rule.

530. The Panel accepts the position in the Poutini Ngāi Tahu hearing statement that it is not appropriate for Rule MPZ-R1 parameters to reflect GRUZ, which would restrict use and development in the zone and run counter to the objectives and policies of the zone. We understand the history of Māori land, as outlined in the joint statement from Poutini Ngāi Tahu and Te Tumu Paeroa, which has meant underdevelopment over time. The Panel acknowledge that the level of development in these areas is expected to change as a result of zoning for increased use and development and that is entirely appropriate.

531. The Panel adopt the amendments sought by Poutini Ngāi Tahu in submission point S620.280, with the exception of amendment to clause (6), and also accept the submission point of GDC (S608.800) regarding management of water supply, wastewater and stormwater. We have considered the argument in the Poutini Ngāi Tahu hearing statement that this may overlap with provisions in other chapters, but our recommendation is to incorporate the reference because it is a consistent requirement across the Plan.

532. The Panel accepts Ms Easton's recommendation to retain rules **MPZ-R2**, **MPZ-R3**, **MPZ-R4, MPZ-R5, MPZ-R10, MPZ-R14, MPZ-R18, MPZ-R20**, **MPZ-R22**, **MPZ-R23**, **MPZ-R24**, for the reasons outlined, except for minor corrections and renumbering under RMA, Schedule 1 clause 16.

533. In relation to rules **MPZ-R5**, **MPZ-R11**, **MPZ-R12**, **MPZ-R13**, **MPZ-R14**, **MPZ-R15**, **MPZ-R16** and **MPZ-R17**, all of which contain reference to an Iwi/Papatipu Rūnanga Management Plan, the Panel are satisfied that there are suitable pathways in the rules for sites that are not subject to an Iwi/Papatipu Rūnanga Management Plan, which may be for a range of reasons, including tikanga in the circumstances of the site.

534. In relation to Rule **MPZ-R6**, the Panel accepts Ms Easton's recommendation to delete clause (2) to avoid duplication with the Signs Chapter.

535. In relation to Rule **MPZ-R7,** the Panel accepts in part the submission of The New Zealand Heavy Haulage (S616.013) and recommends amendments that are consistent with recommendations made in relation to the equivalent rules in the Residential Zones (General Residential Zone, Large Lot Residential Zone and Medium Residential Zone); and reflect the addition of new Appendix Eleven to guide pre-inspection requirements recommended in the Residential Zone Chapter Recommendation Report.

536. The Panel accepts Ms Easton's recommended amendment to Rule **MPZ-R8** to require the provision of letting records annually, as requested by GDC.

537. In relation to Rule **MPZ-R9,** Ms Easton recommended adding "*Emergency Services Facilities*" to the rule title to address the submission point of Poutini Ngai Tahu (S620.279) but did not recommend including "*public amenities*" because she was unclear what this could include. However, she did not respond to the Poutini Ngai Tahu hearing statement that requested including "parks furniture" as an alternative. We consider this addition is appropriate now that it is clear what the submitter had in mind and recommend this is also added to the title.

538. The Panel accepts Ms Easton's recommendation to add a new clause to Rule **MPZ-R11** regarding the design and location of vehicle access, as requested by GDC. We note Poutini Ngāi Tahu opposed this in FS41.743 but that their hearing statement recorded acceptance of the recommendation because this is a standard matter for all zones.

539. In relation to rules **MPZ-R12**, **MPZ-R13, MPZ-R15** and **MPZ-R16,** the Panel accepts Ms Easton's recommended amendments in response to the submission points from Poutini Ngāi Tahu to clarify which matters of discretion do not apply when an Iwi/Papatipu Rūnanga Management Plan is in place. We also accept the recommendation to add an advice note to all restricted discretionary activities stating that applications will not be publicly notified and accept the submission point of Poutini Ngāi Tahu (S620.290) in this regard.

540. We accept Ms Easton's recommendation to delete Rule **MPZ-R17** because it is unnecessary.

541. In relation to Rule **MPZ-R19**, the Panel accept Ms Easton's recommendation to delete "*Controlled"* from the title to correct an error.
